Discusses the psychology of violence and aggression with an emphasis on understanding the psychological, social, and physiological roots of violent and aggressive behavior. Psychological treatment techniques and strategies for prevention of aggressive and violent behavior are also discussed.

Prerequisite: (PSYCH 7A or PSY BEH 9) or (PSYCH 9C or PSY BEH 11C)

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 129. Special Topics in General Psychology. 4 Units.**

Studies in selected areas of general psychology. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 130A. Perception and Sensory Processes. 4 Units.**

A general introduction to the scientific study of sensory processes and perceptual phenomena, with special emphasis in the visual systems.

Prerequisite: (PSYCH 7A or PSY BEH 9) or (PSYCH 9A or PSY BEH 11A)

Overlaps with PSYCH 131A, PSYCH 131B.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 131A. Vision. 4 Units.**

Visual perception and the anatomy and physiology of the visual system. Topics include the retina and the visual pathway; visual sensitivity; color vision; spatial vision; motion perception; and the development of the visual system.

Same as BIO SCI N182.

Overlaps with PSYCH 130A.

Restriction: Upper-division students only. Psychology Majors have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment. School of Biological Sciences students have first consideration for enrollment.

**PSYCH 131B. Hearing. 4 Units.**

Auditory perception, the anatomy and physiology of the auditory system, and the physics of sound. Topics include neural transduction of sound, sensitivity, sound localization, complex sound perception, and hearing loss.

Prerequisite: (PSYCH 9A or PSY BEH 11A) and (PSYCH 9B or PSY BEH 11B)

Overlaps with PSYCH 130A.

Restriction: Psychology Majors have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment.

**PSYCH 135M. The Mind/Body Problem. 4 Units.**

What is consciousness and what is matter and how are the two related? How can brains have minds? This multidisciplinary course draws on information from the fields of computer vision, artificial intelligence, cognition, neurophysiology, philosophy, and psychophysics.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 139. Special Topics in Perception and Sensory Processes. 4 Units.**

Studies in selected areas of perception and sensory processes. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 140C. Cognitive Science. 4 Units.**

Introduction to the investigations of the structure and function of the mind, from viewpoints of computation, neuroscience, philosophy, and cognitive psychology. Topics include perception, attention, knowledge representations, learning and memory, action, reasoning, and language.

Prerequisite: (PSYCH 7A or PSY BEH 9) and (PSYCH 9A or PSY BEH 11A) and (PSYCH 9B or PSY BEH 11B)

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 140L. Principles of Learning Theory. 4 Units.**

Investigation of the learning and memory processes of human and animals. Basic experimental approaches to learning and memory, empirical results, and theoretical interpretations of the evidence are discussed.

Prerequisite: (PSYCH 7A or PSY BEH 9) or (PSYCH 9A or PSY BEH 11A)

Restriction: Psychology Majors have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment.

**PSYCH 140M. Human Memory. 4 Units.**

Developments in the area of memory; history of memory research; theories of the nature of memory. Visual memory, recognition memory, high-speed scanning, free recall, short-term memory, mnemonics, retrieval, relationship of memory to thinking. Selected theoretical formulations for memory.

Prerequisite: (PSYCH 7A or PSY BEH 9) or (PSYCH 9B or PSY BEH 11B)

Restriction: Psychology Majors have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment.

**PSYCH 143P. Human Problem Solving. 4 Units.**

Modern developments in the psychology of human problem solving. Topics include concept identification, arithmetic, sets, logic puzzles, story problems, group problem solving, and theorem proving.

Prerequisite: (PSYCH 7A or PSY BEH 9) or (PSYCH 9B or PSY BEH 11B)

Restriction: Psychology Majors have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment.

**PSYCH 146MW. Writing about Memory. 4 Units.**

Covers a broad range of texts, literary, philosophical, and scientific, each probing the nature of memory and its meaning in human life. Readings are drawn from across many disciplines and many perspectives.

Prerequisite: PSYCH 7A or PSYCH 9B or PSY BEH 9 or PSY BEH 11B. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Psychology Majors have first consideration for enrollment.

(Ib)

**PSYCH 149. Special Topics in Cognition and Learning. 4 Units.**

Studies in selected areas of cognition and learning. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 150. Psychology of Language. 4 Units.**

Examines language using the tools of experimental psychology. From sounds to words to spoken and written sentences, explores how language is used in real time, and how its use reveals how it is represented in the mind.

Prerequisite: PSYCH 7A or PSCI 9 or PSYCH 9B or PSCI 11B or LSCI 3

Same as LSCI 155.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Language Science Majors have first consideration for enrollment.

Psychology Majors have first consideration for enrollment.

**PSYCH 156A. Acquisition of Language II. 4 Units.**

Focuses on native language learning, exploring the way in which infants and very young children unconsciously uncover the rich systematic knowledge of their native language. Examines both experimental and computational studies that quantitatively investigate the 'how' of language acquisition.

Prerequisite: PSYCH 56L or LINGUIS 51

Same as LINGUIS 150.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 157M. Computational Methods for Language Research. 4 Units.**

Focuses on computational methods useful for language research. Students become familiar with software and programming languages used for extracting information from electronic datasets and for creating basic simulations of linguistic cognition. No prior programming experience assumed.

Prerequisite: PSYCH 150 or LSCI 155 or PSYCH 156A or LSCI 151

Same as PSYCH 157M.

