# About the UCI General Catalogue

---

UNIVERSITY OF CALIFORNIA, IRVINE

2020-21 General Catalogue, Volume 54

The *UCI General Catalogue* is published annually in July by the University of California, Irvine, University Editor's Office, 215 Aldrich Hall, Irvine, CA 92697-4975.

The *UCI General Catalogue* constitutes the University of California, Irvine's document of record. While every effort is made to ensure the correctness and timeliness of information contained in the *Catalogue*, the University cannot guarantee its accuracy. Changes may occur, for example, in course descriptions; teaching and administrative staff; curriculum, degree, and graduation requirements; and fee information. Contact the individual academic program or administrative office for further information.

---

## Additional Catalogue Information

Because the *UCI General Catalogue* must be prepared well in advance of the year it covers, changes in some programs and courses inevitably will occur. The selection of courses to be offered each quarter is subject to change without notice, and some courses are not offered each year. The *Schedule of Classes*, available on the University Registrar's website (<http://www.reg.uci.edu/>) at shortly before registration begins each quarter, provides current information about course offerings, instructors, hours, and more. Students should consult the appropriate academic unit for even more up-to-date information. (Admission to UCI does not guarantee enrollment in any particular course.)

## Course Listings

Undergraduate courses are classified as lower-division (numbered 1–99) and upper-division (numbered 100–199). Courses numbered 200 and above are graduate or professional courses. Lower-division usually refers to freshman-sophomore courses, upper-division to junior-senior courses. However, junior and senior students may take lower-division courses, and freshmen and sophomores may normally take upper-division courses when upper-division standing is not a prerequisite and when any other prerequisites have been met. A course has no prerequisites unless indicated.

Some courses are structured as three-quarter sequences, such as 1A-1B-1C; *except as noted, each course in a sequence is prerequisite to the one following*. The letter L following a number usually designates a laboratory course. The letter H preceding a number designates an honors course.

The '4 Units' designation following the course title indicates the quarter unit credits toward graduation. Some courses give other than four units of credit; for example, two, five, or a range from one to 12.

When a course is approved for satisfaction of the UCI general education (GE) requirement, the general education category is indicated by a Roman numeral in parentheses at the end of the description. Courses approved to fulfill the upper-division writing requirement are designated with the letter W following the course number and the GE symbol **(Ib)** following the course description.

## Course Terms Definitions

**Concurrent Courses** - Concurrent courses are those that are offered at the same time and place, with the same instructor, but credit is given at two levels: graduate and undergraduate. In the Catalogue, concurrent courses can be found under the course description of the course. For example, PHYSICS 100 is concurrent with PHYSICS 229A. Under the course description for PHYSICS 100, it states the following: "Concurrent with PHYSICS 229A."

**Overlaps** – When a course includes a substantial amount of material that is also covered in a different UCI course, the courses will be considered "overlaps" of one another. When a course is identified as overlapping with another, students may not receive credit for both courses. Therefore, students who earn a passing grade in one course will not receive credit if they later take the overlapping course, and students who earn a non-passing grade in a course with an overlap should not repeat that course with the overlapping course. In the Catalogue, an overlapping course appears under the course description of the course. For example, EARTHSS 17 overlaps with PUBHLTH 90. Under the course description for EARTHSS 17, it states the following: "Overlaps with PUBHLTH 90."

**"Same as" or Cross-Listed Courses** - A cross-listed course is one course that is offered at the same time and place with the same instructor, and appears under more than one department name. In the Catalogue, a cross-listed course appears as "Same as" under the course description. For example, BIO SCI 14 is cross-listed with PHY SCI 5. Under the course description for BIO SCI 14, it states the following: "Same as PHY SCI 5."

One course can be cross-listed up to three times, which in total would be four department names for one course.

## Where to Find:

### Courses

View all of the University's course offerings, organized by subject matter, here.

To view courses offered by a particular School, Department, or Program, select a School or Program here. Then, click on the tab labeled “Courses” at the top of the page, under the banner image.

### **Admissions Information**

For information for prospective students, including undergraduate and graduate admissions, transfer student services, financial aid, tuition, and more, visit the Information for Prospective Students section.

### **Information on a Specific Degree, Major, or Minor**

View Undergraduate Degrees and/or Graduate Degrees. Or, view a page with all degrees in one table.

You can also search by the degree or program name via the search bar on any Catalogue page.

### **A Previous Edition of the *General Catalogue***

Previous editions of the *General Catalogue* can be found in the *Catalogue* archive. Most previous *Catalogue* editions are available, however, if you don't see the edition you need on the list, send an email to [aehassan@uci.edu](mailto:aehassan@uci.edu) (%20aehassan@uci.edu).

### **A Hard Copy of the *Catalogue***

UCI stopped printing hard copies of the *General Catalogue* in 2011. If you're looking for a *Catalogue* page from a previous year, and you don't want the online version, you can download a PDF. View the *General Catalogue* archive.

### **Contact Us**

To report a correction, broken link(s), or submit a question or suggestion, please email the University Editor ([aehassan@uci.edu](mailto:aehassan@uci.edu)), or call 949-824-5600.

## The University of California

The University of California (UC) was chartered as the state's only land grant college in 1868. Today, UC is one of the world's largest and most renowned centers of higher education and has a combined enrollment of more than 275,000 students on 10 campuses—Berkeley, Davis, Irvine, Los Angeles, Merced, Riverside, San Diego, San Francisco, Santa Barbara, and Santa Cruz. Among the campuses there are six medical schools, a school of veterinary medicine, and professional schools of business administration, education, engineering, law, oceanography, and many others. The collections of the more than 100 UC libraries are surpassed in size on the American continent only by the Library of Congress collection.

The UC faculty is internationally noted for its distinguished academic achievements. UC-affiliated faculty and researchers have won 63 Nobel Prizes and more than 60 National Medals of Science. National Academy of Sciences membership exceeds 350 and Institute of Medicine membership exceeds 160. UC creates an average of four new inventions every day, and for 15 years in a row has developed more patents than any other university in the country.

UC maintains a variety of research facilities, agricultural field stations, and extension centers in more than 100 locations throughout California. Public services include medical and dental clinics, information services for agricultural and urban populations, a broad program of continuing education, museums and art galleries, and more. Detailed information about the University of California's teaching, research, and public service mission is available at the University of California website (<http://www.universityofcalifornia.edu/>).

## The Irvine Campus

### Howard Gillman, Chancellor

The University of California, Irvine (UCI) opened in 1965 with 116 faculty and 1,589 students. Since then, UCI programs, faculty and graduates have achieved distinction in virtually every discipline.

Two Nobel Prizes in 1995 for founding faculty F. Sherwood Rowland in Chemistry and Frederick Reines in Physics helped to secure UCI's position among the leading American research universities. In 2004, Irwin A. Rose, Department of Physiology and Biophysics, became UCI's third Nobel Laureate (chemistry). UCI has been ranked prominently alongside much older universities for excellence in the arts and humanities, Earth system science, management, social sciences, technology, and information systems.

For quality of educational experience and caliber of faculty, UCI consistently ranks among the nation's best public universities, and among the top research universities in the world. Election to the American Association of Universities (AAU), a group of 62 of the most distinguished research institutions, is another indication of UCI's stature in the academic community.

As a research university, UCI challenges students at every level, both academically and personally. While research is critical to graduate education, the research environment also opens up new educational experiences for undergraduates. Students have access to faculty at the forefront of their fields, and they also have opportunities to participate directly in faculty research projects. In addition, to empower students for the future in an information-focused society, UCI has integrated computer technology throughout the curriculum and campus life.

UCI is committed to the discovery and transmission of knowledge. It makes available to its 36,742 students (29,736 undergraduate and 7,006 graduate, medical, and credential students) the education, skills, and credentials which provide the basis for lifelong personal and professional growth.

UCI's education and research missions are fulfilled in its academic units, which are described briefly below, and in its formal research units, which are described in the Office of Research section.

## Claire Trevor School of the Arts

The **Claire Trevor School of the Arts** teaches the creative as well as the academic and critical dimensions of the arts. The School of the Arts is concerned with the vitality of the arts in society. Faculty energies are directed toward the refinement, enhancement, and encouragement of students' artistic and creative talents and toward the development of the students' understanding of related theory and history. The School offers programs which emphasize extensive studio and workshop experiences, essential theoretical and historical background studies, and exercises in criticism. There are 970 students in the School, including 821 undergraduate students and 149 graduate students.

## School of Biological Sciences

The **School of Biological Sciences** is one of the campus's larger academic units, with 4,287 students (3,976 undergraduate and 311 graduate). Faculty research areas include neural plasticity and behavior (which in part encompasses the development of the nervous system, memory, response to injury, and degenerative brain diseases such as Alzheimer's); the nature of cell-cell interactions; pattern formation; the elucidation of ecological conditions and evolutionary histories that have been the driving forces in organism design and functional diversity; the organization and expression of genes; biomolecular structure; molecular pathogenesis; human mitochondrial genetics; and cell biology.

## Paul Merage School of Business

The **Paul Merage School of Business** faculty conduct research and teach in the fields of accounting, economics, finance, health care management, information systems, marketing, operations and decision technologies, organization management, public policy, real estate, and strategy. Based on a thematic approach throughout the curriculum, the School focuses on three critical drivers of business growth: strategic innovation, information technology, and analytic decision making. The Merage School enrolls approximately 996 Business Administration and 144 Business Information Management undergraduate students. The Merage School also enrolls 200 students in the Full-time M.B.A. and Ph.D. programs, 137 students in four specialty one-year masters' programs: Master in Professional Accountancy, Master in Business Analytics, Master in Finance, and Master of Innovation and Entrepreneurship, and 430 students in the Fully Employed M.B.A. and Executive M.B.A. programs.

## School of Education

The **School of Education** offers an undergraduate major in Education Sciences, a minor in Education, a research-focused Ph.D. program, and MAT and credential programs for those becoming teachers. The School integrates the themes of learning, cognition, and development; educational policy and social context; and language, literacy, and technology across its programs. The faculty is multidisciplinary; their scholarly work arises from the common belief that education environments, both in and out of school, are the loci of change in the quality of life and the availability of productive life choices for learners of all ages.

## Henry Samueli School of Engineering

The **Henry Samueli School of Engineering**, with 4,787 students (3,914 undergraduate, 873 graduate), focuses on advancing the frontier of innovative engineering education and pioneering research that will shape the future of the nation and the world. Through an integrative and cross-disciplinary educational experience that blends fundamentals, research, and hands-on experience, the School trains future leaders in the engineering profession. Working in partnership with state and federal agencies and industry, the School promotes the transfer of research to applications that benefit society. The major research disciplines are aerospace, biomolecular, biomedical, chemical, civil, computer, computer science, electrical, environmental, materials science, and mechanical engineering. Research areas include biomolecular, biomedical, and rehabilitation engineering, earthquake engineering, water resources, transportation, parallel and distributed computer systems, embedded systems, intelligent systems, machine learning, wireless communications and networking, image and signal processing, opto-electronic devices and materials, high-frequency devices and systems, integrated micro and nanoscale systems, green energy, fuel cell technology, fluid mechanics, combustion and jet propulsion, materials processing, robotics, and modern control theory.

## School of Humanities

The **School of Humanities** faculty have been repeatedly honored for their teaching and scholarly excellence. Included in the faculty's more than 100 research specialties are literary criticism, studies in film, media and gender, philosophical analysis, historical inquiry, art history, and world languages and literatures. The faculty also participate in interdisciplinary programs such as Global Cultures, Global Middle East Studies, Medical Humanities, Humanities and Law, and Religious Studies. At the core of the educational mission of the humanities is imparting to students tools of analysis that will help them interpret, understand, describe, and explain the world around them. The School has approximately 1,900 students - 1,600 undergraduate and 300 graduate.

## Donald Bren School of Information and Computer Sciences

The **Donald Bren School of Information and Computer Sciences** (ICS) has grown to almost 4,000 students (3,427 undergraduate and 570 graduate students). ICS faculty members are engaged in research (<http://www.ics.uci.edu/faculty/area/>) and teaching in computer science, information technology, and statistics. Specific areas of faculty research include: design of algorithms and data structures; computer architecture and embedded computer systems; networked and distributed systems; systems software; social and mobile computing; artificial intelligence, machine learning, and data mining; computer games and virtual worlds; databases and information retrieval; computer graphics and visualization; bioinformatics, computational biology, and genomics; computer-supported cooperative work, human-centered computing, and human-computer interaction; security and privacy; software engineering; managerial and social aspects of computing technology; and statistics.

## Interdisciplinary Studies

**Interdisciplinary Studies** programs provide students with opportunities to pursue subject areas which derive from the interaction of different disciplines such as Computer Science and Engineering, Civic and Community Engagement, and Transportation Science.

## School of Law

The University of California, Irvine School of Law is the culmination of several generations of revolutionary dreamers. Those not satisfied with the status quo who wanted to redefine, reimagine and reinvent legal education. Celebrating its 10th anniversary in 2018, the University of California, Irvine School of Law begins its second decade a larger, stronger, more dynamic academic institution than its founders could have ever imagined. UCI Law provides an innovative and comprehensive curriculum, and prioritizes public service and a commitment to diversity within the legal profession. UCI Law students have completed more than 80,000 hours of pro bono work in the past decade. Forty-five percent of UCI Law's graduates are students of color. The collaborative and interdisciplinary community at UCI Law includes extraordinary students, world-renowned faculty, engaged alumni, and enthusiastic supporters. UCI Law continues to rank highly, including: The National Jurist ranks UCI Law No. 4 in the nation for practical training; U.S. News & World Report ranks UCI Law No. 21 in the nation overall out of 194 law schools, and ranks UCI Law's robust clinical program No. 13 in the nation. We look forward to continuing our remarkable journey with our faculty, staff, students, alumni and community partners.

The **School of Law** welcomed its inaugural class of 60 students in August 2009, graduated its first class in May 2012, and received full accreditation by the American Bar Association in June 2014. The School offers the J.D. (Juris Doctor) degree. The curriculum includes traditional areas of legal doctrine taught in an innovative context designed to prepare students for the practice of law in the 21st century. The School of Law also offers the Master of Laws (LL.M) degree program. The LL.M. program offers a first-rate legal education to lawyers, judges, government officials and others wishing to become educated about the legal system and practice of law in the United States. The School's concurrent degree programs (J.D./M.B.A., J.D./M.A., and J.D./Ph.D.) connect UC Irvine's legal education with the wide range of academic and professional opportunities at a major research university.

## School of Medicine

The **School of Medicine**, with roughly 135 graduate students, 480 medical students, and 700 residents and fellows, is dedicated to advancing medical knowledge and clinical practice through scholarly research, physician education, and high-quality care; nurturing the development of medical students, resident physicians, and scholars in the clinical and basic sciences; and supporting the dissemination of research advances for the benefit of society. On the UCI campus, a state-of-the-art Medical Education building offers the latest in technology to advance active, small group learning opportunities. The UCI Medical Center located in Orange, CA, and part of the UCI Health system, offers modern facilities for conducting medical research and training future and practicing physicians, allowing more opportunities for researchers and clinicians to collaborate on patient care.

## Sue and Bill Gross School of Nursing

The **Sue and Bill Gross School of Nursing** provides a strong research-based academic and professional program to prepare graduates for basic clinical and advanced practice roles, as well as for educational, administrative, and research positions across the healthcare delivery system, and for faculty positions in academic institutions. The School has 175 undergraduate and 47 graduate students.

## Department of Pharmaceutical Sciences

The **Department of Pharmaceutical Sciences**, founded in 2007, offers its students interdisciplinary educational programs integrating concepts from fields as diverse as biology, chemistry, cell and molecular biology, chemical engineering, materials science, pharmaceuticals, pharmacology, and physiology. Its faculty includes world-renowned scientists encompassing a variety of backgrounds with wide-ranging research programs that cover every facet of pharmaceutical research.

## School of Physical Sciences

The **School of Physical Sciences** has a student body of 3,014 (2,469 undergraduate and 545 graduate). Researchers in the School are conducting investigations in atmospheric chemistry (including the discovery of the adverse impact of human-made chlorofluorocarbon compounds on the Earth's ozone layer), biogeochemistry and climate, synthetic chemistry, laser spectroscopy, condensed matter physics, elementary particle physics, plasma physics, pure and applied mathematics, and mathematical physics.

## Program in Public Health

The **Program in Public Health** provides institutional focus for UC Irvine's academic strengths in various disciplines of public health including population health science. The core of this program is interdisciplinary and focuses on the facilitation and integration of well-grounded education, innovative research and skills based practice. The Program in Public Health consists of the Department of Population Health and Disease Prevention and will be joined in the 2020-2021 academic year by the new Department of Environmental and Occupational Health, the new Department of Health, Society and Behavior, and the Department of Epidemiology and Biostatistics. Under the Program, these four departments will advance the mission of health and well-being, locally, nationally and globally. Currently, the Program has 1291 undergraduate and 85 graduate students (M.P.H., Ph.D.).

## School of Social Ecology

The **School of Social Ecology**, a multidisciplinary unit established in 1970, is unique to UCI. The School's central objectives are the application of scientific methods to the analysis and resolution of societal problems, and the development of theory and knowledge pertinent to social, behavioral, environmental, and legal phenomena. Among issues of long-standing interest are crime and justice in society, social influences on human development

over the life cycle, urban and community planning, and the effects of the physical environment on health and behavior. There are 3,479 students in the School, including 3,205 undergraduate and 274 graduates.

## School of Social Sciences

The **School of Social Sciences**, with 6,899 students (6,440 undergraduate and 459 graduate), is the largest academic unit at UCI. The faculty, many of whom are nationally recognized, have expertise in a wide range of specific social science topics. Research areas include mathematical modeling of perception and cognitive processes; economic analysis of transportation; examination of the impact of society's political system on its economy; study of social structure and values in different cultures through a rigorous scientific methodology; exploration of authority structures and inequality in society; and globalization and international affairs.

## Academic Goals

UCI offers programs designed to provide students with a foundation on which to continue developing their intellectual, aesthetic, and moral capacities. Programs and curricula are based on the belief that a student's collective university experience should provide understanding and insight, which are the basis for an intellectual identity and lifelong learning.

An important aspect of UCI's educational approach is the emphasis placed on student involvement in research, independent study, and the creative process as complements to classroom study. Independent research in laboratories, field study, participation in writing workshops, and in arts productions are normal elements of the UCI experience. Many departments integrate into the curriculum special programs and courses which involve students in original research and creative activities.

UCI provides an inclusive atmosphere conducive to pursuing creative work and scholarship at all levels, to exploring the accumulated knowledge of humanity, and to developing new knowledge through basic and applied research. Along with these objectives, UCI has a serious commitment to public service. The campus generates research expertise that it applies to regional, national, and global challenges, and engages in humanistic inquiry to address societal problems.

## Academic Structure

UCI's instruction and research programs focus on fundamental areas of knowledge and, at the same time, provide for interdisciplinary and professional study through the Claire Trevor School of the Arts, School of Biological Sciences, The Paul Merage School of Business, School of Education, The Henry Samueli School of Engineering, School of Humanities, Donald Bren School of Information and Computer Sciences, Interdisciplinary Studies, School of Law, School of Medicine, Sue and Bill Gross School of Nursing, Department of Pharmaceutical Sciences, School of Physical Sciences, Program in Public Health, School of Social Ecology, and School of Social Sciences.

The Provost & Executive Vice Chancellor has responsibility for all programs of instruction and research. The Vice Provost for Teaching and Learning serves as the Dean of Undergraduate Education, and the Vice Provost for Graduate Education serves as the Dean of the Graduate Division. Matters of educational policy, courses, and grades are the responsibility of the Irvine Division of the Academic Senate. The Academic Senate and the Vice Provost for Academic Planning oversee academic program reviews and approvals.

## UCI Student Affairs

UCI Student Affairs (<http://studentaffairs.uci.edu/>) supports the university's academic mission from orientation through graduation and beyond. The Division of Student Affairs offers comprehensive programs and services preparing students to be leaders in a global society by advancing co-curricular learning, enhancing student life, fostering student leadership and promoting the general welfare of the campus community. Student Affairs' 30+ departments are clustered under the Vice Chancellor, Student Affairs into Auxiliary Services, Student Life & Leadership and Wellness, Health & Counseling Services creating an alignment that lends to UCI's "small college feel" within a large, dynamic research university.

## The Division of Undergraduate Education

The Division of Undergraduate Education (<http://home.due.uci.edu/>) provides leadership, advocacy, and coordination for campus initiatives that impact undergraduate education and enhance student access and retention. The Division works with faculty and staff on a range of activities including advising, curricular development, undergraduate scholarship and research activities, international education, civic and community engagement, assessment, and effective instruction.

## Graduate Division

The Graduate Division (<http://www.grad.uci.edu/>) serves as the campuswide advocate for the advancement of graduate education and oversees all master's and doctoral programs, postdoctoral training programs, and the postbaccalaureate teacher credential program. The Graduate Division has a leadership role with UCI's academic units and provides implementation guidelines and procedures related to university policy as it affects the interconnected aspects of graduate student education, including admissions, student financial support and fellowships, enrollment and registration, academic standards, requirements for graduate degree programs, student services, professional development, and diversity programs.

The Division of Undergraduate Education (<http://home.due.uci.edu/>) and the Graduate Division (<http://www.grad.uci.edu/>) also administer programs and services affecting undergraduate and graduate education, respectively, that require campus-level attention and coordination, and that do not come under the direct authority of the heads of academic units or the Irvine Division of the Academic Senate.

## Accreditation

UCI is a member of the Western Association of Schools and Colleges (WASC). The campus is accredited by the WASC Senior College and University Commission (WSCUC). This accreditation requires periodic review in accord with WSCUC policies and standards. UCI is pleased to participate in these comprehensive reviews as one way to demonstrate our commitment to 1) student learning and success; 2) quality and improvement; and 3) institutional integrity, sustainability, and accountability. Further information is available through the Office of Academic Planning (<http://www.provost.uci.edu/academic-planning/accreditation.html>) and at the WSCUC website (<http://www.wascsenior.org/>).

In addition

- The undergraduate degree program of the Department of Chemistry is accredited by the American Chemical Society (<https://www.acs.org/content/acs/en.html>).
- Credential programs of the School of Education are approved by the California Commission on Teacher Credentialing (<https://www.ctc.ca.gov/>).
- Undergraduate majors in Aerospace Engineering, Biomedical Engineering, Chemical Engineering, Civil Engineering, Computer Engineering, Computer Science and Engineering, Electrical Engineering, Environmental Engineering, Materials Science and Engineering, and Mechanical Engineering are accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>) <http://abet.org>. Computer Science and Engineering also is accredited by the Computing Accreditation Commission of ABET (<http://www.abet.org>) <http://abet.org>. The undergraduate major in Biomedical Engineering Premedical is not designed to be accredited; therefore, it is not accredited by ABET (<http://www.abet.org>) <http://abet.org>. Annual student enrollment and graduation data per major can be found at: <http://www.oir.uci.edu/student-data.html>.
- The master's degree program in Genetic Counseling is accredited by the Accreditation Council for Genetic Counseling (<http://www.gceducation.org/Pages/default.aspx>), which has been approved by the American Board of Genetic Counseling (<https://www.abgc.net/home/>).
- UCI's School of Law is accredited by the American Bar Association (<https://www.americanbar.org/aba.html>).
- The Paul Merage School of Business is accredited by The Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>).
- The M.D. program of the School of Medicine is accredited by the Liaison Committee on Medical Education (<http://lcme.org/>).
- Baccalaureate and master's degrees in the Sue and Bill Gross School of Nursing Science are accredited by the Commission on Collegiate Nursing Education (<http://www.aacnnursing.org/CCNE/>). The pre-licensure RN program and the nurse practitioner program are approved by the California Board of Registered Nursing (<http://www.m.ca.gov/>). The DNP program, begun in fall 2018, is progressing through BRN and CCNE approval processes in 2019 and 2020, as required by those organizations.
- The Program in Public Health, including its baccalaureate, master's, and Ph.D. programs in Public Health, is accredited by the Council on Education for Public Health (<https://ceph.org/>).
- UCI's Master of Urban and Regional Planning program is accredited by the Planning Accreditation Board (<http://www.planningaccreditationboard.org/>).

## Office of Equal Opportunity and Diversity

The Office of Equal Opportunity and Diversity (OEOD) provides consultation services and training programs to the UCI campus and the medical center on the interpretation and application of UCI policies and Federal and State laws regarding sexual harassment, sex offense, discrimination, disability access and accommodation, and equal opportunity. It also develops and monitors UCI's Affirmative Action Plan for staff and faculty as required by Federal regulations.

OEOD investigates and provides assistance to UCI students, faculty, staff, applicants, patients, and visitors in resolving complaints of discrimination, nonaccommodation, sexual harassment, and sex offense. OEOD also offers a variety of workshops on the prevention of discrimination, sexual harassment and sex offense, conflict resolution, and accessibility considerations in a diverse workplace/community to promote equal opportunity and provide support for the university's commitment to diversity, equity, and advancement of inclusive excellence.

OEOD is located in 103 Multipurpose Science and Technology Building; telephone 949-824-5594 (voice), 949-824-7593 (TDD); email: [oeod@uci.edu](mailto:oeod@uci.edu); or visit the Office of Equal Opportunity and Diversity website (<http://www.oeod.uci.edu>).

Refer to the *Catalogue's* Appendix for UCI's Nondiscrimination and Sexual Harassment Policy Statements and Sex Offenses and Consensual Relationships Policies.

## Office of the University Ombudsman

The Office of the University Ombudsman receives complaints, concerns, or problems that students, faculty, staff, and visitors may encounter on the UC Irvine campus. The office is an informal resource. Users of the office are provided a confidential place to explore options to make informed decisions.

When appropriate, the office will initiate an informal intervention with the goal of facilitating or negotiating a resolution that is acceptable to all parties involved.

The Ombudsman acts as an independent, impartial, and confidential problem solver. The office advocates for fairness and equity. If a matter cannot be resolved through the office, the appropriate referral will be made. The Office of the Ombudsman does not replace or substitute for formal grievance, investigative, or appeals processes made available by the university. The office does not have the authority to make decisions or decide policy. However, the office can elevate legitimate matters or concerns to decision makers when appropriate. In addition, the Ombudsman can make recommendations regarding policy review and change as appropriate.

The Office of the Ombudsman also manages the Campus Mediation Program which provides alternative dispute resolution services to the campus and UC Irvine Medical Center communities. The office is located in 205 Multipurpose Science and Technology Building; telephone 949-824-7256. For more information about the office, visit the Office of the Ombudsman (<http://www.ombuds.uci.edu/>) and the Campus Mediation Program websites (<http://www.mediate.uci.edu/>).

## The Campus Setting

UCI's location combines the cultural and economic resources of an urban area with access to Southern California's spectrum of recreational, scenic, and entertainment venues.

Fifty miles south of Los Angeles, five miles from the Pacific Ocean, and nestled in 1,474 acres of coastal foothills, UCI lies amid rapidly growing residential communities and the dynamic international business environment of Orange County and the surrounding region.

The famed sailing and surfing beaches of Newport, Laguna, and Huntington are a short bike ride from campus, while hiking trails, desert camping, and mountain resorts for snowboarding and skiing are within two-hour's travel distance from Irvine. The campus itself is a natural arboretum of native species, as well as of trees and shrubs from all over the world. Adjacent to the campus, the San Joaquin Marsh serves as a natural classroom or peaceful refuge, with trails for viewing the rich diversity of wildlife.

A full roster of intramural sports and recreation events helps fill the daily fitness needs of students, along with UCI's Anteater Recreation Center. This 115,000-square-foot, state-of-the-art facility includes a pool, gymnasiums, racquetball courts, weight room, and jogging track. UCI is an NCAA Division I campus that competes in men's and women's intercollegiate athletics.

Across Campus Drive, and linked by a pedestrian bridge, an area of shops and restaurants also features a movie theater complex, post office, and other services. Complementing UCI on-campus sports and cultural events throughout the year is the vigorous Orange County arts and entertainment environment. It offers everything from small venues for bands and performers to galleries, museums, the Irvine Barclay Theatre, Orange County Performing Arts Center, and South Coast Repertory. And within a one- to two-hour drive are the metropolitan attractions of Los Angeles and San Diego.

With plenty of land for growth, UCI is building to accommodate greater numbers of students, as well as to provide the most updated classroom and laboratory space. Recent projects include the Contemporary Arts Center, with studio, theater, and rehearsal areas; the Medical Education building, the high-tech hub of all educational activities for UCI medical students; luxury student housing complexes Camino del Sol and Puerto del Sol, and the award-winning Mesa Court Towers. On the west campus, the 180-acre UCI Research Park (UCIRP) attracts businesses that want to access the resources of a major research university and form strategic partnerships. UCIRP companies interact with UCI's academic programs, enhance the region's reputation as a center for advanced technology, and contribute to an educated workforce.

Due to the high caliber of UCI faculty and scholarship, the campus is home to national organizations including the National Fuel Cell Research Center and is a major site for the nationwide cancer genetics research network. For its range of services and research, UCI's Chao Family Comprehensive Cancer Center is Orange County's only cancer facility designated "comprehensive" by the National Cancer Institute. UCI is noted, in fact, for its strengths in cancer and neuroscience research, much of which takes place at the University of California, Irvine Medical Center. Located in the city of Orange, 13 miles to the north, the medical center is the primary teaching and research hospital for the UC Irvine School of Medicine.

Bus transportation makes travel convenient between the campus, medical center, and major housing areas, shopping centers, and recreation locales. In addition, the campus and surrounding communities are designed for bicycle traffic, with trails connecting UCI with student housing and the coast.

## Celebrate UCI

**Come to Celebrate UCI!** (<https://admissions.uci.edu/discover/visit/celebrate.php>) "One day. One campus. Many options." UCI's annual spring open house event welcomes new Anteaters, their families and the community to learn more about our renowned academics; tour our campus, housing and recreational facilities; learn more about our admissions and financial aid; enjoy student performances and more. Many academic units and student services offices will be open or available to answer questions. Events and parking are **FREE**. For more information and a schedule of events, visit the Celebrate UCI website (<https://admissions.uci.edu/discover/visit/celebrate.php>). #UCIPride #UCIYES #FutureAnteater

## University Advancement

UCI relies on the generosity of donors to achieve its mission of research, teaching and public service. University Advancement works to generate private philanthropic support for the UCI Foundation, a separate 501(c)(3) nonprofit organization created to advance the mission of the university. The Advancement team also manages the legal and fiduciary requirements associated with accepting all charitable donations to UCI through the UCI Foundation or UC Regents. Each success is accomplished through the combined efforts of professional staff, academic leaders and dedicated volunteers. Program areas include prospect development, planned giving, corporate and foundation relations, alumni relations and constituent engagement, and health advancement. Individuals in these areas provide a bridge between the university and the community, thereby promoting a culture of philanthropy and engagement. For additional information, contact University Advancement at 949-824-8696 or visit the University Advancement website (<http://advancement.uci.edu/about/>).

## UCI Alumni

Located in the Newkirk Alumni Center on the corner of University Drive and Mesa Road, the UCI Alumni Association (<https://alumni.uci.edu/>) is committed to engaging UC Irvine's more than 200,000 alumni with the campus. It sponsors many key campus events, including the annual UCI Homecoming; Lauds & Laurels Awards, the distinguished alumni awards ceremony; Anteater Meetups; networking and career events; cap and gown sales; and the senior send-off events. UCI Alumni members receive a range of access and privileges which include discounts on travel, financial and career services, online research library access, and more.

UCI Alumni also oversees the Student Alumni Association (<https://alumni.uci.edu/saa/>) at UCI, a student group that works to connect students to one another, alumni, and the university. The students help organize Dinners with Anteaters, a quarterly event that brings alumni and students together for an evening of dining and networking; What Matters to Me and Why, a quarterly event where alumni share why UCI matters to them; and Alumni Back 2 Campus, an event where alumni are interviewed by students and share valuable professional advice and personal insights into building success after graduation.

For additional information about the UCI Alumni Association and its programs, visit [alumni.uci.edu](http://www.alumni.uci.edu) (<http://www.alumni.uci.edu>), or contact us at [alumni@uci.edu](mailto:alumni@uci.edu) or 949-824-2586.

## UCIAA Club Affiliate Program

The UCI Alumni Association (<https://alumni.uci.edu/students/clubs.php>)(UCIAA) Club Affiliate Program is for registered campus organization (RCOs) interested in building and leveraging their alumni network to support professional development of their members. UCIAA strives to empower RCOs proactively and independently to connect and engage with alumni by providing applicable resources, training, and guidance. In exchange, club affiliates will further the mission of UCIAA by creating their own alumni programming and participating in UCIAA student events among other things. The Alumni Association supports club affiliates in the following ways:

1. Direct Access to UCIAA Staff
2. Alumni Outreach Support
3. Priority in the Student Alumni Engagement Sponsorship (SAES) (<https://alumni.uci.edu/saa/funding.php>)
4. Publicity and Marketing
5. Workshops and Resources
6. Event Partnership
7. Alumni Giveaways
8. Newkirk Alumni Center Room Reservations
9. Additional Funding

## Student Alumni Engagement Sponsorship

The Student Alumni Engagement Sponsorship (<https://alumni.uci.edu/saa/funding.php>)(SAES) provides funding to registered campus organizations (RCO's) that seek to promote the Student Alumni Association (<https://alumni.uci.edu/saa/>)'s values through campus events or programs. RCO's seeking to host events or programs that promote alumni engagement by creating opportunities to build connections between alumni and students are eligible to apply.

## Dinners with Anteaters

Dinners with Anteaters (<https://alumni.uci.edu/saa/dinners.php>) is a dinner program that brings students, alumni, staff, faculty, retirees and emeriti together for an evening of food, fun and mentorship throughout Orange County and Los Angeles.

Organized by the Student Alumni Association in cooperation with the UCI Alumni Association, the program began in 2003 and has since become a long-lasting Anteater tradition. Last year, the event brought more than 500+ Anteaters together to share stories and give advice over a nice warm meal.

The dinners are hosted and sponsored by Anteater volunteers (i.e. alumni, staff, faculty, etc.) either in their homes or a local restaurant. Over dinner, volunteers and students engage in casual and friendly conversation about their UCI experiences, personal journeys, career goals and more. Over the years, this program has brought together thousands of Anteaters for a fulfilling and uplifting evening.

Questions? Email [dinnerwithanteaters.uci@gmail.com](mailto:dinnerwithanteaters.uci@gmail.com).

## Strategic Communications & Public Affairs

The Office of Strategic Communications & Public Affairs advances UCI's reputation, mission, priorities and values through an integrated approach that includes the following:

- **Brand development and management**
- **Community relations**
- **Executive communications**
- **Government relations and advocacy**
- **Internal communications**
- **Marketing**
- **Media relations**
- **Publications and digital properties**
- **Visual communications**

Strategic Communications & Public Affairs is the campus's storyteller, providing information in a way that's accurate, credible, engaging, and influential. It uses a wide range of platforms to share the university's story—*UCI Magazine*; websites and social networks; university news and features in prominent media outlets; advertising and marketing materials; visual assets such as photography, videography, and graphics; as well as advocacy and community engagement—all designed to build connections with multiple constituents.

The office also develops and monitors communication policies, procedures, and standards to ensure a consistent, accurate, and appropriate presence. In addition, it provides strategy, counsel, services, and support to the university's schools, programs, and units.

For more information, call 949-824-6922 or visit the Strategic Communications & Public Affairs website (<http://www.communications.uci.edu>).

## UCI Libraries

**Lorelei Tanji, University Librarian**

General Information: 949-824-6836

<https://www.lib.uci.edu/>

Established in 1963 as one of the founding academic units on campus, the UCI Libraries connects users—faculty, researchers, scholars, students, staff, or community members—to information resources, facilitating the creation, preservation, and sharing of knowledge in all disciplines. The Libraries support the research needs of the campus and general community, through the Libraries' website and at four library facilities: the Langson Library, the Science Library, and the Libraries Gateway Study Center on the UCI campus, and the Grunigen Medical Library at the UCI Medical Center in Orange, Calif.

**Langson Library:** The Jack Langson Library supports research and teaching in the arts, humanities, social sciences, social ecology, education, and business/management.

**Special Collections and Archives:** The Department of Special Collections and Archives holds non-circulating collections of rare books, archives, manuscripts, photographs, maps, and pamphlets, emphasizing; the Critical Theory Archive; Southeast Asian Archive; Orange County Regional History

collection; the Dance and Performing Arts collections; the personal papers of distinguished UCI faculty, including Nobel Laureates; and the University Archives.

**Libraries' Gateway Study Center:** Located across the plaza from the Langson Library, the Libraries Gateway Study Center provides comfortable individual and group study areas as well as late-night study hours throughout the academic year.

**OC & SEAA Center:** On the lower plaza of the Gateway building, the Orange County and Southeast Asian Archive Center (OC & SEAA Center) holds circulating collections on these topics, has an oral history recording studio, and serves as a resource for the campus and community.

**Science Library:** The Science Library supports research and teaching in the sciences, medicine, and technology. The Multimedia Resource Center (<https://www.lib.uci.edu/mrc/>) is a technological sandbox with a diversity of tools and services to encourage experimentation, creative expression, and experiential learning.

**Grunigen Medical Library:** The Forest J. Grunigen Medical Library is located at the UCI Medical Center in Orange and serves the research, clinical, and teaching needs of the health sciences programs.

**Law Library:** Located in the Law School, the Law Library supports the research and teaching needs of the law school and others at UCI who need to use material unique to the Law Library's collection. The Law Library reports to the Dean, School of Law.

**Library Search:** Library Search is a discovery platform that provides access to the UCI Libraries' premier collections, which include nearly 3.9 million volumes, nearly 180,000 serial titles in electronic and print formats, and substantial collections of manuscripts and visual materials.

**MELVYL:** The MELVYL® Catalog, on the Libraries' website, connects users to the vast collections of the University of California library system, and the scholarly resources of the world. Expedited interlibrary loans and digital desktop delivery services help facilitate the exchange of valuable research materials between our users and the UC Libraries.

**Librarians:** Librarians with disciplinary expertise serve each academic department. They select materials for the Libraries' collection, provide specialized reference assistance to faculty, graduate students, and undergraduates, and are available to meet the research, teaching, learning, and patient care needs of the members of their liaison departments.

**Ask A Librarian:** The UCI Libraries' Ask A Librarian services provide expert in-person and online research assistance to users. Online reference services are available 24 hours a day, seven days a week. More than 13,000 people received personalized, one-on-one research consultations, and over 26,000 students attended library research workshops last year. These workshops develop students' lifelong learning skills and assist researchers to use rapidly changing information resources and technologies effectively and efficiently.

**Subject and Course Guides:** Librarians create subject guides that recommend curated resources for each academic discipline and for research intensive courses.

**Study Spaces:** Wireless access and more than 500 desktop and laptop computers are available for general use in the four library facilities. The Study Space Locator (<https://www.lib.uci.edu/study-space-locator/>) provides a convenient way to locate study spaces and identify open computer workstations in real-time.

**Virtual Tour:** The virtual tour familiarizes users with library spaces and services.

## Office of Information Technology

The Office of Information Technology (OIT) provides computing, network, and telephone services to support and enhance instruction, research, and administration at UCI. OIT provides campus email and calendaring, computer labs, departmental and research computing support, business application support, and campuswide technical coordination. The campus network infrastructure (including WiFi) maintained by OIT provides connectivity on campus and to the Internet.

UCI G Suite (<http://www.google.uci.edu/>) (formerly known as Google Apps) is a collection of services contracted from Google, including UCI Gmail and Google Drive. Incoming students are given UCI Gmail accounts as their default email service (<https://www.oit.uci.edu/help/email/>) (except students in Health Sciences, who have Microsoft Office 365 accounts). UCI Google accounts are also available to faculty and staff (outside Health Sciences), providing an effective platform for communication and collaboration.

OIT administers UCI's ecosystem of instructional technology tools, with the homegrown EEE+ GrandCentral (<https://grandcentral.eee.uci.edu/>) as the main student hub. GrandCentral will list your current courses and give you easy access to other tools, including:

- UCI Canvas: (<https://canvas.eee.uci.edu/>) Hosts course content online, including syllabi, files, quizzes, assignments, and more. Not all courses will use Canvas.
- EEE+ RapidReturn (<https://rapidreturn.eee.uci.edu/>): Receive a scanned copy of on-paper exams.
- EEE+ Evaluations (<https://evaluations.eee.uci.edu/>): Submit feedback for online instructor evaluations.

- **EEE+ EaterEvals** (<https://eaterevals.eee.uci.edu/>): Displays summaries of qualitative data from official, final instructor evaluations.
- **EEE+ ScoreShare** (<https://scoreshare.eee.uci.edu/>): Allows advisors to view students' academic progress.
- **EEE+ Scout** (<https://scout.eee.uci.edu/>): Submit responses to forms in an intuitive interface.

For assistance with these instructional technology tools, call (949)824-3113 during business hours (generally 8-11,12-5, Monday through Friday) or email [eee-support@uci.edu](mailto:eee-support@uci.edu).

**ZotPortal** (<http://portal.uci.edu/>) brings together campus tools and services in one easy-to-use, customizable place. Get the status of your courses, finals, and grades. Look up library hours, search for an available study space, and check the academic calendar for important deadlines. View and pay your ZOTBill, download tax documents, and get the latest financial aid news. Find campus announcements, news, club activities, and much more.

OIT manages computer labs distributed across campus. Lab computers offer many common applications, including Microsoft Office as well as certain mathematical software and statistics packages. Self-service printing is available in many labs. For additional details on Instructional labs, Drop-in labs, Training labs, the lab printing system, Mobile Printing and PC Availability, visit the OIT Computer Labs website (<http://www.oit.uci.edu/labs/>).

The Virtual Computer Lab (VCL) (<http://www.oit.uci.edu/labs/vcl/>) allows UCI students, faculty, and staff to access university-licensed computer applications via the Internet. Certain software is available free or at a discount to UCI students through campus-wide contracts. Visit our Service Portal at <https://uci.service-now.com/sp> (<https://uci.service-now.com/sp/>) and type "Student" in the search bar at the top. In the results page, you'll find links to the software available.

OIT provides media services including a lecture capture and media management service branded UCI Replay (<http://catalogue.uci.edu/introduction/file:///C:/Users/Lyle/Documents/OIT/replay.uci.edu>). Replay uses the YuJa enterprise video platform to allow instructors and staff to easily record classes, presentations, or other short instructional videos, and to allow students to capture, upload, and share academically related media clips.

OIT Classroom Technology Support (<http://catalogue.uci.edu/introduction/file:///C:/Users/Lyle/Documents/OIT/classrooms.uci.edu>) (CTS) manages, maintains, and refreshes instructional technology in 136 general assignment classrooms, consults on new room renovations, supports audience response systems, and operates a will-call equipment rental service for faculty, departments, and registered campus organizations. OIT CTS can be reached at 949-824-8833 or email [smartclassrooms@uci.edu](mailto:smartclassrooms@uci.edu).

**Residential Network Services** (<http://resnet.uci.edu/>) provides a range of services to student residents including service desk, field support, security, network engineering, and the cable TV system.

IT Security and Privacy are vital concerns. To protect yourself and your work, find advice and support at the IT Security website (<http://security.uci.edu/>).

**ZotALERT** (<https://www.oit.uci.edu/zotalert/>) is an emergency alert system that uses cell phone text messaging to quickly notify the UCI community with safety information. It is one of several modes of emergency communication used at UCI.

OIT offers a variety of additional services, detailed on the OIT website (<http://www.oit.uci.edu/>). Information about applications and services can also be found in the Help Center (<https://www.oit.uci.edu/help/>) and the OIT Knowledge Base ([https://uci.service-now.com/sp/?id=kb\\_view](https://uci.service-now.com/sp/?id=kb_view)), a searchable collection of articles on specific topics (UCInetID login required). The OIT Service Desk offers walk-in support in Aldrich Hall during business hours and 24/7 telephone support at 949-824-2222. For assistance, please call 949-824-2222 or email [oit@uci.edu](mailto:oit@uci.edu).

## UCI Ecological Preserve

The UCI Ecological Preserve is one of four natural assets overseen by UCI-NATURE. UCI-NATURE offers UC Irvine's faculty and students opportunities to bring their research, scholarship, teaching, public service, and developing careers out into the natural environment in a wide diversity of settings characteristic of California. Together, these field-based assets span regional gradients across environments from the ocean to the desert, as well as a diversity of societal contexts, all within a few hours of campus. The place-based focus fosters excellence in research and scholarship, tangible interdisciplinary interactions, and community-based partnerships that engage our faculty and students in meaningful real-world problems.

The 62-acre UCI Ecological Preserve is located on campus and consists of several small hills and drainage's bearing remnants of coastal sage scrub flora and associated fauna, including the California gnatcatcher (Federally listed as Threatened) and the coastal cactus wren. The property is protected under the Natural Communities Conservation Plan and is part of the Nature Reserve of Orange County (<https://oconconservation.org/>). For more information contact UCI-NATURE Administrative Director Megan Lulow at [mlulow@uci.edu](mailto:mlulow@uci.edu), or Faculty Advisors Travis Huxman [thuxman@uci.edu](mailto:thuxman@uci.edu) and Peter Bowler, [pabowler@uci.edu](mailto:pabowler@uci.edu).

## Steele/Burnand Anza-Borrego Desert Research Center

The Steele/Burnand Anza-Borrego Desert Research Center is one of four natural assets overseen by UCI-NATURE. UCI-NATURE offers UC Irvine's faculty and students opportunities to bring their research, scholarship, teaching, public service, and developing careers out into the natural environment in a wide diversity of settings characteristic of California. Together, these field-based assets span regional gradients across environments from the ocean to the desert, as well as a diversity of societal contexts, all within a few hours of campus. This system of assets available to UC Irvine's faculty and students is connected on yet a larger scale to the system-wide UC Natural Reserve System (<http://ucnrs.org/>). The place-based focus fosters

excellence in research and scholarship, tangible interdisciplinary interactions, and community-based partnerships that engage our faculty and students in meaningful real-world problems.

The Steele/Burnand Anza-Borrego Desert Research Center, adjacent to the town of Borrego Springs, includes approximately 80 acres, with a large historic clubhouse that serves as home base for researchers and students. Through a cooperative agreement with California State Parks and the Anza-Borrego Foundation, the Research Center offers access to California's largest state park. The 615,000-acre Anza-Borrego Desert State Park encompasses native fan palm oases and piñon pine-juniper forests, and is home to the endangered desert bighorn sheep. The Research Center encourages the study of current and future environmental and societal challenges in the region and supports scholarship across disciplines. For further information, visit <http://anzaborrego.ucnrs.org> (<http://anzaborrego.ucnrs.org/>).

## UCI Arboretum and Herbarium (IRVC)

The UCI Arboretum is a botanical garden developed and managed by the School of Biological Sciences. It contains areas planted with floras adapted to climates similar to those of Southern California and maintains a large collection of plants native to Southern California and Baja California, as well as South African monocots. The Arboretum provides materials and space for research and teaching needs and its collections are also used as an educational resource for the community at large. The UCI Herbarium (<http://arboretum.bio.uci.edu/plant-exhibits/herbarium/>) (IRVC) curates ca. 35,000 vascular plant specimens and is a part of the Arboretum. For further information call 949-824-5833 or contact Rebecca Crowe, Nursery Manager at [rcrowe@uci.edu](mailto:rcrowe@uci.edu) and Peter Bowler, Faculty Advisor at [pabowler@uci.edu](mailto:pabowler@uci.edu).

## Laser Microbeam and Medical Program

The Laser Microbeam and Medical Program (LAMMP) is a Research Center formerly funded by the National Institute of Biomedical Imaging and Bioengineering (NIBIB) at the National Institutes of Health. Located within the Beckman Laser Institute and Medical Clinic at UCI, LAMMP is dedicated exclusively to the use of lasers and optics in biology and medicine. LAMMP supports activities in technological research and development, collaborative research, and training/dissemination. LAMMP research and technology development is based on fundamental light-tissue interaction mechanisms. The LAMMP program also emphasizes “translational” research by rapidly moving basic science and technology from “benchtop to bedside.” Additional information is available at the Laser Microbeam and Medical Program website (<http://www.bli.uci.edu/research/>) or from the LAMMP Coordinator at 949-824-2251.

## UC Irvine Health

UC Irvine Health is committed to providing the highest quality healthcare to more than 3 million people in Orange County, western Riverside County, and southeast Los Angeles County.

UC Irvine Medical Center is Orange County's only university hospital and features more than 600 specialty and primary care physicians. The medical center offers a full scope of acute- and general-care services including cardiac surgery, cancer, digestive disease, neurosurgery, and trauma. *U.S. News & World Report* consistently lists UC Irvine among “America's Best Hospitals.” Since 2001, the publication has bestowed national recognition on UC Irvine Health programs in urology, gynecology, geriatrics, cancer, digestive disorders, kidney disease, orthopedic surgery and ear, nose, and throat. It was only the third hospital in California and the first in Orange County to receive Magnet Designation for nursing excellence. It is the county's first Joint Commission-designated Comprehensive Stroke Center, an advanced certification reserved for hospitals able to receive and treat the most complex stroke cases.

Located in the city of Orange, 13 miles from the UC Irvine campus, UC Irvine Medical Center has 417 beds and is the principal teaching hospital for the UC Irvine School of Medicine. As part of its focus on family and preventive health, the medical center has additional patient care locations in Anaheim, Irvine, the UCI campus, Costa Mesa, Tustin, Orange, Yorba Linda, Placentia, Santa Ana, and in Riverside and San Bernardino counties.

UC Irvine Medical Center houses a 24-hour emergency department and is designated as Orange County's only Level I trauma center—the most comprehensive for the treatment of life-threatening injuries—and Level II pediatric trauma center. Specialists are available for the expert management of high-risk pregnancies, and critically ill newborns are cared for in the county's most sophisticated Level III neonatal care unit.

The medical center is also home to the Chao Family Comprehensive Cancer Center, the only facility in Orange County designated as a comprehensive cancer center by the National Cancer Institute. It offers patients a full range of cancer therapies, including leading edge clinical trials, immunotherapy, radiation oncology, and minimally invasive surgery. It is one of only 48 comprehensive cancer centers in the country.

In March 2009, UC Irvine Health Douglas Hospital opened at UC Irvine Medical Center. A modern facility for the 21st century, the hospital features the latest medical and surgical technology for the delivery of world-class care as well as top training programs for future physicians. The seven-story hospital has a 45-bed regional neonatal intensive care unit, 21 high-tech operating rooms, the county's only regional burn center and advanced interventional procedure rooms. Private patient rooms emphasize individualized care and permit family members to stay overnight.

For additional information visit the UC Irvine Health website (<http://www.ucirvinehealth.org>).

## UCI Center for Occupational and Environmental Health

In 1980, the University established occupational health centers in Northern and Southern California for the purpose of training occupational health professionals, conducting research on occupational health issues, and providing clinical evaluation and services to employers and workers/patients. During the early 1990s, the mandate was expanded to include environmental health issues. The Centers have strong ties to the UC Schools of Medicine, Nursing, and Public Health.

The Irvine Center is comprised of UCI academic faculty and health professionals. Faculty research is concerned with identification of causal association between disease and occupational or environmental exposures with an emphasis on prevention of occupational and environmental disease and injury. The Center's primary areas are occupational and environmental medicine, toxicology, epidemiology, and environmental health sciences. The Center includes a consulting clinic in Irvine, a specialty clinic at the UCI Medical Center, facilities for research and teaching in epidemiology and toxicology, and study space for residents in occupational medicine and graduate students in environmental health sciences. For additional information, call 949-824-8641 or visit the Center for Occupational and Environmental Health website (<http://catalogue.uci.edu/introduction/%20http://www.coeh.uci.edu/>).

## Additional Facilities

Information about many other UCI research and instructional facilities and programs is available in the academic unit sections and the Office of Research section of this *Catalogue*, as well as at the Office of Research Centers and Institutes website (<http://www.research.uci.edu/centers/>).

# Academic Calendar

## Fall Quarter, 2020

Event	Date(s)
Quarter Begins	Sep. 28 (Mon.)
Academic Advising and Orientation	Sep. 28-30 (Mon.–Wed.)
Instruction Begins	Oct. 1 (Thu.)
Veterans' Day Holiday	Nov. 11 (Wed.)
Thanksgiving Holiday	Nov. 26–27 (Thu.–Fri.)
Instruction Ends	Dec. 11 (Fri.)
Final Examinations	Dec. 12–18 (Sat.–Fri.)
Quarter Ends	Dec. 18 (Fri.)
Winter Administrative Recess	Dec. 24–Jan. 3 (Thu.–Sat.)

## Winter Quarter, 2021

Event	Date(s)
Quarter Begins	Jan. 4 (Mon.)
Instruction Begins	Jan. 4 (Mon.)
Martin Luther King Jr. Holiday	Jan. 18 (Mon.)
Presidents' Day Holiday	Feb. 15 (Mon.)
Instruction Ends	Mar. 12 (Fri.)
Final Examinations	Mar. 13–19 (Sat.–Fri.)
Quarter Ends	Mar. 19 (Fri.)

## Spring Quarter, 2021

Event	Date(s)
Quarter Begins	Mar. 24 (Wed.)
Cesar Chavez Day Holiday (Observed)	Mar. 26 (Fri.)
Instruction Begins	Mar. 29 (Mon.)
Memorial Day Holiday	May 31 (Mon.)
Instruction Ends	Jun. 4 (Fri.)
Final Examinations	Jun. 5–10 (Sat.–Thu.)
Quarter Ends	Jun. 11 (Fri.)
Commencement	Jun. 11–14 (Fri.–Mon.)

## Summer Sessions, 2021

Event	Date(s)
Session I	Jun. 21–Jul. 28 (Mon.–Wed.)
10–Week Session	Jun. 21–Aug. 27 (Mon.–Fri.)
Independence Day Holiday (Observed)	Jul. 5 (Mon.)
Session II	Aug. 2–Sep. 8 (Mon.–Wed.)
Labor Day Holiday	Sep. 6 (Mon.)

Calendar updates, detailed information on registration procedures and late charges, and the School of Law academic calendar are available on the University Registrar's website (<http://www.reg.uci.edu>). The M.D. program academic calendar is available at the School of Medicine (<http://www.meded.uci.edu/>).

# All Courses

---

For more information on course listings and for definitions of course terms, visit the [About](#) page.

## Academic English and ESL (AC ENG)

### Courses

#### **AC ENG 20A. Academic Writing. 5 Units.**

Grammar, sentence structure, paragraph and essay organization of formal written English.

Prerequisite: Placement into AC ENG 20A.

Grading Option: Pass/no pass only.

#### **AC ENG 20B. Academic Writing. 5 Units.**

Grammar, sentence structure, paragraph and essay organization of formal written English.

Prerequisite: AC ENG 20A. Placement into AC ENG 20B is also accepted.

Grading Option: Pass/no pass only.

#### **AC ENG 20C. Essentials of Academic Writing. 5 Units.**

Grammar, sentence structure, paragraph and essay organization of formal written English.

Prerequisite: AC ENG 20B. Placement into AC ENG 20C is also accepted.

Grading Option: Pass/no pass only.

#### **AC ENG 20D. Academic Writing. 5 Units.**

Grammar, sentence structure, paragraph and essay organization of formal written English.

Prerequisite: AC ENG 20C

Grading Option: Pass/no pass only.

#### **AC ENG 22A. Academic English Reading and Vocabulary. 2 Units.**

Intensive reading exercises with occasional practice in extensive reading, focusing on comprehension, development of vocabulary, syntax, rhetorical features, reading strategies, and study skills.

Prerequisite: Placement into AC ENG 22A is required.

#### **AC ENG 22B. ESL Reading and Vocabulary. 2 Units.**

Extensive reading and discussion with emphasis on journal articles, textbook chapters, notetaking, and the interpretation of charts, diagrams, tables, and figures.

Grading Option: Pass/no pass only.

#### **AC ENG 23A. ESL Pronunciation I. 2 Units.**

Designed for international graduate students. Provides an emphasis on pronunciation. Development of listening and speaking skills in five fundamental areas: pronunciation, intonation, word stress, listening comprehension, and informal campus communication. Presentations of personal experiences and reports on graphs.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

#### **AC ENG 23B. ESL Conversation II. 2 Units.**

Designed for international graduate students. Provides an emphasis on conversational fluency. Further development of listening and speaking skills: review of English sounds, sentence stress, and rhythm. Oral reports, debates, and reports on graphs and surveys.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**AC ENG 23C. ESL Advanced Communication III. 2 Units.**

Designed for international graduate students with advanced communication skills. Further development of listening and speaking skills: review of minimal pairs, consonant blends, intonation, stress and rhythm. Oral presentations emphasized utilizing graphs, syllabi, academic terms, and video presentations on academic work.

Prerequisite: AC ENG 23A or AC ENG 23B

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**AC ENG 24. ESL International TA Workshop. 2 Units.**

Designed for advanced-level international students preparing to be teaching assistants. Provides extensive practice in oral and written communication skills associated with teaching introductory-level college courses and participating in academic presentations and discussions. Review and analysis of language problems.

Prerequisite: AC ENG 23A or AC ENG 23B or AC ENG 23C

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**AC ENG 28. Grammar. 2-4 Units.**

A full review of English grammar covering the following areas: grammar terms, verb tenses, verb forms, conditionals, passive and word forms, punctuation, sentence structure. The concepts are applied in targeted sentence and paragraph writing practice.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**AC ENG 29. Special Topics in ESL. 2 Units.**

Directed and individualized work in English as a second language not covered in the AC ENG 20, 21, 22 sequence.

Grading Option: Pass/no pass only.

Repeatability: Unlimited as topics vary.

**AC ENG 139W. Advanced Academic Writing Across the Curriculum. 4 Units.**

Designed for transfer students who speak English as a second language. Focuses on developing academic reading and writing skills including essay content, organization, vocabulary, and grammar. Academic content also covered.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Restricted to students whose first language is not English.

(Ib)

## African American Studies (AFAM)

### Courses

**AFAM 40A. African American Studies I. 4 Units.**

Discusses main contours of African American experience from the forced importation of Africans into the Americas in the late fifteenth century to the development of social movements in post-emancipation societies of the late nineteenth and twentieth centuries.

((III or IV) and VII ).

**AFAM 40B. African American Studies II. 4 Units.**

Introduction to the history of modern racial thinking in Western society and its relationship to the material contexts of racial oppression, with emphasis on its development in British colonies and U.S.

((III or IV) and VII ).

**AFAM 40C. African American Studies III. 4 Units.**

Introduction to theories of racial blackness in the modern world, with emphasis on developments in British colonies and U.S. Traces emergence of blackness as term of collective identity, social organization, and political mobilization.

((III or IV) and VII ).

**AFAM 50. Introductory Topics in African American Studies. 4 Units.**

Introduction to a broad range of topics in African American studies, exploring history, literature, art, culture, politics, and contemporary social issues. Topical organization of courses addresses issues that have been of importance historically and are reshaping the African diaspora today.

Repeatability: Unlimited as topics vary.

**AFAM 111A. Modern African American Art. 4 Units.**

Investigates the history of modern African American art; emphasis on the politics of representation. Examines art in a variety of media from material culture and textiles to painting and photography. Issues of migration, nationalism, gender, sexuality, and hybridity are discussed.

Same as AHIS 164A.

**AFAM 111B. Contemporary African American Art. 4 Units.**

Investigates the history of contemporary African American art; emphasis on the politics of representation. Explores art in a variety of media: painting, sculpture, photography, installation, and new media. Cultural politics, appropriation, identity, gender, sexuality, hybridity and civil rights issues discussed.

Same as AHIS 164B.

**AFAM 112A. Early African American Literature. 4 Units.**

Examines the earliest forms of black literary practices, including the jeremiad, the slave narrative, the pamphlet, poetry, the short story, and how these literary forms are related to the historical experiences of enslavement and emancipation.

Repeatability: Unlimited as topics vary.

**AFAM 112B. African American Literature 1900-Present. 4 Units.**

Examines individual literary forms and/or authors, as well as movements such as the Harlem Renaissance and the Black Arts Movement. Explores how black literary practices represent the conditions of modern subjectivities and environments.

Repeatability: Unlimited as topics vary.

**AFAM 113. African American Cinema and Media. 4 Units.**

Explores the diversity of Black creative production and the historical, social, and economic forces that shaped their emergence. May include Black film, hip-hop culture, fine art, photography, and others.

Repeatability: Unlimited as topics vary.

**AFAM 114. International Cultures. 4 Units.**

Explores the various cultures of the African diaspora and their impacts on a global scale. Examines a diverse range of media, including music (reggae, hip-hop), literature, film, and others and the links between culture and social movements throughout the diaspora.

Repeatability: Unlimited as topics vary.

**AFAM 115. Race and Visual Representation. 4 Units.**

Examines film, documentary, fine art, photography, and other visual media to explore the multiple ways in which ideas about race are projected and woven through the visual landscape and the impacts this has on perpetuating social inequalities.

Repeatability: Unlimited as topics vary.

**AFAM 117. Asian American and African American Relations. 4 Units.**

Addresses relationships of Asian American and African American communities in the United States. Topics include race, class, gender, labor, economic systems, political mobilization, community, civil rights, activism, cultural expression.

Same as HIST 152B, ASAM 167.

**AFAM 118. Topics in African American Humanities. 4 Units.**

Provides students with an opportunity to pursue advanced work in African American studies from one or more humanities approaches (literature, film and media studies, art history, and others).

Repeatability: Unlimited as topics vary.

**AFAM 125. African American Women in Art. 4 Units.**

Examines depictions of and by African American women in art and popular culture through a variety of media including textiles, painting, sculpture, photography, and installation. Focuses on African American women's experiences, perspectives, and strategies for contemporary representation.

Same as AHIS 164D.

**AFAM 128. Topics in Gender/Sexuality. 4 Units.**

Expressions of genders and sexualities across the spectrum of African American experience and creativity.

Repeatability: Unlimited as topics vary.

**AFAM 134A. Caribbean History: Colonization to Emancipation. 4 Units.**

Exploration of the history of the archipelago from pre-Columbian times to the end of slavery; examining the impact of European colonization, decimation of the indigenous populations, African slavery, resistance, and emancipation; the unity and diversity of experience in region.

Same as HIST 164A.

**AFAM 134B. Caribbean History: Emancipation to Independence. 4 Units.**

Post-emancipation and anti-colonial struggles ending with political independence for most of the region. Examines social, political, economic, cultural dimensions of post-emancipation period, including large-scale migration to Central America, the U.S., and Britain; the region's global cultural and political contribution.

Same as HIST 164B.

**AFAM 137. History of the African Diaspora. 4 Units.**

Examines the causes and consequences of the multiple diasporas of African peoples since the sixteenth century in the Atlantic world, especially the Americas and Europe.

Same as HIST 134E.

**AFAM 138. Topics in African American History. 4 Units.**

Studies in selected areas of African American history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as HIST 150.

**AFAM 143. Topics in African American Music. 4 Units.**

Examines African American musical forms and traditions, such as blues, jazz, and reggae, in performance and/or critical and theoretical contexts.

Repeatability: Unlimited as topics vary.

**AFAM 144. Topics in Expressive Forms. 4 Units.**

Examines various forms of aesthetic expression in the African diaspora, including dance, music, and the plastic arts, as well as artistic visions of black cyberspace, digital activism, film, video, and aesthetic conceptions of the future.

Repeatability: Unlimited as topics vary.

**AFAM 145. African Americans and Photography. 4 Units.**

Explores depictions of and by African Americans through photography. Examines the history of photography in relationship to African American culture through a variety of media from early daguerreotype processes to digital imagery.

Same as AHIS 164E.

**AFAM 151. Comparative Minority Politics. 4 Units.**

Examines the political experiences of Blacks, Latinos, and Asian Americans in the United States from roughly 1950 to the present. Focuses on how each group has pursued political empowerment via both conventional political channels and social movements.

Same as ASAM 132, CHLT 147, PLSC 124C.

**AFAM 152. African American Politics. 4 Units.**

Examines politics of African Americans in order to gain a broader perspective of the American political process. Major developments in African American politics (including the civil rights movement, Black presidential bids), continuing problem of racism, responsiveness of key governing institutions.

Same as PLSC 124E.

**AFAM 153. African American Psychology. 4 Units.**

Historical overview of the development of black psychology and the African American frame of reference. Topics include personality development, psychological assessment, issues in education, black mental health, and the role of the African American psychologist in the community.

Same as PSYC 174E.

**AFAM 154. African American Social Formations. 4 Units.**

Topics which promote critical investigation into the historical, political, and social formations associated with the Black Diaspora.

Repeatability: Unlimited as topics vary.

**AFAM 155. Intercultural Studies. 4 Units.**

Studies relationships between various cultural formations within the Black Diaspora and the exchange, amalgamations, and tensions between Black Diasporic formations and non-Black formations. Examines expressions of racialization as representation, adaption, and resistance.

Repeatability: Unlimited as topics vary.

**AFAM 156. African Societies and Politics. 4 Units.**

Examines the violent incorporation of Africa within European modernity. Places the discourse of Pan-Africanism, African Nationalisms, Negritude, African Marxism, and/or African Socialism in juxtaposition to the forces of capitalism, colonialism, and imperialism that restructure African history.

Repeatability: Unlimited as topics vary.

**AFAM 157. Critical Race Theory. 4 Units.**

Introduction to Critical Race Theory and key American cases on racial inequality. Using this literature, examines the possibilities and pitfalls of legal claims of race, gender, and sexuality discrimination in the age of colorblindness.

Same as CLS C178.

Restriction: Upper-division students only.

**AFAM 158. Topics in African American Social Sciences. 4 Units.**

Provides students with an opportunity to pursue advanced work in African American studies from one or more social science approaches (psychology, sociology, anthropology, economics, and others).

Repeatability: Unlimited as topics vary.

**AFAM 159. Prisons and Public Education. 4 Units.**

Looks at the connections between schools and prisons in the United States. Students learn about ideas that push beyond common trope of the "school to prison pipeline."

Same as ANTH 138.

**AFAM 162W. The Black Protest Tradition. 4 Units.**

History and discourses of the black protest tradition. Traces emergence of black protest against racial slavery and white supremacy from the early colonial period to present and the complex elaboration of identity politics within black communities in the twentieth century.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only.

**(Ib)**

**AFAM 163. Seminar in African American Studies. 4 Units.**

Explores theoretical and methodological issues in Black Studies via concentrated work on a specific ensemble of questions. Emphasis is on generating student responses to the material covered through oral and written reports.

Repeatability: Unlimited as topics vary.

**AFAM 198. Directed Group Study. 1-4 Units.**

Special topics through directed reading. Paper required.

Repeatability: May be taken for credit for 24 units.

**AFAM 199. Independent Study. 1-4 Units.**

Investigation of special topics through directed reading. Paper required.

Repeatability: May be repeated for credit unlimited times.

**AFAM 399. University Teaching. 4 Units.**

Limited to teaching assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## **Anatomy and Neurobiology (ANATOMY)**

### **Courses**

**ANATOMY 200. Research in Anatomy. 2-12 Units.**

Individual research supervised by a particular faculty member.

Repeatability: May be repeated for credit unlimited times.

**ANATOMY 200R. Research in Anatomy and Neurobiology for First-Year Students. 2-12 Units.**

Independent research within the laboratories of graduate training faculty in the Department of Anatomy and Neurobiology for first-year Ph.D. students.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

**ANATOMY 201. Human Gross Anatomy. 8 Units.**

Study and dissection of the human body, including muscular, skeletal, nervous, and cardiovascular systems. Emphasis on both normal and abnormal structure and function.

Restriction: Graduate students only.

**ANATOMY 202B. Human Neuroscience. 4 Units.**

Study of the human nervous system at the systems level including the physiology and anatomy of sensory, motor, and integrative functions.

Prerequisite: ANATOMY 202A

**ANATOMY 203A. Human Microscopic Anatomy. 3 Units.**

Lecture and laboratory course on human microscopic anatomy. Emphasis is on functional implications of structure of cells and tissues.

Restriction: Graduate students only.

**ANATOMY 203B. Human Microscopic Anatomy. 3 Units.**

Lecture and laboratory course on human microscopic anatomy. Emphasis is on functional implications of structure of cells and tissues.

Prerequisite: ANATOMY 203A

Restriction: Graduate students only.

**ANATOMY 206. Tutorial in Anatomy. 3 Units.**

Series of tutorials on advanced topics in anatomy.

Repeatability: May be repeated for credit unlimited times.

**ANATOMY 210A. Systems Neuroscience. 5 Units.**

Study of the mammalian nervous system at the systems level. Anatomy and physiology of sensory, motor, and integrative functions.

Repeatability: May be taken for credit 2 times.

Same as NEURBIO 208.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**ANATOMY 215. Epilepsy as a Window to Mechanisms of Neuronal Plasticity. 4 Units.**

Understanding the mechanisms of brain disorders provides novel insights into the normal function of neurons and circuits. Discusses approaches to studying mechanisms of brain function ranging from imaging, the use of models and others to study epilepsy.

Grading Option: Satisfactory/unsatisfactory only.

**ANATOMY 227A. Current Topics in Neuroscience. 1-4 Units.**

Focuses on critical reading, presentation, and discussion of current literature in neuroscience research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ANATOMY 227B. Current Topics in Neuroscience. 1-4 Units.**

Focuses on critical reading, presentation, and discussion of current literature in neuroscience research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ANATOMY 227C. Current Topics in Neuroscience. 1-4 Units.**

Focuses on critical reading, presentation, and discussion of current literature in neuroscience research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ANATOMY 230. Topics in Translational Neuroscience. 2-4 Units.**

One-hour seminar presentation by participating faculty or guest lecturer and open to the science community, followed by one-hour student discussion of the lecture topic or related topic. Students are responsible for presentations and readings.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Graduate students only. Interdepartmental Neuroscience Majors have first consideration for enrollment.

**ANATOMY 230A. Molecular, Cellular, & Developmental Neurobiology. 4 Units.**

Molecular aspects of the structure and function of neurons and glia including neurotransmission, synaptic modulation, and channels. Neural development at the cellular and molecular level including neurogenesis, pattern formation, trophic factors, axonal growth, and synaptic rearrangement.

Restriction: Graduate students only.

**ANATOMY 292A. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**ANATOMY 292B. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**ANATOMY 292C. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## Anesthesiology (ANESTH)

# Anthropology (ANTHRO)

## Courses

### **ANTHRO 2A. Introduction to Sociocultural Anthropology. 4 Units.**

Introduction to cultural diversity and the methods used by anthropologists to account for it. Family relations, economic activities, politics, gender, and religion in a wide range of societies. Stresses the application of anthropological methods to research problems.

(III and VIII ).

### **ANTHRO 2B. Introduction to Biological Anthropology. 4 Units.**

Evolutionary theory and processes, comparative primate fossil record, human variation, and the adequacy of theory, and empirical data.

(III)

### **ANTHRO 2C. Introduction to Archaeology. 4 Units.**

Archaeological theory and cultural processes with emphasis on the American Southwest, Mesoamerica, and Mesopotamia.

(III)

### **ANTHRO 2D. Introduction to Language and Culture. 4 Units.**

Explores what the study of language can reveal about ourselves as bearers of culture. After introducing some basic concepts, examines how cultural knowledge is linguistically organized and how language might shape our perception of the world.

Same as LSCI 68.

(III)

### **ANTHRO 10A. Probability and Statistics. 4 Units.**

An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Same as SOCIOL 10A.

Overlaps with PSYCH 10A, SOCECOL 13, SOC SCI 10A, POL SCI 10A.

Restriction: Anthropology Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

(Va)

### **ANTHRO 10B. Probability and Statistics. 4 Units.**

An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Prerequisite: SOCIOL 10A or ANTHRO 10A

Same as SOCIOL 10B.

Overlaps with PSYCH 10B, SOCECOL 13, SOC SCI 10B, POL SCI 10B.

Restriction: Anthropology Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

(Va)

### **ANTHRO 10C. Probability and Statistics. 4 Units.**

An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Prerequisite: SOCIOL 10B or ANTHRO 10B

Same as SOCIOL 10C.

Overlaps with PSYCH 10C, SOCECOL 13, SOC SCI 10C, POL SCI 10C.

Restriction: Anthropology Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

(Vb)

**ANTHRO 20A. People, Cultures, and Environmental Sustainability. 4 Units.**

Anthropological consideration of global environmental sustainability from the perspective of human cultures and communities. Causes and consequences of population growth, natural resource management, environmental law, environmental ethics. Case studies emphasize tropical rain forests, arid lands of Africa and North America.

(VIII)

**ANTHRO 25A. Environmental Injustice. 4 Units.**

Explores how pollution, climate change, and other environmental problems impact people around the world, often worsening social inequality. Students use social science frameworks to understand environmental problems, different interpretations of these problems, and how people have organized for political change.

(III and VII ).

**ANTHRO 30A. Global Issues in Anthropological Perspective. 4 Units.**

Explores anthropological perspectives on issues of importance in an increasingly global society. Topics include emphases on ethnic conflict; identity; immigration and citizenship; religion and religious diversity; medical anthropology; legal anthropology; development and economic change; gender.

Restriction: Anthropology Majors have first consideration for enrollment.

(VIII)

**ANTHRO 30C. Visual Anthropology . 4 Units.**

Focusing on the construction of culture through visibility, this course engages traditional ethnographic films, popular media and anthropological texts to analyze ethics, "reality" and fiction; propaganda and documentary, construction of a frame, the responsibility of the filmmaker, photographer, and anthropologist.

**ANTHRO 41A. Global Cultures and Society. 4 Units.**

Offers a general overview of the rise of global interdependence in political, economic, demographic, and cultural terms. Considers what drove people from relative isolation into intensified intercourse with one another, and investigates the consequences of this shift.

Same as INTL ST 11.

Restriction: Anthropology Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

(III and VIII ).

**ANTHRO 45A. Science, Culture, Power. 4 Units.**

Examines science in historical and cultural context (Scientific and Darwinian Revolutions, Manhattan Project, contemporary biosciences) to understand scientific truths and their limits, scientists as social actors, and vital intersections of sciences with religion, politics, gender, and other forms of culture.

(III)

**ANTHRO 48. Archaeology or Aliens?: Conspiracy, Pseudoscience, and the Emergence of Civilizations. 4 Units.**

Archaeology has inspired (and sometimes actively encouraged) various theories about aliens, lost civilizations, dark conspiracies, and mysterious technologies. Does such an intimate relationship with these fantastic notions undermine archaeology and its claims of authoritative knowledge about past cultures.

(III and VIII ).

**ANTHRO 89. Special Topics in Anthropology. 1-4 Units.**

Studies in selected areas of Anthropology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 100A. Ethnography and Anthropological Methods. 4 Units.**

Anthropological research, learning ethnographic methods, and how to choose a research topic, construct research questions, explore library resources, collect data, and write an analytical paper on research findings.

Prerequisite or corequisite: ANTHRO 2A

Restriction: Anthropology Majors have first consideration for enrollment. Anthropology Minors have first consideration for enrollment. Medical Anthropology Minors have first consideration for enrollment.

**ANTHRO 100B. Anthropology Careers. 4 Units.**

Gives students the skills and perspective needed to leverage undergraduate anthropology education in diverse career domains. Students explore different career domains (health care, tech development, environmental governance, etc.) and learn to represent themselves professionally.

Restriction: Anthropology Majors only. Anthropology Minors only. Medical Anthropology Minors only.

**ANTHRO 121AW. Kinship and Social Organization. 4 Units.**

Organization of social life primarily in preindustrial societies. Theories of kinship, marriage regulations, sexual behavior, and social roles. Comparisons of biological, psychological, sociological, and economic explanations of social organization.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

**(Ib)****ANTHRO 121D. Cross-Cultural Studies of Gender. 4 Units.**

Explores the construction of gender in national and transnational contexts. Special attention is given to how race, sexuality, class, and global inequalities shape different experiences of gender, and how gender structures political, institutional, and social life across the world.

Same as INTL ST 153B.

**(VII)****ANTHRO 121G. Political Anthropology. 4 Units.**

Utilizes anthropological accounts of Western and non-Western societies to question conventional ways of thinking about power and politics. Classical traditions in political anthropology are critiqued; an alternative view is presented through recent anthropological political analyses of various topics.

**ANTHRO 121J. Urban Anthropology. 4 Units.**

Cultural roles of urban centers and processes of urbanization in comparative perspective, focusing on both nonwestern, nonindustrial societies of past and present; the relationship between modern urban centers and Third World peoples. Migration, urban poverty, in Africa, Asia, Latin America.

Same as INTL ST 153C.

**ANTHRO 124. Gold: The Alchemy of Socio-Economic Practice. 4 Units.**

Before bitcoin, before derivatives and mortgage-backed securities, before even writing itself, there was gold. Explore gold's role in the development of culture, politics, and power. From Pharaohs to modern financial wizards, gold has impacted and mediated social life.

Restriction: Anthropology Majors have first consideration for enrollment. Anthropology Minors have first consideration for enrollment. Archaeology Minors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Economics Minors have first consideration for enrollment.

**ANTHRO 125. Anthropology of Debt. 4 Units.**

Explores how debt has shaped culture across varied contexts geographically and historically. In what ways have societies naturalized indebtedness, taken it for granted as a fact of life, and used it for organizing social relations.

Restriction: Anthropology Majors have first consideration for enrollment. Anthropology Minors have first consideration for enrollment. Archaeology Minors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Economics Minors have first consideration for enrollment.

**ANTHRO 125A. Economic Anthropology. 4 Units.**

Economic systems in comparative perspective: production, distribution, and consumption in market and non-market societies; agricultural development in the third world.

Prerequisite: One course in general science, anthropology, economics, geography, or sociology.

Same as ECON 152A.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment. Anthropology Majors have first consideration for enrollment.

**ANTHRO 125B. Ecological Anthropology. 4 Units.**

Studies relationships between human communities and their natural environments. The role of environment in shaping culture; effects of extreme environments on human biology and social organization; anthropologist's role in studying global environmental problems, e.g., African famine, tropical rain forests destruction.

Prerequisite: ANTHRO 2A or ANTHRO 2B or ANTHRO 2C

**ANTHRO 125C. Environmental Anthropology. 4 Units.**

Introduces students to anthropological and qualitative research on the relationship of humans, non-humans, and environments. Focuses on how to analyze and evaluate social and cultural differences in environmental perception, relations, justice, governance, sustainability, and cosmology.

Prerequisite: ANTHRO 2A or ANTHRO 2B or ANTHRO 2C or ANTHRO 2D

(III)

**ANTHRO 125F. Humans and Other Animals. 4 Units.**

Explores peoples' relationships with other animals, a topic that continues to shape anthropological understandings of humanness, culture, and the social. Subthemes: symbol and matter, nature/culture, ontologies, relations, moralities, ecologies, futures.

Prerequisite: ANTHRO 2A or ANTHRO 2B or ANTHRO 2D

**ANTHRO 125S. The Anthropology of Money. 4 Units.**

Anthropological approaches to money; impact of money on subsistence economies; cultural history of money; and modern transformations of money. Students conduct ethnographic research on alternative money practices in Southern California, and create an online exhibition and research paper.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 125U. Immigration, Nation, and Media. 4 Units.**

Examines media shapes and reflects public opinion on immigration and its representation of immigrants, citizens, and ideas about the nation, and who belongs and who is a potential threat; as well as the relationship between scholars and journalists.

Same as CHC/LAT 123, SPPS 101A.

**ANTHRO 125X. Transnational Migration. 4 Units.**

Examines the movement of people across national borders, governmentality and the role of state practices to control populations, and issues of citizenship, belonging, and identity. Examples are drawn from the United States, Europe, Latin America, Asia, and Africa.

Same as CHC/LAT 161, INTL ST 117A.

(VIII)

**ANTHRO 125Z. Islam in America. 4 Units.**

Offers a critical academic study of Islam in America, focusing on the core tenets of belief, the diversity of practices, and historical transformations that have taken place since the arrival of Muslims in the United States.

Same as ASIANAM 142.

**ANTHRO 126. Cultures of the Middle East. 4 Units.**

The diversity of cultures and peoples who constitute the Middle East demonstrates the failure of much contemporary media and discourse to understand this region. Students learn about the broad scope of the contemporary Middle East through an ethnographic lens.

Restriction: Anthropology Majors have first consideration for enrollment. Anthropology Minors have first consideration for enrollment.

**ANTHRO 126A. Elite Cultures. 4 Units.**

The distinctive contribution that ethnographic studies have made to the understanding of elites past and present, in particular societies and globally.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 127. Controversies, Courts, Cultures: The Anthropology of Law. 4 Units.**

Assesses the contributions anthropology has made to legal scholarship, reviewing historical and contemporary themes. Considers both comparative questions of law's norms, structures, and practices around the globe, and the specific insights anthropology offers about contemporary U.S. law.

Same as CRM/LAW C183.

(III)

**ANTHRO 127A. Law and Modernity. 4 Units.**

The rise and spread of Enlightenment legal traditions, social contract theory, individual rights, ideologies of 'liberty, equality, fraternity'; contradictions of liberal law, its understandings of 'primitive' and 'civilized'; pervasive myths of property, difference, race, and rights. Reading- and writing-intensive.

Same as CRM/LAW C191.

**ANTHRO 127B. Global Migrations, Anthropology, and the Law. 4 Units.**

Course explores how cultural contexts and national laws frame migration, and define categories of migrants, families, and people. Topics include illegality, transnational families, refugees and economic migrants, labor conditions, deportation practices, discipline and crime, citizenship controversies, and nativism.

**ANTHRO 128A. Science, Technology, Controversy. 4 Units.**

Explores ways in which the social sciences conceive of science as a sociocultural practice. Emphasis on literature in Science and Technology Studies (STS), especially writings that concern the relationship of science to space and place, power, and politics.

Restriction: Anthropology Majors only.

**ANTHRO 128B. Race, Gender, and Science. 4 Units.**

Perfect for pre-health, science and social science majors wanting to appreciate how science and society interact. Race and gender as biological and socio-cultural constructs are examined. Questions explored: What is disease? What is science? What are social and biological differences.

Same as CHC/LAT 176.

**(VII)****ANTHRO 128C. Digital Cultures . 4 Units.**

Explores cultural and political implications of the infotech revolution and the ways new media are used around the world, new cultural practices and spaces (e.g., cybercafes), debates surrounding the meanings of these new technologies, and their implications for transforming society.

Prerequisite: ANTHRO 2A and (ANTHRO 2B or ANTHRO 2C or ANTHRO 2D)

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 129. Special Topics: Social and Economic Anthropology. 1-4 Units.**

Studies in selected areas of Social and Economic Anthropology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 132A. Psychological Anthropology. 4 Units.**

Cultural differences and similarities in personality and behavior. Child-rearing practices and consequent adult personality characteristics, biocultural aspects of child development and attachment, culture and behavior evolutionary models, politically linked personality, cognitive anthropology, psychology of narrative forms, comparative national character studies.

Prerequisite: ANTHRO 2A or PSYCH 7A or (PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C)

Same as PSYCH 173A.

Restriction: Psychology Majors have first consideration for enrollment.

**ANTHRO 134A. Medical Anthropology. 4 Units.**

Introduces students to cross-cultural perspectives and critical theories in anthropological studies of medicine. Special attention is given to diverse ways of understanding bodies, illnesses, and therapeutic practices in our changing world.

Same as CHC/LAT 178A.

**(VIII)****ANTHRO 134B. Cultures of Biomedicine. 4 Units.**

An introduction to the anthropological study of biomedicine and biotechnology. Topics include medicalization, experimentation and discovery, diagnosis, expertise, health activism, and biotechnology.

**ANTHRO 134C. Medicine, Food, and Health. 4 Units.**

With anthropological studies of edible things as its foundation, this course explores topics related to the relationship between medical knowledge, eating, and health from a medical anthropological perspective.

Prerequisite: ANTHRO 2A or ANTHRO 2B or ANTHRO 2D

**ANTHRO 134F. Anthropology of the Body. 4 Units.**

Examines human bodies as both biological and sociocultural entities and explores the relationship among mind, body, and society cross-culturally. Topics include embodiment; race, sex, gender, and the body; somatization; control of the body; commodified bodies; and hybrid/cyborg bodies.

**ANTHRO 134G. HIV/AIDS in a Global Context. 4 Units.**

Examines issues concerning cultural conceptions of HIV infection and disease worldwide. Topics include treatment and prevention, identity and behavior, risk, ethnicity, gender, youth, sexuality, activism, drug use, illness, religion, the clinical encounter, national belonging, and the pharmaceutical industry.

(VIII)

**ANTHRO 134H. Anthropology of Food. 4 Units.**

Examines how food communicates ideas about ethnocentrism, disgust, privilege, gender, race, labor, social identities and hierarchies, globalization, power, and the 'Western diet' and its health consequences.

Same as CHC/LAT 118.

**ANTHRO 134N. Disease, Health, and Inequality. 4 Units.**

Examines the relationships among disease, health, and social inequality in the U.S. and globally. Topics include infectious and chronic disease case studies, health policy, and strategies for promoting health equity.

**ANTHRO 135A. Religion and Social Order. 4 Units.**

An anthropological exploration of religious belief and practices in diverse social and historical contexts. Emphasis placed on selected non-western traditions of the sacred, and on issues of power, ritual, moral order, and social transformation.

**ANTHRO 136A. Nationalism and Ethnicity in the Contemporary World. 4 Units.**

An exploration of the concepts of identity, culture, ethnicity, race, and nation through ethnographic cases, with a view to asking larger questions: how do people create nativeness and foreignness? How does 'culture' get worked into contemporary racisms and nationalisms.

Same as INTL ST 153E.

(VIII)

**ANTHRO 136B. History of Anthropological Theory. 4 Units.**

Provides foundational knowledge in the discipline of anthropology by reviewing competing approaches in anthropological theory, from the nineteenth century to the present. Covers historically fundamental approaches—social evolutionism, functionalism—and recent movements such as feminism, cultural studies, poststructuralism, and postmodernism.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 136D. Conflict Resolution in Cross-Cultural Perspective. 4 Units.**

Examines theories of conflict management. Analyzes how conflict is mitigated in diverse cultures: at the interpersonal level, between groups, and on the international scale. Students discuss readings, hear from conflict management practitioners, and simulate negotiations.

Same as POL SCI 154G, SOC SCI 183E, INTL ST 183E.

(VIII)

**ANTHRO 136G. Colonialism and Gender. 4 Units.**

An anthropological enquiry into the ways colonial relations of power have been structured and gendered throughout the world, and to what effect. Examines the social locations of men and women in the everyday exercise of colonial and imperial power.

Same as INTL ST 153D.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 136K. The Woman and the Body. 4 Units.**

Probes culture and politics of the female body in contemporary American life. Focusing on 'feminine beauty,' examines diverse notions of beauty, bodily practices, and body politics embraced by American women of different classes, ethnicities, and sexualities.

(VII)

**ANTHRO 138. Prisons and Public Education. 4 Units.**

Looks at the connections between schools and prisons in the United States. Students learn about ideas that push beyond common trope of the "school to prison pipeline."

Same as AFAM 159.

**ANTHRO 139. Special Topics in Cultural and Psychological Anthropology. 1-4 Units.**

Studies in selected areas of Cultural and Psychological Anthropology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 140. Sex and Conquest in Latin America. 4 Units.**

Competing ideas of masculinity and femininity, sexual violence, sexual identities, and gendered hierarchies informed how the Spanish engaged in military and religious domination of Mexican and Andean communities, as well as the forms of native resistance throughout colonial Latin America.

Same as HISTORY 160, CHC/LAT 150A, GEN&SEX 171A.

**ANTHRO 141A. Ancient Civilization of Mexico and the Southwest. 4 Units.**

The prehistory and cultural evolution of the civilization which originated in Mexico, including the Olmecs, Aztecs, Toltecs, Maya, and Zapotec, as well as the Pueblos of the Southwestern U.S. Topics include the origins of food production and of the state.

Same as INTL ST 177I.

**ANTHRO 146. Consumption and Culture. 4 Units.**

Our modern 'society of the spectacle' often equates your consumption to your very humanity. Explores the ways in which our desire for things expresses our identity, politics, place within society, and how what we consume dominates social life.

Restriction: Anthropology Majors have first consideration for enrollment. Anthropology Minors have first consideration for enrollment.

**ANTHRO 147. Egyptomania. 4 Units.**

An exploration into the archaeological heritage and cultures of ancient Egypt. Also examines how ancient Egypt became appropriated as a popular cultural phenomenon and site of scholarship in the centuries after the Pharaohs.

Restriction: Anthropology Majors have first consideration for enrollment. Anthropology Minors have first consideration for enrollment. Archaeology Minors have first consideration for enrollment.

**ANTHRO 147A. Archaeology of the Islamic World. 4 Units.**

The archaeological record connected with the Islamic tradition spans nearly 1,500 years and stretches from Spain to South East Asia. Working with artifacts and other materials, students learn about the sites and historical transformations associated with Islam and Muslim societies.

Restriction: Anthropology Majors have first consideration for enrollment. Anthropology Minors have first consideration for enrollment. Archaeology Minors have first consideration for enrollment.

**ANTHRO 147B. Archaeology, Politics, and Identity. 4 Units.**

Archaeologists don't excavate in a political vacuum. Their research has profound consequences for the ways in which people identify with and claim their cultural heritage. Examines archaeology's role in constructing such identities through the traces of the past.

Restriction: Anthropology Majors have first consideration for enrollment. Anthropology Minors have first consideration for enrollment. Archaeology Minors have first consideration for enrollment.

**ANTHRO 148. I Dig UCI. 4 Units.**

An introduction to archaeological fieldwork through participation in an active excavation on campus. Students engage with research design and learn the foundational methods of archaeological recovery: survey, mapping, sampling strategies, documentation, excavation, artifact identification, and interpretation.

**ANTHRO 149. Special Topics in Archaeology. 1-4 Units.**

Studies in selected areas of Archaeology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 150A. Language and Social Cognition. 4 Units.**

Explores the relationship between language and cognition in social and cultural contexts. The overall goal is to think through how language structure and use impact how individuals perceive, think about, and understand the world around them.

Same as LSCI 168S.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 151A. Improvisation, Language, and Culture. 4 Units.**

Addresses improvisation, both in performance and in everyday life. Examines improvisation as the 'flexible regulation' of everyday behavior by exploring different scholarly treatments of language and interaction, and working on developing actual theatrical improvisation skills.

Same as LSCI 168J.

Restriction: Upper-division students only.

**ANTHRO 152A. Language Origins: Evolution, Genetics, and the Brain. 4 Units.**

Examines how human language(s) may have originated. Studies pertinent techniques (reconstruction) and addresses related questions, including is our language faculty inborn (i.e., genetically encoded)? Can brain imaging and population genetics research help to unlock this mystery of human evolution?.

Same as LSCI 175, GLBLCLT 105, HISTORY 135G.

**ANTHRO 162A. Peoples and Cultures of Latin America. 4 Units.**

Surveys the prehistory of Latin America and its indigenous cultures, emphasizing the impact of colonial rule, capitalism, and twentieth-century transformations. Emphasis on communities from several countries. In some years, emphasis on comparisons between the Latin American and Caribbean experiences.

Same as INTL ST 177J, CHC/LAT 120.

**(VIII)****ANTHRO 162B. Indian North America. 4 Units.**

A survey of indigenous peoples in North America: American Indians, Alaska Natives, First Nations, Native Americans. Tribal populations and geographic distributions, political and social organization, sovereignty, self-determination, intergovernmental relations; cultural continuity and change; management, preservation, development of environments/resources.

**(VII)****ANTHRO 162C. Race and Empire in Colonial Latin America. 4 Units.**

Explores how native people of Latin America with enslaved and free African incorporated and defied Spanish and Portuguese colonization. Focuses on religious adaptations, resistance movements, legal systems, and the emergence of multicultural communities to explain how race shaped European empires.

Same as HISTORY 165.

**ANTHRO 162D. Anthropology of the United States. 4 Units.**

Examines anthropological research in and of the United States. Topics include race, class, identity, politics, law, and media.

**ANTHRO 163A. Peoples of the Pacific. 4 Units.**

The cultural history and recent developments among the Pacific peoples of Polynesia, Micronesia, Melanesia, New Guinea, and Australia.

Same as INTL ST 158B.

**(VIII)****ANTHRO 164A. 21st Century Africa. 4 Units.**

Comparative studies of the cultures and societies of Sub-Saharan Africa, with emphasis on critical study of colonialism and postcoloniality, social transformation, and the politics of identity.

Prerequisite: ANTHRO 2A

Same as INTL ST 157A.

Restriction: Anthropology Majors have first consideration for enrollment.

**(Ib)****ANTHRO 164P. Peoples and Cultures of Post-Soviet Eurasia. 4 Units.**

Examines the cultures and political conflicts of the more than 130 indigenous ethnic groups in the European and Asian territories of the former U.S.S.R. Emphasis is on the theoretical issues of ethnicity, nationalism, and conflict management.

Same as INTL ST 162B, POL SCI 154F.

**(VIII)**

**ANTHRO 165A. Modern Iran: Cinema and the City. 4 Units.**

Exploring modern Iran through film, literature, photography, travel writing, and philosophy and social science texts that introduce students to important concepts in post-colonial studies, social thought, war culture, religion, and media as experienced through the paradigm of a non-Western modernity.

Same as PERSIAN 165A.

**ANTHRO 169. Special Topics in Area Studies. 1-4 Units.**

Studies in selected areas of Anthropology. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 179. Special Topics: Methods and Formal Representations. 1-4 Units.**

Studies in selected areas of Methods and Formal Representations. Topics addressed vary each quarter.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 180AW. Anthropology Majors Writing Seminar. 4 Units.**

Anthropological theory designed especially for majors in Anthropology. Topics addressed vary each quarter.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 3 times as topics vary.

Restriction: Anthropology Majors only.

**(Ib)****ANTHRO 190. Senior Thesis. 4 Units.**

Senior thesis with Anthropology faculty.

Repeatability: May be taken for credit 3 times.

**ANTHRO H190A. Honors Research Design. 3 Units.**

Students design a research project and articulate its goals and significance. Written work consists of a research proposal describing the research questions, the relevant literature, methods of data collection and analysis, and ethical considerations.

Prerequisite or corequisite: ANTHRO 199

Restriction: Anthropology Honors students only.

**ANTHRO H190B. Honors Field Research. 3 Units.**

Students begin or continue ethnographic field research and gain experience with a variety of data collection methods, including participant-observation, interviews, surveys, and the study of archival and documentary materials.

Prerequisite or corequisite: ANTHRO 199 and ANTHRO H190A

Restriction: Anthropology Honors students only.

**ANTHRO H190C. Honors Research Analysis. 3 Units.**

Students apply qualitative data analysis techniques to ethnographic data collected as part of their Honors research.

Prerequisite or corequisite: ANTHRO H190B and ANTHRO 199. Anthropology Honors ONLY.

**ANTHRO H190W. Honors Thesis Writing. 3 Units.**

Students draft a senior honors thesis (typically) with the following sections: problem statement, literature review, ethnographic background, and descriptions of the methods, results, and conclusions.

Prerequisite or corequisite: ANTHRO H190C and ANTHRO 199. Anthropology Honors ONLY. Satisfactory completion of the Lower-Division Writing requirement.

**(Ib)**

**ANTHRO 197. Field Study. 1-4 Units.**

Field study with Anthropology faculty.

Repeatability: May be repeated for credit unlimited times.

**ANTHRO 198. Directed Group Study. 1-4 Units.**

Directed study with Anthropology faculty.

Repeatability: May be repeated for credit unlimited times.

**ANTHRO 199. Independent Study. 1-4 Units.**

Independent research with Anthropology faculty.

Repeatability: May be repeated for credit unlimited times.

**ANTHRO 202A. Proseminar in Anthropology. 4 Units.**

Year-long intensive introduction to the history of anthropological thought and reading in classical and contemporary ethnography for first-year graduate students.

Restriction: Graduate students only.

**ANTHRO 202B. Proseminar in Anthropology. 4 Units.**

Year-long intensive introduction to the history of anthropological thought and reading in classical and contemporary ethnography for first-year graduate students.

Prerequisite: ANTHRO 202A

Restriction: Graduate students only.

**ANTHRO 202C. Proseminar in Anthropology. 4 Units.**

Year-long intensive introduction to the history of anthropological thought and reading in classical and contemporary ethnography for first-year graduate students.

Prerequisite: ANTHRO 202B

Restriction: Graduate students only.

**ANTHRO 204A. Proseminar in Medicine, Science, and Technology. 4 Units.**

Explores the phenomena studied by 'medical anthropology' and 'science and technology studies' are inextricably linked, and how understanding formations requires moving between disparate fields of inquiry. Required for students pursuing a Graduate Certificate in Anthropologies of Medicine, Science, and Technology.

Restriction: Students pursuing a Graduate Certification in Anthropologies of Medicine, Science, and Technology have first consideration for enrollment.

**ANTHRO 215A. Ethnographic Methods. 4 Units.**

Exposes students to diverse methods, both traditional and experimental, used in anthropological ethnographic research. Students gain experience practicing diverse methods, and learn to select methods appropriate to particular study designs and contexts.

Restriction: Graduate students only.

**ANTHRO 215B. Research Design. 4 Units.**

Introduces research design for anthropology, including concept work and mapping, research topic and aims development, research question construction, and fieldwork planning.

Prerequisite: ANTHRO 215A

Restriction: Graduate students only.

**ANTHRO 215C. Grant and Proposal Writing. 4 Units.**

Focuses on production, critique, and revision of student research proposals. A practical seminar designed to improve student proposals, help students through the application processes, and increase students' chances of obtaining support for their research.

Prerequisite: ANTHRO 215B

Restriction: Graduate students only.

**ANTHRO 229A. Anthropology of Knowledge. 4 Units.**

Examines the politics of knowledge. Considers the long history of anthropological studies concerning a wide variety of knowledge forms and practices, including more recent feminist and postcolonial studies. Aims to investigate and enlarge normative definitions of knowledge and science.

**ANTHRO 230D. Ethnography and its Collaborative Futures. 4 Units.**

Structured readings of selected career-making ethnographic works, past and present, with an emphasis on how ethnographic projects evolve into diverse, collaborative projects.

**ANTHRO 230F. Ethnography. 4 Units.**

Explores the theory and practice of ethnography with a focus on anthropology, the discipline most associated with ethnography. Students are exposed to the theoretical underpinnings of ethnographic work, traditional and innovative practices, and sample ethnographies.

Same as CRM/LAW C222, CHC/LAT 217.

Restriction: Graduate students only.

**ANTHRO 232B. Medical Anthropology. 4 Units.**

Explores historical and contemporary theoretical positions and debates in medical anthropology. Topics may include subjectivity, theories of the body, biopolitics, biomedical technologies, sexuality, pharmaceuticals, political economy and health, infectious disease and epidemics, health disparities, and humanitarianism.

Restriction: Students pursuing a Graduate Certification in Anthropologies of Medicine, Science, and Technology have first consideration for enrollment.

**ANTHRO 235A. Transnational Migration. 4 Units.**

Examines borders and boundaries as material and semiotic constructs. Drawing upon an array of literatures, but loosely situated in U.S. geo/biopolitics, explores transformative troubleings of places, spaces, borders, and bodies of all sorts.

Same as SOC SCI 254A, CHC/LAT 215.

Restriction: Graduate students only.

**ANTHRO 240A. Economic Anthropology. 4 Units.**

Classic and contemporary theory in economic anthropology. Case studies: Latin America (primarily Mexico and the Andes), Africa, and the Pacific. Substantive topics: non-market exchange, markets and marketplaces, households, gender, management of common property (fisheries, pastoral lands, forests), labor, and development.

Restriction: Graduate students only.

**ANTHRO 245A. Seminar in Political Anthropology. 4 Units.**

Explores anthropological approaches to politics. Covers a range of issues and topics, including: theories of culture, power, and hegemony; approaches to colonial and post-colonial relations of global inequality; and ethnographic approaches to the modern state.

Restriction: Graduate students only.

**ANTHRO 246. Feminist Anthropology. 4 Units.**

Examines feminist anthropology's rise as an interdisciplinary field. Paying special attention to issues of power, subjectivity, and authority in the research encounter, feminist anthropologists' major contributions to ethnography, gender studies, queer studies, and cultural anthropology are surveyed.

Restriction: Graduate students only.

**ANTHRO 246E. Capital and Empire. 4 Units.**

Examines theories of capital and empire via anthropological theory, post/colonial critique, feminist theory, and Black political thought. Moreover, it examines social movements, geo/political trajectories and formations, and political economic trends that have emerged after the 2008 financial crisis.

Restriction: Graduate students only.

**ANTHRO 247A. Structuralism and Post-Structuralism. 4 Units.**

Traces recent theoretical discussions and arguments over the philosophical and historical 'subject' from structuralist decenterings toward the characteristically 'post-structuralist' contemporary concern with the historical and political constitution of subjectivities and subject positions.

Restriction: Graduate students only.

**ANTHRO 249A. Humanism and Posthumanism. 4 Units.**

Examines alternative forms of human, humanisms, and posthumanisms to explore the inherent ambiguities and shifting boundaries of knowing and being human, and to venture into modes of analysis that problematize the universality and globality of liberal humanism.

**ANTHRO 250A. The Cultural Politics of Visual Representation. 4 Units.**

Develops a theoretical framework for analyzing and reading visual images. Images, as cultural productions, are steeped in the values, ideologies, and taken-for-granted beliefs of the culture which produced them and a political economy that is class, race, and gender inflected.

**ANTHRO 250B. Digital Technologies, Culture, and Media. 4 Units.**

Explores questions of sociality in cyberspace, including what social theories and ethnographic methods are effective in studying online cultures. Topics include general issues like indexicality, reference, temporality, spatiality, and embodiment, and topics such as language, gender, ethnicity, property, and inequality.

Restriction: Graduate students only.

**ANTHRO 252A. Queer Anthropology. 4 Units.**

Explores historical and contemporary scholarship that employs ethnographic approaches to address the discursive construction of sexuality. Also examines how the discipline of anthropology has been shaped by the study of sexuality.

Restriction: Graduate students only.

**ANTHRO 253A. Design, Aesthetics, and Social Life. 4 Units.**

Anthropology has only recently recognized that design demands consideration as a cultural form linked to, yet nonetheless distinct from, other aesthetic endeavors. Course is largely oriented toward collaboratively working out a conceptual basis for a distinctly anthropological approach to design.

**ANTHRO 254. Digital Anthropology. 4 Units.**

Examines "the digital" from an anthropological perspective by exploring ethnographic research on digital culture and using anthropological frameworks to approach the digital and the human. Readings are interdisciplinary, including work from history and communications.

Restriction: Graduate students only.

**ANTHRO 255A. Disability Worlds. 4 Units.**

Explores disability from a range of methodological and theoretical perspectives. Examines the genealogy of disability in anthropology and related disciplines, with an emphasis on ethnographic work. Topics addressed include access, embodiment, politics, selfhood, and sexuality.

Restriction: Graduate students only.

**ANTHRO 256B. Secrecy, Security, and Surveillance. 4 Units.**

Explores secrecy and security as fundamental to constructions of public and private domains, relations of citizenship and sovereignty, the militarization of everyday life, and the ways that the fabrics of societies are woven of both trust and deceit.

Restriction: Graduate students only.

**ANTHRO 257A. Natures and Environments. 4 Units.**

Examines social scientific understandings of natural contexts and human milieus via a survey of key analytic categories. Begins by examining historical and ongoing definitions and problems organized around "nature" and "environment" as separate but imbricated concepts.

**ANTHRO 259A. Dissertation Writing Seminar. 4 Units.**

Intended for advanced, post-fieldwork Anthropology graduate students. Emphasis on the presentation of research design and results, problems of ethnographic writing, and qualitative and quantitative data and analysis. Prerequisites: post-fieldwork; graduate standing in Anthropology or consent of instructor.

Restriction: Graduate students only.

**ANTHRO 289. Special Topics in Anthropology. 1-4 Units.**

Studies in selected areas of Anthropology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ANTHRO 290. Dissertation Research. 4-12 Units.**

Dissertation research with Anthropology faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ANTHRO 299. Independent Study. 4-12 Units.**

Independent research with Anthropology faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Arabic (ARABIC)

### Courses

**ARABIC 1A. Fundamentals of Arabic. 5 Units.**

Designed for students with little or no exposure to Arabic. Using real world texts, provides a firm foundation in the orthography, grammar, syntax, and vocabulary of Modern Standard Arabic. Introduces students to Arab world cultures.

Prerequisite: Placement into ARABIC 1A.

Overlaps with ARABIC S1AB.

Restriction: ARABIC 1A and ARABIC S1AB may not be taken for full credit.

**ARABIC 1B. Fundamentals of Arabic. 5 Units.**

Designed for students with little or no exposure to Arabic. Using real world texts, provides a firm foundation in the orthography, grammar, syntax, and vocabulary of Modern Standard Arabic. Introduces students to Arab world cultures.

Prerequisite: ARABIC 1A. ARABIC 1A with a grade of C or better. Placement into ARABIC 1B is also accepted.

Overlaps with ARABIC S1AB, ARABIC S1BC.

Restriction: ARABIC 1B and ARABIC S1AB and ARABIC S1BC may not be taken for full credit.

**ARABIC 1C. Fundamentals of Arabic. 5 Units.**

Designed for students with little or no exposure to Arabic. Using real world texts, provides a firm foundation in the orthography, grammar, syntax, and vocabulary of Modern Standard Arabic. Introduces students to Arab world cultures.

Prerequisite: ARABIC 1B or ARABIC S1AB. ARABIC 1B with a grade of C or better. ARABIC S1AB with a grade of C or better. Placement is also accepted.

Overlaps with ARABIC S1BC.

### (VI)

**ARABIC 2A. Intermediate Arabic Language and Culture. 4 Units.**

Designed for students to advance their Arabic language skills to intermediate level. Students will develop their understanding of grammar and syntax to a more sophisticated level. Facilitates intermediate-level reading, writing, and speaking skills. Fosters college-level cultural literacy.

Prerequisite: ARABIC 1C or ARABIC S1BC. ARABIC 1C with a grade of C or better. ARABIC S1BC with a grade of C or better. Placement into ARABIC 2A is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

### (VIII)

**ARABIC 2B. Intermediate Arabic Language and Culture. 4 Units.**

Designed for students to advance their Arabic language skills to intermediate level. Students will develop their understanding of grammar and syntax to a more sophisticated level. Facilitates intermediate-level reading, writing, and speaking skills. Fosters college-level cultural literacy.

Prerequisite: ARABIC 2A. ARABIC 2A with a grade of C or better. Placement into ARABIC 2B is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

### (VIII)

**ARABIC 2C. Intermediate Arabic Language and Culture. 4 Units.**

Designed for students to advance their Arabic language skills to intermediate level. Students will develop their understanding of grammar and syntax to a more sophisticated level. Facilitates intermediate-level reading, writing, and speaking skills. Fosters college-level cultural literacy.

Prerequisite: ARABIC 2B. ARABIC 2B with a grade of C or better. Placement into ARABIC 2C is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)****ARABIC 10A. Arabic Peer-to-Peer Language Mentor Program. 1 Unit.**

Peer-to-Peer Language Mentor Program in which student mentors work with student mentees to increase the language skills of both participants. One hour weekly meetings. ARABIC 10A is for language mentors.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**ARABIC 10B. Arabic Peer-to-Peer Language Mentor Program. 1 Unit.**

Peer-to-Peer Language Mentor Program in which student mentors work with student mentees to increase the language skills of both participants. One hour weekly meetings. ARABIC 10B is for language mentees.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**ARABIC 51. Introduction to the Koran. 4 Units.**

An introduction to understanding the Koran and its significance to Muslim life, culture, and history. An overview of scholarly traditions related to the Koran, and its critics. Close readings of the Koran in English translation.

**(IV, VIII)****ARABIC 199. Independent Study. 4 Units.**

Research paper required.

Repeatability: May be repeated for credit unlimited times.

## Armenian (ARMN)

### Courses

**ARMN 1A. Elementary Armenian. 5 Units.**

Written and conversational Armenian for students with no knowledge of the language. Students learn the Armenian alphabet, read and comprehend simple texts, and carry basic conversation. Emphasis on reading and comprehension, grammar rules, and basic composition.

Prerequisite: Placement into ARMN 1A.

**ARMN 1B. Elementary Armenian. 5 Units.**

Continues development of the fundamentals of Armenian, including comprehension, reading of simple texts, basic conversation, and writing with a fair degree of grammatical correctness. Students learn basic reading, writing, and sentence structure through lectures, games, and assignments.

Prerequisite: ARMN 1A. ARMN 1A with a grade of C or better. Placement into ARMN 1B is also accepted.

**ARMN 1C. Elementary Armenian. 5 Units.**

Focus on building grammatical knowledge of the Armenian language and developing skills in reading, writing, listening, and speaking. Includes a strong emphasis on expanding vocabulary and developing oral proficiency in higher/formal registers.

Prerequisite: ARMN 1B. ARMN 1B with a grade of C or better. Placement into ARMN 1C is also accepted.

**(VI)**

**ARMN 2A. Intermediate Armenian. 4 Units.**

Designed to develop students' ability to communicate further orally and in writing in Armenian (Western or Eastern) by consolidating knowledge of grammar, increasing vocabulary, and developing reading, comprehension, and writing.

Prerequisite: ARMN 1C. ARMN 1C with a grade of C or better. Placement into ARMN 2A is also accepted.

(VIII)

**ARMN 2B. Intermediate Armenian. 4 Units.**

Designed to develop students' ability to communicate further orally and in writing in Armenian (Western or Eastern) by consolidating knowledge of grammar, increasing vocabulary, and developing reading, comprehension, and writing.

Prerequisite: ARMN 2A. ARMN 2A with a grade of C or better. Placement into ARMN 2B is also accepted.

(VIII)

**ARMN 2C. Intermediate Armenian. 4 Units.**

Designed to develop students' ability to communicate further orally and in writing in Armenian (Western or Eastern) by consolidating knowledge of grammar, increasing vocabulary, and developing reading, comprehension, and writing.

Prerequisite: ARMN 2B. ARMN 2B with a grade of C or better. Placement into ARMN 2C is also accepted.

(VIII)

## Art (ART)

### Courses

**ART 1A. Art in Context: History, Theory, and Practice. 4 Units.**

First in a three-quarter foundation sequence introducing students to a broad range of contemporary art, media, and practices in relation to their twentieth-century cultural and historical antecedents. ART 1A deals specifically with contemporary painting and photography.

Restriction: Art Majors have first consideration for enrollment.

(IV)

**ART 1B. Art in Context: History, Theory, and Practice. 4 Units.**

Deals with film/video/performance. Concerned with the development of modern/contemporary film, video, and performance, with a focus on experimental and avant-garde production from the early twentieth-century to today.

Restriction: Art Majors have first consideration for enrollment.

(IV)

**ART 1C. Art in Context: History, Theory, and Practice. 4 Units.**

Third in a three-quarter foundation sequence introducing students to a broad range of contemporary art, media, and practice in relation to their twentieth-century cultural and historical antecedents. Deals specifically with space and cyberspace.

Restriction: Art Majors have first consideration for enrollment.

(IV)

**ART 8. Changing Creativity. 4 Units.**

Explores creativity as a changing concept in historical and contemporary terms from the perspectives of producers, consumers, and institutions. Encompasses international perspectives and the role of new technologies in considering creativity as a resource for innovation and social change.

(IV)

**ART 9A. Visual Culture: Media, Art, and Technology. 4 Units.**

Examines creative activities in all spheres of life, including the 'artistic' impulses that dwell in the individual. Culture is addressed in broad terms of the many institutions and cultural forces that shape everyday activities of listening, seeing, doing.

Restriction: Art Majors have first consideration for enrollment.

(IV)

**ART 9B. Visual Culture: A Culture Divided. 4 Units.**

Throughout the 1980s and 1990s, controversies flourished in the mainstream media over purportedly obscene art, anti-American writing, and moral decay, among other issues. Examines these new conflicts as they manifest themselves in public life and everyday experience.

Restriction: Art Majors have first consideration for enrollment.

(IV)

**ART 9C. Visual Culture: Thematic Investigations. 4 Units.**

Considers a broad range of concerns and questions raised by various acts of appropriation in contemporary art and visual culture, such as originality, authenticity, authorship, translation, audience and aesthetics, temporal dimensions of a work, and context.

Restriction: Art Majors have first consideration for enrollment.

(IV)

**ART 11A. Topics in History of Contemporary Art. 4 Units.**

Surveys mid-nineteenth and twentieth-century art production, from modernity through post-modernity, in a historical and cultural context.

Prerequisite: ART 9A

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Art Majors only.

**ART 12A. Art, Design, and Electronic Culture. 4 Units.**

Introduction to historical and theoretical foundations of digital media art, tracing how information technologies seeded growth of new expressive medium. Considers how today's pervasive digital culture evolved through interdisciplinary collaborations between artists, engineers, scientists, scholars.

(IV)

**ART 12B. Technology, Culture, and Society: Steam to Steampunk. 4 Units.**

A survey of the ongoing interactions between technological and social change through the 19th century and 20th century, with special attention to the history of computing, changing arts and cultural practices, and the idea of the Anthropocene.

(IV)

**ART 12C. Intelligences of Arts. 4 Units.**

Introduces contemporary neuroscience and new approaches to cognition – embodied, enactive, extended, situated, distributed. Reviews the history of related ethological, biological, psychological, technological, and philosophical traditions. Considers arts and cultural practices from these and other perspectives, and considers case studies.

(III)

**ART 20A. Basic Drawing I. 4 Units.**

Encourages an investigation of the premises and limits of drawing, primarily, but not inevitably, as a two-dimensional medium. Includes slide presentations and discussions of the historical uses of a wide range of drawing. Materials fee.

Restriction: Art Majors have first consideration for enrollment.

**ART 20B. Basic Drawing II. 4 Units.**

Continuation of the investigation initiated in ART 20A, with an emphasis on experimentation, personal investigation, and development of conceptual working premises, as well as the acquisition of necessary skills. Group discussion and critique are emphasized. Materials fee.

Prerequisite: ART 20A

Restriction: Art Majors have first consideration for enrollment.

**ART 30A. Basic Painting I. 4 Units.**

Examination of the fundamental components of painting: color, form, space, surface, scale, and content. Studio work, slide presentations, and critiques of student work. Materials fee.

Restriction: Art Majors have first consideration for enrollment.

**ART 30B. Basic Painting II. 4 Units.**

Further examinations of the essential qualities of painting: color, form, space, surface, scale, and content. Studio work, slide presentations, and critiques of student work. Materials fee.

Prerequisite: ART 30A

Restriction: Art Majors have first consideration for enrollment.

**ART 40. Basic Sculpture. 4 Units.**

The practice of sculpture in the contemporary arts; inclusion of spatial interventions, site-specific and environmental design, appropriation of found materials; techniques in cutting joining, and assembly of wood, metals, and plastics. May include casting, welding, and ceramics. Materials fee.

Restriction: Art Majors have first consideration for enrollment.

**ART 50A. Matter and Media . 4 Units.**

A project-based introduction to tools and approaches for creating and sharing digital media content within Internet-mediated social environments, with a particular emphasis on art-making and personal expression. Includes an overview of basic user experience and interaction design principles.

**ART 50B. Interaction and Experience. 4 Units.**

An overview of digital video and audio production for the Web, emphasizing art-making and personal expression. Includes digital media aesthetics and conceptual design, basic audio and video recording, and fundamentals of desktop video, audio, and Web authoring software applications.

Prerequisite: ART 50A

**ART 50C. Digital Media: Interaction Design. 4 Units.**

Principles and practices of interaction design for interactive digital media systems that provide for active involvement of the participant. Students gain experience with interaction design issues through a series of media art projects, emphasizing art-making and personal expression.

Prerequisite: ART 12A and ART 12B and ART 50A and ART 50B

**ART 51. Basic Ceramic Sculpture. 4 Units.**

Exploration of use of clay as sculptural basis with an emphasis on development of an idea and its relation to contemporary and experimental art practice. Hand-building, glazing, finishing processes, and use of other structural materials. Materials fee.

Restriction: Art Majors have first consideration for enrollment.

**ART 65A. Foundations in Media Design. 4 Units.**

Provides an overview of media design in the digital age, covering principles of design for different media (2D, time-based, interactive); history of relationship between art and design; and practice in working with different design approaches. Materials fee.

Restriction: Art Majors have first consideration for enrollment.

**ART 65B. Foundations in Internet Art and Design. 4 Units.**

Introduction to creating art for the Internet, covering history and structure of networks; key types of net-based interactivity; basics of Web design and scripting. Materials fee.

Prerequisite: ART 65A. Recommended: ART 11B.

Restriction: Art Majors have first consideration for enrollment.

**ART 65C. Gizmology and Kinetics. 4 Units.**

Provides students with basic skills in materials, construction and design applicable to making machines, musical instruments and things with moving parts enabling work in kinetic sculpture, custom interactive systems, Mechatronics, Robotics, and Maker/DIY culture. Materials fee.

**ART 71A. Introduction to Photography I. 4 Units.**

Introduction to technical underpinnings emphasizing photography as a contemporary art practice. Topics include 35mm non-automatic camera operation, exposure and lighting, black and white printing, introduction to digital photography, discussion of critical and historical issues. Materials fee.

Restriction: Art Majors have first consideration for enrollment.

**ART 71B. Introduction to Photography II. 4 Units.**

Techniques covered include medium and large format cameras, digital photography, studio lighting, digital and analog color printing, mural room. Conceptual direction is developed through critiques, critical readings, discussions, slide lectures. Materials fee.

Prerequisite: ART 71A

Restriction: Art Majors have first consideration for enrollment.

**ART 81A. Digital Filmmaking Production I. 4 Units.**

Introduction to three production stages of video making. Study of the narrative structure of cinema and acquisition of video production skills in camera, lighting, sound, and editing. Production work, readings, and screenings outside of class are assigned. Materials fee.

Restriction: Art Majors have first consideration for enrollment.

**ART 81B. Digital Filmmaking Production II. 4 Units.**

Focuses on video stage production, technical skills including camera operation, stage lighting, sound recording, and construction of basic scenic elements. Emphasis is placed on the function and responsibilities of the production crew and proper working and safety procedures. Materials fee.

Prerequisite: ART 81A

Restriction: Art Majors have first consideration for enrollment.

**ART 91. Basic Performance Art. 4 Units.**

Exploration of objects, gesture, action, text, image, and media to create narrative or non-narrative works. Elements of theory and history of performance art are discussed to illustrate techniques and styles to understand, identify, and articulate artistic vision and voice.

Repeatability: May be taken for credit 2 times.

Restriction: Art Majors have first consideration for enrollment.

**ART 95. SPECIAL TOPICS IN BASIC MEDIA. 4 Units.**

Basic instruction in media or disciplines not otherwise represented in the regular curriculum. Topics vary according to the instructor.

Repeatability: Unlimited as topics vary.

Restriction: Art Majors have first consideration for enrollment.

**ART 100. Special Topics in Art. 4 Units.**

Materials fee, topic dependent.

Prerequisite: ART 9A. Lower-division writing strongly recommended.

Repeatability: May be taken for credit 6 times as topics vary.

Restriction: Art Majors only.

**ART 101W. Artists as Writers. 4 Units.**

Contemporary art practice involves text, as final form or an integral element. Many contemporary artists consider writing as essential to their practice. Covers historical and contemporary uses of text and image as well as artists' writing.

Prerequisite: ART 9A and ART 11A. Satisfactory completion of the lower-division writing requirement.

Restriction: Art Majors only.

**(Ib)**

**ART 106A. Programming for Artists. 4 Units.**

Programming as a means to create interactive artworks with an emphasis on the integration of video, sound, text, and stills. Topics include basic concepts in programming, understanding the limits of code, working with video and audio files, interface design. Materials fee.

Prerequisite: ART 65A. Recommended: ART 11B.

Repeatability: May be taken for credit 2 times.

Restriction: Art Majors only.

**ART 106C. Design for Print. 4 Units.**

Investigates the use of print for communication as an artist. Covers the fundamentals of print design and output using digital media. Materials fee.

Prerequisite: ART 65A. Recommended: ART 11B.

Repeatability: May be taken for credit 2 times.

Restriction: Art Majors only.

**ART 108. Digital Filmmaking Project I. 4 Units.**

Students learn to conceive, develop, and produce original video works building directly upon previously learned skills. Use of video stage and post-production editing facilities. Lectures on video/film subjects, production strategies, readings, screening, field trips, and group critiques. Materials fee.

Prerequisite: ART 81A and ART 81B

Restriction: Art Majors only.

**ART 109. Performance and the Camera. 4 Units.**

Surveys the development of contemporary artists who use performance strategies in the making of videos and films. Students analyze the artist's conceptual approach to performative gestures, actions, and landscapes created for their video or film art.

Prerequisite: ART 1B or ART 81A or ART 91 or ART 128

Restriction: Art Majors only.

**ART 110A. Mechatronic Art I. 4 Units.**

Introduces the practice and theory of analog electronics, emphasizing the design and development of simple interactive systems and the integration of such systems into real-world contexts of performance, installation, sculpture, and automated artifacts. Materials fee.

**ART 110B. Mechatronic Art II. 4 Units.**

Introduces the practice and theory of embedded microcontrollers, digital electronics, coding, sensor interfacing, motor control, and output stages along with mechanical and electromechanical design and construction, emphasizing the integration of such systems into real-world contexts of performance, installation, and art-making. Materials fee.

Prerequisite: ART 110A

**ART 110C. Mechatronic Art III. 4 Units.**

As the capstone to the Mechatronic Art series, students develop major projects utilizing electronics, microcontrollers, sensors, and electromechanical devices, in a methodical and supervised context, with technical, design, and aesthetic advice and critique. Materials fee.

Prerequisite: ART 110A

**ART 113. How to be Clever with Stuff. 4 Units.**

How to Be Clever with Stuff is an introduction to the skilled embodied practices of arts and crafts, working with hand tools, wood, and steel. Class includes technical lecture/demos, short technical assignments, a self-initiated final project, and design drawing. Materials fee.

Restriction: Art Majors have first consideration for enrollment.

**ART 115W. Writing Nearby. 4 Units.**

Art writing is increasingly an area of scholarship unto itself as well as a discursive arm of contemporary art practice. Investigates the politics of art writing as well as training students in its various writing practices.

Prerequisite: ART 9A and ART 11A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only.

**(Ib)****ART 119. Issues in Contemporary Painting. 4 Units.**

Investigation of issues in modern and contemporary art work and criticism, wherein an assessment of Modernist influences is followed by the examination of contemporary painting as a cross-disciplinary practice employing popular culture, 'high art,' theory, and new technology.

Prerequisite: ART 9A. Recommended: Satisfactory completion of the upper-division writing requirement.

Repeatability: May be taken for credit 2 times.

Restriction: Art Majors only.

**ART 119A. Issues in Contemporary Drawing. 4 Units.**

Investigation of drawing as a primary practice rather than a developmental tool. Explores the relationship between Conceptualism, process and content, and considers the historical changes in method, presentation, and theory, from past to present.

Prerequisite: ART 9A

**ART 121A. Afro-Futurism I. 4 Units.**

First of a two-part course on the futuristic artistic vision of Black film, video, and cyberspace. Deals with critical analyses of the Black image in Western Art history, and its association to contemporary Hip Hop culture, art, and music.

Prerequisite: ART 9A. Satisfactory completion of upper-division writing strongly recommended.

Restriction: Art Majors only.

**ART 121B. Afro-Futurism II. 4 Units.**

Second of a two-part course on the futuristic artistic visions of Black film, video, and cyberspace. Deals with modern techno-culture, digital activism, and designing technology based on African aesthetic principles of contemporary Hip Hop International Culture.

Prerequisite: ART 9A. Satisfactory completion of upper-division writing strongly recommended.

Restriction: Art Majors only.

**ART 123B. Issues in Media, Violence, and Fear. 4 Units.**

Violence has been instrumental in story-telling throughout history in art, literature, religion, and entertainment. Continuing presence of media violence provoked debates among parents, politicians, media producers, and academics. Examines history, theory, aesthetics, economics, and politics of violent representation.

Prerequisite: ART 9A. Satisfactory completion of the Upper-Division Writing requirement is recommended.

Restriction: Art Majors only.

**ART 125. Issues in Photography. 4 Units.**

Rigorous investigation of photographic practices and critical writings, the relationship of photography to the construction and maintenance of cultural institutions, the circulation of photographic ideas in society, and photography and technology.

Prerequisite: ART 1A or ART 71A or ART 71B or ART 152A or ART 152B or ART 152C or ART 152D or ART 152E or ART 190B. Recommended: Satisfactory completion of the Upper-Division Writing requirement.

Repeatability: May be taken for credit 2 times.

Restriction: Art Majors only.

**ART 126. Issues in Media and Migration: Asia. 4 Units.**

Media and migration are profound, twinned influences on contemporary globalized experience. A discourse on Asian cultural production and of its transnational dimensions. Students will explore migration in its multiple facets to include migrations of people, ideas, and technologies.

Prerequisite: ART 9A

**ART 126B. Issues in Techno-Arts. 4 Units.**

Addresses issues related to artmaking practices that emerge in tandem with new technologies. Topics include sociopolitical contexts of techno-art; utopic/dystopic framings; key moments in the history of techno-arts.

Prerequisite: ART 9A. Recommended: ART 11B.

Restriction: Art Majors only.

**ART 127B. Issues in Experimental Film History. 4 Units.**

A critical study of experimental film/video art genres and production techniques considering their narrative, structural, iconographic, and cultural aspects. Hollywood narrative, Nouvelle Vague, American Independent, and Video Art compared in terms of production innovation, design, and conceptual content. Materials fee.

Prerequisite: ART 9A

Restriction: Art Majors only.

**ART 128. Issues in New Genres. 4 Units.**

Investigates issues in post-studio practices, including concepts of time, relational aesthetics, site-specificity, institutional critique, and the post-medium condition.

Prerequisite: ART 9A. Recommended: Satisfactory completion of the Upper-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Art Majors only.

**ART 130A. Projects in New Technologies. 4 Units.**

Working with media such as electronic still cameras, desktop publishing, faxes, satellites, virtual reality, digitized imaging. Cultural issues pertinent to the emergence of new technology (e.g., ethical concerns, social impact, copyright laws, nontraditional approaches to distribution, cyberpunk, global markets).

Prerequisite: ART 65A. Recommended: ART 11B and ART 106A.

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 131. Projects in Installation. 4 Units.**

Investigates interior installation in particular spaces. Working in teams, students install, discuss, and remove projects. Technical information and hands-on experience with various media is provided. Materials fee.

Prerequisite: ART 40

Repeatability: May be repeated for credit unlimited times.

**ART 132A. Digital Filmmaking Pre-Production. 4 Units.**

Examines the preparatory and planning stages of video production, including script writing, story boarding, location scouting, script breakdown, and budgeting. Projects may encompass one or more of these stages which will be explored through readings, discussions, and demonstrations. Materials fee.

Prerequisite: ART 81A and ART 81B

Restriction: Art Majors only.

**ART 132B. Digital Filmmaking Post-Production. 4 Units.**

Examines procedures and techniques utilized in video production after principal shooting is completed, including effects processing, composting, sound design, and DVD authoring. Projects focus on these processes, and are explored through readings, discussions, and demonstrations. Materials fee.

Prerequisite: ART 81A and ART 81B

Restriction: Art Majors only.

**ART 133. The Graphic Novel . 4 Units.**

An intensive workshop during which students will create a short graphic novel, taking the process all the way from concept to publication. Course work will focus on understanding how narrative emerges from a combination of visual and textual elements.

Prerequisite: ART 65A. Strongly recommended: ART 106C.

**ART 138. Place Making and Public Art. 4 Units.**

How do art interventions in public spaces inform our definition of 'place' and develop culturally informed audiences? Students will engage in class projects and group investigations that question the traditional and institutional conceptual boundaries of exhibition/distribution.

Prerequisite: ART 40 and ART 9A

Restriction: Art Majors only.

**ART 141. Digital Filmmaking Advanced Project I. 4 Units.**

Incorporating narrative structures in a multi-screen context. Students design and produce an active space in which activities will move from one screen to another. Materials fee.

Prerequisite: ART 81A and ART 81B

Restriction: Art Majors only.

**ART 144. Artist Books as Objects. 4 Units.**

Are artist books still relevant in the contemporary creative community? Focusing on intellectual content and raw physicality, students will explore this question and image/text relationships by creating handmade one-of-a-kind or edition book projects utilizing various mechanical reproduction techniques.

Prerequisite: (ART 20A or ART 30A or ART 40 or ART 51 or ART 65A or ART 71A or ART 81A or ART 91) and ART 9A

**ART 150. Advanced Studio Topics--Painting. 4 Units.**

Provides an intensive and specialized working environment. Thematic issues and material strategies will be explored. Materials fee.

Prerequisite: ART 30B

Repeatability: Unlimited as topics vary.

Restriction: Art Majors only.

**ART 150C. Advanced Drawing . 4 Units.**

Advanced studio problems in visual exploration. Students pursue individual solutions to self-defined and presubscribed projects. Techniques/materials are individual choice. Continual analysis of the personal process.

Prerequisite: ART 20B

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 150F. Advanced Figure Drawing. 4 Units.**

Students develop technical skills in rendering the figure. Live model sessions and an introduction to anatomy. Investigates use of the figure in contemporary art. Materials fee.

Prerequisite: ART 20B

Repeatability: May be taken for credit 2 times.

Restriction: Art Majors only.

**ART 150G. Advanced Figure Painting. 4 Units.**

Students develop technical skills in painting the figure. Live model sessions and projects that investigate the use of the figure in contemporary art.

Prerequisite: ART 150F

**ART 151. Advanced Studio Topics--Sculpture. 4 Units.**

Provides an intensive and specialized working environment. Thematic issues and material strategies will be explored. Materials fee.

Prerequisite: ART 40

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 152A. Advanced Studio Topics: Photography. 4 Units.**

Focused investigation of a range of issues in photographic practice, with an emphasis on developing individual student projects, refining critical thinking, and conceptual framing. Technical topics covered as required. Readings, lectures, critiques, labs. Materials fee.

Prerequisite: ART 71B

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 152B. Documentary Photography. 4 Units.**

Documentary practice is examined through the realization of photo-based projects. Thematic focus of student's choosing will be refined through lectures, discussion, technical demonstrations, field trips, labs, and individual meetings. Materials fee.

Prerequisite: ART 71B

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 152C. The Public Image. 4 Units.**

Strategies for artistic intervention in the public circulation of images are examined alongside the role images play in constructing public identity. Individual or collaborative student projects will be directed around course themes. Materials fee.

Prerequisite: ART 71B

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 152D. The Photographic Tableau. 4 Units.**

Examines and develops photographic projects intended for traditional artistic venues (i.e., galleries and museums). In addition to exploring appropriate techniques and presentation strategies, students consider the interdependency between construction of images and semantic shaping of traditional art venues. Materials fee.

Prerequisite: ART 71B

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 152E. The Constructed Image. 4 Units.**

A studio investigation of theoretical ideas, critical possibilities, historical precedents, and various techniques involving the production of fabricated images. Techniques may include montage, digital, chemical and in-camera manipulations, studio constructions, appropriations, performance, and projected images. Materials fee.

Prerequisite: ART 71B

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 152F. Seminar Production Component. 4 Units.**

Photographic and/or inter-media production course tied to a specific Issues course (for example, Issues in Photography, Issues in Feminism, Issues in New Genres). Critiques, labs, field trips, discussion, demonstrations. Materials fee.

Prerequisite: ART 71B

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 153. Digital Filmmaking Advanced Project II. 4 Units.**

Directed to the production of individual or collaborative videotapes, using studio, portable camera, editing facilities, and sound and computer elements. Emphasis will be on individually initiated projects. Readings and screenings are assigned. Materials fee.

Prerequisite: ART 81A and ART 81B

Restriction: Art Majors only.

**ART 154. Advanced Studio Topics: Performance. 4 Units.**

An intensive investigation of the practice of performance art, with an emphasis on the development of individual projects, and the refinement of various technical skills, as well as audiences, spaces, and cultural connections.

Prerequisite: ART 91 or ART 109 or ART 128

Repeatability: May be taken for credit 3 times.

Restriction: Art Majors only.

**ART 156. Advanced Studio Topics: Ceramic Sculpture. 4 Units.**

Discussion of ideas, techniques, and personal control of form. Clay body, fabrication, glazing, and firing. Emphasis on development of personal direction. Materials fee.

Prerequisite: ART 51

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 166A. Digital Filmmaking Web Series. 4 Units.**

Original video projects produced in collaborative teams combining advanced video students with students from other areas, including Dance, Drama, and Music. Shoots may be carried out on the video stage as well as field locations. Materials fee.

Prerequisite: ART 81A and ART 81B

Restriction: Art Majors only.

**ART 170. Advanced Projects. 4 Units.**

Students working in different mediums will focus on ambitious research, planning, development, and experimentation, leading to a single work or focused series that is large in scope. The project will be exhibited and documented at the end of the quarter. Materials fee.

Prerequisite: ART 150 or ART 150C or ART 151 or ART 152A or ART 152B or ART 152C or ART 152D or ART 152E or ART 152F or ART 153 or ART 166A or ART 190 or ART 190B or ART 190C

Restriction: Art Majors only.

**ART 189. Critical Aesthetics . 4 Units.**

Surveys critical thought that has influenced twentieth-century art production, preparing the student to engage contemporary art with a critical eye, specifically addressing aesthetic and political debates of the historical avant-garde, the neo-avant garde, and postmodern culture.

Prerequisite: ART 1A and ART 1B and ART 1C

Restriction: Upper-division students only. Art Majors only.

**ART 190. Senior Project and Critique. 4 Units.**

Directed-study critique class in preparation for final project and life after graduation; documentation and portfolio preparation for graduate school. Investigation of exhibition spaces and funding opportunities, participation in artists' communities outside the university, and artists' rights issues.

Repeatability: May be repeated for credit unlimited times.

Restriction: Seniors only. Art Majors only.

**ART 190B. Senior Projects and Critique in Photography. 4 Units.**

Directed group study focused on production of photographic projects of significant scope and ambition. Emphasis on preparation for continued study and/or practice in photography in advanced settings beyond the undergraduate university experience. Materials fee.

Prerequisite: ART 1A and ART 1B and ART 1C and ART 71A and ART 71B

Repeatability: May be repeated for credit unlimited times.

Restriction: Seniors only. Art Majors only.

**ART 197. Art Internship. 1-4 Units.**

Under faculty supervision, students participate directly in a variety of art institution settings, including museums, galleries, and nonprofit organizations.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

Restriction: Juniors only.

**ART 198. Honors Exhibition. 4 Units.**

Preparation, installation, and participation in the annual honors exhibition. Materials fee.

Grading Option: Pass/no pass only.

Restriction: Upper-division students only. School of Arts Honors students only.

**ART 199. Independent Study. 1-4 Units.**

Individual study or directed creative projects as arranged with faculty member. Materials fee.

Repeatability: May be repeated for credit unlimited times.

**ART 210. First-Year Graduate Seminar. 4 Units.**

Introductory theory class to contemporary art: intellectual history, theoretical antecedents, and current critical concerns.

Restriction: Graduate students only.

**ART 215. Graduate Seminar Topics. 4 Units.**

In-depth discussion of contemporary art production in relation to a variety of theoretical, cultural, and historical topics. Material is determined by the given instructor's current research interest. Topics vary.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ART 220. Graduate Seminar: Issues in Contemporary Art. 4 Units.**

Classroom interaction with artists, curators, critics, lecturers from fields outside of the arts or from cross-disciplines. Includes recommended readings, discussions, panel participation, writing assignments.

Prerequisite: ART 210

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

**ART 230. Graduate Group Critique. 4 Units.**

Focus on studio production. Students are expected to help foster and develop an environment in which serious and sophisticated peer critique can take place.

Repeatability: May be taken for credit 9 times.

Restriction: Graduate students only.

**ART 236. Graduate Topics in Studio Production. 4 Units.**

Graduate group study of a specific medium or art practice (e.g., painting; video, installation, photography, sculpture/3D, performance, digital media, public art, sound art; film). Includes consideration of technical, theoretical, historical, and/or formal issues.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ART 240. Interdisciplinary Projects. 4 Units.**

Intensive faculty-led discussion of in-progress graduate studio projects--can be discipline driven or working across fields in a rigorous interdisciplinary studio environment where students meet with the professor both individually and in small groups.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ART 250. Directed Reading and Research. 4 Units.**

Independent study with a supervising faculty member to direct academic research, develop bibliographies, and discuss assigned readings.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ART 251. Special Topics Seminar. 4 Units.**

Directed reading and/or study group on a given research topic. Agreed-upon meeting structure may be flexible in order to accommodate off-campus field trips and travel.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ART 255. Graduate Interdisciplinary and Collaborative Projects. 4 Units.**

For graduate students working collaboratively across the School of the Arts or cross-university. May be team taught with one of the faculty members based in the Department of Art.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ART 261. Graduate Thesis Writing Seminar. 4 Units.**

Seminar for writing as a component of the thesis. Different models of writing, text, and spoken word will be discussed. Required second year.

Corequisite: ART 262

Prerequisite: ART 210 and ART 215 and ART 220

Restriction: Graduate students only.

**ART 262. Graduate Thesis Independent Study. 1-4 Units.**

Tutorials and directed study in thesis writing, research and/or studio production with thesis committee chair and/or thesis committee members to be taken during final quarters of study.

Corequisite: ART 261

Prerequisite: ART 210 and ART 215 and ART 220

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ART 263. Graduate Thesis, Exhibition Critique. 4 Units.**

Group critique required for matriculating M.F.A. students during the quarter in which their thesis exhibitions are scheduled. Public presentation/lecture on student's work required.

Prerequisite: ART 210 and ART 215 and ART 220 and ART 230 and ART 240 and ART 261 and ART 262

Restriction: Graduate students only.

**ART 264. Critical and Curatorial Thesis Exhibition. 8 Units.**

Intensive tutorial geared toward execution of professional gallery exhibition, which is one half of the degree requirement for the M.F.A. concentration in Critical and Curatorial Studies. Must be taken under direction of Committee Chair.

**ART 280. Contemporary Exhibition Systems. 4 Units.**

Investigates contemporary case studies of curatorial practice. Sometimes taught in collaboration with a host institution. The history, theory and criticism or curatorial practice are tested through the explication of real exhibitions.

Prerequisite: ART 280A

Repeatability: May be taken for credit 4 times.

**ART 280A. Introduction to Exhibition Systems. 4 Units.**

Introduces the basics of curating, covering the fundamentals of collection, research, fundraising, publicity, and installation. Also introduces the related categories of public programming and art criticism.

Restriction: M.F.A. students only.

**ART 399. University Teaching. 4 Units.**

Limited to Teaching Associates working under the active guidance and supervision of a regular rank faculty member responsible for curriculum and instruction at the University.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit for 12 units.

Restriction: Graduate students only.

# Art History (ART HIS)

## Courses

### **ART HIS 40A. Ancient Greek and Roman Art, and Architecture. 4 Units.**

An overview of Greek and Roman art, and related ancient visual cultures. Considers how and why the peoples of antiquity created art and architecture, as well as the significance of these works within their social, religious, and historical contexts.

(IV and VIII ).

### **ART HIS 40B. Arts of Europe: Medieval and Renaissance. 4 Units.**

Focuses on the art of the Mediterranean area and Europe between ca. A.D. 350 and 1600. By means of movements and artists, examines the cultural identities of the Christian, Islamic, and Early Modern worlds.

(IV, VIII)

### **ART HIS 40C. Early Modern and Modern Art in Europe and America. 4 Units.**

The visual arts from the seventeenth to the twenty-first centuries. Explores the purposes and meaning of painting, sculpture, and architecture in relation to artists, viewers, and historical events.

(IV, VIII)

### **ART HIS 42A. History of Asian Art: Arts of India. 4 Units.**

Emphasizing Hindu, Buddhist, and Islamic art of greater India (Pakistan, Bangladesh, Sri Lanka) from proto-historic to modern times. Themes include art as a source of history, commercial and religious pan-Asian connections, nationalism, and modern versus historical identities.

(IV, VIII)

### **ART HIS 42B. History of Asian Art: Arts of China. 4 Units.**

An introduction to the arts and visual culture of China from Neolithic to modern times. Themes includes the representation of power, death and the afterlife, popular culture and elite arts, landscape and women's painting, and concludes with contemporary China.

(IV, VIII)

### **ART HIS 42C. History of Asian Art: Arts of Japan. 4 Units.**

Examines compelling images and objects of spirit and power created in Japan over many centuries. Themes include Buddhist icons, narrative illustration, popular prints, architecture, manga, and the avant-garde. Japanese interactions with Korean, Chinese, and European culture are emphasized.

(IV, VIII)

### **ART HIS 42D. History of Asian Art: Arts of Islam. 4 Units.**

Examines past and present Islamic art, spanning 1,500 years and extending from the Americas through Indonesia. Themes include Islam as a globalizing force, the definition of 'Islamic,' and the competing roles of religion and politics in making art.

(IV, VIII)

### **ART HIS 42E. Art and Archaeology of Ancient Persia, Egypt, and Mesopotamia. 4 Units.**

An introduction to the art and archaeology of ancient Egypt, Mesopotamia, Anatolia, Persia, and the wider Iranian world from the Neolithic to the coming of Islam. Considers wider impact on the ancient and early medieval worlds and their present legacy.

(IV and VIII ).

### **ART HIS 44. Image Collision: A Multicultural Approach to Images and Their Users. 4 Units.**

Comparisons between present-day visual culture and pre-modern art to re-evaluate the ways in which one understands the contemporary histories of underrepresented groups in the United States.

(IV and VII ).

### **ART HIS 55. Disneyland. 5 Units.**

From Dole Whips to roller coasters, the focus is on the innovations in industrial automation and manufacturing that made Disneyland's attractions possible. Discusses fandom, guest experiences, operating procedures, technical and design patents, and how rides work.

(II and IV ).

**ART HIS 100. Studies in Ancient Art . 4 Units.**

Topics in Egyptian, Prehistoric, and Etruscan art of the Mediterranean area treated with specific reference to relevant cultural and historical settings. Specialized courses in Greek and Roman art are also taught.

Repeatability: Unlimited as topics vary.

**ART HIS 103. Studies in Greek Art. 4 Units.**

Topics in Greek art, architecture, and topography from the Prehistoric period through the end of the fourth century B.C.E.

Repeatability: Unlimited as topics vary.

**ART HIS 107. Studies in Roman Art. 4 Units.**

Topics in Hellenistic and Roman art and architecture; stresses historical and political background.

Repeatability: Unlimited as topics vary.

**ART HIS 110. Studies in Medieval Art. 4 Units.**

Specialized topics in Medieval art and architecture in Europe, the Mediterranean area, and the Near East between the fourth and fifteenth centuries. Examples: the Art of the Migration Period, Medieval City.

Repeatability: Unlimited as topics vary.

**ART HIS 111B. Byzantine Art: 650-1450. 4 Units.**

Studies in the development of the art and architecture of the Byzantine Empire between ca. 650 and 1450.

**ART HIS 112. Studies in Early Christian and Byzantine Art. 4 Units.**

Selected topics on the development of the art and architecture of the Later Roman and Byzantine Empires between ca. 300 and 1453. Examples: Early Christian architecture, Byzantine painting.

Repeatability: Unlimited as topics vary.

**ART HIS 114. Studies in Western Medieval Art. 4 Units.**

Selected topics on the development of art and architecture in Western Europe between ca. 700 and 1400. Examples: Romanesque painting, Gothic architecture.

Repeatability: Unlimited as topics vary.

**ART HIS 120. Studies in Renaissance and Baroque Art. 4 Units.**

Selected topics on the art and architecture of Europe between the fifteenth and eighteenth centuries. Examples: Renaissance and Baroque prints, Bruegel to Rubens.

Repeatability: Unlimited as topics vary.

**ART HIS 121. Studies in Southern Renaissance Art. 4 Units.**

Selected topics determined by individual faculty members exploring historical developments and individual artists of the fifteenth and sixteenth centuries in Italy and Spain. Examples: Renaissance Venice, Age of Michelangelo.

Repeatability: Unlimited as topics vary.

**ART HIS 123. Studies in Northern Renaissance Art. 4 Units.**

Selected topics determined by individual faculty members exploring historical developments and individual artists of the fifteenth and sixteenth centuries in Northern Europe. Examples: Late Medieval art, painting from Van Eyck to Bosch.

Repeatability: Unlimited as topics vary.

**ART HIS 125. Studies in Southern Baroque Art. 4 Units.**

Selected topics determined by individual faculty members exploring historical developments and individual artists of the seventeenth and eighteenth centuries in Italy and Spain. Example: Rome in the seventeenth century.

Repeatability: Unlimited as topics vary.

**ART HIS 128. Studies in Northern Baroque Art. 4 Units.**

Selected topics determined by individual faculty members exploring historical developments and individual artists of the seventeenth and eighteenth centuries in Northern Europe. Example: the Age of Rembrandt.

Repeatability: Unlimited as topics vary.

**ART HIS 134C. Modern European Art: From Impressionism to the Fauves. 4 Units.**

History of European painting and urban transformation from 1851 to 1907, when Paris stood strong as the unquestioned cultural capital of the nineteenth century.

**ART HIS 134D. Modern European Art: From Cubism to Surrealism. 4 Units.**

History of European painting, sculpture, and design from 1907 to 1940, when Paris and painting lost their dominance as other cultural centers and other media claimed renewed importance.

**ART HIS 134E. Topics in Modern European Art. 4 Units.**

Selected topics within the period 1643 to 1940.

Repeatability: Unlimited as topics vary.

**ART HIS 140A. History of Contemporary Art. 4 Units.**

Selected topics exploring historical developments of contemporary art from 1945 to the present. Examples: American Art 1945-1989, European Art 1945-1989, Art After 1989. Works of art are studied as cultural, social, and political practices.

Repeatability: Unlimited as topics vary.

**ART HIS 140B. Topics in Contemporary Art. 4 Units.**

Selected topics exploring artistic movements, artists, and/or issues in contemporary art from 1945 to the present. Examples include Junk Art, Countercultures, Art and Politics Now. Works of art are studied as cultural, social, and political practices.

Repeatability: Unlimited as topics vary.

**ART HIS 145A. Studies in Modern Architecture. 4 Units.**

Architecture and related design practices from the late eighteenth century through 1945 are studied in relation to social, aesthetic, technological, and political questions.

Repeatability: Unlimited as topics vary.

**ART HIS 145B. Studies in Architecture after 1945. 4 Units.**

Architecture and related design practices from 1945 through present are studied in relation to social, aesthetic, technological, and political questions.

Repeatability: Unlimited as topics vary.

**ART HIS 145C. Topics in the History of Modern and Contemporary Architecture. 4 Units.**

Varying topics from the late eighteenth century to the present. Architecture and related design practices are studied in relation to social, aesthetic, technological, and political questions.

Repeatability: Unlimited as topics vary.

**ART HIS 150. Studies in Asian Art. 4 Units.**

Topics include visual studies in China, Japan, Korea and India.

Repeatability: Unlimited as topics vary.

**ART HIS 151B. Later Imperial China. 4 Units.**

Investigates the uses, subjects, styles, and social contexts of art made in the later Imperial dynasties, whether court art, religious art, women's painting, scholar painting, or art for the market.

**ART HIS 151C. Modern China. 4 Units.**

Examines the evolution and media of Chinese art and visual culture in the context of modern China's sweeping historical, social, and political changes.

**ART HIS 155A. Ancient India. 4 Units.**

Examines the visual and religious history of the region defined as 'India' today, but necessarily encompassing modern Bangladesh and Pakistan. Culminates with the supposed Golden Age of the Gupta empire and its far-reaching legacies.

Same as HISTORY 170A, REL STD 122.

Concurrent with ART HIS 255A.

**ART HIS 155B. Medieval India. 4 Units.**

Begins with the Gupta period's aesthetic legacies in South Asia's architecture, sculpture, and painting. Explores the dispersal of Islam throughout South Asia, including the Muslim communities of southern India.

Same as HISTORY 170B, REL STD 123.

Concurrent with ART HIS 255B.

**ART HIS 155C. Modern India. 4 Units.**

Examines the imperial patronage of the Mughal emperors, covering their territorial holdings extending from Afghanistan through western Bangladesh. Continues with the 'aftermath' of the Mughal empire and the rise of British commercialism and colonialism.

**ART HIS 155D. Topics in the Art and Architecture of India. 4 Units.**

Studies in selected areas of Art and Architecture of India. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**ART HIS 156. Art and Globalization, Modern. 4 Units.**

Study of modern art as a cause and expression of increasing contacts between cultures. Focusing on regions in Asia and the Americas, adoption of European oil painting, indigenous art movements, and national capital architecture are explored.

**ART HIS 162C. Contemporary Japan. 4 Units.**

Study of various media of Japanese art from the time of war defeat in 1945 until the present. Topics include artists' responses to the nuclear bomb, the aesthetics of the 'economic miracle,' avant-garde groups, manga, and innovations in architecture.

**ART HIS 163. Asian American Art, Contemporary. 4 Units.**

Study of the Asian American experience in contemporary art and visual culture. Art by Asian Americans of diverse backgrounds as well as the history of visualization of Asian identities in American art/visual culture.

**ART HIS 164A. Modern African American Art. 4 Units.**

Investigates the history of modern African American art; emphasis on the politics of representation. Examines art in a variety of media from material culture and textiles to painting and photography. Issues of migration, nationalism, gender, sexuality, and hybridity are discussed.

Same as AFAM 111A.

**ART HIS 164B. Contemporary African American Art. 4 Units.**

Investigates the history of contemporary African American art; emphasis on the politics of representation. Explores art in a variety of media: painting, sculpture, photography, installation, and new media. Cultural politics, appropriation, identity, gender, sexuality, hybridity and civil rights issues discussed.

Same as AFAM 111B.

**ART HIS 164D. African American Women in Art. 4 Units.**

Examines depictions of and by African American women in art and popular culture through a variety of media including textiles, painting, sculpture, photography, and installation. Focuses on African American women's experiences, perspectives, and strategies for contemporary representation.

Same as AFAM 125.

**ART HIS 164E. African Americans and Photography. 4 Units.**

Explores depictions of and by African Americans through photography. Examines the history of photography in relationship to African American culture through a variety of media from early daguerreotype processes to digital imagery.

Same as AFAM 145.

**ART HIS 165A. Early American Art. 4 Units.**

An examination of American visual culture from 1620 to 1860 from the era of European exploration and colonization of the New World to the beginning of the Civil War.

**ART HIS 165B. Nineteenth Century American Art. 4 Units.**

An exploration of American visual culture from 1860 to 1900, including paintings, sculpture, and photographs produced during the Civil War and during the decades of prosperity that followed.

**ART HIS 165C. Modern American Art. 4 Units.**

Focusing on the period from 1900 until 1965, this course considers the emergence and institutionalization of modern art in the United States.

**ART HIS 165D. Topics in American Art. 4 Units.**

Varying topics within the period 1620 to 1970. Works of art are studied in their cultural, social, and political contexts.

Repeatability: Unlimited as topics vary.

**ART HIS 180. Topics in the Criticism of Art. 4 Units.**

Selected topics discussed on the theoretical and/or practical dimensions of art historical criticism.

Repeatability: Unlimited as topics vary.

**ART HIS 181. Topics in Museum Studies. 4 Units.**

Addresses the historical and contemporary function of the museum as an instructional device. The function of exhibitions in the public sphere, and the roles of curators, educators, and the public are analyzed.

Repeatability: Unlimited as topics vary.

**ART HIS 183B. 20th Century Photographic History. 4 Units.**

Varying topics within the history of photography in the 20th century. Photographic practice studied in relation to art history, cultural history, and social history.

Repeatability: Unlimited as topics vary.

**ART HIS 183C. Selected Topics in Photographic History. 4 Units.**

Varying topics within the history of photography from the early 19th century to the present. Photographic practice studied in relation to art history, cultural history, and social history. Examples include documentary; pictorialism and art photography; photomontage, photographic books.

Repeatability: Unlimited as topics vary.

**ART HIS 185. Topics in Visual Studies. 4 Units.**

Interdisciplinary topics on the cultural analysis of visual artifacts and practices.

Repeatability: Unlimited as topics vary.

**ART HIS 190W. Art History Methods. 4 Units.**

Theory and practice of art history, with an emphasis on formal and social models of analyzing and writing about art.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Art History Majors only.

(Ib)

**ART HIS 196. Ethics, Law, and Art. 4 Units.**

Addresses a broad range of ethical and legal issues pertaining to art, ownership, looting and theft, museum policies, and cultural heritage.

Concurrent with ART HIS 296.

**ART HIS 198. Advanced Seminar: Topics in Art History. 4 Units.**

Discussion and report-oriented seminar with emphasis on reading, writing, and thinking about problems in art history. Examples: Gothic Cathedral, Portraiture East and West.

Prerequisite: Recommended: ART HIS 190W.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only. Art History Majors have first consideration for enrollment.

Concurrent with ART HIS 298.

**ART HIS 199. Independent Study in Art History. 1-4 Units.**

Supervised, but independent reading or research on art historical topics.

Repeatability: May be taken for credit 4 times.

Restriction: Art History Majors only.

**ART HIS 255A. Ancient India. 4 Units.**

Examines the visual and religious history of the region defined as 'India' today, but necessarily encompassing modern Bangladesh and Pakistan. Culminates with the supposed Golden Age of the Gupta empire and its far-reaching legacies.

Same as IRAN 255A.

Restriction: Graduate students only.

Concurrent with ART HIS 155A.

**ART HIS 255B. Medieval India. 4 Units.**

Begins with the Gupta period's aesthetic legacies in South Asia's architecture, sculpture, and painting. Explores the dispersal of Islam throughout South Asia, including the Muslim communities of southern India.

Same as IRAN 255B.

Restriction: Graduate students only.

Concurrent with ART HIS 155B.

**ART HIS 296. Ethics, Law, and Art. 4 Units.**

Addresses a broad range of ethical and legal issues pertaining to art, ownership, looting and theft, museum policies, and cultural heritage.

Prerequisite: Background in Art History or Legal Studies.

Same as IRAN 296.

Concurrent with ART HIS 196.

**ART HIS 298. Master's Seminar: Topics in Art History. 4 Units.**

Studies in selected areas of Art History. Examples include Gothic Cathedral, Portraiture East and West.

Repeatability: Unlimited as topics vary.

Concurrent with ART HIS 198.

**ART HIS 299. Master's Thesis Research. 4 Units.**

Research and writing of the Master's thesis.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ART HIS 399. University Teaching. 4 Units.**

Limited to teaching assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Arts (ARTS)

### Courses

**ARTS 1. ArtsCore. 4 Units.**

An introduction to the arts in general, and to the arts at UCI. Concentration on (1) the interdisciplinary nature of the arts, and (2) the content of particular arts disciplines.

(IV)

**ARTS 75. Digital Media: Exhibition. 4 Units.**

A discussion and critique course in all media arts. Includes a review of key media arts concepts and the preparation of an end-of-quarter exhibition.

Prerequisite: Proposal submission required.

**ARTS H81. Improvisation and Modes of Research / Creative Expression. 4 Units.**

Through immersion, readings, analysis, and observation, students are trained to recognize, build, and engage a set of "improvisatory" cognitive skills in order to enhance artistic creation, the generation of language, data analysis, and the application of the scientific method.

Restriction: Campuswide Honors Collegium students only. Seniors only.

(IV)

**ARTS 173. Athletics Bands . 1-2 Units.**

Bands support athletics events. Includes Pep Band: Rehearsal and performance of band standards; Marching Band: Exercises and performance involving marching fundamentals, formations, and half-time pageantry; and, Drumline: Study and rehearsal of rudiments, cadences, and arrangements.

Repeatability: Unlimited as topics vary.

**ARTS 199. Independent Study. 1-4 Units.**

Individual study or directed projects as arranged with faculty member.

Repeatability: May be repeated for credit unlimited times.

## Arts and Humanities (ARTSHUM)

### Asian American Studies (ASIANAM)

#### Courses

**ASIANAM 50. Asian American Histories. 4 Units.**

Examines and compares diverse experiences of major Asian American groups since the mid-nineteenth century. Topics include origins of emigration; the formation and transformation of community; gender and family life; changing roles of Asian Americans in American society. Formerly ASIANAM 60A.

Same as HISTORY 15C, SOC SCI 78A.

((III or IV) and VII ).

**ASIANAM 51. The U.S. and Asia. 4 Units.**

Explores the historical and contemporary transnational linkages between the U.S. and regions in Asia and their resultant flows of people, goods, and ideas. Attention given to the role of militarism and processes of globalization, and the histories of cultural contact/conflict.

((III or IV) and VIII ).

**ASIANAM 52. Asian American Communities. 4 Units.**

Examines the renewal of Asian immigration following World War II. Explores contemporary Asian American populations and communities in the U.S., and the impact of contemporary Asian immigration on the U.S. political economy and social order.

Same as SOC SCI 78B.

(III, VII)

**ASIANAM 53. Asian Americans and Race . 4 Units.**

Analyzes the Asian American experience in comparative perspective, which includes comparisons of different ethnic and racial groups, and across gender and class. Possible topics include labor, economy, politics, migration, nation, popular culture, gender, family, sexuality, and multiraciality.

Same as SOC SCI 78C.

(III, VII)

**ASIANAM 54. Asian American Stories. 4 Units.**

Examines stories from Asian American communities through literary texts and other media. Selected themes may include the following: dislocation/relocation, finding/inventing a usable past, poetics/politics in language, identities/ethnicities.

(IV, VII)

**ASIANAM 55. Asian Americans and the Media. 4 Units.**

Investigates popular representations of and cultural productions by Asian Pacific Americans and Asians in the Americas from the late-nineteenth century to the present. Cultural media may include political cartoons, film/television, popular music, visual art, blogs/Web sites, and performance.

(IV, VII)

**ASIANAM 100W. Research Methodologies for Asian American Studies. 4 Units.**

Explores various research methodologies for Asian American Studies combining theoretical knowledge with field research. Goals: conduct field research about immigrants and refugees from Asia. Topics vary: migration and labor, assimilation and cultural preservation, cultural expressions in the diaspora.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

**ASIANAM 110. Asian American Writers. 4 Units.**

Literary analysis of Asian American writers' representations of issues of identity, class, history among others. Variety of literary forms—novel, poem, drama, essay—included in a study of a variety of Asian American ethnic groups.

Repeatability: Unlimited as topics vary.

**ASIANAM 111. Asian American History. 4 Units.**

Introduction to important themes in the history of people of Asian ancestry in the United States from the nineteenth century to the present.

Repeatability: Unlimited as topics vary.

**ASIANAM 112. Asian American Art History. 4 Units.**

Investigation of Asian American experience expressed by art and visual culture throughout the twentieth century. Art by Asian Americans of diverse backgrounds as well as the history of cultural visualization of Asian identities in American art/visual culture.

Repeatability: Unlimited as topics vary.

**ASIANAM 114. Asian American Film and Video. 4 Units.**

Topics include histories of Asian American film and video, including documentaries, experimental, short subjects, feature-length independent film, and other forms of cinematic expression. Explores issues of identity (national, racial, gendered, among others).

Repeatability: Unlimited as topics vary.

**ASIANAM 116. Asian Americans and Popular Culture. 4 Units.**

Focuses on Asian Americans' relationship to popular culture as both producers and consumers. Topics include consumer cultures and subcultures, cyberspace and public space, popular music, indie comics and other print media.

Repeatability: Unlimited as topics vary.

**ASIANAM 130. Undocumented Immigrant Experiences. 4 Units.**

Examines the experiences of undocumented immigrants and the policies that structure their educational, economic, social, and political participation.

Same as CHC/LAT 164A, CRM/LAW C187, SOCIOL 177C.

(III and VII ).

**ASIANAM 132. Comparative Minority Politics. 4 Units.**

Examines the political experiences of Blacks, Latinos, and Asian Americans in the United States from roughly 1950 to the present. Focuses on how each group has pursued political empowerment via both conventional political channels and social movements.

Same as AFAM 151, CHC/LAT 147, POL SCI 124C.

**ASIANAM 137. Asian American Labor. 4 Units.**

Explores history of Asian Americans and work from the nineteenth century to the present. Areas of study include migration, colonialism, family, social organization, and work culture.

Same as HISTORY 152A.

**ASIANAM 138. Race and Urban Space. 4 Units.**

Examines how ethnic and racial processes shape and structure interactions in urban settings, such as schools, housing, employment, and public spaces, with attention to the international impact of globalization and postcolonial forces.

**ASIANAM 142. Islam in America. 4 Units.**

Offers a critical academic study of Islam in America, focusing on the core tenets of belief, the diversity of practices, and historical transformations that have taken place since the arrival of Muslims in the United States.

Same as ANTHRO 125Z.

**ASIANAM 143. Religious Traditions of Asian Americans. 4 Units.**

Studies the religious traditions of Asian Americans, focusing on the transplantation of religious institutions, establishment of sacred spaces, celebration of religious holidays, socialization of children, as well as birth, marriage, gender relations, death, family.

Same as SOCIOL 136.

**ASIANAM 144. The Politics of Protest. 4 Units.**

Examines the Civil Rights, Black Power, and women's movements in relationship to the Asian American movement. Uses social movement theories to illuminate the cases, and the cases to critique and revise the theories.

Same as POL SCI 124A.

**(VII)****ASIANAM 150. Special Topics in Asian American Studies. 4 Units.**

Analyzes a variety of themes in Asian American Studies—identity, history, culture—from various interdisciplinary perspectives in humanities, arts, social sciences.

Repeatability: Unlimited as topics vary.

**ASIANAM 151C. Korean American Studies. 4 Units.**

Explores the factors that have distinctly shaped the Korean American experience, including patterns of racial domination, the profile of immigrant flow, immigrant roles in the urban political economy, politics in Korea, and the role of the church.

Same as SOC SCI 178C.

**ASIANAM 151D. Vietnamese American Studies. 4 Units.**

Studies the resettlement of Vietnamese in the United States following their exodus from Southeast Asia. Topics include the Vietnam War, the 1975 evacuation, boat and land refugees, the shaping of Vietnamese communities, and Vietnamese American literature.

Same as SOC SCI 178D.

**ASIANAM 151E. Japanese American Studies. 4 Units.**

Studies the settlement of Japanese in Hawaii and the continental United States since the late 19th century. Topics include sugar plantations, development of rural Japanese America, World War II internment, post-War community development, and persistence of Japanese American identity.

Same as SOC SCI 178E.

**ASIANAM 151F. South Asian American Studies. 4 Units.**

Examines and compares the experiences of South Asian immigrants in the U.S. over time. Looks at the economic, political, and social positions of the immigrants, with special emphasis on religious changes and the changes in the second and later generations.

Same as SOC SCI 178F.

Restriction: Asian American Studies Majors have first consideration for enrollment. Social Policy/Public Service Majors have first consideration for enrollment.

**ASIANAM 151H. Southeast Asian American Studies. 4 Units.**

Analyzes experiences of refugees and immigrants from Southeast Asia, which may include those from Cambodia, Laos, Vietnam, and the Philippines. Examines political and economic factors for their exodus and how they reconstruct their identities, histories, and communities.

Same as SOC SCI 178H.

**ASIANAM 151J. Chinese American Studies. 4 Units.**

Analyzes the experiences of Chinese in the United States. Immigration, Chinese exclusion, racial and gender identity. Historical overview and contemporary issues covered.

Same as SOC SCI 178J.

**ASIANAM 151K. Filipina/Filipino American Studies. 4 Units.**

Explores the experience of Filipina/Filipino Americans from the era of Spanish colonization of the Philippines to present-day community formations in the United States, with special emphasis on the 20th century. Topics include colonialism, nation, migration, gender, and culture.

Same as SOC SCI 178K.

**ASIANAM 162. Asian American Women. 4 Units.**

Examines the representations and experiences of Asian American women from diverse perspectives. Explores the commonalities and differences among various groups of Asian American women, with particular focus on history, culture, values, and family roles.

Same as SOC SCI 177B.

**ASIANAM 164. Topics in Intersectionality. 4 Units.**

Topics include intersectional analysis of various themes related to ethnicity, gender, sexuality, and race within Asian American communities.

Repeatability: Unlimited as topics vary.

**ASIANAM 166. Race and Citizenship. 4 Units.**

Explores historical and contemporary patterns of racialization in relation to citizenship. Topics may include racial categorization, immigration, and comparative racialization.

**ASIANAM 167. Asian American and African American Relations. 4 Units.**

Addresses relationships of Asian American and African American communities in the United States. Topics include race, class, gender, labor, economic systems, political mobilization, community, civil rights, activism, cultural expression.

Same as AFAM 117, HISTORY 152B.

**ASIANAM 168. Politics of Animal Rights. 4 Units.**

Examines animal rights/welfare movement's efforts to transform moral, practical, and legal standing of nonhuman animals in contemporary U.S. Explores intersection of racism, sexism, and speciesism informed by theories of race and ethnicity, including Asian American Studies.

Same as POL SCI 126F.

Restriction: Political Science Majors have first consideration for enrollment. Asian American Studies Majors have first consideration for enrollment.

**ASIANAM 199. Independent Study. 1-4 Units.**

Directed reading and research in consultation with a faculty member. Substantial written work required.

Repeatability: May be repeated for credit unlimited times.

**ASIANAM 200A. Theory and Methods in Asian American Studies. 4 Units.**

Introduction to the intersection of the social sciences, humanities, and other fields that constitute the theory and methodology of Asian American Studies. Focuses on the interventions and contestations within Asian American Studies that have transformed the discipline in recent years.

Restriction: Graduate students only.

**ASIANAM 200B. Contemporary Issues in Asian American Studies. 4 Units.**

Examines the interrelations between history, theory, and race in the aftermath of the twentieth-century decolonial movements, offering an account of race through postcolonial and postnationalist approaches in comparative contexts. Considers the interventions made by transnational feminist and racialized queer critiques.

Restriction: Graduate students only.

**ASIANAM 200C. Leadership and Social Change in Asian American Communities. 4 Units.**

Introduces students to models of community-engaged learning and leadership that are central to the field of Asian American studies. Designed to expose students to histories and models of organizing in Asian American communities and forms of community-based research.

Restriction: Graduate students only.

**ASIANAM 200D. Introduction to Asian American Studies Research. 4 Units.**

Introduces students to research topics and methods within the field of Asian American studies. Aims to expose students to core and affiliated faculty to help them identify possible advisors for master's research projects or members of doctoral committees.

Restriction: Graduate students only.

**ASIANAM 201. Graduate Topics in Asian American Studies. 4 Units.**

Seminars on various topics in Asian American Studies.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ASIANAM 250. Advanced Topics in Asian American Studies. 4 Units.**

Seminar covering various areas of research within Asian American Studies as an interdisciplinary field. Recommended for advanced graduate students.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ASIANAM 290. Directed Research. 4-12 Units.**

Directed graduate study/research in Asian American Studies.

Repeatability: May be taken for credit for 24 units.

Restriction: Graduate students only.

**ASIANAM 291. Directed Reading. 4 Units.**

Readings focused on specialized topics in consultation with, and with the consent of, a faculty member.

Repeatability: May be taken for credit for 12 units.

Restriction: Graduate students only.

**ASIANAM 399. University Teaching. 4 Units.**

Limited to teaching assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Emphasis in Asian American Studies graduate students only.

## Bio Sci & Educational Media Design (BSEMD)

## Biological Chemistry (BIOCHEM)

### Courses

**BIOCHEM 200A. Research in Biological Chemistry. 2-12 Units.**

Individual research under the supervision of a professor.

Repeatability: Unlimited as topics vary.

**BIOCHEM 200B. Research in Biological Chemistry. 2-12 Units.**

Individual research under the supervision of a professor.

Repeatability: Unlimited as topics vary.

**BIOCHEM 200C. Research in Biological Chemistry. 2-12 Units.**

Individual research under the supervision of a professor.

Repeatability: Unlimited as topics vary.

**BIOCHEM 200R. Research in Biological Chemistry for First-Year Students. 2-12 Units.**

Independent research within the laboratories of graduate training faculty in the Department of Biological Chemistry for first-year Ph.D. students.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

**BIOCHEM 202A. Laboratory Seminar Series. 1 Unit.**

Study within a laboratory group including research and journal presentations.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

**BIOCHEM 202B. Laboratory Seminar Series. 1 Unit.**

Study within a laboratory group including research and journal presentations.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

**BIOCHEM 202C. Laboratory Seminar Series. 1 Unit.**

Study within a laboratory group including research and journal presentations.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

**BIOCHEM 207. Current Topics in Cancer Genomics. 4 Units.**

Literature-based discussion of molecular principles in genetics and functional genomics, with focus on cancer and stem cell biology.

Repeatability: May be taken for credit 2 times.

**BIOCHEM 210A. Medical Biochemistry and Molecular Biology. 12 Units.**

Covers the following topics from a biomedical perspective: protein and nucleic acid biochemistry, carbohydrates, lipids, amino acids, purines and pyrimidines, genome structure, molecular mechanisms of development, and signal transduction.

Restriction: Graduate students only.

**BIOCHEM 215. Mouse Developmental Genetics. 4 Units.**

Introduction to using the mouse in contemporary biomedical research. The biology and development of the laboratory mouse, methods for manipulation of the mouse genome and embryos, and examples of application of these methods to understand mammalian development and homeostasis.

Same as DEV BIO 207.

Restriction: Graduate students only.

**BIOCHEM 217. Human Evolution and Behavior. 4 Units.**

Covers theories and empirical research concerning the evolutionary origins of human behaviors and their variations. An interdisciplinary course emphasizing both evolutionary psychology (e.g., mating strategies, kinship, and parenting) and molecular evolution (i.e., evolution of genes for various behaviors).

Same as PSCI P271.

Restriction: Graduate students only.

**BIOCHEM 225. Epigenetics in Health and Disease . 4 Units.**

Focuses on the role of chromatin/nuclear structure organization (histone and DNA modification, chromatin remodeling, higher order chromatin structure and nuclear organization) on gene regulation, DNA replication and repair, relevant to development, metabolism, learning and memory, and human disease.

Prerequisite: MOL BIO 203 or MOL BIO 204 or NEURBIO 206

Same as NEURBIO 230.

Restriction: Graduate students only.

**BIOCHEM 240. New Breakthroughs in Basic and Translational Cancer Research. 4 Units.**

Highlights breakthroughs in molecular and cellular aspects of cancer biology and emerging therapeutic approaches. Emphasis on new discoveries of critical pathways/processes in cancer etiology, progression, and metastasis. Introduces strategies used in the discovery, design of biological and small molecules-based therapies.

Prerequisite: MOL BIO 204 or PHYSIO 252. A gene regulation course is also required.

Restriction: Graduate students only.

**BIOCHEM 291. Research Seminar. 2 Units.**

Student research-based colloquium covering current topics in gene organization and expression, cell cycle and differentiation, DNA repair, checkpoint control, and the physical, chemical, and biological properties of macromolecules. Students are encouraged to read critically and analyze recent literature.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**BIOCHEM 292A. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**BIOCHEM 292B. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**BIOCHEM 292C. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## Biological Sciences (BIO SCI)

### Courses

**BIO SCI 1A. Life Sciences. 4 Units.**

Designed to introduce nonmajors to the basic concepts of modern biology. Discussion of evolutionary biology, ecology, molecular biology, and genetics.

(II)

**BIO SCI 2A. Freshman Seminar. 2 Units.**

Weekly meetings consisting of presentations by faculty, professional staff, and Peer Academic Advisors provide information about the School of Biological Sciences, campus resources, learning skills, and special programs/opportunities.

Grading Option: Pass/no pass only.

Restriction: Freshmen only. School of Biological Sciences students only.

**BIO SCI 2B. Freshman Seminar . 1 Unit.**

Faculty presentations and readings focused on the structure, function, opportunities, and current issues in the biological sciences.

Grading Option: Pass/no pass only.

Restriction: Freshmen only. School of Biological Sciences students only.

**BIO SCI 2C. Solutions in Science. 1 Unit.**

Students will be introduced to approaches that can be used to solve scientific problems. These methods can be utilized in introductory to advanced classes and will allow students to become independent thinkers.

**BIO SCI 2D. EASE Seminar. 1 Workload Unit.**

Seminars designed to help students achieve success in STEM courses. Provides collaborative learning environment facilitated by undergraduate mentor. Students develop critical thinking and study skills. Also receive guidance to campus resources that assist acclimation to University.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**BIO SCI 3A. Career Decision Making. 1 Workload Unit.**

An introductory course designed to facilitate the career decision-making process. Decision-making processes, values, and standardized tests of aptitudes, interests, and values are utilized with non-test data in appraising biological sciences career options.

Grading Option: Workload Credit P/NP Only.

**BIO SCI 3B. Non-Health Sciences Career Exploration. 1 Workload Unit.**

A survey course designed to assist students in exploring non-health science career options. Lectures by professionals in various fields.

Grading Option: Workload Credit P/NP Only.

**BIO SCI 6. Tropical Biology: Race to Save the Tropics. 4 Units.**

Population growth combines with tropical resource consumption by industrialized nations to cause high rates of deforestation, pollution, habitat fragmentation, and extinction of species. Discusses tropical biomes, their population, community, ecosystem processes, and possible means of conservation of biodiversity.

(II)

**BIO SCI 9A. Nutrition Science. 4 Units.**

An introduction to nutrition science, integrating concepts from biology, biochemistry, microbiology, physiology, and psychology to explain the interaction between nutrients and the human body. Biological basis of nutrient standards is analyzed. Effects of nutrition, behavior, exercises on health/disease.

(II)

**BIO SCI 9B. Biology and Chemistry of Food and Cooking . 4 Units.**

The kitchen is used as a laboratory to introduce fundamental principles of biology, chemistry, and physics. A molecular/cellular analysis of cooking, including concepts such as protein structure, browning reactions, colloids, emulsions, carbohydrate metabolism, and development of flavor/texture through biochemical transformations.

(II)

**BIO SCI 9D. Diseases of the Twenty-First Century . 4 Units.**

Why do we get sick? An introduction to the biological basis of human disease, including diseases of the cardiovascular, respiratory, nervous, and reproductive systems. Case studies present diagnosis, treatment, and prevention protocols. Inheritable and infectious diseases also discussed.

Overlaps with BIO SCI 10, BIO SCI 12D.

(II)

**BIO SCI 9E. Horticulture Science . 4 Units.**

Scientific principles of horticulture at the UCI Arboretum. Taxonomy, plant life history strategies; experiments with seed dormancy; morphological adaptations for specialized sexual and clonal reproduction; basics of plant propagation and ecological restoration. Materials fee.

(II)

**BIO SCI 9G. Physiology of Fitness. 4 Units.**

An introduction to the organ systems of the human body, including muscle, cardiovascular, immune, and reproductive systems, with an emphasis on how the body responds to exercise, diet, and disease.

(II)

**BIO SCI 9J. Biology of Oriental Medicine. 4 Units.**

With lectures, demonstrations, and hands-on learning, the theory and practice of herbal medicine, acupuncture, qigong, and manipulative therapies are explained in Western biomedical terms. The latest basic and clinical research advances in each area are also described.

Overlaps with BIO SCI 9N, BIO SCI D124.

(II)

**BIO SCI 9K. Global Change Biology. 4 Units.**

Field trips and lectures that address ways in which humans are altering the global environment, with consequences for the ecology of animals, plants, and microbes.

(II)

**BIO SCI 10. The Biology of Human Diseases. 4 Units.**

Introduction to concepts of diagnosis, treatment, and prevention of major human infectious diseases. Covers some aspects of epidemiology. Scope and impact of infectious diseases in the present and past experiences in controlling infectious disease. Reviews biology of human organ systems.

Overlaps with BIO SCI 9D, BIO SCI 12D.

(II)

**BIO SCI 11. Topics in Biological Sciences. 4 Units.**

Studies in selected areas of biological sciences.

Repeatability: May be taken for credit 3 times.

**BIO SCI 12. Molecular Basis of Human Disease. 4 Units.**

Describes the cause and treatment of human diseases at the cutting edge of modern molecular understanding for non-science majors, including history, interviews, and stories.

(II)

**BIO SCI 14. California Teach 1: Introduction to Science and Mathematics Teaching. 3 Units.**

First in a series for students interested in becoming middle or high school teachers of mathematics or science. Students gain an understanding of effective, research-based teaching strategies. Includes supervised field experience in a K-12 classroom.

Same as PHY SCI 5.

Restriction: School of Physical Sciences students have first consideration for enrollment. School of Biological Sciences students have first consideration for enrollment. School of Info & Computer Sci students have first consideration for enrollment. School of Engineering students have first consideration for enrollment.

**BIO SCI 17. Evolutionary Psychology. 4 Units.**

Introductory overview of the field of evolutionary psychology. Surveys topics operating at the interface of social sciences, i.e. behavioral psychology and evolutionary biology, while developing select aspects of the history of this developing field.

(II)

**BIO SCI 23. Sustainable Landscaping: Design and Practices. 4 Units.**

Through lectures and hands-on work, students learn how to design habitats around dwellings, within cities, and in rural environments. These include traditional/sustainable landscaping, restoration, stormwater/wastewater treatment, xeriscaping, and low impact development design. Sustainable landscape plant materials emphasized.

(II)

**BIO SCI 25. Biology of Cancer. 4 Units.**

Biological, clinical, and psychosocial nature of cancer through the perspectives of medical researchers, biologists, physicians, and health educators. For students of all majors, designed so that each can increase personal awareness of the biology of cancer.

Restriction: BIO SCI 25 may not be taken for credit if taken after BIO SCI M125.

**BIO SCI 35. The Brain and Behavior. 4 Units.**

Introduction to how the brain works. Biological processes underlying perception, movement, sleep-wake cycles, motivation, language, learning, and memory. Changes in the brain associated with sex differences, drug use, aging, seasons, and time of day. Fundamental properties of the nervous system.

(II)

**BIO SCI 36. Drugs and the Brain. 4 Units.**

Introduction to the actions of drugs on the brain. How studying drug action helps reveal normal functions of neurons. How drugs can correct neural disorders or disrupt neural function. Biological issues related to drug abuse, drug addiction, and drug seeking.

(II)

**BIO SCI 37. Brain Dysfunction and Repair . 4 Units.**

Introduction to the disruptions in brain function that underlie disorders such as Alzheimer's disease, Parkinsonism, schizophrenia, and depression, and the basis for drug therapies. The brain's ability to repair itself after damage and the pros and cons of that repair.

(II)

**BIO SCI 38. Mind, Memory, Amnesia, and the Brain. 4 Units.**

Introduction to neural mechanisms underlying learning and memory. Emphasis on molecular changes that mediate memory as well as structures involved in different forms of memory. Additionally, examines the biology of memory phenomena, from extraordinary memory to false memory to amnesia.

(II)

**BIO SCI 41. Aspects of Mood Disorder. 4 Units.**

There are significant differences in response to psychiatric illness across cultures. Delves into the neuroscience underlying mood disorder, investigating current pharmacological treatments and sociocultural influences on treatment outcomes.

(II)

**BIO SCI 43. Media on the Mind. 4 Units.**

Surveys an ever-increasing collection of research, suggesting modern technology and social media are changing in the way our brains function.

(II)

**BIO SCI 44. Stem Cells and Brain Repair. 4 Units.**

Students introduced to the field of regenerative neurobiology. Both basic stem cell discoveries and their potential clinical application to brain disorders examined. Discussion of opportunities, challenges, and implications of this research.

Overlaps with BIO SCI N172.

(II)

**BIO SCI 45. AIDS Fundamentals. 4 Units.**

Considers the biological and sociological bases of the AIDS epidemic. Topics include the history of AIDS, current medical knowledge, transmission, risk reduction, and how the community can respond.

Same as PUBHLTH 80.

(II)

**BIO SCI 46. Discussion and Literature Research in AIDS. 2-4 Units.**

Students carry out two activities: (1) leading discussions about HIV/AIDS (predominantly regarding sociological and personal reactions) among students taking the AIDS Fundamentals course and (2) literature research about biomedical aspects of AIDS.

Prerequisite: BIO SCI 45 or PUBHLTH 80

**BIO SCI 47. Stress. 4 Units.**

Investigates stress at a psychological, physiological, and molecular level, and provides a current overview of the field of stress research.

(II)

**BIO SCI 55. Introduction to Ecology. 4 Units.**

Principles of ecology; application to populations, communities, ecosystems, and humans.

Restriction: No Biological Sciences Majors. BIO SCI 55 may not be taken for credit if taken after BIO SCI 96 or BIO SCI E106.

(II)

**BIO SCI 56. Life Sciencing from Aristotle to Venter. 4 Units.**

History of biology from Aristotle through to the scientific revolutions precipitated by Darwin, geneticists, molecular biologists, and now genomics. Introduces the practices and achievements of biological research to both beginning biology students and non-majors.

Overlaps with BIO SCI H90, BIO SCI H90B.

(II)

**BIO SCI 75. Human Development: Conception to Birth. 4 Units.**

Processes leading to the birth of a healthy child and the avoidance of birth defects. Male and female reproductive systems, hormonal control of egg-sperm formations, sexual intercourse, contraception, venereal diseases, fertilization, cell division, embryonic development, fetal physiology.

(II)

**BIO SCI H90. The Idiom and Practice of Science. 4 Units.**

The importance of biological sciences in our world is discussed. Topics may include brain and behavior, health and disease, genetics and society, and conservation biology. Primary goal is to encourage students to understand better the world in which they live.

Restriction: Campuswide Honors Collegium students only.

(II)

**BIO SCI 92. Curriculum. 1-4 Units.**

Initiation, planning, and coordination of student-run courses.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 12 times.

Restriction: School of Biological Sciences students only.

**BIO SCI 93. From DNA to Organisms. 4 Units.**

Cell biology, biochemistry, genetics, and the biology of organ systems. Covers concepts of building blocks (nucleotides, amino acids, and cells) and of information flow (DNA to proteins, receptors to nuclei, the blood to distant organs, and DNA to offspring).

Restriction: BIO SCI 93 may not be taken for credit if taken after BIO SCI 97 or BIO SCI 98.

(II)

**BIO SCI H93. Honors From DNA to Organisms. 4 Units.**

Cell biology, biochemistry, genetics, and the biology of organ systems. Covers concepts of building blocks (nucleotides, amino acids, and cells) and of information flow (DNA to proteins, receptors to nuclei, the blood to distant organs, and DNA to offspring).

Restriction: BIO SCI H93 may not be taken for credit if taken after BIO SCI 97 or BIO SCI 98.

(II)

**BIO SCI 94. From Organisms to Ecosystems. 4 Units.**

Patterns of diversity, ecology, and evolutionary biology. Emphasis is on the Tree of Life and how its members are distributed and interact.

Prerequisite: BIO SCI 93 or BIO SCI H93

Restriction: BIO SCI 1A may not be taken for credit if taken after BIO SCI 94.

(II)

**BIO SCI 97. Genetics. 4 Units.**

Introduction to genetics. Basic features of replication and expression of DNA, cell division, and gene transmission. Recombination and mutation in diploid organisms.

Prerequisite: BIO SCI 94

Restriction: Pharmaceutical Sciences Majors have first consideration for enrollment. Public Health Majors have first consideration for enrollment. Nursing Science Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment. School of Biological Sciences students have first consideration for enrollment.

**BIO SCI H97. Honors Genetics. 4 Units.**

Introduction to genetics. Basic features of replication and expression of DNA, cell division, and gene transmission. Recombination and mutation in diploid organisms.

Restriction: Campuswide Honors Collegium students only. BIO SCI H97 may not be taken for credit if taken after BIO SCI 97.

**BIO SCI 98. Biochemistry. 4 Units.**

Structure and properties of proteins; major biochemical pathways and mechanisms for their control.

Prerequisite or corequisite: BIO SCI 97 or BIO SCI H97 and CHEM 51B

Restriction: School of Biological Sciences students have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment. Nursing Science Majors have first consideration for enrollment. Pharmaceutical Sciences Majors have first consideration for enrollment. Public Health Majors have first consideration for enrollment.

**BIO SCI 99. Molecular Biology. 4 Units.**

Biochemistry and replication of nucleic acids; molecular genetics; protein biosynthesis; genetic code; regulation of expression of genetic information; biochemical evolution.

Prerequisite: BIO SCI 98

Restriction: Pharmaceutical Sciences Majors have first consideration for enrollment. Public Health Majors have first consideration for enrollment. Nursing Science Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment. School of Biological Sciences students have first consideration for enrollment.

**BIO SCI 100. Scientific Writing. 3 Units.**

Designed to give an overview of the basic aspects of scientific writing relevant to reporting research in the Biological Sciences.

Prerequisite: BIO SCI 99. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: School of Biological Sciences students have first consideration for enrollment. Bio Sci and Educ Media Design Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment. Pharmaceutical Sciences Majors have first consideration for enrollment.

**BIO SCI 101. California Teach 2: Middle School Science and Mathematics Teaching. 3 Units.**

Second in a series for students interested in becoming middle or high school teachers of mathematics or science. Students gain an understanding of effective, research-based teaching strategies for grades 6-8. Includes supervised field experience in a middle school classroom.

Prerequisite: PHY SCI 5

Same as PHY SCI 105.

Restriction: School of Physical Sciences students have first consideration for enrollment. School of Biological Sciences students have first consideration for enrollment. School of Info & Computer Sci students have first consideration for enrollment. School of Engineering students have first consideration for enrollment.

**BIO SCI D103. Cell Biology. 4 Units.**

Analysis of the basic structure and function of animal cells, with an emphasis on the regulation of cellular processes. The basic features of membranes, cellular compartmentalization, protein trafficking, vesicular transport, cytoskeleton, adhesion, signal transduction, and cell cycle are covered.

Prerequisite: BIO SCI 99

Restriction: Students who require this class for completion of their degree have first consideration for enrollment.

**BIO SCI D104. Developmental Biology. 4 Units.**

Cellular and molecular analysis of how a fertilized egg develops into an organism consisting of complex structures such as the eye, arms, and brain. Emphasis is on the key concepts of developmental processes underlying pattern formation, growth, and regeneration.

Prerequisite: BIO SCI 99

Restriction: Students who require this class for completion of their degree have first consideration for enrollment.

**BIO SCI D105. Cell, Developmental, and Molecular Biology of Plants . 4 Units.**

Emphasizes the special features of plant cells and plant development as compared to animals. Two central topics: plants' ability to fuel our planet through photosynthesis, and the interactions of plants with microorganisms in making nitrogen available to other life forms.

Prerequisite: BIO SCI 97 or BIO SCI H97

Restriction: Students who require this class for completion of their degree have first consideration for enrollment.

**BIO SCI E106. Processes in Ecology and Evolution. 4 Units.**

An in-depth study of the mechanisms that drive evolution and ecology including: natural selection, mutation, genetic drift, speciation, extinction, life history patterns, population dynamics, ecosystem and community structure, predator-prey and host pathogen interactions, and social behavior.

Prerequisite: BIO SCI 94

Restriction: Students who require this class for completion of their degree have first consideration for enrollment.

**BIO SCI E106L. Habitats and Organisms. 4 Units.**

Introduces students to local habitats and organisms through required field trips and applies ecological and evolutionary principles from BIO SCI E106. Students also explore related literature.

Prerequisite: (BIO SCI 100 or BIO SCI 108) and BIO SCI E106. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Seniors only. BIO SCI E106L may not be taken for credit concurrently with or after taking BIO SCI E166. Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

**BIO SCI E107. Seminar in Ecology and Evolutionary Biology. 2 Units.**

Invited speakers, graduate students, and faculty present current research in ecology and evolutionary biology.

Grading Option: Pass/no pass only.

Restriction: Upper-division students only. Ecology and Evolutionary Biol Majors only.

**BIO SCI 108. Research Methods. 4 Units.**

Explores tools of inquiry for developing and implementing science research projects. Students undertake independent projects requiring data collection, analysis, and modeling, and the organization and presentation of results. Additional topics include ethical issues and role of scientific literature.

Prerequisite: BIO SCI 14 or PHY SCI 5

Same as PHYSICS 193, CHEM 193.

**BIO SCI E109. Human Physiology. 4 Units.**

Functional features of the major organ systems in the human body. Emphasis on homeostasis and the interactions of organ systems in health and disease. (Discussion of behavior and brain function deferred to BIO SCI N110.).

Prerequisite: (BIO SCI 93 or BIO SCI H93) and CHEM 1C

Overlaps with PHRMSCI 120.

Restriction: Students who require this class for completion of their degree have first consideration for enrollment.

**BIO SCI N110. Neurobiology and Behavior. 4 Units.**

Consideration of the evolution of behavior, including ethological and psychological aspects and analysis of neuroanatomical, neurochemical, neurophysiological, and neuroendocrine systems underlying basic behavioral processes.

Prerequisite or corequisite: BIO SCI 99

Restriction: Students who require this class for completion of their degree have first consideration for enrollment.

**BIO SCI D111L. Developmental and Cell Biology Laboratory. 4 Units.**

Covers the division of cells, isolate cellular organelles (chloroplasts, mitochondria, nuclei), and follows changes in cells undergoing programmed cell death. Development is demonstrated in experiments showing cooperation of individual cells in forming a multicellular organism. Materials fee.

Prerequisite or corequisite: (BIO SCI 100 or BIO SCI 108) and (BIO SCI D103 or BIO SCI D104 or BIO SCI D105)

Restriction: Seniors only. Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

**BIO SCI E112L. Physiology Laboratory. 4 Units.**

Laboratory with a focus on the whole organism and its organ systems. Examples of structure-function relationships are drawn from both animal and human physiology. Cellular and molecular aspects are introduced as required. Materials fee.

Prerequisite: (BIO SCI 100 or BIO SCI 108) and (BIO SCI E109 or BME 120) and BME 121.

Overlaps with PHRMSCI 120L.

Restriction: Seniors only. Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

**BIO SCI D113. Genetics Majors Seminar. 1 Unit.**

Genetics majors attend a weekly seminar to discuss current research techniques and career opportunities in the field. Students have the opportunity to present their own independent research.

Repeatability: May be taken for credit 2 times.

Restriction: Genetics Majors only.

**BIO SCI N113L. Neurobiology Laboratory. 3 Units.**

An in-depth exploration into biology and physiology of the nervous system. Labs include neuroanatomy, electrophysiology, pharmacology, behavior, experimental design, EEG, and scientific writing. Materials fee.

Prerequisite or corequisite: (BIO SCI 100 or BIO SCI 108) and (BIO SCI N110 or BIO SCI N115A)

Restriction: Seniors only. Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

**BIO SCI D114. Developmental and Cell Biology Majors Seminar. 1 Unit.**

Developmental and Cell Biology majors attend a weekly seminar to discuss current research techniques and career opportunities in the field. Students have the opportunity to present their own independent research.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

Restriction: Developmental and Cell Biology Majors only.

**BIO SCI M114. Advanced Biochemistry. 4 Units.**

Physical-chemical properties of macromolecules. Structure-function relationships in nucleic acids, protein, carbohydrates, and lipids. Integration and regulation of metabolism. Biochemistry of organs and biochemistry of diseases.

Prerequisite: BIO SCI 99

**BIO SCI M114L. Biochemistry Laboratory. 5 Units.**

Properties of enzymes and the culture and isolation of mutants of microorganisms. Materials fee.

Prerequisite: BIO SCI 99 and (BIO SCI 100 or BIO SCI 108)

Restriction: Seniors only. Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

**BIO SCI E115L. Evolution Laboratory. 4 Units.**

Students perform experiments which illustrate important concepts in evolutionary biology such as natural selection, random genetic drift, inbreeding, age-specific selection, sexual selection, and phylogenetic reconstruction. Materials fee.

Prerequisite: (BIO SCI 100 or BIO SCI 108) and BIO SCI E106. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Seniors only. Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

**BIO SCI N115A. Advanced Neurobiology I. 4 Units.**

In-depth coverage of neurobiology, ranging from molecular neurobiology to functional brain imaging. Discussion of molecular, cellular, and developmental neurobiology.

Prerequisite: BIO SCI 99

Restriction: Neurobiology Majors only.

**BIO SCI N115B. Advanced Neurobiology II. 4 Units.**

In-depth coverage of neurobiology, ranging from molecular neurobiology to functional brain imaging.

Prerequisite: BIO SCI N115A

Restriction: Neurobiology Majors only.

**BIO SCI M116. Advanced Molecular Biology. 4 Units.**

Mechanisms of gene expression; special emphasis on regulatory events that occur in Eukaryotic organisms other than initiation of transcription. Chromatin structure and rearrangement, RNA polymerases, cis- and trans-acting elements, RNA processing, transport and stability, protein synthesis, trafficking, and turnover.

Prerequisite: BIO SCI 99 and (BIO SCI M114L or BIO SCI M116L)

**BIO SCI M116L. Molecular Biology Laboratory. 5 Units.**

Students perform experiments which illustrate the chemical and biological properties of nucleic acids. Emphasis is placed on recent techniques in recombinant DNA technology including gene isolation and characterization. Materials fee.

Prerequisite: BIO SCI 99 and (BIO SCI 100 or BIO SCI 108)

Restriction: Seniors only. Students who require this lab for completion of their degree have first consideration for enrollment.

**(Ib)****BIO SCI E117A. Exercise Sciences Seminar. 3 Units.**

Students are introduced to fundamental concepts and topics in exercise science with an emphasis on developing innovative approaches for exploring the biological response to physical activity/inactivity. Interactive course with robust discussion amongst faculty and students.

Prerequisite: BIO SCI E109 and BIO SCI E112L and BIO SCI E183

**BIO SCI E117B. Exercise Sciences Seminar. 3 Units.**

Students are introduced to fundamental concepts and topics in exercise science with an emphasis on developing innovative approaches for exploring the biological response to physical activity/inactivity. Interactive course with robust discussion amongst faculty and students.

Prerequisite: BIO SCI E109 and BIO SCI E112L and BIO SCI E183

**BIO SCI E117C. Exercise Sciences Seminar. 3 Units.**

Students are introduced to fundamental concepts and topics in exercise science with an emphasis on developing innovative approaches for exploring the biological response to physical activity/inactivity. Interactive course with robust discussion amongst faculty and students.

Prerequisite: BIO SCI E109 and BIO SCI E112L and BIO SCI E183

**BIO SCI N117. Introduction to Neuroscience Clinical Trials. 4 Units.**

Provides an overview of the science of clinical development of treatments for neurological disease and injury.

Prerequisite: BIO SCI 99

**BIO SCI E118. Ecosystem Ecology. 4 Units.**

A mechanistic perspective on ecosystem processes. Covers ecosystem development, element cycling, and interactions with plants and microbes. The role of ecosystems in environmental change is also addressed.

Prerequisite: BIO SCI E106 or EARTHSS 51 or EARTHSS 60A or CHEM 51C

Same as EARTHSS 164.

Restriction: Earth System Science Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Ecology and Evolutionary Biol Majors have first consideration for enrollment.

Concurrent with EARTHSS 264.

**BIO SCI M118L. Experimental Microbiology Laboratory. 5 Units.**

Introductory general microbiology designed for preprofessional biology majors. Includes microscopy, cultivation of bacteria, morphological and biochemical characterization of bacteria, microbial metabolism, growth and genetics, microorganisms and human disease, and interactions of microorganisms with the environment. Materials fee.

Prerequisite: BIO SCI 99 and (BIO SCI 100 or BIO SCI 108)

Restriction: Seniors only. Students who require this lab for completion of their degree have first consideration for enrollment.

**(Ib)**

**BIO SCI N118. Clinical Psychophysiology. 4 Units.**

Psychophysiology investigates the relationships between physiological processes and psychological phenomena. Technologies examined include reaction times, heart rate variability, EEGs, ERPs, magnetoencephalography, and eye tracking. Applications include diagnosis, the longitudinal assessment, and the identification of individuals at risk of disease onset.

Prerequisite: BIO SCI N110 or BIO SCI N115A or PSYCH 9A or PSCI 11A

Same as PSYCH 122P.

(II ).

**BIO SCI E119. Selfish DNA. 3 Units.**

Focuses on the genetics and evolution of selfish DNA, and introduces necessary background knowledge from molecular biology, cytogenetics, and bioinformatics.

Prerequisite: BIO SCI 94 and BIO SCI 97

**BIO SCI M119. Advanced Topics in Immunology. 4 Units.**

Literature-based, interactive discussions focused on review of seminal historic and recent immunology literature. Student responsibilities include reading, critical evaluation, and discussion of manuscripts.

Prerequisite: BIO SCI M121

Restriction: Microbiology and Immunology Majors have first consideration for enrollment.

**BIO SCI N119. History of Neuroscience. 4 Units.**

An overview of the conceptual and technical foundations of contemporary neuroscience from ancient times to the present. The subjects include synapses, neurons, brain organization, sensory, motor and regulatory systems, learning and memory, human brain function and dysfunction.

Prerequisite: BIO SCI 35 or BIO SCI N110 or BIO SCI N115A or PSY BEH 115D or (PSYCH 9A and PSYCH 9B and PSYCH 9C)

Restriction: Upper-division students only.

Concurrent with NEURBIO 255.

**BIO SCI E120. Marine Biology . 4 Units.**

Examines the biotic and abiotic factors influencing the physiology, distribution, abundances, interactions, and evolution of marine organisms and the roles of those organisms in mediating ecosystem services and functions. A field trip is required. Materials fee.

Prerequisite: BIO SCI 94

**BIO SCI M120. Signal Transduction in Mammalian Cells. 4 Units.**

Introduction to major biochemical pathways that transmit information from extracellular cues into changes in cell behavior. Focuses on kinases, phosphatases, G proteins, second messengers, and protein-protein interactions. Includes discussion of primary research articles and experimental techniques.

Prerequisite: BIO SCI D103

**BIO SCI N120A. Human Biology I. 4 Units.**

Provides an in-depth look at cutting-edge topics in physiology and epidemiology as they relate to global issues of ethics, anthropology, and socioeconomics, providing the student with an understanding of human health beyond basic biological function.

Prerequisite: BIO SCI 99

Restriction: Human Biology Majors only.

**BIO SCI N120B. Human Biology II. 4 Units.**

Provides an in-depth look at cutting-edge topics in physiology and epidemiology as they relate to global issues of ethics, anthropology, and socioeconomics, providing the student with an understanding of human health beyond basic biological function.

Prerequisite: BIO SCI 99

Restriction: Human Biology Majors only.

**BIO SCI N120C. Human Biology III. 4 Units.**

Provides an in-depth look at cutting-edge topics in physiology and epidemiology as they relate to global issues of ethics, anthropology, and socioeconomics, providing the student with an understanding of human health beyond basic biological function.

Prerequisite: BIO SCI 99

Restriction: Human Biology Majors only.

**BIO SCI M121. Immunology with Hematology. 4 Units.**

Antibodies, antigens, antigen-antibody reactions, cells and tissues of lymphoreticular and hematopoietic systems, and individual and collective components of cell-mediated and humoral immune response.

Prerequisite: BIO SCI 98

**BIO SCI M121L. Advanced Immunology Laboratory. 4 Units.**

Emphasis is placed on learning modern techniques in immunology such as ELISAs, western blotting, and immunofluorescent staining assays. Materials fee.

Prerequisite: (BIO SCI 100 or BIO SCI 108) and BIO SCI M116L and BIO SCI M121

Restriction: Seniors only. Students who require this lab for completion of their degree have first consideration for enrollment.

Concurrent with MOL BIO 221L.

**(Ib)**

**BIO SCI N121. Drug Addiction. 4 Units.**

Provides a comprehensive overview of topics in the addiction field, including drug pharmacology, models/approaches to investigate addiction, brain circuits, genetics, epigenetics, and the cellular and molecular biology of drug addiction.

Prerequisite: BIO SCI 99

Concurrent with NEURBIO 233.

**BIO SCI E122. Physiology and Pathology of the Kidney. 4 Units.**

Examines the structure, function, and pathology of the kidney. Topics include anatomy of the kidney, cellular function, urine formation, and disease states of the kidney.

Prerequisite: BIO SCI E109

**BIO SCI M122. General Microbiology. 4 Units.**

Comparative metabolism of small molecules and cell structure and relationship to microbial classification. Macromolecule synthesis and regulation, sporulation, cell division, growth, and effect of antibiotics.

Prerequisite: BIO SCI 98

**BIO SCI M123. Introduction to Computational Biology. 4 Units.**

The use of theories and methods based on computer science, mathematics, and physics in molecular biology and biochemistry. Basics in biomolecular modeling. Analysis of sequence and structural data of biomolecules. Analysis of biomolecular functions.

Prerequisite: MATH 2D or MATH 3A or STATS 7 or STATS 8

Same as BME 132, COMPSCI 183.

Concurrent with MOL BIO 223 and BME 232.

**BIO SCI N123L. Human Neuroimaging Lab. 3 Units.**

Hands-on laboratory course in human neuroimaging, with particular emphasis on using MRI to understand brain function and how it changes over the course of the lifespan and with disease.

Prerequisite: BIO SCI 93 and (BIO SCI 100 or BIO SCI 108). Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Seniors only. Students who require this lab for completion of their degree have first consideration for enrollment.

**(Ib)**

**BIO SCI D124. Biology of Integrative Medicine. 4 Units.**

Presentation of biological principles and the latest clinical and basic research on complementary and alternative therapies (e.g., mind-body medicine, energy medicine, herbal medicine, acupuncture, manipulative therapies) and their integration with Western medicine. Lectures supplemented by demonstrations and hands-on learning sessions.

Overlaps with BIO SCI 9J, BIO SCI 9N.

**BIO SCI E124. Infectious Disease Dynamics. 4 Units.**

Learn how the immune system interacts with infectious diseases, in particular with viral infections. An introduction to basic virology and immunology, it concentrates on the way in which the immune system is critical to the prevention of infections.

Same as PUBHLTH 181.

**BIO SCI M124A. Virology. 4 Units.**

Replication of viruses in populations, animals, and the host cell. The effects of viral infection on populations, individuals, and specific molecular effects on the target cell. Role of viral infections in cancer and degenerative diseases.

Prerequisite: BIO SCI 99

Restriction: School of Biological Sciences students only.

**BIO SCI M124B. Viral Pathogenesis and Immunity. 4 Units.**

The mechanisms of viral pathogenesis and of host resistance to viruses are explored in detail. HIV-1 and Influenza-A are used as examples. In each case, viral replication, cytopathic effects, immune response, and viral evasion are discussed.

Prerequisite: BIO SCI M121 or BIO SCI M124A. Recommended: BIO SCI M122.

**BIO SCI M125. Molecular Biology of Cancer. 4 Units.**

Molecular mechanisms of carcinogenesis. Consideration of transformation by DNA tumor viruses, RNA tumor viruses, and chemical carcinogens.

Prerequisite: BIO SCI 99

**BIO SCI M126. Learning to Read Primary Literature in Biochemistry and Molecular Biology. 4 Units.**

An introduction to primary literature focusing on methods to approach, understand, and analyze scientific papers.

Prerequisite: BIO SCI 99

**BIO SCI E127. Physiological Plant Ecology. 4 Units.**

An examination of the interactions between plants and their environment. Emphasis on the underlying physiological mechanisms of plant function, adaptations and responses to stress, and the basis of the distribution of plants and plant assemblages across the landscape.

Prerequisite: EARTHSS 51 or BIO SCI 94 or (EARTHSS 60A and EARTHSS 60C)

Same as EARTHSS 168.

Restriction: Biological Sciences Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**BIO SCI E128. Chemical Ecology. 4 Units.**

An introduction to the unspoken chemical language of nature. Emphasis on interactions between insects, plants, and microbes including plant defense, pollination, and microbial warfare.

Prerequisite or corequisite: BIO SCI 94 and CHEM 1C. CHEM 1C with a grade of C- or better

**BIO SCI N129. The Transparent Brain. 5 Units.**

Teaches students how to perform new 3-D histology techniques that reveal the complex circuitry of the brain in unprecedented detail. Students work with real brain samples as part of ongoing neuroscience research projects. Materials fee.

Prerequisite: BIO SCI 93 or BIO SCI H93

Restriction: Students who require this course for completion of their degree have first consideration for enrollment.

**BIO SCI D130. Photomedicine. 4 Units.**

Studies the use of optical and engineering-based systems (laser-based) for diagnosis, treating diseases, manipulation of cells and cell function. Physical, optical, and electro-optical principles are explored regarding molecular, cellular, organ, and organism applications.

Prerequisite: PHYSICS 3C or PHYSICS 7D

Same as BME 135.

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

**BIO SCI E130. Forensic Genetics. 4 Units.**

Covers techniques currently used for forensic identification and paternity testing. Topics include STR, Y-STR and mitochondrial DNA tests, database searches, mixtures, allelic drop out, likelihood ratios, laboratory errors and the interaction of science and the legal system.

Prerequisite: BIO SCI 93 and BIO SCI 94

**BIO SCI M130L. Advanced Molecular Lab Techniques. 6 Units.**

Discovery-driven experimentation in the fields of molecular biology, biochemistry, and cell biology. Also involves other aspects of the lab experience including group discussion of results, scientific paper analysis, and student presentations. Materials fee.

Prerequisite: BIO SCI 100 and (BIO SCI D111L or BIO SCI M114L or BIO SCI M116L or BIO SCI M118L)

Repeatability: May be taken for credit 3 times.

Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

**(Ib)****BIO SCI E131L. Image Analysis in Biological Research. 4 Units.**

Introduction to scientific image analysis including techniques such as high-speed, time-lapse, thermal imaging, and flow visualization. Students make movies using cameras, edit and analyze images using computers, and do a writing project.

Prerequisite: (BIO SCI E106 or BIO SCI E109) and (BIO SCI 100 or BIO SCI 108)

Restriction: Seniors only.

**(Ib)****BIO SCI M131. Innate Immunity, Infection, and Pathogenesis. 4 Units.**

Role of the innate immune system in health and disease. Molecular pathways of innate immune recognition, expression, and regulation of immune receptors, signal transduction, pathogen sensors, and detection of microbial ligands. Lecture and discussion of primary research articles.

Prerequisite: BIO SCI M121 or BIO SCI M122 or BIO SCI M124A or BIO SCI M124B or BIO SCI M143

**BIO SCI N131. Human Neurodegenerative Diseases. 4 Units.**

Clinical and epidemiological aspects of neurodegenerative diseases causing dementia are reviewed, including Alzheimer's disease, Parkinson's disease, Huntington's disease, and Frontotemporal Dementia. Seminar format includes student presentation and group discussion.

Prerequisite: BIO SCI 99

**BIO SCI D132. Introduction to Precision Medicine. 4 Units.**

Introduction to the use of genomic techniques for the study of individual genomes and transcriptomes in healthy and diseased samples. Covers GWAS, current sequencing techniques, cancer genomics, and biomarker discovery.

Prerequisite: BIO SCI 99

**BIO SCI D133. Advances in Regenerative Medicine. 4 Units.**

Introduces the rapidly growing field of regenerative medicine. New developments in stem cell research are discussed. Cellular, molecular, and engineering aspects of stem cell-based organ replacement strategies are examined, with emphasis on specific regenerative therapies.

Prerequisite: BIO SCI D103 or BIO SCI D104

Overlaps with BIO SCI N172.

**BIO SCI M133. High-Resolution Structures: NMR and X-ray. 4 Units.**

Basic principles of magnetic resonance and X-ray crystallography toward the determination of high-resolution biomolecular structures.

Prerequisite: MATH 2B or MATH 5B

Restriction: Upper-division students only.

Concurrent with MOL BIO 211.

**BIO SCI E134. Microbiomes. 4 Units.**

Students develop an understanding of microbiomes in the context of both their environment and their impact on host physiology. Discussions on how microbiomes interact with the human body.

Prerequisite: BIO SCI M122

**BIO SCI N134. Cognitive Neuroepigenetics. 4 Units.**

Current topics in the emerging field of cognitive neuroepigenetics focusing on understanding the underlying epigenetic mechanisms of memory formation and persistence. Primary literature is used to explore these processes.

Prerequisite: BIO SCI N110 or BIO SCI N115A

**BIO SCI D135. Cell Biology of Human Disease. 4 Units.**

Builds on prior biology courses about the underlying cell biological mechanisms and recent treatment advances of several model diseases. Emphasizes literature searches, reading primary literature, and student group work.

Prerequisite: BIO SCI D103

**BIO SCI D136. Human Anatomy. 4 Units.**

Presents a systems approach to the analysis of human structure. Molecular, cellular, tissue, organ, and organ system levels of structure and organization are integrated throughout.

Prerequisite: BIO SCI 99

Overlaps with BIO SCI D170.

**BIO SCI E136. The Physiology of Human Nutrition . 4 Units.**

Examines the biochemical basis of energy metabolism, physiological processes in digestion and uptake, and the biochemical transformation of carbohydrates, fats, and proteins in the human body. The emphasis is on expanding the students' understanding of physiology.

Prerequisite: BIO SCI 98 and BIO SCI E109

Overlaps with BIO SCI M150.

**BIO SCI D137. Eukaryotic and Human Genetics. 4 Units.**

Structure and function of genes in eukaryotes with emphasis on special problems of genetic studies in humans. Molecular methods of genetic analysis and gene transfer are discussed. Practical applications and ethical and social issues raised by genetic studies are addressed.

Prerequisite: BIO SCI 97 or BIO SCI H97

**BIO SCI M137. Microbial Genetics. 4 Units.**

Basic principles of microbial genetics are presented as lectures for the first half of the course. The second half is devoted to applications of these principles and requires reading review and original research papers and interactions with guest lecturers.

Prerequisite: BIO SCI 98

**BIO SCI D138. Critical Thinking in Cell Biology . 4 Units.**

Builds on prior biology courses about cell biology, and works to develop a deeper understanding of experimental techniques and interpretation of experiments. A key focus will be the question of how one moves from specific examples to general.

Prerequisite: BIO SCI 99

**BIO SCI E138. Comparative Animal Physiology. 4 Units.**

Maintenance aspects of physiology: water balance; feeding and digestion; metabolism; respiration and circulation.

Prerequisite: BIO SCI E109

**BIO SCI N138. Sex Differences in the Brain. 4 Units.**

Explores the neural bases of sex influences on brain function.

Prerequisite: BIO SCI 99

**BIO SCI E139. Animal Locomotion. 4 Units.**

The physiology, biomechanics, and neuroscience that determines how animals propel themselves and navigate through the world. Considers the principles that govern the walking, running, flying, and swimming of animals, including exercising humans.

Prerequisite: BIO SCI E109

**BIO SCI E140L. Evolution and the Environment Laboratory. 4 Units.**

Explores basic topics in ecology and evolutionary biology and applications to agriculture, conservation, environmental issues, and public health. Format involves lab activities and discussion of scientific journal articles, with focus on learning to evaluate scientific evidence.

Prerequisite or corequisite: (BIO SCI 100 or BIO SCI 108) and BIO SCI E106

Restriction: Seniors only. Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

**BIO SCI E142W. Writing/Philosophy of Biology. 4 Units.**

Philosophy of biology, e.g., scientific method in biology, the structure of evolutionary theory, teleology, ethics, and evolution. Course work includes one 4,000-word and four 1,000-word papers.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as LPS 142W, PHILOS 142W.

Restriction: Juniors only.

(Ib)

**BIO SCI M143. Human Parasitology. 4 Units.**

Introduction to human animal-parasitic diseases including worms and protozoan infections.

Prerequisite: BIO SCI 99

**BIO SCI M144. Cell Organelles and Membranes. 4 Units.**

Structure, function, and biogenesis of biological membranes and membrane-bound organelles.

Prerequisite: CHEM 51A

**BIO SCI D145. Genomics, Development, and Medicine. 4 Units.**

Focuses on the applications of genomics and proteomics to problems in genetics, cell, and developmental biology. Students will gain a comprehensive understanding of the techniques currently used for genomics analysis and how best to apply these tools to solve problems.

Prerequisite: BIO SCI 99

**BIO SCI E145. Animal Coloration and Vision. 4 Units.**

Physiological and behavioral mechanisms of color production and vision including crypsis, mimicry, aposematism, masquerade, sexual dimorphism, and predator-prey interactions through the lens of signals, receivers, and receptors; color and polarization vision in mate choice and visual adaptations to aquatic environments.

Prerequisite or corequisite: BIO SCI E106

**BIO SCI E146. Ecosystem Services. 4 Units.**

Covers what ecosystem services are, how to classify them, what the impacts of land degradation are on ecosystem services, how to quantify and value them, and the importance of mainstreaming ecosystem services in decision-making.

Prerequisite: (EARTHSS 70A and EARTHSS 70B) or (EARTHSS 51 and EARTHSS 53 and EARTHSS 55)

Same as EARTHSS 154.

**BIO SCI N147. Hearing and the Brain. 4 Units.**

An overview of brain mechanisms of hearing, including perception of simple sounds, speech, and music. Begins with sound itself, and looks at processing by the ear, auditory pathways, auditory cortex, and beyond. Also auditory development, learning, and clinical issues.

Prerequisite: PSYCH 160A or BIO SCI 93 or BIO SCI H93

Same as PSYCH 161H.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Biological Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**BIO SCI D148. Development and Disease. 4 Units.**

Development of animal embryos from a fertilized egg to a functioning organism. Topics include reproduction, body-axis formation, growth and differentiation of embryonic cells, and organogenesis, with an emphasis on congenital birth defects and diseases that disrupt these processes.

Prerequisite: BIO SCI D103 or BIO SCI D104

**BIO SCI E150. Conservation Biology. 4 Units.**

Genetic and ecological issues in conservation biology, including effects of human population growth, the value of biodiversity, conservation genetics, demography, metapopulation dynamics, community and ecosystem processes, species invasions, global climate change, and reserve design and management.

Prerequisite: BIO SCI E106

**BIO SCI N150. Brain Dysfunction and Repair. 4 Units.**

Introduction to the disruptions in brain function that underlie disorders such as Alzheimer's disease, Parkinsonism, schizophrenia, and depression, and the basis for drug therapies. The brain's ability to repair itself after damage and the pros and cons of that repair.

Prerequisite: BIO SCI N110 or BIO SCI N115A

Restriction: Neurobiology Majors only.

**BIO SCI E151. Evolutionary and Ecological Principles in Medicine. 4 Units.**

Explore the dynamics of populations on an ecological, epidemiological, and medical level. Considers the dynamics of competition, predation, and parasitism; the spread and control of infectious diseases; and the in vivo dynamics of viral infections and the immune system.

Prerequisite: BIO SCI 93

Same as PUBHLTH 182.

Concurrent with ECO EVO 251.

**BIO SCI N151. Neurobiology of Aging. 4 Units.**

Multidisciplinary overview of the functional capacity of the aging brain, its structural changes and the mechanisms underlying function and structure. Emphasis is on successful brain aging and those mechanisms which lead to the development of Alzheimer's disease.

Prerequisite: BIO SCI N110 or BIO SCI N115A

**BIO SCI N152. Developmental Neurobiology. 4 Units.**

The development of the nervous system is discussed with emphasis on the processes that underlie the appearance of complex and highly ordered neural circuits. Topics include neural induction, specification, migration and death; axon growth, and neural circuit formation.

Prerequisite: BIO SCI 93 or BIO SCI H93

**BIO SCI E153. Functional and Structural Evolutionary Genomics. 4 Units.**

Function and organization of genomes analyzed from an evolutionary perspective. Review of some of the most recent experimental approaches in genome analysis and comparative genomics. Relevant software to analyze DNA and expression data is used.

Prerequisite: BIO SCI 97 or BIO SCI H97

Concurrent with ECO EVO 253.

**BIO SCI N153. Neuropharmacology. 4 Units.**

Survey of neurotransmitter systems, focusing on how transmitters are made, how they interact with their receptors, and how drugs can influence these processes to alter neural function and behavior.

Prerequisite: BIO SCI N110 or BIO SCI N115A

**BIO SCI E154. Genetics and Human History. 4 Units.**

Explores topics in human health/history from an evolutionary perspective, with emphasis on genetics. Topics include the relationship between genetics and human disease as an evolutionary question, and how modern genetic techniques are used to study the history of human populations.

Prerequisite or corequisite: BIO SCI E106

**BIO SCI N154. Molecular Neurobiology. 4 Units.**

Nature and actions of genes/gene products that regulate the functioning of the nervous system and its interaction with muscles. Topics include neural control of gene expression; genetics and molecular biology of neural and neuromuscular diseases; gene therapies for neural disorders.

Prerequisite: BIO SCI 99

**BIO SCI E155. Physiology in Extreme Environments. 4 Units.**

An in-depth look at the physiological mechanisms that allow animals, including humans, to be physically active and survive in extreme environments. Physiological responses to high altitude, diving, microgravity, deserts, and extreme cold are examined.

Prerequisite: BIO SCI 94

**BIO SCI N155. Wiring the Developing Brain . 4 Units.**

The development of the nervous system is discussed with particular emphasis on the processes that underlie the appearance of complex and highly ordered neural circuits. Basic neurodevelopmental processes are discussed and correlated with normal brain function/dysfunction.

Prerequisite: BIO SCI N110 or BIO SCI N115A or BIO SCI N152

**BIO SCI N156. Molecular Mechanisms of Memory. 4 Units.**

Current topics focused on understanding the molecular mechanisms that contribute to synaptic plasticity, learning, and memory. Primary literature is used to explore the variety of molecular mechanisms underlying these processes.

Prerequisite: BIO SCI 99

**BIO SCI N158. Neurobiology of Learning and Memory. 4 Units.**

How the brain and behavior change as a result of experience, with an emphasis on identifying the neurochemical processes through which memory is stored and the parts of the brain that are involved.

Prerequisite: BIO SCI 35 or BIO SCI N110 or BIO SCI N115A

**BIO SCI N159. Animal Behavior. 4 Units.**

Explores why animals behave the way they do from evolutionary/mechanistic perspectives. Considers selective pressures and evolutionary constraints that shape animal behavior and the underlying neural and hormonal mechanisms by using examples such as why dogs bark, why some birds migrate.

Prerequisite: BIO SCI N110 or BIO SCI N115A

**BIO SCI E160. Biology of Birds. 4 Units.**

A thorough introduction to the biology of birds, covering topics ranging from avian anatomy and physiology to behavior, natural history, ecology, genetics, evolution, systematics, and conservation. Examples from both local and global avifauna.

Corequisite: BIO SCI E160L

Prerequisite: BIO SCI 94

**BIO SCI E160L. Biology of Birds Lab. 4 Units.**

The companion to Biology of Birds (E160). Consists primarily of field trips to identify local birds and study avian natural history. Students must provide their own transportation to field sites, some with entrance fees. Students must have field binoculars.

Corequisite: BIO SCI E160

Prerequisite: (BIO SCI 100 or BIO SCI 108)

Restriction: Seniors only. Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

**BIO SCI M160. Structure-Function Relationships of Integral Membrane Proteins. 4 Units.**

Integral membrane proteins such as voltage and ligand-gated ion channels, water channels, pumps, cotransporters, and receptors (e.g., GPCRs). The emphasis is on the relationship between atomic structure and the functional properties of these proteins.

Prerequisite: BIO SCI 98 and BIO SCI 99. BIO SCI 98 with a grade of B or better. BIO SCI 99 with a grade of B or better

Concurrent with MOL BIO 255.

**BIO SCI N160. Language and the Brain . 4 Units.**

Research analysis on biological bases of human linguistic capacity. Development, focusing on hemispheric specialization, plasticity; localization of specific linguistic functions in adults, with emphasis on study of aphasias; relation of linguistic capacity to general cognitive capacity, considering research on retardation.

Prerequisite: (PSYCH 7A or PSY BEH 9 or PSYCH 9A or PSY BEH 11A) and (PSYCH 9B or PSY BEH 11B or BIO SCI 35 or BIO SCI N110 or BIO SCI N115A)

Same as LSCI 158, PSYCH 161.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Biological Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**BIO SCI N165. Brain Disorders and Behavior. 4 Units.**

Examines the localization of human brain functions and the effects of neurological disorders on psychological functions such as perception, motor control, language, memory, and decision-making.

Prerequisite: (PSYCH 7A or PSY BEH 9) and (PSYCH 9A or PSY BEH 11A) and (PSYCH 9B or PSY BEH 11B) or BIO SCI 35 or BIO SCI N110

Same as PSYCH 160D.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Biological Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**BIO SCI E166L. Field Biology. 4 Units.**

Conducting group and independent studies in Southern California ecosystems, this course covers the fundamentals of experimental design, statistical analysis, communicating scientific findings (orally, visually, in writing), and other skills necessary for the scientific investigation of biological processes in the field. Materials fee.

Prerequisite: (BIO SCI 100 or BIO SCI 108) and BIO SCI E106. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Seniors only.

**(Ib)****BIO SCI N166. Introduction to Cognitive Neuroscience. 4 Units.**

Introduction to the neural basis of human perceptual, motor, and cognitive abilities. Topics include sensory perception, motor control, memory, language, attention, emotion, frontal lobe function, functional brain imaging, and neuropsychological disorders.

Prerequisite: PSYCH 7A or (PSYCH 9A and PSYCH 9B) or PSY BEH 9 or (PSY BEH 11A and PSY BEH 11B) or BIO SCI 35 or BIO SCI N110 or BIO SCI N115A

**BIO SCI E168. Evolution. 4 Units.**

An integrative treatment of evolutionary biology that covers evolutionary processes, basic research methods, and the history of life.

Prerequisite: BIO SCI E106

**BIO SCI D170. Applied Human Anatomy. 6 Units.**

Systems approach to analyze the form and function of the human body with an emphasis on applying anatomical concepts to evaluate clinical cases. The laboratory will use human models and a simulated cadaver dissection for structure. Materials fee.

Prerequisite: BIO SCI E109 or PHRMSCI 120. BIO SCI E109 with a grade of C or better. PHRMSCI 120 with a grade of C or better

Overlaps with BIO SCI D136.

**BIO SCI N170. Clinical Neuroscience. 4 Units.**

An introduction to the neuroclinical bases of human behavior, including neuropsychological approaches to mental disorders. Also includes case formulations, research articles, therapeutic approaches, and other discussions related to select psychopathology and other neurobehavioral topics.

Prerequisite: PSCI 9 or PSYCH 7A or PSCI 11A or PSYCH 9A or BIO SCI 99

Same as PSCI 160C.

Restriction: Psychological Science Majors have first consideration for enrollment. Biological Sciences Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**BIO SCI E172. Plant Diversity in a Changing World. 4 Units.**

Investigation of planet diversity in California and throughout the world, including basic systematic concepts, an introduction to major groups of flowering plants, and the effects of global biological change on plant diversity.

Prerequisite: BIO SCI E106

Concurrent with ECO EVO 272.

**BIO SCI N172. Regenerative Neurobiology. 4 Units.**

Explores the field of regenerative neurobiology. Both basic stem cell discoveries and their potential clinical application to brain disorders examined. Opportunities, challenges, and implications of this research also discussed.

Prerequisite: BIO SCI N110 or BIO SCI N115A

Overlaps with BIO SCI 44, BIO SCI D133.

**BIO SCI N173. Human Neuropsychology. 4 Units.**

A survey of human brain disorders using a clinical case study approach to illustrate fundamental issues in studying brain and behavior. Topics include sensory deficits, attentional neglect, amnesia, cortical organization, clinical psychopathology, and more.

Prerequisite: BIO SCI N110 or BIO SCI N115A or PSYCH 9A or PSCI 11A

Same as PSCI 163C, PSYCH 162N.

Restriction: School of Biological Sciences students have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**BIO SCI N174. Principles of Neural Computation. 4 Units.**

Introduction to the theoretical principles and biological mechanisms underlying how brains acquire, assimilate, store, and retrieve information, and how they compute adaptive responses to external inputs.

Prerequisite: BIO SCI N110 or BIO SCI N115A

Concurrent with NEURBIO 220.

**BIO SCI N176. Cerebral Cortex: Structure, Function, and Plasticity. 4 Units.**

The cerebral cortex is highly developed in mammals and is responsible for higher perceptual and cognitive functions. Explores some amazing aspects of cortical structure, function, and plasticity emphasizing primary literature.

Prerequisite: BIO SCI N110 or BIO SCI N115A

**BIO SCI E179. Limnology and Freshwater Biology. 4 Units.**

Biology of freshwater environments: lakes, ponds, rivers, their biota, and the factors which influence distribution of organisms.

Corequisite: BIO SCI E179L

Prerequisite: BIO SCI 94

**BIO SCI E179L. Field Freshwater Ecology. 4 Units.**

Analytical techniques for common water-quality variables of lakes, streams, and rivers. Benthic fauna, vertebrates and invertebrates, algae, and aquatic plants. Emphasis on field methods with an experimental approach; laboratory exercises. Field trips to marshes, vernal pools, rivers, and streams. Materials fee.

Corequisite: BIO SCI E179

Prerequisite or corequisite: (BIO SCI 100 or BIO SCI 108) and BIO SCI E179

Restriction: Seniors only. Students who require this lab for completion of their degree have first consideration for enrollment.

**(Ib)****BIO SCI M180. Biotechnological Applications of Energy and Environmental Research. 4 Units.**

Covers microbiological and biochemical background related to current biotechnological applications, case studies of biotech-companies, and basic information related to patents and start-up companies. Topics include biofuel, bioremediation, agricultural, and environmental applications.

Prerequisite: BIO SCI 98

**BIO SCI E182. Mediterranean Ecosystems: Biodiversity and Conservation. 4 Units.**

Biodiversity, history of human impacts, and conservation efforts are examined in the five Mediterranean-type ecosystems. Remaining natural habitat, approaches to ecological habitat restoration, control of exotic species, and predicted consequences of global climate change are described. Field trip required.

Prerequisite: BIO SCI 94

**BIO SCI N182. Vision. 4 Units.**

Visual perception and the anatomy and physiology of the visual system. Topics include the retina and the visual pathway; visual sensitivity; color vision; spatial vision; motion perception; and the development of the visual system.

Same as PSYCH 131A.

Overlaps with PSYCH 130A.

Restriction: Upper-division students only. Psychology Majors have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment. School of Biological Sciences students have first consideration for enrollment.

**BIO SCI E183. Exercise Physiology. 4 Units.**

Focus upon critical topics in the area of exercise biology using the comparative physiological approach. Specifically examine the physiological factors that limit the capacity of an organism to sustain high levels of aerobic metabolism.

Prerequisite: BIO SCI 98 and BIO SCI E109

**BIO SCI E184. Ecology and Diversity of Insects. 4 Units.**

Insects—representing two-thirds of all species—play fundamental roles in human health, agriculture, and natural ecosystems. Topics include insect morphology, development, physiology, taxonomy, ecology, and insects in human affairs. Lecture includes interactive demonstrations and an optional weekend trip. Materials fee.

Prerequisite: BIO SCI E106

**BIO SCI E186. Population and Community Ecology. 4 Units.**

Population structure, function, development, and evolution. Topics include population structure, population growth and regulation, metapopulations, predation, competition, species diversity, ecosystem function, macroecology, and island biogeography. Offered every other Winter.

Prerequisite: BIO SCI E106

**BIO SCI E186L. Population and Community Ecology Lab. 4 Units.**

Covers processes specific to groups of the same species (populations) and multiple species (communities). Includes growth, regulation, dynamics, and persistence of populations and community interactions, development, diversity, and macroecology. Lab activities focus on application of population prediction and biodiversity assessment.

Prerequisite: BIO SCI E106 and (BIO SCI 100 or BIO SCI 108). Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Seniors only.

**(Ib)****BIO SCI E187. Exercise as Medicine. 4 Units.**

Explores the link between regular physical activity and health, focusing on mechanistic insights into how regular exercise improves overall health and alters disease trajectories of cancer, type-II diabetes, depression, and other chronic illnesses.

Prerequisite: BIO SCI E109

**BIO SCI E188. Introduction to Insect Physiology. 4 Units.**

Physiology of insects. Insect respiration, digestion, excretion, and neurobiology, including sensory systems and effectors.

Prerequisite: BIO SCI E109

**BIO SCI E189. Environmental Ethics. 4 Units.**

History of evolution of environmental ethics in America. Management problems in national parks, wilderness areas, wild and scenic rivers, national forests. Contemporary and historical aspects/contributors to the field. Mitigation, endangered species, habitat restoration, biodiversity, and environmental activism. Field trips required.

Restriction: Upper-division students only.

**BIO SCI 190. Transfer Student Seminar. 1 Unit.**

Weekly meetings consisting of presentations by faculty, professional staff, and New Student Peer Academic Advisors provide information about the School of Biological Sciences, campus resources, and special programs/opportunities.

Grading Option: Pass/no pass only.

Restriction: New transfer students only.

**BIO SCI D190. Topics in Developmental and Cell Biology. 2-4 Units.**

Studies in selected areas of developmental and cell biology.

Prerequisite: BIO SCI D103

Repeatability: May be taken for credit 3 times as topics vary.

Restriction: Upper-division students only. School of Biological Sciences students only.

**BIO SCI E190. Topics in Ecology and Evolutionary Biology. 2-4 Units.**

Studies in selected areas of ecology and evolutionary biology.

Prerequisite: BIO SCI E106

Repeatability: May be taken for credit 3 times as topics vary.

**BIO SCI M190. Topics in Molecular Biology and Biochemistry. 2-4 Units.**

Studies in selected areas of Molecular Biology and Biochemistry.

Prerequisite: BIO SCI 98

Repeatability: May be taken for credit 3 times as topics vary.

**BIO SCI N190. Topics in Neurobiology and Behavior. 2-4 Units.**

Studies in selected areas of neurobiology and behavior.

Prerequisite: BIO SCI N110 or BIO SCI N115A

Repeatability: May be taken for credit 3 times as topics vary.

**BIO SCI 191A. Senior Seminar on Global Sustainability I. 2 Units.**

Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum is also required. Seminar utilized to analyze forum presentations. Prepare bibliography.

Same as SOCECOL 186A, EARTHSS 190A.

Restriction: Seniors only. Global Sustainability Minors have first consideration for enrollment.

**BIO SCI 191B. Senior Seminar on Global Sustainability II. 2 Units.**

Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum is also required. Seminar utilized to analyze forum presentations. Prepare research proposal.

Prerequisite: BIO SCI 191A or SOCECOL 186A or EARTHSS 190A

Same as SOCECOL 186B, EARTHSS 190B.

Restriction: Seniors only.

**BIO SCI 191CW. Writing/Senior Seminar on Global Sustainability III. 4 Units.**

Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum also is required. Seminar utilized to analyze Forum presentations and to prepare senior research paper. Prepare/write research paper under direction of faculty member.

Prerequisite: BIO SCI 191B or EARTHSS 190B or SOCECOL 186B. BIO SCI 191B or EARTHSS 190B or SOCECOL 186B. Satisfactory completion of the Lower-Division Writing requirement.

Same as EARTHSS 190CW, SOCECOL 186CW.

Restriction: Seniors only.

(Ib)

**BIO SCI 192. Tutoring in Biology. 2 Units.**

Tutoring program with Biological Sciences student peers.

Repeatability: May be taken for credit 6 times.

Restriction: Biological Sciences Peer Tutoring Program students only.

**BIO SCI 193A. Campus as a Living Lab I. 2-4 Units.**

Students study sustainability concepts and theories and how they apply to our most pressing environmental, social, and economic challenges. Concurrently, they work on hands-on projects to improve the sustainability of campus operations and systems.

Grading Option: In Progress (Letter Grade with P/NP).

Restriction: Upper-division students only.

**BIO SCI 193B. Campus as a Living Lab II. 2-4 Units.**

Students study sustainability concepts and theories and how they apply to our most pressing environmental, social, and economic challenges. Concurrently, they work on hands-on projects to improve the sustainability of campus operations and systems.

Prerequisite: BIO SCI 193A

Restriction: Upper-division students only.

**BIO SCI 193C. Campus as a Living Lab III. 2-4 Units.**

Students study sustainability concepts and theories and how they apply to our most pressing environmental, social, and economic challenges. Concurrently, they work on hands-on projects to improve the sustainability of campus operations and systems.

Prerequisite: BIO SCI 193B

Restriction: Upper-division students only.

**BIO SCI 194. Current Topics in Biology. 1 Unit.**

A seminar designed to discuss recent research findings and experimental issues in biology.

Corequisite: BIO SCI 199

Grading Option: Pass/no pass only.

Repeatability: Unlimited as topics vary.

**BIO SCI 194S. Safety and Ethics for Research. 1 Unit.**

Introduces students to the concepts, techniques, and ethics involved in biological sciences laboratory work.

Grading Option: Pass/no pass only.

**BIO SCI H195. Honors Topics in Biological Sciences. 4 Units.**

Varied course topics in Biological Sciences designed for students in Honors in Biological Sciences.

Repeatability: May be taken for credit 2 times.

Restriction: Biological Sciences Honors students only.

**BIO SCI 197. Special Study in Biological Sciences. 1-5 Units.**

Individualized instruction dealing with conceptual or theoretical problems in the biological sciences, rather than technical problems.

Prerequisite: BIO SCI 94

Repeatability: May be repeated for credit unlimited times.

Restriction: Maximum of 5 units (per quarter) between BIO SCI 197, BIO SCI 198, and BIO SCI 199.

**BIO SCI 198. Directed Group Studies. 1-5 Units.**

Small group experimental laboratory or field work performed under the direction of a faculty member.

Prerequisite: BIO SCI 94

Repeatability: May be repeated for credit unlimited times.

**BIO SCI 199. Independent Study in Biological Sciences Research. 1-5 Units.**

Individual experimental laboratory or field research under a professor's direction. Required for participation in the Excellence in Research Program.

Prerequisite: BIO SCI 94

Repeatability: Unlimited as topics vary.

**BIO SCI 285. Topics in Allied Health Microbiology. 4 Units.**

Basic microbiology with emphasis for allied health professions such as nursing. Emphasis is on micro-organisms involved in human health, disease and food safety.

Prerequisite: BIO SCI 98

Repeatability: May be taken for credit for 4 units as topics vary.

Overlaps with BIO SCI M122, BIO SCI M118L.

Restriction: Program in Nursing Science students only. Master of Nursing Degree students only.

## Biomedical and Translational Science (BATS)

### Courses

**BATS 209A. Introduction to Medical Statistics. 4 Units.**

Provides understanding of medical statistics for clinicians and clinical researchers to read and interpret literature.

**BATS 209B. Introduction to Medical Statistics II. 4 Units.**

Provides sufficient understanding of medical statistics to read and interpret medical literature critically, identify appropriate statistics for basic research designs used in medicine, and discriminate between appropriate and inappropriate statistical applications for common research designs.

Prerequisite: BATS 209A

**BATS 210A. Introduction to Clinical Epidemiology. 4 Units.**

Introduces principles and practice of clinical epidemiology and the population-based approach to health and disease.

Prerequisite: BATS 209A

**BATS 232. Design and Analysis of Clinical Trials. 4 Units.**

Presents history, organization and planning, rationale for methods, limits, and ethics in conducting clinical trials.

Prerequisite: BATS 209A or STAT 250

**BATS 245A. Comparative Effectiveness Research . 4 Units.**

Provides a comprehensive overview of comparative effectiveness research (CER) with in-depth methodologic clinical practice and policy/dissemination issues related to the conduct, interpretation, and clinical applications of CER.

**BATS 247. Measurement Science, Outcomes Research, and Advanced Applied Methods. 4 Units.**

Further the understanding of methodologic issues involved in the conducting of comparative effectiveness research (CER). Topics: risk adjustment, balancing observational study designs, use of outcomes from multiple data sources, innovations clinical trial designs, the conduct of meta-analysis, and psychometric methods.

**BATS 251. Quality Efficiency and Cost Effectiveness. 4 Units.**

Introduces the principles and practice of quality of care, patient safety, and patient experience research, along with major national and statewide policy and legislative initiatives related to quality of care and patient safety.

**BATS 253. Disparities in Health and Health Care. 4 Units.**

Reviews all aspects of culture that influence health status, development of public health policy, and management and practice of health care. Explores how race and ethnicity affect health and health care, including health care services and policies governing these services.

**BATS 255. Health Politics and Policy. 4 Units.**

Offers political and analytical insights into understanding U.S. health policymaking and developing strategies that influence health policy outcomes.

**BATS 280. Biomedical and Translational Science Seminar. 2 Units.**

Students present their current research or a topic of interest and are exposed to diverse projects in the biomedical and translational science arena.

Repeatability: May be repeated for credit unlimited times.

**BATS 295. Master's Thesis Research and Writing. 2-12 Units.**

Master's thesis research and writing with Biomedical and Translational Science faculty.

Repeatability: May be repeated for credit unlimited times.

**BATS 296. Ethics in Clinical Research. 4 Units.**

Covers major frameworks and concepts of ethics in public health research as well as human subject protection issues.

**BATS 299. Independent Directed Research. 2-12 Units.**

Independent research with Biomedical and Translational Science faculty.

Repeatability: May be repeated for credit unlimited times.

## Biomedical Engineering (BME)

### Courses

**BME 1. Introduction to Biomedical Engineering. 3 Units.**

Introduction to the central topics of biomedical engineering. Offers a perspective on bioengineering as a discipline in a seminar format. Principles of problem solving, design, engineering inventiveness, entrepreneurship, information access, communication, ethics, teamwork, and social responsibility are emphasized.

(Design units: 1)

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment.

**BME 3. Engineering Innovations in Treating Diabetes. 4 Units.**

Innovations in diabetes treatment from the 1800s until the present: purification of insulin, measuring and control of blood glucose, recombinant DNA, clinical trials, and ethics. Solving optimization problems in engineering with Excel.

(II and VA ).

**BME 50A. Cell and Molecular Engineering. 4 Units.**

Molecular, structural, genetic, biophysical, and cellular principles of life and bioengineering. Introduction to molecular bioengineering, genetic engineering, synthetic biology, and cell biology. Applications to genetic and biomolecular design.

(Design units: 1)

Corequisite: BME 1

Prerequisite: CHEM 1C or CHEM H2C

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**BME 50B. Cell and Molecular Engineering. 4 Units.**

Physiological function from a cellular, molecular, and biophysical perspective. Introduction to genetics, neuronal signaling, and cell cycle control.

(Design units: 1)

Prerequisite: BME 50A

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment.

**BME 60A. Engineering Analysis/Design: Data Acquisition. 4 Units.**

Fundamentals of LabVIEW programming, basics of computer-based experimentation, establishing interface between computer and data acquisition instrumentation, signal conditioning basics. Materials fee.

(Design units: 2)

Prerequisite: PHYS 7D

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment.

**BME 60B. Engineering Analysis/Design: Data Analysis. 4 Units.**

Overview of MATLAB; numeric, cell, and structure arrays; file management; plotting and model building; solving linear algebraic equations; signal and image processing. Materials fee.

(Design units: 1)

Prerequisite: MATH 3A

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment.

**BME 60C. Engineering Analysis/Design: Computer-Aided Design. 4 Units.**

Introduction to SolidWorks and Computer-Aided Design software; design; analysis; rapid prototyping; visualization and presentation; manufacturing planning. Materials fee.

(Design units: 2)

Prerequisite or corequisite: BME 1

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment.

**BME 60D. Engineering Analysis/Design: Finite-Element Simulation. 4 Units.**

Introduction to finite-element simulation; fundamentals of Multiphysics simulation;.

(Design units: 2)

Prerequisite: BME 60B and BME 60C

**BME 110A. Biomechanics I. 4 Units.**

Introduction to statics and dynamics. Topics include rigid bodies, analysis of structures, forces in beams, moments of inertia, friction, kinetics, work, and energy.

(Design units: 1)

Prerequisite: PHYS 7C and MATH 3A and MATH 3D and BME 60B and BME 60C

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**BME 110B. Biomechanics II. 4 Units.**

Introduction to biomechanics from subcellular to tissue levels. Introduction to stress, strain, and constitutive laws of cells and tissues. Emphasis is placed on biosolids. Introduction to elastic and viscoelastic behaviors with emphasis on the standard linear model of viscoelasticity.

(Design units: 1)

Prerequisite: BME 110A

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**BME 110C. Biomechanics III. 4 Units.**

Introduction to human biomechanics with emphasis on cardiovascular biomechanics and biofluid mechanics.

(Design units: 0)

Prerequisite: BME 110B

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

**BME 111. Design of Biomaterials. 4 Units.**

Natural and synthetic polymeric materials. Metal and ceramics implant materials. Mechanical properties, degradation, surface characterization, and design of materials. Wound repair, blood clotting, foreign body response, biocompatibility of material. Artificial organs and medical devices. Government regulations.

(Design units: 3)

Corequisite: BME 50B or BIO SCI 99.

Prerequisite: CHEM 1C

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**BME 114. Genetic Engineering and Synthetic Biology. 4 Units.**

Exploring how biological function can be engineered and 'synthesized' from the DNA level up.

(Design units: 0)

Prerequisite: (CHEM 1C or CHEM H2C) and MATH 3D and BME 50A and BME 50B

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

**BME 120. Sensory Motor Systems. 4 Units.**

A quantitative and systems approach to understanding physiological systems. Systems covered include the nervous and musculoskeletal systems.

(Design units: 2)

Prerequisite: (BME 60B or EECS 10 or EECS 12 or CEE 20 or MAE 10) and MATH 3D and PHYS 7D

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

Concurrent with BME 220.

**BME 121. Quantitative Physiology: Organ Transport Systems. 4 Units.**

A quantitative and systems approach to understanding physiological systems. Systems covered include the cardiopulmonary, circulatory, and renal systems.

(Design units: 1)

Prerequisite: (BME 60B or EECS 10 or EECS 12 or CEE 20 or MAE 10) and MATH 3D

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment.

**BME 130. Biomedical Signals and Systems. 4 Units.**

Analysis of analog and digital biomedical signals; Fourier Series expansions; difference and differential equations; convolutions. System models: discrete-time and continuous-time linear time-invariant systems; Laplace and Fourier transforms. Analysis of signals and systems using computer programs.

(Design units: 1)

Corequisite: BME 60B

Prerequisite: (MATH 3A or ICS 6N) and MATH 3D. Recommended: STAT 8.

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment.

**BME 132. Introduction to Computational Biology. 4 Units.**

The use of theories and methods based on computer science, mathematics, and physics in molecular biology and biochemistry. Basics in biomolecular modeling. Analysis of sequence and structural data of biomolecules. Analysis of biomolecular functions.

Prerequisite: MATH 2D or MATH 3A or STAT 7 or STAT 8

Same as BIOL M123, CS 183.

Concurrent with MBB 223 and BME 232.

**BME 135. Photomedicine. 4 Units.**

Studies the use of optical and engineering-based systems (laser-based) for diagnosis, treating diseases, manipulation of cells and cell function. Physical, optical, and electro-optical principles are explored regarding molecular, cellular, organ, and organism applications.

(Design units: 0)

Prerequisite: PHYS 3C or PHYS 7D

Same as BIOL D130.

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

**BME 136. Engineering Medical Optics. 4 Units.**

Principles of optics and photonics, integration of optical components into systems and devices, and analysis of physiological signals obtained from Biophotonics measurements.

(Design units: 3)

Prerequisite: BME 130 and (BME 135 or BIOL D130)

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

Concurrent with BME 251.

**BME 137. Introduction to Biomedical Imaging. 4 Units.**

Introduction to imaging modalities widely used in medicine and biology, including X-ray, computed tomography (CT), nuclear medicine (PET and SPET), ultrasonic imaging, magnetic resonance imaging (MRI), optical tomography, imaging contrast, imaging processing, and complementary nature of the imaging modalities.

(Design units: 1)

Prerequisite: BME 130 or EECS 50 or EECS 150

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

**BME 138. Spectroscopy and Imaging of Biological Systems. 4 Units.**

Principles of spectroscopy; absorption; molecular orbitals; multiphoton transitions; Jablonski diagram; fluorescence anisotropy; fluorescence decay; quenching; FRET; excited state reactions; solvent relaxations; instruments; microscopy: wide field, LSM, TPE; fluorescent probes, fluctuations spectroscopy; optical resolution and super-resolution; CARS and SHG microscopy.

(Design units: 1)

Prerequisite: (MATH 3A or ICS 6N) and MATH 3D. Recommended: STAT 8.

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment.

Concurrent with BME 238.

**BME 140. Design of Biomedical Electronics. 4 Units.**

Analog and digital circuits in bioinstrumentation. AC and DC circuit analysis, design and construction of filter and amplifiers using operational amplifier, digitization of signals and data acquisition, bioelectrical signals, design and construction of ECG instrument, bioelectrical signal measurement and analysis. Materials fee.

(Design units: 3)

Prerequisite: BME 60A and BME 130

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

**BME 142. Microfabrication. 4 Units.**

Essentials of photolithography, soft-lithography, microfabrication, Microelectromechanical Systems (MEMS), BioMEMS; applications in biomedical engineering.

(Design units: 2)

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

**BME 147. Microfluidics and Lab-on-a-Chip. 4 Units.**

Introduction to principles of microfluidics and state-of-the-art micro Total Analysis Systems (uTAS). Lab-on-a-Chip for bimolecular assays with device design principles for microscale sample preparation, flow transport, bimolecular manipulation, separation and detection, and the technologies for integrating these devices into microsystems.

(Design units: 1)

Prerequisite: BME 110C

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

Concurrent with BME 260.

**BME 148. Microimplants. 4 Units.**

Essential concepts of biomedical implants at the micro scale. Design, fabrication, and applications of several microimplantable devices including cochlear, retinal, neural, and muscular implants.

(Design units: 1)

Prerequisite: BME 111

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

Concurrent with BME 262.

**BME 149. Biomedical Microdevices . 4 Units.**

In-depth review of microfabricated devices designed for biological and medical applications. Studies of the design, implementation, manufacturing, and marketing of commercial and research bio-medical devices.

(Design units: 0)

Concurrent with BME 261.

**BME 150. Biotransport Phenomena. 4 Units.**

Fundamentals of heat and mass transfer, similarities in the respective rate equations. Emphasis on practical application of fundamental principles.

(Design units: 0)

Prerequisite: (BME 60B or CEE 20) and (MATH 3A or ICS 6N) and MATH 3D

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment.

**BME 160. Tissue Engineering. 4 Units.**

Quantitative analysis of cell and tissue functions. Emerging developments in stem cell technology, biodegradable scaffolds, growth factors, and others important in developing clinical products. Applications of bioengineering.

(Design units: 2)

Prerequisite: (BME 50B or BIOL 99) and BME 111 and BME 121 and BME 150

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment.

**BME 170. Biomedical Engineering Laboratory. 4 Units.**

Measurement and analysis of biological systems using engineering tools and techniques. Laboratory experiments involve living systems with the emphasis on measuring physiological parameters. Materials fee.

(Design units: 1)

Prerequisite: BME 50B and BME 120 and BME 130

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

**BME 171. Cell and Tissue Engineering Laboratory. 4 Units.**

Techniques in molecular, cellular, and tissue engineering. Topics include bacterial and mammalian cell culture, DNA cloning and gene transfer, fabrication of biomaterial scaffolds, and immunassays and microscopy techniques for cell-based assays.

(Design units: 0)

Prerequisite: BME 160

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment.

**BME 180A. Biomedical Engineering Design. 3 Units.**

Design strategies, techniques, tools, and protocols commonly encountered in biomedical engineering; industrial design experience in group projects; ethics, economic analysis, and FDA product approval. Materials fee.

(Design units: 3)

Prerequisite: (BME 60B or MAE 10 or EECS 10) and (BME 60C or MAE 52 or EECS 31L) and (BME 140 or MAE 106 or EECS 170B). BME 180A, BME 180B, and BME 180C must be taken in the same academic year.

Grading Option: In progress only.

Restriction: Seniors only. Biomedical Engineering Majors only.

**BME 180B. Biomedical Engineering Design. 3 Units.**

Design strategies, techniques, tools, and protocols commonly encountered in biomedical engineering; industrial design experience in group projects; ethics, economic analysis, and FDA product approval. Materials fee.

(Design units: 3)

Prerequisite: BME 180A. BME 180A, BME 180B, and BME 180C must be taken in the same academic year.

Grading Option: In progress only.

Restriction: Seniors only. Biomedical Engineering Majors only.

**BME 180C. Biomedical Engineering Design. 3 Units.**

Design strategies, techniques, tools, and protocols commonly encountered in biomedical engineering; industrial design experience in group projects; ethics, economic analysis, and FDA product approval. Materials fee.

(Design units: 3)

Prerequisite: BME 180B. BME 180A, BME 180B, and BME 180C must be taken in the same academic year.

Restriction: Seniors only. Biomedical Engineering Majors only.

**BME 195. Special Topics in Biomedical Engineering. 1-4 Units.**

Studies in selected areas of Biomedical Engineering. Topics addressed vary each quarter.

(Design units: 1-4)

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**BME 197. Seminars in Biomedical Engineering. 2 Units.**

Presentation of advanced topics and reports of current research efforts in Biomedical Engineering.

(Design units: 1-2)

Restriction: Seniors only. Biomedical Engineering Majors have first consideration for enrollment.

Concurrent with BME 298.

**BME 199. Individual Study. 1-4 Units.**

Independent research conducted in the lab of a biomedical engineering core faculty member. A formal written report of the research conducted is required at the conclusion of the quarter.

(Design units: 1-4)

Prerequisite: BIOL 194S

Repeatability: May be taken for credit for 8 units.

**BME 199P. Individual Study. 1-4 Units.**

Supervised independent reading, research, or design for undergraduate Engineering majors. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**BME 210. Molecular and Cellular Engineering. 4 Units.**

Engineering of physiological function at the genetic, cellular, and tissue scales. Topics include cloning and genetic engineering, extracellular matrix biomaterials, principles of regenerative medicine and tissue engineering, and experimental design.

Restriction: Graduate students only.

**BME 211. Microscale Tissue Engineering. 4 Units.**

Engineering of physiological function at the scale of individual cells. Topics include cell micropatterning, microfluidic tissue culture, engineering the cellular microenvironment, and microphysiological systems.

Restriction: Graduate students only.

**BME 212. Cardiovascular Mechanobiology. 4 Units.**

Advanced topics in cellular engineering and mechanobiology, with focus on the cardiovascular system. Tools and techniques used to manipulate and measure mechanical forces at the molecular, cellular, tissue, and organ levels, and their applications in cardiovascular devices and tissue engineering.

Restriction: Graduate students only.

**BME 213. Systems Cell and Developmental Biology. 4 Units.**

Introduces concepts needed to understand cell and developmental biology at the systems level, i.e., how the parts (molecules) work together to create a complex output. Emphasis on using mathematical/computational modeling to expand/modify insights provided by intuition.

Same as DEVB 232.

Restriction: Graduate students only.

**BME 215. Linking Modeling and Experiments in Bioengineering. 4 Units.**

Overview of modeling based on experimental techniques in bioengineering. Construct and evaluate models of varying complexity and to relate them to experimental data.

Prerequisite: BME 220 and BME 221

Restriction: Graduate students only.

**BME 220. Sensory Motor Systems. 4 Units.**

A quantitative and systems approach to understanding physiological systems. Systems covered include the nervous and musculoskeletal systems.

Restriction: Graduate students only.

Concurrent with BME 120.

**BME 221. Organ Transport Systems. 4 Units.**

A quantitative and systems approach to understanding physiological systems. Systems covered include the cardiopulmonary, circulatory, and renal systems.

Restriction: Graduate students only.

**BME 222. Biofluid Mechanics . 4 Units.**

Introduces principles of biofluid mechanics in a research oriented scheme and approaches a wide spectrum of biofluid related problems in human body and solutions that involves engineering concepts.

Restriction: Graduate students only.

**BME 224. Molecular and Cellular Biophotonics. 4 Units.**

Principles underlying the application of photonic technologies to biomolecular and cellular systems. Sample technologies Optical Tweezers, Linear and Nonlinear Optical Microscopy and Fluorescence Lifetime and Correlation Methods, and their use to investigate emergent problems in Molecular, Cellular, and Developmental Biology.

Same as CHEM 224.

Restriction: Graduate students only.

**BME 225. Tissue and Organ Biophotonics. 4 Units.**

Principles underlying the application of photonic technologies to tissues, organs, organisms. Sample technologies include Optical Coherence Tomography, Optical Speckle Imaging, Optoacoustic Imaging, Wide-Field Spectroscopic Imaging, Diffuse Optical Spectroscopy. Addressing the use of these technologies to detect/monitor disease and physiological processes.

**BME 230A. Applied Engineering Mathematics I. 4 Units.**

Analytical techniques applied to engineering problems in transport phenomena, process dynamics and control, and thermodynamics.

**BME 230B. Applied Engineering Mathematics II. 4 Units.**

Focuses on biomedical system identification. Includes fundamental techniques of model building and testing such as formulation, solution of governing equations, sensitivity theory, identifiability theory, and uncertainty analysis.

Restriction: Graduate students only.

**BME 232. Introduction to Computational Biology. 4 Units.**

The use of theories and methods based on computer science, mathematics, and physics in molecular biology and biochemistry. Basics in biomolecular modeling. Analysis of sequence and structural data of biomolecules. Analysis of biomolecular functions.

Same as MBB 223.

Restriction: Graduate students only.

Concurrent with BIOL M123 and CS 183 and BME 132.

**BME 233. Dynamic Systems in Biology and Medicine. 4 Units.**

Introduces principles of system theory to analyze biological, biochemical, physiological, and bioengineering systems. Analytical and computational tools are used to model and analyze dynamic systems such as population, neuronal and heart dynamics, biochemical and physiological systems, oxygen diffusion and similar.

Restriction: Graduate students only.

**BME 234. Neuroimaging Data Analysis. 4 Units.**

Knowledge and understanding of recent techniques for the analysis of healthy and pathological structure and function in neuroimaging data.

Restriction: Graduate students only.

**BME 234P. Neuroimaging Data Analysis. 4 Units.**

Knowledge and understanding of recent techniques for the analysis of healthy and pathological structure and function in neuroimaging data.

Restriction: Master of Engineering students only. Graduate students only.

**BME 238. Spectroscopy and Imaging of Biological Systems. 4 Units.**

Principles of spectroscopy; absorption; molecular orbitals; multiphoton transitions; Jablonski diagram; fluorescence anisotropy; fluorescence decay; quenching; FRET; excited state reactions; solvent relaxations; instruments; microscopy: wide field, LSM, TPE; fluorescent probes, fluctuations spectroscopy; optical resolution and super-resolution; CARS and SHG microscopy.

Restriction: Graduate students only.

Concurrent with BME 138.

**BME 240. Introduction to Clinical Medicine for Biomedical Engineering. 4 Units.**

An introduction to clinical medicine for graduate students in biomedical engineering. Lectures and rotations through nephrology, gastroenterology, pulmonary, and critical care cardiology.

Restriction: Graduate students only. Biomedical Engineering Majors only.

**BME 251. Engineering Medical Optics. 4 Units.**

Principles of optics and photonics, integration of optical components into systems and devices, and analysis of physiologic signals obtained from Biophotonics measurements.

Restriction: Graduate students only.

Concurrent with BME 136.

**BME 252. Critical Thinking in Biophotonics. 2 Units.**

Critical thematic review of current research papers in the field of Biophotonics.

Prerequisite: BME 224 or BME 225

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**BME 260. Microfluidics and Lab-On-A-Chip. 4 Units.**

Introduction to microfluidics and state-of-the-art micro Total Analysis Systems (uTAS). Lab-on-a-Chip for biomolecular assays with device design principles for microscale sample preparation, flow transport, biomolecular manipulation, separation and detection, and the technologies for integrating these devices into microsystems.

Restriction: Graduate students only.

Concurrent with BME 147.

**BME 262. Microimplants. 4 Units.**

Essential concepts of biomedical implants at the micro scale. Design, fabrication, and applications of several microimplantable devices including cochlear, retinal, neural, and muscular implants.

Restriction: Graduate students only.

Concurrent with BME 148.

**BME 262P. Microimplants. 4 Units.**

Essential concepts of biomedical implants at the micro scale. Design, fabrication, and applications of several microimplantable devices including cochlear, retinal, neural, and muscular implants.

Restriction: Master of Engineering students only. Graduate students only.

**BME 264. Auditory Science and Technology. 2 Units.**

Advanced topics in auditory science and technology from cochlear mechanics to cochlear implants.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**BME 290. Critical Thinking and Writing. 4 Units.**

Critical thinking and writing are essential ingredients for success in scientific research. Examines examples from the scientific literature to extract principles of good scientific reasoning, experimental design, and writing.

Restriction: Graduate students only.

**BME 295. Special Topics in Biomedical Engineering. 1-4 Units.**

Studies in selected areas of Biomedical Engineering. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**BME 295P. Special Topics in Biomedical Engineering. 4 Units.**

Studies in selected areas of Biomedical Engineering. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Master of Engineering students only. Graduate students only.

**BME 296. Master of Science Thesis Research. 1-16 Units.**

Individual research or investigation conducted in the pursuit of preparing and completing the thesis required for the M.S. in Engineering.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**BME 297. Doctor of Philosophy Dissertation Research. 1-16 Units.**

Individual research or investigation conducted in the pursuit of preparing and completing the dissertation required for the Ph.D. in Engineering.

Repeatability: May be repeated for credit unlimited times.

**BME 298. Seminars in Biomedical Engineering. 2 Units.**

Presentation of advanced topics and reports of current research efforts in biomedical engineering. Designed for graduate students in the Biomedical Engineering program.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Concurrent with BME 197.

**BME 299. Individual Research. 1-16 Units.**

Individual research or investigation under the direction of an individual faculty.

Repeatability: May be repeated for credit unlimited times.

## Business Analytics (BANA)

### Courses

**BANA 200. Foundations of Business Analytics. 2 Units.**

Provides overview of the field of business analytics, and the theory and practice underpinnings of the three MSBA curricular tracks: Data Analytics, Marketing Analytics, and Operations Analytics. Provides students with a working knowledge of the R programming language.

Restriction: Graduate students only. Business Analytics Majors only.

**BANA 201A. Statistics for Data Science. 4 Units.**

Methods of statistical inference, emphasizing applications to administrative and management decision problems. Topics include classical estimation and hypothesis testing, regression, correlation, analysis of variance, decision analysis, and forecasting.

Restriction: Graduate students only. Business Analytics Majors only.

**BANA 201B. Management Science for Analytics. 4 Units.**

An introduction to computer-based models for decision making. Topics include optimization (linear programming, integer programming, network flow models) and computer simulation. Uses spreadsheets extensively, including Excel built-in and add-in packages.

Restriction: Graduate students only. Business Analytics Majors only.

**BANA 205. Foundations of Marketing. 4 Units.**

Introduction to the field of marketing. Objectives include developing familiarity with fundamental concepts, theories, and techniques in marketing, and acquainting students with the type of decisions made by marketing managers, including customer targeting, product, pricing, distribution, promotion, and research.

Restriction: Graduate students only. Business Analytics Majors only.

**BANA 211. MSBA ProSeminar.**

Provides students in the Merage School Master of Science in Business Analytics program with information and practical skills for success in the MSBA program and for business career planning.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Business Analytics Majors only.

**BANA 212. Data and Programming for Analytics. 4 Units.**

Challenges and teaches students how to handle data, from initial data acquisition to final data analysis. Provides students with a working knowledge of the Python programming language.

Prerequisite: Basic familiarity with programming is recommended.

Restriction: Graduate students only. Business Analytics Majors only.

**BANA 241. Business Analytics Internship. 2-4 Units.**

Students apply analytics and big data knowledge obtained from classroom theory through work experiences. Provides knowledge of career opportunities, an understanding of the role analytics plays in business environments, and preparation for the business analytics profession.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Business Analytics Majors only.

**BANA 257. Marketing on the Internet for Business Analytics. 4 Units.**

Examines the impact of the Internet on traditional methods of doing marketing, and explores its existing and future uses. Discusses how to capitalize on and increase the Internet's utility as a tool that can increase marketing effectiveness, efficiency, and competitiveness.

Restriction: Graduate students only.

**BANA 271. Marketing Analytics. 4 Units.**

Introduces students to quantitative marketing analytics methods and teaches them how to apply the methods to business problems of interest. Topics include: resource allocation and ROI, marketing mix analytics, customer analytics, market segmentation and targeting, advertising, promotions, and digital marketing.

Restriction: Graduate students only.

**BANA 273. Machine Learning for Analytics. 4 Units.**

Introduces methods to mine data repositories for business intelligence to facilitate analytical decision-making. Topics include clustering for market segmentation, association rules to discover relationships between different purchase decisions, and Naive-Bayes classification techniques for decision making using decision-trees.

Restriction: Graduate students only. Business Analytics Majors only.

**BANA 275. Natural Language Processing and Applications. 4 Units.**

Focuses on providing students knowledge of advanced techniques for data analytics. Students deepen their understanding of topics including: dimension reduction, text mining and topic modeling, sentiment analysis, collaborative filtering, and causal estimation.

Restriction: Graduate students only.

**BANA 277. Customer and Social Analytics. 4 Units.**

Examines how business managers can leverage Web 2.0 and social media analytics to create value for their organizations and customers. Topics include digital and social strategies; Web and search analytics; display and mobile advertising; social networks and influence; social media.

Restriction: Graduate students only.

**BANA 288. Predictive Analytics. 4 Units.**

Deals with predicting entities (forecasting) and predicting membership of known groups (classification). Blends methodologies of forecasting and data mining, focusing on multiple regression, logistic regression, neural nets, ARIMA, discriminate analysis, and k-nearest neighbors, and applying these methods to managerial problems/decision-making.

Restriction: Graduate students only.

**BANA 290. Special Topics in Business Analytics. 4 Units.**

Studies in selected areas of business analytics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**BANA 294. Big Data Analytics with Hadoop. 4 Units.**

In-depth hands-on exploration of various cutting-edge information technologies used for big data analytics. Focuses on using Hadoop, Sqoop, Pig, and Hive for ETL operations and on understanding the MapReduce algorithm using Apache Mahout for data mining algorithms.

Restriction: Business Analytics Majors only.

**BANA 295. Big Data Management Systems. 4 Units.**

Provides an introductory-level overview to the emerging technologies in database systems. Students gain critical insight into big data challenges, the choices of different systems and technologies available, relative advantages/disadvantages, and unique aspects of different systems.

Restriction: Graduate students only.

**BANA 298A. Business Analytics Capstone Prep. 2 Units.**

Prep course for the required capstone project. Students apply the knowledge and methods acquired through the program's coursework to an applied business analytics problem. Requirements include project selection, submission of project plan, and data collection/analysis.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Business Analytics Majors only.

**BANA 298B. Business Analytics Capstone Project. 4 Units.**

Continuation of the capstone project. Students apply the knowledge and methods acquired through the coursework in the program to an applied business analytics problem. Work includes data analysis, completed research paper, and final presentation.

Prerequisite: BANA 298A

Restriction: Graduate students only. Business Analytics Majors only.

**BANA 299. Individual Study. 1-4 Units.**

Individual study under the direction of a selected faculty member.

Repeatability: May be repeated for credit unlimited times.

## Campus Recreation (CAMPREC)

## Chemical and Biomolecular Engineering (CBE)

### Courses

**CBE 40A. Chemical Processes and Material Balances. 4 Units.**

Introduction to chemical engineering and the industries where chemical engineers play vital roles. Problem-solving skills and techniques. Quantitative calculations and applications using mass and energy balances. Stoichiometric equations, multiple bypasses, and others in process industries.

Prerequisite: MATH 2B and PHYS 7C and (CHEM 1B or CHEM H2B)

Restriction: Chemical Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**CBE 40B. Process Thermodynamics. 3 Units.**

Principles of thermodynamics: definitions, basic concepts, and laws; property relationships; construction of thermodynamic charts and tables; energy balances; phase and chemical equilibria; combined mass and energy balances.

Prerequisite: CBE 40A and (MATH 3A or ICS 6N). CBE 40A with a grade of C- or better

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 40C. Chemical Engineering Thermodynamics. 4 Units.**

Elements of chemical engineering thermodynamics, including equilibrium and stability; equations of state; generalized correlations of properties of materials; properties of ideal and non-ideal mixtures; thermodynamics of real solutions; ideal and non-ideal phase equilibria; chemical equilibria for ideal and non-ideal solutions.

Prerequisite: (EECS 10 or EECS 12 or ICS 31 or MAE 10) and MATH 2D and CBE 40B. CBE 40B with a grade of C- or better

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 100. Introduction to Numerical Methods in Engineering. 3 Units.**

An introduction to the fundamentals of numerical analysis and the computer algorithms in MATLAB for the solution of engineering problems, with emphasis on problems arising in chemical engineering thermodynamics, transport phenomena, and reaction engineering.

Prerequisite: CBE 40C

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 105. Engineering Physical Chemistry. 4 Units.**

Provides an integrated view of both classical and molecular perspectives on thermodynamics, thermodynamic potentials, entropy, and the second law. Students learn how to use statistical mechanics to create a bridge between the quantum mechanical world and the familiar macroscopic one.

Prerequisite: CHEM 1C and CBE 40C and (PHYS 7D or PHYS 7E)

Overlaps with CHEM 132A, CHEM 132B, CHEM 132C.

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 110. Reaction Kinetics and Reactor Design. 4 Units.**

Introduction to quantitative analysis of chemical reactions and chemical reactor design. Reactor operations including batch, continuous stirred tank, and tubular reactor. Homogeneous and heterogeneous reactions.

Prerequisite: CHEM 1C and MATH 3D and CBE 40B and CBE 40C and CBE 100. CBE 40B with a grade of C- or better. CBE 40C with a grade of C- or better

Restriction: Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engineering majors have second consideration for enrollment.

**CBE 120A. Momentum Transfer. 4 Units.**

Fluid statics, surface tension, Newton's law of viscosity, non-Newtonian and complex flows, momentum equations, laminar and turbulent flow, velocity profiles, flow in pipes and around objects, piping systems design, pumps and mixing, and other applications to chemical and related industries.

Prerequisite: CBE 40C and MATH 3D. CBE 40C with a grade of C- or better

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 120B. Heat Transfer. 3 Units.**

Principles of conduction, radiation, and convection of heat; phenomenological rate laws, differential and macroscopic energy balances; heat transfer rates, steady state and unsteady state conduction, convection; applications to chemical and related industries.

Prerequisite: CBE 120A. CBE 120A with a grade of C- or better

Restriction: Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engineering majors have second consideration for enrollment.

**CBE 120C. Mass Transfer. 3 Units.**

Molecular and continuum approaches to diffusion and convection in multi-component mixtures; steady state, quasi-steady state and transient mass transfer; effect of reactions on mass transfer; convective mass transfer; simultaneous mass, heat and momentum transfer; applications to chemical and related industries.

Prerequisite: CBE 120B and CBE 100

Restriction: Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engineering majors have second consideration for enrollment.

**CBE 130. Separation Processes. 4 Units.**

Application of equilibria and mass and energy balances for design of separation processes. Use of equilibrium laws for design of distillation, absorption, stripping, and extraction equipment. Design of multicomponent separators.

Prerequisite: CBE 40B and CBE 40C. CBE 40B with a grade of C- or better. CBE 40C with a grade of C- or better

Restriction: Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engineering majors have second consideration for enrollment.

**CBE 140A. Chemical Engineering Laboratory I. 4 Units.**

Experimental study of thermodynamics, fluid mechanics, and heat and mass transfer. Operation and evaluation of process equipment, data analysis. Materials fee.

Prerequisite: CBE 110 and CBE 120C

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 140B. Chemical Engineering Laboratory II. 4 Units.**

Continuation of the CBE 140A covering mass transfer operations such as distillation, absorption, extraction, etc. Rate and equilibria studies in simple chemical systems with and without reaction. Study of chemical process. Materials fee.

Prerequisite: CBE 130 and CBE 145 and CBE 140A

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 145. Chemical Process Control. 4 Units.**

Dynamic responses and control of chemical process equipment, dynamic modeling of chemical processes, linear system analysis, analyses and design of feedback loops and advanced control systems.

Prerequisite: CBE 110 and CBE 120B and CBE 120C

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 150A. Chemical Engineering Design I. 3 Units.**

Introduction to process design; flow sheets for chemical processes; synthesis of multicomponent separation sequences and reaction paths; synthesis of heat exchange networks; computer-aided design and simulation of processes and components packs.

Prerequisite: CBE 110 and CBE 120C and CBE 130

Restriction: Seniors only. Chemical Engineering Majors only.

**CBE 150B. Chemical Engineering Design II. 3 Units.**

Application of chemical engineering basics to practical design problems; process economics; process safety; environmental impacts; a major team design project with progress reports, oral presentation, and technical report with engineering drawings and economics.

Prerequisite: CBE 150A

Restriction: Seniors only. Chemical Engineering Majors only.

**CBE 160. Engineering Biology. 3 Units.**

First-principle introduction to the modern biochemistry, molecular biology, and cell biology with an engineering language. The goal is to demonstrate that the vastly diverse biological phenomena can be explained by a set of fundamental principles in chemistry, thermodynamics, and kinetics.

**CBE 161. Introduction to Biochemical Engineering. 3 Units.**

Application of engineering principles to biochemical processes. Topics include microbial pathways, energetics and control systems, enzyme and microbial kinetics, and the design and analysis of biological reactors.

Prerequisite: CEMS 110 and (CHEM 1C or CHEM H2C) and MATH 3D

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 163. Kinetics of Biochemical Networks. 4 Units.**

Principles from statistical mechanics, thermodynamics, and chemical kinetics applied to biochemical systems, from fundamental processes such as receptor-ligand binding and enzyme catalysis, to complex cellular functions including signal transduction and gene regulation.

Prerequisite: CBE 120A

Restriction: Chemical Engineering Majors have first consideration for enrollment.

Concurrent with CBE 263.

**CBE 176. Nuclear and Radiochemistry. 4 Units.**

Advanced treatment of nuclear structure, nuclear reactions, and radioactive-decay processes. Introduction to nuclear activation analysis, isotope effects, radiation chemistry, hot-atom chemistry, nuclear age-dating methods, nuclear reactors, and nuclear power.

Prerequisite: (CHEM M3C or CHEM 1C or CHEM H2C) and MATH 2D

Same as CHEM 133.

Overlaps with CHEM 170.

Restriction: Chemistry Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment.

Concurrent with CHEM 233 and CBE 276.

**CBE 181. Polymer Science and Engineering. 4 Units.**

An introduction to physical aspects of polymers, including configuration and conformation of polymer chains and characterization techniques; crystallinity, viscoelasticity, mechanical properties, polymer alloys, processing, and application.

Prerequisite: ENGR 54 and (CBE 110 or MSE 165)

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 183. Surface and Adhesion Science. 4 Units.**

Structure, thermodynamics of, kinetics, and reactions on surfaces. Surface electronic and mechanical properties and characterization of all classes of materials including metals, semiconductors, ceramics, polymers, and soft materials. Adhesion between different materials is also addressed.

Prerequisite: (CBE 110 or MSE 165C) and (MSE 141 or MSE 69)

Same as MSE 176.

Restriction: Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

Concurrent with MSE 276 and CBE 283.

**CBE 187. Semiconductor Device Packaging. 3 Units.**

Introduction to the semiconductor device packaging and assembly process. Electrical, thermal, optical, and mechanical aspects of package design and reliability. Special topics on optoelectronics packaging are covered.

Prerequisite: CBE 40B

Restriction: Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**CBE 195. Special Topics in Chemical Engineering. 1-4 Units.**

Studies in selected areas of Chemical Engineering. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**CBE 198. Group Study. 1-4 Units.**

Group study of selected topics in engineering.

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**CBE 199. Individual Study. 1-4 Units.**

For undergraduate engineering majors in supervised but independent readings, research, or design. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

Repeatability: May be taken for credit for 8 units.

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 199P. Individual Study. 1-4 Units.**

For undergraduate Engineering majors in supervised but independent reading, research, or design. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in The School of Engineering.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**CBE 200. Applied Engineering Mathematics I. 4 Units.**

Analytical techniques applied to engineering problems in transport phenomena, process dynamics and control, and thermodynamics.

Restriction: Graduate students only.

**CBE 210. Reaction Engineering. 4 Units.**

Advanced topics in reaction engineering, reactor stability analysis, diffusional effect in heterogeneous catalysis, energy balance, optimization of reactor operation, dispersed in phase reactors.

Restriction: Graduate students only.

**CBE 220A. Transport Phenomena I. 4 Units.**

Continuum modeling and analysis of heat and mass transfer from an integrated viewpoint. Scaling concepts, relevance of characteristic time- and length-scales, steady- and unsteady-state processes, bounded and unbounded problems, and convective transport, with applications to chemical and biological processes.

Restriction: Graduate students only.

**CBE 220B. Transport Phenomena II. 4 Units.**

Introduces flow of isothermal fluids from a momentum transport viewpoint. Steady- and unsteady-state creeping and laminar flows; viscous and inviscid flows; Navier-Stokes equations; lubrication theory; boundary layer theory; with specific application to complex chemical and biological engineering processes.

Prerequisite: CBE 220A

Restriction: Graduate students only.

**CBE 240. Advanced Engineering Thermodynamics. 4 Units.**

Introduction to modern thermodynamics and applications, with a focus on aspects relevant to chemical and materials engineering. Mathematical tools; equilibrium and stability; microscope rigorous equations of state; molecular-level thermodynamics of real mixtures; and phase and chemical equilibrium.

Restriction: Graduate students only.

**CBE 249. Special Topics in Chemical Engineering. 1-4 Units.**

Studies in selected areas of Chemical Engineering. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**CBE 250. Research Methods and Technical Communication. 4 Units.**

Intended for Ph.D. students to develop critical research skills in creating archival papers, intellectual property and technical proposals, and in analysis of the scientific literature.

Restriction: Graduate students only.

**CBE 261. Molecular Biotechnology. 4 Units.**

Engineering and biological principles important in recombinant cell technology. Host/vector selection; plasmid propagation; optimization of cloned gene expression; metabolic engineering; protein secretion; experimental techniques; modeling of recombinant cell systems.

Restriction: Graduate students only.

**CBE 262. Metabolic Engineering and Synthetic Biology. 4 Units.**

Synthesis of chemicals from renewable carbon and energy sources using.

Restriction: Graduate students only.

**CBE 263. Kinetics of Biochemical Networks . 4 Units.**

Principles from statistical mechanics, thermodynamics, and chemical kinetics applied to biochemical systems, from fundamental processes such as receptor-ligand binding and enzyme catalysis, to complex cellular functions including signal transduction and gene regulation.

Restriction: Graduate students only.

Concurrent with CBE 163.

**CBE 264. Drug Delivery. 4 Units.**

Introduction to design of drug delivery systems. Includes physicochemical and pharmacokinetic considerations in drug formulations, types of therapeutics, routes of administration, biomaterials, and novel drug delivery systems.

**CBE 266. Bioseparation Processes. 4 Units.**

Introduction to design of bioseparation processes. The recovery and purification of biologically produced proteins, chemicals, and particulates are important. Focuses on the use of chemical engineering skills and principles in the analysis and design of biologically-based processes.

Restriction: Graduate students only.

**CBE 276. Nuclear and Radiochemistry. 4 Units.**

Advanced treatment of nuclear structure, nuclear reactions, and radioactive-decay processes. Introduction to nuclear activation analysis, isotope effects, radiation chemistry, hot-atom chemistry, nuclear age-dating methods, nuclear reactors, and nuclear power.

Same as CHEM 233.

Restriction: Graduate students only.

Concurrent with CHEM 133 and CBE 176.

**CBE 277. Detection and Measurement of Radiation. 4 Units.**

Basic principles of detection and measurement of ionizing radiation; both theory and practical aspects of measurement techniques for alpha, beta, gamma, and neutron radiation, properties of different detector materials, electronics and data treatments, and analysis.

Prerequisite: CHEM 233 or CBE 276

Same as CHEM 244.

Restriction: Graduate students only.

**CBE 280. Advanced Polymer Science and Engineering. 4 Units.**

The synthesis, characterization, microstructure, rheology, and properties of polymer materials. Polymers in solution and in the liquid, crystalline and glassy states. Engineering and processing properties, including viscoelasticity and rheology. Forming and processing methods. Environmental issues.

Restriction: Graduate students only.

**CBE 282. Colloid Science and Engineering. 4 Units.**

An introduction to the basic foundations of colloid science, interfacial phenomena, suspensions and complex fluids, and engineering and assembly of colloidal materials.

Restriction: Graduate students only.

**CBE 283. Surface and Adhesion Science. 4 Units.**

Structure, thermodynamics of, kinetics, and reactions on surfaces. Surface electronic and mechanical properties and characterization of all classes of materials including metals, semiconductors, ceramics, polymers, and soft materials. Adhesion between different materials is also addressed.

Same as MSE 276.

Restriction: Graduate students only.

Concurrent with MSE 176 and CBE 183.

**CBE 288. Optoelectronics Packaging. 4 Units.**

Basic and current issues in the packaging of integrated circuits (IC) and fiber-optic devices are discussed.

Restriction: Graduate students only.

**CBE 295. Seminars in Engineering. 1-4 Units.**

Seminars scheduled each year by individual faculty in major field of interest.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**CBE 296. Master of Science Thesis Research. 1-16 Units.**

Individual research or investigation conducted in preparation for the thesis required for the M.S. degree.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CBE 297. Doctor of Philosophy Dissertation Research. 1-16 Units.**

Individual research or investigation conducted in preparation for the dissertation required for the Ph.D. degree.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CBE 298. Seminars in Engineering. 2 Units.**

Presentation of advanced topics and reports of current research efforts in chemical engineering.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CBE 299. Individual Research. 1-16 Units.**

Individual research or investigation under the direction of an individual faculty member.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Chemical Engr and Materials Science (CBEMS)

# Chemistry (CHEM)

## Courses

### **CHEM 1A. General Chemistry. 4 Units.**

General chemistry with applications to life sciences, physical sciences, and engineering. Atomic structure; general properties of the elements; covalent, ionic, and metallic bonding; mass relationships.

Prerequisite or corequisite: MATH 5A or MATH 2A or PHYS 7C or CHEM 1X or CHEM 1P or SAT Mathematics or ACT Mathematics or SAT Subject Chemistry or AP Chemistry or AP Calculus AB or AP Calculus BC. CHEM 1P with a grade of C- or better. SAT Mathematics with a minimum score of 600. ACT Mathematics with a minimum score of 27. SAT Subject Chemistry with a minimum score of 700. AP Chemistry with a minimum score of 3. AP Calculus AB with a minimum score of 4. AP Calculus BC with a minimum score of 3

Overlaps with CHEM H2A, ENGR 1A, CHEM M2A.

Restriction: School of Biological Sciences students have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

(II and VA ).

### **CHEM 1B. General Chemistry. 4 Units.**

General chemistry with applications to life sciences, physical sciences, and engineering. Properties of gases, liquids, solids; intermolecular forces; changes of state; properties of solutions; stoichiometry; thermochemistry; and thermodynamics. Course may be offered online.

Prerequisite: CHEM 1A or ENGR 1A or CHEM H2A or AP Chemistry or CHEM M2A. CHEM 1A with a grade of C- or better. ENGR 1A with a grade of C- or better. CHEM H2A with a grade of C- or better. AP Chemistry with a minimum score of 4. CHEM M2A with a grade of C- or better

Overlaps with CHEM H2B.

Restriction: School of Biological Sciences students have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

(II and Va ).

### **CHEM 1C. General Chemistry . 4 Units.**

General chemistry with applications to life sciences, physical sciences, and engineering. Equilibria, aqueous acid-base equilibria, solubility equilibria, oxidation reduction reactions, electrochemistry; kinetics; special topics.

Corequisite: CHEM 1LC

Prerequisite: CHEM 1B. CHEM 1B with a grade of C- or better

Overlaps with CHEM H2C.

Restriction: School of Biological Sciences students have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

(II and VA ).

### **CHEM 1LA. General Chemistry Laboratory. 2 Units.**

Training and experience in basic laboratory techniques through experiments related to lecture topics in Chemistry 1A. Materials fee.

Corequisite: CHEM 1A

Overlaps with CHEM H2LA.

**CHEM 1LC. General Chemistry Laboratory. 3 Units.**

Training and experience in basic laboratory techniques. Chemical practice and principles illustrated through experiments related to lecture topics of CHEM 1A-B-C. Materials fee.

Corequisite: CHEM 1C

Prerequisite: CHEM 1B. CHEM 1B with a grade of C- or better

Overlaps with CHEM 1LE, CHEM H2LB, CHEM M2LB.

Restriction: Div of Undergraduate Education students have first consideration for enrollment. School of Biological Sciences students have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Nursing Science Majors have first consideration for enrollment. Pharmaceutical Sciences Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment.

**CHEM 1LD. General Chemistry Laboratory. 3 Units.**

Training and experience in basic laboratory techniques. Chemical practice and principles illustrated through experiments related to lecture topics in CHEM 1A-B-C. Materials fee.

Prerequisite: (CHEM 1C and CHEM 1LC) or CHEM 1LE. CHEM 1C with a grade of C- or better. CHEM 1LC with a grade of C- or better. CHEM 1LE with a grade of C- or better

Overlaps with CHEM H2LB, CHEM M2LB.

Restriction: School of Biological Sciences students only. School of Physical Sciences students only. School of Engineering students only. Program in Nursing Science students only. Pharmaceutical Sciences Majors only. Public Health Sciences Majors only. No credit for CHEM M2LA if taken after CHEM 1LD. Undecided/Undeclared students also have first consideration for enrollment.

**CHEM 1LE. Accelerated General Chemistry Lab. 3 Units.**

Lecture and experiments covering chemical concepts for accelerated students who do not plan to take organic chemistry. Properties of gases, liquids, solutions, and solids; chemical equilibrium and chemical thermodynamics; atomic and molecular structure; chemical kinetics; electrochemistry. Materials fee.

Prerequisite or corequisite: CHEM 1A or ENGR 1A or AP Chemistry. AP Chemistry with a minimum score of 3

Overlaps with CHEM 1LC.

Restriction: School of Engineering students have first consideration for enrollment. Biomedical Computing Majors have first consideration for enrollment.

**CHEM 1P. Preparation for General Chemistry . 4 Units.**

Units of measurement, dimensional analysis, significant figures; elementary concepts of volume, mass, force, pressure, energy, density, temperature, heat, work; fundamentals of atomic and molecular structure; the mole concept, stoichiometry; properties of the states of matter; gas laws; solutions concentrations.

Restriction: School of Biological Sciences students have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment. Biomedical Computing Majors have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

**CHEM 1X. General Chemistry Plus. 2 Units.**

Units of chemical measurements, dimensional analysis, significant figures; elementary physicochemical concepts; fundamentals of atomic and molecular structure; molar amounts and stoichiometry; properties of the states of matter; solutions concentrations.

Prerequisite: Students who meet the requirements for taking Chem 1A through their SAT, ACT, or AP test scores are not eligible for enrollment in Chem 1X. Specifically, the students must have ALL of the following advisory prerequisites (the inverse of the Chem 1A prerequisites): S02<600 (score below 600 on the SAT Mathematics Reasoning test) A02<27 (score below 27 on the ACT Mathematics test) Z43<700 (score below 700 on the SAT Chemistry subject exam) AP25<3 (score below 3 on the AP Chemistry exam) AP66<4 (score below 4 on the AP Calculus AB Exam) AP68<3 (score below 3 on the AP Calculus BC Exam) Students who meet Chem 1A eligibility through ALEKS-based training are permitted to enroll in Chem 1X. Chem 1X is open to interested BioEASE students.

Grading Option: Pass/no pass only.

**CHEM H2A. Honors General Chemistry. 4 Units.**

Covers the same material as CHEM 1A-CHEM 1B-CHEM M3C but in greater depth. Additional topics will also be included as time permits.

Corequisite: CHEM H2LA

Prerequisite: AP Chemistry or SAT Subject Chemistry. AP Chemistry with a minimum score of 4. SAT Subject Chemistry with a minimum score of 700

Overlaps with CHEM 1A.

Restriction: Campuswide Honors Collegium students only.

**(II and Va ).**

**CHEM H2B. Honors General Chemistry. 4 Units.**

Covers the same material as CHEM 1A-CHEM 1B-CHEM M3C but in greater depth. Additional topics are also included as time permits.

Corequisite: CHEM H2LB

Prerequisite: CHEM H2A and (CHEM H2LA or CHEM M2LA). CHEM H2A with a grade of C- or better. CHEM H2LA with a grade of C- or better. CHEM M2LA with a grade of C- or better

Overlaps with CHEM 1B.

Restriction: Campuswide Honors Collegium students only.

**(II and VA ).**

**CHEM H2C. Honors General Chemistry. 4 Units.**

Covers the same material as CHEM 1A-CHEM 1B-CHEM M3C but in greater depth. Additional topics are also included as time permits.

Prerequisite: CHEM H2B and (CHEM H2LB or CHEM M2LB). CHEM H2B with a grade of C- or better. CHEM H2LB with a grade of C- or better. CHEM M2LB with a grade of C- or better

Overlaps with CHEM 1C.

Restriction: Campuswide Honors Collegium students only.

**(II and VA ).**

**CHEM H2LA. Honors General Chemistry Laboratory. 3 Units.**

Training and experience in fundamental and analytical laboratory techniques through experiments related to lecture topics in CHEM H2A-CHEM H2B-CHEM H2C. Materials fee.

Corequisite: CHEM H2A

Prerequisite: AP Chemistry or SAT Subject Chemistry. AP Chemistry with a minimum score of 4. SAT Subject Chemistry with a minimum score of 700

Overlaps with CHEM M2LA.

Restriction: Campuswide Honors Collegium students only.

**CHEM H2LB. Honors General Chemistry Laboratory. 3 Units.**

Training and experience in fundamental and analytical laboratory techniques through experiments related to lecture topics in CHEM H2A-CHEM H2B-CHEM H2C. Materials fee.

Corequisite: CHEM H2B

Prerequisite: CHEM H2A and (CHEM H2LA or CHEM M2LA). CHEM H2A with a grade of B or better. CHEM H2LA with a grade of B or better. CHEM M2LA with a grade of B or better

Overlaps with CHEM M2LB.

Restriction: No credit for CHEM 1LC if taken after CHEM H2LB or CHEM M2LB.

**CHEM H2LC. Honors General Chemistry Laboratory. 3 Units.**

Training and experience in fundamental and analytical laboratory techniques through experiments related to lecture topics in CHEM H2A-CHEM H2B-CHEM H2C. Materials fee.

Corequisite: CHEM H2C

Prerequisite: CHEM H2B and (CHEM H2LB or CHEM M2LB). CHEM H2B with a grade of B or better. CHEM H2LB with a grade of B or better. CHEM M2LB with a grade of B or better

**CHEM M2A. Majors General Chemistry Lecture. 4 Units.**

Covers the same material as CHEM 1A but in greater depth. Additional topics are included as time permits.

Prerequisite or corequisite: MATH 5A or MATH 2A or PHYS 7C or CHEM 1X or CHEM 1P or SAT Mathematics or ACT Mathematics or SAT Subject Chemistry or AP Chemistry or AP Calculus AB or AP Calculus BC. CHEM 1P with a grade of C- or better. SAT Mathematics with a minimum score of 600. ACT Mathematics with a minimum score of 27. SAT Subject Chemistry with a minimum score of 700. AP Chemistry with a minimum score of 3. AP Calculus AB with a minimum score of 4. AP Calculus BC with a minimum score of 3. Placement via a passing score on the ALEKS placement exam is also accepted.

Overlaps with CHEM 1A, CHEM H2A, ENGR 1A.

Restriction: Chemistry Majors have first consideration for enrollment.

(II and Va ).

**CHEM M2B. Majors General Chemistry Lecture. 4 Units.**

Covers the same material as CHEM 1B but in greater depth. Additional topics will also be included as time permits.

Prerequisite: CHEM M2A and CHEM M2LA. CHEM M2A with a grade of C- or better. CHEM M2LA with a grade of C- or better

Overlaps with CHEM H2B, CHEM 1B.

Restriction: Chemistry Majors have first consideration for enrollment.

(II and Va ).

**CHEM M2C. Majors General Chemistry Lecture. 4 Units.**

Covers the same material as CHEM 1C but in greater depth. Additional topics are also included as time permits.

Prerequisite: CHEM M2B and CHEM M2LB. CHEM M2B with a grade of C- or better. CHEM M2LB with a grade of C- or better

Overlaps with CHEM 1C, CHEM H2C.

Restriction: Chemistry Majors have first consideration for enrollment.

(II and Va ).

**CHEM M2LA. Majors General Chemistry Laboratory. 3 Units.**

Training and experience in basic laboratory techniques through experiments related to lecture topics in CHEM 1A-CHEM 1B-CHEM M3C. Materials fee.

Prerequisite or corequisite: CHEM 1A or CHEM M2A or CHEM H2A. CHEM 1A with a grade of C- or better. CHEM M2A with a grade of C- or better. CHEM H2A with a grade of C- or better. High school chemistry.

Overlaps with CHEM H2LA, CHEM 1LD.

Restriction: Chemistry Majors only. No credit for CHEM M2LA if taken after CHEM 1LD.

**CHEM M2LB. Majors General Chemistry Laboratory. 3 Units.**

Training and experience in basic laboratory techniques through experiments related to lecture topics in CHEM 1A-CHEM 1B-CHEM M3C. Materials fee.

Prerequisite or corequisite: (CHEM 1B or CHEM H2B or CHEM M2B) and (CHEM M2A or CHEM H2A) and (CHEM M2LA or CHEM H2LA). CHEM M2A with a grade of C- or better. CHEM H2A with a grade of C- or better. CHEM M2LA with a grade of C- or better. CHEM H2LA with a grade of C- or better

Overlaps with CHEM H2LB.

Restriction: Chemistry Majors only. CHEM 1LC may not be taken for credit if taken after CHEM H2LB or CHEM M2LB.

**CHEM M3C. Majors Quantitative Analytical Chemistry. 4 Units.**

Topics include equilibria, aqueous acid-base equilibria, solubility equilibria, oxidation reduction reactions, electrochemistry, and kinetics with a special emphasis on the statistical treatment of data and analytical methods of chemical analysis.

Corequisite: CHEM M3LC

Prerequisite: (CHEM 1B or CHEM H2B or CHEM M2B) and (CHEM M2LB or CHEM H2LB). CHEM 1B with a grade of C- or better. CHEM H2B with a grade of C- or better. CHEM M2B with a grade of C- or better. CHEM M2LB with a grade of C- or better. CHEM H2LB with a grade of C- or better

Restriction: Chemistry Majors only.

(II and VA ).

**CHEM M3LC. Majors Quantitative Analytical Chemistry Laboratory. 4 Units.**

Foundational principles of analytical chemistry and experimental methods for quantitative analysis of real samples. Materials fee.

Prerequisite: (CHEM 1B or CHEM H2B or CHEM M2B) and (CHEM M2LB or CHEM H2LB). CHEM 1B with a grade of C- or better. CHEM H2B with a grade of C- or better. CHEM M2B with a grade of C- or better. CHEM M2LB with a grade of C- or better. CHEM H2LB with a grade of C- or better

Restriction: Chemistry Majors only.

**CHEM 5. Scientific Mathematical and Computing Skills. 4 Units.**

Introduces students to mathematical skills, including complex numbers, linear algebra, differential equations, multivariable calculus, infinite series, Fourier series, and integral transforms; and computing skills, including plotting, data analysis (statistics and curve fitting), linear algebra, symbolic mathematics, and spectral analysis.

Corequisite: (CHEM 1C or CHEM H2C or CHEM M3C) and MATH 2D.

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 11. New Chemistry Student Seminar. 1 Workload Unit.**

Seminar for students who recently joined the chemistry major. Addresses available tracks in the major, research opportunities in the chemistry department, careers in chemistry, and relevant programs and resources for students.

Grading Option: Workload Credit P/NP Only.

Restriction: Freshmen students, transfer students, and students who recently changed their major to Chemistry have first consideration for enrollment.

**CHEM 12. Chemistry Around Us. 4 Units.**

Addresses ways in which chemistry affects everyday life. Topics include pollution, global warming, water supply/demands, biodiesel fuels, foods we eat, natural/synthetic materials, common drugs, drug design. Learn and apply basic chemistry concepts. Use risk/benefit analysis for optimal solutions.

(II and Va ).

**CHEM 14. Sense and Sensibility in Science. 4 Units.**

Gives an overview of scientific methods and heuristics through group exercises and discussion. Discusses the benefits and limitations of applying rational scientific approaches to real-world examples from philosophy, cognitive and social psychology, game theory, economics, political science, law, and negotiation.

(II and V.A. ).

**CHEM H30A. Critical Analysis of Health Science Literature. 4 Units.**

Focuses on evaluation of scientific literature. Aspects of scientific inquiry include scientific method, scientific research design, statistical analysis, and publication processes. Addresses why scientific inquiry cannot be separated from sociocultural influences and concerns. Examples drawn from research on health-related issues.

Restriction: Campuswide Honors Collegium students only.

(II and Va. ).

**CHEM 51A. Organic Chemistry. 4 Units.**

Fundamental concepts relating to carbon compounds with emphasis on structural theory and the nature of chemical bonding, stereochemistry, reaction mechanisms, and stereoscopic, physical, and chemical properties of the principal classes of carbon compounds.

Prerequisite or corequisite: (CHEM 1C or CHEM H2C or CHEM M3C) and (CHEM 1LD or CHEM H2LB or CHEM M2LB). CHEM 1C with a grade of C- or better. CHEM H2C with a grade of C- or better. CHEM M3C with a grade of C- or better. CHEM 1LD with a grade of C- or better. CHEM H2LB with a grade of C- or better. CHEM M2LB with a grade of C- or better

Overlaps with CHEM H52A.

Restriction: School of Biological Sciences students have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

**CHEM 51B. Organic Chemistry. 4 Units.**

Fundamental concepts relating to carbon compounds with emphasis on structural theory and the nature of chemical bonding, stereochemistry, reaction mechanisms, and stereoscopic, physical, and chemical properties of the principal classes of carbon compounds.

Prerequisite: CHEM 51A and (CHEM 1LD or CHEM M52LA or CHEM H52LA). CHEM 51A with a grade of C- or better. CHEM 1LD with a grade of C- or better. CHEM M52LA with a grade of C- or better. CHEM H52LA with a grade of C- or better

Overlaps with CHEM H52B.

Restriction: Undeclared Majors have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Biological Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment.

**CHEM 51C. Organic Chemistry. 4 Units.**

Fundamental concepts relating to carbon compounds with emphasis on structural theory and the nature of chemical bonding, stereochemistry, reaction mechanisms, and stereoscopic, physical, and chemical properties of the principal classes of carbon compounds.

Prerequisite: CHEM 51B and (CHEM 51LB or CHEM M52LB or CHEM H52LB). CHEM 51B with a grade of C- or better. CHEM 51LB with a grade of C- or better. CHEM M52LB with a grade of C- or better. CHEM H52LB with a grade of C- or better

Overlaps with CHEM H52C.

Restriction: Undeclared Majors have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Biological Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment.

**CHEM 51LB. Organic Chemistry Laboratory. 3 Units.**

Modern techniques of organic chemistry, using selected experiments to illustrate topics introduced in CHEM 51A-CHEM 51B-CHEM 51C. Materials fee.

Corequisite: CHEM 51B

Prerequisite: CHEM 51A and (CHEM 1LD or CHEM H2LB or CHEM M2LB). CHEM 51A with a grade of C- or better. CHEM 1LD with a grade of C- or better. CHEM H2LB with a grade of C- or better. CHEM M2LB with a grade of C- or better

Overlaps with CHEM H52LA, CHEM M52LA.

Restriction: School of Biological Sciences students have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

**CHEM 51LC. Organic Chemistry Laboratory. 3 Units.**

Modern techniques of organic chemistry, using selected experiments to illustrate topics introduced in CHEM 51A-B-C. Materials fee.

Corequisite: CHEM 51C

Prerequisite: CHEM 51B and CHEM 51LB. CHEM 51B with a grade of C- or better. CHEM 51LB with a grade of C- or better

Overlaps with CHEM H52LB, CHEM M52LB.

Restriction: School of Biological Sciences students have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

**CHEM 51LD. Organic Chemistry Laboratory. 3 Units.**

Modern techniques of organic chemistry using selected experiments to illustrate topics introduced in CHEM 51A-CHEM 51B-CHEM 51C. Materials fee.

Prerequisite: CHEM 51C and CHEM 51LC. CHEM 51C with a grade of C- or better. CHEM 51LC with a grade of C- or better

Overlaps with CHEM H52LC.

Restriction: School of Biological Sciences students have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

**CHEM H52LA. Honors Organic Chemistry Laboratory. 3 Units.**

Fundamental techniques of modern experimental organic chemistry. Materials fee.

Corequisite: CHEM 51A

Prerequisite: (CHEM 1C or CHEM H2C or CHEM M3C) and (CHEM M2LB or CHEM H2LB or CHEM 1LD). CHEM 1C with a grade of C- or better.

CHEM H2C with a grade of C- or better. CHEM M3C with a grade of C- or better. CHEM M2LB with a grade of C- or better. CHEM H2LB with a grade of C- or better. CHEM 1LD with a grade of C- or better

Overlaps with CHEM 51LB, CHEM M52LA.

Restriction: Campuswide Honors Collegium students only.

**CHEM H52LB. Honors Organic Chemistry Laboratory. 3 Units.**

Fundamental techniques of modern experimental organic chemistry. Materials fee.

Corequisite: CHEM 51B

Prerequisite: CHEM 51A and CHEM H52LA. CHEM 51A with a grade of C- or better. CHEM H52LA with a grade of C- or better

Overlaps with CHEM M52LB, CHEM 51LC.

**CHEM H52LC. Honors Organic Chemistry Laboratory. 3 Units.**

Fundamental techniques of modern experimental organic chemistry. Materials fee.

Prerequisite: CHEM 51B and CHEM H52LB. CHEM 51B with a grade of C- or better. CHEM H52LB with a grade of C- or better

Overlaps with CHEM 51LD, CHEM M52LC.

**CHEM M52LA. Majors Organic Chemistry Laboratory. 3 Units.**

Modern techniques of organic chemistry, using selected experiments to illustrate topics introduced in CHEM 51A-B-C. Materials fee.

Corequisite: CHEM 51A

Prerequisite: (CHEM 1C or CHEM H2C or CHEM M3C) and (CHEM H2LB or CHEM M2LB or CHEM 1LD). CHEM 1C with a grade of C- or better.

CHEM H2C with a grade of C- or better. CHEM M3C with a grade of C- or better. CHEM H2LB with a grade of C- or better. CHEM M2LB with a grade of C- or better. CHEM 1LD with a grade of C- or better

Overlaps with CHEM H52LA, CHEM 51LB.

Restriction: Chemistry Majors only.

**CHEM M52LB. Majors Organic Chemistry Laboratory. 3 Units.**

Modern techniques of organic chemistry, using selected experiments to illustrate topics introduced in CHEM 51A-B-C. Materials fee.

Corequisite: CHEM 51B

Prerequisite: CHEM 51A and CHEM M52LA. CHEM 51A with a grade of C- or better. CHEM M52LA with a grade of C- or better

Overlaps with CHEM H52LB, CHEM 51LC.

Restriction: Chemistry Majors only.

**CHEM M52LC. Majors Organic Chemistry Laboratory. 3 Units.**

Modern techniques of organic chemistry, using selected experiments to illustrate topics introduced in CHEM 51A-B-C. Materials fee.

Corequisite: CHEM 51C

Prerequisite: CHEM 51B and CHEM M52LB. CHEM 51B with a grade of C- or better. CHEM M52LB with a grade of C- or better

Overlaps with CHEM H52LC, CHEM 51LD.

Restriction: Chemistry Majors only.

**CHEM H90. The Idiom and Practice of Science. 4 Units.**

A series of fundamental and applied problems in the chemical sciences are addressed. Topics may include the periodic table, electronic structure of atoms, chemical bonding, molecular structure, thermodynamics, and kinetics, with applications to energy and the environment, and/or biochemistry.

Restriction: Campuswide Honors Collegium students only.

(II, Va)

**CHEM 100S. Laboratory Safety for Chemists.**

Provide students with the fundamentals of safety involved in chemical laboratory work.

Prerequisite or corequisite: CHEM 51C

Grading Option: Pass/no pass only.

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 101W. Writing in Chemical Sciences. 4 Units.**

Students receive guidance on preparing research papers, proposals, reports, and other forms of scientific writing in chemistry-related fields, on effectively searching for and using chemical information, and on communicating data in poster and platform presentations.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Chemistry Majors have first consideration for enrollment.

(Ib)

**CHEM 107. Inorganic Chemistry. 4 Units.**

Introduction to modern inorganic chemistry. Principles of structure, bonding, and chemical reactivity with application to compounds of the main group and transition elements, including organometallic chemistry.

Prerequisite: CHEM 51C or CHEM H52C

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 107L. Inorganic Chemistry Laboratory. 3 Units.**

Modern techniques of inorganic and organometallic chemistry, including experience with glove box, Schlenk line, and vacuum line methods. Materials fee.

Prerequisite or corequisite: CHEM 107 and CHEM 100S

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 125. Advanced Organic Chemistry. 4 Units.**

Rapid-paced comprehensive treatment of organic chemistry. Focuses on molecular structure, reactivity, stability, scope and mechanisms of organic reactions. Topics include: structure and bonding; theoretical organic chemistry; acidity and basicity; reactive intermediates; pericyclic reactions; stereochemistry; organic synthesis; natural products; organic photochemistry.

Prerequisite: CHEM 51C

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 127. Inorganic Chemistry II. 4 Units.**

Advanced treatment of selected fundamental topics in inorganic chemistry, building on material presented in Chemistry 107. Molecular symmetry with applications to electronic structure and spectroscopy. Reaction kinetics and mechanisms; inorganic synthesis and catalysis; bioinorganic chemistry.

Prerequisite: CHEM 107

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 128. Introduction to Chemical Biology. 4 Units.**

Introduction to the basic principles of chemical biology: structures and reactivity; chemical mechanisms of enzyme catalysis; chemistry of signalling, biosynthesis, and metabolic pathways.

Corequisite: CHEM 128L

Prerequisite: (CHEM 51C or CHEM H52C)

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 128L. Introduction to Chemical Biology Laboratory Techniques. 3 Units.**

Introduction to the basic laboratory techniques of chemical biology: electrophoresis, plasmid preparation, PCR, protein expression, isolation, and kinetics. Materials fee.

Corequisite: CHEM 128

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 132A. Chemical Thermodynamics, Kinetics, and Dynamics. 4 Units.**

Energy, entropy, and the thermodynamic potentials. Chemical equilibrium. Chemical kinetics.

Prerequisite or corequisite: MATH 2D and (PHYS 7D or PHYS 7E) and (CHEM 5 or (MATH 3D and (EECS 10 or EECS 12 or MAE 10 or ICS 31)) )

Overlaps with CHEM 131C.

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 132B. Quantum Principles, Spectroscopy, and Bonding. 4 Units.**

Principles of quantum chemistry with applications to the elements of atomic structure, energy levels, and spectroscopy.

Prerequisite: (CHEM 132A or CEMS 45C) and (PHYS 7D or PHYS 7E). CHEM 132A with a grade of C- or better

Overlaps with CHEM 131A.

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 132C. Molecular Structure and Elementary Statistical Mechanics. 4 Units.**

Principles of quantum mechanics with applications to molecular spectroscopy and structure determination, and chemical bonding in simple molecules. Elements of statistical mechanics.

Prerequisite: CHEM 132B

Overlaps with CHEM 131B.

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 133. Nuclear and Radiochemistry. 4 Units.**

Advanced treatment of nuclear structure, nuclear reactions, and radioactive-decay processes. Introduction to nuclear activation analysis, isotope effects, radiation chemistry, hot-atom chemistry, nuclear age-dating methods, nuclear reactors, and nuclear power.

Prerequisite: (CHEM M3C or CHEM 1C or CHEM H2C) and MATH 2D

Same as CBE 176.

Overlaps with CHEM 170.

Restriction: Chemistry Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment.

Concurrent with CHEM 233 and CBE 276.

**CHEM 133L. Nuclear and Radiochemistry Laboratory. 3 Units.**

Practical aspects of production, separation, safe handling, detection, and measurement of radioactive isotopes. Experiments use the UCI nuclear reactor and emphasize uses of radioisotopes in chemistry, engineering, biology, and medicine. Materials fee.

Prerequisite or corequisite: CHEM 133

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 137. Computational Chemistry. 4 Units.**

Short introduction to programming languages and to representative algorithms employed in chemical research. Students have the opportunity to devise and employ their own codes and also to employ codes which are widely used in various fields of chemistry. Materials fee.

Corequisite: CHEM 132C

Prerequisite: CHEM 51C and (CHEM 131A or CHEM 132B)

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 138. Introduction to Computational Organic Chemistry. 4 Units.**

An introduction to the use of computational chemistry to investigate reaction mechanisms, to calculate structures, and to predict properties of molecules. Students have the opportunity to perform calculations employing computational methods which are widely used in various fields of chemistry. Materials fee.

Prerequisite: CHEM 51C

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 141. Environmental Chemistry. 4 Units.**

Processes that control the fate of chemicals in the environment. Chemistry of the atmosphere, hydrosphere, and soils, especially as it pertains to pollutants.

Prerequisite: (CHEM 51C or CHEM H52C) and (MATH 2B or AP Calculus BC). AP Calculus BC with a minimum score of 4

**CHEM 145A. Gas-Phase Atmospheric Chemistry. 4 Units.**

Sources, chemistry, sinks, and measurements of key atmospheric gaseous species. Chemistry of photochemical oxidant formation, transformation of key inorganic and organic trace gases, and stratospheric ozone cycling. Applications of atmospheric chemistry models to control strategies.

Prerequisite: CHEM 132A and CHEM 132B and CHEM 132C

Concurrent with CHEM 245A.

**CHEM 145B. Multi-Phase Atmospheric Chemistry. 4 Units.**

Chemical and physical processes leading to the production, aging, and removal of atmospheric particles. Multi-phase processes involving gases, particles, water droplets, and environmental surfaces. Approaches for modeling these processes with applications to control strategies.

Prerequisite: CHEM 145A

Concurrent with CHEM 245B.

**CHEM 150. Computational Chemistry. 4 Units.**

Basic concepts, methods, and techniques in computational chemistry: density functional and wavefunction theory, molecular property calculations, analysis tools, potential energy surfaces, vibrational effects, molecular dynamics simulations.

Prerequisite or corequisite: MATH 3A and (CHEM 132A or PHYS 113A)

Restriction: Chemistry Majors have first consideration for enrollment.

Concurrent with CHEM 250.

**CHEM 150L. Computational Chemistry Laboratory. 4 Units.**

Introduction to the practice of modern computational chemistry through a series of advanced computational experiments.

Prerequisite: CHEM 150 and (CHEM 5 or PHYS 50 or EECS 12)

Restriction: Chemistry Majors have first consideration for enrollment.

Concurrent with CHEM 250L.

**CHEM 152. Advanced Analytical Chemistry. 5 Units.**

In-depth treatment of modern instrumental methods for quantitative analysis of real samples and basic principles of instrument design. Laboratory experiments using spectroscopic, chromatographic, mass spectrometric, and other instrumental methods. Materials fee.

Prerequisite: (CHEM 1C or CHEM M3C or CHEM H2C) and (CHEM M3LC or CHEM H2LC)

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 153. Physical Chemistry Laboratory. 4 Units.**

Introduction to the modern experimental approaches and software tools used in spectroscopy, kinetics, electrochemistry, and other physical chemistry experiments. Basics of interfacing with instruments using LabView. Materials fee.

Corequisite: CHEM 132C

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 156. Advanced Laboratory in Chemistry and Synthesis of Materials. 4 Units.**

Modern synthesis and characterization of organic and inorganic materials including polymers, nanomaterials, and biomaterials. State-of-the-art characterization techniques include gel permeation chromatography, dynamic light scattering, thermal analysis, mechanical analysis, electron and scanning probe microscopy, X-ray diffraction, and porosimetry. Materials fee.

Prerequisite: (CHEM 51C or CHEM H52C) and (CHEM 51LC or CHEM H52LC or CHEM M52LC) and (CHEM 131A or CHEM 132B or PHMS 171)

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 160. Organic Synthesis Laboratory. 4 Units.**

Modern experimental techniques in organic synthesis including experience with thin-layer chromatography, liquid chromatography, and gas chromatography. Modern methods of structure elucidation including FT NMR are employed in the characterization of products. Materials fee.

Prerequisite or corequisite: CHEM 51C and CHEM 100S and (CHEM 51LC or CHEM H52LC or CHEM M52LC)

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 170. Radioisotope Techniques. 4 Units.**

Basic theory and practice of production, separation, safe handling, counting, applications of radioactive isotopes with emphasis on applications in chemistry, biology, and medicine. Materials fee.

Prerequisite: (CHEM 1C or CHEM M3C or CHEM H2C) and (CHEM 1LC or CHEM M3LC or CHEM H2LC)

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 177. Medicinal Chemistry. 4 Units.**

An introduction of the basics of drug activity and mechanisms. Strategies used to identify lead compounds such as natural product chemistry, combinatorial chemistry, molecular modeling, and high-through put screening. Relationship of molecular structure to pharmacological activity.

Prerequisite: CHEM 51A and CHEM 51B and CHEM 51C and (BIOL 98 or CHEM 128)

Same as PHMS 177.

Restriction: Pharmaceutical Sciences Majors have first consideration for enrollment.

**CHEM 177L. Medicinal Chemistry Laboratory. 3 Units.**

An introduction of the basics of drug activity and mechanisms. Strategies used to identify lead compounds such as natural product chemistry, combinatorial chemistry, molecular modeling, and high-through put screening. Relationship of molecular structure to pharmacological activity. Materials fee.

Corequisite: PHRMSCI 177 or CHEM 177.

Prerequisite: CHEM 51A and CHEM 51B and CHEM 51C and BIOL 100 and (BIOL 98 or CHEM 128)

Same as PHMS 177L.

Restriction: Pharmaceutical Sciences Majors have first consideration for enrollment.

**(Ib)****CHEM 180. Undergraduate Research. 4 Units.**

Research for credit arranged with a faculty member to sponsor and supervise work. Student time commitment of 10 to 15 hours per week is expected, and a written research report is required at the end of each quarter.

Prerequisite or corequisite: CHEM 100S

Repeatability: May be repeated for credit unlimited times.

**CHEM 180W. Senior Thesis in Chemistry. 4 Units.**

Students receive guidance on preparing research papers, proposals, reports, and other forms of scientific writing in chemistry-related fields; on effectively searching for and using chemical information; and on communicating data in poster and platform presentations.

Prerequisite: CHEM 180 or CHEM 199 or PHYS 195 or ESS 199 or CEMS 199 or CEE 199 or MAE 199 or BIOL 199 or PUBH 199. CHEM 180 with a grade of A or better. CHEM 199 with a grade of A or better. PHYS 195 with a grade of A or better. ESS 199 with a grade of A or better. CEMS 199 with a grade of A or better. CEE 199 with a grade of A or better. MAE 199 with a grade of A or better. BIOL 199 with a grade of A or better. PUBH 199 with a grade of A or better. Consent of the instructor is also accepted. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Chemistry Majors have first consideration for enrollment.

**(Ib)****CHEM H180A. Honors Research in Chemistry. 4 Units.**

Undergraduate honors research in Chemistry. A student time commitment of 10-15 hours per week is required.

Restriction: Chemistry Honors students only. Campuswide Honors Collegium students only.

**CHEM H180B. Honors Research in Chemistry. 4 Units.**

Undergraduate honors research in Chemistry. A student time commitment of 10-15 hours per week is required.

Prerequisite: CHEM H180A

Restriction: Campuswide Honors Collegium students only.

**CHEM H180C. Honors Research in Chemistry. 4 Units.**

Undergraduate honors research in Chemistry. A student time commitment of 10-15 hours per week is required.

Prerequisite: CHEM H180B

Restriction: Chemistry Honors students only. Chemistry majors participating in the Campuswide Honors Program students only.

**CHEM H181W. Honors Seminar in Chemistry. 2 Units.**

Students will receive guidance in the preparation of oral and written research presentations. A written thesis will be prepared and a formal research seminar will be presented.

Corequisite: CHEM H180C

Prerequisite: CHEM H180A and CHEM H180B. Satisfactory completion of the Lower-Division Writing requirement.

**(Ib)****CHEM 191. Chemistry Outreach Program. 2 Units.**

Involves intensive participation in the UCI Chemistry Outreach Program, which performs Chemistry demonstrations at local high schools.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 6 times.

**CHEM 192. Tutoring in Chemistry. 2 Units.**

Enrollment limited to participants in the Chemistry Peer Tutoring Program.

Repeatability: May be taken for credit 9 times.

Restriction: The first eight may be taken for a letter grade. The remaining ten units must be taken Pass/Not Pass only. NOTE: No more than eight units may be counted toward the 180 units required for graduation. Satisfies no degree requirement other than contribution to the 180-unit total.

**CHEM 193. Research Methods. 4 Units.**

Explores tools of inquiry for developing and implementing science research projects. Students undertake independent projects requiring data collection, analysis, and modeling, and the organization and presentation of results. Additional topics include ethical issues and role of scientific literature.

Prerequisite: BIOL 14 or PS 5

Same as BIOL 108, PHYS 193.

**CHEM 197. Professional Internship. .5-4 Units.**

Internship program that provides students with opportunity to develop professional skills necessary for competitive placement in their chosen chemical-inspired industry. Students gain new and field-specific skills outside the classroom while participating in a supervised internship.

Prerequisite: Enrollment requires completion of an application form. Student selection is made by a selection committee.

Repeatability: May be taken for credit for 13 units.

Restriction: Upper-division students only. Chemistry Majors only.

**CHEM 199. Independent Study in Chemistry. 1-4 Units.**

Independent research with Chemistry faculty. Student time commitment of three to four hours per week per unit is expected, and a written report on the independent study is required at the end of each quarter of enrollment.

Repeatability: Unlimited as topics vary.

**CHEM 200. Conduct of Research . 2 Units.**

Introduces new graduate students to ethical conduct of scientific research, mentoring, and current research in the Department of chemistry.

Repeatability: May be taken for credit 2 times.

**CHEM 201. Organic Reaction Mechanisms I. 4 Units.**

Advanced treatment of basic mechanistic principles of modern organic chemistry. Topics include molecular orbital theory, orbital symmetry control of organic reactions, aromaticity, carbonium ion chemistry, free radical chemistry, the chemistry of carbenes and carbanions, photochemistry, electrophilic substitutions, aromatic chemistry.

Prerequisite: CHEM 132A and CHEM 132B and CHEM 132C

**CHEM 202. Organic Reaction Mechanisms II. 4 Units.**

Topics include more in-depth treatment of mechanistic concepts, kinetics, conformational analysis, computational methods, stereoelectronics, and both solution and enzymatic catalysis.

Prerequisite: CHEM 201

**CHEM 203. Organic Spectroscopy. 4 Units.**

Modern methods used in structure determination of organic molecules. Topics include mass spectrometry; ultraviolet, chiroptical, infrared, and nuclear magnetic resonance spectroscopy.

Prerequisite: (CHEM 51A and CHEM 51B and CHEM 51C) or (CHEM H52A and CHEM H52B and CHEM H52C)

Restriction: Graduate students only.

**CHEM 204. Organic Synthesis I. 4 Units.**

Fundamentals of modern synthetic organic chemistry is developed. Major emphasis is on carbon-carbon bond forming methodology. Topics include carbonyl annulations, cycloadditions, sigmatropic rearrangements, and organometallic methods.

**CHEM 205. Organic Synthesis II. 4 Units.**

Fundamentals of modern synthetic organic chemistry will be developed. Major emphasis this quarter is on natural product total synthesis and retrosynthetic (antithetic) analysis.

Prerequisite: CHEM 204

**CHEM 206. Advanced Data Acquisition and Analysis. 4-6 Units.**

Introduces students to a variety of practical laboratory techniques, including lock-in, boxcar, coincidence counting, noise filtering, PID control, properties of common transducers, computer interfacing to instruments, vacuum technology, laboratory safety, basic mechanical design, and shop skills. Materials fee.

Same as PHYS 206.

Concurrent with PHYS 106.

**CHEM 207. Applied Physical Chemistry. 4 Units.**

Introduction to fundamental concepts in molecular structure and reactivity: theory of bonding, valence and molecular orbitals; structure and reactivity in inorganic chemistry; elements in molecular group theory; nomenclature in organic chemistry; and survey of macromolecules.

Same as PHYS 207.

**CHEM 208. Math Methods. 4 Units.**

Applications of mathematics to physical and chemical problems. Calculus of special functions, complex variables and vectors; linear vector spaces and eigenvalue problems. Differential equations.

Same as PHYS 208.

**CHEM 213. Chemical Kinetics. 4 Units.**

Surveys gas phase and organic reaction mechanisms and their relationship to kinetic rate laws; treats the basic theory of elementary reaction rates. A brief presentation of modern cross-sectional kinetics is included.

Prerequisite: CHEM 132A and CHEM 132B and CHEM 132C

**CHEM 215. Inorganic Chemistry I. 4 Units.**

Principles of modern inorganic chemistry with applications to chemical systems of current interest. Inorganic phenomena are organized into general patterns which rationalize observed structures, stabilities, and physical properties.

Prerequisite: CHEM 107 and CHEM 132A and CHEM 132B and CHEM 132C

Restriction: Graduate students only.

**CHEM 216. Organometallic Chemistry. 4 Units.**

Synthesis and reactivity of organometallic complexes with an emphasis on mechanisms. Topics include bonding and fluxional properties; metal-carbon single and multiple bonds; metal  $\pi$ -complexes. Applications to homogenous catalysis and organic synthesis are incorporated throughout the course.

Prerequisite: CHEM 107 or CHEM 215

**CHEM 217. Physical Inorganic Chemistry. 4 Units.**

General principles of the spectroscopy and magnetism of inorganic compounds. Characterization of inorganic complexes by infrared, near-infrared, visible, ultraviolet, NMR, EPR, EXAFS, and Mossbauer spectroscopies. Some necessary group theory developed.

Prerequisite: CHEM 215

**CHEM 218. Metallobiochemistry . 4 Units.**

A review of the biochemistry of metallic elements emphasizing: methods for studying metals in biological systems; the chemical basis for nature's exploitation of specific elements; structures of active sites; mechanisms; solid-state structures and devices; metals in medicine.

Prerequisite or corequisite: CHEM 131C or CHEM 132C

Same as MBB 248.

**CHEM 219. Chemical and Structural Biology. 4 Units.**

A survey of the organic chemistry underlying biological function. Introduction to chemical genetics, receptor-ligand interactions, small molecule agonists and antagonists, combinatorial synthesis, high throughput assays, molecular evolution, protein and small molecule design.

Restriction: Graduate students only.

**CHEM 221A. Fundamentals of Molecular Biophysics. 4 Units.**

An overview of the principles and concepts in molecular biophysics. Topics covered include energy and entropy in biology, non-equilibrium reaction kinetics, random walks and molecular diffusion, molecular forces in biology.

Prerequisite: Undergraduate courses in physical chemistry and biochemistry.

Repeatability: May be taken for credit 3 times.

**CHEM 223. Biological Macromolecules. 4 Units.**

Introduction to nucleic acid and protein structure, dynamics, and function. Topics include analytical methods, molecular evolution, folding, and catalysis.

Same as PHMS 223.

**CHEM 224. Molecular and Cellular Biophotonics. 4 Units.**

Principles underlying the application of photonic technologies to biomolecular and cellular systems. Sample technologies Optical Tweezers, Linear and Nonlinear Optical Microscopy and Fluorescence Lifetime and Correlation Methods, and their use to investigate emergent problems in Molecular, Cellular, and Developmental Biology.

Same as BME 224.

Restriction: Graduate students only.

**CHEM 225. Polymer Chemistry: Synthesis and Characterization of Polymers. 4 Units.**

Structure of synthetic and natural polymers. Survey of modern polymer synthetic methods. Molecular weight and molecular weight distribution. Chain conformation and stereochemistry. Introduction to polymer characterization, chain models, and solution behavior.

Prerequisite: Undergraduate courses in organic and physical chemistry.

**CHEM 228. Electromagnetism. 4 Units.**

Maxwell's equations, electrodynamics, electromagnetic waves and radiation, wave propagation in media, interference and quantum optics, coherent and incoherent radiation, with practical applications in interferometry, lasers, waveguides, and optical instrumentation.

Same as PHYS 228.

**CHEM 229A. Computational Methods. 4 Units.**

Mathematical and numerical analysis using Mathematica and C programming, as applied to problems in physical science.

Same as PHYS 229A.

Concurrent with PHYS 100.

**CHEM 230. Classical Mechanics and Electromagnetic Theory. 4 Units.**

Fundamentals of classical mechanics and electromagnetic theory are developed with specific application to molecular systems. Newtonian, Lagrangian, and Hamiltonian mechanics are developed. Boundary value problems in electrostatics are investigated. Multipole expansion and macroscopic media are discussed from a molecular viewpoint.

Prerequisite: CHEM 132A and CHEM 132B and CHEM 132C

**CHEM 231A. Fundamentals of Quantum Mechanics. 4 Units.**

The postulates of quantum mechanics are discussed and applied to a variety of model problems.

Prerequisite: CHEM 131A and CHEM 131B and CHEM 131C

**CHEM 231B. Applications of Quantum Mechanics. 4 Units.**

Approximate methods for solving atomic and molecular structure problems are developed, and the application of quantum mechanics to spectroscopy is introduced.

Prerequisite: CHEM 231A

**CHEM 231C. Molecular Spectroscopy. 4 Units.**

Theory and techniques of spectroscopy as used for the study of molecular and condensed phase properties. Coherent time domain spectroscopies are covered.

Prerequisite: CHEM 231B

**CHEM 232A. Thermodynamics and Introduction to Statistical Mechanics. 4 Units.**

A detailed discussion from an advanced point of view of the principles of classical thermodynamics. The fundamentals of statistical mechanics. Topics include an introduction to ensemble theory, Boltzmann statistics, classical statistical mechanics, and the statistical mechanics of ideal gas systems.

Prerequisite: CHEM 131A and CHEM 131B and CHEM 131C

**CHEM 232B. Advanced Topics in Statistical Mechanics. 4 Units.**

Continued discussion of the principles of statistical mechanics. Applications to topics of chemical interest including imperfect gases, liquids, solutions, and crystals. Modern techniques such as the use of autocorrelation function methods.

Prerequisite: CHEM 232A

**CHEM 232C. Non-Equilibrium Statistical Mechanics. 4 Units.**

Phenomenology of material processes, including: kinetic theories of transport and continuum, linear response theory, critical phenomena of phase transition, self-assembly, and nucleation.

**CHEM 233. Nuclear and Radiochemistry. 4 Units.**

Advanced treatment of nuclear structure, nuclear reactions, and radioactive-decay processes. Introduction to nuclear activation analysis, isotope effects, radiation chemistry, hot-atom chemistry, nuclear age-dating methods, nuclear reactors, and nuclear power.

Same as CBE 276.

Restriction: Graduate students only.

Concurrent with CHEM 133 and CBE 176.

**CHEM 237. Mathematical Methods in Chemistry. 4 Units.**

Survey of essential math methods in chemistry. Topics may include series and limits, complex analysis, Fourier and Laplace transforms, linear algebra and operators (theory and algorithms), differential equations, and probability concepts for stochastic processes.

**CHEM 241. Current Issues Related to Air Quality, Climate, and Energy. 4 Units.**

Current issues related to the atmosphere, climate, and air quality in the context of energy conversion and sustainability. Topics include transportation systems; building design; impacts on humans and ecosystems; modeling and meteorology; economics; and application to public policies.

Prerequisite: MAE 261 or CHEM 245 or ESS 240

Same as MAE 260.

Restriction: Graduate students only.

**CHEM 242A. Physical and Geometrical Optics. 4 Units.**

Focuses on the practical aspects of optics and optical engineering, starting at the fundamentals. Topics include geometrical optics, ray tracing, polarization optics, interferometers, and diffractive optics.

Restriction: Graduate students only.

Concurrent with PHYS 134A.

**CHEM 243. Advanced Instrumental Analysis. 4 Units.**

Theory and applications of modern advanced instrumental methods of analysis. Includes data acquisition, storage, retrieval, and analysis; Fourier transform methods; vacuum technologies; magnetic sector; quadrupole and ion trap mass spectrometry; surface science spectroscopic methods; lasers and optics.

Prerequisite: CHEM 152 and CHEM 132C. CHEM 152 with a grade of B or better. CHEM 132C with a grade of B or better

**CHEM 244. Detection and Measurement of Radiation. 4 Units.**

Basic principles of detection and measurement of ionizing radiation; both theory and practical aspects of measurement techniques for alpha, beta, gamma, and neutron radiation, properties of different detector materials, electronics and data treatments, and analysis.

Prerequisite: CHEM 233 or CBE 276

Same as CBE 277.

Restriction: Graduate students only.

**CHEM 245A. Gas-Phase Atmospheric Chemistry. 4 Units.**

Sources, chemistry, sinks, and measurements of key atmospheric gaseous species. Chemistry of photochemical oxidant formation, transformation of key inorganic and organic trace gases, and stratospheric ozone cycling. Applications of atmospheric chemistry models to control strategies.

Prerequisite: CHEM 132A and CHEM 132B and CHEM 132C

Concurrent with CHEM 145A.

**CHEM 245B. Multi-Phase Atmospheric Chemistry. 4 Units.**

Chemical and physical processes leading to the production, aging, and removal of atmospheric particles. Multi-phase processes involving gases, particles, water droplets, and environmental surfaces. Approaches for modeling these processes with applications to control strategies.

Prerequisite: CHEM 245A

Concurrent with CHEM 145B.

**CHEM 245C. Special Topics in Atmospheric Chemistry. 4 Units.**

The subjects covered vary from year to year.

Prerequisite: CHEM 245B

Repeatability: Unlimited as topics vary.

**CHEM 246. Separations and Chromatography. 4 Units.**

Introduction to modern separation techniques such as gas chromatography, high-performance liquid chromatography, supercritical fluid chromatography, capillary electrophoresis, and field flow fractionation. Applications of these separation strategies are discussed.

**CHEM 247. Current Problems in Analytical Chemistry. 4 Units.**

Surveys current research challenges in analytical chemistry. Topics include electrochemistry, chromatography, spectroscopy, and mass spectrometry.

**CHEM 248. Electrochemistry. 4 Units.**

Fundamentals of electrochemistry including thermodynamics and the electrochemical potential, charge transfer kinetics, and mass transfer. Methods based on controlled potential and controlled current are described; the effects of slow heterogeneous kinetics and the perturbation caused by homogeneous chemistry are discussed.

**CHEM 249. Analytical Spectroscopy. 4 Units.**

Advanced treatment of spectroscopic techniques and instrumentation. Atomic and molecular absorption, emission, and scattering processes and their application to quantitative chemical analysis are outlined. Puts different spectroscopic techniques in perspective and demonstrates most appropriate applications to analytical problems.

**CHEM 250. Computational Chemistry. 4 Units.**

Basic concepts, methods, and techniques in computational chemistry: density functional and wavefunction theory, molecular property calculations, analysis tools, potential energy surfaces, vibrational effects, molecular dynamics simulations.

Restriction: Graduate students only.

Concurrent with CHEM 150.

**CHEM 250L. Computational Chemistry Laboratory. 4 Units.**

Introduction to the practice of modern computational chemistry through a series of advanced computational experiments.

Prerequisite: CHEM 250

Restriction: Graduate students only.

Concurrent with CHEM 150L.

**CHEM 251. Special Topics in Organic Chemistry. 1-4 Units.**

Advanced topics in organic chemistry.

Repeatability: Unlimited as topics vary.

**CHEM 252. Special Topics in Physical Chemistry. 1-4 Units.**

Advanced topics in physical chemistry. Materials fee.

Repeatability: Unlimited as topics vary.

**CHEM 253. Special Topics in Inorganic Chemistry. 4 Units.**

Advanced topics in inorganic chemistry.

Prerequisite: CHEM 215

Repeatability: Unlimited as topics vary.

**CHEM 254. Special Topics in Computational and Theoretical Chemistry. 4 Units.**

Subjects covered vary from year to year.

Repeatability: Unlimited as topics vary.

**CHEM 263. Materials Chemistry . 4 Units.**

An introduction to crystalline solids, descriptive crystal chemistry, solid-state synthesis and characterization techniques, x-ray and electron diffraction, phase diagrams, electronic band structure of extended solids, semi conductors, and nanoscale inorganic materials.

**CHEM 266. Current Topics in Chemical, Applied, and Materials Physics. 1 Unit.**

The subjects covered vary from year to year. Connection between fundamental principles and implementations in practice in science, industry, and technology.

Repeatability: May be repeated for credit unlimited times.

Same as PHYS 266.

**CHEM 267. Photochemistry. 4 Units.**

Photochemical and photovoltaic processes in molecules and semiconductors; quantum mechanics; statistical thermodynamics; kinetics; and experimental techniques relevant to photon absorption and emission; photochemical charge separation, recombination, and transport of electrons and ions; and interfacial redox chemistry.

Restriction: Seniors only. Graduate students only.

**CHEM 268. NMR Spectroscopy . 4 Units.**

Students learn the theoretical basis of solid-state or solution NMR (alternate times), including the basics of pulse sequence design. Extensive literature reading is required.

Prerequisite: CHEM 231A

Repeatability: May be taken for credit 2 times.

**CHEM 273. Technical Communication Skills. 2 Units.**

Development of effective communication skills, oral and written presentations, through examples and practice.

Grading Option: Satisfactory/unsatisfactory only.

Same as PHYS 273.

**CHEM 280. Research. 2-12 Units.**

Supervised original research toward the preparation of a Ph.D dissertation or M.S. thesis.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CHEM 290. Seminar. 1 Unit.**

Weekly seminars and discussions on general and varied topics of current interest in chemistry.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CHEM 291. Research Seminar. 4 Units.**

Detailed discussion of research problems of current interest in the Department. Format, content, and frequency of the course are variable.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**CHEM 292. Graduate Symposium. 2 Units.**

Students present public seminars on literature-based research topics in contemporary chemistry. Topics to be chosen by student and approved by instructor.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**CHEM 299. Independent Study. 1-4 Units.**

Independent research with Chemistry faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CHEM 399. University Teaching. 1-4 Units.**

Required of and limited to Teaching Assistants.

Repeatability: May be repeated for credit unlimited times.

## Chicano/Latino Studies (CHC/LAT)

### Courses

**CHC/LAT 61. Introduction to Chicano/Latino Studies I. 4 Units.**

An introduction to the study of the historical foundations of the Chicano/Latino experience. Addresses such topics as empire, migration, immigrant settlement, economic integration, race, gender, and the formation of group identities.

(III, VII)

**CHC/LAT 62. Introduction to Chicano/Latino Studies II. 4 Units.**

Provides an introduction to the arts, literature, and culture of Chicano/Latino communities. Analyzes representations of and cultural production in Chicano/Latino communities through such media as folklore, literature, art, film, architecture, dance theatre, performance, music, poetry, mass media, and language.

(III, VII)

**CHC/LAT 63. Introduction to Chicano/Latino Studies III. 4 Units.**

Examines contemporary public policy issues in Chicano/Latino communities. Each offering addresses at least three of the following themes: migration, immigrant incorporation, identity construction, language policy, health policy, politics, sexuality, gender, labor, class, and education.

(III and VII ).

**CHC/LAT 64. Introduction to Race and Ethnicity in Political Science. 4 Units.**

Examines major theories that attempt to explain the roles of race and ethnicity in U.S. politics.

Same as POL SCI 61A.

(III and VII ).

**CHC/LAT 65. Ethnic and Immigrant America. 4 Units.**

Focusing on Asian, Latino, and Black immigrant groups, examines the second generation's experience of straddling two cultures and growing up American. Covers topics such as assimilation, bilingualism, race relations, education, bicultural conflicts, interracial marriage, and multiracial identities.

Same as SOCIOL 68A.

(VII)

**CHC/LAT H80. Latina/o Childhoods: Comparative Approaches to the Study of Children and Youth. 4 Units.**

Students in this seminar compare the experiences of Latina/o children to other young people in the U.S. and around the world, analyzing the historical, political, economic, and sociocultural factors that have differently structured the life stage we understand as "childhood."

Restriction: Campuswide Honors Collegium students only.

(III)

**CHC/LAT 101. Research in the Latino Community. 4 Units.**

Students engage in firsthand research in the local Orange County environment. Students identify a research problem, conduct a literature review, develop questions and/or hypotheses, appropriate methods, and write a proposal.

Prerequisite: Two courses from CHC/LAT 61 or CHC/LAT 62 or CHC/LAT 63 and two courses from CHC/LAT 110-189.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment.

**CHC/LAT 102W. Chicano/Latino Research Seminar. 4 Units.**

Taught as a writing and research seminar in Chicano/Latino Studies. Student develops own project; engages in peer editing; drafts, writes, and presents paper at Spring research conference. Prior course work in Chicano/Latino Studies helpful, i.e., CHC/LAT 61, 62, 63.

Prerequisite: CHC/LAT 101. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Chicano/Latino Studies Majors only.

(Ib)

**CHC/LAT 110. Topics in Chicano Literature and Culture. 4 Units.**

Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter. Taught in English.

Repeatability: May be taken for credit 4 times as topics vary.

Same as SPANISH 140.

**CHC/LAT 118. Anthropology of Food. 4 Units.**

Examines how food communicates ideas about ethnocentrism, disgust, privilege, gender, race, labor, social identities and hierarchies, globalization, power, and the 'Western diet' and its health consequences.

Same as ANTHRO 134H.

**CHC/LAT 120. Peoples and Cultures of Latin America. 4 Units.**

Surveys the prehistory of Latin America and its indigenous cultures, emphasizing the impact of colonial rule, capitalism, and twentieth-century transformations. Emphasis on communities from several countries. In some years, emphasis on comparisons between the Latin American and Caribbean experiences.

Same as INTL ST 177J, ANTHRO 162A.

(VIII)

**CHC/LAT 121. Latina/Latino Pop: Latina/Latino Popular Culture. 4 Units.**

With a focus on the politics of language and space/place, prepares students to critically analyze sites of Latina/Latino popular culture including: music, film, performance, sports, media, and varied subcultures.

Same as HISTORY 151D.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment. History Majors have first consideration for enrollment.

**CHC/LAT 123. Immigration, Nation, and Media. 4 Units.**

Examines media shapes and reflects public opinion on immigration and its representation of immigrants, citizens, and ideas about the nation, and who belongs and who is a potential threat; as well as the relationship between scholars and journalists.

Same as ANTHRO 125U, SPPS 101A.

**CHC/LAT 124W. Immigrant Emotionality. 4 Units.**

Explores the emotional universe created by the Latin American immigrant experience, and guides students in the creation of a literary work based on an investigation into, or reflection on that experience.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

**CHC/LAT 129. Special Topics in Literature, Arts, Media, Culture. 1-4 Units.**

Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment.

**CHC/LAT 132A. Chicana/Chicano History: Pre-Colonial to 1900. 4 Units.**

Examines social history of the southwest region from antiquity to 1900. Discusses major questions, theory and research methods pertinent to Chicanas/Chicanos. Themes include: indigenous empires, conquest, colonialism, social stratification, ideology, marriage, sexuality, industrial capitalism, accommodation and resistance.

Same as HISTORY 151A.

**CHC/LAT 132B. Chicana/Chicano History: Twentieth Century. 4 Units.**

Examines social history of the Southwest with emphasis on Mexican-origin people. Discusses major questions, theory and research methods pertinent to Chicana/Chicano history. Themes explored include: immigration, xenophobia, class struggle, leadership, generational cohorts, unionization, education, barrioization, ethnicity, patriarchy, sexuality.

Same as HISTORY 151B.

**CHC/LAT 134. U.S. Latino Literature and Cultures. 4 Units.**

Focuses on aspects of literature, art, cultural production, and history of the multifaceted Latino cultures that have developed within the United States. Focuses on one group, such as Caribbean Americans, Chicanos, Central Americans, or a comparative perspective of several groups.

Same as SPANISH 110C.

**CHC/LAT 135. Latinas in the Twentieth Century U.S.. 4 Units.**

Latinas in the U.S. from 1900 to present, offering a diversity of their cultures, regional histories, sexualities, generations, and classes.

Same as HISTORY 151C.

**CHC/LAT 139. Special Topics in Chicano/Latino History. 1-4 Units.**

Studies in selected areas of Chicano/Latino History. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Chicano/Latino Studies Majors only.

**CHC/LAT 147. Comparative Minority Politics. 4 Units.**

Examines the political experiences of Blacks, Latinos, and Asian Americans in the United States from roughly 1950 to the present. Focuses on how each group has pursued political empowerment via both conventional political channels and social movements.

Same as AFAM 151, ASIANAM 132, POL SCI 124C.

**CHC/LAT 148. Racial and Ethnic Relations in the United States. 4 Units.**

Examines central questions and issues in the field of race and ethnicity; the emergence, maintenance, and consequences of the ethnic and racial stratification system in the United States; the future of racial and ethnic relations; and relevant public policy issues.

Same as SOCIOL 167A.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**CHC/LAT 148W. Racial and Ethnic Relations in the United States. 4 Units.**

Examines central questions and issues in the field of race and ethnicity; the emergence, maintenance, and consequences of the ethnic and racial stratification system in the United States; the future of racial and ethnic relations; and relevant public policy issues.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as SOCIOL 167AW.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**(Ib)****CHC/LAT 150. U.S. Intervention in Latin America. 4 Units.**

Explores political, economic, social, and cultural ties that bind Latin America to the United States. Focuses on U.S. intervention and Latin American response from early nineteenth century to present day. Case studies include Mexico, Guatemala, Cuba, Chile, and Central America.

Same as POL SCI 142J, INTL ST 177D, HISTORY 166.

**CHC/LAT 150A. Sex and Conquest in Latin America. 4 Units.**

Competing ideas of masculinity and femininity, sexual violence, sexual identities, and gendered hierarchies informed how the Spanish engaged in military and religious domination of Mexican and Andean communities, as well as the forms of native resistance throughout colonial Latin America.

Same as ANTHRO 140, HISTORY 160, GEN&SEX 171A.

**CHC/LAT 151. Latinos in U.S. Politics. 4 Units.**

Comparing the political issues facing Latino groups by examining their migration histories, voting behavior, nonelectoral participation, and policy issues. Latino issues are examined on the national, state, and local levels, including formal representation, immigration, affirmative action, and language policy.

Same as POL SCI 124B.

**(VII)****CHC/LAT 151B. Revolution in Latin America. 4 Units.**

Presents a comparative analysis of the causes, development, and consequences of selected revolutionary movements, focusing on outbreaks in Mexico, Bolivia, Cuba, Chile, Nicaragua, and Grenada. Explores topics of state formation, economic nationalism, social justice, ethnicity, and role of international affairs.

Same as SOC SCI 173N, HISTORY 166D, INTL ST 177C.

**CHC/LAT 152A. Race, Ethnicity, and Social Control. 4 Units.**

Provides a historical and sociological survey of racial and ethnic group relations in contexts of crime control, emphasizing the roles of racial ideology, structural racism, and social movements in shaping these dynamic relations, and their significance to American liberal democracy.

Same as CRM/LAW C116.

**CHC/LAT 152B. Community, Social Justice, and Health Equity Research for Action. 4 Units.**

Focuses on community as a unit of identity, community, well-being, and social justice perspectives and initiatives to promote community health. Addresses community change and improvements in community well-being, with a focus on health equity research for action.

Prerequisite: PUBHLTH 1 or PUBHLTH 2 or CHC/LAT 61 or CHC/LAT 62 or CHC/LAT 63

Same as PUBHLTH 115.

**CHC/LAT 153. Cross-Cultural Research on Urban Gangs. 4 Units.**

Taking an urban policy approach, examines the background and contemporary traditions of gangs in several ethnic groups including African-, Asian-, and Mexican-Americans. Cross-cultural exploration of the varied facets of gang life. The major social-control institutions affecting them.

Same as CRM/LAW C156.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment. Chicano/Latino Studies Majors have first consideration for enrollment.

**(VII)****CHC/LAT 154. Latino Metropolis. 4 Units.**

Explores the processes of Latino urbanization in the United States and the spatialization of Latino identities, particularly in the context of Southern California with selected comparisons drawing from other cities.

Same as UPPP 172.

**(VII)****CHC/LAT 155. Culture Change and the Mexican People. 4 Units.**

Reviews culture contact and colonization, innovation diffusion, acculturation, assimilation, culture conflict and marginality, modernization, urbanization, legal transformations. Mexico and the Southwestern U.S. are reviewed through several centuries to better appreciate the indigenous base of the Mexican people.

Same as CRM/LAW C172.

**CHC/LAT 156W. Chicano/Latinos and Labor. 4 Units.**

Explores theories that explain the occupational pathways and workplace experiences of Latinos in various work sectors. Investigates jobs such as migrant labor, child street vendors, Latina/Latino professionals, and Latinos migrating to the U.S. South that work in poultry processing plants.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

**(Ib)****CHC/LAT 157. Cuban Society and Revolution. 4 Units.**

Explores the causes, development, and legacy of the 1959 Revolution. Themes include economic dependency, democracy, race, gender, culture, and the always volatile relations between Cuba and the United States.

Same as POL SCI 153G, HISTORY 166C, INTL ST 177E.

**CHC/LAT 158. Feminisms of Color. 4 Units.**

Surveys the development of Chicana feminist thought and practice. Focuses on historical contemporary writings by and about Chicana feminists. Draws from interdisciplinary scholarship in order to survey the diversity of Chicana feminisms.

**(VII)****CHC/LAT 159. Special Topics in Society, Labor, Politics, Law, Gender, Race, Ethnicity. 1-4 Units.**

Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Chicano/Latino Studies Majors only.

**CHC/LAT 161. Transnational Migration. 4 Units.**

Examines the movement of people across national borders, governmentality and the role of state practices to control populations, and issues of citizenship, belonging, and identity. Examples are drawn from the United States, Europe, Latin America, Asia, and Africa.

Same as ANTHRO 125X, INTL ST 117A.

**(VIII)**

**CHC/LAT 162A. Urban America . 4 Units.**

Students examine the historical, social, political, and economic factors that contributed to the construction of the American urban context, one that is poverty concentrated and racially/ethnically segregated. Students also critically assess the consequence of growing up in America's urban neighborhoods.

Same as SOC SCI 163A, UPPP 104.

**CHC/LAT 163. U.S. Immigration Policy. 4 Units.**

Examines selected immigration policy debates since the nineteenth century, rationale and consequences of immigration law since 1965, problems of administration, implementation and enforcement, impact of immigration policy on foreign relations, and contemporary debate regarding the future of U.S. policy.

Same as POL SCI 126C.

**(VII)****CHC/LAT 164A. Undocumented Immigrant Experiences. 4 Units.**

Examines the experiences of undocumented immigrants and the policies that structure their educational, economic, social, and political participation.

Same as ASIANAM 130, CRM/LAW C187, SOCIOL 177C.

**(III and VII ).****CHC/LAT 166. Chicano Movement. 4 Units.**

Explores the history of Mexicans in the U.S. with particular attention paid to their integration into the U.S. capitalist economy. Examines this economic history and the Chicano movement, 'El Movimiento,' within the wide context of socio-economic change.

Same as UPPP 177.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**CHC/LAT 167. Latinos in a Global Society. 4 Units.**

Examines interconnections between diverse Latino groups in the U.S. and the effects of globalization on their social, cultural, and political realities. Topics include immigration, demographics, socioeconomic differentiation, familial relations, political protest/resistance, law and policy, and links to 'homeland' issues.

Same as SOC SCI 173L.

**(VII)****CHC/LAT 168. Chicano/Latino Social Psychology. 4 Units.**

Examines theories, research, and major issues of relevance to understanding social psychological processes in Chicano/Latino populations. Topics include social development, cultural orientations, gender and sexuality, close relationships, happiness and well-being, stereotyping, prejudice and discrimination, and mental and physical health.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as PSCI 192Q.

Restriction: Psychological Science Majors have first consideration for enrollment. Chicano/Latino Studies Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**(VII)****CHC/LAT 169. Special Topics in Globalization, Transnationalism, Immigration, U.S.-Mexico Border. 1-4 Units.**

Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**CHC/LAT 170. Chicano/Latino Families. 4 Units.**

Introduction to the research, literature, and issues surrounding the topic of Chicano/Latino families including cultural history, contemporary issues, organization of family, traditions, lifestyles, values, beliefs, generational differences, gender issues, ethnic identity, evolution of demographic patterns, current economic and political standings.

Same as SOC SCI 165, PSCI 166S, PSYCH 174H.

**CHC/LAT 176. Race, Gender, and Science. 4 Units.**

Perfect for pre-health, science and social science majors wanting to appreciate how science and society interact. Race and gender as biological and socio-cultural constructs are examined. Questions explored: What is disease? What is science? What are social and biological differences.

Same as ANTHRO 128B.

**(VII)****CHC/LAT 178A. Medical Anthropology. 4 Units.**

Introduces students to cross-cultural perspectives and critical theories in anthropological studies of medicine. Special attention is given to diverse ways of understanding bodies, illnesses, and therapeutic practices in our changing world.

Same as ANTHRO 134A.

**(VIII)****CHC/LAT 179. Special Topics in Health, Medicine, and Psychosocial Dynamics. 1-4 Units.**

Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment.

**CHC/LAT 183. Multicultural Education in K-12 Schools. 4 Units.**

Provides a theoretical and empirical overview of educational issues affecting low-income immigrant and U.S. born minority student populations in an increasingly diverse and changing society.

Same as EDUC 124.

**(VII)****CHC/LAT 189. Special Topics in Educational Policy and Issues. 1-4 Units.**

Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: May be repeated for credit unlimited times.

**CHC/LAT H190A. Honors Research Preparation. 4 Units.**

Students write a proposal describing their research question, the relevant background literature, and the method of data collection and analysis. Field work for the project may begin this quarter.

Restriction: Chicano/Latino Studies Honors students only.

**CHC/LAT H190B. Honors Field Research. 4 Units.**

Students begin or continue their research for their senior honors thesis.

Prerequisite: CHC/LAT H190A

**CHC/LAT H190C. Honors Thesis. 4 Units.**

Student drafts a senior honor thesis (typically) with the following sections: problem statement, literature review, description of the methods, results, and conclusions.

Prerequisite: CHC/LAT H190A and CHC/LAT H190B

**CHC/LAT H190W. Honors Thesis. 4 Units.**

Student drafts a senior honor thesis (typically) with the following sections: problem statement, literature review, description of the methods, results, and conclusions.

Prerequisite: CHC/LAT H190A and CHC/LAT H190B. Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

**CHC/LAT 198. Directed Group Study. 1-4 Units.**

Directed study with Chicano/Latino faculty.

Repeatability: May be repeated for credit unlimited times.

**CHC/LAT 199. Independent Study. 1-4 Units.**

Independent research with Chicano/Latino faculty.

Repeatability: May be repeated for credit unlimited times.

**CHC/LAT 200A. Theoretical Issues in Chicano/Latino Research. 4 Units.**

Introduction to theoretical issues in the scholarship in Chicano/Latino Studies. Theories from social sciences, humanities, critical theory. Topics: immigration, identity, gender and sexuality, globalization, transnationalism, social, political, and economic integration, race theory, labor market participation, social history, cultural productions.

**CHC/LAT 210A. Cultural and Historical Precedents for Latinos and Medical Care. 2 Units.**

Introduction to the history of Latinos, focusing on relevant pre-Columbian, colonial, and modern social and cultural developments, including issues of race, gender, sexuality, religious beliefs, and health beliefs and practices.

Grading Option: In Progress (Letter Grade with S/U).

**CHC/LAT 210B. Cultural and Historical Precedents for Latinos and Medical Care. 2 Units.**

Introduction to the history of Latinos, focusing on relevant pre-Columbian, colonial, and modern social and cultural developments, including issues of race, gender, sexuality, religious beliefs, and health beliefs and practices.

Prerequisite: CHC/LAT 210A

Restriction: CHC/LAT 210A-210B and CHC/LAT 212 may not both be taken for credit.

**CHC/LAT 211A. Latinos/Latinas and Medical Care: Contemporary Issues. 2 Units.**

Introduction to medical anthropological and social science perspectives on Latinos/Latinas in relation to a number of health and medically-related issues, i.e., immigration, gender, reproduction, culture, social structure, political economy, sexuality, utilization of medical services, and health beliefs.

Same as PUBHLTH 211A.

**CHC/LAT 211B. Latinos/Latinas and Medical Care: Contemporary Issues. 2 Units.**

Introduction to medical anthropological and social science perspectives on Latinos/Latinas in relation to a number of health and medically-related issues, i.e., immigration, gender, reproduction, culture, social structure, political economy, sexuality, utilization of medical services, and health beliefs.

Prerequisite: CHC/LAT 211A

Same as PUBHLTH 211B.

**CHC/LAT 215. Transnational Migration. 4 Units.**

Examines borders and boundaries as material and semiotic constructs. Drawing upon an array of literatures, but loosely situated in U.S. geo/biopolitics, explores transformative troublings of places, spaces, borders, and bodies of all sorts.

Same as SOC SCI 254A, ANTHRO 235A.

Restriction: Graduate students only.

**CHC/LAT 217. Ethnography. 4 Units.**

Explores the theory and practice of ethnography with a focus on anthropology, the discipline most associated with ethnography. Students are exposed to the theoretical underpinnings of ethnographic work, traditional and innovative practices, and sample ethnographies.

Same as ANTHRO 230F, CRM/LAW C222.

Restriction: Graduate students only.

**CHC/LAT 222. Theorizing Illegality and the Experiences of Undocumented Immigrants. 4 Units.**

Examines theories of illegality and citizenship, historical and contemporary undocumented immigrant experiences, and methodological concerns in this area of study.

Same as SOCIOL 282.

Restriction: Graduate students only.

**CHC/LAT 223. Ethnic America. 4 Units.**

Examines critically the meaning and measurement of ethnicity, race, and nation in sociological theory and research. Theories of ethnicity are explored, along with empirical studies of the construction of ethnic and pan-ethnic identities in historical and contemporary contexts.

Same as SOCIOL 234.

Restriction: Graduate students only.

**CHC/LAT 224. Immigrant America. 4 Units.**

The study of the causes and consequences of international migration has become one of the most vital fields of sociological theory and research. Examines principal theoretical perspectives and empirical research on contemporary immigration flows and the processes of incorporation.

Same as SOCIOL 264.

Restriction: Graduate students only.

**CHC/LAT 225. Crimmigration. 4 Units.**

Examines the criminalization of immigration, with an emphasis on U.S. enforcement procedures and outcomes. Analyzes the devolution of federal immigration law to local authorities, the rise in immigrant detention and deportation, and the militarization of the U.S.-Mexico border.

Same as SOCIOL 268, CRM/LAW C258.

Restriction: Graduate students only.

**CHC/LAT 251. Models of Practice and Intervention at the Community Level. 4 Units.**

Examines and critiques current models, frameworks, theories for.

Prerequisite: CHC/LAT 200A or PUBHLTH 246

Same as PUBHLTH 251.

Restriction: Graduate students only.

**CHC/LAT 289. Special Topics in Chicano/Latino Studies. 1-4 Units.**

Current research in Chicano/Latino Studies.

Repeatability: May be repeated for credit unlimited times.

**CHC/LAT 290. Dissertation Research. 1-12 Units.**

Dissertation research with Chicano/Latino faculty.

Repeatability: May be taken for credit 10 times.

Restriction: Graduate students only.

**CHC/LAT 299. Independent Study. 1-12 Units.**

Independent study with Chicano/Latino Studies faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

# Chinese (CHINESE)

## Courses

### CHINESE 1A. Fundamental Mandarin Chinese. 5 Units.

Natural approach emphasizing four fundamental skills: listening, speaking, reading and writing. Specifically designed for students with no previous experience in any dialect of Chinese. Conducted in Mandarin Chinese using the Pinyin system of Romanization, traditional and simplified Chinese characters.

Prerequisite: Placement into CHINESE 1A is also accepted.

Overlaps with CHINESE S1AB, CHINESE 1MA, CHINESE 1DA.

Restriction: CHINESE 1A and CHINESE 1DA and CHINESE 1MA and CHINESE S1AB may not be taken for full credit.

### CHINESE 1B. Fundamental Mandarin Chinese. 5 Units.

Natural approach emphasizing four fundamental skills: listening, speaking, reading and writing. Specifically designed for students with no previous experience in any dialect of Chinese. Conducted in Mandarin Chinese using the Pinyin system of Romanization, traditional and simplified Chinese characters.

Prerequisite: CHINESE 1A. CHINESE 1A with a grade of C or better. Placement into CHINESE 1B is also accepted.

Overlaps with CHINESE S1AB, CHINESE S1BC, CHINESE 1MB, CHINESE 1DB.

Restriction: CHINESE 1B and CHINESE 1DB and CHINESE 1MB and CHINESE S1AB and CHINESE S1BC may not be taken for full credit.

### CHINESE 1C. Fundamental Mandarin Chinese. 5 Units.

Natural approach emphasizing four fundamental skills: listening, speaking, reading and writing. Specifically designed for students with no previous experience in any dialect of Chinese. Conducted in Mandarin Chinese using the Pinyin system of Romanization, traditional and simplified Chinese characters.

Prerequisite: CHINESE 1B or CHINESE S1AB. CHINESE 1B with a grade of C or better. CHINESE S1AB with a grade of C or better. Placement into CHINESE 1C is also accepted.

Overlaps with CHINESE 1DC, CHINESE 1MC, CHINESE S1BC.

Restriction: CHINESE 1C and CHINESE 1DC and CHINESE 1MC and CHINESE S1BC may not be taken for full credit.

## (VI)

### CHINESE 1MA. Fundamentals of Mandarin Chinese - Mandarin Background Track. 5 Units.

Natural approach emphasizing four fundamental skills: listening, speaking, reading and writing. Specifically designed for students with previous background in Mandarin Chinese. Conducted in Mandarin Chinese using the Pinyin system of Romanization, traditional and simplified Chinese characters.

Prerequisite: Placement into CHINESE 1MA.

Overlaps with CHINESE 1DA, CHINESE 1A, CHINESE S1AB.

Restriction: CHINESE 1MA and CHINESE 1DA and CHINESE 1A and CHINESE S1AB may not be taken for full credit.

### CHINESE 1MB. Fundamentals of Mandarin Chinese - Mandarin Background Track. 5 Units.

Natural approach emphasizing four fundamental skills: listening, speaking, reading and writing. Specifically designed for students with previous background in Mandarin Chinese. Conducted in Mandarin Chinese using the Pinyin system of Romanization, traditional and simplified Chinese characters.

Prerequisite: CHINESE 1MA. CHINESE 1MA with a grade of C or better. Placement into CHINESE 1MB is also accepted.

Overlaps with CHINESE 1B, CHINESE 1DB, CHINESE S1AB, CHINESE S1BC.

Restriction: CHINESE 1MB and CHINESE 1DB and CHINESE 1B and CHINESE S1AB and CHINESE S1BC may not be taken for full credit.

**CHINESE 1MC. Fundamentals of Mandarin Chinese - Mandarin Background Track. 5 Units.**

Natural approach emphasizing four fundamental skills: listening, speaking, reading and writing. Specifically designed for students with previous background in Mandarin Chinese. Conducted in Mandarin Chinese using the Pinyin system of Romanization, traditional and simplified Chinese characters.

Prerequisite: CHINESE 1MB. CHINESE 1MB with a grade of C or better. Placement into CHINESE 1MC is also accepted.

Overlaps with CHINESE 1C, CHINESE 1DC, CHINESE S1BC.

Restriction: CHINESE 1MC and CHINESE 1DC and CHINESE 1C and CHINESE S1BC may not be taken for full credit.

**(VI)****CHINESE S1AB. Fundamentals of Mandarin Chinese. 7.5 Units.**

First half of first-year Mandarin Chinese in an intensive setting using natural approach with emphasis on listening, speaking, reading, and writing.

Prerequisite: Placement into CHINESE 1A or CHINESE 1B or CHINESE 1MA or CHINESE 1MB.

Overlaps with CHINESE 1A, CHINESE 1B, CHINESE 1MA, CHINESE 1MB.

**CHINESE S1BC. Fundamentals of Mandarin Chinese. 7.5 Units.**

Second half of first-year Mandarin Chinese in an intensive setting using natural approach with emphasis on listening, speaking, reading, and writing.

Prerequisite: CHINESE S1AB or CHINESE 1B or CHINESE 1DB or CHINESE 1MB. CHINESE S1AB with a grade of C or better. CHINESE 1B with a grade of C or better. CHINESE 1DB with a grade of C or better. CHINESE 1MB with a grade of C or better. Placement into CHINESE 1C or CHINESE 1DC or CHINESE 1MC is also accepted.

Overlaps with CHINESE 1C, CHINESE 1B, CHINESE 1DB, CHINESE 1DC, CHINESE 1MB, CHINESE 1MC.

Restriction: CHINESE S1BC, CHINESE 1B, CHINESE 1C, CHINESE 1DB or CHINESE 1DC, CHINESE 1MB or CHINESE 1MC and may not be taken for full credit.

**(VI)****CHINESE 2A. Intermediate Mandarin Chinese. 5 Units.**

Both authentic and pedagogically-prepared materials are used to further develop students' ability to communicate in culturally, socially, and linguistically appropriate manners. Taught in Chinese using Pinyin romanization system and both traditional and simplified forms of Chinese.

Prerequisite: CHINESE 1C or CHINESE S1BC or CHINESE 1MC. CHINESE 1C with a grade of C or better. CHINESE S1BC with a grade of C or better. CHINESE 1MC with a grade of C or better. Placement into CHINESE 2A is also accepted.

Overlaps with CHINESE 2DA, CHINESE 2MA.

**(VIII)****CHINESE 2B. Intermediate Mandarin Chinese. 5 Units.**

Both authentic and pedagogically-prepared materials are used to further develop students' ability to communicate in culturally, socially, and linguistically appropriate manners. Taught in Chinese using Pinyin romanization system and both traditional and simplified forms of Chinese.

Prerequisite: CHINESE 2A. CHINESE 2A with a grade of C or better. Placement into CHINESE 2B is also accepted.

Overlaps with CHINESE 2DB, CHINESE 2MB.

Restriction: CHINESE 2B and CHINESE 2DB and CHINESE 2MB may not be taken for full credit.

**(VIII)****CHINESE 2C. Intermediate Mandarin Chinese. 5 Units.**

Both authentic and pedagogically-prepared materials are used to further develop students' ability to communicate in culturally, socially, and linguistically appropriate manners. Taught in Chinese using Pinyin romanization system and both traditional and simplified forms of Chinese.

Prerequisite: CHINESE 2B. CHINESE 2B with a grade of C or better. Placement into CHINESE 2C is also accepted.

Overlaps with CHINESE 2DC, CHINESE 2MC.

Restriction: CHINESE 2C and CHINESE 2DC and CHINESE 2MC may not be taken for full credit.

**(VIII)**

**CHINESE 2MA. Intermediate Mandarin Chinese - Mandarin Background Track. 5 Units.**

Authentic and pedagogically prepared materials are used to further develop communication in culturally, socially, and linguistically appropriate manners for students with initial experience in Mandarin Chinese. Conducted in Mandarin using the Pinyin Romanization system, traditional and simplified Chinese characters.

Prerequisite: CHINESE 1MC or CHINESE S1BC. CHINESE 1MC with a grade of C or better. CHINESE S1BC with a grade of C or better. Placement into CHINESE 2MA is also accepted.

Overlaps with CHINESE 2A, CHINESE 2DA.

Restriction: CHINESE 2MA and CHINESE 2DA and CHINESE 2A may not be taken for full credit.

**(VIII)****CHINESE 2MB. Intermediate Mandarin Chinese - Mandarin Background Track . 5 Units.**

Authentic and pedagogically prepared materials are used to further develop communication in culturally, socially, and linguistically appropriate manners for students with initial experience in Mandarin Chinese. Conducted in Mandarin using the Pinyin Romanization system, traditional and simplified Chinese characters.

Prerequisite: CHINESE 2MA. CHINESE 2MA with a grade of C or better. Placement into CHINESE 2MB is also accepted.

Overlaps with CHINESE 2B, CHINESE 2DB.

Restriction: CHINESE 2MB and CHINESE 2DB and CHINESE 2B may not be taken for full credit.

**(VIII)****CHINESE 2MC. Intermediate Mandarin Chinese - Mandarin Background Track . 5 Units.**

Authentic and pedagogically prepared materials are used to further develop communication in culturally, socially, and linguistically appropriate manners for students with initial experience in Mandarin Chinese. Conducted in Mandarin using the Pinyin Romanization system, traditional and simplified Chinese characters.

Prerequisite: CHINESE 2MB. CHINESE 2MB with a grade of C or better. Placement into CHINESE 2MC is also accepted.

Overlaps with CHINESE 2C, CHINESE 2DC.

Restriction: CHINESE 2MC and CHINESE 2DC and CHINESE 2C may not be taken for full credit.

**(VIII)****CHINESE 3A. Advanced Mandarin Chinese. 4 Units.**

A continuation of CHINESE 2A-CHINESE 2B-CHINESE 2C emphasizing conceptualization, self-expression and academic skills in Chinese. Authentic texts from modern Chinese prose and newspapers are used. Taught in Mandarin Chinese using both traditional and simplified forms of Chinese characters.

Prerequisite: CHINESE 2C or CHINESE 2DC or CHINESE 2MC. CHINESE 2C with a grade of C or better. CHINESE 2DC with a grade of C or better. CHINESE 2MC with a grade of C or better. Placement into CHINESE 3A is also accepted.

**(VIII)****CHINESE 3B. Advanced Mandarin Chinese. 4 Units.**

A continuation of CHINESE 2A-CHINESE 2B-CHINESE 2C emphasizing conceptualization, self-expression, and academic skills in Chinese. Authentic texts from modern Chinese prose and newspapers are used. Taught in Mandarin Chinese using both traditional and simplified forms of Chinese characters.

Prerequisite: CHINESE 3A. CHINESE 3A with a grade of C or better

**(VIII)****CHINESE 3C. Advanced Mandarin Chinese. 4 Units.**

A continuation of CHINESE 2A-CHINESE 2B-CHINESE 2C emphasizing conceptualization, self-expression, and academic skills in Chinese. Authentic texts from modern Chinese prose and newspapers are used. Taught in Mandarin Chinese using both traditional and simplified forms of Chinese characters.

Prerequisite: CHINESE 3B. CHINESE 3B with a grade of C or better

**(VIII)**

**CHINESE 10. Peer Tutoring Program . 1 Workload Unit.**

Tutoring Program in which advanced Chinese students provide assistance to students at a lower level. One hour of tutoring per week.

Grading Option: Workload Credit P/NP Only.

Repeatability: May be taken for credit 4 times.

**CHINESE 40. Topics in Professional Chinese. 4 Units.**

Designed for students with native or near native fluency in Chinese. Develops students' language learning to professional levels with cultural and contextual knowledge and with formal communication and presentation skills.

Prerequisite: CHINESE 3C. CHINESE 3C with a grade of C or better. Native speakers also accepted.

Repeatability: May be taken for credit 3 times as topics vary.

**(VIII)****CHINESE 100A. Classical Chinese. 4 Units.**

Introduction to classical Chinese grammar and vocabulary with emphasis on reading basic texts.

Prerequisite: CHINESE 3C or JAPANESE 3C or KOREAN 3C

**CHINESE 100B. Classical Chinese. 4 Units.**

Introduction to classical Chinese grammar and vocabulary with emphasis on reading basic texts.

Prerequisite: CHINESE 3C or JAPANESE 3C or KOREAN 3C

**CHINESE 100C. Classical Chinese. 4 Units.**

Introduction to classical Chinese grammar and vocabulary with emphasis on reading basic texts.

Prerequisite: CHINESE 3C or JAPANESE 3C or KOREAN 3C

**CHINESE 101A. Fourth-Year Mandarin Chinese. 4 Units.**

Continued emphasis on comprehension, grammar, and proficiency in reading, composition, and conversation through intensive study and analysis of specific literary texts.

Prerequisite: CHINESE 3C

**CHINESE 101B. Fourth-Year Mandarin Chinese. 4 Units.**

Continued emphasis on comprehension, grammar, and proficiency in reading, composition, and conversation through intensive study and analysis of specific literary texts.

Prerequisite: CHINESE 3C

**CHINESE 101C. Fourth-Year Mandarin Chinese. 4 Units.**

Continued emphasis on comprehension, grammar, and proficiency in reading, composition, and conversation through intensive study and analysis of specific literary texts.

Prerequisite: CHINESE 3C

**CHINESE 115. Topics in Chinese Literature: Advanced Texts. 4 Units.**

Designed for students with near-fluency in reading Chinese. Readings may include both literary and philosophical work by important writers, but the emphasis is on literary texts and writings that interpret those texts.

Prerequisite: Consent of instructor required to enroll.

Repeatability: Unlimited as topics vary.

**CHINESE 199. Independent Study. 1-4 Units.**

Investigation of special topics through directed reading in Chinese. Paper required.

Repeatability: May be taken for credit for 12 units.

**CHINESE 201. Readings in Traditional Chinese Narrative and Prose. 4 Units.**

Close reading of selected premodern prose texts such as historical narratives, novels, short stories, and essays.

Prerequisite: CHINESE 101C

Repeatability: Unlimited as topics vary.

**CHINESE 202. Readings in Traditional Chinese Poetry. 4 Units.**

Close readings of selected premodern poetic texts.

Prerequisite: CHINESE 100C

Repeatability: Unlimited as topics vary.

**CHINESE 203. Readings in Modern Chinese Literature. 4 Units.**

Close readings of selected modern literary texts.

Prerequisite: CHINESE 101C

Repeatability: Unlimited as topics vary.

**CHINESE 204. Readings in Chinese Literary and Cultural Theory. 4 Units.**

Close readings of selected texts in premodern criticism and theory.

Prerequisite: CHINESE 100C

Repeatability: Unlimited as topics vary.

**CHINESE 211A. Studies in Traditional Chinese Narrative and Prose. 4 Units.**

Two-quarter seminar in traditional Chinese narrative and prose, with topics varying from year to year.

Prerequisite: CHINESE 100C

Repeatability: Unlimited as topics vary.

**CHINESE 211B. Studies in Traditional Chinese Narrative and Prose. 4 Units.**

Two-quarter seminar in traditional Chinese narrative and prose, with topics varying from year to year.

Prerequisite: CHINESE 211A

Repeatability: Unlimited as topics vary.

**CHINESE 212A. Studies in Traditional Chinese Poetry. 4 Units.**

Two-quarter seminar in traditional Chinese poetry, with topics varying from year to year.

Prerequisite: CHINESE 100C

Repeatability: Unlimited as topics vary.

**CHINESE 212B. Studies in Traditional Chinese Poetry. 4 Units.**

Two-quarter seminar in traditional Chinese poetry, with topics varying from year to year.

Prerequisite: CHINESE 212A

Repeatability: Unlimited as topics vary.

**CHINESE 213A. Studies in Modern Chinese Literature. 4 Units.**

Two-quarter seminar in modern Chinese literature, with topics varying from year to year. Research paper required.

Prerequisite: CHINESE 100C

Repeatability: Unlimited as topics vary.

**CHINESE 213B. Studies in Modern Chinese Literature. 4 Units.**

Two-quarter seminar in modern Chinese literature, with topics varying from year to year. Research paper required.

Prerequisite: CHINESE 213A

Repeatability: Unlimited as topics vary.

**CHINESE 214. Studies in Chinese Literature and Cultural Theory. 4 Units.**

Seminar in Chinese literature and cultural theory, with topics varying from year to year. Research paper required.

Prerequisite: CHINESE 100C or CHINESE 101C

Repeatability: Unlimited as topics vary.

**CHINESE 230. Topics in Chinese Literature and Culture. 4 Units.**

Seminar in Chinese literature and culture, with topics varying from year to year. Research paper required.

Prerequisite: CHINESE 100C or CHINESE 101A

Repeatability: Unlimited as topics vary.

**CHINESE 290. Independent Study. 4 Units.**

Directed research on topic determined in consultation with faculty member. A term paper or project is required.

Repeatability: May be repeated for credit unlimited times.

**CHINESE 299. Dissertation Research. 4-12 Units.**

Dissertation research with Chinese faculty.

Prerequisite: Advancement to Ph.D. candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## Civil and Environmental Engineering (ENGRCEE)

### Courses

**ENGRCEE 11. Methods II: Probability and Statistics. 4 Units.**

Modeling and analysis of engineering problems under uncertainty. Engineering applications of probability and statistical concepts and methods.

(Design units: 0)

Prerequisite: (ENGRCEE 20 or EECS 10 or EECS 12 or ENGRMAE 10 or I&C SCI 31) and MATH 3A

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 20. Introduction to Computational Problem Solving. 4 Units.**

Introduction to computer programming within a numerical computing environment (MATLAB or similar) including types of data representation, graphical display of data, and development of modular programs with application to engineering analysis and problem solving.

(Design units: 1)

Corequisite: MATH 3A

Overlaps with BME 60B.

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 21. Computational Problem Solving. 4 Units.**

Engineering analysis and problem solving using MATLAB (or similar), including matrix algebra, solving systems of linear and nonlinear equations, numerical integration of ordinary differential equations (ODEs) and coupled ODEs, and analysis of numerical errors.

(Design units: 1)

Corequisite: MATH 3D

Prerequisite: (ENGRCEE 20 or BME 60B) and (MATH 3A or I&C SCI 6N)

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 30. Statics. 4 Units.**

Addition and resolution of forces, distributed forces, equivalent system of forces centroids, first moments, moments and products on inertia, equilibrium of rigid bodies, trusses, beams, cables. Course may be offered online.

(Design units: 0)

Corequisite: MATH 2D

Prerequisite: MATH 2D and PHYSICS 7C

Same as ENGR 30, ENGRMAE 30.

Restriction: School of Engineering students have first consideration for enrollment.

**ENGRCEE 60. Contemporary and Emerging Environmental Challenges. 4 Units.**

Introduces contemporary and emerging environmental challenges, illustrates links between human behavior, environmental policy, and engineering practices, examines policy options in the context of current institutions, and introduces tools and frameworks to reach sound economic, social, and environmental solutions.

(Design units: 0)

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**(III)****ENGRCEE 80. Dynamics. 4 Units.**

Introduction to the kinematics and dynamics of particles and rigid bodies. The Newton-Euler, Work/Energy, and Impulse/Momentum methods are explored for ascertaining the dynamics of particles and rigid bodies. An engineering design problem using these fundamental principles is also undertaken.

(Design units: 0.5)

Prerequisite: MATH 2D and PHYSICS 7C

Same as ENGR 80, ENGRMAE 80.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 81A. Civil Engineering Practicum I. 3 Units.**

Introduction to civil engineering through presentations on structural, environmental, water, and transportation systems. Introduction to graphics. Graphical visualization and communication using hand and computer sketching. Fundamentals of Computer Aided Design (CAD) using AutoCad. Laboratory sessions. Materials fee.

(Design units: 2)

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 81B. Civil Engineering Practicum II. 3 Units.**

Principles of surveying; fundamentals of Geographic Information Systems (GIS); introduction to the state-of-the-art and future areas of the profession, including applications of advanced technology and computers; Introduction to visualization and communication of design concepts; laboratory sessions. Materials fee.

(Design units: 1)

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 110. Methods III: Modeling, Economics, and Management. 4 Units.**

Analysis, modeling, and management of civil engineering systems. Statistics and system performance studies, probabilistic models and simulation, basic economics and capital investments, project elements and organization, managerial concepts and network technique, project scheduling. Emphasis on real-world examples. Laboratory sessions.

(Design units: 1)

Prerequisite: ENGRCEE 11

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 111. Methods IV: Systems Analysis and Decision-Making. 4 Units.**

Analysis and optimization for decision-making in civil and infrastructural systems. Topics include linear programming formulations and solution algorithms, network models, and logistical models. Emphasis is on project-level and managerial decision-making and selection from alternative designs.

(Design units: 1)

Prerequisite: (MATH 3A or I&C SCI 6N) and MATH 3D

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 114. GIS for Civil and Environmental Engineering. 4 Units.**

GIS for CEE provides an introduction to Geographic Information Systems (GIS) and their various applications in civil and environmental engineering. Topics include GIS data formats, data queries, spatial and attribute data, spatial data analysis, coordinate systems, and raster data analysis.

Concurrent with ENGRCEE 214.

**ENGRCEE 121. Transportation Systems I: Analysis and Design. 4 Units.**

Introduction to analysis and design of fundamental transportation system components, basic elements of geometric and pavement design, vehicle flow and elementary traffic, basic foundations of transportation planning and forecasting. Laboratory sessions.

(Design units: 2)

Prerequisite: ENGRCEE 11 and ENGRCEE 81A

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 122. Transportation Systems II: Operations and Control. 4 Units.**

Introduction to fundamentals of urban traffic engineering, including data collection, analysis, and design. Traffic engineering studies, traffic flow theory, traffic control devices, traffic signals, capacity and level of service analysis of freeways and urban streets. Laboratory sessions.

(Design units: 2)

Prerequisite: ENGRCEE 11 and ENGRCEE 121

Restriction: Civil Engineering Majors have first consideration for enrollment.

Concurrent with ENGRCEE 229A.

**ENGRCEE 123. Transportation Systems III: Planning and Forecasting. 4 Units.**

Theoretical foundations of transportation planning, design, and analysis methods. Theory and application of aggregate and disaggregate models for land use development, trip generation, destination, mode, and route choice. Transportation network analysis. Planning, design, and evaluation of system alternatives.

(Design units: 2)

Corequisite: ENGRCEE 110

Prerequisite: ENGRCEE 121

Restriction: Civil Engineering Majors have first consideration for enrollment.

Concurrent with ENGRCEE 223.

**ENGRCEE 124. Transportation Systems IV: Freeway Operations and Control. 4 Units.**

Fundamentals of traffic on urban freeways, including data collection analysis, and design. Traffic engineering studies, traffic flow theory, freeway traffic control devices, capacity, and level of service analysis of freeways and highways. Laboratory sessions.

(Design units: 2)

Prerequisite: ENGRCEE 121

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 125. Transportation and the Environment. 4 Units.**

Analysis of the impacts of motor vehicle transportation on the environment. Introduction to life cycle analysis applied to transportation. Basic economic tools for transportation externalities. Transportation planning, urban form, health, and the environment. Transportation sustainability.

(Design units: 0)

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 130. Soil Mechanics. 4 Units.**

Mechanics of soils, composition and classification of soils, compaction, compressibility and consolidation, shear strength, seepage, bearing capacity, lateral earth pressure, retaining walls, piles.

(Design units: 0)

Corequisite: ENGRCEE 130L

Prerequisite: ENGRCEE 150 and ENGRCEE 170

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 130L. Soil Mechanics Laboratory. 1 Unit.**

Laboratory procedures of soil testing for engineering problems. Materials fee.

(Design units: 0)

Corequisite: ENGRCEE 130

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 149. Introduction to Earthquake Engineering. 4 Units.**

Plate tectonics. Structural dynamics. Earthquake magnitude, intensity, and frequency. Seismic damage to structures. Earthquake load prediction including response spectra, normal mode, and direct integration techniques. The basis of building code earthquake load requirements for buildings.

(Design units: 2)

Prerequisite: ENGRCEE 11 and ENGRCEE 20 and ENGRCEE 151A

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 150. Mechanics of Materials. 4 Units.**

Stresses and strains, strain-stress diagrams, axial deformations, torsion, bending and shear stresses in beams, shear force and bending moment diagrams, combined stresses, principal stresses, Mohr's circle, deflection of beams, columns.

(Design units: 1)

Prerequisite: ENGRCEE 30 or ENGRMAE 30 or ENGR 30. ENGRCEE 30 with a grade of C- or better

Overlaps with ENGR 150, ENGRMAE 150.

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 150L. Mechanics of Materials Laboratory. 1 Unit.**

Experimental methods and fundamentals for mechanics of materials analysis. Materials fee.

(Design units: 0)

Prerequisite or corequisite: (ENGRCEE 30 or ENGRMAE 30 or ENGR 30) and ENGRCEE 150. ENGRCEE 30 with a grade of C- or better

Overlaps with ENGRMAE 150L.

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 151A. Structural Analysis. 4 Units.**

Fundamentals of structural analysis and loading. Deformation of statically determinate and indeterminate structures. Influence lines. Structural systems.

(Design units: 0)

Prerequisite: ENGRCEE 150 or ENGRMAE 150. ENGRCEE 150 with a grade of C- or better

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 151B. Structural Timber Design. 4 Units.**

Design of timber structures. Beams, columns, beam-columns, roof, and connections.

(Design units: 3)

Prerequisite: ENGRCEE 151A

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 151C. Reinforced Concrete Design. 4 Units.**

Ultimate strength design. Design of reinforced concrete beam sections. Design for shear and deflection. Design of columns. Design of isolated and combined footings. Laboratory sessions. Materials fee.

(Design units: 3)

Prerequisite: ENGRCEE 151A

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 152. Computer Methods in Structural Analysis and Design. 4 Units.**

Matrix techniques for indeterminate framed structures. Computer implementation using the stiffness method. Software packages for design of reinforced concrete, steel, and/or timber structures.

(Design units: 2)

Prerequisite: ENGRCEE 151C

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 155. Structural Steel Design. 4 Units.**

Design in steel of tension members, beams, columns, welded and bolted connections; eccentrically loaded and moment resistant joints; plate girders. Plastic design; load and resistance factor design. Composite construction; introduction to computer-aided design.

(Design units: 4)

Prerequisite: ENGRCEE 151A

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 156. Foundation Design. 4 Units.**

Applications of soil mechanics principles to the analysis and design of shallow foundations, retaining walls, pile foundations, and braced cuts. Design criteria: bearing capacity, working loads and tolerable settlements, structural integrity of the foundation element. Damage from construction operations.

(Design units: 3)

Prerequisite: ENGRCEE 130 and ENGRCEE 151C

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 160. Environmental Processes. 4 Units.**

Introduction to environmental processes in air and water, mass balances, and transport phenomena. Fundamentals of water-quality engineering including water and wastewater treatment.

(Design units: 1)

Prerequisite: (CHEM 1B or CHEM H2B) and ENGRCEE 170

Restriction: Civil Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 162. Introduction to Environmental Chemistry. 4 Units.**

Basic concepts from general, physical, and analytical chemistry as they relate to environmental engineering. Particular emphasis on the fundamentals of equilibrium and kinetics as they apply to acid-base chemistry, gas solubility, and redox reactions. Laboratory sessions. Materials fee.

(Design units: 0)

Prerequisite: (ENGR 1A or CHEM 1A or CHEM H2A) and (CHEM 1B or CHEM H2B) and (CHEM 1LC or CHEM 1LE or CHEM H2LB or CHEM M2LB) and (CHEM 51A or CHEM H52A)

Restriction: Chemical Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 163. Wastewater Treatment Process Design. 4 Units.**

Design of biological treatment processes. Topics include attached and suspended growth, aeration, anaerobic systems, process control, and economics. Design projects included. Materials fee.

(Design units: 4)

Prerequisite: ENGRCEE 160

Restriction: Civil Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 164. Carbon and Energy Footprint Analysis. 4 Units.**

Process design for wastewater treatment. Mass- and energy-balance analysis applied to water and wastewater treatment systems. Case studies include analysis of water supply, treatment, reclamation, and reuse.

(Design units: 2)

Prerequisite: ENGRCEE 160

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

Concurrent with ENGRCEE 264.

**ENGRCEE 165. Physical-Chemical Treatment Processes. 4 Units.**

Theory and dynamics of physical and chemical separation processes in water and wastewater treatment. Topics include coagulation, sedimentation, filtration, gas-transfer, membrane separations, and adsorption.

(Design units: 2)

Prerequisite: ENGRCEE 160 and (ENGRMAE 91 or CBE 40C)

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

Concurrent with ENGRCEE 265.

**ENGRCEE 169. Environmental Microbiology for Engineers. 4 Units.**

Fundamental and applied principles of microbiology. Structures and functions of microorganisms, the microbiology of water, wastewater and soil used in environmental engineering, and the impact of microorganisms on human and environmental health.

(Design units: 0)

Prerequisite: ENGRCEE 160

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 170. Introduction to Fluid Mechanics. 4 Units.**

Thermodynamic and mechanical fluid properties; fluid statics; control volume and differential approaches for mass, momentum, and energy; dimensional analysis and similarity.

(Design units: 1)

Corequisite: MATH 2E and ENGRCEE 20

Prerequisite: PHYSICS 7C

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 171. Water Resources Engineering. 4 Units.**

Principles governing the analysis and design of water resource systems including pressurized pipelines, pipe networks, channels, and ground water. Coverage of fluid mass, momentum and energy conservation, flow resistance, and related laboratory measurements in different systems. Materials fee.

(Design units: 2)

Prerequisite: ENGRCEE 170

Restriction: Chemical Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 172. Groundwater Hydrology. 4 Units.**

Topics include conservation of fluid mass, storage properties of porous media, matrix compressibility, boundary conditions, flow nets, well hydraulics, groundwater chemistry, and solute transport. Design projects and computer applications included.

(Design units: 2)

Prerequisite: ENGRCEE 170 or ENGRMAE 130A or CBE 120A

Restriction: Civil Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

Concurrent with ENGRCEE 272.

**ENGRCEE 173. Watershed Modeling. 4 Units.**

Basic principles of hydrologic modeling are practiced. Concepts of watershed delineation, land use change impact, design studies, and GIS tools are discussed. Focus on the USACE (HEC) software tools (HEC-HMS, and HEC-RAS) along with their associated GIS interfaces.

(Design units: 1)

Prerequisite: ENGRCEE 170 and ENGRCEE 176

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

Concurrent with ENGRCEE 273.

**ENGRCEE 176. Hydrology. 4 Units.**

Elements of the hydrologic cycle including precipitation, infiltration, evapotranspiration, ground water, and runoff. Unit Hydrograph theory and routing methods. Introduction to precipitation/runoff relationship and watershed modeling. Statistical methods and flood frequency analysis.

(Design units: 2)

Prerequisite: ENGRCEE 170 or ENGRMAE 130A

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

Concurrent with ENGRCEE 276.

**ENGRCEE 178. Fluid Mechanics of Open Channels. 4 Units.**

Fundamentals of fluid motion in open channels. Navier-Stokes equations and one-dimensional momentum and energy principles. Topics include rapidly varied flow, flow resistance and turbulence, gradually varied flow, unsteady flow, and computational methods for channel flow modeling.

(Design units: 1)

Prerequisite: (ENGRCEE 20 or BME 60B or ENGRMAE 10) and (ENGRCEE 170 or ENGRMAE 130A or CBEMS 125A)

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 181A. Senior Design Practicum I. 2 Units.**

Team designs land development project including infrastructural, environmental, circulation aspects. Focus on traffic impact studies, design of roads, geometry, signals, geotechnical and hydrological analysis, design of structural elements, economic analysis. Oral/Written interim and final design reports. Laboratory sessions.

(Design units: 1)

Prerequisite: ENGRCEE 81A and ENGRCEE 81B and ENGRCEE 110 and (ENGRCEE 121 or ENGRCEE 151C or ENGRCEE 162 or ENGRCEE 171). ENGRCEE 181A and ENGRCEE 181B and ENGRCEE 181C must be taken in the same academic year.

Restriction: Seniors only. Civil Engineering Majors only. Environmental Engineering Majors only.

**ENGRCEE 181B. Senior Design Practicum II. 2 Units.**

Team designs land development project including infrastructural, environmental, circulation aspects. Focus on traffic impact studies, design of roads, geometry, signals, geotechnical and hydrological analysis, design of structural elements, economic analysis. Oral/Written interim and final design reports. Laboratory sessions.

(Design units: 2)

Corequisite: ENGRCEE 130

Prerequisite: ENGRCEE 181A. CEE 181A and ENGRCEE 181B and ENGRCEE 181C must be taken in the same academic year.

Grading Option: In Progress (Letter Grade with P/NP).

Restriction: Seniors only. Civil Engineering Majors only. Environmental Engineering Majors only.

**ENGRCEE 181C. Senior Design Practicum III. 2 Units.**

Team designs land development project including infrastructural, environmental, circulation aspects. Focus on traffic impact studies, design of roads, geometry, signals, geotechnical and hydrological analysis, design of structural elements, economic analysis. Oral/Written interim and final design reports. Laboratory sessions.

(Design units: 2)

Prerequisite: ENGRCEE 181B. ENGRCEE 181A and CEE 181B and ENGRCEE 181C must be taken in the same academic year.

Restriction: Seniors only. Civil Engineering Majors only. Environmental Engineering Majors only.

**ENGRCEE 195. Special Topics in Civil and Environmental Engineering. 1-4 Units.**

Studies in selected areas of Civil and Environmental Engineering. Topics addressed vary each quarter.

(Design units: 1-4)

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**ENGRCEE 198. Group Study. 1-4 Units.**

Group study of selected topics in Civil and Environmental Engineering.

(Design units: 1-4)

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**ENGRCEE 199. Individual Study. 1-4 Units.**

For undergraduate Engineering majors in supervised but independent reading, research, or design. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Repeatability: May be taken for credit for 8 units.

**ENGRCEE 199P. Individual Study. 1-4 Units.**

Supervised independent reading, research, or design for undergraduate Engineering majors. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**ENGRCEE 214. GIS for Civil and Environmental Engineering. 4 Units.**

GIS for CEE provides an introduction to Geographic Information Systems (GIS) and their various applications in civil and environmental engineering. Topics include GIS data formats, data queries, spatial and attribute data, spatial data analysis, coordinate systems, raster data analysis.

Concurrent with ENGRCEE 114.

**ENGRCEE 220A. Travel Demand Analysis I. 4 Units.**

Fundamentals of transportation systems analysis. Theoretical aspects of travel demand. Travel behavior. Modeling of performance characteristics and costs of transportation modes. In-depth presentation of travel demand modeling techniques. Development of travel choice models including mode, route, and destination choice. Equilibrium.

Restriction: Graduate students only.

**ENGRCEE 220B. Travel Demand Analysis II. 4 Units.**

Methods of discrete choice analysis and their applications in the modeling of transportation systems. Emphasis on the development of a sound understanding of theoretical aspects of discrete choice modeling that are useful in many applications in travel demand analysis.

Prerequisite: ENGRCEE 220A

Restriction: Graduate students only.

**ENGRCEE 220C. Travel Demand Analysis III: Activity-based Approaches. 4 Units.**

The methodological underpinnings of activity-based travel demand modeling. Presents methodologies within the context of a generalization of discrete choice modeling approaches, emphasizing the distinctions that separate these two approaches and presenting appropriate mathematical and statistical tools to address these distinctions.

Prerequisite: ENGRCEE 220A

Restriction: Graduate students only.

**ENGRCEE 221A. Transportation Systems Analysis I. 4 Units.**

Introduction to mathematical methods and models to address logistics and urban transportation problems. Techniques include stochastic models, queueing theory, linear programming, and introductory non-linear optimization.

Restriction: Graduate students only.

**ENGRCEE 221B. Transportation Systems Analysis II. 4 Units.**

Advanced mathematical methods and models to address logistics and urban transportation problems. Topics include network flows, advanced optimization techniques, network models, and heuristic algorithms.

Prerequisite: ENGRCEE 221A

Restriction: Graduate students only.

**ENGRCEE 222. Transit Systems Planning. 4 Units.**

Planning methods for public transportation in urban areas. Technological and operating characteristics of vehicles, facilities, and systems. Short-range planning techniques: data collection and analysis, demand analysis, mode choice, operational strategies, financial analysis. Design of systems to improve performance.

Restriction: Graduate students only.

**ENGRCEE 223. Transportation Systems III: Planning and Forecasting. 4 Units.**

Theoretical foundations of transportation planning, design, and analysis methods. Theory and application of aggregate and disaggregate models for land use development, trip generation, destination, mode, and route choice. Transportation network analysis. Planning, design, and evaluation of system alternatives.

Restriction: Graduate students only.

Concurrent with ENGRCEE 123.

**ENGRCEE 224A. Transportation Data Analysis I. 4 Units.**

Statistical analysis of transportation data sources. Analysis of categorical and ordinal data. Regression and advanced multivariate analysis methods such as discriminant analysis, canonical correlation, and factor analysis. Sampling techniques, sample error and bias, survey instrument design.

Restriction: Graduate students only.

**ENGRCEE 225B. Transportation Planning Models II. 4 Units.**

Design and application of comprehensive transportation models. Network development, demand modeling, and equilibrium assignment. Model calibration, validation, prediction, and evaluation. Regional modeling, site impact analysis, and circulation studies. Design of transportation alternatives.

Prerequisite: ENGRCEE 223

Restriction: Graduate students only.

**ENGRCEE 226A. Traffic Flow Theory I. 4 Units.**

Traffic measurement and fundamental speed-density-flow relationships. Kinematic models. Shock waves. Statistical-kinetic theory of traffic. Introductory car-following principles and stability. Gap acceptance. Platoon dispersion. Two-fluid model. Queueing process. Multi-regime and catastrophe models. Higher-order continuum models. Microscopic and macroscopic simulation.

Restriction: Graduate students only.

**ENGRCEE 226B. Traffic Flow Theory II. 4 Units.**

Advanced mathematical analysis of vehicular flow. Detailed treatise on car-following models. Fourier and Laplace analysis of stability problems. Perturbation analysis. Derivation of macroscopic traffic flow relationships from microscopic considerations. Advanced hydrodynamic theory.

Prerequisite: ENGRCEE 226A

Restriction: Graduate students only.

**ENGRCEE 228A. Urban Transportation Networks I. 4 Units.**

Analytical approaches and algorithms to the formulation and solution of the equilibrium assignment problem for transportation networks. Emphasis on user equilibrium (UE) comparison with system optimal, mathematical programming formulation, supply functions, estimation. Estimating origin-destination matrices, network design problems.

Prerequisite: ENGRCEE 220A

Restriction: Graduate students only.

**ENGRCEE 228B. Urban Transportation Networks II. 4 Units.**

Advanced analysis, optimization, and modeling of transportation networks. Topics include advanced static and dynamic traffic assignment algorithms, linear and nonlinear multi-commodity network flow optimization, network simplex, and network control problems.

Prerequisite: ENGRCEE 221A and ENGRCEE 228A

Restriction: Graduate students only.

**ENGRCEE 229A. Traffic Systems Operations and Control I. 4 Units.**

Introduction to operation, control, and analysis of arterial and freeway traffic systems. Control concepts, traffic stream principles, detectors, local controllers, system masters, traffic signal and ramp metering timing principles, traffic measurement technologies, traffic delay principles.

Restriction: Graduate students only.

Concurrent with ENGRCEE 122.

**ENGRCEE 229B. Traffic Systems Operations and Control II. 4 Units.**

Advanced topics related to operation, control, and analysis of arterial and freeway traffic systems. Control concepts, traffic stream principles, detectors, local controllers, system masters, traffic signal and ramp metering timing principles.

Prerequisite: ENGRCEE 229A

Restriction: Graduate students only.

**ENGRCEE 231. Foundation Engineering. 4 Units.**

Essentials for design and analysis of structural members that transmit superstructure loads to the ground. Topics include subsurface investigations, excavation, dewatering, bracing, footing, mat foundations, piles and pile foundations, caissons and cofferdams, other special foundations.

Restriction: Graduate students only.

**ENGRCEE 232. Geotech Earthquake Engineering. 4 Units.**

In-situ and laboratory determination of dynamic soil properties, liquefaction of soil, cyclic softening of clays, seismic compression and settlement analyses, ground improvement methods, seismic slope stability, introduction to soil structure interaction.

Restriction: Graduate students only.

**ENGRCEE 240. High Performance Materials. 4 Units.**

Part I: Linear and nonlinear fracture mechanics, methodology, real-world case studies; Part II: Composite material toughening, underlying micromechanics, materials engineering towards microstructure tailoring and new material design approaches; Part III: Emerging high-performance engineering materials for safety, energy and the environment.

Restriction: Graduate students only.

**ENGRCEE 242. Advanced Strength of Materials. 4 Units.**

Beams on elastic foundations. Combined axial and lateral loads. Curved beams. Unsymmetric bending. Shear center. Stresses and strains. Basic equations for theory of elasticity. Energy principles. Theory of torsion. Combined bending and torsion.

Restriction: Graduate students only.

**ENGRCEE 243. Mechanics of Composite Materials. 4 Units.**

Stress-strain relationship for orthotropic materials; invariant properties of an orthotropic lamina; biaxial strength theory for an orthotropic lamina; mechanics of materials approach to stiffness; elasticity approach to stiffness; classical lamination theory; strength of laminates; statistical theory of fatigue damage.

Restriction: Graduate students only.

**ENGRCEE 247. Structural Dynamics. 4 Units.**

Vibration of discrete and continuous mass elastic systems. Isolation and transmissibility. Dynamic recording instruments. Introduction to nonlinear theory of vibration. Response of structures to earthquake, traffic, and wind loads. Response spectra concepts. Normal mode analysis. Numerical integration techniques.

Restriction: Graduate students only.

**ENGRCEE 249. Earthquake Engineering. 4 Units.**

Earthquake magnitude, intensity, and frequency. Seismic damage to structures. Earthquake load prediction including response spectra, normal mode, and direct integration techniques. The basis of building code earthquake load requirements for buildings. Seismic response of special structures. Lifeline engineering.

Restriction: Graduate students only.

**ENGRCEE 250. Finite Element Method in Structural Engineering. 4 Units.**

Finite element concepts in structural engineering including variational formulations, shape functions, elements assembly, convergence and computer programming. Stiffness of truss, beam, and frame members, two- and three-dimensional solids, plate and shell elements. Static, vibration, stability, and inelastic analysis.

Restriction: Graduate students only.

**ENGRCEE 252. Multiscale Modeling of Materials and Structures. 4 Units.**

Introduction to modeling materials and structures across length.

Restriction: Graduate students only.

**ENGRCEE 254. Advanced Reinforced Concrete Behavior and Design. 4 Units.**

Flexural strength of reinforced concrete elements. Flexural ductility of unconfined and confined members with axial loads. Shear and torsional behaviors. Strength of reinforced concrete ductile frames and shear walls. Reinforced concrete detailing.

Restriction: Graduate students only.

**ENGRCEE 255. Advanced Behavior and Design of Steel Structures. 4 Units.**

Advanced principles of structural steel design. Analysis and design of beam-column members, braced and unbraced frames for buildings, and plate girders. Review of seismic design provisions. Design of connections.

Restriction: Graduate students only.

**ENGRCEE 258. Earthquake Resistant Structural Design. 4 Units.**

Objectives of seismic design. Cyclic load-distortion characteristics of typical structural elements. Desirable structural form. Ductility and methods of achieving it. Use of energy dissipators. Project involving design of multistory, multibay rigid-jointed plane frame.

Restriction: Graduate students only.

**ENGRCEE 260. Desalination. 4 Units.**

Introduction of state of technology, costs and benefits, environmental issues, and implementation issues related to desalination. Emphasis on membrane processes and biofouling prevention.

Restriction: Graduate students only.

**ENGRCEE 261. Applied Environmental Microbiology. 4 Units.**

Microbes in the environment and their impact on human interactions. Microbiological application in solving environmental engineering problems.

Restriction: Graduate students only.

**ENGRCEE 262. Environmental Chemistry II. 4 Units.**

Advanced concepts from physical and organic chemistry as they relate to environmental engineering. Emphasis on equilibrium and kinetics as they apply to redox reactions, coordination, absorption, gas phase reactions, and ion exchange.

Restriction: Graduate students only.

**ENGRCEE 263. Advanced Biological Treatment Processes. 4 Units.**

Analysis of biological processes in natural and engineered systems. Biological treatment processes, both aerobic and anaerobic, with emphasis on suspended growth systems including design consideration. Containment degradation or control covered. Includes laboratory on molecular tools used in wastewater treatment.

Restriction: Graduate students only.

**ENGRCEE 264. Carbon and Energy Footprint Analysis. 4 Units.**

Process design for wastewater treatment. Mass- and energy- balance analysis applied to water and wastewater treatment systems. Case studies include analysis of water supply, treatment, reclamation, and reuse.

Restriction: Graduate students only.

Concurrent with ENGRCEE 164.

**ENGRCEE 265. Physical-Chemical Treatment Processes. 4 Units.**

Theory and dynamics of physical and chemical separation processes in water and wastewater treatment. Topics include coagulation, sedimentation, filtration, gas transfer, membrane separations, and absorption.

Restriction: Graduate students only.

Concurrent with ENGRCEE 165.

**ENGRCEE 266. Drinking Water and Wastewater Biotechnology. 4 Units.**

Water and wastewater microbiology. Engineering principles, molecular aspects, and overview of microorganisms of importance to public health. Topics include aerobic and anaerobic wastewater treatment and disinfection of pathogens in water, wastewaters, and biosolids.

Restriction: Graduate students only.

**ENGRCEE 267. Energy, Climate Change, and Urban Air Quality. 4 Units.**

An introduction to the connection between energy, climate change, and urban air quality. It will focus on air quality and climate implications of energy choices, bringing light to the most important and time-relevant issues.

Restriction: Graduate students only.

**ENGRCEE 269. Beach Dynamics. 4 Units.**

Coastal erosion in California, human and natural influences on southern California beaches, and present-day challenges. Littoral cells and sediment budgets. Water wave theory. Littoral sediment transport and shoreline change modeling. Shoreline stabilization using green and gray infrastructure.

Restriction: Graduate students only.

**ENGRCEE 270. Flood Risk and Modeling. 4 Units.**

Global and national trends in flooding and related impacts including disasters; flood risk management; theory and numerical methods for flood inundation modeling; flood risk communication strategies including flood hazard visualizations.

**ENGRCEE 271. Flow in Unsaturated Porous Media. 4 Units.**

Fluid flow in the unsaturated zone (zone of aeration) of the subsurface. Soil-water physics, flow in regional groundwater systems, miscible displacement, mathematical modeling techniques.

Restriction: Graduate students only.

**ENGRCEE 272. Groundwater Hydrology. 4 Units.**

Topics include conservation of fluid mass, storage properties of porous media, matrix compressibility, boundary conditions, flow nets, well hydraulics, groundwater chemistry, and solute transport. Includes introduction to advanced topics in porous media. Design projects and computer applications included.

Restriction: Graduate students only.

Concurrent with ENGRCEE 172.

**ENGRCEE 273. Watershed Modeling. 4 Units.**

Basic principles of hydrologic modeling are practiced. Concepts of watershed delineation, land use change impact, design studies, and GIS tools are discussed. Focus on the USACE (HEC) software tools (HEC-HMS and HEC-RAS) along with their associated GIS interfaces.

Restriction: Graduate students only.

Concurrent with ENGRCEE 173.

**ENGRCEE 274. Climate Data Analysis. 4 Units.**

Trend analysis; statistical indices for diagnosing and detecting changes in extremes; nonstationary processes; extreme value analysis; multivariate extreme value methods; tail dependence estimation; uncertainties in observed and projected changes in climate extremes.

**ENGRCEE 275. Topics in Coastal Engineering. 4 Units.**

Linear wave theory. Wave properties: particle kinematics, energy propagation, shoaling, refraction, reflection, diffraction, and breaking. Wave statistics and spectra. Selected topics from: design of coastal structures; harbor engineering; littoral transport and shoreline morphology; and hydrodynamics of estuaries.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ENGRCEE 276. Hydrology. 4 Units.**

Elements of the hydrologic cycle including precipitation, infiltration, evapotranspiration, ground water, and runoff. Unit Hydrograph theory and routing methods. Introduction to precipitation/runoff relationship and watershed modeling. Statistical methods and flood frequency analysis. Discussion section covers advanced topics.

Restriction: Graduate students only.

Concurrent with ENGRCEE 176.

**ENGRCEE 277. Hydrologic Transport Fundamentals. 4 Units.**

Process description, mathematical and numerical modeling of transport processes in surface and ground water. Topics include advection, molecular diffusion, Taylor dispersion, mechanical dispersion in porous media, shear flow dispersion in channels, and turbulent jets and plumes.

Restriction: Graduate students only.

**ENGRCEE 279. Environmental Transport Modeling. 4 Units.**

Computational modeling of multi-dimensional flow and scalar transport problems in surface and ground water. Topics include mathematical model formulation, numerical method selection, serial and parallel implementation, model verification and validation.

Restriction: Graduate students only.

**ENGRCEE 281. Structural Reliability. 4 Units.**

Applications of probability theory to reliability analysis of engineering structures. Theory of structural reliability. Estimation of static random loads. Reliability analysis of structural components and system. Monte Carlo simulation.

Restriction: Graduate students only.

**ENGRCEE 283. Mathematical Methods in Engineering Analysis. 4 Units.**

Matrices; vector calculus; eigenvalue problems; Fourier analysis; partial differential equations; special functions; numerical analysis; finite difference method.

**ENGRCEE 289. Analysis of Hydrologic Systems. 4 Units.**

Application of systems theory in hydrologic, land surface, biogeochemical modeling. Design, identification, and calibration of conceptual models. Principles of dynamic systems, modeling approaches, theory of linear systems, mathematical concepts of differential calculus, theoretical concepts of parameter estimation and optimization theory.

**ENGRCEE 290. Merging Models and Data. 4 Units.**

Introduction to optimization and data assimilation methods for model calibration and uncertainty quantification. Local, global and multi-method search. Bayesian analysis using Monte Carlo simulation with Random Walk Metropolis, and adaptive samplers. Filtering methods for recursive inference. Illustration using environmental models.

Restriction: Graduate students only.

**ENGRCEE 291. Hydrologic Remote Sensing. 4 Units.**

Introduction to principles of remote sensing and application in hydrology. Review of sensor systems, thermal and multispectral image processing, and image classification. Examples from remote sensing of hydrologic processes such as precipitation, soil moisture, and vegetation are covered.

Prerequisite: ENGRCEE 276

Restriction: Graduate students only.

**ENGRCEE 292. Wavelets in Hydrology, Engineering, and Geoscience. 4 Units.**

Multiscale analysis of hydrologic, engineering, and earth system processes; energy decomposition in the time-frequency domain via wavelets; applications to fluid flows, climate and mechanical signals for feature extraction, trend analysis, coherent structures, and upscaling/downscaling.

Restriction: Graduate students only.

**ENGRCEE 295. Seminars in Engineering. 1-4 Units.**

Seminars scheduled each year by individual faculty in major field of interest.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ENGRCEE 296. Master of Science Thesis Research. 1-16 Units.**

Individual research or investigation conducted in preparation of the thesis required for the M.S. degree in Engineering.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ENGRCEE 297. Doctor of Philosophy Dissertation Research. 1-16 Units.**

Individual research or investigation conducted in preparation for the dissertation required for the Ph.D. degree in Engineering.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ENGRCEE 298. Special Topics in Civil Engineering. 1-4 Units.**

Presentation of advanced topics and special research areas in civil engineering.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ENGRCEE 299. Individual Research. 1-16 Units.**

Individual research or investigation under the direction of an individual faculty member.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Classics (CLASSIC)

### Courses

**CLASSIC 10. Scientific and Specialized Terminology. 4 Units.**

A study of English terms derived from Greek and Latin and important to contemporary medicine, science, and other professions, with emphasis on development of word-building skills. No prior knowledge of Greek or Latin required.

**CLASSIC 36A. The Formation of Ancient Greek Society: Early Greece. 4 Units.**

A survey of ancient Greek civilization from its origins in the Bronze Age to the mid-Archaic period. Examines political and social history, as well as literature, art, religion, and archaeological remains.

Same as HISTORY 36A.

(IV)

**CLASSIC 36B. The Formation of Ancient Greek Society: Late Archaic and Classical Greece. 4 Units.**

A survey of ancient Greek civilization from the Late Archaic period to the Classical period. Focuses on major institutions and cultural phenomena as seen through the study of ancient Greek literature, history, archaeology, and religion.

Same as HISTORY 36B.

(IV)

**CLASSIC 36C. The Formation of Ancient Greek Society: Fourth-Century and Hellenistic Greece. 4 Units.**

A survey of ancient Greek civilization from the fourth century BCE through to the Hellenistic period. Focuses on major institutions and cultural phenomena as seen through the study of ancient Greek literature, history, archaeology, and religion.

Same as HISTORY 36C.

(IV)

**CLASSIC 37A. The Formation of Ancient Roman Society: Origins to Roman Republic. 4 Units.**

A survey of the development of Roman civilization from its eighth century BCE beginnings to the civil wars of the first century BCE. Examines political and social history, as well as literature, art, architecture, and religion.

Same as HISTORY 37A.

(IV)

**CLASSIC 37B. The Formation of Ancient Roman Society: Roman Empire. 4 Units.**

A survey of Roman civilization from Augustus's consolidation of power following the civil wars of the first century BCE to the crisis of the third century CE. Includes social history, literature, art, architecture, and religion.

Same as HISTORY 37B.

(IV)

**CLASSIC 37C. The Formation of Ancient Roman Society: The Fall of Rome. 4 Units.**

A survey of Roman civilization from the crisis of the third century CE to the so-called "fall of Rome" in 476 CE. Examines political and social history, as well as literature, art, architecture, and religion.

Same as HISTORY 37C.

(IV)

**CLASSIC 45A. Classical Mythology: The Gods. 4 Units.**

An overview of the main myths of the gods of the ancient Greeks and Romans and their influence in contemporary and later literature and art. Includes readings from both ancient and modern sources.

(IV)

**CLASSIC 45B. Classical Mythology: The Heroes. 4 Units.**

An overview of the main myths of the heroes of the ancient Greeks and Romans and their influence in contemporary and later literature and art. Includes readings from both ancient and modern sources.

(IV)

**CLASSIC 45C. Classical Mythology: Ancient and Modern Perspectives of Classical Mythology. 4 Units.**

Detailed examination of key Greek and Roman myths, their interpretations, and the influence they have exerted on literature, art, and popular culture in subsequent periods.

(IV)

**CLASSIC 99. Special Studies in Classics. 1-4 Units.**

Lower-division level independent research with Classics faculty.

Repeatability: May be repeated for credit unlimited times.

**CLASSIC 140. Classics and History: The Ancient World. 4 Units.**

Selected topics in society and culture of the Graeco-Roman world. Readings in translation.

Repeatability: Unlimited as topics vary.

**CLASSIC 150. Classical Mythology. 4 Units.**

Selected myths and legends as used in Classical literature, and their modern interpretations.

**CLASSIC 160. Topics in Classical Literature in English Translation. 4 Units.**

Studies in selected areas of Classical literature. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**CLASSIC 160W. Topics in Classical Literature in English Translation. 4 Units.**

Studies in selected areas of Classical literature. Topics addressed vary each quarter.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

(Ib)

**CLASSIC 166. Topics in Classical Reception. 4 Units.**

Studies in selected areas of Classical reception. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**CLASSIC 170. Topics in Classical Civilization. 4 Units.**

Studies in selected areas of Classical civilization. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**CLASSIC 176. International Studies and the Classics. 4 Units.**

Develops a broader understanding of the formation of different cultures and countries of Classical times and their impact on the modern world.

Repeatability: Unlimited as topics vary.

**CLASSIC 192A. Senior Capstone. 2 Units.**

Under the guidance of a faculty mentor, majors design and execute a senior project. This project may be a research paper, dramatic production, school curriculum, etc. All projects must be approved by the faculty mentor.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Grading Option: In Progress (Letter Grade with P/NP).

**CLASSIC 192B. Senior Capstone. 4 Units.**

Under the guidance of a faculty mentor, majors design and execute a senior project. This project may be a research paper, dramatic production, school curriculum, etc. All projects must be approved by the faculty mentor.

Prerequisite: CLASSIC 192A. Satisfactory completion of the Lower-Division Writing requirement.

**CLASSIC 198. Directed Group Study. 4 Units.**

Special topics in Classical studies through directed reading and research.

Repeatability: May be repeated for credit unlimited times.

**CLASSIC 199. Independent Study in Classics. 1-4 Units.**

Independent research with Classics faculty.

Repeatability: May be repeated for credit unlimited times.

**CLASSIC 280. Independent Study. 4-12 Units.**

Supervised independent research. Subject varies.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CLASSIC 290. Research in Classics. 4-12 Units.**

Research under Classics faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CLASSIC 299. Dissertation Research. 4-12 Units.**

Dissertation research with Classics faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CLASSIC 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Cognitive Sciences (COGS)

### Courses

**COGS 14P. Python for Cognitive Science and Neuroscience Research. 4 Units.**

Introduces Python for data analysis and modeling encountered in cognitive science and neuroscience. Topics include data structures, execution control, graphic visualization, and interaction with sound and display interfaces. Application in statistical analysis, model simulation, and stimulus presentation and experimental control.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**COGS 109. Cognitive Sciences Research Seminar. 4 Units.**

Read and discuss examples of the primary research leading to the concepts covered in Psychology Fundamentals. Focuses on how this research is conducted and how inferences from it are drawn.

Prerequisite or corequisite: PSYC 9A

Restriction: Cognitive Sciences Majors only.

**COGS 110. Quantitative Methods for Cognitive Sciences Research. 4 Units.**

Basics of quantitative methods used in cognitive sciences research focusing on linear algebra, Fourier analysis, multivariate statistics, and signal detection theory. Examples drawn from models and methods used in cognitive sciences research with practical examples.

Prerequisite: MATH 2B and STAT 7 and (PSYC 114M or ICS 31)

Restriction: Cognitive Sciences majors only.

## Community and Environmental Medicine (CEM)

## Comparative Literature (COM LIT)

### Courses

**COM LIT 3. Just Reading: Developing the Reading Experience . 4 Units.**

Develops the reading experience apart from writing. Develops tools for sustained attention in reading practice across a wide range of genres and media from across the globe. Students learn to appreciate elements of reading experience such as attention and perplexity.

(IV and VIII ).

**COM LIT 8. Travels in Comparative Literature. 4 Units.**

Readings in English and in English translation on such topics as love, war, cities, travel writing, politics, fantasy and science fiction, violence.

Repeatability: Unlimited as topics vary.

(IV)

**COM LIT 9. Introduction to Multiculturalism. 4 Units.**

Various themes and forms of literary and cultural production within a multicultural framework, including African American, Asian American, Chicano/Latino, and Native American literatures and cultures.

Repeatability: Unlimited as topics vary.

(IV, VII)

**COM LIT 10. Topics in World Literature. 4 Units.**

Introduction to texts from across the globe and from different historical periods. Readings in English and English translation.

Repeatability: Unlimited as topics vary.

(IV and VIII ).

**COM LIT 60A. World Literature. 4 Units.**

An introduction to the comparative study of literatures and cultures in a global context. Studies literary texts and other media across the borders of various cultures, historical periods, and traditions. All texts are read in English translation.

(IV and VIII ).

**COM LIT 60B. Reading with Theory. 4 Units.**

Introduction to theory and methods of literary and cultural criticism in a global context. Students read theoretical approaches to literature, culture, and ideas. Marx and Freud, e.g., may be studied alongside readings in narrative poetry, film, song lyrics, novel.

(IV, VIII)

**COM LIT 60C. Cultural Studies. 4 Units.**

Introduces students to a variety of cultural practices (literature, blogs, films, radio, comics) from across the globe. Focuses on the ways that context, genre, and medium (e.g., written, visual, oral) affect how these practices are produced, circulated, and received.

(IV, VIII)

**COM LIT 100A. Nations, Regions, and Beyond. 4 Units.**

Intensive study of national and regional cultural and literary traditions from across the globe, among them the literary and cultural production of the Middle East, Africa, Europe, the Americas, and Asia.

Repeatability: Unlimited as topics vary.

**COM LIT 101W. An Introduction to Translation Studies. 4 Units.**

Focuses on theories of translation and on how these theories help students understand the role of translation in the world. Students develop a critical vocabulary for discussing translation in multiple linguistic traditions and complete a final translation project.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

**COM LIT 102. Comparative Studies in Literature and Theory. 4 Units.**

In-depth discussion of special topics.

Repeatability: Unlimited as topics vary.

**COM LIT 102W. Comparative Studies in Literature and Theory. 4 Units.**

In-depth discussion of special topics.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

(Ib)

**COM LIT 105. Topics in Comparative Multiculturalism. 4 Units.**

Treats the literatures and cultures of one or more minority groups in California and the United States, including African Americans, Asian Americans, Chicano/Latinos, and Native Americans, and their relations to other national literatures.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: May be repeated for credit unlimited times.

**COM LIT 107. Colonialisms and Postcolonialisms. 4 Units.**

Explores topics such as colonialism and race, decolonization, pre- and postcoloniality, globalization, and the cultural dynamics of colonization and subjectivity.

Repeatability: Unlimited as topics vary.

**COM LIT 108. Diasporic Literatures and Cultures. 4 Units.**

Literatures, cultures, and histories of diasporic groups, e.g., literature of the Persian diaspora; cinema of the African diaspora.

Repeatability: Unlimited as topics vary.

**COM LIT 120. Philosophy, Culture, and Literature. 4 Units.**

Discusses contemporary and historical philosophical questions and figures--for example, existentialism or debates about artificial intelligence--in interaction with culture and literature.

Repeatability: Unlimited as topics vary.

**COM LIT 121. Narrative, Pattern, and Text. 4 Units.**

Explores textual patterns, structures, and effects. May include topics such as novel, hypertext, genre, reader responses, intertextuality.

Repeatability: Unlimited as topics vary.

**COM LIT 122. Rhetorical Approaches to Literature. 4 Units.**

Studies the art and politics of rhetoric and persuasion in connection with cultural works from various times and places, for example, classical political speeches, Internet journalism.

Repeatability: Unlimited as topics vary.

**COM LIT 123. Literatures in Dialogue. 4 Units.**

Studies how texts interact across time and space in a global context. Uses concepts of influence, imitation, and parody, to ask, for example, how the Homeric epics can help us understand Caribbean novels and U.S. movies such as *Troy*.

Repeatability: Unlimited as topics vary.

**COM LIT 130. Gender, Sexuality, Race, Class. 4 Units.**

Discusses the roles of differences such as race, class, gender, and sexuality in society, culture, and literature across the globe, covering topics such as theoretical and literary representations of queer sexuality, gender performance, critical race theory.

Repeatability: Unlimited as topics vary.

**COM LIT 131. Psychoanalysis and Culture. 4 Units.**

Discusses major psychoanalytic writings of Freud and others in connection with questions of culture.

Repeatability: Unlimited as topics vary.

**COM LIT 132. Discourse, Ideologies, and Politics. 4 Units.**

Compares ideologies and systems, e.g., nationalism and fundamentalism, as they affect literature and culture in a global context.

Repeatability: Unlimited as topics vary.

**COM LIT 140. Critical Cultural Studies. 4 Units.**

Introduces a variety of ways of understanding cultural phenomena in relation to different power structures. These cultural phenomena may include comics, film, literature, sports, music, festivals, telling stories, or eating out.

Repeatability: Unlimited as topics vary.

**COM LIT 141. Topics in Popular Culture . 4 Units.**

Critical analyses of popular culture such as comics, oral narratives, films, TV, and music in an international framework.

Repeatability: Unlimited as topics vary.

**COM LIT 142. The Metropolis and Other Cultural Geographies. 4 Units.**

Examines the relationship between space and culture; cultural production in the city, suburb, and/or countryside; spaces in texts and artifacts (film, literature, comics, photographs) in a global context.

Repeatability: Unlimited as topics vary.

**COM LIT 143. Literature, Arts, and Media. 4 Units.**

Explores literature and other arts and media in a global context. May include film and electronic media, fine arts, oral cultures, architecture, in an international framework.

Repeatability: Unlimited as topics vary.

**COM LIT 144. Literature, History, and Society. 4 Units.**

Explores the relationship between literary texts and their historical and social contexts in an international framework. Courses may address, for example, literary and cultural expressions in social revolutions or the way literary texts talk back to medicine, religion, and anthropology.

Repeatability: Unlimited as topics vary.

**COM LIT 150. Literature in Translation. 4 Units.**

The study of literary works in one or more genres in English translation. May be a comparative study of works from several different original languages or a concentration on works from a single cultural/linguistic tradition.

Repeatability: Unlimited as topics vary.

**COM LIT 160. World Cinema . 4 Units.**

Comparative analysis of contemporary film in languages other than English.

Repeatability: May be taken for credit 2 times as topics vary.

**COM LIT 190W. Advanced Seminar in Comparative Literature and Theory. 4 Units.**

Capstone seminar for the Comparative Literature major. Deepens understanding of the field through investigation of a special topic and a substantial research and writing project.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: School of Humanities students only.

(Ib)

**COM LIT 199. Independent Study in Comparative Literature. 1-4 Units.**

To be taken only when the materials to be studied lie outside the normal run of departmental offerings.

Repeatability: May be repeated for credit unlimited times.

**COM LIT 200A. History of Comparative Literature and Introduction to Methods and Theories of CL. 4 Units.**

Seminar designed to introduce graduate students in Comparative Literature to the discipline of Comparative Literature. Issues and theories of comparative literary and cultural study are covered. Strongly recommended for first and second year students before the M.A. exam and review.

Restriction: Graduate students only.

**COM LIT 200B. Theories of Translation. 4 Units.**

The reproduction, translation, and transfer of literary and cultural, ideological and political, and symbolic codes and texts have long been the object of study in Comparative Literature. Addresses the diverse ways in which expressive systems interact and intersect.

Repeatability: Unlimited as topics vary.

**COM LIT 200C. Theories of Globalization, Inter-Nationalism, and Postcolonialism. 4 Units.**

Addresses both theories and the complex history of literary and cultural expression in a national, trans-, inter-, and post-national, global frame. Topics may include: globalism and nationhood, theories of citizenship and political subjecthood, postcolonial literature and theory.

Repeatability: Unlimited as topics vary.

**COM LIT 210. Comparative Studies . 4 Units.**

Studies in selected areas of Comparative Literature. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**COM LIT 220. Translation Workshop. 2-4 Units.**

Trains students in the methodologies and practice of translation. Students focus on the translating process in a series of case studies and individual projects.

Repeatability: May be taken for credit for 8 units.

**COM LIT 280A. Professionalization Seminar. 2 Units.**

The first of two required professionalization seminars in Comparative Literature. Intended for second and third year students and covers preparation for the M.A. and Ph.D. exams, conference presentations, teaching and classroom management, and publishing journals.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**COM LIT 280B. Professionalization Seminar. 2 Units.**

The second of two required professionalization seminars in Comparative Literature. Intended for fourth and fifth year students and covers course design, applying for grants, dissertation prospectus and support, and the job application process.

Prerequisite: COM LIT 280A. COM LIT 280A with a grade of B or better

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**COM LIT 290. Reading and Conference. 4-12 Units.**

Studies in selected areas. Topics addressed vary each quarter.

Repeatability: May be repeated for credit unlimited times.

**COM LIT 291. Guided Reading Course. 4 Units.**

Studies in selected areas. Topics addressed vary each quarter.

Repeatability: May be repeated for credit unlimited times.

**COM LIT 292. Teaching Practicum . 2 Units.**

Graduate students develop their pedagogical practices by accompanying a professor teaching a UCI undergraduate class. Meets individually with the professor to discuss relevant pedagogical practices, syllabus design, lecturing, assessment, classroom management, etc. Actively participates in one teaching component.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**COM LIT 299. Dissertation Research. 4-12 Units.**

A units-only course for students in the dissertation phase.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**COM LIT 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Computer Science (COMPSCI)

### Courses

**COMPSCI 103. Advanced Programming and Problem Solving with C++. 4 Units.**

Advanced programming language concepts for more complex, higher performance software design. Builds depth of programming skills in C++ as a foundation for upper-division courses and projects. Focuses on strengthening programming, debugging, and problem solving skills.

Prerequisite: I&C SCI 45C

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 111. Digital Image Processing. 4 Units.**

Introduction to the fundamental concepts of digital signal and image processing as applicable in areas such as multimedia, graphics, AI, data mining, databases, vision, or video games. Topics include image representation, space- and frequency-domain transformations, filters, segmentation, and compression.

Prerequisite: (I&C SCI 46 or CSE 46) and I&C SCI 6D and (MATH 3A or I&C SCI 6N). I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better. I&C SCI 6D with a grade of C or better. MATH 3A with a grade of C or better. I&C SCI 6N with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 112. Computer Graphics. 4 Units.**

Introduction to the fundamental principles of 3D computer graphics including polygonal modeling, geometric transformations, visibility algorithms, illumination models, texturing, and rasterization. Use of an independently-learned 3D graphics API to implement these techniques.

Prerequisite: (I&C SCI 45C or CSE 45C) and (MATH 3A or I&C SCI 6N). I&C SCI 45C with a grade of C or better. CSE 45C with a grade of C or better. MATH 3A with a grade of C or better. I&C SCI 6N with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 113. Computer Game Development. 4 Units.**

Introduction to the principles of interactive 2D and 3D computer game development. Concepts in computer graphics, algorithms, software engineering, art and graphics, music and sound, story analysis, and artificial intelligence are presented and are the basis for student work.

Prerequisite: COMPSCI 112 or COMPSCI 171 or IN4MATX 121 or ART 106B or I&C SCI 163 or I&C SCI 166

Same as IN4MATX 125.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 114. Projects in Advanced 3D Computer Graphics. 4 Units.**

Projects in advanced 3D graphics such as illumination, geometric modeling, visualization, and animation. Topics include physically based and global illumination, solid modeling, curved surfaces, multiresolution modeling, image-based rendering, basic concepts of animation, and scientific visualization.

Prerequisite: COMPSCI 112 and (I&C SCI 45C or CSE 45C). I&C SCI 45C with a grade of C or better. CSE 45C with a grade of C or better.

Recommended: COMPSCI 161 or CSE 161 or COMPSCI 164 or COMPSCI 165.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 115. Computer Simulation. 4 Units.**

Discrete event-driven simulation; continuous system simulation; basic probability as pertaining to input distributions and output analysis; stochastic and deterministic simulation; static and dynamic system simulation.

Prerequisite: I&C SCI 6B and (I&C SCI 6N or MATH 3A) and (STATS 67 or STATS 7) and STATS 120A and I&C SCI 51 and IN4MATX 43. I&C SCI 6B with a grade of C or better. I&C SCI 6N with a grade of C or better. MATH 3A with a grade of C or better. STATS 67 with a grade of C or better. STATS 7 with a grade of C or better. STATS 120A with a grade of C or better. I&C SCI 51 with a grade of C or better. IN4MATX 43 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 116. Computational Photography and Vision. 4 Units.**

Introduces the problems of computer vision through the application of computational photography. Specific topics include photo-editing (image warping, compositing, hole filling), panoramic image stitching, and face detection for digital photographs.

Prerequisite: I&C SCI 6D and (MATH 6G or MATH 3A or I&C SCI 6N) and MATH 2B and (I&C SCI 46 or CSE 46). I&C SCI 6D with a grade of C or better. MATH 6G with a grade of C or better. MATH 3A with a grade of C or better. I&C SCI 6N with a grade of C or better. MATH 2B with a grade of C or better. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 117. Project in Computer Vision. 4 Units.**

Students undertake construction of a computer vision system. Topics include automatically building 3D models from photographs, searching photo collections, robot navigation, and human motion tracking.

Prerequisite: I&C SCI 6D and (MATH 3A or I&C SCI 6N) and MATH 2B and (I&C SCI 46 or CSE 46) and (COMPSCI 112 or COMPSCI 116 or COMPSCI 171 or COMPSCI 178). I&C SCI 6D with a grade of C or better. MATH 3A with a grade of C or better. I&C SCI 6N with a grade of C or better. MATH 2B with a grade of C or better. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 121. Information Retrieval. 4 Units.**

An introduction to information retrieval including indexing, retrieval, classifying, and clustering text and multimedia documents.

Prerequisite: (I&C SCI 45C or I&C SCI 45J) and (STATS 7 or STATS 67). I&C SCI 45C with a grade of C or better. I&C SCI 45J with a grade of C or better

Same as IN4MATX 141.

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**COMPSCI 122A. Introduction to Data Management. 4 Units.**

Introduction to the design of databases and the use of database management systems (DBMS) for applications. Topics include entity-relationship modeling for design, relational data model, relational algebra, relational design theory, and Structured Query Language (SQL) programming.

Prerequisite: I&C SCI 33 or CSE 43 or EECS 114. I&C SCI 33 with a grade of C or better. CSE 43 with a grade of C or better

Same as EECS 116.

Restriction: Computer Science Engineering Majors have first consideration for enrollment. School of Info & Computer Sci students have first consideration for enrollment.

**COMPSCI 122B. Project in Databases and Web Applications. 4 Units.**

Introduces students to advanced database technologies and Web applications. Topics include database connectivity (ODBC/JDBC), extending databases using stored procedures, database administration, Web servers, Web programming languages (Java servlets, XML, Ajax, and mobile platforms).

Prerequisite: (COMPSCI 122A or EECS 116) and I&C SCI 45J

Overlaps with COMPSCI 137, IN4MATX 124.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 122C. Principles of Data Management. 4 Units.**

Covers fundamental principles underlying data management systems. Content includes key techniques including storage management, buffer management, record-oriented file system, access methods, query optimization, and query processing.

Prerequisite: COMPSCI 122A and (I&C SCI 53 or COMPSCI 143A)

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

Concurrent with COMPSCI 222.

**COMPSCI 122D. Beyond SQL Data Management. 4 Units.**

Survey of modern data management and analysis technologies beyond relational (SQL) database management. Topics include semistructured data, NoSQL databases, big data analysis, and text search/query engines. Additional topics vary and may include data frames, streaming data, and/or time-series data.

Prerequisite: I&C SCI 46 and I&C SCI 51 and (COMPSCI 122A or EECS 116)

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**COMPSCI 125. Next Generation Search Systems. 4 Units.**

Discusses concepts and techniques related to all aspects of search systems. After considering basic search technology and the state-of-art systems, rapidly developing techniques for multimedia search, local search, event-search, and video-on-demand are explored.

Prerequisite: I&C SCI 31 or CSE 41 or I&C SCI 32A

Restriction: Upper-division students only. School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

Concurrent with COMPSCI 225.

**COMPSCI 131. Parallel and Distributed Computing. 4 Units.**

Parallel and distributed computer systems. Parallel programming models. Common parallel and distributed programming issues. Specific topics include parallel programming, performance models, coordination and synchronization, consistency and replication, transactions, fault tolerance.

Prerequisite: (I&C SCI 53 and I&C SCI 53L) or COMPSCI 143A

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 132. Computer Networks. 4 Units.**

Computer network architectures, protocols, and applications. Internet congestion control, addressing, and routing. Local area networks. Multimedia networking.

Prerequisite: EECS 55 or STATS 67

Same as EECS 148.

Restriction: Computer Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 133. Advanced Computer Networks. 4 Units.**

Fundamental principles in computer networks are applied to obtain practical experience and skills necessary for designing and implementing computer networks, protocols, and network applications. Various network design techniques, simulation techniques, and UNIX network programming are covered.

Prerequisite: COMPSCI 132 or EECS 148

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 134. Computer and Network Security. 4 Units.**

Overview of modern computer and networks security, attacks, and countermeasures. Authentication, identification, data secrecy, data integrity, authorization, access control, computer viruses, network security. Also covers secure e-commerce and applications of public key methods, digital certificates, and credentials.

Prerequisite: I&C SCI 6D and (I&C SCI 33 or CSE 43) and (COMPSCI 122A or EECS 116 or COMPSCI 132 or COMPSCI 143A)

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 137. Internet Applications Engineering. 4 Units.**

Concepts in Internet applications engineering with emphasis on the Web. Peer-to-Peer and Interoperability. Topics include HTTP and REST, Remote Procedure/Method Calls, Web Services, data representations, content distribution networks, identity management, relevant W3C/IETF standards, and relevant new large-scale computing styles.

Prerequisite: (COMPSCI 132 or EECS 148) and I&C SCI 45J

Same as IN4MATX 124.

Overlaps with COMPSCI 122B.

Restriction: Upper-division students only. School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 141. Concepts in Programming Languages I. 4 Units.**

In-depth study of several contemporary programming languages stressing variety in data structures, operations, notation, and control. Examination of different programming paradigms, such as logic programming, functional programming and object-oriented programming; implementation strategies, programming environments, and programming style.

Prerequisite: (I&C SCI 51 or CSE 31 or EECS 31) and (I&C SCI 46 or CSE 46). I&C SCI 51 with a grade of C or better. CSE 31 with a grade of C or better. EECS 31 with a grade of C or better. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better

Same as IN4MATX 101.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 142A. Compilers and Interpreters. 4 Units.**

Introduction to the theory of programming language processors covering lexical analysis, syntax analysis, semantic analysis, intermediate representations, code generation, optimization, interpretation, and run-time support.

Prerequisite: CSE 141 or COMPSCI 141 or IN4MATX 101

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 142B. Language Processor Construction. 4 Units.**

Project course which provides working laboratory experience in construction and behavior of compilers and interpreters. Students build actual language processors and perform experiments which reveal their behaviors.

Prerequisite: COMPSCI 142A or CSE 142

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 143A. Principles of Operating Systems. 4 Units.**

Principles and concepts of process and resource management, especially as seen in operating systems. Processes, memory management, protection, scheduling, file systems, and I/O systems are covered. Concepts illustrated in the context of several well-known systems.

Prerequisite: (I&C SCI 46 or CSE 46) and (I&C SCI 51 or EECS 31 or CSE 31)

Overlaps with EECS 111.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 143B. Project in Operating System Organization. 4 Units.**

Detailed specification and design of critical components of an actual operating system including a memory manager, a process server, and a file/IO subsystem. Hardware/software tradeoffs. Emphasis on logical organization of system and communication.

Prerequisite: COMPSCI 143A

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 145. Embedded Software. 4 Units.**

Principles of embedded computing systems: embedded systems architecture, hardware/software components, system software and interfacing, real-time operating systems, hardware/software co-development, and communication issues. Examples of embedded computing in real-world application domains. Simple programming using an embedded systems development environment.

Corequisite: COMPSCI 145L

Prerequisite: (CSE 46 or I&C SCI 46) and (I&C SCI 51 or EECS 31 or CSE 31)

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 145L. Embedded Software Laboratory. 2 Units.**

Laboratory section to accompany COMPSCI 145.

Corequisite: COMPSCI 145

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 146. Programming in Multitasking Operating Systems. 4 Units.**

User- and systems-level programming of modern Internet-connected, multi-user, multitasking operating systems. Shells, scripting, filters, pipelines, programmability, extensibility, concurrency, inter-process communication. Concrete examples of a modern operating system (such as, but not necessarily, Unix programmed in C) are used.

Prerequisite: (I&C SCI 46 or CSE 46) and I&C SCI 51. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better. I&C SCI 51 with a grade of C or better. Recommended: COMPSCI 143A.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 147. Internet of Things (IoT) Software and Systems. 4 Units.**

Introduction to the Internet of Things (IoT) from a systems and software perspective. IoT ecosystem including sensors, embedded CPUs, networking protocols, software, cloud services, and security and privacy requirements. IoT use cases, system design, and programming project.

Prerequisite: I&C SCI 33 or CSE 43

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 151. Digital Logic Design. 4 Units.**

Boolean algebra. Design/analysis of combinational and sequential systems using SSI/MSI/LSI modules. Number systems. Error detecting and correction codes. Arithmetic algorithms. Hardware/ firmware implementation of algorithms.

Prerequisite: (I&C SCI 33 or CSE 43) and I&C SCI 51 and I&C SCI 6B and I&C SCI 6D. I&C SCI 33 with a grade of C or better. CSE 43 with a grade of C or better. I&C SCI 51 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 152. Computer Systems Architecture. 4 Units.**

Design of computer elements; ALU, control unit, and arithmetic circuits. Memory hierarchy and organization. Caches. Function unit sharing and pipelining. I/O and interrupt processing. RTL and behavioral modeling using hardware description languages. Microprocessor organization and implementation techniques.

Prerequisite: COMPSCI 151

Overlaps with I&C SCI 160, EECS 112.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 153. Logic Design Laboratory. 4 Units.**

Introduction to standard integrated circuits. Construction and debugging techniques. Design of digital systems using LSI and MSI components. Practical use of circuits in a laboratory environment, including implementation of small digital systems such as arithmetic modules, displays, and timers.

Prerequisite: COMPSCI 151

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 154. Computer Design Laboratory. 4 Units.**

Underlying primitives of computer instruction sets. Principles of microprogramming. Microprogramming. Microprograms written for one or more systems. Typical microprogramming applications discussed and implemented or simulated.

Prerequisite or corequisite: COMPSCI 151

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 161. Design and Analysis of Algorithms. 4 Units.**

Techniques for efficient algorithm design, including divide-and-conquer and dynamic programming, and time/space analysis. Fast algorithms for problems applicable to networks, computer games, and scientific computing, such as sorting, shortest paths, minimum spanning trees, network flow, and pattern matching.

Prerequisite: (I&C SCI 46 or CSE 46) and I&C SCI 6B and I&C SCI 6D and MATH 2B. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Software Engineering Majors have first consideration for enrollment. Data Science Majors have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment. Computer Science Majors have first consideration for enrollment. Business Information Management, Computer Game Science, and Informatics majors have second right of consideration.

**COMPSCI 162. Formal Languages and Automata. 4 Units.**

Formal aspects of describing and recognizing languages by grammars and automata. Parsing regular and context-free languages. Ambiguity, nondeterminism. Elements of computability; Turing machines, random access machines, undecidable problems, NP-completeness.

Prerequisite: (I&C SCI 46 or CSE 46) and MATH 2B and I&C SCI 6B and I&C SCI 6D. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better

Same as LSCI 102.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment. Language Science Majors have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 163. Graph Algorithms. 4 Units.**

Algorithms for solving fundamental problems in graph theory. Graph representations, graph traversal, network flow, connectivity, graph layout, matching problems.

Prerequisite: COMPSCI 161 or CSE 161

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

Concurrent with COMPSCI 265.

**COMPSCI 164. Computational Geometry and Geometric Modeling. 4 Units.**

Algorithms and data structures for computational geometry and geometric modeling, with applications to game and graphics programming. Topics: convex hulls, Voronoi diagrams, algorithms for triangulation, motion planning, and data structures for geometric searching and modeling of 2D and 3D objects.

Prerequisite: I&C SCI 46 or CSE 46. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 165. Project In Algorithms And Data Structures. 4 Units.**

Design, implementation, execution, and analysis of algorithms for problems such as sorting, searching, data compression, and data encryption. Time-space-structure trade-offs.

Prerequisite: COMPSCI 161 or CSE 161. Recommended: I&C SCI 45C OR CSE 45C.

**COMPSCI 166. Quantum Computation and Information. 4 Units.**

Basic models for quantum computation and their foundations in quantum mechanics. Quantum complexity classes and quantum algorithms, including algorithms for factoring and quantum simulation. Introduction to quantum information theory and quantum entanglement.

Prerequisite: (I&C SCI 6N or MATH 3A) and COMPSCI 161

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 167. Introduction to Applied Cryptography. 4 Units.**

An introduction to the essential aspects of applied cryptography, as it is used in practice. Topics include classical cryptography, block ciphers, stream ciphers, public-key cryptography, digital signatures, one-way hash functions, basic cryptographic protocols, and digital certificates and credentials.

Prerequisite: COMPSCI 161 or CSE 161

Restriction: Upper-division students only. School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 169. Introduction to Optimization. 4 Units.**

A broad introduction to optimization. Unconstrained and constrained optimization. Equality and inequality constraints. Linear and integer programming. Stochastic dynamic programming.

Prerequisite: (I&C SCI 6N or MATH 3A) and (STATS 67 or (STATS 7 and STATS 120A))

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

Concurrent with COMPSCI 268.

**COMPSCI 171. Introduction to Artificial Intelligence. 4 Units.**

Different means of representing knowledge and uses of representations in heuristic problem solving. Representations considered include predicate logic, semantic nets, procedural representations, natural language grammars, and search trees.

Prerequisite or corequisite: ((STATS 7 and STATS 120A) or STATS 67) ( and (I&C SCI 46 or CSE 46) and MATH 2B)

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 172B. Neural Networks and Deep Learning . 4 Units.**

Neural network and deep learning from multiple perspectives. Theory of parallel distributed processing systems, algorithmic approaches for learning from data in various manners, applications to difficult problems in AI from computer vision, to natural language understanding, to bioinformatics and chemoinformatics.

Prerequisite: (STATS 120A and STATS 120B) or MATH 121A or COMPSCI 178 or COMPSCI 273A

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

Concurrent with COMPSCI 274C.

**COMPSCI 172C. Artificial Intelligence Frontiers: Technical, Ethical, and Societal. 4 Units.**

Explores the frontiers of artificial intelligence and related technologies with a focus on the underlying ethical, legal, and societal challenges and opportunities they create. Encourages critical thinking about these issues.

Prerequisite: COMPSCI 171 and COMPSCI 172B. Recommended: COMPSCI 178

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

Concurrent with COMPSCI 274D.

**COMPSCI 175. Project in Artificial Intelligence. 4 Units.**

Construction of a working artificial intelligence system. Evaluation of capabilities of the system including impact of knowledge representation.

Prerequisite: COMPSCI 171 and COMPSCI 178

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 177. Applications of Probability in Computer Science. 4 Units.**

Application of probability to real-world problems in computer science. Typical topics include analysis of algorithms and graphs, probabilistic language models, network traffic modeling, data compression, and reliability modeling.

Prerequisite: MATH 2B and STATS 67 and I&C SCI 6B and I&C SCI 6D and (MATH 3A or I&C SCI 6N)

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 178. Machine Learning and Data-Mining. 4 Units.**

Introduction to principles of machine learning and data-mining applied to real-world datasets. Typical applications include spam filtering, object recognition, and credit scoring.

Prerequisite: I&C SCI 6B and I&C SCI 6D and (I&C SCI 6N or MATH 3A) and MATH 2B and (STATS 67 or (STATS 7 and STATS 120A))

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 179. Algorithms for Probabilistic and Deterministic Graphical Models. 4 Units.**

Graphical model techniques dealing with probabilistic and deterministic knowledge representations. Focuses on graphical models such as constraint networks, Bayesian networks, and Markov networks that have become a central paradigm for knowledge representation and reasoning in AI and general computer science.

Prerequisite: COMPSCI 171

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 183. Introduction to Computational Biology. 4 Units.**

The use of theories and methods based on computer science, mathematics, and physics in molecular biology and biochemistry. Basics in biomolecular modeling. Analysis of sequence and structural data of biomolecules. Analysis of biomolecular functions.

Prerequisite: MATH 2D or MATH 3A or STATS 7 or STATS 8

Same as BME 132, BIO SCI M123.

Concurrent with MOL BIO 223 and BME 232.

**COMPSCI 184A. Artificial Intelligence in Biology and Medicine. 4 Units.**

Introduction to computational methods in molecular biology, aimed at those interested in learning about this interdisciplinary area. Covers computational approaches to understanding and predicting the structure, function, interactions, and evolution of DNA, RNA, proteins, and related molecules and processes.

Prerequisite: I&C SCI 6N or MATH 3A

Restriction: Upper-division students only. School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

Concurrent with COMPSCI 284A.

**COMPSCI 184C. Computational Systems Biology. 4 Units.**

Computational inference and modeling of gene regulation networks, signal transduction pathways, and the effects of regulatory networks in cellular processes, development, and disease. Introduction of required mathematical, computational, and data handling tools.

Prerequisite: COMPSCI 184A

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

Concurrent with COMPSCI 284C.

**COMPSCI 190. Special Topics in Information and Computer Science. 4 Units.**

Studies in selected areas of Information and Computer Science. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**COMPSCI H198. Honors Research. 4 Units.**

Directed independent research in computer science for honors students.

Repeatability: May be repeated for credit unlimited times.

Restriction: Campuswide Honors Collegium students only. Bren School of ICS Honors students only. Upper-division students only.

**COMPSCI 199. Individual Study. 2-5 Units.**

Individual research or investigation with Computer Science faculty.

Repeatability: May be repeated for credit unlimited times.

**COMPSCI 200S. Seminar in Computer Science Research. 1 Unit.**

Graduate colloquium series. Includes weekly talks by notable computer scientists.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**COMPSCI 201. Foundations of Cryptographic Protocols. 4 Units.**

Explores fundamental cryptographic tools, including encryption, signatures, and identification schemes. Students are introduced to the provable security paradigm of modern cryptography, focusing on understanding of security properties provided by cryptographic tools, and on proving security (or insecurity) of cryptographic constructions.

Prerequisite: COMPSCI 260 or COMPSCI 263

**COMPSCI 201P. Introduction to Computer Security. 4 Units.**

Introduction to computer security, including systems, technology, and management. Topics include authorization, authentication, data integrity, malware, operating systems security, network security, web security, and basic cryptography.

Prerequisite: Knowledge of Python or C++ programming is required.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 202. Applied Cryptography. 4 Units.**

Design and analysis of algorithms for applied cryptography. Topics include symmetric and asymmetric key encryption, digital signatures, one-way hash functions, digital certificates and credentials, and techniques for authorization, non-repudiation, authentication, identification, data integrity, proofs of knowledge, and access control.

Prerequisite: COMPSCI 260 and COMPSCI 263

**COMPSCI 202P. Applied Cryptography . 4 Units.**

Design and analysis of algorithms for applied cryptography. Topics include symmetric and asymmetric key encryption, digital signatures, one-way hash functions, digital certificates and credentials, and techniques for authorization, non-repudiation, authentication, identification, data integrity, proofs of knowledge, and access control.

Restriction: Graduate students only.

**COMPSCI 203. Network and Distributed Systems Security. 4 Units.**

Modern computer and networks security: attacks and countermeasures, authentication, identification, data secrecy, data integrity, authorization, access control, computer viruses, network security. Group communication and multicast security techniques. Covers secure e-commerce and applications of public key methods, digital certificates, and credentials.

Prerequisite: EECS 148 or COMPSCI 132

Same as NET SYS 240.

**COMPSCI 203P. Network Security. 4 Units.**

Introduction to network security, including network threats and attacks, as well as defenses against such attacks. Topics include network infrastructure security, mobile and Wi-Fi security, spam, phishing, firewalls, anonymity, secure email, secure and private cloud computing, and web security.

Prerequisite: COMPSCI 201P or COMPSCI 202P

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 204. Usable Security and Privacy. 4 Units.**

Introduces usability problems in security and privacy methods, tools, and software. Overviews prominent examples of both failures and successes in usable security and privacy. Surveys state-of-the-art techniques and evaluation methodologies.

Same as IN4MATX 237.

Overlaps with IN4MATX 231, COMPSCI 203.

Restriction: Informatics Majors have first consideration for enrollment. Computer Science Majors have first consideration for enrollment. Undergraduate degree in CompSci or Informatics is strongly recommended.

**COMPSCI 205. Computer and Systems Security . 4 Units.**

Lecture and discuss latest security research in software, OS, protocols, mobile devices, machine learning, sensors, and emerging IoT/CPS systems such as smart home and smart transportation. Students perform research projects and gain hands-on experience evaluating and designing secure systems.

Prerequisite: COMPSCI 134 and COMPSCI 142A and COMPSCI 143A

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Graduate students only.

**COMPSCI 206. Principles of Scientific Computing. 4 Units.**

Overview of widely used principles and methods of numerical and scientific computing, including basic concepts and computational methods in linear algebra, optimization, and probability.

Prerequisite: Basic courses in multivariate calculus, linear algebra, and probability.

Overlaps with STATS 230.

**COMPSCI 206P. Principles of Scientific Computing. 4 Units.**

Overview of widely used principles and methods of numerical and scientific computing, including basic concepts and computational methods in floating-point, linear algebra, optimization, simulation, modeling, and probability/statistics as it relates to model evaluation.

Prerequisite: Basic knowledge of multivariate calculus, linear algebra, and familiarity with MATLAB.

Restriction: Graduate students only.

**COMPSCI 210P. Computer Graphics and Visualization . 4 Units.**

Interactive 3D graphics rendering pipeline, illumination and shading, ray tracing, texture-, bump-, mip-mapping, hidden surface removal, anti-aliasing, multiresolution representations, volume rendering techniques, iso-surface extraction.

Prerequisite: Familiarity with linear algebra is required.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 211A. Visual Computing. 4 Units.**

Fundamentals of image processing (convolution, linear filters, spectral analysis), vision geometry (projective geometry, camera models and calibration, stereo reconstruction), radiometry (color, shading, illumination, BRDF), and visual content synthesis (graphics pipeline, texture- bump-, mip-mapping, hidden surface removal, anti-aliasing).

**COMPSCI 211B. Computer Graphics and Visualization. 4 Units.**

Interactive 3D graphics rendering pipeline, illumination and shading, ray tracing, texture-, bump-, mip-mapping, hidden surface removal, anti-aliasing, multiresolution representations, volume rendering techniques, iso-surface extraction.

Prerequisite: COMPSCI 211A

**COMPSCI 211P. Visual Computing . 4 Units.**

Develops a comprehensive understanding of fundamentals of image processing (convolution, linear filters, spectral analysis), vision geometry (projective geometry, camera models and calibration, stereo reconstruction), radiometry (color, shading, illumination, BRDF), visual content synthesis (graphics pipeline, texture- bump-, mip-mapping, hidden surface, anti-aliasing).

Prerequisite: Undergraduate-level familiarity with Linear algebra (matrices and operations), eigenvalue, eigenvectors, linear regression; basic of algorithms; programming in C/C++

Restriction: Graduate students only.

**COMPSCI 212. Multimedia Systems and Applications. 4 Units.**

Organization and structure of modern multimedia systems; audio and video encoding/compression; quality of service concepts; scheduling algorithms for multimedia; resource management in distributed and multimedia systems; multimedia protocols over high-speed networks; synchronization schemes; multimedia applications; and teleservices.

Prerequisite: COMPSCI 143A and COMPSCI 161. B.S. degree in Computer Science is also accepted. Recommended: COMPSCI 131 and COMPSCI 132 and COMPSCI 133.

**COMPSCI 213. Introduction to Visual Perception. 4 Units.**

Introduction to the process of human visual perception. Offers the physiological and psychophysical approach to understand vision, introducing concepts of perception of color, depth, movement. Examples of quantification and application of these models in computer vision, computer graphics, multimedia, HCI.

Prerequisite: MATH 121A

**COMPSCI 216. Image Understanding. 4 Units.**

The goal of image understanding is to extract useful semantic information from image data. Course covers low-level image and video processing techniques, feature descriptors, segmentation, objection recognition, and tracking.

Prerequisite: I&C SCI 6D and (I&C SCI 6N or MATH 6G or MATH 3A) and MATH 2B and I&C SCI 46

**COMPSCI 217. Light and Geometry in Computer Vision. 4 Units.**

Examines the issues of light transport and multiview geometry in computer vision. Applications include camera calibration, 3D understanding, stereo reconstruction, and illumination estimation.

Prerequisite: I&C SCI 6D and (I&C SCI 6N or MATH 6G or MATH 3A) and MATH 2B and I&C SCI 46 and COMPSCI 211A

**COMPSCI 221. Information Retrieval, Filtering, and Classification. 4 Units.**

Algorithms for the storage, retrieval, filtering, and classification of textual and multimedia data. The vector space model, Boolean and probabilistic queries, and relevance feedback. Latent semantic indexing; collaborative filtering; and relationship to machine learning methods.

Prerequisite: COMPSCI 161 and COMPSCI 171 and (I&C SCI 6N or MATH 3A or MATH 6G)

Same as SWE 225.

Restriction: Graduate students only.

**COMPSCI 222. Principles of Data Management. 4 Units.**

Covers fundamental principles underlying data management systems. Content includes key techniques including storage management, buffer management, record-oriented file system, access methods, query optimization, and query processing.

Prerequisite: COMPSCI 122A and (I&C SCI 53 or COMPSCI 143A)

Concurrent with COMPSCI 122C.

**COMPSCI 222P. Principles of Data Management. 4 Units.**

Covers fundamental principles underlying data management systems. Understanding and implementation of key techniques including storage management, buffer management, record-oriented file system, access methods, query optimization, and query processing.

Prerequisite: C++ programming skills, understanding of Data Structures and Algorithms

Restriction: Graduate students only.

**COMPSCI 223. Transaction Processing and Distributed Data Management. 4 Units.**

Covers fundamental principles underlying transaction processing including database consistency, concurrency control, database recovery, and fault-tolerance. Includes transaction processing in centralized, distributed, parallel, and client-server environments.

Prerequisite: COMPSCI 222 and COMPSCI 131

**COMPSCI 225. Next Generation Search Systems. 4 Units.**

Discusses concepts and techniques related to all aspects of search systems. After considering basic search technology and the state-of-art systems, rapidly developing techniques for multimedia search, local search, event-search, and video-on-demand are explored.

Prerequisite: I&C SCI 21 or CSE 21 or IN4MATX 41 or I&C SCI 31 or CSE 41

Restriction: Upper-division students only. Graduate students only.

Concurrent with COMPSCI 125.

**COMPSCI 230. Distributed Computer Systems. 4 Units.**

Principles of distributed computing systems. Topics covered include message-passing, remote procedure calls, distributed shared memory synchronization, resource and process/thread management, distributed file systems, naming and security.

**COMPSCI 230P. Distributed Computer Systems . 4 Units.**

Principles of distributed computing systems. Topics covered include message-passing, remote procedure calls, distributed shared memory synchronization, resource and process/thread management, distributed file systems, naming and security.

Restriction: Graduate students only.

**COMPSCI 231P. Parallel and Distributed Computing for Professionals . 4 Units.**

Covers a wide variety of concepts related to the design and application of high-performance concurrent computing systems, including architectural features, communications networks and models, parallel program development for numerical and non-numerical applications, programming models, and more.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 232. Computer and Communication Networks. 4 Units.**

Network architecture of the Internet, telephone networks, cable networks, and cell phone networks. Network performance models. Network performance models. Advanced concepts and implementations of flow and congestion control, addressing, internetworking, forwarding, routing, multiple access, streaming, and quality-of-service.

Prerequisite: EECS 148 or COMPSCI 132

Same as EECS 248A, NET SYS 201.

Restriction: Graduate students only.

**COMPSCI 232P. Computer and Communication Networks . 4 Units.**

Internet architecture, protocols, and services. Advanced concepts of IP and TCP, including addressing, internetworking, forwarding, routing, and implementations of flow and congestion control. Internet services such as Network Address Translation and Domain Name Servers. Overview of Local Area Networks.

Restriction: Graduate students only.

**COMPSCI 233. Networking Laboratory. 4 Units.**

A laboratory-based introduction to basic networking concepts such as addressing, sub-netting, bridging, ARP, and routing. Network simulation and design. Structured around weekly readings and laboratory assignments.

Prerequisite: EECS 148 or COMPSCI 132

Same as NET SYS 202.

**COMPSCI 234. Advanced Networks. 4 Units.**

Design principles of networked systems, advanced routing and congestion control algorithms, network algorithms, network measurement, management, security, Internet economics, and emerging networks.

Prerequisite: NET SYS 201 or COMPSCI 232 or EECS 248A

Same as NET SYS 210.

**COMPSCI 236. Wireless and Mobile Networking. 4 Units.**

Introduction to wireless networking. The focus is on layers 2 and 3 of the OSI reference model, design, performance analysis, and protocols. Topics covered include: an introduction to wireless networking, digital cellular, next generation cellular, wireless LANs, and mobile IP.

Prerequisite: EECS 148 or COMPSCI 132

Same as NET SYS 230.

**COMPSCI 237. Middleware for Networked and Distributed Systems. 4 Units.**

Discusses concepts, techniques, and issues in developing distributed systems middleware that provides high performance and Quality of Service for emerging applications. Also covers existing standards (e.g., CORBA, DCOM, Jini, Espeak) and their relative advantages and shortcomings.

Prerequisite: An undergraduate-level course in operating systems and networks.

Same as NET SYS 260.

**COMPSCI 238. Advanced Operating Systems. 4 Units.**

Focuses on advanced and graduate-level topics in operating systems. Presents important recent developments in operating systems, topics not covered in undergraduate operating systems courses. This includes novel operating system designs and techniques to improve existing ones.

Prerequisite: COMPSCI 143A

**COMPSCI 238P. Operating Systems. 4 Units.**

In-depth organization of the core operating system abstraction and its implementation (virtual memory, kernel and user mode, system calls, threads, context switches, interrupts, inter-process communication, hardware interface, etc.) and a range of recent developments in de-facto industry standard operating systems.

Prerequisite: Working knowledge of C and the Linux environment.

Restriction: School of Info & Computer Sci students only. Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 241. Advanced Compiler Construction. 4 Units.**

Advanced study of programming language implementation techniques: optimizations such as common sub-expression elimination, register allocation, and instruction scheduling. Implementation of language features such as type-directed dispatch, garbage collection, dynamic linking, and just-in-time code generation.

Prerequisite: COMPSCI 142A

**COMPSCI 242. Parallel Computing. 4 Units.**

Definition of parallel processing systems. Theory and application of arrays, trees, and hypercubes. Computational models, applications: sorting, integer arithmetic, matrix operations, Fast Fourier Transform, and others. Interconnection networks: a framework for the description, analysis, and construction of hypercube-derived networks.

**COMPSCI 242P. Compilers and Interpreters. 4 Units.**

Provides in-depth study of compilers and interpreters which are the primary forms of programming language processing in computing.

Prerequisite: Knowledge of C++ programming is required.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 243. High-Performance Architectures and Their Compilers. 4 Units.**

Emphasis on the development of automatic tools (i.e., compilers/environments) for the efficient exploitation of parallel machines, and the trade-offs between hardware and software in the design of supercomputing and high-performance machines.

**COMPSCI 244. Introduction to Embedded and Ubiquitous Systems. 4 Units.**

Embedded and ubiquitous system technologies including processors, DSP, memory, and software. System interfacing basics; communication strategies; sensors and actuators, mobile and wireless technology. Using pre-designed hardware and software components. Design case studies in wireless, multimedia, and/or networking domains.

Prerequisite: I&C SCI 51 and COMPSCI 152 and COMPSCI 161 and (I&C SCI 6N or MATH 3A or MATH 6G or I&C SCI 6D). B.S. degree in Computer Science is also accepted.

Same as IN4MATX 244.

**COMPSCI 244P. Introduction to the Internet of Things. 4 Units.**

Develops a comprehensive understanding of the hardware and software technology, the communication protocols, and the security and privacy requirements underlying the Internet of Things ecosystem, particularly those using computing elements (processors, DSPs/ ASIPs), sensors, and accessing cloud services.

Prerequisite: Undergraduate-level familiarity with fundamentals of integrated circuit blocks, processors, optimization/algorithm design, and some programming experience.

Restriction: Graduate students only.

**COMPSCI 245. Software for Embedded Systems. 4 Units.**

Embedded computing elements, device interfaces, time-critical IO handling. Embedded software design under size, performance, and reliability constraints. Software timing and functional validation. Programming methods and compilation for embeddable software. Embedded runtime systems. Case studies of real-time software systems.

Prerequisite: I&C SCI 51 and COMPSCI 152 and COMPSCI 161 and (I&C SCI 6N or MATH 3A or MATH 6G or I&C SCI 6D). B.S. degree in Computer Science is also accepted.

**COMPSCI 246. Dependability, Validation, and Testing of Embedded Systems. 4 Units.**

Embedded system building blocks, including IP cores. Dependability and Resilience. Co-simulation. Formal verification using model checking. Verification environments. Test challenges in core integration: compliance, feature, random, and collision testing. Core access and test integration. Interface-based verification and standards.

Prerequisite: B.S. degree in Computer Science or basic courses in algorithms and data structures, calculus, discrete math, linear algebra, symbolic logic.

**COMPSCI 247. Complex Software Systems: Project Course. 4 Units.**

Building complex systems software systems, such as Database Management Systems, Operating Systems, and Optimizing Compilers. Such systems often involve low-level programming and intricate performance optimizations. Students learn how to build such a system.

Prerequisite or corequisite: COMPSCI 222 or COMPSCI 238 or COMPSCI 241

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**COMPSCI 248A. Introduction to Ubiquitous Computing. 4 Units.**

The 'disappearing computer' paradigm. Differences to the desktop computing model: applications, interaction in augmented environments, security, alternate media, small operating systems, sensors, and embedded systems design. Evaluation by project work and class participation.

Same as IN4MATX 241.

**COMPSCI 250A. Computer Systems Architecture. 4 Units.**

Study of architectural issues and their relation to technology and software: design of processor, interconnections, and memory hierarchies.

Prerequisite: COMPSCI 152

**COMPSCI 250B. Modern Computer Systems. 4 Units.**

Fundamental concepts and recent advances in computer systems architecture necessary to achieve high performance and efficiency on systems available today. Topics span modern processor features, accelerators, storage and network architectures, as well as architecture-optimized software.

Prerequisite: Required: Undergraduate-level understanding of computer architecture concepts.

Overlaps with COMPSCI 243.

**COMPSCI 250P. Computer Systems Architecture . 4 Units.**

Study of architectural issues and their relation to technology and software: design of processor, interconnections, and memory hierarchies.

Prerequisite: Undergraduate-level familiarity with fundamentals of integrated circuit blocks, processors, and optimization/algorithm design, and some programming experience.

Restriction: Graduate students only.

**COMPSCI 252. Introduction to Computer Design. 4 Units.**

The methodology and use of CAD tools for computer design, accomplished by a lab in which students practice design using commercially available silicon compilers and other tools.

Prerequisite: COMPSCI 151 and COMPSCI 152

**COMPSCI 253. Analysis of Programming Languages. 4 Units.**

Concepts in modern programming languages, their interaction, and the relationship between programming languages and methods for large-scale, extensible software development. Empirical analysis of programming language usage.

Same as SWE 212.

**COMPSCI 253P. Advanced Programming and Problem Solving. 4 Units.**

Provides in-depth preparation for industry interviews requiring demonstration of problem solving and programming skills. Emphasis is on understanding problem statements, considering edge cases, developing effective test cases, designing correct solutions, explaining these clearly, and implementing a solution correctly.

Corequisite: COMPSCI 260P

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 259S. Seminar in Design Science. 2 Units.**

Current research and research trends in design science. Forum for presentation and criticism by students of research work in progress.

Repeatability: May be taken for credit 18 times.

**COMPSCI 260. Fundamentals of the Design and Analysis of Algorithms. 4 Units.**

Covers fundamental concepts in the design and analysis of algorithms and is geared toward non-specialists in theoretical computer science. Topics include: deterministic and randomized graph algorithms, fundamental algorithmic techniques like divide-and-conquer strategies and dynamic programming, and NP-completeness.

Prerequisite: COMPSCI 161

**COMPSCI 260P. Fundamentals of Algorithms with Applications. 4 Units.**

Covers fundamental concepts in the design and analysis of algorithms and is geared toward practical application and implementation. Topics include greedy algorithms, deterministic and randomized graph algorithms, models of network flow, fundamental algorithmic techniques, and NP-completeness.

Restriction: Graduate students only.

**COMPSCI 261. Data Structures. 4 Units.**

An in-depth treatment of data structures and their associated management algorithms including resource complexity analysis.

Prerequisite: I&C SCI 46 and COMPSCI 161

**COMPSCI 261P. Data Structures with Applications . 4 Units.**

Data structures and their associated management algorithms, including their applications and analysis.

Restriction: Graduate students only.

**COMPSCI 262. Computational Complexity. 4 Units.**

Advanced course in computational models and complexity classes. Covers the fundamentals of Turing Machines, Decidability, and NP-completeness. Includes discussion of more advanced topics including polynomial hierarchy, randomized complexity classes, #P-completeness and hardness of approximation.

Prerequisite: COMPSCI 162

**COMPSCI 262P. Text Processing and Pattern Matching. 4 Units.**

Techniques for pattern matching and parsing character strings. Topics include substring searching, finite state machines, regular expressions, and context-free grammars, as well as applications in lexical analyzers, compilers, word processors, malware detectors, and search engines.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 263. Analysis of Algorithms. 4 Units.**

Analysis of correctness and complexity of various efficient algorithms; discussion of problems for which no efficient solutions are known.

Prerequisite: COMPSCI 161 and COMPSCI 261

**COMPSCI 264. Quantum Computation and Information. 4 Units.**

Basic models for quantum computation and their foundations in quantum mechanics. Quantum complexity classes and quantum algorithms, including algorithms for factoring and quantum simulation. Introduction to quantum information theory and quantum entanglement.

Prerequisite: Basic courses in linear algebra and algorithms.

**COMPSCI 265. Graph Algorithms. 4 Units.**

Graph definitions, representation methods, graph problems, algorithms, approximation methods, and applications.

Prerequisite: COMPSCI 161 and COMPSCI 261

Concurrent with COMPSCI 163.

**COMPSCI 266. Computational Geometry. 4 Units.**

An overview of some of the basic problems in computational geometry and of some algorithmic and data-structuring techniques appropriate to their solution.

Prerequisite: COMPSCI 161 and COMPSCI 261

**COMPSCI 267P. Data Compression. 4 Units.**

An introduction to the theory and practice of modern data compression techniques. Topics include codes, coding, modeling, text compression, lossless and lossy image compression standards and systems, audio compression.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 268. Introduction to Optimization. 4 Units.**

A broad introduction to optimization. Unconstrained and constrained optimization. Equality and inequality constraints. Linear and integer programming. Stochastic dynamic programming.

Prerequisite: STATS 67 or (STATS 7 and STATS 120A) and (I&C SCI 6N or MATH 3A)

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

Concurrent with COMPSCI 169.

**COMPSCI 268P. Introduction to Optimization Modeling . 4 Units.**

A broad introduction to optimization methods and their applications. Unconstrained and constrained optimization. Direct, first, and second order methods. Use of optimization software libraries. Equality and inequality constraints, optimal conditions, and methods. Applications to modeling in computer science, engineering.

Restriction: Graduate students only.

**COMPSCI 269S. Seminar in the Theory of Algorithms and Data Structures. 2 Units.**

Current research and research trends in the Theory of algorithms and data structures.

Repeatability: May be taken for credit 18 times.

**COMPSCI 271. Introduction to Artificial Intelligence. 4 Units.**

The study of theories and computational models for systems which behave and act in an intelligent manner. Fundamental subdisciplines of artificial intelligence including knowledge representation, search, deduction, planning, probabilistic reasoning, natural language parsing and comprehension, knowledge-based systems, and learning.

**COMPSCI 271P. Introduction to Artificial Intelligence. 4 Units.**

The study of theories and computational models for systems which behave and act in an intelligent manner. Fundamental sub-disciplines of artificial intelligence, including knowledge representation, search, deduction, planning, probabilistic reasoning, natural language parsing and comprehension, knowledge-based systems, and learning.

Restriction: Graduate students only.

**COMPSCI 272. Statistical Natural Language Processing. 4 Units.**

Statistical models, machine learning algorithms, and computational tasks involved in natural language processing. Focuses on approaches that learn these models from data, and covers applications such as information extraction, dialog systems, machine translation, and question answering.

Prerequisite: COMPSCI 171 and COMPSCI 178

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Graduate students only.

**COMPSCI 273A. Machine Learning. 4 Units.**

Computational approaches to learning algorithms for classifications, regression, and clustering. Emphasis is on discriminative classification methods such as decision trees, rules, nearest neighbor, linear models, and naive Bayes.

Prerequisite: COMPSCI 271 and COMPSCI 206

**COMPSCI 273P. Machine Learning and Data Mining . 4 Units.**

Introduction to principles of machine learning and data-mining. Learning algorithms for classifications, regression, and clustering. Emphasis is on discriminative classification methods such as decision trees, rules, nearest neighbor, linear models, and naive Bayes.

Prerequisite: Python programming knowledge is required.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 274A. Probabilistic Learning: Theory and Algorithms. 4 Units.**

An introduction to probabilistic and statistical techniques for learning from data, including parameter estimation, density estimation, regression, classification, and mixture modeling.

Prerequisite: COMPSCI 206

**COMPSCI 274B. Learning in Graphical Models. 4 Units.**

Models for data analysis are presented in the unifying framework of graphical models. The emphasis is on learning from data but inference is also covered. Real world examples are used to illustrate the material.

Prerequisite: COMPSCI 274A

**COMPSCI 274C. Neural Networks and Deep Learning. 4 Units.**

Neural network and deep learning from multiple perspectives. Theory of parallel distributed processing systems, algorithmic approaches for learning from data in various manners, applications to difficult problems in AI from computer vision, to natural language understanding, to bioinformatics and chemoinformatics.

Prerequisite: (STATS 120A and STATS 120B) or MATH 121A or COMPSCI 178 or COMPSCI 273A

Overlaps with COMPSCI 274A, COMPSCI 277, COMPSCI 276, COMPSCI 278, COMPSCI 274B, COMPSCI 273A.

Concurrent with COMPSCI 172B.

**COMPSCI 274D. Artificial Intelligence Frontiers: Technical, Ethical, and Societal. 4 Units.**

Explores the frontiers of artificial intelligence and related technologies with a focus on the underlying ethical, legal, and societal challenges and opportunities they create. Encourages critical thinking about these issues.

Prerequisite: Recommended: COMPSCI 172B and COMPSCI 178.

Restriction: Graduate students only.

Concurrent with COMPSCI 172C.

**COMPSCI 274E. Deep Generative Models. 4 Units.**

Discusses probabilistic approaches to deep learning such as generative models and their applications in computer vision, NLP, the natural sciences, and other fields. Coursework may include both homework and project components.

Prerequisite: COMPSCI 178 or COMPSCI 273A or STATS 120B. Recommended: Advanced machine learning or graphical models courses such as COMPSCI 274A or COMPSCI 274B or CS 273C or COMPSCI 276.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Graduate students only.

**COMPSCI 274P. Neural Networks and Deep Learning. 4 Units.**

Introduction to principles of machine learning and neural networks. Architecture design. Feedforward and recurrent networks. Learning models and algorithms. Applications to data analysis and prediction problems in areas such as machine vision, natural language processing, biomed, and finance.

Prerequisite: COMPSCI 271P. COMPSCI 271P with a grade of B or better. Knowledge of Python programming is required.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 276. Reasoning in Probabilistic Graphical Models. 4 Units.**

Focuses on algorithms for probabilistic reasoning using graphical models such as Bayesian Networks and Markov Networks that encode knowledge as local probabilistic relations. Tasks include finding most likely scenarios over a subset of variables, or updating posterior probability, given observations.

Prerequisite: A basic course in probability.

**COMPSCI 278. Probability Models. 4 Units.**

Advanced probability, discrete time Markov chains, Poisson processes, continuous time Markov chains. Queuing or simulation as time permits.

Prerequisite: STATS 120A

Concurrent with STATS 121.

**COMPSCI 284A. Artificial Intelligence in Biology and Medicine. 4 Units.**

Introduction to computational methods in molecular biology, aimed at those interested in learning about this interdisciplinary area. Covers computational approaches to understanding and predicting the structure, function, interactions, and evolution of DNA, RNA, proteins, and related molecules and processes.

Prerequisite: A Basic course in algorithms or a basic course in molecular biology.

Concurrent with COMPSCI 184A.

**COMPSCI 284C. Computational Systems Biology. 4 Units.**

Computational inference and modeling of gene regulation networks, signal transduction pathways, and the effects of regulatory networks in cellular processes, development, and disease. Introduction of required mathematical, computational, and data handling tools.

Prerequisite: COMPSCI 284A or (BIO SCI 99 and MATH 2D)

Concurrent with COMPSCI 184C.

**COMPSCI 285. Mathematical and Computational Biology . 4 Units.**

Analytical and numerical methods for dynamical systems, temporal-spatial dynamics, steady state, stability, stochasticity. Application to life sciences: genetics, tissue growth and patterning, cancers, ion channels gating, signaling networks, morphogen gradients. Probabilistic methods.

Prerequisite: MATH 227A

Same as MATH 227C.

**COMPSCI 290. Research Seminar. 2 Units.**

Forum for presentation and criticism by students of research work in progress. Presentation of problem areas and related work. Specific goals and progress of research.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**COMPSCI 294P. Keystone Professional Writing and Communication for Computer Science Careers. 4 Units.**

Well-developed written and oral communication skills relevant to computer science professionals including oral presentations, short descriptive writing assignments, and one longer writing assignment related to a research replication project.

Restriction: Graduate students only.

**COMPSCI 295. Special Topics in Information and Computer Science . 4 Units.**

Studies in selected areas of Information and Computer Science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**COMPSCI 295P. Keystone Project for Computer Science. 4 Units.**

Design and development of a software system or a hardware component of a system based on knowledge of advanced computer science principles. Students implement at least a working prototype and test this using relevant input data.

Restriction: Graduate students only.

**COMPSCI 296. Elements of Scientific Writing. 4 Units.**

Introduces the concepts and principles of good scientific writing, demonstrates them by examples drawn from the literature, and uses a hands-on approach to apply them to documents being written by the participants.

Grading Option: Satisfactory/unsatisfactory only.

**COMPSCI 296P. Capstone Professional Writing and Communication for Computer Science Careers . 4 Units.**

Written and oral communication for computer science and IT careers. Production of the detailed design and development document for the concurrent capstone design class and refinement of written documents and oral communications skills needed for a successful job search.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 297P. Capstone Design Project for Computer Science . 4 Units.**

Design and development of app, software system, or hardware component of system based on students' prior knowledge of advanced computer science principles. Implement at least a working prototype and test this using relevant use cases and/or input data.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 298. Thesis Supervision. 2-12 Units.**

Individual research or investigation conducted in preparation for the M.S. thesis option or the dissertation requirements for the Ph.D. program.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Information and Computer Science majors only.

**COMPSCI 298P. Computer Science Practicum. 1-4 Units.**

Internship in which students work individually at an outside organization to gain experience with the challenges involved in technology-related work.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: School of Info & Computer Sci students only. Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 299. Individual Study. 1-12 Units.**

Individual research or investigation with Computer Science faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Information and Computer Science majors only.

**COMPSCI 299P. Individual Study. 4-8 Units.**

Supervised individual study in computer science.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 4 times.

Restriction: Master of Computer Science Degree students have first consideration for enrollment. Graduate students only.

## Computer Science and Engineering (CSE)

### Courses

**CSE 90. Systems Engineering and Technical Communications . 2 Units.**

Introduces systems engineering concepts, including specifications and requirements, hardware and software design, integration, testing, and documentation. Emphasizes organization and writing of reports and effective presentations.

Restriction: Computer Science Engineering Majors have first consideration for enrollment.

**CSE 112. Electronic Devices and Circuits. 4 Units.**

A first course in the design of Very Large Scale Integrated (VLSI) systems. Introduction to CMOS technology; MOS transistors and CMOS circuits. Analysis and synthesis of CMOS gates. Layout design techniques for building blocks and systems. Introduction to CAD tools.

(Design units: 4)

Prerequisite: PHYS 7D and (CSE 70A or EECS 70A)

Overlaps with EECS 119, EECS 170D.

Restriction: Computer Science Engineering Majors have first consideration for enrollment.

**CSE 199. Individual Study. 1-4 Units.**

Supervised independent reading, research, or design for undergraduate Engineering majors. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Repeatability: May be taken for credit for 8 units.

## Criminology, Law and Society (CRM/LAW)

### Courses

**CRM/LAW C7. Introduction to Criminology, Law and Society . 4 Units.**

Introduces characteristics of the U.S. criminal justice system, including responses to crime, components of the system, and current challenges to the system. Examines structure and function of police and courts, criminal procedure, and sentencing and incarceration policies.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

(III)

**CRM/LAW C10. Fundamentals of Criminology, Law and Society . 4 Units.**

Introduces three interdisciplinary literatures: criminology, socio-legal studies, and justice studies. Focuses on theoretical and empirical work addressing law making, law breaking, and legal systems.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

(III)

**CRM/LAW H80. The Properties of Property. 4 Units.**

Develops an understanding and critique of private property. Draws from interdisciplinary sources to explore the foundations of private property, the institutions that support it over time, and possible alternatives to it.

Restriction: Campuswide Honors Collegium students only.

(III)

**CRM/LAW C100. Special Topics in Criminology, Law and Society. 4 Units.**

Course content varies with interest of the instructor.

Repeatability: Unlimited as topics vary.

**CRM/LAW C101. American Law. 4 Units.**

Introduction to substantive and procedural law governing private dispute resolution, including common law (tort, property, contracts), lawsuits (civil procedure), and alternative dispute resolution; emphasis on the socio-legal ramifications of private disputes, particularly the modern tort system and tort reform movement.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C102. Introduction to the Comparative Study of Legal Cultures. 4 Units.**

Traces the anthropological and comparative cultural study of law from the nineteenth century to the present; briefly surveys the diversity of recorded legal cultures and critically examines key concepts which have been used to describe and classify them.

Same as INTL ST 124A.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**CRM/LAW C103. US Legal Thought. 4 Units.**

Evolution of legal thought in socio-historical context from 19th century to present; emphasizes the rise and fall of legal classicism and modern socio-legal critiques, including the law and society movement, critical legal studies, feminist legal theory, and critical race studies.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C104. Sociology of Law. 4 Units.**

Examines law creation and law enforcement in their social and political context. Discusses the major theories of law and the modern state, and presents case studies in order to evaluate the strengths and weaknesses of these theoretical perspectives.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C105. Psychology and the Law. 4 Units.**

Psychological assumptions of the American legal system and mental health aspects of provision of criminal justice services. Civil commitment, insanity defense, competence to stand trial, jury selection, eyewitness identification. Use of police, courts, correctional institutions in prevention of behavior disorder.

Same as PSCI 193E.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment.

**CRM/LAW C106. Crime and Public Policy. 4 Units.**

Explores nature and dimensions of crime in America and uses and limits of various strategies to control it. Topics include growth of imprisonment, the problem of domestic violence, the death penalty, gun control, and the potential of crime prevention programs.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C107. Deviance. 4 Units.**

Perspectives on deviance and criminality in behavior, institution, community, and myth. The suitability of contemporary theories of deviant behavior.

Same as SOCIOL 156, PSYCH 177D.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**CRM/LAW C108. Criminological Theory. 4 Units.**

Explores the question of crime causation from a number of theoretical perspectives in the social sciences. Schools of thought examined include utilitarianism, positivism, human ecology, social structural approaches, social process (learning) theories, labeling, and radical-critical (political) perspectives.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C109. Juvenile Delinquency. 4 Units.**

Patterns of delinquent behavior, theories that explain behavior, current research aimed at enhancing exploratory power. Attempts to prevent and control delinquency are put in historical perspective. Development of the current juvenile justice system and evolution of modern juvenile law.

Same as PSCI 193B.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment.

**CRM/LAW C110. Community Context of Crime. 4 Units.**

Examines the social context of high-crime communities, with special emphasis on the problems of poverty, joblessness, economic inequality, and racial discrimination. Assesses debates on the causes of these problems, and on the most effective policies to combat them.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C111. Theories of Punishment. 4 Units.**

Survey of the various schools of thought regarding formal punishment theory. The purposes of legal sanctions are examined, including those of deterrence, rehabilitation, retribution, and incapacitation. Considers problems in realizing formal goals of punishment in practice.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C112. Legal Sanctions and Social Control. 4 Units.**

Examination of criminal sanctions as mechanisms of social control. Includes the nature, function, and organization of courts as sanction generating institutions, and problems associated with punishing white-collar and corporate illegalities.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C113. Gender and Social Control. 4 Units.**

Examines the legal system's use of sex as an organizing characteristic, focusing particularly on sameness and difference feminism, and tracing the evolution of equal treatment of men and women in the areas of constitutional rights, employment, education, and military service.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C114. Miscarriages of Justice. 4 Units.**

Systematically describes, explains, and analyzes the causes and consequences of the wrongful accusation, prosecution, incarceration, and sometimes even execution, of the innocent in the American criminal justice system.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C115. Prisons, Punishment, and Corrections. 4 Units.**

A review of how the U.S. punishes and rehabilitates convicted law violators. The conflicts among the major purposes of sentencing—rehabilitation, deterrence, incapacitation—are discussed, as well as the effects of different sanctions on public safety, offender rehabilitation, and justice system costs.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C116. Race, Ethnicity, and Social Control. 4 Units.**

Provides a historical and sociological survey of racial and ethnic group relations in contexts of crime control, emphasizing the roles of racial ideology, structural racism, and social movements in shaping these dynamic relations, and their significance to American liberal democracy.

Same as CHC/LAT 152A.

**CRM/LAW C117. Imprisonment and Reentry. 4 Units.**

Offers an overview of imprisonment and reentry in the contemporary United States. Examines the development of the prison in the United States and explores changes in its composition, structure, and purpose over time.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C118. Domestic Violence. 4 Units.**

General perspectives about domestic violence and theoretical accounts about what causes such behavior.

Same as SOCECOL 118.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C119. Violence in Intimate Relationships. 4 Units.**

Responses to various forms of domestic violence, such as intimate partner violence and child abuse. Covers barriers to reporting to the police, and prosecutors and courts. Human services, such as safety planning for victims, treatment programs, and restorative justice approaches.

Corequisite:

Same as SOCECOL 119.

**CRM/LAW C120. Law and Inequality. 4 Units.**

Various aspects of the law as related to three specific areas of inequality: immigration and immigrants, race, and gender. The role of law as a tool of social reform and limitations of the legal system historically in resolving inequality issues.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C122. Constitutional Law. 4 Units.**

Examines the evolution of civil liberties and individual rights in the United States, focusing on how Constitutional Amendments and U.S. Supreme Court decision-making have shaped the ongoing political and legal struggles over issues such as privacy, abortion, and free speech.

Overlaps with POL SCI 174A.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C123. Family Law. 4 Units.**

Examines legal issues surrounding marriage, cohabitation, divorce, child custody and support, adoption, and the rights of parents and children in the family context. The findings of social science research are used to illuminate the legal issues.

Same as PSCI 193F.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C124. Mental Health and the Justice System. 4 Units.**

Covers the history of criminalization of persons with mental illness; challenges and needs; civil and outpatient commitment; law enforcement responses; mentally ill in jails and prisons; community supervision strategies; and reentry strategies for offenders with mental illness.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C127. Hate Crimes. 4 Units.**

Examines the causes, manifestations, and consequences of hate crimes and the larger social context within which they occur. The politics and dynamics of intergroup violence born of bigotry and manifested as discrimination; social policy designed to control bias-motivated violence.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C128. Environmental Law and Policy . 4 Units.**

Environmental law as a combination of traditional legal principles and newly created statutes, rules, and decisions applied to environmental protection. Investigates roles of courts, legislature, executive branch and administrative agencies, and private citizens attempting to regulate environmental quality.

Same as UPPP 133.

Restriction: Criminology, Law and Society Majors only. Planning, Policy, and Design Majors only.

**CRM/LAW C130. Seminar on Gangs. 4 Units.**

An overview of gangs, including the nature and definition of gangs; types of gangs; diversity of membership; theoretical explanations; criminal behavior; drug use and sales; law enforcement responses; gangs in correctional institutions; intervention and prevention strategies; and public policy issues.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C131. Organized Crime and American Society. 4 Units.**

Examination of the phenomenon of American organized crime from a sociological perspective. Explanation of methods by which organized crime is tolerated at various levels of society. Emphasis on ways in which 'underworld' interests interact with legitimate economic and political institutions.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C132. Forensic Science, Law, and Society. 4 Units.**

Examines use of 'forensic science' to resolve issues arising in criminal cases including crime scene analysis, DNA testing, fingerprints, trace evidence comparisons, profiling, lie detectors, other forensic techniques; evaluation, statistical characterization, and legal admissibility of evidence; regulation of forensic laboratories.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C133. Homicide and Suicide. 4 Units.**

Examines similarities and differences among homicide and suicide, two major causes of death.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C134. Victimless Crimes. 4 Units.**

Examines major theoretical, empirical, and policy-oriented research related to the design, implementation, and analysis of government intervention, through the criminal sanction, in the spheres of vice and morality.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C135. Mass Incarceration and Social Inequality in America. 4 Units.**

Explores the origins and consequences of mass incarceration; extraordinarily high incarceration rates within particular demographic groups above and beyond historical levels in the U.S. Theoretical explanations for, and current policy debates around, mass incarceration are covered.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C136. Forensic Psychology: Advanced Seminar. 4 Units.**

Focuses on the psychology of criminal offending, particularly violent behavior. Examines violence, sexual offending, and mental disorder related to crime with regard to clinical assessment and treatment; mental health services within forensic institutions.

Prerequisite: (PSCI 9 or PSCI 11C or PSYCH 7A or PSYCH 9C) and PSCI 102C and (PSCI 178S or CRM/LAW C149)

Same as PSCI 156C, PSYCH 177F.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C139. Police and Change. 4 Units.**

Organizational efforts to modify police conduct are addressed by focusing on the history of policing in the United States including training, education, and the contributions of women.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C140. Surveillance and Society. 4 Units.**

Explores the development and deployment of surveillance technologies in contemporary society. The social and legal impact of surveillance technologies, in such areas as crime control, privacy, trust, community, democracy, and the war on terror.

Restriction: Criminology, Law and Society Majors only.

**CRM/LAW C142. White-Collar Crime. 4 Units.**

Examines criminal activity in business and corporate enterprise, organizations, and the professions. Theories regarding the causes and control of white-collar and corporate crime are covered as well as the numerous definitions of these terms.

Same as SOCIOL 142.

Restriction: Sociology Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C144. Criminal Law. 4 Units.**

Deals specifically with the substantive nature of criminal law and its historical development. Focuses on understanding the development of fundamental doctrinal principles upon which criminal law is based, including mens rea, actus reus, homicide, causation, group criminality, and exculpation.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C145. Government Crime. 4 Units.**

Examines the legal, organizational, and political issues involved in the generation and control of government lawlessness. Readings present historical and theoretical perspectives in the abuse of government authority and the ability of the legal system to control such behavior.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C149. Violence in Society. 4 Units.**

Current theory and research on aggression; anger and violence as problems in individual and social functioning. Process and functions of anger examined with regard to normal behavior and psychopathology. The determinants, prevalence, and implications of violence in society are analyzed.

Prerequisite: PSCI 9 or PSCI 11C or PSYCH 7A or PSYCH 9C

Same as PSCI 178S.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment.

**CRM/LAW C150. The Legal Profession. 4 Units.**

Role of the legal profession in modern society, the diverse professional roles lawyers play, the American legal profession compared with that of other societies. 'Litigation explosion,' ethical problems, interactions between lawyers and other professionals, training and socialization of new lawyers.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C156. Cross-Cultural Research on Urban Gangs. 4 Units.**

Taking an urban policy approach, examines the background and contemporary traditions of gangs in several ethnic groups including African-, Asian-, and Mexican-Americans. Cross-cultural exploration of the varied facets of gang life. The major social-control institutions affecting them.

Same as CHC/LAT 153.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment. Chicano/Latino Studies Majors have first consideration for enrollment.

**(VII)****CRM/LAW C160. Forensic Psychology . 4 Units.**

Forensic psychology is the interface between clinical psychology and the law. Emphasizes clinically relevant legal topics (insanity defense; competency to stand trial) and includes critical thinking about issues that arise when psychologists are involved in legal proceedings.

Prerequisite: PSCI 9 or PSCI 11B or PSCI 11C

Same as PSCI 161C.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C162. Crime Hotspots. 4 Units.**

Criminological theories of local public safety hazards or hotspots are introduced. Spatial statistics are developed for different types of hotspots. Hotspot policing theories are introduced and research on the effectiveness of policing strategies is reviewed.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C163. Ethics and Politics of Justice. 4 Units.**

Theoretical perspective on how ethics and politics relate to criminal justice through an introduction to moral philosophy; consideration of specific theories of punishment and justice; and consideration of practical and empirical illustrations of the intersection of ethics, politics, and justice.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C164. Social Control of Delinquency. 4 Units.**

Assumes familiarity with theories of delinquency, the juvenile justice system, and elements of juvenile law. Explores socio-historical origins and evolution of juvenile justice, current research and policy on delinquency prevention and treatment, and future directions of law, policy, and practice.

Prerequisite: Recommended: CRM/LAW C109.

Same as PSCI 193C.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C165. The Death Penalty. 4 Units.**

Examines why the U.S. continues to have a death penalty when so many other countries have abandoned it. Arguments for and against the death penalty are covered.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C167. Crime Measurement. 4 Units.**

The strengths and weaknesses of three crime measures (police reports, victim surveys, and offender self-reports) are illustrated through analyses of research articles. Common measurement problems are analyzed with a focus on reliability and validity.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C168. Extreme Punishment . 4 Units.**

Explores the history and law of America's Eighth Amendment prohibition against cruel and unusual punishment, examining the death penalty, long prison sentences, harsh confinement conditions, and other punishments. Students debate practical, legal, and moral arguments for and against these punishments.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C169W. Advanced Research Methods. 4 Units.**

For students planning to conduct senior research projects or apply to graduate school in social research fields. Topics include reviewing literature, preparing a research proposal, protecting human subjects, citing scholarly work, building measures, estimating sample size, interview and presentation skills.

Prerequisite: SOCECOL 10 and SOCECOL 13. Satisfactory completion of the Lower-Division Writing requirement.

Same as SOCECOL 111W, PSCI 111W, UPPP 114W.

**(Ib)****CRM/LAW C172. Culture Change and the Mexican People. 4 Units.**

Reviews culture contact and colonization, innovation diffusion, acculturation, assimilation, culture conflict and marginality, modernization, urbanization, legal transformations. Mexico and the Southwestern U.S. are reviewed through several centuries to better appreciate the indigenous base of the Mexican people.

Same as CHC/LAT 155.

**CRM/LAW C173. Maritime Piracy, Law and Society. 4 Units.**

Explores the historical and contemporary images and reality of pirates and piracy since the 16th century across the globe through an analysis of primary sources, key historiographical and legal debates, and criminological theories.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C174. Immigration and Crime. 4 Units.**

Examines immigration and crime in the global context, highlighting immigrants as criminals and victims; immigration and crime control; immigrants' perceptions of the criminal justice system; public discourse and public perception on immigration and crime; and human rights issues.

**CRM/LAW C175. Issues in Policing. 4 Units.**

Lectures and readings focus on the history and strategies of policing, measuring the quality of policing, and police misconduct. Strategies for enhancing the quality of policing for controlling misconduct are covered.

**CRM/LAW C176. Classics in Crime Cinema. 4 Units.**

A multidimensional understanding of crime films and how they shape public thinking about crime and criminals.

Restriction: CRM/LAW C176 and CRM/LAW C20 may not be taken for credit.

**CRM/LAW C177. Eyewitness Testimony. 4 Units.**

Faulty eyewitness testimony is a major cause of wrongful convictions. Covers the fast-growing topic of eyewitness testimony and memory for real-world events, both how psychologists study eyewitness capacity, and how the legal system has dealt with eyewitness issues.

Prerequisite: SOCECOL 10

Same as PSCI 193G.

Restriction: Seniors only. Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

Concurrent with CRM/LAW C263.

**CRM/LAW C178. Critical Race Theory. 4 Units.**

Introduction to Critical Race Theory and key American cases on racial inequality. Using this literature, examines the possibilities and pitfalls of legal claims of race, gender, and sexuality discrimination in the age of colorblindness.

Same as AFAM 157.

Restriction: Upper-division students only.

**CRM/LAW C179. Race and Incarceration. 4 Units.**

Examines the racial politics of mass incarceration through historical, empirical, theoretical, and legal frameworks. Focuses on race, gender, and sexual differences to develop a critique on policing, incarceration, and other forms of punishment.

**CRM/LAW C180. Power, Constructions of Deviance, and Social Control . 4 Units.**

Examines the forms and limits of power in the construction of social deviants. Theories of state power are covered to understand the prison system as a contemporary driver of social inequality. The collateral consequences of mass incarceration are discussed.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment.

**CRM/LAW C182. Illegal Economics. 4 Units.**

How illegal firms function in illegal markets, why individuals participate in these groups and markets, and what federal, state, and local governments do to disrupt organized illegal activity.

Same as ECON 146A.

Restriction: Business Economics Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C183. Controversies, Courts, Cultures: The Anthropology of Law. 4 Units.**

Assesses the contributions anthropology has made to legal scholarship, reviewing historical and contemporary themes. Considers both comparative questions of law's norms, structures, and practices around the globe, and the specific insights anthropology offers about contemporary U.S. law.

Same as ANTHRO 127.

**(III)****CRM/LAW C186. Social Media and The Law. 4 Units.**

Examines legal and policy issues raised by the rise of social media. Surveys how social networking platforms and other emerging technologies impact the right to privacy, public perceptions of judicial systems, and the law generally.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C187. Undocumented Immigrant Experiences. 4 Units.**

Examines the experiences of undocumented immigrants and the policies that structure their educational, economic, social, and political participation.

Same as ASIANAM 130, CHC/LAT 164A, SOCIOL 177C.

(III and VII ).

**CRM/LAW C190. Applied Statistics in Social and Behavioral Research. 4 Units.**

Covers statistical techniques used to describe and make generalizations about phenomena represented by data. Hands-on experience in data analysis and interpretation using statistical software (SPSS, STATA) is emphasized. Topics include data visualization, ANOVA, multiple regression, and categorical data analyses.

Prerequisite: SOCECOL 13

Same as PSCI 190, SOCECOL 190, UPPP 190.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**CRM/LAW C191. Law and Modernity. 4 Units.**

The rise and spread of Enlightenment legal traditions, social contract theory, individual rights, ideologies of 'liberty, equality, fraternity'; contradictions of liberal law, its understandings of 'primitive' and 'civilized'; pervasive myths of property, difference, race, and rights. Reading- and writing-intensive.

Same as ANTHRO 127A.

**CRM/LAW C196. Research Seminar in Criminology, Law and Society. 4 Units.**

Special topics research seminar. Content varies with interest of instructor. Capstone research opportunity with Criminology, Law and Society faculty members.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only. Anthropology Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C201. Research Methods. 4 Units.**

An introduction to techniques of inductive methodologies, including qualitative interviewing and participant observation, and deductive methodologies, including survey research and experimental and quasi-experimental design. Provides a sound overview of research methodology with tools to pursue specific methods in greater depth.

Restriction: Graduate students only.

**CRM/LAW C202. Research Methods II. 4 Units.**

Covers qualitative approaches (interview strategies, varieties of ethnography, archival and historical methods, etc.) and quantitative approaches (survey methods, experimental designs, secondary data sets, comparative and international data, etc.), and concludes with mixed-method approaches.

Prerequisite: CRM/LAW C201. CRM/LAW C201 with a grade of B or better

Restriction: Graduate students only.

**CRM/LAW C203A. Qualitative Methods Practicum. 4 Units.**

Designed to deepen students' familiarity with qualitative research strategies and to guide them through the initial stages of their Second Year Project requirement, such as the development of an original research proposal and/or a research instrument.

Prerequisite: CRM/LAW C202. CRM/LAW C202 with a grade of B or better

Restriction: Graduate students only.

**CRM/LAW C203B. Quantitative Methods Practicum. 4 Units.**

Deepens familiarity with quantitative research and provides a foundation for the second-year paper, e.g., initial models for data analysis and/or a replication study. Students evaluate what assumptions are necessary for credible inference in different evaluation approaches.

Prerequisite: CRM/LAW C202. CRM/LAW C202 with a grade of B or better

Restriction: Graduate students only.

**CRM/LAW C207. Land-Use Law. 4 Units.**

Investigates legal and institutional frameworks for development control. Review of constitutional issues implicated in land-use regulation. Traces development control historically and analyzes contemporary approaches to land-use control which reflect environmental and economic development concerns.

Same as UPPP 207.

Restriction: Graduate students only.

**CRM/LAW C210. Introduction to Criminology, Law and Society. 4 Units.**

Familiarizes students with the interrelated fields of criminology, law and society studies, and criminal justice studies. Organized around three well-established interdisciplinary literatures: criminology, sociolegal studies, and criminal justice studies.

Restriction: Graduate students only. Criminology, Law and Society Majors only.

**CRM/LAW C211. Legal Institutions and Society. 4 Units.**

Acquaints students with the institutions of U.S. legal system and its operations, as well as with the constitutional framework undergirding this system, and defines the relationship between U.S. citizens and government at a variety of levels.

Restriction: Graduate students only.

**CRM/LAW C212. Police, Courts, and Corrections. 4 Units.**

Focuses on basic policy issues in the administration of the criminal justice system. The key elements of the criminal justice system are police, courts, and corrections. Prepares students for continued study of these organizations.

Restriction: Graduate students only.

**CRM/LAW C213. Crime and Social Deviance. 4 Units.**

Examines the major social scientific perspectives on criminal and deviant behavior. Specific deviant and criminal activities are described and explained using established theoretical frameworks.

Restriction: Graduate students only.

**CRM/LAW C214. Research Methods. 4 Units.**

Structures research methodology, the approach to developing and evaluating knowledge of the sciences for use in criminal justice professional activities. Special emphasis on differentiating scientific approaches from pseudo-science.

Restriction: Graduate students only.

**CRM/LAW C215. Applied Statistics. 4 Units.**

Provides a basis for the use of fundamental statistical analysis techniques for solving public policy and management problems through a series of assignments, examinations, and online discussions and demonstrations.

Restriction: Graduate students only.

**CRM/LAW C216. Public Policy, Crime, and Criminal Justice. 4 Units.**

Increases understanding of crime, violence, and the criminal justice system. Assesses the state of knowledge on key policy issues of our time. Discusses the contribution of communities, schools, employment, drugs, guns, and alcohol to crime and violence.

Restriction: Graduate students only.

**CRM/LAW C217. Leadership. 4 Units.**

Introduces concepts, ideas, and theories about leadership and its operation. Explores leadership concepts through interviews with leaders from the community and fellow classmates.

Restriction: Graduate students only.

**CRM/LAW C218. Social Problems, Law, and Policy. 4 Units.**

Capstone course for M.A.S. program in Criminology, Law and Society. Students choose a social problem related to crime, criminal justice, and law; relate the problem to legal and social issues; and devise a plan of action to research the problem.

Restriction: Graduate students only. Criminology, Law and Society Majors only.

**CRM/LAW C219. Hate Crime. 4 Units.**

Examines the causes, manifestations, and consequences of hate crimes, as well as the larger social context within which they occur, are reacted to, and seem to be proliferating.

Restriction: Graduate students only.

**CRM/LAW C221. Sentencing and Corrections. 4 Units.**

Reviews U.S. attempts to punish and rehabilitate convicted law violators. Conflicts among major purposes of sentencing (rehabilitation, deterrence, incapacitation, and retribution) are discussed, as well as effects of different sanctions on public safety, offender rehabilitation, and justice system costs.

Restriction: Graduate students only.

**CRM/LAW C222. Ethnography. 4 Units.**

Explores the theory and practice of ethnography with a focus on anthropology, the discipline most associated with ethnography. Students are exposed to the theoretical underpinnings of ethnographic work, traditional and innovative practices, and sample ethnographies.

Same as ANTHRO 230F, CHC/LAT 217.

Restriction: Graduate students only.

**CRM/LAW C224. Organizational Perspectives on the Legal System. 4 Units.**

Familiarizes students with organization theory and research as ways to make sense of, navigate, and act on the legal system. Acquaints students with major frameworks in organization theory and their application to the system of legal organizations.

Restriction: Graduate students only.

**CRM/LAW C226. Causal Methods for Policy Analysis. 4 Units.**

Provides students with hands-on experience using existing data to estimate the impact of policy and law on individual behavior or aggregate social outcomes. Covers different econometric strategies used to identify causal effects in the absence of an experiment.

Restriction: Graduate students only.

**CRM/LAW C228. Criminology: Micro Approaches. 4 Units.**

Introduces students to the dominant theories in modern criminology, their theoretical antecedents and extensions, major empirical tests and implications for programs, policy and practice, and focuses on micro-level, individual theories of crime causation. Formerly Criminology, Law and Society C233A.

**CRM/LAW C229. Criminology: Macro Approaches. 4 Units.**

Introduces students to the dominant theories in modern criminology, their theoretical antecedents and extensions, major empirical tests and implications for programs, policy and practices, and addresses macro-level theories of crime causation. Formerly Criminology, Law and Society C233B.

**CRM/LAW C231. Crime and Gender . 4 Units.**

Examines the legal, political, social, economic, and policy implications of making gender (primarily) and race (secondarily) the focus in the study of crime, criminal law, and the criminal justice system.

Restriction: Graduate students only.

**CRM/LAW C232. Juvenile Delinquency. 4 Units.**

Examines the major theoretical perspectives regarding the onset, persistence, and desistance of juvenile delinquency, and examines empirical evidence for each perspective.

Restriction: Graduate students only.

**CRM/LAW C234. Anthropology of Law. 4 Units.**

Law has been a key site of anthropological inquiry since the discipline's nineteenth-century origins. Course introduces and critically assesses the contributions anthropology has made to sociolegal lytic trends.

Restriction: Graduate students only.

**CRM/LAW C238. White-Collar Crime. 4 Units.**

Examines the illegal behavior of individuals who commit crimes in the course of their employment. Special attention will be paid to ways in which power and organizational structure affect the behavior of the white-collar offenders.

Restriction: Graduate students only.

**CRM/LAW C239A. Law and Society I. 4 Units.**

Provides an introduction to the law and society field from its origins in social scientific, legal, and philosophical scholarship during the eighteenth, nineteenth, and early-twentieth centuries. Formerly Criminology, Law, and Society C239.

Restriction: Graduate students only.

**CRM/LAW C239B. Law and Society II. 4 Units.**

Building on Law and Society I, addresses contemporary issues in the field from mid-twentieth century to the present with emphasis on the degree to which the field's foundational assumptions are being challenged, refined, or confirmed through current research.

Prerequisite: CRM/LAW C239A

Restriction: Graduate students only.

**CRM/LAW C240A. Socio-Legal Workshop.**

Designed to foster intellectual discussion, encourage practice and skill-building in providing feedback, and build substantive knowledge of legal scholarship, this workshop is for both law and doctoral students across campus who are interested in interdisciplinary approaches to studying law.

Grading Option: In Progress (Letter Grade with S/U).

Restriction: Graduate students only.

**CRM/LAW C240B. Socio-Legal Workshop.**

Designed to foster intellectual discussion, encourage practice and skill-building in providing feedback, and build substantive knowledge of legal scholarship, this workshop is for both law and doctoral students across campus who are interested in interdisciplinary approaches to studying law.

Prerequisite: CRM/LAW C240A

Grading Option: In Progress (Letter Grade with S/U).

Restriction: Graduate students only.

**CRM/LAW C240C. Socio-Legal Workshop. 4 Units.**

Designed to foster intellectual discussion, encourage practice and skill-building in providing feedback, and build substantive knowledge of legal scholarship, this workshop is for both law and doctoral students across campus who are interested in interdisciplinary approaches to studying law.

Prerequisite: CRM/LAW C240B. CRM/LAW C240B with a grade of B or better

Restriction: Graduate students only.

**CRM/LAW C242. Crime Hotspots. 4 Units.**

Focuses on the criminological theory of hotspots, beginning with the "when, where, and why" questions and ending with the practical policing strategies that have been developed to mitigate hotspot public safety hazards.

Restriction: Graduate students only.

**CRM/LAW C248. Geographic Information Systems. 4 Units.**

Prepares students to become proficient in the basic GIS functionality including visualization, data management, and spatial analysis.

Restriction: Graduate students only.

**CRM/LAW C250. Preventing Errors of Justice. 4 Units.**

Examines the types of errors that are made in the U.S. criminal justice system and how we might prevent these errors, including failures to convict guilty offenders as well as wrongful convictions of the innocent.

Restriction: Graduate students only.

**CRM/LAW C252. Issues in Environmental Law and Policy. 4 Units.**

Treatment of legal and policy strategies for promoting environmental protection and deterring environmental degradation within the context of other societal objectives. Topical approach with a focus on problems of special interest to criminologists and to environmental policy specialists.

Same as UPPP 252.

Restriction: Graduate students only.

**CRM/LAW C253. Cybercrime, Cybersecurity, and Society. 4 Units.**

Introduces students to the world of cybercrime in the age of globally networked digital, and information and communication technologies (ICT). Presents a socio-legal approach to the study of cybercrime, cybersecurity, and how it relates to society.

Restriction: Graduate students only. Criminology, Law and Society M.A.S. students only.

**CRM/LAW C254. Immigration in the US: Economic, Fiscal, and Social Outcomes. 4 Units.**

The changing patterns of immigration in the U.S. and the role that immigrants play in our society. In particular, the economic and social outcomes of immigration, as well as the relationship between immigration, crime, and criminal justice policy.

Restriction: Graduate students only. Criminology, Law and Society Majors only.

**CRM/LAW C255. Public Policy. 4 Units.**

Explores different approaches to public policy analysis, the diverse conceptions of the goals and objectives that should be served by policy, and the appropriate role of the policy analyst. Policy consequences are traced to indirect and subtle incentives and disincentives.

Same as UPPP 221, POL SCI 221A.

Restriction: Graduate students only.

**CRM/LAW C258. Crimmigration. 4 Units.**

Examines the criminalization of immigration, with an emphasis on U.S. enforcement procedures and outcomes. Analyzes the devolution of federal immigration law to local authorities, the rise in immigrant detention and deportation, and the militarization of the U.S.-Mexico border.

Same as CHC/LAT 225, SOCIOL 268.

Restriction: Graduate students only.

**CRM/LAW C260A. Race and Justice Studies Proseminar .**

A year-long proseminar conducted by a team of instructors specializing in race and justice studies. Conceived as a reading and peer mentor group focusing on intellectual and professional development. Required for students pursuing the Race and Justice Studies emphasis.

Grading Option: In Progress (Letter Grade with S/U).

Restriction: Graduate students only.

**CRM/LAW C260B. Race and Justice Studies Proseminar.**

A year-long proseminar conducted by a team of instructors specializing in race and justice studies. Conceived as a reading and peer mentor group focusing on intellectual and professional development. Required for students pursuing the Race and Justice Studies emphasis.

Prerequisite: CRM/LAW C260A

Grading Option: In Progress (Letter Grade with S/U).

Restriction: Graduate students only.

**CRM/LAW C260C. Race and Justice Studies Proseminar. 4 Units.**

A year-long proseminar conducted by a team of instructors specializing in race and justice studies. Conceived as a reading and peer mentor group focusing on intellectual and professional development. Required for students pursuing the Race and Justice Studies emphasis.

Prerequisite: CRM/LAW C260B

Restriction: Graduate students only.

**CRM/LAW C261. Race and Justice Studies Writing Seminar . 4 Units.**

A required writing-intensive seminar conducted by an instructor affiliated with the Race and Justice Studies emphasis. Students with manuscripts on relevant topics will read and critique peer manuscripts, and revise manuscripts toward completion of articles, dissertation chapters, and other publications.

Prerequisite: CRM/LAW C260C

Same as HUMAN 261, SOC SCI 253K.

Restriction: Graduate students only.

**CRM/LAW C262. Special Topics in Race and Justice Studies. 4 Units.**

A seminar focused on special issues in race and justice studies.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**CRM/LAW C263. Eyewitness Testimony. 4 Units.**

Examines the evidence that shows that faulty eyewitness memory is the major cause of wrongful convictions. Explores what the legal system thinks of eyewitness testimony and how the legal system has dealt with eyewitness issues.

Same as PSCI P263.

Restriction: Graduate students only.

**CRM/LAW C265. Memory and the Law. 4 Units.**

Examines the controversial topic of repressed memory, or perception and memory of real-world events.

Same as PSCI P265.

Restriction: Graduate students only.

**CRM/LAW C266. Psychology and the Law. 4 Units.**

Overview of how psychology is applied to the civil and criminal justice systems, how case law shapes this application, and how legal decisions affect the direction of psychological research. Interdisciplinary approach to research in psychology, law, and/or criminology.

Same as PSCI P266.

Restriction: Graduate students only.

**CRM/LAW C268. Contemporary Issues in Crime and Justice. 4 Units.**

Intensive reading and discussion of several recent works that raise critical issues for criminology and criminal justice policy, with a special emphasis on issues of inequality, diversity, and social justice.

Restriction: Graduate students only.

**CRM/LAW C275. Special Topics in Criminology, Law and Society. 4 Units.**

Topics covered vary with interests of instructor.

Repeatability: Unlimited as topics vary.

**CRM/LAW C280A. Professionalization Proseminar.**

Focuses on two areas that are key to scholarly and professional success in graduate school but are rarely discussed in a structured setting: 1) publishing in peer-reviewed academic journals; and 2) preparing for the academic job market.

Grading Option: In Progress (Letter Grade with S/U).

Restriction: Graduate students only.

**CRM/LAW C280B. Professionalization Proseminar.**

Focuses on two areas that are key to scholarly and professional success in graduate school but are rarely discussed in a structured setting: 1) publishing in peer-reviewed academic journals; and 2) preparing for the academic job market.

Prerequisite: CRM/LAW C280A

Grading Option: In Progress (Letter Grade with S/U).

Restriction: Graduate students only.

**CRM/LAW C280C. Professionalization Proseminar. 4 Units.**

Focuses on two areas that are key to scholarly and professional success in graduate school but are rarely discussed in a structured setting: 1) publishing in peer-reviewed academic journals; and 2) preparing for the academic job market.

Prerequisite: CRM/LAW C280B

Restriction: Graduate students only.

**CRM/LAW C296. Doctoral Dissertation Research and Writing. 2-12 Units.**

Dissertation research with Criminology, Law and Society faculty.

Prerequisite: Advancement to candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**CRM/LAW C298. Directed Study. 2-4 Units.**

Directed study with Criminology, Law and Society faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CRM/LAW C299. Independent Study . 2-8 Units.**

Independent research with Criminology, Law and Society faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Criticism (CRITISM)

### Courses

**CRITISM 200A. Political Economy: Methods and Critique. 4 Units.**

Introduction to canonical texts in Marxism coupled with an examination of the questions of race, gender, ethnicity, and sexuality that distend the calculus of the canon's assumptive logic. May be taken after CLT&THY 200B.

Same as CLT&THY 200A.

Restriction: Graduate students only.

**CRITISM 220B. Studies in Literary Theory and Its History. 4 Units.**

Introduction to criticism and aesthetics for beginning graduate students. Readings from continental, English, and American theorists.

Same as HUMAN 220B.

Restriction: Graduate students only.

**CRITISM 240. Advanced Theory Seminar. 4 Units.**

Studies in selected areas of Criticism Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

## Culture and Theory (CLT&THY)

### Courses

**CLT&THY 200A. Political Economy: Methods and Critique. 4 Units.**

Introduction to canonical texts in Marxism coupled with an examination of the questions of race, gender, ethnicity, and sexuality that distend the calculus of the canon's assumptive logic. May be taken after CLT&THY 200B.

Same as CRITISM 200A.

Restriction: Graduate students only.

**CLT&THY 200B. Libidinal Economy: Methods and Critique. 4 Units.**

Introduction to canonical texts in psychoanalysis coupled with an examination of the questions of race, gender, ethnicity, and sexuality that distend the calculus of the canon's assumptive logic. May be taken before CLT&THY 200A.

Restriction: Graduate students only.

**CLT&THY 200C. Theory from Below. 4 Units.**

Introduction to systems of thought understudied or undervalued in academic canons--for instance, systems constituted in communities' practices or theories that do not seek permanence or generality.

Prerequisite: CLT&THY 200A and CLT&THY 200B

Restriction: Graduate students only.

**CLT&THY 241. Ethics, Erotics, and Will: Gendered Black Politics, Sexualized Racisms, and the Humanities. 4 Units.**

Introduces doctoral students to an interdisciplinary conversation about black queer sexuality and black heteropatriarchy. Uses disciplinary formations as a tool for understanding knowledge formations about the shifting relations that constitute sexuality, gender, and racial blackness.

Restriction: Graduate students only.

**CLT&THY 242. Afro-Pessimism and the Status of the Subject. 4 Units.**

Afro-Pessimism theorizes the Black as a being against which all other beings become legible as human subjects. Focuses on either the subject of psychoanalysis or the subject of capital accumulation in their explorations of the antagonism between Blackness.

Restriction: Graduate students only.

**CLT&THY 280. Independent Study. 4 Units.**

Limited to students who have not yet received the M.A. degree.

Repeatability: May be repeated for credit unlimited times.

**CLT&THY 289. Topics in Culture and Theory. 4 Units.**

Seminars on various topics in Culture and Theory.

Repeatability: Unlimited as topics vary.

**CLT&THY 298. Directed Reading. 4-12 Units.**

Directed readings on a specific topic agreed upon by students and their instructors. Limited to students who have completed their M.A. degree and are preparing for their qualifying exam.

Prerequisite: Completion of the M.A. degree.

Repeatability: May be repeated for credit unlimited times.

**CLT&THY 299. Dissertation Research. 4-12 Units.**

Dissertation research in Culture and Theory.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## Dance (DANCE)

### Courses

**DANCE 2. Dance Health and Injury Prevention. 4 Units.**

An overview of factors that affect the health of dancers. Includes evaluation of general health measures and prevention and management of common dance injuries.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 3. Scientific Concepts of Health. 4 Units.**

Introduction to the scientific foundations of health, emphasizing those pertaining to success in college and lifetime wellness. Includes principles of cardiorespiratory, musculoskeletal, flexibility, and nutritional fitness. A variety of learning experiences are offered to apply science to real life.

(II)

**DANCE 14. Social Dance. 2 Units.**

Contemporary and historical forms. Current ballroom, disco, and Western square dance forms; Latin ballroom dances; dances from the 20s, 30s, and 40s.

Grading Option: Pass/no pass only.

**DANCE 21A. Music for Dancers. 4 Units.**

Emphasis on the development of musical skills most pertinent to the dancer: vocabulary, notational literacy, rhythmic and melodic acuity, score reading, and fundamental analysis; working with live accompaniment.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 30A. Studio Workshop in Ballet I. 2 Units.**

Beginning ballet: fundamentals and principles of classical ballet with an emphasis on technique.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**DANCE 30B. Studio Workshop in Ballet I. 2 Units.**

Beginning ballet: fundamentals and principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 30A

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**DANCE 30C. Studio Workshop in Ballet I. 2 Units.**

Beginning ballet: fundamentals and principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 30A and DANCE 30B

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**DANCE 34. Men's Studio Workshop in Ballet. 2 Units.**

Emphasis on men's traditional ballet, techniques, and movements.

Prerequisite: DANCE 30A and DANCE 30B and DANCE 30C

Repeatability: May be repeated for credit unlimited times.

**DANCE 40A. Studio Workshop in Modern I. 2 Units.**

Fundamentals of modern dance: principles of modern tradition developed from Graham, Humphrey, and Wigman.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**DANCE 40B. Studio Workshop in Modern I. 2 Units.**

Fundamentals of modern dance: principles of modern tradition developed from Graham, Humphrey, and Wigman.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**DANCE 40C. Studio Workshop in Modern I. 2 Units.**

Fundamentals of modern dance: principles of modern tradition developed from Graham, Humphrey, and Wigman.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**DANCE 50A. Studio Workshop on Jazz I. 2 Units.**

Fundamentals of jazz: principles of jazz dance and contemporary forms incorporating the personal point of view of the instructor.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**DANCE 50B. Studio Workshop on Jazz I. 2 Units.**

Fundamentals of jazz: principles of jazz dance and contemporary forms incorporating the personal point of view of the instructor.

Prerequisite: DANCE 50A

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**DANCE 50C. Studio Workshop on Jazz I. 2 Units.**

Fundamentals of jazz: principles of jazz dance and contemporary forms incorporating the personal point of view of the instructor.

Prerequisite: DANCE 50B

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**DANCE 52A. Workshop in Tap I. 2 Units.**

Beginning tap: principles of rhythm and basic tap steps.

Repeatability: May be taken for credit 2 times.

**DANCE 52B. Workshop in Tap I. 2 Units.**

Beginning tap: principles of rhythm and basic tap steps.

Prerequisite: DANCE 52A

Repeatability: May be taken for credit 2 times.

**DANCE 52C. Workshop in Tap I. 2 Units.**

Beginning tap: principles of rhythm and basic tap steps.

Prerequisite: DANCE 52B

Repeatability: May be taken for credit 2 times.

**DANCE 60A. Choreography. 4 Units.**

Beginning-to-intermediate study of principles of dance composition. May include composition assignments for stage and video. By audition, works may be shown quarterly in public studio performances.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 60B. Choreography. 4 Units.**

Beginning-to-intermediate study of principles of dance composition. May include composition assignments for stage and video. By audition, works may be shown quarterly in public studio performances.

Prerequisite: DANCE 60A

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 60C. Choreography. 4 Units.**

Beginning-to-intermediate study of principles of dance composition. May include composition assignments for stage and video. By audition, works may be shown quarterly in public studio performances.

Prerequisite: DANCE 60A and DANCE 60B

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 80. Introduction to Ballet and Modern Dance. 4 Units.**

Survey of nineteenth and twentieth-century ballet, modern dance, and theatre dance.

Overlaps with DANCE 90B, DANCE 90C, DANCE 90A.

Restriction: Non-major only.

(IV, VIII)

**DANCE 81. American Ballet and Modern Dance since 1900. 4 Units.**

A survey of American ballet and modern dance in the twentieth and twenty-first centuries. Lectures are supplemented by video.

Overlaps with DANCE 90C.

Restriction: Non-major only. Dance 81 and Dance 90C may not both be taken for credit.

(IV)

**DANCE 82. Topics in World Dance. 4 Units.**

Various topics in world dance studies focusing on historical, social, and cultural contexts.

Repeatability: May be repeated for credit unlimited times.

(VIII)

**DANCE 83. Dance in Feature Film. 4 Units.**

Dance in film musicals and commercial dance films, concentrating especially on films from the 1930s through the 1970s.

(IV)

**DANCE 85. What Dance Does: From Ballet to Hip-Hop. 4 Units.**

Explores the way dance reflects culture and embodies new ideas. Examples for viewing and analysis come from ballet (with roots in Europe) and hip-hop (with roots in the African diaspora). Themes include gender, perceived racial difference, identity.

(IV)

**DANCE 90A. Dance History I. 4 Units.**

Global perspectives. Topics and histories of dance and movement practices from various parts of the world.

Overlaps with DANCE 80.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

(IV and VIII ).

**DANCE 90B. Dance History II. 4 Units.**

The history of dance in the western tradition from the Renaissance through the 19th century.

Prerequisite: DANCE 90A

Overlaps with DANCE 80.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

(IV and VIII ).

**DANCE 90C. Dance History III. 4 Units.**

The history of dance in the western tradition in the the 20th and 21st centuries.

Prerequisite: DANCE 90B

Overlaps with DANCE 80, DANCE 81.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

(IV ).

**DANCE 100. Kinesiology for Dance. 4 Units.**

The study of the production of dance movement by the musculoskeletal system. Anatomical and dynamic analysis of dance movement.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 103. Pilates. 2 Units.**

Basics of technique emphasizing alignment, breath control, correction of muscular imbalances.

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 104. Pilates Reformer. 2 Units.**

Utilizes the Universal Reformer apparatus, aiding the student in core stabilization, correcting muscular imbalances, increasing flexibility, and improving strength.

Prerequisite: DANCE 103

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 110. World Dance . 2 Units.**

Studio workshop of dances and movement sources of specified countries or areas.

Repeatability: May be taken for credit 6 times as topics vary.

**DANCE 125A. Teaching of Dance. 4 Units.**

Pedagogy. The methods and theory of teaching dance forms.

Prerequisite: DANCE 133A and DANCE 133B and DANCE 133C and DANCE 143A and DANCE 143B and DANCE 143C

Restriction: Upper-division students only. Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 127A. Costume Design for Dance. 4 Units.**

Costume design and construction specific to the body in motion. Theoretical study and practical execution.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 130A. Pointe Class. 2 Units.**

Beginning and intermediate pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 132A and DANCE 132B and DANCE 132C

Repeatability: May be taken for credit 3 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 132A. Studio Workshop in Ballet II. 2 Units.**

Intermediate ballet and beginning pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: (DANCE 30A and DANCE 30B and DANCE 30C) or audition. Prerequisites are for non-Dance majors only.

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**DANCE 132B. Studio Workshop in Ballet II. 2 Units.**

Intermediate ballet and beginning pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 132A

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**DANCE 132C. Studio Workshop in Ballet II. 2 Units.**

Intermediate ballet and beginning pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 132A and DANCE 132B

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**DANCE 133A. Advanced Studio Workshop in Ballet III. 2 Units.**

Advanced intermediate ballet and pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 132C. DANCE 132C with a grade of B+ or better. Placement by audition is also accepted.

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 133B. Advanced Studio Workshop in Ballet III. 2 Units.**

Advanced intermediate ballet and pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 133A

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 133C. Advanced Studio Workshop in Ballet III. 2 Units.**

Advanced intermediate ballet and pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 133A and DANCE 133B

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 134A. Advanced Studio Workshop in Ballet IV. 4 Units.**

Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 133A and DANCE 133B and DANCE 133C. DANCE 133C with a grade of B+ or better. Placement by audition is also accepted.

Repeatability: May be taken for credit 3 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 134B. Advanced Studio Workshop in Ballet IV. 4 Units.**

Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 134A

Repeatability: May be taken for credit 3 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 134C. Advanced Studio Workshop in Ballet IV. 4 Units.**

Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 134A and DANCE 134B

Repeatability: May be taken for credit 3 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 135A. Advanced Studio Workshop in Ballet V. 4 Units.**

Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 134A and DANCE 134B and DANCE 134C. DANCE 134C with a grade of B+ or better. Placement by audition is also accepted.

Repeatability: May be taken for credit 3 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 135B. Advanced Studio Workshop in Ballet V. 4 Units.**

Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 135A

Repeatability: May be taken for credit 3 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 135C. Advanced Studio Workshop in Ballet V. 4 Units.**

Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 135A and DANCE 135B

Repeatability: May be taken for credit 3 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 137. Repertory . 2 Units.**

Rehearsal and performance of repertoire from established ballet, modern, or jazz choreographers.

Prerequisite: (DANCE 133A and DANCE 133B and DANCE 133C) or (DANCE 143A and DANCE 143B and DANCE 143C)

Repeatability: May be taken for credit 3 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 139. Partnering. 2 Units.**

Principles of partnering techniques in various dance performance styles.

Prerequisite: DANCE 133A and DANCE 133B and DANCE 133C and DANCE 143A and DANCE 143B and DANCE 143C

Repeatability: May be taken for credit 4 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 142A. Studio Workshop in Modern II. 2 Units.**

Introduction to the principles of motion, including the use of breath, gravity, spatial awareness, and time values.

Prerequisite: DANCE 40A and DANCE 40B and DANCE 40C. Prerequisites are for non-Dance majors only.

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**DANCE 142B. Studio Workshop in Modern II. 2 Units.**

Introduction to the principles of motion, including the use of breath, gravity, spatial awareness, and time values.

Prerequisite: DANCE 142A

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**DANCE 142C. Studio Workshop in Modern II. 2 Units.**

Introduction to the principles of motion, including the use of breath, gravity, spatial awareness, and time values.

Prerequisite: DANCE 142A and DANCE 142B

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**DANCE 143A. Advanced Studio Workshop in Modern III. 2 Units.**

Builds on fundamentals of Dance 142A-B-C and introduces performance techniques.

Prerequisite: DANCE 142C. DANCE 142C with a grade of B+ or better

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 143B. Advanced Studio Workshop in Modern III. 2 Units.**

Builds on the fundamentals of DANCE 142A-DANCE 142B-DANCE 142C and introduces performance techniques.

Prerequisite: DANCE 143A

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 143C. Advanced Studio Workshop in Modern III. 2 Units.**

Builds on fundamentals of DANCE 142A-DANCE 142B-DANCE 142C and introduces performance techniques.

Prerequisite: DANCE 143A and DANCE 143B

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 144A. Advanced Studio Workshop in Modern IV. 2 Units.**

Synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Prerequisite: DANCE 143C. DANCE 143C with a grade of B+ or better

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 144B. Advanced Studio Workshop in Modern IV. 2 Units.**

Synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Prerequisite: DANCE 144A

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 144C. Advanced Studio Workshop in Modern IV. 2 Units.**

Synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Prerequisite: DANCE 144A and DANCE 144B

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 152A. Intermediate Studio Workshop in Jazz II. 2 Units.**

Intermediate jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: Prerequisites for non-Dance majors: DANCE 50A and DANCE 50B and DANCE 50C.

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**DANCE 152B. Intermediate Studio Workshop in Jazz II. 2 Units.**

Intermediate jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 152A

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**DANCE 152C. Intermediate Studio Workshop in Jazz II. 2 Units.**

Intermediate jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 152A and DANCE 152B

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**DANCE 153A. Advanced Studio Workshop in Jazz III. 2 Units.**

Advanced jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 152C. DANCE 152C with a grade of B+ or better

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 153B. Advanced Studio Workshop in Jazz III. 2 Units.**

Advanced jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 153A

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 153C. Advanced Studio Workshop in Jazz III. 2 Units.**

Advanced jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 153A and DANCE 153B

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 154A. Advanced Jazz: Performance Techniques IV. 2 Units.**

Advanced jazz emphasizing performance techniques.

Prerequisite: DANCE 153C. DANCE 153C with a grade of B+ or better

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 154B. Advanced Jazz: Performance Techniques IV. 2 Units.**

Advanced jazz emphasizing performance techniques.

Prerequisite: DANCE 154A

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 154C. Advanced Jazz: Performance Techniques IV. 2 Units.**

Advanced jazz emphasizing performance techniques.

Prerequisite: DANCE 154A and DANCE 154B

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only.

**DANCE 160. Improvisation. 2 Units.**

Structured and experiential improvisation to heighten the personal intuitive processes, the kinesthetic sense, spatial and temporal awareness, and to encourage insights into the potential movement resources of the individual for performance and choreography. Course encourages freedom of exploration.

Repeatability: May be taken for credit 2 times.

**DANCE 162A. Choreography II. 4 Units.**

Directed choreographic projects for stage or video integrating the elements of stagecraft. In process or completed works may be shown quarterly in public studio or stage performances.

Prerequisite: DANCE 60A and DANCE 60B and DANCE 60C. Audition required.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 162B. Choreography II. 4 Units.**

Directed choreographic projects for stage or video integrating the elements of stagecraft. In process or completed works may be shown quarterly in public studio or stage performances.

Prerequisite: DANCE 162A. Audition required.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 162C. Choreography II. 4 Units.**

Directed choreographic projects for stage or video integrating the elements of stagecraft. In process or completed works may be shown quarterly in public studio or stage performances.

Prerequisite: DANCE 162A and DANCE 162B. Audition required.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 163. Dance and Video Technology. 4 Units.**

Introduction to video and audio documentation of dance performance. Integrating dance performance within the film aesthetic. Techniques and technologies of video cameras, formats, editing, and projection. Overview of video compression and DVD authoring.

Prerequisite: DANCE 60A

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 164. Screendance. 4 Units.**

Overview of dance for film and choreography for the camera. Aesthetics of creating dance for the screen. Approaches for delivery of dance films to an audience, including projection, DVD, Web, and mobile devices. A final dance film project is required.

Prerequisite: DANCE 163

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 165. Choreographic Projects. 1-4 Units.**

Supervised choreographic projects for workshop productions.

Prerequisite: Audition required.

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 170. Dance Performance. 1-4 Units.**

Rehearsal and performance in a faculty-choreographed production.

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

**DANCE 171. Dance Workshop. 1-4 Units.**

Rehearsal and performance in a student-choreographed production.

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

**DANCE 172. Master of Fine Arts Concert. 1-4 Units.**

Rehearsal and performance in a graduate student-choreographed production.

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

**DANCE 174. UCI Dance Ensemble Performance. 1-4 Units.**

Performance with the UCI Dance Ensemble.

Repeatability: May be taken for credit 6 times.

Restriction: Sophomores only. Upper-division students only.

**DANCE 176. UCI Jazz Dance Ensemble. 2-4 Units.**

Rehearsal and performance in theatrical jazz dance, designed to provide an experience in assimilating various styles of jazz dance and in refining dance performance techniques. Students will master aspects of dance company promotion.

Prerequisite: DANCE 152A and DANCE 152B and DANCE 152C

Repeatability: May be taken for credit 6 times.

Restriction: Sophomores only. Upper-division students only.

**DANCE 178. Performance Laboratory. 2 Units.**

Rehearsal and performance of graduate student-choreographed dance works for the M.F.A. thesis.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**DANCE 179. UCI Etude Ensemble. 4 Units.**

Repertory and performances by undergraduate Dance majors. Concert presentations on and off campus. Faculty directed, student/faculty choreographed.

Prerequisite: Audition required.

Repeatability: May be taken for credit 9 times.

Restriction: Sophomores only. Upper-division students only.

**DANCE 180C. Laban Studies. 4 Units.**

Laban movement analysis.

Prerequisite: DANCE 21A

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 185W. Critical Issues in Dance. 4 Units.**

Critical thinking and writing about dance, with a section on dance criticism and a major emphasis on persuasive writing about significant issues in the dance world.

Prerequisite: DANCE 90A and DANCE 90B and DANCE 90C. Satisfactory completion of the lower-division writing requirement.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**(Ib)****DANCE 193. Selected Topics in Dance. 1-4 Units.**

Directed group studies of topics in dance.

Repeatability: May be taken for credit 3 times as topics vary.

**DANCE 194. Topics Vary. 4 Units.**

Seminar in Dance Studies. Variable topics related to gender, race, politics, and dance writing, and criticism, with attention to linking dance practices to the wider world.

Prerequisite: DANCE 90A and DANCE 90B and DANCE 90C

Repeatability: Unlimited as topics vary.

**DANCE 195. Arts Management. 4 Units.**

Designed for students interested in the developmental and management of nonprofit arts organizations. Examines the organizational structure and areas of operation such as marketing, fundraising, budgeting, production, and administration.

Repeatability: May be taken for credit 2 times.

**DANCE 197. Independent Study. 1-4 Units.**

Individual independent projects in experimental laboratory, library, field, performance, under instructor's direction. Students can receive conceptual, creative, and theoretical instruction in the successful completion of a written report or performance.

Repeatability: May be repeated for credit unlimited times.

**DANCE 199. Senior Thesis. 4 Units.**

Directed research or creative activity for senior Dance majors. Research consists of a substantial essay on dance history, research in dance science, or the creation of original or reconstructed choreography.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 201. Seminar in Kinesiology for Dance. 4 Units.**

Introduction to the anatomical, biomechanical, and physiological principles of dance movement.

Prerequisite: DANCE 100

**DANCE 222. Musical Resources. 4 Units.**

Detailed study of music as it relates to dance. Historical overview of musical form, style, and other elements. Analysis of various affinities between music and dance. Practical applications.

**DANCE 225. Seminar in the Teaching of Dance Techniques. 4 Units.**

Principles and theories of teaching dance techniques. Supervised presentation and teaching of technique class.

**DANCE 231A. Graduate Studio: Ballet. 2 Units.**

Advanced ballet, pointe work, and performance style: principles of the classical ballet with an emphasis on technique.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

**DANCE 231B. Graduate Studio: Ballet. 2 Units.**

Advanced ballet, pointe work, and performance style: principles of the classical ballet with an emphasis on technique.

Prerequisite: DANCE 231A

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

**DANCE 231C. Graduate Studio: Ballet. 2 Units.**

Advanced ballet, pointe work, and performance style: principles of the classical ballet with an emphasis on technique.

Prerequisite: DANCE 231B

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

**DANCE 241A. Graduate Studio: Modern. 2 Units.**

Advanced modern dance: synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

**DANCE 241B. Graduate Studio: Modern. 2 Units.**

Advanced modern dance: synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Prerequisite: DANCE 241A

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

**DANCE 241C. Graduate Studio: Modern. 2 Units.**

Advanced modern dance: synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Prerequisite: DANCE 241B

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

**DANCE 251A. Graduate Studio: Jazz. 2 Units.**

Principles of jazz dance and contemporary forms, incorporating the personal views of the instructor.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

**DANCE 251B. Graduate Studio: Jazz. 2 Units.**

Principles of jazz dance and contemporary forms, incorporating the personal views of the instructor.

Prerequisite: DANCE 251A

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

**DANCE 251C. Graduate Studio: Jazz. 2 Units.**

Principles of jazz dance and contemporary forms, incorporating the personal views of the instructor.

Prerequisite: DANCE 251B

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

**DANCE 252A. Graduate Studio: Tap. 2 Units.**

An overview of tap concentrating on the development of various technique forms using basic and intermediate principles.

Repeatability: May be taken for credit 4 times.

**DANCE 252B. Graduate Studio: Tap. 2 Units.**

An overview of tap concentrating on the development of various technique forms using basic and intermediate principles.

Prerequisite: DANCE 252A

Repeatability: May be taken for credit 4 times.

**DANCE 252C. Graduate Studio: Tap. 2 Units.**

An overview of tap concentrating on the development of various technique forms using basic and intermediate principles.

Prerequisite: DANCE 252B

Repeatability: May be taken for credit 4 times.

**DANCE 261A. Graduate Studio in Choreography. 4 Units.**

Graduate work in dance composition emphasizing the individual aesthetic. Assignments in movement discovery, solo and group forms, with the main emphasis on independent work.

Repeatability: May be repeated for credit unlimited times.

**DANCE 261B. Graduate Studio in Choreography. 4 Units.**

Graduate work in dance composition emphasizing the individual aesthetic. Assignments in movement discovery, solo and group forms, with the main emphasis on independent work.

Prerequisite: DANCE 261A

Repeatability: May be repeated for credit unlimited times.

**DANCE 264. Screendance. 4 Units.**

Overview of dance for film and choreography for the camera. Aesthetics of creating dance for the screen. Approaches for delivery of dance films to an audience, including projection, DVD, Web, and mobile devices. A final dance film project is required.

Prerequisite: DANCE 281

**DANCE 281. Dance and Video Technology. 4 Units.**

Introduction to video and audio documentation of dance performance. Integrating dance performance within the film aesthetic. Techniques and technologies of video cameras, formats, editing, and projection. Overview of video compression and DVD authoring.

**DANCE 282. Seminar in Movement Analysis. 4 Units.**

Theories of movement analysis and nonverbal communication applied to dance.

**DANCE 283. Critical Issues in Dance. 4 Units.**

Reading, writing, discussing, and presenting key issues that relate to dance studies. Basics of dance analysis and criticism. Special emphasis on effective ways of defining, clarifying, and arguing for points of view.

Prerequisite: DANCE 284

**DANCE 284. Bibliography and Research. 4 Units.**

Understanding the field of dance studies, available resources, research methods, and academic formats in preparation for thesis writing.

**DANCE 285. Graduate Projects. 4 Units.**

Projects may be educational, choreographic, scientific, historical, or philosophical in scope and must have faculty advisor approval.

Repeatability: May be taken for credit 6 times.

**DANCE 286. Thesis. 4 Units.**

Substantial research in a topic approved by the student's graduate committee. Results of the research must be written in approved thesis style.

Repeatability: May be taken for credit 6 times.

**DANCE 287. Graduate Lectures in Dance. 1-4 Units.**

A series of lectures and discussions of announced topics in dance. Content may be from history, ethnology, notation, medicine, music, or other areas in the field.

Repeatability: Unlimited as topics vary.

**DANCE 296. Proseminar in Dance History. 4 Units.**

Discussion seminar with emphasis on reading and thinking about problems in dance history; presentation of oral and written reports.

Repeatability: May be taken for credit 2 times as topics vary.

**DANCE 297. Directed Reading. 1-4 Units.**

Topic to be approved by instructor. Paper required.

Repeatability: May be repeated for credit unlimited times.

**DANCE 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Dance Majors only.

## Dermatology (DERM)

## Developmental and Cell Biology (DEV BIO)

### Courses

**DEV BIO 200A. Research in Developmental and Cell Biology. 2-12 Units.**

Independent research with Developmental and Cell Biology faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**DEV BIO 200B. Research in Developmental and Cell Biology. 2-12 Units.**

Independent research with Developmental and Cell Biology faculty.

Prerequisite: DEV BIO 200A

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**DEV BIO 200C. Research in Developmental and Cell Biology . 2-12 Units.**

Independent research with Developmental and Cell Biology faculty.

Prerequisite: DEV BIO 200B

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**DEV BIO 200R. Research in Developmental & Cell Biology for First-year Students. 2-12 Units.**

Independent research within the laboratories of graduate training faculty in the Department of Developmental and Cell Biology for first-year Ph.D. students.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

**DEV BIO 203A. Graduate Tutorial in Developmental and Cell Biology. 4 Units.**

Advanced study in areas not represented by formal courses. May involve individual or small group study through discussion, reading, and composition. Time and subject matter arranged individually.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**DEV BIO 203B. Graduate Tutorial in Developmental and Cell Biology. 4 Units.**

Advanced study in areas not represented by formal courses. May involve individual or small group study through discussion, reading, and composition. Time and subject matter arranged individually.

Prerequisite: DEV BIO 203A

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**DEV BIO 203C. Graduate Tutorial in Developmental and Cell Biology. 4 Units.**

Advanced study in areas not represented by formal courses. May involve individual or small group study through discussion, reading, and composition. Time and subject matter arranged individually.

Prerequisite: DEV BIO 203B

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**DEV BIO 206A. Developmental and Cell Biology Journal Club. 2 Units.**

Advanced study of various topics in cell biology.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**DEV BIO 206B. Developmental and Cell Biology Journal Club. 2 Units.**

Advanced study of various topics in cell biology.

Prerequisite: DEV BIO 206A

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**DEV BIO 206C. Developmental and Cell Biology Journal Club. 2 Units.**

Advanced study of various topics in cell biology.

Prerequisite: DEV BIO 206B

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**DEV BIO 207. Mouse Developmental Genetics. 4 Units.**

Introduction to using the mouse in contemporary biomedical research. The biology and development of the laboratory mouse, methods for manipulation of the mouse genome and embryos, and examples of application of these methods to understand mammalian development and homeostasis.

Same as BIOCHEM 215.

Restriction: Graduate students only.

**DEV BIO 212. Topics in Systems Biology. 2 Units.**

Studies in selected areas of Systems Biology.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**DEV BIO 214. Principles of Genomics. 4 Units.**

A survey course of the principal subfields of genomics and their applications to biological and health sciences that will cover genome assembly and annotation, genome structure, comparative genomics, population genomics, functional genomics, and medical genomics.

Same as MOL BIO 244.

Restriction: Graduate students only.

**DEV BIO 231B. Cell Biology. 4 Units.**

A broadly based course including topics in extracellular matrix, cytoskeleton, organelle biogenesis, receptor-mediated endocytosis, signal transduction, cell cycle, and developmental biology.

Concurrent with BIO SCI D154.

**DEV BIO 232. Systems Cell and Developmental Biology. 4 Units.**

Introduces concepts needed to understand cell and developmental biology at the systems level, i.e., how the parts (molecules) work together to create a complex output. Emphasis on using mathematical/computational modeling to expand/modify insights provided by intuition.

Same as BME 213.

Restriction: Graduate students only.

**DEV BIO 245. Stem Cell Biology. 4 Units.**

The basic characteristics and development roles of embryonic, adult, and cancer stem cells in the human body and in model systems and the use of experimental and genetic methods to analyze and manipulate their properties.

Restriction: Graduate students only.

**DEV BIO 290A. Colloquium in Developmental and Cell Biology. 2 Units.**

Contemporary research problems. Research students, faculty, and other invited speakers introduce research and review topics.

Restriction: Graduate students only.

**DEV BIO 290B. Colloquium in Developmental and Cell Biology. 2 Units.**

Contemporary research problems. Research students, faculty, and other invited speakers introduce research and review topics.

Prerequisite: DEV BIO 290A

Restriction: Graduate students only.

**DEV BIO 290C. Colloquium in Developmental and Cell Biology. 2 Units.**

Contemporary research problems. Research students, faculty, and other invited speakers introduce research and review topics.

Prerequisite: DEV BIO 290B

Restriction: Graduate students only.

**DEV BIO 292A. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**DEV BIO 292B. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Prerequisite: DEV BIO 292A

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**DEV BIO 292C. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Prerequisite: DEV BIO 292B

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**DEV BIO 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Drama (DRAMA)

### Courses

**DRAMA 10. Introduction to Theatre. 4 Units.**

An interactive introduction to the world of theatre that serves to develop an appreciation of theatrical arts, to establish an awareness of landmarks within the performance history, and to create an understanding of the collaborative roles and departments that exist.

(IV)

**DRAMA 11. The Rock and Roll Spectacle Show. 4 Units.**

A thorough overview to the development and cultural significance of the Rock 'n' Roll Spectacle show. Focus on historical and recent developments of the spectacle show, trends in the aesthetics of the field, and various sub-genres.

(IV)

**DRAMA 14. Performing Rock 'N' Roll. 4 Units.**

Explores major movements in the history of rock 'n' roll in terms of performance, not virtuosity necessarily of the performers as musicians, rather as performances of aesthetics in modes of embodied ideology, iconoclastic spectacle, mixed media fashion, and subcultural formation.

**DRAMA 15. Performance Now. 4 Units.**

Exposes students to what is most current in the world of performance and theatre. Begins with a series of lectures on the idea of performance, and the various theories that frame it.

Restriction: Music Theatre Majors have first consideration for enrollment. Drama Majors have first consideration for enrollment.

(IV)

**DRAMA 16. Performing Culture. 4 Units.**

Culture, aesthetics, and ideology (combined in the concept 'subculture') work to fashion social identities. Using theories and methodologies of performance studies, with an emphasis on American culture, this course explores why and how culture is reinforced through performance.

(IV)

**DRAMA 20A. Culture in Performance. 4 Units.**

A three-quarter foundation series exploring the rich depth of theatre, drama, and other genres of performance across a wide variety of worldwide forms, for performer and audience.

(IV)

**DRAMA 20B. Culture in Performance. 4 Units.**

A three-quarter foundation series exploring the rich depth of theatre, drama, and other genres of performance across a wide variety of worldwide forms, for performer and audience.

(IV)

**DRAMA 20C. Culture in Performance. 4 Units.**

A three-quarter foundation series exploring the rich depth of theatre, drama, and other genres of performance across a wide variety of worldwide forms, for performer and audience.

(IV)

**DRAMA 30A. Acting. 4 Units.**

Focuses on Stanislavski-based terminology and technique through theatre exercises and improvisation. The first part of a one-year series in basic acting technique and discipline.

Repeatability: May be taken for credit 2 times.

Restriction: Music Theatre Majors have first consideration for enrollment. Drama Majors have first consideration for enrollment.

**DRAMA 30B. Acting. 4 Units.**

Focuses on scene work and character development. The second part of a one-year series in basic acting technique and discipline.

Prerequisite: DRAMA 30A

Repeatability: May be taken for credit 2 times.

Restriction: Music Theatre Majors have first consideration for enrollment. Drama Majors have first consideration for enrollment.

**DRAMA 30C. Acting. 4 Units.**

Focuses on monologues, auditions, callbacks, and the profession of acting. The third part of a one-year series in basic acting technique and discipline.

Prerequisite: DRAMA 30A and DRAMA 30B

Repeatability: May be taken for credit 2 times.

Restriction: Music Theatre Majors have first consideration for enrollment. Drama Majors have first consideration for enrollment.

**DRAMA 34. Movement for Actors. 4 Units.**

A studio course in fundamentals of stretch, strength, and alignment; exploring spatial awareness and physical control through mime isolations, techniques, and related improvisation.

Repeatability: May be taken for credit 3 times.

**DRAMA 35. Speech for the Theatre. 4 Units.**

An introductory course in voice and speech for actors, combining the body-based approach to voice developed by Fitzmaurice, and speech work of Knight and Thompson. Designed for the needs of actors and is not a public speaking course.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 40A. Development of Drama. 4 Units.**

The development of Western Drama, concentrating on the drama's intellectual, social, and artistic foundations. About 10 plays and supplementary critical material are read each quarter. Greek Drama through Shakespeare.

Prerequisite or corequisite: DRAMA 10

Restriction: Music Theatre Majors have first consideration for enrollment. Drama Majors have first consideration for enrollment.

(IV and VIII ).

**DRAMA 40B. Development of Drama. 4 Units.**

The development of Western Drama, concentrating on the drama's intellectual, social, and artistic foundations. About 10 plays and supplementary critical material are read each quarter. Restoration Drama through Ibsen.

Prerequisite or corequisite: DRAMA 10

Restriction: Music Theatre Majors have first consideration for enrollment. Drama Majors have first consideration for enrollment.

(IV and VIII ).

**DRAMA 40C. Development of Drama. 4 Units.**

The development of Western Drama, concentrating on the drama's intellectual, social, and artistic foundations. About 10 plays and supplementary material are read each quarter. Contemporary Drama. Post Naturalistic theatre.

Prerequisite or corequisite: DRAMA 10

Restriction: Music Theatre Majors have first consideration for enrollment. Drama Majors have first consideration for enrollment.

(IV and VIII ).

**DRAMA 50A. Introduction to Costume Design. 4 Units.**

Introduction to the process and procedures employed by the costume designer for the theatre. The elements of design are discussed in the context of character development, historical period, and style. Exercises extend to drawing, rendering, and investigation of human proportions.

Prerequisite or corequisite: DRAMA 10

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 50B. Introduction to Scenic Design. 4 Units.**

Introduction to the principles and practice of scenic design. Weekly problems include research into various periods and styles of production with an emphasis on the conceptual idea. Perspective drawing, rendering, and model building are covered in studio exercises and assignments.

Prerequisite or corequisite: DRAMA 10

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 50C. Introduction to Lighting Design. 4 Units.**

Introduction to the principles, theories, and equipment employed by the lighting designer for the stage. Areas of investigation include history, technology, and script analysis. Detailed studio attention is given to the theory and practice of design.

Prerequisite or corequisite: DRAMA 10

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 50D. Introduction to Sound Design. 4 Units.**

Principles, theories, equipment use, and terminology employed by the sound designer for the stage. Areas of study include history, technology, and script analysis. Focuses on the theory and practice of design.

Prerequisite or corequisite: DRAMA 10

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 50E. Introduction to Stage Management. 4 Units.**

A basic study of theatrical, dance, and opera stage management practices, forms, and methods, from first script reading to closing night. Opportunity to observe professionals at work in regional and touring situations as available.

Prerequisite or corequisite: DRAMA 10

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 60. Topics in Advanced Stage Management. 4 Units.**

Nurtures a greater appreciation for the stage manager and his or her process, and supports students who are interested in pursuing a career in professional stage management.

Repeatability: May be taken for credit 3 times as topics vary.

**DRAMA 65. Music Theatre Workshop I. 2 Units.**

Basic vocal technique and characterization of musical theatre repertoire explored.

Prerequisite: Audition required.

Repeatability: May be taken for credit 2 times.

**DRAMA 80. Directing I . 4 Units.**

Introduction to comprehensive directing process from pre-production to opening. Focus on fundamental skills: analysis, staging, action, actor coaching, and elements of design. Skills applied to scripted theatrical material. Develop a language for commenting on theatrical production. Attending and critiquing productions.

Prerequisite: DRAMA 30A and DRAMA 30B

**DRAMA 100. University Theatre . 4 Units.**

Rehearsal and performance in a faculty-directed.

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

**DRAMA 101A. Theatre Production: Costume. 1-6 Units.**

The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

**DRAMA 101B. Theatre Production: Scenic. 1-6 Units.**

The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

**DRAMA 101C. Theatre Production: Lighting. 1-6 Units.**

The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

**DRAMA 101D. Theatre Production: Stage Management. 1-8 Units.**

The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit 24 times.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

**DRAMA 101E. Theatre Production: Audio. 1-6 Units.**

The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

**DRAMA 101S. Theatre Production: Theatre Management. 1-6 Units.**

The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

**DRAMA 103. Lectures in Dramatic Literature. 4 Units.**

Courses include Medieval and Tudor Drama, Elizabethan and Jacobean Drama, Shakespeare, Restoration and Eighteenth Century Drama, Modern British Drama, Modern American Drama, Tragedy, and Comedy.

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 103W. Lectures in Dramatic Literature. 4 Units.**

Courses include Medieval and Tudor Drama, Elizabethan and Jacobean Drama, Shakespeare, Restoration and Eighteenth-Century Drama, Modern British Drama, Modern American Drama, Tragedy, and Comedy.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 109. Special Topics in Theory and Criticism. 4 Units.**

Discussion of recent major trends and ideas in critical theory, concentrating on in-depth readings and lectures in particular facets of theory and criticism: Derrida, Butler, Lacan, Deleuze, and others.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 109W. Special Topics in Theory and Criticism. 4 Units.**

Discussion of recent major trends and ideas in critical theory, concentrating on in-depth readings and lectures in particular facets of theory and criticism: Derrida, Butler, Lacan, Deleuze, and others.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**(Ib)****DRAMA 110. Special Topics in Classical Dramas . 4 Units.**

Designed to introduce students to various classical traditions-early Greek and Roman theatres, to be sure, but also, by way of comparison, the classical traditions of non-European cultures.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C. Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 110W. Special Topics in Classical Dramas. 4 Units.**

Designed to introduce students to various classical traditions-early Greek and Roman theatres, to be sure, but also, by way of comparison, the classical traditions of non-European cultures.

Prerequisite: DRAMA 40A or DRAMA 40B or DRAMA 40C. Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**(Ib)**

**DRAMA 112. Special Topics in Early Modern and Neoclassical Theatre. 4 Units.**

Investigates aspects of European theatre and culture in the sixteenth, seventeenth, and eighteenth centuries; individual courses may focus on specific topics within this broad expanse.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 112W. Special Topics in Early Modern and Neoclassical Theatre. 4 Units.**

Investigates aspects of European theatre and culture in the sixteenth, seventeenth, and eighteenth centuries; individual courses may focus on specific topics within this broad expanse.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**(Ib)****DRAMA 116. Special Topics in Nineteenth-Century Dramas. 4 Units.**

Looks at the various trends and conventions of theatres in the nineteenth century, both Euro-American and beyond, paying special attention to the culture and political milieu within which these various traditions appeared.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C. Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 116W. Special Topics in Nineteenth-Century Dramas. 4 Units.**

Looks at the various trends and conventions of theatres in the nineteenth century, both Euro-American and beyond, paying special attention to the culture and political milieu within which these various traditions appeared.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**(Ib)****DRAMA 118. Special Topics in Modern and Contemporary Drama. 4 Units.**

An investigation into the many forms and permutations of modern (1880-1945), and contemporary (since 1945) drama, paying special attention to the historical and philosophical interpretations of text and performance.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 118W. Special Topics in Modern and Contemporary Drama . 4 Units.**

An investigation into the many forms and permutations of modern (1880-1945), and contemporary (since 1945) drama, paying special attention to the historical and philosophical interpretations of text and performance.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C. Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**(Ib)**

**DRAMA 121. Introduction to Asian Theatre. 4 Units.**

An introduction to some of the major traditional theatrical forms and dramatic texts from India, China, and Japan. Other than dramatic texts (in English translation), attention is also paid to theory, history, and performance styles of traditional Asian theatre.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 122. Asian American Theatre. 4 Units.**

An introduction to the history and development of Asian American theatre and drama. Besides play analysis, special attention is also paid to the history and politics of Asian American identity and experience, as well as to aspects of theatrical performance.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 123. Multicultural Theatres. 4 Units.**

A study of the history, culture, aesthetics, and literature of various traditional performing arts and their connections to the contemporary multicultural society.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 126. African American Film and Drama. 4 Units.**

A critical investigation of films and plays written by African Americans, with emphasis on dramaturgical and cinematic strategies, individual and collective representation, and the legacy of African American political struggle.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 126W. African American Film and Drama. 4 Units.**

A critical investigation of films and plays written by African Americans, with emphasis on dramaturgical and cinematic strategies, individual and collective representation, and the legacy of African American political struggle.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Restriction: Music Theatre Majors only. Drama Majors only.

**(Ib)****DRAMA 129. Advanced Topics in Performance. 4 Units.**

Addresses particular issues in theatre and performance that typically lie outside of regular course offerings. May address such issues as the theatre of the Avant Garde, performing gender, transversality and performance, body art, installation and performance art, among other topics.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 129W. Advanced Topics in Performance. 4 Units.**

Addresses particular issues in theatre and performance that typically lie outside of regular course offerings. May address such issues as the theatre of the Avant Garde, performing gender, transversality and performance, body art, installation and performance art, among other topics.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**(Ib)****DRAMA 130. Intermediate Acting. 4 Units.**

Rehearsal and presentation of scenes from contemporary material. Focus on connection with scene partner, playing actions, and text analysis. Introduction to the credibility and theatricality of characterization and style.

Prerequisite: DRAMA 30A and DRAMA 30B and DRAMA 30C with an average grade of B or better. For transfer students: one year of beginning acting with an average grade of B or better.

Repeatability: May be taken for credit 2 times.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 132A. Writing for Performance. 4 Units.**

Completion of a full-length play or its equivalent; discussion of student writing and of relevant literary texts.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 134. Studio for Advanced Movement for Actors. 4 Units.**

Studio course in conditioning and partnering techniques to the practice of contact improvisation. Contact improvisation is explored and applied in scene study.

Prerequisite: DRAMA 34. DRAMA 34 with a grade of B or better

Repeatability: May be taken for credit 3 times.

**DRAMA 135. Master Classes in Acting. 1-4 Units.**

Advanced acting in specialized areas including acting for the camera: situation comedy, commercials; auditioning and industry preparation; Shakespeare; Molière; Chekov; improvisation; advanced movement and voice and speech for the actor; self-starting; stage combat; repertory acting, singing; comedy; clowning; and masks.

Prerequisite: DRAMA 130. DRAMA 130 with a grade of B or better

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 136. Music Theatre Acting. 4 Units.**

An acting class exclusive to the students in the B.F.A. in Music Theatre program.

Prerequisite: DRAMA 30A and DRAMA 30B and DRAMA 30C

Repeatability: May be taken for credit 4 times.

Restriction: Music Theatre Majors only.

**DRAMA 142. Music Theatre Workshop II. 4 Units.**

A workshop in audition technique and song interpretation.

Prerequisite: Audition required.

Repeatability: May be taken for credit 4 times.

**DRAMA 143A. Music Theatre Workshop III. 4 Units.**

Scene study and song repertoire examined by era for the advanced Music Theatre student. 1800s-1940.

Prerequisite: DRAMA 142. Audition required.

**DRAMA 143B. Music Theatre Workshop III. 4 Units.**

Scene study and song repertoire examined by era for the advanced Music Theatre student. 1940s-1970s.

Prerequisite: DRAMA 142. Audition required.

**DRAMA 143C. Music Theatre Workshop III. 4 Units.**

Scene study and song repertoire examined by era for the advanced Music Theatre student. 1970's-present.

Prerequisite: DRAMA 142. Audition required.

**DRAMA 144. Music Theatre Workshop IV. 4 Units.**

A performance class concentrating on role building. Work culminates with in-class performances of abbreviated versions of musicals.

Prerequisite: For B.F.A. students: DRAMA 143A, DRAMA 143B, DRAMA 143C, and audition. For Drama graduate students: audition required.

Repeatability: May be taken for credit 4 times.

Restriction: Graduate students only. Music Theatre Majors only. Drama Majors only.

**DRAMA 145. Music Theatre Singing. 1 Unit.**

Private weekly voice lessons for the advanced Music Theatre student.

Corequisite: DRAMA 143A

Repeatability: May be taken for credit 9 times.

Restriction: Music Theatre Majors only.

**DRAMA 146. NYSP-Preparation. 4 Units.**

Class preparation for the New York Satellite Program (NYSP) - an immersion experience in New York City for the musical theatre performer.

Prerequisite: Admission is by audition and the following prerequisites: DRAMA 30C and two quarters of DRAMA 148A, DRAMA 148B, or DRAMA 148C (if the 148 prerequisite is not complete at the time of auditions, student must enroll during the fall and winter quarters in the same year as the trip to New York); senior Drama majors must have successfully completed DRAMA 40C and DRAMA 120C; non-Drama majors must have sophomore standing or higher and must carefully plan their course schedule as many spring quarter classes cannot be taken while part of the NYSP.

Repeatability: May be taken for credit 2 times.

**DRAMA 148A. History of American Musical Theatre. 4 Units.**

A survey of the influential artists who produce, write, direct, and perform on America's musical stages. Surveys 1700s-1940s.

Restriction: Drama Majors only. Music Theatre Majors only.

Concurrent with DRAMA 248A.

**DRAMA 148B. History of American Musical Theatre. 4 Units.**

A survey of the influential artists who produce, write, direct, and perform on America's musical stages. Surveys 1940s-1970s.

Restriction: Drama Majors only. Music Theatre Majors only.

Concurrent with DRAMA 248B.

**DRAMA 148C. History of American Musical Theatre. 4 Units.**

A survey of the influential artists who produce, write, direct, and perform on America's musical stages. Surveys 1970s to present day.

Restriction: Drama Majors only. Music Theatre Majors only.

Concurrent with DRAMA 248C.

**DRAMA 149. Music Proficiency for Actors. 2 Units.**

A musicianship class introducing basic musical terminology, theory, and sight singing skills.

Repeatability: May be taken for credit 2 times.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 150. Costume Production Techniques. 4 Units.**

Studio instruction in pattern making, draping, millinery, and construction techniques.

Prerequisite: DRAMA 50A

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 157. Lighting Composition. 4 Units.**

Provides an opportunity for students to pursue stage lighting composition in a studio atmosphere. Laboratory practice includes weekly exercises in style and genre. Emphasis is placed on the realization of conceptual ideas.

Prerequisite: DRAMA 50C

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 158. Topics in Theatre Design. 4 Units.**

Examines the various functions of scenery and costume: locale, historical period, mood, and atmosphere, with special assignments in each area. Discussion of problems in scenic metaphors and visualization, emphasizing techniques of planning and presentation (e.g., floor plans, models, and rendering).

Prerequisite: DRAMA 50A or DRAMA 50B

Repeatability: May be repeated for credit unlimited times.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 159. Proseminar in Theatre Design. 4 Units.**

Topics in theatre design.

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 164A. History of Costume. 4 Units.**

A study of the development of dress and the influence of cultural factors on clothing from the time of Egyptians to Early Baroque.

Prerequisite: DRAMA 50A

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 164B. History of Costume. 4 Units.**

A study of the development of dress and the influence of cultural factors on clothing from late Baroque to World War I.

Prerequisite: DRAMA 50A

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 176. Script and Score. 4 Units.**

A form and analysis seminar discussing the libretto and score of landmark musicals.

Prerequisite: Two courses from DRAMA 148A or DRAMA 148B or DRAMA 148C.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 177. Song Repertoire. 2 Units.**

A song coaching class culminating in a song recital or showcase. Each quarter will feature a different composer, lyricist, or musical style.

Repeatability: May be taken for credit 6 times.

Restriction: Music Theatre Majors only.

**DRAMA 180. Contemporary Dramatic Criticism and Theory. 4 Units.**

Reading and analysis of theories and critical approaches to contemporary theatre: Brecht, Artaud, and others who have contributed to the form and idea of the modern theatre. Writing of assigned exercises in dramatic criticism.

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 180W. Contemporary Dramatic Criticism and Theory. 4 Units.**

Reading and analysis of theories and critical approaches to contemporary theatre: Brecht, Artaud, and others who have contributed to the form and idea of the modern theatre. Writing of assigned exercises in dramatic criticism.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only. Music Theatre Majors only.

(Ib)

**DRAMA 182A. Dance Technique, Level I. 4 Units.**

Advanced beginner and intermediate dance training including musical theatre, ballet, jazz and contemporary modern techniques and repertoire. Body conditioning is also a major component of the course.

Prerequisite: DRAMA 65 or DRAMA 142. Audition required.

Repeatability: May be taken for credit 4 times.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 182B. Dance Technique, Level I. 4 Units.**

Advanced beginner and intermediate dance training including musical theatre, ballet, jazz and contemporary modern techniques and repertoire. Body conditioning is also a major component of the course.

Prerequisite: (DRAMA 65 or DRAMA 142) and DRAMA 182A. Audition required.

Repeatability: May be taken for credit 4 times.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 183A. Dance Technique, Level II. 4 Units.**

Intermediate and advanced dance training including musical theatre, ballet, jazz and contemporary modern techniques and repertoire. Body conditioning is also a major component of the course.

Prerequisite: DRAMA 65 or DRAMA 142. Audition required.

Repeatability: May be taken for credit 4 times.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 183B. Dance Technique, Level II. 4 Units.**

Intermediate and advanced dance training including musical theatre, ballet, jazz and contemporary modern techniques and repertoire. Body conditioning is also a major component of the course.

Prerequisite: (DRAMA 65 or DRAMA 142) and DRAMA 183A. Audition required.

Repeatability: May be taken for credit 4 times.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 184. Directing II. 4 Units.**

The principles of stage directing, covering the director's functions in the areas of interpretation, composition, coaching, and styling a theatrical production. Directing exercises and projects; the final project is the preparation of a hypothetical proposal for a play production.

Prerequisite: DRAMA 30A and DRAMA 30B and DRAMA 40A and DRAMA 40B and DRAMA 40C and DRAMA 80

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 185. Advanced Directing. 4 Units.**

A seminar in directorial organization and research. Student prepares a textual and dramaturgical analysis, a production timetable, and a hypothetical production book of an assigned play.

Prerequisite: DRAMA 184

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 190. NYSP-Acting. 1-4 Units.**

New York Satellite Program acting classes taught by guest faculty in New York.

Prerequisite: DRAMA 146

Repeatability: May be taken for credit 2 times.

**DRAMA 191. NYSP - Dance. 4 Units.**

New York Satellite Program dance classes in ballet, tap, jazz, and musical theatre styles taught by guest faculty in New York.

Prerequisite: DRAMA 146

Repeatability: May be taken for credit 2 times.

**DRAMA 192. NYSP - Singing. 4 Units.**

New York Satellite Program private and group lessons in musical theatre singing taught by guest faculty in New York.

Prerequisite: DRAMA 146

Repeatability: May be taken for credit 2 times.

**DRAMA 193. NYSP - Performance. 4 Units.**

New York Satellite Program rehearsals and public, staged readings of original musicals in New York.

Prerequisite: DRAMA 146

Repeatability: May be taken for credit 2 times.

**DRAMA 194. NYSP-UCI Residency. 4 Units.**

New York Satellite Program follow-up classes and performances back on Irvine campus upon the return from New York.

Prerequisite: DRAMA 146

Repeatability: May be taken for credit 2 times.

**DRAMA 195. Music Theatre Dance - Special Topics. 1-4 Units.**

Advanced dance classes in specialized areas including the dance styles of a choreographer (de Mille, Fosse, Robbins, Tune, Stroman), genre (tap, ballroom, jazz, swing, hip-hop), or in musical theatre choreography.

Prerequisite: DRAMA 182A or DRAMA 182B or DRAMA 183A or DRAMA 183B. Audition required.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 198. Director Class Project. 1-8 Units.**

For students who are involved in the Director Class Projects at UCI as actors, directors, designers, stage managers and their assistants. M.F.A. Directors and the Head of Directing (HoD) supervise the projects.

Grading Option: Pass/no pass only.

Repeatability: Unlimited as topics vary.

**DRAMA H198. Honors Director Class Project. 1-4 Units.**

For graduate student actors and undergraduate directors who are candidates for Honors in Directing and involved in the Director Class Projects. The Head of Directing (HoD) supervises these students.

Repeatability: Unlimited as topics vary.

**DRAMA 199. Project in Theatre . 1-4 Units.**

Independent theatre projects with Drama faculty.

Repeatability: Unlimited as topics vary.

**DRAMA 200. Graduate Studio: Acting. 4 Units.**

Work in graduate studio taken in tandem with graduate studios in stage voice (DRAMA 201), stage speech (DRAMA 202), and stage movement (DRAMA 203).

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 201. Graduate Studio: Voice. 1 Unit.**

Graduate studio in vocal production for actors.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 202. Graduate Studio: Speech. 1 Unit.**

Graduate studio in speech for actors.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 203. Graduate Studio: Movement. 2 Units.**

Work in graduate studio: stage movement taken in tandem with nine graduate studios in acting (DRAMA 200), voice (DRAMA 201), speech (DRAMA 202), and voice/movement dynamics (DRAMA 206).

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 206. Graduate Studio: Voice/Movement Dynamics. 2 Units.**

Daily conditioning exercises.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 211. Graduate Studio: Directing. 4 Units.**

Graduate studio in directing.

Repeatability: Unlimited as topics vary.

Restriction: Drama graduate students only.

**DRAMA 219. Graduate Master Class. 1-4 Units.**

Various topics such as Shakespeare, comedy, Molière, improvisation, Kabuki, television acting.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 220. Seminar in Dramatic Literature. 4 Units.**

Topics in Dramatic Literature.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 225. Seminar on Theatre Pedagogy. 4 Units.**

A seminar on the major teaching systems in the dramatic arts with particular attention to professional arts training. Required prior to applying for Teaching Assistantships in studio areas.

Restriction: Drama graduate students only.

**DRAMA 240. Graduate Projects . 1-4 Units.**

Various projects depending on student's concentration (acting, design, musical theatre, directing).

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Drama and Theatre Majors only. Drama Majors only.

**DRAMA 241. Singing Pedagogy . 2 Units.**

Learning how to teach voice lessons and coach musical theatre singing. Experiences include both private voice lessons and observing the lessons given to the B.F.A./Music Theatre students.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate Music Direction students only.

**DRAMA 242. Conducting . 2 Units.**

Private conducting instruction to develop freedom of movement/expression, baton technique, ear training, and tempo memory for both rehearsal and performance situations in musical theatre.

Repeatability: May be taken for credit 9 times.

Restriction: Graduate Music Directors only.

**DRAMA 243. Script and Score . 4 Units.**

A form and analysis seminar discussing the libretto and score of landmark musicals.

Restriction: Graduate students only. Music Majors only.

Concurrent with DRAMA 176.

**DRAMA 244. Dramaturgy: Theory and Methods. 4 Units.**

Examines the practice, place, and theory of dramaturgy. Explores plays in terms of how they work: dramatic form and structure, historical context, and more. Study includes dramaturgy as a theatrical practice.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 246A. Musical Scene Study I. 4 Units.**

Musically directing scenes from musicals of various time periods. Features works from the late 19th and early 20th centuries, including songwriters Gilbert and Sullivan, Irving Berlin, George Gershwin, Rodgers and Hart, and Cole Porter.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate Music Director students only.

**DRAMA 246B. Musical Scene Study II. 4 Units.**

Musically directing scenes from musicals of various time periods. Features works from the middle of the 20th century including songwriters Rodgers and Hammerstein, Lerner and Loewe, Julie Styne, Kander and Ebb, and Jerry Herman.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate Music Directors only.

**DRAMA 246C. Musical Scene Study III. 4 Units.**

Musically directing scenes from musicals of various time periods. Features works from the late 20th and early 21st centuries including songwriters Stephen Sondheim, Andrew Lloyd Webber, Stephen Schwartz, Flaherty and Ahrens, and Jeanine Tesori.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate Music Directors only.

**DRAMA 247. Musicals Abridged . 4 Units.**

Musically directing abridged versions of musicals from various time periods and genres.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate Music Directors only.

**DRAMA 248A. History of American Music Theatre. 4 Units.**

A survey of the influential artists who produce, write, direct, and perform on America's musical stages. Surveys 1700s-1940s.

Restriction: Graduate students only.

Concurrent with DRAMA 148A.

**DRAMA 248B. History of American Musical Theatre. 4 Units.**

A survey of the influential artists who produce, write, direct and perform on America's musical stages. Surveys 1940s-1970s.

Restriction: Graduate students only.

Concurrent with DRAMA 148B.

**DRAMA 248C. History of American Musical Theatre. 4 Units.**

A survey of the influential artists who produce, write, direct and perform on America's musical stages. Surveys 1970s to present day.

Concurrent with DRAMA 148C.

**DRAMA 249. Graduate Music Direction. 4 Units.**

Various musical direction activities including the vocal direction, accompanying, and conducting of musical theatre performances.

Repeatability: May be taken for credit 9 times.

Restriction: Graduate students only. Music Majors only.

**DRAMA 251A. Foundations of Theatre. 4 Units.**

Seeks to create greater understanding in the roots and theories of theatrical models, aesthetics, action vs. reaction of differing thoughts in theatrical doctrine, and art, architecture, music, and fashion that contributed to the style and practice of theatre.

Restriction: Drama graduate students only.

**DRAMA 251B. Foundations of Theatre. 4 Units.**

Seeks to create greater understanding in the roots and theories of theatrical models, aesthetics, action vs. reaction of differing thoughts in theatrical doctrine, and art, architecture, music, and fashion that contributed to the style and practice of theatre.

Restriction: Drama graduate students only.

**DRAMA 251C. Foundations of Theatre. 4 Units.**

Seeks to create greater understanding in the roots and theories of theatrical models, aesthetics, action vs. reaction of differing thoughts in theatrical doctrine, and art, architecture, music, and fashion that contributed to the style and practice of theatre.

Restriction: Drama graduate students only.

**DRAMA 254. Graduate Stage Management. 4 Units.**

Studio exercises and projects in stage management.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama Majors only.

**DRAMA 255. Graduate Design Seminar. 4 Units.**

Projects, lectures, and critical discussion in costume, scenery, lighting, and sound design.

Restriction: Drama Majors only.

**DRAMA 256. Survival and Professional Practice in Design. 4 Units.**

Provides an in-depth examination of business skills needed to survive as a theatrical designer. Required 'Bridge' course in the Design MFA programs, relevant to all disciplines.

Restriction: Drama graduate students only.

**DRAMA 257A. Costume Thesis Project. 4 Units.**

Development of thesis project with focus on organization, research, timeline, and execution.

Prerequisite: DRAMA 240

Restriction: Drama graduate students only.

**DRAMA 257B. Scenic Thesis Project. 4 Units.**

Development of thesis project with focus on organization, research, timeline, and execution.

**DRAMA 257E. Thesis Writing Project-Stage Management. 4 Units.**

Development of thesis topic with focus on organization, research, timeline, and execution.

Prerequisite: 12 units of DRAMA 254.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Drama graduate students only.

**DRAMA 258. Drawing for Designers. 2 Units.**

A multi-skill level course in drawing technique focusing on skills essential to stage designers including line, proportion, perspective and creating dynamic compositions. Focus will primarily be in figure drawing but may include still-life, landscape, and architectural drawings. Materials fee.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 9 times.

**DRAMA 259. Theatre Colloquium. 1 Unit.**

Exposes students to a wider range of theatrical practitioners, theories, and topics through guest lecturers, special projects, and cross-disciplinary dialogue.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 260A. Digital Costume Rendering. 4 Units.**

A studio course in costume rendering for the theatre using computer image manipulation. Instruction in compositing and painting techniques and performance design conventions.

**DRAMA 260B. Digital Textile Design and Printing. 4 Units.**

A studio course in textile design using digital printing and embossing techniques. Instruction in state-of-the-art software and output manipulation for artistic expression.

**DRAMA 261. Digital Design: Drawing/Painting/Rendering. 4 Units.**

A studio course in scenic or costume rendering for the theatre using the computer for drawing/painting through the use of the digital pen/tablet.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 262. Digital Design: 2D/3D Modeling. 4 Units.**

A studio course in CAD's 2D drafting and 3D modeling capabilities for theatrical design. Instruction in state-of-the-art software for 2D and 3D object creation and theatrical presentation conventions.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 263. Digital Design: 3D Rendering. 4 Units.**

A studio course in theatrical design through 3d modeling on computer and use of state-of-the-art rendering software. Instruction emphasizes collaborative design process through the use of scenic designer/lighting designer teams for all projects.

Prerequisite: DRAMA 262

Restriction: Graduate students only. Drama and Theatre Majors only. Drama Majors only.

**DRAMA 264. Lighting Graphics. 4 Units.**

A studio course in the various graphic methods employed by lighting designers in the theatre. Projects include manual and CAD techniques for Light Plot and Paperwork creation.

Prerequisite: DRAMA 262

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 265. Digital Design: 2D CAD. 4 Units.**

A studio course in theatrical design and architectural lighting design on the computer. Instruction in state-of-the-art software for 2D object creation. Theatrical and architectural standards implemented in performance design.

Prerequisite: DRAMA 262

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 266. Digital Design: Digital Audio Systems. 4 Units.**

Comprehensive tutorial on digital audio including hard disk recording, editing, data compression, and ethernet audio distribution. Focus is on recording, editing, and delivery of audio as used by the sound designer in the digital domain.

Restriction: Drama graduate students only.

**DRAMA 267. Digital Design: Creating Sounds from Scratch. 4 Units.**

The process of analyzing sounds for their core timbral components and using that data to create new sounds - from realistic to fantastic - by means of digital manipulation.

Prerequisite: DRAMA 266

Restriction: Drama Majors only.

**DRAMA 271. Conceptual Sound Design. 4 Units.**

An intensive, project-based seminar for exploring relationships between sound and sight. Synesthesia, creative intent vs. audience perception, and sound/movement are typical of the many topics to be explored. A series of creative projects are assigned and critiqued in peer review.

Prerequisite: DRAMA 266

Restriction: Drama Majors only.

**DRAMA 272. Musical Theatre Sound/Concert Sound. 4 Units.**

A concept-to-opening study of the process of designing sound systems for musicals and live/touring sound. Special attention given to the paperwork and documentation required to package, build, and mix these shows.

Restriction: Drama Majors only.

**DRAMA 277. Critical Listening. 4 Units.**

Exploration of the many variables that affect (and effect) the audio chain. Perceiving and understanding these parameters unlocks the art of controlling sound and stylizing cues. Also includes the process of equalizing/aligning sound systems and the art of audio mastering.

Prerequisite: DRAMA 266

Restriction: Drama Majors only.

**DRAMA 279. Advanced Sound Design. 4 Units.**

An in-depth investigation into sound design for the theatre. Special emphasis is placed on text analysis, design conception, content creation, content delivery, and design organization. Class projects include creating paper designs and paperwork for different texts.

**DRAMA 280A. Techniques in Costume Design. 4 Units.**

Student exercises in the techniques and implementation of costume design.

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only.

**DRAMA 280B. Techniques in Scenery Design. 4 Units.**

Student exercises in the techniques and implementation of scenic design.

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only.

**DRAMA 280C. Techniques in Lighting Design. 4 Units.**

Student exercises in the techniques and implementation of lighting design.

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only.

**DRAMA 280D. Techniques in Sound Design. 4 Units.**

Student exercises in the techniques and implementation of sound design.

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only.

**DRAMA 282. Stage Electronics/Introduction to Show Control. 4 Units.**

Using computers and dedicated hardware to cue, control or automate sound, scenery, and lighting for live performance and themed entertainment applications.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 290. Dramatic Literature and Theatre History Prior to 1900. 4 Units.**

Studies in selected areas of dramatic literature and theatre history prior to 1900. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**DRAMA 291. Dramatic Literature and Theatre History, 1900 to Present. 4 Units.**

Studies in selected areas of dramatic literature and theatre history, 1900 to present. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**DRAMA 292. Cultural and Critical Theory. 4 Units.**

Studies in selected areas of cultural and critical theory. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**DRAMA 293. Directed Studies. 4-12 Units.**

Directed study with Drama faculty.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

**DRAMA 294. Dissertation Research. 4-12 Units.**

Dissertation research with Drama faculty.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**DRAMA 295. Professional Internship. 1-12 Units.**

An arranged internship at the South Coast Repertory Theatre, or other equity theatre company, for qualifying M.F.A. students. A stipend and equity points are provided by the theatre company.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama graduate students only.

**DRAMA 297. Dramaturgy Practicum. 4 Units.**

Requires doctoral students to identify two plays from the Drama Department's season to work as dramaturges. Students write a Dramaturgy Booklet recording their research and interactions with director, actors, and the design team. Students will work with doctoral faculty.

Restriction: Graduate students only. Drama and Theatre Majors only.

**DRAMA 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

# Earth System Science (EARTHSS)

## Courses

### **EARTHSS 1. Introduction to Earth System Science. 4 Units.**

Covers the origin and evolution of the Earth, its atmosphere, and oceans, from the perspective of biogeochemical cycles, energy use, and human impacts on the Earth system.

(II and VA ).

### **EARTHSS 3. Oceanography. 4 Units.**

Examines circulation of the world oceans and ocean chemistry as it relates to river, hydrothermal vent, and atmospheric inputs. Geological features, the wide variety of biological organisms, and global climate changes, such as greenhouse warming, are also studied.

(II, Va)

### **EARTHSS 5. The Atmosphere. 4 Units.**

The composition and circulation of the atmosphere with a focus on explaining the fundamentals of weather and climate. Topics include solar and terrestrial radiation, clouds, and weather patterns.

(II and VA ).

### **EARTHSS 7. Physical Geology. 4 Units.**

Introduction to Earth materials and processes. Topics include rocks and minerals, plate tectonics, volcanoes, earthquakes, Earth surface processes, Earth resources, geologic time, and Earth history. Laboratory work involves hands-on study of geologic materials, maps, and exercises pertaining to geologic processes. Materials fee.

(II and VA ).

### **EARTHSS 15. Introduction to Global Climate Change. 4 Units.**

Introduction of scientific, technological, environmental, economic, and social aspects underlying the threat and understanding of global climate change. Human and natural drivers of climate. Impacts of climate on natural, managed, and human systems, including their vulnerability and ability to adapt.

(II and (VA or VIII) ).

### **EARTHSS 17. Hurricanes, Tsunamis, and Other Catastrophes. 4 Units.**

Introduction to the basic science and state of predictability of various natural catastrophic events including earthquakes, volcanic eruptions, tsunamis, landslides, floods, hurricanes, fires, and asteroid impacts and their interactions and implications with human society in the U.S. and globally.

Overlaps with PUBHLTH 90.

(II and (VA or VIII) ).

### **EARTHSS 19. Introduction to Modeling the Earth System. 4 Units.**

Simulate the Earth's system using computer models. Covers the interaction of the air, land, and ocean, and explores how changes to one part of the environment affect the complete Earth system. Utilizes technological tools to understand scientific principles.

(II, Vb)

### **EARTHSS 21. On Thin Ice: Climate Change and the Cryosphere. 4 Units.**

Introduction of the basic science that governs the cryosphere and its interaction with the climate system. Covers some of the significant economic, sociological, and political consequences of the recent melting of the cryosphere driven by anthropogenic climate change.

(II and (VA or VIII) ).

### **EARTHSS 23. Air Pollution: From Urban Smog to Global Change . 4 Units.**

Air pollution occurs on regional to global scales. A wide range of air pollution sources and physical, chemical, and meteorological sciences behind air pollution are introduced. The consequences of air pollution to our society are also discussed.

(II and (VA or VIII) ).

### **EARTHSS 27. The Sustainable Ocean. 4 Units.**

An introduction to sustainability as it relates to marine resources and conservation. Topics include the scientific basis of our understanding of marine ecosystems, and the political, social, and cultural principles that govern resource protection.

(II and VIII ).

**EARTHSS H30B. Environmental Issues Affecting the Sustainability of Societies I. 4 Units.**

Focuses on several environmental challenges facing the world today, and explores the problem, possible solutions, and their scientific, technical, and social constraints. Models for systems, their assumptions, predictive uncertainty, and interpretation, play a large role.

Prerequisite: CHEM H30A. CHEM H30A with a grade of C or better

Overlaps with EARTHSS 15.

Restriction: Campuswide Honors Collegium students only.

(II and Vb ).

**EARTHSS H30C. Environmental Issues Affecting the Sustainability of Societies II. 4 Units.**

Focuses on how we can use Earth's resources, e.g., food and water, in a more sustainable way, exploring their scientific, technical, and social constraints.

Prerequisite: EARTHSS H30B. EARTHSS H30B with a grade of C or better

Restriction: Campuswide Honors Collegium students only.

(III)

**EARTHSS 40A. Earth System Chemistry. 4 Units.**

To understand the cycling of matter on Earth, we need to learn about the chemistry of elements and molecules in the environment. Introduces students to the understanding of how chemical principles apply in context to their everyday lives.

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment.

(II and VA ).

**EARTHSS 40B. Earth System Biology. 4 Units.**

Earth System Science is a highly interdisciplinary field that requires knowledge of various components of the Earth as a system, including the biosphere. Students are introduced to several fundamental principles of biology, from the smallest cells to the largest ecosystems.

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment.

(II)

**EARTHSS 40C. Earth System Physics. 4 Units.**

Covers the fundamental physical forces and laws that affect the Earth system, such as electromagnetic radiation and energy transfer, atmospheric and ocean dynamics. Also covers aspects of physics related to environmental issues, such as electricity generation and transmission.

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment.

(II and VA ).

**EARTHSS 45. New Student Seminar. 1 Unit.**

Weekly meetings led by faculty, current students, and staff, to provide information on the Department of Earth System Science, campus resources, and special programs and opportunities. Designed for students who recently joined the Earth System Science and Environmental Science majors.

Grading Option: Pass/no pass only.

Restriction: Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment. New students only (freshman, transfer, and change of major).

**EARTHSS 51. Land Interactions. 4 Units.**

The role of terrestrial processes in the Earth system. Provides an introduction to ecosystem processes that regulate the cycling of energy, water, carbon, and nutrients. Analysis of the impact of human activities. Materials fee.

Corequisite: CHEM 1C

Restriction: Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 53. Ocean Biogeochemistry. 4 Units.**

Overview of oceanography for those interested in Earth System Science. Focus is on physical, chemical, and biological processes that drive biogeochemical cycling in the oceans. Coastal systems are also reviewed, with an emphasis on California waters.

Prerequisite: CHEM 1C

Restriction: Earth System Science Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment.

**EARTHSS 55. Earth's Atmosphere. 4 Units.**

Composition, physics, and circulation of Earth's atmosphere with an emphasis on explaining the role of atmospheric processes in shaping the climate system. Topics include atmospheric composition, the global energy balance, radiative transfer and climate, atmospheric circulation, and climate sensitivity.

Prerequisite or corequisite: (MATH 2B or MATH 5B) and (PHYSICS 3B or PHYSICS 7C)

Restriction: Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 70A. Sustainable Energy Systems. 4 Units.**

Addresses how modern energy services can be provided sustainably and the challenges and barriers that must be overcome. Major environmental issues are discussed, such as climate change, air pollution, and resource demands.

Prerequisite or corequisite: EARTHSS 40C or PHYSICS 3C or PHYSICS 7E

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 70B. Sustainable Food and Water Systems. 4 Units.**

Explores the biophysical underpinnings of food production, the history of agricultural development, and a range of environmental issues facing agricultural systems, including water management, climate change, and land use.

Prerequisite or corequisite: EARTHSS 40B or (BIO SCI 93 and BIO SCI 94)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 100. Special Topics in Earth System Science. 1-4 Units.**

Devoted to current topics in the field of Earth System Science. Topics addressed vary each quarter.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B)

Repeatability: May be taken for credit for 12 units as topics vary.

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 101. Paleoclimatology. 4 Units.**

Explores past changes in Earth's climate. Topics include tools and techniques used to reconstruct past climate from natural archives; records and mechanisms of past climate changes throughout Earth history; and lessons learned from the paleo-record for prediction of future climate.

Prerequisite: EARTHSS 51 and EARTHSS 53 and EARTHSS 55

Restriction: Earth System Science Majors have first consideration for enrollment.

Concurrent with EARTHSS 201.

**EARTHSS 112. Global Climate Change and Impacts. 4 Units.**

Observations over the 20th century show extensive changes in atmospheric composition, climate and weather, and biological systems that have paralleled industrial growth. Evidence of globally driven changes in these biogeochemical systems is studied, including projected impacts over the 21st century.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 114. Earth System Science Laboratory and Field Methods. 4 Units.**

Introduction to methods used to measure exchange of gases and energy between the atmosphere and terrestrial ecosystems. Laboratories include data acquisition and isotopic and chromatographic analysis. Field measurements at UCI's Marsh Reserve include microclimate, hydrology, trace-gas exchange, and plant growth. Materials fee.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 115. Aquatic Field Methods. 4 Units.**

Students design sampling plans, conduct field research techniques, and carry out data analyses that are relevant to aquatic field research. Aquatic field sites covered in the course include marine, estuarine, and fluvial systems. Materials fee.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 116. Introduction to Environmental Data Science. 4 Units.**

Analysis and interpretation of geophysical data, including functional fitting, probability density functions, and multidimensional time-series methods, with applications in atmospheric, oceanic, and biogeochemical sciences.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 118. Analysis, Modeling, and Visualization of Multidimensional Environmental Data. 4 Units.**

Students learn programming and numerical methods in Python with applications in Earth System Science and ecology. Topics include regression, uncertainty and significance, the development of simple box models, and the visualization of multi-dimensional climate and satellite datasets.

Prerequisite: I&C SCI 31 or EARTHSS 116

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 122. Atmospheric Dynamics. 4 Units.**

Fluid dynamical processes that determine the large-scale flow of the atmosphere and ocean. Most important are interactions between the density stratification and the Coriolis force associated with Earth's rotation. Topics include circulation, vorticity, planetary waves, and their role in climate.

Prerequisite: EARTHSS 55 and (PHYSICS 7C or PHYSICS 3B)

Restriction: Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 124. Weather Analysis. 4 Units.**

Provides an overview of weather systems in midlatitudes and tropics. The fundamental dynamics possible for these weather systems are described. Elementary weather analysis and forecasting techniques are introduced.

Prerequisite: EARTHSS 55

Restriction: Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 130. Physical Oceanography. 4 Units.**

Physical processes that determine the distribution of water properties such as salt and temperature. Fluid-dynamical underpinnings of physical oceanography. Wave motions. The wind-driven and thermohaline circulation. Similarities and differences between ocean and atmosphere dynamics.

Prerequisite: (PHYSICS 7C or PHYSICS 3B) and EARTHSS 53

Restriction: Earth System Science Majors have first consideration for enrollment.

**EARTHSS 132. Terrestrial Hydrology. 4 Units.**

Comprehensive treatment of modern conceptual and methodological approaches to hydrological science. Combines qualitative understanding of hydrological processes with quantitative representation, approaches to measurement, and treatment of uncertainty. Components of the hydrological cycle and their linkages within the coupled Earth system.

Prerequisite: (EARTHSS 51 and EARTHSS 55) or (EARTHSS 40C and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 133. Soil: It's the Good Dirt. 4 Units.**

An introduction to the critical role soils play in sustaining land ecosystems and humans. Covers how soils form and how human actions contribute to the pollution and loss but also the health and productivity of soils.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors only. Environmental Science Majors only. Earth System Science Majors only.

**EARTHSS 134. Fundamentals of GIS for Environmental Science. 4 Units.**

Introduction to Geographic Information Systems (GIS). Topics include fundamentals of cartography, creating/editing GIS data, linking spatial and tabular data, georeferencing, map projections, geospatial analysis, spatial statistics, and the development of GIS models. Examples from hydrology, ecology, and geology.

Prerequisite: (EARTHSS 51 and EARTHSS 53) or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 138. Satellite Remote Sensing for Earth System Science. 4 Units.**

Satellite remote sensing data are increasingly used to study the Earth system. Provides an overview of the principles behind remote sensing, and the types of satellite data available for study of the oceans, land, and atmosphere.

Prerequisite: (EARTHSS 51 and EARTHSS 53) or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 140. Advanced Geology. 4 Units.**

Introduces students to the geological processes which have formed and continue to shape the Earth. Topics include geological time, minerals and the rock cycle, plate tectonics and associated geological hazards, earth resources, and earth surface processes. Materials fee.

Prerequisite: EARTHSS 51 or EARTHSS 70B

Overlaps with EARTHSS 7.

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 142. Atmospheric Chemistry. 4 Units.**

Chemistry of the troposphere and stratosphere. Topics include processes controlling the lifetime and reaction pathways of chemicals in the atmosphere, the role of the atmosphere in biogeochemical cycles, and interactions between atmospheric chemistry and the physical climate system.

Prerequisite: (CHEM 1C or CHEM H2C or CHEM M3C) and (PHYSICS 3C or PHYSICS 7E) and (MATH 2B or MATH 5B or AP Calculus BC). AP Calculus BC with a minimum score of 4

Restriction: Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 144. Marine Geochemistry and Biogeochemistry. 4 Units.**

Processes controlling the major and minor element composition of seawater and element distributions in the ocean. Gas exchange, carbon dioxide system, stable isotopes, radionuclides as tracers and chronometers, particle fluxes, organic geochemistry, sediment geochemistry, global cycles of biogeochemically important elements.

Prerequisite: EARTHSS 53 or CHEM 51C

Restriction: School of Physical Sciences students have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 146. Consequences of Air Pollution. 4 Units.**

From public health to the global climate system, this course explores the impacts of air pollution from the beginning of human history to current and emerging issues. Scientific concepts behind air pollution and solutions are discussed.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 40C and EARTHSS 70A)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 148. Marine Ecosystems and Global Change. 4 Units.**

Presents an overview of marine ecosystem structure, diversity, and processes in the context of global change, including the impacts of climate warming, ocean acidification, marine fisheries, and anthropogenic additions of nutrients and pollutants.

Prerequisite: EARTHSS 53 or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

Concurrent with EARTHSS 248.

**EARTHSS 154. Ecosystem Services. 4 Units.**

Covers what ecosystem services are, how to classify them, what the impacts of land degradation are on ecosystem services, how to quantify and value them, and the importance of mainstreaming ecosystem services in decision-making.

Prerequisite: (EARTHSS 70A and EARTHSS 70B) or (EARTHSS 51 and EARTHSS 53 and EARTHSS 55)

Same as BIO SCI E146.

**EARTHSS 156. The Future of Forests. 4 Units.**

Introduces students to the determinants of global forest distribution; ecosystem services associated with forest functioning; threats to forests resulting from climate and land-use change; and, opportunities for conserving natural forests in the near future.

Prerequisite: (EARTHSS 70A and EARTHSS 70B) or (EARTHSS 51 and EARTHSS 53 and EARTHSS 55)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 158. Research Methods for Sustainable Systems Analysis. 4 Units.**

Develops students' analytical skills that are necessary to engage and assess the sustainability of coupled human and natural systems and effectively communicate their findings.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B). Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment. Global Sustainability Minors have first consideration for enrollment.

**EARTHSS 162. The Impact of Climate Change on California's Landscape. 4 Units.**

Overview of anticipated impacts of climate change on California's landscape. Includes projections of future climate; anticipated impacts on ecology, hydrology, wildfire, coastal environment, and agriculture; and efforts to reduce greenhouse gas emissions or adapt to climate change through land management.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 164. Ecosystem Ecology. 4 Units.**

A mechanistic perspective on ecosystem processes. Covers ecosystem development, element cycling, and interactions with plants and microbes. The role of ecosystems in environmental change is also addressed.

Prerequisite: BIO SCI E106 or EARTHSS 51 or EARTHSS 60A or CHEM 51C

Same as BIO SCI E118.

Restriction: Earth System Science Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Ecology and Evolutionary Biol Majors have first consideration for enrollment.

Concurrent with EARTHSS 264.

**EARTHSS 168. Physiological Plant Ecology. 4 Units.**

An examination of the interactions between plants and their environment. Emphasis on the underlying physiological mechanisms of plant function, adaptations and responses to stress, and the basis of the distribution of plants and plant assemblages across the landscape.

Prerequisite: EARTHSS 51 or BIO SCI 94 or (EARTHSS 60A and EARTHSS 60C)

Same as BIO SCI E127.

Restriction: Biological Sciences Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 171. Microbial Biogeochemistry. 4 Units.**

Develops an understanding of microorganisms in the context of their environment, environmental impact, and role in the global cycles of C,N,P, etc. Focuses on tools used to evaluate microbial diversity and function, and applications of microbial ecology.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors only. Environmental Science Majors only. Earth System Science Majors only.

**EARTHSS 176W. Marine Conservation, Policy, and Society. 4 Units.**

Conservation of marine ecosystems is important yet challenging due to competing physical, ecological, social, and regulatory issues. Students explore the principles of marine conservation, the scientific basics of marine ecosystems, and political and social processes involved with resource protection.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B). Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

(Ib)

**EARTHSS 177W. Documenting and Understanding Earth System Change. 4 Units.**

Students select a time series of key environmental interest as the focus for their writing. They become familiar with common writing practices for the Earth Sciences, and exercise their ability to use the scientific method to produce reports.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B). Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Environmental Science and Policy Majors only. Environmental Science Majors only. Earth System Science Majors only.

(Ib)

**EARTHSS 179. Climate Solutions. 4 Units.**

Focuses on carbon neutrality and climate stability, addressing.

Same as ENGRMAE 119, UPPP 111.

Restriction: Upper-division students only.

**EARTHSS 190A. Senior Seminar on Global Sustainability I. 2 Units.**

Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum is also required. Seminar utilized to analyze forum presentations. Prepare bibliography.

Same as BIO SCI 191A, SOCECOL 186A.

Restriction: Seniors only. Global Sustainability Minors have first consideration for enrollment.

**EARTHSS 190B. Senior Seminar on Global Sustainability II. 2 Units.**

Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum is also required. Seminar utilized to analyze forum presentations. Prepare research proposal.

Prerequisite: BIO SCI 191A or SOCECOL 186A or EARTHSS 190A

Same as BIO SCI 191B, SOCECOL 186B.

Restriction: Seniors only.

**EARTHSS 190CW. Writing/Senior Seminar on Global Sustainability III. 4 Units.**

Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum also is required. Seminar utilized to analyze Forum presentations and to prepare senior research paper. Prepare/write research paper under direction of faculty member.

Prerequisite: BIO SCI 191B or EARTHSS 190B or SOCECOL 186B. BIO SCI 191B or EARTHSS 190B or SOCECOL 186B. Satisfactory completion of the Lower-Division Writing requirement.

Same as BIO SCI 191CW, SOCECOL 186CW.

Restriction: Seniors only.

**(Ib)****EARTHSS 191. Introduction to Research in Earth System Science. 1 Unit.**

Weekly presentations by Earth System Science faculty describing ongoing research in their laboratories. Students are introduced to the range of research topics and methods in Earth System Science and to the research opportunities available within the Department.

Prerequisite: (EARTHSS 60A and EARTHSS 60B) or (EARTHSS 51 and EARTHSS 53)

Grading Option: Pass/no pass only.

Restriction: Earth & Atmospheric Sciences Minors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 192. Careers in Earth System Science. 1 Unit.**

A weekly seminar course designed to help students transition to post-graduation career paths. Topics include designing effective resumes, applying to graduate school, and seeking employment. Also includes presentations by faculty, business, and government leaders describing potential environmental science career trajectories.

Grading Option: Pass/no pass only.

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 197. Independent Study in Earth System Science. .5-4 Units.**

Field study, educational outreach, or other independent projects under faculty direction. Interested students should arrange with an ESS faculty member to supervise and support an independent study project. A written summary is required at the end of each quarter.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 12 units.

**EARTHSS 198W. Senior Thesis in Earth System Science. 4 Units.**

Students receive guidance on the effective oral and written communication of research results. Students prepare and present a seminar, a poster, and a written thesis describing their research in Earth System Science.

Prerequisite: Two quarters of EARTHSS 199. Satisfactory completion of the Lower-Division Writing requirement.

Overlaps with EARTHSS H198.

(Ib)

**EARTHSS H198. Honors Thesis in Earth System Science. 4 Units.**

Students receive guidance on effective written and oral communication of research results. Students prepare and present a seminar, poster, and written thesis describing their honors research in Earth System Science. Submission of the thesis and successful completion of this course will also satisfy the UCI upper-division writing requirement.

Prerequisite: ESS 199A and ESS 199B

Restriction: Consent of instructor to enroll and Prerequisite required

(Ib)

**EARTHSS 199. Undergraduate Research. 1-4 Units.**

For undergraduates with majors in science or engineering. Interested students should arrange with an ESS faculty member to supervise and support a research project. A written summary is required at the end of each quarter.

Repeatability: May be taken for credit for 12 units.

**EARTHSS H199A. Honors Research in Earth System Science. 4 Units.**

Undergraduate honors research in Earth System Science. A student commitment of 10-15 hours a week is expected, and a written report is required at the end of the quarter.

Restriction: Earth System Science Honors students only. Campuswide Honors Collegium students only.

**EARTHSS H199B. Honors Research in Earth System Science. 4 Units.**

Undergraduate honors research in Earth System Science. A student commitment of 10-15 hours a week is expected, and a written report is required at the end of the quarter.

Restriction: Earth System Science Honors students only. Campuswide Honors Collegium students only.

**EARTHSS H199C. Honors Research in Earth System Science. 4 Units.**

Undergraduate honors research in Earth System Science. A student commitment of 10-15 hours a week is expected, and a written report is required at the end of the quarter.

Restriction: Earth System Science Honors students only. Campuswide Honors Collegium students only.

**EARTHSS 200. Global Physical Climatology. 4 Units.**

A descriptive overview of Earth's climate system and energy budget. Large-scale circulations, key physical processes, and climate sensitivity of the atmosphere, ocean, land surface, and cryosphere.

Restriction: Graduate students only.

**EARTHSS 201. Paleoclimatology . 4 Units.**

Explores past changes in Earth's climate. Topics include tools and techniques used to reconstruct past climate from natural archives; records and mechanisms of past climate changes throughout Earth history; and lessons learned from the paleo-record for predication of future climate.

Restriction: Graduate students only.

Concurrent with EARTHSS 101.

**EARTHSS 202. Climate Change. 4 Units.**

Explores past, present, and projected changes in Earth's climate. Topics include paleoclimate records and mechanisms of natural climate variability at a range of timescales (orbital to seasonal); General Circulation Models; and IPCC observations and projections of future climate change.

Restriction: Graduate students only.

**EARTHSS 204. Humans in the Earth System. 4 Units.**

Focuses on the human systems of energy and food production which have the greatest effects on the Earth system. Assess the physical mechanisms and feedbacks of human-nature interactions and consider approaches of mitigation, interventions, and adaptation.

Restriction: Graduate students only. Earth System Science Majors only.

**EARTHSS 212. Geoscience Modeling and Data Analysis. 4 Units.**

Computer-based course. Fundamental statistical techniques needed to analyze Earth system data and models. Basic numerical techniques to solve Earth system models. Focuses on linear and non-linear ordinary differential equations, as well as simple partial differential equations.

Restriction: Graduate students only.

**EARTHSS 215. Cryosphere. 4 Units.**

A global perspective of the major components of the cryosphere. Includes current extent and trends, mass balance, energetics, and physical processes. Quantitative assessment of current state, in situ and remote observations, and interactions with climate.

Restriction: Graduate students only.

**EARTHSS 224. Ocean Processes. 4 Units.**

Introduction to the physics, chemistry, and biology of the oceans. Offers a mechanistic perspective of the structure and functioning of marine ecosystems, nutrient cycles, and role of ecosystem dynamics in local and global biogeochemistry.

Restriction: Graduate students only.

**EARTHSS 225. Marine Biogeochemistry. 4 Units.**

Overview of ocean biology and biogeochemistry, with a focus on lower trophic levels and the roles of biota in the marine biogeochemical cycles of key elements.

Restriction: Doctor of Philosophy Degree students have first consideration for enrollment. Graduate students only. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 226. Land Surface Processes. 4 Units.**

A mechanistic perspective of the structure and functioning of terrestrial ecosystems. Includes processes such as nutrient cycling, biogeochemical cycling, mass balance, energetics, terrestrial hydrology, and water cycle.

Restriction: Graduate students only.

**EARTHSS 228. Geophysical Fluid Dynamics. 4 Units.**

Introduces fluid dynamical processes that determine the large-scale flow of the atmosphere and ocean, with particular emphasis on the interactions between the stable density stratification and the Coriolis force associated with Earth's rotation.

Restriction: Graduate students only.

**EARTHSS 230. Physical Oceanography. 4 Units.**

Physical processes that determine the distribution of water properties such as salt and temperature. Fluid-dynamical underpinnings of physical oceanography. Wave motions. The wind-driven and thermohaline circulation. Similarities and differences between ocean and atmosphere dynamics.

Prerequisite: MATH 2D and PHYSICS 7A and PHYSICS 7B and PHYSICS 7E

Restriction: Graduate students only.

**EARTHSS 238. Satellite Remote Sensing for Earth System Science. 4 Units.**

Satellite remote sensing data are increasingly used to study the Earth system. Provides an overview of the principles behind remote sensing, and the types of satellite data available for study of the oceans, land, and atmosphere.

**EARTHSS 240. Atmospheric Chemistry and Physics. 4 Units.**

Examines the physical/chemical processes which determine the structure and composition of Earth's atmosphere and its role in the climate system.

Restriction: Graduate students only.

**EARTHSS 242. Advanced Atmospheric Chemistry. 4 Units.**

Chemistry of the troposphere and stratosphere. Topics include: processes controlling the lifetime and reaction pathways of chemicals in the atmosphere, the role of the atmosphere in biogeochemical cycles, and interactions between atmospheric chemistry and the physical climate system.

Restriction: Graduate students only.

**EARTHSS 244. Introduction to Atmospheric Dynamics. 4 Units.**

Covers fundamentals of atmospheric dynamics including thermodynamics, quasi-geostrophy, the weak-temperature gradient of the tropics, and the turbulent boundary layer.

Restriction: Graduate students only.

**EARTHSS 248. Marine Ecosystems and Global Change. 4 Units.**

Presents an overview of marine ecosystem structure, diversity, and processes in the context of global change, including the impacts of climate warming, ocean acidification, marine fisheries, and anthropogenic additions of nutrients and pollutants.

Prerequisite: EARTHSS 224

Restriction: Graduate students only.

Concurrent with EARTHSS 148.

**EARTHSS 252. Environmental Isotope Geochemistry. 4 Units.**

Covers the fundamentals of stable, radioactive, and radiogenic isotope variability in the Earth System. Focuses on theory, measurement techniques, biogeochemistry, hydrology, ecology, and climate related applications.

Restriction: Graduate students only.

Concurrent with EARTHSS 152.

**EARTHSS 256. Paleoclimatology and Paleocceanography. 4 Units.**

Explores past changes in Earth's climate. Topics include tools and techniques used to reconstruct past climate from natural archives; records and mechanisms of past climate changes throughout Earth history; and lessons learned from the paleo-record for prediction of future climate.

Restriction: Graduate students only.

**EARTHSS 264. Ecosystem Ecology . 4 Units.**

A mechanistic perspective on ecosystem processes. Covers ecosystem development, element cycling, and interactions with plants and microbes. The role of ecosystems in environmental change is also addressed.

Prerequisite: CHEM 51C

Concurrent with EARTHSS 164 and BIO SCI E118.

**EARTHSS 266. Global Biogeochemical Cycles. 4 Units.**

Global biogeochemical cycling of the elements. Topics include global cycling of carbon, nitrogen, oxygen, and sulfur; impact of human activities on biogeochemical processes.

Restriction: Graduate students only.

**EARTHSS 280A. Special Topics in Earth System Science. 1-4 Units.**

Each quarter is devoted to current topics in the field of Earth System Science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**EARTHSS 280B. Special Topics in Earth System Science. 1-4 Units.**

Each quarter is devoted to current topics in the field of Earth System Science. Topics addressed vary each quarter.

Prerequisite: EARTHSS 280A

Repeatability: Unlimited as topics vary.

**EARTHSS 280C. Special Topics in Earth System Science. 1-4 Units.**

Each quarter is devoted to current topics in the field of Earth System Science. Topics addressed vary each quarter.

Prerequisite: EARTHSS 280B

Repeatability: Unlimited as topics vary.

**EARTHSS 282C. Special Topics in Climate. 1-4 Units.**

Each quarter is devoted to in-depth analysis of an important and rapidly developing area in the field of climate dynamics. Topics addressed vary each quarter.

Prerequisite: EARTHSS 282B

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EARTHSS 286A. Special Topics in Biogeochemistry. 1-4 Units.**

Each quarter is devoted to in-depth analysis of a subarea in biogeochemistry which is undergoing rapid development. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EARTHSS 286B. Special Topics in Biogeochemistry. 1-4 Units.**

Each quarter is devoted to in-depth analysis of a subarea in biogeochemistry which is undergoing rapid development. Topics addressed vary each quarter.

Prerequisite: EARTHSS 286A

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EARTHSS 286C. Special Topics in Biogeochemistry. 1-4 Units.**

Each quarter is devoted to in-depth analysis of a subarea in biogeochemistry which is undergoing rapid development. Topics addressed vary each quarter.

Prerequisite: EARTHSS 286B

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EARTHSS 288C. Special Topics in Ecosystems. 1-4 Units.**

Each quarter is devoted to current topics relating to Ecosystems. Topics addressed vary each quarter.

Prerequisite: EARTHSS 288B

Repeatability: Unlimited as topics vary.

**EARTHSS 290. Seminar. 1 Unit.**

Weekly seminars and discussions on topics of general and current interest in Earth System Science. Topics addressed vary each quarter.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EARTHSS 298. Practicum in Earth System Science. 4 Units.**

Designed to introduce first-year graduate students to research. Students explore research opportunities and develop a proposal for a summer research project under the direction of a faculty mentor.

Restriction: Graduate students only.

**EARTHSS 299. Research. 2-12 Units.**

Supervised original research in areas of Earth System Science.

Repeatability: May be repeated for credit unlimited times.

**EARTHSS 399. University Teaching. 1-4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## East Asian Studies (EAS)

### Courses

**EAS 15C. Introductory Topics in Chinese Literature. 4 Units.**

Introduces students to major themes in Chinese literature and culture through the close reading, discussion, and analysis of selected texts in English translation.

Repeatability: Unlimited as topics vary.

Restriction: Korean Literature and Culture Majors only. Chinese Studies Majors only. Japanese Language Literature Majors only. East Asian Cultures Majors only.

**EAS 15J. Introductory Topics in Japanese Literature. 4 Units.**

Introduces students to major themes in Japanese literature and culture through the close reading, discussion, and analysis of selected texts in English translation.

Repeatability: Unlimited as topics vary.

Restriction: Korean Literature and Culture Majors only. Chinese Studies Majors only. Japanese Language Literature Majors only. East Asian Cultures Majors only.

**EAS 15K. Introductory Topics in Korean Literature. 4 Units.**

Introduces students to major themes in Korean literature and culture through the close reading, discussion, and analysis of selected texts in English translation.

Repeatability: Unlimited as topics vary.

Restriction: Korean Literature and Culture Majors only. Chinese Studies Majors only. Japanese Language Literature Majors only. East Asian Cultures Majors only.

**EAS 20. Topics in Asian Religions . 4 Units.**

An introduction to Asian religions (Hinduism, Buddhism, Confucianism, Taoism, Shamanism) including both elite doctrinal aspects and forms of more popular religiosity.

Repeatability: May be taken for credit 3 times as topics vary.

(IV and VIII ).

**EAS 40. Topics in East Asian Popular Culture. 4 Units.**

Selected topics in the popular cultural traditions of East Asia designed to introduce students both to problems in situating culture in a specific time and place and to contemporary theories of popular culture and their application to East Asian contexts.

Repeatability: Unlimited as topics vary.

(IV and VIII ).

**EAS 55. Introduction to East Asian Cultures . 4 Units.**

Interdisciplinary courses organized each year around a broad theme designed to introduce students to the cultures of East Asia. Topical organization of courses addresses issues that have been of importance historically and are reshaping East Asia today.

Repeatability: May be taken for credit 3 times as topics vary.

(IV and VIII ).

**EAS H84. Traveling East/West. 4 Units.**

Traveling East/West presents a wide range of travel writings by Chinese, Indian, and Euro-American authors in which they contemplate the complexities of cross-cultural encounters and how knowledge about others and knowledge of ourselves are closely intertwined.

Same as HUM H84.

Restriction: Campuswide Honors Collegium students only.

**(IV)****EAS 110. Topics in Chinese Literature and Society. 4 Units.**

Studies in Chinese texts in their social and cultural context(s). Conducted in English.

Repeatability: May be taken for credit 3 times as topics vary.

**EAS 116. Topics in East Asian Religions. 4 Units.**

Selected topics in the religions of East Asia, e.g., Buddhism, Daoism, Shintô, Christianity, popular religions.

Repeatability: May be taken for credit 3 times as topics vary.

**EAS 117. Topics in East Asian Philosophy. 4 Units.**

Selected topics in the philosophies of East Asia, e.g., Yoga, Buddhism, Vedanta, Confucianism, Taoism, and Shinto.

Repeatability: Unlimited as topics vary.

**EAS 120. Topics in Japanese Literature and Society. 4 Units.**

Studies in Japanese texts in their social and cultural context(s). Conducted in English.

Repeatability: May be taken for credit 3 times as topics vary.

**EAS 123. Structure of Japanese. 4 Units.**

An overview of the linguistic features of modern Japanese. Provides students with a systematic introduction to the nature and characteristics of the language.

Same as LSCI 165B.

**EAS 126. Topics in East Asian Linguistics. 4 Units.**

In-depth examination of selected topics in the linguistics of East Asian languages, including Chinese, Japanese, Korean, and Vietnamese.

Repeatability: May be taken for credit 3 times as topics vary.

**EAS 130. Topics in Korean Society and Culture. 4 Units.**

Studies of the social and cultural forces that affect the lives of the Koreans, including those in the United States. Considers traditional values and contemporary issues within a historical framework.

Repeatability: May be taken for credit 3 times as topics vary.

**EAS 140. Topics in Korean Literature and Society. 4 Units.**

Studies in Korean texts in their social and cultural context(s). Conducted in English.

Repeatability: May be taken for credit 3 times as topics vary.

**EAS 150. Topics in East Asian Literature in Translation. 4 Units.**

East Asian literary works in translation. Taught in English.

Repeatability: Unlimited as topics vary.

**EAS 155. Topics in Cultural Studies in East Asia. 4 Units.**

Interdisciplinary and theoretical introduction to issues in cultural studies that are pertinent to the study of East Asia. All readings in English.

Repeatability: Unlimited as topics vary.

**EAS 160. Topics in East Asian Cinema. 4 Units.**

Study of East Asian cinema from historical, theoretical, and comparative perspectives. Taught in English.

Repeatability: Unlimited as topics vary.

**EAS 170. Topics in Gender in East Asia . 4 Units.**

Explores the construction of gender in East Asian cultures and literatures. Pays close attention to the specificity of historical, cultural, and literary contexts of East Asia as it investigates various theoretical and critical perspectives on gender and sexuality.

Repeatability: Unlimited as topics vary.

**EAS 190. Junior-Senior Colloquium. 4 Units.**

Specialized courses dealing with primary sources; required reports and papers. Each colloquium reflects the instructor's intellectual interest and is conducted as a discussion group. Limited to 15 students.

Repeatability: May be taken for credit 3 times as topics vary.

Restriction: Upper-division students only. Korean Literature and Culture Majors only. Chinese Studies Majors only. Japanese Language Literature Majors only. East Asian Cultures Majors only.

**EAS 192W. Junior-Senior Seminar. 4 Units.**

Analysis of a literary or cultural topic or problem through research and writing of two short and one long research paper for a minimum of 4,000 total words. Seminar follows EAS 190; related to the colloquium's subject.

Prerequisite: EAS 190. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 3 times as topics vary.

**(Ib)****EAS 199. Independent Study. 1-4 Units.**

Investigation of special topics through directed reading in translation. Paper required.

Repeatability: May be taken for credit for 12 units.

**EAS 216. Topics in East Asian Religions . 4 Units.**

Selected topics in the religions of East Asia, e.g., Buddhism, Daoism, Shintô, Islam, shamanism.

Repeatability: May be taken for credit 3 times as topics vary.

**EAS 220. Topics in East Asian Cultural Studies. 4 Units.**

Seminar, with topics varying from year to year. Research paper required.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EAS 225. Topics in East Asian Applied Linguistics. 4 Units.**

In-depth examination of selected topics in applied linguistics, with a particular emphasis on language acquisition and language pedagogy.

Repeatability: May be taken for credit 3 times as topics vary.

Concurrent with EALL 125.

**EAS 260. Topics in East Asian Cinema. 4 Units.**

An examination of the possibilities of East Asian cinematic narrative. Possible topics: cinematic history; cinema in popular culture; comparisons with literary texts; major auteurs. Emphasis on technical as well as on thematic aspects. Includes readings in film theory.

Prerequisite: EAS 160

Repeatability: Unlimited as topics vary.

**EAS 290. Independent Study. 2-4 Units.**

Directed research on topic determined in consultation with faculty member. A term paper or project is required.

Repeatability: May be repeated for credit unlimited times.

**EAS 299. Dissertation Research. 4-12 Units.**

Dissertation research for students who are advanced to doctoral candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**EAS 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Ecology and Evolutionary Biology (ECO EVO)

### Courses

**ECO EVO 200A. Research in Ecology and Evolutionary Biology. 2-12 Units.**

Individual research with Ecology and Evolutionary Biological faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ECO EVO 200B. Research in Ecology and Evolutionary Biology. 2-12 Units.**

Individual research with Ecology and Evolutionary Biological faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ECO EVO 200C. Research in Ecology and Evolutionary Biology. 2-12 Units.**

Individual research with Ecology and Evolutionary Biological faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ECO EVO 201. Seminar in Ecology and Evolutionary Biology. 2 Units.**

Invited speakers, graduate students, and faculty present current research in ecology and evolutionary biology.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

Concurrent with BIO SCI E107.

**ECO EVO 203A. Graduate Tutorial in Ecology and Evolutionary Biology. 2-12 Units.**

Advanced study in areas not represented by formal courses. May involve individual or small group study through reading, discussion, and composition.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ECO EVO 203B. Graduate Tutorial in Ecology and Evolutionary Biology. 2-12 Units.**

Advanced study in areas not represented by formal courses. May involve individual or small group study through reading, discussion, and composition.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ECO EVO 203C. Graduate Tutorial in Ecology and Evolutionary Biology. 2-12 Units.**

Advanced study in areas not represented by formal courses. May involve individual or small group study through reading, discussion, and composition.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ECO EVO 204. Writing Grant Proposals. 4 Units.**

Provides students with hands-on experience writing proposals in the research areas of ecology, evolution, or physiology.

Restriction: Graduate students only.

**ECO EVO 205. Special Topics in Ecology. 4 Units.**

Survey of special topics in Ecology.

Restriction: Graduate students only.

**ECO EVO 206. Special Topics in Evolution. 4 Units.**

Extensive introduction to the primary literature of evolutionary biology. Topics include population genetics, quantitative genetics, neutralism, molecular evolution, evolution of genetic systems, genetic architecture of fitness, speciation, and macroevolution.

Restriction: Graduate students only.

**ECO EVO 207. Quantitative Methods in Ecology and Evolutionary Biology. 4 Units.**

Statistics for ecologists and evolutionary biologists. Emphasis on specific applications and underlying assumptions rather than on methods of calculation. Topics include experimental design, parametric and nonparametric methods, analysis of variance and covariance, and multiple regression.

Prerequisite: Completion of at least one quarter of statistics including regression and analysis of variance.

Restriction: Graduate students only.

**ECO EVO 208. Ecological and Evolutionary Physiology. 4 Units.**

A summary of information in organismal biology, comparative and ecological physiology, and the biophysical basis of organismal function. Course offered every other fall.

Restriction: Graduate students only.

**ECO EVO 210. Foundations of Physiology. 4 Units.**

Physical and functional principles common to many living forms. Course forms a basis for subsequent specialization in any of the subdisciplines of physiology. Course offered in even years.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ECO EVO 219. Advanced Topics in Ecological Genetics. 4 Units.**

Content and instructor will vary from year to year. Possible topics include coevolution, sex-ratio evolution, evolution senescence, plant population biology, and density-dependent selection.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ECO EVO 221. Advanced Topics in Ecology. 2-4 Units.**

Weekly discussion of current topics in ecology at the graduate level.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

**ECO EVO 222. Statistical Learning in Ecology and Evolution. 4 Units.**

Reviews basic principals of variance/bias trade-offs. Topics include models for prediction and classification, variable selection methods, cross-validation, tree based methods, unsupervised learning. Applications in ecology and evolution using R.

Prerequisite: ECO EVO 207. ECO EVO 207 with a grade of B or better

Restriction: Graduate students only.

**ECO EVO 227. Plant Physiological Ecology. 4 Units.**

Provides a summary of information on plant organismal biology, comparative and ecological physiology, and functional ecology. Offered every other fall.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ECO EVO 228. Seminar in Conservation Biology. 2 Units.**

Devoted to the application of basic ecological principles to the understanding and resolution of environmental problems of both local and global natures. Current problems approached through a combination of readings, group discussions, and visiting speakers.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ECO EVO 230. Topics in Microbial Ecology. 2-4 Units.**

Weekly discussion of current topics in ecology, biogeochemistry, evolution, and physiology of microbial organisms.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**ECO EVO 235. Experimental Evolution. 2 Units.**

Explores experimental evolution, which is now a well-established part of evolutionary biology. With the advent of genomics, it is now one of the most powerful tools for studying the genetic foundations of biology.

Prerequisite: BIO SCI E106

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Biological Sciences students only.

**ECO EVO 246. Seminar in Ecology and Evolution Education. 2 Units.**

Weekly discussion of teaching techniques and challenges that are specific to courses in ecology and evolutionary biology. Emphasis will be on using evidence-based pedagogy techniques. There will be a combination of readings, group discussions and speakers.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ECO EVO 251. Evolutionary and Ecological Principles in Medicine. 4 Units.**

Explore the dynamics of populations on an ecological, epidemiological, and medical level. Considers the dynamics of competition, predation, and parasitism; the spread and control of infectious diseases; and the in vivo dynamics of viral infections and the immune system.

Restriction: Graduate students only.

Concurrent with BIO SCI E151.

**ECO EVO 253. Functional and Structural Evolutionary Genomics. 4 Units.**

Function and organization of genomes analyzed from an evolutionary perspective. Review of some of the most recent experimental approaches in genome analysis and comparative genomics. Relevant software to analyze DNA and expression data is used.

Concurrent with BIO SCI E153.

**ECO EVO 262. Professional Workshop. 2 Units.**

Identify and attend professional or technical skill workshops to gain professional knowledge and certifications related to conservation and restoration science.

Repeatability: May be taken for credit 4 times.

Restriction: Graduate students only.

**ECO EVO 264. Conservation Biology. 4 Units.**

Explores concepts in ecology with potential for conserving biological diversity. Identifies creative applications of ecological research that mitigate impacts of rapid human population growth and habitat destruction on biodiversity.

Restriction: Graduate students only.

**ECO EVO 265. Restoration Ecology. 4 Units.**

Study of principles and practices that help recover degraded ecosystems including restoration in different ecological systems, restoration motives and intensities, implementation and monitoring, and scope and success of case studies.

Restriction: Graduate students only.

**ECO EVO 266L. Field Methods in Restoration. 4 Units.**

Laboratory experience performing field methods that help recover degraded ecosystems in different ecological systems. Emphasis on the plant community composition, soil, irrigation, maintenance, and monitoring of a project.

**ECO EVO 267. Science Communication. 2 Units.**

Develops students' abilities to convey information related to conservation and restoration in a way that has broad appeal and/or effective messaging for non-scientific audiences by assessing the audience, developing effective storytelling, and deploying a persuasive information campaign.

Repeatability: May be taken for credit 2 times.

**ECO EVO 268. Technical Writing. 2 Units.**

Practice developing key documents for restoration projects including a response to a request for proposal (RFP), a restoration project plan, and a monitoring and maintenance plan.

**ECO EVO 269. Project Management. 2 Units.**

Discover the planning, design, implementation, and aftercare phases of managing a conservation or restoration project. Students will project cost, manage risk, analyze sites, evaluate and review projects, and become familiar with common permitting and consultation requirements.

**ECO EVO 270. GIS for Environmental Science. 4 Units.**

Introduction to the fundamental principles of GIS. Topics include cartography, creating/editing GIS data, georeferencing, map projections, geospatial analysis, spatial statistics, and development of GIS models. Focuses on theory and practice.

Restriction: Graduate students only.

**ECO EVO 271. Marine Research and Conservation Methods. 4 Units.**

Field-based introduction to marine ecology and conservation management through the study of the ecology, resource management, and conservation of marine habitats and species, and the use of a variety of marine field research methods.

Restriction: Graduate students only.

**ECO EVO 272. Plant Diversity in a Changing World. 4 Units.**

Investigation of plant diversity in California and throughout the world, including basic systematic concepts, introduction to major groups of flowering plants, and the effects of global biological change on plant diversity. Students carry out a phylogenetic analysis using appropriate software.

Concurrent with BIO SCI E172.

**ECO EVO 275. Wildlife Ecology and Sampling. 4 Units.**

Field-based introduction to wildlife management through the study of the ecology, physiology, population biology management, and conservation of vertebrate wildlife species, and the use of a variety of different wildlife sampling techniques.

Restriction: Graduate students only.

**ECO EVO 282. Fundamentals of Informatics for Biologists. 4 Units.**

Students learn the fundamentals of bioinformatics and the unix operating system (including the shell and Sun Grid Engine) in order to assemble a eukaryotic genome.

Restriction: Graduate students only.

**ECO EVO 283. Advanced Informatics for Biologists. 4 Units.**

Students learn advanced informatics including the analysis of: Poolseq, RNAseq, ATACseq, and ChIPseq datasets using programs such as bwa, tophat, cufflinks, DEseq, Trinity, Augustus, etc., in a unix high-performance computing environment. Statistical tests carried out and publication quality.

Prerequisite: ECO EVO 282

Restriction: Graduate students only.

**ECO EVO 285. Topics in Evolutionary Genetics. 2 Units.**

Weekly discussion of recent research on evolutionary genetics.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ECO EVO 286. MCRS Capstone. 2-12 Units.**

Apply knowledge and skills in a practical professional setting, working with practitioners to identify a conservation or management problem and then to plan, implement, and evaluate a solution.

Repeatability: May be taken for credit for 12 units.

Restriction: Graduate students only.

**ECO EVO 287. Communicating Research Through Video. 4 Units.**

Students explore videography to develop basic production skills through practice with high interest special topics, such as laboratory experimental evolution and educational interdisciplinary field events, and then develop media to communicate their own research or other topics of interest.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ECO EVO 288. Documenting Research Through Cinematic Production. 4 Units.**

Students gain advanced media expertise by conceptualizing investigative research into publicly engaging video projects. Popularly accessible research topics will be adapted into documentary, television, or cinematic pieces that provide opportunities for developing professionally marketable skills in educationally effective media production.

Prerequisite: ECO EVO 287

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ECO EVO 341. Teaching Science in Secondary School. 4 Units.**

Prospective secondary science teachers learn how to teach science in grades 7-12. Covers State science requirements, a variety of teaching methods, criteria for selecting science curricular materials, and how to plan science lessons, units, experiments, projects, and demonstrations.

Same as EDUC 341.

Restriction: Master of Arts in Teaching Degree students only.

**ECO EVO 398. Teaching Assistant Seminar. 2 Units.**

Readings, lectures, workshops, and student presentations designed to help develop teaching skills of graduate students teaching university-level biology classes. Topics vary and may include: course organization, presentation styles, exam design, grading, motivating students, and commonly encountered problems.

Repeatability: May be repeated for credit unlimited times.

**ECO EVO 399. University Teaching. 4 Units.**

Mandatory course for Ecology and Evolutionary Biology Teaching Assistants, required in each quarter in which student has a Teaching Assistant position. Limited to Teaching Assistants.

Repeatability: May be repeated for credit unlimited times.

## Economics (ECON)

### Courses

**ECON 1. Introduction to Economics. 4 Units.**

An analysis of the problems society faces in organizing itself to provide goods and services. How decisions of government, business, and the individual relate to current economic problems such as unemployment, inflation, poverty, and environmental pollution.

Restriction: No Economics Majors. ECON 1 may not be taken for credit if taken concurrently or after ECON 20A or ECON 20B.

(III)

**ECON 11. The Internet and Public Policy. 4 Units.**

How the Internet works. Current public policy issues concerning the Internet. Introductory economics. Communications law. Interactions between information technology, economics, and law. Case studies about Internet and communications policy.

Same as ICS 11.

(II or III).

**ECON 12. Federal Reserve: Past, Present, and Future. 4 Units.**

Studies central banking in the United States from colonial times to the present. Focuses on the past, present, and future of the Federal Reserve and precursors to that system, which was established in 1913.

**ECON 13. Global Economy. 4 Units.**

Acquaints students with the fundamental patterns of the global economy. Emphasizes the historical roots and political implications of economic choices.

Same as IS 13.

Restriction: International Studies Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

(III, VIII)

**ECON 15A. Probability and Statistics in Economics I. 4 Units.**

An introduction to probability, statistics, and econometrics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Examples from economics.

Prerequisite: MATH 2A and MATH 2B

Overlaps with MGMT 7.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

(Va)

**ECON 15B. Probability and Statistics in Economics II. 4 Units.**

An introduction to probability, statistics, and econometrics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Examples from economics.

Prerequisite: ECON 15A

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

(Va)

**ECON 17. An Economic Approach to Religion. 4 Units.**

Introduction to how basic economic concepts such as demand, supply, consumption, production, competition, free-riding, innovation, regulation, and rent-seeking can be applied to understand observed religious behavior.

Same as RLGN 17.

(III)

**ECON 20A. Basic Economics I. 4 Units.**

The fundamentals of microeconomics. The behavior of firms and consumers: markets, supply/demand, utility maximization, resource allocation, and efficiency.

Overlaps with MGMT 4A, ECON 23.

Restriction: Economics, Quantitative Economics, Business Economics, and Business Info Management majors have first consideration for enrollment. For School of Social Sciences majors, MGMT 4A may not be used as a substitute for ECON 20A.

(III)

**ECON 20B. Basic Economics II. 4 Units.**

The fundamentals of macroeconomics. Government behavior: monetary and fiscal policy, inflation, and unemployment. Effective fall 2006, the content of Economics 20B is macroeconomics. This course cannot be taken to repeat Economics 20B taken prior to fall 2006.

Prerequisite: ECON 20A or ECON 13 or ECON 23

Overlaps with MGMT 4B.

Restriction: Business Information Mgmt Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment. For School of Social Sciences majors, MGMT 4B may not be used as a substitute for ECON 20B.

(III)

**ECON 23. Basic Economics for Engineers. 4 Units.**

The fundamentals of microeconomics. The behavior of firms and of consumers: markets, supply/demand, utility maximization, resource allocation, and efficiency.

Overlaps with ECON 20A.

Restriction: Engineering Majors only. Mechanical Engineering Majors only. Aerospace Engineering Majors only. Civil Engineering Majors only. Environmental Engineering Majors only.

(III)

**ECON 25. The Economics of Accounting Decisions. 4 Units.**

Introduction to accounting concepts and principles, including the accounting model and accounting style, transaction analysis, and preparation of financial statements. An analysis of the similarities and differences between accounting and economic concepts (e.g., value, profits).

Prerequisite: ECON 20A

Overlaps with MGMT 30A.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 100A. Intermediate Economics I. 4 Units.**

Determinants of supply and demand; operation of competitive and monopolistic markets; imperfections of the market system, explanations of unemployment, inflation, recessions; public policy for macroeconomic problems.

Prerequisite: ECON 20A and ECON 20B and MATH 2A and MATH 2B

Overlaps with ECON 105A.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 100B. Intermediate Economic II. 4 Units.**

Determinants of supply and demand; operation of competitive and monopolistic markets; imperfections of the market system, explanations of unemployment, inflation, recessions; public policy for macroeconomic problems.

Prerequisite: ECON 100A

Overlaps with ECON 105B.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 100C. Intermediate Economic III. 4 Units.**

Determinants of supply and demand; operation of competitive and monopolistic markets; imperfections of the market system, explanations of unemployment, inflation, recessions; public policy for macroeconomic problems.

Prerequisite: ECON 100B

Overlaps with ECON 105C.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 105A. Intermediate Quantitative Economics I . 4 Units.**

An advanced and mathematical version of ECON 100A for students in the Quantitative Economics major.

Prerequisite: ECON 20A and ECON 20B and MATH 2A and MATH 2B and MATH 3A

Overlaps with ECON 100A.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 105B. Intermediate Quantitative Economics II . 4 Units.**

An advanced and mathematical version of ECON 100B for students in the Quantitative Economics major.

Prerequisite: ECON 105A

Overlaps with ECON 100B.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 105C. Intermediate Quantitative Economics III . 4 Units.**

An advanced and mathematical version of ECON 100C for students in the Quantitative Economics major.

Prerequisite: ECON 105B

Overlaps with ECON 100C.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 107. Economics of Asymmetric Information. 4 Units.**

Focuses on the effects of asymmetric information in the markets for traditional economic goods and resources, such as labor, insurance, used cars, credit, and in auctions and bargaining problems. Prerequisite:..

Prerequisite: ECON 100A or ECON 105A

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 109. Special Topics in Economic Theory. 4 Units.**

Studies in selected areas of Economics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: May be repeated for credit unlimited times.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 115. Behavioral Economics. 4 Units.**

Studies the behavioral and psychological biases in economics settings. Both individual decisions and games are discussed.

Prerequisite: ECON 20A and ECON 20B

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 116A. Game Theory I. 4 Units.**

Extensive form games with perfect information, and coalitional games. The key solution concepts are Nash Equilibrium, Backward Induction, and the Core. Substantive examples include public good production, oligopoly, electoral competition, auctions, holdup, market entry, and voting.

Prerequisite: (ECON 15B or STAT 120B) and (ECON 100A or ECON 105A)

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 116B. Game Theory II. 4 Units.**

Two-quarter sequence on game theory. Bayesian games, extensive form games with imperfect information, zero-sum games.

Prerequisite: ECON 116A

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 122A. Applied Econometrics I. 4 Units.**

Introduction to econometrics emphasizing practical applications in microeconomics and macroeconomics.

Prerequisite or corequisite: ECON 100A or ECON 105A and (ECON 15B or MATH 130B or MATH 133A or STAT 120C)

Overlaps with ECON 123A, ECON 123B.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 122B. Applied Econometrics II. 4 Units.**

Introduction to econometrics emphasizing practical applications in microeconomics and macroeconomics.

Prerequisite: ECON 122A

Overlaps with ECON 123B.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 122CW. Data Analysis Writing. 4 Units.**

Research writing course in econometrics focusing on individual research projects. Students employ econometric analysis to address an economic question in a 20-page paper and present their findings to the class in a short presentation.

Prerequisite: ECON 15A and ECON 15B and ECON 122A and ECON 122B. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

(Ib)

**ECON 123A. Econometrics I. 4 Units.**

Specification, estimation, and testing of econometric models. Applications in various areas of microeconomics and macroeconomics.

Prerequisite: MATH 2A and MATH 2B and MATH 3A and STAT 120A and STAT 120B and (STAT 120C or MATH 131C) and (ECON 100A and ECON 100B and ECON 100C) or (ECON 105A and ECON 105B and ECON 105C)

Overlaps with ECON 122A, ECON 122B.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 123B. Econometrics II. 4 Units.**

Specification, estimation, and testing of econometric models. Applications in various areas of microeconomics and macroeconomics.

Prerequisite: ECON 123A

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 123CW. Econometrics III. 4 Units.**

Seminar course in which students do an original econometric research project.

Prerequisite: ECON 123B. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

(Ib)

**ECON 125. Business Forecasting. 4 Units.**

Students learn how to produce forecasts of the behavior of economic (and other) variables. The techniques examined are linear regression, nonlinear regression, and nonparametric kernel regression; AR, MA, ARMA, ARIMA, and Box-Jenkins.

Prerequisite: ECON 122A

Overlaps with MGMT 180.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 126. Computational Macroeconomics. 4 Units.**

Introduction to the computational methods for studying economic growth and the business cycle. Students learn how to write computer programs to simulate macroeconomic models, download and manage data from internet resources, and to do basic statistics.

Prerequisite or corequisite: (ECON 100C or ECON 105C) and (ECON 122A or ECON 123A)

Restriction: Business Economics Majors only. Economics Majors only. Quantitative Economics Majors only.

**ECON 127A. Experimental Economics . 4 Units.**

Students will learn what constitutes proper experimental design and what laboratory experiments teach us about human behavior and the economy. Students will participate in a sample experiment, evaluate the results, and discuss experiment design and larger issues. Formerly ECON 117.

Prerequisite: ECON 15B and ECON 100B

**ECON 128. Machine Learning for Economists. 4 Units.**

Develops the theory and computation of recent methods at the intersection of econometrics and machine learning as used in economics and business. Building on intermediate econometrics, it introduces causal random forests, double machine learning, and neural networks.

Prerequisite: ECON 123A

Restriction: Business Economics Majors only. Economics Majors only. Quantitative Economics Majors only.

**ECON 129. Special Topics in Quantitative Methods. 4 Units.**

Studies in selected areas of Quantitative Methods. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 131A. The Economics of Risk and Uncertainty. 4 Units.**

The theory of insurance and joint-ownership of risky enterprises; optimal procedures for the allocation of uncertain payoffs.

Prerequisite or corequisite: (ECON 15B or ECON 105A or MATH 130B) and (ECON 100B or ECON 105B or STAT 120B or MATH 133A) and (ECON 100C or STAT 120C)

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 132A. Introduction to Financial Investments. 4 Units.**

Modern theories of investment and their application to the study of financial markets. The relation between risk and return, diversification, asset pricing, efficient markets hypothesis, and the market valuation of stocks, bonds, options, and futures.

Prerequisite or corequisite: ECON 15A and ECON 15B and (ECON 122A or ECON 123A) and (ECON 100A and ECON 100B and ECON 100C) or (ECON 105A and ECON 105B and ECON 105C) or (MATH 130A and STAT 120A and STAT 120B and STAT 120C) or MATH 130B or MATH 133A

Overlaps with MGMT 141.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 134A. Corporate Finance. 4 Units.**

Provides an overview of the modern theory and practice of corporate finance and focuses on two fundamental financial decisions; investment as well as financing. Beginning with discounted cash flow analysis, basic theory will be applied to the valuation of stocks.

Prerequisite: (ECON 100A and ECON 100B and ECON 100C) or (ECON 105A and ECON 105B and ECON 105C) and (ECON 15A or MATH 130A or STAT 120A) and (ECON 15B or STAT 120B)

Overlaps with MGMT 109.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 135. Mathematics of Finance. 4 Units.**

After reviewing tools from probability, statistics, and elementary differential and partial differential equations, concepts such as hedging, arbitrage, Puts, Calls, the design of portfolios, the derivation and solution of the Blac-Scholes, and other equations are discussed.

Prerequisite: MATH 3A or MATH H3A

Same as MATH 176.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Mathematics Majors have first consideration for enrollment.

**ECON 137W. Financial Markets and the Macroeconomy. 4 Units.**

Students are required to write a paper on a research question related to.

Prerequisite: ECON 122A or ECON 123A. Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

**ECON 139. Special Topics in Financial Economics. 4 Units.**

Studies in selected areas of Financial Economics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 140. Managerial Economics. 4 Units.**

A collection of concepts and methods for effective decision making. Explores how the tools of microeconomics, including game theory and industrial organization theory, can be used to make better managerial decisions, particularly those involving allocation of resources within firms.

Prerequisite: (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B)

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 141A. Public Economics I. 4 Units.**

Examines the role of the government in the economy and its impact on individuals and firms.

Prerequisite: (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B)

**ECON 141B. Public Economics II. 4 Units.**

Theory of public goods, externalities, voting models, analysis of bureaucracy, the Tiebout model, income redistribution, intergovernmental grants.

Prerequisite: (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B)

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 142A. Industrial Organization I. 4 Units.**

The theory of market structure. Imperfect markets, government policies, and industry performance.

Prerequisite: (ECON 15A and ECON 15B) and (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B)

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 142CW. Industrial Organization III. 4 Units.**

Research in industrial organization. Satisfies the honors research requirement.

Prerequisite: (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B). Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

(Ib)

**ECON 143. Energy Economics. 4 Units.**

The economics of markets for oil, natural gas, electricity, and renewable energy, and their interactions with each other and the rest of the economy. Effects of government intervention, policy measures, economic policy issues arising between energy use and the environment.

Prerequisite: ECON 15A and (ECON 100A or ECON 105A)

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 144A. Urban Economics I. 4 Units.**

Why cities exist, economics of urban land-use, housing demand and tenure choice, traffic congestion.

Prerequisite or corequisite: ECON 20A and ECON 20B. Recommended: ECON 100A.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 144B. Urban Economics II. 4 Units.**

Housing policy analysis, urban public goods and services, crime, pollution, urban amenities.

Prerequisite: ECON 20A and ECON 20B. Recommended: ECON 100A.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 145E. Economics of the Environment. 4 Units.**

Surveys economic aspects of natural resources, pollution, population, and the environment. Examines the causes of pollution; analysis of public policies regarding these problems. Emphasis on microeconomic aspects of environmental problems.

Prerequisite: ECON 100A or ECON 105A

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 145FW. Economics of the Environment II. 4 Units.**

Applications of the tools covered in ECON 145E to topics such as global warming, destruction of the ozone layer, and emissions trading. Emphasis on independent research papers. Syllabus and classes include writing technique.

Prerequisite: ECON 145E. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

(Ib)

**ECON 145L. Economics of Law. 4 Units.**

Examination of several economic concepts which are useful in understanding legal rules: externalities, the assignment of property rights, and Coase's theorem. Examples are drawn from the fields of pollution control, no-fault insurance, medical malpractice, and product liability.

Prerequisite or corequisite: (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B)

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 146A. Illegal Economics. 4 Units.**

How illegal firms function in illegal markets, why individuals participate in these groups and markets, and what federal, state, and local governments do to disrupt organized illegal activity.

Same as CLS C182.

Restriction: Business Economics Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**ECON 147A. Corporate Governance. 4 Units.**

Studies topics in the internal organization of firms, including rent seeking, incentive contracts, principal-agent problems, internal labor markets, contests, and herd behavior.

Prerequisite: ECON 100A

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 147B. Economics of Strategy. 4 Units.**

Uses tools of economics, game theory in particular, to develop an understanding of business decision-making. Deals with questions such as how the firm decides what kind of business to be in, how large should it be, and others.

Prerequisite: (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B)

Overlaps with MGMT 110, MGMT 168.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 148. Business Decisions. 4 Units.**

Surveys normative and descriptive models of decision-making behavior, with an emphasis on organizational and policy contexts. Topics include rational choice theory, biases and heuristics, framing effects, and overconfidence. Management fads, panics, and herd behavior are also discussed.

Prerequisite: (ANTH 10A and ANTH 10B and ANTH 10C) or (SOCL 10A and SOCL 10B and SOCL 10C) or (SSCI 10A and SSCI 10B and SSCI 10C) or (MATH 2A and MATH 2B and (STAT 7 or MGMT 7)) or (STAT 120A and STAT 120B and STAT 120C) or (ECON 15A and ECON 15B)

Same as SOCL 138.

Restriction: Sociology Majors have first consideration for enrollment.

**ECON 149. Special Topics in Economics of Public and Private Organizations. 4 Units.**

Studies in selected areas of Economics of Public and Private Organizations. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 149W. Special Topics in Economics of Public and Private Organizations. 4 Units.**

Studies in selected areas of Economics of Public and Private Organizations. Topics addressed vary each quarter.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**(Ib)****ECON 151A. Labor Economics and Human Resources I. 4 Units.**

Labor demand, labor supply, human capital, personnel economics, and other topics.

Prerequisite: (ECON 15A and ECON 15B) and (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B)

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 152A. Economic Anthropology. 4 Units.**

Economic systems in comparative perspective: production, distribution, and consumption in market and non-market societies; agricultural development in the third world.

Prerequisite: One course in general science, anthropology, economics, geography, or sociology.

Same as ANTH 125A.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment. Anthropology Majors have first consideration for enrollment.

**ECON 154. Voting and Political Manipulation. 4 Units.**

Introduction to social choice and cooperative games. Topics include majority rule, types of voting methods, apportionment and proportional representation, agenda manipulation, coalition formation, voting power, political consequences of electoral laws.

Same as IS 156A, SSCI 121T, PLSC 151H.

Restriction: International Studies Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON H155. Current Issues in Political Economy. 4 Units.**

Political economy seeks explanations that combine insights from both economics and politics. Topics include the interaction of government and markets, the causes of the Great Recession, and the sources of income and wealth inequality.

Prerequisite: ECON 20A or ECON 20B or ECON 13 or IS 13

Restriction: Economics Honors students only.

**ECON 157. Economic Development. 4 Units.**

Considers the process of economic development across the globe and why some countries are rich and others poor. Discusses the major problems facing developing countries, such as population growth, education, capital formation, environmental protection, and international trade.

Prerequisite: ECON 20A and ECON 20B

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 158. Economics of Education. 4 Units.**

Arms students with tools, concepts, and evidence that can be used to analyze complex policy questions in education, enabling students to arrive at their own reasoned judgments about how to improve education.

Prerequisite: ECON 15A and ECON 100A

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 161A. Money and Banking. 4 Units.**

Basic elements of money and banking: institutional features and economics of financial markets and, in particular, the U.S. banking system; determinants of interest rates; the Federal Reserve and its role in money supply; effects of money on output and inflation.

Prerequisite or corequisite: (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B) and (ECON 100C or ECON 105C)

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 161B. International Money. 4 Units.**

Open economy macroeconomics and determination of exchange rates. Asset-market approach to the balance of payments. Internal and external balance in the economy. Macroeconomic policies under fixed and floating exchange rates. The international monetary system and institutions.

Prerequisite or corequisite: (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B) and ECON 100C

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 161D. Advanced Money and Banking. 4 Units.**

Studies business cycles in the United States during the last century. The first portion of the course reviews the theoretical models employed to study economic fluctuations and empirical methods used to measure fluctuations.

Prerequisite: ECON 161A and (ECON 100C or ECON 105C)

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 162. Poverty, Growth, and Development. 4 Units.**

Examines India as a case study for each of the topics studied: growth experience of India along with its poverty eradication record, aspects of poverty, and the policies that have been undertaken to tackle poverty.

Prerequisite: (ECON 15A or STAT 120A) and (ECON 15B or STAT 120B) and (ECON 100A and ECON 100B and ECON 100C) or (ECON 105A and ECON 105B and ECON 105C)

**ECON 164AW. The Industrial Revolution in Western Europe. 4 Units.**

How do economists explain the process of economic development during the past three centuries? Has the process of industrialization affected living standards? Focusing on these questions, students learn how to apply economic theory and quantitative methods.

Prerequisite or corequisite: ECON 100C or ECON 105C. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

(Ib)

**ECON 164C. American Economic History from Colonization to the Present. 4 Units.**

Examines how the American economy evolved from colonization to the post-war era. Topics include relations with foreign countries, the emergence of manufacturing and big business, railroads, slavery, war, the Great Depression, the rise of fiscal and monetary policies.

Prerequisite: ECON 20A and ECON 20B

**ECON 165. Economics of International Business . 4 Units.**

Students learn to understand and analyze the principal economic issues in the international business arena. Covers topics such as trade theory, foreign direct investment, foreign exchange market, and strategy of international business.

Prerequisite or corequisite: ECON 100C or ECON 105C

**ECON 167. International Trade and Commercial Policy. 4 Units.**

Determination of trade flows and the relative prices. Gains from trade, the terms of trade, and income distribution. Imperfect competition and international trade. The effect of tariffs, export subsidies, and import quotas. The effects of free and restricted trade.

Prerequisite: ECON 100A or ECON 105A

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 169. Special Topics in Development Economics. 4 Units.**

Studies in selected areas of Development Economics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 190. Senior Thesis. 4 Units.**

Students work with faculty to complete their honors thesis.

Repeatability: May be taken for credit 3 times.

**ECON 190BW. Economics Honors Colloquium II. 4 Units.**

Colloquium required for honors students in Economics, Quantitative Economics, and Business Economics. Introduces students to independent research and helps students plan a research program. Students complete their thesis.

Prerequisite: ECON H190A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Economics Honors students only.

**(Ib)****ECON H190A. Economics Honors Colloquium I. 4 Units.**

Colloquium required for honors students in economics, quantitative economics, and business economics. Introduces students to independent research. Helps students plan a research program. Prepares students for thesis writing.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Economics Honors students only.

**ECON 197. Field Study. 4 Units.**

Not listed in Catalogue.

Repeatability: Unlimited as topics vary.

Restriction: Authorization required or Enrollment by add card only

**ECON 198. Directed Group Study. 4 Units.**

Not listed in Catalogue.

Repeatability: Unlimited as topics vary.

Restriction: Authorization required or Enrollment by add card only

**ECON 199. Independent Study. 1-5 Units.**

Independent research with Economics faculty.

Repeatability: May be repeated for credit unlimited times.

**ECON 200A. Graduate Colloquium for Economics I. 2 Units.**

Weekly reports and colloquia by faculty, students, and visitors. Supplemented by class discussion of these presentations and other material on current research methodology.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Economics Majors only.

**ECON 200B. Graduate Colloquium for Economics II. 2 Units.**

Weekly reports and colloquia by faculty, students, and visitors. Supplemented by class discussion of these presentations and other material on current research methodology.

Prerequisite: ECON 200A

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Economics Majors only.

**ECON 200C. Graduate Colloquium for Economics III. 2 Units.**

Weekly reports and colloquia by faculty, students, and visitors. Supplemented by class discussion of these presentations and other material on current research methodology.

Prerequisite: ECON 200B

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Economics Majors only.

**ECON 202. Probability and Statistics. 4 Units.**

Provides lectures on probability theory and the beginning of mathematical statistics (continued in ECON 220A-ECON 221A) necessary to prepare students for the required econometrics sequence. Topics include probability, distributions, mathematical expectation, sampling, and point estimation.

Restriction: Graduate students only.

**ECON 203A. Mathematics for Economists. 4 Units.**

Gives students the mathematical background required for graduate work in economics. Topics covered include multivariate calculus, differential equations, and linear algebra.

Restriction: Graduate students only.

**ECON 210A. Microeconomic Theory I. 4 Units.**

Theoretical microeconomics. Emphasis on the meaning and empirical interpretation of theoretical models. Topics include theory of the firm, theory of the market, theory of the consumer, duality theory, application to econometrics, general equilibrium and welfare economics, uncertainty, game theory.

Restriction: Graduate students only.

**ECON 210B. Microeconomic Theory II. 4 Units.**

Theoretical microeconomics. Emphasis on the meaning and empirical interpretation of theoretical models. Topics include theory of the firm, theory of the market, theory of the consumer, duality theory, application to econometrics, general equilibrium and welfare economics, uncertainty, game theory.

Prerequisite: ECON 210A

Restriction: Graduate students only.

**ECON 210C. Microeconomic Theory III. 4 Units.**

Theoretical microeconomics. Emphasis on the meaning and empirical interpretation of theoretical models. Topics include theory of the firm, theory of the market, theory of the consumer, duality theory, application to econometrics, general equilibrium and welfare economics, uncertainty, game theory.

Prerequisite: ECON 210B

Restriction: Graduate students only.

**ECON 210D. Macroeconomic Theory I. 4 Units.**

Advanced macroeconomic theory including alternative macroeconomic models, microeconomic foundations of macroeconomics, investment and growth theory, inflation and unemployment, rational expectations and macroeconomic policy, wealth effects, crowding out and fiscal policy, money and interest, open economy models.

Restriction: Graduate students only.

**ECON 210E. Macroeconomic Theory II. 4 Units.**

Advanced macroeconomic theory including alternative macroeconomic models, microeconomic foundations of macroeconomics, investment and growth theory, inflation and unemployment, rational expectations and macroeconomic policy, wealth effects, crowding out and fiscal policy, money and interest, open economy models.

Corequisite: ECON 211L

Prerequisite: ECON 210D

Restriction: Graduate students only.

**ECON 210F. Macroeconomic Theory III. 4 Units.**

Advanced macroeconomic theory including alternative macroeconomic models, microeconomic foundations of macroeconomics, investment and growth theory, inflation and unemployment, rational expectations and macroeconomic policy, wealth effects, crowding out and fiscal policy, money and interest, open economy models.

Prerequisite: ECON 210E

Restriction: Graduate students only.

**ECON 211L. Macroeconomics Theory II Lab. 2 Units.**

Overview of stochastic processes; introduction to dynamic programming; two equilibrium concepts; Ricardian equivalence; real business cycle model; complete versus incomplete markets; asset pricing and the equity premium puzzle.

Corequisite: ECON 210E

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**ECON 219. Special Topics in Economic Theory. 2-4 Units.**

Studies in selected areas of Economic Theory. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**ECON 220A. Statistics and Econometrics I. 4 Units.**

Takes up where ECON 202 leaves off. Continuing in the likelihood perspective, begins with Bayesian point estimation and then covers interval estimation and hypothesis testing from both frequentist and Bayesian perspectives.

Corequisite: ECON 221A

Restriction: Graduate students only.

**ECON 220B. Statistics and Econometrics II. 4 Units.**

Begins by relaxing the ideal conditions of the standard regression model. Potential topics include kernel density estimation, instrumental variables (IV), two stage least squares (2SLS), panel data models, and simulation-based Bayesian methods, including Gibbs sampling, and the bootstrap.

Corequisite: ECON 221B

Prerequisite: ECON 220A

Restriction: Graduate students only.

**ECON 220C. Statistics and Econometrics III. 4 Units.**

Covers econometric time series, discrete choice and count models, sample selection, and duration models along with Bayesian and classical asymptotic methods.

Corequisite: ECON 221C

Prerequisite: ECON 220B

Restriction: Graduate students only.

**ECON 221A. Statistics and Econometrics Laboratory I. 2 Units.**

Discussion of problems in statistics and econometrics, and their relationships to statistical and econometrics theory. Instruction in the use of computers for applied econometric work.

Corequisite: ECON 220A

**ECON 221B. Statistics and Econometrics Laboratory II. 2 Units.**

Discussion of problems in statistics and econometrics, and their relationships to statistical and econometrics theory. Instruction in the use of computers for applied econometric work.

Corequisite: ECON 220B

**ECON 221C. Statistics and Econometrics Laboratory III. 2 Units.**

Discussion of problems in statistics and econometrics, and their relationships to statistical and econometrics theory. Instruction in the use of computers for applied econometric work.

Corequisite: ECON 220C

**ECON 222. Replication and Applied Economics Writing. 4 Units.**

Before the course begins, students choose a published empirical economics article and obtain the necessary data to replicate it. Students will replicate and extend the economic analysis and write a paper describing their work.

Prerequisite: ECON 220A and ECON 220B and ECON 220C

**ECON 223A. Discrete Choice Econometrics. 4 Units.**

Specification, estimation, and testing of discrete choice models, with emphasis on cross-sectional and panel data models and applications. Students use computer packages to apply models and techniques to real data.

Prerequisite: ECON 220A and ECON 220B and ECON 220C

**ECON 224A. Time Series Econometrics. 4 Units.**

Econometric analysis of time series data. Moving average and autoregressive series, regression analysis, Box-Jenkins techniques, computational methods, and causality conditions.

Prerequisite: ECON 220A and ECON 220B and ECON 220C

**ECON 227A. Experimental Econ I. 4 Units.**

An introduction to experimental social science. Students learn experimental methodology, design, and analysis, and be exposed to active research areas. Each student writes a proposal for their own experiment and presents the design in class.

Restriction: Graduate students only.

**ECON 227B. Experimental Econ II. 4 Units.**

Focuses on implementing experimental projects in a laboratory environment. Subjects learn about human subjects protection, program experimental software for their own projects, and conduct live experiment sessions.

Restriction: Graduate students only.

**ECON 229. Special Topics in Econometrics. 2-4 Units.**

Studies in selected areas of Econometrics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**ECON 232. Business Cycles in Historical Perspective. 4 Units.**

Investigates business cycles in the United States and worldwide during the last two centuries. Topics include causes and consequences of business fluctuations, monetary and fiscal policy, models of fluctuations, and empirical macroeconomics.

Prerequisite: ECON 210A and ECON 210B and ECON 210C and ECON 210D and ECON 210E and ECON 210F

**ECON 234. American Economic History. 4 Units.**

Focuses on American economic history from colonization onwards. Topics include the development of legal systems, transport systems, financial markets, industrialization, migration, immigration, technological change, and the consequences of slavery.

Prerequisite: ECON 210A and ECON 210B and ECON 210C and ECON 210D and ECON 210E and ECON 210F

**ECON 239. Special Topics in Financial Economics. 2-4 Units.**

Studies in selected areas of Financial Economics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**ECON 241A. Industrial Organization I. 4 Units.**

Analysis of the structure and economic performance of markets, and the impact of public policy and their efficiency and equity. Effects of information structure. Oligopoly, cartels, mergers, vertical integration, patents, innovation, antitrust, and regulation.

Prerequisite: ECON 100B and ECON 203A

Restriction: Graduate students only.

**ECON 241B. Industrial Organization II. 4 Units.**

Analysis of the structure and economic performance of markets, and the impact of public policy and their efficiency and equity. Effects of information structure. Price flexibility and dispersion, auctions, search and industrial structure, intrafirm organization.

Prerequisite: ECON 241A and ECON 100B and ECON 203A

Restriction: Graduate students only.

**ECON 243A. Game Theory. 4 Units.**

A formal introduction to non-cooperative game theory. Topics include properties of Nash Equilibrium and equilibrium refinements, games with imperfect information, and games with incomplete information.

Prerequisite: ECON 210A and ECON 210B and ECON 210C

Restriction: Graduate students only.

**ECON 243B. Advanced Game Theory. 4 Units.**

Provides advanced instruction in game theory. The topics covered will be (i) the theory of repeated games and (ii) evolutionary game theory. Applications include bargaining, collusion, reputation, social norms, and the evolution of preferences via natural selection and cultural transmission.

Prerequisite: ECON 243A

Restriction: Graduate students only.

**ECON 245. Empirical Methods in Applied Microeconomics. 4 Units.**

Focuses on the empirical methods used in modern applied microeconomics. Teaches methods that can be applied to produce original research in applied fields using cross-sectional and panel data. Applications will be drawn heavily from labor, public, health and development economics.

**ECON 249. Special Topics in Microeconomics. 2-4 Units.**

Studies in selected areas of Microeconomics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: May be repeated for credit unlimited times.

**ECON 251A. Labor Economics I . 4 Units.**

Analysis of the relationships between education and the labor market (human capital theory), between resources devoted to education and the return to education (the education production function) and between education and labor market inequality (the theory of skill-biased technical change).

Prerequisite: ECON 203A

Restriction: Graduate students only.

**ECON 251B. Labor Economics II. 4 Units.**

Analysis of core topics in labor economics, with an emphasis on empirical methods. Topics may include minimum wages, discrimination, gender, aging and retirement, labor market networks, personnel economics, and employment policy.

Prerequisite: ECON 203A

Restriction: Graduate students only.

**ECON 251C. Labor Economics III . 4 Units.**

Discussion of treatment effect/program evaluation in labor economics, emphasizing identification. Classical labor topics, including human capital, technology, wages, labor supply, and migration are discussed in the context of causal inference. A unified framework is used in analyzing identification strategies.

Prerequisite: ECON 203A

Restriction: Graduate students only.

**ECON 255. Microeconomics and Public Policy. 4 Units.**

Introduces the fundamental principles of microeconomics that are required for applied policy analysis. Provides students with an intuitive understanding of the microeconomic approach, and familiarizes them with concepts used in applied public policy analysis.

Repeatability: May be taken for credit 2 times.

Same as PPOL 240.

Restriction: Graduate students only.

**ECON 259. Special Topics in Labor Economics. 2-4 Units.**

Studies in selected areas of Labor Economics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**ECON 260B. Monetary Economics II. 4 Units.**

Surveys recent issues on monetary policy in uncertain environments. Examines settings where both the policy makers and the private sector are uncertain of future outcomes or the underlying economic structure.

**ECON 261A. International Trade I. 4 Units.**

Covers theoretical models, empirical methods, and policy issues in international trade. Following the conventional treatment of the Richardian model, the Heckscher-Ohlin model and the specific factors model, new trade models which incorporate scale economics and imperfect competition will be discussed.

Prerequisite: ECON 210A and ECON 210B

**ECON 263A. Advanced Macroeconomics I. 4 Units.**

Students build Dynamic Stochastic General Equilibrium (DSGE) macroeconomic models from microeconomic foundations. This approach emphasizes intertemporal optimization by firms and households and typically incorporates nominal rigidities such as sluggish price and/or wage adjustment.

**ECON 269. Special Topics in Macroeconomics. 2-4 Units.**

Studies in selected areas of Macroeconomics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**ECON 270A. Political Economy I. 4 Units.**

Political Economy lies at the intersection of economics and political science. Studies effects of politics on the economy and uses tools derived from economics to understand the behavior of governments and of citizens when they deal with politics.

Restriction: Graduate students only.

**ECON 270B. Political Economy II. 4 Units.**

Political Economy lies at the intersection of economics and political science. Studies effects of politics on the economy and uses tools derived from economics to understand the behavior of governments and of citizens when they deal with politics.

Prerequisite: ECON 270A

Restriction: Graduate students only.

**ECON 270C. Political Economy III. 4 Units.**

Political Economy lies at the intersection of economics and political science. Studies effects of politics on the economy and uses tools derived from economics to understand the behavior of governments and of citizens when they deal with politics.

Prerequisite: ECON 270B

Restriction: Graduate students only.

**ECON 272A. Public Economics I. 4 Units.**

Covers two broad categories of government expenditure policies, redistribution programs, and social insurance, from a theoretical and empirical perspective, as well as the effects on individuals of the income tax system.

Prerequisite: ECON 210A and ECON 210B and ECON 210C

**ECON 272B. Public Economics II. 4 Units.**

Covers the theory of public goods and models of decentralized provision of such goods, including voluntary provision, voting, bureaucratic provision, and preference revelation mechanisms.

Prerequisite: ECON 210A and ECON 210B and ECON 210C

**ECON 275. Economics of Government. 4 Units.**

Prepares students to analyze public policy questions with tools from economics. By the end, students should be able to identify important economic issues in public policy debates and consume and critique economic research on these topics.

Same as PPOL 227.

**ECON 279. Special Topics in Political Economy. 2-4 Units.**

Studies in selected areas of Political Economy. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**ECON 281A. Urban Economics I. 4 Units.**

Economic reasons for the existence of cities, analysis of urban spatial structure, urban sprawl, Third World urbanization, hedonic price analysis, housing tenure choice.

Prerequisite: ECON 210A

**ECON 281B. Urban Economics II. 4 Units.**

Housing in the portfolio, land-use controls, rent control, homelessness, neighborhood effects, urban quality-of-life measurement, and subcenters.

Prerequisite: ECON 210A

**ECON 282A. Transportation Economics I. 4 Units.**

Applies microeconomic concepts of demand, costs, pricing, investment, and project evaluation to analyze transportation activities. Empirical studies include travel demand using discrete models, and cost functions.

Restriction: Graduate students only.

**ECON 282B. Transportation Economics II. 4 Units.**

Economics of the airline industry. Hub-and-spoke networks, the effects of competition on airfares, price dispersion, airline alliances, airport congestion, product unbundling.

Prerequisite: ECON 282A

Restriction: Graduate students only.

**ECON 289. Special Topics in Urban and Transportation Economics. 2-4 Units.**

Studies in selected areas of Urban and Transportation Economics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: May be repeated for credit unlimited times.

**ECON 290. Dissertation Research. 2-12 Units.**

Dissertation research with Economics faculty.

Repeatability: May be repeated for credit unlimited times.

**ECON 299. Independent Study. 2-4 Units.**

Independent research with Economics faculty.

Repeatability: May be repeated for credit unlimited times.

# Education (EDUC)

## Courses

### **EDUC 10. Educational Research Design. 4 Units.**

Designed to help students become intelligent consumers of research and independent researchers, and provides an introduction to the basic principles of educational research. Topics include research questions, literature reviews, and qualitative and quantitative research designs.

Overlaps with SE 10.

Restriction: Education Sciences Majors have first consideration for enrollment.

(III)

### **EDUC 15. Statistics for Education Research . 4 Units.**

Provides an introduction to the use of statistics in educational research. Focuses on testing and measurement, and provides basic tools to read, interpret, and draw conclusions from quantitative educational research.

Prerequisite: EDUC 10

Overlaps with SE 13.

Restriction: Education Sciences Majors have first consideration for enrollment.

(Va)

### **EDUC 25. Introduction to Education: Disciplinary Perspectives. 4 Units.**

Provides insights into educational organizations and processes by developing understanding of concepts used by four different disciplines (economics, history, psychology, and sociology) to analyze key issues and phenomenon in the field of education that profoundly influence individual life course outcomes.

Restriction: Education Sciences Majors have first consideration for enrollment.

(III)

### **EDUC 30. 21st Century Literacies. 4 Units.**

Provides an overview of literacies required for academic and career success in the 21st century. Issues addressed include reading, writing, academic language, research skills, media and technology skills, scientific literacy, critical thinking, communication, collaboration, and creativity.

Restriction: Education Sciences Majors have first consideration for enrollment.

(III)

### **EDUC 40. Theories of Development and Learning Applied to Education. 4 Units.**

Provides an introductory examination of central theories of human development and learning in their application to contemporary educational settings.

Restriction: Education Sciences Majors have first consideration for enrollment.

(III)

### **EDUC 50. Origins, Purposes, and Central Issues in K-12 Education. 4 Units.**

An introduction to the role of education in U.S. society and to central issues in K–12 education. Education is studied from four different perspectives: social, historical, philosophical, and political.

Restriction: Education Sciences Majors have first consideration for enrollment.

### **EDUC 52. Foundations of Bilingual Education and Bilingualism. 4 Units.**

Provides a comprehensive overview of current issues in bilingual education and bilingualism. Topics include dimensions of bilingualism, the effects of bilingualism on children's linguistic and cognitive development, bilingual education programs, literacy, special needs, and assessment.

Same as LSCI 51B, HUM 52.

**EDUC 55. Knowing and Learning in Mathematics and Science. 5 Units.**

Multidisciplinary study of knowing and learning in secondary school mathematics and science. Topics include standards for knowing, scientific epistemologies, mental representations, problem solving, expert-novice studies, assessment, and domain-specific thinking, learning, and teaching. Applied analysis of learning through clinical interviews.

Prerequisite: PS 5 or BIOL 14

**(III)****EDUC 100. Educational Strategies for Tutoring and Teacher Aiding. 4 Units.**

Placement in a public elementary or secondary school to gain experience as a tutor or teacher aide. Emphasis on cognitive learning and the development of instructional strategies and resources which can be used in effective cross-age and cross-cultural experiences.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 101. Strategies for Tutoring and Teacher Aiding in a Bilingual Classroom. 4 Units.**

Placement in a dual immersion school setting to gain experience as a bilingual (Spanish) tutor or teacher aide. Emphasis on cognitive learning and the development of instructional strategies and resources which can be used in effective cross-age and cross-cultural experiences.

Prerequisite: Must be able to communicate in Spanish.

Grading Option: Pass/no pass only.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 104D. The Arts and Human Development. 4 Units.**

Students use various arts disciplines (e.g. studio art, music, dance, drama, and media arts) to investigate how visual and performing arts support individual human development. Introduction to pedagogy for integrating the arts in K-12 settings. Materials fee.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 104E. Multimedia and the Arts in the Multicultural Classroom. 4 Units.**

Multiculturalism and under-represented U.S. minorities and the visual and performing arts: perspectives in artistic perception, creative expression, historical and cultural context, aesthetic valuing, and media literacy in the interpretation and production of multimedia arts products and applications for K-12 classrooms.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 106. Early Childhood Education Curriculum and Instruction. 4 Units.**

Designed to provide an introductory survey of the nature, needs, and education of young children. Explores questions such as 'What should we teach young children?' and 'How should we teach?'.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 107. Child Development in Education. 4 Units.**

Explores the pathways of normally developing children's growth and change over time. In particular, focuses on how cognitive and social development impact and are driven by educational contexts.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 108. Adolescent Development and Education. 4 Units.**

Explores the physical, cognitive, emotional, and social development of adolescents, with an emphasis on the practical implications of developmental theory and research findings for teachers and other professionals who work with adolescents in middle or high school contexts.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 109. Reading and Writing in Mathematics and Science. 4 Units.**

Emphasis is placed on understanding the literacy processes (listening, speaking, viewing, thinking, reading, and writing) as they relate to middle and high school mathematics and science. Students integrate literacy-related strategies with curriculum-based goals supported in the California State Frameworks.

Corequisite: EDUC 158

**EDUC 122A. Foundations of Elementary Mathematics Learning I. 4 Units.**

Provides understanding of fundamental mathematics necessary to teach for conceptual understanding and higher-level reasoning and problem solving. Conceptual understanding of place value, fractions, proportionality, geometry, algebra, functions, probability, statistics, and measurement. Instructional applications of these concepts in grades K-8 teaching.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 122B. Foundations of Elementary Mathematics Learning II. 4 Units.**

Provides understanding of fundamental mathematics necessary to teach for conceptual understanding and higher-level reasoning and problem solving. Conceptual understanding of place value, fractions, proportionality, geometry, algebra, functions, probability, statistics, and measurement. Instructional applications of these concepts in grades K-8 teaching.

Prerequisite: EDUC 122A

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 122C. Foundations of Elementary Mathematics Learning III. 4 Units.**

Provides understanding of fundamental mathematics necessary to teach for conceptual understanding and higher-level reasoning and problem solving. Conceptual understanding of place value, fractions, proportionality, geometry, algebra, functions, probability, statistics, and measurement. Instructional applications of these concepts in grades K-8 teaching.

Prerequisite: EDUC 122B

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 124. Multicultural Education in K-12 Schools. 4 Units.**

Provides a theoretical and empirical overview of educational issues affecting low-income immigrant and U.S. born minority student populations in an increasingly diverse and changing society.

Same as CHLT 183.

**(VII)****EDUC 125. Children, Schools, and Cinema. 4 Units.**

Through popular films, analyzes aspects of school dynamics and interaction of schools with students, teachers, and public. Melding educational studies and film studies provides deeper understanding of methods used to transmit information and attitudes about schools to the lay public.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 126. Ethics and Education. 4 Units.**

Ethics in education and how ethicists frame moral problems. Presents major ethical themes that affect education. Analysis of models for dealing with ethical goals and developing morality for K–12 students. Models for solving ethical dilemmas within an educational context.

Prerequisite: EDUC 50

**EDUC 127A. Moral Education for Youth Development I. 2 Units.**

The first of a two-course series that examines research-based theories for how school settings and adult mentors contribute to the moral development of adolescents. Students examine theory in the context of real-world application in four program observations.

Prerequisite: EDUC 126

Restriction: Education Sciences Majors only.

**EDUC 127B. Moral Education for Youth Development II. 2 Units.**

Continuation of EDUC 127A. Allows students from 127A to experience the role of adults in the moral development of youth. Students receive training to deliver curriculum and apply research-based theories and methods in real-world youth settings.

Prerequisite: EDUC 126 and EDUC 127A

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 128. Exceptional Learners. 4 Units.**

An introductory survey of the nature, needs, and education of K–12 children with exceptionalities. Covers the categories and characteristics of exceptionalities, relevant state and federal legislation, and the role of general education teachers in special education.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 130. Children's Learning and Media. 4 Units.**

Examines how popular media may impact how young people learn, develop, and communicate by looking at research related to the impacts of a wide range of popular media including television, video games, digital environments, mobile devices, and other multimedia.

Same as INF 164.

Restriction: Education Sciences Majors only. Informatics Majors only. Informatics Minors only.

**EDUC 131. Educational Technology. 4 Units.**

Presents an overview of the types and uses of educational technology to support and enhance the K–12 learning experience. Familiarizes students with lesson planning, instructional design, learning theory, and integrating technology into the curriculum.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 132. Reading and Writing Enrichment for After-School Programs. 4 Units.**

Examines literacy development and the implementation of research-based practices to enrich learners' reading and writing skills in after-school programs. A minimum of 20 hours of after-school program fieldwork is required in order to design and implement literacy enrichment activities.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 134. Teaching English Internationally. 4 Units.**

Covers methods of teaching English as a foreign language, basic language knowledge for English teachers, the social context of English language teaching around the world, and essential information about securing international employment as an English teacher.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 137. Arts for Elementary Learners. 4 Units.**

Theory and practice in art education for the elementary school classroom. Includes content and pedagogy for future teachers and others interested in the relationship between child development and the production of visual art. Materials fee.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 138. Children's Literature in the Elementary Classroom. 4 Units.**

Explores the wealth of children's literature that can be integrated into the elementary classroom. Surveys traditional literature, fiction, nonfiction, and poetry that make curriculum accessible to all students. Focuses on literary elements for both reading and creating text.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 140. Courts, Classrooms, and Controversies in Education Policy . 4 Units.**

Examines policies and laws defining the K-12 U.S. education system and the politics and controversies surrounding the political decision-making process at the federal, state, and local levels. Discusses original intent versus effects on organization of schools and educational equity.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 142. American History and Education Policy: An Intimate Relationship. 4 Units.**

Examines the interplay between history, politics, and policy. Students examine the interactions between sociopolitical development and environmental contexts (e.g. familial, social, school, cultural) and contemplate the power of normative values in the formulation of education policy.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 143. Controversies in College. 4 Units.**

Explores the fascinating world of postsecondary education. Every week students dive deeper into controversies that make college more than just where students attend class, but rather, one of the most important social institutions shaping our world.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 143AW. Classroom Interactions I. 4 Units.**

Focuses on research-based instructional strategies for enhancing the learning of secondary mathematics and science. Students learn about adolescent and second-language development to assist them in developing analyzing, teaching, and critiquing lessons for secondary classrooms.

Prerequisite: (PS 105 or BIOL 101) and EDUC 55. Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

**EDUC 143BW. Classroom Interactions II. 4 Units.**

Focuses on equity and multicultural education research, special education, and research-based instructional and assessment strategies to assist students in designing, teaching, and assessing lessons that meet the needs of all secondary mathematics and science students.

Prerequisite: (PS 105 or BIOL 101) and EDUC 55 and EDUC 143AW and EDUC 148. Satisfactory completion of the Lower-Division Writing requirement.

(IB AND VII ).

**EDUC 144. The American Charter School. 4 Units.**

Explores the legitimacy of the charter school as a viable educational reform movement. Critical themes include the role of choice and privatization in public education and charter schools as a vehicle for fulfilling the promise of educational equality.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 145. Theories and Pedagogies of Race in Education. 4 Units.**

Introduces theoretical frameworks to examine the role of race in American education. Emphasis is placed on introducing students to different race and ethnicity paradigms.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 146. Education, Learning, and Culture. 4 Units.**

Exploration of learning and development through a cultural lens, drawing from a range of research traditions and disciplines to broaden understandings of theories that inform teaching and learning in formal and informal settings.

Restriction: Education Sciences Majors only.

**EDUC 147. Poverty, Education, and Social Change. 4 Units.**

Explores how institutional and demographic changes in the U.S. have shaped disparities in education, the mechanisms through which poverty and social class influence families, and students, and promising programs and interventions to address inequity. Includes community service.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 148. Complex Pedagogical Design. 6 Units.**

In this Cal Teach capstone course, students design lesson plans and complex instructional units, using approaches such as mathematics and science integration, problem-based instruction, project-based learning, technology, representations, scientific and mathematical analysis/modeling, authentic assessment, contextualization, and designing equitable learning environments.

Prerequisite: (PS 105 or BIOL 101) and EDUC 55 and EDUC 143AW

**EDUC 149. Family, School, and Community in Early Childhood. 4 Units.**

Focuses on the many socializing aspects of young children's social worlds. Through the use of ecological perspectives, explores the role of families, schools, and communities on children's social development, especially in early childhood.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 150. Changing the High School Experience. 4 Units.**

Analysis of problems in high school education (e.g., student disengagement and underachievement of disadvantaged) and proposals for changing curriculum, instruction, and school organization. Students suggest own reforms and analyze effective/ineffective school practices.

Prerequisite: Recommended: 1 unit of EDUC 199.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 151. Language and Literacy. 4 Units.**

Addresses the linguistic principles and processes that underlie oral and written language proficiency. Emphasis is on how to use phonology, morphology, orthography, semantics, syntax, and pragmatics to support literacy and oral language development for K-12 students.

Same as PSCI 192V, LSCI 182V.

Restriction: Language Science Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Education Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**EDUC 152. Theory and Practice of Reading Interventions for Students At-Risk for Reading Failure. 4 Units.**

Examines the research concerning reading failure in young children and interventions used to support them. Topics include reading development and reading intervention. Students critically evaluate the relation between their fieldwork experience and the research and evaluation literature.

Repeatability: May be taken for credit 2 times.

Restriction: Education Sciences Majors only.

**EDUC 156. Introduction to Field Methods in Education. 4 Units.**

Introduces students to methods for studying human behavior in context. It prepares students for conducting applied educational research, including designing needs assessments; conducting observations, interviews and focus groups; organizing and analyzing data; and synthesizing and presenting research findings.

Prerequisite: EDUC 10

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 157. Educational Research and Evaluation. 4 Units.**

Covers qualitative and quantitative research methods relevant for the evaluation of educational programs. Students have the opportunity to plan, execute, and write-up a small evaluation project.

Prerequisite: EDUC 10 and EDUC 15

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 158. Student Teaching Mathematics and Science in Middle/High School. 6 Units.**

Student teaching includes orientation, seminars, preparation, and assumption of secondary school classroom instructional responsibilities in accordance with State credentialing requirements and in conjunction with the public school calendar. Five days/week and a minimum four hours/day over two quarters.

Corequisite: EDUC 109

Prerequisite: (PS 105 or BIOL 101) and EDUC 55 and EDUC 143AW and EDUC 143BW and EDUC 148

Repeatability: May be taken for credit 2 times.

**EDUC 158F. Advanced Fieldwork in Middle/High School Math and Science. 3 Units.**

Advanced fieldwork for math and science teacher credential candidates over two quarters, prior to starting a fall student teaching assignment. Requires a minimum of 40 hours per quarter of fieldwork in a K-12 classroom and attendance at weekly seminars.

Prerequisite: (PS 105 or BIOL 101) and EDUC 55 and EDUC 143AW and EDUC 143BW and EDUC 148

Repeatability: May be taken for credit for 6 units.

**EDUC 159. Experimental Research Methods. 4 Units.**

Designed to help students to develop the ability to think critically about research, and to develop an understanding of how to design and conduct experiments. The overall goal is to prepare students to independently plan and implement a research study.

Prerequisite: EDUC 10 and EDUC 15

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 160. Foundations of Out-of-School Learning. 4 Units.**

Provides an overview of child and adolescent learning through participation in out-of-school activities and settings. Recognizes the importance of matching out-of-school experiences with the interests, needs, and development level of students. Observation-based fieldwork included.

Repeatability: May be taken for credit 2 times.

Restriction: Education Sciences Majors have first consideration for enrollment. May be taken a second time if student is a candidate for Certificate in After-School Education, and the first time was prior to Fall 2008.

**EDUC 161. Discovering Science in Out-of-School Hours. 4 Units.**

Examines the design principles and teaching techniques that science museums and other out-of-school science programs use to motivate children and youth to learn science through discovery. Includes field experience at a science learning center or after-school program. Materials fee.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 173. Cognition and Learning in Educational Settings. 4 Units.**

Foundational concepts in cognition and development as applied to student learning. Primary topics include historical behaviorism, basic cognitive structure and processes, complex cognition, cognitive development, and motivation.

Same as PSCI 192T.

Restriction: Psychological Science Majors have first consideration for enrollment. Education Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**EDUC 174. Education and the American Dream: Historical Perspectives on Democracy and Education. 4 Units.**

Examines the relationship between public schooling and the promotion of democratic ideals in American society over the past two centuries.

Same as HIST 147.

**EDUC 175. Foundations of Education. 4 Units.**

Foundational questions of education are viewed from newly emerging developmental perspectives which treat cognition as embodied action and learning as cultural recapitulation. Historical, sociological, psychological, and philosophical implications of views toward aspects of teaching, learning, curriculum, and pedagogy are considered.

Restriction: Education Sciences Majors only.

**EDUC 176. Psychology of Learning, Abilities, and Intelligence. 4 Units.**

Overview of classic positions on the mind, human abilities, and intelligence, especially as related to academic achievement. Contrasting views: psychometric versus information processing; experimental versus correlational research.

Prerequisite: PSYC 7A or PSCI 9 or PSCI 11A or PSCI 11B or PSCI 11C

Same as PSCI 192U.

Restriction: Psychological Science Majors have first consideration for enrollment. Education Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**EDUC 179W. Advanced Writing for Education Sciences. 4 Units.**

Writing for multiple audiences and purposes about central concepts in education sciences, such as schools as organizations; social structures in education and stratification; individual decision making, government regulation and markets; human development and learning.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Seniors only. Education Sciences Majors have first consideration for enrollment.

(Ib)

**EDUC 180. Interdisciplinary Topics in Education. 4 Units.**

Analysis of issues in education from interdisciplinary perspectives. Topics covered vary with interests of instructor.

Repeatability: Unlimited as topics vary.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 181A. Principles and Practices of Coaching Sports I. 4 Units.**

Focuses on foundational theories and instructional practices in coaching sports from fourth grade to the collegiate level. Prepares students for the coach's mandatory state certification examination for high school sports in California.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 185. Social Development in Education. 4 Units.**

Examination of contextual, psychosocial, and biological factors contributing to the social development of children and adolescents. Theoretical perspectives, empirical findings, and methodological issues are emphasized. Implications of the scientific evidence for practical and policy decision-making surrounding development are discussed.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 190. Principles and Practices of K–6 After School Sports and Fitness. 4 Units.**

Focuses on foundational theories and instructional practices in after-school sports and fitness for K–6 students. Includes a 20-hour field experience in an after-school setting.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 191. Advanced Fieldwork in After-School Education. 4 Units.**

Capstone fieldwork experience for students seeking to earn the Department of Education-sponsored Certificate in After-School Education. Students are required to complete 50 or more hours of fieldwork and related assignments at an instructor-approved after-school program.

Prerequisite: EDUC 160

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 193. Directed Studies in Early Childhood Education. 2-4 Units.**

Advanced study of early childhood education under the direction of a faculty member, coupled with a community-based practicum.

Repeatability: May be repeated for credit unlimited times.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 198. Directed Research in Education. 2-8 Units.**

Individually or in small groups, students are exposed to or participate in work related to a faculty member's research. Students also attend a weekly seminar and complete a research paper or comparable project.

Repeatability: May be taken for credit for 12 units.

Restriction: Sophomores only. Upper-division students only.

**EDUC 199. Individual Study. 1-4 Units.**

Intensified advanced study in areas in which a student has considerable background, under the direction of a faculty member who will guide and evaluate the study.

**EDUC 202. Outcomes of Schooling/Student Assessment. 4 Units.**

Focuses on establishment of learning goals and assessment tools that are valid for all students, inform educational decisions, and promote educational success. Provides critical examination of different forms of assessment used in K–12 schools, including developmental assessments and appropriate interventions.

Restriction: Graduate students only. Education-MA/PhD Majors only.

**EDUC 203. Advanced Concepts in Learning and Cognition. 4 Units.**

Theories of cognition and their application to thinking and learning in school settings. Topics include memory, information processing, knowledge representation, problem solving, meta-cognition, and intelligence.

Prerequisite: EDUC 173

Restriction: Graduate students only. Education-MA/PhD Majors only.

**EDUC 205. Critical Assessment of Teaching Practice and Learning. 4 Units.**

Student articulates a problem in instructional practice and uses research on cognition, assessment, and other tools to understand the problem. Capstone course emphasizes practices of teacher inquiry, reflection, and professional collaboration. Student's written analyses are evaluated as program's Comprehensive Examination.

Restriction: Graduate students only. Education-MA/PhD Majors only.

**EDUC 206. Design of Learning Environments for Teachers in Secondary School Subjects. 4 Units.**

Research on comprehension, conceptual understanding, reasoning, critical thinking, and problem solving with applications to pedagogy in secondary school subjects. Required for M.A.T. single subject students, unless substitution of Education 207 is authorized.

**EDUC 207. Cognition and Pedagogy in Quantitative Literacy. 4 Units.**

Reviews research on cognition in elementary mathematics, including numeracy, fractions, probability, proportionality, measurement, geometry, algebra. Emphasizes instructional approaches consistent with this research knowledge. Required for M.A.T. multiple subjects students, unless substitution of Education 206 is authorized by the Department.

**EDUC 208. Reading and Writing Development . 4 Units.**

Covers major theories and evidence about mechanisms and factors that contribute to development and difficulties with reading and writing skills. These include language, cognition, biological and environmental factors, bilingual and second language acquisition, and educational implications.

Restriction: Graduate students only.

**EDUC 210. Language, Literacy, and Discourse. 4 Units.**

Introduces students to the interdisciplinary study of language, literacy, and discourse across historical and educational contexts. Addresses theories of how people learn, interact, and make meaning through a variety of semiotic resources, including oral communication, print, and digital media.

Restriction: Graduate students only.

**EDUC 211. Writing Theory and Practice. 4 Units.**

Offers an overview of histories, theories, and research in the field of composition studies from 1950 to the present. Addresses the influences of theory and research on teaching practice at K–12 and college levels.

Restriction: Graduate students only.

**EDUC 212. Literacy and Technology. 4 Units.**

Examines theoretical, historical, and contemporary relationships of technology and literacy. Topics include online communication, multimodality, video games, the use of technology for literacy instruction in schools, and research approaches for investigating literacy development with technology.

Restriction: Graduate students only.

**EDUC 217. Foundations of Digital Learning. 4 Units.**

Students are introduced to historical, constructionist, instructionist, and new literacies perspectives through reading major works in educational technology and discussing how they apply to both teaching and research.

Restriction: Graduate students only.

**EDUC 218. Special Topics in Teaching, Learning, and Educational Improvement. 4 Units.**

Advanced seminar designed to engage students in highly interactive examination of current issues in teaching and learning. Topics and content vary by quarter, depending upon research interests of the faculty and students.

Repeatability: May be taken for credit 10 times as topics vary.

Restriction: Graduate students only.

**EDUC 220. Developing Adolescent Literacy. 4 Units.**

Examines how adolescents leverage vocabulary knowledge, word-reading skills, background understanding, and knowledge of content-specific text features to master an increasing range of texts both independently and for subject-area learning.

Restriction: Graduate students only.

**EDUC 221. Longitudinal and Advanced Structural Equation Modeling. 4 Units.**

Covers advanced and longitudinal structural equation models. Topics include measurement invariance, growth curve models, measurement models, mixture models, and missing data.

Prerequisite: Recommended: EDUC 288B.

Restriction: Graduate students only.

**EDUC 222. Research Epistemologies and Methodologies. 4 Units.**

Introduction to epistemological underpinnings of educational research and to a range of research methodologies in education. Includes examination of quantitative and qualitative studies through reading and analyzing contemporary research. Critique of selected research studies pertinent to educational practice and policy.

Restriction: Ed.D. Program students only.

**EDUC 223. Oral Language Acquisition and Education. 4 Units.**

Learn about research on domains of development in oral language (phonology, vocabulary, grammar, and extended discourse), bilingual development, and second language acquisition with attention to cognitive, biological, and environmental factors. Focus on learning in school settings and educational implications.

Restriction: Graduate students only.

**EDUC 224A. Learning Analytics Fundamentals. 4 Units.**

Provides students with a survey of learning analytics (LA), emphasizing its application across educational contexts, rather than its underlying algorithmic details. A comprehensive overview orients students to this nascent field and prepares them for advanced research in LA.

Restriction: Graduate students only.

**EDUC 224B. Learning Analytics Practicum. 4 Units.**

Helps students gain hands-on experience working as educational data scientists, while simultaneously learning some of the key guiding principles behind effectively using data to make predictions and decisions. Culminates in an interdisciplinary group research project.

Prerequisite: EDUC 288A

Restriction: Graduate students only.

**EDUC 225. Learning, Development, and Culture. 4 Units.**

Explores issues of learning and development through a cultural lens. The interplay between culture and learning and culture and development is analyzed through the discussion of relevant readings from both psychological and anthropological research traditions.

Restriction: Graduate students only.

**EDUC 226. University Teaching: Concepts and Practices. 4 Units.**

Prepares doctoral students for course design and instruction at the university level. Addresses topics including the university teaching context, preparing a syllabus, and inclusive teaching and learning.

Restriction: Graduate students only.

**EDUC 228. Science Education for the 21st-Century Classroom. 4 Units.**

Aims to develop foundational understanding about science education research. Contemporary research from early childhood through high school is introduced. Issues of equity, social justice, pedagogy, professional development, and innovation in and out of school settings are addressed.

Restriction: Graduate students only.

**EDUC 229. Theories of Human Development. 4 Units.**

Examines developmental theory as a guide for research and practice in education. The evolution of classical development theories and the emergence of new theoretical models are considered. Theoretical perspectives include ecological systems, life course, psychobiology, attachment, and social-cognitive theories.

Restriction: Graduate students only.

**EDUC 229A. Theories and Issues in Human Development - Part I. 4 Units.**

Examines seminal concepts, issues, and theories that underlie contemporary developmental science. Students develop an understanding of these concepts, and develop their skills in using theory as a guide in their own research and practice.

Restriction: Graduate students only.

**EDUC 230. The History and Culture of Schooling in the United States. 4 Units.**

Considers the historical, cultural, and structural processes that contextualize American schooling. In particular, examines the roles of race, class, and gender in the context of public education in the United States.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 231. Interrogating Race and Education. 4 Units.**

Critically explores how race is a socially constructed concept and how it manifests itself in American society. Attention is given to African American, Asian, and Mexican communities throughout U.S. history, with particular emphasis on educational inequality.

Restriction: Graduate students only.

**EDUC 232. Mathematics Cognition and Learning. 4 Units.**

Study of mathematical cognition, learning, and development. Combines readings from cognitive and developmental psychology, education, and learning sciences with the purpose of identifying the most useful applications of cognitive theory and methods for educational research and practice.

Restriction: Graduate students only.

**EDUC 233A. Special Topics in Atypical Development. 4 Units.**

Includes advanced examination of current issues in theories of atypical development, assessment, and intervention as applied to special needs. Understanding physical and/or cognitive mechanisms of child development and disorders. Knowledge and skills for areas of disability.

Repeatability: May be taken for credit 5 times as topics vary.

Restriction: Graduate students only.

**EDUC 234. Measurement and Psychometrics. 4 Units.**

Focuses on appraisal and development of measures, measurement theory, and its application using a classical test theory approach. Topics include scaling, construction, reliability and validity assessment, and item analysis; as well as cross-cultural and cross-linguistic considerations in test development.

Restriction: Graduate students only.

**EDUC 235. Psychology of Reading Acquisition. 4 Units.**

Surveys theory and empirical evidence concerning acquisition, cognitive processes, and consequences of skilled reading. Explores psychological models of skilled reading, how children acquire reading and writing skills in their home and second languages, cognitive consequences of acquiring literacy skills.

Restriction: Graduate students only.

**EDUC 236. Applied Linguistics and Literacy. 4 Units.**

Examines research in applied linguistics as related to teaching literacy. Overview of language knowledge required to understand development and instruction of literacy. Topics include English language structures, psychological processing of these structures, and methodologies to study language and literacy.

Restriction: Graduate students only.

**EDUC 237. Foundations of Teaching and Learning. 4 Units.**

Situates learning in relation to teaching, content, and context. Locates the work of teaching and learning as a cultural practice and considers the limitations of existing theories for advancing learning opportunities for historically under-served and under-resourced communities.

Restriction: Graduate students only.

**EDUC 238. Special Topics in Human Development in Context. 4 Units.**

An advanced seminar designed to engage students in highly interactive examination of current issues in human development. Topics and content vary by quarter, depending upon the research interests of the faculty and students.

Repeatability: May be taken for credit 10 times as topics vary.

Restriction: Graduate students only.

**EDUC 239. Cognitive Neuroscience and Human Development. 4 Units.**

Focuses on the latest empirical work at the intersection of neuroscience, cognitive psychology, developmental science, and educational practice; explores how educational neuroscience fits within those fields; and discusses the main conceptual and practical challenges facing the field.

Restriction: Graduate students only.

**EDUC 241. Children's Sense Making in Science. 2 Units.**

Investigates elementary students as individuals who construct understanding of concepts through their interactions with others and the world around them. Observations of children in informal settings to analyze learning in context.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 243. The Policy Environment of Teaching. 2 Units.**

Examines research and public perceptions about school-based educational processes, the influence of institutional structures and educational policy on the lives of teachers, and the challenges of school reform at the local and classroom levels.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 245. Learning Inside and Outside of School. 2 Units.**

A field-based course focused on observing adolescents in out-of-school contexts to examine adolescent learning and development in a range of contexts, how out-of-school contexts motivate learning and development, and consider the implications for teaching.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 246. Teaching Investigations: Identifying Dilemmas of Practice. 4 Units.**

Focuses on identifying problems of teaching practice that arise in student teaching, examining the theoretical foundations that underlie problems of practice, and developing approaches for inquiring into strategies to systematically address instructional challenges.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 247. Teaching Investigations: Exploring Dilemmas of Practice. 4 Units.**

Focuses on exploring problems of teaching practice that arise in student teaching, drawing on research to examine the theoretical foundations that underlie problems of practice, and to propose courses of action to address and study educational interventions.

Prerequisite: EDUC 246

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 248. Understanding Teacher Agency. 4 Units.**

Considers how teachers can become agents of change within their school contexts, through their participation in professional organizations and via social media. Candidates experiment with using different avenues for sharing images of practice and action research.

Prerequisite: EDUC 246

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 250. Research Practice Partnerships. 4 Units.**

An introduction to research-practice partnerships (RPPs). It examines the distinctive characteristics of this approach to education improvement by discussing examples of established partnerships and inviting students to become familiar with methods and tools to advance RPP work.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**EDUC 251. Educational Policy and Politics. 4 Units.**

An in-depth study of topics relevant to educational reform and policy-making. Topics include: the policy-making process, the role of values and interest groups, policy analysis, equality of educational opportunity, systemic reform, implementation, and politics at the school site.

Restriction: Graduate students only.

**EDUC 252. Social Organization of Schools and Classrooms. 4 Units.**

Examines how schools are organizations with ambiguous goals, faced with challenges around effective leadership and cooperation, part of loosely coupled systems, and subject to coercive, normative, and mimetic pressures from organizational environments, shaping institutional practices and structures.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EDUC 253. Foundations of Educational Policy. 4 Units.**

Reviews disciplinary models that economists and sociologists employ in approaching education-related policy issues, including markets as emergent systems, human capital, social and cultural capital, and rational choice and institutional models of administrators and teachers.

Restriction: Graduate students only.

**EDUC 254. College Access and Persistence. 4 Units.**

Introduction to how social, political, and economic forces impact college access and persistence in the U.S. higher education system. Investigates historical perspectives and theoretical underpinnings of college access and retention research and the link between K–12 schooling and postsecondary stratification.

Restriction: Graduate students only.

**EDUC 255. Immigration and the New Second Generation. 4 Units.**

Focuses on Asian, Latino, and Black children of immigrants. Investigates how today's second generation adapts, incorporates into the U.S. social structure, transforms the social and economic landscape. Explores assimilation, immigrant families/communities, language, racial/ethnic identities, gender, education, changing U.S. racial structure.

Restriction: Graduate students only.

**EDUC 258. Special Topics in Educational Policy and Social Context. 4 Units.**

An advanced seminar designed to engage students in highly interactive examination of current issues in educational policy and social context. Topics and content will vary by quarter, depending upon the research interests of the faculty and students.

Repeatability: May be taken for credit 10 times.

Restriction: Graduate students only.

**EDUC 259. Community Research and Action. 4 Units.**

Introduces the theoretical underpinnings and research approaches of the field of Community Psychology. Project-based course focused on research and action in communities, organizations, and other extra-individual units (e.g., schools).

Restriction: Graduate students only.

**EDUC 260. The Arts, Human Development, and Social Context. 4 Units.**

Examines the state of empirical knowledge on the impact of visual and performing arts education on the development of academic, communication, and social-emotional skills. The role of the arts in forming personal and cultural identity is discussed.

Restriction: Graduate students only.

**EDUC 261. Social and Cultural Foundations of Education. 4 Units.**

Provides a critical understanding of the social and cultural foundations of education through reproduction theory. Explores the unique ways in which culture and power intersect within schools and schooling systems to reproduce and resist educational inequality.

Restriction: Graduate students only.

**EDUC 264. Economic Foundations of Education and Social Policy. 4 Units.**

Beginning/intermediate microeconomics course provides students with an introduction to how economists think about household decision-making, markets, benefit-cost analysis, social policy issues in general and education policy in particular.

Restriction: Graduate students only.

**EDUC 265. Applied Regression Analysis for Education and Social Research. 4 Units.**

Provides students with a working knowledge of multiple regression and the statistical analysis of longitudinal data. Topics include a review of the OLS regression model, event-history methods, and various other techniques for analyzing longitudinal data.

Prerequisite: EDUC 288B

Restriction: Graduate students only.

**EDUC 266. Design-Based Implementation Research. 4 Units.**

Explores design-based implementation research (DBIR) to organize research and improvement efforts in education. Delves deeper into different techniques of partnership development, design, implementation, and improvement science to build a repertoire of practices for students' studies.

Restriction: Graduate students only.

**EDUC 267. Classroom Research Methods. 4 Units.**

Uses students' research problems as the basis for exploring methods—teacher and student observation, interview, case studies, think alouds. Intended for doctoral students with a specific research question and very good grounding in the literature related to their question.

Restriction: Graduate students only.

**EDUC 268. Out-of-School Learning and Development. 4 Units.**

Examines theory, research, and policy concerning out-of-school time and youth development. Several out-of-school contexts are considered (e.g., unsupervised care, informal leisure activities, and organized activities). A range of developmental outcomes are considered (e.g., achievement, social-emotional competence, and physical health).

Restriction: Graduate students only.

**EDUC 274. Studies of Professional and Staff Development. 2-4 Units.**

Research and theory of effective strategies for professional and staff development. Topics include: adult learning as related to professional growth of teachers, staff development as vehicle for systemic reform, reforms to enhance teacher professionalization and empowerment.

Restriction: Doctoral students only.

**EDUC 276. Early Childhood Education Policy. 4 Units.**

Covers core topics in the field of early education policy. Integrates research from the various perspectives relevant to child policy in a practical way to understand the mechanisms of intervention and to develop policy solutions.

Restriction: Graduate students only.

**EDUC 278. Experimental Designs in Educational Research. 4 Units.**

Designed to enable students to think critically about experimental research, and to develop an understanding of how to design and conduct experiments. The overall goal is to prepare students to independently plan and implement an experimental research study.

Prerequisite: EDUC 222

Restriction: Graduate students only.

**EDUC 279. Advanced Qualitative Methods. 4 Units.**

Further developing qualitative inquiry skills for examining human interaction and studying lived experiences of individuals and communities. Practices and techniques for collecting, working with, and analyzing qualitative data to develop and justify claims.

Prerequisite: EDUC 283A or EDUC 283B

Restriction: Graduate students only.

**EDUC 280. Research Methods: Hierarchical Linear Modeling. 4 Units.**

Research data often have a hierarchical structure, which require multi-level models. Students learn to use HLM; conduct appropriate analyses; and write the methods and results section for a peer-reviewed journal article. Previous coursework in regression is required.

Restriction: Doctor of Philosophy Degree students only. Graduate students only.

**EDUC 283A. Qualitative Research Methods in Education I. 4 Units.**

Introduces students to qualitative research methodologies and methods and explores strengths and challenges of this research tradition. Topics include logistical and ethical issues, reliability, validity and generalizability, and the role of reflexivity. Students will also engage in fieldwork.

Prerequisite: EDUC 222

Restriction: Graduate students only.

**EDUC 283B. Qualitative Research Methods in Education II. 4 Units.**

Provides methods for conducting and analyzing qualitative research in educational settings. Topics include data collection, coding, representing qualitative data, and using software for qualitative data analysis.

Prerequisite: EDUC 283A

Restriction: Graduate students only.

**EDUC 284. Mixed Methods in Educational Research . 4 Units.**

Provides an overview of mixed methods research for students familiar with both quantitative and qualitative research. Consists of defining mixed methods research, describing its history and foundations, and examining various types of mixed methods designs.

Restriction: Graduate students only.

**EDUC 285. Theories of Learning Cognition. 4 Units.**

Overview of theories applicable to learning in schools and extracurricular contexts. Cognitive, psychometric, behavioral, and neuroscience perspectives are applied to such topics as memory, knowledge structures, problem solving, motivation, self-referent beliefs, expertise, assessment, and cognitive abilities, including intelligence.

Restriction: Graduate students only.

**EDUC 287A. Quantitative Data Analysis in Education Research and Evaluation. 4 Units.**

Statistical aspects of survey-based evaluations and quantitative research in education. Includes sampling, coding open-ended information, data management, scale construction, statistical analysis, and presentation of findings. Students analyze data sets - a district-based evaluation and a national survey - using SPSS.

Prerequisite: EDUC 281

Restriction: Graduate students only.

**EDUC 287B. Causal Inference: Methods for Program Evaluation and Policy Research. 4 Units.**

Provides students with a comprehensive overview of how to perform some more advanced statistical methods useful in answering policy questions using observational or experimental data.

Restriction: Graduate students only.

**EDUC 288A. Educational, Social, and Behavioral Statistics. 4 Units.**

Designed for graduate students with previous course work in statistics, including experience with statistical software such as SPSS. The emphasis is on regression analysis and the general linear model. Students learn to analyze real data using Stata software.

Prerequisite: Prior coursework in statistics, and experience with statistical software such as SPSS.

Restriction: Graduate students only.

**EDUC 288B. Structural Equation Modeling for Educ, Soc & Behavioral Analysis. 4 Units.**

Rigorous introduction to structural equation modeling for students with strong prior course work in statistics. Topics include path diagrams, SEM with observed variables, factor analysis, SEM with latent variables. Maximum likelihood estimating, goodness-of-fit measures, nested models, related topics.

Prerequisite: EDUC 288A

Restriction: Graduate students only.

**EDUC 289. Use of Video in Educational Research. 4 Units.**

Provides students with conceptual and methodological tools for using video in educational research. Students work with their own video data or with publicly accessible databases.

Restriction: Graduate students only.

**EDUC 295. Pre-Dissertation Research. 1-12 Units.**

Independent study course taken under the direction of a faculty member who guides the student's research. May include guidance on data collection, methodology, human subjects protocol, conference presentation, scholarly publication, program benchmark activities.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**EDUC 296A. Professional Writing in Educational Research I. 2 Units.**

First of a two-course series designed to extend students' knowledge of conducting and publishing educational research. Topics include the logic of research and how to effectively communicate research findings, with particular emphasis on proficient scientific writing.

**EDUC 296B. Professional Writing in Educational Research II. 2 Units.**

Second of a two-course series designed to extend students' knowledge of conducting and publishing educational research. Topics include the logic of research and how to effectively communicate research findings, with particular emphasis on proficient scientific writing.

**EDUC 298. Independent Study. 1-8 Units.**

Independent research on topics related to education.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EDUC 299. Dissertation Research. 1-12 Units.**

Specifically designed for students researching and writing their dissertations.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Doctoral students only.

**EDUC 301. Directed Elementary Field Experiences in Diverse Schools. 2 Units.**

Fieldwork experiences and seminars to provide introduction to the California Teaching Performance Expectations, including guidelines for professional expectations, observation and participation in classrooms, instructional planning, classroom management, and formative experiences and preparation for the state-mandated Teaching Performance Assessment.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 302. Directed Secondary Field Experiences. 2 Units.**

Field work experiences and seminars to provide introduction to the California Teaching Performance Expectations, including guidelines for professional expectations, observation and participation in classrooms, instructional planning, classroom management, and formative experiences and preparation for the State-mandated Teaching Performance Assessment.

Restriction: Master of Arts Degree students only.

**EDUC 304. Student Teaching in the Elementary Schools. 8-12 Units.**

Student teaching seminars prepare candidates for assumption of classroom instructional responsibilities in accordance with State credentialing requirements. Four full days a week of student teaching in public school elementary classrooms in winter quarter and five full days in spring quarter.

Repeatability: May be repeated for credit unlimited times.

Restriction: Master of Arts Degree students only.

**EDUC 305. Learning to Learn from Teaching in Secondary Schools. 4 Units.**

Analytic tools for (1) observing and reflecting on observed instruction; (2) examining student thinking and the relationship between teaching and learning; (3) understanding particular components of the teaching/learning process; and (4) planning effective instruction including innovative teaching practices.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 306. Supervised Teaching in Bilingual Education, Elementary. 8-12 Units.**

Student teaching experiences in bilingual public school classrooms to include orientation, regular seminars, and preparation for bilingual classroom instructional responsibilities in accordance with State credentialing requirements and in conjunction with the public school calendar.

Repeatability: May be repeated for credit unlimited times.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 307. Student Teaching in Intermediate/Secondary School. 8-12 Units.**

Student teaching includes orientation, seminars, and preparation for and assumption of secondary school classroom instructional responsibilities in accordance with State credentialing requirements and in conjunction with public school calendar. Five full days a week in both winter and spring quarters.

Repeatability: May be repeated for credit unlimited times.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 320. Teaching Physical and Health Education in Elementary School. 4 Units.**

Methods of teaching physical education for the elementary classroom teacher. Through an interactive environment, students experience the California Physical Education and Health content standards with appropriate pedagogy. Concepts address motor skills, physical fitness, and personal responsibility for lifelong health.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 322A. Curriculum and Methods for Elementary School Mathematics I. 4 Units.**

Scope, sequence, and methods of teaching mathematics at all levels of elementary school. Presented through lectures, discussions, demonstrations, and exploration of a variety of materials. Covers how to plan lessons, motivate students, diagnose difficulties, and evaluate learning in mathematics.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 322B. Curriculum and Methods for Elementary School Mathematics II. 4 Units.**

Part two of a course addressing pedagogical methods for elementary mathematics. Lectures, discussions, and exploration of instructional strategies and materials support preservice teacher development in the critical areas of planning, instruction, and assessment for conceptual understanding in mathematics.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 323A. Curriculum Methods in Elementary Science. 2 Units.**

Prospective elementary teachers learn how to teach science in grades K-8. Covers state science requirements, a variety of teaching methods, and criteria for selecting science curriculum materials.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 323B. Curriculum Methods in Elementary Science. 2 Units.**

Prospective elementary teachers learn how to teach science in grades K-8. Covers state science requirements, a variety of teaching methods, criteria for selecting science curriculum materials, and how to plan science lessons, units, experiments, projects, and demonstrations.

Prerequisite: EDUC 323A

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 325. Teaching the Visual and Performing Arts in Elementary School. 2 Units.**

Introduction to the issues and practices — including student diversity, academic literacy, and interdisciplinary content — involved in integrating the California visual and performing arts curriculum framework and academic content standards with developmentally appropriate teaching strategies for the elementary classroom. Materials fee.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 326. Curriculum and Methods for Elementary School Reading. 4 Units.**

Teaching an integrated reading/language arts program in the elementary classroom. Implementing theories, principles, and methods which are research and reality-based. Creating a child-centered, language-rich program to meet needs of children in multicultural/multilingual settings.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 336. Methods of Teaching Languages other than English in Secondary Schools. 4 Units.**

Prepares future teachers of foreign language or primary/home language. Emphasizes hands-on, practical strategies for communication-based instruction and authentic assessment in reading, writing, listening, speaking, and culture.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 337. Methods of Teaching Social Science in the Secondary School. 4 Units.**

Theories, strategies, and methodologies related to the teaching of history and social science in the secondary school. Emphasis on the planning, delivery, and assessment of lessons reflecting an understanding of the History-Social Science Framework for California.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 338. Methods of Teaching English in the Secondary School. 2-4 Units.**

Introduction to teaching reading, writing, and speaking skills in secondary school. Emphasis upon integrative approach to teaching literature, composition, and grammar consistent with the California State Framework. Practice in the design of lesson plans that are both integrated and cumulative.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 339. Methods of Teaching Visual Arts in Secondary Schools. 4 Units.**

Theory, curriculum, and strategies for teaching visual arts in the secondary school. Emphasis on the planning, delivery, and assessment of lessons consistent with California State Framework and content standards.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 340. Methods of Teaching Mathematics in Secondary School. 2-4 Units.**

Theories, strategies, and methodologies related to the teaching of mathematics in the secondary school. Emphasis on the planning, delivery, and assessment of lessons reflecting an understanding of the Mathematics Framework for California and the recommendations of professional organizations.

Repeatability: May be taken for credit for 4 units.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 341. Teaching Science in Secondary School. 4 Units.**

Prospective secondary science teachers learn how to teach science in grades 7-12. Covers State science requirements, a variety of teaching methods, criteria for selecting science curricular materials, and how to plan science lessons, units, experiments, projects, and demonstrations.

Same as EEB 341.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 342A. Applied Instructional Strategies in Secondary Schools. 2 Units.**

Application of pedagogy and research to practice teaching experiences in the secondary schools. A continuation of the methodology course series with an emphasis on the needs of students with culturally diverse backgrounds. Conducted in a five-week format.

Repeatability: May be taken for credit 2 times.

Overlaps with EDUC 342.

Restriction: Master of Arts in Teaching Degree students only. EDUC 342 and EDUC 342A may not both be taken for credit.

**EDUC 342B. Applied Instructional Strategies in Secondary Schools. 2 Units.**

Application of pedagogy and research to practice teaching experiences in the secondary schools. A continuation of the methodology course series with an emphasis on the needs of students with culturally diverse backgrounds. Conducted in a five-week format.

Repeatability: May be taken for credit 2 times.

Overlaps with EDUC 342.

Restriction: Master of Arts in Teaching Degree students only. EDUC 342 and EDUC 342B may not both be taken for credit.

**EDUC 346. Reading and Writing in Middle School and High School Classrooms. 4 Units.**

Emphasis is placed upon understanding the literacy processes (listening, speaking, viewing, reading, and writing) as they relate to all Single Subject areas. Teachers are guided to integrate literacy-related strategies with curriculum-based goals supported in the California State Frameworks.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 347. Culture, Diversity, and Educational Equity . 4 Units.**

Survey of the history of and social theories about the origins and consequences of U.S. racial, gender, and social inequality, and the effects of poverty and racism on the educational opportunities and outcomes of minority groups in the United States.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 348. Educational Equity and the Exceptional Learner. 2 Units.**

Knowledge, skills, and strategies to teach exceptional learners in the general education classroom. Legislation pertaining to the education of exceptional learners. Role of general education teacher in the special education process. Inclusive curriculum to provide equal access to content.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 348A. Educational Equity and the Exceptional Learner I. 2 Units.**

Focuses on knowledge, skills, and strategies needed to teach special populations in general education secondary classrooms. Covers categories and characteristics of disability and exceptionality, state and federal legislation, and the role of general education teachers in the special education process.

Restriction: Graduate students only. Education-MA/PhD Majors only.

**EDUC 348B. Educational Equity and the Exceptional Learner II. 2 Units.**

Emphasizes the use of differentiated instruction to meet special needs and the creation of a positive, inclusive learning environment that provides access to the core curriculum for special needs students.

Restriction: Graduate students only. Education-MA/PhD Majors only.

**EDUC 349. Theories and Methods of English Language Development Applied to Secondary Students. 4 Units.**

Theories and methods of English language development and instruction of English language learners, with focus on secondary students. Includes language acquisition theory, language and content, assessment strategies, and preparation of curricula and instruction for grades 7–12 English language learners.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 358. Media and Information Literacy in the Secondary Classroom. 2 Units.**

Focuses on how teachers can help their students to become critical, ethical, and effective users of technological resources in the secondary classroom. Students learn tools for evaluating, selecting, and incorporating appropriate learning technologies into the secondary classroom.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 359. Curriculum and Methods for Elementary Social Science and Information Literacy. 4 Units.**

Methods of instruction for Social Science at the K–6 level. Includes integration of the use of technology, development of content literacy, and use of evidence to construct arguments.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 361. The Adolescent Learner . 4 Units.**

Issues of adolescent development and learning in family, school, and community contexts from biological, psychological, cognitive, and social perspectives. Focuses on how adolescents learn, what motivates them to learn, and how schools and teachers contribute to adolescents' growth.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 362. Curriculum and Methods for Elementary Language Arts and English Language Development. 4 Units.**

Methods, instructional practices, and assessment strategies for teaching English-Language Arts, with a focus on instructional practices for supporting English Language Learners. Focuses on core language arts topics, including composition of persuasive, expository, and narrative texts; speaking; and listening.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 364. Instructional Design and Education Technology for the Elementary Classroom. 2 Units.**

Focuses on how teachers can effectively integrate educational technologies for teaching and learning in the elementary school classroom. Students learn tools for evaluating, selecting, and incorporating appropriate technologies into their classroom activities.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 374. Learning and Child Development . 4 Units.**

Issues of child development and learning in family, school, and community contexts from biological, psychological, cognitive, and social perspectives. Focuses on how young children learn and develop, how schools and teachers contribute to children's growth, and implications for instruction.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 399. University Teaching. 1-4 Units.**

Limited to teaching assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## Educational Affairs (Sch of Med) (ED AFF)

## Electrical Engineering & Computer Science (EECS)

### Courses

**EECS 1. Introduction to Electrical Engineering and Computer Engineering. 1 Unit.**

Introduction to the fields of Electrical Engineering and Computer Engineering, including possible careers in both traditional and new emerging areas. Background on both the Electrical Engineering and the Computer Engineering majors, curriculum requirements, specializations, and faculty research interests.

(Design units: 0)

Restriction: Electrical Engineering Majors have first consideration for enrollment.

**EECS 10. Computational Methods in Electrical and Computer Engineering. 4 Units.**

An introduction to computers and structured programming. Binary Data Representation. Hands-on experience with a high-level structured programming language. Introduction to algorithm efficiency. Applications of structured programming in solving engineering problems. Programming laboratory.

(Design units: 0)

Corequisite: MATH 2A

Prerequisite: MATH 2A

Overlaps with EECS 12, ICS 31.

Restriction: Electrical Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment.

**EECS 12. Introduction to Programming. 4 Units.**

An introduction to computers and programming. Python programming syntax/style, types. Numbers and sequences. Control flow. I/O and errors/exceptions. Function calling, parameter passing, formal arguments, return values. Variable scoping. Programming laboratory.

(Design units: 0)

Corequisite: MATH 2A

Overlaps with EECS 10, ICS 31.

Restriction: Computer Engineering Majors have first consideration for enrollment.

**EECS 20. Computer Systems and C Programming. 4 Units.**

Introduction to computing systems. Data representation and operations. Simple logic design. Basic computer organization. Instruction set architecture and assembly language programming. Introduction to C. Functions and recursion, data structures, pointers. Programming laboratory.

(Design units: 1)

Prerequisite: EECS 12

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 22. Advanced C Programming. 3 Units.**

C language programming concepts. Control flow, function calls, recursion. Basic and composite data types, static and dynamic data structures. Program modules and compilation units. Preprocessor macros. C standard libraries.

(Design units: 1)

Prerequisite: EECS 10 or EECS 20

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 22L. Software Engineering Project in C Language. 3 Units.**

Hands-on experience with the ANSI-C programming language. Medium-sized programming projects, team work. Software specification, documentation, implementation, testing. Definition of data structures and application programming interface. Creation of program modules, linking with external libraries. Rule-based compilation, version control.

(Design units: 3)

Prerequisite: EECS 22

Restriction: Computer Engineering Majors have first consideration for enrollment.

**EECS 31. Introduction to Digital Systems. 4 Units.**

Digital representation of information. Specification, analysis, design and optimization of combinational and sequential logic, register-transfer components and register-transfer systems with datapaths and controllers. Introduction to high-level and algorithmic state-machines and custom processors.

(Design units: 2)

Prerequisite: ICS 31 or EECS 10 or EECS 12 or MAE 10

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 31L. Introduction to Digital Logic Laboratory. 3 Units.**

Introduction to common digital integrated circuits: gates, memory circuits, MSI components. Operating characteristics, specifications, applications. Design of simple combinational and sequential digital systems (arithmetic processors game-playing machines). Construction and debugging techniques using hardware description languages and CAD tools.

(Design units: 3)

Prerequisite: EECS 31 and (EECS 10 or EECS 12 or ICS 32)

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 40. Object-Oriented Systems and Programming. 4 Units.**

Primitive types and expressions. The class and method definition. Information hiding and encapsulation. Objects and reference. Overloading. Constructors. Inheritance basics. Programming with inheritance. Dynamic binding and polymorphism. Exception handling. An overview of streams and file input/output. Programming laboratory.

(Design units: 2)

Prerequisite: EECS 22L

Restriction: Computer Engineering Majors have first consideration for enrollment.

**EECS 50. Discrete-Time Signals and Systems. 4 Units.**

Analysis of discrete-time linear-time-invariant (DTLTI) systems in the time domain and using z-transforms. Introduction to techniques based on Discrete-Time, Discrete, and Fast Fourier Transforms. Examples of their application to digital signal processing and digital communications.

(Design units: 0)

Prerequisite: EECS 70A

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 55. Engineering Probability. 4 Units.**

Sets and set operations; nature of probability, sample spaces, fields of events, probability measures; conditional probability, independence, random variables, distribution functions, density functions, conditional distributions and densities; moments, characteristic functions, random sequences, independent and Markov sequences.

(Design units: 0)

Prerequisite: MATH 2D

Restriction: Computer Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment.

**EECS 70A. Network Analysis I. 4 Units.**

Modeling and analysis of electrical networks. Basic network theorems. Sinusoidal steady state and transient analysis of RLC networks and the impedance concept.

(Design units: 1)

Corequisite: MATH 3D

Prerequisite: PHYS 7D and (EECS 10 or EECS 12 or MAE 10 or ICS 31 or CEE 20)

Overlaps with MAE 60.

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**EECS 70B. Network Analysis II. 4 Units.**

Laplace transforms, complex frequency, and the s-plane. Network functions and frequency response, including resonance. Bode plots. Two-port network characterization.

(Design units: 1)

Corequisite: EECS 70LB

Prerequisite: (BME 60B or EECS 10 or EECS 12 or ICS 31 or CEE 20 or MAE 10) and EECS 70A

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**EECS 70LA. Network Analysis I Laboratory. 1 Unit.**

Laboratory to accompany EECS 70A.

(Design units: 0)

Corequisite: EECS 70A

Prerequisite: PHYS 7D and (EECS 10 or EECS 12 or BME 60B or CEE 20 or MAE 10)

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 70LB. Network Analysis II Laboratory. 1 Unit.**

Laboratory to accompany EECS 70B. Materials fee.

(Design units: 1)

Corequisite: EECS 70B

Prerequisite: (BME 60B or EECS 10 or EECS 12 or ICS 31 or CEE 20 or MAE 10) and EECS 70A

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 101. Introduction to Machine Vision. 3 Units.**

The use of digital computers for the analysis of visual scenes; image formation and sensing, color, segmentation, shape estimation, motion, stereo, pattern classification, computer architectures, applications. Computer experiments are used to illustrate fundamental principles.

(Design units: 2)

Prerequisite: EECS 150 or EECS 50

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 111. System Software. 4 Units.**

Multiprogramming, interrupt, processes, kernel, parallelism, critical sections, deadlocks, communication, multiprocessing, multilevel memory management, binding, name management, file systems, protection, resource allocation, scheduling. Experience with concurrent programming, synchronization mechanisms, interprocess communication.

(Design units: 2)

Prerequisite: EECS 112 and (ICS 46 or EECS 114)

Overlaps with CS 143A.

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 112. Organization of Digital Computers. 4 Units.**

Building blocks and organization of digital computers, the arithmetic, control, and memory units, and input/output devices and interfaces. Microprogramming and microprocessors.

(Design units: 4)

Prerequisite: EECS 31L

Overlaps with CS 152.

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 112L. Organization of Digital Computers Laboratory. 3 Units.**

Specification and implementation of a processor-based system using a hardware description language such as VHDL. Hands-on experience with design tools including simulation, synthesis, and evaluation using testbenches.

(Design units: 3)

Prerequisite: EECS 112

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 113. Processor Hardware/Software Interfaces. 4 Units.**

Hardware/software interfacing, including memory and bus interfaces, devices, I/O, and compiler code generation/instruction scheduling. Experience microcontroller programming and interfacing. Specific compiler code generation techniques including local variable and register allocations, instruction dependence and scheduling, and code optimization.

(Design units: 3)

Prerequisite: EECS 112

Restriction: Computer Engineering Majors have first consideration for enrollment. Computer Science and Engineering Majors have second consideration for enrollment.

**EECS 114. Engineering Data Structures and Algorithms. 4 Units.**

Introduces abstract behavior of classes data structures, alternative implementations, informal analysis of time and space efficiency. Also introduces classic algorithms and efficient algorithm design techniques (recursion, divide-and-conquer, branch-and-bound, dynamic programming).

(Design units: 2)

Prerequisite: EECS 40

Restriction: Computer Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 116. Introduction to Data Management. 4 Units.**

Introduction to the design of databases and the use of database management systems (DBMS) for applications. Topics include entity-relationship modeling for design, relational data model, relational algebra, relational design theory, and Structured Query Language (SQL) programming.

(Design units: 1)

Prerequisite: ICS 33 or CSE 43 or EECS 114. ICS 33 with a grade of C or better. CSE 43 with a grade of C or better

Same as CS 122A.

Restriction: Computer Science Engineering Majors have first consideration for enrollment. School of Info & Computer Sci students have first consideration for enrollment.

**EECS 117. Parallel Computer Systems. 3 Units.**

General introduction to parallel computing focusing on parallel algorithms and architectures. Parallel models: Flynn's taxonomy, dataflow models. Parallel architectures: systolic arrays, hypercube architecture, shared memory machines, dataflow machines, reconfigurable architectures. Parallel algorithms appropriate to each machine type area also discussed.

(Design units: 1)

Prerequisite: EECS 20 and EECS 114 and EECS 112

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 118. Introduction to Knowledge and Software Engineering. 4 Units.**

Introduction of basic concepts in knowledge engineering and software engineering. Knowledge representation and reasoning, search planning, software life cycle, requirements engineering, software design languages, declarative programming, testing, database and web programming.

(Design units: 2)

Prerequisite: EECS 40

Restriction: Computer Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 119. VLSI. 4 Units.**

Design techniques for Very Large Scale Integrated (VLSI) systems and chips. Review CMOS and related process technologies; primitives such as logic gates and larger design blocks; layout; floor planning; design hierarchy, component interfaces; use of associated CAD tools for design.

(Design units: 4)

Prerequisite: EECS 112 and EECS 170B

Overlaps with EECS 170D, CSE 112.

Restriction: Computer Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 120. Fundamentals of Parallel Computing. 4 Units.**

Fundamentals of parallel computing, focusing on parallel algorithms and architectures. Topics include design of parallel and I/O efficient algorithms, basics of parallel machine architectures, and current/emerging programming models (shared memory, distributed memory, and accelerators).

Prerequisite: (EECS 12 or CS 152) and EECS 114

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 121. System Security. 3 Units.**

Fundamentals and practices of system security. Topics include cryptographic (encryption, decryption, and message authentication), software vulnerabilities (buffer overflow), network security (layer 2-7 attacks and defenses and PKI), web security (XSS and XSRF), and privacy.

Prerequisite: EECS 22 or ICS 45C

**EECS 141A. Communication Systems I. 3 Units.**

Introduction to analog communication systems including effects of noise. Modulation-demodulation for AM, DSB-SC, SSB, VSB, QAM, FM, PM, and PCM with application to radio, television, and telephony. Signal processing as applied to communication systems.

(Design units: 1)

Prerequisite: EECS 55 and EECS 150

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 141B. Communication Systems II. 3 Units.**

Signal space analysis. Optimum receivers for digital communication. Maximum a posteriori and maximum likelihood detection. Matched filter and correlation receiver. PAM, QAM, PSK, FSK, and MSK and their performance. Introduction to equalization, synchronization, information theory, and error control codes.

(Design units: 1)

Prerequisite: EECS 141A

Restriction: Computer Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**EECS 144. Antenna Design for Wireless Communication Links. 4 Units.**

Analysis and synthesis of antennas and antenna arrays. Adaptive arrays and digital beam forming for advanced wireless links. Friis transmission formula. Wireless communication equations for cell-site and mobile antennas, interference, slow and fast fading in mobile communication.

(Design units: 0)

Prerequisite: EECS 180A

**EECS 145. Electrical Engineering Analysis. 4 Units.**

Vector calculus, complex functions, and linear algebra with applications to electrical engineering problems.

(Design units: 0)

Prerequisite: MATH 3D

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment. Computer Science Engineering majors have second consideration for enrollment.

**EECS 148. Computer Networks. 4 Units.**

Computer network architectures, protocols, and applications. Internet congestion control, addressing, and routing. Local area networks. Multimedia networking.

(Design units: 2)

Prerequisite: EECS 55 or STAT 67

Same as CS 132.

Restriction: Computer Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**EECS 150. Continuous-Time Signals and Systems. 4 Units.**

Characteristics and properties of continuous-time (analog) signals and systems. Analysis of linear time-invariant continuous-time systems using differential equation convolutional models. Analysis of these systems using Laplace transforms, Fourier series, and Fourier transforms. Examples from applications to telecommunications.

(Design units: 0)

Prerequisite: EECS 70A and EECS 145

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 152A. Digital Signal Processing. 3 Units.**

Nature of sampled data, sampling theorem, difference equations, data holds, z-transform, w-transform, digital filters, Butterworth and Chebychev filters, quantization effects.

(Design units: 2)

Prerequisite: EECS 50

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 152B. Digital Signal Processing Design and Laboratory. 3 Units.**

Design and implementation of algorithms on a DSP processor and using computer simulation. Applications in signal and image processing, communications, radar, etc.

(Design units: 3)

Prerequisite: EECS 152A

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 159A. Senior Design Project I. 3 Units.**

Teaches problem definition, detailed design, integration, and testability with teams of students specifying, designing, building, and testing complex systems. Lectures include engineering values, discussions, and ethical ramifications of engineering decisions.

(Design units: 3)

Prerequisite: EECS 113 or EECS 170C or CS 145

Restriction: Seniors only. Computer Science Engineering Majors only. Electrical Engineering Majors only. Computer Engineering Majors only.

**EECS 159B. Senior Design Project II. 3 Units.**

Teaches problem definition, detailed design, integration, and testability with teams of students specifying, designing, building, and testing complex systems. Lectures include engineering values, discussions, and ethical ramifications of engineering decisions. Materials fee.

(Design units: 3)

Prerequisite: EECS 159A

Restriction: Computer Science Engineering Majors only. Electrical Engineering Majors only. Computer Engineering Majors only.

**EECS 160A. Introduction to Control Systems. 4 Units.**

Modeling, stability, and specifications of feedback control systems. Root locus, Bode plots, Nyquist criteria, and state-space methods for dynamic analysis and design.

(Design units: 2)

Corequisite: EECS 160LA

Prerequisite: (EECS 10 or EECS 12 or MAE 10 or BME 60B or CEE 20) and EECS 150 and EECS 170B and EECS 170LB

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 160LA. Control Systems I Laboratory. 1 Unit.**

Laboratory accompanying EECS 160A. Materials fee.

(Design units: 1)

Corequisite: EECS 160A

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 163. Power Systems. 4 Units.**

Generation, transmission, and use of electrical energy. Fault calculation, protection, stability, and power flow.

(Design units: 1)

Corequisite: EECS 163L

Prerequisite: EECS 70B

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 163L. Power Systems Laboratory. 1 Unit.**

Experiments and field trips relevant to studies in power systems. Materials fee.

(Design units: 0)

Corequisite: EECS 163

Restriction: Computer Science Engineering Majors only. Electrical Engineering Majors only. Computer Engineering Majors only.

**EECS 166A. Industrial and Power Electronics. 4 Units.**

Power switching devices, pulse width modulation (PWM) methods, switching converter topologies, control, and magnetics. Materials fee.

(Design units: 2)

Prerequisite: EECS 170C and EECS 160A

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have second consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

Concurrent with EECS 267A.

**EECS 170A. Electronics I. 4 Units.**

The properties of semiconductors, electronic conduction in solids, the physics and operation principles of semiconductor devices such as diodes and transistors, transistor equivalent circuits, and transistor amplifiers.

(Design units: 1)

Corequisite: PHYS 7E

Prerequisite: PHYS 7D and EECS 70B

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 170B. Electronics II. 4 Units.**

Design and analysis of single-stage amplifiers, biasing circuits, inverters, logic gates, and memory elements based on CMOS transistors.

(Design units: 2)

Corequisite: EECS 170LB

Prerequisite: EECS 70B and EECS 170A and EECS 170LA

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 170C. Electronics III. 4 Units.**

Principles of operation, design, and utilization of integrated circuit modules, including multi-stage amplifiers, operational amplifiers, and logic circuits.

(Design units: 2)

Corequisite: EECS 170LC

Prerequisite: EECS 170B and EECS 170LB

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have second consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 170D. Integrated Electronic Circuit Design. 4 Units.**

Design and fabrication of modern digital integrated circuits. Fabrication of CMOS process, transistor-level design simulation, functional characteristics of basic digital integrated circuits, and different logic families including the static and dynamic logic, layout, and extraction of digital circuits.

(Design units: 4)

Prerequisite: EECS 170C and EECS 170LC

Overlaps with EECS 119, CSE 112.

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have second consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 170E. Analog and Communications IC Design. 4 Units.**

Advanced topics in design of analog and communications integrated circuits. Topics include: implementation of passive components in integrated circuits; overview of frequency response of amplifiers, bandwidth estimation techniques, high-frequency amplifier design; design of radio-frequency oscillators.

(Design units: 3)

Prerequisite: EECS 170C

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have second consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 170LA. Electronics I Laboratory. 1 Unit.**

Laboratory accompanying EECS 170A to perform experiments on semiconductor material properties, semiconductor device physics and operation principles, and transistor amplifiers to improve experimental skills and to enhance the understanding of lecture materials.

(Design units: 1)

Corequisite: EECS 170A and PHYS 7E

Prerequisite: PHYS 7D and EECS 70B

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**EECS 170LB. Electronics II Laboratory. 1 Unit.**

Laboratory accompanying EECS 170B.

(Design units: 1)

Corequisite: EECS 170B

Prerequisite: EECS 170A and EECS 170LA

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 170LC. Electronics III Laboratory. 1 Unit.**

Laboratory accompanying EECS 170C to provide hands-on training in design of digital/analog circuits/subsystems. Materials fee.

(Design units: 1)

Corequisite: EECS 170C

Prerequisite: EECS 170B and EECS 170LB

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have second consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 174. Semiconductor Devices. 4 Units.**

Metal-semiconductor junctions, diodes, bipolar junction transistors, MOS structures, MOSFETs, CMOS technology, LEDs, and laser diodes.

(Design units: 1)

Prerequisite: EECS 170A

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment. Materials Science Engineering Majors have second consideration for enrollment.

**EECS 176. Fundamentals of Solid-State Electronics and Materials. 4 Units.**

Physical properties of semiconductors and the roles materials play in device operation. Topics include: crystal structure, phonon vibrations, energy band, transport phenomenon, optical properties and quantum confinement effect essential to the understanding of electronic, optoelectronic and nanodevices.

(Design units: 1)

Prerequisite: EECS 170A

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**EECS 179. Microelectromechanical Systems (MEMS). 4 Units.**

Small-scale machines, small-scale phenomena, MEMS fabrication, MEMS CAD tools, MEMS devices and packaging, MEMS testing.

(Design units: 2)

Restriction: Upper-division students only. Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment.

**EECS 180A. Engineering Electromagnetics I. 4 Units.**

Electrostatics, magnetostatics, and electromagnetic fields: solutions to problems in engineering applications; transmission lines, Maxwell's equations and phasors, plane wave propagation, reflection, and transmission.

(Design units: 1)

Prerequisite: PHYS 7E and EECS 145

Restriction: Electrical Engineering Majors have first consideration for enrollment. Biomedical Engineering Majors have first consideration for enrollment. Materials Science Engineering Majors have first consideration for enrollment.

**EECS 180B. Engineering Electromagnetics II. 4 Units.**

Time-varying electromagnetic fields, plane waves, polarization, guidance of waves like rectangular waveguides and microstrips, optical fibers resonant cavities, skin effects and losses, spherical waves, radiation and reception of waves, antenna basics.

(Design units: 1)

Prerequisite: EECS 180A

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 180C. Engineering Electromagnetics III. 4 Units.**

Propagation in anisotropic media. Propagation in ferrites and non-reciprocal devices. Scattering and dispersion. Electromagnetic properties of materials. Scattering of small nanoparticles. Spherical waves. Cross section of large and small objects. Radar equation. Coherent and incoherent radiation.

(Design units: 0)

Prerequisite: EECS 180B

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment.

**EECS 182. Monolithic Microwave Integrated Circuit (MMIC) Analysis and Design. 4 Units.**

Design of microwave amplifiers including low-noise amplifiers, multiple stage amplifiers, power amplifiers, and introduction to broadband amplifiers. The goal is to provide the basic knowledge for the design of microwave amplifiers ranging from wireless system to radar system.

(Design units: 3)

Prerequisite: EECS 180A

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment.

**EECS 188. Optical Electronics. 4 Units.**

Photodiodes and optical detection, photometry and radiometry, geometric optics, lens theory, imaging system, EM wave propagation, optical waveguides and fibers, heterojunction structures, laser theory, semiconductor lasers, and optical transmission system.

(Design units: 1)

Prerequisite: EECS 180A

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 195. Special Topics in Electrical and Computer Engineering. 1-4 Units.**

Studies special topics in selected areas of Electrical and Computer Engineering. Topics addressed vary each quarter.

(Design units: 1-4)

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**EECS 198. Group Study. 1-4 Units.**

Group study of selected topics in Electrical and Computer Engineering.

(Design units: 1-4)

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**EECS 199. Individual Study. 1-4 Units.**

For undergraduate Engineering majors in supervised but independent reading, research, or design. Students taking Individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Repeatability: May be taken for credit for 8 units.

**EECS 199P. Individual Study. 1-4 Units.**

For undergraduate Engineering majors in supervised but independent reading, research, or design. Students taking individual study for design credit are to submit a written paper to the instructor and to the Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**EECS 202A. Principles of Imaging. 4 Units.**

Linear systems, probability and random processes, image processing, projecting imaging, tomographic imaging.

Same as PHYS 233A.

Restriction: Graduate students only.

Concurrent with PHYS 147A.

**EECS 202B. Techniques in Medical Imaging I: X-ray, Nuclear, and NMR Imaging. 4 Units.**

Ionizing radiation, planar and tomographic radiographic and nuclear imaging, magnetism, NMR, MRI imaging.

Prerequisite: EECS 202A

Same as PHYS 233B.

Restriction: Graduate students only.

Concurrent with PHYS 147B.

**EECS 202BP. Techniques in Medical Imaging: X-ray, Nuclear, and NMR Imaging. 4 Units.**

Ionizing radiation, planar and tomographic radiographic and nuclear imaging, magnetism, NMR, MRI imaging.

Restriction: Master of Engineering students only. Graduate students only.

**EECS 202C. Techniques in Medical Imaging II: Ultrasound, Electrophysiological, Optical. 4 Units.**

Sound and ultrasound, ultrasonic imaging, physiological electromagnetism, EEG, MEG, ECG, MCG, optical properties of tissues, fluorescence and bioluminescence, MR impedance imaging, MR spectroscopy, electron spin resonance and ESR imaging.

Prerequisite: EECS 202B

Same as PHYS 233C.

Restriction: Graduate students only.

Concurrent with PHYS 147C.

**EECS 203A. Digital Image Processing. 4 Units.**

Pixel-level digital image representation and elementary operations; Fourier and other unitary transforms; compression, enhancement, filtering, and restoration; laboratory experience is provided.

Restriction: Graduate students only.

**EECS 211. Advanced System Software. 4 Units.**

Study of operating systems including interprocess communication, scheduling, resource management, concurrency, reliability, validation, protection and security, and distributed computing support. System software design languages and modeling analysis.

Restriction: Graduate students only.

**EECS 211P. Advanced System Software. 4 Units.**

Study of operating systems including interprocess communication, scheduling, resource management, concurrency, reliability, validation, protection and security, and distributed computing support. System software design languages and modeling analysis.

Prerequisite: Recommended: Undergraduate-level knowledge of system software (e.g. EECS 111) and organization of digital computers (e.g. UCI EECS 112).

Restriction: Master of Engineering students only. Graduate students only.

**EECS 213. Computer Architecture. 4 Units.**

Problems in hardware, firmware (microprogram), and software. Computer architecture for resource sharing, real-time applications, parallelism, microprogramming, and fault tolerance. Various architectures based on cost/performance and current technology.

Restriction: Graduate students only.

**EECS 213P. Computer Architecture. 4 Units.**

Problems in hardware, firmware (microprogram), and software. Computer architecture for resource sharing, real-time applications, parallelism, microprogramming, and fault tolerance. Various architectures based on cost/performance and current technology.

Prerequisite: Recommended: Undergraduate-level knowledge of organization of digital computers (e.g. EECS 112 and EECS 112L).

Restriction: Master of Engineering students only. Graduate students only.

**EECS 215. Design and Analysis of Algorithms. 4 Units.**

Computer algorithms from a practical standpoint. Algorithms for symbolic and numeric problems such as sorting, searching, graphs, and network flow. Analysis includes algorithm time and space complexity.

**EECS 215P. Design and Analysis of Algorithms. 4 Units.**

Computer algorithms from a practical standpoint. Algorithms for symbolic and numeric problems such as sorting, searching, graphs, and network flow. Analysis includes algorithm time and space complexity.

Restriction: Master of Engineering students only. Graduate students only.

**EECS 216. Advanced Application of Algorithms. 4 Units.**

Medium-sized group and individual programming project. Topics include specification requirements documentation, practical implementation of algorithms, and testing/verification of design.

Prerequisite: Recommended: Undergraduate course work in engineering data structures and algorithms.

**EECS 217. VLSI System Design. 4 Units.**

Overview of integrated fabrication, circuit simulation, basic device physics, device layout, timing; MOS logic design; layout generation, module generation, techniques for very large scale integrated circuit design.

Restriction: Graduate students only.

**EECS 220. Advanced Digital Signal Processing Architecture. 4 Units.**

Study the latest DSP architectures for applications in communication (wired and wireless) and multimedia processing. Emphasis given to understanding the current design techniques and to evaluate the performance, power, and application domain of the latest DSP processors.

Prerequisite: EECS 213

Restriction: Graduate students only.

**EECS 220P. Advanced Digital Signal Processing Architecture. 4 Units.**

Study the latest DSP architectures for applications in communication (wired and wireless) and multimedia processing. Emphasis given to understanding the current design techniques and to evaluate the performance, power, and application domain of the latest DSP processors.

Prerequisite: EECS 213P

Restriction: Master of Engineering students only. Graduate students only.

**EECS 221. Topics in Computer Engineering. 4 Units.**

New research results in computer engineering.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EECS 222. Embedded System Modeling. 4 Units.**

Computational models for embedded systems. System-level specification and description languages. Concepts, requirements, examples. Embedded system models at different levels of abstraction. Modeling of test benches, design under test, IP components. Discrete event simulation, semantics, and algorithms. Formerly EECS 222A.

Restriction: Graduate students only.

**EECS 223. Real-Time Computer Systems. 4 Units.**

Time bases, clock synchronization, real-time communication protocols, specification of requirements, task scheduling. Validation of timelines, real-time configuration management.

Prerequisite: EECS 211 and EECS 213

Restriction: Graduate students only.

**EECS 223P. Real-Time Computer Systems. 4 Units.**

Time bases, clock synchronization, real-time communication protocols, specification of requirements, task scheduling. Validation of timelines, real-time configuration management.

Prerequisite: EECS 211P and EECS 213P

Restriction: Master of Engineering students only. Graduate students only.

**EECS 224. High-Performance Computing. 4 Units.**

Fundamentals of high-performance computing, covering both theory and practice. Topics include performance analysis and tuning, design of parallel and I/O efficient algorithms, basics of parallel machine architectures, and current/emerging programming models (shared memory, distributed memory, and accelerators).

Prerequisite: EECS 215 or CS 260

Restriction: Graduate students only.

**EECS 225. Embedded Systems Design. 4 Units.**

Embedded systems design flow and methodology. Design space exploration. Co-design of hardware and software, embedded architecture and network exploration and synthesis. System software/hardware interface generation. Real-time constraints, specification-to-architecture mapping, design tools and methodologies. Formerly EECS 222B.

Restriction: Graduate students only.

**EECS 226. Embedded System Software. 4 Units.**

Embedded system software concepts, requirements, examples, for engineering applications such as multi-media and automotive. Software generation methodology. Algorithmic specification, design constraints. Embedded operating systems. Static, dynamic, real-time scheduling. Input/output, interrupt handling. Code generation, compilation, instruction set simulation. Formerly EECS 222C.

Restriction: Graduate students only.

**EECS 227. Cyber-Physical System Design. 4 Units.**

Model-based design of cyber-physical systems including, e.g., plant, sensing, control, actuation, embedded hardware/software, communication, real-time analysis, various levels of simulation (MILS, SILS, HILS), tools and methodologies for automatic synthesis, and application from various interdisciplinary domains.

Restriction: Graduate students only.

**EECS 229. Low Power SoC Design. 4 Units.**

From an inverter to server centers, low-power design theory and practice in modern systems-on-chip (SoC), energy efficient design time and runtime methods are surveyed at circuit, RTL, and architecture levels. Lab assignments will help students quantify tradeoffs and design practices.

Prerequisite: EECS 217

Restriction: Graduate students only.

**EECS 230. Energy Efficiency. 4 Units.**

Green energy sources for production, transmission, storage, and utilization of electricity, with a special focus on solar, wind, and nuclear energy production. Study of newly developed renewable sources of energy including capital cost, product cost, environmental issues, and technical feasibility.

**EECS 231. Advanced System Security. 4 Units.**

Advanced study about system security. Topics include software vulnerabilities (buffer overflow), vulnerability discovery (fuzzing), network security, side-channel analysis (power analysis and micro-architecture attacks), machine-learning security, IoT security, and privacy (differential privacy).

Restriction: Graduate students only.

**EECS 240. Random Processes. 4 Units.**

Extensions of probability theory to random variables varying with time. General properties of stochastic processes. Convergence. Estimation, including nonlinear and linear minimum mean square error and maximum likelihood. Spectral density and linear filters. Poisson processes and discrete-time Markov chains.

Restriction: Graduate students only.

**EECS 240P. Random Processes. 4 Units.**

Extensions of probability theory to random variables varying with time. General properties of stochastic processes. Convergence. Estimation, including nonlinear and linear minimum mean square error and maximum likelihood. Spectral density and linear filters. Poisson processes and discrete-time Markov chains.

Prerequisite: Recommended: Knowledge of engineering probability (e.g. EECS 55).

Restriction: Master of Engineering students only. Graduate students only.

**EECS 241A. Digital Communications I. 4 Units.**

Concepts and applications of digital communication systems. Baseband digital transmission of binary, multi-amplitude, and multidimensional signals. Introduction to and performance analysis of different modulation schemes.

**EECS 241AP. Digital Communications I. 4 Units.**

Concepts and applications of digital communication systems. Baseband digital transmission of binary, multi-amplitude, and multidimensional signals. Introduction to and performance analysis of different modulation schemes.

Restriction: Master of Engineering students only. Graduate students only.

**EECS 241B. Digital Communications II. 4 Units.**

Concepts and applications of equalization, multi-carrier modulation, spread spectrum and CDMA. Digital communications through fading memory channels.

Prerequisite: EECS 241A

Restriction: Graduate students only.

**EECS 241BP. Digital Communications II. 4 Units.**

Concepts and applications of equalization, multi-carrier modulation, spread spectrum, and CDMA. Digital communications through fading memory channels.

Prerequisite: EECS 241AP

Restriction: Master of Engineering students only. Graduate students only.

**EECS 242. Information Theory. 4 Units.**

Fundamental capabilities and limitations of information sources and information transmission systems. Analytical framework for modeling and evaluating communication systems: entropy, mutual information asymptotic equipartition property, entropy rates of a stochastic process, data compression, channel capacity, differential entropy, the Gaussian channel.

Prerequisite: EECS 240

**EECS 243. Error Correcting Codes. 4 Units.**

Different techniques for error correcting codes and analyzing their performance. Linear block codes; cyclic codes; convolutional codes. Minimum distance; optimal decoding; Viterbi decoding; bit error probability. Coding gain; trellis coded modulation.

Prerequisite: EECS 240

Restriction: Graduate students only.

**EECS 244. Wireless Communications. 4 Units.**

Introduction to wireless communications systems. Wireless channel modeling. Single carries, spread spectrum, and multi-carrier wireless modulation schemes. Diversity techniques. Multiple-access schemes. Transceiver design and system level tradeoffs. Brief overview of GSM, CDMA, (IS-95) and 2.5, 3G cellular schemes.

Prerequisite: EECS 241B

Restriction: Graduate students only.

**EECS 244P. Wireless Communications. 4 Units.**

Introduction to wireless communications systems. Wireless channel modeling. Single carries, spread spectrum, and multi-carrier wireless modulation schemes. Diversity techniques. Multiple-access schemes. Transceiver design and system level tradeoffs. Brief overview of GSM, CDMA, (IS-95) and 2.5, 3G cellular schemes.

Prerequisite: EECS 241BP

Restriction: Master of Engineering students only. Graduate students only.

**EECS 245. Space-Time Coding. 4 Units.**

A fundamental study of: Capacity of MIMO Channels, space-time code design criteria, space-time block codes, space-time trellis codes, differential detection for multiple antennas, spatial multiplexing, BLAST.

Prerequisite: EECS 242

Restriction: Graduate students only.

**EECS 247. Information Storage. 4 Units.**

Storage architecture, storage network and networking algorithms in data centers, principle of storage devices and non-volatile memory, data consistency, data availability and integrity, power management.

Restriction: Graduate students only.

**EECS 248A. Computer and Communication Networks. 4 Units.**

Network architecture of the Internet, telephone networks, cable networks, and cell phone networks. Network performance models. Network performance models. Advanced concepts and implementations of flow and congestion control, addressing, internetworking, forwarding, routing, multiple access, streaming, and quality-of-service.

Prerequisite: EECS 148 or CS 132

Same as CS 232, NSYS 201.

Restriction: Graduate students only.

**EECS 250. Digital Signal Processing I. 4 Units.**

Fundamental principles of digital signal processing, sampling, decimation and interpolation, discrete Fourier transforms and FFT algorithms, transversal and recursive filters, discrete random processes, and finite-word effects in digital filters.

Restriction: Graduate students only.

**EECS 250P. Digital Signal Processing I. 4 Units.**

Fundamental principles of digital signal processing, sampling, decimation and interpolation, discrete Fourier transforms and FFT algorithms, transversal and recursive filters, discrete random processes, and finite-word effects in digital filters.

Prerequisite: Recommended: Knowledge of digital signal processing (e.g. EECS 152A).

Restriction: Master of Engineering students only. Graduate students only.

**EECS 251A. Detection, Estimation, and Demodulation Theory. 4 Units.**

Fundamentals of hypothesis testing and Bayes and Maximum Likelihood Estimation. ARMA and state variable models for random time series analysis. Wiener and Kalman filtering and prediction. Adaptive algorithms for identification and tracking of parameters of time-varying models.

Prerequisite: EECS 240

**EECS 251B. Detection, Estimation, and Demodulation Theory. 4 Units.**

Fundamentals of hypothesis testing and Bayes and Maximum Likelihood Estimation. ARMA and state variable models for random time series analysis. Wiener and Kalman filtering and prediction. Adaptive algorithms for identification and tracking of parameters of time-varying models.

Prerequisite: EECS 240

**EECS 260A. Linear Systems I. 4 Units.**

State-space representation of continuous-time and discrete-time linear systems. Controllability, observability, stability. Realization of rational transfer functions.

Restriction: Graduate students only.

**EECS 261A. Linear Optimization Methods. 4 Units.**

Formulation, solution, and analysis of linear programming and linear network flow problems. Simplex methods, dual ascent methods, interior point algorithms, and auction algorithms. Duality theory and sensitivity analysis. Shortest path, max-flow, assignment, and minimum cost flow problems.

Restriction: Graduate students only.

**EECS 267A. Industrial and Power Electronics. 4 Units.**

Power switching devices, pulse width modulation (PWM) methods, switching converter topologies, control, and magnetics. Materials fee.

Restriction: Graduate students only.

Concurrent with EECS 166A.

**EECS 267B. Topics in Industrial and Power Electronics. 4 Units.**

Practical design of switching converters, electromagnetic compatibility, thermal management, and/or control methods.

Prerequisite: EECS 267A

Restriction: Graduate students only.

**EECS 270A. Advanced Analog Integrated Circuit Design I. 4 Units.**

Basic transistor configurations; differential pairs; active load/current sources; supply/temperature-independent biasing; op-amp gain and output stages; amplifier frequency response and stability compensation; nonidealities in op-amps; noise and dynamic range in analog circuits.

Restriction: Graduate students only.

**EECS 270AP. Advanced Analog Integrated Circuit Design I. 4 Units.**

Basic transistor configurations; differential pairs; active load/current sources; supply/temperature-independent biasing; op-amp gain and output stages; amplifier frequency response and stability compensation; nonidealities in op-amps; noise and dynamic range in analog circuits.

Prerequisite: Recommended: Introductory knowledge of control systems (e.g. EECS 160A) and electronics (e.g. EECS 170C).

Restriction: Master of Engineering students only. Graduate students only.

**EECS 270B. Advanced Analog Integrated Circuit Design II. 4 Units.**

Advanced transistor modeling issues; discrete-time and continuous-time analog Integrated Circuit (IC) filters; phase-locked loops; design of ICs operating at radio frequencies; low-voltage/low-power design techniques; A/D and D/A converters; AGC circuits.

Prerequisite: EECS 270A

Restriction: Graduate students only.

**EECS 270BP. Advanced Analog Integrated Circuit Design II. 4 Units.**

Advanced transistor modeling issues; discrete-time and continuous-time analog Integrated Circuit (IC) filters; phase-locked loops; design of ICs operating at radio frequencies; low-voltage/low-power design techniques; A/D and D/A converters; AGC circuits.

Prerequisite: EECS 270AP

Restriction: Master of Engineering students only. Graduate students only.

**EECS 270C. Design of Integrated Circuits for Broadband Applications. 4 Units.**

Topics include: broadband standards and protocols; high-frequency circuit design techniques; PLL theory and design; design of transceivers; electrical/optical interfaces.

Prerequisite: EECS 270A

Restriction: Graduate students only.

**EECS 270D. Radio-Frequency Integrated Circuit Design. 4 Units.**

Topics include: RF component modeling; matching network design; transmission line theory/modeling; Smith chart and S-parameters; noise modeling of active and passive components; high-frequency amplifier design; low-noise amplifier (LNA) design; mixer design; RF power amplifier.

Prerequisite: EECS 270A

Restriction: Graduate students only.

**EECS 270DP. Radio-Frequency Integrated Circuit Design. 4 Units.**

Topics include RF component modeling; matching network design; transmission line theory/modeling; Smith chart and S-parameters; noise modeling of active and passive components; high-frequency amplifier design; low-noise amplifier (LNA) design; mixer design; RF power amplifier.

Prerequisite: EECS 270AP

Restriction: Master of Engineering students only. Graduate students only.

**EECS 270E. High Frequency (Millimeter-Wave and Terahertz) Circuits. 4 Units.**

Discussion of the new methodologies, circuits, and systems developed at mm-wave and terahertz frequency ranges due to the growing interest in high speed communication and high frequency signal generation.

Restriction: Graduate students only.

**EECS 272. Topics in Electrical Engineering. 4 Units.**

New research results in electronic system design.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EECS 275A. Very Large Scale Integration (VLSI) Project. 4 Units.**

Students create VLSI design projects from conception through architecture, floor planning, detailed design, simulation, verification, and submission for project fabrication. Emphasis on practical experience in robust VLSI design techniques. (Successful students are expected to take EECS 275B.).

Restriction: Graduate students only.

**EECS 275B. Very Large Scale Integration (VLSI) Project Testing. 4 Units.**

Test and document student-created Complementary Metal Oxide Semiconductor (CMOS) Very Large Scale Integration (VLSI) projects designed in EECS 275A. Emphasis on practical laboratory experience in VLSI testing techniques. Materials fee.

Prerequisite: EECS 275A

Restriction: Graduate students only.

**EECS 277A. Advanced Semiconductor Devices I. 4 Units.**

Advanced complementary metal-oxide-semiconductor field-effect transistors (CMOSFET), device scaling, device modeling and fabrication, equivalent circuits, and their applications for digital, analog, RF.

Restriction: Graduate students only.

**EECS 277B. Advanced Semiconductor Devices II. 4 Units.**

Metal-semiconductor field-effect transistors (MESFET), heterojunction bipolar transistors (HBT), microwave semiconductor devices, equivalent circuits, device modeling and fabrication, microwave amplifiers, transmitters, and receivers.

Restriction: Graduate students only.

**EECS 277C. Nanotechnology. 4 Units.**

Fabrication and characterization techniques of electrical circuit elements at the nanometer scale. Quantized conductance, semiconductor quantum dots, single electron transistors, molecular wires, carbon nanotubes, self-assembly of nano-circuit elements, quantum methods of information processing.

Restriction: Graduate students only.

**EECS 278. Micro-System Design. 4 Units.**

Covers the fundamentals of the many disciplines needed for design of Micro-Electro-Mechanical Systems (MEMS): microfabrication technology, structural mechanics on micro-scale, electrostatics, circuit interface, control, computer-aided design, and system integration.

Same as MAE 247.

Restriction: Graduate students only.

**EECS 279. Micro-Sensors and Actuators. 4 Units.**

Introduction to the technology of Micro-Electro-Mechanical Systems (MEMS). Fundamental principles and applications of important microsensors, actuation principles on microscale. Introduction to the elements of signal processing; processing of materials for micro sensor/actuator fabrication; smart sensors and microsensor/microactuator array devices.

Same as MAE 249.

Restriction: Graduate students only.

**EECS 280A. Advanced Engineering Electromagnetics I. 4 Units.**

Stationary electromagnetic fields, Maxwell's equations, circuits and transmission lines, plane waves, guided waves, and radiation.

Restriction: Graduate students only.

**EECS 280AP. Advanced Engineering Electromagnetics I. 4 Units.**

Stationary electromagnetic fields, Maxwell's equations, circuits and transmission lines, plane waves, guided waves, and radiation.

Prerequisite: Recommended: Knowledge of engineering electromagnetics (e.g. EECS 180A)

Restriction: Master of Engineering students only. Graduate students only.

**EECS 280B. Advanced Engineering Electromagnetics II. 4 Units.**

Two- and three-dimensional boundary value problems, dielectric waveguides and other special waveguides, microwave networks and antenna arrays, electromagnetic properties of materials, and electromagnetic optics.

Prerequisite: EECS 280A

Restriction: Graduate students only.

**EECS 282. Monolithic Microwave Integrated Circuit (MMIC) Analysis and Design II. 4 Units.**

Design of microwave amplifiers using computer-aided design tools. Covers low-noise amplifiers, multiple stage amplifiers, broadband amplifiers, and power amplifiers. Hybrid circuit design techniques including filters and baluns. Theory and design rules for microwave oscillator design.

Restriction: Graduate students only.

**EECS 284P. RF Antenna Design . 4 Units.**

Advanced transmission line design, radiation of electromagnetic waves, dipole antennas, antenna arrays, advanced antenna designs, and practical design considerations in communications systems. Course is supplemented by RF design tools and modeling.

Prerequisite: EECS 280AP

Restriction: Master of Engineering students only. Graduate students only.

**EECS 285A. Optical Communications. 4 Units.**

Introduction to fiber optic communication systems, optical and electro-optic materials, and high-speed optical modulation and switching devices.

Restriction: Graduate students only.

**EECS 285AP. Optical Communications. 4 Units.**

Introduction to fiber optic communication systems, optical and electro-optic materials, and high-speed optical modulation and switching devices.

Prerequisite: Undergraduate-level Engineering Electromagnetics I (e.g. EECS E80A).

Restriction: Master of Engineering students only. Graduate students only.

**EECS 285B. Lasers and Photonics. 4 Units.**

Covers the fundamentals of lasers and applications, including Gaussian beam propagation, interaction of optical radiation with matters, and concepts of optical gain and feedback. Applications are drawn from diverse fields of optical communication, signal processing, and material diagnosis.

Prerequisite: Undergraduate course work in electromagnetic theory and atomic physics.

**EECS 285C. Nano Imaging. 4 Units.**

Theory and practice of modern nanoscale imaging techniques and applications. Traces the development of microscopy from ancient times to modern day techniques used for visualizing the nano-world from atoms to molecules including hands-on experience in the laboratory.

Restriction: Graduate students only.

**EECS 290. Curricular Practical Training. 1 Unit.**

Curricular practical training. Students will go through practical training under an industry mentor in a technical field corresponding to their concentration area.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EECS 292. Preparation for M.S. Comprehensive Examination. 1-8 Units.**

Individual reading and preparation for the M.S. comprehensive examination.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EECS 293. Preparation for Ph.D. Preliminary Examination. 1-8 Units.**

Individual reading and preparation for the Ph.D. preliminary examination.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EECS 294. Electrical Engineering and Computer Science Colloquium. 1 Unit.**

Invited speakers discuss their latest research results in electrical engineering and computer science.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EECS 295. Seminars in Engineering. 1-4 Units.**

Scheduled each year by individual faculty in major field of interest.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EECS 295P. Special Topics in Electrical Engineering and Computer Science. 4 Units.**

Studies in selected areas of Electrical Engineering. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Master of Engineering students only. Graduate students only.

**EECS 296. Master of Science Thesis Research. 1-16 Units.**

Individual research or investigation conducted in the pursuit of preparing and completing the thesis required for the M.S. degree in Engineering.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EECS 297. Doctor of Philosophy Dissertation Research. 1-16 Units.**

Individual research or investigation conducted in preparing and completing the dissertation required for the Ph.D. degree in Engineering.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EECS 298. Topics in Electrical Engineering and Computer Science. 4 Units.**

Study of Electrical and Computer Engineering concepts.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EECS 299. Individual Research. 1-16 Units.**

Individual research or investigation under the direction of an individual faculty member.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Embedded and Cyber-Physical Systems (ECPS)

### Courses

**ECPS 202. Cyber-Physical Systems Design. 4 Units.**

Requirements and specification, MoCs, tools, design, merging cyber and physical, manufacturing, examples (robots, energy house, self-driving car, pacemaker, etc.). Design process, specification, requirements, modeling, components, selection, interfaces, system structure, different levels, verification, testing.

Restriction: Graduate students only.

**ECPS 203. Embedded Systems Modeling and Design. 4 Units.**

Embedded Systems definition, specification, and languages. Concepts, requirements, examples. Embedded system models at different abstraction levels. Test benches, design under test, Intellectual Property components. Discrete event simulation, semantics, algorithms. Design, analysis techniques for decentralized computer architectures, communication, and hardware-software systems.

Restriction: Graduate students only.

**ECPS 204. Embedded System Software. 4 Units.**

Embedded system software concepts, requirements, examples, for engineering applications such as multimedia and automotive. Software methodology. Specification, design constraints. Embedded operating systems. Input/output, interrupt handling. Code generation, compilation, instruction set simulation. Distributed object model, distributed environment, platform-independent software agents, components.

Restriction: Graduate students only.

**ECPS 205. Sensors, Actuators and Sensor Networks. 4 Units.**

Fundamental principles and applications of sensors, actuators. Smart sensors and microsensor/microactuator array devices. Introduction to signal processing and sensor/actuator networks, deployment and architecture, wireless communication, multiple access control layer, data gathering, routing and querying, collaborating signal processing.

Restriction: Graduate students only.

**ECPS 206. Real-Time and Distributed Systems. 4 Units.**

Time dependent systems, clock synchronization, real-time communication protocols, specification of requirements, task scheduling. Validation of timelines, real-time configuration management. Middleware architecture for distributed real-time and secure services.

Restriction: Graduate students only.

**ECPS 207. Security and Privacy in Cyber-Physical Systems. 4 Units.**

ES and CPS security: attacks and countermeasures, authentication, identification, confidentiality, data integrity, authorization, access control, malware attacks and counter-measures, security protocols. Privacy issues e.g., vehicular devices and smart metering. Applications of public key and symmetric cryptography, e.g., digital certificates, credentials.

Restriction: Graduate students only.

**ECPS 208. Control Systems for Cyber-Physical Systems. 4 Units.**

State space representation (continuous and discrete), principles of optimization, model predictive control, robustness to actuation or communications limitations, control of networked systems, multi-agent co-operation and control.

Restriction: Graduate students only.

**ECPS 209. Cyber-Physical Systems Case Studies . 4 Units.**

Covers CPS case studies in applications such as (but not limited to): automotive and transportation, manufacturing, power distribution grid, medical and healthcare, robotics, civil infrastructure, avionics.

Restriction: Graduate students only.

**ECPS 210. Cyber-Physical Systems Project. 4 Units.**

Students are required to complete a project that deals with a specific emphasis of Cyber-Physical Systems, such as (but not limited to): automotive, transportation, manufacturing, power grid, medical healthcare, robotics, civil infrastructure, avionics.

Prerequisite: ECPS 202 and ECPS 204 and ECPS 209

Repeatability: May be taken for credit 3 times.

**ECPS 211. Machine Learning and Data Mining. 4 Units.**

Introduction to principles of machine learning and data-mining. Learning algorithms for classifications, regression, and clustering. Emphasis is on discriminative classification methods such as decision trees, rules, nearest neighbor, linear models, and naive Bayes.

Restriction: Graduate students only.

**ECPS 212. Entrepreneurship for Scientists and Engineers. 4 Units.**

Real-world introduction to the theory and practice of entrepreneurship. Explores organizational, strategic, and financial challenges; start-up strategies; business-idea evaluation; and business-plan writing. Presentations by prestigious entrepreneurs and industry leaders.

Restriction: Graduate students only.

**ECPS 299. Individual Research. 1-16 Units.**

Individual research or investigation under the direction of an individual faculty member.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Emergency Medicine (ER MED)

## Engineering (ENGR)

### Courses

**ENGR 1A. General Chemistry for Engineers. 4 Units.**

Emphasis on solid-state chemistry. Quantum theory, atomic structure, periodic trends, chemical bonding, molecular orbitals, electronic band structure, gases, liquids, intermolecular forces, unit cells, crystal lattices, phase transformations, and electrochemistry.

(Design units: 0)

Prerequisite: AP Chemistry or SAT Subject Chemistry or SAT Mathematics or ACT Mathematics. AP Chemistry with a minimum score of 3. SAT Subject Chemistry with a minimum score of 600. SAT Mathematics with a minimum score of 600. ACT Mathematics with a minimum score of 27. A score of 85 or higher on the Engineering Chemistry Placement Exam (fee required) is also accepted.

Overlaps with CHEM 1A.

Restriction: Electrical Engineering Majors have first consideration for enrollment. Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Materials Science Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

(II)

**ENGR 7A. Introduction to Engineering I. 2 Units.**

Introduction to engineering disciplines and the design process. Students enrolled in the online lecture also attend a three-hour lab on campus. Materials fee.

(Design units: 1)

Grading Option: In Progress (Letter Grade with P/NP).

Restriction: Lower-division students only. School of Engineering students have first consideration for enrollment.

**ENGR 7B. Introduction to Engineering II. 2 Units.**

Introduction to engineering disciplines and the design process. Students enrolled in the online lecture also attend a three-hour lab on campus. Materials fee.

(Design units: 2)

Prerequisite: ENGR 7A

Restriction: Lower-division students only. School of Engineering students have first consideration for enrollment.

**ENGR 30. Statics. 4 Units.**

Addition and resolution of forces, distributed forces, equivalent system of forces centroids, first moments, moments and products on inertia, equilibrium of rigid bodies, trusses, beams, cables. Course may be offered online.

(Design units: 0)

Corequisite: MATH 2D

Prerequisite: MATH 2D and PHYS 7C

Same as CEE 30, MAE 30.

Restriction: School of Engineering students have first consideration for enrollment.

**ENGR 54. Principles of Materials Science and Engineering. 4 Units.**

Superconductors to biodegradable polymers. Structure and properties of materials, including metal, ceramics, polymers, semiconductors, composites, traditional materials. Atomic structure, bonding, defects, phase equilibria, mechanical properties, electrical, optical and magnetic properties. Introduction to materials processing and synthesis. Materials fee.

(Design units: 0)

Prerequisite: (ENGR 1A or CHEM 1A or CHEM H2A) and PHYS 7C

Restriction: School of Engineering students have first consideration for enrollment.

**ENGR 80. Dynamics. 4 Units.**

Introduction to the kinematics and dynamics of particles and rigid bodies. The Newton-Euler, Work/Energy, and Impulse/Momentum methods are explored for ascertaining the dynamics of particles and rigid bodies. An engineering design problem using these fundamental principles is also undertaken.

(Design units: 0.5)

Prerequisite: MATH 2D and PHYS 7C

Same as CEE 80, MAE 80.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGR 92. Engineering and Computer Educational Laboratory. 1-4 Workload Units.**

Comprehensive academic support designed primarily for underrepresented or underprepared students in Engineering, ICS, or selected areas of the physical sciences. Typical program activities: tutoring, study skills, career planning, self-esteem enhancement, library research techniques.

(Design units: 0)

Grading Option: Workload Credit P/NP Only.

Repeatability: May be taken for credit for 12 units.

**ENGR 93. Public and Professional Service in Engineering. 1-2 Workload Units.**

Student participation in public and professional service activities related to engineering.

(Design units: 0)

Grading Option: Workload Credit P/NP Only.

Repeatability: May be repeated for credit unlimited times.

**ENGR 98. Group Study . 1-4 Units.**

Group study of selected topics in engineering.

(Design units: 1-4)

Repeatability: Unlimited as topics vary.

**ENGR 100. Special Topics in Fabrication Safety. 1 Workload Unit.**

Hands on training in the safe use of item fabrication: metalworking, woodworking, electronics fabrication, composites, welding, adhesives, water disposal, and others. Safety certification will be granted from this course and is required for access to Engineering School fabrication facilities.

(Design units: 0)

Grading Option: Workload Credit Letter Grade with P/NP.

Repeatability: Unlimited as topics vary.

Restriction: School of Engineering students have first consideration for enrollment.

**ENGR 150. Mechanics of Structures. 4 Units.**

Stresses and strains. Torsion. Bending. Beam deflection. Shear force and moment distributions in beams. Yielding and buckling of columns. Combined loading. Transformation of stresses and strain. Yielding criteria. Finite elements analysis of frames. Dynamic of two-bar truss.

(Design units: 2)

Prerequisite: (CEE 30 or ENGR 30 or MAE 30) and MATH 3A

Same as MAE 150.

Overlaps with CEE 150.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**ENGR 165. Advanced Manufacturing. 4 Units.**

Principles in manufacturing processes. All machining requires energy: mechanical (cutting and shaping), heat energy (laser cutting), photochemical (photolithography), chemical energy (electro chemical machining and chemical vapor deposition). These methods and their fundamentals are examined. Materials fee.

(Design units: 2)

Restriction: Seniors only. School of Engineering students only.

Concurrent with ENGR 265.

**ENGR 180. Entrepreneurship for Scientists and Engineers. 4 Units.**

Learn the theory and practice of entrepreneurship and intrapreneurship. Covers positioning an idea, establishing the value propositions and benefits case, going to market strategy, creating an execution plan, and raising funds. Concepts are applied to a real-world venture project.

(Design units: 0)

Restriction: Upper-division students only. School of Engineering students have first consideration for enrollment.

Concurrent with ENGR 280.

**ENGR 189. Senior Project - Topics Vary. 1-4 Units.**

Multidisciplinary group senior project of theoretical or applied nature involving design.

(Design units: 1-4)

Repeatability: May be taken for credit for 12 units as topics vary.

Restriction: Seniors only.

**ENGR 190W. Communications in the Professional World. 4 Units.**

Upper-division technical writing course including the development of presentation skills. Effective communication with a range of audiences. Recognition of ethical and professional responsibilities for engineers.

(Design units: 0)

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: School of Engineering students only. Graduating seniors with an application on file have first consideration.

**(Ib)**

**ENGR 191. Curricular Practical Training. 1 Unit.**

Practical training under an industry mentor in a technical field corresponding to students' area of interest.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**ENGR 195. Special Topics in Engineering. 1-4 Units.**

Studies in selected areas of Engineering. Topics addressed vary each quarter.

(Design units: 1-4)

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**ENGR 196W. Engineering Thesis. 4 Units.**

Preparation of final presentation and paper describing individual research in Engineering completed in one or more quarters of individual study (i.e., ENGR 199).

(Design units: 0)

Prerequisite: Completion of at least 4 units of Individual Research in Engineering. Satisfactory completion of the Lower-Division Writing requirement.

**(Ib)**

**ENGR H196W. Honors Thesis. 4 Units.**

Preparation of final presentation and paper describing individual research in Engineering. For participants in the Campuswide Honors Program.

(Design units: 1-4)

Prerequisite: ENGR H199. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Campuswide Honors Collegium students only.

**(Ib)**

**ENGR 199. Individual Study. 1-4 Units.**

Supervised independent reading, research, or design for undergraduate Engineering majors. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Repeatability: May be taken for credit for 8 units.

Restriction: School of Engineering students only.

**ENGR 199P. Individual Study. 1-4 Units.**

Supervised independent reading, research, or design for undergraduate Engineering majors. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**ENGR H199. Individual Study for Honors Students. 1-5 Units.**

Supervised research in Engineering for participants in the Campuswide Honors Program. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-5)

Repeatability: May be repeated for credit unlimited times.

Restriction: Campuswide Honors Collegium students only.

**ENGR 200AP. Entrepreneurship Science and Engineering: Innovation. 4 Units.**

Teaches concepts on how to develop innovate/disruptive ideas through actual delivery and adoption. Focuses on the critical thinking skills, the process of developing an idea into a product/service, and teaching a framework to foster adoption of the idea and product.

Restriction: Master of Engineering students only. Graduate students only.

**ENGR 200BP. Entrepreneurship Science and Engineering: Build. 4 Units.**

Learn how to build an executable plan to transform an idea into a product. Learn how to construct a go-to market plan, raise funds for building the product, and leverage ecosystem resources to fill in resource gaps.

Restriction: Master of Engineering students only. Graduate students only.

**ENGR 200CP. Entrepreneurship Science and Engineering: Launch. 4 Units.**

Understand how to build an actual product. Learn about prototyping and basic project management skills. Learn a framework on when to pivot for course corrections. Identify how to define outcome metrics and measure progress as the product is launched.

Restriction: Master of Engineering students only. Graduate students only.

**ENGR 210P. Capstone Project . 4 Units.**

Students are required to complete a project that deals with a specific emphasis of their Master of Engineering concentration/specialization.

Repeatability: May be taken for credit 4 times.

Restriction: Master of Engineering students only. Graduate students only.

**ENGR 265. Advanced Manufacturing. 4 Units.**

Principles in manufacturing processes. All machining requires energy: mechanical (cutting and shaping), heat energy (laser cutting), photochemical (photolithography), chemical energy (electro chemical machining and chemical vapor deposition). These methods and their fundamentals are examined. Materials fee.

Restriction: Graduate students only. School of Engineering students only.

Concurrent with ENGR 165.

**ENGR 280. Entrepreneurship for Scientists and Engineers. 4 Units.**

Learn the theory and practice of entrepreneurship and intrapreneurship. Covers positioning an idea, establishing the value propositions and benefits case, going to market strategy, creating an execution plan, and raising funds. Concepts are applied to a real-world venture project.

Restriction: School of Engineering students have first consideration for enrollment. Graduate students only.

Concurrent with ENGR 180.

**ENGR 290. Developing Teaching Excellence. 4 Units.**

Introduces the Scholarship of Teaching and Learning (SoTL) as it applies to Engineering Education. Focuses on how teaching practice can be guided by the research literature on teaching and learning.

Restriction: Graduate students only.

**ENGR 291. Internship. 1 Unit.**

Practical training under an industry mentor in a technical field corresponding to the student's area of interest.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ENGR 295. Special Topics in Engineering. 1-4 Units.**

Studies in selected areas of Engineering. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ENGR 296. Master of Science Thesis Research. 1-16 Units.**

Individual research or investigation conducted in the pursuit of preparing and completing the thesis required for the M.S. in Engineering.

Repeatability: May be repeated for credit unlimited times.

**ENGR 297. Doctor of Philosophy Dissertation Research. 1-16 Units.**

Individual research or or investigation conducted in the pursuit of preparing and completing the dissertation required for the Ph.D. in Engineering.

Repeatability: May be repeated for credit unlimited times.

**ENGR 299. Individual Research. 1-16 Units.**

Individual research or investigation under the direction of an individual faculty.

Repeatability: May be repeated for credit unlimited times.

**ENGR 399. University Teaching. 4 Units.**

University teaching with Engineering faculty.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Teaching assistants only.

## English (ENGLISH)

### Courses

**ENGLISH 8. Multicultural American Literature. 4 Units.**

Writings from at least two historically underrepresented groups in California and the United States with particular attention to historical conditions of literary production. Considers in-depth how literary works relate to racial constructions, economic conditions, and/or social movements.

(IV and VII ).

**ENGLISH 9. Shakespeare. 4 Units.**

Plays by William Shakespeare are used to explore the playwright's poetic gifts, theatrical imagination, and inquiry into human relationships and the human condition.

(IV)

**ENGLISH 10. Topics in English and American Literature. 4 Units.**

Explores the diversity of human expression manifested in selected works of literature. By engaging with substantial literary texts, students will think critically about how meaning is created and how experience is interpreted in literary language.

Repeatability: May be taken for credit 3 times as topics vary.

(IV)

**ENGLISH 10B. Topics in English and American Literature. 4 Units.**

Linked with Writing 39B. Explores the diversity of human expression manifested in selected works of literature. By engaging with substantial literary texts, students think critically about how meaning is created and how experience is interpreted in literary language.

Corequisite: WRITING 39B

Repeatability: May be taken for credit 3 times as topics vary.

Overlaps with ENGLISH 10.

(IV)

**ENGLISH 11. Society, Law, and Literature. 4 Units.**

Examines how works of literature represent and influence the relation between law and society. The primary readings will be works of literature, but selections of works of law, politics, and sociology may also be assigned.

(III or IV ).

**ENGLISH 11C. Society, Law, and Literature. 4 Units.**

Linked with Writing 39C. Explores how works of literature represent and influence the relation between law and society. The primary readings are works of literature, but selections of works of law, politics, and sociology may also be assigned.

Corequisite: WRITING 39C

Overlaps with ENGLISH 11.

(III or IV ).

**ENGLISH 12. Young Adult Fiction . 4 Units.**

Young adult fiction studied in historical context, including the publishing industry and mass marketing, as well as education and literacy. Primary readings will focus on young adult fiction, but works of history, advertising, and film will also be included.

(IV)

**ENGLISH 15. Introductory Seminar in English: Topics in Literary Studies. 4 Units.**

Discussion-based seminar on a faculty-chosen topic that introduces majors and those considering a major in English to interpretive methodologies and critical frameworks that characterize the field of English studies.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: English Majors have first consideration for enrollment.

**ENGLISH 16. The Craft of Poetry. 4 Units.**

Reading of selected texts to explore the ways in which these modes formulate experience. Students write several short analytic papers. Requires creative writing.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(IV)

**ENGLISH 17. The Craft of Fiction. 4 Units.**

Reading of selected texts to explore the ways in which these modes formulate experience. Students write several short analytic papers. Requires creative writing.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(IV)

**ENGLISH H80. Sanctuary: Medieval and Modern. 4 Units.**

Principles and significance of the practice of legal sanctuary in medieval English history, literature, and religion. Development of modern use of churches and other safe spaces in the American Civil Rights movement, immigrant sanctuary movements, and international asylum.

Restriction: Campuswide Honors Collegium students only.

(III or IV ).

**ENGLISH H81. What is a Person?. 4 Units.**

Contemporary debates about personhood in law, culture, and society. Beginning with the emergence of ideas of personhood in philosophy and theology, and culminating in the study of highly contested cases: slavery, abortion law, animal rights, corporate personhood, and artificial intelligence.

Restriction: Campuswide Honors Collegium students only.

**(III)****ENGLISH 100. Introduction to Literary Theory. 4 Units.**

Using Plato and Aristotle as points of departure, addresses a range of perspectives and problems in literary theory. To be taken by English majors in the junior year.

Prerequisite: Three courses selected from ENGLISH 8, ENGLISH 9, ENGLISH 10, ENGLISH 11, ENGLISH 12, ENGLISH 15, ENGLISH 16, ENGLISH 17, LIT JRN 20, LIT JRN 21.

**ENGLISH 101W. Undergraduate Seminar in Critical Writing: Topics in Literary History. 4 Units.**

Each instructor identifies a topic within literary history; special attention is given to mastering the conventions of academic argument and expression. To be taken as early as possible in the junior year.

Prerequisite: Three courses selected from ENGLISH 8, ENGLISH 9, ENGLISH 10, ENGLISH 11, ENGLISH 12, ENGLISH 15, ENGLISH 16, ENGLISH 17; or LIT JRN 20 and LIT JRN 21 and one course selected from the above list. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only. English Majors have first consideration for enrollment.

**(Ib)****ENGLISH 102A. Topics in Medieval and Renaissance Literature. 4 Units.**

Studies of works representative of Medieval and Renaissance literature in English, with attention to literary history, treating at a minimum more than one author and more than one genre.

Prerequisite: Three courses selected from ENGLISH 8, ENGLISH 9, ENGLISH 10, ENGLISH 11, ENGLISH 12, ENGLISH 15, ENGLISH 16, ENGLISH 17. Or LIT JRN 20 and LIT JRN 21 and one course selected from the above list.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only. English Majors have first consideration for enrollment.

**ENGLISH 102B. Topics in Restoration and 18th-Century Literature . 4 Units.**

Studies of works representative of Restoration and 18th-century literature in English, with attention to literary history, treating at a minimum more than one author and more than one genre.

Prerequisite: Three courses selected from ENGLISH 8, ENGLISH 9, ENGLISH 10, ENGLISH 11, ENGLISH 12, ENGLISH 15, ENGLISH 16, ENGLISH 17. Or LIT JRN 20 and LIT JRN 21 and one course selected from the above list.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only. English Majors have first consideration for enrollment.

**ENGLISH 102C. Topics in Romantic and 19th-Century Literature. 4 Units.**

Studies of works representative of Romantic and 19th-century literature in English, with attention to literary history, treating at a minimum more than one author and more than one genre.

Prerequisite: Three courses selected from ENGLISH 8, ENGLISH 9, ENGLISH 10, ENGLISH 11, ENGLISH 12, ENGLISH 15, ENGLISH 16, ENGLISH 17. Or LIT JRN 20 and LIT JRN 21 and one course selected from the above list.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only. English Majors have first consideration for enrollment.

**ENGLISH 102D. Topics in 20th-Century Literature. 4 Units.**

Studies of works representative of 20th-century literature in English, with attention to literary history, treating at a minimum more than one author and more than one genre.

Prerequisite: Three courses selected from ENGLISH 8, ENGLISH 9, ENGLISH 10, ENGLISH 11, ENGLISH 12, ENGLISH 15, ENGLISH 16, ENGLISH 17. Or LIT JRN 20 and LIT JRN 21 and one course selected from the above list.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only. English Majors have first consideration for enrollment.

**ENGLISH 103. Topics in Literature, Theory, and Criticism. 4 Units.**

A series of lectures on and discussions of announced topics in literary criticism, theory, history, genres, modes, major authors.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Recommended: Upper-division students only.

**ENGLISH 105. Multicultural Topics in Literatures in English. 4 Units.**

Focuses on ethnic or minority literatures, or treats issues related to race and cultural identity.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Recommended: Upper-division students only.

**ENGLISH 106. Advanced Seminar: Topics in English Literature . 4 Units.**

Capstone course. Provides intensive work on a topic within the area of literatures in English with particular attention to the theoretical, critical, or conceptual issues it raises, with the goal of producing a substantive research paper.

Prerequisite: (ENGLISH 101W or WRITING 101W) and (ENGLISH 100 and 102A) or (ENGLISH 100 and 102B) or (ENGLISH 100 and 102C) or (ENGLISH 100 and 102D) or (ENGLISH 102A and 102B) or (ENGLISH 102A and 102C) or (ENGLISH 102A and 102D) or (ENGLISH 102B and 102C) or (ENGLISH 102C and 102D) or (ENGLISH 103 and 102A) or (ENGLISH 103 and 102B) or (ENGLISH 103 and 102C) or (ENGLISH 103 and 102D) or (ENGLISH 105 and 102A) or (ENGLISH 105 and 102B) or (ENGLISH 105 and 102C) or (ENGLISH 105 and 102D) or (ENGLISH 100 and 103) or (ENGLISH 103 and 105) or (ENGLISH 100 and 105).

Repeatability: Unlimited as topics vary.

Restriction: Seniors only. English Majors have first consideration for enrollment.

**ENGLISH 150. Topics in Literature for Nonmajors . 4 Units.**

Major texts in English, American, and Comparative Literature explored for basic humanistic issues and themes, on announced topics. Primarily for upper-division students, but not requiring previous training in literature.

Repeatability: Unlimited as topics vary.

Restriction: Recommended: Upper-division students only.

**ENGLISH 160. Topics in English Language Film and TV. 4 Units.**

Focuses on the analysis of film and/or television traditions in the English-speaking world, from a historical, theoretical, or comparative perspective.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Upper-division students only.

**ENGLISH 198. Special Topics. 4 Units.**

Directed group study of selected topics as arranged by instructor.

Repeatability: May be repeated for credit unlimited times.

**ENGLISH 199. Independent Study. 1-4 Units.**

To be taken only when the materials to be studied lie outside the normal run of departmental offerings, and when the student will have no formal chance to pursue the subject. Research paper required.

Repeatability: May be repeated for credit unlimited times.

**ENGLISH 210. Studies in Literary History. 4 Units.**

Studies in selected areas of literary history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**ENGLISH 225. Studies in Literary Genres. 4 Units.**

Studies in selected areas of literary genres. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**ENGLISH 230. Studies in Major Writers. 4 Units.**

Studies in selected areas of major writers. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**ENGLISH 255. Graduate Workshop in Academic Publishing. 4 Units.**

Reading and critique of student-authored essays with the goal of producing a publishable essay. Instructor leads discussion, meets with students individually, and provides an introduction to appropriate venues for publication and the process of submission, peer review, and revision.

Grading Option: Satisfactory/unsatisfactory only.

**ENGLISH 290. Reading and Conference. 4-12 Units.**

Studies in selected areas. Topics addressed vary each quarter.

Repeatability: May be repeated for credit unlimited times.

**ENGLISH 291. Guided Reading Course. 4 Units.**

Studies in selected areas. Topics addressed vary each quarter.

**ENGLISH 299. Dissertation Research. 4-12 Units.**

A units-only course for students in the dissertation phase.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**ENGLISH 398. Rhetoric/Teaching of Composition. 4 Units.**

Readings, lectures, and internship designed to prepare graduate students to teach composition. Formal instruction in rhetoric and practical work in teaching methods and grading.

**ENGLISH 399. University Teaching. 4 Units.**

A units-only course for students appointed as teaching assistants or associates.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Environmental Health, Science, and Policy (ENVIRON)

# Epidemiology (EPIDEM)

## Courses

### **EPIDEM 199. Undergraduate Research in Epidemiology. 2-4 Units.**

Provides disciplinary research participation. Original or existing research options provide undergraduates the opportunity for faculty/mentor interactions including access to appropriate facilities. Medical Epidemiology research areas: Cancer, Genetic/Molecular, Environmental, Occupational, Biostatistics, and Infectious Disease.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only.

### **EPIDEM 200A. Principles of Epidemiology. 4 Units.**

Fundamental principles of epidemiology, biostatistics, and epidemiological research. Topics include research methods of measuring health problems in populations, disease control and prevention in populations, how epidemiology contributes to knowledge of disease etiology, and biostatistical analysis and interpretation of epidemiologic data.

Same as PUBHLTH 206A.

Restriction: Graduate students only.

### **EPIDEM 200B. Intermediate Epidemiology. 4 Units.**

Learn to design and conduct epidemiologic studies using common designs. Determine why bias and measurement error arise in observational studies, and how they influence effect estimates. Perform and interpret epidemiologic data analyses using statistical software.

Prerequisite: PUBHLTH 206A. PUBHLTH 206A with a grade of B or better

Same as PUBHLTH 206B.

Restriction: College of Health Sciences students only. Program in Public Health students only. Master of Public Health Degree students only. Graduate students only. Epidemiology Majors only.

### **EPIDEM 200C. Advanced Epidemiologic Methods. 4 Units.**

Advanced topics in the design and statistical analysis of epidemiologic studies. Topics include simulation methods, counter-matching and multiphase study designs, missing data, and Bayesian analysis. Published simulation studies are discussed and replicated using the R software package.

Prerequisite: EPIDEM 200A and EPIDEM 200B. EPIDEM 200A with a grade of B or better. EPIDEM 200B with a grade of B or better

Same as PUBHLTH 206C.

### **EPIDEM 201. Cancer Epidemiology. 4 Units.**

Concentrates on understanding how epidemiology plays a role in the search for cancer etiology, prevention, control, and treatment; gives an overview of cancer research with an appreciation of the multidisciplinary nature of the field.

Prerequisite: EPIDEM 203 or PUBHLTH 203 or PUBH 206

Restriction: Graduate students only.

### **EPIDEM 202. Genetic Epidemiology. 4 Units.**

Concentrates on the role of genetic factors in the etiology of disease in human populations with an objective of disease control and prevention and the role of interactions of genetic factors and environmental exposures in the occurrence of disease.

Prerequisite: PUBHLTH 203 or EPIDEM 203 or PUBH 206

Restriction: Graduate students only.

### **EPIDEM 204A. Biostatistics I: Introduction to Statistical Methods. 4 Units.**

Designed to help students develop an appreciation for statistician's view of the research process, emphasizing biomedical research. Instills an understanding of how statistical models are used to yield insights about data that form evidence-based understanding of the world around us.

Same as PUBHLTH 204.

Restriction: Graduate students only.

**EPIDEM 204B. Biostatistics II: Intermediate Statistical Methods. 4 Units.**

Intended for graduate students in epidemiology, public health, and clinical research fields. Covers common regression-modeling techniques frequently used in biologic and medical applications.

Prerequisite: EPIDEM 204. EPIDEM 204 with a grade of B or better

Repeatability: May be taken for credit 2 times.

Same as PUBHLTH 204B.

Restriction: Graduate students only.

**EPIDEM 204C. Biostatistics III: Advanced Statistical Methods. 4 Units.**

Intended for graduate students in epidemiology, public health, and related fields. Introduces statistical methods for analyzing survival and longitudinal/clustered data, and techniques to resolve missing data.

Prerequisite: EPIDEM 204B. EPIDEM 204B with a grade of B or better

Repeatability: May be taken for credit 2 times.

Same as PUBHLTH 204C.

Restriction: Graduate students only.

**EPIDEM 205. Environmental Epidemiology. 4 Units.**

Concentrates on epidemiological approaches to the assessment of community environmental hazards; issues involved in environmental exposure estimation; interdisciplinary approaches to environmental epidemiology, including the use of biomarkers of exposures and susceptibility; epidemiological studies within the context of risk assessment.

Prerequisite: EPIDEM 200 and EPIDEM 204

Restriction: Graduate students only.

**EPIDEM 212. Methods for Design and Implementation of Epidemiologic Research. 2 Units.**

Intended for students in epidemiology, public health, and related fields, and covers topics in subject recruitment, data collection, quality assessment and control, and sample-size estimation.

Corequisite: PUBHLTH 206B

Prerequisite: EPIDEM 200A and EPIDEM 204A. EPIDEM 200A with a grade of B or better. EPIDEM 204A with a grade of B or better

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**EPIDEM 215. Introduction to Statistical Genetics. 4 Units.**

Provides students with knowledge of the basic principles, concepts, and methods used in statistical genetic research. Topics include principles of population genetics, and statistical methods for family- and population-based studies.

Prerequisite: Two quarters of upper-division or graduate training in statistical methods.

Same as STATS 257.

**EPIDEM 232. Chronic Disease Epidemiology & Prevention. 4 Units.**

Epidemiological aspects of chronic human diseases. Topics include methodologies for quantifying aspects of prevalent chronic diseases including risk factors, identification of susceptible groups, societal burdens, promising future research; and the intervention, prevention, and control of diseases in populations.

Restriction: Graduate students only.

**EPIDEM 244. Toxic Chemicals in Environment. 4 Units.**

Industrial ecology of toxicants and their impacts on environmental quality and human health. Explores theoretical basis of toxicity thresholds and regulatory issues. Uses classic and contemporary research articles to understand the legacy of traditional toxicants, and to identify emerging threats.

Restriction: Graduate students only.

**EPIDEM 264. Introduction to Environmental Health Science. 4 Units.**

Convergence of agents (chemical, physical, biological, or psychosocial) in environment can emerge as diseases influenced by social, political, and economic factors, allowing them to become rooted in society. How these agents from various spheres come together and impact human health.

Same as EHS 264, PUBHLTH 264.

Restriction: Graduate students only. Environmental Health Sciences Majors only. Epidemiology Majors only. Public Health Majors only. Environ Health Sci and Policy Majors only.

**EPIDEM 265. Advanced Environmental Health Science. 4 Units.**

Explores the complex relationships among exposure processes and adverse health effects of environmental toxins focusing on specific chemicals, sources, transport media, exposure pathways, and human behaviors. Techniques of environmental sampling for exposure assessment are discussed.

Same as PUBHLTH 265.

Restriction: Graduate students only.

**EPIDEM 269. Air Pollution, Climate, and Health. 4 Units.**

Emission of air pollutants into the atmosphere, physical and meteorological processes that affect transport, and influence on global warming. Concepts of how and where people are most exposed, and how exposures and health effects differ in developed and developing regions.

Same as EHS 269, PUBHLTH 269.

**EPIDEM 270. Human Exposure to Environmental Contaminants. 4 Units.**

Introduces founders of conceptual thought that environmental contaminants can impact health. Theory and principles of exposure assessment, the continuum from emissions of a contaminant into the environment to evidence of health effects in a population.

Same as EHS 270, PUBHLTH 270.

**EPIDEM 275. Special Topics in Epidemiology. 1-4 Units.**

Presents various topics and latest research in the broad field of epidemiology.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EPIDEM 280. Epidemiology Research Journal Club. 1 Unit.**

Research journal club is a group discussion of recent publications in epidemiology and related fields. Students rotate as lead discussants, guided by faculty. All attendees are expected to be familiar with the papers at the start of class.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EPIDEM 282. Epidemiology Department Seminar. 1 Unit.**

A forum for the presentation of recent research to epidemiology students, faculty, and other interested parties. The atmosphere is informal, yet rigorous. Speakers range from graduate students through distinguished visitors from other institutions.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EPIDEM 290. Introduction to Biostatistics and Epidemiology for Medical Fellows. 4 Units.**

Prepares medical fellows and other physicians for rotations in research programs. Understanding of basic biostatistics and study design, and interdependencies between the two. Application of principles in evaluation of medical literature for guidance on patient care and public health policy.

Prerequisite: Medical degree.

**EPIDEM 296. M.S. Thesis Research and Writing. 1-12 Units.**

Individual research and study necessary for a graduate student to prepare and complete the thesis required for the Master of Science (M.S.) degree.

Prerequisite: Advancement to candidacy.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EPIDEM 297. PhD Degree Dissertation Research & Writing. 1-12 Units.**

Individual research and study necessary for a graduate student to prepare and complete the dissertation required for the Doctor of Philosophy (Ph.D.) degree.

Prerequisite: Advancement to candidacy.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EPIDEM 298. Directed Study in Epidemiology. 2-4 Units.**

Directed study with Epidemiology faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EPIDEM 299. Independent Study in Epidemiology. 2-8 Units.**

Independent research with Epidemiology faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EPIDEM 399. University Supervised Teaching. 2-4 Units.**

Limited to students with active Teaching Assistant (T.A.) appointments.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## European Studies (EURO ST)

### Courses

**EURO ST 9. Topics in Europe in the Middle Ages. 4 Units.**

Explores the literature, history, and thought of the European Middle Ages. Topics may include understandings of self and community, aristocratic power and courtly life, colonialism, crusading, religious beliefs and persecution, monasticism and reform, university culture, epic literature, and Arthurian romance.

Repeatability: Unlimited as topics vary.

(IV and VIII ).

**EURO ST 10. Topics in Historical Foundations (1500-1800). 4 Units.**

Offers an overview of the European experience from its social, political, and cultural foundations to modern European issues and institutions in a globalized world. Topics include social, political, and cultural history up to the French Revolution.

Repeatability: Unlimited as topics vary.

Overlaps with EURO ST S10.

((III or IV) and VIII ).

**EURO ST S10. Historical Foundations: Europe and the Foundations of the Modern World. 4 Units.**

Encompasses a variety of perspectives in the social sciences and the humanities involving crucial developments coming out of Europe from roughly 1500 to 1800, (the Protestant Reformation through the French Revolution), that helped shape the modern (western) world.

Overlaps with EURO ST 10.

((III or IV) and VIII ).

**EURO ST 11. Issues and Institutions in Modern Europe (1789-1945). 4 Units.**

Offers an overview of modern European societies in social, political, and cultural terms. Topics include shifting geopolitical borders, social movements, and various forms of cultural expression (film, art, literature) as they intersect with and shape issues and events after 1800.

Repeatability: Unlimited as topics vary.

((III or IV) and VIII ).

**EURO ST S11. Europe's Futures: 1755-Present. 4 Units.**

Introduces students to competing approaches from humanities and social sciences to conceptualizing the future in politics, art, and literature. From the enlightenment to today, investigates the cultural and political context of moments when new ideas emerged to secure Europe's futures.

Overlaps with EURO ST 11.

((III or IV) and VIII ).

**EURO ST 12. What is the Origin of Language?. 4 Units.**

Teaches symbol-based logic and universal grammar in human language as tools to investigate the origin of language. Does language originate with reason? Is language inherently universal or diverse? Does it begin as something literal or figurative.

((III or IV) and Vb ).

**EURO ST 13. Topics in Contemporary Europe (1945 – Today). 4 Units.**

Offers a perspective on contemporary politics and social and cultural life of today's Europe. Introduces students to literature, film, and social theory crises of the contemporary world as they emanated from World War II, such as nationalism and populism.

Repeatability: Unlimited as topics vary.

(IV and VIII ).

**EURO ST 101A. European Studies Core I - Early Europe (Pre-1789). 4 Units.**

Introduction to multidisciplinary approaches to important themes in European society, culture, art, literature, and politics; encourages students to explore intersections among disciplines. Possible themes: Concept of Europe in Renaissance, Self and Other: Europe and Islam, Hybrid Cultures in Medieval Europe.

Repeatability: Unlimited as topics vary.

**EURO ST 101B. European Studies Core II: Modern Europe (Post-1789). 4 Units.**

Multidisciplinary approaches to important themes in modern European society, culture, art, literature, and politics, encouraging students to see points of intersection among disciplines. Possible themes: Subjects, Citizens, and Representation; Europe in the World; European Revolutions in Art and Society.

Repeatability: Unlimited as topics vary.

**EURO ST 102. Topics in Early European History and Culture: Pre-1789. 4 Units.**

Addresses historical and cultural events, issues, and texts (art, literature, music, political theory) from the pre-1789 period in more than one European country.

Repeatability: Unlimited as topics vary.

**EURO ST 103. Topics in Modern European History and Culture: Post-1789. 4 Units.**

Addresses historical and cultural events, issues, and texts (art, literature, music, political theory) from 1789 to present in more than one European country.

Repeatability: Unlimited as topics vary.

**EURO ST 190W. Senior Seminar in European Studies. 4 Units.**

Capstone research seminar. Students engage in rigorous, in-depth, interdisciplinary exploration of specific topics, periods, or themes, investigating and analyzing the intersection of material and discursive culture in different historical periods and geographical locations.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: School of Humanities students only.

(Ib)

**EURO ST 199. Independent Study. 1-4 Units.**

Directed reading and research in consultation with a faculty advisor. Substantial written work required.

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**EURO ST 200A. Core Seminar I: Foundations of European Thought and Culture. 4 Units.**

Provides a historical, geographical, and methodological overview of foundational texts and issues in European thought and culture. Covering several historical periods between the Middle Ages and the present, students will see how ideas and institutions change over time.

**EURO ST 200B. Core Seminar II: Theorizing Periods and Movements in European Thought and Culture. 4 Units.**

Periods and movements still form basic units for organizing European thought and theory, even as such categories are problematized. This course will allow for greater focus on a specific time period or constellation of issues around a period or movement.

**EURO ST 200C. Core Seminar III: European Thought and Culture Beyond Europe. 4 Units.**

Studies the intersection and afterlives of European thought and culture with and in non-European contexts, the way European thought and culture has been translated and transformed, taken up and challenged, in colonial, postcolonial, and other global situations.

**EURO ST 201. Topics in European Studies. 4 Units.**

Seminars on various topics related to European Studies.

Repeatability: Unlimited as topics vary.

**EURO ST 299. Independent Research. 4 Units.**

For students to do independent research with advisors on their master's thesis or master's examination reading lists.

Restriction: Graduate students only. School of Humanities students only.

## Executive MBA (MGMT EP)

### Courses

**MGMT EP 200. Thinking Strategically in the Digital Age for Executives. 6 Units.**

Focuses on the strategic and organizational challenges that a rapidly changing environment poses to the firm's management and frames them according to Merage's strategic emphasis on analytical decision making, innovation, and information technology.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Administration - Executive Majors only.

**MGMT EP 201A. Business Analytics: Decision-Making for Executives. 4 Units.**

Methods of statistical inference, emphasizing applications to administrative and management decision problems. Topics include classical estimation, hypothesis testing, regression, correlation, analysis of variance, decision analysis, and forecasting.

Restriction: Graduate students only. Administration - Executive Majors only.

**MGMT EP 202. Organizational Leadership for Executives. 4 Units.**

Develops a better understanding of individual and group behavior in and across organizations, and the frameworks by which to analyze and understand behavior in complex organizations. Enhances the skills required to manage collaboration and lead. Every other weekend course.

Restriction: Graduate students only. Administration - Executive Majors only.

**MGMT EP 203A. Financial Reporting Policies for Executives. 4 Units.**

Involves the development, analysis, and interpretation of financial accounting information for external reporting purposes. Emphasis on measurement and valuation issues in decision-making problems and cases. Every other weekend course format.

Restriction: Graduate students only. Administration - Executive Majors only.

**MGMT EP 203B. Managerial Accounting for Executives. 4 Units.**

Involves developing and using internal financial and non-financial information to help organizations make planning, budgeting, control, operating, and performance evaluation decisions. Every other weekend course format.

Prerequisite: MGMT EP 203A. MGMT EP 203A with a grade of C or better

Restriction: Graduate students only. Administration - Executive Majors only.

**MGMT EP 204A. Microeconomics for Executives in the Digital Age. 4 Units.**

Provides basic tools for analyzing economic decisions of consumers and firms. Topics include demand and supply analysis, production and cost theory, perfect competition, monopoly, market failures, and introductory game theory. Every other weekend course format.

Restriction: Graduate students only. Administration - Executive Majors only.

**MGMT EP 204B. Macroeconomics for Executives. 4 Units.**

Introduces use of macroeconomic analysis to manage the business cycle for competitive advantage. 'Business cycle-sensitive' management is explored within the context of marketing, operations management, HRM, merger and acquisition activity, and capital financing and expenditures. Every other weekend course format.

Prerequisite: MGMT EP 204A. MGMT EP 204A with a grade of C or better

Restriction: Graduate students only. Administration - Executive Majors only.

**MGMT EP 205. Marketing Leadership. 4 Units.**

Introduction to marketing. Topics include developing familiarity with fundamental marketing concepts, theories, and techniques; acquainting students with the type of decisions made by executives, including customer targeting, product, pricing, place, promotion, and research. Every other weekend course format.

Restriction: Graduate students only. Administration - Executive Majors only.

**MGMT EP 207. Competing with Digital: Technology, Analytics, Business Models. 4 Units.**

Focuses on how information technology is used to create value in organizations through product, process, and strategy innovation. Aims to help managers understand the strategic role of key information technologies in managing organizations. Every other weekend course format.

Restriction: Graduate students only. Administration - Executive Majors only.

**MGMT EP 208. Operational Excellence: Processes, Strategy, and Analytics. 4 Units.**

Introduction to strategic and tactical issues in production and operations management. A blend of quantitative and qualitative considerations. Topics include product planning, process design, capacity management, production planning, inventory control, just-in-time manufacturing, and quality management. Every other weekend course format.

Restriction: Graduate students only. Administration - Executive Majors only.

**MGMT EP 209A. Managerial Finance for Executives. 4 Units.**

Introduces students to financial theory and concepts. Topics include time value of money, valuation of stocks and bonds, capital budgeting, portfolio theory, and capital structure choice. Every other weekend course format.

Prerequisite: MGMT EP 201A and MGMT EP 203A and MGMT EP 204A. MGMT EP 201A with a grade of C or better. MGMT EP 203A with a grade of C or better. MGMT EP 204A with a grade of C or better

Restriction: Graduate students only. Administration - Executive Majors only.

**MGMT EP 210. Strategy for Executives: Foundations and Dynamics . 4 Units.**

Provides conceptual frameworks and techniques to analyze and develop firm strategies. Through case analysis/discussion, helps improve strategic thinking by developing frameworks by which to assess, evaluate, and respond to different business situations. Every other weekend course format.

Prerequisite: MGMT EP 200 and MGMT EP 202 and MGMT EP 205 and MGMT EP 209A. MGMT EP 200 with a grade of C or better. MGMT EP 202 with a grade of C or better. MGMT EP 205 with a grade of C or better. MGMT EP 209A with a grade of C or better

Restriction: Graduate students only. Administration - Executive Majors only.

**MGMT EP 219. Practice of General Management for Executives. 4 Units.**

Teaches the graduating MBA how the best managers actually manage. Students develop a toolkit of proven concepts and practices that will help them succeed as managers at any level.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT EP 225. Negotiations For Executives. 4 Units.**

Using a combination of theory and practice via negotiation simulations, students expand their repertoire of negotiating skills and develop their ability to analyze different negotiation situations and contexts. Every other weekend course format.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT EP 290. Special Topics in Business. 2-4 Units.**

Studies in selected areas of business. Topics addressed vary each quarter.

Repeatability: May be repeated for credit unlimited times.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT EP 295A. Global Business I for Executives. 4 Units.**

Fundamentals of global strategy, economics, and financial issues. Topics include global manager's environment, global strategy, impact of national culture on business systems, strategies and practices, foreign direct investment, corporate governance, human resources, and international marketing. Every other weekend course format.

Restriction: Graduate students only. Administration - Executive Majors only.

**MGMT EP 295B. Global Business II for Executives. 4 Units.**

Emphasizes and reinforces international perspectives contained in the M.B.A. curriculum by providing a week-long intensive seminar abroad in the second year. Scholars and business people from the host country instruct Executive M.B.A. students in designed class sessions and company visits.

Restriction: Graduate students only. Administration - Executive Majors only.

**MGMT EP 296. Executive Leadership. 4 Units.**

Focuses on the conceptual, practical, and personal dimensions of executive leadership. Past and current leadership theories are addressed. Individual personal assessment and diagnosis. Every other weekend course format.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Administration - Executive Majors only.

**MGMT EP 299. Individual Study. 1-8 Units.**

Individual Study under the direction of a selected faculty member.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Master of Business Admin Degree students only.

## Family Medicine (FAM MED)

## Film and Media Studies (FLM&MDA)

### Courses

**FLM&MDA H80. Honors Seminar: Race Sport Media. 4 Units.**

Honors seminar examining the intersection of race, sports, and media in everyday U.S. popular culture (film, TV, advertising, gaming, social media) and political culture. Materials fee.

Restriction: Campuswide Honors Collegium students only.

(IV and VII ).

**FLM&MDA 85A. Introduction to Film and Visual Analysis. 4 Units.**

Introduces the language and techniques of visual and film analysis. Teaches students to analyze the moving image; emphasize framing, camera movement, and sound; and conveys how editing produces meaning, reproduces historical ideologies, fosters or disrupts narrative, and cues spectators.

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

(IV)

**FLM&MDA 85B. Broadcast Media History and Analysis. 4 Units.**

History of broadcast media from the radio era to the present day, including social, political, institutional, and audience analysis as well as methods of visual and aural analysis of these media.

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

(IV)

**FLM&MDA 85C. New Media and Digital Technologies. 4 Units.**

The study of digital media, computer-mediated communication, and Internet cultures, from historical and theoretical perspectives.

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

**(IV)****FLM&MDA 101A. History of Film I: The Silent Era. 4 Units.**

The aesthetic, industrial, and socio-historical developments of cinema in the U.S. and internationally from its invention to the adoption of synchronous sound. Includes early exhibition, developments in narrative and editing, the formation of the studio system, and avant-garde film movements. Materials fee.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 101B. History of Film II: The Studio Era. 4 Units.**

The aesthetic, industrial, and socio-historical developments of cinema in the U.S. and internationally from the 1930s through the 1960s. Includes the Hollywood studio system, propaganda films, Italian neorealism, post-war Japanese cinema, and the French New Wave. Materials fee.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 101C. History of Film III: The Contemporary Era. 4 Units.**

The aesthetic, industrial, and socio-historical developments of cinema in the U.S. and internationally from the late 1960s to the present. Includes New Hollywood and independent U.S. films, ethnic cinemas, postcolonial cinemas, East-Asian new waves, and digital filmmaking. Materials fee.

Prerequisite: FLM&MDA 85A and FLM&MDA 101B. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 110. Film and Media Theory. 4 Units.**

Survey of major directions in film and media theory. Various theories of mass culture, realism, auteurism, semiotics, feminism, cultural studies, and theories of other media, with an emphasis on developing the student's ability to analyze and articulate a theoretical argument. Materials fee.

Prerequisite: FLM&MDA 85A and FLM&MDA 85B and FLM&MDA 85C and (FLM&MDA 101A or FLM&MDA 101B or FLM&MDA 101C). Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 111. Film and Media Theory and Practice. 4 Units.**

Seminar focusing on issues in film and media production and editing. Reading and exercises to understand aspects of film and media production (montage, sound, film movement, directing, and mise en scène), and how ideology works in tandem with style.

Prerequisite: FLM&MDA 85A and FLM&MDA 85B and FLM&MDA 85C and FLM&MDA 120A and (FLM&MDA 101A or FLM&MDA 101B or FLM&MDA 101C). Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 112. Genre Study . 4 Units.**

Critical approaches to the serial productions we call 'genre' films such as westerns, weepies, musicals, horror films, and others; televisual genres, such as sitcoms, drama, comedy, news, docudrama, police; Internet categories, such as chat-rooms, listservs, Web pages.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 113. Narrative/Image . 4 Units.**

What relations do sound, image, and story assume in film, television, video, and Internet narratives? In what ways do these media interact with and borrow from each other and traditional story-telling media? How have the new media explored non-narrative strategies.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 114. Film, Media, and the Arts. 4 Units.**

A synthetic entity, film draws on both established and popular arts. Looks at visual media's exchanges with 'high' and 'low' culture, exploring its relation to areas such as photography, music, painting, and architecture.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 115. Authorship . 4 Units.**

Theoretical and analytical discussions of visual media authorship, focusing on case studies of directors, producers, scriptwriters, and film, video, and digital artists.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 117A. Introduction to Screenwriting. 4 Units.**

Introduction to the technique and format of the screenplay, with a particular focus on its three act structural elements: coverage, treatment, and 60 beat outline. Materials fee.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 117B. Intermediate Screenwriting. 4 Units.**

Exercises in the development of screenplays, with emphasis on formal and structural considerations of character development. Students work with the hero structure and other character development methodologies, such as method acting. Materials fee.

Prerequisite: FLM&MDA 117A. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 117C. Screenwriting Workshop. 4 Units.**

Continuation and intensification of work initiated in 117B. Students complete a full-length screenplay. Concentrates on both practical and technical concerns, addressing pragmatic and aesthetic questions in intensive small-group discussions. Materials fee.

Prerequisite: FLM&MDA 117B. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 118A. Writing Television I. 4 Units.**

Introduction to the technique and format of the television screenplay. Focuses on character, storytelling, structure, and scene development; culminating in a one-hour drama series treatment and first act of the pilot.

Prerequisite: FLM&MDA 85B. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 118B. Writing Television II. 4 Units.**

Intermediate-level screenwriting class exploring the one-hour television drama format. Students write and workshop an original pilot, continuing work started in 118A, and finish a complete draft of the pilot script.

Prerequisite: FLM&MDA 118A. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 120A. Basic Production. 4 Units.**

Introduction to the basic apparatus of video/film production. The elementary essentials of production, including the use of camera and lenses, lighting, editing, and sound. Materials fee.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 120B. Intermediate Production. 4 Units.**

Students work on individual and group projects, utilizing skills and insights introduced in Film and Media Studies 120A. Materials fee.

Prerequisite: FLM&MDA 120A. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 120C. Production Workshop. 4 Units.**

As film and video are collaborative media, students form production groups and ultimately produce final 10-15-minute film/video projects. Materials fee.

Prerequisite: FLM&MDA 120B. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 130. Multicultural Topics in the Media. 4 Units.**

Investigation of media representations of gender, race, and sexuality in the United States. Topics include media images of and by one or more minority groups in the United States, including African Americans, Asian Americans, Chicano/Latinos, Native Americans, gays, and lesbians.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 139W. Writing on Film and Media. 4 Units.**

Writing on cinema, television, and/or digital culture, emphasizing identification of reliable sources, close readings, addressing academic, professional, and/or popular audiences. Requires at least 4,000 words of assigned composition.

Prerequisite: FLM&MDA 85A or FLM&MDA 85B or FLM&MDA 85C. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Film and Media Studies Majors only.

(Ib)

**FLM&MDA 143. Critical Theory of Television. 4 Units.**

Introduction to critical, theoretical, and scholarly understandings and analyses of television, which offer in-depth analyses of television programming, audience reception practices, and industry strategies of address.

Prerequisite: FLM&MDA 85B. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 144. Studies in New Media. 4 Units.**

Advanced analysis of the technologies, texts, theories, and cultures of computers, video games, networks, or platforms.

Prerequisite: FLM&MDA 85C. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 145. Popular Culture and Media. 4 Units.**

Considers the forms, ideologies, consumption, and marketing of popular entertainment and technologies. May focus on cultural studies methods, transnational approaches, and synergy between media.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 146. Sound Studies. 4 Units.**

Focuses on the production, theories, and meanings of sound recordings, music, and/or audio technologies. Topics may include the cultures of popular music and audio devices, music television, and theories of film sound.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 150. Audiences and Reception. 4 Units.**

Explores the dynamics of address, interpretation, and appropriation between film and media texts and their viewers. Topics may include reception studies, fandom, audience-defined modes of production, demographics, spectatorial pleasure, and historical approaches to audiences.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 151. Documentary and Experimental Film and Media. 4 Units.**

Examines nonfiction and/or experimental cinemas and media, such as documentary, the historical avant-garde, video art, and activist media. Students consider the specific aesthetics and ideologies of forms distinct from narrative feature films.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 160. National/Regional Cinemas and Media. 4 Units.**

National schools, period styles, or cultural movements beyond U.S. cinema, as defined by national borders or by geographic regions, such as Latin America. May be approached from a comparative perspective.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 161. Global/Transnational Cinemas and Media. 4 Units.**

Analyzes the multinational production, circulation, and reception of film and media texts beyond singular national borders or specific geographic regions. Topics may include transnational co-productions, exports, and diasporic reception.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 162. US Cinema . 4 Units.**

Explores the modes of production and distribution, aesthetics, and contexts that have shaped cinema in the United States. Topics may include classical Hollywood, American independent cinema, or periods such as 1970s cinema.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 185. Television and New Media. 4 Units.**

Advanced seminar focusing on special topics in television and new media. Past examples have included courses on media marketing and brand identity; television and sound; game theory; and other issues related to popular culture, broadcast media, and new media technologies.

Prerequisite: FLM&MDA 85B or FLM&MDA 85C. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 190. Special Topics in Film and Modern Media. 4 Units.**

Special issues concerned with film and media history, theory, and criticism.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 191. Special Topics in Critical Practice. 4 Units.**

Integrates critical analysis, historical, and theoretical methods with creative projects to illuminate film and media production and industries. May include courses in adaptation, writing television, media activism, writing the short film, performance studies, and movie title sequences.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 192. Special Topics in Advanced Film Production. 4 Units.**

Focuses on special topics in production. Culminates in final 6-10-minute group film projects. Topics include producing, acting, and/or directing in short films, experimental films, documentaries, television, and other media.

Prerequisite: FLM&MDA 120A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 193. Special Topics in Advanced Screenwriting. 4 Units.**

Focuses on special topics in screenwriting. Topics include adaptation, alternative screenwriting, writing the first feature, act two construction, and rewriting.

Prerequisite: FLM&MDA 117A or FLM&MDA 118A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 197. Professional Internship. 2-4 Units.**

Professional internship in the film, broadcast, and/or digital media industries designed to provide students with closely supervised professional experience to enhance their understanding of media from industrial, historical, and critical perspectives. Journal and final report required.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

Restriction: Upper-division students only.

**FLM&MDA 198. Creative Project. 2-4 Units.**

Creative project in screenwriting, filmmaking, videomaking, or Web or internet design intended to provide advanced production and creative writing training beyond the Film and Media Studies 117A-B-C or 120A-B-C series. Final project required.

Prerequisite: (FLM&MDA 85A and FLM&MDA 117A and FLM&MDA 117B and FLM&MDA 117C) or (FLM&MDA 120A and FLM&MDA 120B and FLM&MDA 120C). Satisfactory completion of the Lower-Division Writing requirement. Recommended: FLM&MDA 101A.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Upper-division students only.

**FLM&MDA 199. Directed Research. 4 Units.**

Directed reading and research under supervision of a faculty member in topic areas not covered by regular course offerings. Final research paper required.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only.

**FLM&MDA 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## Film and Media Studies (see FLM&MDA) (FILMSTD)

## Finance (FIN)

### Courses

**FIN 203A. Financial Reporting for Management. 4 Units.**

Financial reporting is concerned with the preparation and public dissemination of financial reports designed to reflect corporate performance and financial condition. Provides a base level of knowledge needed by corporate executives to understand and discuss corporate financial statements.

Restriction: Master of Finance Degree students only. Graduate students only.

**FIN 209B. Investments Management. 4 Units.**

Introduction to how securities are traded and how their prices are determined. Discussion of different market organizations, including some recently developed online financial markets. Study of pricing models, including Capital Asset, factor models, and Arbitrage Pricing Theory.

Restriction: Master of Finance Degree students only. Graduate students only.

**FIN 210. Foundations of Finance. 4 Units.**

Examines foundations of finance. Teaches tools such as time value of money, capital budgeting techniques, cash flow analysis. Examines foundations of investment management and theory/empirical evidence related to portfolio theory, market efficiency, asset pricing models, factor models, option pricing theory.

Restriction: Master of Finance Degree students only.

**FIN 211. Master of Finance ProSeminar.**

Provides students in the Merage School Master of Finance program with information and practical skills for success in the program and for business career planning.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Master of Finance Degree students only.

**FIN 240. Financial Research Methodology. 4 Units.**

Provides an introduction into the computational research methods necessary in modern finance, such as optimization, simulation methods, and finite difference and finite element methods. Some applications include quadratic programming for portfolio selection and option pricing.

Restriction: Master of Finance Degree students only.

**FIN 241. Risk Management. 4 Units.**

Examines modern techniques for managing financial risks, including market, credit, liquidity, and operational risks. Covers measurement techniques for different financial risks and instruments. Discusses how risk measurement tools can be used for management of the risk/return profile of financial institutions.

Prerequisite: FIN 249. FIN 249 with a grade of C or better

Restriction: Master of Finance Degree students only. Graduate students only.

**FIN 242. Portfolio Management. 4 Units.**

Provides a working understanding of the themes and concepts of portfolio management. Covers several disciplines, such as investment valuation, investment decision-making, investing styles, asset allocation, monitoring and re-balancing portfolios, risk management strategies, performance evaluation, and attribution analysis.

Restriction: Master of Finance Degree students only.

**FIN 243. Bonds and Fixed Income. 4 Units.**

Addresses concepts covering a broad spectrum of debt securities with emphasis on qualitative and quantitative analysis of fixed income securities in many areas, including corporate (credit) debt, MBS/ABS, structured debt, and credit derivatives.

**FIN 244. Multinational Finance. 4 Units.**

Examines the history of the world's foreign exchange markets, the macroeconomics of foreign exchange, major parity conditions, hedging of currency exposure and international investment. Gives students a basic understanding of foreign exchange market.

**FIN 246F. Seminar in Management of the Real Estate Enterprise. 4 Units.**

Capstone seminar. Looks beyond "The Deal" to management of the real estate enterprise itself. Explores aspects of decision-making focused upon strategic objectives: goal setting, legal/tax structures, public vs. closely-held entities, corporate ethics, capital structure, managing growth, diversification, technology. Guest professionals.

Restriction: Master of Finance Degree students only. Graduate students only.

**FIN 246G. Applied Real Estate Security Analysis and Portfolio Management. 4 Units.**

Provides an understanding of the public real estate investment trust (REIT) market and its place in modern investment strategies, presents methods for analyzing and valuing companies, and introduces basic concepts for constructing and managing a real estate investment portfolio.

Restriction: Master of Finance Degree students only. Graduate students only.

**FIN 247. Cases in Corporate Financial Management. 4 Units.**

Case-based course in corporate finance. Introduces advanced analytical tools and techniques for value-based financial management in a broad range of corporate settings, including financial forecasting, mergers and acquisitions, leveraged buyouts, ownership and control, corporate restructuring, and financial distress.

Restriction: Master of Finance Degree students only.

**FIN 248. Corporate Valuation. 4 Units.**

Expands on concepts covered in introductory finance. Combines lectures and cases designed to confront students with real-world problems to enhance their understanding of the value and limitations of finance theory. Focuses on the value of firms/projects in diverse settings.

Prerequisite: FIN 210. FIN 210 with a grade of C or better

Restriction: Master of Finance Degree students only.

**FIN 249. Derivatives. 4 Units.**

Covers major derivative instruments that are widely used for hedging, including forward, futures, swaps and options, speculation, and arbitrage. Focuses on understanding the instruments, how to use and price them, basic risk management principles, and how to implement investment strategies.

Restriction: Master of Finance Degree students only.

**FIN 250. Mergers and Acquisitions. 4 Units.**

Focuses on mastering mergers and acquisitions concepts and techniques that will enable participants to practically apply them in related fields such as investment banking, consulting, and corporate development. Studies drivers of success in M&A with heavy attention on transactional review.

Restriction: Master of Finance Degree students only.

**FIN 251. Behavioral Finance. 4 Units.**

Describes the scientific evidence about where misvaluation comes from, how investors can trade profitably to exploit market inefficiency, how corporate managers should make financing and investment decisions in an inefficient market, and how managers can correct biases to avoid mistakes.

Restriction: Master of Finance Degree students only.

**FIN 252. Wealth Management. 4 Units.**

Provides overview of considerations needed to connect singular functional areas that comprise personal and business wealth management, including basic and advanced estate planning, investment management, tax management, life/liability and property/casualty insurance, medical and long-term care coverage, retirement and philanthropy considerations.

Restriction: Graduate students only.

**FIN 253. Venture Capital and Private Equity. 4 Units.**

Overview of venture capital and private equity, which constitute the "alternative" asset class (as opposed to conventional investments). Many start-up and entrepreneurial firms require substantial capital, and venture capital and private equity organizations finance these high-risk but potentially high-reward companies.

Restriction: Master of Finance Degree students only.

**FIN 254. Advanced Derivatives. 4 Units.**

Describes the scientific evidence about where misvaluation come from, how investors can trade profitably to exploit market inefficiency, how corporate managers should make financing and investment decisions in an inefficient market, and how managers can correct their own biases.

Prerequisite: FIN 249. FIN 249 with a grade of C or better

Restriction: Master of Finance Degree students only.

**FIN 255. Finance Internship. 2-4 Units.**

Provides students with opportunities to apply knowledge obtained from classroom theory through actual practical work experiences. Also provides knowledge of career opportunities, understanding of finance in business environments, and preparation for the finance profession.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Master of Finance Degree students only.

**FIN 290. Special Topics in Finance. 4 Units.**

Studies in selected areas of finance. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**FIN 296. Master of Finance Capstone. 4 Units.**

Students work in teams on an applied finance project associated with their area of focus to demonstrate knowledge and expertise. The project can involve experiential learning, collaboration with a faculty member, or association with an internship.

Restriction: Master of Finance Degree students only.

**FIN 299. Individual Study. 1-4 Units.**

Individual study under the direction of a select faculty member.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## French (FRENCH)

### Courses

**FRENCH 1A. Fundamentals of French. 5 Units.**

First quarter of first-year French in a hybrid format. Students are taught to conceptualize in French as they learn to understand, read, write, and speak. Classes are conducted entirely in French.

Overlaps with FRENCH S1AB, FRENCH 1AB, FRENCH 1ABSP.

**FRENCH 1AB. Intensive Fundamentals of French. 7.5 Units.**

Intensive first half of first-year French. Students are taught to conceptualize in French as they learn to read, write, and speak. Students develop an awareness of and sensibility to French and Francophone life and culture through reading, viewing, and discussion.

Overlaps with FRENCH 1A, FRENCH 1B, FRENCH S1AB.

**FRENCH 1ABSP. Accelerated Fundamentals of French for Spanish Speakers. 5 Units.**

Accelerated first half of first-year French for Hispanophone students. Teaches conceptualizing in French while learning to read, write, and speak using knowledge of Spanish. Develops awareness of and sensibility to French and Francophone life and culture through reading, viewing, discussing.

Prerequisite: Two years of high school Spanish, one semester of college Spanish, or heritage speaker of Spanish.

Overlaps with FRENCH 1A, FRENCH 1AB, FRENCH S1AB, FRENCH 1B.

**FRENCH 1B. Fundamentals of French. 5 Units.**

First quarter of first-year French in a hybrid format. Students are taught to conceptualize in French as they learn to understand, read, write, and speak. Classes are conducted entirely in French.

Prerequisite: FRENCH 1A. FRENCH 1A with a grade of C or better

Overlaps with FRENCH S1AB, FRENCH S1BC, FRENCH 1AB, FRENCH 1BC, FRENCH 1ABSP, FRENCH 1BCSP.

**FRENCH 1BC. Intensive Fundamentals of French. 7.5 Units.**

Intensive second half of first-year French. Students are taught to conceptualize in French as they learn to read, write, and speak. Students develop an awareness of and sensibility to French and Francophone life and culture through reading, viewing, and discussion.

Prerequisite: FRENCH 1AB or FRENCH 1B or FRENCH S1AB. FRENCH 1AB with a grade of C or better. FRENCH 1B with a grade of C or better. FRENCH S1AB with a grade of C or better. Placement into FRENCH 1BC is also accepted.

Overlaps with FRENCH 1B, FRENCH 1C, FRENCH S1BC.

**(VI)****FRENCH 1BCSP. Accelerated Fundamentals of French for Spanish Speakers. 5 Units.**

Accelerated second half of first-year French for Hispanophone students. Teaches conceptualizing in French while learning to read, write, and speak using knowledge of Spanish. Develops awareness of and sensibility to French and Francophone life and culture through reading, viewing, discussing.

Prerequisite: FRENCH 1ABSP or FRENCH 1AB or FRENCH S1AB or FRENCH 1B. FRENCH 1ABSP with a grade of C or better. FRENCH 1AB with a grade of C or better. FRENCH S1AB with a grade of C or better. FRENCH 1B with a grade of C or better. Two years of high school Spanish, one semester of college Spanish, or heritage speaker of Spanish.

Overlaps with FRENCH 1B, FRENCH 1BC, FRENCH S1BC, FRENCH 1C.

**(VI)****FRENCH 1C. Fundamentals of French. 5 Units.**

First quarter of first-year French in a hybrid format. Students are taught to conceptualize in French as they learn to understand, read, write, and speak. Classes are conducted entirely in French.

Prerequisite: FRENCH 1B. FRENCH 1B with a grade of C or better

Overlaps with FRENCH S1BC, FRENCH 1BC, FRENCH 1BCSP.

**(VI)****FRENCH S1AB. Intensive Fundamentals of French. 7.5 Units.**

First half of first-year French in an intensified form and hybrid format. Students are taught to conceptualize in French as they learn to understand, read, write, and speak. Classes are conducted entirely in French.

Overlaps with FRENCH 1A, FRENCH 1B, FRENCH 1AB, FRENCH 1ABSP.

**FRENCH S1BC. Intensive Fundamentals of French. 7.5 Units.**

Second half of first-year French in an intensified form and hybrid format. Students are taught to conceptualize in French as they learn to understand, read, write, and speak. Classes are conducted entirely in French.

Prerequisite: FRENCH S1AB or FRENCH 1B or FRENCH 1AB or FRENCH 1ABSP. FRENCH S1AB with a grade of C or better. FRENCH 1B with a grade of C or better. FRENCH 1AB with a grade of C or better. FRENCH 1ABSP with a grade of C or better

Overlaps with FRENCH 1B, FRENCH 1C, FRENCH 1BC, FRENCH 1BCSP.

**(VI)****FRENCH 2A. Intermediate French. 4 Units.**

Texts of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in French.

Prerequisite: FRENCH 1C or FRENCH 1BC or FRENCH S1BC or FRENCH 1BCSP. FRENCH 1C with a grade of C or better. FRENCH 1BC with a grade of C or better. FRENCH S1BC with a grade of C or better. FRENCH 1BCSP with a grade of C or better. Placement into FRENCH 2A is also accepted.

Overlaps with FRENCH S2AB.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)****FRENCH 2AB. Intensive Intermediate French . 6 Units.**

Intensive first half of second-year French. Texts and films of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in French.

Prerequisite: FRENCH 1C or FRENCH 1BC or FRENCH S1BC. FRENCH 1C with a grade of C or better. FRENCH 1BC with a grade of C or better. FRENCH S1BC with a grade of C or better. Prior high school or college French is recommended. Placement into French 2AB is also accepted.

Overlaps with FRENCH 2A, FRENCH 2B, FRENCH S2AB.

**(VIII)****FRENCH 2B. Intermediate French. 4 Units.**

Texts of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in French.

Prerequisite: FRENCH 2A. FRENCH 2A with a grade of C or better

Overlaps with FRENCH S2AB, FRENCH S2BC.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment. FRENCH 2B and FRENCH S2AB and FRENCH S2BC may not be taken for full credit.

**(VIII)****FRENCH 2BC. Intensive Intermediate French . 6 Units.**

Prerequisite: FRENCH S2AB or FRENCH 2AB. FRENCH S2AB with a grade of C or better. FRENCH 2AB with a grade of C or better. Prior high school or college French is recommended. Placement into French 2BC is also accepted.

Overlaps with FRENCH S2BC, FRENCH 2B, FRENCH 2C.

**(VIII)**

**FRENCH 2C. Intermediate French. 4 Units.**

Texts of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in French.

Prerequisite: FRENCH 2B or FRENCH S2AB. FRENCH 2B with a grade of C or better. FRENCH S2AB with a grade of C or better

Overlaps with FRENCH S2BC.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment. FRENCH 2C and FRENCH S2BC may not be taken for full credit.

**(VIII)****FRENCH S2AB. Intermediate French. 6 Units.**

First half of second-year French in an intensified form. Texts of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in French. Prior high school or college French recommended.

Prerequisite: FRENCH 1C or FRENCH 1BC or FRENCH S1BC. FRENCH 1C with a grade of C or better. FRENCH 1BC with a grade of C or better. FRENCH S1BC with a grade of C or better. Placement into FRENCH S2AB is also accepted.

Overlaps with FRENCH 2A, FRENCH 2B.

Restriction: FRENCH S2AB and FRENCH 2A and FRENCH 2B may not be taken for full credit.

**(VIII)****FRENCH S2BC. Intermediate French. 6 Units.**

Second half of second-year French in an intensified form. Texts of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in French. Prior high school or college French recommended.

Prerequisite: FRENCH S2AB or FRENCH 2B. FRENCH S2AB with a grade of C or better. FRENCH 2B with a grade of C or better

Overlaps with FRENCH 2C, FRENCH 2B.

Restriction: FRENCH S2BC and FRENCH 2B and FRENCH 2C may not be taken for full credit.

**(VIII)****FRENCH 10. French Peer Tutoring. 1 Unit.**

Tutoring Program in which advanced French students provide assistance to students at a lower level. One hour of tutoring per week.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**FRENCH 50. Topics in French Culture and the Modern World. 4 Units.**

Introductory course for non-majors. Focuses on France's role in the modern world and its cultural connections to Asia, the Middle East, Africa, Europe, and the Americas. Taught in English.

Repeatability: May be taken for credit 3 times as topics vary.

**(IV and VIII ).****FRENCH 97. Fundamentals of French (with Emphasis on Reading). 4 Units.**

Designed primarily for students interested in acquiring a solid reading knowledge of French, and to facilitate the understanding and translating of French texts dealing with a variety of disciplines.

Restriction: No French Majors.

**FRENCH 101A. Introduction to 19th-Century French Literature. 4 Units.**

Fiction, nonfiction, drama, and poetry of the 19th century studied in relationship to a specific literary or historical problem.

Prerequisite: FRENCH 2C or FRENCH S2BC

**FRENCH 101B. Introduction to 18th-Century French Literature. 4 Units.**

Literature and philosophy of the 18th century studied in relationship to a specific literary or historical problem.

Prerequisite: FRENCH 2C or FRENCH S2BC

**FRENCH 101C. Introduction to 20th-Century French Literature. 4 Units.**

Literatures of the French-speaking world studied in relationship to a specific literary or historical problem.

Prerequisite: FRENCH 2C or FRENCH S2BC

**FRENCH 102A. Grammar and Composition. 4 Units.**

Review of grammar taught in FRENCH 2A-B-C. Students gain facility in writing French and increase reading comprehension. Short texts and films are introduced to generate substantive discussion, and multiple short writing exercises are assigned to solidify skills. Formerly FRENCH 60.

Prerequisite or corequisite: FRENCH 2C or FRENCH 2BC or FRENCH S2BC. FRENCH 2C with a grade of C or better. FRENCH 2BC with a grade of C or better. FRENCH S2BC with a grade of C or better

**FRENCH 102B. Topics in Issues in French and Francophone Culture. 4 Units.**

Investigation of an issue of cultural significance in the francophone world through historical documents, literary works, and newspaper articles. Supplemented with films and/or other elements of popular culture. Multiple short writing assignments to solidify writing skills. Formerly FRENCH 61.

Prerequisite or corequisite: FRENCH 2C or FRENCH 2BC or FRENCH S2BC. FRENCH 2C with a grade of C or better. FRENCH 2BC with a grade of C or better. FRENCH S2BC with a grade of C or better

Repeatability: Unlimited as topics vary.

**FRENCH 102C. Translation. 4 Units.**

Introduction to the theory and practice of translation from French to English and English to French. Many opportunities provided to improve skills in writing and comprehension. Formerly FRENCH 62.

Prerequisite or corequisite: FRENCH 2C or FRENCH 2BC or FRENCH S2BC. FRENCH 2C with a grade of C or better. FRENCH 2BC with a grade of C or better. FRENCH S2BC with a grade of C or better

**FRENCH 102D. Topics in the Work World in French. 4 Units.**

A view into the world of work in French. Areas of study include international relations; French administration; and tensions between management and workers. Attention given to vocabulary and grammar of professional interactions in French. Formerly FRENCH 63.

Prerequisite or corequisite: FRENCH 2C or FRENCH 2BC or FRENCH S2BC. FRENCH 2C with a grade of C or better. FRENCH 2BC with a grade of C or better. FRENCH S2BC with a grade of C or better

Repeatability: Unlimited as topics vary.

**FRENCH 102E. Advanced French Language and Style. 4 Units.**

Intended for advanced students who wish to improve their expressive capabilities in French. Review of more nuanced grammar points. Emphasis placed on rhetoric, syntax, and precision. Advanced readings increase comprehension. Formerly FRENCH 64.

Prerequisite or corequisite: FRENCH 2C or FRENCH 2BC or FRENCH S2BC. FRENCH 2C with a grade of C or better. FRENCH 2BC with a grade of C or better. FRENCH S2BC with a grade of C or better

**FRENCH 116. Topics in 16th-Century French Literature. 4 Units.**

Examines the diverse literature of the Renaissance and the Age of Exploration.

Repeatability: Unlimited as topics vary.

**FRENCH 117. Topics in 17th-Century French Literature. 4 Units.**

Examines the age of drama and other vibrant forms in French literature of the period.

Prerequisite or corequisite: FRENCH 2C or FRENCH 2BC or FRENCH S2BC or FRENCH 60. FRENCH 2C with a grade of C or better. FRENCH 2BC with a grade of C or better. FRENCH S2BC with a grade of C or better. FRENCH 60 with a grade of C or better

Repeatability: Unlimited as topics vary.

**FRENCH 118. Topics in 18th-Century French Literature. 4 Units.**

Examines the literature and philosophy of the Enlightenment, the Ancient Régime, Classicism, and/or Revolution.

Prerequisite or corequisite: FRENCH 2C or FRENCH 2BC or FRENCH S2BC or FRENCH 60. FRENCH 2C with a grade of C or better. FRENCH 2BC with a grade of C or better. FRENCH S2BC with a grade of C or better. FRENCH 60 with a grade of C or better

Repeatability: Unlimited as topics vary.

**FRENCH 119. Topics in 19th-Century French Literature. 4 Units.**

Focuses on the literature of an era that experienced many modernist transformations.

Prerequisite or corequisite: FRENCH 2C or FRENCH 2BC or FRENCH S2BC or FRENCH 60. FRENCH 2C with a grade of C or better. FRENCH 2BC with a grade of C or better. FRENCH S2BC with a grade of C or better. FRENCH 60 with a grade of C or better

Repeatability: Unlimited as topics vary.

**FRENCH 120. Topics in 20th-Century French and Francophone Literature. 4 Units.**

A study of modern and contemporary literature and culture.

Prerequisite or corequisite: FRENCH 2C or FRENCH 2BC or FRENCH S2BC or FRENCH 60. FRENCH 2C with a grade of C or better. FRENCH 2BC with a grade of C or better. FRENCH S2BC with a grade of C or better. FRENCH 60 with a grade of C or better

Repeatability: Unlimited as topics vary.

**FRENCH 125. Topics in African Literature of French Expression. 4 Units.**

Introduction to the principal African and Caribbean works written in French. Offers opportunity to study literature and culture in French in a non-European context. Lectures and papers in French.

Prerequisite or corequisite: FRENCH 2C or FRENCH 2BC or FRENCH S2BC or FRENCH 60. FRENCH 2C with a grade of C or better. FRENCH 2BC with a grade of C or better. FRENCH S2BC with a grade of C or better. FRENCH 60 with a grade of C or better

Repeatability: Unlimited as topics vary.

**FRENCH 127. Topics in Francophone Literature and Culture. 4 Units.**

Literature and cultures of the francophone world.

Repeatability: Unlimited as topics vary.

**FRENCH 139W. Literature and Society. 4 Units.**

In English. Readings of masterpieces of French literature in their social, political, and historical contexts. Requires at least 4,000 words of assigned composition based on French works. Several essays required.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. French Majors have first consideration for enrollment.

**(Ib)**

**FRENCH 140. Topics in French Literary Genre. 4 Units.**

Examines the development and transformation of a single genre, such as the poem or the novel.

Prerequisite or corequisite: FRENCH 2C or FRENCH 2BC or FRENCH S2BC or FRENCH 60. FRENCH 2C with a grade of C or better. FRENCH 2BC with a grade of C or better. FRENCH S2BC with a grade of C or better. FRENCH 60 with a grade of C or better

Repeatability: Unlimited as topics vary.

**FRENCH 150. Topics in French Literature and Culture. 4 Units.**

Study of a theme, movement, or problem crucial to understanding French Literature and Culture.

Repeatability: Unlimited as topics vary.

**FRENCH 160. French Cinema. 4 Units.**

Study of a period, movement, or theme in French or Francophone cinema.

Repeatability: May be taken for credit 2 times as topics vary.

**FRENCH 170. Topics in History and Literature. 4 Units.**

Examines the dialogue between historical events and literary texts.

Repeatability: Unlimited as topics vary.

**FRENCH 171. Politics and Literature. 4 Units.**

Examines the role played by politics and ethics in French literature, film, and culture.

Repeatability: Unlimited as topics vary.

**FRENCH 180. Topics in Theory and Criticism. 4 Units.**

Advanced study of theoretical and critical texts.

Repeatability: Unlimited as topics vary.

**FRENCH 185. Junior/Senior Seminar in French Literature and Culture. 4 Units.**

Required intensive writing course for French majors to explore in depth selected topic in French literature and culture. Students complete major independent research project on topic studied, making use of literary and critical materials in their capstone essay. In French.

Prerequisite: FRENCH 100A and FRENCH 100B and FRENCH 101A and FRENCH 101B and FRENCH 101C. One course from FRENCH 101A, FRENCH 101B, or FRENCH 101C may be taken as a corequisite.

**FRENCH 199. Special Studies in French. 1-4 Units.**

A project proposal is prepared by the student and approved by the faculty member who directs the project. Procedure must be completed by the end of the first week of classes.

Repeatability: Unlimited as topics vary.

Restriction: Repeatability: once for M.A. candidates; twice for Ph.D. candidates.

**FRENCH 216. Studies in Renaissance Literature. 4 Units.**

Advanced study of a topic in the Renaissance period.

Repeatability: Unlimited as topics vary.

**FRENCH 217. Studies in Seventeenth-Century Literature. 4 Units.**

Advanced study of a topic in the 17th century.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**FRENCH 218. Studies in Eighteenth-Century Literature. 4 Units.**

Advanced study of a topic in the 18th century.

Repeatability: Unlimited as topics vary.

**FRENCH 219. Studies in Nineteenth-Century Literature. 4 Units.**

Advanced study of a topic in the 19th century.

Repeatability: Unlimited as topics vary.

**FRENCH 220. Studies in Twentieth-Century Literature. 4 Units.**

Advanced study of a topic in the 20th and 21st century.

Repeatability: May be taken for credit 9 times as topics vary.

Restriction: Graduate students only.

**FRENCH 225. Francophone Literature and Culture. 4 Units.**

Studies in different francophone literatures and cultures (of Canada, the Caribbean, West and North Africa, and Southeast Asia).

Repeatability: Unlimited as topics vary.

**FRENCH 231. Studies in Fiction . 4 Units.**

Examines the art of fiction.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**FRENCH 232. Studies in Nonfictional Prose. 4 Units.**

Examines non-fictional genres such as the essay and the memoir.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**FRENCH 233. Studies in Poetry and Poetics. 4 Units.**

Examines the genre of poetry and theories of poetry.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**FRENCH 240. Studies on a Major Writer. 4 Units.**

Focused study of one author.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**FRENCH 250. Studies in Theory and Criticism. 4 Units.**

Advanced study of a topic in theory and/or criticism.

Repeatability: Unlimited as topics vary.

**FRENCH 254. History and Literature. 4 Units.**

Advanced study of literary works in their historical context.

Repeatability: Unlimited as topics vary.

**FRENCH 272. Cultural Studies . 4 Units.**

Examines the theoretical paradigm of cultural studies.

Repeatability: Unlimited as topics vary.

**FRENCH 290. Research in French Language and Literature. 4 Units.**

A project proposal is prepared by the student and approved by the faculty member who directs the project. Procedure must be completed by the end of the first week of classes. Limit: Once for M.A. candidates; twice for Ph.D. candidates.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only. French Majors only.

**FRENCH 299. Dissertation Research. 4-12 Units.**

For graduate students writing a dissertation with a faculty member in French.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Humanities students only.

**FRENCH 399. University Teaching. 4 Units.**

For graduate students completing a course on foreign language pedagogy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Humanities students only.

## Fully Employed MBA (MGMT FE)

### Courses

**MGMT FE 200. Thinking Strategically in the Digital Age for Managers. 6 Units.**

Focuses on the strategic and organizational challenges that a rapidly changing environment poses to the firm's management and frames them according to Merage's strategic emphasis on analytical decision making, innovation, and information technology.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Admin - Fully Employed Majors only.

**MGMT FE 201A. Business Analytics: Decision-Making for Managers . 4 Units.**

Methods of statistical inference, emphasizing applications to administrative and management decision problems. Topics include classical estimation, hypothesis testing, regression, correlation, analysis of variance, decision analysis, and forecasting. Evening or weekend course format.

Restriction: Graduate students only. Admin - Fully Employed Majors only.

**MGMT FE 201B. Management Science for Managers. 4 Units.**

Uses both prescriptive analysis and risk analysis to explore linear programming models, network problems, and simulation. The goal is to introduce and help students acquire some skills of logical thinking with formal models and improve students' decision making capability.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 202. Organizational Leadership for Managers. 4 Units.**

Develops a better understanding of individual and group behavior in and across organizations; the frameworks by which to analyze and understand behavior in complex organizations; and enhances the skills required to manage collaboration and lead. Evening or weekend course format.

Restriction: Graduate students only. Admin - Fully Employed Majors only.

**MGMT FE 203A. Financial Reporting for Managers. 4 Units.**

Involves the development, analysis, and interpretation of financial accounting information for external reporting purposes. Emphasis on measurement and valuation issues in decision-making problems and cases. Evening or weekend course format.

Restriction: Graduate students only. Admin - Fully Employed Majors only.

**MGMT FE 203B. Driving Profitability Through Managerial Accounting. 4 Units.**

Teaches skills for making vital strategic and tactical decisions (e.g., outsourcing; adding/dropping product lines), to maximize profitability while managing risk. Also covers managerial tools (e.g., budgeting, cost-volume-profit analysis) to drive strategy implementation and incentivize employees. Taught in an evening/weekend format.

Prerequisite: MGMT FE 203A or MGMTMBA 203A. MGMT FE 203A with a grade of C or better. MGMTMBA 203A with a grade of C or better

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 204A. Microeconomics for Managers in the Digital Age. 4 Units.**

Provides basic tools for analyzing economic decisions, the determinants and consequences of market structure and market failure. Topics include demand and supply analysis, production and cost theory, perfect competition, monopoly, and introductory game theory. Evening and weekend course format.

Restriction: Graduate students only. Admin - Fully Employed Majors only.

**MGMT FE 204B. Macroeconomics for Managers. 4 Units.**

Introduces use of macroeconomic analysis to manage the business cycle for competitive advantage. 'Business cycle-sensitive' management is explored within the context of marketing, operations management, HRM, merger and acquisition activity, and capital financing and expenditures. Evening and weekend course format.

Prerequisite: MGMT FE 204A or MGMTMBA 204A

Restriction: Graduate students only. Business Administration Majors only.

**MGMT FE 205. Marketing Management. 4 Units.**

Introduction to marketing. Develops familiarity with fundamental concepts, theories, and techniques in marketing and acquaints students with the type of decisions made by marketing managers including customer targeting, product, pricing, placement, promotion, and research. Evening or weekend course format.

Restriction: Graduate students only. Admin - Fully Employed Majors only.

**MGMT FE 206. Business and Government for Managers. 4 Units.**

Introduces students to the many non-market issues that affect today's managers, such as environment protection, health and safety, intellectual property protection, antitrust, and lobbying. Takes an interdisciplinary approach using economics, political science, public policy, and law. Evening and weekend course.

Restriction: Graduate students only. Admin - Fully Employed Majors only.

**MGMT FE 207. Competing with Digital. 4 Units.**

Focuses on the technological and managerial issues surrounding the development and use of IT in organizations. Examines how technology can be used to execute an organization's business strategy and to enable new, innovative business strategies. Evening or weekend course format.

Restriction: Graduate students only. Admin - Fully Employed Majors only.

**MGMT FE 208. Operational Excellence: Processes, Principles, and Analytics. 4 Units.**

Introduction to strategic and tactical issues in production and operations management. Blend of quantitative and qualitative considerations. Topics include product planning, process design, capacity management, production planning, inventory control, distribution management, just-in-time manufacturing, quality management. Evening or weekend course format.

Restriction: Graduate students only. Admin - Fully Employed Majors only.

**MGMT FE 209A. Finance for Managers. 4 Units.**

Introduces students to financial theory and concepts. Topics include time value of money, valuation of stocks and bonds, capital budgeting, portfolio theory, and capital structure choice. Evening or weekend course format.

Prerequisite: MGMT FE 201A and MGMT FE 203A and MGMT FE 204A

Restriction: Graduate students only. Admin - Fully Employed Majors only.

**MGMT FE 209B. Investments for Managers. 4 Units.**

Foundations of investment management. Theory and empirical evidence related to portfolio theory, market efficiency, and valuation models for equities, bonds, and options. Emphasis on practical applications, including optimal investment strategies. Evening or weekend course format.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 210. Strategy for Managers: Foundations and Dynamics . 4 Units.**

Provides conceptual frameworks and techniques to analyze and develop firm strategies. Through case analysis and discussion, helps improve strategic thinking by developing frameworks by which to assess, evaluate, and respond to different business situations. Evening or weekend course format.

Prerequisite: MGMT FE 200 and MGMT FE 202 and MGMT FE 205 and MGMT FE 209A

Restriction: Graduate students only. Admin - Fully Employed Majors only.

**MGMT FE 211. Networks, Platforms, and Ecosystems . 4 Units.**

Focuses on unique strategic issues raised by multi-sided platform businesses that facilitate interaction among different parties. Combining economic theory and case examples to unpack subtle factors making multi-sided businesses different. From value propositions to pricing strategies to design decisions.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 212. Business Growth Strategies for Managers. 4 Units.**

Focuses on management of growth opportunities in industries where applied innovation, usually in the form of technology, people, or processes, creates distinct competitive advantages.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 214. Entrepreneurship. 4 Units.**

A project course in which student teams develop a business plan to launch a new venture. Drafts of sections of the plan are due throughout the course. Evening or weekend course format.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 215. Strategy in a Digital Age. 4 Units.**

Focuses on applying unchanging basic principles of strategy, economics, and organization to digital technologies. Studies historical and contemporary competitive situations to work out key underlying digital mechanisms that shape competition over time.

Restriction: Master of Business Admin Degree students only.

**MGMT FE 217. Competitive Intelligence for Managers. 4 Units.**

Focuses on how to design a competitive intelligence program, which is a core foundation upon which competitive strategies and execution tactics are developed, assessed, and modified. Evening or weekend course format.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 219. Practice of General Management. 4 Units.**

Designed to teach the graduating M.B.A. students how the best managers actually manage. Students will develop a toolkit of proven concepts and practices that will help them succeed as managers at any level.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 220. Organizational Change in a Digital World for Managers. 4 Units.**

Focuses on the implementation of change. Identifies the features of successful changes in organizations of varying sizes and configurations, with an emphasis on the reasons why individuals resist or embrace change. Evening or weekend course format.

Prerequisite: MGMT FE 202 or MGMTMBA 202

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 222. Performance Management in 21st Century Organizations . 4 Units.**

The key to sustained competitive advantage in a 21st century organization. Performance management is all about aligning employee attitudes and behaviors with firm goals and performance.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 225. Negotiations For Managers. 4 Units.**

Using a combination of theory and practice via negotiation simulations, students expand their repertoire of negotiating skills and develop their ability to analyze different negotiation situations and contexts. Evening or weekend course format.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 227. Global Negotiations. 4 Units.**

Emphasizes economic, political, social, and cultural environments of international business negotiations. Topics include self-assessment/analysis, environmental analysis, international team building, negotiation processes and strategies, resources, skills, pre-negotiation preparations, agreements, and post-contract negotiations. Specific emphasis will be placed on cross-cultural problem-solving.

Restriction: Graduate students only.

**MGMT FE 228. International Management for Managers. 4 Units.**

Introduction to the effects of different national cultures, and political and economic systems on the assumptions, expectations, organizational practices, and organizational forms needed to conduct cross-national organizational work. Evening or weekend course format.

Prerequisite: MGMT FE 202

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 229. Building Your Leadership Toolkit. 2 Units.**

Provides insights/perspectives about the study and development of leadership. Helps students answer three questions: Where am I currently as a leader? What tools can I use to improve my leadership? What is my plan for the future as a leader.

Prerequisite: MGMT FE 202 or MGMTMBA 202. MGMT FE 202 with a grade of C or better. MGMTMBA 202 with a grade of C or better

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 231A. Financial Statement Analysis and Valuation for Managers I. 4 Units.**

Develops skills essential to using financial statements for business analysis by examining financial information quality, profitability and risk analysis, earnings management, revenue recognition, asset recognition and valuation, and how financial reporting is related to the business environment and managerial incentives.

Prerequisite: MGMT FE 203A or MGMTMBA 203A. MGMT FE 203A with a grade of C or better. MGMTMBA 203A with a grade of C or better

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 231B. Financial Statement Analysis and Valuation for Managers II. 4 Units.**

Focuses on the financial statement analysis of liabilities and stockholders' equity. Topics include forecasting financial statements, earnings-based valuation models, accounting analysis of mergers and acquisitions, leases, bankruptcy prediction, and derivatives. Evening or weekend course format.

Prerequisite: MGMT FE 203A or MGMTMBA 203A. MGMT FE 203A with a grade of C or better. MGMTMBA 203A with a grade of C or better

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 233. Wealth Management for Managers. 4 Units.**

Aims to integrate behavioral finance, psychology, personal financial planning, risk management, and asset management to provide students with the theoretical and practical knowledge to effectively build and manage wealth.

Restriction: Admin - Fully Employed Majors only.

**MGMT FE 245. FinTech and the Digital Economy. 4 Units.**

Provides working knowledge of the role of IT-enabled innovation in financial markets to help students acquire an understanding of broad economic issues that are of wide applicability in many areas of FinTech. Both qualitative analysis and quantitative applications are explored.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 246A. Introduction to the Real Estate Process. 4 Units.**

Introductory survey course providing an understanding of the real estate market. Topics include real estate economics, valuation, feasibility, investment, tax considerations, financing, development, and corporate real estate asset management. Hands-on lectures, with guest lectures by real estate professionals.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 246B. International Real Estate. 4 Units.**

Survey of international real estate investment opportunities. Topics include size and breadth; opportunities and challenges (tax treatment, currency/political/market risks, transaction costs, lack of local knowledge); ownership vehicles (REITs, joint ventures, equity funds, etc.). Global cast of guest lecturers supplements lectures.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 246C. Real Estate Capital Markets. 4 Units.**

Understanding the four sectors of real estate capital markets: public debt, private debt, public equity, private equity; estate investment, key players, investment types drive capital solutions, underwriting strategies, and vehicle structuring, debt versus equity source characteristics and implications for returns.

**MGMT FE 246D. The Real Estate Development Process. 4 Units.**

Nature and composition of development community and development process. Emphasis on role of conflicting interests, values and goals, and market uncertainty. Special attention paid to deal structuring and risk management. Lectures, guest lecturers, team projects evaluating actual development project.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 246F. Seminar in Management of the Real Estate Enterprise. 4 Units.**

Beyond 'The Deal' to management of the real estate enterprise itself. Explores aspects of decision-making focused upon strategic objectives: goal setting, legal/tax structures, family-owned firms, going public, corporate ethics, capital structure, diversification, core competencies, technology. Guest professionals.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 246G. Applied Real Estate Security Analysis and Portfolio Management. 4 Units.**

Provides an understanding of the public real estate investment trust (REIT) market and its place in modern investment strategies, presents methods for analyzing and valuing companies, and introduces basic concepts for constructing and managing a real estate investment portfolio.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 247. Venture Capital and Private Equity for Managers. 4 Units.**

Geared to students who are seeking a career in finance and/or in working with venture capital firms, private equity/buyout firms, investment banks, commercial lenders, mezzanine fund investors, corporate finance, and entrepreneurial firms.

Restriction: Master of Business Admin Degree students only.

**MGMT FE 249. Derivatives for Managers. 4 Units.**

Studies financial derivatives instruments, including forward contracts, futures, swaps, and options. Advanced applications of these instruments, including pricing and risk management, are emphasized. Evening or weekend course format.

Prerequisite: MGMT FE 209A or MGMTMBA 209A

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 251A. Marketing Research for Managers. 4 Units.**

Qualitative and quantitative marketing techniques that generate customer insights. Discusses problem formulation, data collection, statistical analyses, formulating managerial recommendations, implementation, and how research is used by companies. Evening or weekend course format.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 252A. Managing Advertising and Communications. 4 Units.**

Integrated marketing communications, including advertising, sale promotions, public relations, and direct mail. Exposure to elements of a communications plan; marketing research, including copy testing and tracking; creating brand value; media strategies; metrics. Evening or weekend course format.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 255. Business to Business Selling and Sales Management. 4 Units.**

Sales is the interpersonal process where the needs of the buyer are uncovered and satisfied, to the long-term benefit of both parties. Students explore sales force management and personal selling in a dynamic, digital environment.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 257. Marketing on the Internet for Managers. 4 Units.**

Examines the Internet's impact on traditional methods of marketing. Discusses how to capitalize on and increase the Internet's utility as a tool that can increase marketing effectiveness, efficiency, and competitiveness. Evening or weekend course format.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 258. Marketing Strategies for High Technology for Managers. 4 Units.**

Framework and tools for managing technology-intensive businesses. Product and pricing policies; network externalities; compatibility concerns; systems competitions; technological and market uncertainty; technology licensing strategies; contracting in high-tech markets; product line design; product bundling strategies; usage-based pricing; pricing of networks; auctions.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 259. Strategic Brand Management for Managers. 4 Units.**

Addresses important branding decisions faced by organizations. A computer simulation allows students hands-on experience in making decisions about their brand and seeing the results of those decisions. Evening or weekend course format.

Prerequisite: MGMT FE 205 or MGMT MBA 205

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 273. Business Intelligence for Analytical Decisions for Managers. 4 Units.**

Introduces methods to mine data repositories for business intelligence to facilitate analytical decision-making. Topics include clustering for market segmentation; association rules to discover relationships between different purchase decisions; Naive-Bayes classification techniques for decision making using decision-trees. Evening or weekend format.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 278. Data and Programming for Analytics. 4 Units.**

Challenges and teaches students to handle data that come in a variety of forms and sizes. Guides students through the whole data management process, from initial data acquisition to final data analysis.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 279. Digital Strategies and Markets. 4 Units.**

Examines how online social media are impacting organizations and markets. Topics include collective intelligence, online social influence, social networks, and social media monetization. The target audience consists of students interested in IT consulting, competitive strategy, marketing, and entrepreneurship.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 281. Analytical Decision Models for Managers. 4 Units.**

An introduction of analytics tools for decision making. Topics include linear and non-linear optimization and simulation models. Excel Solver will be used as the optimization tool and Risk Solver Platform will be used as the simulation tool. Evening or weekend.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 282. Revenue Management for Managers. 4 Units.**

Students learn to apply advanced analytics to earn incremental revenue through the efficient use of resources and science-based pricing methods. Statistics and optimization (using Excel and Excel Solver). Industry-specific implementation issues.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 283. Decision Analysis for Managers. 4 Units.**

Models of preferences and uncertainty; exercises in creative problem solving. Assessment and use of preference models for private, public, and not-for-profit decision making. Assessment and use of subjective probabilities in decision making. Evening or weekend course format.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 288. Predictive Analytics. 4 Units.**

Deals with predicting entities, such as demand for a product or service (forecasting) and predicting membership of known groups (classification). Blends methodologies of forecasting and data mining and focuses on the application of these methods to managerial problems and decision-making.

Restriction: Graduate students only.

**MGMT FE 290. Special Topics in Business. 2-4 Units.**

Studies in selected areas of Business. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 292. Business Law for Managers. 4 Units.**

Detailed study from a business viewpoint of contract theories, assignments, delegation of duties, third-party beneficiary contracts, defenses to consensual contracts, types of conditions, methods of excusing conditions, remedies, and types of damages. Evening or weekend course format.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 293. Information, Communication, and Coordination: Practicum for Analyzing Organizations. 4 Units.**

Use of contextual inquiry and ethnographic methods to assess real world contexts. Exploring culture, power, physical layout, and the role of artifacts in information flow, communication practices, and coordination through qualitative fieldwork in an organization.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 294. EDGE for Managers. 4 Units.**

Explores the crucial roles of external forces: globalization, technology, shifting demographics - as transformative catalysts for change - opening markets, erasing boundaries, and transforming industries. This course prepares future business leaders to innovate and successfully compete.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 295A. Introduction to Global Business for Managers.**

Fundamentals of global strategy, economics, and financial issues. Topics include global manager's environment, global strategy, impact of national culture on business systems, strategies and practices, foreign direct investment, corporate governance, human resources, and international marketing. Evening and weekend course format.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Admin - Fully Employed Majors only.

**MGMT FE 295B. Global Business for Managers. 4 Units.**

Emphasizes and reinforces international perspectives contained in the FEMBA curriculum by providing a week-long intensive seminar abroad in the second year. Scholars and business people from the host country instruct FEMBA students in specially designed class sessions and company visits.

Prerequisite: MGMT FE 295A. MGMT FE 295A with a grade of B or better

Restriction: Graduate students only. Admin - Fully Employed Majors only.

**MGMT FE 296. Executive Leadership. 6 Units.**

Provides perspectives on leadership. Helps students answer three questions: Where am I currently as a leader? What tools can I use to improve my leadership? What is my plan for the future as a leader? Evening or weekend course format.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 298. Merage Consulting Projects for Managers. 4 Units.**

Provides students the opportunity to put into practice concepts, skills, and tools acquired in other parts of the MBA program. Seminars augment internship experiences with analyses of relevant administrative issues.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 299. Individual Directed Study. 1-8 Units.**

Individual study under the direction of a selected faculty member.

Restriction: Graduate students only. Master of Business Admin Degree students only.

## Gender and Sexuality Studies (GEN&SEX)

### Courses

**GEN&SEX 20. Introduction to Queer Studies. 4 Units.**

Study of sexuality from the perspective of lesbian, gay, queer, transgender scholarship spanning humanities, social sciences, and arts.

(IV and VII ).

**GEN&SEX 50A. Gender and Feminism in Everyday Life. 4 Units.**

What is gender? Why does studying it matter? Explores how feminism has understood not only gender as a category of social analysis, but how gender structures personal identities, family, citizenship, work and leisure, social policy, sexuality, and language.

(IV, VII)

**GEN&SEX 50B. Gender and Power. 4 Units.**

From workplace to home to schools to prisons, how are societal institutions and politics "gendered"? Examines power and inequalities around gender, race, class, and sexuality in national and transnational contexts.

(IV, VII)

**GEN&SEX 50C. Gender and Popular Culture. 4 Units.**

An investigation of gender, race, and sexuality in film, TV, video, music, and advertising, with attention to the ways that popular culture shapes understandings of technology, national identities, leisure and work, historical memory, international communication, and multicultural representation.

(IV, VII)

**GEN&SEX 60A. Gender and Science. 4 Units.**

Examines science from a variety of feminist viewpoints in order to explore how science influences everyday life. Special attention is given to the ways science shapes our understanding of gender, race, and sexuality.

(III)

**GEN&SEX 60B. Gender and Law. 4 Units.**

Introduction to the relationship between gender, race, sexuality, and the law. Critical thinking about how law defines citizenship, political representation, and democracy, focusing on the history of legal reform undertaken in the name of women as a social group.

(III)

**GEN&SEX 60C. Gender and Religion. 4 Units.**

Introduces the topic of religion in a feminist context by performing cross-cultural exploration of gender, authority, and faith in various traditions. Study includes (but is not limited to) writings of contemporary Jewish, Christian, and Muslim feminists.

Same as REL STD 61.

(III and VIII ).

**GEN&SEX 100A. Feminism and Social Change. 4 Units.**

Explores feminist modes of knowledge production in relation to histories and activist practices of various social movements. Examines the kinds of information, research, ideas, theories, and concepts that underlie feminist cultural analysis and social movement organizing.

**GEN&SEX 100B. Feminist Theory. 4 Units.**

Introduction to historical traditions in theory and various conceptual frameworks informing scholarship in gender studies, sexuality studies, and women's studies as a field of critical inquiry.

**GEN&SEX 100C. Feminist Cultural Studies. 4 Units.**

Investigation of the theories and methods that inform the feminist study of culture. Focuses on the interpretation of the visual arts and literature created by, and predominately for, women.

**GEN&SEX 100D. Queer Knowledges. 4 Units.**

Explores the emergence of historical elaboration of non-normative sexual identities, practices, and communities; focuses on medical, legal, literary, aesthetic, scientific, and religious notions about homosexuality and appropriations and subversions of these notions by queer people.

**GEN&SEX 110A. Gender, State, and Nation. 4 Units.**

Examination of gender and sexuality in relation to the production of identities created through participation in state and nation. Examines complexity of relationship between feminism and nationalism, feminism and the state.

**GEN&SEX 110B. Money, Sex, and Power. 4 Units.**

Examination of gender and sexuality in relation to the emergence of the modern world, modernity, and capitalism; commodification, circulation, and transnational exchanges relating to race, gender, class, sexuality, religion, and nationality.

**GEN&SEX 110D. The Politics of Health and Medicine. 4 Units.**

Focuses on cultural and political-economic analysis and representations of disease both within the U.S. and globally.

**GEN&SEX 120A. Histories of Sexuality. 4 Units.**

Examines the historical production of non-normative sexual and gender identities, bodies, practices, and communities. Explores how past formations inform and shape the present and future.

**GEN&SEX 120B. Image Problems. 4 Units.**

Examination of scholarly approaches to gender stereotypes and politics of representation as they present possibilities for critical analysis and produce problems and limitations; how powerful ideas of gender intersect with other forms of social differentiation such as race and class.

**GEN&SEX 120C. Practices of Embodiment. 4 Units.**

Explores how science, medicine, and law have shaped the understanding of differentiated bodies; examines shifting norms and ideals about producing, shaping, adorning, and dressing gendered bodies across diverse historical, cultural, social, economic, and spatial contexts.

**GEN&SEX 139. Topics in Gender Studies. 4 Units.**

Various topics in gender studies. Encompasses issues of gender, culture, race and class, including issues of sexualities and social justice.

Repeatability: Unlimited as topics vary.

**GEN&SEX 155. Topics in Gender and Sexuality Studies. 4 Units.**

Designed to provide students with an opportunity to conduct advanced work in Gender and Sexuality Studies.

Repeatability: Unlimited as topics vary.

**GEN&SEX 157. Topics in Queer Studies. 4 Units.**

Explores issues in queer studies from one or more of the following perspectives: theoretical, historical, legal, economic, political, sociological, and representation in the arts.

Repeatability: Unlimited as topics vary.

**GEN&SEX 165F. Gender and Technology. 4 Units.**

Using a variety of disciplinary methods, examines how various technological processes and products produce culturally complex meanings associated with gender and technology.

**GEN&SEX 167A. Militarism and Gender. 4 Units.**

Examination of feminist approaches to militarism, war, and political violence; drawing on representations of women as both victims of and participants in military violence; effects of militarism on formations of gender; effects of military industrial complex on nationalism and identity.

Same as INTL ST 153F.

**GEN&SEX 170. Topics in Gender, Feminism, Literature, and Language. 4 Units.**

Topics cover issues in language and literature which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 171. Topics in Gender, Feminism, and History. 4 Units.**

Topics cover issues in history which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 171A. Sex and Conquest in Latin America. 4 Units.**

Competing ideas of masculinity and femininity, sexual violence, sexual identities, and gendered hierarchies informed how the Spanish engaged in military and religious domination of Mexican and Andean communities, as well as the forms of native resistance throughout colonial Latin America.

Same as ANTHRO 140, CHC/LAT 150A, HISTORY 160.

**GEN&SEX 174. Topics in Gender, Feminism, and the Arts. 4 Units.**

Topics cover issues in the arts which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 175. Topics in Gender, Feminism, and the Media. 4 Units.**

Topics cover issues in the media which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 180. Topics in Gender, Feminism, and Anthropology. 4 Units.**

Topics cover issues in Anthropology which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 181. Topics in Gender, Feminism, and Cognitive Psychology. 4 Units.**

Topics cover issues in cognitive psychology which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 182. Topics in Gender, Feminism and Economics. 4 Units.**

Topics cover issues in economics which relate to women and gender or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 183. Topics in Gender, Feminism, and Sociology. 4 Units.**

Topics cover issues in sociology which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 184. Topics in Gender, Feminism, and Political Science. 4 Units.**

Topics cover issues in political science which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 185. Topics in Gender, Feminism, and Social Sciences. 4 Units.**

Topics cover issues in social sciences which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 187. Topics in Gender, Feminism, and Social Ecology. 4 Units.**

Topics cover issues in social ecology which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 188. Topics in Gender, Feminism, and Science. 4 Units.**

Topics cover issues in science which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 189. Topics in Gender, Feminism, and Interdisciplinary Studies. 4 Units.**

Topics cover issues in interdisciplinary studies which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 190. Topics in Sexualities Studies. 4 Units.**

Topics cover issues in the humanities, social sciences, sciences, and arts that relate to critical inquiry of sexualities.

Repeatability: Unlimited as topics vary.

**GEN&SEX 197. Senior Seminar in Gender and Sexuality Studies. 4 Units.**

Students read advanced scholarship in Gender and Sexuality Studies and complete a major seminar paper.

Prerequisite: Satisfactory completion of the Upper-Division Writing requirement.

Restriction: Gender and Sexuality Studies Majors only.

**GEN&SEX 199. Independent Study . 1-4 Units.**

Directed reading and research in consultation with a faculty member. Substantial written work required. Includes independent study, involving 3-12 hours a week.

Repeatability: May be repeated for credit unlimited times.

**GEN&SEX 200A. Feminist Knowledge and Social Change. 4 Units.**

Provides a broad and introductory overview of Women's Studies and feminist knowledge, including key concepts, theoretical frameworks, disciplinary approaches and methods, and critical debates that have shaped the field.

Repeatability: May be taken for credit 2 times.

**GEN&SEX 200B. Problems in Feminist Research. 4 Units.**

Colloquium on analytic approaches to interdisciplinary feminist research in Women's Studies and exploration of how feminist knowledges are produced in different academic disciplines.

Repeatability: May be taken for credit 2 times.

**GEN&SEX 201. Special Topics in Feminist Studies. 4 Units.**

Seminars on various topics in feminist studies.

Repeatability: Unlimited as topics vary.

**GEN&SEX 210A. Topics in Graduate Feminist Theory. 4 Units.**

In-depth introduction to various theoretical frameworks that have and continue to inform scholarship in Women's Studies including (but not limited to) identity, representation, and political economy.

Repeatability: Unlimited as topics vary.

**GEN&SEX 290. Directed Research. 2-12 Units.**

Directed graduate study/research in Gender and Sexuality Studies.

Repeatability: May be taken for credit for 24 units.

Restriction: Graduate students only.

**GEN&SEX 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

## German (GERMAN)

### Courses

**GERMAN 1A. Fundamentals of German. 5 Units.**

Emphasizes the development of meaningful communicative skills in German for the purposes of interaction with German speakers and beginning study of German. With a learner-centered approach, the courses help students develop speaking, listening, reading, writing, and cultural skills and knowledge.

Overlaps with GERMAN S1AB, GERMAN 1AB.

**GERMAN 1AB. Intensive German Fundamentals . 7.5 Units.**

First half of first-year German in a time-intensive form. Development of meaningful communicative skills for the purposes of interaction with German speakers and beginning study of German. Learner-centered approach develops speaking, listening, reading, writing, and cultural skills and knowledge. Materials fee.

Prerequisite: Placement into GERMAN 1AB.

Overlaps with GERMAN S1AB, GERMAN 1A, GERMAN 1B.

Restriction: GERMAN 1AB and GERMAN 1A and GERMAN 1B and GERMAN S1AB may not be taken for full credit.

**GERMAN 1B. Fundamentals of German. 5 Units.**

Emphasizes the development of meaningful communicative skills in German for the purposes of interaction with German speakers and beginning study of German. With a learner-centered approach, students develop speaking, listening, reading, writing, and cultural skills and knowledge.

Prerequisite: GERMAN 1A. GERMAN 1A with a grade of C or better. Placement into GERMAN 1B is also accepted.

Overlaps with GERMAN S1AB, GERMAN S1BC, GERMAN 1AB, GERMAN 1BC.

**GERMAN 1BC. Intensive German Fundamentals. 7.5 Units.**

Second half of first-year German in a time-intensive form. Development of meaningful communicative skills for the purposes of interaction with German speakers and beginning study of German. Learner-centered approach develops speaking, listening, reading, writing, and cultural skills and knowledge. Materials fee.

Prerequisite: GERMAN 1AB or GERMAN 1B or GERMAN S1AB. GERMAN 1AB with a grade of C or better. GERMAN 1B with a grade of C or better. GERMAN S1AB with a grade of C or better. Placement into GERMAN 1BC is also accepted.

Overlaps with GERMAN 1B, GERMAN 1C, GERMAN S1BC.

Restriction: GERMAN 1BC and GERMAN 1B and GERMAN 1C and GERMAN S1AB may not be taken for full credit.

**(VI)****GERMAN 1C. Fundamentals of German. 5 Units.**

Emphasizes the development of meaningful communicative skills in German for the purposes of interaction with German speakers and beginning study of German. With a learner-centered approach, students develop speaking, listening, reading, writing, and cultural skills and knowledge.

Prerequisite: GERMAN 1B. GERMAN 1B with a grade of C or better. Placement into GERMAN 1C is also accepted.

Overlaps with GERMAN 1BC, GERMAN S1BC.

**(VI)****GERMAN S1AB. Fundamentals of German. 7.5 Units.**

First half of first-year German in a time-intensive form. Development of meaningful communicative skills for the purposes of interaction with German speakers and beginning study of German. Learner-centered approach develops speaking, listening, reading, writing, and cultural skills and knowledge.

Overlaps with GERMAN 1A, GERMAN 1B, GERMAN 1AB.

Restriction: GERMAN S1AB and GERMAN 1A and GERMAN 1B and GERMAN 1AB may not be taken for full credit.

**GERMAN S1BC. Fundamentals of German. 7.5 Units.**

Second half of first-year German in a time-intensive form. Development of meaningful communicative skills for the purposes of interaction with German speakers and beginning study of German. Learner-centered approach develops speaking, listening, reading, writing, and cultural skills and knowledge.

Prerequisite: GERMAN 1AB or GERMAN 1B or GERMAN S1AB. GERMAN 1AB with a grade of C or better. GERMAN 1B with a grade of C or better. GERMAN S1AB with a grade of C or better. Placement into GERMAN S1BC is also accepted.

Overlaps with GERMAN 1B, GERMAN 1C, GERMAN 1BC.

Restriction: GERMAN 1BC and GERMAN S1BC and GERMAN 1B and GERMAN 1C may not be taken for full credit.

**(VI)**

**GERMAN 2A. Intermediate German. 4 Units.**

Emphasizes communicative skills for the purposes of interaction with German speakers and intermediate study of German. With a learner-centered approach, helps students develop reading, writing, speaking, listening, grammatical, and cultural skills and knowledge. First-year grammar is reviewed and expanded.

Prerequisite: GERMAN 1BC or GERMAN 1C or GERMAN S1BC. GERMAN 1BC with a grade of C or better. GERMAN 1C with a grade of C or better. GERMAN S1BC with a grade of C or better. Placement into GERMAN 2A is also accepted.

Overlaps with GERMAN S2AB.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

(VIII)

**GERMAN 2B. Intermediate German. 4 Units.**

Emphasizes communicative skills for the purposes of interaction with German speakers and intermediate study of German. With a learner-centered approach, helps students develop reading, writing, speaking, listening, grammatical, and cultural skills and knowledge. First-year grammar is reviewed and expanded.

Prerequisite: GERMAN 2A. GERMAN 2A with a grade of C or better. Placement into GERMAN 2B is also accepted.

Overlaps with GERMAN S2AB, GERMAN S2BC.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

(VIII)

**GERMAN 2C. Intermediate German. 4 Units.**

Emphasizes communicative skills for the purposes of interaction with German speakers and intermediate study of German. With a learner-centered approach, helps students develop reading, writing, speaking, listening, grammatical, and cultural skills and knowledge. First-year grammar is reviewed and expanded.

Prerequisite: GERMAN 2B. GERMAN 2B with a grade of C or better. Placement into GERMAN 2C is also accepted.

Overlaps with GERMAN S2BC.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

(VIII)

**GERMAN S2AB. Intermediate German. 6 Units.**

First half of second-year German in a time-intensive form. Emphasizes communicative skills for the purposes of interaction with German speakers and intermediate study of German. Learner-centered approach develops reading, writing, speaking, listening, grammatical, and cultural skills and knowledge.

Prerequisite: GERMAN 1C or GERMAN S1BC

Overlaps with GERMAN 2A, GERMAN 2B.

Restriction: GERMAN S2AB and GERMAN 2A and GERMAN 2B may not be taken for full credit.

(VIII)

**GERMAN S2BC. Intermediate German. 6 Units.**

Second half of second-year German in a time-intensive form. Emphasizes communicative skills for the purposes of interaction with German speakers and intermediate study of German. Learner-centered approach develops reading, writing, speaking, listening, grammatical, and cultural skills and knowledge.

Prerequisite: GERMAN 2B or GERMAN S2AB. GERMAN 2B with a grade of C or better. GERMAN S2AB with a grade of C or better

Overlaps with GERMAN 2B, GERMAN 2C.

Restriction: GERMAN S2BC and GERMAN 2B and GERMAN 2C may not be taken for full credit.

(VIII)

**GERMAN 53. Advanced Conversation. 2 Units.**

Includes reading of political and cultural material. Conducted in German.

Prerequisite or corequisite: GERMAN 2C

Repeatability: May be repeated for credit unlimited times.

**GERMAN 97. Fundamentals of German (with Emphasis on Reading). 4 Units.**

Primarily for students interested in acquiring a solid reading knowledge of German. Facilitates comprehension and translation of texts in various disciplines. Does not serve as prerequisite for any higher-level German courses or fulfill any undergraduate foreign language requirement.

Repeatability: May be taken for credit 3 times.

Restriction: No German Studies Majors.

**GERMAN 101. Topics in Introduction to German Literature and Culture. 4 Units.**

Sample interpretations of texts in their cultural and historical contexts. Introduction to critical language in German.

Prerequisite or corequisite: GERMAN 2C. GERMAN 2C with a grade of C or better

Repeatability: Unlimited as topics vary.

**GERMAN 102. Topics in German Culture and Society. 4 Units.**

Interdisciplinary introduction to German culture from the perspective of its aesthetic, social, and political aspects. Methodological problems arising from an analysis of culture in its historical context.

Prerequisite or corequisite: GERMAN 2C. GERMAN 2C with a grade of C or better

Repeatability: Unlimited as topics vary.

**GERMAN 103. Topics in German Film. 4 Units.**

Introduction to the history and interpretation of German film within its cultural and social contexts. Enhances German grammar knowledge and vocabulary and develops sophisticated speaking, writing, and reading skills.

Prerequisite or corequisite: GERMAN 2C. GERMAN 2C with a grade of C or better

Repeatability: Unlimited as topics vary.

**GERMAN 104. Topics in German Linguistics. 4 Units.**

Introduces German or other Germanic-language linguistic, sociolinguistic, or ethnography-of-communication topics. Taught in German.

Prerequisite or corequisite: GERMAN 2C. GERMAN 2C with a grade of C or better

Repeatability: Unlimited as topics vary.

**GERMAN 105. German for Professions . 4 Units.**

Explores the structure of German business practices, including in scientific fields and engineering, while developing verbal and written skills important for professional life in Germany. Taught in German.

Prerequisite or corequisite: GERMAN 2C. GERMAN 2C with a grade of C or better

**GERMAN 115. Topics in Advanced German for Business and Economics. 4 Units.**

Explores the structure of the German economy and business practices while developing advanced verbal and written skills important for professional life in Germany. Taught in German.

Prerequisite or corequisite: GERMAN 101 or GERMAN 102 or GERMAN 103 or GERMAN 104 or GERMAN 105

Repeatability: Unlimited as topics vary.

**GERMAN 118. Topics in Studies in the Age of Goethe. 4 Units.**

Individual authors such as Lessing, Goethe, Schiller, Kleist, and Hölderlin, or the drama of the 'angry young men' of the German 1770s.

Prerequisite or corequisite: GERMAN 101 or GERMAN 102 or GERMAN 103 or GERMAN 104 or GERMAN 105

Repeatability: Unlimited as topics vary.

**GERMAN 119. Topics in 19th Century German Literature and Culture. 4 Units.**

Individual authors such as Büchner, Grillparzer, Keller, and Nietzsche, or broader social-literary phenomena.

Prerequisite or corequisite: GERMAN 101 or GERMAN 102 or GERMAN 103 or GERMAN 104 or GERMAN 105

Repeatability: Unlimited as topics vary.

**GERMAN 120. Topics in 20th Century German Literature and Culture. 4 Units.**

Individual authors such as Thomas Mann, Brecht, and Kafka, or topics addressing questions of genre and/or social-literary problems.

Prerequisite or corequisite: GERMAN 101 or GERMAN 102 or GERMAN 103 or GERMAN 104 or GERMAN 105

Repeatability: Unlimited as topics vary.

**GERMAN 130. Topics in German Literature and Culture. 4 Units.**

Literary and cultural topics not fully contained within the periods listed above, such as 'German Comedy' and 'Turn-of-the-Century Vienna.'

Prerequisite or corequisite: GERMAN 101 or GERMAN 102 or GERMAN 103 or GERMAN 104 or GERMAN 105

Repeatability: Unlimited as topics vary.

**GERMAN 140. Topics in Literary Theory and Criticism. 4 Units.**

In English. Theoretical dimensions of literary criticism and the German philosophical tradition. Topics have included Marxism, Freudian thought, German Idealist aesthetics, Historicism, twentieth-century hermeneutics, Frankfurt School, and Rezeptionsästhetik.

Repeatability: Unlimited as topics vary.

**GERMAN 140W. Topics in Literary Theory and Criticism. 4 Units.**

In English. Theoretical dimensions of literary criticism and the German philosophical tradition. Topics have included Marxism, Freudian thought, German Idealist aesthetics, Historicism, twentieth-century hermeneutics, Frankfurt School, and Rezeptionsästhetik.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only.

**(Ib)****GERMAN 150. German Literature and Culture in Translation. 4 Units.**

In English. Major works in Germanic literature and culture in context.

Repeatability: Unlimited as topics vary.

**GERMAN 150W. German Literature and Culture in Translation. 4 Units.**

In English. Major works in Germanic literature and culture in context.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only.

**(Ib)****GERMAN 160. German Cinema.**

Historical, theoretical, and comparative perspectives on German cinema.

Repeatability: Unlimited as topics vary.

**GERMAN 160W. German Cinema. 4 Units.**

Historical, theoretical, and comparative perspectives on German cinema.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only.

**(Ib)**

**GERMAN 170. Topics in German Linguistics. 4 Units.**

Explores linguistic, sociolinguistic, or ethnography-of-communication topics of German or other Germanic languages (Swedish, Icelandic, Yiddish, and others). Taught in English.

Repeatability: Unlimited as topics vary.

**GERMAN 170W. Topics in German Linguistics. 4 Units.**

Explores linguistic, sociolinguistic, or ethnography-of-communication topics of German or other Germanic languages (Swedish, Icelandic, Yiddish, and others). Taught in English.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only.

**(Ib)**

**GERMAN 197. German Internship . 4 Units.**

In this internship course, students will engage in professional practice (e.g., Engineering, Business Administration, government) in a German setting and thereby increase their knowledge of German language and culture in a setting beyond the academic classroom.

Prerequisite: GERMAN 2C

Grading Option: Pass/no pass only.

**GERMAN 199. Independent Study. 1-4 Units.**

Independent research with German faculty.

Repeatability: May be repeated for credit unlimited times.

**GERMAN 200. Literary Criticism . 4 Units.**

Topics in literary criticism.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**GERMAN 210. Literary Theory . 4 Units.**

Topics in literary theory.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**GERMAN 220. Selected Topics in German Linguistics . 4 Units.**

Topics in German linguistics.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**GERMAN 230. Literary and Cultural History. 4 Units.**

Topics in literary and cultural history.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**GERMAN 290. Independent Study. 4 Units.**

Counted toward course requirements for the M.A. or Ph.D. A term paper or project is required.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Humanities students only.

**GERMAN 298. Independent Directed Reading. 4-12 Units.**

For students preparing for doctoral examination.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**GERMAN 299. Dissertation Research. 4-12 Units.**

For students who have been admitted to doctoral candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Humanities students only.

**GERMAN 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Global Cultures (GLBLCLT)

### Courses

**GLBLCLT 103A. Global Cultures I . 4 Units.**

Introduction to the processes by which economies, cultural practices, national entities, groups, individuals, and personal identities have undergone globalization. General background and methodological tools for understanding problems and processes of globalization.

Repeatability: Unlimited as topics vary.

**GLBLCLT 103B. Global Cultures II . 4 Units.**

Introduction to the processes by which economies, cultural practices, national entities, groups, individuals, and personal identities have undergone globalization. Explores how globalization has manifested itself in specific topics, periods, or societies.

Repeatability: Unlimited as topics vary.

**GLBLCLT 105. Language Origins: Evolution, Genetics, and the Brain. 4 Units.**

Examines how human language(s) may have originated. Studies pertinent techniques (reconstruction) and addresses related questions, including is our language faculty inborn (i.e., genetically encoded)? Can brain imaging and population genetics research help to unlock this mystery of human evolution?.

Same as ANTHRO 152A, LSCI 175, HISTORY 135G.

**GLBLCLT 191. Senior Seminar: Topics in Global Cultures. 4 Units.**

Students explore a topic(s) concerning processes and/or problems of globalization from an interdisciplinary perspective and build on their critical and analytical skills when investigating cultural and other phenomena that cut across national borders. Research assignments, class presentations, final seminar paper.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only.

**GLBLCLT 199. Independent Study. 1-4 Units.**

Directed reading and research in consultation with a faculty advisor. Substantial written work required.

Repeatability: May be repeated for credit unlimited times.

## Global Middle East Studies (GLBL ME)

### Courses

**GLBL ME 60A. Humanities and Arts: Problems and Methods for Global Middle East Studies. 4 Units.**

Introduces students to the broad set of humanities and arts approaches to studying the Middle East as a global zone of cultural, political, and economic interaction.

(IV and VIII ).

**GLBL ME 60B. Social Sciences: Problems and Methods for Global Middle East Studies. 4 Units.**

Introduces students to the broad set of social sciences approaches to studying the Middle East as a global zone of cultural, political, and economic interaction.

(III and VIII ).

**GLBL ME 60C. Social Ecology and Sciences: Problems and Methods for Global Middle East Studies. 4 Units.**

Introduces students to the broad set of approaches to studying the Middle East as a global zone of cultural, political, and economic interaction, focusing on the disciplines related to Social Ecology.

(III and VIII ).

**GLBL ME 100W. Research and Writing for Global Middle East Studies. 4 Units.**

Research and writing course for Global Middle East Studies majors. The primary focus is to refine the skills necessary for students to engage in independent research and writing in Global Middle East Studies.

Prerequisite or corequisite: GLBL ME 60A or GLBL ME 60B or GLBL ME 60C. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Global Middle East Studies Majors have first consideration for enrollment.

(Ib)

## Greek (GREEK)

### Courses

**GREEK 1A. Fundamentals of Greek. 5 Units.**

Elements of Classical Greek grammar, syntax, and vocabulary.

Overlaps with GREEK S1AB.

Restriction: GREEK 1A and GREEK S1AB may not be taken for full credit.

**GREEK 1B. Fundamentals of Greek. 5 Units.**

Elements of Classical Greek grammar, syntax, and vocabulary.

Prerequisite: GREEK 1A. GREEK 1A with a grade of C or better

Overlaps with GREEK S1AB, GREEK S1BC.

Restriction: GREEK 1B and GREEK S1AB and GREEK S1BC may not be taken for full credit.

**GREEK 1C. Fundamentals of Greek. 5 Units.**

Introduction to reading texts.

Prerequisite: GREEK 1B. GREEK 1B with a grade of C or better

Overlaps with GREEK S1BC.

Restriction: GREEK 1C and GREEK S1BC may not be taken for full credit.

(VI)

**GREEK 99. Special Studies in Greek. 1-4 Units.**

Lower-division level independent research with Greek faculty.

Repeatability: May be repeated for credit unlimited times.

**GREEK 100. Topics in Attic Greek. 4 Units.**

Selected readings in Attic Greek prose and poetry. Authors may include Xenophon, Lysias, Antiphon, Euripides, and others. Selections from prose and poetry will be read each quarter. Grammar and syntax review included.

Prerequisite: GREEK 1C. GREEK 1C with a grade of C or better. Placement into GREEK 100 is also accepted.

Repeatability: Unlimited as topics vary.

**GREEK 103. Seminar in Greek Prose. 4 Units.**

Specialized and focused study of a particular Greek prose author or topic.

Prerequisite: GREEK 100

Repeatability: Unlimited as topics vary.

**GREEK 104. Seminar in Greek Poetry. 4 Units.**

Specialized and focused study of a particular topic or author of Greek poetry.

Prerequisite: GREEK 100

Repeatability: Unlimited as topics vary.

**GREEK 198. Directed Group Study. 4 Units.**

Special topics in Greek culture and civilization through directed reading and research.

Repeatability: May be repeated for credit unlimited times.

**GREEK 199. Independent Studies in Greek. 1-4 Units.**

Independent research with Greek faculty.

Repeatability: May be repeated for credit unlimited times.

## Health Care MBA (MGMT HC)

### Courses

**MGMT HC 200. Responding to Dynamic Times: Thinking Strategically for Healthcare Executives. 7 Units.**

Focuses on the strategic and organizational challenges that a rapidly changing environment poses to the firm's management and frames them according to Merage's strategic emphasis on analytical decision making, innovation, and information technology.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 201A. Statistics for Healthcare Executives . 5 Units.**

Methods of statistical inference, emphasizing applications to administrative and management decision problems. Topics include classical estimation, hypothesis testing, regression, correlation, analysis of variance, decision analysis, and forecasting.

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 201B. Operations Analytics for Healthcare Executives. 5 Units.**

An introduction to computer-based models for decision making. Topics include optimization (linear programming, integer programming, network flow models) and computer simulation. Uses spreadsheets extensively, including Excel built-in and add-in packages. Once a month weekend course format.

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 202. Organizational Behavior for Healthcare Executives. 5 Units.**

Develops a better understanding of individual and group behavior in and across organizations, the frameworks by which to analyze and understand behavior in complex organizations; enhances the skills required to manage collaboration and lead. Once a month weekend course format.

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 203A. Financial Reporting for Healthcare Executives. 5 Units.**

Involves the development, analysis, and interpretation of financial accounting information for external reporting purposes. Emphasis on measurement and valuation issues in decision-making problems and cases. Once a month weekend course format.

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 203B. Managerial Accounting for Healthcare Executives. 5 Units.**

Involves developing and using internal financial and non-financial information to help organizations make planning, budgeting, control, operating, and performance evaluation decisions. Once a month weekend course format.

Prerequisite: MGMT HC 203A

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 204A. Microeconomics for Healthcare Executives. 5 Units.**

Provides basic tools for analyzing economic decisions of consumers and firms. Topics include demand and supply analysis, production and cost theory, perfect competition, monopoly, market failures, and introductory game theory. Once a month weekend course format.

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 205. Marketing for Healthcare Executives. 5 Units.**

Introduction to marketing. Develops familiarity with fundamental marketing concepts, theories, and techniques, and acquainting students with the type of decisions made by marketing managers, including customer targeting, product, pricing, place, promotion, and research. Once a month weekend course format.

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 206. Business and Government for Healthcare Executives. 2 Units.**

Introduces students to the many non-market issues that affect today's managers: environment protection, health and safety, intellectual property protection, antitrust, and lobbying. Takes an interdisciplinary approach using economics, political science, public policy, and law. Once a month weekend course format.

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 207. Competing with Digital in Healthcare: Analytics, Platforms, and Business Models. 5 Units.**

Focuses on how information technology is used to create value in healthcare-related organizations through product, process, and strategy innovation. Aims to help managers and healthcare professionals understand the strategic role of technology. Every other weekend course format.

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 209A. Managerial Finance for Healthcare Executives. 5 Units.**

Introduces students to financial theory and concepts. Topics include time value of money, valuation of stocks and bonds, capital budgeting, portfolio theory, capital structure choice. Once a month weekend course format.

Prerequisite: MGMT HC 201A and MGMT HC 203A and MGMT HC 204A

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 209B. Investments for Healthcare Executives. 3 Units.**

Foundations of investment management. Theory and empirical evidence related to portfolio theory, market efficiency, and valuation models for equities, bonds, and options. Emphasis on practical applications, including optimal investment strategies. Once a month weekend course format.

Prerequisite: MGMT HC 209A

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 210. Strategic Management for Healthcare Executives. 5 Units.**

Provides conceptual frameworks and techniques to analyze and develop firm strategies. Through case analysis and discussion, helps students improve analytical and strategic thinking by which to assess, evaluate, and respond to different business situations. Once a month weekend course format.

Prerequisite: MGMT HC 200 and MGMT HC 202 and MGMT HC 205 and MGMT HC 209A

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 225. Negotiations For Healthcare Executives. 5 Units.**

Using a combination of theory and practice via negotiation simulations, students expand their repertoire of negotiating skills and develop their ability to analyze different negotiation situations and contexts. Once a month weekend course format.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT HC 267. Understanding Managed Care. 2-5 Units.**

This course is designed to increase understanding of the various concepts of managed health care with an emphasis on the organizational processes required to make it work, and explore the economics and financial pressures these organizations face.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT HC 290. Special Topics in Business. 2-5 Units.**

Studies in selected areas of business. Topics addressed vary each quarter.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT HC 295. Federal Policy in Health Care. 8 Units.**

National/international one-week residential course exploring political analysis as related to management of health care organizations. Topics include political environment of management, concepts, and processes central to political analysis, bureaucratic politics, politics, and the manager.

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 296. Leadership for Healthcare Executives. 7 Units.**

Focuses on the conceptual, practical, and personal dimensions of executive leadership. Past and current leadership theories are addressed. Individual personal assessment and diagnosis. Once a month weekend course format.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Administration - Health Care Majors only.

## Hebrew (HEBREW)

### Courses

**HEBREW 1A. Fundamentals of Hebrew. 5 Units.**

Designed for students with little or no exposure to Hebrew. May focus on Biblical Hebrew and/or modern Hebrew. Students learn the writing system and basics of grammar via latest pedagogical materials. Topics in Jewish culture are also included.

Prerequisite: Placement into HEBREW 1A is also accepted.

**HEBREW 1C. Fundamentals of Hebrew. 5 Units.**

Designed for students with little or no exposure to Hebrew. May focus on Biblical Hebrew and/or modern Hebrew. Students learn the writing system and basics of grammar via latest pedagogical materials. Topics in Jewish culture are also included.

Prerequisite: HEBREW 1B. HEBREW 1B with a grade of C or better. Placement into HEBREW 1C is also accepted.

### (VI)

**HEBREW 10A. Hebrew Peer-to-Peer Language Mentor Program. 1 Unit.**

Peer-to-Peer Language Mentor Program in which student mentors work with student mentees to increase the language skills of both participants. One hour weekly meetings. HEBREW 10A is for language mentors.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**HEBREW 10B. Hebrew Peer-to-Peer Language Mentor Program. 1 Unit.**

Peer-to-Peer Language Mentor Program in which student mentors work with student mentees to increase the language skills of both participants. One hour weekly meetings. HEBREW 10B is for language mentors.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**HEBREW 50. Jewish and Israeli Culture. 4 Units.**

Examination of subjects relevant to the culture of Israel and Judaism in their historical and modern day contexts through the study of film, literature, religious texts, artistic representations, etc.

(IV, VIII)

**HEBREW 199. Independent Study. 4 Units.**

Research paper required.

Repeatability: May be repeated for credit unlimited times.

## Hindi (HINDI)

## History (HISTORY)

### Courses

**HISTORY 10. The Holocaust. 4 Units.**

Introduction to the history of European Jewish communities before the Holocaust; the origins of Nazi antisemitism; the implementation of the 'Final Solution'; Jewish resistance to the Nazis; and attempts in film and literature to represent the Holocaust since 1945.

(IV, VIII)

**HISTORY 11. Genocide and Crimes Against Humanity Since WWII. 4 Units.**

Investigates instances of genocide since 1945 (including Cambodia, Bosnia, Rwanda, and others); explores the history behind these mass murders; considers why people kill, how victims survive, and questions whether international agreements are enough to prevent crimes against humanity.

(III, VIII)

**HISTORY 12. Introductory Topics in History . 4 Units.**

Introduces methods and premises of historical study. Topics include introductions to cultural, political, economic, social, and religious history.

Repeatability: Unlimited as topics vary.

(IV)

**HISTORY 15A. Native American History. 4 Units.**

An overview of major developments in Indian-white relations from the American Revolution to the present with an emphasis on political and legal history. How tribal sovereignty has been redefined over time is a central theme of the course.

(IV, VII)

**HISTORY 15C. Asian American Histories. 4 Units.**

Examines and compares diverse experiences of major Asian American groups since the mid-nineteenth century. Topics include origins of emigration; the formation and transformation of community; gender and family life; changing roles of Asian Americans in American society. Formerly ASIANAM 60A.

Same as ASIANAM 50, SOC SCI 78A.

((III or IV) and VII ).

**HISTORY 15D. History of Sexuality in the US . 4 Units.**

Explores intertwined histories of sexuality, race, and gender in the US. By examining how different cultures and times viewed sexuality, race and gender, it analyzes relationships between regulation of bodies/behaviors and construction of cultural, economic, and political norms.

(IV, VII)

**HISTORY 15F. What to Eat? Immigrants and the Development of American Cuisines. 4 Units.**

Relationship between immigration and changing American foodways; impact of several major culinary traditions of immigrants and racial minorities, such as African Americans, Asian Americans, Mexican Americans, Italian Americans, Irish Americans, and Jewish Americans, on America's gastronomical and socioeconomic landscape.

((III or IV) and VII ).

**HISTORY 15G. Racial Segregation in Modern U.S.. 4 Units.**

Explores the history of racial segregation in the United States from the late 19th century to the present.

(VII)

**HISTORY 16A. World Religions I. 4 Units.**

An introduction to the history, doctrine, culture, and writing of Judaism, Christianity, and Islam.

Same as REL STD 5A.

(IV and VIII ).

**HISTORY 16B. World Religions II. 4 Units.**

An introduction to various religious traditions in selected areas of the world—including India and South Asia, East Asia, Africa, and the Americas.

Same as REL STD 5B.

(IV and VIII ).

**HISTORY 16C. Religious Dialogue. 4 Units.**

Lectures and discussion on controversial topics in religion: sexual morality; religious violence; science; treatment of women and girls; religious truth, American Constitutional matters; secularization; the future of religion, and other topics.

Same as REL STD 5C.

(IV, VIII)

**HISTORY 18A. Major Jewish Texts. 4 Units.**

Introduction to the diversity of Jewish cultures from ancient to modern times. Surveys the Jewish experience in various societies and civilizations: ancient Mediterranean, Middle East and North Africa, Europe, and the Americas.

(IV and VIII ).

**HISTORY 21A. World: Innovations. 4 Units.**

Treats major themes of world historical development through the mid-seventeenth century, focusing on the Eurasian world, but with secondary emphasis on Africa and the Americas.

(IV, VIII)

**HISTORY 21B. World: Empires and Revolutions. 4 Units.**

Examines three major transformations that made the world of 1870 dramatically different from that of 1650: e.g., the scientific revolution, industrialization, and the formation of modern states and nations.

(IV, VIII)

**HISTORY 21C. World: Nation, War, and Rights. 4 Units.**

Considers several major currents of modern history: technological change and its social effects; changes in gender relations; totalitarianism; peasant revolutions and the crisis of colonization; international migration; and ecological problems.

(IV and VIII ).

**HISTORY 36A. The Formation of Ancient Greek Society: Early Greece. 4 Units.**

A survey of ancient Greek civilization from its origins in the Bronze Age to the mid-Archaic period. Examines political and social history, as well as literature, art, religion, and archaeological remains.

Same as CLASSIC 36A.

(IV)

**HISTORY 36B. The Formation of Ancient Greek Society: Late Archaic and Classical Greece. 4 Units.**

A survey of ancient Greek civilization from the Late Archaic period to the Classical period. Focuses on major institutions and cultural phenomena as seen through the study of ancient Greek literature, history, archaeology, and religion.

Same as CLASSIC 36B.

(IV)

**HISTORY 36C. The Formation of Ancient Greek Society: Fourth-Century and Hellenistic Greece. 4 Units.**

A survey of ancient Greek civilization from the fourth century BCE through to the Hellenistic period. Focuses on major institutions and cultural phenomena as seen through the study of ancient Greek literature, history, archaeology, and religion.

Same as CLASSIC 36C.

(IV)

**HISTORY 37A. The Formation of Ancient Roman Society: Origins to Roman Republic. 4 Units.**

A survey of the development of Roman civilization from its eighth century BCE beginnings to the civil wars of the first century BCE. Examines political and social history, as well as literature, art, architecture, and religion.

Same as CLASSIC 37A.

(IV)

**HISTORY 37B. The Formation of Ancient Roman Society: Roman Empire. 4 Units.**

A survey of Roman civilization from Augustus's consolidation of power following the civil wars of the first century BCE to the crisis of the third century CE. Includes social history, literature, art, architecture, and religion.

Same as CLASSIC 37B.

(IV)

**HISTORY 37C. The Formation of Ancient Roman Society: The Fall of Rome. 4 Units.**

A survey of Roman civilization from the crisis of the third century CE to the so-called "fall of Rome" in 476 CE. Examines political and social history, as well as literature, art, architecture, and religion.

Same as CLASSIC 37C.

(IV)

**HISTORY 40A. Colonial America: New Worlds. 4 Units.**

Important themes in the social, economic, political, and cultural development in North America that transformed part of the geographical space into the U.S. Topics include Native Americans, European colonization, African enslavement, borderlands, gender, economic stratification, the American Revolution, the Constitution.

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

(IV)

**HISTORY 40B. Nineteenth-Century U.S.: Crisis and Expansion. 4 Units.**

Explores the transformation of American society, economy, and politics during the nineteenth century. Topics include industrial revolution, slavery, antislavery, women's rights, reform movements, Civil War and Reconstruction, immigration and ethnicity, and cultural and social transformation.

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

(IV)

**HISTORY 40C. Modern America: Culture and Power. 4 Units.**

Important themes in U.S. history in the twentieth and early twenty-first centuries. Topics include corporate capitalism, empire, immigration, race, gender, consumer society, World Wars, Progressiveness, New Deal, Great Society, civil rights, women's movements, Vietnam War, conservative politics, and economic stratification.

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

(IV)

**HISTORY 50. Crises and Revolutions. 4 Units.**

Study of turning points in world history, illustrating themes and methods of historical analysis.

Repeatability: May be taken for credit 3 times as topics vary.

(IV, VIII)

**HISTORY 60. The Making of Modern Science. 4 Units.**

Surveys the history of science and mathematics since the Scientific Revolution, examining central developments both chronologically and thematically, as well as investigating their significance for contemporary philosophical debates about the role and status of current scientific theories.

Same as LPS 60.

**(GE II or GE IV ).**

**HISTORY 70A. Problems in History: Asia. 4 Units.**

An introduction to the historical problems, the issues of interpretation, the primary sources, and the historical scholarship of the history of Asia, with an emphasis on developing skills in historical essay-writing.

Repeatability: Unlimited as topics vary.

**(IV, VIII)**

**HISTORY 70B. Problems in History: Europe. 4 Units.**

An introduction to the historical problems, the issues of interpretation, the primary sources, and the historical scholarship of the history of Europe, with an emphasis on developing skills in historical essay-writing.

Repeatability: Unlimited as topics vary.

**(IV, VIII)**

**HISTORY 70C. Problems in History: United States. 4 Units.**

An introduction to the historical problems, the issues of interpretation, the primary sources, and the historical scholarship of the history of the United States, with an emphasis on developing skills in historical essay-writing.

Repeatability: Unlimited as topics vary.

**(IV)**

**HISTORY 70D. Problems in History: Latin America. 4 Units.**

An introduction to the historical problems, the issues of interpretation, the primary sources, and the historical scholarship of the history of Latin America, with an emphasis on developing skills in historical essay-writing.

Repeatability: Unlimited as topics vary.

**(IV, VIII)**

**HISTORY 70E. Problems in History: Middle East and Africa. 4 Units.**

An introduction to the historical problems, the issues of interpretation, the primary sources, and the historical scholarship of the history of the Middle East and Africa, with an emphasis on developing skills in historical essay-writing.

Repeatability: Unlimited as topics vary.

**(IV, VIII)**

**HISTORY 70F. Problems in History: Transregional History. 4 Units.**

An introduction to the historical problems, the issues of interpretation, the primary sources, and the historical scholarship of transregional history, with an emphasis on developing skills in historical essay-writing.

Repeatability: Unlimited as topics vary.

**(IV, VIII)**

**HISTORY 100W. Writing About History. 4 Units.**

Specialized courses focusing on history writing and research skills. Each class reflects the instructor's intellectual interests and is conducted as a discussion group. Limited to 18 students. Several short writing assignments and one longer project meeting the upper-division writing requirement.

Prerequisite: HISTORY 12 or HISTORY 15A or HISTORY 15C or HISTORY 15D or HISTORY 16A or HISTORY 16B or HISTORY 16C or HISTORY 18A or HISTORY 21A or HISTORY 21B or HISTORY 21C or HISTORY 40A or HISTORY 40B or HISTORY 40C or HISTORY 60 or HISTORY 70A or HISTORY 70B or HISTORY 70C or HISTORY 70D or HISTORY 70E or HISTORY 70F. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: History Majors have first consideration for enrollment.

(Ib)

**HISTORY 102B. Topics in Environmental History. 4 Units.**

Explores the many historical interfaces between climate change, modes of production, and culture. Topics include the environmental history of warfare, imperialism, and famine in the nineteenth century and the history of environmental thought.

Repeatability: Unlimited as topics vary.

**HISTORY 110D. Topics in Medieval Europe. 4 Units.**

Studies of the topics in Medieval Europe.

Repeatability: Unlimited as topics vary.

**HISTORY 112D. Topics in Early Modern Europe. 4 Units.**

Theme-based approach to the main social, political, and cultural developments in Europe between the fifteenth and eighteenth centuries. Topics included Renaissance humanism, Reformation and Counter-Reformation, scientific revolution, court culture and nation building, interactions with non-European peoples, cities and commerce.

Repeatability: Unlimited as topics vary.

**HISTORY 114. Topics in Modern European History. 4 Units.**

Course content changes with instructor. Topics include the Inquisition; science and religion in modern Europe; sex and society in modern Europe; French revolutions; culture in interwar Europe; the Holocaust; the fall of communism in Eastern Europe.

Repeatability: Unlimited as topics vary.

**HISTORY 120D. War and Empire: France and the World in the 20th Century. 4 Units.**

Examines French experience of World War I, the defeat and occupation by Germany in World War II, the violent struggles that came with the loss of the French empire in the 1950s and 1960s, immigration, French responses to globalization.

**HISTORY 122B. Hitler and the Germans. 4 Units.**

Focuses on Hitler's rise to power and Nazi society. Examines Germany's defeat in World War I; the political and cultural experimentation of the 1920s; the causes of Hitler's success; and life in Germany under the Nazis.

**HISTORY 123D. Topics in Spanish History. 4 Units.**

Topics include Spain in the nineteenth century, the Spanish Civil War, and dictatorship and democracy in modern Spain.

Repeatability: Unlimited as topics vary.

**HISTORY 124B. Twentieth-Century Russia. 4 Units.**

Political and social developments in Twentieth-Century Russia.

**HISTORY 126B. The Era of World War II: 1933-45. 4 Units.**

The era of World War II and its political, social and economic history.

**HISTORY 128C. Topics in the History of Women in Europe. 4 Units.**

Studies in selected areas of history of European women. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 130C. Topics in the Jewish History. 4 Units.**

Studies in selected areas of Jewish history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 130F. Jews and Power. 4 Units.**

Examines the relationship between the Jewish people and political power over a 3500 year period. How have Jews preserved their communal interests and personal safety? How have they defined the proper relationship of the people to political authority.

Same as POL SCI 154J, REL STD 130F.

**HISTORY 131A. History of Zoroastrianism. 4 Units.**

Reviews major trends in the history of Zoroastrianism.

Same as REL STD 131A.

**HISTORY 131B. Ancient Persia. 4 Units.**

Survey of the history of Persia in antiquity.

**HISTORY 131C. Medieval Persia. 4 Units.**

A survey of Persian history in the context of Late Antique and Medieval Islamic history.

**HISTORY 131D. Modern Iran. 4 Units.**

The history of Iran from the end of the Safavid Empire in the eighteenth century to the present.

**HISTORY 132B. The Emergence of the Modern Middle East. 4 Units.**

Offers a survey of the history of the Middle East from the 19th century to the present time. Formerly History 133A.

**HISTORY 132C. Women and Gender in the Middle East. 4 Units.**

Focuses on women and gender in the Middle East from the pre-modern to the contemporary.

**HISTORY 132D. Armenians and Armenia in Ancient to Early Modern World History. 4 Units.**

A history of Armenia and Armenians from ethnogenesis to the early modern period at the end of the 1700s within a regional and global context. Takes into account interactions and encounters with the empires, and peoples that encompassed their orbit.

**HISTORY 132E. Armenians and Armenia in Modern World History. 4 Units.**

Covers the most important themes in the history of Armenians and Armenia in the 19th, 20th, and 21st centuries within a regional (i.e., Middle East and Caucasus) and global context.

**HISTORY 132H. Topics in Middle Eastern History. 4 Units.**

Topics include the cultural, political, intellectual, social, and/or economic histories of one or many regions of the Middle East.

Repeatability: Unlimited as topics vary.

**HISTORY 134A. Africa: Societies and Cultures. 4 Units.**

Introduction to the variety of cultures, political organizations, social structures, and artistic expressions created by Africans over a broad time span. Indigenous development of African societies in distinct regions of the continent. Issues, themes, processes for understanding history of Africa.

**HISTORY 134C. Topics in the History of Africa. 4 Units.**

Studies in selected areas of African history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 134D. Topics in South African History. 4 Units.**

Introduction to important historical events and processes in Southern Africa. Focuses on particular themes and explores how those themes change over time. Topics include: changing ideas about race, the development of class structures, identity formation, the role of gender.

Repeatability: Unlimited as topics vary.

**HISTORY 134E. History of the African Diaspora. 4 Units.**

Examines the causes and consequences of the multiple diasporas of African peoples since the sixteenth century in the Atlantic world, especially the Americas and Europe.

Same as AFAM 137.

**HISTORY 135B. Crossing the World's Oceans: From Sail to Steam. 4 Units.**

Explores the basics of oceanography, the evolution of ships and sailing in the ancient Mediterranean world, the North Atlantic, Polynesia, the South China Sea, the Arab Indian Ocean, the global oceanic world, and the discovery of celestial and terrestrial navigation.

**HISTORY 135E. Topics in the History of Science and Technology. 4 Units.**

Studies in selected areas of science and technological history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 135G. Language Origins: Evolution, Genetics, and the Brain. 4 Units.**

Examines how human language(s) may have originated. Studies pertinent techniques (reconstruction) and addresses related questions, including is our language faculty inborn (i.e., genetically encoded)? Can brain imaging and population genetics research help to unlock this mystery of human evolution?.

Same as ANTHRO 152A, GLBLCLT 105, LSCI 175.

**HISTORY 136D. Topics in the History of Medicine and Health Care. 4 Units.**

Studies in selected areas of Medicine and Health Care history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 140B. Revolutionary America: 1740-1790. 4 Units.**

An exploration of why 13 continental colonies, whose commercial and cultural connections with Britain far exceed their interaction with one another, resisted imperial reform after 1763 to the point of war in 1775 and independence the following year.

**HISTORY 142A. California Dreaming: Conquest, Conflict, and Globalization in the Golden State. 4 Units.**

California as a case study of national trends and as a unique setting: its specific problems and culture. Major themes include: colonization, immigration, race relations, agricultural development, industrialization, urbanization, working class movements, social conflict, and political reform.

**HISTORY 142B. Topics in American Social and Economic History. 4 Units.**

Studies in selected areas of American social and economic history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 144G. Topics in American Cultural and Intellectual History. 4 Units.**

Studies in selected areas of American cultural and intellectual history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 146H. Topics in Women and Gender Relations in the United States. 4 Units.**

Studies in selected areas of women and gender relations in the United States. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 147. Education and the American Dream: Historical Perspectives on Democracy and Education. 4 Units.**

Examines the relationship between public schooling and the promotion of democratic ideals in American society over the past two centuries.

Same as EDUC 174.

**HISTORY 148B. Topics in Multicultural U.S. History. 4 Units.**

Examines the variety of cultural expressions through which the people who came to inhabit the United States historically signify their collective identities.

Repeatability: Unlimited as topics vary.

**HISTORY 149. Veterans in History and Society. 4 Units.**

Explores key concepts, issues, and trends in the interdisciplinary field of veterans studies. Students gain a deep understanding of the ways that social scientists and historians have analyzed the identities, experiences, and worldviews of U.S. military veterans.

Same as SOC SCI 132.

**HISTORY 150. Topics in African American History. 4 Units.**

Studies in selected areas of African American history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as AFAM 138.

**HISTORY 151A. Chicana/Chicano History: Pre-Colonial to 1900. 4 Units.**

Examines social history of the southwest region from antiquity to 1900. Discusses major questions, theory and research methods pertinent to Chicanas/Chicanos. Themes include: indigenous empires, conquest, colonialism, social stratification, ideology, marriage, sexuality, industrial capitalism, accommodation and resistance.

Same as CHC/LAT 132A.

**HISTORY 151B. Chicana/Chicano History: Twentieth Century. 4 Units.**

Examines social history of the Southwest with emphasis on Mexican-origin people. Discusses major questions, theory and research methods pertinent to Chicana/Chicano history. Themes explored include: immigration, xenophobia, class struggle, leadership, generational cohorts, unionization, education, barrioization, ethnicity, patriarchy, sexuality.

Same as CHC/LAT 132B.

**HISTORY 151C. Latinas in the Twentieth Century U.S.. 4 Units.**

Latinas in the U.S. from 1900 to present, offering a diversity of their cultures, regional histories, sexualities, generations, and classes.

Same as CHC/LAT 135.

**HISTORY 151D. Latina/Latino Pop: Latina/Latino Popular Culture. 4 Units.**

With a focus on the politics of language and space/place, prepares students to critically analyze sites of Latina/Latino popular culture including: music, film, performance, sports, media, and varied subcultures.

Same as CHC/LAT 121.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment. History Majors have first consideration for enrollment.

**HISTORY 152. Topics in Asian-American History. 4 Units.**

Introduction to important themes in the history of people of Asian ancestry in the United States from the nineteenth century to the present.

Repeatability: Unlimited as topics vary.

**HISTORY 152A. Asian American Labor. 4 Units.**

Explores history of Asian Americans and work from the nineteenth century to the present. Areas of study include migration, colonialism, family, social organization, and work culture.

Same as ASIANAM 137.

**HISTORY 152B. Asian American and African American Relations. 4 Units.**

Addresses relationships of Asian American and African American communities in the United States. Topics include race, class, gender, labor, economic systems, political mobilization, community, civil rights, activism, cultural expression.

Same as AFAM 117, ASIANAM 167.

**HISTORY 154. American Urban History. 4 Units.**

A study of urban communities in the United States, from colonial times to the present. Traces the impact of industrialization and urbanization on social and cultural life, and investigates the significance of urban life for U.S. democratic culture.

**HISTORY 160. Sex and Conquest in Latin America. 4 Units.**

Competing ideas of masculinity and femininity, sexual violence, sexual identities, and gendered hierarchies informed how the Spanish engaged in military and religious domination of Mexican and Andean communities, as well as the forms of native resistance throughout colonial Latin America.

Same as ANTHRO 140, CHC/LAT 150A, GEN&SEX 171A.

**HISTORY 162. Topics in Brazilian History. 4 Units.**

Studies in selected areas of Brazilian history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 163. World of Coffee . 4 Units.**

History of consumption and production of coffee over the centuries, and coffee's cultural, economic, social, political consequences. Coffee's social life as a drug, symbol of hospitality, religious rite, sociability and bourgeois lifestyle, commodity, source of livelihoods, imperial revenues, corporate profits.

Same as INTL ST 111B.

**HISTORY 164A. Caribbean History: Colonization to Emancipation. 4 Units.**

Exploration of the history of the archipelago from pre-Columbian times to the end of slavery; examining the impact of European colonization, decimation of the indigenous populations, African slavery, resistance, and emancipation; the unity and diversity of experience in region.

Same as AFAM 134A.

**HISTORY 164B. Caribbean History: Emancipation to Independence. 4 Units.**

Post-emancipation and anti-colonial struggles ending with political independence for most of the region. Examines social, political, economic, cultural dimensions of post-emancipation period, including large-scale migration to Central America, the U.S., and Britain; the region's global cultural and political contribution.

Same as AFAM 134B.

**HISTORY 165. Race and Empire in Colonial Latin America. 4 Units.**

Explores how native people of Latin America with enslaved and free African incorporated and defied Spanish and Portuguese colonization. Focuses on religious adaptations, resistance movements, legal systems, and the emergence of multicultural communities to explain how race shaped European empires.

Same as ANTHRO 162C.

**HISTORY 165A. War and Revolution in Colonial Latin America. 4 Units.**

Comparison of how Andeans resurrected the leaders of the Inca, a defeated indigenous empire, to contest the Spanish empire with how enslaved Africans, with their descendants and others, defeated Spanish colonial rule in what would become the Cuban nation.

**HISTORY 166. U.S. Intervention in Latin America. 4 Units.**

Explores political, economic, social, and cultural ties that bind Latin America to the United States. Focuses on U.S. intervention and Latin American response from early nineteenth century to present day. Case studies include Mexico, Guatemala, Cuba, Chile, and Central America.

Same as POL SCI 142J, INTL ST 177D, CHC/LAT 150.

**HISTORY 166B. Revolution and Reaction in Cold War Latin America. 4 Units.**

Explores Latin American experiences of revolutionary change and military dictatorship during the Cold War (1945-1990). Pays particular attention to the lives of women, peasants, workers, and the urban middle classes. Case studies include Guatemala, Cuba, Chile, Argentina, Nicaragua, and Mexico.

Same as INTL ST 177G.

**HISTORY 166C. Cuban Society and Revolution. 4 Units.**

Explores the causes, development, and legacy of the 1959 Revolution. Themes include economic dependency, democracy, race, gender, culture, and the always volatile relations between Cuba and the United States.

Same as POL SCI 153G, INTL ST 177E, CHC/LAT 157.

**HISTORY 166D. Revolution in Latin America. 4 Units.**

Presents a comparative analysis of the causes, development, and consequences of selected revolutionary movements, focusing on outbreaks in Mexico, Bolivia, Cuba, Chile, Nicaragua, and Grenada. Explores topics of state formation, economic nationalism, social justice, ethnicity, and role of international affairs.

Same as CHC/LAT 151B, SOC SCI 173N, INTL ST 177C.

**HISTORY 169. Topics in Latin American History. 4 Units.**

Studies in selected areas of Latin American history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 170A. Ancient India. 4 Units.**

Examines the visual and religious history of the region defined as 'India' today, but necessarily encompassing modern Bangladesh and Pakistan. Culminates with the supposed Golden Age of the Gupta empire and its far-reaching legacies.

Same as ART HIS 155A, REL STD 122.

Concurrent with ART HIS 255A.

**HISTORY 170B. Medieval India. 4 Units.**

Begins with the Gupta period's aesthetic legacies in South Asia's architecture, sculpture, and painting. Explores the dispersal of Islam throughout South Asia, including the Muslim communities of southern India.

Same as ART HIS 155B, REL STD 123.

Concurrent with ART HIS 255B.

**HISTORY 171D. Chinese History to 1800. 4 Units.**

A survey of the history of China to 1800.

**HISTORY 171E. Chinese History: 1800-1949. 4 Units.**

An examination of Chinese society and thought from the late-eighteenth century to the 1949 revolution. Focuses on the role of intellectuals; popular culture; women in Chinese society; developments in commerce and urban life; rebellion; foreign imperialism.

**HISTORY 171G. Topics in the History of China. 4 Units.**

Topics include the cultural, political, economic, social, intellectual, and religious history of China.

Repeatability: Unlimited as topics vary.

**HISTORY 172G. Topics in the History of Japan. 4 Units.**

Topics include the cultural, political, economic, social, intellectual and religious history of Japan.

Repeatability: Unlimited as topics vary.

**HISTORY 173G. Topics in the History of Korea. 4 Units.**

Topics include the cultural, political, economic, social, intellectual, and religious history of Korea.

Repeatability: Unlimited as topics vary.

**HISTORY 174G. Topics in the History of South Asia. 4 Units.**

Topics include the cultural, political, economic, social, intellectual, and religious history of South Asia.

Repeatability: Unlimited as topics vary.

**HISTORY 180. Special Studies in Social History. 4 Units.**

Studies in selected areas of social history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 182. Special Studies in Intellectual-Cultural History. 4 Units.**

Studies in selected areas of intellectual-cultural history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 183. Special Studies in International History. 4 Units.**

Studies in selected areas of international history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 184. Special Studies in Comparative History. 4 Units.**

Studies in selected areas of comparative history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 185. Special Studies in Social Theory. 4 Units.**

Studies in selected areas of social theory. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 190. Colloquium . 4 Units.**

Specialized courses dealing primarily with close reading and analysis of primary and secondary works; required reports and papers. Each colloquium reflects the instructor's intellectual interests and is conducted as a discussion group. Limited to 18 students.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only. History Majors have first consideration for enrollment.

**HISTORY 193. Advanced Research Seminar I. 4 Units.**

The first course in a two-quarter advanced research sequence, this course allows upper-division history majors to undertake significant research and writing under close faculty supervision.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: History majors only. Upper-division students only.

**HISTORY 194. Advanced Research Seminar II. 4 Units.**

Second course in a two-quarter advanced research sequence. Allows upper division history majors to undertake significant research and writing under close faculty supervision.

Prerequisite: HISTORY 193. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. History Majors only.

**HISTORY 197. Internships in Public History. 4 Units.**

Students will sharpen their abilities to research, critically interpret, and present history by "doing history" beyond the formal classroom. Internships, which introduce students to the field of "public history," include working as archivists, oral historians, project advisers, and exhibit curators.

Grading Option: Pass/no pass only.

Restriction: Upper-division students only. History Majors only.

**HISTORY 198. Directed Group Study. 4 Units.**

Special topics through directed reading. Paper required.

Repeatability: Unlimited as topics vary.

**HISTORY 199. Independent Reading. 1-4 Units.**

Investigation of special topics through directed reading. Paper required.

Repeatability: May be repeated for credit unlimited times.

**HISTORY 200. History and Theory. 4 Units.**

Explores a variety of theoretical issues and methodological concerns that have sparked lively debate in the humanities and social sciences in past decades and which remain of urgent concern to 21st-century historical writing.

Repeatability: May be repeated for credit unlimited times.

**HISTORY 202A. First-Year Research Seminar. 4 Units.**

Introduction to historical methodologies and preparation for the first-year research paper. Required of all first-year doctoral students and M.A. students.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. History Majors only.

**HISTORY 202B. First-Year Research Seminar. 4 Units.**

Research and writing of a paper demonstrating command of historical methods explored in HISTORY 202A. Required of all first-year Ph.D. students and M.A. students.

Prerequisite: HISTORY 202A

Repeatability: May be taken for credit 1 times as topics vary.

**HISTORY 204A. Second-Year Research Seminar. 4 Units.**

Part one of a two-quarter sequence required of all Ph.D. students during the second year of the program; not required for M.A. students. Includes primary research and writing a research paper, often related to a future dissertation topic.

Restriction: Graduate students only. History Majors only.

**HISTORY 204B. Second-Year Research Seminar. 4 Units.**

Part two of a two-quarter sequence required of all Ph.D. students. Taken during the second year of the Ph.D. program; not required for M.A. students. Includes primary research and writing a research paper, often related to a future dissertation topic.

Prerequisite: HISTORY 204A

Restriction: Graduate students only. History Majors only.

**HISTORY 230. Topics in European History . 4 Units.**

Studies in selected themes and time periods in European history. Topics and period vary.

Repeatability: Unlimited as topics vary.

**HISTORY 240. Topics in World History. 4 Units.**

Studies in selected themes and time periods in world history. Topics and period vary.

Repeatability: Unlimited as topics vary.

**HISTORY 250. Topics in Latin American History . 4 Units.**

Studies in selected themes and time periods in Latin American history. Topics and period vary.

Repeatability: Unlimited as topics vary.

**HISTORY 260. Topics in American History. 4 Units.**

Studies in selected themes and time periods in U.S. history. Topics and period vary.

Repeatability: Unlimited as topics vary.

**HISTORY 270C. Seminar in Japanese History: 1600-Present. 4 Units.**

Studies in Japanese history since 1600. Topics addressed vary each quarter.

**HISTORY 273. Research Methods in Chinese History. 4 Units.**

Introduces major tools for research in Qing and twentieth-century Chinese history as well as an introduction to research tools for earlier periods.

**HISTORY 280. Topics in Asian History. 4 Units.**

Studies in selected themes and time periods in Asian history. Topics and period vary.

Repeatability: Unlimited as topics vary.

**HISTORY 290. Special Topics . 4 Units.**

Lectures, readings, and discussion on subjects more limited in scope than those included in the year-long colloquium series.

Repeatability: Unlimited as topics vary.

**HISTORY 291. Directed Reading. 4-12 Units.**

Reading courses focused on specialized topics.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. History Majors only.

**HISTORY 297. History Internship. 4 Units.**

Limited to History graduate students with Department-approved internships. Materials fee.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. History Majors only.

**HISTORY 298. Experimental Group Study. 4-12 Units.**

Open to four or more students.

Repeatability: May be repeated for credit unlimited times.

**HISTORY 299. Dissertation Research. 4-12 Units.**

Specifically designed for students researching and writing their dissertations.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Advancement to Ph.D. candidacy.

**HISTORY 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Humanities (HUMAN)

### Courses

**HUMAN 1A. Humanities Core Lecture. 4 Units.**

Through a range of cultural traditions and an interdisciplinary approach to works of literature, history, philosophy, and contemporary media, students are introduced to the humanities.

Restriction: Lower-division students only.

**(IV)****HUMAN 1AES. Humanities Core Writing: Entry Level Writing. 4 Units. 2 Workload Units.**

A small writing course for Entry Level Writing students exploring the ideas presented in the companion lecture course and illustrated in the literary, historical, philosophical, and media works assigned.

Corequisite: HUMAN 1A

Grading Option: Workload Credit Letter Grade with P/NP.

Overlaps with HUMAN 1AS, HUMAN H1AS.

Restriction: Lower-division students only.

**HUMAN 1AS. Humanities Core Writing. 4 Units.**

A small writing course in which students explore the ideas presented in the companion lecture course and illustrated in the literary, historical, philosophical, and media works assigned.

Corequisite: HUMAN 1A

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

Overlaps with HUMAN 1AES, HUMAN H1AS.

Restriction: Lower-division students only.

**(Ia)****HUMAN 1B. Humanities Core Lecture. 4 Units.**

Through a range of cultural traditions and an interdisciplinary approach to works of literature, history, philosophy, and contemporary media, students are introduced to the humanities.

Restriction: Lower-division students only.

**(IV)****HUMAN 1BES. Humanities Core Writing: Entry Level Writing. 4 Units. 2 Workload Units.**

A small writing course for Entry Level Writing students exploring the ideas presented in the companion lecture course and illustrated in the literary, historical, philosophical, and media works assigned.

Corequisite: HUMAN 1B

Prerequisite: HUMAN 1AES. HUMAN 1AES with a grade of C- or better

Grading Option: Workload Credit Letter Grade with P/NP.

Overlaps with HUMAN 1BS, HUMAN H1BS.

Restriction: Lower-division students only.

**(Ia)**

**HUMAN 1BS. Humanities Core Writing. 4 Units.**

A small writing course in which students explore the ideas presented in the companion lecture course and illustrated in the literary, historical, philosophical, and media works assigned.

Corequisite: HUMAN 1B

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

Overlaps with HUMAN H1BS, HUMAN 1BES.

Restriction: Lower-division students only.

**(Ia)**

**HUMAN 1C. Humanities Core Lecture. 4 Units.**

Through a range of cultural traditions and an interdisciplinary approach to works of literature, history, philosophy, and contemporary media, students are introduced to the humanities.

Prerequisite: HUMAN 1A or HUMAN 1B

Restriction: Lower-division students only.

**(IV and VII and VIII ).**

**HUMAN 1CS. Humanities Core Writing. 4 Units.**

A small writing course in which students explore the ideas presented in the companion lecture course and illustrated in the literary, historical, philosophical, and media works assigned.

Corequisite: HUMAN 1C

Prerequisite: HUMAN 1AS or HUMAN H1AS or HUMAN 1AES or HUMAN 1BS or HUMAN H1BS or HUMAN 1BES. HUMAN 1AS with a grade of C or better. HUMAN H1AS with a grade of C or better. HUMAN 1AES with a grade of C or better. HUMAN 1BS with a grade of C or better. HUMAN H1BS with a grade of C or better. HUMAN 1BES with a grade of C or better

Overlaps with HUMAN H1CS, HUMAN 1CES.

Restriction: Lower-division students only.

**(Ia)**

**HUMAN B1A. Humanities Core Biological Sciences Lecture. 4 Units.**

Through a range of cultural traditions and an interdisciplinary approach to works of literature, history, philosophy, and contemporary media, students are introduced to the humanities.

Overlaps with HUMAN 1A.

Restriction: Lower-division students only. Biological Sciences Majors only.

**(IV)**

**HUMAN H1AS. Humanities Core Writing: Honors. 4 Units.**

For Campuswide Honors students exploring the ideas presented in the companion lecture course and illustrated in the literary, historical, philosophical, and media works assigned.

Corequisite: HUMAN 1A

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

Overlaps with HUMAN 1AS, HUMAN 1AES.

Restriction: Campuswide Honors Collegium students only. Lower-division students only.

**(Ia)**

**HUMAN H1BS. Humanities Core Writing: Honors. 4 Units.**

For Campuswide Honors students exploring the ideas presented in the companion lecture course and illustrated in the literary, historical, philosophical, and media works assigned.

Corequisite: HUMAN 1B

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

Overlaps with HUMAN 1BS, HUMAN 1BES.

Restriction: Campuswide Honors Collegium students only. Lower-division students only.

**(Ia)**

**HUMAN H1CS. Humanities Core Writing: Honors. 4 Units.**

For Campuswide Honors students exploring the ideas presented in the companion lecture course and illustrated in the literary, historical, philosophical, and media works assigned.

Corequisite: HUMAN 1C

Prerequisite: HUMAN 1AS or HUMAN H1AS or HUMAN 1AES or HUMAN 1BS or HUMAN H1BS or HUMAN 1BES with a grade of C or better.

Overlaps with HUMAN 1CS, HUMAN 1CES.

Restriction: Lower-division students only. Campuswide Honors Program students only.

**(Ia)**

**HUMAN 10. Masterpieces of Literature. 4 Units.**

Students closely read major works of world literature that are significant (1) in their own right, (2) for a specific literary tradition, and (3) because of their reception in other cultural contexts. Literature written in English and English translation.

Repeatability: Unlimited as topics vary.

**(IV and VIII ).**

**HUMAN 52. Foundations of Bilingual Education and Bilingualism. 4 Units.**

Provides a comprehensive overview of current issues in bilingual education and bilingualism. Topics include dimensions of bilingualism, the effects of bilingualism on children's linguistic and cognitive development, bilingual education programs, literacy, special needs, and assessment.

Same as EDUC 52, LSCI 51B.

**HUMAN H80. Exploring Memory. 4 Units.**

Questions about human memory are central to a wide range of disciplines. Students will explore how historians, sociologists, social psychologists, legal experts, and neuroscientists understand human memory and apply their findings to understand and shape their own societies.

Restriction: Campuswide Honors Collegium students only.

**(IV)**

**HUMAN H81. The Vietnam War . 4 Units.**

Examines the origins, evolution, opposition against, conclusion, and legacy of the United States in the Vietnam War.

Restriction: Campuswide Honors Collegium students only.

**(GE III or IV ).**

**HUMAN H83. How Nations Remember. 4 Units.**

Just like people, nations select and organize what and how they want to remember. Compares how specific historical events (such as slavery and the Holocaust) are memorialized in various countries and represented in public art works, museums, literature, and film.

Restriction: Campuswide Honors Collegium students only.

**(III)**

**HUMAN H84. Traveling East/West. 4 Units.**

Traveling East/West presents a wide range of travel writings by Chinese, Indian, and Euro-American authors in which they contemplate the complexities of cross-cultural encounters and how knowledge about others and knowledge of ourselves are closely intertwined.

Same as EAS H84.

Restriction: Campuswide Honors Collegium students only.

**(IV)****HUMAN H120. Honors Proseminar . 4 Units.**

Interdisciplinary Honors courses organized each year around a single topic problem designed to compare and contrast modes of analysis in history, literary studies, and philosophy.

Repeatability: May be taken for credit 3 times as topics vary.

Restriction: Humanities Honors students only.

**HUMAN H140. Senior Honors Seminar. 4 Units.**

Directed by Humanities Honors Thesis Advisor and required of students in Humanities Honors program and Humanities majors in Campuswide Honors Program. Designed to facilitate exchange of ideas and research strategies among students and begin process of writing senior honors thesis.

Restriction: Humanities Honors students only. Seniors only.

**HUMAN H141. Senior Honors Thesis. 4 Units.**

Directed independent research required of participants in the Humanities Honors Program and Humanities majors in the Campuswide Honors Program.

Prerequisite: HUMAN H140

Restriction: Campuswide Honors Collegium students only. Humanities Honors students only.

**HUMAN H142W. Senior Honors Colloquium. 4 Units.**

Completion, presentation, and discussion of Senior Honors Theses.

Prerequisite: HUMAN H141

Restriction: Campuswide Honors Collegium students only. Humanities Honors students only.

**(Ib)****HUMAN H145. Arts of Contemporary Communication. 4 Units.**

A workshop seminar exploring the theory and practice of visual design, data visualization, and oral presentation. Designed to get students to think about, and hone their skills in, effective presentation of information in multiple media.

Restriction: Campuswide Honors Collegium students only. Humanities Honors Program students can enroll as space allows.

**HUMAN 175. Topics in Humanities and Science . 4 Units.**

Interdisciplinary topics exploring the relationship between the humanities and the physical and biological sciences.

Repeatability: May be taken for credit 3 times as topics vary.

**HUMAN 195. Humanities Out There (H.O.T.) Practicum. 0 - 2 Units.**

H.O.T. sponsors tutoring opportunities in local schools and after-school sites for UCI students. Requirements include weekly one-hour training sessions at UCI; at least eight off-site tutoring sessions; and short writing assignments.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 8 units.

**HUMAN 198. Directed Group Study. 1-4 Units.**

Directed group study on special topics.

Grading Option: Pass/no pass only.

Repeatability: Unlimited as topics vary.

**HUMAN 199. Directed Research. 1-4 Units.**

Directed research for senior Humanities students.

Repeatability: Unlimited as topics vary.

Restriction: Seniors only.

**HUMAN 220B. Studies in Literary Theory and Its History. 4 Units.**

Introduction to criticism and aesthetics for beginning graduate students. Readings from continental, English, and American theorists.

Same as CRITISM 220B.

Restriction: Graduate students only.

**HUMAN 260A. Critical Theory Workshop.**

A year-long Critical Theory Workshop, conducted by a team of instructors, conceived as a reading group, and developed with the input of all participants, where significant texts are discussed and analyzed in class.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**HUMAN 260B. Critical Theory Workshop.**

A year-long Critical Theory Workshop, conducted by a team of instructors, conceived as a reading group, and developed with the input of all participants, where significant texts are discussed and analyzed in class.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**HUMAN 260C. Critical Theory Workshop. 4 Units.**

A year-long Critical Theory Workshop, conducted by a team of instructors, conceived as a reading group, and developed with the input of all participants, where significant texts are discussed and analyzed in class.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**HUMAN 261. Race and Justice Studies Writing Seminar . 4 Units.**

A required writing-intensive seminar conducted by an instructor affiliated with the Race and Justice Studies emphasis. Students with manuscripts on relevant topics will read and critique peer manuscripts, and revise manuscripts toward completion of articles, dissertation chapters, and other publications.

Prerequisite: CRM/LAW C260C

Same as CRM/LAW C261, SOC SCI 253K.

Restriction: Graduate students only.

**HUMAN 265A. Issues In Latin American Studies I.**

Students discuss significant texts on Latin America from a range of disciplines in the humanities, social sciences, and the arts. This course will meet 3-4 times per quarter throughout the academic year.

Grading Option: Satisfactory/unsatisfactory only.

**HUMAN 265B. Issues In Latin American Studies II.**

Students discuss significant texts on Latin America from a range of disciplines in the humanities, social sciences, and the arts. This course will meet 3-4 times per quarter throughout the academic year.

Prerequisite: HUMAN 265A

Grading Option: Satisfactory/unsatisfactory only.

**HUMAN 265C. Issues In Latin American Studies III . 4 Units.**

Students discuss significant texts on Latin America from a range of disciplines in the humanities, social sciences, and the arts. This course will meet 3-4 times per quarter throughout the academic year.

Prerequisite: HUMAN 265B

Grading Option: Satisfactory/unsatisfactory only.

**HUMAN 270. Advanced Critical Theory. 4 Units.**

Seminars on various topics in critical theory.

Prerequisite: Students should have taken introductory courses before enrolling in these seminars.

Repeatability: Unlimited as topics vary.

**HUMAN 298. Humanities Out There (H.O.T.) Practicum. 4 Units.**

Individual study with H.O.T. faculty supervisor.

Repeatability: May be repeated for credit unlimited times.

**HUMAN 398A. Foreign Language Teaching: Approaches and Methods. 2 Units.**

Introduces approaches and methods of foreign language learning and teaching, and the theoretical models of second-language acquisition and teaching. Focus areas include lesson planning, teaching vocabulary, grammar, speaking, reading, writing, listening, culture, task-based teaching, uses of digital media.

Restriction: Graduate students only.

**HUMAN 398B. Foreign Language Teaching: Approaches and Methods. 2 Units.**

Introduces approaches and methods of foreign language learning and teaching, and the theoretical models of second-language acquisition and teaching. Focus areas include lesson planning, teaching vocabulary, grammar, speaking, reading, writing, listening, culture, task-based teaching, uses of digital media.

Restriction: Graduate students only.

**HUMAN 399. University Teaching. 4 Units.**

Limited to Teaching Associates in Humanities Core course.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Humanities and Arts (HUMARTS)

## Informatics (IN4MATX)

### Courses

**IN4MATX 12. Barter to Bitcoin: Society, Technology and the Future of Money. 4 Units.**

Digital money has captured the broad imagination of speculators, coders, regulators, criminals and the mass media. Course puts this change in context: how do we understand money as a social, political and technological phenomenon?.

Same as SOC SCI 11A.

(II and III ).

**IN4MATX 43. Introduction to Software Engineering. 4 Units.**

Concepts, methods, and current practice of software engineering. Large-scale software production, software life cycle models, principles and techniques for each stage of development.

Prerequisite: I&C SCI 32 or I&C SCI 32A

Overlaps with I&C SCI 105.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX H81. Ethics, Technology, and Design. 4 Units.**

Provides a critical framework for how and why biases of many kinds are built into everyday digital tools. Reflections on ethics, technology, and design through case studies drawn from machine learning, CS education, engineering, social media, and criminal justice.

Restriction: Campuswide Honors Collegium students only.

**(III)****IN4MATX 101. Concepts in Programming Languages I. 4 Units.**

In-depth study of several contemporary programming languages stressing variety in data structures, operations, notation, and control. Examination of different programming paradigms, such as logic programming, functional programming and object-oriented programming; implementation strategies, programming environments, and programming style.

Prerequisite: (I&C SCI 51 or CSE 31 or EECS 31) and (I&C SCI 46 or CSE 46). I&C SCI 51 with a grade of C or better. CSE 31 with a grade of C or better. EECS 31 with a grade of C or better. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better

Same as COMPSCI 141.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 102. Concepts of Programming Language II. 4 Units.**

In-depth study of major programming paradigms: imperative, functional, declarative, object-oriented, and aspect-oriented. Understanding the role of programming languages in software development and the suitability of languages in context. Domain-specific languages. Designing new languages for better software development support.

Prerequisite: IN4MATX 101 or COMPSCI 141 or CSE 141

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 113. Requirements Analysis and Engineering. 4 Units.**

Equips students to develop techniques of software-intensive systems through successful requirements analysis techniques and requirements engineering. Students learn systematic process of developing requirements through cooperative problem analysis, representation, and validation.

Prerequisite: (I&C SCI 33 or CSE 43) and IN4MATX 43. I&C SCI 33 with a grade of C or better. CSE 43 with a grade of C or better. IN4MATX 43 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 115. Software Testing, Analysis, and Quality Assurance. 4 Units.**

Preparation for developing high-quality software through successful verification and validation techniques. Fundamental principles of software testing, implementing software testing practices, ensuring the thoroughness of testing to gain confidence in the correctness of the software.

Prerequisite: (I&C SCI 45J or I&C SCI 45C or I&C SCI 46 or CSE 46) and IN4MATX 43. I&C SCI 45J with a grade of C or better. I&C SCI 45C with a grade of C or better. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better. IN4MATX 43 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 117. Project in Software System Design. 4 Units.**

Specification, design, construction, testing, and documentation of a complete software system. Special emphasis on the need for and use of teamwork, careful planning, and other techniques for working with large systems.

Prerequisite: (IN4MATX 43 and I&C SCI 33) or CSE 43

Restriction: Upper-division students only. School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 121. Software Design: Applications. 4 Units.**

Introduction to application design: designing the overall functionality of a software application. Topics include general design theory, software design theory, and software architecture. Includes practice in designing and case studies of existing designs.

Prerequisite: I&C SCI 33 or CSE 43. I&C SCI 33 with a grade of C or better. CSE 43 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 122. Software Design: Structure and Implementation. 4 Units.**

Introduction to implementation design: designing the internals of a software application. Topics include design aesthetics, design implementation, design recovery, design patterns, and component reuse. Includes practice in designing and case studies of existing designs.

Prerequisite: (I&C SCI 45J or I&C SCI 46 or IN4MATX 45) and (IN4MATX 101 or COMPSCI 141 or CSE 141)

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 124. Internet Applications Engineering. 4 Units.**

Concepts in Internet applications engineering with emphasis on the Web. Peer-to-Peer and Interoperability. Topics include HTTP and REST, Remote Procedure/Method Calls, Web Services, data representations, content distribution networks, identity management, relevant W3C/IETF standards, and relevant new large-scale computing styles.

Prerequisite: (COMPSCI 132 or EECS 148) and I&C SCI 45J

Same as COMPSCI 137.

Overlaps with COMPSCI 122B.

Restriction: Upper-division students only. School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 125. Computer Game Development. 4 Units.**

Introduction to the principles of interactive 2D and 3D computer game development. Concepts in computer graphics, algorithms, software engineering, art and graphics, music and sound, story analysis, and artificial intelligence are presented and are the basis for student work.

Prerequisite: COMPSCI 112 or COMPSCI 171 or IN4MATX 121 or ART 106B or I&C SCI 163 or I&C SCI 166

Same as COMPSCI 113.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 131. Human Computer Interaction. 4 Units.**

Basic principles of human-computer interaction (HCI). Introduces students to user interface design techniques, design guidelines, and usability testing. Students gain the ability to design and evaluate user interfaces and become familiar with some of the outstanding research problems in HCI.

Prerequisite: I&C SCI 10 or I&C SCI 31 or I&C SCI 32A or CSE 41 or ENGR 10 or ENGRMAE 10 or EECS 10. I&C SCI 10 with a grade of C or better. I&C SCI 31 with a grade of C or better. I&C SCI 32A with a grade of C or better. CSE 41 with a grade of C or better. ENGR 10 with a grade of C or better. ENGRMAE 10 with a grade of C or better. EECS 10 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 132. Project in Human-Computer Interaction Requirements and Evaluation. 4 Units.**

Students undertake significant projects in the elicitation and specification of HCI requirements and the thorough evaluation of user interfaces.

Prerequisite: IN4MATX 131

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 133. User Interaction Software. 4 Units.**

Introduction to human-computer interaction programming. Emphasis on current tools, standards, methodologies for implementing effective interaction designs. Widget toolkits, Web interface programming, geo-spatial and map interfaces, mobile phone interfaces.

Prerequisite: I&C SCI 45J or I&C SCI 45C. I&C SCI 45J with a grade of C or better. I&C SCI 45C with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 134. Project in User Interaction Software. 4 Units.**

Students complete an end-to-end user interface programming project based on an iterative design paradigm. Topics may include requirements brainstorming, paper prototyping, iterative development, cognitive walk-through, quantitative evaluation, and acceptance testing. Materials fee.

Prerequisite: IN4MATX 131 and IN4MATX 133

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 141. Information Retrieval. 4 Units.**

An introduction to information retrieval including indexing, retrieval, classifying, and clustering text and multimedia documents.

Prerequisite: (I&C SCI 45C or I&C SCI 45J) and (STATS 7 or STATS 67). I&C SCI 45C with a grade of C or better. I&C SCI 45J with a grade of C or better

Same as COMPSCI 121.

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**IN4MATX 143. Information Visualization. 4 Units.**

Introduction to interactive visual interfaces for large datasets, and to principles of human visual perception and human computer interaction that inform their design. Various applications for data analysis and monitoring are discussed.

Prerequisite: (IN4MATX 131 or IN4MATX 43) and (I&C SCI 31 or I&C SCI 32A or CSE 41). IN4MATX 131 with a grade of C or better. IN4MATX 43 with a grade of C or better. I&C SCI 31 with a grade of C or better. I&C SCI 32A with a grade of C or better. CSE 41 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**IN4MATX 148. Project in Ubiquitous Computing. 4 Units.**

Introduction to ubiquitous computing research methods, tools, and techniques. Prototyping, design, and evaluation of physical computing applications, smart environments, embedded systems, and future computing scenarios. Includes hands-on in-class laboratory exercises. Materials fee.

Prerequisite: I&C SCI 10 or I&C SCI 31 or CSE 41 or I&C SCI 32A. I&C SCI 10 with a grade of C or better. I&C SCI 31 with a grade of C or better. CSE 41 with a grade of C or better. I&C SCI 32A with a grade of C or better

Restriction: Upper-division students only. School of Info & Computer Sci students have first consideration for enrollment.

**IN4MATX 151. Project Management. 4 Units.**

Introduces theoretical and practical aspects of project management. Topics include organizational theory, group behavior, project management skills, case studies, personal and group productivity tools, management of distributed work, stakeholders, consultants, and knowledge management. Students do a project exercise.

Prerequisite: IN4MATX 43

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**IN4MATX 153. Computer Supported Cooperative Work. 4 Units.**

Introduces concepts and principles of collaborative systems. Topics may include shared workspaces, group interaction, workflow, architectures, interaction between social and technical features of group work, and examples of collaborative systems used in real-world settings. Students develop a simple collaborative application.

Prerequisite: (IN4MATX 161 or IN4MATX 43) and (I&C SCI 31 or I&C SCI 32A or CSE 41). I&C SCI 31 with a grade of C or better. I&C SCI 32A with a grade of C or better. CSE 41 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**IN4MATX 161. Social Analysis of Computing. 4 Units.**

Introduction of computing as a social process. Examines the social opportunities and problems raised by new information technologies, and the consequences of different ways of organizing. Topics include computing and work life, privacy, virtual communities, productivity paradox, systems risks.

Prerequisite: I&C SCI 10 or I&C SCI 31 or I&C SCI 32A or CSE 41 or ENGR 10 or EECS 10 or ENGRMAE 10. I&C SCI 10 with a grade of C or better. I&C SCI 31 with a grade of C or better. I&C SCI 32A with a grade of C or better. CSE 41 with a grade of C or better. ENGR 10 with a grade of C or better. EECS 10 with a grade of C or better. ENGRMAE 10 with a grade of C or better. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**IN4MATX 162W. Organizational Information Systems. 4 Units.**

Introduction to role of information systems in organizations, components and structure of organizational information systems, and techniques used in information systems analysis, design, and implementation.

Prerequisite: IN4MATX 161. Satisfactory completion of the Lower-Division Writing requirement.

**(Ib)****IN4MATX 163. Project in the Social and Organizational Impacts of Computing . 4 Units.**

Students undertake projects intended to gather and analyze data from situations in which computers are used, organize and conduct experiments intended to test hypotheses about impacts, and explore the application of concepts learned in previous courses.

Prerequisite: IN4MATX 162W

**IN4MATX 164. Children's Learning and Media. 4 Units.**

Examines how popular media may impact how young people learn, develop, and communicate by looking at research related to the impacts of a wide range of popular media including television, video games, digital environments, mobile devices, and other multimedia.

Same as EDUC 130.

Restriction: Education Sciences Majors only. Informatics Majors only. Informatics Minors only.

**IN4MATX 171. Introduction to Medical Informatics. 4 Units.**

Broad overview of medical informatics for students with varied backgrounds. Electronic medical records, online resources, mobile technologies, patient safety, and computational design. Legal, ethical, and public policy issues. Health systems management. Evaluation and fieldwork for health systems.

Prerequisite: WRITING 39C or WRITING 30 or WRITING 31 or HUMAN 1C or HUMAN H1C. WRITING 39C with a grade of C or better. WRITING 30 with a grade of C or better. WRITING 31 with a grade of C or better. HUMAN 1C with a grade of C or better. HUMAN H1C with a grade of C or better

Same as PUBHLTH 105.

Restriction: Upper-division students only. Satisfactory completion of the Lower-Division Writing requirement.

**IN4MATX 172. Project in Health Informatics. 4 Units.**

Students undertake significant quarter-long projects related to health informatics. Topics may include field evaluations of health care technologies, prototypes, iterative design, and system implementations.

Prerequisite: PUBHLTH 105 or IN4MATX 171

Same as PUBHLTH 106.

**IN4MATX 190. Special Topics in Informatics. 4 Units.**

Studies in selected areas of informatics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**IN4MATX 191A. Senior Design Project. 4 Units.**

Group supervised project in which students analyze, specify, design, construct, evaluate, and adapt a significant information processing system. Topics include team management, professional ethics, and systems analysis.

Prerequisite: IN4MATX 113 and IN4MATX 121 and IN4MATX 131 and IN4MATX 151

Grading Option: In Progress (Letter Grade with P/NP).

Restriction: Seniors only. Software Engineering Majors have first consideration for enrollment. Informatics Majors have first consideration for enrollment.

**IN4MATX 191B. Senior Design Project. 4 Units.**

Group supervised project in which students analyze, specify, design, construct, evaluate, and adapt a significant information processing system. Topics include team management, professional ethics, and systems analysis.

Prerequisite: IN4MATX 191A. In Progress (IP) grade for IN4MATX 191A is also accepted.

Restriction: Seniors only.

**IN4MATX H198. Honors Research. 4 Units.**

Directed independent research in Informatics for honors students.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be repeated for credit unlimited times.

Restriction: Bren School of ICS Honors students only. Campuswide Honors Collegium students only.

**IN4MATX 199. Individual Study. 2-5 Units.**

Individual research or investigation under the direction of an individual faculty member.

Repeatability: May be repeated for credit unlimited times.

**IN4MATX 201. Research Methodology for Informatics. 4 Units.**

Introduction to strategies and idioms of research in Informatics. Includes examination of issues in scientific inquiry, qualitative and quantitative methods, and research design. Both classic texts and contemporary research literature are read and analyzed.

**IN4MATX 203. Qualitative Research Methods in Information Systems. 4 Units.**

Introduction to qualitative research methods used to study computerization and information systems, such as open-ended interviewing, participant observation, and ethnography. Studies of the methods in practice through examination of research literature.

Prerequisite: IN4MATX 261 or IN4MATX 251

**IN4MATX 205. Quantitative Research Methods in Information Systems. 4 Units.**

Quantitative research methods used to study computerization and information systems. Design of instruments, sampling, sample sizes, and data analysis. Validity and reliability. Longitudinal versus cross-sectional designs. Analysis of secondary data. Studies of the methods through examination of research literature.

Prerequisite: IN4MATX 251 or IN4MATX 261. Basic knowledge of elementary statistics is also required.

**IN4MATX 207S. Doctoral Seminar on Research and Writing. 2 Units.**

Doctoral seminar centered on original research and writing. Provides a chance for doctoral students at all levels to present original work, brainstorm ongoing issues, and learn to provide and receive critical feedback from peers.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**IN4MATX 209S. Seminar in Informatics. 2 Units.**

Current research and research trends in informatics. Forum for presentation and criticism by students of research work in progress.

Repeatability: Unlimited as topics vary.

**IN4MATX 231. User Interface Design and Evaluation. 4 Units.**

Introduction to the design and evaluation of user interfaces, with an emphasis on methodology. Cognitive principles, design life cycle, on-line and off-line prototyping techniques. Toolkits and architectures for interactive systems. Evaluation techniques, including heuristic and laboratory methods.

**IN4MATX 232. Research in Human-Centered Computing. 4 Units.**

Introduction to contemporary topics in human-computer interaction, including methods, technologies, design, and evaluation. Emerging application domains and their challenges to traditional research methods. Advanced architectures and technologies. Critical issues.

Prerequisite: Some familiarity with HCI principles.

**IN4MATX 237. Usable Security and Privacy. 4 Units.**

Introduces usability problems in security and privacy methods, tools, and software. Overviews prominent examples of both failures and successes in usable security and privacy. Surveys state-of-the-art techniques and evaluation methodologies.

Same as COMPSCI 204.

Overlaps with IN4MATX 231, COMPSCI 203.

Restriction: Informatics Majors have first consideration for enrollment. Computer Science Majors have first consideration for enrollment. Undergraduate degree in CompSci or Informatics is strongly recommended.

**IN4MATX 241. Introduction to Ubiquitous Computing. 4 Units.**

The 'disappearing computer' paradigm. Differences to the desktop computing model: applications, interaction in augmented environments, security, alternate media, small operating systems, sensors, and embedded systems design. Evaluation by project work and class participation.

Same as COMPSCI 248A.

**IN4MATX 244. Introduction to Embedded and Ubiquitous Systems. 4 Units.**

Embedded and ubiquitous system technologies including processors, DSP, memory, and software. System interfacing basics; communication strategies; sensors and actuators, mobile and wireless technology. Using pre-designed hardware and software components. Design case studies in wireless, multimedia, and/or networking domains.

Prerequisite: I&C SCI 51 and COMPSCI 152 and COMPSCI 161 and (I&C SCI 6N or MATH 3A or MATH 6G or I&C SCI 6D). B.S. degree in Computer Science is also accepted.

Same as COMPSCI 244.

**IN4MATX 251. Computer-Supported Cooperative Work. 4 Units.**

The role of information systems in supporting work in groups and organizations. Examines various technologies designed to support communication, information sharing, and coordination. Focuses on behavioral and social aspects of designing and using group support technologies.

**IN4MATX 261. Social Analysis of Computing. 4 Units.**

The social and economic impacts of computing and information technologies on groups, organizations, and society. Topics include computerization and changes in the character of work, social control and privacy, electronic communities, and risks of safety-critical systems to people.

**IN4MATX 263. Computerization, Work, and Organizations. 4 Units.**

Selected topics in the influence of computerization and information systems in transforming work and organizations. Theories of organization and organizational change. Processes by which diverse information technologies influence changes in work and organizations over short and long time periods.

Prerequisite: IN4MATX 251 or IN4MATX 261

**IN4MATX 265. Theories of Information Society . 4 Units.**

Social and economic conceptions of information technology. Macrosocial and economic conditions that foster changes in information technologies. Social construction of information and computer technology in professional worlds. Theories of information technology and large-scale social change.

Prerequisite: IN4MATX 251 or IN4MATX 261

**IN4MATX 267. Digital Media and Society. 4 Units.**

Selected topics in the technological and social aspects of online interactions, and policy including online games, social media, electronic activism, e-commerce, and digital libraries. Media-theoretic approaches to digital technology. Architectures, infrastructure considerations, and their consequences.

Prerequisite: IN4MATX 251 or IN4MATX 261

**IN4MATX 273. Information Technology in Global Sustainability . 4 Units.**

Explores the relationship between recent developments in information technology and the global transition to sustainability. Topics include the role of IT systems in the provision of human needs and wants (e.g., smart grids, food systems, and other IT-enabled infrastructure).

Restriction: Graduate students only.

**IN4MATX 280. Overview of Human-Computer Interaction and Design . 4 Units.**

Introduction to human-computer interaction and user-centered design. The material is focused on laying the groundwork for understanding the history, importance, and methods of human-computer interaction and design.

**IN4MATX 281. User Needs Analysis . 4 Units.**

Understanding the user's context, needs, and preferences. Topics include interviews and observations, modeling the context, flow, culture, space and artifacts involved in an endeavor, ways of aggregating what is found, and presenting these findings to others.

Prerequisite: IN4MATX 280

**IN4MATX 282. Design and Prototyping . 4 Units.**

Introduction to user-centered design and prototyping. Focused on practical methods for interaction design. Topics include the nature of design and the challenges to creating and evaluating good designs, as well specific skills for designing interactive systems.

Prerequisite: IN4MATX 280

**IN4MATX 283. User Experience Evaluation . 4 Units.**

Evaluating prototypes and completed systems. Topics include comparative analysis, laboratory experiments, heuristic evaluation, cognitive walkthroughs, surveys, clickstreams, and help-desk.

Prerequisite: IN4MATX 280

**IN4MATX 284. Advanced Design and Prototyping . 4 Units.**

Develop and communicate interactive technology design prototypes. Moving concepts from brainstorming and paper prototypes to wireframe and limited functionality mock-ups.

Prerequisite: IN4MATX 282

**IN4MATX 285. Interactive Technology Studio . 4 Units.**

Technologies, languages, and skills required for creating prototypes to communicate interactive technology concepts. Topics include HTTP, CSS, CSS scripting, AJAX, Design Patterns, Javascript, Javascript libraries such as jQuery, SQL, MVC, and cloud architectures.

Prerequisite: IN4MATX 280

**IN4MATX 286. Innovations in HCI and Design . 4 Units.**

Recent social and technological developments in human-computer interaction and design. Topics will vary as the field progresses but include novel input techniques, novel platforms, and innovations in theory and methods of design.

Prerequisite: IN4MATX 280

**IN4MATX 287. Capstone Project in HCI and Design . 4 Units.**

Group project that reinforces all concepts learned in this program, including knowing where user experience work is most appropriate and essential, and executing the appropriate steps.

Prerequisite: IN4MATX 283 and IN4MATX 284

**IN4MATX 288. Capstone Project and Portfolio . 4 Units.**

Completion of capstone projects and development of portfolios. Ideation, critique, development, and critique.

Prerequisite: IN4MATX 287

**IN4MATX 290. Research Seminar. 2 Units.**

Forum for presentation and criticism by students of research work in progress. Presentation of problem areas and related work. Specific goals and progress of research.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**IN4MATX 291S. Literature Survey in Software Engineering. 2 Units.**

Reading and analysis of relevant literature in Software Engineering under the direction of a faculty member.

Repeatability: May be repeated for credit unlimited times.

**IN4MATX 295. Special Topics in Informatics. 4 Units.**

Studies in selected areas of informatics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**IN4MATX 298. Thesis Supervision. 2-12 Units.**

Individual research or investigation conducted in preparation for the M.S. thesis option or the dissertation requirements for the Ph.D. program.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**IN4MATX 299. Individual Study. 1-12 Units.**

Individual research or investigation under the direction of an individual faculty member.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Information and Computer Science (I&C SCI)

### Courses

**I&C SCI 3. Internet Technologies and their Social Impact. 4 Units.**

Examines current Internet technologies and social implications at the individual, group, and societal level. Blogs, wikis, sharing of video, photos, and music, e-commerce, social networking, gaming, and virtual environments. Issues include privacy, trust, identity, reputation, governance, copyright, and malicious behavior.

(III)

**I&C SCI 4. Human Factors for the Web. 4 Units.**

Principles of human-computer interaction in evaluating, designing, and developing information presented on the World Wide Web. User characteristics, usability analysis, navigation and organization. Color, typography, multimedia, information visualization, prototyping, user studies, evaluation strategies. Web accessibility.

Restriction: May not be taken for credit after IN4MATX 131.

(II)

**I&C SCI 5. Global Disruption and Information Technology. 4 Units.**

Explores how new forms of information technology may support transition to a sustainable civilization. Topics include design and implementation of IT systems, science of global change, online community building, and "green IT". Activities involve reading, writing, discussion, and final project.

(II)

**I&C SCI 6B. Boolean Logic and Discrete Structures. 4 Units.**

Relations and their properties; Boolean algebras, formal languages; finite automata.

Prerequisite: High school mathematics through trigonometry.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

(Vb)

**I&C SCI 6D. Discrete Mathematics for Computer Science. 4 Units.**

Covers essential tools from discrete mathematics used in computer science with an emphasis on the process of abstracting computational problems and analyzing them mathematically. Topics include mathematical induction, combinatorics, and recurrence relations.

Prerequisite: Recommended: I&C SCI 6B

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment. Computer Engineering majors have second consideration.

**(Vb)**

**I&C SCI 6N. Computational Linear Algebra. 4 Units.**

Matrices and linear transformations, systems of linear equations, determinants, linear vector spaces, eigenvalues and eigenvectors, orthogonal matrices, diagonalization, and least squares. Topics taught primarily from an algorithmic perspective, including computational solutions, applications, and numerical error analysis.

Overlaps with MATH 6G, MATH 3A.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**(II and V.B ).**

**I&C SCI 7. Introducing Modern Computational Tools. 4 Units.**

A unified look at a spectrum of modern tools for building, solving, and analyzing simple computational models (deterministic and random) in diverse subject areas. Tools include those for numeric/symbolic computation, and those for acquiring, organizing, translating, processing, and displaying information.

**(Va)**

**I&C SCI 10. How Computers Work. 4 Units.**

Introduction to digital computer and communication systems. Capabilities and limitations of information technology. Representing information in digital form. Overview of computer organization, internet, operating systems, software. Human-computer interaction and social impact.

Restriction: May not be taken for credit after I&C SCI 31, I&C SCI 32, I&C SCI 32A, I&C SCI 51, I&C SCI 105, or IN4MATX 43.

**(II)**

**I&C SCI 11. The Internet and Public Policy. 4 Units.**

How the Internet works. Current public policy issues concerning the Internet. Introductory economics. Communications law. Interactions between information technology, economics, and law. Case studies about Internet and communications policy.

Same as ECON 11.

**(II or III ).**

**I&C SCI 20. Invitation to Computing. 4 Units.**

Foundational principles of computer science for students with no computing background that are interested in a related career. Big ideas of computing explored, including programming through use of sequential, conditional, iterative logic. Good computational practices, problem solving, and organization discussed.

**I&C SCI 31. Introduction to Programming. 4 Units.**

Introduction to fundamental concepts and techniques for writing software in a high-level programming language. Covers the syntax and semantics of data types, expressions, exceptions, control structures, input/output, methods, classes, and pragmatics of programming.

Overlaps with EECS 10, EECS 12, ENGRMAE 10.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**(II and VB ).**

**I&C SCI 32. Programming with Software Libraries. 4 Units.**

Construction of programs for problems and computing environments more varied than in I&C SCI 31. Using library modules for applications such as graphics, sound, GUI, database, Web, and network programming. Language features beyond those in I&C SCI 31 are introduced as needed.

Prerequisite: I&C SCI 31 or CSE 41. I&C SCI 31 with a grade of C or better. CSE 41 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

(II and (VA or VB) ).

**I&C SCI 32A. Python Programming and Libraries (Accelerated). 4 Units.**

Introduces Python syntax and semantics for fundamental programming concepts. Constructing programs for varied problems and environments. Using library modules for applications such as graphics, sound, GUI, database, Web, and network programming. Accelerated course for students with previous programming background.

Prerequisite: AP Computer Science A. AP Computer Science A with a minimum score of 3. Placement via a transfer course in computer programming or equivalent experience may also be accepted upon review.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

(II and (VA or VB) ).

**I&C SCI 33. Intermediate Programming. 4 Units.**

Intermediate-level language features and programming concepts for larger, more complex, higher-quality software. Functional programming, name spaces, modules, class protocols, inheritance, iterators, generators, operator overloading, reflection. Analysis of time and space efficiency.

Prerequisite: I&C SCI 32 or CSE 42 or I&C SCI 32A. I&C SCI 32 with a grade of C or better. CSE 42 with a grade of C or better. I&C SCI 32A with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

(II and VB) ).

**I&C SCI 45C. Programming in C/C++ as a Second Language. 4 Units.**

An introduction to the lexical, syntactic, semantic, and pragmatic characteristics of the C/C++ languages for experienced programmers. Emphasis on object-oriented programming, using standard libraries, and programming with manual garbage collection.

Prerequisite: I&C SCI 33 or CSE 43 or EECS 40. I&C SCI 33 with a grade of C or better. CSE 43 with a grade of C or better. EECS 40 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**I&C SCI 45J. Programming in Java as a Second Language. 4 Units.**

An introduction to the lexical, syntactic, semantic, and pragmatic characteristics of the Java language for experienced programmers. Emphasis on object-oriented programming, using standard libraries, and programming with automatic garbage collection.

Prerequisite: I&C SCI 33 or CSE 43. I&C SCI 33 with a grade of C or better. CSE 43 with a grade of C or better

Overlaps with I&C SCI 22, I&C SCI 23, CSE 23.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment. I&C SCI 45J may not be taken for credit after I&C SCI 22, I&C SCI 23, or CSE 23.

**I&C SCI 46. Data Structure Implementation and Analysis. 4 Units.**

Focuses on implementation and mathematical analysis of fundamental data structures and algorithms. Covers storage allocation and memory management techniques.

Prerequisite: CSE 45C or I&C SCI 45C. CSE 45C with a grade of C or better. I&C SCI 45C with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

(Vb)

**I&C SCI 51. Introductory Computer Organization. 6 Units.**

Multilevel view of system hardware and software. Operation and interconnection of hardware elements. Instruction sets and addressing modes. Virtual memory and operating systems. Laboratory work using low-level programming languages.

Prerequisite: (I&C SCI 31 or CSE 41 or I&C SCI 32A) and I&C SCI 6B

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**(II)****I&C SCI 53. Principles in System Design. 4 Units.**

Introduces basic principles of system software: operating systems, compilers, and networking. Exposure to the following topics through theoretical and practical programming experiences: linking and loading, process and memory management, concurrency and synchronization, network communication, programming for performance, etc.

Corequisite: I&C SCI 53L

Prerequisite: I&C SCI 46 and I&C SCI 51. I&C SCI 46 with a grade of C or better. I&C SCI 51 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**I&C SCI 53L. Principles in System Design Library. 2 Units.**

Required laboratory section and co-requisite for I&C SCI 53.

Corequisite: I&C SCI 53

Prerequisite: I&C SCI 51

**I&C SCI 60. Computer Games and Society. 4 Units.**

The study and critical analysis of computer games as art objects, cultural artifacts, gateways to virtual worlds, educational aids, and tools for persuasion and social change. Emphasis on understanding games in their historical and cultural context.

Prerequisite: Satisfaction of the UC Entry Level Writing Requirement.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Game Science Majors have first consideration for enrollment.

**(III)****I&C SCI 61. Game Systems and Design. 4 Units.**

Principles and usage of game design elements. Introduction to technologies that support modern computer games. Students design, implement, and critique several small games.

Restriction: Computer Game Science Majors have first consideration for enrollment.

**(II)****I&C SCI 62. Game Technologies and Interactive Media. 4 Units.**

Technologies for interactive media and game design. Web-based software systems, virtual world platforms, and game engines. Emphasis is on conceptual and architectural aspects of these technologies.

Prerequisite: I&C SCI 31 or I&C SCI 32A

**I&C SCI 90. New Students Seminar. 1 Unit.**

Introduces students to the Donald Bren School of Information and Computer Sciences. Focuses on advising students making the transition to UCI, community building, and mostly surveying the technical areas within departments in ICS, via talks by faculty on their research.

Grading Option: Pass/no pass only.

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**I&C SCI 105. Digital Information Systems. 4 Units.**

Design and analysis of digital information systems. Covers underlying database and network technology, and software engineering principles used to build these systems. Evaluating digital information systems, and recognizing common flaws and vulnerabilities.

Prerequisite: I&C SCI 10 or I&C SCI 21 or CSE 21 or I&C SCI H21 or IN4MATX 41. I&C SCI 10 with a grade of C or better. I&C SCI 21 with a grade of C or better. CSE 21 with a grade of C or better. I&C SCI H21 with a grade of C or better. IN4MATX 41 with a grade of C or better

Overlaps with I&C SCI 52, IN4MATX 43.

**I&C SCI 139W. Critical Writing on Information Technology. 4 Units.**

Study and practice of critical writing and oral communication as it applies to information technology. Each student writes assignments of varying lengths, totaling at least 4,000 words.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. School of Info & Computer Sci students have first consideration for enrollment.

**(Ib)****I&C SCI 161. Game Engine Lab. 4 Units.**

The use of an open source game or graphics engine in the design and implementation of a computer game. Principles of game engine design. Students work on teams to design, implement, and evaluate new computer games based on an engine.

Prerequisite: I&C SCI 45C or CSE 45C

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**I&C SCI 162. Modeling and World Building. 4 Units.**

Use of 3D modeling software and related tools to design and create animated, textured models, and expansive virtual worlds incorporating objects, scenes, and venues for activity within game worlds and online environments.

Prerequisite or corequisite: I&C SCI 33 and (I&C SCI 6N or MATH 3A) and I&C SCI 61

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**I&C SCI 163. Mobile and Ubiquitous Games. 4 Units.**

Design and technology of mobile games, including mixed reality gaming, urban games, and locative media. Case studies of significant systems. Uses and limitations of location-based technologies. Infrastructures and their relationships to gameplay and design.

Prerequisite: I&C SCI 61 and (I&C SCI 10 or I&C SCI 31 or I&C SCI 32A)

**I&C SCI 166. Game Design. 4 Units.**

Game design takes into consideration psychology, narrative, platform features and limitations, marketing, computer science capabilities, human-computer interface principles, industry trends, aesthetic judgment, and other factors. Students focus on video game design through lectures, readings, presentations, implementation, and play testing.

Prerequisite: I&C SCI 61 and IN4MATX 43

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Game Science Majors have first consideration for enrollment.

**I&C SCI 167. Multiplayer Game Systems. 4 Units.**

Foundations and technologies that enable multiuser, networked, and persistent virtual environments. Emphasis on database design and management, network protocols, and concurrency control to accommodate large numbers of simultaneous users.

Prerequisite: I&C SCI 51

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Game Science Majors have first consideration for enrollment.

**I&C SCI 168. Multiplayer Game Project. 4 Units.**

Designing and implementing a multiuser, networked, and persistent virtual environment or game. Emphasis on cultural aspects, community building, user interface issues and design, security, privacy, and economics.

Prerequisite: IN4MATX 43 and I&C SCI 167. IN4MATX 43 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Game Science Majors have first consideration for enrollment.

**I&C SCI 169A. Capstone Game Project I. 4 Units.**

Students work in teams to design and implement a new computer game or virtual world. Emphasis on sound, art, and level design, building a community, cut scenes, production values, full utilization of hardware and software platform, and current industry trends.

Prerequisite: I&C SCI 168

Grading Option: In Progress (Letter Grade with P/NP).

Restriction: Computer Game Science Majors have first consideration for enrollment.

**I&C SCI 169B. Capstone Game Project II. 4 Units.**

Students work in teams to design and implement a new computer game or virtual world. Emphasis on sound, art, and level design, building a community, cut scenes, production values, full utilization of hardware and software platform, and current industry trends.

Prerequisite: I&C SCI 169A. I&C SCI 169A with a grade of D- or better. In Progress grade for I&C SCI 169A also accepted.

Restriction: Computer Game Science Majors have first consideration for enrollment.

**I&C SCI 192. Industrial or Public Sector Field Study. 2-4 Units.**

Students participate in an off-campus, supervised internship for a minimum of 60 hours. Students apply classroom knowledge through internship projects in the private sector or nonprofit agencies.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**I&C SCI 193. Tutoring in ICS. 2 Units.**

Principles and practice of providing technical assistance to novice learners in information and computer sciences.

Repeatability: May be taken for credit for 18 units.

Restriction: ICS Peer Tutoring Program students only.

**I&C SCI H197. Honors Seminar. 2 Units.**

An overview of computer science and selected recent trends in research. Students attend talks on current faculty research, with opportunities for discussion.

Grading Option: Pass/no pass only.

Restriction: Bren School of ICS Honors students only. Campuswide Honors Collegium students only.

**I&C SCI 398A. Teaching Assistant Training Seminar. 2 Units.**

Theories, methods, and resources for teaching computer science at the university level, particularly by teaching assistants. Classroom presentations, working with individuals, grading, motivating students. Participants will give and critique presentations and may be videotaped while teaching.

Grading Option: Satisfactory/unsatisfactory only.

**I&C SCI 398B. Advanced Teaching Assistant Seminar. 4 Units.**

Teaching computer science at the university level, emphasizing issues in teaching an entire course. Course organization, designing examinations and projects, grading, motivating students. Participants will begin to assemble teaching portfolios.

Prerequisite: I&C SCI 398A

Grading Option: Satisfactory/unsatisfactory only.

**I&C SCI 399. University Teaching. 4 Units.**

Involves on-the-job experience for Teaching Assistants.

Repeatability: May be repeated for credit unlimited times.

Restriction: Teaching assistants only.

## Innovation and Entrepreneurship (INNO)

## Internal Medicine (INT MED)

## International Studies (INTL ST)

### Courses

**INTL ST 1. Introduction to Global Studies. 4 Units.**

Ongoing historical processes that increase global integration, the social, economic, and political interdependence of different regions, cultures, and peoples. Topics include ancient empires, colonialism, nationalism, industrialization, modern imperialism and warfare, decolonization, global social movements, conflict, inequality, and global governance.

Same as SOC SCI 4A.

Restriction: International Studies Majors have first consideration for enrollment.

**(III and VIII ).**

**INTL ST 11. Global Cultures and Society. 4 Units.**

Offers a general overview of the rise of global interdependence in political, economic, demographic, and cultural terms. Considers what drove people from relative isolation into intensified intercourse with one another, and investigates the consequences of this shift.

Same as ANTHRO 41A.

Restriction: Anthropology Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(III and VIII ).**

**INTL ST 12. Global Political Ideologies. 4 Units.**

An overview of the major political ideologies shaping the current world order and global conflict. Topics include liberalism, democracy, nationalism, capitalism, communism, socialism, fascism, neoliberalism, clash of civilizations, sectarian violence, populist nationalism, and de-globalization.

Same as POL SCI 44B, SOC SCI 12.

Restriction: International Studies Majors have first consideration for enrollment.

**(III and VIII ).**

**INTL ST 13. Global Economy. 4 Units.**

Acquaints students with the fundamental patterns of the global economy. Emphasizes the historical roots and political implications of economic choices.

Same as ECON 13.

Restriction: International Studies Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**(III, VIII)**

**INTL ST 14. Introduction to International Relations. 4 Units.**

Analysis of political relations between and among nations with emphasis on explanations of conflict and cooperation. The role of ideologies and their relation to international problems are also examined.

Same as POL SCI 41A.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(III and VIII ).**

**INTL ST 15. Global Political Economy. 4 Units.**

The global economy as an integrated system. The rise of world trade, capitalism, national economies, market cycles, competing economic ideologies, development, globalization, transnational labor, multinational corporations, and the role of UN, World Bank, WTO, and the IMF in global governance.

Same as SOC SCI 15.

Restriction: International Studies Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment.

(III and VIII ).

**INTL ST 16. Human Rights and Global Governance. 4 Units.**

Historical development of civil, political rights and the rise of human rights in international law. Explores role, and limitations, of the UN, ICJ, and ICC in global governance. Reconceptualizing democracy and political representation in a postnational 21st century.

Same as POL SCI 45A, SOC SCI 16.

Restriction: International Studies Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment.

(III and VIII ).

**INTL ST 17. Global Environmental Issues. 4 Units.**

Examines problems such as global climate change, growing human populations, fisheries depletion, ocean acidification, biodiversity loss, deforestation, and food security. Introduces political, social, and economic factors contributing to environmental issues and their disproportional impacts on the world's poor and minorities.

Same as SOC SCI 17.

Restriction: International Studies Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment.

(III and VIII ).

**INTL ST 32A. Dilemmas of Diversity. 4 Units.**

Focuses on racial, ethnic, and gender diversity, multiculturalism, and their impact on our social and political ideals. Traces the sources of ideas about difference, equality, and toleration, and examines tensions that occur when forms of identity conflict with one another.

Same as POL SCI 32A.

(VII)

**INTL ST 100. Global Trials. 4 Units.**

Explores landmark legal trials that have impacted both domestic and world affairs. The trials provide a lens through which to explore society at the time, as well as shed light on the historical legacies of current social, political, and legal values.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**INTL ST 101A. Global Social Movements. 4 Units.**

The evolution of global social movements over past 250 years. Age of Revolutions in America, France, and Haiti; nationalism and labor; 1960s global decolonization; 21st century Latin American indigenous movements; Occupy Wall Street, Arab Spring, and social media's #metoo, #BlackLivesMatter.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**INTL ST 101B. Global Cities and Slums. 4 Units.**

Cities as a window into contemporary challenges of the globalized world. Global cities such as Los Angeles, London, and Beijing compared with cities with slums in the global south such as Rio de Janeiro, Johannesburg, and Mumbai.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**INTL ST 102A. Global Refugees and Stateless People. 4 Units.**

Examines the reason behind global refugee crises, and what it means to be a displaced migrant or stateless person in history and in contemporary society. Links case studies about refugees around the world.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**INTL ST 102B. Global Asia and Orientalism. 4 Units.**

Examines how the modern world is divided between East and West in the age of globalization. Through the postcolonial framework of Orientalism, it considers a pluralistic idea of Asia and the current notion of the new world order as one.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**INTL ST 103A. Case Studies in Global and Planetary Health. 4 Units.**

Explores critical global health and planetary health studies, linking past trends to current research of health inequalities. Case studies include maternal-fetal mortality, environmental contamination, disaster preparedness, pharmaceutical development and access, and humanitarian aid interventions.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**INTL ST 104A. Global Trafficking. 4 Units.**

Explores trafficking in different global contexts. Covers sex trafficking, labor trafficking, and organ trafficking. Tracks the use of the concept in policy, human rights, law, humanitarianism, and media. Provides a complex and nuanced understanding of the problem and its solutions.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**INTL ST 104BW. Global Gender and Sexuality. 4 Units.**

Develops critical insights into gender and sexuality as products of the world around us and as lived experiences across the globe. Topics include agency and resistance, intersectionality, feminisms, colonialism, heteronormativity, gender violence, masculinities, media and popular culture, globalization and migration.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**(Ib)****INTL ST 106A. Global Political Ecology. 4 Units.**

Introduction to political ecology and critical analysis of the global scale and globalization. Topics include current and historical climate change, fossil fuels, international trade and investment, soil erosion and pollution, deforestation, waste, ocean ecology, water crisis, wars, revolutions, and refugees.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**INTL ST 106B. Global Food Environment. 4 Units.**

Examines the global political ecology of food, focusing on the U.S., China, and Brazil. Topics include the history of agriculture, imperialism/neocolonialism, Malthusianism, migration, agro-industrialization, deforestation, GMOs, agrochemicals, soil and water contamination, land struggles, food security/safety/sovereignty, dietary habits, and climate change.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**INTL ST 111B. World of Coffee . 4 Units.**

History of consumption and production of coffee over the centuries, and coffee's cultural, economic, social, political consequences. Coffee's social life as a drug, symbol of hospitality, religious rite, sociability and bourgeois lifestyle, commodity, source of livelihoods, imperial revenues, corporate profits.

Same as HISTORY 163.

**INTL ST 112A. International Business. 4 Units.**

Introduction to conducting business in the international arena, decision making in the organization, and globalization of markets and production. Topics covered range from tax and finance to ethics, marketing, and more. Continuing corporate regulatory scandals discussed.

Same as SOC SCI 115D.

**INTL ST 114A. International Political Economy. 4 Units.**

Examination of problems in global political-economic relations through competing conceptual lenses or grand theories: mercantilism, liberalism, and Marxism. Surveys North-North and North-South issues relating power and wealth.

Same as POL SCI 141B.

**(VIII)****INTL ST 115. Global Poverty and Inequality in the 21st Century. 4 Units.**

Explores a multidisciplinary understanding of poverty and inequality in the 21st century and assesses impact of education, health, technology, and other interventions. Course offered online only.

Same as UPPP 115.

**INTL ST 117A. Transnational Migration. 4 Units.**

Examines the movement of people across national borders, governmentality and the role of state practices to control populations, and issues of citizenship, belonging, and identity. Examples are drawn from the United States, Europe, Latin America, Asia, and Africa.

Same as CHC/LAT 161, ANTHRO 125X.

(VIII)

**INTL ST 122. Nuclear Environments. 4 Units.**

Understanding the impact of the nuclear age on the environment and human health through interrelated developments of nuclear power and nuclear weapons. The early years of weapon development, catastrophic environmental pollution, perils of nuclear power in the U.S. and Russia.

Same as SOCECOL E127, PUBHLTH 168.

(VIII)

**INTL ST 124A. Introduction to the Comparative Study of Legal Cultures. 4 Units.**

Traces the anthropological and comparative cultural study of law from the nineteenth century to the present; briefly surveys the diversity of recorded legal cultures and critically examines key concepts which have been used to describe and classify them.

Same as CRM/LAW C102.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 130. Transnational Gangs. 4 Units.**

Examines the internationalization of U.S. domestic street gangs. The relationship between California gangs Mara Salvatrucha and 18th Street and Mexico/Central American gangs is assessed. Specified topics include: mobilization, migration, territorialism, culture, organization, and use of technology.

Same as SOC SCI 120.

Overlaps with SOC SCI XI120, INTL ST XI130.

**INTL ST 131A. Just War Revisited. 4 Units.**

Examines the evolution of the doctrine of the just war across the history of Western political thought, the importance of changes in the doctrine and whether it applies today; examines international relations case studies to determine today's relevancy.

Same as POL SCI 135B.

**INTL ST 140A. Approaches to International Relations. 4 Units.**

Reviews theoretical and methodological approaches to the study of international relations using contending perspectives to analyze power and influence, capabilities, interdependence, reciprocity, international regimes, anarchy, cooperation, imperialism, and hegemony.

Same as POL SCI 144A.

Restriction: Upper-division students only. Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 141B. Homeland Security . 4.0 Units.**

Examines the 9/11 origins of the concept of homeland security; assess the evolution, structure, and operations of the Department of Homeland Security; critically examines the evolution of threat assessment to the U.S. and the utilization of risk management methodologies.

Same as POL SCI 143G.

**INTL ST 142A. U.S. Foreign Policy I: Globalism and Cold War. 4 Units.**

Looks at changing international perspectives, policy responses, and military strategies of presidential administrations from Truman to Reagan. In assessing the motives and objectives of U.S. foreign policy leaders during the "Cold War" era, the concept of "national interest" is examined.

Same as POL SCI 142D.

Restriction: International Studies Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment.

**INTL ST 142D. The International Relations of East Asia. 4 Units.**

Surveys various aspects of relations between the nations of East Asia. Topics include the historical development of the region; current political and security relations, including the impact of the American military presence.

Same as POL SCI 142B.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 142E. U.S. Coercive Diplomacy. 4 Units.**

Examines the theory of compellence and the U.S. practice of coercive diplomacy--the power to change behavior of other governments. Specific case examples: the Cuban missile crisis, bombing of North Vietnam, the Nicaraguan Contras, Desert Shield/Desert Storm, and Libya.

Same as POL SCI 142G.

Restriction: Upper-division students only. Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 142G. U.S. Foreign Policy Toward Asia. 4 Units.**

U.S. policy toward the countries of East Asia: bilateral and regional security relationships, U.S. economic relations with the major Asian countries, the development of regional institutions, and human rights.

Same as POL SCI 141E.

**INTL ST 143A. Vietnam War. 4 Units.**

Examines social structures and social changes in Vietnamese and U.S. societies through the study of the Vietnam War.

Same as SOCIOL 170A.

**INTL ST 144A. Comparative Politics: Four Nations, Three Continents. 4 Units.**

Studies four countries in a comparative fashion: their respective political histories and cultural traditions; actual differences among their superficially similar party, parliamentary, and executive institutions; contemporary economic policy. The countries represent three continents and varying levels of economic development.

Same as POL SCI 154C.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 145A. International Law. 4 Units.**

Examination of the origin, changing structure, application of international law, and the role of legal norms in regulating the behavior of states and maintaining international order.

Prerequisite: POL SCI 71A

Same as POL SCI 172A.

**(VIII)****INTL ST 147CW. International Humanitarianism. 4 Units.**

Examines, analyzes, and evaluates the humanitarian phenomenon, the actors involved in it (including states, international organizations (IOs), and nongovernmental organizations (NGOs)), the rise of a body of international humanitarian law, and the problems and debates associated with international humanitarianism today.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as POL SCI 147CW.

**(Ib)****INTL ST 147D. International Organizations. 4 Units.**

Active learning course that examines origins, decision-making processes, activities, and evolution of leading international organizations (e.g. U.N., NATO, EU, AU, WTO, World Bank, IMF). Activities include drafting reforms, applying theory, assessing dysfunctions, and participating in U.N. negotiation simulations.

Same as POL SCI 147D.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 148W. Global Futures. 4 Units.**

Develops critical insights into our collective future as it reflects different perspectives of the world. Topics include techno-orientalism, afro-futurism, feminist futures, indigenous cosmology, and environmental concerns.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**(Ib)****INTL ST 150. Racism and Global Apartheid. 4 Units.**

The concept of race has been used to draw a global color line dividing rich from poor, developed from developing, first from third worlds. Racism is used to justify slavery, colonialism, imperialism, eugenics, genocide, and extreme inequalities produced by globalization.

Restriction: International Studies Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment.

**INTL ST 151B. Religion and World Politics. 4 Units.**

Examines the relationship between religion and world politics historically and today, focusing on connections with peace/war, democracy, human rights, secularism(s), and globalization. Covers major debates, scholarship, concepts, and theories through class exercises, exams, and essays.

Prerequisite: POL SCI 41A or INTL ST 11 or INTL ST 12 or REL STD 5A or REL STD 5B or REL STD 5C

Same as POL SCI 146B, REL STD 115.

**INTL ST 152A. Non-Government Organization (NGO) Fundamentals. 4 Units.**

Introduction to non-governmental organizations, including their role in U.S. society and the international community. Explores varying definitions of NGOs and the characteristics held in common by all NGOs.

Same as SOC SCI 152A.

**INTL ST 153B. Cross-Cultural Studies of Gender. 4 Units.**

Explores the construction of gender in national and transnational contexts. Special attention is given to how race, sexuality, class, and global inequalities shape different experiences of gender, and how gender structures political, institutional, and social life across the world.

Same as ANTHRO 121D.

**(VII)****INTL ST 153C. Urban Anthropology. 4 Units.**

Cultural roles of urban centers and processes of urbanization in comparative perspective, focusing on both nonwestern, nonindustrial societies of past and present; the relationship between modern urban centers and Third World peoples. Migration, urban poverty, in Africa, Asia, Latin America.

Same as ANTHRO 121J.

**INTL ST 153D. Colonialism and Gender. 4 Units.**

An anthropological enquiry into the ways colonial relations of power have been structured and gendered throughout the world, and to what effect. Examines the social locations of men and women in the everyday exercise of colonial and imperial power.

Same as ANTHRO 136G.

Restriction: Anthropology Majors have first consideration for enrollment.

**INTL ST 153E. Nationalism and Ethnicity in the Contemporary World. 4 Units.**

An exploration of the concepts of identity, culture, ethnicity, race, and nation through ethnographic cases, with a view to asking larger questions: how do people create nativeness and foreignness? How does 'culture' get worked into contemporary racisms and nationalisms.

Same as ANTHRO 136A.

**(VIII)****INTL ST 153F. Militarism and Gender. 4 Units.**

Examination of feminist approaches to militarism, war, and political violence; drawing on representations of women as both victims of and participants in military violence; effects of militarism on formations of gender; effects of military industrial complex on nationalism and identity.

Same as GEN&SEX 167A.

**INTL ST 154B. Human Rights. 4 Units.**

Examines the causes and consequences of human rights violations with a focus on Latin America. What are human rights? When and where are they violated? What political mechanisms are available to deal with human rights problems? How effective are they.

Same as POL SCI 153E.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 154C. Ethics in an Age of Terror and Genocide. 4 Units.**

Original sources document personal impact of wars on genocides, from World War II to the Bosnian and Rwandan genocides and current wars in Iraq and Afghanistan. Students train for and conduct personal interviews with someone who lived through a war.

Same as POL SCI 145A.

**INTL ST 154W. Ethics and Justice in International Affairs. 4 Units.**

Analyzes choices regarding the use of force, resolving conflict, and promoting human rights and social justice. Special attention is given to the American experience as a principal case study of ethics and statecraft.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. International Studies Majors have first consideration for enrollment.

**(Ib)****INTL ST 156A. Voting and Political Manipulation. 4 Units.**

Introduction to social choice and cooperative games. Topics include majority rule, types of voting methods, apportionment and proportional representation, agenda manipulation, coalition formation, voting power, political consequences of electoral laws.

Same as POL SCI 151H, SOC SCI 121T, ECON 154.

Restriction: International Studies Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**INTL ST 157A. 21st Century Africa. 4 Units.**

Comparative studies of the cultures and societies of Sub-Saharan Africa, with emphasis on critical study of colonialism and postcoloniality, social transformation, and the politics of identity.

Prerequisite: ANTHRO 2A

Same as ANTHRO 164A.

Restriction: Anthropology Majors have first consideration for enrollment.

**(Ib)****INTL ST 157C. Comparing European and US Societies. 4 Units.**

Society, culture, institutions of U.S. and European countries. Fertility to football, guns to government, work to welfare, health to housework. Cross-national approaches for understanding the world and thinking critically about taken-for-granted practices. Policies the U.S. might borrow for social issues.

Same as SOCIOL 157C.

**INTL ST 158B. Peoples of the Pacific. 4 Units.**

The cultural history and recent developments among the Pacific peoples of Polynesia, Micronesia, Melanesia, New Guinea, and Australia.

Same as ANTHRO 163A.

**(VIII)****INTL ST 158D. China in the Global Age. 4 Units.**

Chinese society from 1949 to present. Social change in the context of political control and ideological considerations. Focus on the power structure, political decision processes, and ideological legitimization, and interplay with the Chinese community and its culture.

Same as SOCIOL 175B.

**INTL ST 161A. Political Islam. 4 Units.**

Political Islam is a diverse phenomenon. While noticeable barriers exist to 'Islamist democracy,' it is the Islamists who will define the political future of much of the Muslim world. Reviews the experience of Saudi Arabia, Egypt, Pakistan, Turkey, and Indonesia.

Same as SOC SCI 188K.

**INTL ST 162B. Peoples and Cultures of Post-Soviet Eurasia. 4 Units.**

Examines the cultures and political conflicts of the more than 130 indigenous ethnic groups in the European and Asian territories of the former U.S.S.R. Emphasis is on the theoretical issues of ethnicity, nationalism, and conflict management.

Same as POL SCI 154F, ANTHRO 164P.

**(VIII)****INTL ST 163. Global Inequalities. 4 Units.**

An examination of various forms of social, economic, and political inequality within and between nations. Different approaches to understanding inequality and the intersections of poverty, race, ethnicity, class, gender, nationality, health, and violence.

Restriction: International Studies Majors have first consideration for enrollment.

**INTL ST 165. Introduction to Contemporary Middle East Politics. 4 Units.**

An overview of basic issues that shape the politics of the Middle East and North Africa. Themes include implication of the colonization era, nation-state formation, inter-Arab relations, nationalism, Arab-Israel conflict, Islamic resurgence, and more.

Same as SOC SCI 188A, POL SCI 158D.

**INTL ST 175A. U.S. War on Terrorism. 4.0 Units.**

Analyzes the United States war on terrorism by focusing on terrorism, the U.S. wars in Afghanistan and Iraq, and changes in police powers through the Patriot Act, as well as the political leadership which directs the war.

Same as SOCIOL 170B.

**INTL ST 176C. Introduction to Chinese Politics. 4 Units.**

Background to the Chinese revolution, rise of the communist party; and institutions, ideology, and structure of Communist party rule from 1949-present.

Same as POL SCI 151B.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 176D. Chinese Politics: Policy, Leadership, and Change. 4 Units.**

Examines major policies from 1949 to the present, and considers the changing role of the Communist Party and its shifting treatment of various social groups; the era of Mao Zedong, reforms under Deng, and post-Deng politics.

Same as POL SCI 151C.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 176I. West European Politics. 4 Units.**

Explores four main themes: (1) thinking scientifically about politics; (2) understanding the linkages between different political structures and spheres of activity; (3) evaluating some theories about politics; (4) learning about three countries: Britain, France, and Germany.

Same as POL SCI 152F.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 176L. Canadian Politics. 4 Units.**

Addresses the basic structures and processes of contemporary Canadian government and politics. Additional topics may include regionalism, federalism, western alienation and oil, Canadian solutions to social welfare policy questions, developments in Quebec, and other issues associated with French-English relations.

Same as POL SCI 153B.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 177C. Revolution in Latin America. 4 Units.**

Presents a comparative analysis of the causes, development, and consequences of selected revolutionary movements, focusing on outbreaks in Mexico, Bolivia, Cuba, Chile, Nicaragua, and Grenada. Explores topics of state formation, economic nationalism, social justice, ethnicity, and role of international affairs.

Same as CHC/LAT 151B, HISTORY 166D, SOC SCI 173N.

**INTL ST 177D. U.S. Intervention in Latin America. 4 Units.**

Explores political, economic, social, and cultural ties that bind Latin America to the United States. Focuses on U.S. intervention and Latin American response from early nineteenth century to present day. Case studies include Mexico, Guatemala, Cuba, Chile, and Central America.

Same as POL SCI 142J, HISTORY 166, CHC/LAT 150.

**INTL ST 177E. Cuban Society and Revolution. 4 Units.**

Explores the causes, development, and legacy of the 1959 Revolution. Themes include economic dependency, democracy, race, gender, culture, and the always volatile relations between Cuba and the United States.

Same as POL SCI 153G, HISTORY 166C, CHC/LAT 157.

**INTL ST 177G. Revolution and Reaction in Cold War Latin America. 4 Units.**

Explores Latin American experiences of revolutionary change and military dictatorship during the Cold War (1945-1990). Pays particular attention to the lives of women, peasants, workers, and the urban middle classes. Case studies include Guatemala, Cuba, Chile, Argentina, Nicaragua, and Mexico.

Same as HISTORY 166B.

**INTL ST 177I. Ancient Civilization of Mexico and the Southwest. 4 Units.**

The prehistory and cultural evolution of the civilization which originated in Mexico, including the Olmecs, Aztecs, Toltecs, Maya, and Zapotec, as well as the Pueblos of the Southwestern U.S. Topics include the origins of food production and of the state.

Same as ANTHRO 141A.

**INTL ST 177J. Peoples and Cultures of Latin America. 4 Units.**

Surveys the prehistory of Latin America and its indigenous cultures, emphasizing the impact of colonial rule, capitalism, and twentieth-century transformations. Emphasis on communities from several countries. In some years, emphasis on comparisons between the Latin American and Caribbean experiences.

Same as ANTHRO 162A, CHC/LAT 120.

**(VIII)****INTL ST 178A. Immigration Politics in Western Europe. 4 Units.**

Examines immigration politics in Western Europe, analyzing trends and policy from the postwar period through to today. Topics include citizenship, immigrant integration, asylum, the far-right, and a rotating focus on contemporary issues, e.g., terrorism, Islamophobia.

Same as POL SCI 152K.

Overlaps with POL SCI 141D.

**INTL ST 179. Special Topics: Geographic Focus in International Studies. 4 Units.**

Studies in selected areas of international studies. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**INTL ST H180. International Studies Honors Research Seminar. 4 Units.**

Assists students to prepare a thesis prospectus for the Honors Program in International Studies. Students choose a topic, learn writing and research methods, write a prospectus and orally present and defend it, and conduct a literature review.

Restriction: International Studies Majors have first consideration for enrollment. Social Science Honors students only.

**INTL ST 183A. Global and International Studies Forum. 4 Units.**

A faculty-student forum featuring lectures from a variety of institutions with discussion issues related to Global and International Studies.

Repeatability: May be taken for credit 4 times.

Same as SOCECOL 183A, SOC SCI 183A.

**INTL ST 183B. Seminar in Mediation. 4 Units.**

Students develop mediation skills and refine knowledge in the practice and theory of conflict resolution. Students who complete this course may serve as mediators in the Campus Mediation Program. Course is a prerequisite to completing Indep Study as an intern.

Same as SOC SCI 183B, SOCECOL 183B.

Restriction: International Studies Majors have first consideration for enrollment. School of Humanities students have first consideration for enrollment. School of Social Ecology students have first consideration for enrollment. School of Social Sciences students have first consideration for enrollment.

**INTL ST 183CW. Seminar Conflict Resolution. 4 Units.**

Designed for seniors who are pursuing the minor in Conflict Resolution and/or International Studies major. Provides a forum in which students will refine skills and theory in the study of cooperation and conflict, from local to global arenas.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as SOCECOL 183CW, SOC SCI 183CW.

**(Ib)****INTL ST 183E. Conflict Resolution in Cross-Cultural Perspective. 4 Units.**

Examines theories of conflict management. Analyzes how conflict is mitigated in diverse cultures: at the interpersonal level, between groups, and on the international scale. Students discuss readings, hear from conflict management practitioners, and simulate negotiations.

Same as ANTHRO 136D, SOC SCI 183E, POL SCI 154G.

**(VIII)****INTL ST 189. Special Topics: Global Focus in International Studies. 2-4 Units.**

Studies in selected areas of international studies. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**INTL ST H190. Honors Thesis. 4 Units.**

Students work with faculty to complete their honors thesis.

Repeatability: May be taken for credit 2 times.

Restriction: International Studies Honors students only.

**INTL ST 199. Individual Study. 2-4 Units.**

Students participate in planned research and study under written contract with a supervising UCI instructor. Students may enroll for only one individual study course each quarter.

Repeatability: Unlimited as topics vary.

**INTL ST 201. What is Global Studies?. 4 Units.**

Introduces graduates to the field of global and international studies. Landmark studies outline the transition from globalization studies to contemporary global studies. Identify complex global issues, underlying processes of globalization, and the impacts they have on people around the world.

Restriction: Graduate students only.

**INTL ST 202. Foundations of European Social Thought. 4 Units.**

Provides graduate students with a broad overview of the major landmarks in the development of modern social thought. Introduces key philosophers and theorists Adam Smith, Marx, Durkheim, Weber, Freud, and Du Bois, focusing on the global dimensions of their work.

Restriction: Graduate students only.

**INTL ST 203. Globalizing Social Theory in the Age of Extremes. 4 Units.**

Examines important developments in social theory between 1914 and 1991. The overarching goal is to synthesize from these various approaches a critical and transdisciplinary theoretical framework to analyze complex global issues.

Restriction: Graduate students only.

**INTL ST 204. Theories of Globalization. 4 Units.**

Theories of globalization engage deep historical transformations, keeping the interrelated dynamics of economics, politics, and culture in focus. Theories examine transformations emanating at transnational and state levels, and from below in the form of social movements led by everyday people.

Restriction: Graduate students only.

**INTL ST 205. Theories from the Global South. 4 Units.**

Looking beyond the theoretical traditions of the Euro-American academy scholars can begin to engage important theoretical contributions from the Global South. Explores alternative standpoints and interventions challenging dominant narratives and calling into question taken-for-granted assumptions, categories, concepts, values, and perspectives.

Restriction: Graduate students only.

**INTL ST 206. Engaging Global Issues. 4 Units.**

Critical and interdisciplinary works on global issues serve as examples that graduates can use in their own research. Each week focuses on a different example of outstanding global research done by a scholar having an important impact on the field.

Restriction: Graduate students only.

**INTL ST 207. Research Design and Methods . 4 Units.**

Fundamentals of empirical research design, strategies for global research, sampling logics, reliability, validity, mixed methods, integrating qualitative and quantitative methods. Introduction to basic data collection methods and examples of more advanced methodological strategies. Research ethics and the IRB review process.

Restriction: Graduate students only.

**INTL ST 208. Grant Writing. 4 Units.**

Focuses on production, critique, and revision of student research proposals. A practical seminar designed to improve student proposals, help students through the application processes, and increase students' chances of obtaining support for their research.

Restriction: Graduate students only.

**INTL ST 210A. Proseminar in Global Studies I. 4 Units.**

Year-long intensive introduction to graduate students to a range of topics pertinent to the field of Global Studies. The guest speakers and topics addressed vary each quarter.

Repeatability: May be taken for credit 6 times.

Restriction: Graduate students only.

**INTL ST 210B. Proseminar in Global Studies II. 4 Units.**

Year-long intensive introduction to graduate students to a range of topics pertinent to the field of Global Studies. The guest speakers and topics addressed vary each quarter.

Repeatability: May be taken for credit 6 times.

Restriction: Graduate students only.

**INTL ST 210C. Proseminar in Global Studies III. 4 Units.**

Year-long intensive introduction to graduate students to a range of topics pertinent to the field of Global Studies. The guest speakers and topics addressed vary each quarter.

Repeatability: May be taken for credit 6 times.

Restriction: Graduate students only.

**INTL ST 260. Directed Reading and Research. 4-12 Units.**

Readings focused on specialized topics in consultation with, and with the consent of, a faculty member. Students are expected to produce a paper based on the readings.

Repeatability: May be taken for credit 6 times.

Restriction: Graduate students only.

**INTL ST 290. Dissertation Research. 1-12 Units.**

Dissertation research with Global and International Studies faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**INTL ST 299. Independent Study. 4-12 Units.**

Independent research with Global and International Studies faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Iranian Studies (IRAN)

### Courses

**IRAN 231A. History of Zoroastrianism. 4 Units.**

Reviews major trends in the history of Zoroastrianism.

Restriction: Graduate students only.

Concurrent with HIST 131A.

**IRAN 231B. Ancient Persia. 4 Units.**

Survey of the history of Persia in antiquity.

Restriction: Graduate students only.

Concurrent with HIST 131B.

**IRAN 231C. Medieval Persia. 4 Units.**

A survey of Persian history in the context of Late Antique and Medieval Islamic history.

Restriction: Graduate students only.

Concurrent with HIST 131C.

**IRAN 255A. Ancient India. 4 Units.**

Examines the visual and religious history of the region defined as 'India' today, but necessarily encompassing modern Bangladesh and Pakistan. Culminates with the supposed Golden Age of the Gupta empire and its far-reaching legacies.

Same as AHIS 255A.

Restriction: Graduate students only.

Concurrent with AHIS 155A.

**IRAN 255B. Medieval India. 4 Units.**

Begins with the Gupta period's aesthetic legacies in South Asia's architecture, sculpture, and painting. Explores the dispersal of Islam throughout South Asia, including the Muslim communities of southern India.

Same as AHIS 255B.

Restriction: Graduate students only.

Concurrent with AHIS 155B.

**IRAN 280. Studies in Old Iranian. 4 Units.**

Studies in grammars and texts of Old Persian and Avestan.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**IRAN 281. Studies in Middle Iranian. 4 Units.**

Studies in grammars and texts of Middle Iranian languages (e.g., Middle Persian, Parthian, Sogdian, Bactrian).

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**IRAN 282. Studies in Classical Persian. 4 Units.**

Studies in the premodern literatures and historical texts of medieval and early modern Persian.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**IRAN 290. Special Topics in Premodern Iranian Studies. 4 Units.**

Studies in selected areas of premodern Iranian Studies. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**IRAN 292. Seminar in Premodern Iranian Studies. 4 Units.**

Seminar in selected areas of premodern Iranian Studies. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**IRAN 293. Directed Readings in Premodern Iranian Studies. 4 Units.**

Directed reading on a specific topic agreed upon by student and instructor.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**IRAN 294. Curatorial Methods. 4 Units.**

Development of curatorial methodologies with an instructor in conjunction with curatorial internship or practicum.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**IRAN 295. Special Methods. 4 Units.**

Reading course focused on the development of particular research skills (e.g. archaeological field methods, numismatics, digital humanities) often in conjunction with a practicum.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**IRAN 296. Ethics, Law, and Art. 4 Units.**

Addresses a broad range of ethical and legal issues pertaining to art, ownership, looting and theft, museum policies, and cultural heritage.

Prerequisite: Background in Art History or Legal Studies.

Same as AHIS 296.

Concurrent with AHIS 196.

## Italian (ITALIAN)

### Courses

**ITALIAN 1A. Fundamentals of Italian. 5 Units.**

First quarter of first-year Italian in a hybrid format. Students are taught to conceptualize in Italian as they learn to understand, read, write, and speak. Classes are conducted entirely in Italian.

Overlaps with ITALIAN S1AB, ITALIAN 1AB.

**ITALIAN 1AB. Intensive Italian Fundamentals. 7.5 Units.**

First half of first-year Italian in a time-intensive form. Development of meaningful communicative skills for the purposes of interaction with Italian speakers and beginning study of Italian. Learner-centered approach develops speaking, listening, reading, writing, and cultural skills and knowledge.

Overlaps with ITALIAN 1A, ITALIAN 1B, ITALIAN S1AB.

Restriction: ITALIAN 1AB and ITALIAN 1A and ITALIAN 1B and ITALIAN S1AB may not be taken for full credit.

**ITALIAN 1B. Fundamentals of Italian. 5 Units.**

Second quarter of first-year Italian in a hybrid format. Students are taught to conceptualize in Italian as they learn to understand, read, write, and speak. Classes are conducted entirely in Italian.

Prerequisite: ITALIAN 1A. ITALIAN 1A with a grade of C or better. Placement into ITALIAN 1B is also accepted.

Overlaps with ITALIAN S1AB, ITALIAN S1BC, ITALIAN 1AB, ITALIAN 1BC.

**ITALIAN 1BC. Intensive Italian Fundamentals. 7.5 Units.**

Second half of first-year Italian in a time-intensive form. Development of meaningful communicative skills for the purposes of interaction with Italian speakers and beginning study of Italian. Learner-centered approach develops speaking, listening, reading, writing, and cultural skills and knowledge.

Prerequisite: ITALIAN 1AB or ITALIAN S1AB or ITALIAN 1B. ITALIAN 1AB with a grade of C or better. ITALIAN S1AB with a grade of C or better. ITALIAN 1B with a grade of C or better. Placement into ITALIAN 1BC is also accepted.

Overlaps with ITALIAN 1B, ITALIAN 1C, ITALIAN S1BC.

Restriction: ITALIAN 1AB and ITALIAN 1A and ITALIAN 1B and ITALIAN S1AB may not be taken for full credit.

**(VI)****ITALIAN 1C. Fundamentals of Italian. 5 Units.**

Third quarter of first-year Italian in a hybrid format. Students are taught to conceptualize in Italian as they learn to understand, read, write, and speak. Classes are conducted entirely in Italian.

Prerequisite: ITALIAN 1B or ITALIAN 1AB or ITALIAN S1AB. ITALIAN 1B with a grade of C or better. ITALIAN 1AB with a grade of C or better. ITALIAN S1AB with a grade of C or better. Placement into ITALIAN 1C is also accepted.

Overlaps with ITALIAN S1BC, ITALIAN 1BC.

**(VI)****ITALIAN S1AB. Italian Fundamentals. 7.5 Units.**

First-year Italian in an intensified form. Students are taught to conceptualize in Italian as they learn to understand, read, write, and speak. Classes are conducted entirely in Italian and meet daily three hours for five weeks each session.

Overlaps with ITALIAN 1A, ITALIAN 1B, ITALIAN 1AB.

Restriction: ITALIAN S1AB and ITALIAN 1A and ITALIAN 1B and ITALIAN 1AB may not be taken for full credit.

**ITALIAN S1BC. Italian Fundamentals. 7.5 Units.**

First-year Italian in an intensified form. Students are taught to conceptualize in Italian as they learn to understand, read, write, and speak. Classes are conducted entirely in Italian and meet daily three hours for five weeks each session.

Prerequisite: ITALIAN S1AB or ITALIAN 1B or ITALIAN 1AB. ITALIAN S1AB with a grade of C or better. ITALIAN 1B with a grade of C or better. ITALIAN 1AB with a grade of C or better.

Overlaps with ITALIAN 1B, ITALIAN 1C, ITALIAN 1BC.

Restriction: ITALIAN S1BC and ITALIAN 1B and ITALIAN 1C and ITALIAN 1BC may not be taken for full credit.

**(VI)**

**ITALIAN 2A. Intermediate Italian. 4 Units.**

Texts of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in Italian.

Prerequisite: ITALIAN 1C or ITALIAN 1BC or ITALIAN S1BC. ITALIAN 1C with a grade of C or better. ITALIAN 1BC with a grade of C or better. ITALIAN S1BC with a grade of C or better. Placement into ITALIAN 2A is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

(VIII)

**ITALIAN 2B. Intermediate Italian. 4 Units.**

Texts of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in Italian.

Prerequisite: ITALIAN 2A. ITALIAN 2A with a grade of C or better. Placement into ITALIAN 2B is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

(VIII)

**ITALIAN 2C. Intermediate Italian. 4 Units.**

Texts of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in Italian.

Prerequisite: ITALIAN 2B. ITALIAN 2B with a grade of C or better. Placement into 2C is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

(VIII)

**ITALIAN 50. Topics in Italian Culture. 4 Units.**

Examines Italian culture at home and from abroad, in cinema, literature, and popular culture.

Repeatability: Unlimited as topics vary.

(IV and VIII ).

**ITALIAN 99. Special Studies in Italian. 4 Units.**

Both student and instructor arrive at the theme of the course and the critical approach to be followed in consultation. Intended to offer courses in Italian otherwise unavailable.

Repeatability: May be repeated for credit unlimited times.

**ITALIAN 150. Topics in Italian Literature and Culture. 4 Units.**

Major themes, periods, and/or movements in Italian literature and culture. Taught in English.

Repeatability: Unlimited as topics vary.

**ITALIAN 199. Tutorial in Italian Literature and Culture. 4 Units.**

The student must submit a written description of the proposed course to the instructor and the Chair prior to the beginning of the course.

Repeatability: Unlimited as topics vary.

## Japanese (JAPANESE)

### Courses

**JAPANESE 1A. Fundamental Japanese. 5 Units.**

Students develop listening, speaking, reading, and writing abilities in Japanese for meaningful communication. Content deals with daily life, society, and culture in Japan. Approximately 180 kanji (Chinese characters) are introduced in addition to the hiragana and katakana orthography.

Prerequisite: Placement into JAPANESE 1A is accepted.

Overlaps with JAPANESE S1AB.

Restriction: JAPANESE 1A and JAPANESE S1AB may not be taken for full credit.

**JAPANESE 1B. Fundamental Japanese. 5 Units.**

Students develop listening, speaking, reading, and writing abilities in Japanese for meaningful communication. Content deals with daily life, society, and culture in Japan. Approximately 180 kanji (Chinese characters) are introduced in addition to the hiragana and katakana orthography.

Prerequisite: JAPANESE 1A or JAPANESE S1AB. JAPANESE 1A with a grade of C or better. JAPANESE S1AB with a grade of C or better. Placement into JAPANESE 1B is also accepted.

Overlaps with JAPANESE S1AB, JAPANESE S1BC.

Restriction: JAPANESE 1B and JAPANESE S1AB and JAPANESE S1BC may not be taken for full credit.

**JAPANESE 1C. Fundamental Japanese. 5 Units.**

Students develop listening, speaking, reading, and writing abilities in Japanese for meaningful communication. Content deals with daily life, society, and culture in Japan. Approximately 180 kanji (Chinese characters) are introduced in addition to the hiragana and katakana orthography.

Prerequisite: JAPANESE 1B or JAPANESE S1AB. JAPANESE 1B with a grade of C or better. JAPANESE S1AB with a grade of C or better. Placement into JAPANESE 1C is also accepted.

Overlaps with JAPANESE S1BC.

Restriction: JAPANESE 1C and JAPANESE S1BC may not be taken for full credit.

**(VI)****JAPANESE S1AB. Fundamentals of Japanese. 7.5 Units.**

First half of first-year Japanese in an intensified form.

Prerequisite: Placement into JAPANESE 1A.

Overlaps with JAPANESE 1A, JAPANESE 1B.

Restriction: JAPANESE S1AB and JAPANESE 1A and JAPANESE 1B may not be taken for full credit.

**JAPANESE S1BC. Fundamentals of Japanese. 7.5 Units.**

Second half of first-year Japanese in an intensified form.

Prerequisite: JAPANESE S1AB or JAPANESE 1B. JAPANESE S1AB with a grade of C or better. JAPANESE 1B with a grade of C or better. Placement into JAPANESE 1C is also accepted.

Overlaps with JAPANESE 1C, JAPANESE 1B.

Restriction: JAPANESE S1BC and JAPANESE 1B and JAPANESE 1C may not be taken for full credit.

**(VI)****JAPANESE 2A. Intermediate Japanese. 5 Units.**

Japanese listening, speaking, reading, and writing abilities developed for meaningful communication. Content deals with daily life, society, and culture, including social issues in Japan. Approximately 180 kanji (Chinese characters) are introduced in addition to the 180 characters learned in 1A-B-C.

Prerequisite: JAPANESE 1C or JAPANESE S1BC. JAPANESE 1C with a grade of C or better. JAPANESE S1BC with a grade of C or better. Placement into JAPANESE 2A is also accepted.

Overlaps with JAPANESE S2AB.

Restriction: JAPANESE 2A and JAPANESE S2AB may not be taken for full credit.

**(VIII)**

**JAPANESE 2B. Intermediate Japanese. 5 Units.**

Japanese listening, speaking, reading, and writing abilities developed for meaningful communication. Content deals with daily life, society, and culture, including social issues in Japan. Approximately 180 kanji (Chinese characters) are introduced in addition to the 180 characters learned in 1A-B-C.

Prerequisite: JAPANESE 2A. JAPANESE 2A with a grade of C or better. Placement into JAPANESE 2B is also accepted.

Overlaps with JAPANESE S2AB.

Restriction: JAPANESE 2B and JAPANESE S2AB and JAPANESE S2BC may not be taken for full credit.

**(VIII)**

**JAPANESE 2C. Intermediate Japanese. 5 Units.**

Japanese listening, speaking, reading, and writing abilities developed for meaningful communication. Content deals with daily life, society, and culture, including social issues in Japan. Approximately 180 kanji (Chinese characters) are introduced in addition to the 180 characters learned in 1A-B-C.

Prerequisite: JAPANESE 2B or JAPANESE S2AB. JAPANESE 2B with a grade of C or better. JAPANESE S2AB with a grade of C or better. Placement into JAPANESE 2C is also accepted.

Overlaps with JAPANESE S2BC.

Restriction: JAPANESE 2C and JAPANESE S2BC may not be taken for full credit.

**(VIII)**

**JAPANESE S2AB. Intermediate Japanese. 7.5 Units.**

First half of second-year Japanese in an intensified form.

Prerequisite: JAPANESE 1C or JAPANESE S1BC. JAPANESE 1C with a grade of C or better. JAPANESE S1BC with a grade of C or better. Placement into JAPANESE 2A is also accepted.

Overlaps with JAPANESE 2A, JAPANESE 2B.

Restriction: JAPANESE S2AB and JAPANESE 2A and JAPANESE 2B may not be taken for full credit.

**(VIII)**

**JAPANESE S2BC. Intermediate Japanese. 7.5 Units.**

Second half of second-year Japanese in an intensified form.

Prerequisite: JAPANESE S2AB or JAPANESE 2B. JAPANESE S2AB with a grade of C or better. JAPANESE 2B with a grade of C or better. Placement into JAPANESE 2C is also accepted.

Overlaps with JAPANESE 2C, JAPANESE 2B.

Restriction: JAPANESE S2BC and JAPANESE 2B and JAPANESE 2C may not be taken for full credit.

**(VIII)**

**JAPANESE 3A. Advanced Japanese. 4 Units.**

Students are taught to conceptualize in Japanese as they learn to understand, read, write, and speak. Authentic Japanese texts are used. Approximately 360 kanji (Chinese characters) in addition to the 270 characters learned in 1A-B-C and 2A-B-C are introduced.

Prerequisite: JAPANESE 2C or JAPANESE S2BC or placement into JAPANESE 3A. JAPANESE 2C with a grade of C or better. JAPANESE S2BC with a grade of C or better.

**(VIII)**

**JAPANESE 3B. Advanced Japanese. 4 Units.**

Students are taught to conceptualize in Japanese as they learn to understand, read, write, and speak. Authentic Japanese texts are used. Approximately 360 kanji (Chinese characters) in addition to the 270 characters learned in 1A-B-C and 2A-B-C are introduced.

Prerequisite: JAPANESE 3A. JAPANESE 3A with a grade of C or better. Placement into JAPANESE 3B is also accepted.

**(VIII)**

**JAPANESE 3C. Advanced Japanese. 4 Units.**

Students are taught to conceptualize in Japanese as they learn to understand, read, write, and speak. Authentic Japanese texts are used. Approximately 360 kanji (Chinese characters) in addition to the 270 characters learned in first and second year are introduced.

Prerequisite: JAPANESE 3B. JAPANESE 3B with a grade of C or better. Placement into JAPANESE 3C is also accepted.

Restriction: Japanese Language Literature Majors have first consideration for enrollment.

**(VIII)****JAPANESE 100A. Classical Japanese. 4 Units.**

Introduction to classical Japanese grammar and vocabulary with emphasis on reading and analysis of basic texts.

Prerequisite: JAPANESE 3C. JAPANESE 3C with a grade of C or better

**JAPANESE 100B. Classical Japanese. 4 Units.**

Introduction to classical Japanese grammar and vocabulary with emphasis on reading and analysis of basic texts.

Prerequisite: JAPANESE 100A. JAPANESE 100A with a grade of C or better

**JAPANESE 101A. Fourth Year Japanese. 4 Units.**

Continued emphasis on comprehension, grammar, and proficiency in reading, composition, and conversation through intensive study and analysis of a variety of texts.

Prerequisite: JAPANESE 3C

**JAPANESE 101B. Fourth Year Japanese. 4 Units.**

Continued emphasis on comprehension, grammar, and proficiency in reading, composition, and conversation through intensive study and analysis of a variety of texts.

Prerequisite: JAPANESE 3C

**JAPANESE 115. Japanese Literature: Advanced Texts. 4 Units.**

Designed for students with near-fluency in reading Japanese. Texts include both fiction and nonfiction by important writers, and may be supplemented and contextualized where needed by literary criticism and cultural-studies texts in English.

Prerequisite: JAPANESE 101A or JAPANESE 101B or JAPANESE 101C

Repeatability: Unlimited as topics vary.

**JAPANESE 180. Topics in Japanese Literature. 4 Units.**

Special topics through directed reading in Japanese. Paper required.

Prerequisite: JAPANESE 3C. JAPANESE 3C with a grade of C or better

Repeatability: May be taken for credit 3 times as topics vary.

**JAPANESE 199. Independent Study. 1-4 Units.**

Investigation of special topics through directed reading in Japanese. Paper required.

Repeatability: May be taken for credit for 12 units.

**JAPANESE 201. Readings in Traditional Japanese Prose. 4 Units.**

Close reading of selected premodern prose texts, including tales, journals, travel journals, essays.

Prerequisite: JAPANESE 100B

Repeatability: Unlimited as topics vary.

**JAPANESE 202. Readings in Traditional Japanese Poetry or Drama. 4 Units.**

Close reading of selected premodern poetic or dramatic texts.

Prerequisite: JAPANESE 100B

Repeatability: Unlimited as topics vary.

**JAPANESE 203. Readings in Modern Japanese Literature. 4 Units.**

Texts include both fiction and nonfiction by important writers, and may be supplemented where needed by literary criticism and cultural-studies texts in English.

Prerequisite: JAPANESE 101C

Repeatability: Unlimited as topics vary.

**JAPANESE 204. Readings in Traditional Japanese Literary and Cultural Theory . 4 Units.**

Close reading of selected texts involving literary criticism and/or aesthetics.

Prerequisite: JAPANESE 100B

Repeatability: Unlimited as topics vary.

**JAPANESE 205. Readings in Japanese Religion. 4 Units.**

Close readings of selected Japanese religious texts.

Prerequisite: JAPANESE 101C

Repeatability: Unlimited as topics vary.

**JAPANESE 211A. Studies in Traditional Japanese Prose. 4 Units.**

Studies in selected areas of traditional Japanese prose. Topics addressed vary each quarter. Research paper required.

Prerequisite: JAPANESE 100B

Repeatability: Unlimited as topics vary.

**JAPANESE 211B. Studies in Traditional Japanese Prose. 4 Units.**

Studies in selected areas of traditional Japanese prose. Topics addressed vary each quarter. Research paper required.

Prerequisite: JAPANESE 100B and JAPANESE 211A

Repeatability: Unlimited as topics vary.

**JAPANESE 212A. Studies in Traditional Japanese Poetry or Drama. 4 Units.**

Studies in selected areas of traditional Japanese poetry or drama. Topics addressed vary each quarter. Research paper required.

Prerequisite: JAPANESE 100B

Repeatability: Unlimited as topics vary.

**JAPANESE 212B. Studies in Traditional Japanese Poetry or Drama. 4 Units.**

Studies in selected areas of traditional Japanese poetry or drama. Topics addressed vary each quarter. Research paper required.

Prerequisite: JAPANESE 212A

Repeatability: Unlimited as topics vary.

**JAPANESE 213A. Studies in Modern Japanese Literature. 4 Units.**

A two-quarter, in-depth look at a major author and/or issue in modern Japanese literature. Seminar format. The first quarter is devoted to reading of the requisite texts; the second quarter, to the writing of a research paper.

Prerequisite: JAPANESE 203

Repeatability: Unlimited as topics vary.

**JAPANESE 213B. Studies in Modern Japanese Literature. 4 Units.**

A two-quarter, in-depth look at a major author and/or issue in modern Japanese literature. Seminar format. The first quarter is devoted to reading of the requisite texts; the second quarter, to the writing of a research paper.

Prerequisite: JAPANESE 203 and JAPANESE 213A

Repeatability: May be repeated for credit unlimited times.

**JAPANESE 214. Studies in Japanese Literary and Cultural Theory. 4 Units.**

Studies in selected areas of Japanese literary and cultural theory. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**JAPANESE 215. Studies in Japanese Religion. 4 Units.**

Studies in selected areas of Japanese religion. Topics addressed vary each quarter. Research paper required.

Prerequisite: JAPANESE 101C

Repeatability: Unlimited as topics vary.

**JAPANESE 230. Topics in Japanese Literature and Culture. 4 Units.**

A topical study that addresses important issues in Japanese literature and culture. May focus on a specific writer or writers, or on a specific issue or set of related issues.

Prerequisite: JAPANESE 203

Repeatability: Unlimited as topics vary.

**JAPANESE 290. Independent Study. 4 Units.**

Directed research on topic determined in consultation with faculty member. A term paper or project is required.

Repeatability: May be repeated for credit unlimited times.

**JAPANESE 299. Dissertation Research. 4-12 Units.**

For Students who have been admitted to doctoral candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## Judaica Studies (JUDAICA)

## Korean (KOREAN)

### Courses

**KOREAN 1A. Fundamental Korean. 5 Units.**

Natural approach with emphasis on the four fundamental skills of listening, speaking, reading, and writing for students with no previous background in Korean. Conducted in both English and Korean.

Prerequisite: Placement into KOREAN 1A.

Overlaps with KOREAN 1KA, KOREAN S1AB.

Restriction: KOREAN 1A and KOREAN 1KA and KOREAN S1AB may not be taken for full credit.

**KOREAN 1B. Fundamental Korean. 5 Units.**

Natural approach with emphasis on the four fundamental skills of listening, speaking, reading, and writing for students with no previous background in Korean. Conducted in both English and Korean.

Prerequisite: KOREAN 1A. KOREAN 1A with a grade of C or better. Placement into KOREAN 1B is also accepted.

Overlaps with KOREAN S1BC, KOREAN 1KB, KOREAN S1AB.

Restriction: KOREAN 1B and KOREAN 1KB and KOREAN S1AB and KOREAN S1BC may not be taken for full credit.

**KOREAN 1C. Fundamental Korean. 5 Units.**

Natural approach with emphasis on the four fundamental skills of listening, speaking, reading, and writing for students with no previous background in Korean. Conducted in both English and Korean.

Prerequisite: KOREAN 1B or KOREAN S1AB. KOREAN 1B with a grade of C or better. KOREAN S1AB with a grade of C or better. Placement into KOREAN 1C is also accepted.

Overlaps with KOREAN 1KC, KOREAN S1BC.

Restriction: KOREAN 1C and KOREAN 1KC and KOREAN S1BC may not be taken for full credit.

**(VI)****KOREAN 1KA. Fundamental Korean for Students with a Previous Background in Korean. 5 Units.**

Natural approach with emphasis on the four fundamental skills of listening, speaking, reading, and writing for students with a previous background in Korean. Conducted in both English and Korean.

Prerequisite: Placement into KOREAN 1KA.

Overlaps with KOREAN 1A, KOREAN S1AB.

Restriction: KOREAN 1KA and KOREAN 1A and KOREAN S1AB may not be taken for full credit.

**KOREAN 1KB. Fundamental Korean for Students with a Previous Background in Korean . 5 Units.**

Natural approach with emphasis on the four fundamental skills of listening, speaking, reading, and writing for students with a previous background in Korean. Conducted in both English and Korean.

Prerequisite: KOREAN 1KA. KOREAN 1KA with a grade of C or better. Placement into KOREAN 1KB is also accepted.

Overlaps with KOREAN 1B, KOREAN S1AB, KOREAN S1BC.

Restriction: KOREAN 1KB and KOREAN 1B and KOREAN S1AB and KOREAN S1BC may not be taken for full credit.

**KOREAN 1KC. Fundamental Korean for Students with a Previous Background in Korean. 5 Units.**

Natural approach with emphasis on the four fundamental skills of listening, speaking, reading, and writing for students with a previous background in Korean. Conducted in both English and Korean.

Prerequisite: KOREAN 1KB. KOREAN 1KB with a grade of C or better. Placement into KOREAN 1KC is also accepted.

Overlaps with KOREAN 1C, KOREAN S1BC.

Restriction: KOREAN 1KC and KOREAN 1C and KOREAN S1BC may not be taken for full credit.

**(VI)****KOREAN S1AB. Fundamentals of Korean. 7.5 Units.**

First half of first-year Korean in an intensified form.

Prerequisite: Placement into KOREAN 1A or KOREAN 1KA or KOREAN 1B or KOREAN 1KB.

Overlaps with KOREAN 1A, KOREAN 1B, KOREAN 1KA, KOREAN 1KB.

Restriction: KOREAN S1AB and KOREAN 1A and KOREAN 1KA and KOREAN 1B and KOREAN 1KB may not be taken for full credit.

**KOREAN S1BC. Fundamentals of Korean. 7.5 Units.**

Second half of first-year Korean in an intensified form.

Prerequisite: KOREAN S1AB or KOREAN 1B or KOREAN 1KB. KOREAN S1AB with a grade of C or better. KOREAN 1B with a grade of C or better. KOREAN 1KB with a grade of C or better. Placement into KOREAN 1C or KOREAN 1KC is also accepted.

Overlaps with KOREAN 1C, KOREAN 1KB, KOREAN 1KC, KOREAN 1B.

Restriction: KOREAN S1BC and KOREAN 1B and KOREAN 1KB and KOREAN 1C and KOREAN 1KC may not be taken for full credit.

**(VI)**

**KOREAN 2A. Intermediate Korean. 5 Units.**

Designed to develop writing and reading skills as well as communicative skills in authentic situations for students without previous initial background in Korean. Students also introduced to aspects of Korean culture as related to lesson topics and basic Chinese characters.

Prerequisite: KOREAN 1C or KOREAN S1BC. KOREAN 1C with a grade of C or better. KOREAN S1BC with a grade of C or better. Placement into KOREAN 2A is also accepted.

Overlaps with KOREAN 2KA.

(VIII)

**KOREAN 2B. Intermediate Korean. 5 Units.**

Designed to develop writing and reading skills as well as communicative skills in authentic situations for students without previous initial background in Korean. Students also introduced to aspects of Korean culture as related to lesson topics and basic Chinese characters.

Prerequisite: KOREAN 2A. KOREAN 2A with a grade of C or better. Placement into KOREAN 2B is also accepted.

Overlaps with KOREAN 2KB.

(VIII)

**KOREAN 2C. Intermediate Korean. 5 Units.**

Designed to develop writing and reading skills as well as communicative skills in authentic situations for students without previous initial background in Korean. Students also introduced to aspects of Korean culture as related to lesson topics and basic Chinese characters.

Prerequisite: KOREAN 2B. KOREAN 2B with a grade of C or better. Placement into KOREAN 2C is also accepted.

Overlaps with KOREAN 2KC.

(VIII)

**KOREAN 2KA. Intermediate Korean for Students with a Previous Background in Korean . 5 Units.**

Designed to develop writing and reading skills as well as communicative skills in authentic situations for students with previous background in Korean. Students also introduced to aspects of Korean culture as related to lesson topics and basic Chinese characters.

Prerequisite: KOREAN 1KC or KOREAN S1BC. KOREAN 1KC with a grade of C or better. KOREAN S1BC with a grade of C or better. Placement into KOREAN 2KA is also accepted.

Overlaps with KOREAN 2A.

(VIII)

**KOREAN 2KB. Intermediate Korean for Students with a Previous Background in Korean . 5 Units.**

Designed to develop writing and reading skills as well as communicative skills in authentic situations for students with previous background in Korean. Students also introduced to aspects of Korean culture as related to lesson topics and basic Chinese characters.

Prerequisite: KOREAN 2KA. KOREAN 2KA with a grade of C or better. Placement into KOREAN 2KB is also accepted.

Overlaps with KOREAN 2B.

(VIII)

**KOREAN 2KC. Intermediate Korean for Students with a Previous Background in Korean. 5 Units.**

Designed to develop writing and reading skills as well as communicative skills in authentic situations for students with previous background in Korean. Students also introduced to aspects of Korean culture as related to lesson topics and basic Chinese characters.

Prerequisite: KOREAN 2KB. KOREAN 2KB with a grade of C or better. Placement into KOREAN 2KC is also accepted.

Overlaps with KOREAN 2C.

(VIII)

**KOREAN 3A. Advanced Korean. 4 Units.**

Focuses on developing advanced reading/writing and translation skills with additional instruction in Chinese characters.

Prerequisite: KOREAN 2C or KOREAN 2KC or KOREAN S2BC. KOREAN 2C with a grade of C or better. KOREAN 2KC with a grade of C or better. KOREAN S2BC with a grade of C or better. Placement into KOREAN 3A is also accepted.

(VIII)

**KOREAN 3B. Advanced Korean. 4 Units.**

Focuses on developing advanced reading, writing, and translation skills.

Prerequisite: KOREAN 3A or KOREAN 2C or KOREAN 2KC or KOREAN S2BC. KOREAN 3A with a grade of C or better. KOREAN 2C with a grade of C or better. KOREAN 2KC with a grade of C or better. KOREAN S2BC with a grade of C or better. Placement into KOREAN 3B is also accepted.

(VIII)

**KOREAN 3C. Advanced Korean. 4 Units.**

Focuses on developing advanced reading, writing, and translation skills.

Prerequisite: KOREAN 2C or KOREAN 2KC or KOREAN S2BC or KOREAN 3A or KOREAN 3B. KOREAN 2C with a grade of C or better. KOREAN 2KC with a grade of C or better. KOREAN S2BC with a grade of C or better. KOREAN 3A with a grade of C or better. KOREAN 3B with a grade of C or better. Placement into KOREAN 3C is also accepted.

(VIII)

**KOREAN 101A. Fourth-Year Korean. 4 Units.**

Continued emphasis on comprehension, grammar, and proficiency in reading, composition, and conversation through intensive study and analysis of a variety of modern texts.

Prerequisite: KOREAN 3A or KOREAN 3B or KOREAN 3C. KOREAN 3A with a grade of C or better. KOREAN 3B with a grade of C or better. KOREAN 3C with a grade of C or better.

**KOREAN 115. Korean Literature: Advanced Texts. 4 Units.**

Designed for students with near-fluency in reading Korean. Readings include modern Korean literary works (poetry, prose, and drama) by important writers. Emphasis is on the interpretation of the texts and writings that interpret those texts in the original language.

Prerequisite: KOREAN 101A or KOREAN 101B or KOREAN 101C

Repeatability: Unlimited as topics vary.

**KOREAN 199. Independent Study. 1-4 Units.**

Investigation of special topics through directed reading in Korean. Paper required.

Repeatability: May be taken for credit for 12 units.

## Language Science (LSCI)

### Courses

**LSCI 1. Languages of the World. 4 Units.**

The world has over 6,000 languages, with an exuberant variety of sounds, words, grammars. Introduction to a representative (about eight), drawn from every continent. Students not expected to learn these languages, but to explore and study their structure and complexity.

(VIII)

**LSCI 2. Discovering Language. 4 Units.**

Explores language's pervasiveness and diversity; demonstrates ways linguistics illuminates language's crucial--albeit hidden--societal role. Issues: self- and group-identification, language death, language in legal and educational settings. Illustrations: spoken and signed languages, varieties of English, Native American languages.

(VII)

**LSCI 3. Introduction to Linguistics. 4 Units.**

Emphasis on the notion that language is a remarkable achievement of the human mind. Current insights into the nature of language. Survey of various subfields of linguistics. Introduction to linguistic analysis.

(III and V.B ).

**LSCI 10. Introduction to Phonology. 4 Units.**

Basic concepts in phonetic description and phonological analysis.

(III and V.B ).

**LSCI 20. Introduction to Syntax. 4 Units.**

Basic concepts in syntactic description and grammatical analysis.

Prerequisite: LSCI 3

(III and V.B ).

**LSCI 43. Introduction to Symbolic Logic. 4 Units.**

An introduction to the symbolism and methods of the logic of statements, including evaluation of arguments by truth tables, the techniques of natural deduction, and semantic tableaux.

Same as LPS 30, PHIL 30.

(Vb)

**LSCI 51. Acquisition of Language. 4 Units.**

What children say, what they mean, and what they understand. Theories about the learning of language by one-, two-, and three-year-olds. Comparison of kinds of data on which these theories are based.

Same as PSYC 56L.

(III)

**LSCI 51B. Foundations of Bilingual Education and Bilingualism. 4 Units.**

Provides a comprehensive overview of current issues in bilingual education and bilingualism. Topics include dimensions of bilingualism, the effects of bilingualism on children's linguistic and cognitive development, bilingual education programs, literacy, special needs, and assessment.

Same as EDUC 52, HUM 52.

**LSCI 68. Introduction to Language and Culture. 4 Units.**

Explores what the study of language can reveal about ourselves as bearers of culture. After introducing some basic concepts, examines how cultural knowledge is linguistically organized and how language might shape our perception of the world.

Same as ANTH 2D.

(III)

**LSCI 99. Special Topics in Language Science. 4 Units.**

Special Topics at lower-division level.

Repeatability: Unlimited as topics vary.

**LSCI 102. Formal Languages and Automata. 4 Units.**

Formal aspects of describing and recognizing languages by grammars and automata. Parsing regular and context-free languages. Ambiguity, nondeterminism. Elements of computability; Turing machines, random access machines, undecidable problems, NP-completeness.

Prerequisite: (ICS 46 or CSE 46) and MATH 2B and ICS 6B and ICS 6D. ICS 46 with a grade of C or better. CSE 46 with a grade of C or better

Same as CS 162.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment. Language Science Majors have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**LSCI 106M. Computational Models of Language Learning. 4 Units.**

Focuses on using computational models to investigate questions related to language learning. Topics include computational models of language acquisition, principles underlying models of language learning and language change, computational learning theory, and modeling information extraction from language by humans.

Prerequisite: LSCI 151. LSCI 151 with a grade of A- or better

Concurrent with LSCI 206C.

**LSCI 107M. Computational Methods for Language Research. 4 Units.**

Focuses on computational methods useful for language research. Students become familiar with software and programming languages used for extracting information from electronic datasets and for creating basic simulations of linguistic cognition. No prior programming experience assumed.

Prerequisite: PSYC 150 or LSCI 155 or PSYC 156A or LSCI 151

Same as PSYC 157M.

**LSCI 109. Special Topics in Computational Linguistics. 4 Units.**

Topics in computational linguistics.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**LSCI 111. Intermediate Phonology. 4 Units.**

Fundamentals of phonological theory. Intensive practice in phonological analysis.

Prerequisite: Recommended: LSCI 10

Concurrent with LING 211.

**LSCI 115. Introduction to Phonetics. 4 Units.**

Introduces students to fundamental concepts of phonetics. The sound systems of selected languages around the world, including that of English, are described in detail. Students are trained to work with speech sound recognition, phonetic transcription, and language sound production.

Prerequisite: LSCI 3

**LSCI 119. Special Topics in Phonetics/Phonology. 4 Units.**

Topics in Phonetics/Phonology.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**LSCI 121. Intermediate Syntax. 4 Units.**

Examines various phenomena within a generative theory of syntax, focusing on the nature of syntactic rules, representations, and constraints. Introduces methods of experimental syntax, providing students hands-on opportunity to recognize the connection(s) between theory and experiential results.

Prerequisite: LSCI 20

**LSCI 124. Current Topics in Syntactic Theory. 4 Units.**

Research seminar in syntax. Intensive study of a small number of well-defined topics which have had significant impact on the development of syntactic theory.

Repeatability: May be repeated for credit unlimited times.

**LSCI 129. Special Topics in Syntax. 4 Units.**

Topics in Syntax.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**LSCI 139. Special Topics in Morphology. 4 Units.**

Topics in Morphology.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**LSCI 141. Topics in Philosophy of Language. 4 Units.**

Selected topics in the philosophy of language, e.g., the nature of meaning, mechanisms of reference, speech acts.

Repeatability: Unlimited as topics vary.

Same as LPS 145, PHIL 145.

**LSCI 142. Introduction to Logic. 4 Units.**

Introduction to sentence logic, including truth tables and natural deduction; and to predicate logic, including semantics and natural deduction.

Same as LPS 104, PHIL 104.

**LSCI 143. Introduction to Formal Semantics. 4 Units.**

Introduces students to the analytical tools used in the investigation of natural language semantics. Topics include the truth-conditional approach to meaning, compositionality, scope and anaphora, generalized quantifier theory, and intensionality.

Prerequisite: LPS 30 or PHIL 30 or LPS 104 or PHIL 104. LPS 30 with a grade of A- or better. PHIL 30 with a grade of A- or better. LPS 104 with a grade of A- or better. PHIL 104 with a grade of A- or better

**LSCI 145A. Elementary Set Theory. 4 Units.**

An introduction to the basic working vocabulary of mathematical reasoning. Topics include sets, Boolean operations, ordered n-tuples, relations, functions, ordinal and cardinal numbers.

Same as LPS 105A, PHIL 105A.

**LSCI 145B. Metalogic. 4 Units.**

Introduction to formal syntax (proof theory) and semantics (model theory) for first-order logic, including the deduction, completeness, compactness, and Löwenheim-Skolem theorems.

Prerequisite: PHIL 105A

Same as LPS 105B, PHIL 105B.

Overlaps with MATH 150.

**LSCI 145C. Undecidability and Incompleteness. 4 Units.**

Introduction to the formal theory of effective processes, including recursive functions, Turing machines, Church's thesis, and proofs of Gödel's incompleteness theorem for arithmetic, and Church's undecidability theorem for first-order logic.

Prerequisite: PHIL 105B

Same as LPS 105C, PHIL 105C.

Overlaps with MATH 152.

Concurrent with LPS 205C.

**LSCI 149. Special Topics in Semantics. 4 Units.**

Topics in Semantics.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**LSCI 151. Acquisition of Language II. 4 Units.**

Focuses on native language learning, exploring the way in which infants and very young children unconsciously uncover the rich systematic knowledge of their native language. Examines both experimental and computational studies that quantitatively investigate the 'how' of language acquisition.

**LSCI 151B. Bilingual Acquisition. 4 Units.**

Focuses on different forms of bilingualism, including bilingual first language acquisition, early second language acquisition, and late second language acquisition. Research techniques discussed include theoretical, experimental, and computational methods.

Prerequisite: LSCI 151 or PSYC 156A. Placement via consent of the instructor is also accepted.

**LSCI 151S. Second Language Acquisition . 4 Units.**

Examines a number of theoretical perspectives that attempt to explain second language learning with a focus on adult learners. How universal constraints, individual differences, and social factors influence the task of learning a second language as an adult.

Prerequisite: LSCI 3 or SPAN 113B

**LSCI 152. Acquisition of Language III . 4 Units.**

Focuses on native language learning, exploring the way in which infants and very young children unconsciously uncover the rich systematic knowledge of their native language. Examines both experimental and computational studies that quantitatively investigate the 'how' of language acquisition.

**LSCI 155. Psychology of Language. 4 Units.**

Examines language using the tools of experimental psychology. From sounds to words to spoken and written sentences, explores how language is used in real time, and how its use reveals how it is represented in the mind.

Prerequisite: PSYC 7A or PSCI 9 or PSYC 9B or PSCI 11B or LSCI 3

Same as PSYC 150.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Language Science Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**LSCI 158. Language and the Brain . 4 Units.**

Research analysis on biological bases of human linguistic capacity. Development, focusing on hemispheric specialization, plasticity; localization of specific linguistic functions in adults, with emphasis on study of aphasias; relation of linguistic capacity to general cognitive capacity, considering research on retardation.

Prerequisite: (PSYC 7A or PSB 9 or PSYC 9A or PSB 11A) and (PSYC 9B or PSB 11B or BIOL 35 or BIOL N110 or BIOL N115A)

Same as BIOL N160, PSYC 161.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Biological Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**LSCI 159. Special Topics in Psycholinguistics. 4 Units.**

Topics in Psycholinguistics.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**LSCI 164A. Topics in Romance Languages. 4 Units.**

Topics in Romance Languages.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**LSCI 164B. French Phonetics. 4 Units.**

Study of the sound structure of French. Introduction to elements of general phonetics, contrastive (French/English) phonetics, and French phonetics and phonology. Designed to help students improve their pronunciation. Also serves as a preparatory course for language teaching.

Prerequisite: FREN 1C

**LSCI 165B. Structure of Japanese. 4 Units.**

An overview of the linguistic features of modern Japanese. Provides students with a systematic introduction to the nature and characteristics of the language.

Same as EAS 123.

**LSCI 165L. Language Change, Acquisition, and Complexity. 4 Units.**

Focuses on models of language change, acquisition, and complexity, looking at the connections between them to explain empirical data relating to the form of existing languages and how languages change over time. Emphasis is placed on computational and mathematical models.

Prerequisite: PSYC 156A. PSYC 156A with a grade of A- or better

**LSCI 168J. Improvisation, Language, and Culture. 4 Units.**

Addresses improvisation, both in performance and in everyday life. Examines improvisation as the 'flexible regulation' of everyday behavior by exploring different scholarly treatments of language and interaction, and working on developing actual theatrical improvisation skills.

Same as ANTH 151A.

Restriction: Upper-division students only.

**LSCI 168S. Language and Social Cognition. 4 Units.**

Explores the relationship between language and cognition in social and cultural contexts. The overall goal is to think through how language structure and use impact how individuals perceive, think about, and understand the world around them.

Same as ANTH 150A.

Restriction: Anthropology Majors have first consideration for enrollment.

**LSCI 169. Special Topics in Language Studies. 4 Units.**

Topics in Language Studies.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**LSCI 172. History of English. 4 Units.**

Traces the history of English from its roots through its earliest written records and into the present, including fundamental changes in morphology, phonology, syntax, semantics, and vocabulary, as well as social, cultural, and historical forces affecting language.

Prerequisite: LSCI 3

**LSCI 175. Language Origins: Evolution, Genetics, and the Brain. 4 Units.**

Examines how human language(s) may have originated. Studies pertinent techniques (reconstruction) and addresses related questions, including is our language faculty inborn (i.e., genetically encoded)? Can brain imaging and population genetics research help to unlock this mystery of human evolution?.

Same as ANTH 152A, GLBC 105, HIST 135G.

**LSCI 176. Introduction to Pidgins and Creoles. 4 Units.**

Explores the linguistic structures of pidgin and creole languages and examines major theories for the surprisingly high degree of similarity found across pidgin and creole languages. Includes sociolinguistic and field methods.

Prerequisite: LSCI 3 or SPAN 113A

**LSCI 179. Special Topics in Historical Linguistics. 4 Units.**

Topics in Historical Linguistics.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**LSCI 182V. Language and Literacy. 4 Units.**

Addresses the linguistic principles and processes that underlie oral and written language proficiency. Emphasis is on how to use phonology, morphology, orthography, semantics, syntax, and pragmatics to support literacy and oral language development for K-12 students.

Same as EDUC 151, PSCI 192V.

Restriction: Language Science Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Education Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**LSCI 189. Special Topics in Applied Language Science: Writing Skills for Language Science. 4 Units.**

Topics in Applied Language Science.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**LSCI 195A. Language Science Research I. 4 Units.**

Provides students with in-depth experience in different facets of research in language science. It includes theoretical, behavioral, computational, and/or applied language science topics and methodologies.

Prerequisite: Permission of faculty advisor. If this is not the same faculty member as the course instructor, the faculty advisor will coordinate with the course instructor when it comes to assessing the student's research process at the end of each quarter.

Repeatability: May be repeated for credit unlimited times.

**LSCI 195B. Language Science Research II. 4 Units.**

Provides students with in-depth experience in different facets of research in language science. It includes theoretical, behavioral, computational, and/or applied language science topics and methodologies.

Prerequisite: Permission of faculty advisor. If this is not the same faculty member as the course instructor, the faculty advisor will coordinate with the course instructor when it comes to assessing the student's research process at the end of each quarter.

Repeatability: May be repeated for credit unlimited times.

**LSCI 195C. Language Science Research III. 4 Units.**

Provides students with in-depth experience in different facets of research in language science. It includes theoretical, behavioral, computational, and/or applied language science topics and methodologies.

Prerequisite: Permission of faculty advisor. If this is not the same faculty member as the course instructor, the faculty advisor will coordinate with the course instructor when it comes to assessing the student's research process at the end of each quarter.

Repeatability: May be repeated for credit unlimited times.

**LSCI 195W. Writing Skills for Language Science. 4 Units.**

Focuses on written technical communication skills in language science. Topics include the scientific publication process (focusing on research abstracts), how to write for pieces of different lengths, and writing for different audiences.

(Ib)

**LSCI 198. Directed Group Study. 4 Units.**

Directed study with Linguistics faculty.

Repeatability: Unlimited as topics vary.

**LSCI 199. Independent Study. 4 Units.**

Independent research with Linguistics faculty. Students may enroll for only one 199 each quarter.

Repeatability: May be repeated for credit unlimited times.

**LSCI 201A. Language Science Research. 1.3 Unit.**

Involves colloquia and scientific reports by faculty, students, and visitors. Students are exposed to current language science research and gain experience in active listening and scientific discourse.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Language Science Majors only.

**LSCI 201B. Language Science Research . 1.3 Unit.**

Involves colloquia and scientific reports by faculty, students, and visitors. Students are exposed to current language science research and gain experience in active listening and scientific discourse.

Grading Option: In Progress (Letter Grade with S/U).

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Language Science Majors only.

**LSCI 201C. Language Science Research. 1.3 Unit.**

Involves colloquia and scientific reports by faculty, students, and visitors. Students are exposed to current language science research and gain experience in active listening and scientific discourse.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Language Science Majors only.

**LSCI 202A. Skills for Language Science I. 4 Units.**

Focuses on computational skills for language science research. Topics include computational literacy, programming languages, and database interfaces that are useful for language science research, allowing for general scripting and file manipulation, and enabling statistical analysis and data visualization.

Restriction: Graduate students only.

**LSCI 202B. Skills for Language Science II. 4 Units.**

Introduction to the scientific publication process and practice of scientific writing skills.

Prerequisite: LSCI 202A

Restriction: Graduate students only.

**LSCI 202C. Skills for Language Science III. 4 Units.**

Introduction to scientific presentation for audiences of different backgrounds and practice of scientific presentations skills.

Prerequisite: LSCI 202B

Repeatability: May be taken for credit for 4 units as topics vary.

Restriction: Graduate students only.

**LSCI 202D. Advanced Skills for Language Science . 4 Units.**

Practice of advanced professional writing skills, including writing of grants, journal publications, research profiles, academic CVs, teaching statements, and cover letters. Students bring their own academic material to workshop.

Prerequisite: LSCI 202A and LSCI 202B and LSCI 202C. LSCI 202A with a grade of B or better. LSCI 202B with a grade of B or better. LSCI 202C with a grade of B or better

Restriction: Graduate students only.

**LSCI 206C. Computational Models of Language Learning. 4 Units.**

Focuses on computational models of native language learning, exploring how probabilistic learning and inference fare on difficult case studies within language acquisition. In all cases, grounds the learning models in available empirical data and considers their psychological plausibility.

Prerequisite: LSCI 251. LSCI 251 with a grade of B- or better

Same as PSYC 245M.

Restriction: Graduate students only.

Concurrent with LSCI 106M.

**LSCI 209. Special Topics in Computational Linguistics. 1-4 Units.**

Focuses on ongoing research in linguistics. Variable units based on course content, as determined by Department. May be repeated for credit as topic varies.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

Concurrent with LSCI 109.

**LSCI 239. Special Topics in Morphology. 4 Units.**

Topics in morphology.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**LSCI 248M. Modal Logic. 4 Units.**

Introduction to modal logic methods and their application.

Restriction: Graduate students only.

**LSCI 250. Psycholinguistics. 4 Units.**

Examines how language is used in real time, and how its use reveals how it is represented in the mind and the brain.

Restriction: Graduate students only.

**LSCI 250B. Bilingualism. 4 Units.**

Examines how bilingualism interfaces with language representation, language use, and language development.

Restriction: Graduate students only.

**LSCI 250H. Heritage Language Acquisition. 4 Units.**

Examines how heritage languages are represented in speakers' minds, processed in real time, and acquired.

Restriction: Graduate students only.

**LSCI 251. Language Acquisition. 4 Units.**

Focuses on native language learning, exploring the way in which infants and very young children unconsciously uncover the rich systematic knowledge of their native language. Examines both experimental and computational studies that quantitatively investigate the 'how' of language acquisition.

Restriction: Graduate students only.

**LSCI 251A. Atypical Acquisition. 4 Units.**

Focuses on different types of atypical acquisition, including acquisition in special populations and acquisition under atypical circumstances. Research techniques discussed include theoretical, experimental, and computational methods.

Restriction: Graduate students only.

Concurrent with LSCI 151A.

**LSCI 253M. Experimental Methods for Language Research. 4 Units.**

Focuses on experimental methods useful for language research. Students become familiar with software and programming languages used for implementing and analyzing behavioral experiments.

Restriction: Graduate students only.

**LSCI 259. Special Topics in Psycholinguistics. 4 Units.**

Topics in Psycholinguistics. May be repeated for credit as topic varies.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**LSCI 265L. Language Change, Acquisition, and Complexity. 4 Units.**

Focuses on models of language change, acquisition, and complexity, looking at the connections between them to explain empirical data relating to the form of existing languages and how languages change over time. Emphasis is placed on computational and mathematical models.

Restriction: Graduate students only.

Concurrent with LSCI 165L.

**LSCI 281L. Language Learning with Digital Media. 4 Units.**

Provides students with a graduate-level introduction to key issues of digital media in second-language teaching and learning.

Restriction: Graduate students only.

**LSCI 281S. Second Language Acquisition and Teaching. 4 Units.**

Explores the prevailing paradigms that seek to account for how adults learn second languages (L2s) in instructed settings.

Restriction: Graduate students only.

**LSCI 290. Dissertation Research. 4-12 Units.**

Dissertation Research.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**LSCI 299. Independent Study. 1-12 Units.**

Independent study. Research with language science faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

# Latin (LATIN)

## Courses

### **LATIN 1A. Fundamentals of Latin. 5 Units.**

Elements of Latin grammar, syntax, and vocabulary.

Overlaps with LATIN S1AB.

Restriction: LATIN 1A and LATIN S1AB may not be taken for full credit.

### **LATIN 1B. Fundamentals of Latin. 5 Units.**

Elements of Latin grammar, syntax, and vocabulary.

Prerequisite: LATIN 1A. LATIN 1A with a grade of C or better

Overlaps with LATIN S1AB, LATIN S1BC.

Restriction: LATIN 1B and LATIN S1AB and LATIN S1BC may not be taken for full credit.

### **LATIN 1C. Fundamentals of Latin. 5 Units.**

Introduction to reading texts, including study of the poetry of Catullus and selected readings.

Prerequisite: LATIN 1B. LATIN 1B with a grade of C or better

Overlaps with LATIN S1BC.

Restriction: LATIN 1C and LATIN S1BC may not be taken for full credit.

## (VI)

### **LATIN 99. Special Studies in Latin. 1-4 Units.**

Lower-division level independent research with Latin faculty.

Repeatability: May be repeated for credit unlimited times.

### **LATIN 100. Topics in Classical Latin. 4 Units.**

Selected readings in Classical Latin prose and poetry. Authors may include Cicero, Caesar, Ovid, Catullus, and others. Selections from prose and poetry will be read each quarter. Grammar and syntax review included.

Prerequisite: LATIN 1C. LATIN 1C with a grade of C or better. Placement into Latin 100 is also accepted.

Repeatability: Unlimited as topics vary.

### **LATIN 103. Seminar in Latin Prose. 4 Units.**

Specialized and focused study of a particular Latin prose author or topic.

Prerequisite: LATIN 100

Repeatability: Unlimited as topics vary.

### **LATIN 104. Seminar in Latin Poetry. 4 Units.**

Specialized and focused study of a particular topic or author in Latin poetry.

Prerequisite: LATIN 100

Repeatability: Unlimited as topics vary.

### **LATIN 198. Directed Group Study. 1-4 Units.**

Special topics in Roman culture and civilization through directed reading and research.

Repeatability: May be repeated for credit unlimited times.

### **LATIN 199. Independent Studies in Latin. 1-4 Units.**

Independent research with Latin faculty.

Repeatability: May be repeated for credit unlimited times.

## Law (LAW)

## Linguistics (LINGUIS)

### Courses

**LINGUIS 150. Acquisition of Language II. 4 Units.**

Focuses on native language learning, exploring the way in which infants and very young children unconsciously uncover the rich systematic knowledge of their native language. Examines both experimental and computational studies that quantitatively investigate the 'how' of language acquisition.

Prerequisite: PSYCH 56L or LINGUIS 51

Same as PSYCH 156A.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

## Literary Journalism (LIT JRN)

### Courses

**LIT JRN 20. Introduction to Literary Journalism. 4 Units.**

Reading of selected texts to explore the ways in which literary journalism and related nonfiction modes formulate experience. Students complete a range of writing projects.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Literary Journalism Majors have first consideration for enrollment.

#### (IV)

**LIT JRN 21. Reporting for Literary Journalism. 4 Units.**

Instruction and hands-on training in how to interview, report, research, and collect the types of information needed to write literary journalism.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Literary Journalism Majors have first consideration for enrollment.

**LIT JRN 100. Advanced Reporting. 4 Units.**

Practical engagement with advanced reporting techniques of Literary Journalism, emphasizing the importance of thorough and effective research in the production of high-quality journalistic writing. Prepares students to make good decisions about where and how to publish their writing.

Prerequisite: LIT JRN 21

**LIT JRN 101A. Studies in the History, Theory, and Ethics of Literary Journalism. 4 Units.**

Lectures and discussion on topics that explore the historical and theoretical dimensions of literary journalism, with particular emphasis on the evolution of ethics in the field.

Prerequisite: LIT JRN 21 and LIT JRN 20 and (ENGLISH 28A or ENGLISH 28B or ENGLISH 28C or ENGLISH 28D or ENGLISH 28E or COM LIT 60A or COM LIT 60B or COM LIT 60C or ENGLISH 8 or ENGLISH 10 or ENGLISH 11 or ENGLISH 12 or ENGLISH 15 or ENGLISH 16 or ENGLISH 17)

**LIT JRN 101BW. Literary Journalism Core Writing Workshop. 4 Units.**

Writing workshops in announced specialized genres that students will both study and practice. Examples include 'The Memoir,' 'Review Writing,' 'The Editorial,' 'Writing Biography,' 'The Profile,' and 'Political Writing.'

Prerequisite: LIT JRN 101A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 3 times as topics vary.

Restriction: Upper-division students only. Students may enroll in one LITJ 101BW course per quarter.

#### (Ib)

**LIT JRN 103. Lectures on Topics in Literary Journalism. 4 Units.**

A series of lectures on, and discussions of, announced topics in literary journalism and the literature of fact. Examples include 'Travel Literary Journalism'; 'Literature of True Crime'; 'Narratives in the Digital Age'; 'Journalism on the Edge'.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Recommended: Upper-division students only.

**LIT JRN 197. Community Reporting . 4 Units.**

Directed group study in which students work with an instructor to report and write about community news in a newsroom-style format. Students will partner with local publications to pitch, market, and publish their stories.

Prerequisite: Satisfactory completion of lower-division writing requirement.

Repeatability: May be repeated for credit unlimited times.

**LIT JRN 198. Special Topics. 4 Units.**

Directed group study of selected topics.

Repeatability: Unlimited as topics vary.

**LIT JRN 199. Reading and Conference. 1-4 Units.**

To be taken only when the materials to be studied lie outside the normal run of departmental offerings.

Repeatability: May be repeated for credit unlimited times.

## Logic and Philosophy of Science (LPS)

### Courses

**LPS 29. Critical Reasoning. 4 Units.**

Introduction to analysis and reasoning. The concepts of argument, premise, and conclusion, validity and invalidity, consistency and inconsistency. Identifying and assessing premises and inferences. Deductive versus inductive reasoning, and introduction to the probability calculus. Evaluating definitions. Informal fallacies.

Same as PHIL 29.

(II and Vb ).

**LPS 30. Introduction to Symbolic Logic. 4 Units.**

An introduction to the symbolism and methods of the logic of statements, including evaluation of arguments by truth tables, the techniques of natural deduction, and semantic tableaux.

Same as LSCI 43, PHIL 30.

(Vb)

**LPS 31. Introduction to Inductive Logic. 4 Units.**

Philosophical questions concerning the foundations of scientific inference, e.g., the traditional problem of induction, the Goodman paradox, the concept of cause, Mill's method of inductive reasoning, probability calculus, different interpretations of probability, and their interaction in inductive reasoning.

Same as PHIL 31.

(II, Va)

**LPS 40. The Nature of Scientific Inquiry. 4 Units.**

Investigates the nature, scope, and status of scientific knowledge and the methods used to acquire it. Uses concrete historical examples from a variety of scientific fields to identify distinctive features of the scientific enterprise and explore their significance.

(II)

**LPS 60. The Making of Modern Science. 4 Units.**

Surveys the history of science and mathematics since the Scientific Revolution, examining central developments both chronologically and thematically, as well as investigating their significance for contemporary philosophical debates about the role and status of current scientific theories.

Same as HIST 60.

**(GE II or GE IV ).**

**LPS H80. Scientific Realism and Instrumentalism. 4 Units.**

Explores competing views of the character and status of theoretical knowledge in science, including challenges to and defenses of the view that contemporary scientific theories offer straightforward and accurate descriptions of how things stand in otherwise inaccessible domains of nature.

Restriction: Campuswide Honors Collegium students only.

**(II)**

**LPS H81. What is Space? . 4 Units.**

Historical, philosophical, scientific exploration of the concept of 'space.' Questions of interest include: What kind of a thing is space? How can we know what space is like? How is space different from time.

Restriction: Campuswide Honors Collegium students only.

**(II)**

**LPS 91. The Philosophy of Sex. 4 Units.**

Discusses the origins of biological sex, dynamics of sexual selection, sex differences in humans, and the construction of gender in human societies. Seeks to understand the role social values play in the creation of science.

Same as PHIL 91.

Overlaps with LPS H91.

**(III)**

**LPS H91. The Philosophy and Biology of Sex. 4 Units.**

Covers the origins of biological sex, dynamics of sexual selection, the evolution and cultural creation of sexual behavior in humans, and the construction of gender in human societies.

Restriction: Campuswide Honors Collegium students only.

**(II and III ).**

**LPS H95. Jurisprudence and Constitutional Law. 4 Units.**

Applies competing theories of the nature of law and legal reasoning to evaluate decisions of the U.S. Supreme Court in controversial areas of constitutional law such as free speech, privacy, sexual conduct, affirmative action, and political campaign contributions.

Restriction: Campuswide Honors Collegium students only.

**(III)**

**LPS 100W. Writing Philosophy. 4 Units.**

Discussion of those aspects of writing of special importance in philosophy, e.g., philosophical terminology, techniques for evaluating arguments, philosophical definitions and theories. At least 4,000 words of assigned composition based on philosophical readings.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as PHIL 100W.

Restriction: Upper-division students only.

**(Ib)**

**LPS 102. Introduction to the Theory of Knowledge. 4 Units.**

A study of one or more of the basic issues in epistemology, e.g., the role of perception in the acquisition of knowledge, the nature of evidence, the distinction between belief and knowledge, and the nature of truth and certainty.

Same as PHIL 102.

**LPS 104. Introduction to Logic. 4 Units.**

Introduction to sentence logic, including truth tables and natural deduction; and to predicate logic, including semantics and natural deduction.

Same as LSCI 142, PHIL 104.

**LPS 105A. Elementary Set Theory. 4 Units.**

An introduction to the basic working vocabulary of mathematical reasoning. Topics include sets, Boolean operations, ordered n-tuples, relations, functions, ordinal and cardinal numbers.

Same as LSCI 145A, PHIL 105A.

**LPS 105B. Metalogic. 4 Units.**

Introduction to formal syntax (proof theory) and semantics (model theory) for first-order logic, including the deduction, completeness, compactness, and Löwenheim-Skolem theorems.

Prerequisite: PHIL 105A

Same as LSCI 145B, PHIL 105B.

Overlaps with MATH 150.

**LPS 105C. Undecidability and Incompleteness. 4 Units.**

Introduction to the formal theory of effective processes, including recursive functions, Turing machines, Church's thesis, and proofs of Gödel's incompleteness theorem for arithmetic, and Church's undecidability theorem for first-order logic.

Prerequisite: PHIL 105B

Same as LSCI 145C, PHIL 105C.

Overlaps with MATH 152.

Concurrent with LPS 205C.

**LPS 106. Topics in Logic . 4 Units.**

Selected topics in mathematical or philosophical logic.

Prerequisite: PHIL 105B or LPS 105B

Repeatability: Unlimited as topics vary.

Same as PHIL 106.

**LPS 108. Topics in Induction, Probability, and Decision Theory. 4 Units.**

Selected topics in induction, probability, and decision theory.

Repeatability: Unlimited as topics vary.

Same as PHIL 108.

**LPS 113. Topics in Modern Philosophy. 4 Units.**

Focuses on the works of central philosophical figures of modern Philosophy (e.g., Descartes, Leibniz, Hobbes, Locke, Hume, Kant) or on the treatment of one or more central philosophical problems by a number of these figures.

Repeatability: Unlimited as topics vary.

Same as PHIL 113.

**LPS 115. Topics in History of Analytic Philosophy. 4 Units.**

Review of central theories or figures in the history of analytic philosophy. Emphasis on writings of Frege, Russell, Schlick, Carnap, and Quine. Topics include the nature of meaning and truth, the synthetic/analytic distinction, and scientific knowledge.

Repeatability: Unlimited as topics vary.

Same as PHIL 115.

**LPS 120. Topics in Metaphysics. 4 Units.**

Examines central philosophical questions concerning our own fundamental nature and that of the world around us (e.g., causation and necessity, determination, free will, personal identity, the mind-body problem).

Repeatability: Unlimited as topics vary.

Same as PHIL 120.

**LPS 121. Topics in the Theory of Knowledge . 4 Units.**

One or more topics in the theory of knowledge, e.g., the nature of rational justification, of perceptual knowledge, of a priori knowledge.

Repeatability: Unlimited as topics vary.

Same as PHIL 121.

**LPS H123. What is Disease?. 4 Units.**

Explores philosophical issues associated with scientific efforts to understand and explain disease.

Restriction: Campuswide Honors Collegium students only.

**(II)****LPS H125. What Is Time? . 4 Units.**

Engages the question 'what is time?' by drawing on physics, philosophy, fiction, film, and psychology. Organized around understanding and addressing the tension between time as represented in physics and our immediate temporal experience.

Restriction: Campuswide Honors Collegium students only.

**(III)****LPS 140. Topics in Philosophy of Science. 4 Units.**

Selected topics in contemporary philosophy of science, e.g., the status of theoretical entities, the confirmation of theories, the nature of scientific explanation.

Repeatability: Unlimited as topics vary.

Same as PHIL 140.

**LPS 141A. Topics in Philosophy of Physics. 4 Units.**

Selected topics in the philosophy of physics, e.g., the interpretation of quantum mechanics, the nature of spacetime, the problem of quantum field theories.

Repeatability: Unlimited as topics vary.

Same as PHIL 141A.

**LPS 141B. Geometry and Spacetime. 4 Units.**

An examination of the foundations of the special theory of relativity, with emphasis on the geometry of Minkowski spacetime, and its relation to both Euclidean and non-Euclidean (hyperbolic) plane geometries.

Prerequisite: MATH 2D and (MATH 3A or MATH 6G)

Same as PHIL 141B.

**LPS 141C. Philosophy of Quantum Mechanics. 4 Units.**

An examination of the standard von Neumann-Dirac formulation of quantum mechanics. The quantum measurement problem is discussed along with several proposed solutions, including GRW, many-worlds, man-minds, and Bohm's theory.

Same as PHIL 141C.

**LPS 141D. Probability and Determinism. 4 Units.**

An examination of a cluster of interrelated issues concerning probability, determinism, logic, and the foundations of quantum mechanics.

Prerequisite: MATH 2D and (MATH 3A or MATH 6G)

Same as PHIL 141D.

**LPS H141. Honors Philosophy of Quantum Mechanics. 4 Units.**

An examination of the standard von Neumann-Dirac formulation of quantum mechanics. The quantum measurement problem is discussed along with several proposed solutions, including GRW, many-worlds, man-minds, and Bohm's theory.

Overlaps with LPS 141C.

Restriction: Campuswide Honors Collegium students only.

**LPS 142W. Writing/Philosophy of Biology. 4 Units.**

Philosophy of biology, e.g., scientific method in biology, the structure of evolutionary theory, teleology, ethics, and evolution. Course work includes one 4,000-word and four 1,000-word papers.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as PHIL 142W, BIOL E142W.

Restriction: Juniors only.

**(Ib)**

**LPS 143. Topics in Philosophy of Psychology. 4 Units.**

Selected topics in the philosophy of psychology, e.g., the nature of psychological explanation, reductionism, issues in cognitive, behavioral, and neuroscience.

Repeatability: Unlimited as topics vary.

Same as PHIL 143, PSYC 123P.

Restriction: Psychology Majors have first consideration for enrollment. Philosophy Majors have first consideration for enrollment.

**LPS 144. Topics in Philosophy of Social Science. 4 Units.**

Selected topics in the philosophy of the social sciences, e.g., Is their goal to understand behavior or to predict and control it?; Are they normative and the natural sciences not?; Do they incorporate philosophical doctrines about language and mind?.

Repeatability: May be taken for credit for 4 units as topics vary.

Same as PHIL 144.

**LPS 145. Topics in Philosophy of Language. 4 Units.**

Selected topics in the philosophy of language, e.g., the nature of meaning, mechanisms of reference, speech acts.

Repeatability: Unlimited as topics vary.

Same as LSCI 141, PHIL 145.

**LPS 146. Topics in Philosophy of Logic. 4 Units.**

Selected topics in the philosophy of logic, e.g., the nature of logical truth and our knowledge of it, the status of propositions, definite descriptions, and existential presuppositions.

Repeatability: Unlimited as topics vary.

Same as PHIL 146.

**LPS 147. Topics in Philosophy of Mathematics. 4 Units.**

Selected historical and contemporary topics in the philosophy of mathematics, e.g., mathematical truth and ontology, mathematical knowledge, the nature and role of proof, the workings of mathematics in application.

Repeatability: Unlimited as topics vary.

Same as PHIL 147.

**LPS 199. Independent Study. 1-4 Units.**

Independent research with Logic and Philosophy of Science faculty.

Repeatability: May be taken for credit for 12 units.

**LPS 200. Topics in Logic and Philosophy of Science. 4 Units.**

Studies in selected areas of Logic and Philosophy of Science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**LPS 205A. Set Theory. 4 Units.**

The basic working vocabulary of mathematical reasoning. Topics include: sets, Boolean operations, ordered n-tuples, relations, functions, ordinal and cardinal numbers.

Same as PHIL 205A.

**LPS 205B. Metalogic. 4 Units.**

Formal syntax (proof theory) and semantics (model theory) for first-order logic, including the deduction, completeness, compactness, and Loewenheim-Skolem theorems.

Prerequisite: PHIL 205A or LPS 205A

Same as PHIL 205B.

**LPS 205C. Undecidability and Incompleteness. 4 Units.**

Formal theory of effective processes, including recursive function, Turing machines, Church's thesis, proofs of Goedel's incompleteness theorem for arithmetics, and Church's undecidability for first-order logic.

Prerequisite: PHIL 205B or LPS 205B

Same as PHIL 205C.

Restriction: Graduate students only.

Concurrent with LPS 105C.

**LPS 206. Topics in Logic . 4 Units.**

Studies in selected areas of logic. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 206.

**LPS 213. Topics in Modern Philosophy. 4 Units.**

Studies in selected areas of modern philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 213.

**LPS 215. Topics in Analytic Philosophy. 4 Units.**

Studies in selected areas of analytic philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 215.

**LPS 220. Topics in Metaphysics. 4 Units.**

Studies in selected areas of metaphysics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 220.

**LPS 221. Topics in Epistemology. 4 Units.**

Studies in selected areas of epistemology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 221.

**LPS 221A. Medical Epistemology. 4 Units.**

Analysis of epistemological issues concerning medical research and healthcare. Topics may include medical evidence, transmission of medical knowledge in the doctor-patient interaction, medical expertise, epistemology of medical disagreement, classification of illness, well-being, philosophy of pain, or medical decision making.

Same as PHIL 221A.

Restriction: Graduate students only.

**LPS 232. Topics in Political and Social Philosophy. 4 Units.**

Studies in selected areas of political and social philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 232.

**LPS 240. Topics in Philosophy of Science. 4 Units.**

Studies in selected areas of philosophy of science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 240.

**LPS 241. Topics in Philosophy of Physics. 4 Units.**

Studies in selected areas of philosophy of physics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 241.

**LPS 242. Topics in Philosophy of Biology. 4 Units.**

Studies in selected areas of philosophy of biology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 242.

**LPS 243. Topics in Philosophy of Psychology. 4 Units.**

Selected topics in the philosophy of psychology, e.g., the nature of psychological explanation, reductionism, issues in cognitive, behavioral, and neuroscience.

Repeatability: Unlimited as topics vary.

Same as PHIL 243, PSYC 231P.

**LPS 244. Topics in Philosophy of Social Science. 4 Units.**

Studies in selected areas of philosophy and social science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 244.

**LPS 245. Topics in Philosophy of Language. 4 Units.**

Studies in selected areas of philosophy of language. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 245.

**LPS 246. Topics in Philosophy of Logic. 4 Units.**

Studies in selected areas of philosophy of logic. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 246.

**LPS 247. Topics in Philosophy of Mathematics. 4 Units.**

Studies in selected areas of philosophy of mathematics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 247.

**LPS 289. Logic and Philosophy of Science Workshop. 1-4 Units.**

A two- or three-quarter-long workshop on selected topics in logic and philosophy of science.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**LPS 298. Independent Study. 4-12 Units.**

Independent research with Logic and Philosophy of Science Faculty.

Repeatability: May be taken for credit for 12 units.

**LPS 299. Directed Research. 1-12 Units.**

Directed study with Logic and Philosophy of Science Faculty.

Repeatability: May be repeated for credit unlimited times.

**LPS 399. University Teaching. 4-12 Units.**

Required of and limited to Teaching Assistants.

Repeatability: May be taken for credit for 12 units.

## Management (MGMT)

### Courses

**MGMT 1. Introduction to Business and Management. 4 Units.**

Rigorous overview of major business functions and management topics. Addresses the global and fast-changing environment in which modern business enterprises operate as well as the challenges posed by concerns about sustainable growth, ethics, and social responsibility.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 4A. Basic Economics for Managers I. 4 Units.**

Microeconomic principles for managers. Useful applications of basic economic principles to situations in business as well as in various professions. Materials fee.

Overlaps with ECON 23, ECON 20A.

Restriction: Business Administration Majors have first consideration for enrollment. For School of Social Sciences majors, MGMT 4A may not be used as a substitute for ECON 20A.

(III)

**MGMT 4B. Basic Economics for Managers II. 4 Units.**

Macroeconomic principles for managers. Useful applications of basic economic principles to situations in business as well as in various professions.

Prerequisite: MGMT 4A or ECON 20A

Overlaps with ECON 20B.

Restriction: Business Administration Majors have first consideration for enrollment. For School of Social Sciences majors, MGMT 4B may not be used as a substitute for ECON 20B.

(III)

**MGMT 5. Management of Contemporary Organizations. 4 Units.**

Equips students with working knowledge of several major subject areas within the context of business and society studies. Topics include: role of management in organizations, corporate social responsibility and responsiveness, ethics and values in business, government regulation, and international business.

**MGMT 7. Statistics for Business Decision Making. 4 Units.**

Basics of data analysis and the fundamental notion of statistical inference emphasizing applications to administrative and management decision problems. Classical estimation and hypotheses testing, regression, correlation, analysis of variance, nonparametric methods, and statistical probability.

Overlaps with STAT 7, STAT 8, ECON 15A, ECON 15B.

Restriction: Business Administration Majors have first consideration for enrollment.

(Va)

**MGMT 10. Business Management in the World Today. 4 Units.**

Accounting scandals, e-commerce, and globalization are only a few examples that show the profound impact of business practices on individuals and on society at large. Provides students with a broad overview of business functions and management practices.

**MGMT 30A. Principles of Accounting I. 4 Units.**

First in a two course introductory series. Emphasis on financial accounting concepts and practices essential to the administration of business enterprises; including recording and valuation of financial transactions, and preparation, analysis, and interpretation of financial statements.

Overlaps with ECON 25.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 30B. Principles of Accounting II. 4 Units.**

Second in a two-course introductory series. Emphasis is on the introduction of managerial accounting concepts and techniques as tools to aid management in carrying out the primary internal functions of planning, control, and decision-making.

Prerequisite: MGMT 30A

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 90. Special Topics in Management. 1 Unit.**

Studies in selected areas of management. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**MGMT 101. Management Science. 4 Units.**

Concepts and methods of management science, which applies mathematical modeling and analysis to management problems. Topics include linear and integer programming, project scheduling, inventory management, queuing analysis, decision analysis, and simulation.

Prerequisite: MGMT 7

Restriction: Upper-division students only. Business Administration Majors have first consideration for enrollment.

**MGMT 102. Managing Organizational Behavior. 4 Units.**

Basic theory and concepts which provide the manager with tools for understanding behavior of people in organizations. Areas such as individual, group, and organizational determinants of attitudes, turnover, and job performance.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 105. Introduction to Marketing. 4 Units.**

Basic marketing concepts; discussion of the role marketing plays in modern society. Topics include industrial and consumer marketing, promotion, distribution, and pricing theory.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 107. Introduction to Management Information Systems. 4 Units.**

Information Technology (IT) continues to drive rapid productivity growth and structural changes in the economy. Topics include what IT is, and how companies can use IT to improve business processes, enhance customer services, and gain competitive advantage over rivals.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 109. Introduction to Managerial Finance. 4 Units.**

Basics of financial administration. Capital budgeting, cost of capital, cash budgeting, working capital management, and long-term sources of funds. Provides a basic understanding of issues and techniques involved in financial decision making.

Prerequisite: MATH 2B and MGMT 30A

Overlaps with ECON 134A.

Restriction: Upper-division students only. Business Administration Majors have first consideration for enrollment.

**MGMT 110. Strategic Management. 4 Units.**

Addresses management of the entire business. Role of the general manager in organizations, industry analysis, core competencies, growth through vertical integration, innovation, acquisition and diversification, globalization, strategy implementation, and the ethical and moral responsibility of a manager.

Prerequisite: MGMT 102 and MGMT 105 and MGMT 109

Overlaps with ECON 147B.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 111. China and the Global Order. 4 Units.**

Introduces students to China's economic and military relations with the world, assessment of likelihood for conflict, and how to strategically manage business risk from regional conflict. Includes an original documentary series and engaging discussion.

**(VIII)****MGMT 113. New Ventures: A Course in Entrepreneurship. 4 Units.**

Introduction to the survival and growth of new ventures. Methods include analysis of live cases, guest speakers, discussion, and field projects with contemporary new ventures to learn about new venture management and surviving the liabilities of newness.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 115. Lean Startup. 4 Units.**

Based on the well-known Lean Launchpad course currently used by a growing segment of the startup world. Students work in teams to ideate, develop a Business Model Canvas, and gather customer/market feedback.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 123. Learning to Think Creatively and Innovate. 4 Units.**

Learn about your own thinking process; develop the ability to think both logically and creatively and to understand how emotions affect your thinking. Class sessions involve discussion and experiential exercises. Business problems and issues are used for discussion and exercises.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 124. Human Resources Management. 4 Units.**

Theory and practice of managing human resources. Students will identify and analyze HR dilemmas, apply labor law, and design systems and processes to develop the human resources needed to help organizations achieve their goals.

Restriction: Business Administration Majors have first consideration for enrollment. Business Information Mgmt Majors have first consideration for enrollment.

**MGMT 125. Negotiations. 4 Units.**

The objective is to assist students in developing an understanding of different theoretical perspectives and develop their skills in negotiating. Exploration of feelings and beliefs about negotiation, negotiation skills, and putting theory into action by practicing new negotiation skills.

Prerequisite: MGMT 102

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 126. Foundations of Teams. 4 Units.**

Social and psychological processes that detract from effective teamwork and collaboration. Tools to understand how to be a better team member are introduced. Provides the foundation for students to become effective team leaders and to manage difficult team situations.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 128. International Management. 4 Units.**

Impact of different cultures and political/economic systems on assumptions, expectations, and organizational practices relevant to conducting business in different national settings. Understanding of the challenges of cross-national management and resources utilized to work and conduct business outside the United States.

Restriction: Business Administration Majors have first consideration for enrollment.

**(VIII)****MGMT 129. Leadership. 4 Units.**

Case analyses, free-form discussion, and written assignments designed to develop critical thinking skills, as well as knowledge of approaches to differing leadership challenges. Experiential exercises encourage students to develop their ability to innovate, foster collaboration, manage conflict, and value diversity.

Prerequisite: MGMT 102

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 131A. Intermediate Accounting I. 4 Units.**

First course in a series of two intermediate-level courses in financial accounting theory and practice. Concepts include the measurement, valuation and reporting of current and long-term assets, current liabilities, and revenue recognition issues.

Prerequisite: MGMT 30A and MGMT 30B

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 131B. Intermediate Accounting II. 4 Units.**

Second course in a series of two intermediate-level courses in financial accounting theory and practice. Concepts include the measurement, valuation, and reporting of long-term liabilities and contingencies, accounting for stockholders' equity, and the Statement of Cash Flows.

Prerequisite: MGMT 131A

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 131C. Intermediate Accounting III. 4 Units.**

Third in a three-part series (A, B, and C). Focuses on developing knowledge related to investments, debt/equity issues, accounting for income taxes, pensions, leases, and revenue recognition.

Prerequisite: MGMT 131B

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 132A. Individual Taxation. 4 Units.**

Fundamentals of federal income taxation pertaining to individuals. Topics include income, deductions, credits, property transactions, and the impact of taxes on business and investment decisions.

Prerequisite: MGMT 30B

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 133. Corporate and Partnership Taxation. 4 Units.**

Fundamentals of federal income taxation pertaining to partnerships and corporations, including subchapter S corporations. Emphasis on the tax issues associated with formation, operation, and termination of these entities.

Prerequisite: MGMT 132A

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 136. Accounting Information Systems & Spreadsheets. 4 Units.**

Fundamentals of accounting information systems including internal controls and transaction processing cycles. Development of efficient spreadsheets as applied to financial and managerial accounting concepts.

Prerequisite: MGMT 30B

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 137. Advanced Accounting. 4 Units.**

Covers advanced concepts in accounting theory and practice. Topics include business combinations, consolidated financial statements, foreign exchange transactions, international, and governmental/nonprofit accounting standards.

Prerequisite: MGMT 131B

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 138. Auditing. 4 Units.**

An introduction to auditing practice with emphasis on the verification of financial statements and related information. Topics include professional ethics, assessment of audit risk, study and evaluation of internal control, gathering and evaluating audit evidence, and audit reporting.

Prerequisite: MGMT 131B

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 141. Investments. 4 Units.**

Foundations of investment management. Theory and empirical evidence related to portfolio theory, market efficiency, asset pricing models, factor models, and option pricing theory. Students are expected to combine market research results and electronic information sources to create optimal investment strategies.

Prerequisite: MGMT 109

Overlaps with ECON 132A.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 144. Multinational Finance. 4 Units.**

Focuses on financial issues facing multinational corporations, the most important of which is the management of foreign exchange risk. Introduction to investments and financing decisions in international capital markets.

Prerequisite: MGMT 109 and (ECON 20A or MGMT 4A) and (ECON 20B or MGMT 4B)

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 146A. Introduction to the Real Estate Process. 4 Units.**

Introductory survey course providing a working knowledge of the real estate market, both residential and commercial. Topics include real estate economics, appraisal, feasibility, investment, tax considerations, financing, and development. Lectures and cases, with supplemental presentations by real estate professionals.

Restriction: Upper-division students only. Business Administration Majors have first consideration for enrollment.

**MGMT 147. Applied Financial Valuation. 4 Units.**

Case study course designed to confront students with real-world financial valuation problems. Situations are chosen to enhance students' understanding of the application of finance theory. The principal focus is on estimating the value of firms and projects in diverse settings.

Prerequisite: MGMT 109 and MGMT 141

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 149. Derivatives. 4 Units.**

Introduction to financial derivatives. Covers forward contracts, futures, swaps, and options. Applications of these instruments, including pricing and risk management, are emphasized.

Prerequisite: MGMT 109

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 150. Consumer Behavior. 4 Units.**

Application of the behavioral sciences to understanding buyer behavior. Topics include perception, memory, affect, learning, persuasion, motivation, behavioral decision theory, social and culture influences, and managerial implications.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 151. Marketing Research. 4 Units.**

Research to aid managerial decisions for products and services; problem formulation, research design, data collection, sampling, statistical analyses, managerial recommendations, and implementation in several real-world settings.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 153. Sales Management. 4 Units.**

Designed for students interested in learning about sales force management and personal selling by firms engaged in business-to-business and consumer goods/services marketing. Covers advantages of personal selling, how to perform sales calls, challenges of sales managers, roles of buying centers.

Restriction: Business Information Mgmt Majors have first consideration for enrollment. Business Administration Majors have first consideration for enrollment.

**MGMT 154. Global Marketing. 4 Units.**

Students are exposed to the challenges and opportunities facing marketers in the international marketplace. Special attention is given to the management of cultural differences in product development, distribution systems, pricing, and promotion.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 155. Brand Management. 4 Units.**

Introduction to issues in planning, implementing, and evaluating brand strategies, relevant theories, models, and tools for the making of brand decisions; application of these principles.

Prerequisite: MGMT 105

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 156. Pricing Strategy . 4 Units.**

Provides a framework for designing and analyzing pricing strategies. Emphasizes role of pricing in the marketing-mix decisions and broader marketing strategy of a firm. Incorporates study of various economic, psychological, competitive, and organizational foundations that enter into effective pricing decisions.

Prerequisite: MGMT 105

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 157. Marketing on the Internet. 4 Units.**

Recent developments in interactive technologies indicate that marketing on the internet is becoming a serious business activity, with exponential growth. How to do marketing on the Internet and identify the key issues pertaining to the marketing process.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 165. U.S. Healthcare Systems. 4 Units.**

Providers, suppliers, payers, consumers, and the unique market dynamics among these players. Structure, organization, and financing of health care. The health care industry's relationship to the overall economy will be explored.

Restriction: Business Administration Majors have first consideration for enrollment. Business Information Mgmt Majors have first consideration for enrollment.

**MGMT 166. Business of Medicine. 4 Units.**

In order to improve the quality and efficiency of health care delivery one must understand the design and management of health care operations. Opportunities for innovation and changes needed to design a simple, accessible, fair, and effective health care system.

Restriction: Business Administration Majors have first consideration for enrollment. Business Information Mgmt Majors have first consideration for enrollment.

**MGMT 171. Social Media. 4 Units.**

Covers theoretical aspects and business applications of social media tools including blogs, wikis, social networking platforms, immersive environments, and other social computing technologies. Also covers business value of social-media-enabled processes.

Restriction: Business Administration Majors have first consideration for enrollment. Business Information Mgmt Majors have first consideration for enrollment.

**MGMT 173. Business Intelligence for Analytical Decisions. 4 Units.**

BI from both managerial and technical perspectives. Learn to apply a variety of data mining techniques to learn business intelligence embedded in data, and apply that intelligence to run your business more efficiently. These techniques are useful in different areas.

Prerequisite: MGMT 107

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 174. Database Management and Applications. 4 Units.**

Query, manipulate, and understand data and learn about leading edge applications for databases. Database fundamentals including entity relationship design, creating database tables, normalization, and data querying. Contemporary applications of database using case studies. Applications include data warehousing, data mining.

Prerequisite: MGMT 107

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 176. Digital Strategies. 4 Units.**

Covers business strategies for firms that make technology products. Insights are applicable not only to industries that make information and technology goods but also to industries that leverage digitization and network effects for their products.

Restriction: Business Administration Majors only.

**MGMT 178. Management of Information Technology. 4 Units.**

Strategic use and impact of information technology (IT) in organizations. Covers what IT is, and how it works, business value of IT, and IT strategies that organizations can employ to create value.

Prerequisite: MGMT 107

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 182. Supply Chain Management. 4 Units.**

Flows of materials and information among all of the firms that contribute to a product or service. Forecasting, demand management, logistical networks, inventory management, supplier contracting, sourcing, information technology, flexibility, globalization, and performance management.

Prerequisite: MGMT 101

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 189. Operations Management. 4 Units.**

Managing the productive resources, from which raw materials as inputs are being transformed into useful outputs of final products and services. Explanation of issues pertaining to both manufacturing and services-oriented systems.

Prerequisite: MGMT 101

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 190. Special Topics in Management. 2-4 Units.**

Studies in selected areas of management. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 191W. Business Communication. 4 Units.**

Provides students with a solid foundation in business communication. Emphasis is placed on improving students' written and oral communication skills to help them succeed in (1) upper-division Business Administration courses, (2) graduate school, and (3) work and career activities.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Business Administration Majors only.

(Ib)

**MGMT 192. Business Law. 4 Units.**

A study of the legal environment of business. Topics include contracts, agency, partnerships, corporations, and other basic principles of law as they relate to business transactions.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 194. Financial Statement Analysis. 4 Units.**

Study of financial statements and their related footnotes; tools and procedures common to financial statement analysis; relationships among business transactions, environmental forces (political, economic, social), and reported financial statement information; how financial statement information can help solve certain business problems.

Prerequisite: MGMT 30A and MGMT 30B

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 198A. Administrative Internship. 4 Units.**

Selected undergraduates serve as managers within administrative units on campus with a three-quarter course which complements the intern experience. Topics include management ethics, study of non- and for-profit institutions, career management, and the changing nature of the workforce.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**MGMT 198B. Administrative Internship. 4 Units.**

Selected undergraduates serve as managers within administrative units on campus with a three-quarter course which complements the intern experience. Topics include management ethics, study of non- and for-profit institutions, career management, and the changing nature of the workforce.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**MGMT 198C. Administrative Internship. 4 Units.**

Selected undergraduates serve as managers within administrative units on campus with a three-quarter course which complements the intern experience. Topics include management ethics, study of non- and for-profit institutions, career management, and the changing nature of the workforce.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**MGMT 199. Independent Study. 1-4 Units.**

Individual study under the direction of a selected faculty member.

Repeatability: May be repeated for credit unlimited times.

## Management MBA (MGMTMBA)

### Courses

**MGMTMBA 200. Thinking Strategically in the Digital Age. 4 Units.**

Focuses on the strategic and organizational challenges that a rapidly changing environment poses to the firm's management and frames them according to Merage's strategic emphasis on analytical decision making, innovation, and information technology.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Business Administration Majors only.

**MGMTMBA 201A. Business Analytics: Decision-Making. 4 Units.**

Methods of statistical inference, emphasizing applications to administrative and management decision problems. Topics include classical estimation and hypothesis testing, regression, correlation, analysis of variance, decision analysis, and forecasting.

Prerequisite: Courses in basic statistics with probability.

Restriction: Graduate students only. Business Administration Majors only.

**MGMTMBA 201B. Management Science. 4 Units.**

An introduction to computer-based models for decision making. Topics include optimization (linear programming, integer programming, network flow models) and computer simulation. Uses spreadsheets extensively, including Excel built-in and add-in packages.

Restriction: Graduate students only. Business Administration Majors only.

**MGMTMBA 202. Organizational Leadership for Management. 4 Units.**

Develops a better understanding of the causes and consequences of individual and group behavior, and the frameworks by which to analyze and understand complex organizations; and enhances the skills required to manage and lead an organization.

Restriction: Graduate students only. Business Administration Majors only.

**MGMTMBA 203A. Financial Reporting. 4 Units.**

Involves the development, analysis, and interpretation of financial accounting information for external reporting purposes.

Restriction: Graduate students only. Business Administration Majors only.

**MGMTMBA 203B. Driving Profitability Through Management Accounting. 4 Units.**

Teaches core skills for making vital strategic and tactical decisions (e.g., outsourcing; adding/dropping product lines), to maximize profitability while managing risk. Also covers operational and managerial tools (e.g., budgeting, planning, cost-volume-profit analysis) to drive strategy implementation and incentivize employees.

Prerequisite: MGMTMBA 203A or MGMT FE 203A

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 204A. Microeconomics for Management in the Digital Age. 4 Units.**

Provides basic tools for analyzing economic decisions of consumers and firms. Topics include demand and supply analysis, production and cost theory, perfect competition, monopoly, market failures, and introductory game theory.

Restriction: Graduate students only. Business Administration Majors only.

**MGMTMBA 204B. Macroeconomics for Management. 4 Units.**

Introduces use of macroeconomic analysis to manage the business cycle for competitive advantage. Such 'business cycle-sensitive' management is explored within the context of marketing, operations management, HRM, merger and acquisition activity, and capital financing and expenditures.

Prerequisite: MGMTMBA 204A or MGMT FE 204A

Restriction: Graduate students only. Business Administration Majors only.

**MGMTMBA 205. Marketing Principles. 4 Units.**

Introduction to the field of marketing. Objectives include developing familiarity with fundamental concepts, theories, and techniques in marketing, and acquainting students with the type of decisions made by marketing managers including customer targeting, product, pricing, distribution, promotion, and research.

Restriction: Graduate students only. Business Administration Majors only.

**MGMTMBA 207. Competing with Digital: Technology, Analytics, and Platforms. 4 Units.**

Focuses on the technological and managerial issues surrounding the development and use of IT in organizations. Examines role of technology in organizations, how technology can be used to execute an organization's business strategy and to enable new, innovative business strategies.

Restriction: Graduate students only. Business Administration Majors only.

**MGMTMBA 208. Operational Excellence: Processes, Models, and Analytics. 4 Units.**

Introduction to strategic and tactical issues in production and operations management. A blend of quantitative and qualitative considerations. Topics include product planning, process design, capacity management, production planning, inventory control, distribution management, just-in-time manufacturing, quality management.

Restriction: Graduate students only. Business Administration Majors only.

**MGMTMBA 209A. Managerial Finance. 4 Units.**

Introduces students to financial theory and concepts. The main topics covered are time value of money, valuation of stocks and bonds, capital budgeting, portfolio theory, capital structure choice.

Prerequisite: MGMTMBA 201A and MGMTMBA 203A and MGMTMBA 204A

Restriction: Graduate students only. Business Administration Majors only.

**MGMTMBA 209B. Investments. 4 Units.**

Foundations of investment management. Theory and empirical evidence related to portfolio theory, market efficiency, asset pricing models, factor models, and option pricing theory. Students are expected to combine market research results and electronic information sources to create optimal investment strategies.

Prerequisite: MGMTMBA 209A or MGMT FE 209A

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 210. Strategy: Foundations and Dynamics. 4 Units.**

Provides conceptual frameworks and techniques to analyze and develop firm strategies. Through case analysis and discussion, helps improve strategic thinking by developing frameworks by which to assess, evaluate, and respond to different business situations.

Prerequisite: MGMTMBA 200 and MGMTMBA 202 and MGMTMBA 205 and MGMTMBA 209A

Restriction: Graduate students only. Business Administration Majors only.

**MGMTMBA 211. MBA Proseminar.**

Provides students in the Merage School Full-time MBA Program with information and practical skills for success in the MBA program, and for business career planning.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMTMBA 213. New Venture Management. 4 Units.**

Teaches students how to launch and manage a new business by providing an overview of the start-up process, including how to identify new business opportunities and how to develop a sound operating model, value new ventures, and understand capital financing.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 214. Entrepreneurship: Planning the New Venture. 4 Units.**

Project course in which student teams develop a business plan to launch a new venture. The final business plan is presented to an expert panel.

Prerequisite: (MGMTMBA 202 or MGMT FE 202) and (MGMTMBA 205 or MGMT FE 205) and (MGMTMBA 210 or MGMT FE 210)

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 215. Global Competitive Strategy. 4 Units.**

Explores advanced topics in managing the geographic scope of the firm: locating activities in the right places, which markets to penetrate, horizontal integration across countries, and multinational partnering.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 217. Competitive Intelligence. 4 Units.**

The course focuses on how to design a competitive intelligence program which is a core foundation upon which competitive strategies and execution tactics are developed, assessed, and modified.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 218. Business Dynamics. 4 Units.**

Enhances students' analytical skills by analyzing complex challenges that businesses face and to quickly implement a winning response.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 220. Organizational Change. 4 Units.**

Focuses on the implementation of change, including identifying the features of successful change in organizations of varying sizes and configurations, with an emphasis on the reasons why individuals resist or embrace change.

Prerequisite: MGMTMBA 202 or MGMT FE 202

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 225. Negotiations. 4 Units.**

Using a combination of theory and practice via negotiation simulations, students expand their repertoire of negotiating skills and develop their ability to analyze different negotiation situations and contexts.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 228. International Management. 4 Units.**

Introduction to the effects of different national cultures, political and economic systems on the assumptions, expectations, organizational practices, and organizational forms needed to conduct cross-national organizational work.

Prerequisite: MGMTMBA 202 or MGMT FE 202

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 229. Leadership Strategies. 4 Units.**

Provides insight/perspectives about the study and development of leadership. Helps students answer three questions: Where am I currently as a leader? What tools can I use to improve my leadership? What is my plan for the future as a leader. Materials fee.

Prerequisite: MGMTMBA 202 or MGMT FE 202. MGMTMBA 202 with a grade of C or better. MGMT FE 202 with a grade of C or better

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMTMBA 231A. Financial Statement Analysis and Valuation I. 4 Units.**

Develops skills essential to using financial statements for business analysis by examining financial information quality, profitability and risk analysis, earnings management, revenue recognition, asset recognition and valuation, and how financial reporting is related to the business environment and managerial incentives.

Prerequisite: MGMTMBA 203A or MGMT FE 203A. MGMTMBA 203A with a grade of C or better. MGMT FE 203A with a grade of C or better

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMTMBA 243. Bonds and Fixed Income. 4 Units.**

Fixed-income markets include treasury bonds, corporate bonds, and asset-backed securities. Focuses on techniques and methodologies for valuing different types of debt as well as their uses.

Prerequisite: (MGMTMBA 209A or MGMT FE 209A) and (MGMTMBA 209B or MGMT FE 209B)

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 244. Multinational Finance. 4 Units.**

Focuses on financial issues facing multinational corporations, the most important of which is the management of foreign exchange risk. Other topics include investments and financing decisions in international capital markets.

Prerequisite: MGMTMBA 209A or MGMT FE 209A

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 245. FinTech and the Digital Economy for Business. 4 Units.**

Provides working knowledge of the role of IT-enabled innovation in financial markets to help students acquire an understanding of broad economic issues that are of wide applicability in many areas of FinTech. Both qualitative analysis and quantitative applications are explored.

Restriction: Master of Business Admin Degree students only.

**MGMTMBA 247. Venture Capital and Private Equity. 4 Units.**

Geared to students who are seeking a career in finance and/or in working with venture capital firms, private equity/buyout firms, investment banks, commercial lenders, mezzanine fund investors, corporate finance, and entrepreneurial firms.

Restriction: Master of Business Admin Degree students only.

**MGMTMBA 248. Corporate Valuation. 4 Units.**

Studies cases that expand concepts covered in the introductory corporate finance course and focuses on estimating the value of firms and projects in diverse settings.

Prerequisite: (MGMTMBA 209A or MGMT FE 209A) and (MGMTMBA 209B or MGMT FE 209B)

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 249. Derivatives. 4 Units.**

Studies financial derivatives instruments, including forward contracts, futures, swaps, and options. Advanced applications of these instruments, including pricing and risk management, are emphasized.

Prerequisite: MGMTMBA 209A or MGMT FE 209A

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 250. Consumer Behavior. 4 Units.**

Examines the consumer decision-making process with an emphasis on application of concepts and research findings from behavioral sciences for solution of marketing problems. Includes models of consumer decision-making, information processing theories, and sociological influences on consumer decision-making.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 251A. Marketing Research. 4 Units.**

Covers conducting marketing research to generate consumer insights that will drive sales, market share, and profitability and/or realize other quantitative objectives. Discusses problem formulation, data collection, statistical analyses, formulating managerial recommendations, implementation, and how research is used by companies.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 252D. New Product Development. 4 Units.**

Designed to introduce the new product development process and techniques to identify markets, develop new product ideas, measure consumer preferences, position and design new products, as well as test them prior to launch. Analytical thinking and techniques are emphasized.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 254. Global Marketing. 4 Units.**

Provides an understanding of the problems and perspectives of marketing across national boundaries, and develops analytical abilities for structuring and controlling marketing programs related to overseas business. Financial, legal, and cultural barriers to international marketing are emphasized.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 257. Marketing on the Internet. 4 Units.**

Examines the impact of the Internet on traditional methods of doing marketing, and explores its existing and future uses. Discusses how to capitalize on and increase the Internet's utility as a tool that can increase marketing effectiveness, efficiency, and competitiveness.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMTMBA 262. Managing Nonprofits. 4 Units.**

Focuses on the similarities and differences between for-profit and nonprofit organizations, with emphasis on the management of nonprofits. Topics include: marketing, fundraising, staffing, management/director relationships, use of volunteers, and emerging career opportunities.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 263. Economics of Information. 4 Units.**

Provides students with an understanding of fundamental economic principles governing information technology industries. Particularly, implications for optimal pricing strategies, determinants/consequences of market structure, and the role and rationale for government intervention and the implications for business strategy.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMTMBA 270. Data Camp for Managers. 2 Units.**

Provides an overview of R for basic data analytics and visualization with hands-on training using Data Camp. This project is meant to foreshadow the analysis that students will be doing in their electives.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMTMBA 274. Data and Programming for Analytics. 4 Units.**

Challenges and teaches students to handle data that come in a variety of forms and sizes. Guides students through the whole data management process, from initial data acquisition to final data analysis.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMTMBA 276. Analytics and Technology Consulting. 4 Units.**

Focuses on elements of analytics and personalized engagement. Students work on a project using a real-life business problem and data to get hands-on understanding.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMTMBA 277. Blockchain and Cryptocurrency. 2 Units.**

Provides students with an introduction to and an architectural understanding of 'why' and 'how' Blockchain was created, an overview of altcoins, and provide an understanding of the challenges and risks involved with this new Blockchain technology and cryptocurrency landscape.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMTMBA 279. Digital Strategies and Markets. 4 Units.**

Examines how online social media are impacting organizations and markets. Topics include collective intelligence, online social influence, social networks, and social media monetization. The target audience consists of students interested in IT consulting, competitive strategy, marketing, and entrepreneurship.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 283. Decision Analysis. 4 Units.**

Models of preferences and uncertainty; exercises in creative problem solving. Assessment and use of preference models (von Neumann-Morgenstern expected utility and measurable value functions) for private, public, and not-for-profit decision making. Assessment and use of subjective probabilities in decision making.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 285. Supply Chain Analytics. 4 Units.**

Introduces students to the use of advanced analytics and data-driven methods to successfully manage uncertainty in supply chains, meeting customer needs in the most timely and cost effective manner, and driving business disruptions through innovations.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMTMBA 286. Fundamentals of Business Analytics. 4 Units.**

Focuses on the business understanding, on the process of business analytics, and teaching a framework to understand the key drivers that could be fed into a mathematical model. Emphasizes how to make use of information to drive digital change.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMTMBA 287. Project Management. 4 Units.**

Examines the fundamental components of project management and its role in the modern corporation. Emphasis on how to initiate, implement, control, and terminate a project. Use of computer package for project management.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 288. Predictive Analytics for Business. 4 Units.**

Deals with predicting entities, such as demand for a product or service (forecasting) and predicting membership of known groups (classification). Blends methodologies of forecasting and data mining and focuses on the application of these methods to managerial problems and decision-making.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMTMBA 290. Field Studies in Management. 2-4 Units.**

Each quarter a number of special topic seminars are offered in the 290 series. Examples of possible topics include Communication in Organizations, Power and Authority in Organizations, International Management, Health Care Administration, Real Estate Development.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 292. Business Law. 4 Units.**

Detailed study from a business viewpoint of contract theories, assignments, delegation of duties, third-party beneficiary contracts, defenses to consensual contracts, types of conditions, methods of excusing conditions, remedies, and types of damages.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 293. Biotech Management . 5 Units.**

Taught jointly by Bio Sci and Merage School faculty, the course addresses fundamental aspects within, and associated with, the biotechnology industry. Curriculum is focused largely on management issues, including finance, product development, pharmaceuticals, project management, regulatory affairs, and ethics.

Same as MOL BIO 253.

Restriction: Graduate students only. Biotechnology Majors only.

**MGMTMBA 294. Edge. 4 Units.**

Edge explores the crucial roles of external forces - globalization, technology, shifting demographics - as transformative catalysts for change - opening markets, erasing boundaries, and transforming industries. This course prepares future business leaders to innovate and compete successfully.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 295B. Micromarketing with Digital Footprints. 2-4 Units.**

How businesses use digital footprints from household data and point-of-purchase data to customize product offerings and delivery, store locations, advertising, and promotions to households and neighborhoods with the highest market potential. Hands-on experience with Geographic Information System (GIS) mapping software.

Corequisite: MGMTMBA 205 or MGMT FE 205.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMTMBA 298. Merage Consulting Projects. 4 Units.**

Provides students the opportunity to put into practice concepts, skills, and tools acquired in other parts of the M.B.A. program. Seminars augment internship experiences with analyses of relevant administrative issues.

Restriction: Second-year MBA students only.

**MGMTMBA 299. Individual Study . 1-12 Units.**

Individual study under the direction of the selected faculty member.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Management PhD (MGMTPHD)

### Courses

**MGMTPHD 291. Ph.D. Special Topics Seminar. 2-12 Units.**

Each quarter a number of special topic seminars are offered in the 291 series for Ph.D. students. Examples include topics such as methods seminar, experimental design, qualitative research, structural equation modeling.

Repeatability: Unlimited as topics vary.

**MGMTPHD 292. Pre-Colloquium Seminar . 0-2 Units.**

Seeks to facilitate discussion of upcoming Colloquium research papers increasing the likelihood that Ph.D. students are active participants in all of the Colloquia. Active participation enhances exposure of Ph.D. students to visiting scholars.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only. Management Majors only.

**MGMTPHD 297A. Doctoral Proseminar. 2 Units.**

Analysis of the central theories and theoretical controversies in the field of management. Examination of the formal education for managerial careers and exploration of issues relating to professional careers in research and scholarship in the field of management.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**MGMTPHD 297B. University Teaching.**

Designed to prepare students for teaching career; incorporates seminars addressing topics of classroom dynamics, syllabus preparation, teaching techniques; establishes mentor relationship with faculty member in student's teaching area, provides classroom experience and includes option of videotape analysis of teaching style.

Restriction: Graduate students only.

**MGMTPHD 297D. Philosophy of Science. 4 Units.**

Provides exposure to fundamental issues regarding how knowledge is created, defended, and replaced both in the natural and social sciences. Covers current debates on the meaning of the term "scientific" and the validity of the scientific method.

Restriction: Graduate students only.

**MGMTPHD 297F. Doctoral Research Methods. 4 Units.**

An introduction to the fundamentals of social science research: theory development, research design, methods, data management, and writing for scholarly publications; for doctoral students intending scholarly research careers. Involves hands-on practice in formulating hypotheses, designing research, and conducting journal reviews.

Restriction: Graduate students only. Management Majors only.

**MGMTPHD 297H. Experimental Design. 4 Units.**

Advanced course provides experience in planning and implementing an experiment or quasi-experiment, including choice of topic, study design, data analysis, and manuscript preparation. Data analysis topics include ANOVA, ANCOVA, repeated measures, logistic regression, chi-square, and tests of mediation.

Restriction: Graduate students only.

**MGMTPHD 297I. Applied Multivariate Statistics. 2-4 Units.**

Provides an overview of the most common techniques for multivariate analysis: principal component analysis, factor analysis, cluster analysis, MANOVA, regression with continuous variables, and regression with discrete variables.

Restriction: Graduate students only.

**MGMTPHD 297K. Advanced Qualitative Methods: Analyzing Qualitative Data. 4 Units.**

Introduction to the theory and practice of analyzing qualitative data. Students must have already learned about data collection and research design for qualitative research and must have qualitative data they can analyze.

Same as UPPP 213, POL SCI 273A.

Restriction: Graduate students only.

**MGMTPHD 297L. Writing for Scholarly Publication. 4 Units.**

Introduces methods for planning and carrying out scholarly writing.

Restriction: Graduate students only.

**MGMTPHD 297M. SAS Boot Camp . 2 Units.**

Teaches basics of SAS programming for empirical research. No prior knowledge of SAS or other computer programming language is required. Provides knowledge and tools to replicate an empirical study and learn how to perform very advanced data procedures.

Restriction: Graduate students only.

**MGMTPHD 297Q. Game-Theoretic Models for Management Research. 4 Units.**

Introduces some classic game-theoretic models for management research. It is about modeling strategic interactions between business competitors and/or partners in an analytical framework. Various applications will be discussed, e.g., pricing strategies, business alliances, e-commerce, negotiations, and contracts, etc.

Restriction: Graduate students only.

**MGMTPHD 297R. Theories of Power and Empowerment. 4 Units.**

Studies different ways of thinking about power and its uses. Explores theories of power that inform various notions of empowerment, including resistance, participatory democracy, and workplace empowerment.

Same as UPPP 279, POL SCI 223A.

Restriction: Graduate students only.

**MGMTPHD 297T. Decision Theory. 2-4 Units.**

Decision theories and preference models: How models are elicited or theories are experimentally tested, relevance to different management research areas, alternative theories, applications in management practice, and interpretations for the general public.

Restriction: Graduate students only.

**MGMTPHD 297U. Foundational Theories of Organizations. 4 Units.**

Covers major economic and sociological perspectives guiding the study of organizations (i.e., transaction cost economics, agency theory, institutional theories, organizational ecology, network and diffusion theories, behavioral theories, resource dependence), and examines how different theoretical perspectives are tested.

Restriction: Graduate students only.

**MGMTPHD 297V. Information, Psychology, and Social Processes. 4 Units.**

In the marketplace for ideas, which succeed and which fail? How do ideas and information spread between individuals, and how do populations of ideas evolve? This course reviews recent research on these issues and applications to business.

Restriction: Graduate students only.

**MGMTPHD 297W. Establishing Your Academic Career. 4 Units.**

Overview of the best practices for succeeding in an academic career. Presenting oneself in conversation, in written documents, in research talks, and in teaching.

Restriction: Graduate students only.

**MGMTPHD 299. Individual Directed Study. 1-12 Units.**

Individual study under the direction of a selected faculty member.

Repeatability: May be taken for credit for 12 units.

Restriction: Graduate students only.

**MGMTPHD 399. University Teaching. 2-4 Units.**

Limited to teaching assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Master of Professional Accountancy (MAC)

## Master of Professional Accountancy (MPAC)

### Courses

**MPAC 200A. Intermediate Accounting Intensive I. 4 Units.**

Designed to provide students with technical U.S. accounting theory and principles background necessary for graduate work in accounting. Current international accounting convergence issues and standards will be discussed on emerging topics.

Repeatability: May be taken for credit 2 times.

Restriction: Accountancy Majors only.

**MPAC 200B. Foundations of Taxation Intensive. 4 Units.**

Provides students with the basic concepts of federal income taxation applicable to all taxpayers. Specifically, principles of taxation for individuals, corporations, and partnerships are discussed.

Repeatability: May be taken for credit 2 times.

Restriction: Accountancy Majors only.

**MPAC 200C. Intermediate Accounting Intensive II and Special Topics. 4 Units.**

Designed to provide students with the technical U.S. accounting theory and principles background necessary for graduate work in accounting. Current international accounting convergence issues and standards will be discussed on emerging topics.

Repeatability: May be taken for credit 2 times.

Restriction: Accountancy Majors only.

**MPAC 200D. Auditing Intensive. 4 Units.**

Designed to provide students with an understanding of the fundamental principles, processes, and ethical considerations involved in the performance of a financial statement audit under U.S. auditing standards.

Repeatability: May be taken for credit 2 times.

Restriction: Accountancy Majors only.

**MPAC 230. Accounting ProSeminar: Career and Professional Development. 2 Units.**

Provides students with information and practical skills for success in the program and for professional accounting and business career planning, and with discussions of current issues confronting the accounting profession.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 2 times.

Restriction: Accountancy Majors only.

**MPAC 231A. Financial Statement Analysis and Forecasting. 4 Units.**

Develops skills to analyze corporate financial reports. Topics include profitability, risk analysis, cash flow analysis, revenue and asset recognition, and forecasting. The skills are useful for students to evaluate financial reporting quality, detect earnings management, and predict firms' financial performance.

Prerequisite: Intermediate accounting.

Restriction: Accountancy Majors only.

**MPAC 231B. Advanced Financial Statement Analysis. 4 Units.**

Develops skills to analyze corporate financial reports with a focus on liabilities, stockholders' equity, and valuation. Topics include forecasting financial statements, cash flows- and earnings-based equity, and valuation models, accounting analysis of mergers and acquisitions, lease pensions, and derivatives.

Restriction: Accountancy Majors only.

**MPAC 232. Taxes and Business Strategy. 4 Units.**

Develops a student's ability to identify, understand, and evaluate tax-planning opportunities. The focus is on tax planning concepts and the effects of taxes on business decisions rather than on detailed tax rules, compliance, or legal research.

Restriction: Accountancy Majors only.

**MPAC 233. Non-for-Profit Accounting. 4 Units.**

Focuses on the accounting and reporting for governmental and non-for-profit entities. Topics include preparation of fund basis financial statements and related reporting and auditing issues. Use of non-financial performance measures for non-for-profit entities is also discussed.

Restriction: Accountancy Majors only.

**MPAC 234. Accounting Policy and Research. 2 Units.**

Considers issues in contemporary accounting standard setting and regulation by examining academic accounting research of the various issues. Enables students to develop their knowledge and better appreciate current debates in accounting.

Restriction: Accountancy Majors only.

**MPAC 235. Advanced Managerial Accounting. 4 Units.**

Design of cost information and systems used to plan and control organizational activities; procedures used to account for unit, process, and program costs; cybernetic evaluation of costing procedures; cost estimation, analysis, and accounting via computers.

Restriction: Accountancy Majors only.

**MPAC 236. Forensic Accounting . 2 Units.**

Elective course focuses on the principles, and application of forensic accounting. Topics include the identification, detection, and prevention of fraud, valuations, damage calculations, and litigation support. The role of forensic accountants in the legal system will also be discussed.

Restriction: Accountancy Majors only.

**MPAC 237. International Accounting. 4 Units.**

An online course. A comprehensive study of differences between US GAAP and International Financial Reporting Standards (IFRS).

Prerequisite: Intermediate accounting.

Restriction: Accountancy Majors only.

**MPAC 238. Advanced Auditing and Assurance Services. 4 Units.**

Designed to provide advanced coverage of topics and emerging issues in auditing and assurance services. Provides a deeper understanding of the fundamental concepts of auditing, assurance services, and developing hot-topics within the auditing profession.

Prerequisite: Intermediate accounting and basic auditing.

Restriction: Accountancy Majors only.

**MPAC 239. Ethics in Accounting and Business. 4 Units.**

Designed to introduce students to the intellectual principles of ethical decision making by emphasizing the theories of ethics and their application in the business, and specifically, accounting professions. MPAC capstone course with a final comprehensive exam for the program.

Restriction: Accountancy Majors only.

**MPAC 241. Accounting Internship. 2-4 Units.**

Provides students with the opportunity to apply accounting knowledge through actual work experiences. The internship experience will provide students with knowledge of career opportunities, an understanding of how accounting plays in today's business environment, and prepare students for success.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Accountancy Majors only.

**MPAC 290. Special Topic Seminars. 2-4 Units.**

Studies in selected area of Accounting. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Accountancy Majors only.

**MPAC 291. Professional Research and Communication. 4 Units.**

Combines research of the professional accounting literature on a range of technical topics with a written communication and oral presentations of the findings.

Restriction: Accountancy Majors only.

**MPAC 299. Individual Study. 1-4 Units.**

Individual study under the direction of a selected faculty member.

Repeatability: May be repeated for credit unlimited times.

Restriction: Accountancy Majors only.

# Materials Science and Engineering (MSE)

## Courses

### **MSE 60. Laboratory in Synthesis and Characterization of Materials. 4 Units.**

Synthesis and characterization of ceramic, polymer, and semiconductor materials. Connect the process, structure, properties, and performance to materials science knowledge in a hands-on laboratory setting. Materials fee.

Prerequisite: ENGR 54 and CHEM 1C

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

### **MSE 69. Electronic and Optical Properties in Materials. 4 Units.**

Covers the electronic, optical, and dielectric properties of crystalline and amorphous materials to provide a foundation of the underlying physical principles governing the properties of existing and emerging electronic and photonic materials.

Prerequisite: PHYS 7D and PHYS 7E and (MATH 3A or ICS 6N) and MATH 3D and ENGR 54

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

### **MSE 141. Nano-Scale Materials and Applications. 4 Units.**

Overview of the chemistry, physics, and applications of nanometer-scale materials. Explore the effects of composition, bonding, and confinement on physical properties of nanomaterials, their chemical syntheses, and their device physics in electronic, optoelectronic, and energy technologies.

Prerequisite: (ENGR 1A or CHEM 1A or CHEM H2A) and ENGR 54 and MSE 69

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

Concurrent with MSE 241.

### **MSE 151. Polymeric Materials. 4 Units.**

An introduction to physical aspects of polymers, including polymer molecular size and configuration, solution and bulk phase structural properties, mechanical properties including viscoelasticity and rheology, polymer synthesis methods, characterization techniques, processing methods, and examples from existing and emerging polymeric materials.

Prerequisite: ENGR 54 and (MSE 165A or CBE 40C or MAE 91)

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

### **MSE 155. Mechanical Behavior and Design Principles. 4 Units.**

Principles governing structure and mechanical behavior of materials, relationship relating microstructure and mechanical response with application to elasticity, plasticity, yielding, necking, creep, and fracture of materials. Introduction to experimental techniques to characterize the properties of materials. Design parameters.

Prerequisite: ENGR 54

Same as MAE 156.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Aerospace Engineering majors have second consideration for enrollment.

### **MSE 155L. Mechanical Behavior Laboratory. 1 Unit.**

Introduction to experimental techniques to characterize mechanical properties of materials. Emphasis on correlations between property and microstructure. Experiments include: plastic stability in tension, effect of grain size on flow stress, microstructural engineering. Materials fee.

Corequisite: MSE 155

Prerequisite: ENGR 54

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

**MSE 158. Ceramic Materials for Sustainable Energy. 4 Units.**

A technical elective for students interested in materials. Topics covered include structure and properties of ceramic materials, and design for sustainable energy applications.

Prerequisite: ENGR 54

Restriction: Materials Science and Engr Majors have first consideration for enrollment. Chemical Engineering majors have second consideration for enrollment.

**MSE 163. Computer Techniques in Experimental Research. 4 Units.**

Principles and practical guidelines of automated materials testing. Computer fundamentals, programming languages, data acquisition and control hardware, interfacing techniques, programming strategies, data analysis, data storage, safeguard procedures.

Restriction: Materials Science and Engr Majors have first consideration for enrollment. Chemical Engineering majors have second consideration for enrollment.

**MSE 164. X-ray Diffraction, Electron Microscopy, and Microanalysis. 4 Units.**

Material characterization using X-ray diffraction and scanning electron microscopy (SEM). Topics include X-ray diffraction and analysis; SEM imaging and microanalysis. Materials fee.

Prerequisite: ENGR 54 and PHYS 7D

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

**MSE 164L. X-ray Diffraction, Electron Microscopy, and Microanalysis Lab. 1 Unit.**

Material characterization using X-ray diffraction and scanning electron microscopy (SEM). Topics include X-ray diffraction and analysis; SEM imaging and microanalysis.

Prerequisite: ENGR 54 and PHYS 7D

Restriction: Materials Science and Engr Majors only.

**MSE 165A. Thermodynamics of Materials. 4 Units.**

Treatment of the laws of thermodynamics and their application in understanding properties and equilibrium states of engineering materials. Develops relationships pertaining to multiphase equilibrium and presents graphical constructions for interpretation of phase diagrams. Statistical thermodynamics in relation to materials phenomena.

Prerequisite: CHEM 1C and PHYS 7C

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

**MSE 165B. Diffusion and Heat Transport in Materials. 4 Units.**

Examines how kinetics affect materials development, behavior, and processing. Highlights the ways in which kinetics and diffusion are key to designing materials processing and heat treating strategies, with examples in various applied topics.

Prerequisite: MSE 165A or CBE 40C or MAE 91. MSE 165A with a grade of C- or better

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

**MSE 165C. Materials Kinetics and Phase Transformations. 4 Units.**

Treatment of the kinetics of solid-state reactions and reactions at interfaces. Thermodynamics and kinetics of phase transformations, including solidification processes, diffusional and diffusionless phase transformations.

Prerequisite: ENGR 54 and (MSE 165B or (CBE 120B and CBE 120C) or MAE 120). MSE 165B with a grade of C- or better

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

**MSE 165CL. Laboratory in Materials Kinetics and Phase Transformations. 1 Unit.**

Covers topics of practical application of the kinetics of solid state reactions, reactions at interfaces, and the thermodynamics and kinetics of phase transformations to common materials systems.

Prerequisite: ENGR 54 and (MSE 165B or (CBE 120B and CBE 120C) or MAE 120). MSE 165B with a grade of C- or better

Restriction: Materials Science and Engr Majors only.

**MSE 171. Green Engineering: Theory and Practice. 4 Units.**

Methods and impacts of selecting alternative technologies, processes, materials, chemicals, to reduce pollution, waste, and use of toxic substances, thereby creating "green," environmentally responsible, sustainable solutions. Topics include environmental regulations, recycling, life-cycle assessment, economic analysis, design, green chemistry, and toxicology.

Restriction: Seniors only. Materials Science and Engr Majors have first consideration for enrollment.

**MSE 173. Fundamentals of Materials Processing: How are Materials Processed to Make Things?. 4 Units.**

An in-depth knowledge of manufacturing processes with focus on the fundamentals of materials processing (heat flow, mass flow, fluid flow, etc.). Processing fundamentals that apply to the three main classes of engineering materials: metals, ceramics, and polymers.

Prerequisite: ENGR 54

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

**MSE 174. Composite Materials Design. 3 Units.**

Introduction to fiber-reinforced composites for mechanical applications. Properties of reinforcing fibers. Manufacture of fibers and composites. Micromechanics of fiber composites. Strength criteria and failure modes. Macromechanics in design of laminated composite structures.

Prerequisite: ENGR 54 and ENGR 150

**MSE 175. Design Failure Investigation. 4 Units.**

Survey of mechanisms by which devices fail, including overload, fatigue, corrosion, and wear. Use of fractography and other evidence to interpret failure modes and specify design/manufacturing changes. Students redesign failed parts or structures based on actual parts and/or case histories.

Prerequisite: ENGR 54

Restriction: Materials Science and Engr Majors have first consideration for enrollment. Chemical Engineering majors have second consideration for enrollment.

**MSE 176. Surface and Adhesion Science. 4 Units.**

Structure, thermodynamics of, kinetics, and reactions on surfaces. Surface electronic and mechanical properties and characterization of all classes of materials including metals, semiconductors, ceramics, polymers, and soft materials. Adhesion between different materials is also addressed.

Prerequisite: (CBE 110 or MSE 165C) and (MSE 141 or MSE 69)

Same as CBE 183.

Restriction: Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

Concurrent with MSE 276 and CBE 283.

**MSE 189A. Senior Design Project I. 3 Units.**

Group supervised senior design projects that deal with materials selection in engineering design and that involve case studies in ethics, safety, design, failure modes, new products, and patents. Activities conclude with a presentation of the projects. Materials fee.

Prerequisite: ENGR 54 and MSE 155 and MSE 60 and MSE 165C

Grading Option: In Progress (Letter Grade with P/NP).

Restriction: Seniors only. Materials Science and Engr Majors only. MSE 189A, MSE 189B, and MSE 189C must be taken in the same academic year.

**MSE 189B. Senior Design Project II. 3 Units.**

Group supervised senior design projects that deal with materials selection in engineering design and that involve case studies in ethics, safety, design, failure modes, new products, and patents. Activities conclude with a presentation of the projects. Materials fee.

Prerequisite: MSE 189A

Grading Option: In Progress (Letter Grade with P/NP).

Restriction: Seniors only. Materials Science and Engr Majors only. MSE 189A, MSE 189B, and MSE 189C must be taken in the same academic year.

**MSE 189C. Senior Design Project III. 3 Units.**

Group supervised senior design projects that deal with materials selection in engineering design and that involve case studies in ethics, safety, design, failure modes, new products, and patents. Activities conclude with a presentation of the projects. Materials fee.

Prerequisite: MSE 189B

Restriction: Seniors only. Materials Science and Engr Majors only. MSE 189A, MSE 189B, and MSE 189C must be taken in the same academic year.

**MSE 190. Materials Selection and Design. 4 Units.**

Meaning and phases of design; design considerations; properties of engineering materials; materials property charts; materials selection; process selection; multi-constraint and multi-objective design. Selection of shape in mechanical components. Designing with hybrid materials: challenges and opportunities. Environmental considerations; case studies.

Prerequisite: ENGR 54 and ENGR 150

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

**MSE 191. Materials Outreach. 3 Units.**

Demonstrates major concepts in Materials Science and Engineering. Concepts of materials engineering covered include deformation in crystalline solids, effects of heat treatment on mechanical properties, thermal barrier materials, composites design, mechanical behavior of polymers, superconductivity in ceramics.

Prerequisite: ENGR 54

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

**MSE 195. Special Topics in Materials Science and Engineering. 1-4 Units.**

Studies in selected areas of Materials Science and Engineering. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**MSE 198. Group Study. 1-4 Units.**

Group study of selected topics in engineering.

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**MSE 199. Individual Study. 1-4 Units.**

Supervised independent reading, research, or design for undergraduate Engineering majors. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

Repeatability: May be taken for credit for 8 units.

Restriction: Materials Science and Engr Majors only.

**MSE 199P. Individual Study. 1-4 Units.**

Supervised independent reading, research, or design for undergraduate Engineering majors. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**MSE 200. Crystalline Solids: Structure, Imperfections, and Properties. 4 Units.**

Principles and concepts underlying the study of advanced materials including alloys, composites, ceramics, semiconductors, polymers, ferroelectrics, and magnetism. Crystal structure and defects, surface and interface properties, thermodynamics and kinetics of phase transformations, and material processing, related to fundamental material properties.

Restriction: Graduate students only.

**MSE 201A. Critical Analysis and Technical Communication I. 2 Units.**

Develop an understanding of the process to conduct research. Topics include performing analytical analysis of the scientific literature, formation of a hypothesis, defining investigations to validate hypothesis, communicating analysis in written form, writing a research proposal.

Restriction: Graduate students only.

**MSE 201B. Critical Analysis and Technical Communication II. 2 Units.**

Develop oral presentation skills and skills to understand significance of published research. Topics include performing critical and analytical analysis of the scientific literature, connecting core course content with experimental/theoretical methods in the scientific literature, and communicating analysis in oral form.

Prerequisite: MSE 201A

Restriction: Graduate students only.

**MSE 205. Materials Physics. 4 Units.**

Covers the electronic, optical, and dielectric properties of crystalline materials to provide a foundation of the underlying physical principles of governing the properties of existing and emerging electronic and photonic materials.

Prerequisite: MSE 200

Restriction: Graduate students only.

**MSE 241. Nano-Scale Materials and Applications. 4 Units.**

Overview of the chemistry, physics, and applications of nanometer-scale materials. Explore the effects of composition, bonding, and confinement on physical properties of nanomaterials, their chemical syntheses, and their device physics in electronic, optoelectronic, and energy technologies.

Prerequisite: MSE 200 and MSE 205

Restriction: Graduate students only.

Concurrent with MSE 141.

**MSE 249. Special Topics in Materials Science and Engineering. 1-4 Units.**

Studies in selected areas of Materials Science and Engineering. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**MSE 254. Polymer Science and Engineering. 4 Units.**

An introduction to physical aspects of polymers, including configuration and conformation of polymer chains and characterization techniques; crystallinity viscoelasticity, rheology, and processing.

Restriction: Graduate students only.

**MSE 255A. Design with Ceramic Materials. 4 Units.**

Dependence of ceramic properties on bonding, crystal structure, defects, and microstructure. Ceramic manufacturing technology. Survey of physical properties. Strength, deformation, and fracture of ceramics. Mechanical design with brittle, environment-sensitive materials exhibiting time-dependent strengths.

Prerequisite: ENGR 54

Restriction: Graduate students only.

**MSE 256A. Mechanical Behavior of Engineering Materials. 4 Units.**

Principles governing structure and mechanical behavior of materials, relationship relating microstructure and mechanical response with application to elasticity, plasticity, creep, and fatigue, study of rate-controlling mechanisms and failure modes, fracture of materials.

Restriction: Graduate students only.

**MSE 256B. Fracture of Engineering Materials. 4 Units.**

Fracture mechanics and its application to engineering materials. Elastic properties of cracks, the stress intensity factor, the crack tip plastic zone, the J integral approach, fracture toughness testing, the crack tip opening displacement, fracture at high temperatures, fatigue crack growth.

Restriction: Graduate students only.

**MSE 259. Transmission Electron Microscopy. 4 Units.**

The theory and operation of the transmission electron microscope (TEM), including the basic construction, electron optics, electron diffraction and reciprocal space, formation of image and electron diffraction information, microanalysis, and specimen preparation.

Prerequisite: MSE 200

Restriction: Graduate students only.

**MSE 262. Grain Boundaries and Interfaces in Nanocrystalline Materials. 4 Units.**

Structure and character of grain boundaries and interfaces in solids including nanocrystalline materials. Role of grain boundaries in chemical segregation, fracture, deformation, creep, conductivity, diffusion, and grain growth. Experimental techniques and computational methods used to characterize and model grain boundaries.

Prerequisite: MSE 200

**MSE 264. Scanning Electron Microscopy. 4 Units.**

The theory and operation of the scanning electron microscope (SEM) and X-ray microanalysis. Topics covered include the basic design and electron optics, electron beam - specimen interactions, image formation and interpretation, X-ray spectrometry, and other related topics and techniques.

Prerequisite: MSE 200

Restriction: Graduate students only.

**MSE 265. Phase Transformations. 4 Units.**

Advanced thermodynamics and kinetics of phase transformations and phase transitions.

Prerequisite: MSE 200

Restriction: Graduate students only.

**MSE 267. Seminar in Systems Microbiology Research. 1 Unit.**

A research and journal club seminar that covers topics on bacteria and phage using approaches and principles from biology, engineering, and physics.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Same as MBB 268, PHYS 268.

Restriction: Upper-division students only. Graduate students only.

**MSE 271. Green Engineering: Theory and Practice. 4 Units.**

Methods and impacts of selecting alternative technologies, processes, materials, chemicals, to reduce pollution, waste, and use of toxic substances, thereby creating "green," environmentally responsible, sustainable solutions. Topics include environmental regulations, recycling, life-cycle assessment, economic analysis, design, green chemistry, and toxicology.

Restriction: Graduate students only.

**MSE 273. Electroceramics & Solid State Electrochemical Systems. 4 Units.**

Theory, underlying principles, experimental techniques, and applications of electroceramics and solid-state electrochemical systems. Links solid state physics, atomic structure, thermodynamics, defect chemistry, and transport processes to electrical properties of ceramics - spanning from insulators to fast-ion conductors and HT superconductors.

Prerequisite: MSE 200

**MSE 276. Surface and Adhesion Science. 4 Units.**

Structure, thermodynamics of, kinetics, and reactions on surfaces. Surface electronic and mechanical properties and characterization of all classes of materials including metals, semiconductors, ceramics, polymers, and soft materials. Adhesion between different materials is also addressed.

Same as CBE 283.

Restriction: Graduate students only.

Concurrent with MSE 176 and CBE 183.

**MSE 295. Seminar in Engineering. 1-4 Units.**

Seminars by individual faculty in major fields of interest.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**MSE 296. Master of Science Thesis Research. 1-16 Units.**

Individual research or investigation conducted in preparation for the thesis required for the M.S. degree in Engineering.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**MSE 297. Doctor of Philosophy Dissertation Research. 1-16 Units.**

Individual research or investigation conducted in preparation for the dissertation required for the Ph.D. degree in Engineering.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**MSE 298. Seminars in Materials Science and Engineering. 2 Units.**

Presentation of advanced topics and reports of current research efforts in Materials Science and Engineering.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**MSE 299. Individual Research. 1-16 Units.**

Individual research or investigation under the direction of an individual faculty member.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Mathematics (MATH)

### Courses

**MATH 1A. Pre-Calculus. 4 Workload Units.**

Basic equations and inequalities, linear and quadratic functions, and systems of simultaneous equations.

Grading Option: Workload Credit Letter Grade with P/NP.

**MATH 1B. Pre-Calculus. 4 Units.**

Preparation for calculus and other mathematics courses. Exponentials, logarithms, trigonometry, polynomials, and rational functions. Satisfies no requirements other than contribution to the 180 units required for graduation.

Prerequisite: MATH 1A. Placement into MATH 1B via the Calculus Placement exam, or a score of 450 or higher on the Mathematics section of the SAT Reasoning Test.

Restriction: MATH 1B may not be taken for credit if taken after MATH 2A.

**MATH 2A. Single-Variable Calculus. 4 Units.**

Introduction to derivatives, calculation of derivatives of algebraic and trigonometric functions; applications including curve sketching, related rates, and optimization. Exponential and logarithm functions.

Prerequisite: MATH 1B or AP Calculus AB or SAT Mathematics or ACT Mathematics. MATH 1B with a grade of C or better. AP Calculus AB with a minimum score of 3. SAT Mathematics with a minimum score of 650. ACT Mathematics with a minimum score of 29. Placement via the Calculus Placement exam (fee required) is also accepted.

Overlaps with MATH 5A.

Restriction: School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. School of Info & Computer Sci students have first consideration for enrollment.

**(Vb)**

**MATH 2B. Single-Variable Calculus. 4 Units.**

Definite integrals; the fundamental theorem of calculus. Applications of integration including finding areas and volumes. Techniques of integration. Infinite sequences and series.

Prerequisite: MATH 2A or MATH 5A or AP Calculus AB or AP Calculus BC. AP Calculus AB with a minimum score of 4. AP Calculus BC with a minimum score of 3

Restriction: School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. School of Info & Computer Sci students have first consideration for enrollment.

**(Vb)**

**MATH 2D. Multivariable Calculus. 4 Units.**

Differential and integral calculus of real-valued functions of several real variables, including applications. Polar coordinates.

Prerequisite: MATH 2B or MATH 5B or AP Calculus BC. AP Calculus BC with a minimum score of 4

Restriction: School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. School of Info & Computer Sci students have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

**(Vb)**

**MATH 2E. Multivariable Calculus. 4 Units.**

The differential and integral calculus of vector-valued functions. Implicit and inverse function theorems. Line and surface integrals, divergence and curl, theorems of Greens, Gauss, and Stokes.

Prerequisite: MATH 2D or MATH H2D

Restriction: School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment.

**MATH H2D. Honors Multivariable Calculus. 4 Units.**

Differential and integral calculus of real-valued functions of several real variables, including applications. Polar coordinates. Covers the same material as MATH 2D-E, but with a greater emphasis on the theoretical structure of the subject matter.

Prerequisite: MATH 2B or MATH 5B or (AP Calculus BC and (MATH H3A) or (MATH 3A and MATH 13)). MATH 2B with a grade of A or better. MATH 5B with a grade of A or better. AP Calculus BC with a minimum score of 5. MATH H3A with a grade of B- or better. MATH 3A with a grade of A or better. MATH 13 with a grade of A or better

Overlaps with MATH 2D.

**(Vb)**

**MATH H2E. Honors Multivariable Calculus. 4 Units.**

Differential and integral calculus of real-valued functions of several real variables, including applications. Polar coordinates. Covers the same material as MATH 2D-E, but with a greater emphasis on the theoretical structure of the subject matter.

Prerequisite: MATH H2D. MATH H2D with a grade of B- or better

Overlaps with MATH 2E.

**MATH 3A. Introduction to Linear Algebra. 4 Units.**

Systems of linear equations, matrix operations, determinants, eigenvalues and eigenvectors, vector spaces, subspaces, and dimension.

Prerequisite: MATH 2B or MATH 5B or AP Calculus BC. AP Calculus BC with a minimum score of 4

Overlaps with ICS 6N.

Restriction: School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

(Vb)

**MATH 3D. Elementary Differential Equations. 4 Units.**

Linear differential equations, variation of parameters, constant coefficient cookbook, systems of equations, Laplace transforms, series solutions.

Prerequisite: (MATH 3A or MATH H3A) and (MATH 2D or MATH H2D) and (MATH 2B or AP Calculus BC). AP Calculus BC with a minimum score of 4

Restriction: School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment.

**MATH H3A. Honors Introduction to Linear Algebra. 4 Units.**

Systems of linear equations, matrix operations, determinants, eigenvalues, eigenvectors, vector spaces, subspaces, and dimension.

Prerequisite: MATH 2B or MATH 5B or AP Calculus BC. MATH 2B with a grade of A or better. MATH 5B with a grade of A or better. AP Calculus BC with a minimum score of 5

Overlaps with MATH 3A, ICS 6N.

Restriction: School of Physical Sciences students only. School of Engineering students only. Mathematics Majors only. Undeclared Majors only.

**MATH 5A. Calculus for Life Sciences. 4 Units.**

Differential calculus with applications to life sciences. Exponential, logarithmic, and trigonometric functions. Limits, differentiation techniques, optimization and difference equations.

Prerequisite: MATH 1B or AP Calculus AB or SAT Mathematics or ACT Mathematics. MATH 1B with a grade of C or better. AP Calculus AB with a minimum score of 3. SAT Mathematics with a minimum score of 650. ACT Mathematics with a minimum score of 29. Placement via the Calculus Placement exam (fee required) is also accepted.

Overlaps with MATH 2A.

Restriction: School of Biological Sciences students have first consideration for enrollment.

(Vb)

**MATH 5B. Calculus for Life Sciences. 4 Units.**

Integral calculus and multivariable calculus with applications to life sciences. Integration techniques, applications of the integral, phase plane methods and basic modeling, basic multivariable methods.

Prerequisite: MATH 5A or MATH 2A or AP Calculus AB or AP Calculus BC. AP Calculus AB with a minimum score of 4. AP Calculus BC with a minimum score of 3

Restriction: School of Biological Sciences students have first consideration for enrollment. Cannot be taken for credit after MATH 2B.

(Vb)

**MATH 7A. Single-Variable Calculus I. 4 Units.**

Introduction to derivatives, calculation of derivatives of algebraic and trigonometric functions; applications including curve sketching, related rates, and optimization. Exponential and logarithm functions.

Prerequisite: MATH 1B or AP Calculus AB or SAT Mathematics or ACT Mathematics. MATH 1B with a grade of C or better. AP Calculus AB with a minimum score of 3. SAT Mathematics with a minimum score of 650. ACT Mathematics with a minimum score of 29. Placement via the Calculus Placement exam (fee required) is also accepted.

Overlaps with MATH 2A, MATH 5A.

Restriction: Mathematics Majors only.

(Vb)

**MATH 7B. Single-Variable Calculus II. 4 Units.**

Definite integrals; the fundamental theorem of calculus. Applications of integration including finding areas and volumes. Techniques of integration. Infinite sequences and series.

Prerequisite: MATH 2A or MATH 5A or AP Calculus AB or AP Calculus BC or MATH 7A. AP Calculus AB with a minimum score of 4. AP Calculus BC with a minimum score of 3

Overlaps with MATH 2B, MATH 5B.

Restriction: Mathematics Majors only.

**(Vb)**

**MATH 8. Explorations in Functions and Modeling. 4 Units.**

Explorations of applications and connections in topics in algebra, geometry, calculus, and statistics for future secondary math educators. Emphasis on nonstandard modeling problems.

Prerequisite or corequisite: MATH 2A or AP Calculus AB or AP Calculus BC. AP Calculus AB with a minimum score of 4. AP Calculus BC with a minimum score of 3

**MATH 9. Introduction to Programming for Numerical Analysis. 4 Units.**

Introduction to computers and programming using Matlab and Mathematica. Representation of numbers and precision, input/output, functions, custom data types, testing/debugging, reading exceptions, plotting data, numerical differentiation, basics of algorithms. Analysis of random processes using computer simulations.

Prerequisite: MATH 2A

Restriction: Mathematics Majors have first consideration for enrollment.

**(II and Vb ).**

**MATH 10. Introduction to Programming for Data Science. 4 Units.**

Intro to algorithms in data science using Python and R. Basic concepts of Python, store, access, and manipulate data in lists; functions, methods, and packages; NumPy, Numerical stability, and accuracy. Gradient descent and Newton's method. Basics of R Programming.

Prerequisite or corequisite: (MATH 2D or MATH H2D) and (MATH 3A or MATH H3A) and MATH 9

Restriction: Mathematics Majors have first consideration for enrollment.

**(II and VB ).**

**MATH 13. Introduction to Abstract Mathematics. 4 Units.**

Introduction to formal definition and rigorous proof writing in mathematics. Topics include basic logic, set theory, equivalence relations, and various proof techniques such as direct, induction, contradiction, contrapositive, and exhaustion.

Prerequisite: MATH 2A or ICS 6D

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 105A. Numerical Analysis I. 4 Units.**

Introduction to the theory and practice of numerical computation with an emphasis on solving equations. Solving transcendental equations; linear systems, Gaussian elimination, QR factorization, iterative methods, eigenvalue computation, power method.

Corequisite: MATH 105LA

Prerequisite: MATH 3A or MATH H3A. Familiarity with computer programming is required.

Overlaps with MAE 185.

**MATH 105B. Numerical Analysis II. 4 Units.**

Introduction to the theory and practice of numerical computation with an emphasis on topics from calculus and approximation theory. Lagrange interpolation; Gaussian quadrature; Fourier series and transforms; Methods from data science including least squares and L1 regression.

Corequisite: MATH 105LB

Prerequisite: MATH 105A

**MATH 105LA. Numerical Analysis Laboratory. 1 Unit.**

Provides practical experience to complement the theory developed in Mathematics 105A.

Corequisite: MATH 105A

**MATH 105LB. Numerical Analysis Laboratory. 1 Unit.**

Provides practical experience to complement the theory developed in Mathematics 105B.

Corequisite: MATH 105B

**MATH 107. Numerical Differential Equations. 4 Units.**

Theory and applications of numerical methods to initial and boundary-value problems for ordinary and partial differential equations.

Corequisite: MATH 107L

Prerequisite: MATH 3D and MATH 105A and MATH 105B

**MATH 107L. Numerical Differential Equations Laboratory. 1 Unit.**

Provides practical experience to complement the theory developed in Mathematics 107.

Corequisite: MATH 107

**MATH 110A. Optimization I. 4 Units.**

Introduction to optimization, linear search method, trust region method, Newton method, linear programming, linear, and non-linear least square methods.

Prerequisite or corequisite: (MATH 2D or MATH H2D) and (MATH 3A or MATH H3A) and MATH 10 and MATH 121A and MATH 121B

**MATH 110B. Optimization II. 4 Units.**

The simplex method, interior point method, penalty barrier method, primal dual method, augmented Lagrangian method, and stochastic gradient method.

Prerequisite: MATH 110A. MATH 110A with a grade of C or better

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 112A. Introduction to Partial Differential Equations and Applications. 4 Units.**

Introduction to ordinary and partial differential equations and their applications in engineering and science. Basic methods for classical PDEs (potential, heat, and wave equations). Classification of PDEs, separation of variables and series expansions, special functions, eigenvalue problems.

Prerequisite: (MATH 2E or MATH H2E) and MATH 3D

**MATH 112B. Introduction to Partial Differential Equations and Applications. 4 Units.**

Introduction to partial differential equations and their applications in engineering and science. Basic methods for classical PDEs (potential, heat, and wave equations). Green functions and integral representations, method of characteristics.

Prerequisite: MATH 112A

**MATH 112C. Introduction to Partial Differential Equations and Applications. 4 Units.**

Nonhomogeneous problems and Green's functions, Sturm-Liouville theory, general Fourier expansions, applications of partial differential equations in different areas of science.

Prerequisite: MATH 112B

**MATH 113A. Mathematical Modeling in Biology. 4 Units.**

Discrete mathematical and statistical models; difference equations, population dynamics, Markov chains, and statistical models in biology.

Prerequisite: MATH 2B or MATH 5B

**MATH 113B. Mathematical Modeling in Biology. 4 Units.**

Linear algebra; differential equations models; dynamical systems; stability; hysteresis; phase plane analysis; applications to cell biology, viral dynamics, and infectious diseases.

Prerequisite: MATH 2B or AP Calculus BC or MATH 5B. AP Calculus BC with a minimum score of 4

**MATH 115. Mathematical Modeling. 4 Units.**

Mathematical modeling and analysis of phenomena that arise in engineering physical sciences, biology, economics, or social sciences.

Prerequisite: MATH 112A and (MATH 2D or MATH H2D) and (MATH 3A or MATH H3A) and MATH 3D

**MATH 117. Dynamical Systems. 4 Units.**

Introduction to the modern theory of dynamical systems including contraction mapping principle, fractals and chaos, conservative systems, Kepler problem, billiard models, expanding maps, Smale's horseshoe, topological entropy.

Prerequisite: MATH 3D and MATH 140A

**MATH 118. The Theory of Differential Equations. 4 Units.**

Existence and uniqueness of solutions, continuous dependence of solutions on initial conditions and parameters, Lyapunov and asymptotic stability, Floquet theory, nonlinear systems, and bifurcations.

Prerequisite: MATH 3D and MATH 140A

**MATH 120A. Introduction to Abstract Algebra: Groups. 4 Units.**

Axioms for group theory; permutation groups, matrix groups. Isomorphisms, homomorphisms, quotient groups. Advanced topics as time permits. Special emphasis on doing proofs.

Prerequisite: (MATH 3A or MATH H3A) and MATH 13. MATH 13 with a grade of C or better

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 120B. Introduction to Abstract Algebra: Rings and Fields. 4 Units.**

Basic properties of rings; ideals, quotient rings; polynomial and matrix rings. Elements of field theory.

Prerequisite: MATH 120A. MATH 120A with a grade of C- or better

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 120C. Introduction to Abstract Algebra: Galois Theory. 4 Units.**

Galois Theory: proof of the impossibility of certain ruler-and-compass constructions (squaring the circle, trisecting angles); nonexistence of analogues to the 'quadratic formula' for polynomial equations of degree 5 or higher.

Prerequisite: MATH 120B

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH H120A. Honors Introduction to Graduate Algebra I. 5 Units.**

Introduction to abstract linear algebra, including bases, linear transformation, eigenvectors, canonical forms, inner products, and symmetric operators. Introduction to groups, rings, and fields, including examples of groups, group actions, Sylow theorems, modules over principal ideal domains, polynomials, and Galois groups.

Prerequisite: (MATH 3A or MATH H3A) and MATH 13 and (MATH 120A or MATH 121A). MATH 13 with a grade of A or better. MATH 120A with a grade of A or better. MATH 121A with a grade of A or better

Restriction: Mathematics Honors students only.

Concurrent with MATH 206A.

**MATH H120B. Honors Introduction to Graduate Algebra II. 5 Units.**

Introduction to abstract linear algebra, including bases, linear transformation, eigenvectors, canonical forms, inner products, and symmetric operators. Introduction to groups, rings, and fields, including examples of groups, group actions, Sylow theorems, modules over principal ideal domains, polynomials, and Galois groups.

Prerequisite: MATH H120A

Restriction: Mathematics Honors students only.

Concurrent with MATH 206B.

**MATH H120C. Honors Introduction to Graduate Algebra III. 5 Units.**

Introduction to abstract linear algebra, including bases, linear transformation, eigenvectors, canonical forms, inner products, and symmetric operators. Introduction to groups, rings, and fields, including examples of groups, group actions, Sylow theorems, modules over principal ideal domains, polynomials, and Galois groups.

Prerequisite: MATH H120B

Restriction: Mathematics Honors students only.

Concurrent with MATH 206C.

**MATH 121A. Linear Algebra. 4 Units.**

Introduction to modern abstract linear algebra. Special emphasis on students doing proofs. Vector spaces, linear independence, bases, dimension. Linear transformations and their matrix representations. Theory of determinants.

Prerequisite: (MATH 3A or MATH H3A) and MATH 13. MATH 13 with a grade of C or better

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 121B. Linear Algebra. 4 Units.**

Introduction to modern abstract linear algebra. Special emphasis on students doing proofs. Canonical forms; inner products; similarity of matrices.

Prerequisite: MATH 121A

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 130A. Probability I. 4 Units.**

Combinatorial probability, conditional probabilities, independence, discrete and continuous random variables, expectation and variance, common probability distributions.

Prerequisite: (MATH 2A or AP Calculus BC or AP Calculus AB) and (MATH 2B or AP Calculus BC) and (MATH 3A or MATH H3A). AP Calculus BC with a minimum score of 3. AP Calculus AB with a minimum score of 4. AP Calculus BC with a minimum score of 4

**MATH 130B. Probability II. 4 Units.**

Joint distributions, sums of independent random variables, conditional distributions and conditional expectation, covariances, moment generating functions, limit theorems.

Prerequisite: MATH 130A or MATH 131A or STAT 120A

**MATH 130C. Stochastic Processes. 4 Units.**

Markov chains, Brownian motion, Gaussian processes, applications to option pricing and Markov chain Monte Carlo methods.

Prerequisite: MATH 130B

**MATH 133A. Statistical Methods with Applications to Finance. 4 Units.**

Overview of probability, statistics, and financial concepts: distribution, point estimation, confidence interval, linear regression, hypothesis testing, principal component analysis, financial applications.

Prerequisite: MATH 130A or MATH 131A or STAT 120A

**MATH 133B. Statistical Methods with Applications to Finance. 4 Units.**

Overview of markets and options: asset modeling, Brownian motion, risk neutrality, option pricing, value at risk, MC simulations.

Prerequisite: MATH 133A

**MATH 133C. Statistical Methods with Applications to Finance. 4 Units.**

Overview of interest theory, time value of money, annuities/cash flows with payments that are not contingent, loans, sinking funds, bonds, general cash flow and portfolios, immunization, duration and convexity, swaps.

Prerequisite: MATH 133B

**MATH 134A. Fixed Income. 4 Units.**

Overview of interest theory, time value of money, annuities/cash flows with payments that are not contingent, loans, sinking funds, bonds, general cash flow and portfolios, immunization, duration and convexity, swaps.

Prerequisite: MATH 130A or STAT 120A

Overlaps with MATH 133C.

**MATH 134B. Mathematics of Financial Derivatives. 4 Units.**

General derivatives; call/put options; hedging and investment strategies: spreads and collars; risk management; forwards and futures; bonds.

Prerequisite: MATH 134A or MATH 133C

Overlaps with MATH 133A.

**MATH 134C. Mathematical Models for Finance. 4 Units.**

General properties of options: option contracts (call and put options, European, American and exotic options); binomial option pricing model, Black-Scholes option pricing model; risk-neutral pricing formula using Monte-Carlo simulation; option greeks and risk management; interest rate derivatives, Markowitz portfolio theory.

Prerequisite: MATH 134B or MATH 133A

Overlaps with MATH 133B.

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 140A. Elementary Analysis. 4 Units.**

Introduction to real analysis, including convergence of sequence, infinite series, differentiation and integration, and sequences of functions. Students are expected to do proofs.

Prerequisite: (MATH 2B or AP Calculus BC) and (MATH 2D or MATH H2D) and (MATH 3A or MATH H3A) and MATH 13. AP Calculus BC with a minimum score of 4. MATH 13 with a grade of C or better

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 140B. Elementary Analysis. 4 Units.**

Introduction to real analysis including convergence of sequences, infinite series, differentiation and integration, and sequences of functions. Students are expected to do proofs.

Prerequisite: MATH 140A. MATH 140A with a grade of C- or better

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 140C. Analysis in Several Variables . 4 Units.**

Rigorous treatment of multivariable differential calculus. Jacobians, Inverse and Implicit Function theorems.

Prerequisite: MATH 140B

**MATH H140A. Honors Introduction to Graduate Analysis I. 5 Units.**

Construction of the real number system, topology of the real line, concepts of continuity, differential and integral calculus, sequences and series of functions, equicontinuity, metric spaces, multivariable differential and integral calculus, implicit functions, curves and surfaces.

Prerequisite: (MATH 2E or MATH H2E) and (MATH 3A or MATH H3A) and MATH 13 and MATH 121A and MATH 140A and MATH 140B. MATH 2E with a grade of A or better. MATH H2E with a grade of A or better. MATH 13 with a grade of A or better. MATH 140A with a grade of A or better. MATH 140B with a grade of A or better

Restriction: Mathematics Honors students only.

Concurrent with MATH 205A.

**MATH H140B. Honors Introduction to Graduate Analysis II. 5 Units.**

Construction of the real number system, topology of the real line, concepts of continuity, differential and integral calculus, sequences and series of functions, equicontinuity, metric spaces, multivariable differential and integral calculus, implicit functions, curves and surfaces.

Prerequisite: MATH H140A

Restriction: Mathematics Honors students only.

Concurrent with MATH 205B.

**MATH H140C. Honors Introduction to Graduate Analysis III. 5 Units.**

Construction of the real number system; topology of the real line; concepts of continuity, differential, and integral calculus; sequences and series of functions, equicontinuity, metric spaces, multivariable differential, and integral calculus; implicit functions, curves and surfaces.

Prerequisite: MATH H140B

Restriction: Mathematics Honors students only.

Concurrent with MATH 205C.

**MATH 141. Introduction to Topology. 4 Units.**

The elements of naive set theory and the basic properties of metric spaces. Introduction to topological properties.

Prerequisite: MATH 140A

**MATH 147. Complex Analysis. 4 Units.**

Rigorous treatment of basic complex analysis: analytic functions, Cauchy integral theory and its consequences, power series, residue calculus, harmonic functions, conformal mapping. Students are expected to do proofs.

Prerequisite or corequisite: MATH 140A and MATH 140B

Restriction: MATH 114A may not be taken for credit after MATH 147.

**MATH 150. Introduction to Mathematical Logic. 4 Units.**

First order logic through the Completeness Theorem for predicate logic.

Prerequisite: MATH 13 or (ICS 6B and ICS 6D). MATH 13 with a grade of C- or better

Overlaps with LPS 105B, PHIL 105B.

**MATH 161. Modern Geometry. 4 Units.**

Euclidean Geometry; Hilbert's Axioms; Absolute Geometry; Hyperbolic Geometry; the Poincare Models; and Geometric Transformations.

Prerequisite: MATH 13 or (ICS 6B and ICS 6D). MATH 13 with a grade of C- or better

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 162A. Introduction to Differential Geometry. 4 Units.**

Applications of advanced calculus and linear algebra to the geometry of curves and surfaces in space.

Prerequisite: (MATH 2E or MATH H2E) and (MATH 3A or MATH H3A) and MATH 3D

**MATH 162B. Introduction to Differential Geometry. 4 Units.**

Applications of advanced calculus and linear algebra to the geometry of curves and surfaces in space.

Prerequisite: MATH 162A

**MATH 173A. Introduction to Cryptology. 4 Units.**

Introduction to some of the mathematics used in the making and breaking of codes, with applications to classical ciphers and public key systems. Includes topics from number theory, probability, and abstract algebra.

Prerequisite: (MATH 2B or AP Calculus BC) and (MATH 3A or MATH H3A) and MATH 13 or (ICS 6B and ICS 6D). AP Calculus BC with a minimum score of 4. MATH 13 with a grade of C or better

**MATH 173B. Introduction to Cryptology. 4 Units.**

Introduction to some of the mathematics used in the making and breaking of codes, with applications to classical ciphers and public key systems. The mathematics which is covered includes topics from number theory, probability, and abstract algebra.

Prerequisite: MATH 173A

**MATH 175. Combinatorics . 4 Units.**

Introduction to combinatorics including basic counting principles, permutations, combinations, binomial coefficients, inclusion-exclusion, derangements, ordinary and exponential generating functions, recurrence relations, Catalan numbers, Stirling numbers, and partition numbers.

Prerequisite: (MATH 2B or AP Calculus BC) and MATH 13. AP Calculus BC with a minimum score of 4. MATH 13 with a grade of C or better

**MATH 176. Mathematics of Finance. 4 Units.**

After reviewing tools from probability, statistics, and elementary differential and partial differential equations, concepts such as hedging, arbitrage, Puts, Calls, the design of portfolios, the derivation and solution of the Blac-Scholes, and other equations are discussed.

Prerequisite: MATH 3A or MATH H3A

Same as ECON 135.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Mathematics Majors have first consideration for enrollment.

**MATH 180A. Number Theory. 4 Units.**

Introduction to number theory and applications. Divisibility, prime numbers, factorization. Arithmetic functions. Congruences. Quadratic residue. Diophantine equations. Introduction to cryptography.

Prerequisite: (MATH 3A or MATH H3A) and MATH 13. MATH 13 with a grade of C or better

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 180B. Number Theory. 4 Units.**

Introduction to number theory and applications. Analytic number theory, character sums, finite fields, discrete logarithm, computational complexity. Introduction to coding theory. Other topics as time permits.

Prerequisite: MATH 180A

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 184. History of Mathematics. 4 Units.**

Topics vary from year to year. Some possible topics: mathematics in ancient times; the development of modern analysis; the evolution of geometric ideas. Students will be assigned individual topics for term papers.

Corequisite: MATH 184L

Prerequisite: MATH 120A and MATH 140A

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 184L. History of Mathematics Lesson Lab. 1 Unit.**

Aspiring math teachers research, design, present, and peer review middle school or high school math lessons that draw from history of mathematics topics.

Corequisite: MATH 184

Prerequisite: PS 5

**MATH 192. Studies in the Learning and Teaching of Secondary Mathematics. 2 Units.**

Focus is on historic and current mathematical concepts related to student learning and effective math pedagogy, with fieldwork in grades 6-14.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**MATH 194. Problem Solving Seminar. 2 Units.**

Develops ability in analytical thinking and problem solving, using problems of the type found in the Mathematics Olympiad and the Putnam Mathematical Competition. Students taking the course in fall will prepare for and take the Putnam examination in December.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**MATH 195W. Mathematical Writing. 4 Units.**

Techniques of mathematical writing and communication. Covers effectively writing mathematical papers, creating effective presentations, and communicating mathematics in a variety of media. Focuses on utilizing LaTeX for typesetting mathematics.

Prerequisite: MATH 120A or MATH 121A or MATH 140A. MATH 120A with a grade of C or better. MATH 121A with a grade of C or better. MATH 140A with a grade of C or better. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Mathematics Majors have first consideration for enrollment.

**(Ib)****MATH 199A. Special Studies in Mathematics. 2-4 Units.**

Supervised reading. For outstanding undergraduate Mathematics majors in supervised but independent reading or research of mathematical topics.

Repeatability: Unlimited as topics vary.

**MATH 199B. Special Studies in Mathematics. 2-4 Units.**

Supervised reading. For outstanding undergraduate Mathematics majors in supervised but independent reading or research of mathematical topics.

Repeatability: Unlimited as topics vary.

**MATH 199C. Special Studies in Mathematics. 2-4 Units.**

Supervised reading. For outstanding undergraduate Mathematics majors in supervised but independent reading or research of mathematical topics.

Repeatability: Unlimited as topics vary.

**MATH 205A. Introduction to Graduate Analysis. 5 Units.**

Construction of the real number system, topology of the real line, concepts of continuity, differential and integral calculus, sequences and series of functions, equicontinuity, metric spaces, multivariable differential and integral calculus, implicit functions, curves and surfaces.

Prerequisite: (MATH 2E or MATH H2E) and (MATH 3A MATH H3A) and MATH 13. MATH 2E with a grade of A or better. MATH H2E with a grade of A or better. MATH 13 with a grade of C or better

Concurrent with MATH H140A.

**MATH 205B. Introduction to Graduate Analysis. 5 Units.**

Construction of the real number system, topology of the real line, concepts of continuity, differential and integral calculus, sequences and series of functions, equicontinuity, metric spaces, multivariable differential and integral calculus, implicit functions, curves and surfaces.

Prerequisite: MATH 205A

Concurrent with MATH H140B.

**MATH 205C. Introduction to Graduate Analysis. 5 Units.**

Construction of the real number system, topology of the real line, concepts of continuity, differential and integral calculus, sequences and series of functions, equicontinuity, metric spaces, multivariable differential and integral calculus, implicit functions, curves and surfaces.

Prerequisite: MATH 205B

Concurrent with MATH H140C.

**MATH 206A. Introduction to Graduate Algebra. 5 Units.**

Introduction to abstract linear algebra, including bases, linear transformation, eigenvectors, canonical forms, inner products, symmetric operators. Introduction to groups, rings, and fields including examples of groups, group actions, Sylow theorems, modules over principal ideal domains, polynomials, and Galois groups.

Prerequisite: MATH 3A or MATH H3A

Concurrent with MATH H120A.

**MATH 206B. Introduction to Graduate Algebra. 5 Units.**

Introduction to abstract linear algebra, including bases, linear transformation, eigenvectors, canonical forms, inner products, symmetric operators. Introduction to groups, rings, and fields including examples of groups, group actions, Sylow theorems, modules over principal ideal domains, polynomials, and Galois groups.

Prerequisite: MATH 206A

Concurrent with MATH H120B.

**MATH 206C. Introduction to Graduate Algebra. 5 Units.**

Introduction to abstract linear algebra, including bases, linear transformation, eigenvectors, canonical forms, inner products, symmetric operators. Introduction to groups, rings, and fields including examples of groups, group actions, Sylow theorems, modules over principal ideal domains, polynomials, and Galois groups.

Prerequisite: MATH 206B

Concurrent with MATH H120C.

**MATH 210A. Real Analysis. 4 Units.**

Measure theory, Lebesgue integral, signed measures, Radon-Nikodym theorem, functions of bounded variation and absolutely continuous functions, classical Banach spaces,  $L_p$  spaces, integration on locally compact spaces and the Riesz-Markov theorem, measure and outer measure, product measure spaces.

Prerequisite: MATH 140C

**MATH 210B. Real Analysis. 4 Units.**

Measure theory, Lebesgue integral, signed measures, Radon-Nikodym theorem, functions of bounded variation and absolutely continuous functions, classical Banach spaces,  $L_p$  spaces, integration on locally compact spaces and the Riesz-Markov theorem, measure and outer measure, product measure spaces.

Prerequisite: MATH 210A

**MATH 210C. Real Analysis. 4 Units.**

Measure theory, Lebesgue integral, signed measures, Radon-Nikodym theorem, functions of bounded variation and absolutely continuous functions, classical Banach spaces,  $L_p$  spaces, integration on locally compact spaces and the Riesz-Markov theorem, measure and outer measure, product measure spaces.

Prerequisite: MATH 210B

**MATH 218A. Introduction to Manifolds and Geometry. 4 Units.**

General topology and fundamental groups, covering space; Stokes theorem on manifolds, selected topics on abstract manifold theory.

Prerequisite: MATH 205C

**MATH 218B. Introduction to Manifolds and Geometry. 4 Units.**

General topology and fundamental groups, covering space; Stokes theorem on manifolds, selected topics on abstract manifold theory.

Prerequisite: MATH 218A

**MATH 218C. Introduction to Manifolds and Geometry. 4 Units.**

General topology and fundamental groups, covering space; Stokes theorem on manifolds, selected topics on abstract manifold theory.

Prerequisite: MATH 218B

**MATH 220A. Analytic Function Theory. 4 Units.**

Standard theorems about analytic functions. Harmonic functions. Normal families. Conformal mapping.

Prerequisite: MATH 140C

**MATH 220B. Analytic Function Theory. 4 Units.**

Standard theorems about analytic functions. Harmonic functions. Normal families. Conformal mapping.

Prerequisite: MATH 220A

**MATH 220C. Analytic Function Theory. 4 Units.**

Standard theorems about analytic functions. Harmonic functions. Normal families. Conformal mapping.

Prerequisite: MATH 220B

**MATH 222A. Several Complex Variables and Complex Geometry. 4 Units.**

Several Complex variables,  $\bar{\partial}$ -bar problems, mappings, Kaehler geometry, de Rham and Dolbeault Theorems, Chern Classes, Hodge Theorems, Calabi conjecture, Kahler-Einstein geometry, Monge-Ampere.

Prerequisite: MATH 218C and MATH 220C

**MATH 225A. Introduction to Numerical Analysis and Scientific Computing. 4 Units.**

Introduction to fundamentals of numerical analysis from an advanced viewpoint. Error analysis, approximation of functions, nonlinear equations.

Prerequisite: MATH 3D and (MATH 105A and MATH 105B) or (MATH 140A and MATH 140B) and MATH 121A and (MATH 112A or MAE 140)

Restriction: Graduate students only.

**MATH 225B. Introduction to Numerical Analysis and Scientific Computing. 4 Units.**

Introduction to fundamentals of numerical analysis from an advanced viewpoint. Numerical linear algebra, numerical solutions of differential equations; stability.

Prerequisite: MATH 225A

Restriction: Graduate students only.

**MATH 225C. Introduction to Numerical Analysis and Scientific Computing. 4 Units.**

Introduction to fundamentals of numerical analysis from an advanced viewpoint. Numerical linear algebra, numerical solutions of differential equations; stability.

Prerequisite: MATH 225B

Restriction: Graduate students only.

**MATH 226A. Computational Differential Equations. 4 Units.**

Finite difference and finite element methods. Quick treatment of functional and nonlinear analysis background: weak solution,  $L_p$  spaces, Sobolev spaces. Approximation theory. Fourier and Petrov-Galerkin methods; mesh generation. Elliptic, parabolic, hyperbolic cases in 226A-B-C, respectively.

Prerequisite: MATH 3D and (MATH 112A or MAE 140) and (MATH 140B or MATH 105B)

**MATH 226B. Computational Differential Equations. 4 Units.**

Finite difference and finite element methods. Quick treatment of functional and nonlinear analysis background: weak solution,  $L_p$  spaces, Sobolev spaces. Approximation theory. Fourier and Petrov-Galerkin methods; mesh generation. Elliptic, parabolic, hyperbolic cases in 226A-B-C, respectively.

Prerequisite: MATH 226A

**MATH 226C. Computational Differential Equations. 4 Units.**

Finite difference and finite element methods. Quick treatment of functional and nonlinear analysis background: weak solution,  $L_p$  spaces, Sobolev spaces. Approximation theory. Fourier and Petrov-Galerkin methods; mesh generation. Elliptic, parabolic, hyperbolic cases in 226A-B-C, respectively.

Prerequisite: MATH 226B

**MATH 227A. Mathematical and Computational Biology. 4 Units.**

Analytical and numerical methods for dynamical systems, temporal-spatial dynamics, steady state, stability, stochasticity. Application to life sciences: genetics, tissue growth and patterning, cancers, ion channels gating, signaling networks, morphogen gradients. Analytical methods.

Prerequisite: (MATH 2A or AP Calculus BC or AP Calculus AB) and (MATH 2B or AP Calculus BC or MATH 5B) and (MATH 3A or MATH H3A). AP Calculus BC with a minimum score of 3. AP Calculus AB with a minimum score of 4. AP Calculus BC with a minimum score of 4

**MATH 227B. Mathematical and Computational Biology. 4 Units.**

Analytical and numerical methods for dynamical systems, temporal-spatial dynamics, steady state, stability, stochasticity. Application to life sciences: genetics, tissue growth and patterning, cancers, ion channels gating, signaling networks, morphogen gradients. Numerical simulations.

Prerequisite: MATH 227A

**MATH 227C. Mathematical and Computational Biology . 4 Units.**

Analytical and numerical methods for dynamical systems, temporal-spatial dynamics, steady state, stability, stochasticity. Application to life sciences: genetics, tissue growth and patterning, cancers, ion channels gating, signaling networks, morphogen gradients. Probabilistic methods.

Prerequisite: MATH 227A

Same as CS 285.

**MATH 230A. Algebra. 4 Units.**

Elements of the theories of groups, rings, fields, modules. Galois theory. Modules over principal ideal domains. Artinian, Noetherian, and semisimple rings and modules.

Prerequisite: MATH 120A and MATH 121A and MATH 121B

**MATH 230B. Algebra. 4 Units.**

Elements of the theories of groups, rings, fields, modules. Galois theory. Modules over principal ideal domains. Artinian, Noetherian, and semisimple rings and modules.

Prerequisite: MATH 230A

**MATH 230C. Algebra. 4 Units.**

Elements of the theories of groups, rings, fields, modules. Galois theory. Modules over principal ideal domains. Artinian, Noetherian, and semisimple rings and modules.

Prerequisite: MATH 230B

**MATH 232A. Algebraic Number Theory. 4 Units.**

Algebraic integers, prime ideals, class groups, Dirichlet unit theorem, localization, completion, Cebotarev density theorem, L-functions, Gauss sums, diophantine equations, zeta functions over finite fields. Introduction to class field theory.

Prerequisite: MATH 230C

**MATH 232B. Algebraic Number Theory. 4 Units.**

Algebraic integers, prime ideals, class groups, Dirichlet unit theorem, localization, completion, Cebotarev density theorem, L-functions, Gauss sums, diophantine equations, zeta functions over finite fields. Introduction to class field theory.

Prerequisite: MATH 232A

**MATH 232C. Algebraic Number Theory. 4 Units.**

Algebraic integers, prime ideals, class groups, Dirichlet unit theorem, localization, completion, Cebotarev density theorem, L-functions, Gauss sums, diophantine equations, zeta functions over finite fields. Introduction to class field theory.

Prerequisite: MATH 232B

**MATH 233A. Algebraic Geometry. 4 Units.**

Basic commutative algebra and classical algebraic geometry. Algebraic varieties, morphisms, rational maps, blow ups. Theory of schemes, sheaves, divisors, cohomology. Algebraic curves and surfaces, Riemann-Roch theorem, Jacobians, classification of curves and surfaces.

Prerequisite: MATH 230C

**MATH 233B. Algebraic Geometry. 4 Units.**

Basic commutative algebra and classical algebraic geometry. Algebraic varieties, morphisms, rational maps, blow ups. Theory of schemes, sheaves, divisors, cohomology. Algebraic curves and surfaces, Riemann-Roch theorem, Jacobians, classification of curves and surfaces.

Prerequisite: MATH 233A

**MATH 233C. Algebraic Geometry. 4 Units.**

Basic commutative algebra and classical algebraic geometry. Algebraic varieties, morphisms, rational maps, blow ups. Theory of schemes, sheaves, divisors, cohomology. Algebraic curves and surfaces, Riemann-Roch theorem, Jacobians, classification of curves and surfaces.

Prerequisite: MATH 233B

**MATH 235A. Mathematics of Cryptography. 4 Units.**

Mathematics of public key cryptography: encryption and signature schemes; RSA; factoring; primality testing; discrete log based cryptosystems, elliptic and hyperelliptic curve cryptography and additional topics as determined by the instructor.

Prerequisite: MATH 230C

**MATH 239A. Analytic Methods in Arithmetic Geometry. 4 Units.**

Riemann zeta function, Dirichlet L-functions, prime number theorem, zeta functions over finite fields, sieve methods, zeta functions of algebraic curves, algebraic coding theory, L-Functions over number fields, L-functions of modular forms, Eisenstein series.

Prerequisite: MATH 220C and MATH 230C

**MATH 239B. Analytic Methods in Arithmetic Geometry. 4 Units.**

Riemann zeta function, Dirichlet L-functions, prime number theorem, zeta functions over finite fields, sieve methods, zeta functions of algebraic curves, algebraic coding theory, L-Functions over number fields, L-functions of modular forms, Eisenstein series.

Prerequisite: MATH 239A

**MATH 239C. Analytic Methods in Arithmetic Geometry. 4 Units.**

Riemann zeta function, Dirichlet L-functions, prime number theorem, zeta functions over finite fields, sieve methods, zeta functions of algebraic curves, algebraic coding theory, L-Functions over number fields, L-functions of modular forms, Eisenstein series.

Prerequisite: MATH 239B

**MATH 240A. Differential Geometry. 4 Units.**

Riemannian manifolds, connections, curvature and torsion. Submanifolds, mean curvature, Gauss curvature equation. Geodesics, minimal submanifolds, first and second fundamental forms, variational formulas. Comparison theorems and their geometric applications. Hodge theory applications to geometry and topology.

**MATH 240B. Differential Geometry. 4 Units.**

Riemannian manifolds, connections, curvature and torsion. Submanifolds, mean curvature, Gauss curvature equation. Geodesics, minimal submanifolds, first and second fundamental forms, variational formulas. Comparison theorems and their geometric applications. Hodge theory applications to geometry and topology.

Prerequisite: MATH 240A

**MATH 240C. Differential Geometry. 4 Units.**

Riemannian manifolds, connections, curvature and torsion. Submanifolds, mean curvature, Gauss curvature equation. Geodesics, minimal submanifolds, first and second fundamental forms, variational formulas. Comparison theorems and their geometric applications. Hodge theory applications to geometry and topology.

Prerequisite: MATH 240B

**MATH 245A. Topics in Differential Geometry. 4 Units.**

Studies in selected areas of differential geometry, a continuation of MATH 240A-MATH 240B-MATH 240C. Topics addressed vary each quarter.

Prerequisite: MATH 240C

Repeatability: Unlimited as topics vary.

**MATH 245B. Topics in Differential Geometry. 4 Units.**

Studies in selected areas of differential geometry, a continuation of MATH 240A-MATH 240B-MATH 240C. Topics addressed vary each quarter.

Prerequisite: MATH 245A

Repeatability: Unlimited as topics vary.

**MATH 245C. Topics in Differential Geometry. 4 Units.**

Studies in selected areas of differential geometry, a continuation of MATH 240A-MATH 240B-MATH 240C. Topics addressed vary each quarter.

Prerequisite: MATH 245B

Repeatability: Unlimited as topics vary.

**MATH 250A. Algebraic Topology. 4 Units.**

Provides fundamental materials in algebraic topology: fundamental group and covering space, homology and cohomology theory, and homotopy group.

Prerequisite: MATH 230A

**MATH 250B. Algebraic Topology. 4 Units.**

Provides fundamental materials in algebraic topology: fundamental group and covering space, homology and cohomology theory, and homotopy group.

Prerequisite: MATH 250A

**MATH 250C. Algebraic Topology. 4 Units.**

Provides fundamental materials in algebraic topology: fundamental group and covering space, homology and cohomology theory, and homotopy group.

Prerequisite: MATH 250B

**MATH 260A. Functional Analysis. 4 Units.**

Normed linear spaces, Hilbert spaces, Banach spaces, Stone-Weierstrass Theorem, locally convex spaces, bounded operators on Banach and Hilbert spaces, the Gelfand-Neumark Theorem for commutative  $C^*$ -algebras, the spectral theorem for bounded self-adjoint operators, unbounded operators on Hilbert spaces.

Prerequisite: MATH 210C and MATH 220C

**MATH 260B. Functional Analysis. 4 Units.**

Normed linear spaces, Hilbert spaces, Banach spaces, Stone-Weierstrass Theorem, locally convex spaces, bounded operators on Banach and Hilbert spaces, the Gelfand-Neumark Theorem for commutative  $C^*$ -algebras, the spectral theorem for bounded self-adjoint operators, unbounded operators on Hilbert spaces.

Prerequisite: MATH 260A

**MATH 260C. Functional Analysis. 4 Units.**

Normed linear spaces, Hilbert spaces, Banach spaces, Stone-Weierstrass Theorem, locally convex spaces, bounded operators on Banach and Hilbert spaces, the Gelfand-Neumark Theorem for commutative  $C^*$ -algebras, the spectral theorem for bounded self-adjoint operators, unbounded operators on Hilbert spaces.

Prerequisite: MATH 260B

**MATH 270A. Probability. 4 Units.**

Probability spaces, distribution and characteristic functions. Strong limit theorems. Limit distributions for sums of independent random variables. Conditional expectation and martingale theory. Stochastic processes.

Prerequisite: MATH 130C and MATH 210C

**MATH 270B. Probability. 4 Units.**

Probability spaces, distribution and characteristic functions. Strong limit theorems. Limit distributions for sums of independent random variables. Conditional expectation and martingale theory. Stochastic processes.

Prerequisite: MATH 270A

**MATH 270C. Probability. 4 Units.**

Probability spaces, distribution and characteristic functions. Strong limit theorems. Limit distributions for sums of independent random variables. Conditional expectation and martingale theory. Stochastic processes.

Prerequisite: MATH 270B

**MATH 271A. Stochastic Processes. 4 Units.**

Processes with independent increments, Wiener and Gaussian processes, function space integrals, stationary processes, Markov processes.

Prerequisite: MATH 210C

Overlaps with STAT 270.

**MATH 271B. Stochastic Processes. 4 Units.**

Processes with independent increments, Wiener and Gaussian processes, function space integrals, stationary processes, Markov processes.

Prerequisite: MATH 271A

Overlaps with STAT 270.

**MATH 271C. Stochastic Processes. 4 Units.**

Processes with independent increments, Wiener and Gaussian processes, function space integrals, stationary processes, Markov processes.

Prerequisite: MATH 271B

Overlaps with STAT 270.

**MATH 280A. Mathematical Logic. 4 Units.**

Basic set theory; models, compactness, and completeness; basic model theory; Incompleteness and Gödel's Theorems; basic recursion theory; constructible sets.

**MATH 280B. Mathematical Logic. 4 Units.**

Basic set theory; models, compactness, and completeness; basic model theory; Incompleteness and Gödel's Theorems; basic recursion theory; constructible sets.

Prerequisite: MATH 280A

**MATH 280C. Mathematical Logic. 4 Units.**

Basic set theory; models, compactness, and completeness; basic model theory; Incompleteness and Gödel's Theorems; basic recursion theory; constructible sets.

Prerequisite: MATH 280B

**MATH 281A. Set Theory. 4 Units.**

Ordinals, cardinals, cardinal arithmetic, combinatorial set theory, models of set theory, Gödel's constructible universe, forcing, large cardinals, iterate forcing, inner model theory, fine structure.

Prerequisite: MATH 280C

**MATH 281B. Set Theory. 4 Units.**

Ordinals, cardinals, cardinal arithmetic, combinatorial set theory, models of set theory, Gödel's constructible universe, forcing, large cardinals, iterate forcing, inner model theory, fine structure.

Prerequisite: MATH 281A

**MATH 281C. Set Theory. 4 Units.**

Ordinals, cardinals, cardinal arithmetic, combinatorial set theory, models of set theory, Gödel's constructible universe, forcing, large cardinals, iterate forcing, inner model theory, fine structure.

Prerequisite: MATH 281B

**MATH 282A. Model Theory. 4 Units.**

Languages, structures, compactness and completeness. Model-theoretic constructions. Omitting types theorems. Morley's theorem. Ranks, forking. Model completeness. O-minimality. Applications to algebra.

Prerequisite: MATH 280C

**MATH 282B. Model Theory. 4 Units.**

Languages, structures, compactness and completeness. Model-theoretic constructions. Omitting types theorems. Morley's theorem. Ranks, forking. Model completeness. O-minimality. Applications to algebra.

Prerequisite: MATH 282A

**MATH 282C. Model Theory. 4 Units.**

Languages, structures, compactness and completeness. Model-theoretic constructions. Omitting types theorems. Morley's theorem. Ranks, forking. Model completeness. O-minimality. Applications to algebra.

Prerequisite: MATH 282B

**MATH 285A. Topics in Mathematical Logic. 4 Units.**

Studies in selected areas of mathematical logic, a continuation of MATH 280A-MATH 280B-MATH 280C. Topics addressed vary each quarter.

Prerequisite: MATH 280C

Repeatability: Unlimited as topics vary.

**MATH 290A. Methods in Applied Mathematics. 4 Units.**

Introduction to ODEs and dynamical systems: existence and uniqueness. Equilibria and periodic solutions. Bifurcation theory. Perturbation methods: approximate solution of differential equations. Multiple scales and WKB. Matched asymptotic. Calculus of variations: direct methods, Euler-Lagrange equation. Second variation and Legendre condition.

**MATH 290B. Methods in Applied Mathematics. 4 Units.**

Introduction to ODEs and dynamical systems: existence and uniqueness. Equilibria and periodic solutions. Bifurcation theory. Perturbation methods: approximate solution of differential equations. Multiple scales and WKB. Matched asymptotic. Calculus of variations: direct methods, Euler-Lagrange equation. Second variation and Legendre condition.

Prerequisite: MATH 290A

**MATH 290C. Methods in Applied Mathematics. 4 Units.**

Introduction to ODEs and dynamical systems: existence and uniqueness. Equilibria and periodic solutions. Bifurcation theory. Perturbation methods: approximate solution of differential equations. Multiple scales and WKB. Matched asymptotic. Calculus of variations: direct methods, Euler-Lagrange equation. Second variation and Legendre condition.

Prerequisite: MATH 290B

**MATH 295A. Partial Differential Equations. 4 Units.**

Theory and techniques for linear and nonlinear partial differential equations. Local and global theory of partial differential equations: analytic, geometric, and functional analytic methods.

Prerequisite: MATH 210C and MATH 112B and MATH 112C

**MATH 295B. Partial Differential Equations. 4 Units.**

Theory and techniques for linear and nonlinear partial differential equations. Local and global theory of partial differential equations: analytic, geometric, and functional analytic methods.

Prerequisite: MATH 295A

**MATH 295C. Partial Differential Equations. 4 Units.**

Theory and techniques for linear and nonlinear partial differential equations. Local and global theory of partial differential equations: analytic, geometric, and functional analytic methods.

Prerequisite: MATH 295B

**MATH 296. Topics in Partial Differential Equations. 4 Units.**

Studies in selected areas of partial differential equations, a continuation of MATH 295A-MATH 295B-MATH 295C. Topics addressed vary each quarter.

Prerequisite: MATH 295C

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**MATH 297. Mathematics Colloquium. 1 Unit.**

Weekly colloquia on topics of current interest in mathematics.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**MATH 298A. Seminar . 2 Units.**

Seminars organized for detailed discussion of research problems of current interest in the Department. The format, content, frequency, and course value are variable.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

**MATH 298B. Seminar . 2 Units.**

Seminars organized for detailed discussion of research problems of current interest in the Department. The format, content, frequency, and course value are variable.

Prerequisite: MATH 298A

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

**MATH 298C. Seminar . 2 Units.**

Seminars organized for detailed discussion of research problems of current interest in the Department. The format, content, frequency, and course value are variable.

Prerequisite: MATH 298B

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

**MATH 299A. Supervised Reading and Research. 1-12 Units.**

Supervised reading and research with Mathematics faculty.

Repeatability: May be repeated for credit unlimited times.

**MATH 299B. Supervised Reading and Research. 1-12 Units.**

Supervised reading and research with Mathematics faculty.

Prerequisite: MATH 299A

Repeatability: May be repeated for credit unlimited times.

**MATH 299C. Supervised Reading and Research. 1-12 Units.**

Supervised reading and research with Mathematics faculty.

Prerequisite: MATH 299B

Repeatability: May be repeated for credit unlimited times.

**MATH 399. University Teaching. 1-4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## Mechanical and Aerospace Engineering (ENGRMAE)

### Courses

**ENGRMAE 10. Introduction to Engineering Computations. 4 Units.**

Introduction to the solution of engineering problems through the use of the computer. Elementary programming, numerical analysis, and data visualization with a high-level programming language such as MATLAB.

(Design units: 1)

Corequisite: MATH 2A

Prerequisite: MATH 2A or MATH 5A

Overlaps with EECS 10, EECS 12, BME 60B.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**ENGRMAE 30. Statics. 4 Units.**

Addition and resolution of forces, distributed forces, equivalent system of forces centroids, first moments, moments and products on inertia, equilibrium of rigid bodies, trusses, beams, cables. Course may be offered online.

(Design units: 0)

Corequisite: MATH 2D

Prerequisite: MATH 2D and PHYSICS 7C

Same as ENGRCEE 30, ENGR 30.

Restriction: School of Engineering students have first consideration for enrollment.

**ENGRMAE 52. Computer-Aided Design. 4 Units.**

Develops skills for interpretation and presentation of mechanical design drawings and the use of CAD in engineering design. An integrated approach to drafting based on sketching, manual drawing, and three-dimensional CAD techniques is presented.

(Design units: 0.5)

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**ENGRMAE 57. Manufacturing Processes in Engineering. 2 Units.**

With laboratory. Machines and processes of mechanical manufacturing. Safety and professional procedures emphasized. Use of measuring instruments, hand tools, lathe, mill, drill press, bandsaw, grinder, welding equipment.

(Design units: 0)

Grading Option: Pass/no pass only.

Restriction: School of Engineering students have first consideration for enrollment.

**ENGRMAE 60. Electric Circuits. 4 Units.**

Design and analysis of analog circuits based on lumped circuit elements with emphasis on the use of operational amplifiers. Sinusoidal and transient response. Constructional and laboratory testing of analog circuits, and introduction to data acquisition. Materials fee.

(Design units: 2)

Corequisite: MATH 3D

Prerequisite: PHYSICS 7D and PHYSICS 7LD

Overlaps with EECS 70A.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Materials Science Engineering Majors have first consideration for enrollment.

**ENGRMAE 80. Dynamics. 4 Units.**

Introduction to the kinematics and dynamics of particles and rigid bodies. The Newton-Euler, Work/Energy, and Impulse/Momentum methods are explored for ascertaining the dynamics of particles and rigid bodies. An engineering design problem using these fundamental principles is also undertaken.

(Design units: 0.5)

Prerequisite: MATH 2D and PHYSICS 7C

Same as ENGRCEE 80, ENGR 80.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRMAE 91. Introduction to Thermodynamics. 4 Units.**

Thermodynamic principles; open and closed systems representative of engineering problems. First and second law of thermodynamics with applications to engineering systems and design.

(Design units: 0.5)

Prerequisite: PHYSICS 7C and MATH 2D

Overlaps with CBE 40B.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRMAE 93. Topics in Design Project . 1-4 Units.**

Early-stage design/hands-on experience for students, and allows them to participate alongside seniors in the design project.

(Design units: 1)

Repeatability: Unlimited as topics vary.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment.

**ENGRMAE 106. Mechanical Systems Laboratory. 4 Units.**

Experiments in linear systems, including op-amp circuits, vibrations, and control systems. Emphasis on demonstrating that mathematical models can be useful tools for the analysis and design of electro-mechanical systems. Materials fee.

(Design units: 2)

Prerequisite: ENGRMAE 60 or EECS 70A

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRMAE 107. Fluid Thermal Science Laboratory. 4 Units.**

Fluid and thermal engineering laboratory. Experimental analysis of fluid flow, heat transfer, and thermodynamic systems. Probability, statistics, and uncertainty analysis. Report writing is emphasized and a design project is required. Materials fee.

(Design units: 1)

Corequisite: ENGRMAE 120

Restriction: Mechanical Engineering Majors have first consideration for enrollment.

**ENGRMAE 108. Aerospace Laboratory. 4 Units.**

Analytical and experimental investigation in aerodynamics, fluid dynamics, and heat transfer. Emphasis on study of flow over objects and lift and drag on airfoils. Introduction to basic diagnostic techniques. Report writing is emphasized. Design project is required.

(Design units: 2)

Prerequisite: ENGRMAE 130B

Restriction: Aerospace Engineering Majors have first consideration for enrollment. Mechanical Engineering majors have second consideration for enrollment.

**ENGRMAE 110. Combustion and Fuel Cell Systems. 4 Units.**

Fundamentals of gaseous, liquid, and coal-fired combustion and fuel cell systems. Fuels, fuel-air mixing, aerodynamics, and combustion and fuel cell thermodynamics. Operating and design aspects of practical systems including engines, power generators, boilers, furnaces, and incinerators.

(Design units: 2)

Prerequisite: ENGRMAE 115

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRMAE 112. Propulsion. 4 Units.**

Application of thermodynamics and fluid mechanics to basic flow processes and cycle performance in propulsion systems: gas turbines, ramjets, scramjets, and rockets.

(Design units: 1)

Prerequisite: ENGRMAE 135

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment.

**ENGRMAE 113. Electric Propulsion. 4 Units.**

Space propulsion requirements and maneuvers, stressing those best suited to electric propulsion. An introduction to plasma physics. Electrothermal, electromagnetic, and electrostatic accelerators, with emphasis in technologies (ion engines, Hall thrusters, and colloidal thrusters) belonging to the latter family.

(Design units: 1)

Prerequisite: ENGRMAE 112

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment.

Concurrent with ENGRMAE 213.

**ENGRMAE 114. Fuel Cell Fundamentals and Technology. 4 Units.**

Introduction to electrochemistry and electrocatalysis; nature of fuel-cell electrodes and electrolytes; charge transfer reactions at interfaces; charge transport and mass transport processes; fuel processing reactions; determination of fuel cell efficiency, fuel flexibility, emissions, and other characteristics.

(Design units: 0)

Prerequisite: ENGRMAE 115

Restriction: Seniors only. Mechanical Engineering Majors have first consideration for enrollment. Chemical Engineering majors have second consideration for enrollment.

Concurrent with ENGRMAE 214A.

**ENGRMAE 115. Applied Engineering Thermodynamics. 4 Units.**

Application of thermodynamic principles to compressible and incompressible processes representative of practical engineering problems; power cycles, refrigeration cycles, multicomponent mixtures, air conditioning systems, combustion, and compressible flow. Design of a thermodynamic process.

(Design units: 2)

Prerequisite: ENGRMAE 91 or CBE 40B or ENGRMSE 65A

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRMAE 117. Solar and Renewable Energy Systems. 4 Units.**

Basic principles, design, and operation of solar and other renewable energy systems including solar photo-voltaic, solar thermal, wind, and PEM fuel cell. Includes power generation and storage, and renewable fuels for transportation and stationary power generation.

(Design units: 1)

Prerequisite: (ENGRMAE 91 or CBE 40B)

Restriction: Mechanical Engineering Majors have first consideration for enrollment.

**ENGRMAE 118. Sustainable Energy Systems. 4 Units.**

Basic principles, design, and operation of sustainable energy systems including wind, solar photo-voltaic and thermal, hydroelectric, geothermal, oceanic, biomass combustion, advanced coal, and next generation nuclear. Includes power generation, storage, and transmission for stationary power generation.

(Design units: 1)

Prerequisite: ENGRMAE 115

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment.

Concurrent with ENGRMAE 218.

**ENGRMAE 119. Climate Solutions. 4 Units.**

Focuses on carbon neutrality and climate stability, addressing.

Same as EARTHSS 179, UPPP 111.

Restriction: Upper-division students only.

**ENGRMAE 120. Heat and Mass Transfer. 4 Units.**

Fundamentals of heat and mass transfer. Conduction, heat and mass transfer by convection in laminar and turbulent flows, radiation heat transfer, and combined modes of heat and mass transfer. Practical engineering applications.

(Design units: 0)

Prerequisite: ENGRMAE 130B

Overlaps with CBE 120B.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**ENGRMAE 130A. Introduction to Fluid Mechanics. 4 Units.**

Fundamental concepts; fluid statics; fluid dynamics; Bernoulli's equation; control-volume analysis; basic flow equations of conservation of mass, momentum, and energy; differential analysis; potential flow; viscous incompressible flow.

(Design units: 0)

Corequisite: ENGRMAE 91

Prerequisite: PHYSICS 7C and MATH 2D and MATH 2E and MATH 3D and (ENGRMAE 30 or ENGRCEE 30 or ENGR 30) and (ENGRMAE 80 or ENGRCEE 80 or ENGR 80). PHYSICS 7C with a grade of C- or better. MATH 2D with a grade of C- or better. MATH 2E with a grade of C- or better. MATH 3D with a grade of C- or better. ENGRMAE 30 with a grade of C- or better. ENGRCEE 30 with a grade of C- or better. ENGR 30 with a grade of C- or better. ENGRMAE 80 with a grade of C- or better. ENGRCEE 80 with a grade of C- or better. ENGR 80 with a grade of C- or better

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment.

**ENGRMAE 130B. Introduction to Viscous and Compressible Flows. 4 Units.**

Introduction to the analysis of viscous flows including fully developed laminar and turbulent flow in a pipe, viscous flow over immersed bodies, evaluation of boundary layer characteristics, lift and drag, compressible flow in a duct and normal shock waves.

(Design units: 1)

Prerequisite: ENGRMAE 130A

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment.

**ENGRMAE 132. Computational Fluid Dynamics. 4 Units.**

Introduction to computational fluid dynamics in simple engineering devices. The numerical simulations will be performed via the widely-used software ANSYS-Fluent. While Fluent is the choice of software, all major CFD packages are based on a similar numerical method.

(Design units: 0)

Prerequisite: ENGRMAE 130B. ENGRMAE 130B with a grade of C- or better

Restriction: Aerospace Engineering Majors only. Mechanical Engineering Majors only.

**ENGRMAE 135. Compressible Flow. 4 Units.**

Compressibility effects in fluid mechanics. One-dimensional flow with area variation, friction, heat transfer, and shocks. Design of gas supply systems. Two-dimensional flow with oblique shocks and isentropic waves. Supersonic airfoil theory and design, wind tunnel design. Basic diagnostics.

(Design units: 1)

Prerequisite: ENGRMAE 130A

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment.

**ENGRMAE 136. Aerodynamics. 4 Units.**

Analysis of flow over aircraft wings and airfoils, prediction of lift, moment, and drag. Topics: fluid dynamics equations; flow similitude; viscous effects; vorticity, circulation, Kelvin's theorem, potential flow; superposition principle, Kutta-Joukowski theorem; thin airfoil theory; finite wing theory; compressibility.

(Design units: 1)

Prerequisite: ENGRMAE 130B

Restriction: Aerospace Engineering Majors have first consideration for enrollment. Mechanical Engineering Majors have first consideration for enrollment.

**ENGRMAE 145. Theory of Machines and Mechanisms. 4 Units.**

Presents the basic mathematical theory of machines. Focuses on the principles of cam design, gearing and gear train analysis, and the kinematic and dynamic analysis of linkages, together with an introduction to robotics.

(Design units: 2)

Prerequisite: ENGRMAE 52 and (ENGRMAE 80 or ENGRCEE 80 or ENGR 80) and (MATH 3A or I&C SCI 6N)

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Materials Science and Engineering majors have second consideration for enrollment.

**ENGRMAE 146. Astronautics. 4 Units.**

Motion in gravitational force fields, orbit transfers, rocketry, interplanetary trajectories, attitude dynamics and stabilization, navigation, reentry, the space environment.

(Design units: 1)

Prerequisite: ENGRMAE 80 or ENGRCEE 80 or ENGR 80

Restriction: Aerospace Engineering Majors have first consideration for enrollment.

**ENGRMAE 147. Vibrations. 4 Units.**

Analysis of structural vibrations of mechanical systems. Modeling for lumped and distributed parameter systems. Topics include single and multi-degree of freedom systems, free and forced vibrations, Fourier series, convolution integral, mass/stiffness matrices, and normal modes with design project.

(Design units: 1)

Prerequisite: (ENGR 80 or ENGRCEE 80 or ENGRMAE 80) and MATH 2E and MATH 3D

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**ENGRMAE 150. Mechanics of Structures. 4 Units.**

Stresses and strains. Torsion. Bending. Beam deflection. Shear force and moment distributions in beams. Yielding and buckling of columns. Combined loading. Transformation of stresses and strain. Yielding criteria. Finite elements analysis of frames. Dynamic of two-bar truss.

(Design units: 2)

Prerequisite: (ENGRCEE 30 or ENGR 30 or ENGRMAE 30) and MATH 3A

Same as ENGR 150.

Overlaps with ENGRCEE 150.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**ENGRMAE 150L. Mechanics of Structures Laboratory. 1 Unit.**

Experimental techniques for the measurement of mechanical properties of materials and structures. Methods for load, displacement, and strain measurements. Tension, bending, compression tests. Determination of strength, stiffness, toughness for metals, polymers, ceramics, and composites. Deformation of structures. Materials fee.

(Design units: 0)

Corequisite: ENGRMAE 150

Prerequisite: ENGRMAE 30 or ENGR 30 or ENGRCEE 30

Overlaps with ENGRCEE 150L.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**ENGRMAE 151. Mechanical Engineering Design. 4 Units.**

A comprehensive group design project experience that involves identifying customer needs, idea generation, reverse engineering, preliminary design, standards, prototype development, testing, analysis, and redesign of a product involving fluid, thermal, and mechanical components. Introduces design for manufacturing and the environment. Materials fee.

(Design units: 3)

Corequisite: ENGRMAE 170

Prerequisite: ENGRMAE 120 and ENGRMAE 145

Restriction: Seniors only. Mechanical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**ENGRMAE 152. Introduction to Computer-Aided Engineering. 4 Units.**

Elements and principles of computer-aided engineering with modern hardware and software are presented with a design focus. Case studies are used to assist in finite-element method techniques. Not offered every year.

(Design units: 2)

Prerequisite: (ENGRMAE 150 or ENGR 150) and ENGRMAE 120

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**ENGRMAE 153. Advanced BIOMEMS Manufacturing Techniques. 4 Units.**

Introduction to BIOMEMS. Advanced biotechnology/biomedicine equipment based on MEMS and NEMS. Fundamentals of MEMS/NEMS sensing techniques and the biological and physics principles involved and the preferred MEMS and NEMS manufacturing techniques.

(Design units: 0)

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Biomedical Engineering Majors have first consideration for enrollment.

Concurrent with ENGRMAE 253.

**ENGRMAE 155. Composite Materials and Structures. 4 Units.**

Motivation for composite materials. Different classifications according to the nature of the matrix (PMC, MMC, CMC) and the reinforcement topology (fibers, whiskers, particulates). Mechanical properties. Failure mechanisms. Designing with composite materials. Advantages and limitations of homogenization techniques for numerical modeling.

(Design units: 0)

Prerequisite: ENGR 54 and (ENGRMAE 150 or ENGRCEE 150 or ENGR 150)

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering majors have second consideration for enrollment. Chemical Engineering majors have second consideration for enrollment. Civil Engineering majors have second consideration for enrollment. Materials Science and Engineering majors have second consideration for enrollment.

Concurrent with ENGRMAE 255.

**ENGRMAE 156. Mechanical Behavior and Design Principles. 4 Units.**

Principles governing structure and mechanical behavior of materials, relationship relating microstructure and mechanical response with application to elasticity, plasticity, yielding, necking, creep, and fracture of materials. Introduction to experimental techniques to characterize the properties of materials. Design parameters.

(Design units: 2)

Prerequisite: ENGR 54

Same as ENGRMSE 155.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Aerospace Engineering majors have second consideration for enrollment.

**ENGRMAE 157. Lightweight Structures. 4 Units.**

Fundamentals of torsion and bending. Analysis and design of thin-wall and composite beams. Stress analysis of aircraft components. Stiffness, strength, and buckling. Introduction to the Finite Element method and its application to plates and shells.

(Design units: 2)

Prerequisite: ENGR 150 or ENGRCEE 150 or ENGRMAE 150

Restriction: Aerospace Engineering Majors have first consideration for enrollment. Mechanical Engineering majors have second consideration for enrollment. Civil Engineering majors have second consideration for enrollment. Materials Science and Engineering majors have second consideration for enrollment.

**ENGRMAE 158. Aircraft Performance. 4 Units.**

Flight theory applied to subsonic propeller and jet aircraft. Nature of aerodynamic forces, drag and lift of wing and fuselage, high-lift devices, level-flight performance, climb and glide performance, range, endurance, take-off and landing distances, static and dynamic stability and control.

(Design units: 2)

Prerequisite: ENGRMAE 130A

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment.

**ENGRMAE 159. Aircraft Design. 4 Units.**

Preliminary design of subsonic general aviation and transport aircraft with emphasis on layout, aerodynamic design, propulsion, and performance. Estimation of total weight and weight distribution, design of wings, fuselage, and tail, selection and location of engines, prediction of overall performance.

(Design units: 4)

Prerequisite: ENGRMAE 112 and ENGRMAE 136 and ENGRMAE 158

Restriction: Aerospace Engineering Majors have first consideration for enrollment. Mechanical Engineering Majors have first consideration for enrollment.

**ENGRMAE 164. Air Pollution and Control. 4 Units.**

Sources, dispersion, and effects of air pollutants. Topics include emission factors, emission inventory, air pollution, meteorology, air chemistry, air quality modeling, impact assessment, source and ambient monitoring, regional control strategies.

(Design units: 2)

Prerequisite: (ENGRMAE 91 or CBE 40B) and ENGRMAE 130A

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRMAE 170. Introduction to Control Systems. 4 Units.**

Feedback control systems. Modeling, stability, and systems specifications. Root locus, Nyquist, and Bode methods of analysis and design.

(Design units: 2)

Prerequisite: (ENGRMAE 80 or ENGRCEE 80 or ENGR 80) and ENGRMAE 106

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**ENGRMAE 171. Digital Control Systems. 4 Units.**

Methods for analysis and design of discrete-time control systems. Z-transforms, difference equations, discrete Fourier transforms. Sampling theorem and applications. Z-plane stability, frequency response. Digital controller design. Introduction to digital filters.

(Design units: 2)

Prerequisite: ENGRMAE 170

Restriction: Civil Engineering Majors have first consideration for enrollment. Mechanical Engineering Majors have first consideration for enrollment.

**ENGRMAE 172. Design of Computer-Controlled Robots. 4 Units.**

Students design a small robotic device and program it to exhibit sentient behaviors. The basic aspects of mechatronic design are covered, including motor and sensor selection, control strategies, and microcomputer programming for the implementation of control paradigms. Materials fee.

(Design units: 3)

Corequisite: ENGRMAE 60

Prerequisite: ENGRMAE 170

Restriction: Mechanical Engineering Majors have first consideration for enrollment.

Concurrent with ENGRMAE 280.

**ENGRMAE 175. Dynamics and Control of Aerospace Vehicles. 4 Units.**

Equations of motion, linearization, stability derivatives, and longitudinal and lateral modes of motion. Handling qualities, sensors and actuators, and effects of various feedbacks on stability and performance. Stability augmentation. Autopilot design.

(Design units: 3)

Prerequisite: ENGRMAE 106

Restriction: Aerospace Engineering Majors have first consideration for enrollment. Mechanical Engineering Majors have first consideration for enrollment.

**ENGRMAE 182. Introduction to Machine Learning. 4 Units.**

Fundamental principles necessary to understand statistical learning methods. Introduction to the R programming language. Mathematical foundation for various machine learning algorithms. Computer implementation.

**ENGRMAE 183. Computer-Aided Mechanism Design. 4 Units.**

Focuses on design of planar, spherical, and spatial mechanisms using computer algebra and graphics. Topics include exact and approximate analytical design techniques. Students are required to use existing software (or develop new algorithms) to design various mechanisms for new applications.

(Design units: 4)

Prerequisite: MATH 3A or I&C SCI 6N

Restriction: Mechanical Engineering Majors have first consideration for enrollment.

**ENGRMAE 184. Fundamentals of Experimental Design. 4 Units.**

Review of statistics as applied to experimental research. Fundamentals and principles of statistical experimental design and analysis with emphasis on understanding and use of designed experiments, response surfaces, linear regression modeling, and process optimization.

(Design units: 1)

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment.

Concurrent with ENGRMAE 284.

**ENGRMAE 185. Numerical Analysis in Mechanical Engineering. 4 Units.**

Solution of mechanical-engineering equations by means of numerical methods. Errors in numerical analysis. Nonlinear equation and sets of equations. Numerical differentiation and integration. Ordinary differential equations. Boundary-value problems. Partial differential equations.

(Design units: 2)

Prerequisite: (ENGRMAE 10 or EECS 10 or EECS 12 or BME 60B) and MATH 3D and MATH 2E

Overlaps with MATH 105A.

**ENGRMAE 188. Engineering Design in Industry. 4 Units.**

Principles of engineering design in the context of an industrial application. Local manufacturing firms define an engineering design project to be completed in 10 weeks. Projects include initial brainstorming to final design, with a formal presentation.

(Design units: 4)

Repeatability: May be taken for credit 3 times.

Restriction: Mechanical Engineering Majors have first consideration for enrollment.

**ENGRMAE 189. Senior Project - Special Topics. 1-4 Units.**

Group or individual senior project of theoretical or applied nature involving design. Materials fee.

(Design units: 1-4)

Repeatability: May be taken for credit for 12 units as topics vary.

Restriction: Seniors only. Mechanical Engineering Majors only.

**ENGRMAE 193. Topics in MAE Design. 1-4 Units.**

Provides early-stage design/hands-on experience for upper-division students, and allows them to participate in senior design projects course ENGRMAE 189.

(Design units: 1)

Repeatability: May be taken for credit for 12 units as topics vary.

Restriction: Aerospace Engineering Majors have first consideration for enrollment. Mechanical Engineering Majors have first consideration for enrollment.

**ENGRMAE 195. Seminars in Engineering. 1-4 Units.**

Seminars by individual faculty in major fields of interest. Materials fee.

(Design units: 1-4)

Repeatability: Unlimited as topics vary.

**ENGRMAE 198. Group Study. 1-4 Units.**

Group study of selected topics in Aerospace and Mechanical Engineering.

(Design units: 1-4)

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**ENGRMAE 199. Individual Study. 1-4 Units.**

For undergraduate Engineering majors in supervised but independent reading, research, or design. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Repeatability: May be taken for credit for 8 units.

**ENGRMAE 199P. Individual Study. 1-4 Units.**

For undergraduate Engineering majors in supervised but independent reading, research, or design. Students taking individual study for design are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**ENGRMAE 200A. Engineering Analysis I. 4 Units.**

Linear algebra, including vector spaces, matrices, linear systems of equations, least squares, and the eigenvalue problem. Ordinary differential equations, including analytical and numerical solution methods, stability, and phase portraits.

Restriction: Graduate students only.

**ENGRMAE 200B. Engineering Analysis II. 4 Units.**

Review of ordinary differential equations, including Bessel and Legendre functions. Partial differential equations, including the diffusion equation, Laplace's equation, and the wave equation. Fourier series, Fourier and Laplace transforms and their applications.

Restriction: Graduate students only.

**ENGRMAE 205. Perturbation Methods in Engineering. 4 Units.**

Asymptotic Expansions of integrals. Regular and singular perturbations. Perturbation methods for ordinary and partial differential equations. Matched asymptotic expansions. Multiple-scale asymptotic expansion schemes. Not offered every year.

Prerequisite: ENGRMAE 200A and ENGRMAE 200B. Knowledge of linear differential equations.

Restriction: Graduate students only.

**ENGRMAE 206. Nonlinear Optimization Methods. 4 Units.**

Numerical methods for constrained and unconstrained optimization. Necessary and sufficient conditions for optimality. Conjugate gradient, variable metric algorithms. Gradient projection, penalty functions, and Lagrange methods. Not offered every year.

Prerequisite: ENGRMAE 200A

Restriction: Graduate students only.

**ENGRMAE 207. Methods of Computer Modeling in Engineering and the Sciences. 4 Units.**

Unified introduction to finite volume, finite element, field-boundary element, meshless, primal, dual, and mixed methods. Nonlinear problems posed by ordinary as well as partial differential equations. Computer implementations and comparisons of accuracy and convergence.

Restriction: Graduate students only.

**ENGRMAE 209P. Energy Efficiency Technology. 4 Units.**

Principles, design, operation of energy efficient technology in the built environment, including solar energy, green building design, low waste/emissions construction materials, energy harvesting, built environment energy conversion and storage, high efficiency lighting, daylighting, heat pumps, cooling systems, renewable power systems.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 210. Advanced Fundamentals of Combustion. 4 Units.**

Premixed, nonpremixed, and heterogeneous reactions, with emphasis on kinetics, thermal ignition, turbulent flame propagation, detonations, explosions, flammability limits, diffusion flame, quenching, flame stabilization, and particle and spray combustion. Not offered every year.

Prerequisite: ENGRMAE 224 or ENGRMAE 230B

Restriction: Graduate students only.

**ENGRMAE 211P. Energy Storage Systems and Technology. 4 Units.**

Basic principles, design, and operation of energy storage systems and technology including lithium ion battery systems for transportation and stationary applications, for flow batteries (e.g., vanadium redox, sodium sulfur), and for reversible fuel cell electrolyzer systems and hydrogen energy storage.

Prerequisite: Required: Undergraduate-level knowledge of applied engineering thermodynamics.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 212. Engineering Electrochemistry: Fundamentals and Applications. 4 Units.**

Introduction to engineering electrochemistry fundamentals and applications. Examine thermodynamics and transport principles in typical electrochemical systems. Electrochemical sensors, batteries, fuel cells, and supercapacitors. Manufacturing aspects will also be covered.

Restriction: Graduate students only.

**ENGRMAE 212P. Engineering Electrochemistry: Fundamentals and Applications. 4 Units.**

Introduction to engineering electrochemistry fundamentals and applications. Examine thermodynamics and transport principles in typical electrochemical systems. Electrochemical sensors, batteries, fuel cells, and supercapacitors. Manufacturing aspects are also covered.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 213. Electric Propulsion. 4 Units.**

Space propulsion requirements and maneuvers, stressing those best suited to electric propulsion. An introduction to plasma physics. Electrothermal, electromagnetic and electrostatic accelerators, with emphasis in technologies (ion engines, Hall thrusters and colloidal thrusters) belonging to the latter family.

Restriction: Graduate students only.

Concurrent with ENGRMAE 113.

**ENGRMAE 214A. Fuel Cell Fundamentals and Technology. 4 Units.**

Introduction to electrochemistry and electrocatalysis; nature of fuel-cell electrodes and electrolytes; charge transfer reactions at interfaces; charge transport and mass transport processes; fuel processing reactions; determination of fuel cell efficiency, fuel flexibility, emissions and other characteristics.

Restriction: Graduate students only.

Concurrent with ENGRMAE 114.

**ENGRMAE 214AP. Fuel Cell Fundamentals and Technology. 4 Units.**

Introduction to electrochemistry and electrocatalysis; nature of fuel-cell electrodes and electrolytes; charge transfer reactions at interfaces; charge transport and mass transport processes; fuel processing reactions; determination of fuel cell efficiency, fuel flexibility, emissions, and other characteristics.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 214B. Fuel Cell Systems and Degradation. 4 Units.**

Fuel cell systems design; impacts of operating conditions; experimental and theoretical analysis methods for fuel cells systems; introduction to degradation mechanisms and mitigation techniques; provides broad insight into fuel-cell science, technology, system design and operation. Offered every other year.

Prerequisite: ENGRMAE 214A

Restriction: Graduate students only.

**ENGRMAE 214C. PEM Fuel Cells . 4 Units.**

An in-depth introduction to the fundamentals of PEM fuel cells, including thermodynamics, kinetics, and transport in electrochemical systems. Topics of specific interest to mechanical engineers will include water/heat management and dynamic responses.

Prerequisite: ENGRMAE 214A

Restriction: Graduate students only.

**ENGRMAE 215. Advanced Combustion Technology. 4 Units.**

Pollutant formation and experimental methods. Formation of gaseous pollutants and soot; transformation and emission of fuel contaminants in gas, liquid, and solid fuel combustion; methods employed to measure velocity, turbulence intensity, temperature, composition, particle size; methods to visualize reacting flows.

Prerequisite: ENGRMAE 200A and (ENGRMAE 230A or ENGRMAE 270A)

Restriction: Graduate students only.

**ENGRMAE 216. Statistical Thermodynamics. 4 Units.**

Statistics of independent particles, development of quantum mechanical description of atoms and molecules, application of quantum mechanics, evaluation of thermodynamics properties for solids, liquids, and gases, statistical mechanics of dependent particles (ensembles).

Restriction: Graduate students only.

**ENGRMAE 217. Generalized Thermodynamics. 4 Units.**

Generalized thermodynamics develops the laws of continuum thermodynamics from a set of plausible and intuitive postulates. The postulates are motivated qualitatively by a statistical description of matter and are justified by a posterior success for the resulting theory.

Restriction: Graduate students only.

**ENGRMAE 217P. Generalized Thermodynamics. 4 Units.**

Generalized thermodynamics develops the laws of continuum thermodynamics from a set of plausible and intuitive postulates. The postulates are motivated qualitatively by a statistical description of matter and are justified by a posterior success for the resulting theory.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 218. Sustainable Energy Systems. 4 Units.**

Basic principles, design and operation of sustainable energy systems including wind, solar photo-voltaic and thermal, hydroelectric, geothermal, oceanic, biomass combustion, advanced coal and next generation nuclear. Includes power generation, storage, and transmission for stationary power generation.

Restriction: Graduate students only.

Concurrent with ENGRMAE 118.

**ENGRMAE 218P. Sustainable Energy Systems. 4 Units.**

Basic principles, design, and operation of sustainable energy systems including wind, solar photo-voltaic and thermal, hydroelectric, geothermal, oceanic, biomass combustion, advanced coal, and next generation nuclear. Includes power generation, storage, and transmission for stationary power generation.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 219P. Solar and Renewable Energy Systems. 4 Units.**

Basic principles, design, and operation of solar and other renewable energy systems including solar photo-voltaic, solar thermal, wind, and PEM fuel cell. Includes power generation and storage, and renewable fuels for transportation and stationary power generation.

Prerequisite: Required: Knowledge of applied engineering thermodynamics.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 220. Conduction Heat Transfer. 4 Units.**

Steady state and transient conduction heat transfer in one- and multi-dimensional geometries. Analytical methods, exact and approximate. Numerical techniques are also included.

Restriction: Graduate students only.

**ENGRMAE 221. Convective Heat and Mass Transfer. 4 Units.**

Laminar and turbulent convective heat and mass transfer in external and internal flows. Forced and free convection. Exact and approximate solutions. Similarity solutions. Variable properties. Concentration boundary layer theory. Mass transfer conductance.

Prerequisite: ENGRMAE 230B

Restriction: Graduate students only.

**ENGRMAE 222. Radiative Heat Transfer. 4 Units.**

Black body radiation. Radiative transport equations for surfaces separated by non-participating media. Radiant energy transfer through absorbing, emitting, and scattering media. Radiation-conduction interaction. Radiation-convection interaction. Introduction to finite-difference solutions.

Restriction: Graduate students only.

**ENGRMAE 223A. Numerical Methods in Heat, Mass, and Momentum Transport (Laminar Flows) I. 4 Units.**

Introduction to the discretization of various types of partial differential equations (parabolic, elliptic, hyperbolic). Finite-volume discretization for one- and two-dimensional flows. Use of a two-dimensional elliptic procedure to predict sample laminar flows.

Prerequisite or corequisite: ENGRMAE 230A

Restriction: Graduate students only.

**ENGRMAE 223B. Numerical Methods in Heat, Mass, and Momentum II. 4 Units.**

Introduction to turbulence. Reynolds-averaging of Navier-Stokes equations. Second-order closure of the average equations. Use of two-dimensional elliptic procedure to predict confined turbulent flows. Not offered every year.

Prerequisite: ENGRMAE 223A

Restriction: Graduate students only.

**ENGRMAE 224. Advanced Transport Phenomena. 4 Units.**

Fundamentals of transport phenomena in fluid (gas and liquid), solid, and nano systems. Conservation equations, fundamentals of diffusion, ion transport, dispersion in turbulent/laminar flows, absorption, differential/staged distillation, transport in membranes, and nano/microscale transport phenomena. Not offered every year.

Restriction: Graduate students only.

**ENGRMAE 226. Special Topics in Fluid and Thermal Sciences. 1-4 Units.**

Special topics of current interest in fluid mechanics, heat and mass transfer, multiphase flows, or combustion. Emphasis could be placed on theory, computational methods, or experimental techniques.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ENGRMAE 227. Thermal Resistance Analysis in Microdevices and Nanomaterials. 4 Units.**

Heat transfer and thermal resistance analysis relevant for microdevices and nanomaterials. Overview of recent progress in nanotechnology and materials science. Thermal modeling strategies for novel electronic devices and energy conversion systems.

Restriction: Graduate students only.

**ENGRMAE 228. Nanoscale Phase Change Transport Physics. 4 Units.**

Discusses a wide range of phase change processes (i.e., evaporation, boiling, condensation, and freezing) through the use of novel thermal metamaterials with the aim of enhancing phase change performances.

Prerequisite: Undergraduate-level heat transfer is recommended.

Restriction: Graduate students only.

**ENGRMAE 229P. Nanoscale Materials for Modern Electronics. 4 Units.**

Introduction to design and synthesis of nanomaterials. Topics include thermal and liquid transport in materials systems, phase change heat transfer physics, and mechanical properties in materials systems.

Prerequisite: Required: Undergraduate-level knowledge of heat transfer.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 230A. Inviscid Incompressible Fluid Mechanics I. 4 Units.**

Equations of motion. Vector notation. Flow kinematics. Potential flow and complex potential. Vorticity and circulation. Bernoulli's theorem. Crocco's theorem. Conformal, Joukowski, and Schwarz-Christoffel transformations.

Restriction: Graduate students only.

**ENGRMAE 230B. Viscous Incompressible Fluid Mechanics II. 4 Units.**

Review of mass, momentum, energy equations. Stress tensor, constitutive relations. Laminar flows. Stokes and Oseen flows. Self-similarity. Boundary layer theory: thin-layer approximation, Falkner-Skan, Blasius solutions, integral methods. Jet, wake, cavity flows. Introduction to turbulence: instability, Reynolds averaging, mixing length.

Restriction: Graduate students only.

**ENGRMAE 230C. Compressible Fluid Dynamics. 4 Units.**

One-dimensional unsteady flow; Riemann invariants, acoustics, shock tube. Two-dimensional flow: shock polars, linear theory, similarity rules, method of characteristics. Three dimensional flow: slender-body theory. Effects of viscosity and conductivity: laminar boundary layer, Crocco-Busemann relations.

Prerequisite: ENGRMAE 230A or ENGRMAE 230B

Restriction: Graduate students only.

**ENGRMAE 230D. Theoretical Foundations of Fluid Mechanics. 4 Units.**

Well-posed problems and boundary, initial, and interface conditions; strong and weak solutions. Similarity, perturbation theory and limit behavior, bifurcations. Dispersive and nondispersive wave propagation, acoustics, ship waves, internal gravity waves, water waves. Vortices: mutual interactions and stability. Jets, wakes, cavities.

Prerequisite: ENGRMAE 230A and ENGRMAE 230B

Restriction: Graduate students only.

**ENGRMAE 231. Fundamentals of Turbulence. 4 Units.**

Phenomenon of turbulence. Reynolds equations. Dynamics of turbulence. Free turbulent shear flows. Wall-bounded turbulent shear flows. Turbulent transport of scalar quantities. Spectral dynamics. Mathematical models of turbulence.

Prerequisite: ENGRMAE 230A and ENGRMAE 230B

Restriction: Graduate students only.

**ENGRMAE 233. Turbulent Free Shear Flows. 4 Units.**

Practical and theoretical aspects of turbulent free shear flows. Instability, global scaling laws, mixing, and noise generation in incompressible and compressible shear layers, jets, and wakes. Kelvin-Helmholtz instability, near- and far-field growth rates, effect of compressibility, aeroacoustics of jets.

Prerequisite: ENGRMAE 200B and ENGRMAE 230A and ENGRMAE 230B

Restriction: Graduate students only.

**ENGRMAE 236. Nonequilibrium Gas Dynamics. 4 Units.**

Molecular description of fluid flow. Boltzmann equation. Chapman-Enskog expansion for flows with translational nonequilibrium. Shock structure. Inviscid flows with chemical and vibrational nonequilibrium. Not offered every year.

Prerequisite: ENGRMAE 230C

Restriction: Graduate students only.

**ENGRMAE 237. Computational Fluid Dynamics. 4 Units.**

Mathematical, physical, and computational fundamentals of computational fluid dynamics, numerical methods for solving the Euler and Navier-Stokes equations. Topics include: finite-difference and finite-volume discretization, time marching methods, von Neumann analysis, upwinding, flux splitting, TVD, and other high-resolution shock-capturing schemes.

Prerequisite: ENGRMAE 230C

Restriction: Graduate students only.

**ENGRMAE 238. Experimental Fluid Dynamics. 4 Units.**

Concepts and techniques for measurement of fluid motion. Quantitative and qualitative flow visualization. Flow facilities, shadowgraph, schlieren, interferometer, thermal anemometer. Laser diagnostics, fluorescence, Rayleigh, Raman, Mie scattering. Laser-Doppler, particle-image, and image-correlation velocimetry. Three- and four-dimensional digital imaging.

Prerequisite: ENGRMAE 230A and ENGRMAE 230B

Restriction: Graduate students only.

**ENGRMAE 239. Dynamics of Unsteady Flows. 4 Units.**

Unsteady potential flow modeling (Kelvin's circulation theorem, unsteady Bernoulli's equation). Theodorsen's frequency response, Wagner's step response, and the Kussner sharp-edged gust. State Space approximations for Unsteady Loads. Vortex Lattice. Flutter.

Prerequisite: ENGRMAE 230A is recommended.

Restriction: Graduate students only.

**ENGRMAE 241. Dynamics. 4 Units.**

Kinematics and dynamics of three-dimensional motions. Lagrange's equations, Newton-Euler equations. Applications include robot systems and spinning satellites.

Restriction: Graduate students only.

**ENGRMAE 242. Robotics. 4 Units.**

Spatial rigid-body transformations. Forward and inverse kinematics. Jacobian of serial and parallel chains. Screw coordinates and transformations. Rate and static analyses using screw theory. Singularity analysis. Trajectory generation. Not offered every year.

Restriction: Graduate students only.

**ENGRMAE 244. Theoretical Kinematics. 4 Units.**

Spatial rigid body kinematics is presented with applications to robotics. Orthogonal Matrices, Rodrigues' formula, Quaternions, Plucker coordinates, screw theory, and dual numbers are studied using modern projective geometry and multi-linear algebra. Applications include trajectory planning, inverse kinematics, and workspace analysis.

Restriction: Graduate students only.

**ENGRMAE 245. Spatial Mechanism Design. 4 Units.**

Fundamental kinematic theory required for planar, spherical, and spatial mechanism design. The focus is on algebraic methods for the exact solution of constraint equations. Not offered every year.

Restriction: Graduate students only.

**ENGRMAE 247. Micro-System Design. 4 Units.**

Covers the fundamentals of the many disciplines needed for design of Micro-Electro-Mechanical Systems (MEMS): microfabrication technology, structural mechanics on micro-scale, electrostatics, circuit interface, control, computer-aided design, and system integration.

Same as EECS 278.

Restriction: Graduate students only.

**ENGRMAE 247P. Micro-System Design. 4 Units.**

Covers the fundamentals of the many disciplines needed for design of Micro-Electro-Mechanical Systems (MEMS): microfabrication technology, structural mechanics on micro-scale, electrostatics, circuit interface, control, computer-aided design, and system integration.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 249. Micro-Sensors and Actuators. 4 Units.**

Introduction to the technology of Micro-Electro-Mechanical Systems (MEMS). Fundamental principles and applications of important microsensors, actuation principles on microscale. Introduction to the elements of signal processing; processing of materials for micro sensor/actuator fabrication; smart sensors and microsensor/microactuator array devices.

Same as EECS 279.

Restriction: Graduate students only.

**ENGRMAE 250. Biorobotics. 4 Units.**

Sensors, actuators, and neural circuits for biological movement control from an engineering perspective. Current approaches to robotic and mechatronic devices that support and enhance human movement in health and following neurologic injuries like stroke and spinal cord injury.

Restriction: Graduate students only.

**ENGRMAE 252. Fundamentals of Microfabrication. 4 Units.**

Introduces Engineering and Science students to the science of miniaturization. Different options to make very small machines (micro and nano size) are reviewed, materials choices are discussed, scaling laws are analyzed, and many practical applications are listed.

Restriction: Graduate students only.

**ENGRMAE 252P. Fundamentals of Microfabrication. 4 Units.**

Introduces engineering and science students to the science of miniaturization. Different options to make very small machines (micro and nano size) are reviewed, materials choices are discussed, scaling laws are analyzed, and many practical applications are listed.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 253. Advanced BIOMEMS Manufacturing Techniques. 4 Units.**

Introduction to BIOMEMS. Advanced biotechnology/biomedicine equipment based on MEMS and NEMS. Fundamentals of MEMS/NEMS sensing techniques and the biological and physics principles involved and the preferred MEMS and NEMS manufacturing techniques.

Restriction: Graduate students only.

Concurrent with ENGRMAE 153.

**ENGRMAE 254. Mechanics of Solids and Structures. 4 Units.**

Finite deformation kinematics; stress and strain measures; invariance in solid mechanics; objective rates; constitutive theory of elastic and inelastic solids; rate formulations; computational approaches; theories of plates and shells; applications to aerospace vehicles.

Restriction: Graduate students only.

**ENGRMAE 254P. Mechanics of Solids and Structures. 4 Units.**

Finite deformation kinematics; stress and strain measures; invariance in solid mechanics; objective rates; constitutive theory of elastic and inelastic solids; rate formulations; computational approaches; theories of plates and shells; applications to aerospace vehicles.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 255. Composite Materials and Structures. 4 Units.**

Motivation for composite materials. Different classifications according to the nature of the matrix (PMC, MMC, CMC) and the reinforcement topology (fibers, whiskers, particulates). Mechanical properties. Failure mechanisms. Designing with composite materials. Advantages and limitations of homogenization techniques for numerical modeling.

Restriction: Graduate students only.

Concurrent with ENGRMAE 155.

**ENGRMAE 256. Nanomechanics. 4 Units.**

Nanoscale materials and the experimental and computational techniques used to measure their properties. Mechanical behavior is the main focus, but other material properties such as diffusion and electron transport are discussed.

Restriction: Graduate students only.

**ENGRMAE 257P. Fabrication and Characterization of Nanomaterials . 4 Units.**

Introduction to nanoscale materials and experimental and computational techniques. Topics materials synthesis techniques, thin film deposition, nanoparticle and nanowire growth, characterization with electrons and X-rays, forces and surface interactions at the nanoscale, structure-property scaling laws, and atomistic/multiscale computer modeling.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 258. Mechanical Behavior of Solids - Continuum Theories. 4 Units.**

Presents a continuum, macroscopic view of deformation and failure of solids. Covers elasticity, plasticity, visco-elasticity, visco-plasticity, fracture and fatigue. Topics include discussions of physical behavior, mathematical formalism and measurement techniques.

Prerequisite: ENGRMAE 254

Restriction: Graduate students only.

**ENGRMAE 259. Mechanical Behavior of Solids - Atomistic Theories. 4 Units.**

Presents atomistic mechanisms that control mechanical behavior of materials. Covers plasticity, dislocation theory, strengthening mechanisms, high-temperature diffusion and grain boundary sliding, shear localization, void formation, ductile rupture, brittle fracture and fatigue.

Restriction: Graduate students only.

**ENGRMAE 259P. Mechanical Behavior of Solids - Atomistic Theories. 4 Units.**

Presents atomistic mechanisms that control mechanical behavior of materials. Covers plasticity, dislocation theory, strengthening mechanisms, high-temperature diffusion and grain boundary sliding, shear localization, void formation, ductile rupture, brittle fracture, and fatigue.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 260. Current Issues Related to Air Quality, Climate, and Energy. 4 Units.**

Current issues related to the atmosphere, climate, and air quality in the context of energy conversion and sustainability. Topics include transportation systems; building design; impacts on humans and ecosystems; modeling and meteorology; economics; and application to public policies.

Prerequisite: ENGRMAE 261 or CHEM 245 or EARTHSS 240

Same as CHEM 241.

Restriction: Graduate students only.

**ENGRMAE 270A. Linear Systems I. 4 Units.**

Input-output and state-space representations of continuous-time linear systems. State transition matrices, Controllability and observability. Irreducible realizations. State feedback and observer design.

Restriction: Graduate students only.

**ENGRMAE 270B. Linear Systems II. 4 Units.**

Advanced topics in linear systems: bases, linear operator representations, and Jordan forms. Review of dynamical systems, and stability. Time-varying systems, discrete-time representations, and multi-input/multi-output systems. Introduction to continuous and discrete time linear regulator (LQR) problems. Not offered every year.

Prerequisite: ENGRMAE 270A

Restriction: Graduate students only.

**ENGRMAE 272. Robust Control Theory. 4 Units.**

Methods for control design of systems with uncertainty. Feedback stability and small gain theorem. Multivariable stability margins and multiplier theory. H-infinity-optimal control, linear matrix inequalities. Not offered every year.

Prerequisite: ENGRMAE 270A

Restriction: Graduate students only.

**ENGRMAE 274. Optimal Control. 4 Units.**

Principles and methods of optimal control. Topics include objectives and issues in controlling nonlinear systems; linear variational and adjoint equations; optimality conditions via variational calculus, maximum principle, and dynamic programming; solution methods; applications to control robots and aerospace vehicles.

Prerequisite: ENGRMAE 200A and ENGRMAE 270A

Restriction: Graduate students only.

**ENGRMAE 275. Nonlinear Feedback Systems. 4 Units.**

Advanced tools for feedback control system analysis and synthesis. Norms, operators,  $L_p$  spaces, contraction mapping theorem, Lyapunov techniques along with their extensions. Circle criterion positivity and passivity. Applications to nonlinear control methods, such as sliding mode or adaptive techniques.

Prerequisite: ENGRMAE 270B

Restriction: Graduate students only.

**ENGRMAE 276. Geometric Nonlinear Control. 4 Units.**

Using the mathematics of differential geometry, a number of the concepts and results of linear systems theory have been extended to nonlinear systems. Describes these extensions and illustrate their use in nonlinear system analysis and design. Not offered every year.

Prerequisite: ENGRMAE 200A and ENGRMAE 270A

Restriction: Graduate students only.

**ENGRMAE 277. Learning Control Systems. 4 Units.**

Supervised learning for classification and regression: perceptrons, support vector machines, feed-forward neural networks, Gaussian processes. Generalization and model selection: cross-validation, regularization, and Bayesian methods. Unsupervised learning: clustering and dimensionality reduction. Learning control systems. Introduction to reinforcement learning.

Restriction: Graduate students only.

**ENGRMAE 278. Parameter and State Estimation. 4 Units.**

Bayesian and frequentist approaches to parameter and state estimation. Properties of estimators. Linear Gaussian systems and the Kalman Filter. Nonlinear state estimation, extended and unscented Kalman Filters. Introduction to Monte Carlo methods and particle filtering. Application to tracking and navigation.

Prerequisite: ENGRMAE 200A and ENGRMAE 270A

Restriction: Graduate students only.

**ENGRMAE 279. Special Topics in Mechanical Systems. 4 Units.**

Selected topics of current interest in mechanical systems. Topics include robotics, kinematics, control, dynamics, and geometric modeling.

Prerequisite: ENGRMAE 270A and ENGRMAE 241

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ENGRMAE 280. Design of Computer-Controlled Robots. 4 Units.**

The basic aspects of mechatronic design are covered, including motor and sensor selection, control strategies, finite state machines, inertial measurement units, and implementation of advanced feedback control laws. Students work in groups to create their own mechatronic device. Materials fee.

Restriction: Graduate students only.

Concurrent with ENGRMAE 172.

**ENGRMAE 284. Fundamentals of Experimental Design. 4 Units.**

Fundamentals and principles of statistical experimental design and analysis. Emphasis addresses understanding and use of designed experiments, response surfaces, linear regression modeling, process optimization, and development of links between empirical and theoretical models.

Restriction: Graduate students only.

Concurrent with ENGRMAE 184.

**ENGRMAE 294. Master of Science Thesis Project. 4 Units.**

Tutorial in which masters-level students taking the comprehensive examination option undertake a masters-level research project.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ENGRMAE 295. Special Topics in Mechanical and Aerospace Engineering. 1-4 Units.**

Special topics by individual faculty in major fields of interest.

Repeatability: Unlimited as topics vary.

**ENGRMAE 295P. Special Topics in Mechanical and Aerospace Engineering. 4 Units.**

Studies in selected areas of Mechanical and Aerospace Engineering. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 296. Master of Science Thesis Research. 1-16 Units.**

Individual research or investigation conducted in the pursuit of preparing and completing the thesis required for the M.S. in Engineering.

Repeatability: May be repeated for credit unlimited times.

**ENGRMAE 297. Doctor of Philosophy Dissertation Research. 1-16 Units.**

Individual research or investigation conducted in the pursuit of preparing and completing the dissertation required for the Ph.D. in Engineering.

Repeatability: May be repeated for credit unlimited times.

**ENGRMAE 298. Seminars in Mechanical and Aerospace Engineering. 1 Unit.**

Presentation of advanced topics and reports of current research efforts in mechanical engineering. Required of all graduate students in mechanical engineering.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**ENGRMAE 299. Individual Research. 1-16 Units.**

Individual research or investigation under the direction of an individual faculty member.

Repeatability: May be repeated for credit unlimited times.

Restriction: Consent of instructor to enroll

## Medical Education (MED ED)

## Medical Humanities (MED HUM)

### Courses

**MED HUM 1. Health, Wellness, and Conception of the Body. 4 Units.**

Asks what is health and who gets to have it? What is considered a “healthy” or “sick” body? We analyze historical and contemporary experiences of illness, medicine, and caregiving, including how patients represent their bodies and healing.

(GE III or IV ).

**MED HUM 3. Art and Medicine . 4 Units.**

Analyzes the relationship between medicine and the visual arts from the late medieval to modern periods, covering topics such as anatomy, optical medical technologies, gender and race in medicine, and popular representations of disease and doctors.

(GE II or IV ).

**MED HUM 195. Capstone Seminar: The Clinical Moral Laboratory. 4 Units.**

Interdisciplinary exploration of the clinical encounter, and the importance of meaning making in these “moral laboratories.” Students enter the clinical space as participant observers, and reflect on how the clinical site informs and challenges reading practices.

Prerequisite: MED HUM 1 or MED HUM 3 or GEN&SEX 60A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only.

**MED HUM 200. Critical Perspectives in Medical Humanities. 4 Units.**

Analyzes social and cultural understandings of the body, health, illness, medicine, and disease. Themes include critical histories of the body; non-compliant subjects interacting with medicine; racial-sexual hierarchies of health; and theories and expressions of pain and suffering.

Restriction: Graduate students only.

## Medical Pharmacology (PHARM)

### Courses

**PHARM 241. Advanced Topics in Pharmacology. 2 Units.**

Application of pharmacological principles in disease therapy. Advanced pharmacological mechanisms and in-depth study of drug action. Discussion of several major drug classes/therapeutic strategies: molecular mechanisms of action, physiological consequences of administration, and clinical use.

**PHARM 251. Experimental Pharmacology. 4 Units.**

Introduction to the concepts and techniques used in pharmacological science. Molecular biology, quantitative and biochemical pharmacology, fluorescent probes, behavior, genetics, animal handling, anatomical and receptor binding analysis, methods for ion channel study, the absorption, distribution, metabolism and elimination of drugs.

**PHARM 254. Introduction to Pharmacology. 4 Units.**

Ligand-gated ion channels, G protein-coupled receptors, receptor tyrosine kinases, ligand-regulated transcription factors, their signaling mechanisms, trafficking, macromolecular complexes, and physiological responses.

**PHARM 255. Neuropharmacology. 2 Units.**

Mechanisms underlying chemical signaling processes in the brain and periphery. Molecular biology, signal transduction, transmitter synthesis, and inactivation of major neurotransmitter systems. Drugs that act on these major neurotransmitters.

Restriction: Graduate students only.

**PHARM 256. Experimental Design for Pharmacologists. 1 Unit.**

Population and sample statistics, hypothesis testing, analysis of variance, nonparametric statistics, experimental design, power, and the use of statistical computer software.

Prerequisite: PHARM 251

**PHARM 257. Ethics in Research. 1 Unit.**

Ethical conduct in research including data handling, authorship, conflict of interest, animal rights, handling of misconduct.

Prerequisite: PHARM 299

Repeatability: May be taken for credit 2 times.

**PHARM 270. Applied Pharmacology . 3 Units.**

One week (five days, 40 hours) in-residence course offered on the UCI campus. Introduction to pharmacological techniques and current research problems; includes laboratory demonstrations and research seminars.

Restriction: Pharmacology Majors only.

**PHARM 271. Principles of Pharmacology . 3 Units.**

Principles of pharmacology: pharmacodynamics, pharmacokinetics, pharmacogenetics, drug interactions, and toxicity.

Restriction: Pharmacology Majors only.

**PHARM 272. Receptors and Drug Targets . 3 Units.**

Molecular basis of drug-receptor interaction. Receptor properties including gene and protein structure, signaling mechanisms, trafficking and physiological effects: G-protein linked receptors, ligand-gated ion channels, receptor tyrosine kinases, nuclear receptors, and ligand regulated transcription factors.

Restriction: Pharmacology Majors only.

**PHARM 274. Research Techniques in Pharmacology. 3 Units.**

Experimental techniques and model systems used in pharmacological research. Receptor analysis, bioassay, molecular biology, in vitro pharmacology, biochemical pharmacology, imaging, electrophysiology, in vivo pharmacology, disease models.

Restriction: Pharmacology Majors only.

**PHARM 276. Experimental Design and Data Analysis . 3 Units.**

Experimental design, data analysis and interpretation. Population and sample statistics, hypothesis testing, analysis of variance, nonparametric statistics, and power calculations.

Restriction: Pharmacology Majors only.

**PHARM 277. Ethics in Scientific Research. 3 Units.**

Ethical conduct in research including data handling, authorship, conflict of interest, animal rights, and handling of misconduct.

Restriction: Pharmacology Majors only.

**PHARM 278. Concepts in Drug Discovery. 3 Units.**

Critical steps involved in discovery and optimization of a new drug. Target selection, relationship of molecular structure to pharmacological activities, screening methods, strategies to identify lead compounds, and preclinical characterization necessary for development of the drug for clinical trials.

Restriction: Pharmacology Majors only.

**PHARM 279. Special Topics in Pharmacology. 3 Units.**

Topics of current interest in pharmacology; discussion of recent research publications.

Restriction: Pharmacology Majors only.

**PHARM 280. Master's Project in Pharmacology. 3 Units.**

Capstone research paper on topic of interest in pharmacology.

Restriction: Pharmacology Majors only.

**PHARM 281. Neuropharmacology . 3 Units.**

Autonomic and central nervous system pharmacology, including major drug classes and therapeutic uses. Mechanisms underlying chemical signaling processes in the brain and peripheral nervous system, including neurotransmitter synthesis, inactivation, and receptor action.

Restriction: Pharmacology Majors only.

**PHARM 282. Behavioral Pharmacology. 3 Units.**

Pharmacology of integrative function and behavior. Drug treatment of pain. Mechanisms of reward, addiction, and drugs of abuse.

Restriction: Pharmacology Majors only.

**PHARM 283. Cardiovascular Pharmacology. 3 Units.**

Basic understanding of drugs used in the prevention and treatment of cardiovascular disease. Mechanisms of action, clinical and adverse effects.

Restriction: Pharmacology Majors only.

**PHARM 284. Endocrine, Respiratory, and Gastrointestinal Pharmacology . 3 Units.**

Basic understanding of drugs used in endocrine, respiratory, and gastrointestinal conditions, including hormone replacement, contraceptives, and drugs for diabetes, asthma, obesity, ulcer, and gastric reflux. Mechanisms of drug action, clinical and adverse effects.

Restriction: Pharmacology Majors only.

**PHARM 298. Seminar. 2 Units.**

Presentation and discussion of current problems and methods in teaching and research in pharmacology, toxicology, and therapeutics.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHARM 299. Research. 1-12 Units.**

Independent research with Pharmacology and Toxicology faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Medicine (MED)

## Microbiology (MIC BIO)

## Microbiology and Molecular Genetics (M&MG)

### Courses

**M&MG 200A. Research in Microbiology and Molecular Genetics. 2-12 Units.**

Individual research supervised by a particular professor.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**M&MG 200B. Research in Microbiology and Molecular Genetics. 2-12 Units.**

Individual research supervised by a particular professor.

Prerequisite: M&MG 200A

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**M&MG 200C. Research in Microbiology and Molecular Genetics. 2-12 Units.**

Individual research supervised by a particular professor.

Prerequisite: M&MG 200B

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**M&MG 200R. Research in Microbiology and Molecular Genetics for First-Year Students. 2-12 Units.**

Independent research within the laboratories of graduate training faculty in the Department of Microbiology and Molecular Genetics for first-year Ph.D. students.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

**M&MG 201A. Research topics in Microbiology and Molecular Genetics. 1 Unit.**

Seminars presented by graduate students and faculty of the Department which explore research topics in specialized areas of microbiology and molecular genetics. Opportunity for students to gain experience in the organization, critical evaluation, and oral presentation of current research developments.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**M&MG 201B. Research topics in Microbiology and Molecular Genetics. 1 Unit.**

Seminars presented by graduate students and faculty of the Department which explore research topics in specialized areas of microbiology and molecular genetics. Opportunity for students to gain experience in the organization, critical evaluation, and oral presentation of current research developments.

Prerequisite: M&MG 201A

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**M&MG 201C. Research topics in Microbiology and Molecular Genetics. 1 Unit.**

Seminars presented by graduate students and faculty of the Department which explore research topics in specialized areas of microbiology and molecular genetics. Opportunity for students to gain experience in the organization, critical evaluation, and oral presentation of current research developments.

Prerequisite: M&MG 201B

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**M&MG 203A. Advanced Studies in Microbiology and Molecular Genetics. 1 Unit.**

Organized within each laboratory group, one to four hours. Advanced study in areas related to faculty research interests. Involves small group study based on readings, discussions, and guest speakers. May be conducted as journal clubs.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**M&MG 203B. Advanced Studies in Microbiology and Molecular Genetics. 1 Unit.**

Organized within each laboratory group, one to four hours. Advanced study in areas related to faculty research interests. Involves small group study based on readings, discussions, and guest speakers. May be conducted as journal clubs.

Prerequisite: M&MG 203B

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**M&MG 203C. Advanced Studies in Microbiology and Molecular Genetics. 1 Unit.**

Organized within each laboratory group, one to four hours. Advanced study in areas related to faculty research interests. Involves small group study based on readings, discussions, and guest speakers. May be conducted as journal clubs.

Prerequisite: M&MG 203B

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**M&MG 205A. Basic Immunology Core Lectures. 1 Unit.**

Basic concepts in human immunology including development of the immune system, innate immunity, immunoglobulin structure and genetics, antigen-antibody reactions, the major histocompatibility complex and antigen presentation, T cell and B cell development, initiation of the immune response, effector mechanisms.

Grading Option: Satisfactory/unsatisfactory only.

**M&MG 205B. Basic Immunology Core Lectures. 1 Unit.**

Basic concepts in human immunology including development of the immune system, innate immunity, immunoglobulin structure and genetics, antigen-antibody reactions, the major histocompatibility complex and antigen presentation, T cell and B cell development, initiation of the immune response, effector mechanisms.

Prerequisite: M&MG 205A

Grading Option: Satisfactory/unsatisfactory only.

**M&MG 205C. Basic Immunology Core Lectures. 1 Unit.**

Basic concepts in human immunology including development of the immune system, innate immunity, immunoglobulin structure and genetics, antigen-antibody reactions, the major histocompatibility complex and antigen presentation, T cell and B cell development, initiation of the immune response, effector mechanisms.

Prerequisite: M&MG 205C

Grading Option: Satisfactory/unsatisfactory only.

**M&MG 206. Regulation of Gene Expression. 4 Units.**

Aspects of gene expression including the organization of the eukaryotic nucleus in terms of protein-nucleic acid interaction (i.e., chromatin and chromosome structure); the enzymology and regulation of RNA transcription and pre-mRNA processing in eukaryotes; mechanisms of RNAi and translation.

**M&MG 210A. Medical Microbiology. 4-6 Units.**

Biology of microbial pathogens (viruses, bacteria, fungi, parasites) as foundation for subsequent study of infectious diseases. Topics: molecular basis of microbial pathogenesis; clinical presentation and epidemiology; diagnostic testing; antimicrobial therapy; prevention strategies. Format: lectures, laboratory, clinical cases, liveclasstech interactive questions.

**M&MG 210B. Medical Immunology. 6 Units.**

Cellular and molecular basis of immune response and roles of the immune system in both maintaining health and contributing to disease.

Prerequisite: M&MG 210A

Restriction: Medical students only.

**M&MG 215. Integrative Immunology. 4 Units.**

Lectures and student presentations of primary literature. The main goal is to achieve a basic understanding of the cellular and molecular basis of innate and adaptive immunity, and how immune function is coordinated at a systems level.

Same as MOL BIO 215.

**M&MG 216. Pathogenic Microbiology. 4 Units.**

Biochemical and genetic properties of infectious agents; identification and behavior of pathogens; activities of toxins; the chemotherapy, biochemistry, and genetics of drug resistance; and epidemiology of infectious diseases.

**M&MG 219. Medical Virology. 4 Units.**

Animal viruses as disease causing agents, including mechanisms of infection at both the cellular and organismic levels. Topics include comparative studies of different groups of viruses, viral transformation, and mechanisms of viral gene expression.

**M&MG 221. Immunopathogenic Mechanisms of Disease. 3 Units.**

Examination of the mechanisms underlying disease states mediated by immune dysregulation. Topics include mechanisms of immune evasion by cancer, diseases mediated by cytokine dysregulation, role of the microbiome of the GI tract and other disease sites, and adoptive T-cell therapy.

Prerequisite: M&MG 215

Same as PATH 221.

Restriction: Graduate students only.

**M&MG 222. Molecular Pathogenesis of Microbial Infections. 4 Units.**

Features lectures by faculty on the molecular aspects of microbial pathogenesis, highlighting both microbe and cellular functions. In addition to lectures, students review papers and discuss them. There will be two written exams, one on viruses and one on microbes.

**M&MG 225. Molecular Mechanisms of Human Disease. 3 Units.**

Provides an overview of the molecular mechanisms of human diseases, including neurologic, hematologic, neoplastic, and infectious diseases. Students gain an understanding of these mechanisms, as well as models of human diseases.

Same as PATH 225.

**M&MG 227. Immunology Journal Club. 2 Units.**

Advanced topics in immunology as related to an understanding of human disease.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**M&MG 230. Topics in Stem Cells. 2-4 Units.**

One-hour seminar presentation by participating faculty or guest lecturer and open to the science community, followed by one-hour discussion of the lecture topic or related topic. Students are responsible for presentations and readings.

**M&MG 240. M.D./PH.D. Tutorial. 1 Unit.**

Explores a variety of topics that impact careers of medical scientists (M.D./Ph.D students). Topics range from scientific, such as recent advances in particular research areas, to ethical problems brought on by increased technology and intervention in the disease process.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**M&MG 250. Responsible Conduct of Research. 2 Units.**

Each session includes a formal presentation by faculty/invited speaker followed by a discussion of case studies related to the topic under consideration.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**M&MG 270. Career Development. 2 Units.**

Topics include preparation of papers, grants and fellowships, scientific presentations, and curriculum vitae, and career opportunities.

Repeatability: May be repeated for credit unlimited times.

**M&MG 280. Tutorial in Microbiology and Molecular Genetics. 2 Units.**

Tutorial in Microbiology and Molecular Genetics. Presented by the department chair; relates current laboratory research to the literature.

Repeatability: May be repeated for credit unlimited times.

**M&MG 292A. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**M&MG 292B. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**M&MG 292C. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**M&MG 298. Independent Study. 1-12 Units.**

Provided for MSTP students to synthesize the basic science information learned during the basic science years of medical school and learn how to apply that knowledge toward graduate research directed at understanding the basis of human disease.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**M&MG 299. Dissertation—Microbiology and Molecular Genetics . 1-12 Units.**

Course provided for Ph.D. students to prepare and complete the dissertation required for a Ph.D. degree.

Repeatability: May be repeated for credit unlimited times.

## Molecular Biology and Biochemistry (MOL BIO)

### Courses

**MOL BIO 200A. Research in Molecular Biology and Biochemistry. 2-12 Units.**

Individual research with Molecular Biology and Biochemistry faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**MOL BIO 200B. Research in Molecular Biology and Biochemistry. 2-12 Units.**

Individual research with Molecular Biology and Biochemistry faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**MOL BIO 200C. Research in Molecular Biology and Biochemistry. 2-12 Units.**

Individual research with Molecular Biology and Biochemistry faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**MOL BIO 200R. Research in Developmental & Cell Biology for First-year Students. 2-12 Units.**

Independent research within the laboratories of graduate training faculty in the Department of Molecular Biology and Biochemistry for first-year Ph.D. students.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

**MOL BIO 201A. Seminars in Molecular Biology & Biochemistry. 2 Units.**

Presentation of research from department laboratories or, when pertinent, of other recent developments.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**MOL BIO 201B. Seminars in Molecular Biology & Biochemistry. 2 Units.**

Presentation of research from department laboratories or, when pertinent, of other recent developments.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**MOL BIO 201C. Seminars in Molecular Biology & Biochemistry. 2 Units.**

Presentation of research from department laboratories or, when pertinent, of other recent developments.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**MOL BIO 202A. Tutorial in Molecular Biology and Biochemistry. 2 Units.**

Tutorials in the area of research of a particular professor which relate current research to the literature. May be conducted as journal clubs.

Repeatability: Unlimited as topics vary.

**MOL BIO 202B. Tutorial in Molecular Biology and Biochemistry. 2 Units.**

Tutorials in the area of research of a particular professor which relate current research to the literature. May be conducted as journal clubs.

Repeatability: Unlimited as topics vary.

**MOL BIO 202C. Tutorial in Molecular Biology and Biochemistry. 2 Units.**

Tutorials in the area of research of a particular professor which relate current research to the literature. May be conducted as journal clubs.

Repeatability: Unlimited as topics vary.

**MOL BIO 203. Nucleic Acid Structure and Function. 4 Units.**

Structure and chemistry of nucleic acids. Relationship between these properties and the mechanisms of fundamental processes such as replication and repair, RNA-mediated catalysis, formation and regulation of higher order chromatin structure and recombination.

Prerequisite: BIO SCI 98 and BIO SCI 99 and CHEM 51A and CHEM 51B and CHEM 51C

**MOL BIO 204. Protein Structure and Function. 4 Units.**

The structure and properties of proteins, enzymes, and their kinetic properties.

Prerequisite: BIO SCI 98 and BIO SCI 99 and CHEM 51C

**MOL BIO 205. Molecular Virology. 4 Units.**

Primary research data on the major DNA and RNA viruses emphasizing strategies of regulation of gene expression. Utilization of viruses as molecular biological tools. Graduate-level knowledge of the biochemistry and molecular biology of macromolecules is required.

Prerequisite: MOL BIO 203 and MOL BIO 204

Restriction: Graduate students only.

**MOL BIO 211. High-Resolution Structures: NMR and X-ray. 4 Units.**

Basic principles of magnetic resonance and x-ray crystallography toward the determination of high-resolution biomolecular structures.

Prerequisite: MATH 2B

Restriction: Graduate students only.

Concurrent with BIO SCI M133.

**MOL BIO 213. Literature in Nucleic Acid Structure and Function. 2 Units.**

Exploration and critical analysis of recent primary scientific literature in structure, properties, and biological mechanisms involving nucleic acids.

Corequisite: MOL BIO 203

Grading Option: Satisfactory/unsatisfactory only.

**MOL BIO 214. Literature in Protein Structure and Function. 2 Units.**

Exploration and critical analysis of recent primary scientific literature in structure and properties of proteins, enzymes, and their kinetic properties.

Corequisite: MOL BIO 204

Grading Option: Satisfactory/unsatisfactory only.

**MOL BIO 215. Integrative Immunology. 4 Units.**

Lectures and student presentations of primary literature. The main goal is to achieve a basic understanding of the cellular and molecular basis of innate and adaptive immunity, and how immune function is coordinated at a systems level.

Same as M&MG 215.

**MOL BIO 217A. Principles of Cancer Biology I. 4 Units.**

Oncogenes and tumor suppressor genes are studied from molecular viewpoints. Also studies their role in cancer; viral carcinogenesis. Designed for graduate students interested in cancer research. Format includes lectures and student-led discussions.

Prerequisite: MOL BIO 203 and MOL BIO 204

Restriction: Graduate students only.

**MOL BIO 217B. Principles of Cancer Biology II. 4 Units.**

Topics include cancer cell growth and metastasis, chemical carcinogenesis, and cancer genetics and epidemiology. Designed for graduate students interested in cancer research. Format includes lectures and student-led discussions.

Prerequisite: MOL BIO 203 and MOL BIO 204

Restriction: Graduate students only.

**MOL BIO 218. Clinical Cancer. 3 Units.**

Designed to acquaint students in basic life science with clinical cancer.

Restriction: Graduate students only.

**MOL BIO 220. Structure & Synthesis of Biological Macromolecules Journal Club. 2 Units.**

Advanced topics in macromolecular structure and synthesis as related to biological problems.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**MOL BIO 221. Advanced Topics in Immunology. 4 Units.**

Literature-based, interactive discussions focused on review of seminal historic and recent immunology literature. Student responsibilities include reading, critical evaluation, and discussion of manuscripts.

Prerequisite: M&MG 215

Restriction: Graduate students only.

**MOL BIO 221L. Advanced Immunology Laboratory. 4 Units.**

An advanced course in immunology for graduate students enrolled in the Biotechnology master's program. Emphasis is placed on learning modern techniques in immunology such as ELISAs, western blotting, immunofluorescent staining assays.

Restriction: Graduate students only.

Concurrent with BIO SCI M121L.

**MOL BIO 223. Introduction to Computational Biology. 4 Units.**

The use of theories and methods based on computer science, mathematics, and physics in molecular biology and biochemistry. Basics in biomolecular modeling. Analysis of sequence and structural data of biomolecules. Analysis of biomolecular functions.

Same as BME 232.

Restriction: Graduate students only.

Concurrent with BIO SCI M123 and COMPSCI 183 and BME 132.

**MOL BIO 227. Immunology Journal Club. 2 Units.**

Advanced topics in immunology as related to an understanding of human disease.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 15 times.

Restriction: Graduate students only.

**MOL BIO 229. Research-in-Progress Seminars. 1 Unit.**

Two half-hour presentations by graduate students and postdoctorals to the department on their current research projects.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 15 times.

Restriction: Graduate students only.

**MOL BIO 235. Literature in Chemical and Structural Biology. 1 Unit.**

Exploration and critical analysis of recent primary scientific literature in chemical and structural biology.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**MOL BIO 243. Topics in Stem Cells. 2-4 Units.**

Presentation by participating faculty or guest lecturer that is open to the science community, followed by discussion of the lecture topic or a related topic. Students are responsible for presentations and readings.

**MOL BIO 244. Principles of Genomics. 4 Units.**

A survey course of the principal subfields of genomics and their applications to biological and health sciences that will cover genome assembly and annotation, genome structure, comparative genomics, population genomics, functional genomics, and medical genomics.

Same as DEV BIO 214.

Restriction: Graduate students only.

**MOL BIO 248. Metallobiochemistry . 4 Units.**

A review of the biochemistry of metallic elements emphasizing: methods for studying metals in biological systems; the chemical basis for nature's exploitation of specific elements; structures of active sites; mechanisms; solid-state structures and devices; metals in medicine.

Prerequisite or corequisite: CHEM 131C or CHEM 132C

Same as CHEM 218.

**MOL BIO 250. Advanced Topics in Biotechnology - Nucleic Acids. 2 Units.**

Supplements laboratory curriculum with scientific background behind experimental methods. Format consists of lectures and the presentation and analysis of relevant papers from the scientific literature.

Corequisite: MOL BIO 250L

Restriction: Graduate students only. Biotechnology Majors only.

**MOL BIO 250L. Biotechnology Laboratory - Nucleic Acids. 8 Units.**

Nucleic acid techniques and recombinant DNA technology. Extraction and purification of nucleic acids, cloning and subcloning, PCR, site-directed mutagenesis, nucleic acid hybridization, additional associated procedures. Students must demonstrate accurate documentation of data (laboratory notebook) detailing experience and results.

Corequisite: MOL BIO 250

Restriction: Graduate students only. Biotechnology Majors only.

**MOL BIO 251. Advanced Topics in Biotechnology - Protein Purification and Characterization. 2 Units.**

Supplements laboratory curriculum with scientific background behind experimental methods. Format consists of lectures and the presentation and analysis of relevant papers from the scientific literature.

Corequisite: MOL BIO 251L

Prerequisite: MOL BIO 250L and MOL BIO 250

Restriction: Graduate students only. Biotechnology Majors only.

**MOL BIO 251L. Biotechnology Laboratory - Protein Purification and Characterization. 8 Units.**

Major techniques of handling proteins and antibodies. Protein engineering, expression and large-scale purification of recombinant proteins from bacteria, HPLC, antibody purification, western blotting, additional associated procedures. Students must demonstrate accurate documentation of data (laboratory notebook) detailing experience and results.

Corequisite: MOL BIO 251

Prerequisite: MOL BIO 250L and MOL BIO 250

Restriction: Graduate students only. Biotechnology Majors only.

**MOL BIO 252L. Biotechnology Management Laboratory. 8 Units.**

Overview of current methods in biotechnology, designed specifically for biotechnology graduate students. Organized into four distinct sections (nucleic acids, proteins, virology, and immunology). Students must demonstrate accurate documentation of data (laboratory notebooks) detailing experience and results.

Restriction: Graduate students only. Biotechnology Majors only.

**MOL BIO 253. Biotech Management . 5 Units.**

Taught jointly by Bio Sci and Merage School faculty, the course addresses fundamental aspects within, and associated with, the biotechnology industry. Curriculum is focused largely on management issues, including finance, product development, pharmaceuticals, project management, regulatory affairs, and ethics.

Same as MGMTMBA 293.

Restriction: Graduate students only. Biotechnology Majors only.

**MOL BIO 253L. Stem Cell Laboratory. 4 Units.**

Designed to prepare M.S. Biotechnology program students for a career in stem cell research. Laboratory training utilizes tissue culture, mouse and human embryonic stem cells, and is enhanced with didactic material and discussion.

Prerequisite: MOL BIO 250L and MOL BIO 251L

Restriction: Graduate students only. Biotechnology Majors only.

**MOL BIO 268. Seminar in Systems Microbiology Research. 1 Unit.**

A research and journal club seminar that covers topics on bacteria and phage using approaches and principles from biology, engineering, and physics.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Same as PHYSICS 268, ENGRMSE 267.

Restriction: Upper-division students only. Graduate students only.

**MOL BIO 270. Science Communication Skills. 2 Units.**

Development of effective communication skills, oral and written presentations. Topics range from the art of creating keynote slides to strategically crafting a personal story, culminating in a live presentation to an invited audience.

**MOL BIO 291. Graduate School Fundamentals. 2 Units.**

Lectures and discussions providing basic skills needed for success in Ph.D. graduate studies. Topics include formulating a hypothesis, experimental design, literature review, grant writing, oral communication, biostatistics, time management, and professional development.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Cellular and Molecular Biosci Majors only.

**MOL BIO 292A. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**MOL BIO 292B. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**MOL BIO 292C. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**MOL BIO 293A. Cancer Biology Journal Club. 1 Unit.**

Focuses on molecular mechanisms that underlie the development and progression of cancers. Covers a variety of cancer-related research areas, such as cell cycle control, apoptosis, DNA repair, metastasis, angiogenesis, and others.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**MOL BIO 293B. Cancer Biology Journal Club. 1 Unit.**

Focuses on molecular mechanisms that underlie the development and progression of cancers. Covers a variety of cancer-related research areas, such as cell cycle control, apoptosis, DNA repair, metastasis, angiogenesis, and others.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**MOL BIO 293C. Cancer Biology Journal Club. 1 Unit.**

Focuses on molecular mechanisms that underlie the development and progression of cancers. Covers a variety of cancer-related research areas, such as cell cycle control, apoptosis, DNA repair, metastasis, angiogenesis, and others.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**MOL BIO 295. Biomedical Research Methods. 2 Units.**

Lectures and interactive discussions of research methods in modern biomedical science. Each week will focus on a different class of techniques, including molecular, biochemical, immunological, genomic, bioinformatics, microscopy, cancer biology, genome editing. One hour per week, grading based on attendance.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Cellular and Molecular Biosci Majors only.

**MOL BIO 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Restriction: Graduate students only.

## Music (MUSIC)

### Courses

**MUSIC 3. Introduction to Music. 4 Units.**

Introduction to musical concepts and active listening skills. Students develop musical understanding through critical readings, selected repertoire, fundamental concepts related to rhythm, pitch, and genre. Students apply those concepts to music from a wide range of historical and cultural origins.

(IV)

**MUSIC 4. Introduction to Opera. 4 Units.**

Introduces students with no musical background to the dramatic and performance conventions of opera, and suggests ways of developing a critical stance vis-a-vis the social, political, gender-related and moral conflicts that are presented by composers and librettists.

(IV)

**MUSIC 5. Popular Music in the United States. 4 Units.**

Examines the cultural, social, political, and economic dimensions of popular music in the United States over the last century and a half, with an emphasis on matters related to class, race, ethnicity, and gender.

(IV)

**MUSIC 8. The Beatles and the Sixties. 4 Units.**

Through a study of the music of the Beatles, students are introduced to selected broader historical and cultural themes (e.g., race and music, gender and music, music and the counterculture) while developing an understanding of the basic elements of music.

(IV)

**MUSIC 9. Rock: The Early Years. 4 Units.**

Surveys the social and cultural fabric of the post-World War II United States (from the late 1940s through the early 1970s) as seen through the prism of music - rock and roll music.

(IV)

**MUSIC 10. Piano for Majors. 1 Unit.**

For Music majors with little or no piano experience. Provides the necessary background for realizing keyboard exercises required in the theory and harmony courses, and develops skills to play and sight-read simple music from different periods.

Repeatability: May be taken for credit 3 times.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 15A. Musicianship I. 2 Units.**

Interval and chord quality identification, melodic and harmonic dictation, tonal and chromatic sight-singing, and rhythmic reading and dictation.

Corequisite: MUSIC 16A

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 15B. Musicianship II. 2 Units.**

Interval and chord quality identification, melodic and harmonic dictation, tonal and chromatic sight-singing, and rhythmic reading and dictation.

Corequisite: MUSIC 16B

Prerequisite: MUSIC 15A and MUSIC 16A. MUSIC 15A with a grade of C- or better. MUSIC 16A with a grade of C- or better

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 15C. Musicianship III. 2 Units.**

Interval and chord quality identification, melodic and harmonic dictation, tonal and chromatic sight-singing, and rhythmic reading and dictation.

Corequisite: MUSIC 16C

Prerequisite: MUSIC 15B and MUSIC 16B. MUSIC 15B with a grade of C- or better. MUSIC 16B with a grade of C- or better

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 16A. Music Theory. 4 Units.**

Review of music fundamentals. Triad and seventh chords, musical texture, chord spacing, embellishing tones, and introduction to diatonic harmony. Part-writing and model composition with tonic, dominant seventh, and subdominant harmonies.

Corequisite: MUSIC 15A

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 16B. Music Theory. 4 Units.**

Introduction to phrase structure. Part-writing and harmonization with predominants, linear dominants, 6/4 embellishing chords, leading-tone and other diatonic seventh chords. Advanced meters and rhythmic-metric dissonance. Diatonic sequence. Introduction to tonicization and modulation through motion to V and III.

Corequisite: MUSIC 15B

Prerequisite: MUSIC 15A and MUSIC 16A. MUSIC 15A with a grade of C- or better. MUSIC 16A with a grade of C- or better

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 16C. Music Theory. 4 Units.**

Tonicization and modulation to closely related keys. Simple binary and ternary forms. Voice-leading reductions and simple forms. Diatonic sequence with seventh chords. Introduction to chromatic harmony I: modal exchange and mixture chords, the Neapolitan and augmented sixth chords.

Corequisite: MUSIC 15C

Prerequisite: MUSIC 15B and MUSIC 16B. MUSIC 15B with a grade of C- or better. MUSIC 16B with a grade of C- or better

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 16D. Theory/Musicianship. 4 Units.**

Extended homophonic and contrapuntal formal designs (continuous variations, rondo form, sonata form, invention, fugue). Embellishing chromatic chords, dominant prolongation, modulations to foreign keys, extended harmonies, chromatic sequence, chromatic voice-leading and symmetrical divisions of the octave.

Prerequisite: MUSIC 15C and MUSIC 16C. MUSIC 15C with a grade of C- or better. MUSIC 16C with a grade of C- or better

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 21A. Keyboard Skills. 1 Unit.**

Designed to develop the foundational skills of sight-reading, harmonization, transposition, improvisation, figured bass realization, and score reading.

Repeatability: May be taken for credit 6 times.

Restriction: Lower-division students only. Music Majors only. Music - Performance Majors only.

**MUSIC 21B. Keyboard Skills. 1 Unit.**

Designed to develop the foundational skills of sight-reading, harmonization, transposition, improvisation, figured bass realization, and score reading.

Repeatability: May be taken for credit 6 times.

Restriction: Lower-division students only. Music Majors only. Music - Performance Majors only.

**MUSIC 21C. Keyboard Skills. 1 Unit.**

Designed to develop the foundational skills of sight-reading, harmonization, transposition, improvisation, figured bass realization, and score reading.

Repeatability: May be taken for credit 6 times.

Restriction: Lower-division students only. Music Majors only. Music - Performance Majors only.

**MUSIC 25. Fundamentals of Music. 4 Units.**

Gain comprehensive insight into the fundamental concepts of music theory, including notation, harmony, and score analysis. Designed for students of all levels to improve their understanding of how music is composed, performed, and heard. Formerly MUSIC 25A.

**(IV)****MUSIC 40B. History of European Music: From the Renaissance through the Baroque. 4 Units.**

An introduction to the analysis of musical styles and forms, to the sources for constructing music history and reconstructing historical music, and to J.S. Bach.

Prerequisite: MUSIC 16C. MUSIC 16C with a grade of C- or better

Restriction: Music Majors have first consideration for enrollment. Music - Performance Majors have first consideration for enrollment.

**(IV and VIII ).****MUSIC 40C. History of European Music: Hasse to Mahler. 4 Units.**

An introduction to the analysis of musical styles and forms, and to the sources for constructing music history and reconstructing historical music, to Richard Wagner.

Prerequisite: MUSIC 40B. MUSIC 40B with a grade of D or better. Recommended: MUSIC 16D

Restriction: Music Majors have first consideration for enrollment. Music - Performance Majors have first consideration for enrollment.

**(IV and VIII ).**

**MUSIC 40D. 20th Century Music. 4 Units.**

Survey of principal composers, movements, and compositional techniques of Western art music of the modern era.

Prerequisite: MUSIC 16C. MUSIC 16C with a grade of C- or better

Restriction: Music Majors have first consideration for enrollment. Music - Performance Majors have first consideration for enrollment.

(IV and VIII ).

**MUSIC 41. Major Composer. 4 Units.**

Study of the works of an important composer with emphasis on their significance in historical and social contexts. Composers selected represent a wide variety of historical periods, nationalities, and stylistic orientations.

Repeatability: May be taken for credit 2 times as topics vary.

(IV)

**MUSIC 42. Music and Gender. 4 Units.**

Explores various intersections between music and gender. Examines ways in which gender and sexuality have played a vital role in the creation, dissemination, and consumption of music ranging from medieval Christian mysticism to contemporary hip-hop artists.

(IV, VIII)

**MUSIC 44. Classical Music in Society. 4 Units.**

Examines some ways in which classical music has played an integral role in aspects of society. Studies pieces from different cultural, political, and historical contexts in order to understand how musical meaning is created and interpreted.

(IV, VIII)

**MUSIC 45. History of Film Music. 4 Units.**

Course provides an overview of film music history. Special emphasis will be placed on developing an analytic vocabulary for musical elements and cultivating an understanding of how music can function within a film.

(IV)

**MUSIC 46. Music in Multimedia. 4 Units.**

Students explore intersections between music and other media forms through creating multimedia projects, readings, lectures, and discussion. Students produce music, edit video, increase media literacy, and study theories behind how music communicates meaning.

(IV)

**MUSIC 47. Introductory Topics in Music Technology. 4 Units.**

Introductory topics in electronic music, digital audio, and other aspects of music technology.

Repeatability: Unlimited as topics vary.

(IV)

**MUSIC 48. Introductory Topics in Music and Culture. 4 Units.**

Examines music and musical practices in different historical periods, societies, and cultural settings.

Repeatability: Unlimited as topics vary.

(IV)

**MUSIC 51. Music Technology and Computers. 4 Units.**

A study of the influence of technology on the musical culture and aesthetics from the 20th century to the present, with particular emphasis on the role of the computer. Work includes lectures, readings, listenings, discussions, demonstrations, writing, and experimentation.

(IV)

**MUSIC 65. Piano for Music Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times as topics vary.

Restriction: Music Majors only.

**MUSIC 66. Strings for Music Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times as topics vary.

Restriction: Music Majors only.

**MUSIC 67. Winds for Music Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times as topics vary.

Restriction: Music Majors only.

**MUSIC 68. Voice for Music Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music Majors only.

**MUSIC 69. Percussion for Music Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times as topics vary.

Restriction: Music Majors only.

**MUSIC 70. Guitar, Lute, and Other Plucked Instruments for Music Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music Majors only.

**MUSIC 78. History of Jazz. 4 Units.**

Development of jazz from African and African American folk origins through blues, early jazz, swing, bebop, 'cool' jazz, fusion, free jazz, and contemporary trends.

Restriction: Music Majors have first consideration for enrollment. Music - Performance Majors have first consideration for enrollment.

(IV and VII ).

**MUSIC H80. Experiments in Music. 4 Units.**

Scientists explain the cognition of music using experimental methodology; artists expand the domain of music by trying previously unknown ways of making it. These two types of experiment deepen our understanding of music, from both scientific and artistic vantage points.

Restriction: Campuswide Honors Collegium students only.

(IV)

**MUSIC 82A. MAHUR-Pish Radif: Introduction to Classical Persian Music. 4 Units.**

Survey of art music in Iran and basic structures of classical Persian music, with emphasis on MAHUR modal system and different instruments of classical Persian music. No musical experience required, but interest in vocal music is strongly recommended.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 82B. HOMAYUN-Pish Radif: Introduction to Classical Persian Music. 4 Units.**

Survey of art music in Iran and basic structures of classical Persian music, with emphasis on HOMAYUN modal system and famous musicians and performers of classical Persian music. No musical experience required, but interest in vocal music is strongly recommended.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 82C. SHUR-Pish Radif: Introduction to Classical Persian Music. 4 Units.**

Survey of art music in Iran and basic structures of classical Persian music, with emphasis on the SHUR modal system and different poetic rhythms in classical Persian music. No musical experience required, but interest in vocal music is strongly recommended.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 122A. Piano Literature. 2 Units.**

Survey of stringed keyboard literature from the English Virginalists through twentieth-century composers. Historical, formal, and stylistic considerations of music presented. Performances by class participants and occasional outside guests.

Prerequisite: MUSIC 16A and MUSIC 16B and MUSIC 16C

Restriction: Upper-division students only. Music Majors only. Music - Performance Majors only.

**MUSIC 122B. Piano Literature. 2 Units.**

Survey of stringed keyboard literature from the English Virginalists through twentieth-century composers. Historical, formal, and stylistic considerations of music presented. Performances by class participants and occasional outside guests.

Prerequisite: MUSIC 16A and MUSIC 16B and MUSIC 16C

Restriction: Upper-division students only. Music Majors only. Music - Performance Majors only.

**MUSIC 122C. Piano Literature. 2 Units.**

Survey of stringed keyboard literature from the English Virginalists through twentieth-century composers. Historical, formal, and stylistic considerations of music presented. Performances by class participants and occasional outside guests.

Prerequisite: MUSIC 16A and MUSIC 16B and MUSIC 16C

Restriction: Upper-division students only. Music Majors only. Music - Performance Majors only.

**MUSIC 126. Piano Pedagogy. 2 Units.**

The materials and methods of piano instruction are examined and evaluated.

Restriction: Upper-division students only. Music Majors only. Music - Performance Majors only.

**MUSIC 131. Post-Tonal Theory. 4 Units.**

Significant harmonic, rhythmic, and structural practices since 1900. Analysis and written work exploring free atonality and serialism; neo-tonal practices such as use of extended tertian harmonies, modalism, pandiatonicism, and non-tertian harmonies; structural principles such as aleatory, metric modulation and minimalism.

Prerequisite: MUSIC 16D

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 132. Jazz Theory. 4 Units.**

Study of jazz harmony and melody construction in improvisation. Covered topics include terminology, chord symbols, notation, voicings, and scales as commonly used in jazz and popular music. Issues regarding tonality and ramifications of the blue scale are also examined.

Prerequisite: MUSIC 16D

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 136. Instrumentation. 4 Units.**

Ranges and capabilities of modern orchestral instruments. Exercise in writing for various combinations of wind, string, and percussion instruments and for full orchestra.

Prerequisite: MUSIC 16C

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 140. Topics in Medieval Music. 4 Units.**

Topics in medieval music.

Prerequisite: MUSIC 40B. MUSIC 40B with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 141. Topics in Renaissance Music. 4 Units.**

Topics in renaissance music.

Prerequisite: MUSIC 40B. MUSIC 40B with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 142. Topics in Baroque Music. 4 Units.**

Topics in Baroque music.

Prerequisite: MUSIC 40B. MUSIC 40B with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 142W. Topics in Baroque Music . 4 Units.**

Topics in Baroque music.

Prerequisite: MUSIC 40B. MUSIC 40B with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**(Ib)**

**MUSIC 143. Topics in Classical Music. 4 Units.**

Topics in Classical music.

Prerequisite: MUSIC 40C. MUSIC 40C with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 143W. Topics in Classical Music. 4 Units.**

Topics in Classical music.

Prerequisite: MUSIC 40C. MUSIC 40C with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**(Ib)**

**MUSIC 144. Topics in Romantic Music. 4 Units.**

Topics in Romantic music.

Prerequisite: MUSIC 40C. MUSIC 40C with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 144W. Topics in Romantic Music. 4 Units.**

Topics in Romantic music.

Prerequisite: MUSIC 40C. MUSIC 40C with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only.

**(Ib)**

**MUSIC 145. Topics in 20th Century Music. 4 Units.**

Topics in 20th century music.

Prerequisite: MUSIC 40D. MUSIC 40D with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 145W. Topics in 20th Century Music. 4 Units.**

Topics in 20th century music.

Prerequisite: MUSIC 40D. MUSIC 40D with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Upper-division students only. Music Majors only. Music - Performance Majors only.

**(Ib)****MUSIC 146. Studies in Jazz Music. 4 Units.**

Topics in Jazz Music.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 147. Studies in Music Technology. 4 Units.**

Specialized topics in electronic music, computer-aided music, and other aspects of music technology.

Repeatability: May be taken for credit 2 times as topics vary.

**MUSIC 148. Studies in Ethnomusicology. 4 Units.**

Topics in Ethnomusicology.

Repeatability: May be taken for credit 2 times.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 149. Studies in Music History. 4 Units.**

Specialized topics in musical genres; culture and social issues; performance practices; and interrelated arts.

Prerequisite: MUSIC 40B and MUSIC 40C and MUSIC 40D. Satisfactory completion of the lower-division writing requirement.

Repeatability: May be taken for credit 3 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 150. Composition. 4 Units.**

Exercises and projects for diverse instrumental-vocal combinations; contemporary techniques and problems. Participation in the improvisation ensemble and working with electronic media.

Prerequisite: MUSIC 16C

Repeatability: May be repeated for credit unlimited times.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 151. Computer Music Composition. 4 Units.**

Exercises in the composition of music uniquely possible by computer, including digital signal processing, computer control of synthesizers and processors, and algorithmic composition. Demonstrations and musical analyses in class; considerable studio work outside class.

Prerequisite: MUSIC 51

**MUSIC 152. Interactive Arts Programming. 4 Units.**

Study of artistic issues and programming techniques involved in the development of interactive computer art and music. Theoretical background, basic tenets of programming, and practical exercises in programming interactive computer multimedia art.

Prerequisite: MUSIC 51 or ART 65A or DANCE 163

**MUSIC 153. Counterpoint. 4 Units.**

Studies in contrapuntal practices of various style periods such as the 16th, 18th, and 20th centuries.

Prerequisite: MUSIC 16B. MUSIC 16B with a grade of C- or better

Restriction: Music Majors only.

**MUSIC 155. Analysis. 4 Units.**

Methods of formal analysis applicable to all Western musical styles: additive, continuous, transformational, and hierarchic forms; rhythm, texture, and sonority as form and process.

Prerequisite: MUSIC 16D

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 156A. Song Literature. 2 Units.**

A survey of song literature. Designed as an overview of the song repertoire, German Lieder.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 156B. Song Literature. 2 Units.**

A survey of song literature. Designed as an overview of the song repertoire, French mélodie.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 157. Advanced Study in Composition. 4 Units.**

Individual weekly lessons in composition.

Prerequisite: MUSIC 150. MUSIC 150 with a grade of C- or better

Repeatability: May be taken for credit 6 times.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 158A. Diction. 2 Units.**

In-depth study of the International Phonetic Alphabet (IPA), including its transcription and pronunciation, and its application for singers. Introduction to IPA and Italian Diction.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 158B. Diction. 2 Units.**

In-depth study of the International Phonetic Alphabet (IPA), including its transcription and pronunciation, and its application for singers. German Diction.

Prerequisite: MUSIC 158A

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 158C. Diction. 2 Units.**

In-depth study of the International Phonetic Alphabet (IPA), including its transcription and pronunciation, and its application for singers. French Diction.

Prerequisite: MUSIC 158A and MUSIC 158B

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 159. Vocal Pedagogy. 2 Units.**

Survey about the physical structure of the singing mechanism, science, and philosophy of studio instruction.

Restriction: Music - Performance Majors only.

**MUSIC 160. University Orchestra. 2 Units.**

Study and performance of standard orchestral repertory and works by contemporary composers. Membership is open to all qualified students by audition only.

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 161. Wind Ensemble. 2 Units.**

Study and performance of works written for varying combinations of wind and percussion instruments. Membership is open to all qualified students by audition only.

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 162. University Chorus. 2 Units.**

Make-up of the ensembles varies and may include University Chorus, Chamber Choir, Madrigal Singers, Women's Chorus, and Reading Choir. Membership is open to all qualified students by audition only.

Corequisite: MUSIC 162L

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 162P. University Chorus: Accompanying. 2 Units.**

Keyboard accompanying for one of the UCI choral organizations, with individual coaching in sight reading, score reading, and other accompanying skills.

Repeatability: May be taken for credit 12 times.

**MUSIC 164. Opera Workshop. 2-4 Units.**

Preparation and performance of operatic repertoire, including arias, scenes, and fully staged operas, and/or stage training and role analysis.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 164P. Opera Workshop: Accompanying. 2-4 Units.**

Training in techniques and operatic repertory for keyboard players.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 165. Piano for Music Performance Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music - Performance Majors only.

**MUSIC 166. Strings for Music Performance Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music - Performance Majors only.

**MUSIC 166P. String Accompaniment. 2 Units.**

Chamber ensemble experience with the solo string repertory for keyboard, participation in the weekly string master class, performance in public recitals.

Repeatability: May be taken for credit 3 times.

**MUSIC 167. Winds for Music Performance Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music - Performance Majors only.

**MUSIC 168. Voice for Music Performance Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music - Performance Majors only.

**MUSIC 169. Percussion for Music Performance Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music - Performance Majors only.

**MUSIC 170. Guitar, Lute, and Other Plucked Instruments for Music Performance Majors. 2 Units.**

Private weekly lessons and a weekly master class/workshop for the discussion of solo repertory and performance practice, including special topics such as historical notational systems, traditional American guitar styles, and demonstrations of period plucked instruments. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music - Performance Majors only.

**MUSIC 171. Chamber Singers. 2 Units.**

A select ensemble specializing in vocal chamber music from all periods. Frequent performances on and off campus. Membership is open to all singers by audition.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 176. Chamber Ensembles . 2 Units.**

Make-up of the ensembles varies and may include various Classical ensembles, Latin Jazz Ensemble, Small Jazz Combos, Percussion Ensemble, and Guitar Ensemble. Membership is open to all qualified students by audition only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music Majors have first consideration for enrollment. Music - Performance Majors have first consideration for enrollment.

**MUSIC 178. Jazz Orchestra. 2 Units.**

Rehearsal and performance of literature written for large jazz ensemble with emphasis on methods and materials. Laboratory setting for new arrangers and/or composers of modern jazz pieces.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 181. Improvisation. 4 Units.**

Improvisation has been central to all music traditions. Course explores real-time music-making in a variety of non-notated contexts. Different improvisational styles are presented, including jazz, Asian improvisation, and experimental modern music. Emphasis on actual classroom performance.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 182. Advanced Jazz Combo. 2 Units.**

Small-group jazz ensemble and improvisational workshop. Range of music covered encompasses the full traditional jazz from improvised ragtime up through the most current avant-garde musical techniques.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 183A. Jazz Composition I. 4 Units.**

Performance and lecture course for writing and performing original jazz compositions. Emphasis is placed on composing as a way to create new improvisational frameworks. Cyclical forms, modal compositions, blues-oriented compositions, and ballad writing.

Prerequisite: MUSIC 78 and MUSIC 132

Restriction: Music Majors only.

**MUSIC 183B. Jazz Composition II. 4 Units.**

Performance and lecture course for writing and performing original jazz compositions. Emphasis is placed on composing as a way to create new improvisational frameworks. Non-functional harmony, contemporary forms, free-bop, and current trends.

Prerequisite: MUSIC 78 and MUSIC 132 and MUSIC 183A

Restriction: Music Majors only.

**MUSIC 183C. Jazz Composition III. 4 Units.**

Performance and lecture course for writing and performing original jazz compositions. Emphasis is placed on composing as a way to create new improvisational frameworks. Study of modern tonal-center compositions, intervallic compositions, and alternate rhythms.

Prerequisite: MUSIC 78 and MUSIC 132 and MUSIC 183A and MUSIC 183B

Restriction: Music Majors only.

**MUSIC 189. Accompanying for Plucked Strings: Continuo and Changes. 2 Units.**

Students apply theory to their instruments as they learn the basics of pre-1800 continuo playing and post-1900 jazz charts. Includes discussions of appropriate repertoire, treatment of harmonic progressions, and finer points of style and technique.

Prerequisite: MUSIC 16C

Repeatability: May be repeated for credit unlimited times.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 191. Tutorial in Music. 1-4 Units.**

Supplemental instruction related to student's area of study. Taken only when the materials studied lie outside regular departmental offerings, and when the student has no formal chance to pursue the subject.

Prerequisite: Undergraduate advisor approval required.

Repeatability: May be taken for credit 3 times.

**MUSIC 193. Conducting. 4 Units.**

Introduces students to the basic techniques employed in the practice of conducting and includes score study and development of leadership skills.

Prerequisite: MUSIC 16D and MUSIC 40B and MUSIC 40C

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 195A. Senior Thesis. 2 Units.**

With consultation in regularly scheduled meetings, students identify and study relevant texts and materials and prepare a prospectus for an original thesis.

Prerequisite: Senior standing in the Honors Program in Music and Culture.

Grading Option: In Progress (Letter Grade with P/NP).

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 195B. Senior Thesis. 2 Units.**

Students submit an outline and preliminary drafts of section of their thesis to the instructor, on a schedule supervised by the instructor. The final version will address the instructor's comments and criticisms.

Prerequisite: MUSIC 195A

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 197. Word and Music. 2 Units.**

Performance class for advanced singers and pianists with emphasis on collaborative approach to vocal literature.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 199. Independent Study. 2-4 Units.**

Student-devised research/composition project, with faculty guidance, resulting in a formal paper/project. Taken only when materials studied lie outside regular departmental offerings or when students have no formal chance to pursue the subject.

Prerequisite: Undergraduate or graduate advisor approval required.

Repeatability: May be taken for credit 3 times.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 200. Bibliography and Research. 4 Units.**

Required of all entering students. A systematic introduction to the bibliographical tools both in the general field of music and in the student's areas of specialization.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 201. Topics in Analysis . 4 Units.**

Seminar focusing on different analytical methods, modal, tonal, and post-tonal, and their applications to repertoires drawn from various historical periods through to the present day.

Prerequisite: Placement into MUSIC 201.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Music Majors only.

**MUSIC 202. Proseminar in Musicology. 4 Units.**

Introduces significant issues and recent developments in musicology and music criticism, including exposure to the controversies that have brought change and reflection to the discipline.

Corequisite: Recommended for musicology students: MUSIC 200

Prerequisite or corequisite: MUSIC 200. MUSIC 200 with a grade of B or better

Restriction: Graduate students only.

**MUSIC 203. Music Thesis . 4 Units.**

Intensive work dedicated to researching and writing a Master's thesis under the supervision of a faculty advisor.

Prerequisite: MUSIC 200. MUSIC 200 with a grade of B or better

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 204. Proseminar in Music Theory and Analysis. 4 Units.**

Introduction to music theories, analytic approaches, and methodologies as applied to repertoires drawn from Western art and popular music.

Corequisite: Recommended for musicology students: MUSIC 200

Prerequisite or corequisite: MUSIC 200. MUSIC 200 with a grade of B or better

Restriction: Graduate students only.

**MUSIC 209. Seminar in Creative Practices. 1-4 Units.**

Core first-year seminar required for graduate students in the Integrated Composition, Improvisation, and Technology emphasis of the M.A. and Ph.D. programs. Composition and presentation of original student works, lecture, and discussion.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 210. Choral Conducting . 4 Units.**

Intensive private instruction and study of the various choral literatures.

Repeatability: May be taken for credit 6 times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 211. Performance . 4 Units.**

Contents vary according to the student's major instrument. Intensive private instruction and study of the various literatures.

Repeatability: May be taken for credit 6 times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 212. Composition. 4 Units.**

Intensive work in composition geared to each student's level of competence.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 213. Orchestral Conducting. 4 Units.**

Intensive private instruction in instrumental conducting.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 214. Graduate Recital.**

Performance of public recital.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 215A. Computer Music Composition and Production. 4 Units.**

Study of the composition and production of music made uniquely possible by the computer, including usage of prevalent digital music technology, techniques of digital signal processing, and computer control of synthesizers and audio processors.

Restriction: Graduate students only. Music Majors only.

**MUSIC 215B. Computer Music Programming. 4 Units.**

Study of the artistic issues and programming techniques involved in the development of original applications for computer music composition and interactive performance.

Restriction: Graduate students only. Music Majors only.

**MUSIC 220. Seminar in Music History. 4 Units.**

Topics in music history.

Corequisite: MUSIC 200

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Music Majors only.

**MUSIC 222. Seminar in Musicology . 4 Units.**

Focuses on current scholarship in musicology and related fields with a strong critical content. Addresses topics relative to their historical and stylistic periods. Recent topics have included Stravinsky, Holy Women, Mahler, Historiography, Issues in Performance Practice, and Brahms's Chamber Music.

Corequisite: Recommended for musicology students: MUSIC 200

Prerequisite or corequisite: MUSIC 200. MUSIC 200 with a grade of B or better

Repeatability: May be taken for credit for 4 units as topics vary.

Restriction: Graduate students only.

**MUSIC 224. Seminar in Music Theory and Analysis. 4 Units.**

Typical topics include Schenkerian theory and analysis, contemporary form theory, and advanced techniques in the analysis of late 19th-century and contemporary music (e.g., transformational theory, Neo-Riemannian, and scale network theory).

Corequisite: Recommended for musicology students: MUSIC 200

Prerequisite or corequisite: MUSIC 200. MUSIC 200 with a grade of B or better

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**MUSIC 230. Seminar in Contemporary Music. 4 Units.**

Special seminar projects dealing with contemporary music with emphasis on analytical techniques and style criticism.

Prerequisite or corequisite: MUSIC 200. MUSIC 200 with a grade of B or better

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Music Majors only.

**MUSIC 231. Improvisation. 4 Units.**

Introduces the practice and history of improvisation in diverse fields of Western music since 1950. Performance projects and group critiques, weekly reading and listening assignments, participation in a class concert, and a research paper.

Restriction: Graduate students only. Music Majors only.

**MUSIC 235. Critical Studies in Music. 4 Units.**

A critical examination of music traditions, institutions, and aesthetics, employing new scholarship in music and new critical studies in other disciplines.

Corequisite: Recommended for musicology students: MUSIC 200

Prerequisite or corequisite: MUSIC 200. MUSIC 200 with a grade of B or better

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Music Majors only.

**MUSIC 236. Theoretical ICIT Seminar. 1-4 Units.**

Seminar studying new genres and topics that integrate composition, improvisation, new technologies, and non-classical cultures.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Music Majors only.

**MUSIC 237. Practical ICIT Seminar. 1-4 Units.**

Study of new practices and techniques that integrate composition, improvisation, new technologies, and non-classical cultures.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Music Majors only.

**MUSIC 239. Thesis Colloquium. 1-2 Units.**

ICIT students present their thesis work-in-progress for discussion and criticism. Faculty and visiting artists/scholars also present their current work.

Repeatability: May be taken for credit for 8 units.

Restriction: Graduate students only. Music Majors only.

**MUSIC 240. Graduate Projects . 4 Units.**

Substantial projects in performance, conducting, or composition (other than those specifically required for the degree), accompanied by a summary paper.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Music Majors only.

**MUSIC 242A. First-Year Research and Writing Seminar I. 4 Units.**

Guided reading for one quarter on a broad subject selected by the instructor, followed by one quarter in which the student undertakes independent research on the selected topic, leading to a substantial term paper.

Prerequisite: MUSIC 200. MUSIC 200 with a grade of B or better

Restriction: Graduate students only.

**MUSIC 242B. First-Year Research and Writing Seminar II. 4 Units.**

Guided reading for one quarter on a broad subject selected by the instructor, followed by one quarter in which the student undertakes independent research on the selected topic, leading to a substantial term paper.

Prerequisite: MUSIC 200 and MUSIC 242A. MUSIC 200 with a grade of B or better. MUSIC 242A with a grade of B or better

Restriction: Graduate students only.

**MUSIC 243A. Second-Year Research and Writing Tutorial I. 4 Units.**

In this two-quarter sequence, students gain expertise in a first area of research concentration by undertaking directed reading on a topic of their choice and then writing a paper of near-publishable length and quality on that topic.

Prerequisite: MUSIC 242B. MUSIC 242B with a grade of B or better

Restriction: Graduate students only.

**MUSIC 243B. Second-Year Research and Writing Tutorial II. 4 Units.**

In this two-quarter sequence, students gain expertise in a first area of research concentration by undertaking directed reading on a topic of their choice and then writing a paper of near-publishable length and quality on that topic.

Prerequisite: MUSIC 243A. MUSIC 243A with a grade of B or better

Restriction: Graduate students only.

**MUSIC 244. Readings for the Qualifying Examination. 4-12 Units.**

Directed reading in preparation for the Qualifying Examination.

Prerequisite: MUSIC 243B. MUSIC 243B with a grade of B or better

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**MUSIC 245. Prospectus Research. 4-12 Units.**

Research and writing of the Dissertation Prospectus.

Prerequisite: MUSIC 244. MUSIC 244 with a grade of B or better

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**MUSIC 250. Directed Research. 4 Units.**

Preparation for qualifying exams and dissertation, or an individual research project resulting in a substantial paper or comparable documentation of the research results.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Music Majors only.

**MUSIC 276. Contemporary Ensemble. 2 Units.**

Chamber ensemble for the performance of contemporary music, including newly composed and improvised forms.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 290. Dissertation Research. 4-12 Units.**

Research and writing of the dissertation for the History and Music Theory Ph.D.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**MUSIC 299. Independent Study. 2-4 Units.**

Student-devised research/composition project, with faculty guidance, resulting in a formal paper/project. Taken only when materials studied lie outside regular departmental offerings or when students have no formal chance to pursue the subject.

Prerequisite: Graduate advisor approval required.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 399. University Teaching. 1-4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Networked Systems (NET SYS)

### Courses

**NET SYS 201. Computer and Communication Networks. 4 Units.**

Network architecture of the Internet, telephone networks, cable networks, and cell phone networks. Network performance models. Network performance models. Advanced concepts and implementations of flow and congestion control, addressing, internetworking, forwarding, routing, multiple access, streaming, and quality-of-service.

Prerequisite: EECS 148 or COMPSCI 132

Same as COMPSCI 232, EECS 248A.

Restriction: Graduate students only.

**NET SYS 202. Networking Laboratory. 4 Units.**

A laboratory-based introduction to basic networking concepts such as addressing, sub-netting, bridging, ARP, and routing. Network simulation and design. Structured around weekly readings and laboratory assignments.

Prerequisite: EECS 148 or COMPSCI 132

Same as COMPSCI 233.

**NET SYS 210. Advanced Networks. 4 Units.**

Design principles of networked systems, advanced routing and congestion control algorithms, network algorithms, network measurement, management, security, Internet economics, and emerging networks.

Prerequisite: NET SYS 201 or COMPSCI 232 or EECS 248A

Same as COMPSCI 234.

**NET SYS 230. Wireless and Mobile Networking. 4 Units.**

Introduction to wireless networking. The focus is on layers 2 and 3 of the OSI reference model, design, performance analysis, and protocols. Topics covered include: an introduction to wireless networking, digital cellular, next generation cellular, wireless LANs, and mobile IP.

Prerequisite: EECS 148 or COMPSCI 132

Same as COMPSCI 236.

**NET SYS 240. Network and Distributed Systems Security. 4 Units.**

Modern computer and networks security: attacks and countermeasures, authentication, identification, data secrecy, data integrity, authorization, access control, computer viruses, network security. Group communication and multicast security techniques. Covers secure e-commerce and applications of public key methods, digital certificates, and credentials.

Prerequisite: EECS 148 or COMPSCI 132

Same as COMPSCI 203.

**NET SYS 260. Middleware for Networked and Distributed Systems. 4 Units.**

Discusses concepts, techniques, and issues in developing distributed systems middleware that provides high performance and Quality of Service for emerging applications. Also covers existing standards (e.g., CORBA, DCOM, Jini, Espeak) and their relative advantages and shortcomings.

Prerequisite: An undergraduate-level course in operating systems and networks.

Same as COMPSCI 237.

**NET SYS 270. Topics in Networked Systems. 4 Units.**

Study of Networked concepts.

Repeatability: Unlimited as topics vary.

**NET SYS 295. Networked Systems Seminar. 1 Unit.**

Current research in networked systems. Includes talks by UCI faculty, visiting researchers, and Networked Systems graduate students.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## Neurobiology and Behavior (NEURBIO)

### Courses

**NEURBIO 200A. Research in Neurobiology and Behavior. 2-12 Units.**

Individual research with Neurobiology and Behavior faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 200B. Research in Neurobiology and Behavior. 2-12 Units.**

Individual research with Neurobiology and Behavior faculty.

Prerequisite: NEURBIO 200A

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 200C. Research in Neurobiology and Behavior. 2-12 Units.**

Individual research with Neurobiology and Behavior faculty.

Prerequisite: NEURBIO 200B

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 201A. Research in Neurobiology and Behavior. 2-12 Units.**

Individual research with Neurobiology and Behavior faculty.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 201B. Research in Neurobiology and Behavior. 2-12 Units.**

Individual research with Neurobiology and Behavior faculty.

Prerequisite: NEURBIO 201A

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 201C. Research in Neurobiology and Behavior. 2-12 Units.**

Individual research with Neurobiology and Behavior faculty.

Prerequisite: NEURBIO 201B

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 202A. Foundations of Neuroscience. 2 Units.**

Intended to expose students to critical reading and analysis of the primary neuroscience literature. Instructors from departments associated with the Interdepartmental Neuroscience Program participate and discuss topics of current interest.

Grading Option: Satisfactory/unsatisfactory only.

**NEURBIO 202B. Foundations of Neuroscience. 2 Units.**

Intended to expose students to critical reading and analysis of the primary neuroscience literature. Instructors from departments associated with the Interdepartmental Neuroscience Program participate and discuss topics of current interest.

Prerequisite: NEURBIO 202A

Grading Option: Satisfactory/unsatisfactory only.

**NEURBIO 206. Molecular Neuroscience. 5 Units.**

Surveys molecular and cellular mechanisms involved in neuronal function, including control of gene expression, post-transcriptional and post-translational processing, RNA and protein targeting, cell death mechanisms, and molecular genetic basis of neurological disorders. Overview of the molecular aspects of developmental neurobiology.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 207. Cellular Neuroscience. 5 Units.**

Neurophysiological and neurochemical mechanisms of electrical and chemical signaling in neurons. Topics include generation of resting- and action-potentials, voltage- and ligand-gated ion channels, second messenger systems, and synaptic transmission and integration.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 207L. Cellular Neuroscience Laboratory. 2 Units.**

Intensive hands-on laboratory experience of contemporary techniques for studying ion channels and synaptic function. Experiments include microelectrode recording, patch clamp, quantal analysis of synaptic transmission, heterologous expression of genes for channels and receptors, brain slice, and fluorescence calcium imaging.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 208. Systems Neuroscience. 5 Units.**

Study of the mammalian nervous system at the systems level. Anatomy and physiology of sensory, motor, and integrative functions.

Repeatability: May be taken for credit 2 times.

Same as ANATOMY 210A.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 209. Behavioral Neuroscience. 5 Units.**

Overview of fundamental conceptual and experimental issues in the neurobiology of learning and memory. The approach is a cross-level integration of research in molecular-genetic, cellular, circuit, systems, and behavioral analyses.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 220. Neural Coding, Computation, and Dynamics. 4 Units.**

Theoretical principles and biological mechanisms underlying how brains acquire, assimilate, store, and retrieve information, compute adaptive responses to external inputs, and how knowledge is extracted from experience to generate an internal model of the world.

Prerequisite: At least one upper-division course in the field of Neuroscience or one upper-division course in Cognitive Science or Machine Learning.

Concurrent with BIO SCI N174.

**NEURBIO 221. Scientific Presentation Skills. 1 Unit.**

A tutorial seminar on developing skills for presenting research to scientific audiences.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**NEURBIO 225. Rigor, Reproducibility, and Research Methods. 1 Unit.**

Understanding key concepts in experimental design, execution, and analysis that enhance or detract from scientific rigor.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**NEURBIO 227. Bioinformatics and Systems Biology. 4 Units.**

Students learn the fundamentals of bioinformatics, genomic approaches, and Linux and R program in order to analyze RNA-sequencing data.

Overlaps with ECO EVO 282, ECO EVO 283.

Restriction: Graduate students only.

**NEURBIO 228. Psychophysiological Methods in Clinical Research . 4 Units.**

Introduces the principal signals of psychophysiology and outlines how measures calculated from these signals can be applied in clinical research and practice.

Prerequisite: One graduate or undergraduate course in statistics.

Restriction: Graduate students only.

**NEURBIO 230. Epigenetics in Health and Disease . 4 Units.**

Focuses on the role of chromatin/nuclear structure organization (histone and DNA modification, chromatin remodeling, higher order chromatin structure and nuclear organization) on gene regulation, DNA replication and repair, relevant to development, metabolism, learning and memory, and human disease.

Prerequisite: MOL BIO 203 or MOL BIO 204 or NEURBIO 206

Same as BIOCHEM 225.

Restriction: Graduate students only.

**NEURBIO 231. Clinical and Epidemiological Aspects of Neurodegenerative Diseases. 4 Units.**

Clinical and epidemiological aspects of neurodegenerative disorders causing dementia will be reviewed, including AD, PD, FTD, HD and cerebrovascular disease. Seminar format will include student presentations and group discussion.

Restriction: Graduate students only.

**NEURBIO 232. Regenerative Neurobiology. 4 Units.**

Surveys the latest research on regenerative neurobiology. Both basic stem cell discoveries and their potential clinical application to brain disorders will be examined.

**NEURBIO 233. Neurobiology of Drug Addiction. 4 Units.**

Provides a comprehensive overview of topics in the addiction field, including drug pharmacology, models/approaches to investigate addiction, brain circuits, genetics, epigenetics, and the cellular and molecular biology of drug addiction.

Restriction: Graduate students only.

Concurrent with BIO SCI N121.

**NEURBIO 236. Cortex: Structure, Function, and Plasticity. 4 Units.**

Structured to include lectures and presentation of papers about cortex with emphasis on sensory-motor cortex. Both historical and current perspectives on cortical structure-function relationship will be critically evaluated.

**NEURBIO 237. Neurobiology of Brain Aging. 4 Units.**

Outlines some of the significant changes that occur in the aging brain, with a special emphasis on risk factors and protective strategies that promote successful brain aging. Topics include changes in synaptic plasticity, neurotrophic factors, and molecular mechanisms in aging.

Prerequisite: NEURBIO 209

**NEURBIO 239. Functional Imaging of the Nervous System. 4 Units.**

Overview of technical and applied aspects of imaging techniques available for studying the nervous system. The areas emphasized are cellular and subcellular imaging of neural function, systems-level imaging of brain function, and imaging of the human brain.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 240. Advanced Analysis of Learning and Memory. 4 Units.**

Advanced analysis of contemporary research concerning the nature and neurobiological bases of learning and memory. Special emphasis is given to time-dependent processes involved in memory storage.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 247. Programming for Neuroscience Research . 4 Units.**

A neuroscience-specific introduction to programming and data analysis using either MATLAB or Scientific PYTHON. Students will learn general programming skills and effective use of programming for data management, statistical analysis, and image analysis.

Overlaps with PSYCH 205A.

**NEURBIO 248. Topics in Neurobiology and Behavior. 4 Units.**

Studies in selected areas of Neurobiology and Behavior. Topics addressed vary each quarter.

Repeatability: May be taken for credit 3 times.

**NEURBIO 249. Electronics for Biologists. 4 Units.**

Basic principles of electricity; properties and use of discrete components and integrated circuits; circuit analysis and design. Intended for advanced students in the life sciences.

Same as PHYSIO 205.

**NEURBIO 254. Molecular Neurobiology. 4 Units.**

The application of genetic and recombinant DNA technology to neurobiology. Topics include the study of neuronal proteins which play important roles in the formation of synapses and synaptic transmission.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 255. Perspectives in Neuroscience: Past, Present, and Future. 4 Units.**

An overview of the conceptual and technical foundations of contemporary neuroscience from ancient times to the present. The subjects include synapses, neurons, brain organization, sensory, motor and regulatory systems, learning and memory, human brain function and dysfunction.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

Concurrent with BIO SCI N119.

**NEURBIO 257. Statistics for Neurobiologists. 4 Units.**

Introduction to common methods for statistical analysis used in neurobiology. Topics covered include t-tests, ANOVAs, correlations and regressions, general linear model, power analysis, and non-parametric tests.

Restriction: Graduate students only.

**NEURBIO 260. Auditory Neuroscience. 4 Units.**

Multidisciplinary overview of brain mechanisms of hearing. Emphasizes breadth of auditory function and research: single neurons to psychoacoustics, the cochlea to the cortex, and basic science to clinic.

Concurrent with BIO SCI N147.

**NEURBIO 290. Colloquium in Neurobiology and Behavior. 1.3 Unit.**

Presentation of contemporary research problems in neurobiology and behavior and related areas by invited speakers.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 292. Scientific Proposals for Neuroscience Trainees. 4 Units.**

Students learn how to effectively communicate scientific ideas and results. Activities include learning how to effectively write a scientific proposal, how to perform a coherent, persuasive slide presentation, and how to give meaningful, constructive review critiques.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 399. University Teaching. 1-4 Units.**

Limited to Teaching Assistants.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Neurology (NEUROL)

## Nursing Science (NUR SCI)

### Courses

**NUR SCI 90. Introduction to Pain Medicine. 2 Units.**

Gives students introductory knowledge in pain medicine.

**NUR SCI 92. Compassion in Health Care. 1 Unit.**

An overview of the importance of compassion in health care, providing examples from a variety of health care professions through lectures and discussion.

Grading Option: Pass/no pass only.

**NUR SCI 110W. Frameworks for Professional Nursing Practice. 5 Units.**

Conceptual frameworks for professional practice. Scope of professional nursing, jurisprudence and ethics, professional interpersonal relationships, and health care delivery systems in the context of the social, political, and economic environments. Socialization of the student for professional roles in nursing.

Corequisite: NUR SCI 112LA and NUR SCI 114A and NUR SCI 118A

Prerequisite: BIO SCI D170 and BIO SCI E109. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Nursing Science Majors only.

**(Ib)****NUR SCI 112LA. Foundations of Professional Practice. 3 Units.**

Development of skills in communication, interviewing, functional and physical health assessment across the life span, the art and science of human care, and clinical judgment.

Corequisite: NUR SCI 110W and NUR SCI 114A and NUR SCI 118A

Prerequisite: BIO SCI E109 and BIO SCI D170

Restriction: Nursing Science Majors only.

**NUR SCI 112LB. Foundations of Professional Practice. 4 Units.**

Development of skills in communication, interviewing, functional and physical health assessment across the life span, the art and science of human care, and clinical judgment.

Corequisite: NUR SCI 114B and NUR SCI 118B and NUR SCI 125 and NUR SCI 135

Prerequisite: NUR SCI 112LA and NUR SCI 110W and NUR SCI 114A and NUR SCI 118A

Restriction: Nursing Science Majors only.

**NUR SCI 114A. Applied Pharmacology I. 2 Units.**

Presents principles of pharmacology applied to interventions in pathophysiologic states across the life span. Discussion of the major drug groups with implications for monitoring, drug administration, toxicity, and patient education are included.

Corequisite: NUR SCI 110W and NUR SCI 118A and NUR SCI 112LA

Prerequisite: BIO SCI E109 and BIO SCI D170

Restriction: Nursing Science Majors only.

Concurrent with NUR SCI 264A.

**NUR SCI 114B. Applied Pharmacology II. 2 Units.**

Presents principles of pharmacology applied to interventions in pathophysiologic states across the life span. Discussion of the major drug groups with implications for monitoring, drug administration, toxicity, and patient education are included.

Corequisite: NUR SCI 118B and NUR SCI 112LB and NUR SCI 125 and NUR SCI 135

Prerequisite: NUR SCI 114A and NUR SCI 118A and NUR SCI 110W and NUR SCI 112LA

Restriction: Nursing Science Majors only.

Concurrent with NUR SCI 264B.

**NUR SCI 116. Human Growth and Development through the Lifespan. 4 Units.**

Examines theories and concepts of typical human development throughout the life cycle, from the time of conception through adulthood, and familiarizes students with the many forces that shape individual development, including family, society, and culture.

Prerequisite: PSYCH 7A or PSY BEH 9. PSYCH 7A with a grade of C or better. PSY BEH 9 with a grade of C or better

Repeatability: May be taken for credit 2 times.

Restriction: Program in Nursing Science students only.

**NUR SCI 118A. Human Health and Disease I. 2 Units.**

Presents content on pathologic alterations in physiologic processes in cells, tissues, organs, and systems across the life span. Emphasis on critical thinking, application of concepts to clinical practice, and related research.

Corequisite: NUR SCI 114A and NUR SCI 112LA and NUR SCI 110W

Prerequisite: BIO SCI E109 and BIO SCI D170

Restriction: Nursing Science Majors only.

Concurrent with NUR SCI 268A.

**NUR SCI 118B. Human Health and Disease II. 2 Units.**

Presents content on pathologic alterations in physiologic processes in cells, tissues, organs, and systems across the life span. Emphasis on critical thinking, application of concepts to clinical practice, and related research.

Corequisite: NUR SCI 114B and NUR SCI 112LB and NUR SCI 125 and NUR SCI 135

Prerequisite: NUR SCI 112LA and NUR SCI 114A and NUR SCI 118A and NUR SCI 110W

Restriction: Nursing Science Majors only.

Concurrent with NUR SCI 268B.

**NUR SCI 120. Adult Health Care. 8 Units.**

Restorative, perioperative, supportive care of adults with acute/chronic alterations in oxygenation, regulation, immune response, elimination, metabolism, mobility, cognition, and substance abuse. Concurrent practicum occurs in inpatient medical-surgical units, perioperative units and outpatient clinics utilizing critical thinking and research skills.

Corequisite: NUR SCI 140

Prerequisite: NUR SCI 112LB and NUR SCI 114B and NUR SCI 118B and NUR SCI 125 and NUR SCI 135

Restriction: Nursing Science Majors only.

Concurrent with NUR SCI 266.

**NUR SCI 125. Research Methods and Applications in Health Care. 4 Units.**

Foundational concepts of research in health care. Emphasizes critical evaluation and interpretation of research for application in practice.

Corequisite: NUR SCI 112LB and NUR SCI 114B and NUR SCI 118B and NUR SCI 135

Prerequisite: NUR SCI 110W and NUR SCI 112LA and NUR SCI 114A and NUR SCI 118A. And a basic statistics course.

Restriction: Nursing Science Majors only.

**NUR SCI 130. Maternity and Women's Health Care. 8 Units.**

Provides didactic and clinical experiences in nursing management of women's wellness across the lifespan, the childbirth process, and newborn care. Incorporates concepts of family-centered care, teamwork and collaboration, patient safety, quality improvement and informatics, utilizing an evidence-based practice approach.

Corequisite: NUR SCI 132

Prerequisite: NUR SCI 120 and NUR SCI 140 and PSYCH 120D

Restriction: Nursing Science Majors only.

Concurrent with NUR SCI 273.

**NUR SCI 132. Pediatrics: Care of Children and Families. 7 Units.**

Provides didactic and clinical experiences in nursing management of infants, children, and adolescents with acute, chronic and/or life-threatening conditions. Incorporates concepts of family-centered care, teamwork and collaboration, patient safety, quality improvement and informatics, utilizing an evidence-based practice approach.

Corequisite: NUR SCI 130

Prerequisite: NUR SCI 120 and NUR SCI 140 and PSYCH 120D

Restriction: Nursing Science Majors only.

Concurrent with NUR SCI 272.

**NUR SCI 133. Complementary and Integrative Health . 2 Units.**

Complementary and integrative healthcare emphasized a holistic, patient-focused approach to healthcare and wellness. Key research is critically evaluated and applications for improving patient care emphasized. Knowledge and skills are developed through lectures, guest speakers, and discussion.

**NUR SCI 135. Older Adult Health Care. 2 Units.**

Theories of aging and application of principles of gerontology in health maintenance of older adults. Concepts and principles of rehabilitation and palliative care.

Corequisite: NUR SCI 112LB and NUR SCI 114B and NUR SCI 118B and NUR SCI 125

Prerequisite: NUR SCI 112LA and NUR SCI 114A and NUR SCI 118A and NUR SCI 110W

Restriction: Nursing Science Majors only.

Concurrent with NUR SCI 265.

**NUR SCI 140. Human Behavior and Mental Health Care. 7 Units.**

Biopsychosocial and cultural influences on promotion and restoration of mental health in adults and adolescents. Assessment, classification, and care of clients with mental health problems and/or substance abuse. Concurrent practicum in adult/adolescent inpatient psychiatric units and outpatient mental health clinics.

Corequisite: NUR SCI 120

Prerequisite: NUR SCI 112LB and NUR SCI 114B and NUR SCI 118B and NUR SCI 125 and NUR SCI 135

Restriction: Nursing Science Majors only.

Concurrent with NUR SCI 267.

**NUR SCI 150. Critical and Specialty Health Care. 6 Units.**

Delivery of patient-centered care for individuals with life-threatening alterations in health status utilizing technology and pharmacology for life support. Concurrent practicum in critical care units emphasizes collaboration, team work, and quality improvement in safe care delivery.

Corequisite: NUR SCI 160 and NUR SCI 179A

Prerequisite: NUR SCI 130 and NUR SCI 132

Restriction: Nursing Science Majors only.

Concurrent with NUR SCI 274.

**NUR SCI 160. Leadership and Management in Health Care. 4 Units.**

Principles, concepts, and theories related to organizations, management, leadership, decision-making, and group process applied to the delivery of health care. The professional nurse using evidenced-based practice, collaboration, and informatics is incorporated in concurrent practicum emphasizing safe patient care delivery.

Corequisite: NUR SCI 150 and NUR SCI 179A

Prerequisite: NUR SCI 130 and NUR SCI 132

Restriction: Nursing Science Majors only.

Concurrent with NUR SCI 276.

**NUR SCI 170. Community-Based Health Care. 6 Units.**

Epidemiology, primary health care promotion, and disease prevention applied to nursing care of individuals, families, groups, and communities. Includes sociocultural, political, economic, and environmental influences. Concepts and methods of assessing populations and communities incorporated in concurrent practicum.

Corequisite: NUR SCI 175L and NUR SCI 179BW

Prerequisite: NUR SCI 150 and NUR SCI 160 and NUR SCI 179A

Restriction: Nursing Science Majors only.

Concurrent with NUR SCI 271.

**NUR SCI 175L. Clinical Preceptorship. 6 Units.**

Independent study course focusing on critical thinking skills for nursing practice in selected clinical areas of interest to the student. The clinical experience focuses on core competencies: patient-centered care, evidence-based practice, quality improvement, safety, and informatics.

Corequisite: NUR SCI 170 and NUR SCI 179BW

Prerequisite: NUR SCI 150 and NUR SCI 160 and NUR SCI 179A

Grading Option: Pass/no pass only.

Restriction: Nursing Science Majors only.

Concurrent with NUR SCI 275.

**NUR SCI 179AW. Scholarly Concentration I. 2 Units.**

Focuses on analysis and use of evidence to improve nursing practice. Emphasis is to develop critical analysis skills synthesizing a body of research evidence for clinical issues on a formal, collaborative written paper.

Corequisite: NUR SCI 150 and NUR SCI 160

Prerequisite: NUR SCI 130 and NUR SCI 132

Restriction: Nursing Science Majors only.

**(Ib)****NUR SCI 179B. Scholarly Concentration II. 2 Units.**

Continuation of evidence-based research and application for nursing practice. Emphasis is to develop a collaborative quality improvement project with clinical nurses applying the evidence to improve nursing practice.

Corequisite: NUR SCI 170 and NUR SCI 175L

Prerequisite: NUR SCI 179A

Restriction: Nursing Science Majors only.

**NUR SCI 199. Independent Study in Nursing Science. 1-4 Units.**

Original research with Nursing Science faculty.

Repeatability: May be repeated for credit unlimited times.

**NUR SCI 200. Research Methods and Evaluation for Evidence-Based Practice. 3 Units.**

Clinical research methods and evaluation procedures relevant to evidence-based advanced nursing practice.

Prerequisite: Undergraduate statistics course; undergraduate nursing research course.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 210. Advanced Pathophysiology. 3 Units.**

Principles of normal body functioning and pathophysiologic changes that occur as a result of compensatory mechanisms and disease. Physical and psychological aspects of altered health are explored from the cellular to the level of the total body system.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 212. Philosophy of Science for Nursing Scholarship. 4 Units.**

Development of philosophy of science in relation to nursing science, scholarship, and practice; emphasis on inquiry, scientific reasoning, and contemporary philosophical thought; historical and contemporary influences on nursing science theory development; evaluation/analysis of interdisciplinary theory and application to nursing research.

Restriction: Graduate students only.

**NUR SCI 215. Health Promotion/Disease Prevention. 3 Units.**

Covers the evidence-based national clinical preventive services guidelines for health promotion and disease prevention. Emphasizes counseling about personal health behaviors, screening tests for the early detection of risk factors and disease, immunizations and chemo-prophylaxis.

Restriction: Graduate students only.

**NUR SCI 220. The Ecology of Healthy Communities. 2 Units.**

Nursing science research contributions and opportunities as they pertain to the ecology of health in local, national, and global communities. Emphasis on methodological and ethical issues, research gaps, and clinical translational opportunities.

Restriction: Graduate students only.

**NUR SCI 222A. Seminar in Clinical Translational Science. 2 Units.**

Discussion of clinical translational science methods in the context of nursing science research. Emphasis placed on interdisciplinary and community participatory research approaches.

Prerequisite: Consent of the instructor is required.

Restriction: Graduate students only.

**NUR SCI 222B. Seminar in Clinical Translational Science. 2 Units.**

Discussion of clinical translational science methods in the context of nursing science research. Emphasis placed on interdisciplinary and community participatory research approaches. Course may be offered online.

Prerequisite: NUR SCI 222A

Restriction: Graduate students only.

**NUR SCI 223A. Biostatistics for Health Sciences I. 4 Units.**

Helps students to develop skills necessary for applying statistical principles and practices in health research. This is achieved through in-depth review of existing research articles and hands-on statistical programming exercises.

Restriction: Graduate students only.

**NUR SCI 223B. Biostatistics for Health Sciences II. 4 Units.**

Introduces advanced methods of statistical analysis and research design used in health research. These include linear, logistic, Poisson regression, and a brief introduction to regression models for correlated data.

Prerequisite: NUR SCI 223A

Restriction: Graduate students only.

**NUR SCI 224. Research Designs in Nursing Science. 4 Units.**

Provides an introduction to qualitative and quantitative research designs, methods, and analyses in nursing science. Evaluation of measurement and population issues, data management, ethics, analytical approaches, mixed methods work, and translational potential in the context of research.

Restriction: Graduate students only. Nursing Science Majors only.

**NUR SCI 225A. Advanced Pharmacology I. 3 Units.**

Principles of pharmacology that serve as a foundation for the pharmacotherapeutic management of patients evaluated and treated by advanced practice nurses. Emphasis includes the application of pharmacokinetic and pharmacodynamic principles.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 225B. Advanced Pharmacology II. 2 Units.**

Principles of pharmacology that serve as a foundation for the pharmacotherapeutic management of patients evaluated and treated by advanced practice nurses. Emphasis includes the application of pharmacokinetic and pharmacodynamic principles.

Prerequisite: NUR SCI 225A. NUR SCI 225A with a grade of B or better

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 226. Theoretical and Conceptual Frameworks. 4 Units.**

Explores the history, roles, and uses of theory in nursing and health scholarship. Students examine, analyze, and utilize the components of theory, theory construction, concept analysis, and theory evaluation.

Restriction: Graduate students only.

**NUR SCI 227A. Grant Writing I. 4 Units.**

Introduction to the principles and methods of proposal writing used in preparing grant proposals. Provides content on the process for good proposal development, key elements and sections of proposal, necessary information to include in grant proposal and development of budget.

Prerequisite: NUR SCI 212 and NUR SCI 233 and NUR SCI 226 and NUR SCI 246 and NUR SCI 247

Restriction: Graduate students only.

**NUR SCI 227B. Grant Writing II. 2 Units.**

Provides a continuation of skill building in preparing a grant proposal, with emphasis on developing the educational training plan, budget and budget justification, the IRB and ethics component, and letters of support for a career-development grant.

Prerequisite: NUR SCI 227A. NUR SCI 227A with a grade of B or better

Restriction: Graduate students only.

**NUR SCI 230. Advanced Health and Physical Assessment. 3 Units.**

Application of theoretical concepts related to comprehensive health assessment of patients across the lifespan. Analysis, synthesis, and application of comprehensive health assessment data.

Corequisite: NUR SCI 230L

Restriction: Graduate students only.

**NUR SCI 230L. Advanced Health and Physical Assessment Laboratory. 1 Unit.**

Clinical laboratory course for the application of concepts related to comprehensive health assessment of patients across the lifespan.

Corequisite: NUR SCI 230

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 231. DNP Prologue . 2 Units.**

An onsite 2 ½ day immersive experience that provides an introduction to DNP scholarship and foundations essential for academic success in a doctoral program. Preparatory activities and onsite individual and group assignments are completed.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 232. Leadership and Professional Collaboration in Healthcare. 4 Units.**

Explore and debate the relationship between various leadership and collaboration models, theories health care practice, and outcomes. Prepares DNP graduates to assume leadership roles across the healthcare spectrum.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 233. Appraisal and Translation of Evidence for Practice . 3-4 Units.**

Provides advanced concepts on research methods and measurement strategies that are applicable to support the advanced practice nurse to access, evaluate, and utilize data from various sources including research, quality improvement initiatives, and information technology origins to achieve improvements.

Prerequisite: Consent of the instructor is required.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 234. Health Politics and Policy. 4 Units.**

Participants will analyze, apply, and evaluate current health policy-related literature, engage in the process of health policy development within professional, regulatory, or administrative environments, and develop an evidence-based health policy proposal across the spectrum of health care systems.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 235. DNP Scholarly Project I: Conceptualization and Planning . 1 Unit.**

Students gain the knowledge, skills, and abilities necessary to develop an evidence-based project plan and proposal. Structured didactic content and application of the Student's DNP Scholarly Project. First of four DNP Scholarly Project courses.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 236. Social Determinants of Health and Health Equity . 3 Units.**

The four components of the Clinical Prevention and Population Health Framework: evidence-based practice, clinical preventive service and health promotion, health systems and policy, and population health and community aspects of practice with emphasis on ethical care delivery.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 237. DNP Intersession. 2 Units.**

Provides DNP students an opportunity to present and receive faculty and peer feedback on their DNP project plan. Recommendations related to practical data collection and information gathering approaches and data analysis are also emphasized.

Prerequisite: NUR SCI 235. NUR SCI 235 with a grade of B or better

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 238. Foundations of Health Systems and Health Economics. 3 Units.**

Foundational understanding of how healthcare is financed in the U.S. Explores economic theories and policies, various types of healthcare organizations, and healthcare delivery systems. Healthcare finance is discussed at national and practice levels.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 239. The Science of Change, Quality Improvement, and Program Evaluation. 4 Units.**

Intro to science of quality improvement and program evaluation. Focus on info system technology and its application in quality improvement. Focus placed on the role of the advanced practice nurse leader in developing and leading clinical quality and safety initiatives.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 240. DNP Scholarly Project II: Proposal. 1 Unit.**

Developing a full proposal that reflects synthesis of the student's knowledge from prior coursework and work in an area of interest or expertise under the direction of a faculty mentor. Second of four DNP Scholarly Project course sequence.

Prerequisite: NUR SCI 237. NUR SCI 237 with a grade of B or better

Restriction: Graduate students only. Consent of instructor required to enroll.

**NUR SCI 241. DNP Scholarly Project III: Implementation and Evaluation. 1 Unit.**

Continued development of knowledge, skills, and abilities to implement the chosen DNP proposal. Students receive direction from a faculty mentor and peer feedback as they become engaged in the microsystem where they are implementing their DNP Scholarly Project.

Prerequisite: NUR SCI 240. NUR SCI 240 with a grade of B or better

Restriction: Graduate students only.

**NUR SCI 242. DNP Scholarly Project IV: Implications . 1 Unit.**

Selection and implementation of evidence-based interventions supported through informatics and technological advances and measurement of outcomes in a selected practicum site as applicable. Includes reflection and mapping of the DNP Scholarly Project with DNP Essentials as published.

Prerequisite: NUR SCI 241. NUR SCI 241 with a grade of B or better

Restriction: Graduate students only.

**NUR SCI 243. DNP Epilogue. 2 Units.**

DNP students develop DNP competency through the presentation of their project and development of a professional manuscript. Individual direction from the DNP Project Team and peer feedback are provided throughout the course.

Prerequisite: NUR SCI 242. NUR SCI 242 with a grade of B or better

Restriction: Graduate students only.

**NUR SCI 245. Primary Care Adult/Gerontology Acute Common Conditions . 3 Units.**

Assessment and management of acute or episodic problems affecting patients and families across the lifespan. Diagnostics, pharmacology, pathophysiology, and therapeutics are integrated. Concepts of quality health care, resource management, and shared-decision making are emphasized.

Prerequisite: NUR SCI 210 and NUR SCI 230. NUR SCI 210 with a grade of B or better. NUR SCI 230 with a grade of B or better

Restriction: Graduate students only.

**NUR SCI 246. Qualitative Research Designs in Nursing Science. 4 Units.**

Seminar in qualitative research philosophies, methods, and analysis in nursing science clinical research. Consideration of population access and sampling, ethics, data management, analytical approaches, and translational potential.

Restriction: Graduate students only.

**NUR SCI 247. Quantitative Research Designs in Nursing Science. 4 Units.**

Seminar in experimental and survey research designs, methods, and analysis in nursing science clinical research. Consideration of measurement issues, mixed methods models, population access and sampling, data management, analytical approaches, and translational potential.

Prerequisite: NUR SCI 212

Restriction: Graduate students only.

**NUR SCI 248. Curricular Design for the Health Professions. 3 Units.**

Introduces students to the theoretical foundations, essential components, and accreditation standards for curriculum development at the program level. Outcome competencies are addressed as they apply to the development and evaluation of an educational program to meet society's diverse healthcare needs.

Restriction: Graduate students only.

**NUR SCI 249. Transformational Leadership in Education for the Health Professions. 4 Units.**

Students are introduced to the role of the nurse educator as change agent, leader, and scholar and provided experience in planning learner-centered learning activities that are engaging and effective in achieving desired student performance.

Restriction: Graduate students only.

**NUR SCI 250. Primary Care Women's Health. 2 Units.**

Primary health care needs of women including adolescent, adult, and aging adults. Emphasizes assessment, diagnosis, prevention, management, and education of common gynecologic and family planning health care needs.

Prerequisite: NUR SCI 210 and NUR SCI 230. NUR SCI 210 with a grade of B or better. NUR SCI 230 with a grade of B or better

Restriction: Graduate students only. Consent of instructor required to enroll.

**NUR SCI 251. Nursing Informatics . 4 Units.**

Provides an overview of nursing informatics topics for practice.

Restriction: Graduate students only.

**NUR SCI 255. Primary Care Obstetrics. 2 Units.**

Assessment and management of women during pregnancy. Diagnostics, pharmacology, pathophysiology and therapeutics are integrated. Includes assessment, differential diagnosis, management, patient/family education, and counseling related to normal pregnancy care.

Prerequisite: NUR SCI 210 NUR SCI 230. NUR SCI 210 with a grade of B or better. NUR SCI 230 with a grade of B or better

Restriction: Graduate students only. Consent of instructor required to enroll.

**NUR SCI 260A. Primary Care Adult/Gerontology Chronic Conditions . 3 Units.**

Assessment and management of acute or episodic problems affecting adult and geriatric patients and their families. Diagnostics, pharmacology, pathophysiology, and therapeutic are integrated.

Prerequisite: NUR SCI 245. NUR SCI 245 with a grade of B or better

Restriction: Graduate students only. Consent of instructor required to enroll.

**NUR SCI 262. Foundations of Professional Nursing Practice. 4 Units.**

Focuses on the development of skills in therapeutic communication, interviewing, functional assessment across the lifespan, the art and science of human care, and clinical judgment. Faculty-facilitated, participatory peer group, and self-learning laboratory activities are included.

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

**NUR SCI 263. Frameworks for Professional Nursing Practice. 4 Units.**

A theory-intensive course focused on conceptual frameworks for professional nursing practice. Topics address the professional, political, and economic contexts of nursing practice, with an emphasis on jurisprudence and ethics, professional interpersonal relationships, and nursing's role in the care delivery system.

Restriction: Graduate students only.

**NUR SCI 264A. Applied Pharmacology I. 2 Units.**

Principles of pharmacology applied to intervention in pathophysiologic states across the life span. Discussion of the major drug groups with implications for monitoring, drug administration, toxicity, and patient education included. Physical, psychological, social, and cultural factors affecting drug administration.

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

Concurrent with NUR SCI 114A.

**NUR SCI 264B. Applied Pharmacology II. 2 Units.**

Principles of pharmacology applied to intervention in pathophysiologic states across the life span. Discussion of the major drug groups with implications for monitoring, drug administration, toxicity, and patient education included. Physical, psychological, social, and cultural factors affecting drug administration.

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

Concurrent with NUR SCI 114B.

**NUR SCI 265. Older Adult Health Care. 2 Units.**

Analyzes the interaction of physical, pathophysiological, psychological, social, cultural, and health care policy factors influencing the health and health care of older adults. Topics include health risk factors, health assessment, acute illness and chronic conditions, and ethical issues.

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

Concurrent with NUR SCI 135.

**NUR SCI 266. Adult Health Care . 8 Units.**

Focuses on the restorative, peri-operative, and supportive nursing management of adults with acute or chronic alterations in oxygenation, regulation, immune response, elimination, metabolism, mobility, cognition, and substance abuse. Diagnostics, pharmacology, pathophysiology, and therapeutics will be integrated.

Prerequisite: NUR SCI 200 and NUR SCI 262 and NUR SCI 264A and NUR SCI 264B and NUR SCI 268A and NUR SCI 268B and NUR SCI 265 and NUR SCI 281

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

Concurrent with NUR SCI 120.

**NUR SCI 267. Human Behavior and Mental Health Nursing . 7 Units.**

Focuses on nursing management of individuals across the lifespan with alterations in mental health. Mental health promotion and crisis intervention, chemical dependency, acute and chronic care for psychiatric conditions, rehabilitation, and recovery will be addressed.

Prerequisite: NUR SCI 200 and NUR SCI 262 and NUR SCI 264A and NUR SCI 264B and NUR SCI 268A and NUR SCI 268B and NUR SCI 265 and NUR SCI 281

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

Concurrent with NUR SCI 140.

**NUR SCI 268A. Pathophysiology I . 2 Units.**

Focuses on pathologic alterations in physiologic processes in cells, tissues, organs, and systems across the life span. Content includes disease processes, linkage of relevant physiology to disease states, and factors that influence epidemiology and pathophysiology.

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

Concurrent with NUR SCI 118A.

**NUR SCI 268B. Pathophysiology II . 2 Units.**

Focuses on pathologic alterations in physiologic processes in cells, tissues, organs, and systems across the life span. Content includes disease processes, linkage of relevant physiology to disease states, and factors that influence epidemiology and pathophysiology.

Prerequisite: NUR SCI 268A

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

Concurrent with NUR SCI 118B.

**NUR SCI 270. Primary Care Pediatrics. 2 Units.**

Assessment and management of acute or episodic problems affecting pediatric patients and their families. Diagnostics, pharmacology, pathophysiology, and therapeutics are integrated.

Prerequisite: NUR SCI 210 and NUR SCI 230. NUR SCI 210 with a grade of B or better. NUR SCI 230 with a grade of B or better

Restriction: Graduate students only. Consent of instructor required to enroll.

**NUR SCI 271. Community-Based Health Care . 6 Units.**

Epidemiology, primary health care promotion, and disease prevention applied to nursing care of individuals, families, groups, and communities. Includes sociocultural, political, economic, and environmental influences. Concepts and methods of assessing populations and communities incorporated in concurrent practicum.

Prerequisite: NUR SCI 215 and NUR SCI 274 and NUR SCI 276

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

Concurrent with NUR SCI 170.

**NUR SCI 272. Pediatrics: Care of Children and Families. 7 Units.**

Provides didactic and clinical experiences in nursing management of infants, children, and adolescents with acute, chronic, and/or life-threatening conditions. Incorporates concepts of family-centered care, teamwork and collaboration, patient safety, quality improvement and informatics, utilizing an evidence-based practice approach.

Prerequisite: NUR SCI 266 and NUR SCI 267

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

Concurrent with NUR SCI 132.

**NUR SCI 273. Maternity and Women's Health Care. 8 Units.**

Provides didactic and clinical experiences in nursing management of women's wellness across the lifespan, the childbirth process, and newborn care. Incorporates concepts of family-centered care, teamwork and collaboration, patient safety, quality improvement and informatics, utilizing an evidence-based practice approach.

Prerequisite: NUR SCI 266 and NUR SCI 267

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

Concurrent with NUR SCI 130.

**NUR SCI 274. Critical and Specialty Health Care. 6 Units.**

Focuses on the restorative, supportive care of individuals with life-threatening alterations in health status utilizing technology and pharmacology for life support. The course includes pathophysiology, diagnostics, monitoring, pharmacology, therapeutics, and evidence-based management interventions will be integrated.

Prerequisite: NUR SCI 272 and NUR SCI 273

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

Concurrent with NUR SCI 150.

**NUR SCI 275. Clinical Preceptorship. 6 Units.**

Independent study course focusing on in-depth clinical nursing practice in a selected clinical area of interest to the graduate student. Students are mentored by a preceptor who is an expert clinician in the area.

Prerequisite: NUR SCI 215 and NUR SCI 274 and NUR SCI 276

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

Concurrent with NUR SCI 175L.

**NUR SCI 276. Leadership and Management in Health Care. 4 Units.**

Explores the professional nurse as leader and manager of a health care team. Principles and theories related to organizations, leadership, decision-making, and group process are applied to the delivery of health care at the individual and population levels.

Prerequisite: NUR SCI 272 and NUR SCI 273

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

Concurrent with NUR SCI 160.

**NUR SCI 279A. Frameworks for the Advanced Practice Registered Nursing Role: Nurse Practitioner . 2 Units.**

Orientation to the scope and standards of advanced practice registered nursing pertinent to the APRN role. Principles of jurisprudence, ethics, and advocacy will be introduced along with conceptual frameworks for advanced nursing practice.

Restriction: Graduate students only.

**NUR SCI 281. Professional Issues in Nursing . 3 Units.**

Provides an orientation to the scope and standards of professional nursing practice for master's students. The social, political, and economic environments affecting health care delivery systems and the ethics of professional nursing practice are analyzed.

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

**NUR SCI 282. Compassionate Care with Underserved Populations. 2-3 Units.**

Addresses theory/research on health risk factors (e.g., psychiatric illness, sociocultural and economic characteristics) that impact patient health and well-being across the lifespan. Emphasis is on cultural awareness, lifestyle modification, community resources, and communication/coping strategies to promote well-being.

Restriction: Graduate students only.

**NUR SCI 283. Primary Care Procedures. 2 Units.**

Introduces the theoretical basis for common procedures performed in primary care clinical practice. Focus includes EKG interpretation, x-ray interpretation, minor surgery, and orthopaedic procedures.

Prerequisite: NUR SCI 245. NUR SCI 245 with a grade of B or better

Restriction: Graduate students only. Consent of instructor required to enroll.

**NUR SCI 284. Scholarly Concentration. 3 Units.**

Independent study focusing on critique, analysis, and synthesis of research evidence as a basis for graduate practice nursing in an area of interest to the student.

Prerequisite: NUR SCI 200

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

**NUR SCI 285. DNP APRN Practicum I. 2 Units.**

Clinical application of theory and research related to the advanced assessment and health promotion of patients across the lifespan.

Prerequisite: NUR SCI 210 and NUR SCI 230 and (NUR SCI 230L or NUR SCI 231L). NUR SCI 210 with a grade of B or better. NUR SCI 230 with a grade of B or better. NUR SCI 230L with a grade of B or better. NUR SCI 231L with a grade of B or better

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**NUR SCI 286. DNP APRN Practicum II. 2 Units.**

Clinical field study applying theory, research, and developing clinical skills related to the provision of care to patients and their families in increasingly complex clinical situations.

Prerequisite: NUR SCI 285. NUR SCI 285 with a grade of B or better

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Consent of instructor required to enroll.

**NUR SCI 287. DNP APRN Practicum III. 6 Units.**

Clinical application of theory and research through clinical experiences in selected primary care settings designed to provide students with competencies in the assessment, diagnosis, management, and education/counseling in selected populations.

Prerequisite: NUR SCI 286. NUR SCI 286 with a grade of B or better

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Consent of instructor required to enroll.

**NUR SCI 288. DNP APRN Practicum IV. 7 Units.**

Continued clinical application of theory and research through clinical experiences in selected primary care settings designed to provide students with competencies in the assessment, diagnosis, management, and education/counseling in selected populations.

Prerequisite: NUR SCI 287. NUR SCI 287 with a grade of B or better

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Consent of instructor required to enroll.

**NUR SCI 289. DNP APRN Practicum V. 8 Units.**

Culminating clinical experience serves as a transition from the student role to that of the advanced practice nurse.

Prerequisite: NUR SCI 288. NUR SCI 288 with a grade of B or better

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Consent of instructor required to enroll.

**NUR SCI 290. DNP APRN Practicum VI. 4 Units.**

Through continued clinical experience, students demonstrate increased responsibility and accountability for performance as an advanced practice nurse and clinical scholar, synthesizing knowledge of pathophysiology and disease management, evidence-based guidelines, anticipatory guidance, models of provider-patient communication, and provision of educational resources.

Prerequisite: NUR SCI 289. NUR SCI 289 with a grade of B or better

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Consent of instructor required to enroll.

**NUR SCI 291. DNP Practicum I. 4-8 Units.**

Implementation and evaluation of an evidence-based, DNP project in an area of advanced practice in partnership with a selected agency or organization that solves a practice problem or improves population health, educational, or performance outcomes.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**NUR SCI 292. DNP Practicum II. 5-10 Units.**

Implementation and evaluation of an evidence-based, DNP project in an area of advanced practice in partnership with a selected agency or organization that solves a practice problem or improves population health, educational, or performance outcomes.

Prerequisite: NUR SCI 291. NUR SCI 291 with a grade of B or better

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Consent of instructor required to enroll.

**NUR SCI 293. DNP Practicum III. 4-8 Units.**

Implementation and evaluation of an evidence-based, DNP project in an area of advanced practice in partnership with a selected agency or organization that solves a practice problem or improves population health, educational, or performance outcomes.

Prerequisite: NUR SCI 292. NUR SCI 292 with a grade of B or better

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Consent of instructor required to enroll.

**NUR SCI 294. Directed Study in Vulnerable Populations. 1-4 Units.**

Independent study that focuses on individually designed clinical learning experiences and goals within a selected vulnerable population, such as the homeless, veterans, minority groups, etc. Students work in a clinical setting addressing health care needs of the vulnerable population(s).

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 2 times.

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

**NUR SCI 296. Doctoral Dissertation Reading and Writing. 4-12 Units.**

Dissertation research with Nursing Sciences faculty.

Prerequisite: Advancement to candidacy.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**NUR SCI 298. Directed Studies in Nursing Science. 1-12 Units.**

Directed study with Nursing Science faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**NUR SCI 299. Independent Study in Nursing Science. 1-12 Units.**

Independent research with Nursing Science faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**NUR SCI 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Ophthalmology (OPHTHAL)

## Pathology and Laboratory Medicine (PATH)

### Courses

**PATH 200A. Research in Experimental Pathology. 2-12 Units.**

Independent research for the Ph.D. program within the laboratories of graduate training faculty in Experimental Pathology.

Corequisite: PATH 203A

Repeatability: Unlimited as topics vary.

**PATH 200B. Research in Experimental Pathology. 2-12 Units.**

Independent research for the Ph.D. program within the laboratories of graduate training faculty in Experimental Pathology.

Corequisite: PATH 203B

Repeatability: Unlimited as topics vary.

**PATH 200C. Research in Experimental Pathology. 2-12 Units.**

Independent research for the Ph.D. program within the laboratories of graduate training faculty in Experimental Pathology.

Corequisite: PATH 203C

Repeatability: Unlimited as topics vary.

**PATH 200R. Research in Experimental Pathology for First-Year Students. 2-12 Units.**

Independent research within the laboratories of graduate training faculty in Experimental Pathology for first-year Ph.D. students.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

**PATH 203A. Advanced Studies in Experimental Pathology. 1 Unit.**

A tutorial course for Ph.D. students in Experimental Pathology entailing attendance at Departmental seminars and critical reading of the scientific literature.

Corequisite: PATH 200A

Repeatability: May be repeated for credit unlimited times.

**PATH 203B. Advanced Studies in Experimental Pathology. 1 Unit.**

A tutorial course for Ph.D. students in Experimental Pathology entailing attendance at Departmental seminars and critical reading of the scientific literature.

Corequisite: PATH 200B

Repeatability: May be repeated for credit unlimited times.

**PATH 203C. Advanced Studies in Experimental Pathology. 1 Unit.**

A tutorial course for Ph.D. students in Experimental Pathology entailing attendance at Departmental seminars and critical reading of the scientific literature.

Corequisite: PATH 200C

Repeatability: May be repeated for credit unlimited times.

**PATH 204A. Experimental Pathology Research Seminar. 1 Unit.**

Seminar series for graduate students in Experimental Pathology. Students attend seminars and, beginning in their third year of graduate study, present one formal seminar on their graduate research.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PATH 204B. Experimental Pathology Research Seminar. 1 Unit.**

Seminar series for graduate students in Experimental Pathology. Students attend seminars and, beginning in their third year of graduate study, present one formal seminar on their graduate research.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PATH 204C. Experimental Pathology Research Seminar. 1 Unit.**

Seminar series for graduate students in Experimental Pathology. Students attend seminars and, beginning in their third year of graduate study, present one formal seminar on their graduate research.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PATH 221. Immunopathogenic Mechanisms of Disease. 3 Units.**

Examination of the mechanisms underlying disease states mediated by immune dysregulation. Topics include mechanisms of immune evasion by cancer, diseases mediated by cytokine dysregulation, role of the microbiome of the GI tract and other disease sites, and adoptive T-cell therapy.

Prerequisite: MMG 215

Same as MMG 221.

Restriction: Graduate students only.

**PATH 225. Molecular Mechanisms of Human Disease. 3 Units.**

Provides an overview of the molecular mechanisms of human diseases, including neurologic, hematologic, neoplastic, and infectious diseases. Students gain an understanding of these mechanisms, as well as models of human diseases.

Same as MMG 225.

**PATH 227. Experimental Pathology Journal Club. 1 Unit.**

Graduate-level course, which is open to all years, will involve the reading and discussion of papers, preferably written by the invited seminar speaker. Discussions will cover advanced topics in experimental pathology as related to an understanding of human disease.

Corequisite: PATH 204A and PATH 204B and PATH 204C

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PATH 292A. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PATH 292B. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PATH 292C. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PATH 299. Dissertation in Experimental Pathology. 1-12 Units.**

Provided for the preparation and completion of the dissertation required for the Ph.D. degree.

Repeatability: May be repeated for credit unlimited times.

## Pediatrics (PEDS)

## Pediatrics Genetics (PED GEN)

### Courses

**PED GEN 200A. Introduction to Medical Genetics and Cytogenetics. 4 Units.**

Covers current concepts regarding mitosis, meiosis, the cell cycle, and chromosome ultrastructure and function. Clinical disorders caused by chromosomal aneuploidy, duplication, and deletion, and principles of Mendelian, chromosomal, and multifactorial and nontraditional inheritance are presented and illustrated.

Restriction: Graduate students only.

**PED GEN 200B. Genetic Screening, Prenatal Development, and Human Teratology. 4 Units.**

Principles and techniques of prenatal, neonatal, and carrier screening. Infertility, pregnancy, and delivery. Normal and abnormal prenatal growth and development. Reproductive and fetal effects of drugs, radiation, infections, and other environmental factors.

Prerequisite: PED GEN 200A

Restriction: Medical students only. Genetic Counseling Majors only.

**PED GEN 200C. Human Genetic Disorders. 4 Units.**

Inheritance, diagnosis, natural history, management, and counseling considerations for commonly encountered genetic diseases, birth defects, and dysmorphic syndromes.

Prerequisite: PED GEN 200B

Restriction: Medical students only. Genetic Counseling Majors only.

**PED GEN 200D. Disorders due to Inborn Errors of Metabolism. 4 Units.**

Aspects of biochemistry and metabolism are reviewed with special emphasis on genetic abnormalities which lead to inborn errors of metabolism. Diagnostic procedures, heterozygote detection, treatment, counseling issues, and prenatal diagnosis are reviewed.

Prerequisite: PED GEN 200A

**PED GEN 200E. Molecular Genetics, Gene Mapping, and Genetic Linkage. 4 Units.**

Derivation of different types of DNA probes and DNA libraries, restriction endonuclease polymorphisms, assignment of genes to chromosomes, and genetic linkage. Emphasis on the use of recombinant DNA technologies and genetic analysis for diagnosis of human genetic disease.

Prerequisite: PED GEN 200A and PED GEN 200D

**PED GEN 200F. Quantitative Genetics. 2 Units.**

Quantitative aspects of human genetics, including population studies, segregation analysis, linkage, mapping, and genetic risk determination.

Prerequisite or corequisite: PED GEN 200A

Overlaps with PED GEN 200B.

**PED GEN 200G. Hereditary Cancer Counseling. 4 Units.**

Issues in genetic counseling for cancer. Cancer biology; genetic mechanisms and environmental influences in carcinogenesis; tumor pathology; cancer gene mapping; epidemiology. Features natural history, diagnosis, prevention, surveillance, and management of heredity cancers. Psychosocial, ethical, legal aspects of cancer risk assessment.

Prerequisite: PED GEN 200B

Restriction: Medical students only. Genetic Counseling Majors only.

**PED GEN 200H. Genetic Counselin Research Design. 4 Units.**

Quantitative and qualitative methods for genetic counseling research. Reference management; statistics: sample size, power, and data analysis; reliability and validity; surveys, questionnaires, interviews, focus groups; quality of life and genetic epidemiology research; designing a research protocol; IRB issues; grant writing.

**PED GEN 200L. Cytogenetics Laboratory. 4 Units.**

Practicum introducing methods of specimen collection, short-term lymphocyte and bone marrow culture, long-term fibroblast and amniocyte culture, harvesting and slide preparation, chromosome staining, microphotography, and darkroom techniques. Microscopic chromosome analysis, photographic karyotyping, and appropriate use of cytogenetic nomenclature are emphasized.

Restriction: Graduate students only.

**PED GEN 201A. Introduction to Genetic Counseling. 4 Units.**

Through directed readings, observing patient evaluations, role-playing, and conducting intake interviews, students are introduced to the process of diagnosis, management, and counseling for genetic disease. Psychosocial issues, interviewing techniques, pedigree construction, clinical photography, and various other skills are addressed.

Restriction: Medical students only. Genetic Counseling Majors only.

**PED GEN 201B. Clinical Rotation I. 4 Units.**

Provides extensive supervised experience in history taking, interviewing, and psychosocial assessment in the clinical genetics setting. Students independently perform telephone, office, and home-visit intake interviews, participate in counseling, and present cases at patient management conferences.

Restriction: Medical students only. Genetic Counseling Majors only.

**PED GEN 201C. Clinical Rotation II. 4 Units.**

Provides further supervised experience in genetic counseling, case management, clinic administration and organization, and the use of community resources. Emphasis is on sharpening counseling skills and on developing a professional identity and code of ethics.

Restriction: Medical students only. Genetic Counseling Majors only.

**PED GEN 201D. Prenatal Diagnosis Counseling. 4 Units.**

A practicum with extensive supervised experience in prenatal diagnosis counseling which provides the student with the opportunity to conduct genetic counseling sessions semi-independently and to further develop clinical skills.

Prerequisite: PED GEN 200A and PED GEN 200B and PED GEN 200C

Restriction: Medical students only. Genetic Counseling Majors only.

**PED GEN 202A. Counseling in Human Genetics: Theory and Methods. 3 Units.**

Theoretical approaches, counseling models and methods, and bio-psychosocial assessment strategies are examined in the context of genetic counseling. Contract-setting, working alliance, the use of self and evaluation methods. Beginning counseling and peer supervision skills are practiced in class.

Restriction: Medical students only. Genetic Counseling Majors only.

**PED GEN 202B. Community Resources. 1-2 Units.**

Lectures, guest speakers, and community visits acquaint genetic counselors with public and private health care and funding agencies, parent support and advocacy groups, and other resources to assist individuals and families confronted with genetic disorders, developmental disabilities, and birth defects.

Repeatability: May be taken for credit 2 times.

Restriction: Medical students only. Genetic Counseling Majors only.

**PED GEN 202C. Ethical Issues in Human Genetics. 1-2 Units.**

Explores major social, legal, and ethical issues in genetic counseling including those arising in genetic screening, prenatal diagnosis, informed consent, privacy and confidentiality, rights of the disabled, new genetic and reproductive technologies, treatment, and access to services.

Repeatability: May be taken for credit 2 times.

Restriction: Medical students only. Genetic Counseling Majors only.

**PED GEN 203A. Counseling in Human Genetics: Putting Thought to Practice. 4 Units.**

Builds upon the skills learned in previous courses emphasizing advanced counseling methods such as listening, empathy, and collaboration. The counselor's own self-awareness, ethical behaviors, and limits are explored. Individual, team, and group exercises are performed.

Prerequisite: PED GEN 202A

Restriction: Medical students only. Genetic Counseling Majors only.

**PED GEN 204A. Professional Skills Development. 4 Units.**

Hones and augments existing competencies in genetic counseling through ongoing clinical experiences. Develops skills using computers for genetics applications, provision of community and professional education, and clinic administration. Further experience in genetics laboratories or specialty clinics may be elected.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

**PED GEN 204B. Professional Skills Development. 4 Units.**

Hones and augments existing competencies in genetic counseling through ongoing clinical experiences. Develops skills using computers for genetics applications, provision of community and professional education, and clinic administration. Further experience in genetics laboratories or specialty clinics may be elected.

Prerequisite: PED GEN 204A

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

**PED GEN 204C. Professional Skills Development. 4 Units.**

Hones and augments existing competencies in genetic counseling through ongoing clinical experiences. Develops skills using computers for genetics applications, provision of community and professional education, and clinic administration. Further experience in genetics laboratories or specialty clinics may be elected.

Prerequisite: PED GEN 204B

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

**PED GEN 295. Master's Thesis and Research Writing. 4-8 Units.**

Under the supervision of one or more faculty members, the student designs and conducts a research project or completes a case report. A problem in the cytogenetics, biochemical, clinical, psychosocial, or behavioral areas of medical genetics may be investigated.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

## Persian (PERSIAN)

### Courses

**PERSIAN 1A. Fundamentals in Persian. 5 Units.**

Designed for students with little or no exposure to Persian. Students learn the modern writing system and grammar of Persian. Facilitates basic reading, writing, and speaking skills and fosters college-level literacy in Persian culture.

Prerequisite: Placement into PERSIAN 1A.

Overlaps with PERSIAN S1AB.

Restriction: PERSIAN 1A and PERSIAN S1AB may not be taken for full credit.

**PERSIAN 1B. Fundamentals in Persian. 5 Units.**

Designed for students with little or no exposure to Persian. Students learn the modern writing system and grammar of Persian. Facilitates basic reading, writing, and speaking skills and fosters college-level literacy in Persian culture.

Prerequisite: PERSIAN 1A. PERSIAN 1A with a grade of C or better. Placement into PERSIAN 1B is also accepted.

Overlaps with PERSIAN S1AB, PERSIAN S1BC.

Restriction: PERSIAN 1B and PERSIAN S1AB and PERSIAN S1BC may not be taken for full credit.

**PERSIAN 1C. Fundamentals in Persian. 5 Units.**

Designed for students with little or no exposure to Persian. Students learn the modern writing system and grammar of Persian. Facilitates basic reading, writing, and speaking skills and fosters college-level literacy in Persian culture.

Prerequisite: PERSIAN 1B or PERSIAN S1AB. PERSIAN 1B with a grade of C or better. PERSIAN S1AB with a grade of C or better. Placement into PERSIAN 1C is also accepted.

Overlaps with PERSIAN S1BC.

Restriction: PERSIAN 1C and PERSIAN S1BC may not be taken for full credit.

(VI)

**PERSIAN 2A. Intermediate Persian. 4 Units.**

Designed for students to advance their Persian language skills from introductory to intermediate level. Student will advance their understanding of grammar and syntax. Facilitates intermediate-level reading, writing, and speaking skills. Fosters college-level cultural literacy.

Prerequisite: PERSIAN 1C or PERSIAN S1BC. PERSIAN 1C with a grade of C or better. PERSIAN S1BC with a grade of C or better. Placement into PERSIAN 2A is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

(VIII)

**PERSIAN 2B. Intermediate Persian. 4 Units.**

Designed for students to advance their Persian language skills from introductory to intermediate level. Students will advance their understanding of grammar and syntax. Facilitates intermediate-level reading, writing, and speaking skills. Fosters college-level cultural literacy.

Prerequisite: PERSIAN 2A. PERSIAN 2A with a grade of C or better. Placement into PERSIAN 2B is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

(VIII)

**PERSIAN 2C. Intermediate Persian. 4 Units.**

Designed for students to advance their Persian language skills from introductory to intermediate level. Students will advance their understanding of grammar and syntax. Facilitates intermediate-level reading, writing, and speaking skills. Fosters college-level cultural literacy.

Prerequisite: PERSIAN 2B. PERSIAN 2B with a grade of C or better. Placement into PERSIAN 2C is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

(VIII)

**PERSIAN 10A. Persian Peer-to-Peer Language Mentor Program. 1 Unit.**

Peer-to-Peer Language Mentor Program in which student mentors work with student mentees to increase the language skills of both participants. One hour weekly meetings. PERSIAN 10A is for language mentors.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**PERSIAN 10B. Persian Peer-to-Peer Language Mentor Program. 1 Unit.**

Peer-to-Peer Language Mentor Program in which student mentors work with student mentees to increase the language skills of both participants. One hour weekly meetings. PERSIAN 10B is for language mentees.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**PERSIAN 50. Persian Culture. 4 Units.**

Study of varied topics in Persian culture, area studies, and society, both in the present and in historical perspective. Topics are not normally repeated for a two-year period.

Repeatability: Unlimited as topics vary.

(IV, VIII)

**PERSIAN 150. Topics in Advanced Persian Culture. 4 Units.**

In-depth examination of major works in premodern and modern Persian literature and/or the arts, with specific emphasis upon historical and cultural context and relevant societal issues and trends. Course is conducted in English.

Repeatability: May be taken for credit for 4 units as topics vary.

**PERSIAN 165A. Modern Iran: Cinema and the City. 4 Units.**

Exploring modern Iran through film, literature, photography, travel writing, and philosophy and social science texts that introduce students to important concepts in post-colonial studies, social thought, war culture, religion, and media as experienced through the paradigm of a non-Western modernity.

Same as ANTHRO 165A.

**PERSIAN 199. Independent Study. 4 Units.**

Independent research with Persian faculty.

Repeatability: May be repeated for credit unlimited times.

## Pharmaceutical Sciences (PHRMSCI)

### Courses

**PHRMSCI 1. New Student Seminar. 1 Unit.**

Weekly meetings consisting of presentations by faculty, professional staff, and Peer Academic Advisors provide information about the Pharmaceutical Sciences major, campus resources, learning skills, and special programs and opportunities.

Grading Option: Pass/no pass only.

Restriction: Pharmaceutical Sciences Majors only. New students only.

**PHRMSCI 3. Professional Development and Careers in the Pharmaceutical Sciences. 1 Workload Unit.**

Designed to help Pharmaceutical Science majors select a career track and prepare for graduate program applications and careers in industry.

Grading Option: Workload Credit Letter Grade with P/NP.

Restriction: Juniors only. Pharmaceutical Sciences Majors only.

**PHRMSCI 42. Life 101 . 2 Units.**

Covers the latest scientific work on the impact of nutrition, exercise, and lifestyle choices on mental and physical health. Motivates students to make positive changes by fostering personal growth.

**PHRMSCI 76. Ethical Conduct of Research. 2 Units.**

Covers the ethical responsibilities of biomedical scientists. Topics include, as discussions and case studies, the high standards of science, the responsible conduct of research, animal experimentation, and clinical trials as they relate to the pharmaceutical sciences.

**PHRMSCI H80. Drugs and Society. 4 Units.**

Where drugs come from, how drugs work, how and why people abuse drugs, the costs of drug abuse on society, which drugs are commonly abused, and how drug abuse can be prevented and treated. Course intended for non-science majors.

Prerequisite: Recommended: High school chemistry and biology.

Restriction: Campuswide Honors Collegium students only.

### (II)

**PHRMSCI 90. Speaking about Science. 4 Units.**

Students learn to effectively prepare and present public speeches and slide presentations. Included are storytelling, informative, commemorative, and persuasive speeches, and scientific presentation. Evaluating speeches and strategies to reduce speaker apprehension is also covered.

Restriction: Pharmaceutical Sciences Majors have first consideration for enrollment.

**PHRMSCI 120. Human Physiology. 4 Units.**

Covers the function of the human body. All major organ systems are discussed. Designed to prepare students for healthcare careers, such as medicine, pharmacy, dentistry, and for research careers which require basic knowledge of how the human body functions.

Corequisite: PHRMSCI 120L

Prerequisite: BIO SCI 99

Overlaps with BIO SCI E109.

**PHRMSCI 120L. Human Physiology Lab. 3 Units.**

Designed to complement PHRMSCI 120. Computer-based lab simulations will be used to study the function of the human body. Class will physically meet for review sessions and exams.

Corequisite: PHRMSCI 120

Prerequisite: BIO SCI E109

Overlaps with BIO SCI E112L.

**PHRMSCI 142. Healthspan Sciences. 4 Units.**

Covers the complex and multi-factorial process of aging and increases the understanding of factors that contribute to enhanced lifespan, including basic principles of health and wellness and scientifically proven interventions, both pharmacological and non-pharmacological.

Prerequisite: BIO SCI 98 and BIO SCI 99 and PHRMSCI 120

Restriction: Upper-division students only.

**PHRMSCI 155. Neuropsychopharmacology. 4 Units.**

Mechanisms underlying chemical signaling processes in the nervous system. Fundamental knowledge for understanding the cellular and molecular actions of drugs and their mechanisms of action on synaptic transmission. Applied neuropsychopharmacology including major drug classes and therapeutic uses.

Prerequisite: PHRMSCI 170A. PHRMSCI 170A with a grade of C- or better

Restriction: Upper-division students only.

**PHRMSCI 163. Pharmacogenomics and Epigenetics. 4 Units.**

Survey of the genetic and epigenetic basis of inter-subject variability in response to drugs. Covers drug efficacy, safety, and need for their optimization in pharmacotherapy. Emphasizes genetic mechanisms of polymorphisms in the pharmacokinetics and pharmacodynamics of representative therapeutic drugs.

Prerequisite: BIO SCI 99

Concurrent with PHRMSCI 263.

**PHRMSCI 170A. Molecular Pharmacology I. 4 Units.**

Molecular basis of drug-receptor action at the molecular and cellular levels. Structure-function of drug targets emphasizing enzymes, ion channels, and membrane transport proteins. Understanding how the drugs' mechanisms of action contribute to the development of more efficacious and safer drugs.

Prerequisite or corequisite: (CHEM 51C or CHEM H52C) and (PHRMSCI 120 or BIO SCI E109)

Restriction: Pharmaceutical Sciences Majors have first consideration for enrollment.

**PHRMSCI 170B. Molecular Pharmacology II. 4 Units.**

Introductory survey covering the molecular mechanisms of drugs that target the nervous system, such as anxiolytics, antidepressants, antipsychotics, hypnotics, muscle relaxants, and recreational drugs; drugs related to the immune system, including antibiotics, antihistamines, and immunosuppressants; drugs used to treat cancer.

Prerequisite: PHRMSCI 170A

**PHRMSCI 171. Physical Biochemistry. 4 Units.**

Thermodynamics and kinetic fundamentals as applied to problems relevant to pharmaceutical sciences such as receptor/enzyme-ligand interactions. Fundamentals of biophysical methods used in the pharmaceutical sciences including structure determination and biomolecular spectroscopy.

Prerequisite: MATH 2B and PHYSICS 3C and (CHEM 1C or CHEM H2C) and BIO SCI 99

Restriction: Pharmaceutical Sciences Majors have first consideration for enrollment.

**PHRMSCI 172. Topics in Pharmaceutical Sciences. 2 Units.**

Presents information about various fields of research, study, careers, and graduate school opportunities in pharmaceutical sciences. Taught by guest lecturers from various disciplines including 199 research course faculty. Helps Pharmaceutical Sciences students select electives appropriate to their future goals.

Prerequisite or corequisite: BIO SCI 99 and (CHEM 51C or CHEM H52C)

Grading Option: Pass/no pass only.

**PHRMSCI 173. Pharmacotherapy. 4 Units.**

An exploration of the clinical application of medications to selected disease states. Focus is on an understanding of underlying principles of pharmacology and how this knowledge can be applied to treatment of diseases.

Prerequisite or corequisite: PHRMSCI 170B

**PHRMSCI 174. Biopharmaceutics and Nanomedicine. 4 Units.**

Introduces theories and tools of new drug formulations. Particularly new novel therapeutics based on biological materials, pathological characteristics utilized to achieve the maximum efficacy and specificity, and drug delivery systems based on emerging nanotechnology are extensively discussed.

Prerequisite: PHRMSCI 170B

Restriction: Pharmaceutical Sciences Majors have first consideration for enrollment.

**PHRMSCI 174L. Biopharmaceutics and Nanomedicine Lab. 3 Units.**

Introduction to cancer drug screening using cellular models, and confirmation of comprehensive therapeutic efficacy using a live animal model. Includes basic cell culture, cytotoxicity assays, cell analysis, drug circulation test, and tumor eradication and imaging experiments. Materials fee.

Prerequisite: PHRMSCI 170B and BIO SCI 100

(Ib)

**PHRMSCI 175. Drug Discovery Computing Techniques. 4 Units.**

Techniques used in computer-aided drug discovery, including theory behind these techniques and practical applications. Topics include scientific computing; python; classical force fields and simulations; visualization and movie-making; quantum mechanics in drug discovery; molecular dynamics; solvation models; and several others.

Prerequisite: CSE 41 or I&C SCI 31. CSE 42 or I&C SCI 32 is recommended.

Concurrent with PHRMSCI 275.

**PHRMSCI 177. Medicinal Chemistry. 4 Units.**

An introduction of the basics of drug activity and mechanisms. Strategies used to identify lead compounds such as natural product chemistry, combinatorial chemistry, molecular modeling, and high-through put screening. Relationship of molecular structure to pharmacological activity.

Prerequisite: CHEM 51A and CHEM 51B and CHEM 51C and (BIO SCI 98 or CHEM 128)

Same as CHEM 177.

Restriction: Pharmaceutical Sciences Majors have first consideration for enrollment.

**PHRMSCI 177L. Medicinal Chemistry Laboratory. 3 Units.**

An introduction of the basics of drug activity and mechanisms. Strategies used to identify lead compounds such as natural product chemistry, combinatorial chemistry, molecular modeling, and high-through put screening. Relationship of molecular structure to pharmacological activity. Materials fee.

Corequisite: PHRMSCI 177 or CHEM 177.

Prerequisite: CHEM 51A and CHEM 51B and CHEM 51C and BIO SCI 100 and (BIO SCI 98 or CHEM 128)

Same as CHEM 177L.

Restriction: Pharmaceutical Sciences Majors have first consideration for enrollment.

(Ib)

**PHRMSCI 178. Stem Cell Therapy . 4 Units.**

Introduces new paradigms in regenerative medicine involving stem cells, and emerging molecular, nano- and micro-engineered tools for in vivo imaging that is critical for studying and monitoring regeneration. Selected topics include stem cell biology and in vivo imaging modalities.

Prerequisite: BIO SCI D103

Concurrent with PHRMSCI 278.

**PHRMSCI 179. Emerging Technologies in Pharmaceutical Sciences and Medicine. 4 Units.**

Introduces emerging, ground-breaking technologies in pharmaceutical sciences and medicine, including pharmacogenomics, genome editing, and stem cell and engineered T cell therapies. Explores these novel technologies with both their underlying theories and forward-thinking applications.

Concurrent with PHRMSCI 279.

**PHRMSCI 197. Professional Internship. 4 Units.**

Provides students with opportunity to develop leadership and professional skills necessary for competitive placement in their chosen industry. Students gain new and field-specific skills outside the classroom environment while participating in a supervised internship for a total of 100 hours.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Seniors only.

**PHRMSCI 198. Independent Study in Pharmaceutical Sciences. 1-4 Units.**

Students interested in independent study should arrange with a faculty member to sponsor and supervise such work. A time commitment of three hours per week per unit is expected. A written report is required at the end of each quarter.

Repeatability: May be taken for credit for 4 units.

**PHRMSCI 199. Undergraduate Research. 1-4 Units.**

Original research in the laboratory of Pharmaceutical Sciences faculty. Attendance at regular research group meetings is also generally expected, and a quarterly written report is required. Strongly recommended for students considering research careers and/or graduate degree programs.

Repeatability: May be repeated for credit unlimited times.

**PHRMSCI H199. Honors Research in Pharmaceutical Sciences. 1-4 Units.**

Undergraduate honors research in Pharmaceutical Sciences. A student time commitment of 10-15 hours per week is required.

Repeatability: May be repeated for credit unlimited times.

**PHRMSCI 223. Biological Macromolecules. 4 Units.**

Introduction to nucleic acid and protein structure, dynamics, and function. Topics include analytical methods, molecular evolution, folding, and catalysis.

Same as CHEM 223.

**PHRMSCI 250A. Current Topics in Pharmaceutical Sciences. 1 Unit.**

Intended to expose students to the primary literature and current research in the field of Pharmaceutical Sciences. Students analyze and present information for discussion. Guest speakers from academia and industry may participate throughout the quarter.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only. Math and Computational Biology Majors only.

**PHRMSCI 250B. Current Topics in Pharmaceutical Sciences. 1 Unit.**

Intended to expose students to the primary literature and current research in the field of Pharmaceutical Sciences. Students analyze and present information for discussion. Guest speakers from academia and industry may participate throughout the quarter.

Prerequisite: PHRMSCI 250A

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only. Math and Computational Biology Majors only.

**PHRMSCI 250C. Current Topics in Pharmaceutical Sciences. 1 Unit.**

Intended to expose students to the primary literature and current research in the field of Pharmaceutical Sciences. Students analyze and present information for discussion. Guest speakers from academia and industry may participate throughout the quarter.

Prerequisite: PHRMSCI 250B

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only. Math and Computational Biology Majors only.

**PHRMSCI 263. Pharmacogenomics and Epigenetics. 4 Units.**

Survey of the genetic and epigenetic basis of inter-subject variability in response to drugs. Covers drug efficacy, safety, and the need for their optimization in pharmacotherapy. Emphasizes genetic mechanisms of polymorphisms in the pharmacokinetics and pharmacodynamics of representative therapeutic drugs.

Restriction: Graduate students only.

Concurrent with PHRMSCI 163.

**PHRMSCI 264. The RNA World: From Discovery to Mechanism. 4 Units.**

Provides a comprehensive understanding of RNA in biology. Use of knowledge gained in organic chemistry, biochemistry, genomics, and molecular biology to understand how RNA is integrated into contemporary biology.

Restriction: Graduate students only.

**PHRMSCI 265. New Frontiers in Chemical and Synthetic Biology. 4 Units.**

Explores new developments in chemical and synthetic biology that span the areas of chemistry, molecular biology, genetics, bioengineering, systems biology, and computational genomics.

Restriction: Graduate students only.

**PHRMSCI 270. Advanced Pharmacology. 4 Units.**

Provides a mechanism-based overview of pharmacology with strong emphasis on clinical application of pharmacology. Students learn the most recent advances in pharmacology as they relate to drug discovery, development, and clinical application.

Restriction: Graduate students only.

Concurrent with PHRMSCI 170A.

**PHRMSCI 272. Special Topics in Pharmaceutical Sciences. 2-4 Units.**

Reserved for current topics of particular interest in areas of pharmaceutical sciences that are not covered by other courses. The subject will vary from year to year, highlighting, for example, significant emerging fields or highly specialized but vital research areas.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PHRMSCI 275. Drug Discovery Computing Techniques. 4 Units.**

Techniques used in computer-aided drug discovery, including theory behind these techniques and practical applications. Topics include scientific computing; python; classical force fields and simulations; visualization and movie-making; quantum mechanics in drug discovery; molecular dynamics; solvation models; and several others.

Restriction: Graduate students only.

Concurrent with PHRMSCI 175.

**PHRMSCI 277. Medicinal Chemistry. 4 Units.**

Fundamentals of medicinal chemistry covering diverse aspects of drug design, discovery, synthesis, and development. Molecular basis of drug action with an emphasis on the structure-to-function continuum.

**PHRMSCI 278. Stem Cell Therapy . 4 Units.**

Introduces new paradigms in regenerative medicine particularly those that involve stem cells, and emerging molecular, nano- and micro-engineered tools for in vivo imaging that is critical for studying and monitoring regeneration.

Restriction: Graduate students only.

**PHRMSCI 279. Emerging Technologies in Pharmaceutical Sciences and Medicine. 4 Units.**

Introduces emerging, ground-breaking technologies in pharmaceutical sciences and medicine, including pharmacogenomics, genome editing, and stem cell and engineered T cell therapies. Explores these novel technologies with both their underlying theories and forward-thinking applications.

Concurrent with PHRMSCI 179.

**PHRMSCI 298. Research Seminar . 2 Units.**

Presentation and discussion of current problems and methods in teaching and research in pharmaceutical sciences.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHRMSCI 299. Graduate Research. 1-12 Units.**

Supervised original research or investigation under the direction of an individual faculty member.

Repeatability: May be repeated for credit unlimited times.

**PHRMSCI 399. University Teaching. 1-4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## Philosophy (PHILOS)

### Courses

**PHILOS 1. Introduction to Philosophy. 4 Units.**

A selection of philosophical problems, concepts, and methods, e.g., free will, cause and substance, personal identity, the nature of philosophy itself. Materials fee.

(IV)

**PHILOS 2. Puzzles and Paradoxes. 4 Units.**

Introduction to the formal tools needed to comprehend and evaluate philosophical arguments and theoretical reasoning in general.

(IV and VB ).

**PHILOS 3. Technology and Society. 4 Units.**

A study of the nature of technology, its relation to human values, the philosophical assumptions in its development, and the philosophical implications of technology.

(II)

**PHILOS 4. Introduction to Ethics. 4 Units.**

Selected topics from the history of ethics, e.g., the nature of the good life and the moral justification of conduct.

(IV)

**PHILOS 5. Contemporary Moral Problems. 4 Units.**

Selected moral issues of current interest, e.g., abortion, sexual morality, euthanasia, capital punishment, reverse discrimination, civil disobedience, or violence.

(IV)

**PHILOS 7. Introduction to Existentialism. 4 Units.**

An analysis of themes in phenomenology and existentialism and their philosophical origins, e.g., consciousness, self and other, freedom and individuality.

(IV)

**PHILOS 10. History of Ancient Philosophy. 4 Units.**

Examination of the central philosophical themes developed by the pre-Socratics, Socrates, Plato, Aristotle, the Stoics, the Epicureans, and the Skeptics.

(IV)

**PHILOS 11. History of Medieval Philosophy. 4 Units.**

A study of some of the major theological and philosophical texts from the Medieval period.

Prerequisite: Recommended: PHILOS 10.

(IV)

**PHILOS 12. History of Modern Philosophy. 4 Units.**

A study of major developments in western philosophy from Descartes to Kant with readings from Descartes, Leibniz, Locke, Berkeley, Hume, and Kant.

Prerequisite: Recommended: PHILOS 10 or PHILOS 11.

(IV)

**PHILOS 13. History of Contemporary Philosophy. 4 Units.**

A study of recent philosophical developments in Anglo-American and Continental philosophy with readings from such figures as Russell, Moore, Wittgenstein, Quine, Heidegger, and Sartre.

Prerequisite: Recommended: PHILOS 12.

(IV)

**PHILOS 21. Philosophy and Religion. 4 Units.**

Examines the intersection of religion and philosophy from a standpoint that does not presuppose previous academic study of either. Both Western and Eastern traditions and perspectives may be explored.

Repeatability: Unlimited as topics vary.

Same as REL STD 21.

(IV)

**PHILOS 22. Introduction to Law and Society. 4 Units.**

What constitutes a legal system? What does it mean for a society to have a system as a part of the social fabric. Examines the social status of law and its use as a tool for fashioning society.

(III)

**PHILOS 29. Critical Reasoning. 4 Units.**

Introduction to analysis and reasoning. The concepts of argument, premise, and conclusion, validity and invalidity, consistency and inconsistency. Identifying and assessing premises and inferences. Deductive versus inductive reasoning, and introduction to the probability calculus. Evaluating definitions. Informal fallacies.

Same as LPS 29.

(II and Vb ).

**PHILOS 30. Introduction to Symbolic Logic. 4 Units.**

An introduction to the symbolism and methods of the logic of statements, including evaluation of arguments by truth tables, the techniques of natural deduction, and semantic tableaux.

Same as LPS 30, LSCI 43.

(Vb)

**PHILOS 31. Introduction to Inductive Logic. 4 Units.**

Philosophical questions concerning the foundations of scientific inference, e.g., the traditional problem of induction, the Goodman paradox, the concept of cause, Mill's method of inductive reasoning, probability calculus, different interpretations of probability, and their interaction in inductive reasoning.

Same as LPS 31.

(II, Va)

**PHILOS 40. Special Topics in Philosophy. 4 Units.**

Lectures on selected topics at the lower-division level.

Repeatability: Unlimited as topics vary.

**PHILOS 91. The Philosophy of Sex. 4 Units.**

Discusses the origins of biological sex, dynamics of sexual selection, sex differences in humans, and the construction of gender in human societies. Seeks to understand the role social values play in the creation of science.

Same as LPS 91.

Overlaps with LPS H91.

**(III)****PHILOS 100W. Writing Philosophy. 4 Units.**

Discussion of those aspects of writing of special importance in philosophy, e.g., philosophical terminology, techniques for evaluating arguments, philosophical definitions and theories. At least 4,000 words of assigned composition based on philosophical readings.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as LPS 100W.

Restriction: Upper-division students only.

**(Ib)****PHILOS 101. Introduction to Metaphysics. 4 Units.**

A study of one or more of the problems of 'first philosophy,' e.g., substance, free will, causation, abstract entities, identity.

**PHILOS 102. Introduction to the Theory of Knowledge. 4 Units.**

A study of one or more of the basic issues in epistemology, e.g., the role of perception in the acquisition of knowledge, the nature of evidence, the distinction between belief and knowledge, and the nature of truth and certainty.

Same as LPS 102.

**PHILOS 102W. Introduction to the Theory of Knowledge. 4 Units.**

A study of one or more of the basic issues in epistemology, e.g., the role of perception in the acquisition of knowledge, the nature of evidence, the distinction between belief and knowledge, and the nature of truth and certainty.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Overlaps with PHILOS 102, LPS 102.

**(Ib)****PHILOS 103. Introduction to Moral Philosophy. 4 Units.**

A study of one or more of the problems of contemporary moral philosophy, e.g., the nature of justice, liberalism versus conservatism, happiness and its relation to virtue and right conduct, the objectivity of moral standards.

**PHILOS 104. Introduction to Logic. 4 Units.**

Introduction to sentence logic, including truth tables and natural deduction; and to predicate logic, including semantics and natural deduction.

Same as LPS 104, LSCI 142.

**PHILOS 105A. Elementary Set Theory. 4 Units.**

An introduction to the basic working vocabulary of mathematical reasoning. Topics include sets, Boolean operations, ordered n-tuples, relations, functions, ordinal and cardinal numbers.

Same as LPS 105A, LSCI 145A.

**PHILOS 105B. Metalogic. 4 Units.**

Introduction to formal syntax (proof theory) and semantics (model theory) for first-order logic, including the deduction, completeness, compactness, and Löwenheim-Skolem theorems.

Prerequisite: PHILOS 105A

Same as LPS 105B, LSCI 145B.

Overlaps with MATH 150.

**PHILOS 105C. Undecidability and Incompleteness. 4 Units.**

Introduction to the formal theory of effective processes, including recursive functions, Turing machines, Church's thesis, and proofs of Gödel's incompleteness theorem for arithmetic, and Church's undecidability theorem for first-order logic.

Prerequisite: PHILOS 105B

Same as LPS 105C, LSCI 145C.  
Overlaps with MATH 152.

Concurrent with LPS 205C.

**PHILOS 106. Topics in Logic . 4 Units.**

Selected topics in mathematical or philosophical logic.

Prerequisite: PHILOS 105B or LPS 105B

Repeatability: Unlimited as topics vary.

Same as LPS 106.

**PHILOS 108. Topics in Induction, Probability, and Decision Theory. 4 Units.**

Selected topics in induction, probability, and decision theory.

Repeatability: Unlimited as topics vary.

Same as LPS 108.

**PHILOS 110. Topics in Ancient Philosophy. 4 Units.**

Selected topics from the writings of Plato and Aristotle, e.g., Aristotle's criticisms of Plato's metaphysics, ethics, or politics.

Repeatability: May be taken for credit 2 times as topics vary.

**PHILOS 111. Topics in Medieval Philosophy. 4 Units.**

Studies of some of the major issues of concern to Medieval philosophers, e.g., universals, the nature and existence of God, faith, and reason.

Repeatability: May be taken for credit 2 times as topics vary.

**PHILOS 113. Topics in Modern Philosophy. 4 Units.**

Focuses on the works of central philosophical figures of modern Philosophy (e.g., Descartes, Leibniz, Hobbes, Locke, Hume, Kant) or on the treatment of one or more central philosophical problems by a number of these figures.

Repeatability: Unlimited as topics vary.

Same as LPS 113.

**PHILOS 114. Topics in Nineteenth-Century Philosophy. 4 Units.**

Studies of some of the major figures after Kant (e.g., Hegel, Nietzsche, Marx, Kierkegaard), especially in German idealism and social thought.

Repeatability: Unlimited as topics vary.

**PHILOS 115. Topics in History of Analytic Philosophy. 4 Units.**

Review of central theories or figures in the history of analytic philosophy. Emphasis on writings of Frege, Russell, Schlick, Carnap, and Quine. Topics include the nature of meaning and truth, the synthetic/analytic distinction, and scientific knowledge.

Repeatability: Unlimited as topics vary.

Same as LPS 115.

**PHILOS 116. Topics in Continental Philosophy. 4 Units.**

Studies of some of the major figures (e.g., Husserl), movements (e.g., phenomenology, existentialism) in early twentieth-century continental European thought.

Repeatability: Unlimited as topics vary.

**PHILOS 117. Topics in Asian Philosophy. 4 Units.**

Selected topics in the philosophies of Asia, e.g. Jainism, Buddhism, Yoga, Vedanta, Confucianism, Taoism, and Shinto.

Repeatability: Unlimited as topics vary.

**PHILOS 120. Topics in Metaphysics. 4 Units.**

Examines central philosophical questions concerning our own fundamental nature and that of the world around us (e.g., causation and necessity, determination, free will, personal identity, the mind-body problem).

Repeatability: Unlimited as topics vary.

Same as LPS 120.

**PHILOS 121. Topics in the Theory of Knowledge . 4 Units.**

One or more topics in the theory of knowledge, e.g., the nature of rational justification, of perceptual knowledge, of a priori knowledge.

Repeatability: Unlimited as topics vary.

Same as LPS 121.

**PHILOS 121A. Medical Epistemology. 4 Units.**

Analysis of epistemological issues concerning medical research and health care. Topics may include medical evidence, transmission of medical knowledge, medical expertise, the epistemology of medical disagreement, classification of illnesses, well-being, philosophy of pain, and medical decision making.

**PHILOS 122. Topics in Philosophy of Mind. 4 Units.**

Selected topics involving the concept of mind, e.g., the relation between mind and body, the self, personal identity, consciousness, the unconscious.

Repeatability: Unlimited as topics vary.

**PHILOS 123. Topics in Philosophy of Religion. 4 Units.**

Critical examination of concepts involved in the theological literature, e.g., the nature and existence of God, miracles, the problem of evil, divine command theories in ethics.

Repeatability: Unlimited as topics vary.

**PHILOS 130. Topics in Moral Philosophy. 4 Units.**

Selected topics in ethics.

Repeatability: Unlimited as topics vary.

**PHILOS 131A. Applied Ethics. 4 Units.**

Topics may include capital punishment, world hunger, obligations to future generations, environmental ethics, animal rights, economic justice, sexual morality, affirmative action, racism and sexism, or legalization of drugs.

**PHILOS 131C. Medical Ethics. 4 Units.**

Analysis of moral issues concerning health care. Topics may include just allocation of scarce medical resources, the doctor/patient relationship, genetic engineering, surrogate motherhood, abortion, euthanasia, or social policy concerning AIDS.

**PHILOS 132. Topics in Political and Social Philosophy. 4 Units.**

Selected topics in social and political philosophy, e.g., the functions of government, the justification of political authority, the nature of democracy, the varieties of liberty, and social justice. Readings from classical and contemporary sources.

Repeatability: Unlimited as topics vary.

**PHILOS 133. Topics in Philosophy of Law. 4 Units.**

Selected topics concerning legal systems and the concept of law, e.g., the nature and purpose of law, the nature of authority, the relationship between law and morality, law and political-economic systems.

Repeatability: Unlimited as topics vary.

**PHILOS 140. Topics in Philosophy of Science. 4 Units.**

Selected topics in contemporary philosophy of science, e.g., the status of theoretical entities, the confirmation of theories, the nature of scientific explanation.

Repeatability: Unlimited as topics vary.

Same as LPS 140.

**PHILOS 141A. Topics in Philosophy of Physics. 4 Units.**

Selected topics in the philosophy of physics, e.g., the interpretation of quantum mechanics, the nature of spacetime, the problem of quantum field theories.

Repeatability: Unlimited as topics vary.

Same as LPS 141A.

**PHILOS 141B. Geometry and Spacetime. 4 Units.**

An examination of the foundations of the special theory of relativity, with emphasis on the geometry of Minkowski spacetime, and its relation to both Euclidean and non-Euclidean (hyperbolic) plane geometries.

Prerequisite: MATH 2D and (MATH 3A or MATH 6G)

Same as LPS 141B.

**PHILOS 141C. Philosophy of Quantum Mechanics. 4 Units.**

An examination of the standard von Neumann-Dirac formulation of quantum mechanics. The quantum measurement problem is discussed along with several proposed solutions, including GRW, many-worlds, man-minds, and Bohm's theory.

Same as LPS 141C.

**PHILOS 141D. Probability and Determinism. 4 Units.**

An examination of a cluster of interrelated issues concerning probability, determinism, logic, and the foundations of quantum mechanics.

Prerequisite: MATH 2D and (MATH 3A or MATH 6G)

Same as LPS 141D.

**PHILOS 142W. Writing/Philosophy of Biology. 4 Units.**

Philosophy of biology, e.g., scientific method in biology, the structure of evolutionary theory, teleology, ethics, and evolution. Course work includes one 4,000-word and four 1,000-word papers.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as LPS 142W, BIO SCI E142W.

Restriction: Juniors only.

(Ib)

**PHILOS 143. Topics in Philosophy of Psychology. 4 Units.**

Selected topics in the philosophy of psychology, e.g., the nature of psychological explanation, reductionism, issues in cognitive, behavioral, and neuroscience.

Repeatability: Unlimited as topics vary.

Same as LPS 143, PSYCH 123P.

Restriction: Psychology Majors have first consideration for enrollment. Philosophy Majors have first consideration for enrollment.

**PHILOS 144. Topics in Philosophy of Social Science. 4 Units.**

Selected topics in the philosophy of the social sciences, e.g., Is their goal to understand behavior or to predict and control it?; Are they normative and the natural sciences not?; Do they incorporate philosophical doctrines about language and mind?.

Repeatability: May be taken for credit for 4 units as topics vary.

Same as LPS 144.

**PHILOS 145. Topics in Philosophy of Language. 4 Units.**

Selected topics in the philosophy of language, e.g., the nature of meaning, mechanisms of reference, speech acts.

Repeatability: Unlimited as topics vary.

Same as LPS 145, LSCI 141.

**PHILOS 146. Topics in Philosophy of Logic. 4 Units.**

Selected topics in the philosophy of logic, e.g., the nature of logical truth and our knowledge of it, the status of propositions, definite descriptions, and existential presuppositions.

Repeatability: Unlimited as topics vary.

Same as LPS 146.

**PHILOS 147. Topics in Philosophy of Mathematics. 4 Units.**

Selected historical and contemporary topics in the philosophy of mathematics, e.g., mathematical truth and ontology, mathematical knowledge, the nature and role of proof, the workings of mathematics in application.

Repeatability: Unlimited as topics vary.

Same as LPS 147.

**PHILOS 150. Phenomenology . 4 Units.**

A study of the foundations of phenomenology in Husserl and its background in Bolzano, Frege, Brentano, Meinong, Kant, and Descartes.

**PHILOS 151. Existentialism. 4 Units.**

A study of such central existentialist thinkers as Heidegger and Sartre.

Prerequisite: Recommended: PHILOS 7 or PHILOS 150.

**PHILOS 162. Social Ontology. 4 Units.**

Examines how things in one's social environment exist. Such things are compared and contrasted to others in what might be regarded as the given, natural environment. Topics discussed include natural kinds; artifacts; essentialism; constructivism; intentionality; agency.

**PHILOS 163. Social Epistemology. 4 Units.**

Social epistemology is specifically concerned with questions concerning knowledge and justification that arise in a social context. Topics discussed include testimony, experts, disagreement, group knowledge, feminist epistemology, legal epistemology, and epistemology of education.

**PHILOS 164. Well-Being. 4 Units.**

Examines what it is that makes a life good (or bad) for the person who lives it. Topics include hedonism, desire-satisfaction theories of well-being (as well as other such theories), the notion of harm, the possibility of posthumous harm.

**PHILOS 165. Philosophy of Action. 4 Units.**

Philosophy of action is specifically concerned with questions concerning the nature of acting, and related phenomena such as intending, willing, trying, and trusting. It deals both with individual and group action and their moral and epistemological underpinnings.

**PHILOS 190. Special Topics in Philosophy. 4 Units.**

Lectures on selected topics to be given by regular faculty and visiting faculty.

Repeatability: Unlimited as topics vary.

**PHILOS 199. Directed Special Studies. 2-4 Units.**

Independent study on a research topic supervised by a faculty member.

Repeatability: May be repeated for credit unlimited times.

**PHILOS 199H. Honors Directed Special Studies. 2 Units.**

Independent study on a research topic supervised by a faculty member, with the objective of preparing the Department of Philosophy honors paper.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**PHILOS 200. Special Topics in Philosophy. 4 Units.**

Seminars on selected topics to be given by regular faculty and visiting faculty.

Repeatability: Unlimited as topics vary.

**PHILOS 201. First-Year Seminar. 4 Units.**

An examination of some standard works in the history of philosophy, value theory, metaphysics, or epistemology; required of all first-year Philosophy graduate students in the School of Humanities.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only. Philosophy Majors only. Logic and Philosophy of Sci Majors only.

**PHILOS 205A. Set Theory. 4 Units.**

The basic working vocabulary of mathematical reasoning. Topics include: sets, Boolean operations, ordered n-tuples, relations, functions, ordinal and cardinal numbers.

Same as LPS 205A.

**PHILOS 205B. Metalogic. 4 Units.**

Formal syntax (proof theory) and semantics (model theory) for first-order logic, including the deduction, completeness, compactness, and Loewenheim-Skolem theorems.

Prerequisite: PHILOS 205A or LPS 205A

Same as LPS 205B.

**PHILOS 205C. Undecidability and Incompleteness. 4 Units.**

Formal theory of effective processes, including recursive function, Turing machines, Church's thesis, proofs of Goedel's incompleteness theorem for arithmetics, and Church's undecidability for first-order logic.

Prerequisite: PHILOS 205B or LPS 205B

Same as LPS 205C.

Restriction: Graduate students only.

Concurrent with LPS 105C.

**PHILOS 206. Topics in Logic . 4 Units.**

Studies in selected areas of logic. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 206.

**PHILOS 210. Topics in Ancient Philosophy. 4 Units.**

Studies in selected areas of ancient philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 211. Topics in Medieval Philosophy. 4 Units.**

Studies in selected areas of medieval philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 212. Topics in Renaissance Philosophy. 4 Units.**

Studies in selected areas of renaissance philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 213. Topics in Modern Philosophy. 4 Units.**

Studies in selected areas of modern philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 213.

**PHILOS 214. Topics in Nineteenth-Century Philosophy. 4 Units.**

Studies in selected areas of nineteenth-century philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 215. Topics in Analytic Philosophy. 4 Units.**

Studies in selected areas of analytic philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 215.

**PHILOS 216. Topics in Continental Philosophy. 4 Units.**

Studies in selected areas of continental philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 218. Topics in Contemporary Philosophy. 4 Units.**

Studies in selected areas of contemporary philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 220. Topics in Metaphysics. 4 Units.**

Studies in selected areas of metaphysics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 220.

**PHILOS 221. Topics in Epistemology. 4 Units.**

Studies in selected areas of epistemology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 221.

**PHILOS 221A. Medical Epistemology. 4 Units.**

Analysis of epistemological issues concerning medical research and healthcare. Topics may include medical evidence, transmission of medical knowledge in the doctor-patient interaction, medical expertise, epistemology of medical disagreement, classification of illness, well-being, philosophy of pain, or medical decision making.

Same as LPS 221A.

Restriction: Graduate students only.

**PHILOS 222. Topics in Mind and Action. 4 Units.**

Studies in selected areas of mind and action. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 230. Topics in Ethics . 4 Units.**

Studies in selected areas of ethics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 232. Topics in Political and Social Philosophy. 4 Units.**

Studies in selected areas of political and social philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 232.

**PHILOS 234. Topics in Aesthetics . 4 Units.**

Studies in selected areas of aesthetics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 240. Topics in Philosophy of Science. 4 Units.**

Studies in selected areas of philosophy of science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 240.

**PHILOS 241. Topics in Philosophy of Physics. 4 Units.**

Studies in selected areas of philosophy of physics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 241.

**PHILOS 242. Topics in Philosophy of Biology. 4 Units.**

Studies in selected areas of philosophy of biology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 242.

**PHILOS 243. Topics in Philosophy of Psychology. 4 Units.**

Selected topics in the philosophy of psychology, e.g., the nature of psychological explanation, reductionism, issues in cognitive, behavioral, and neuroscience.

Repeatability: Unlimited as topics vary.

Same as LPS 243, PSYCH 231P.

**PHILOS 244. Topics in Philosophy of Social Science. 4 Units.**

Studies in selected areas of philosophy and social science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 244.

**PHILOS 245. Topics in Philosophy of Language. 4 Units.**

Studies in selected areas of philosophy of language. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 245.

**PHILOS 246. Topics in Philosophy of Logic. 4 Units.**

Studies in selected areas of philosophy of logic. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 246.

**PHILOS 247. Topics in Philosophy of Mathematics. 4 Units.**

Studies in selected areas of philosophy of mathematics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 247.

**PHILOS 250. Topics in Existentialism and Phenomenology. 4 Units.**

Studies in selected areas of existentialism and phenomenology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 298. Independent Study. 4-12 Units.**

Independent research with Philosophy faculty.

Repeatability: May be repeated for credit unlimited times.

**PHILOS 299. Directed Research. 4-12 Units.**

Directed research with Philosophy faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHILOS 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Physical Science (PHY SCI)

### Courses

**PHY SCI 5. California Teach 1: Introduction to Science and Mathematics Teaching. 3 Units.**

First in a series for students interested in becoming middle or high school teachers of mathematics or science. Students gain an understanding of effective, research-based teaching strategies. Includes supervised field experience in a K-12 classroom.

Same as BIO SCI 14.

Restriction: School of Physical Sciences students have first consideration for enrollment. School of Biological Sciences students have first consideration for enrollment. School of Info & Computer Sci students have first consideration for enrollment. School of Engineering students have first consideration for enrollment.

**PHY SCI 80. Skills Development. 1.5 Workload Unit.**

Undergraduates identify, cultivate, and practice relevant soft skills applicable to careers in mathematics and science. The focus is on career readiness, how to market oneself to future employers, and what to expect from the professional world.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Grading Option: Workload Credit Letter Grade with P/NP.

Restriction: School of Physical Sciences students have first consideration for enrollment.

**PHY SCI 105. California Teach 2: Middle School Science and Mathematics Teaching. 3 Units.**

Second in a series for students interested in becoming middle or high school teachers of mathematics or science. Students gain an understanding of effective, research-based teaching strategies for grades 6-8. Includes supervised field experience in a middle school classroom.

Prerequisite: PHY SCI 5

Same as BIO SCI 101.

Restriction: School of Physical Sciences students have first consideration for enrollment. School of Biological Sciences students have first consideration for enrollment. School of Info & Computer Sci students have first consideration for enrollment. School of Engineering students have first consideration for enrollment.

**PHY SCI 139W. Technical Writing and Communication Skills. 4 Units.**

Workshop in writing technical reports, journal articles, proposals. Oral presentations. Communicating with the public. May not be used in satisfaction of any School or departmental requirement.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. School of Physical Sciences students have first consideration for enrollment.

**(Ib)****PHY SCI 220. Science Communication Skills. 2 Units.**

Development of effective communication skills, oral and written presentations. Topics range from the art of creating keynote slides to strategically crafting a personal story, culminating in a live presentation to an invited audience.

# Physics (PHYSICS)

## Courses

### **PHYSICS 2. Introduction to Mathematical Methods for Physics. 4 Units.**

Provides the applied mathematics and problem solving/presentation skills necessary for success in an introductory physics sequence. Focuses on practical exercises in problem solving. Covers kinematics in one and two dimensions in detail. Additional topics include vectors, differentiation, and integration.

Prerequisite or corequisite: MATH 2A or MATH 5A or AP Calculus AB or AP Calculus BC. AP Calculus AB with a minimum score of 4. AP Calculus BC with a minimum score of 3

Restriction: PHYSICS 2 may not be taken for credit if taken after PHYSICS 7C.

### **PHYSICS 3A. Basic Physics I. 4 Units.**

Vectors; motion, force, and energy.

Corequisite: MATH 2A or MATH 5A, or a score of 4 or higher on the AP Calculus AB exam, or a score of 3 or higher on the AP Calculus BC exam.

Restriction: PHYSICS 3A may not be taken for credit if taken after PHYSICS 7C.

(II and VA ).

### **PHYSICS 3B. Basic Physics II. 4 Units.**

Fluids; heat; electricity and magnetism.

Prerequisite: PHYSICS 3A or AP Physics C: Mechanics. AP Physics C: Mechanics with a minimum score of 5

(II and VA ).

### **PHYSICS 3C. Basic Physics III. 4 Units.**

Waves and sound; optics; quantum ideas; atomic and nuclear physics; relativity.

Corequisite: MATH 2B or MATH 5B, or a score of 4 or higher on the AP Calculus BC exam.

Prerequisite: PHYSICS 3A or AP Physics C: Mechanics. AP Physics C: Mechanics with a minimum score of 5

(II and Va ).

### **PHYSICS 3LB. Basic Physics Laboratory. 1.5 Unit.**

Practical applications of electronics and classical physics to biology. Goals include skill to use oscilloscope and other basic instrumentation. Materials fee.

### **PHYSICS 3LC. Basic Physics Laboratory. 1.5 Unit.**

Practical applications of physics to medical imaging. Topics include optics, radioactivity, and acoustics. Materials fee.

### **PHYSICS 7C. Classical Physics. 4 Units.**

Topics include force, energy, momentum, rotation, and gravity.

Corequisite: MATH 2B or AP CALCULUS BC, min score = 4.

Prerequisite: PHYSICS 2 or (MATH 2D and (CHEM 1C or CHEM H2C or CHEM M3C) or CHEM M2C) or AP Physics C: Mechanics or AP Physics C: Electricity and Magnetism or SAT Mathematics or ACT Mathematics. PHYSICS 2 with a grade of C or better. AP Physics C: Mechanics with a minimum score of 4. AP Physics C: Electricity and Magnetism with a minimum score of 4. SAT Mathematics with a minimum score of 650. ACT Mathematics with a minimum score of 27. Recommended: One year of high school physics or equivalent physics background.

Restriction: Physics Majors have first consideration for enrollment.

(II and VA ).

### **PHYSICS 7D. Classical Physics. 4 Units.**

Electricity and magnetism.

Corequisite: PHYSICS 7LD and MATH 2D

Prerequisite: PHYSICS 7C and (MATH 2B or AP Calculus BC). AP Calculus BC with a minimum score of 4

Restriction: Physics Majors have first consideration for enrollment.

(II and Va ).

**PHYSICS 7E. Classical Physics. 4 Units.**

Fluids; oscillations; waves; and optics.

Prerequisite: PHYSICS 7C and MATH 2B

Restriction: Physics Majors have first consideration for enrollment.

(II and VA ).

**PHYSICS 7LC. Classical Physics Laboratory. 1 Unit.**

Experiments related to lecture topics in Physics 7C. Materials fee.

Corequisite: PHYSICS 7C

Restriction: Physics Majors have first consideration for enrollment.

**PHYSICS 7LD. Classical Physics Laboratory. 1 Unit.**

Electricity and magnetism.

Corequisite: PHYSICS 7D

Restriction: Physics Majors have first consideration for enrollment.

**PHYSICS 12. Science Fiction and Science Fact. 4 Units.**

An introduction to fundamental physics principles, the scientific process, and the mathematical language of science, used to analyze topics drawn from superheroes, science fiction works, and current science news to distinguish science fiction and science fact.

Overlaps with PHYSICS 21.

(II and VA ).

**PHYSICS 14. Energy and the Environment. 4 Units.**

The physics of society's energy production and consumption, and of their influences on the environment. Topics include fossil and renewable energy resources; nuclear power; prospects for a hydrogen economy; efficient and environmentally benign transportation; efficient home and commercial energy usage.

(II, Va)

**PHYSICS 15. Physics of Music. 4 Units.**

Introduces basic physical principles underlying generation and properties of music, including basic properties of sound waves, musical scales and temperament, musical instruments, and acoustics of music halls. No mathematics background required, but high school algebra is recommended.

(II)

**PHYSICS 17. Physics of Athletics. 4 Units.**

Introduces basic physical principles behind motion. Examples are drawn from a range of athletic endeavors (such as ice skating, baseball, diving, and dance). No mathematics background required, but high school algebra is recommended.

(II)

**PHYSICS 18. How Things Work. 4 Units.**

Survey of the physical basis of modern technology, with an emphasis on electronics and materials. Topics include power generation and distribution, communication (radio, TV, telephone, computers, tape recorders, CD players), imaging (optics, x-rays, MRI), and modern materials (alloys, semiconductors, superconductors).

(II)

**PHYSICS 19. Great Ideas of Physics. 4 Units.**

Introduces non-science majors to physics, examining important breakthroughs and controversies. Potential topics: Einstein's Relativity; Heisenberg's Uncertainty Principle; black holes; extra-dimensions; antimatter. Case studies illustrate the essential nature of scientific review and independent confirmation of results. No mathematics background required.

(II)

**PHYSICS 20A. Introduction to Astronomy. 4 Units.**

History of astronomy. Underlying physics. Objects in the solar system and how they are studied. Properties of stars: their formation, structure, and evolution. Pulsars and black holes. Galaxies and quasars.

(II and VA ).

**PHYSICS 20B. Cosmology: Humanity's Place in the Universe. 4 Units.**

An overview of the origin, evolution, and ultimate fate of the Universe. Galaxies and dark matter. The Big Bang and dark energy. Ancient world models.

(II and VA ).

**PHYSICS 20D. Space Science. 4 Units.**

Space exploration. Human missions to the moon, Mars, and beyond. Space stations, observatories, and deep-space probes. Robots and drones on distant worlds. Propulsion mechanisms, rockets, space flight, and the dangers of solar radiation.

(II and VA ).

**PHYSICS 20E. Life in the Universe. 4 Units.**

An overview of the scientific quest to discover life elsewhere in the universe. Topics include the origin of life on Earth, Mars, extra-solar planets, interstellar travel, and extra-terrestrial intelligence.

(II, Va)

**PHYSICS 21. Special Topics in Physics. 4 Units.**

Topics addressed vary each quarter. Past topics have included physics and music, Newton, planetary science. Lectures on areas of special interest in physics used to introduce students to scientific method, fundamental laws of science, qualitative and quantitative analysis of data.

Repeatability: Unlimited as topics vary.

Overlaps with PHYSICS 12, PHYSICS XI12.

(II)

**PHYSICS 50. Introductory Mathematical Physics. 4 Units.**

Introduction to math methods for upper-division physics. Taylor and Fourier series; complex algebra; ordinary differential equations; matrices, tensors and vector spaces; eigensystems; orthogonal coordinates; vector calculus and fields. Symbolic computation with Mathematica is incorporated throughout.

Corequisite: MATH 2E

Prerequisite: MATH 3A

Overlaps with PHYSICS 100.

Restriction: Physics Majors have first consideration for enrollment.

**PHYSICS 51A. Modern Physics. 4 Units.**

Wave-particle duality; quantum mechanics; special relativity; statistical mechanics.

Prerequisite: (PHYSICS 7E or PHYSICS 3C) and MATH 2D

Overlaps with PHYSICS 61A.

Restriction: No Physics Majors.

**PHYSICS 52A. Fundamentals of Experimental Physics. 2 Units.**

Optics: lenses, mirrors, polarization, lasers, optical fibers, interference, spectra. Materials fee.

Corequisite: PHYSICS 7E or PHYSICS 3C.

Restriction: Physics Majors have first consideration for enrollment.

**PHYSICS 52B. Fundamentals of Experimental Physics. 2 Units.**

Circuits: oscilloscope, meters, DC and AC circuits. Materials fee.

Prerequisite: PHYSICS 7D or PHYSICS 3B

Restriction: Physics Majors have first consideration for enrollment.

**PHYSICS 52C. Fundamentals of Experimental Physics. 2 Units.**

Data analysis: random and systematic errors, curve fitting; nuclear counting; quantum experiments. Error analysis: random and systematic errors, curve fitting, nuclear counting, and quantum experiments. Materials fee.

Prerequisite: PHYSICS 51A or PHYSICS 61A

Restriction: Physics Majors have first consideration for enrollment.

**PHYSICS 53. Introduction to Programming and Numerical Analysis. 4 Units.**

Introduction to structured programming; in-depth training in python. Elementary numerical methods applied to physics problems.

Prerequisite: MATH 3A and MATH 3D

Restriction: Physics Majors have first consideration for enrollment.

**PHYSICS 60. Thermal Physics. 4 Units.**

Introduction to thermodynamics and systems of many particles. Topics include first and second laws of thermodynamics, ideal gas laws, kinetic theory, heat engines and refrigerators, thermodynamic potentials, phase transitions, dilute solutions, chemical equilibrium, and basic statistical distributions.

Prerequisite: (PHYSICS 7E or PHYSICS 3C) and MATH 2D

Restriction: Physics Majors only.

**PHYSICS 61A. Modern Physics for Majors. 4 Units.**

Wave-particle duality; Schrödinger equation; angular momentum.

Prerequisite: (PHYSICS 7E or PHYSICS 3C) and MATH 2D

Overlaps with PHYSICS 51A.

Restriction: Physics Majors only.

**PHYSICS 61B. Modern Physics for Majors. 4 Units.**

Atomic transitions; molecules; solids; nuclei; elementary particles; cosmological models.

Prerequisite: PHYSICS 61A or PHYSICS 51A

Overlaps with PHYSICS 51B.

Restriction: Physics Majors only.

**PHYSICS 61C. Introduction to Astrophysics. 4 Units.**

Introduction to fundamental topics in astrophysics, including stellar structure and evolution; stellar remnants; detection and characterization of exoplanets; physics of interstellar gas and star-forming regions.

Prerequisite: PHYSICS 61A or PHYSICS 51A

**PHYSICS H80. Impact of World War I on Science. 4 Units.**

Introduction to science in 1914 and WWI. Participants in groups of two or three will pick a preferred science; find out what happened to it during and after the war; write reports and present what they learned.

Restriction: Campuswide Honors Collegium students only.

(II)

**PHYSICS H90. The Idiom and Practice of Science. 4 Units.**

A series of fundamental and applied scientific problems of social relevance. Possible topics include Newton's Law, calculus, earthquake physics, and radiation.

Restriction: Campuswide Honors Collegium students only.

(II, Va)

**PHYSICS 99. Current Topics in Physics. 2 Units.**

Designed to introduce undergraduate students to current topics in physics. Focus is discussion of selected readings on current research issues.

Repeatability: Unlimited as topics vary.

**PHYSICS 100. Computational Methods. 4 Units.**

Mathematical and numerical analysis using Mathematica and C programming, as applied to problems in physical science.

Overlaps with PHYSICS 50.

Concurrent with PHYSICS 229A.

**PHYSICS 106W. Advanced Data Acquisition, Analysis, and Scientific Writing. 4 Units.**

Introduces modern practical laboratory techniques for developing data interface devices, acquiring and analyzing data, and writing up results in manuscript format. Experiments include interfacing with instruments through software and hardware development, PID controller, Fourier analysis, and lock-in amplifier.

Prerequisite: PHYSICS 52B and PHYSICS 194

Concurrent with PHYSICS 206 and CHEM 206.

**(Ib)****PHYSICS 111A. Classical Mechanics. 4 Units.**

One-dimensional motion and oscillations; three-dimensional motion, non-inertial coordinates, conservation laws, and Lagrangian and Hamiltonian dynamics; rigid body motion and relativity.

Corequisite: PHYSICS 50

Prerequisite: (PHYSICS 7E or PHYSICS 3C)

**PHYSICS 111B. Classical Mechanics. 4 Units.**

One-dimensional motion and oscillations; three-dimensional motion, non-inertial coordinates, conservation laws, and Lagrangian and Hamiltonian dynamics; rigid body motion and relativity.

Prerequisite: PHYSICS 111A

**PHYSICS 112A. Electromagnetic Theory. 4 Units.**

Electric, magnetic, and gravitational fields and potentials; electrodynamics; mechanical and electromagnetic waves and radiation.

Prerequisite: (PHYSICS 7D or PHYSICS 3B) and PHYSICS 50

**PHYSICS 112B. Electromagnetic Theory. 4 Units.**

Electric, magnetic, and gravitational fields and potentials; electrodynamics; mechanical and electromagnetic waves and radiation.

Prerequisite: PHYSICS 7E and PHYSICS 112A

**PHYSICS 113A. Quantum Physics. 4 Units.**

Inadequacy of classical physics; time independent and time dependent Schrodinger equation; systems in one, two, and three dimensions; matrices; Hermitian operators; symmetries; angular momentum; perturbation theory; scattering theory; applications to atomic structure; emphasis on phenomenology.

Prerequisite: (PHYSICS 51A or PHYSICS 61A) and PHYSICS 50

**PHYSICS 113B. Quantum Physics. 4 Units.**

Inadequacy of classical physics; time independent and time dependent Schrodinger equation; systems in one, two, and three dimensions; matrices; Hermitian operators; symmetries; angular momentum; perturbation theory; scattering theory; applications to atomic structure; emphasis on phenomenology.

Prerequisite: PHYSICS 111B and PHYSICS 112B and PHYSICS 113A

**PHYSICS 113C. Quantum Physics. 4 Units.**

Inadequacy of classical physics; time independent and time dependent Schrodinger equation; systems in one, two, and three dimensions; matrices; Hermitian operators; symmetries; angular momentum; perturbation theory; scattering theory; applications to atomic structure; emphasis on phenomenology.

Prerequisite: PHYSICS 111B and PHYSICS 112B and PHYSICS 113B

**PHYSICS 115A. Statistical Physics. 4 Units.**

Microscopic theory of temperature, heat, and entropy; kinetic theory; multicomponent systems; quantum statistics.

Prerequisite: PHYSICS 50 and (PHYSICS 60 or CHEM 1C or ENGRMAE 91)

**PHYSICS 116. Relativity and Black Holes. 4 Units.**

Introduces students to both special and general relativity; includes the formalism of four-vectors, equivalence principle, curved space-time, and modern issues with black holes.

Prerequisite: PHYSICS 50 and PHYSICS 111A

**PHYSICS 120. Electronics for Scientists. 4 Units.**

Applications of modern semiconductor devices to physical instrumentation. Characteristics of semiconductor devices, integrated circuits, analog and digital circuits. Materials fee.

Prerequisite: PHYSICS 52B

Concurrent with PHYSICS 220.

**PHYSICS 121W. Advanced Laboratory. 4 Units.**

Experiments in atomic, condensed matter, nuclear, particle, and plasma physics. Introduction to instrumentation and a first experience in the research laboratory.

Prerequisite: (PHYSICS 51B or PHYSICS 61B or PHYSICS 61C) and (PHYSICS 52C or PHYSICS 193) and (PHYSICS 194 or EDUC 143BW)

Repeatability: May be taken for credit 3 times.

Restriction: Physics Majors only.

(Ib)

**PHYSICS 125A. Mathematical Physics. 4 Units.**

Complex variables; Legendre and Bessel functions; complete sets of orthogonal functions; partial differential equations; integral equations; calculus of variations; coordinate transformations; special functions and series.

Prerequisite: PHYSICS 50 and MATH 3D

**PHYSICS 125B. Mathematical Physics. 4 Units.**

Complex variables; Legendre and Bessel functions; complete sets of orthogonal functions; partial differential equations; integral equations; calculus of variations; coordinate transformations; special functions and series.

Prerequisite: PHYSICS 125A and PHYSICS 113A

**PHYSICS 133. Introduction to Condensed Matter Physics. 4 Units.**

Phenomena of solids and their interpretation in terms of quantum theory.

Prerequisite: PHYSICS 113B and PHYSICS 115A

**PHYSICS 134A. Physical and Geometrical Optics. 4 Units.**

Focuses on the practical aspects of optics and optical engineering, starting at the fundamentals. Topics include geometrical optics, ray tracing, polarization optics, interferometers, and diffractive optics.

Corequisite: PHYSICS 112B

Prerequisite: PHYSICS 112A

Concurrent with CBEMS 242A and CHEM 242A.

**PHYSICS 135. Plasma Physics. 4 Units.**

Basic concepts, orbits, kinetic and fluid equations, Coulomb collisions, fluctuations, scattering, radiation.

Prerequisite: PHYSICS 112B

Concurrent with PHYSICS 239A.

**PHYSICS 136. Introduction to Particle Physics. 4 Units.**

Experimental techniques and theoretical concepts of high-energy phenomena: accelerators and detectors; classification of particles and interactions; particle properties; symmetries and mass multiplets; production and decay mechanisms.

Prerequisite: PHYSICS 113B

**PHYSICS 137. Introduction to Cosmology. 4 Units.**

Solution of the differential equations governing the expansion of the Universe. Observational determinations of the parameters governing the expansion. Big Bang inflation, primordial nucleosynthesis, and cosmic microwave background. Dark matter, dark energy, and large-scale structure of the Universe.

Prerequisite or corequisite: PHYSICS 111A

**PHYSICS 138. Astrophysics of Galaxies. 4 Units.**

Introduction to the solar neighborhood, Milky Way, and other galaxies. Interstellar medium. Star formation. Stellar populations. Evolution of spiral, elliptical, and irregular galaxies. Supermassive black holes, quasars, and active galaxies. Galaxies as probes of the expansion rate of the Universe.

Prerequisite: PHYSICS 111A and PHYSICS 61C

**PHYSICS 139. Observational Astrophysics. 4 Units.**

Telescopes and astronomical observations, imaging with CCD detectors and image processing techniques. Photometry and spectroscopy of stars, galaxies, and quasars. Advanced imaging techniques such as deconvolution, adaptive optics, and interferometry.

Corequisite: PHYSICS 194

Prerequisite: PHYSICS 52A and PHYSICS 52B and PHYSICS 52C and PHYSICS 53

**PHYSICS 144. Stellar Astrophysics. 4 Units.**

Stars: their structure and evolution; physical state of the interior; the Hertzsprung- Russell diagram, stellar classification, and physical principles responsible for the classification; star formation; nuclear burning; giant and dwarf stars; neutron stars and black holes.

Prerequisite: (PHYSICS 51A or PHYSICS 61A) and PHYSICS 111A and PHYSICS 112A

**PHYSICS 145. High-Energy Astrophysics. 4 Units.**

Production of radiation by high-energy particles, white dwarfs, neutron stars, and black holes. Evolution of galactic nuclei, radio galaxies, quasars, and pulsars. Cosmic rays and the cosmic background radiation.

Prerequisite: (PHYSICS 51A or PHYSICS 61A) and PHYSICS 111A and PHYSICS 112A

**PHYSICS 146A. Biophysics of Molecules and Molecular Machines. 4 Units.**

Physical concepts and experimental and computational techniques used to study the structure and function of biological molecules and molecular machines with examples from enzyme action, protein folding, molecular motors, photobiology, chemotaxis, and vision.

Prerequisite: PHYSICS 115A

Concurrent with PHYSICS 230A.

**PHYSICS 146B. Biophysics of Molecules and Molecular Machines. 4 Units.**

Physical concepts and experimental and computational techniques used to study the structure and function of biological molecules and molecular machines with examples from enzyme action, protein folding, molecular motors, photobiology, chemotaxis, and vision.

Prerequisite: PHYSICS 115A

Concurrent with PHYSICS 230B.

**PHYSICS 147B. Techniques in Medical Imaging I: X-ray, Nuclear, and NMR Imaging. 4 Units.**

Ionizing radiation, planar and tomographic radiographic and nuclear imaging, magnetism, NMR, MRI imaging.

Prerequisite: PHYSICS 147A

Concurrent with PHYSICS 233B and EECS 202B.

**PHYSICS 147C. Techniques in Medical Imaging II: Ultrasound, Electrophysiological, Optical. 4 Units.**

Sound and ultrasound, ultrasonic imaging, physiological electromagnetism, EEG, MEG, ECG, MCG, optical properties of tissues, fluorescence and bioluminescence, MR impedance imaging, MR spectroscopy, electron spin resonance and ESR imaging.

Prerequisite: PHYSICS 147B

Concurrent with PHYSICS 233C and EECS 202C.

**PHYSICS 150. Special Topics in Physics and Astronomy. 4 Units.**

Current topics in physics. Includes topics from nano-science, biological sciences, astrophysics, and the common use of estimation across subdisciplines within physics.

Repeatability: Unlimited as topics vary.

**PHYSICS 191. Field Experience in Physics Education. 1-4 Units.**

Students develop and perform physics assemblies at neighboring public schools.

Prerequisite: PHYSICS 7C and PHYSICS 7D and PHYSICS 7E

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 8 units.

**PHYSICS 192. Tutoring in Physics. 1-2 Units.**

Formalizes the already existing free tutoring for the lower-division physics courses that is provided by the Society of Physics Students (SPS). Includes instructions on tutoring techniques.

Prerequisite: PHYSICS 7E

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 12 units.

Restriction: Society of Physics Students (SPS) tutoring program students only.

**PHYSICS 193. Research Methods. 4 Units.**

Explores tools of inquiry for developing and implementing science research projects. Students undertake independent projects requiring data collection, analysis, and modeling, and the organization and presentation of results. Additional topics include ethical issues and role of scientific literature.

Prerequisite: BIO SCI 14 or PHY SCI 5

Same as BIO SCI 108, CHEM 193.

**PHYSICS 194. Research Communication for Physics Majors. 2 Units.**

Students learn the fundamentals of communicating about research. Topics include preparing abstracts, proposals, and literature reviews. Provides preparation for presentation of independent research projects in PHYSICS 121 and PHYSICS 196.

Prerequisite: PHYSICS 61A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Physics Majors only.

**PHYSICS 195. Undergraduate Research. 4 Units.**

Independent research under the guidance of a Physics faculty member.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Juniors only. Physics Majors only.

**PHYSICS 196A. Thesis in Physics I. 2 Units.**

Independent research for seniors conducted under the guidance of a faculty member. Students' research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Corequisite: PHYSICS 194

Overlaps with PHYSICS H196A.

Restriction: Physics Majors only.

**PHYSICS 196B. Thesis in Physics II. 4 Units.**

Independent research for seniors conducted under the guidance of a faculty member. Students' research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Prerequisite: PHYSICS 196A

Overlaps with PHYSICS H196B.

Restriction: Physics Majors only.

**PHYSICS 196C. Thesis in Physics III. 4 Units.**

Independent research for seniors conducted under the guidance of a faculty member. Students' research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Prerequisite: PHYSICS 196B

Overlaps with PHYSICS H196C.

Restriction: Physics Majors only.

**PHYSICS H196A. Honors Thesis in Physics I. 2 Units.**

Independent research for seniors conducted under the guidance of a faculty member. Students' research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Corequisite: PHYSICS 194

Overlaps with PHYSICS 196A.

Restriction: Physics Majors only. Campuswide Honors Collegium students only. Honors Program in Physics students only.

**PHYSICS H196B. Honors Thesis in Physics II. 4 Units.**

Independent research for seniors conducted under the guidance of a faculty member. Students' research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Prerequisite: PHYSICS H196A

Overlaps with PHYSICS 196B.

Restriction: Physics Majors only. Campuswide Honors Collegium students only. Honors Program in Physics students only.

**PHYSICS H196C. Honors Thesis in Physics III. 4 Units.**

Independent research for seniors conducted under the guidance of a faculty member. Students' research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Prerequisite: PHYSICS H196B

Overlaps with PHYSICS 196C.

Restriction: Physics Majors only. Campuswide Honors Collegium students only. Honors Program in Physics students only.

**PHYSICS 199. Readings on Special Topics. 1-4 Units.**

Readings in selected areas of Physics. Topics addressed vary each quarter.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**PHYSICS 206. Advanced Data Acquisition and Analysis. 4-6 Units.**

Introduces students to a variety of practical laboratory techniques, including lock-in, boxcar, coincidence counting, noise filtering, PID control, properties of common transducers, computer interfacing to instruments, vacuum technology, laboratory safety, basic mechanical design, and shop skills. Materials fee.

Same as CHEM 206.

Concurrent with PHYSICS 106.

**PHYSICS 207. Applied Physical Chemistry. 4 Units.**

Introduction to fundamental concepts in molecular structure and reactivity: theory of bonding, valence and molecular orbitals; structure and reactivity in inorganic chemistry; elements in molecular group theory; nomenclature in organic chemistry; and survey of macromolecules.

Same as CHEM 207.

**PHYSICS 208. Math Methods. 4 Units.**

Applications of mathematics to physical and chemical problems. Calculus of special functions, complex variables and vectors; linear vector spaces and eigenvalue problems. Differential equations.

Same as CHEM 208.

**PHYSICS 211. Classical Mechanics. 4 Units.**

Variational principles, Lagrange's equations; applications to two body problems, small oscillation theory, and other phenomena. Hamilton's equations. Hamilton-Jacobi theory. Canonical transformations.

Restriction: Graduate students only.

**PHYSICS 212A. Mathematical Physics. 4 Units.**

Complex variables and integration; ordinary and partial differential equations; the eigenvalue problem.

Restriction: Graduate students only.

**PHYSICS 213A. Electromagnetic Theory. 4 Units.**

Electrostatics; magnetostatics; relativity; classical electron theory; fields in vacuum and matter; retardation; radiation and absorption; dispersion; propagation of light; diffraction; geometric optics; theories of the electric and magnetic properties of materials; scattering.

**PHYSICS 213B. Electromagnetic Theory. 4 Units.**

Electrostatics; magnetostatics; relativity; classical electron theory; fields in vacuum and matter; retardation; radiation and absorption; dispersion; propagation of light; diffraction; geometric optics; theories of the electric and magnetic properties of materials; scattering.

Prerequisite: PHYSICS 213A

**PHYSICS 214A. Statistical Physics. 4 Units.**

Maxwell-Boltzmann, Bose-Einstein, Fermi-Dirac statistics; ideal and imperfect gases; thermodynamic properties of solids; transport theory.

Restriction: Graduate students only.

**PHYSICS 214C. Many Body Theory. 4 Units.**

Application of field theory methods, perturbative and non-perturbative, to many particle systems; second quantization, Feynman diagrams, linear response theory, and functional integral methods applied to the ground state and at finite temperature.

Prerequisite: PHYSICS 214A and PHYSICS 215A and PHYSICS 215B

Restriction: Graduate students only.

**PHYSICS 215A. Quantum Mechanics. 4 Units.**

Foundations; Dirac notation; basic operators and their eigenstates; perturbation theory; spin.

Restriction: Graduate students only.

**PHYSICS 215B. Quantum Mechanics. 4 Units.**

Atomic physics; scattering theory, formal collision theory; semi-classical radiation theory; many body systems.

Prerequisite: PHYSICS 215A

Restriction: Graduate students only.

**PHYSICS 220. Electronics for Scientists. 4 Units.**

Applications of modern semiconductor devices to physical instrumentation. Characteristics of semiconductor devices, integrated circuits, analog and digital circuits.

Restriction: Graduate students only.

Concurrent with PHYSICS 120.

**PHYSICS 222. Continuum Mechanics. 4 Units.**

Introduction to the continuum limit and stress and strain tensors. Hydrodynamics of perfect fluids; two-dimensional problems, motion of incompressible viscous fluids, Navier Stokes equations. Basic elasticity theory. Description of viscoelastic materials. Introduction to nonlinear behavior instabilities.

**PHYSICS 223. Numerical Methods. 4 Units.**

Introduction to theory and practice of modern numerical methods. Techniques are drawn from topics such as solution of differential equations, Monte Carlo methods, Fast Fourier transforms, and evaluation of special functions.

**PHYSICS 228. Electromagnetism. 4 Units.**

Maxwell's equations, electrodynamics, electromagnetic waves and radiation, wave propagation in media, interference and quantum optics, coherent and incoherent radiation, with practical applications in interferometry, lasers, waveguides, and optical instrumentation.

Same as CHEM 228.

**PHYSICS 229A. Computational Methods. 4 Units.**

Mathematical and numerical analysis using Mathematica and C programming, as applied to problems in physical science.

Same as CHEM 229A.

Concurrent with PHYSICS 100.

**PHYSICS 230A. Biophysics of Molecules and Molecular Machines. 4 Units.**

Physical concepts and experimental and computational techniques used to study the structure and function of biological molecules and molecular machines with examples from enzyme action, protein folding, molecular motors, photobiology, chemotaxis, and vision.

Concurrent with PHYSICS 146A.

**PHYSICS 230B. Biophysics of Molecules and Molecular Machines. 4 Units.**

Physical concepts and experimental and computational techniques used to study the structure and function of biological molecules and molecular machines with examples from enzyme action, protein folding, molecular motors, photobiology, chemotaxis, and vision.

Concurrent with PHYSICS 146B.

**PHYSICS 233A. Principles of Imaging. 4 Units.**

Linear systems, probability and random processes, image processing, projecting imaging, tomographic imaging.

Same as EECS 202A.

Restriction: Graduate students only.

Concurrent with PHYSICS 147A.

**PHYSICS 233B. Techniques in Medical Imaging I: X-ray, Nuclear, and NMR Imaging. 4 Units.**

Ionizing radiation, planar and tomographic radiographic and nuclear imaging, magnetism, NMR, MRI imaging.

Prerequisite: EECS 202A

Same as EECS 202B.

Restriction: Graduate students only.

Concurrent with PHYSICS 147B.

**PHYSICS 233C. Techniques in Medical Imaging II: Ultrasound, Electrophysiological, Optical. 4 Units.**

Sound and ultrasound, ultrasonic imaging, physiological electromagnetism, EEG, MEG, ECG, MCG, optical properties of tissues, fluorescence and bioluminescence, MR impedance imaging, MR spectroscopy, electron spin resonance and ESR imaging.

Prerequisite: EECS 202B

Same as EECS 202C.

Restriction: Graduate students only.

Concurrent with PHYSICS 147C.

**PHYSICS 234A. Elementary Particle Physics. 4 Units.**

Overview of Standard Model theory and phenomenology. Electromagnetic, strong and weak forces, quark model, interactions with matter, particle detectors and accelerators.

Prerequisite: PHYSICS 215B

**PHYSICS 234B. Advanced Elementary Particle Physics. 4 Units.**

$SU(3) \times SU(2) \times U(1)$  model of strong, weak, and electromagnetic interactions. K-meson system and CP violation, neutrino masses and mixing, grand-unified theories, supersymmetry, introduction to cosmology and its connection to particle physics.

Prerequisite: PHYSICS 234A and PHYSICS 235A

**PHYSICS 234C. Advanced Elementary Particle Physics. 4 Units.**

$SU(3) \times SU(2) \times U(1)$  model of strong, weak, and electromagnetic interactions. K-meson system and CP violation, neutrino masses and mixing, grand-unified theories, supersymmetry, introduction to cosmology and its connection to particle physics.

Prerequisite: PHYSICS 234A and PHYSICS 235A

**PHYSICS 235A. Quantum Field Theory. 4 Units.**

Canonical quantization, scalar field theory, Feynman diagrams, tree-level quantum electrodynamics.

Prerequisite: PHYSICS 215B

Restriction: Graduate students only.

**PHYSICS 235B. Advanced Quantum Field Theory. 4 Units.**

Pathintegral techniques, loop diagrams, regularization and renormalization, anomalies.

Prerequisite: PHYSICS 235A

Restriction: Graduate students only.

**PHYSICS 238A. Condensed Matter Physics. 4 Units.**

Bonding in solids; crystal symmetry and group theory, elastic properties of crystals; lattice vibrations, interaction of radiation with matter; cohesion of solids; the electron gas; electron energy bands in solids; ferromagnetism; transport theory; semiconductors and superconductors; many-body perturbation theory.

Prerequisite: PHYSICS 133 and (PHYSICS 214A or CHEM 232A) and (PHYSICS 215B or CHEM 231B)

**PHYSICS 238B. Condensed Matter Physics. 4 Units.**

Bonding in solids; crystal symmetry and group theory, elastic properties of crystals; lattice vibrations, interaction of radiation with matter; cohesion of solids; the electron gas; electron energy bands in solids; ferromagnetism; transport theory; semiconductors and superconductors; many-body perturbation theory.

Prerequisite: PHYSICS 238A

**PHYSICS 238C. Condensed Matter Physics. 4 Units.**

Bonding in solids; crystal symmetry and group theory, elastic properties of crystals; lattice vibrations, interaction of radiation with matter; cohesion of solids; the electron gas; electron energy bands in solids; ferromagnetism; transport theory; semiconductors and superconductors; many-body perturbation theory.

Prerequisite: PHYSICS 238B

**PHYSICS 239A. Plasma Physics. 4 Units.**

Basic concepts, orbits, kinetic and fluid equations, Coulomb collisions, fluctuations, scattering, radiation.

Restriction: Graduate students only.

Concurrent with PHYSICS 135.

**PHYSICS 239B. Plasma Physics. 4 Units.**

Magnetic confinement, MHD equilibrium and stability, collisional transport.

Prerequisite: PHYSICS 239A

Restriction: Graduate students only.

**PHYSICS 239C. Plasma Physics. 4 Units.**

Linear waves and instabilities, uniform un-magnetized and magnetized plasmas, non-uniform plasmas.

Prerequisite: PHYSICS 239B

Restriction: Graduate students only.

**PHYSICS 240A. Galactic Astrophysics. 4 Units.**

The morphology, kinematics, and evolution of our Milky Way and other galaxies. Topics include stellar formation and stellar evolution, end states of stars (supernovae, neutron stars), the distribution of stars, interstellar gas and mass in galaxies. The Local Group.

**PHYSICS 240B. Cosmology. 4 Units.**

An introduction to modern cosmology set within the context of general relativity. Topics include the expansion history of the Universe, inflation, the cosmic microwave background, density fluctuations, structure formation, dark matter, dark energy, and gravitational lensing.

**PHYSICS 240C. Radiative Processes in Astrophysics. 4 Units.**

Exploration of radiation mechanisms (electron scattering, synchrotron emission, collisional excitation, and more) and radiative transfer through matter including absorption and emission. Includes such observational astrophysics topics as spectroscopic study of atoms and nuclei, X-rays, and cosmic rays.

**PHYSICS 241A. Solar System and Extrasolar Planets. 4 Units.**

Formation, evolution, and habitability of planetary systems. Observational and theoretical study of the origin and evolution of the Solar System, present day dynamical state of the Solar System (asteroids, Kuiper Belt Objects, Oort cloud), planetary atmospheres, processes governing planetary climate.

Corequisite: PHYSICS 242

Restriction: Graduate students only.

**PHYSICS 241B. Stellar Astrophysics. 4 Units.**

Physics of stellar interiors and equations of stellar structure. Stellar atmospheres and absorption processes. Introduction to stellar winds. Thermonuclear reactions, nucleosynthesis, and solar neutrinos. Binary stars and mass accretion. White dwarfs, supernovae, neutron stars, and black holes.

Prerequisite: PHYSICS 211 and PHYSICS 240A

**PHYSICS 241C. Extragalactic Astrophysics. 4 Units.**

The physics and phenomenology of galaxies; star formation, interstellar medium, and intergalactic medium. Galaxy structure and dynamics. Galaxy evolution, stellar populations, and scaling relations; the relationship between galaxy properties and environment. Galaxy clusters and active galactic nuclei.

Prerequisite: PHYSICS 211 and PHYSICS 240A

**PHYSICS 241D. Early Universe Physics. 4 Units.**

Includes a thorough quantum treatment of the generation of perturbations during inflation and various topics related to kinetic theory in an expanding Universe. Other topics include the astrophysics and cosmology of weakly interacting particles.

Prerequisite: PHYSICS 234A and (PHYSICS 240B or PHYSICS 255)

**PHYSICS 242. Astro Fundamentals. 4 Units.**

Introduction to topics in astrophysics including measurement of stellar properties, stellar structure and evolution, stellar remnants and supernovae, the interstellar medium, exoplanets, gravitational lensing, galactic structure, extragalactic distance measurements, and the expanding universe.

Restriction: Graduate students only.

**PHYSICS 246. Special Topics in Astrophysics. 4 Units.**

Outlines and emphasizes a subarea of astrophysics that is undergoing rapid development.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 247. Special Topics in Particle Physics. 4 Units.**

Current topics in particle non-accelerator-based research fields.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 248. Special Topics in Condensed Matter Physics. 4 Units.**

Outlines and emphasizes a subarea of condensed matter physics that is undergoing rapid development.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PHYSICS 249. Special Topics in Plasma Physics. 4 Units.**

Outlines and emphasizes a subarea of plasma physics that is undergoing rapid development.

Prerequisite: PHYSICS 239A and PHYSICS 239B

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PHYSICS 250. Physics and Astronomy Communications Skills. 4 Units.**

Fundamentals of effectively communicating research through written and oral platforms. Topics include writing compelling proposals and journal articles for peer review, and the development of engaging oral presentations of science results and significance to a wide range of audiences.

Restriction: Graduate students only.

**PHYSICS 255. General Relativity. 4 Units.**

An introduction to Einstein's theory of gravitation. Tensor analysis, Einstein's field equations, astronomical tests of Einstein's theory, gravitational waves.

**PHYSICS 260A. Seminar in Condensed Matter Physics. 1 Unit.**

Seminar designed to acquaint students with recent advances in solid state physics. Lecturers from the Department of Physics and Astronomy (both faculty and graduate students), other UCI departments, and other institutions.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 260B. Seminar in Condensed Matter Physics. 1 Unit.**

Seminar designed to acquaint students with recent advances in solid state physics. Lecturers from the Department of Physics and Astronomy (both faculty and graduate students), other UCI departments, and other institutions.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 260C. Seminar in Condensed Matter Physics. 1 Unit.**

Seminar designed to acquaint students with recent advances in solid state physics. Lecturers from the Department of Physics and Astronomy (both faculty and graduate students), other UCI departments, and other institutions.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 261A. Seminar in Plasma Physics. 1 Unit.**

Advanced topics in plasma physics: wave propagation, nonlinear effects, kinetic theory and turbulence, stability problems, transport coefficients, containment, and diagnostics. Applications to controlled fusion and astrophysics.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**PHYSICS 261B. Seminar in Plasma Physics. 1 Unit.**

Advanced topics in plasma physics: wave propagation, nonlinear effects, kinetic theory and turbulence, stability problems, transport coefficients, containment, and diagnostics. Applications to controlled fusion and astrophysics.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**PHYSICS 261C. Seminar in Plasma Physics. 1 Unit.**

Advanced topics in plasma physics: wave propagation, nonlinear effects, kinetic theory and turbulence, stability problems, transport coefficients, containment, and diagnostics. Applications to controlled fusion and astrophysics.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**PHYSICS 263A. Seminar in Particle Physics. 1 Unit.**

Discussion of advanced topics and reports of current research results in theoretical and experimental particle physics and cosmic rays.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 263B. Seminar in Particle Physics. 1 Unit.**

Discussion of advanced topics and reports of current research results in theoretical and experimental particle physics and cosmic rays.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 263C. Seminar in Particle Physics. 1 Unit.**

Discussion of advanced topics and reports of current research results in theoretical and experimental particle physics and cosmic rays.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 265A. Seminar in Astrophysics. 1 Unit.**

Acquaints students with current research in astrophysics. Lecturers from the Department of Physics and Astronomy and from other institutions.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 265B. Seminar in Astrophysics. 1 Unit.**

Acquaints students with current research in astrophysics. Lecturers from the Department of Physics and Astronomy and from other institutions.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 265C. Seminar in Astrophysics. 1 Unit.**

Acquaints students with current research in astrophysics. Lecturers from the Department of Physics and Astronomy and from other institutions.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 266. Current Topics in Chemical, Applied, and Materials Physics. 1 Unit.**

The subjects covered vary from year to year. Connection between fundamental principles and implementations in practice in science, industry, and technology.

Repeatability: May be repeated for credit unlimited times.

Same as CHEM 266.

**PHYSICS 267B. Current Problems in Particle Physics. 4 Units.**

Presentation and discussion of current research and theory in particle physics. Lectures given by staff and students.

Repeatability: May be repeated for credit unlimited times.

**PHYSICS 267C. Current Problems in Particle Physics. 4 Units.**

Presentation and discussion of current research and theory in particle physics. Lectures given by staff and students.

Repeatability: May be repeated for credit unlimited times.

**PHYSICS 268. Seminar in Systems Microbiology Research. 1 Unit.**

A research and journal club seminar that covers topics on bacteria and phage using approaches and principles from biology, engineering, and physics.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Same as MOL BIO 268, ENGRMSE 267.

Restriction: Upper-division students only. Graduate students only.

**PHYSICS 269. Seminar in Teaching Physics. 2 Units.**

Techniques for effective teaching. Covers active listening and student engagement, problem-solving skills, peer instruction and collaborative learning, and evaluation. Required of all new Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

**PHYSICS 273. Technical Communication Skills. 2 Units.**

Development of effective communication skills, oral and written presentations, through examples and practice.

Grading Option: Satisfactory/unsatisfactory only.

Same as CHEM 273.

**PHYSICS 291. Research Seminar. 1-4 Units.**

Detailed discussion of research problems of current interest in the Department. Format, content, and frequency of the course are variable.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 295. Experimental Research. 4-12 Units.**

With the approval of a faculty member, a student may pursue a research program in experimental physics. Typical areas include astrophysics, condensed matter physics, elementary particle physics, and plasma physics.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Physical Sciences students only.

**PHYSICS 296. Theoretical Research. 4-12 Units.**

With approval of a faculty member, a student may pursue a research program in theoretical physics. Typical areas include astrophysics, condensed matter physics, elementary particle physics, and plasma physics.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Physical Sciences students only.

**PHYSICS 298. Physics Colloquium. 1 Unit.**

Seminar held each week, in which a current research topic is explored. Frequently, off-campus researchers are invited to present the seminar, and on occasion a faculty member or researcher from the Department will speak.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: School of Physical Sciences students only.

**PHYSICS 299. Reading of Special Topic. 4-12 Units.**

With special consent from a faculty member who will agree to supervise the program, a student may receive course credit for individual study of some area of physics.

Restriction: Graduate students only.

**PHYSICS 395. Laboratory Teaching. 1 Unit.**

Required of and limited to teaching assistants of undergraduate laboratory courses. Designed to teach the necessary skills required of teaching assistants for these courses.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PHYSICS 399. University Teaching. 1-4 Units.**

Required of and limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## Physiology and Biophysics (PHYSIO)

### Courses

**PHYSIO 200. Research in Physiology and Biophysics. 2-12 Units.**

Individual research directed toward doctoral dissertation and supervised by a particular professor.

Repeatability: May be repeated for credit unlimited times.

**PHYSIO 200R. Research in Physiology and Biophysics for First-Year Students. 2-12 Units.**

Independent research within the laboratories of graduate training faculty in the Department of Physiology and Biophysics for first-year Ph.D. students.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

**PHYSIO 201. Introduction to Physiology Research. 1-4 Units.**

Introduction to research in physiology and related sciences. Concentrates on techniques emphasized in the various laboratories of the Department of Physiology and Biophysics.

Repeatability: May be repeated for credit unlimited times.

**PHYSIO 204. Concepts of Biophysics. 3 Units.**

Principles of crystallography; introduction to time-resolved absorption and fluorescence spectroscopy; the concepts of kinetic order and kinetic rate theory.

Restriction: Graduate students only.

**PHYSIO 205. Electronics for Biologists. 4 Units.**

Basic principles of electricity; properties and use of discrete components and integrated circuits; circuit analysis and design. Intended for advanced students in the life sciences.

Same as NEURBIO 249.

**PHYSIO 206A. Introduction to Medical Physiology. 5 Units.**

Vertebrate physiology with emphasis on humans and on the relationship between the function of normal tissues and the processes of disease. Fundamental principles of physiology and the interrelationships which control organ function.

Prerequisite: A biochemistry course.

Restriction: Graduate students only.

**PHYSIO 206B. Introduction to Medical Physiology. 6 Units.**

Vertebrate physiology with emphasis on humans and on the relationship between the function of normal tissues and the processes of disease. Fundamental principles of physiology and the interrelationships which control organ function.

Prerequisite: PHYSIO 206A

Restriction: Graduate students only.

**PHYSIO 212. Medical Immunology. 1.5 Unit.**

One of the cornerstones of the MS1 Molecular Basis of Medicine block. Includes temporal coordination of lecture material, regular course director meetings, and combined exams with PHYSIO 544: Medical Immunology.

Restriction: Graduate students only.

**PHYSIO 215. Integrative Immunology . 4 Units.**

Provides an introduction to immunology, but focuses on providing in-depth analysis of selected topics within the broader field of immunology, including relevant research techniques, while improving critical thinking skills.

Restriction: Graduate students only.

**PHYSIO 232. The Physiology of Ion Channels. 4 Units.**

Discusses how ion channels work (molecular/structural biophysics level) and what ion channels do in diverse cell types (cell physiology level).

Restriction: Graduate students only.

**PHYSIO 252. Introduction to Proteomics. 4 Units.**

Introduces students to concepts and methods of proteomics including protein identification, expression proteomics, and protein-protein interactions.

Repeatability: May be taken for credit 2 times.

**PHYSIO 272. Eye: Health and Disease. 3 Units.**

Introduces the anatomic and physiological basis of vertebrate vision and disease states in which the structure and function of the eye is disrupted with emphasis on current and developing research areas.

Restriction: Graduate students only.

**PHYSIO 290. Topics in Physiology. 3 Units.**

Contemporary research problems in physiology. Students review research articles in current literature and present ideas contained therein, focusing on groundbreaking discoveries and methodologies. Students present results of their own research and attend presentations given by other students and departmental researchers.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSIO 292A. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PHYSIO 292B. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PHYSIO 292C. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PHYSIO 299. Dissertation in Physiology and Biophysics. 2-12 Units.**

Preparation and completion of the dissertation required for the Ph.D.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Planning, Policy, and Design (PP&D)

### Courses

**PP&D 221. Public Policy . 4 Units.**

Explores different approaches to public policy analysis, the diverse conceptions of the goals and objectives that should be served by policy, and the appropriate role of the policy analyst. Policy consequences are traced to indirect and subtle incentives and disincentives.

Repeatability: May be taken for credit 2 times.

Same as PUB POL 221.

Restriction: Public Policy Majors have first consideration for enrollment.

## Planning, Policy, and Design (see PP&D) (URBPLAN)

## Political Science (POL SCI)

### Courses

**POL SCI 10A. Probability and Statistics in Political Science I. 4 Units.**

Introduction to the variety of statistical applications in the social sciences. Descriptive statistics. Measures of central tendency and dispersion. Percentile ranks. Standardization and normal approximation. Basic probability theory focuses on application to statistical inference and binomial distribution. Laboratory required.

Prerequisite: SOC SCI 3A

Overlaps with ANTHRO 10A, ECON 15A, PSYCH 10A, SOCECOL 13, SOC SCI 9A, SOCIOL 10A.

Restriction: Lower-division students only.

(Va)

**POL SCI 10B. Probability and Statistics in Political Science II. 4 Units.**

Introduction to statistical inference, sampling distribution, standard error. Hypothesis tests for proportions and means. Inferential techniques for nominal variables including chi-square, study measures of strengths, significance of relationships between variables, assumptions, data requirements, and types of error in significance tests.

Prerequisite: POL SCI 10A

Overlaps with ANTHRO 10B, ECON 15B, PSYCH 10B, SOCECOL 13, SOC SCI 9B, SOC SCI 10B.

(Va)

**POL SCI 10C. Probability and Statistics in Political Science III. 4 Units.**

Focus on correlation, regression, and control for effects of variables. One-way and two-way factorial analysis of variance. A priori and a posteriori comparisons. Introduction to repeated measures design and non-parametric statistics. Discusses use of statistics in newspapers and popular magazines.

Prerequisite: POL SCI 10B

Overlaps with ANTHRO 10C, PSYCH 10C, SOCECOL 13, SOC SCI 9C, SOC SCI 10C, SOCIOL 10C.

(Vb)

**POL SCI 11A. Introduction to Political Science: Political Analysis. 4 Units.**

Presents various modes of understanding politics. Emphasis on basic approaches to political analysis, their uses in constructing theories, and their application to particular national political systems.

(III and VIII ).

**POL SCI 11C. Introduction to Political Science: Micropolitics. 4 Units.**

Introduction to political behavior of individuals and groups within national systems. Three questions addressed: How do individuals come to understand the political world? How do individuals behave within this world? How do groups and individuals engage in the political process.

(III)

**POL SCI 21A. Introduction to American Government. 4 Units.**

Introduction to American political processes and institutions. Topics include elections, political participation, parties, interest groups, the Presidency, Congress, the bureaucracy, and the judiciary.

(III)

**POL SCI 31A. Introduction to Political Theory. 4 Units.**

Types of questions: What is politics? What are the theoretical and philosophical bases for different types of political arrangements? How do these perspectives get translated into reality? Among others, the works of Rousseau, Locke, Mill, and Marx are read.

(III)

**POL SCI 32A. Dilemmas of Diversity. 4 Units.**

Focuses on racial, ethnic, and gender diversity, multiculturalism, and their impact on our social and political ideals. Traces the sources of ideas about difference, equality, and toleration, and examines tensions that occur when forms of identity conflict with one another.

Same as INTL ST 32A.

(VII)

**POL SCI 41A. Introduction to International Relations. 4 Units.**

Analysis of political relations between and among nations with emphasis on explanations of conflict and cooperation. The role of ideologies and their relation to international problems are also examined.

Same as INTL ST 14.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

(III and VIII ).

**POL SCI 44B. Global Political Ideologies. 4 Units.**

An overview of the major political ideologies shaping the current world order and global conflict. Topics include liberalism, democracy, nationalism, capitalism, communism, socialism, fascism, neoliberalism, clash of civilizations, sectarian violence, populist nationalism, and de-globalization.

Same as INTL ST 12, SOC SCI 12.

Restriction: International Studies Majors have first consideration for enrollment.

(III and VIII ).

**POL SCI 45A. Human Rights and Global Governance. 4 Units.**

Historical development of civil, political rights and the rise of human rights in international law. Explores role, and limitations, of the UN, ICJ, and ICC in global governance. Reconceptualizing democracy and political representation in a postnational 21st century.

Same as INTL ST 16, SOC SCI 16.

Restriction: International Studies Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment.

(III and VIII ).

**POL SCI 49. Lower-Division Special Topics in International Relations. 4 Units.**

Studies in selected areas of international relations. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**POL SCI 51A. Introduction to Politics Around the World. 4 Units.**

Introduces comparative politics. Compares political systems in a variety of countries. Includes elections, parties, parliaments, presidents, protest movements, and other aspects of national politics. Addresses how to make meaningful comparisons across countries.

(III, VIII)

**POL SCI 61A. Introduction to Race and Ethnicity in Political Science. 4 Units.**

Examines major theories that attempt to explain the roles of race and ethnicity in U.S. politics.

Same as CHC/LAT 64.

(III and VII).

**POL SCI 71A. Introduction to Law. 4 Units.**

An introduction to the study of judicial politics. Questions include: what is law?; what is a court?; who are the judges? Analysis of a wide range of judicial decisions illustrates the political importance of courts in the U.S. and elsewhere.

(III)

**POL SCI 79. Lower-Division Special Topics in Law. 4 Units.**

Studies in selected areas of law. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**POL SCI H80. Globalization and Human Security. 4 Units.**

Emerging issues of human security in the globalized world, including personal human security, physical integrity, human trafficking, global climate change, food. Challenges of these complex human security problems for a multi-scalar system (international, national, local).

Restriction: Campuswide Honors Collegium students only.

(III, VIII)

**POL SCI 120. Public Opinion. 4 Units.**

Theories concerning sources of public opinion, processes by which it is altered, organization of citizens' belief systems, and role of public opinion in government policy. Students analyze survey data as a research project.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 121A. The American Presidency. 4 Units.**

Presents a comprehensive survey of the American presidency and considers the question of political power.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 121C. U.S. Elections and Voting Behavior. 4 Units.**

Examines how voters evaluate political parties, candidates, and issues in electoral campaigns to reach their decisions. Numerous controversies concerning the degree of issue voting, sophistication of candidate evaluations, and the decline of political parties are discussed.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 121F. Presidents Since World War II. 4 Units.**

Reviews the actions and character of presidents from Harry Truman through Bill Clinton. Each week a different president is examined from a variety of perspectives. Students are expected to write a substantial original research paper.

Prerequisite: POL SCI 21A

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 121G. American Public Policy. 4 Units.**

Focuses on the development and implementation of public policy in the United States. Lectures cover theoretical models of the policy process as well as significant problems facing contemporary American decision-makers.

Same as PUBHLTH 132, SOC SCI 152C, UPPP 129.

**POL SCI 121HW. Writing for the President of the United States. 4 Units.**

Imagines how White House staffers can help presidents with clear, focused, and effective writing. Through a variety of formats, students study, hone, and practice writing skills that will prove useful- in and out of the White House.

Prerequisite: POL SCI 21A

(Ib)

**POL SCI 122A. American Metropolitan Politics. 4 Units.**

Explores the politics of urban and suburban America, including the policy making process; the exercise of political power; local politics, federalism and the problems of metropolitanism; and major policy problems facing urban areas.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 122B. California Politics. 4 Units.**

Examines the structure and function of California government, traces historical development of political power, with constantly changing casts of power-brokers and seekers. Explores California exceptionalism and the roles played by the electorate, legislature, executive, and organized interests in policy making.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 122BW. California Politics. 4 Units.**

Examines the structure and function of California government, traces historical development of political power, with constantly changing casts of power-brokers and seekers. Explores California exceptionalism and the roles played by the electorate, legislature, executive, and organized interests in policy making.

Prerequisite: Satisfactory completion of the Lower-Division writing requirement.

Restriction: Political Science Majors have first consideration for enrollment.

(Ib)

**POL SCI 123B. Representation. 4 Units.**

Deals with classical theories of representation: issues of racial and political representation in U.S. legislatures and city councils; proportional representation models; and comparative election systems.

Prerequisite: SOC SCI 3A or SOC SCI 10A or SOC SCI 10B

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 124A. The Politics of Protest. 4 Units.**

Examines the Civil Rights, Black Power, and women's movements in relationship to the Asian American movement. Uses social movement theories to illuminate the cases, and the cases to critique and revise the theories.

Same as ASIANAM 144.

(VII)

**POL SCI 124B. Latinos in U.S. Politics. 4 Units.**

Comparing the political issues facing Latino groups by examining their migration histories, voting behavior, nonelectoral participation, and policy issues. Latino issues are examined on the national, state, and local levels, including formal representation, immigration, affirmative action, and language policy.

Same as CHC/LAT 151.

(VII)

**POL SCI 124C. Comparative Minority Politics. 4 Units.**

Examines the political experiences of Blacks, Latinos, and Asian Americans in the United States from roughly 1950 to the present. Focuses on how each group has pursued political empowerment via both conventional political channels and social movements.

Same as AFAM 151, CHC/LAT 147, ASIANAM 132.

**POL SCI 124E. African American Politics. 4 Units.**

Examines politics of African Americans in order to gain a broader perspective of the American political process. Major developments in African American politics (including the civil rights movement, Black presidential bids), continuing problem of racism, responsiveness of key governing institutions.

Same as AFAM 152.

**POL SCI 125A. The United States Congress. 4 Units.**

Does the Congress do a good job of representing the American citizenry? Is it the most appropriate mechanism for the creation, resolution, and implementation of public policy.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 125CW. Constitutional Convention. 4 Units.**

Analyzes the Constitution, its amendments, and periods of Constitutional reform as a foundation for a critical evaluation of the Constitution with an eye both to necessary reforms and to elements of the Constitution that should be maintained.

Prerequisite: POL SCI 21A. Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

**POL SCI 126C. U.S. Immigration Policy. 4 Units.**

Examines selected immigration policy debates since the nineteenth century, rationale and consequences of immigration law since 1965, problems of administration, implementation and enforcement, impact of immigration policy on foreign relations, and contemporary debate regarding the future of U.S. policy.

Same as CHC/LAT 163.

(VII)

**POL SCI 126D. Urban Politics and Policy. 4 Units.**

Examines economic limits of cities and welfare policy. Addresses such issues as why are the poor concentrated in the central cities? Which anti-poverty programs will work best in cities? Which level of government can best combat poverty in the U.S.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 126F. Politics of Animal Rights. 4 Units.**

Examines animal rights/welfare movement's efforts to transform moral, practical, and legal standing of nonhuman animals in contemporary U.S. Explores intersection of racism, sexism, and speciesism informed by theories of race and ethnicity, including Asian American Studies.

Same as ASIANAM 168.

Restriction: Political Science Majors have first consideration for enrollment. Asian American Studies Majors have first consideration for enrollment.

**POL SCI 128BW. Political Ideologies: The Way We View Our World. 4 Units.**

Politics has become divisive and ideological. But ideologies are poorly understood and have become mere labels for identifying friends and enemies. Course analyzes the nature of ideology, focusing on liberalism, conservatism, fascism, socialism, and contemporary 'liberation' ideologies.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

**POL SCI 128C. Political Psychology. 4 Units.**

Examination of how psychological theory and research may be used to better understand political thought and behavior. Drawing on theories of learning, cognition, and personality, discusses such topics as the formation of political attitudes, and the process of political decision-making.

Same as PSYCH 176A.

Restriction: Majors only. POL SCI 128C may not be taken for credit if taken after POL SCI 137C.

**POL SCI 129. Special Topics in American Politics and Society. 4 Units.**

Studies in selected areas of American politics and society. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 130A. Game Theory and Politics I. 4 Units.**

Introduction to game theory and a survey of its political applications. Examples of topics covered include voting in small committees, legislatures, and mass elections; interest group activities and environmental issues; institutional design, and the evolution of cooperative behavior.

Same as SOCIOL 134, SOC SCI 103A.

Restriction: Social Policy/Public Service Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**POL SCI 130B. Game Theory and Politics II. 4 Units.**

More advanced game theory and its political applications, beginning where Game Theory and Politics I ends. Examples of topics covered include revolutions; arms race; spatial models of party competition; political manipulation; political coalitions and their power.

Prerequisite: POL SCI 130A or ECON 116A

Same as SOC SCI 103B.

Restriction: Social Policy/Public Service Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 131C. Modern Political Theory. 4 Units.**

Examines major thinkers and intellectual movements in the political thought of the 17th and 18th centuries.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 131F. Twentieth Century Political Theory. 4 Units.**

Examines major thinkers and intellectual movements in the political thought of the 20th Century.

Prerequisite: POL SCI 31A

**POL SCI 134F. Social and Political Theory. 4 Units.**

Focus is on recent major work in social and political theory. An in-depth analysis of a relatively small body of writing. Authors discussed include Jurgen Habermas, Anthony Giddens, and Richard Rorty.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 135A. Origins of Liberalism. 4 Units.**

Examines the ideals, social forces, and historical events that gave rise to liberal political theory. Topics include patriarchal authority, the divine right of kings, religious toleration, slavery, colonialism, political economy, the evolution of law, and tensions between liberty and equality.

Prerequisite: POL SCI 31A

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 135B. Just War Revisited. 4 Units.**

Examines the evolution of the doctrine of the just war across the history of Western political thought, the importance of changes in the doctrine and whether it applies today; examines international relations case studies to determine today's relevancy.

Same as INTL ST 131A.

**POL SCI 136B. Cannibals and Conquistadores: The Philosophy of the Other. 4 Units.**

Examines critically the notion of the 'other' by looking at the philosophical challenges difference poses in the context of the European discovery of the New World. Seeks to understand the naissance of the concept of human rights and tolerance.

**POL SCI 136BW. Cannibals and Conquistadores: The Philosophy of the Other. 4 Units.**

Examines critically the notion of the 'other' by looking at the philosophical challenges difference poses in the context of the European discovery of the New World. Seeks to understand the naissance of the concept of human rights and tolerance.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Overlaps with POL SCI 136B.

(Ib)

**POL SCI 137BW. Types of Political Representation. 4 Units.**

Political representation plays an important role in democratic systems, but is elusive once examined closely. Students delve into the concept and relate different views to political life. Half of the course is spent on writing instruction.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Recommended: Upper-Division students. Political Science majors have first consideration for enrollment.

(Ib)

**POL SCI 138A. The Moral of the Story: Introductory Seminar in Ethics. 4 Units.**

Introduces major theories and classic texts in ethics, from Plato and Aristotelian virtue ethics to utilitarianism and Kant and contemporary moral psychology.

**POL SCI 138AW. Moral of the Story: Introduction to Ethics. 4 Units.**

Focuses on how we learn about ethics from stories, in the form of fables, bedtime stories, religious stories, soap operas, television, and movies as adults. Students bring in stories that informed their own ethical development.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

**POL SCI 138CW. Ethics of Difference. 4 Units.**

Examines differences traditionally judged politically salient—race, ethnicity, religion, gender. Personal interviews with an elderly person encourage students to understand the social construction of difference and to reexamine their own attitudes by putting themselves in the place of another.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science Majors have first consideration for enrollment.

(Ib)

**POL SCI 138DW. The Moral Life During War. 4 Units.**

Can people keep their humanity during war? What does the term humanity signify when simply surviving requires faith, courage, and desperation? When facing wartime brutality, must we abrogate morality? What does it mean to compose a moral life during war?.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science Majors have first consideration for enrollment.

Concurrent with POL SCI 238D.

(Ib)

**POL SCI 139. Special Topics in Political Theory and Methods. 4 Units.**

Studies in selected areas of political theory and methods. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 141B. International Political Economy. 4 Units.**

Examination of problems in global political-economic relations through competing conceptual lenses or grand theories: mercantilism, liberalism, and Marxism. Surveys North-North and North-South issues relating power and wealth.

Same as INTL ST 114A.

(VIII)

**POL SCI 141C. International Political Economy of East Asia. 4 Units.**

Integration of theoretical perspectives in international political economy with the study of economic development in East Asia, with special emphasis on regional integration.

(VIII)

**POL SCI 141E. U.S. Foreign Policy Toward Asia. 4 Units.**

U.S. policy toward the countries of East Asia: bilateral and regional security relationships, U.S. economic relations with the major Asian countries, the development of regional institutions, and human rights.

Same as INTL ST 142G.

**POL SCI 142B. The International Relations of East Asia. 4 Units.**

Surveys various aspects of relations between the nations of East Asia. Topics include the historical development of the region; current political and security relations, including the impact of the American military presence.

Same as INTL ST 142D.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 142D. U.S. Foreign Policy I: Globalism and Cold War. 4 Units.**

Looks at changing international perspectives, policy responses, and military strategies of presidential administrations from Truman to Reagan. In assessing the motives and objectives of U.S. foreign policy leaders during the "Cold War" era, the concept of "national interest" is examined.

Same as INTL ST 142A.

Restriction: International Studies Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment.

**POL SCI 142G. U.S. Coercive Diplomacy. 4 Units.**

Examines the theory of compellence and the U.S. practice of coercive diplomacy--the power to change behavior of other governments. Specific case examples: the Cuban missile crisis, bombing of North Vietnam, the Nicaraguan Contras, Desert Shield/Desert Storm, and Libya.

Same as INTL ST 142E.

Restriction: Upper-division students only. Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 142J. U.S. Intervention in Latin America. 4 Units.**

Explores political, economic, social, and cultural ties that bind Latin America to the United States. Focuses on U.S. intervention and Latin American response from early nineteenth century to present day. Case studies include Mexico, Guatemala, Cuba, Chile, and Central America.

Same as HISTORY 166, INTL ST 177D, CHC/LAT 150.

**POL SCI 143G. Homeland Security . 4.0 Units.**

Examines the 9/11 origins of the concept of homeland security; assess the evolution, structure, and operations of the Department of Homeland Security; critically examines the evolution of threat assessment to the U.S. and the utilization of risk management methodologies.

Same as INTL ST 141B.

**POL SCI 144A. Approaches to International Relations. 4 Units.**

Reviews theoretical and methodological approaches to the study of international relations using contending perspectives to analyze power and influence, capabilities, interdependence, reciprocity, international regimes, anarchy, cooperation, imperialism, and hegemony.

Same as INTL ST 140A.

Restriction: Upper-division students only. Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 145A. Ethics in an Age of Terror and Genocide. 4 Units.**

Original sources document personal impact of wars on genocides, from World War II to the Bosnian and Rwandan genocides and current wars in Iraq and Afghanistan. Students train for and conduct personal interviews with someone who lived through a war.

Same as INTL ST 154C.

**POL SCI 146B. Religion and World Politics. 4 Units.**

Examines the relationship between religion and world politics historically and today, focusing on connections with peace/war, democracy, human rights, secularism(s), and globalization. Covers major debates, scholarship, concepts, and theories through class exercises, exams, and essays.

Prerequisite: POL SCI 41A or INTL ST 11 or INTL ST 12 or REL STD 5A or REL STD 5B or REL STD 5C

Same as REL STD 115, INTL ST 151B.

**POL SCI 147CW. International Humanitarianism. 4 Units.**

Examines, analyzes, and evaluates the humanitarian phenomenon, the actors involved in it (including states, international organizations (IOs), and nongovernmental organizations (NGOs)), the rise of a body of international humanitarian law, and the problems and debates associated with international humanitarianism today.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as INTL ST 147CW.

(Ib)

**POL SCI 147D. International Organizations. 4 Units.**

Active learning course that examines origins, decision-making processes, activities, and evolution of leading international organizations (e.g. U.N., NATO, EU, AU, WTO, World Bank, IMF). Activities include drafting reforms, applying theory, assessing dysfunctions, and participating in U.N. negotiation simulations.

Same as INTL ST 147D.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 147E. Critical Investigations into Humanitarianism in Africa. 4 Units.**

Explores the complex phenomenon of aid to Africa (emergency and development aid), and the representational, cultural, historical, and other reasons why some participants and many observers critique it. Students occasionally engage with peers and faculty in African institutions.

**(VIII)****POL SCI 149. Special Topics in International Relations. 4 Units.**

Studies in selected areas of international relations. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 151B. Introduction to Chinese Politics. 4 Units.**

Background to the Chinese revolution, rise of the communist party; and institutions, ideology, and structure of Communist party rule from 1949-present.

Same as INTL ST 176C.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 151C. Chinese Politics: Policy, Leadership, and Change. 4 Units.**

Examines major policies from 1949 to the present, and considers the changing role of the Communist Party and its shifting treatment of various social groups; the era of Mao Zedong, reforms under Deng, and post-Deng politics.

Same as INTL ST 176D.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 151H. Voting and Political Manipulation. 4 Units.**

Introduction to social choice and cooperative games. Topics include majority rule, types of voting methods, apportionment and proportional representation, agenda manipulation, coalition formation, voting power, political consequences of electoral laws.

Same as INTL ST 156A, SOC SCI 121T, ECON 154.

Restriction: International Studies Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**POL SCI 152F. West European Politics. 4 Units.**

Explores four main themes: (1) thinking scientifically about politics; (2) understanding the linkages between different political structures and spheres of activity; (3) evaluating some theories about politics; (4) learning about three countries: Britain, France, and Germany.

Same as INTL ST 176I.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 152K. Immigration Politics in Western Europe. 4 Units.**

Examines immigration politics in Western Europe, analyzing trends and policy from the postwar period through to today. Topics include citizenship, immigrant integration, asylum, the far-right, and a rotating focus on contemporary issues, e.g., terrorism, Islamophobia.

Same as INTL ST 178A.

Overlaps with POL SCI 141D.

**POL SCI 153B. Canadian Politics. 4 Units.**

Addresses the basic structures and processes of contemporary Canadian government and politics. Additional topics may include regionalism, federalism, western alienation and oil, Canadian solutions to social welfare policy questions, developments in Quebec, and other issues associated with French-English relations.

Same as INTL ST 176L.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 153E. Human Rights. 4 Units.**

Examines the causes and consequences of human rights violations with a focus on Latin America. What are human rights? When and where are they violated? What political mechanisms are available to deal with human rights problems? How effective are they.

Same as INTL ST 154B.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 153G. Cuban Society and Revolution. 4 Units.**

Explores the causes, development, and legacy of the 1959 Revolution. Themes include economic dependency, democracy, race, gender, culture, and the always volatile relations between Cuba and the United States.

Same as INTL ST 177E, HISTORY 166C, CHC/LAT 157.

**POL SCI 154C. Comparative Politics: Four Nations, Three Continents. 4 Units.**

Studies four countries in a comparative fashion: their respective political histories and cultural traditions; actual differences among their superficially similar party, parliamentary, and executive institutions; contemporary economic policy. The countries represent three continents and varying levels of economic development.

Same as INTL ST 144A.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 154F. Peoples and Cultures of Post-Soviet Eurasia. 4 Units.**

Examines the cultures and political conflicts of the more than 130 indigenous ethnic groups in the European and Asian territories of the former U.S.S.R. Emphasis is on the theoretical issues of ethnicity, nationalism, and conflict management.

Same as INTL ST 162B, ANTHRO 164P.

**(VIII)****POL SCI 154G. Conflict Resolution in Cross-Cultural Perspective. 4 Units.**

Examines theories of conflict management. Analyzes how conflict is mitigated in diverse cultures: at the interpersonal level, between groups, and on the international scale. Students discuss readings, hear from conflict management practitioners, and simulate negotiations.

Same as ANTHRO 136D, SOC SCI 183E, INTL ST 183E.

**(VIII)****POL SCI 154J. Jews and Power. 4 Units.**

Examines the relationship between the Jewish people and political power over a 3500 year period. How have Jews preserved their communal interests and personal safety? How have they defined the proper relationship of the people to political authority.

Same as HISTORY 130F, REL STD 130F.

**POL SCI 154KW. US Government in Comparative Perspective. 4 Units.**

Introduction to the United States in comparative perspective, covering general features of the United States and other countries, such as institutional design and policy choices. Addresses the debates about American exceptionalism and American decline.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science Majors have first consideration for enrollment.

**(Ib)**

**POL SCI 155C. Organizations. 4 Units.**

How bureaucracies, formal organizations, and voluntary associations work, how/why they grow, and where they are going. History and structure of organizational rationality; dynamics of organized groups; behavior in organizations; limits of bureaucratization and attempts to overcome these limits through decentralization.

Same as SOCIOL 141.

Restriction: Sociology Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment.

**POL SCI 156A. Political Participation. 4 Units.**

The ways in which people in various political systems take part in politics, especially in activities directed toward affecting outcomes. Who is active, what they do, why they do it, and what difference it makes.

**POL SCI 156D. Protests, Movements, and Revolutions. 4 Units.**

A survey of models of collective action drawn from sociology, economics, psychology, and political science. Focus on areas such as social movements, strikes, crowd psychology, cults, fads, fashions, public opinion, and symbolic and mythical elements in collective culture.

Prerequisite: SOCIOL 1 or POL SCI 11A or ECON 1

Same as SOCIOL 174.

Restriction: Political Science Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**POL SCI 157B. International Divided Cities. 4 Units.**

Investigates urban divisions in international cities where deep-seated nationalistic ethnic differences create pressures for intergroup conflicts, autonomy, or territorial separation, and can incite violence. Urban political polarization as it is manifest in the urban setting.

Same as UPPP 178, SOCIOL 176.

**POL SCI 158D. Introduction to Contemporary Middle East Politics. 4 Units.**

An overview of basic issues that shape the politics of the Middle East and North Africa. Themes include implication of the colonization era, nation-state formation, inter-Arab relations, nationalism, Arab-Israel conflict, Islamic resurgence, and more.

Same as SOC SCI 188A, INTL ST 165.

**POL SCI 159. Special Topics in Comparative Politics. 4 Units.**

Studies in selected areas of comparative politics. Topics addressed vary each quarter.

Repeatability: May be repeated for credit unlimited times.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 169. Special Topics in Race and Ethnicity Politics. 4 Units.**

Studies in selected areas of race and ethnicity. Topics vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 171AW. Law and Society. 4 Units.**

Law and its various roles in society. The nature and meaning of law; legality and power in the American system; law as a mechanism for social change; the role of law in dispute processing, social control, compliance with judicial decisions.

Prerequisite: POL SCI 71A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science Majors have first consideration for enrollment.

(Ib)

**POL SCI 171CW. Comparative Constitutional Politics. 4 Units.**

Examines the impact of constitutional courts on politics and policy-making in Canada, France, Germany, and the United States. Cases may focus on the constitutional politics of free speech, abortion, rights to property, and the conduct of foreign relations.

Prerequisite: POL SCI 71A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science Majors have first consideration for enrollment.

(Ib)

**POL SCI 171D. American Constitutional Law. 4 Units.**

American constitutional interpretation of cases involving separation of powers, federal-state relations, rights of property, free expression, privacy, criminal due process, political participation, and equality. Includes legal research methods, development of judicial review, legal reasoning, and impact of Supreme Court decisions.

Prerequisite: POL SCI 71A

Overlaps with CRM/LAW C122.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 171F. Law in the Twenty-First Century. 4 Units.**

Examines the complex relationship between law, the social sciences, and modern society. Lectures explore such issues as the interplay between technology and constitutional rights, the impact of science on law, and the evolving roles of attorneys and judges.

Same as SOC SCI 172D.

Restriction: Political Science Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment.

**POL SCI 171G. Legal Implications of the Drug Trade. 4 Units.**

Examines United States policy to combat domestic and international narcotics trafficking. Analyzes the national drug policy and program implementation by federal and state agencies. Considers the effects of these policies on our individual constitutional rights and the criminal justice system.

**POL SCI 172A. International Law. 4 Units.**

Examination of the origin, changing structure, application of international law, and the role of legal norms in regulating the behavior of states and maintaining international order.

Prerequisite: POL SCI 71A

Same as INTL ST 145A.

**(VIII)**

**POL SCI 174A. Civil Liberties. 4 Units.**

Political analysis of selected Supreme Court cases involving claims under the Bill of Rights and the Fourteenth Amendment. Topics include: race, sex, and other forms of discrimination; criminal justice; privacy; freedom of speech and related claims.

Prerequisite: POL SCI 71A

Overlaps with CRM/LAW C122.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 174C. U.S. Supreme Court. 4 Units.**

Overview and analysis of the role played by the U.S. Supreme Court in the American political system. Judicial review, appointment of justices, judicial activism and judicial restraint, process of case selection, court deliberation, and decision-making, impact of Supreme Court decisions.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 174CW. U.S. Supreme Court. 4 Units.**

Overview and analysis of the role played by the U.S. Supreme Court in the American political system. Judicial review, appointment of justices, judicial activism and judicial restraint, process of case selection, court deliberation, and decision-making, impact of Supreme Court decisions.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science Majors have first consideration for enrollment.

**(Ib)**

**POL SCI 175. The Bill of Rights in Film. 4 Units.**

Focuses on ways American cinema has portrayed, represented, and analyzed U.S. Bills of Rights. Juxtaposes cinematic presentations on specific Bill of Rights clauses, treating films as cultural texts, with pertinent judicial decisions and more scholarly appraisals of those same provisions.

**POL SCI 179. Special Topics in Public Law. 4 Units.**

Studies in selected areas of public law. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI H180D. Honors Seminar in Political Science. 2-4 Units.**

Course for students enrolled in the Honors Program in Political Science.

Prerequisite: Only open to students in the Political Science Honors Program.

Repeatability: May be repeated for credit unlimited times.

**POL SCI H182A. Honors Thesis Workshop. 4 Units.**

A weekly seminar/workshop to facilitate the exchange of ideas and research strategies among students and to review their progress in writing the thesis.

Restriction: Open only to students in the Political Science Senior Thesis program.

**POL SCI 190W. Senior Thesis. 4 Units.**

Thesis research with Political Science faculty.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 3 times.

**(Ib)****POL SCI 197. Field Study. 1-4 Units.**

Field study with Political Science faculty.

Repeatability: Unlimited as topics vary.

**POL SCI 198. Directed Group Study. 1-4 Units.**

Directed group study with Political Science faculty.

Repeatability: Unlimited as topics vary.

**POL SCI 199. Independent Study. 1-4 Units.**

Independent study or research with a Political Science faculty member.

Repeatability: May be repeated for credit unlimited times.

**POL SCI 209A. Study of Democracy Colloquium. 1.33 Unit.**

Skills critical to professional success. Students learn and practice professional presentation skills, develop substantive knowledge in the field by attending talks and panels, and interact with scholars and professionals in the field.

Restriction: Graduate students only. POL SCI 209A may not be taken for credit if taken after SOCIOL 229.

**POL SCI 209B. Study of Democracy Colloquium. 1.33 Unit.**

This colloquium teaches students skills critical to professional success. Students learn and practice professional presentation skills and develop substantive knowledge in the field by attending talks and panels and interacting with scholars and professionals in the field.

Restriction: Graduate students only. POL SCI 209B may not be taken for credit if taken after SOCIOL 229 Democracy.

**POL SCI 209C. Study of Democracy Colloquium . 1.34 Unit.**

This colloquium teaches students skills critical to professional success. Students learn and practice professional presentation skills and develop substantive knowledge in the field by attending talks and panels and interacting with scholars and professionals in the field.

Restriction: Graduate students only. POL SCI 209C may not be taken for credit if taken after SOCIOL 229 Democracy.

**POL SCI 210A. Colloquium. 1.3 Unit.**

Doctoral training requires more than learning substantive debates and research methods; it also requires students learn professional practices, routines, and expectations. This year-long workshop offers students a mix of professional development, outside speakers, and casual conversations with departmental faculty.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**POL SCI 210B. Colloquium. 1.3 Unit.**

Doctoral training requires more than learning substantive debates and research methods; it also requires students learn professional practices, routines, and expectations. This year-long workshop offers students a mix of professional development, outside speakers, and casual conversations with departmental faculty.

Prerequisite: POL SCI 210A

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**POL SCI 210C. Colloquium. 1.4 Unit.**

Doctoral training requires more than learning substantive debates and research methods; it also requires students learn professional practices, routines, and expectations. This year-long workshop offers students a mix of professional development, outside speakers, and casual conversations with departmental faculty.

Prerequisite: POL SCI 210B

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**POL SCI 212A. Public Opinion. 4 Units.**

Introduction to the study of U.S. public opinion. Provides an overview of the theories regarding opinion formation, the methodologies employed, and the role of public opinion in democratic governments.

Restriction: Graduate students only.

**POL SCI 212B. Ethics Workshop. 4 Units.**

Students find an important question in ethics, search literature to assess topic's importance, pose question to be researched, propose method of analysis and type of data, analyze data, and note how their works contribute to knowledge in the field.

**POL SCI 219. Special Topics in Politics and Society. 4 Units.**

Current research in politics and society.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**POL SCI 221A. Public Policy. 4 Units.**

Explores different approaches to public policy analysis, the diverse conceptions of the goals and objectives that should be served by policy, and the appropriate role of the policy analyst. Policy consequences are traced to indirect and subtle incentives and disincentives.

Same as CRM/LAW C255, UPPP 221.

Restriction: Graduate students only.

**POL SCI 223A. Theories of Power and Empowerment. 4 Units.**

Studies different ways of thinking about power and its uses. Explores theories of power that inform various notions of empowerment, including resistance, participatory democracy, and workplace empowerment.

Same as MGMTPHD 297R, UPPP 279.

Restriction: Graduate students only.

**POL SCI 229. Special Topics in American Politics. 4 Units.**

Current research in American Politics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**POL SCI 231A. Political Epistemology. 4 Units.**

Focuses on fundamental issues of knowledge in the study of politics, especially interconnections and tensions between politics and knowledge. Counts as the Field Seminar in Political Theory.

Restriction: Graduate students only.

**POL SCI 231B. Theories of Textual Interpretation. 4 Units.**

Examination of different theories of textual interpretation, including Straussian, hermeneutical, poststructuralist, feminist, postcolonial, and critical race theories. Key questions include: How does one go about the task of interpreting texts? What makes one interpretation better or more insightful than another.

Restriction: Graduate students only.

**POL SCI 232A. Introduction to Voting Theory. 4 Units.**

Introduction to voting modules. Substantive topics include majority rule, voting methods and their properties, apportionment and proportional representation, agenda manipulation, coalition formation, voting power, political consequences of electoral laws.

Restriction: Graduate students only.

**POL SCI 238D. The Moral Life During War. 4 Units.**

Can people keep their humanity during war? What does the term humanity signify when simply surviving requires faith, courage, and desperation? When facing wartime brutality must we abrogate morality? What does it mean to compose a moral life during war?.

Restriction: Graduate students only. Political Science Majors have first consideration for enrollment.

Concurrent with POL SCI 138DW.

**POL SCI 239. Special Topics in Political Theory. 4 Units.**

Current research in political theory. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**POL SCI 241B. Seminar in International Relations Theory. 4 Units.**

Overview of the major theories guiding research and scholarship in international relations. Focus on major conceptual approaches (realism, neoliberalism, marxism) and levels of analysis (systemic, state, and subnational), as well as on methodological/epistemological debates engulfing the field.

Restriction: Graduate students only.

**POL SCI 241E. Research Design in International Relations. 4 Units.**

Surveys research design primarily through substantive readings in international relations. The purpose is to familiarize students with choices/dilemmas relevant to IR-specific research. Students at various stages in the graduate program and with different methodological orientations are welcome.

**POL SCI 249. Special Topics in International Relations. 4 Units.**

Current research in international relations. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**POL SCI 252G. Theories and Practice of Migration and Citizenship. 4 Units.**

Examines theories of migration and citizenship. In examining these themes, the course includes discussion of theory development, multi-method testing, and case study comparison with a focus on Western Europe and other advanced democratic receiving states.

**POL SCI 254A. Introduction to Game Theory. 4 Units.**

Introduction to non-cooperative games. The prisoner's dilemma, Nash equilibrium, sequential games, subgame perfection. Applications include collective action, agenda-setter models, spatial competition of political parties, models of revolution and arms race.

Restriction: Graduate students only.

**POL SCI 259. Special Topics in Comparative Politics. 4 Units.**

Current research in comparative politics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**POL SCI 260B. Political Participation. 4 Units.**

Examines theoretical approaches to the explanation of the pattern of participation and consideration of the results of empirical studies of such activity by mass publics (mainly in Europe and North America). Addresses issues in both comparative politics and political behavior.

Restriction: Graduate students only.

**POL SCI 273A. Advanced Qualitative Methods: Analyzing Qualitative Data. 4 Units.**

Introduction to the theory and practice of analyzing qualitative data. Students must have already learned about data collection and research design for qualitative research and must have qualitative data they can analyze.

Same as MGMPHD 297K, UPPP 213.

Restriction: Graduate students only.

**POL SCI 276. Predictive Models in Social Sciences. 4 Units.**

Basic numeracy (logarithms, fixed-exponent and exponential formats, graphing). Models based on ignorance and logical constraints. Logical quantitative models (how things should be) to complement and guide statistical analysis (how things are).

**POL SCI 285A. Introduction to Political Psychology I. 4 Units.**

Reviews theoretical questions regarding the relationship between the analytical and normative and the polity. Considers relationships between the analytical and normative concerns of psychology and political science, addressing empirical literatures on political socialization, ideology and public opinion, identity and nationality.

**POL SCI 290. Dissertation Research. 1-12 Units.**

Dissertation research with Political Science faculty.

Repeatability: Unlimited as topics vary.

**POL SCI 299. Independent Study. 1-12 Units.**

Independent research with Political Science faculty.

Repeatability: Unlimited as topics vary.

## Portuguese (PORTUG)

### Courses

**PORTUG 121. Topics in Luso-Brazilian Literature. 4 Units.**

In English. Contextualized study of a major author, current, or genre in Brazilian, Portuguese, and/or Lusophone African literature. Examples: Gender, Race, and Sexualities in Postcolonial Lusophone Literatures; Women and Writing in Brazil and Portugal; The Short Story.

Repeatability: Unlimited as topics vary.

**PORTUG 243. Studies in Luso-Brazilian Literature and Culture. 4 Units.**

Critical analysis of selected literary works from Portugal and/or Brazil. Contextualizes the works within their historical and literary specificity, and discusses pertinent theoretical issues raised by them. Taught in Portuguese.

Prerequisite: Reading knowledge of Portuguese.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

# Psychological Science (PSCI)

## Courses

### **PSCI 9. Introduction to Psychology. 4 Units.**

Introduction to field of psychology, addressing the application of scientific methods to the study of human development, learning, memory, problem solving, perception, biological mechanisms, emotions and motivation, personality, psychopathology, and effects of diverse social and cultural contexts on human behavior.

Same as PSYC 7A.

Overlaps with PSYC 9A, PSYC 9B, PSYC 9C, PSCI 11A, PSCI 11B.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment. PSCI 9 and PSYCH 7A may not be taken for credit if taken concurrently with or after PSCI 11A, PSCI 11B, PSCI 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)

### **PSCI 11A. Psychology Fundamentals. 4 Units.**

Designed to provide freshman with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSYC 9A.

Restriction: Lower-division students only. Cognitive Sciences Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. PSCI 9 and PSYCH 7A may not be taken for credit if taken after PSCI 11A, PSCI 11B, PSCI 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)

### **PSCI 11B. Psychology Fundamentals. 4 Units.**

Designed to provide freshmen with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSYC 9B.

Restriction: Lower-division students only. Cognitive Sciences Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

(III)

### **PSCI 11C. Psychology Fundamentals. 4 Units.**

Designed to provide freshman with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSYC 9C.

Restriction: Lower-division students only. Cognitive Sciences Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

(III)

**PSCI 100. Special Topics in Social Behavior. 4 Units.**

Course content varies with interest of instructor.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Repeatability: Unlimited as topics vary.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 101D. Life Span Developmental Psychology. 4 Units.**

Addresses the major issues, concepts, and methods of life span developmental psychology. The fundamental theories, distinctive methods, and the physical, perceptual, cognitive, social, motivational, and emotional development for each developmental phase of the life course are considered.

Prerequisite: PSCI 9 or PSCI 11B or PSYC 7A or PSYC 9B

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment.

**PSCI 102C. Abnormal Psychology. 4 Units.**

Survey of disorders organized by the diagnostic categories of the American Psychiatric Association. Interdisciplinary orientation combines environmental, psychological, and organic perspectives on etiology and treatment.

Prerequisite: (PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C) and SE 10

Overlaps with PSYC 120A.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment.

**PSCI 103H. Health Psychology. 4 Units.**

Theory and research are considered as they contribute to an understanding of the role of psychological processes in health and illness. The distinction between prevention and treatment of illness is established, and a variety of psychosocial interventions are elaborated.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment.

**PSCI 104S. Social Animal: An Introduction to Social Psychology. 4 Units.**

Theories and research exploring social behavior and social influences on behavior. Topics include methods of social research, attitude formation and change, social perception, the social self, stereotypes and prejudice, conformity, obedience, altruism, aggression, interpersonal relationships and love, and group behavior.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment.

**PSCI 110D. Infant Development. 4 Units.**

Study of human development from conception through the first two years of life, covering processes and events in the domains of physical, social, and cognitive development.

Prerequisite: PSCI 9 or PSCI 11B or PSYC 7A or PSYC 9B

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 111D. Child Development. 4 Units.**

Examines social, emotional, and intellectual growth and development between the ages of 2 and 12 years.

Prerequisite: PSCI 9 or PSCI 11B or PSYC 7A or PSYC 9B

Overlaps with PSYC 120D.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 111W. Advanced Research Methods. 4 Units.**

For students planning to conduct senior research projects or apply to graduate school in social research fields. Topics include reviewing literature, preparing a research proposal, protecting human subjects, citing scholarly work, building measures, estimating sample size, interview and presentation skills.

Prerequisite: SE 10 and SE 13. Satisfactory completion of the Lower-Division Writing requirement.

Same as CLS C169W, SE 111W, UPPP 114W.

(Ib)

**PSCI 112D. Adolescent Development. 4 Units.**

Examines current research on the biological, social, and cultural contexts of adolescent development. Topics include the impacts of puberty, adolescents' decision-making competencies, changes in family and peer relationships, identity development, and psychosocial problems such as depression and problem behavior.

Prerequisite: PSCI 9 or PSCI 11B or PSYC 7A or PSYC 9B

Overlaps with PSYC 21A.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 113D. Adult Development. 4 Units.**

Examines why and how we change (with attention to gains as well as losses) from ages 18-65 and the nature and sources of continuity over time. Topics include physical and intellectual functioning, personality, coping strategies, and social roles and relationships.

Prerequisite: PSCI 9 or PSCI 11B or PSYC 7A or PSYC 9B

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 115D. Cognitive Development. 4 Units.**

Examines theories on nature of cognitive development. Discusses behaviorist theories on role of the environment including those of Vygotsky and Piaget, and recent evidence from cognitive psychologists stressing the importance of knowledge and skills within specific domains.

Prerequisite: PSCI 9 or PSCI 11B or PSYC 7A or PSYC 9B

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 116D. Human Development and Cross-Cultural Perspectives. 4 Units.**

Human development in diverse cultures (e.g., Asian, American, and African). Special emphasis on East-West contrasts and when East meets West (i.e., Asian-American experiences). Topics include parenting, family relations, language and cognition, schooling and academic achievement, and morality.

Prerequisite: (PSCI 9 or PSCI 11B or PSYC 7A or PSYC 9B) and SE 10

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 117D. The Psychology of Gender. 4 Units.**

Discussion of gender identity development and examination of gender differences and similarities across the life span. Consideration of the biology and psychology of gender in relation to physical, behavioral, personality, and intellectual capabilities.

Prerequisite: PSCI 9 or PSYC 9B or PSCI 11B or PSYC 7A

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 118D. Human Sexuality. 4 Units.**

A broad survey of human sexuality encompassing genetic factors, physiological and anatomical development, customary and atypical forms of behavior, reproductive processes, and cultural determinants.

Prerequisite: PSCI 9 or PSCI 11B or PSYC 7A or PSYC 9B

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 121D. Work and Family. 4 Units.**

Effects of employment and unemployment on mental health and marital quality; effects of work on parenting and child development; corporate and social policies for 'families that work'; young adults' decision-making about work and family.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Upper-division students only. Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 126D. Development of Motivation Across the Lifespan. 4 Units.**

Introduces major concepts in life-span development of motivation and self-regulation, and discusses exemplar empirical findings pertaining to these concepts during the various phases of life. Students participate in discussion, present findings from research articles, and write a paper.

Restriction: Psychological Science Majors only. Psychology and Social Behavior Majors only. Social Ecology Majors only.

**PSCI 127D. Attachment Relationships. 4 Units.**

Students learn about the development of attachment-related needs throughout development, as well as the links between attachment and emotion, psychopathology and treatment. Lectures emphasize classic as well as cutting-edge research and are supplemented by primary source readings.

Prerequisite: PSCI 9 or PSYC 7A or PSCI 11A or PSYC 9A or PSCI 11B or PSYC 9B

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 134H. The Science and Practice of Wellness and Resilience . 4 Units.**

Wellness is a common, but elusive goal. Covers the history, theory, psychology, and behavioral science behind skills for wellness and resilience. Provides opportunities to practice the strategies to help further understanding of the behavioral nature of each of the areas.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Psychological Science Majors only. Psychology and Social Behavior Majors only. Social Ecology Majors only.

**PSCI 136H. Behavioral Medicine. 4 Units.**

Examines biobehavioral aspects of health and illness, focusing on how stress contributes to or exacerbates disease processes. Background information on psychosomatic medicine and stress models and detailed examination of specific organ systems emphasizing the reactivity of these systems to stress.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 137H. Human Stress. 4 Units.**

Stress as a multidisciplinary topic. Biological, psychological, and sociological approaches to adaptation-related disorders. Effects of acute and chronic stress on emotions, physiology, and behavior. Methods of stress assessment, stress reduction, and intervention.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 138H. Child Health Psychology. 4 Units.**

Exploration of psychological antecedents, concomitants, and consequences of medical illnesses in children. Children's beliefs about health, illness, and medication; the role of stress; coronary-prone behavior; therapeutic adherence and physician-patient interaction; coping with chronic illness; effects of child's illness on family.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 9C or PSYC 7A. Recommended: SE 10.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 139H. Clinical Sport Psychology. 4 Units.**

An interdisciplinary introduction to clinical sport psychology, that includes, among other things, an introduction to psychopathology in sport; plus the use of psychological skills training, including anxiety reduction techniques, visualization, self-efficacy, coping skills, concentration, and goal-setting in sports.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Overlaps with PSYC 124S.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 140H. The Hardiness Approach to Stress Management. 4 Units.**

New development within psychology involving a combination of motivations and skills that extensive research has shown enhances performance, conduct, morale, stamina, and health. Combines study of hardiness research with strategies for improvement of personal hardiness through a series of exercises.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 141H. Clinical Health Psychology. 4 Units.**

Behavioral role in etiology, treatment, and prevention of certain diseases. Behavioral intervention including biofeedback, stress-, pain-management, health habit counseling, and other skills to assist patients make cognitive, emotional, and behavioral changes needed to cope with disease or achieve better health.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Same as PUBH 141.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 142H. Introduction to Interdisciplinary Salivary Bioscience . 4 Units.**

Introduction to the integration of salivary analytes into developmental, social, behavioral, and health sciences. Lectures cover theoretical perspectives; oral fluid as a biological specimen; saliva collection and study design; basics of salivary assay methods; and research findings across multiple fields.

Restriction: Psychological Science Majors only. Psychology and Social Behavior Majors only. Social Ecology Majors only.

**PSCI 150C. Clinical Psychology. 4 Units.**

Overview of theories, assessment techniques, research methodologies, and intervention approaches in clinical psychology. Psychodynamic, behavioral, humanistic, and cognitive perspectives are examined along with ethical and professional issues.

Prerequisite: (PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C) and PSCI 102C

Overlaps with PSYC 122C.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 152C. Clinical Child Psychology. 4 Units.**

Examines research and theory concerning childhood psychopathology behavior disorders. Diagnosis and assessment, early identification of high-risk children, fears and phobias, antisocial behavior, childhood psychoses, autism, depression, attention deficit/hyperactivity disorders, and ethical and policy implications of identifying children who are different.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 153C. Developmental Psychopathology. 4 Units.**

Research and theory of origins, course, and outcomes of disordered behavior. Continuity and change in patterns of behavior; environmental challenges and buffers; stress/competence in children; vulnerable/invincible children; children of mentally ill parents; families at risk; childhood antecedents of adult disorders.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C. Recommended: SE 10.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 154C. Cognitive Behavior Therapy. 4 Units.**

Presentation of principles and procedures of therapeutic interventions based on cognitive-behavior methods. Cognitive factors in learning, emotional arousal, psychological disorder, and psychotherapy reviewed. Introduces the application of cognitive behavioral methods to problems of depression, anxiety, anger, pain, and impulsivity.

Prerequisite: PSCI 9 or (PSCI 11A and PSCI 11C) or PSYC 7A or (PSYC 9A and PSYC 9C)

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 155C. Child Therapies. 4 Units.**

Examines research methodologies, empirical data, and implications of diverse intervention strategies. Primary topics include psychotherapy process and outcome, family therapies, behavioral intervention, cognitive behavior modification, pediatric psychopharmacology, and ethical and social policy implications of intervening in other people's lives.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 156C. Forensic Psychology: Advanced Seminar. 4 Units.**

Focuses on the psychology of criminal offending, particularly violent behavior. Examines violence, sexual offending, and mental disorder related to crime with regard to clinical assessment and treatment; mental health services within forensic institutions.

Prerequisite: (PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C) and PSCI 102C and (PSCI 178S or CLS C149)

Same as CLS C136, PSYC 177F.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 160C. Clinical Neuroscience. 4 Units.**

An introduction to the neuroclinical bases of human behavior, including neuropsychological approaches to mental disorders. Also includes case formulations, research articles, therapeutic approaches, and other discussions related to select psychopathology and other neurobehavioral topics.

Prerequisite: PSCI 9 or PSYC 7A or PSCI 11A or PSYC 9A or BIOL 99

Same as BIOL N170.

Restriction: Psychological Science Majors have first consideration for enrollment. Biological Sciences Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 161C. Forensic Psychology . 4 Units.**

Forensic psychology is the interface between clinical psychology and the law. Emphasizes clinically relevant legal topics (insanity defense; competency to stand trial) and includes critical thinking about issues that arise when psychologists are involved in legal proceedings.

Prerequisite: PSCI 9 or PSCI 11B or PSCI 11C

Same as CLS C160.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 162C. Psychodynamic Studies. 4 Units.**

Introduction to contemporary psychodynamic studies. Emphasis on clinical concepts associated with psychodynamic psychotherapy, including unconscious determinants of behavior, typical defenses, life experiences, and techniques. Exploration of links between psychodynamic-oriented psychotherapy and other disciplines (e.g., psychology, music, medicine, neuroscience, film).

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 163C. Human Neuropsychology. 4 Units.**

A survey of human brain disorders using a clinical case study approach to illustrate fundamental issues in studying brain and behavior. Topics include sensory deficits, attentional neglect, amnesia, cortical organization, clinical psychopathology, and more.

Prerequisite: BIOL N110 or BIOL N115A or PSYC 9A or PSCI 11A

Same as BIOL N173, PSYC 162N.

Restriction: School of Biological Sciences students have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSCI 164C. Addiction. 4 Units.**

Designed for those with an interest in the nature and treatment of addiction. Focuses on the etiology and treatment of addiction, but does not prepare students to treat substance abuse disorders.

Prerequisite: PSCI 11A and PSCI 11B and PSCI 11C and PSCI 102C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 165C. Adult Psychopathology. 4 Units.**

Advanced course in abnormal psychology, focusing on adult psychopathology. Covers historical and fundamental issues about psychiatric disorders, clinical research on disorders of anxiety, PTSD, mood, psychoses, personality, and dementia, and their biopsychosocial features, and attends to assessment and treatment.

Prerequisite: PSCI 102C. Equivalent to PSCI 102C is also accepted.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 166S. Chicano/Latino Families. 4 Units.**

Introduction to the research, literature, and issues surrounding the topic of Chicano/Latino families including cultural history, contemporary issues, organization of family, traditions, lifestyles, values, beliefs, generational differences, gender issues, ethnic identity, evolution of demographic patterns, current economic and political standings.

Same as CHLT 170, SSCI 165, PSYC 174H.

**PSCI 170S. Personality. 4 Units.**

Comparison of the major theories of personality. Provides a frame of reference for understanding lifestyles, development, maturity, and psychopathology. Emerging research themes are used to identify promising lines of personality theorizing.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Overlaps with PSYC 120P.

Restriction: Upper-division students only. Sophomores only. Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 171S. Environmental Psychology. 4 Units.**

Impact of the physical environment on individual and group behavior. Three basic concerns examined: (a) environmental determinants of behavior at the individual and interpersonal level; (b) social planning and urban design; (c) methodological approaches to the study of environmental issues.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 173S. Social Relationships. 4 Units.**

Examines major issues, concepts, and methods in the scientific study of social relationships. Topics include relationship formation and dissolution, friendships and love relationships, loneliness, bereavement, societal influences on close relationships, significance of close relationships for health and well-being.

Prerequisite: (PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C) and SE 10

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 174S. Error and Bias in Social Judgement. 4 Units.**

Examines how people encode, reason about, and remember social information and explores how biases and shortcomings in social perception, judgment, and memory are central to understanding both effective social functioning and many forms of maladaptive behavior and social conflict.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 176S. Motivation. 4 Units.**

History, major theories, methods, and applications of motivational psychology, with emphasis on European approaches. Origins of the field in personality, learning, cognition, and activation research. Recent innovations in motivational and volitional self-recognition. Current approaches, major debates, empirical research programs.

Prerequisite: (PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C) and PSCI 101D and (PSCI 104S or UPPP 151)

Overlaps with PSYC 121M.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 178S. Violence in Society. 4 Units.**

Current theory and research on aggression; anger and violence as problems in individual and social functioning. Process and functions of anger examined with regard to normal behavior and psychopathology. The determinants, prevalence, and implications of violence in society are analyzed.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Same as CLS C149.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment.

**PSCI 179S. Cultural Psychology. 4 Units.**

An examination of culture's influence on human minds. Topics include culture's impact on perception, cognition, motivation, emotion, moral reasoning, communication, and health. Addresses cultural psychology's methods, history, and place within psychology and related fields.

Prerequisite: PSCI 9 or PSCI 11B or PSCI 11C or PSYC 7A or PSYC 9B or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 183S. Social Epidemiology. 4 Units.**

Overviews evidence linking environmental factors to mental and physical disorders including such variables as socioeconomic status, income inequality, work stress, job loss, social capital, location, and other demographic characteristics. Measurement and research design issues of both individual and aggregate levels.

Prerequisite: (PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C) and SE 10 and SE 13

Same as PUBH 102.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 184S. Positive Psychology . 4 Units.**

The field of positive psychology focuses on what is right and positive about people and institutions. Introduces findings associated with human strengths and positive emotions, and provides clinical and personal applications and implications.

Prerequisite: PSCI 9 or PSCI 11C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 185S. Industrial-Organizational Psychology. 4 Units.**

Examines the application of social psychology to organizational settings. Topics include motivation of workers, group decision-making, leadership styles, career management, and organizational development.

Prerequisite: PSCI 9 or PSCI 11A or PSCI 11B or PSCI 11C or PSYC 7A or PSYC 9A or PSYC 9B or PSYC 9C

Overlaps with PSYC 122I.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 187S. Psychology of Inequality. 4 Units.**

Focuses on the psychological dimensions of poverty, wealth, and economic inequality.

Prerequisite: PSCI 104S and PSCI 11C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 188S. Evolutionary Psychology. 4 Units.**

Understanding our evolutionary origins is critical to truly understanding the complexities of human psychology. Explores how Darwinian principles, applied to both genes and culture, can help us understand not just how the mind works, but why.

Prerequisite: PSCI 11C or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 190. Applied Statistics in Social and Behavioral Research. 4 Units.**

Covers statistical techniques used to describe and make generalizations about phenomena represented by data. Hands-on experience in data analysis and interpretation using statistical software (SPSS, STATA) is emphasized. Topics include data visualization, ANOVA, multiple regression, and categorical data analyses.

Prerequisite: SE 13

Same as CLS C190, SE 190, UPPP 190.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**PSCI 192B. The Science and Practice of Compassion. 4 Units.**

Explores the latest scientific research on compassion and its correlates, and considers practical strategies for increasing compassion in everyday life. Students discover how cutting-edge research is yielding insights into kindness, empathy, altruism, and compassion.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 192Q. Chicano/Latino Social Psychology. 4 Units.**

Examines theories, research, and major issues of relevance to understanding social psychological processes in Chicano/Latino populations. Topics include social development, cultural orientations, gender and sexuality, close relationships, happiness and well-being, stereotyping, prejudice and discrimination, and mental and physical health.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as CHLT 168.

Restriction: Psychological Science Majors have first consideration for enrollment. Chicano/Latino Studies Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**(VII)****PSCI 192T. Cognition and Learning in Educational Settings. 4 Units.**

Foundational concepts in cognition and development as applied to student learning. Primary topics include historical behaviorism, basic cognitive structure and processes, complex cognition, cognitive development, and motivation.

Same as EDUC 173.

Restriction: Psychological Science Majors have first consideration for enrollment. Education Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 192U. Psychology of Learning, Abilities, and Intelligence. 4 Units.**

Overview of classic positions on the mind, human abilities, and intelligence, especially as related to academic achievement. Contrasting views: psychometric versus information processing; experimental versus correlational research.

Prerequisite: PSYC 7A or PSCI 9 or PSCI 11A or PSCI 11B or PSCI 11C

Same as EDUC 176.

Restriction: Psychological Science Majors have first consideration for enrollment. Education Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 192V. Language and Literacy. 4 Units.**

Addresses the linguistic principles and processes that underlie oral and written language proficiency. Emphasis is on how to use phonology, morphology, orthography, semantics, syntax, and pragmatics to support literacy and oral language development for K-12 students.

Same as EDUC 151, LSCI 182V.

Restriction: Language Science Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Education Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 193B. Juvenile Delinquency. 4 Units.**

Patterns of delinquent behavior, theories that explain behavior, current research aimed at enhancing exploratory power. Attempts to prevent and control delinquency are put in historical perspective. Development of the current juvenile justice system and evolution of modern juvenile law.

Same as CLS C109.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment.

**PSCI 193C. Social Control of Delinquency. 4 Units.**

Assumes familiarity with theories of delinquency, the juvenile justice system, and elements of juvenile law. Explores socio-historical origins and evolution of juvenile justice, current research and policy on delinquency prevention and treatment, and future directions of law, policy, and practice.

Prerequisite: Recommended: CLS C109.

Same as CLS C164.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 193E. Psychology and the Law. 4 Units.**

Psychological assumptions of the American legal system and mental health aspects of provision of criminal justice services. Civil commitment, insanity defense, competence to stand trial, jury selection, eyewitness identification. Use of police, courts, correctional institutions in prevention of behavior disorder.

Same as CLS C105.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment.

**PSCI 193F. Family Law. 4 Units.**

Examines legal issues surrounding marriage, cohabitation, divorce, child custody and support, adoption, and the rights of parents and children in the family context. The findings of social science research are used to illuminate the legal issues.

Same as CLS C123.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 193G. Eyewitness Testimony. 4 Units.**

Faulty eyewitness testimony is a major cause of wrongful convictions. Covers the fast-growing topic of eyewitness testimony and memory for real-world events, both how psychologists study eyewitness capacity, and how the legal system has dealt with eyewitness issues.

Prerequisite: SE 10

Same as CLS C177.

Restriction: Seniors only. Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

Concurrent with CLS C263.

**PSCI 196. Research Seminar in Psychological Science . 4 Units.**

Special topics research seminar. Content varies with interest of instructor. Capstone seminar for students who have conducted research with, or have a background in, the research topics of the PSCI faculty member offering this seminar in a given quarter.

Prerequisite: PSCI 11C

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**PSCI P200. Introduction to Legal and Forensic Psychology . 4 Units.**

Familiarizes students with the interrelated fields of psychology, law, and forensic studies. Emphasizes clinically relevant legal topics (insanity defense; competency to stand trial) and includes critical thinking about issues that arise when psychologists are involved in legal proceedings.

Restriction: Master of Legal & Forensic Psy Degree students only.

**PSCI P201. Research Methods in Psychology. 4 Units.**

In-depth examination of the conceptualization of research problems and linkages between theory and the design of appropriate strategies for empirical research in psychological science. Topics include experimental and quasi-experimental designs, reliability and validity of measurement and non-experimental procedures.

Restriction: Graduate students only. Psychological Science Majors only. Psychology and Social Behavior Majors only.

**PSCI P202. Data Analysis and Statistics . 4 Units.**

Statistical techniques to facilitate inferences in psychological research, including fundamentals of statistical inference and methods for analyzing data.

Restriction: Master of Legal & Forensic Psy Degree students only.

**PSCI P204. Adolescence. 4 Units.**

Considers pubertal and cognitive changes and their social consequences; the family, peer group, school, and cultural contexts in which adolescence is embedded; and selected psychosocial issues including autonomy, identity, health, and well-being.

Restriction: Graduate students only.

**PSCI P208. Research Methods. 4 Units.**

In-depth examination of issues relevant to designing and evaluating research in psychological science. Topics address casual inference, ethical issues surrounding the responsible conduct of research, experimental and quasi-experimental designs, reliability and validity of measurement, and non-experimental procedures.

Overlaps with PSCI P201.

Restriction: Master of Legal & Forensic Psy Degree students only.

**PSCI P209A. Applied Psychological Research. 4 Units.**

Focuses on scientific and professional issues in the field of psychology. Topics include communication skills; intervention approaches; collaboration, consultation, and referral; and ethical issues associated with at-risk populations research.

Restriction: Graduate students only.

**PSCI P214. Seminar in Social Psychology. 4 Units.**

Presents an overview of selected theoretical and empirical topics in social psychology including social influence and conformity, altruism and aggression, persuasion and attitude change, self and social perception, and social cognition.

Restriction: Graduate students only.

**PSCI P215. Psychology and Law . 4 Units.**

An interdisciplinary approach to research in psychology, law, and/or criminology. Examines how psychology is applied to the civil and criminal justice systems, how case law shapes this application, and how legal decisions affect the direction of psychological research.

Overlaps with PSCI P266.

Restriction: Master of Legal & Forensic Psy Degree students only.

**PSCI P217. Life-Span Development. 4 Units.**

Introduces the major concepts of life-span development and discusses those with regard to some key topics of developmental psychology. For example, change and continuity, evolutionary and inherited nature, culture, society, and family-based nurture, and their dynamic interaction.

Restriction: Graduate students only.

**PSCI P220. Developmental Psychology: Theories and History. 4 Units.**

Examines key concepts, theories, and the historical and philosophical roots of research in human life span development. Focuses on biological and environmental causation, universalism and cultural relativism, continuity and change.

Restriction: Graduate students only.

**PSCI P222. Forensic Assessment . 4 Units.**

Explores the various ways in which clinical psychology is relevant to the law, and how forensic psychologists can meaningfully contribute to the adjudicatory process. Examines legal, scientific, and ethical issues that arise when psychologists are involved in legal proceedings.

Restriction: Master of Legal & Forensic Psy Degree students only.

**PSCI P223. Cross-Cultural Developmental Psychology. 4 Units.**

Examines human development in diverse cultures (e.g., Asian, American, and African). Cultural diversity within the U.S. and acculturation of various ethnic groups is also discussed. Topics include parenting, family relations, language, and cognition, schooling and academic achievement, and morality.

Restriction: Graduate students only.

**PSCI P224. Children and the Law. 4 Units.**

Examines how psychology research and practice can inform several areas of law and social policy affecting children, adolescents, and families. Topics include education, mental health, reproductive rights, and delinquency.

Overlaps with PSCI 120D.

Restriction: Master of Legal & Forensic Psy Degree students only.

**PSCI P226. Emotion in Psychology. 4 Units.**

Covers original and recent theories of emotions and how they guide current research. Specific topics include neuroanatomical structure of emotion, life-span emotional development, and health and emotion.

Restriction: Graduate students only.

**PSCI P231. Professional Issues in Psychology. 4 Units.**

Examines a variety of issues related to the professional socialization and development of graduate students in psychology. Topics include the publication process, sources of research funding, alternative employment options, competitiveness on the job market, and the academic career route.

Restriction: Graduate students only.

**PSCI P232. Trauma and Resilience. 4 Units.**

Psychological impact of trauma; biopsychosocial factors affecting development of traumatic stress, treatment, and preventive interventions for traumatic stress; define and measure resilience; moral injury and post traumatic growth; ethics of studying trauma.

Restriction: Graduate students only.

**PSCI P234. Childhood. 4 Units.**

Provides graduate students with an overview of traditional and emerging theories, models, and research designed to understand children's development in the domains of cognitive, social, and emotional functioning.

Restriction: Graduate students only.

**PSCI P238. Child Psychopathology. 4 Units.**

Examination of etiology, classification, and developmental pathways of disorders, as well as risk and resilience factors, during the childhood/adolescent years. Discussion of genetic influences and contextual risk factors as well as internalizing and externalizing disorders.

Restriction: Graduate students only.

**PSCI P242. Legal Reasoning and Jurisprudence. 4 Units.**

Overview of the law and legal process as well as the history and assumptions underlying modern legal reasoning. Issues related to procedure and evidence as well as key jurisprudential perspectives are discussed.

Restriction: Master of Legal & Forensic Psy Degree students only.

**PSCI P246. Affective Neuroscience. 4 Units.**

Provides an overview of the emerging field of affective neuroscience. Emphasis is placed on mapping affective experience and behavior to brain function, including cross-level integration of anatomical, chemical, fMRI, and electrical data.

Restriction: Graduate students only.

**PSCI P247. EEG Methods . 4 Units.**

Provides an in-depth training of the electroencephalogram (EEG) methodology with a specific focus on the event-related potential technique. Emphasis is on learning how to use this methodology and how to analyze data, with a focus on emotional stimuli.

Restriction: Graduate students only.

**PSCI P249. Advanced Social Psychology . 4 Units.**

Conveys an appreciation of the flavors of contemporary social psychology, an understanding of empirical approaches to problems in this area, and a sense of the array of theoretical orientations in the field.

Restriction: Graduate students only.

**PSCI P250. Emotion, Reasoning, and Memory. 4 Units.**

Examines research and theory on emotion from the perspective of cognitive psychology. Topics include the effects of emotions on attention, memory, and problem solving; the relations between emotional and cognitive development; flash-bulb memories of intense emotional experiences; eyewitness testimony.

Restriction: Graduate students only.

**PSCI P251. Clinical Interviewing and Treatment in a Forensic Setting. 4 Units.**

Students receive an introduction to clinical interviewing, learn details of strategic, solution-focused therapy, and think critically about issues that come at the interaction of psychology and the law. Students are not 'license-eligible' at end of this course.

Restriction: Master of Legal & Forensic Psy Degree students only.

**PSCI P252. Law and Behavior: Compliance and Enforcement. 4 Units.**

Provides sophisticated insight into the different ways through which law shapes behavior. Addresses both the economic amoral rational choice theories, as well as ideas from social psychology, criminology, and sociology about the moral, social, and and unconscious dimensions of compliance.

Restriction: Graduate students only. Psychological Science Majors only. Psychology and Social Behavior Majors only.

**PSCI P253. Master of Legal and Forensic Psychology Capstone. 4 Units.**

Focuses on macro-level writing topics such as developing a meaningful research question, conducting a thorough review of relevant literature, and presenting a clear and convincing research-based argument.

Restriction: Graduate students only.

**PSCI P254. Mental Health and the Law . 4 Units.**

Explores the history of criminalization of persons with mental illness. Topics include challenges and needs of persons with mental illness; civil and outpatient commitment; law enforcement responses to persons with mental illness; and mentally ill offenders in jails and prisons.

Restriction: Master of Legal & Forensic Psy Degree students only. Graduate students only.

**PSCI P255. Violence, Anger, and Psychopathology. 4 Units.**

Overviews the prevalence of violence as a criminal and public health problem. Topics include violence within families and intimate partner relationships, traumatic origins of violence, the development of a violence-prone personality, the association of anger and violence with psychopathology.

Restriction: Master of Legal & Forensic Psy Degree students only. Graduate students only.

**PSCI P256. Family and the Law . 4 Units.**

Examines sociological and legal perspectives on the relationship between family life and law, with a focus on three distinct but sometimes interconnected domains: the child welfare system, the criminal justice system, and the immigration system.

Restriction: Master of Legal & Forensic Psy Degree students only. Graduate students only.

**PSCI P258. Health Psychology. 4 Units.**

Interdisciplinary exploration of emerging fields of health psychology and behavioral medicine. Topics: role of stress in development/treatment of medical problems; sociocognitive determinants of health and illness; interpersonal health transactions; behavioral approaches to medical problems such as diabetes, obesity, hypertension.

Restriction: Graduate students only.

**PSCI P260. Technology and Health. 4 Units.**

Explores the growing intersection of health and technology, including electronic Health ("eHealth"), mobile health ("mHealth"), and digital health and medicine. Specifically, it focuses on the implications and uses of technologies for behavioral and emotional health, and behavioral change.

Restriction: Graduate students only.

**PSCI P261. Intensive Longitudinal Data Analysis. 4 Units.**

Fundamentals of Intensive Longitudinal Study designs, gain first-hand experience collecting ILD using web and/or mobile-based platforms, and learn.

Prerequisite: SE 264A and SE 264B

Restriction: Graduate students only.

**PSCI P262. Interpersonal Processes and Health. 4 Units.**

Examines traditions of research linking interpersonal processes to emotional or physical health. Topics include: role of social support in ameliorating stress, effects of social control on health-compromising behaviors, adverse effects of social relationships on health, causes of deficient social relationships.

Restriction: Graduate students only.

**PSCI P263. Eyewitness Testimony. 4 Units.**

Examines the evidence that shows that faulty eyewitness memory is the major cause of wrongful convictions. Explores what the legal system thinks of eyewitness testimony and how the legal system has dealt with eyewitness issues.

Same as CLS C263.

Restriction: Graduate students only.

**PSCI P265. Memory and the Law. 4 Units.**

Examines the controversial topic of repressed memory, or perception and memory of real-world events.

Same as CLS C265.

Restriction: Graduate students only.

**PSCI P266. Psychology and the Law. 4 Units.**

Overview of how psychology is applied to the civil and criminal justice systems, how case law shapes this application, and how legal decisions affect the direction of psychological research. Interdisciplinary approach to research in psychology, law, and/or criminology.

Same as CLS C266.

Restriction: Graduate students only.

**PSCI P271. Human Evolution and Behavior. 4 Units.**

Covers theories and empirical research concerning the evolutionary origins of human behaviors and their variations. An interdisciplinary course emphasizing both evolutionary psychology (e.g., mating strategies, kinship, and parenting) and molecular evolution (i.e., evolution of genes for various behaviors).

Same as BIOC 217.

Restriction: Graduate students only.

**PSCI P273. Biobehavioral Aspects of Health and Illness. 4 Units.**

Examines the behavior-physiology interactions of some major bodily systems: the nervous, cardiovascular, gastrointestinal, and endocrine systems. Analysis of normal and abnormal states of these systems as they relate to tissue injury, disease, and rehabilitation.

Restriction: Graduate students only.

**PSCI P275. Special Topics in Psychological Science . 4 Units.**

Topics covered vary with interests of instructor.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PSCI P276. Meta Analysis. 4 Units.**

The process of synthesizing results from a number of studies that address a common research question is often referred to as meta-analysis. Explores the meta-analysis process from the coding of retrieved studies to the final research synthesis.

Restriction: Graduate students only.

**PSCI P280A. Interdisciplinary Salivary Bioscience. 4 Units.**

Theory and research on the integration of salivary analytes into developmental, social, behavioral, and health sciences. Topics include oral fluid as biological specimens; practical aspects of sample handling, collection, and study design; basics of laboratory methods used for assaying saliva.

Restriction: Graduate students only.

**PSCI P280B. Interdisciplinary Salivary Bioscience Lab. 4 Units.**

Laboratory sequel to the P280A seminar. Provides laboratory-based hands-on experience integrating salivary analytes into developmental, social, behavioral, and health sciences that also includes supervised training on sample processing.

Prerequisite or corequisite: PCSI P280A. PCSI P280A with a grade of B or better

Restriction: Graduate students only.

**PSCI P281. Race and the Law. 4 Units.**

Explores how race and other markers of social identity shape outcomes within the criminal justice system. Students examine how race, ethnicity, and national origin intersect with rules governing the policing, trials, and punishment.

Restriction: Master of Legal & Forensic Psy Degree students only.

**PSCI P282. Salivary Bioscience Data Analysis . 4 Units.**

A salivary bioscience statistical research working group. Students conduct guided data analyses with salivary biomarker data. Special topics related to salivary bioscience analytic strategies and the interpretation and dissemination of research findings are discussed.

Restriction: Graduate students only.

**PSCI P283H. Psychoneuroimmunology. 4 Units.**

Introduces students to the field of psychoneuroimmunology and helps them develop the conceptual and methodological skills necessary for designing and interpreting research on the bidirectional relationship between the immune system and psychological processes.

Restriction: Graduate students only.

**PSCI P284. Health and Emotion. 4 Units.**

Overview of research focused on understanding how emotional processes influence physical health. Provides students with a deeper understanding of how emotions play into the health of others as well.

Restriction: Graduate students only.

**PSCI P285. Anger: A Turbulent Emotion. 4 Units.**

Provides an enriched perspective on anger beginning with its understanding in classical antiquity. Topics include developmental processes and trauma, anger physiology and neuroscience, anger-related physical health impairments, and the involvement of anger in psychopathology and violence.

Restriction: Graduate students only.

**PSCI P286. Motivation. 4 Units.**

Introduces major concepts of motivational psychology, theory, and history. Application of motivational concepts to phenomena from social psychology and affective science. Development of own research proposal in a motivational framework and/or conceptualizing or expanding an ongoing or planned research project.

Restriction: Graduate students only.

**PSCI P288. Human Neuropsychology . 4 Units.**

Focuses on clinical, neuroanatomical, and neuropathological studies that have contributed to our understanding of brain-behavior relationships in the context of normal brain function and disease-associated neuropsychiatric syndromes.

Restriction: Graduate students only.

**PSCI P289. The Teaching of Psychology. 4 Units.**

Provides students with the theory and skills needed to teach undergraduate psychology courses. Covers research on theories and methods of teaching, curriculum design, and evaluation. Students also gain practical experience preparing and presenting material.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Psychological Science Majors only. Psychology and Social Behavior Majors only.

**PSCI P290. Research in Developmental Psychology. 4 Units.**

Introduces graduate students to research conducted by individual faculty members in the area of developmental psychology. This is accomplished by having students involve themselves in the conceptualization, strategy, and implementation of the faculty member's research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PSCI P291. Research in Health Psychology. 4 Units.**

Introduces graduate students to research conducted by individual faculty members in the area of health psychology. This is accomplished by having students involve themselves in the conceptualization, strategy, and implementation of the faculty member's research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PSCI P292. Research in Psychopathology and Behavior Disorder. 4 Units.**

Introduces graduate students to research conducted by individual faculty members in the area of psychopathology and behavior disorder. This is accomplished by having students involve themselves in the conceptualization, strategy, and implementation of the faculty member's research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PSCI P293. Research in Social and Personality Psychology. 4 Units.**

Introduces graduate students to research conducted by individual faculty members in the area of social and personality psychology. This is accomplished by having students involve themselves in the conceptualization, strategy, and implementation of the faculty member's research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PSCI P294A. Research Directions in Psychological Science I. 2 Units.**

Introduces students to the current research of faculty, graduate students, and visitors to the Department of Psychological Science. Includes examination of contemporary research issues and controversies, as well as issues related to students' development as professionals.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PSCI P294B. Research Directions in Psychological Science II. 2 Units.**

Introduces students to the current research of faculty, graduate students, and visitors to the Department of Psychological Science. Includes examination of contemporary research issues and controversies, as well as issues related to students' development as professionals.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PSCI P294C. Research Directions in Psychological Science III. 2 Units.**

Introduces students to the current research of faculty, graduate students, and visitors to the Department of Psychological Science. Includes examination of contemporary research issues and controversies, as well as issues related to students' development as professionals.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PSCI P295. Research in Psychology and Law. 4 Units.**

Introduces graduate students to research conducted by individual faculty members in the area of psychology and law. This is accomplished by having students involve themselves in the conceptualization, strategy, and implementation of the faculty member's research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PSCI P296. Doctoral Dissertation Research and Writing. 4-12 Units.**

Dissertation research with Psychological Science faculty.

Prerequisite: Advancement to candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PSCI P298. Directed Studies in Psychological Science. 2-4 Units.**

Directed study with Psychological Science faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PSCI P299. Independent Studies in Psychological Science. 2-8 Units.**

Independent research with Psychological Science faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

# Psychology (PSYCH)

## Courses

### **PSYCH 7A. Introduction to Psychology. 4 Units.**

Introduction to field of psychology, addressing the application of scientific methods to the study of human development, learning, memory, problem solving, perception, biological mechanisms, emotions and motivation, personality, psychopathology, and effects of diverse social and cultural contexts on human behavior.

Same as PSCI 9.

Overlaps with PSYCH 9A, PSYCH 9B, PSYCH 9C, PSCI 11A, PSCI 11B.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment. PSCI 9 and PSYCH 7A may not be taken for credit if taken concurrently with or after PSCI 11A, PSCI 11B, PSCI 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)

### **PSYCH 9A. Psychology Fundamentals. 4 Units.**

Designed to provide freshman with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSCI 11A.

Restriction: Lower-division students only. Cognitive Sciences Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. PSCI 9 and PSYCH 7A may not be taken for credit if taken after PSCI 11A, PSCI 11B, PSCI 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)

### **PSYCH 9B. Psychology Fundamentals. 4 Units.**

Designed to provide freshmen with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSCI 11B.

Restriction: Lower-division students only. Cognitive Sciences Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

(III)

### **PSYCH 9C. Psychology Fundamentals. 4 Units.**

Designed to provide freshman with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSCI 11C.

Restriction: Lower-division students only. Cognitive Sciences Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

(III)

**PSYCH 10A. Probability and Statistics in Psychology I. 4 Units.**

An introduction to probability and statistics. Emphasis on thorough understanding of the probabilistic basis of statistical inference. Examples drawn primarily from psychology.

Restriction: Psychology Majors have first consideration for enrollment.

(Va)

**PSYCH 10B. Probability and Statistics in Psychology II. 4 Units.**

An introduction to probability and statistics. Emphasis on thorough understanding of the probabilistic basis of statistical inference. Examples drawn primarily from psychology.

Prerequisite: PSYCH 10A

Restriction: Psychology Majors have first consideration for enrollment.

(Va)

**PSYCH 10C. Probability and Statistics in Psychology III. 4 Units.**

An introduction to probability and statistics. Emphasis on thorough understanding of the probabilistic basis of statistical inference. Examples drawn primarily from psychology.

Prerequisite: PSYCH 10B

Restriction: Psychology Majors have first consideration for enrollment.

(Vb)

**PSYCH 21A. Adolescent Psychology. 4 Units.**

Focuses on psychosocial dynamics of today's adolescents in America emphasizing the quest for identity, independence, values, and sexual orientation. The influence of society, family, school, and peers is analyzed. Strategies for helping troubled adolescents are discussed.

Overlaps with PSCI 112D.

(III)

**PSYCH 46A. Introduction to Human Memory. 4 Units.**

Covers the core concepts of modern research and theorizing about human memory, including structural subdivisions (e.g., perceptual memory, short-term memory, long-term memory), different measures of memory (e.g., recall, reorganization), and some practical applications of memory research (e.g., mnemonics).

(III)

**PSYCH 56L. Acquisition of Language. 4 Units.**

What children say, what they mean, and what they understand. Theories about the learning of language by one-, two-, and three-year-olds. Comparison of kinds of data on which these theories are based.

Same as LSCI 51.

(III)

**PSYCH 78A. Self-Identity and Society. 4 Units.**

Studies sociological contributions to theory and research in social psychology, with focus on the social influences on personality, attitudes, beliefs, and behavior; socialization, human groups, and social interaction.

Same as SOCIOL 31.

(III)

**PSYCH 89. Special Topics in Lower-Division Psychology. 4 Units.**

Studies in selected areas of psychology at the lower-division level. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**PSYCH H101A. Honors Seminar in Psychology I. 4 Units.**

Focuses on the research activities and honors thesis research projects of each student and the research of various Cognitive Sciences faculty. Students discuss their research interests in the early and later stages of their projects. Research projects and write-ups required.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

Restriction: Psychology Majors only. Cognitive Sciences Majors only. Social Science Honors students only.

**PSYCH H101B. Honors Seminar in Psychology II. 4 Units.**

Focuses on the research activities and honors thesis research projects of each student and the research of various Cognitive Sciences faculty. Students discuss their research interests in the early and later stages of their projects. Research projects and write-ups required.

Prerequisite: PSYCH H101A

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

Restriction: Psychology Majors only. Cognitive Sciences Majors only. Social Science Honors students only.

**PSYCH H101C. Honors Seminar in Psychology III. 4 Units.**

Focuses on the research activities and honors thesis research projects of each student and the research of various Cognitive Sciences faculty. Students discuss their research interests in the early and later stages of their projects. Research projects and write-ups required.

Prerequisite: PSYCH H101B

Repeatability: May be taken for credit 2 times.

Restriction: Psychology Majors only. Cognitive Sciences Majors only. Social Science Honors students only.

**PSYCH 111BW. Honors Advanced Experimental Psychology. 4 Units.**

Design and analysis of multivalent, factorial, and correlational studies. Students prepare proposals for independent research.

Corequisite: PSYCH H111B

Prerequisite: PSYCH H111A and (PSYC H11A or PSYCH 112A). Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Psychology Majors only. Social Science Honors students only.

**(Ib)****PSYCH H111A. Honors Experimental Psychology. 4 Units.**

Emphasis on design of experiments and analysis of results. Experiments are conducted in laboratory sections.

Prerequisite: ((PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C)) and ((PSYCH 10A and 10B and 10C) or (MATH 2A and MATH 2B and (MATH 7 or STATS 7))).

Overlaps with PSYCH 112A.

Restriction: Psychology and Cognitive Sciences Honors Program students only.

**PSYCH H111B. Honors Advanced Experimental Psychology Laboratory. 2 Units.**

Design and analysis of multivalent, factorial, and correlational studies. Students prepare proposals for independent research.

Corequisite: PSYCH 111BW

**PSYCH H111C. Honors Research in Experimental Psychology. 4 Units.**

Each student conducts a research project in experimental psychology. The projects are discussed in a seminar format. Written reports on each project are submitted at the end of the quarter.

Prerequisite: PSYCH 111BW or PSYCH 112B

Restriction: Psychology Majors only. Social Science Honors students only.

**PSYCH 112A. Experimental Psychology. 4 Units.**

Emphasis on design of experiments and analysis of results. Experiments are conducted in laboratory sections.

Corequisite: PSYCH 112LA

Prerequisite: ((PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C)) and ((PSYCH 10A and PSYCH 10B and PSYCH 10C) or (MATH 2A and MATH 2B and (MATH 7 or STATS 7)))

Overlaps with PSYCH H111A, PSYCH 112F, PSYCH 112G.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 112BW. Advanced Experimental Psychology. 4 Units.**

Design and analysis of multivalent, factorial, and correlational studies. Students prepare proposals for independent research.

Prerequisite: PSYCH 112A and PSYCH 112LA. Satisfactory completion of the Lower-Division Writing requirement.

Overlaps with PSYCH 112F, PSYCH 112FW, PSYCH 112G, PSYCH 112GW.

Restriction: Psychology Majors have first consideration for enrollment.

**(Ib)****PSYCH 112C. Research in Experimental Psychology. 4 Units.**

Each student conducts a research project in experimental psychology. The projects are discussed in a seminar format. Written reports on each project are submitted at the end of the quarter.

Corequisite: PSYCH 112LC

Prerequisite: PSYCH 112B and PSYCH 112LB

Overlaps with PSYCH 112F, PSYCH 112FW, PSYCH 112G, PSYCH 112GW.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 112D. Effective Graphical Presentation of Data. 4 Units.**

Learn to use MATLAB to produce graphical displays of data based on psychological principles for effective design. Approach is problem-oriented, with emphasis on case-studies using data from psychological experiments and real-world corpora. Assessment via independent individual projects.

Corequisite: PSYCH 112LD

Prerequisite: (PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C) and (PSYCH 10C or SOC SCI 10C or ANTHRO 10C or POL SCI 10C or SOCIOL 10C) or (MATH 2B and STATS 7)

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 112LA. Experimental Psychology Laboratory. 2 Units.**

Required laboratory section and co-requisite for Psych 112A.

Corequisite: PSYCH 112A

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 112LB. Advanced Experimental Psychology Laboratory. 2 Units.**

Required laboratory section for PSYCH 112B and PSYCH 112BW.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 112LC. Research in Experimental Psychology.**

Required laboratory section and co-requisite for PSYCH 112C.

Corequisite: PSYCH 112C

**PSYCH 112LD. Effective Graphical Presentation of Data Lab . 2 Units.**

Lab to learn to use MATLAB to produce graphical displays of data based on psychological principles for effective design. Approach is problem-oriented, with emphasis on case-studies using data from psychological experiments and real-world corpora. Assessment via independent individual projects.

Corequisite: PSYCH 112D

Restriction: Psychology Majors have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment.

**PSYCH 112LM. Research Methods in Psychology Laboratory. 2 Units.**

Required laboratory section and co-requisite for PSYCH 112M.

Corequisite: PSYCH 112M

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 112LR. Cognitive Robotics Laboratory. 2 Units.**

Required laboratory section and corequisite for PSYCH 112R.

Corequisite: PSYCH 112R

Restriction: Psychology Majors have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment.

**PSYCH 112M. Research Methods in Psychology. 4 Units.**

Research methods in psychology for majors who wish to fulfill this requirement separately from upper-division writing. Covers both experimental and descriptive research methods, analysis of results, and reading the psychological literature. Research experience is provided in laboratory sections.

Corequisite: PSYCH 112LM

Prerequisite: (PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C) and (PSYCH 10C or SOC SCI 10C or ANTHRO 10C or POL SCI 10C or SOCIOL 10C) or (MATH 2B and STATS 7)

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 112R. Cognitive Robotics. 4 Units.**

Introduces concepts on experimental design, embodiment, robot construction, and computer programming. Concepts of embodied intelligence and case studies of cognitive robotics are covered in lecture. Simple robots are constructed and programmed to carry out different behavioral experiments in lab.

Corequisite: PSYCH 112LR

Prerequisite: (PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C) and (PSYCH 10C or SOC SCI 10C or ANTHRO 10C or POL SCI 10C or SOCIOL 10C) or (MATH 2B and STATS 7)

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 114M. MATLAB Programming. 4 Units.**

MATLAB is a mathematical software package for solving quantitative problems often encountered in experimental psychology. Topics include rudiments of programming, statistical analysis of data, matrix algebra, signal processing, graphic visualization, and simulated models of cognitive and perceptual processes.

Restriction: Psychology Majors have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment.

**PSYCH 119. Special Topics in Research Methodologies. 1-4 Units.**

Studies in selected areas of research methodologies. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 120A. Abnormal Psychology. 4 Units.**

Introduction to psychopathology and behavioral deviations, and the concepts of theories regarding these conditions.

Prerequisite: PSYCH 7A or PSCI 9 or PSYCH 9C or PSCI 11C

Overlaps with PSCI 102C.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 120D. Developmental Psychology. 4 Units.**

A general introduction to the study of the physical, intellectual, social, and emotional development of the child from birth to adulthood.

Prerequisite: PSYCH 7A or PSCI 9 or PSYCH 9A or PSCI 11A

Overlaps with PSCI 111D.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Nursing Science Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 120H. History of Psychology. 4 Units.**

A history of the development of various schools and systems of psychological thought.

Prerequisite: (PSYCH 7A or PSCI 9) or (PSYCH 9A or PSCI 11A) and (PSYCH 9B or PSCI 11B) and (PSYCH 9C or PSCI 11C)

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 120P. Personality Theories. 4 Units.**

A survey of the evolution of personality theory during this century. An overview of major perspectives in the field, with special attention to Freud, Jung, and Adler.

Prerequisite: PSYCH 7A or PSCI 9 or PSYCH 9C or PSCI 11C

Overlaps with PSCI 170S.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 121M. Theories of Motivation. 4 Units.**

Factors affecting the behavioral performance of organisms. A survey of theoretical and empirical approaches to the physiological, psychological, and social factors which generate behavior.

Prerequisite: (PSYCH 7A or PSCI 9) or (PSYCH 9A or PSCI 11A) and (PSYCH 9B or PSCI 11B) and (PSYCH 9C or PSCI 11C)

Overlaps with PSCI 176S.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 121P. Positive Psychology. 4 Units.**

Positive psychology, at the subjective level, is about valued subjective experiences; at the individual level, it is about positive individual traits; and at the group level, it is about the civic virtues and institutions that move individuals toward better citizenship.

Prerequisite: (PSYCH 9A or PSCI 11A) and (PSYCH 9B or PSCI 11B) and (PSYCH 9C or PSCI 11C)

Overlaps with PSY BEH 184S.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 121S. Psychology of Sleep and Consciousness. 4 Units.**

Covers the physiology, neurochemistry, and neuroanatomy associated with sleep, contemporary sleep theory, REM and NREM, phenomenology, sleep disorders, examination of differences between conscious and unconscious cognitive function, the history of sleep and dream theories from ancient time to present day.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 122C. Clinical Psychology. 4 Units.**

Provides overview of the clinical psychology field including theories and techniques used in counseling and testing.

Overlaps with PSY BEH 150C.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 122I. Organizational/Industrial Psychology. 4 Units.**

Introduction to applied psychology in organizations, including personnel testing, selection, training and evaluation, job and classification analysis, job satisfaction and motivation, organizational development, leadership, market research, and consumer psychology. Potential ethical problems are discussed.

Prerequisite: (PSYCH 7A or PSY BEH 9) or (PSYCH 9A or PSY BEH 11A) or (PSYCH 9B or PSY BEH 11B) or (PSYCH 9C or PSY BEH 11C)

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 122P. Clinical Psychophysiology. 4 Units.**

Psychophysiology investigates the relationships between physiological processes and psychological phenomena. Technologies examined include reaction times, heart rate variability, EEGs, ERPs, magnetoencephalography, and eye tracking. Applications include diagnosis, the longitudinal assessment, and the identification of individuals at risk of disease onset.

Prerequisite: BIO SCI N110 or BIO SCI N115A or PSYCH 9A or PSCI 11A

Same as BIO SCI N118.

(II ).

**PSYCH 123P. Topics in Philosophy of Psychology. 4 Units.**

Selected topics in the philosophy of psychology, e.g., the nature of psychological explanation, reductionism, issues in cognitive, behavioral, and neuroscience.

Repeatability: Unlimited as topics vary.

Same as LPS 143, PHILOS 143.

Restriction: Psychology Majors have first consideration for enrollment. Philosophy Majors have first consideration for enrollment.

**PSYCH 124S. Sports Psychology. 4 Units.**

Discusses the field of sports psychology with an emphasis on clinical practice including motivation, goal setting, performance skills, and mental skills. Discusses and utilizes a wide range of techniques designed to enhance performance and manage problems among athletes.

Prerequisite: (PSYCH 7A or PSY BEH 9) or (PSYCH 9C or PSY BEH 11C)

Overlaps with PSY BEH 139H.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 124V. Psychology of Violence. 4 Units.**