**PSYCH 159. Special Topics in Language. 4 Units.**

Studies in selected areas of language sciences. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 160A. Introduction to Cognitive Neuroscience. 4 Units.**

Introduction to the neural basis of human perceptual, motor, and cognitive abilities. Topics include sensory perception, motor control, memory, language, attention, emotion, frontal lobe function, functional brain imaging, and neuropsychological disorders.

Prerequisite: (PSYCH 7A or PSY BEH 9) and (PSYCH 9A or PSY BEH 11A) and (PSYCH 9B or PSY BEH 11B)

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 160D. Brain Disorders and Behavior. 4 Units.**

Examines the localization of human brain functions and the effects of neurological disorders on psychological functions such as perception, motor control, language, memory, and decision-making.

Prerequisite: (PSYCH 7A or PSY BEH 9) and (PSYCH 9A or PSY BEH 11A) and (PSYCH 9B or PSY BEH 11B) or BIO SCI 35 or BIO SCI N110

Same as BIO SCI N165.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Biological Sciences Majors have first consideration for enrollment.

Psychology Majors have first consideration for enrollment.

**PSYCH 160H. History of Cognitive Neuroscience. 4 Units.**

Studies of the human mind from ancient cultures to the innovation of modern methods of brain imaging. Logic of valid and invalid brain hypothesis are examined. Recurring theme is the competition between holistic and localized views of brain function.

Prerequisite: PSYCH 9A or PSY BEH 11A or PSYCH 7A or PSY BEH 9

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 161. Language and the Brain . 4 Units.**

Research analysis on biological bases of human linguistic capacity. Development, focusing on hemispheric specialization, plasticity; localization of specific linguistic functions in adults, with emphasis on study of aphasia; relation of linguistic capacity to general cognitive capacity, considering research on retardation.

Prerequisite: (PSYCH 7A or PSY BEH 9 or PSYCH 9A or PSY BEH 11A) and (PSYCH 9B or PSY BEH 11B or BIO SCI 35 or BIO SCI N110 or BIO SCI N115A)

Same as BIO SCI N160, LSCI 158.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Biological Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 161H. Hearing and the Brain. 4 Units.**

An overview of brain mechanisms of hearing, including perception of simple sounds, speech, and music. Begins with sound itself, and looks at processing by the ear, auditory pathways, auditory cortex, and beyond. Also auditory development, learning, and clinical issues.

Prerequisite: PSYCH 160A or BIO SCI 93 or BIO SCI H93

Same as BIO SCI N147.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Biological Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 162N. Human Neuropsychology. 4 Units.**

A survey of human brain disorders using a clinical case study approach to illustrate fundamental issues in studying brain and behavior. Topics include sensory deficits, attentional neglect, amnesia, cortical organization, clinical psychopathology, and more.

Prerequisite: BIO SCI N110 or BIO SCI N115A or PSYCH 9A or PSCI 11A

Same as BIO SCI N173, PSCI 163C.

Restriction: School of Biological Sciences students have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 169. Special Topics in Cognitive Neuroscience . 4 Units.**

Studies in selected areas of cognitive neuroscience. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 173A. Psychological Anthropology. 4 Units.**

Cultural differences and similarities in personality and behavior. Child-rearing practices and consequent adult personality characteristics, biocultural aspects of child development and attachment, culture and behavior evolutionary models, politically linked personality, cognitive anthropology, psychology of narrative forms, comparative national character studies.

Prerequisite: ANTHRO 2A or PSYCH 7A or (PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C)

Same as ANTHRO 132A.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 174E. African American Psychology. 4 Units.**

Historical overview of the development of black psychology and the African American frame of reference. Topics include personality development, psychological assessment, issues in education, black mental health, and the role of the African American psychologist in the community.

Same as AFAM 153.

**PSYCH 174H. Chicano/Latino Families. 4 Units.**

Introduction to the research, literature, and issues surrounding the topic of Chicano/Latino families including cultural history, contemporary issues, organization of family, traditions, lifestyles, values, beliefs, generational differences, gender issues, ethnic identity, evolution of demographic patterns, current economic and political standings.

Same as CHC/LAT 170, PSCI 166S, SOC SCI 165.

**PSYCH 176A. Political Psychology. 4 Units.**

Examination of how psychological theory and research may be used to better understand political thought and behavior. Drawing on theories of learning, cognition, and personality, discusses such topics as the formation of political attitudes, and the process of political decision-making.

Same as POL SCI 128C.

Restriction: Majors only. POL SCI 128C may not be taken for credit if taken after POL SCI 137C.

**PSYCH 177D. Deviance. 4 Units.**

Perspectives on deviance and criminality in behavior, institution, community, and myth. The suitability of contemporary theories of deviant behavior.

Same as SOCIOL 156, CRM/LAW C107.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 177F. Forensic Psychology: Advanced Seminar. 4 Units.**

Focuses on the psychology of criminal offending, particularly violent behavior. Examines violence, sexual offending, and mental disorder related to crime with regard to clinical assessment and treatment; mental health services within forensic institutions.

Prerequisite: (PSCI 9 or PSCI 11C or PSYCH 7A or PSYCH 9C) and PSCI 102C and (PSCI 178S or CRM/LAW C149)

Same as CRM/LAW C136, PSCI 156C.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSYCH 178N. Social Psychology of Networks. 4 Units.**

Review of network methods used in small group and organizational research. Discussion of social psychological literature relevant to the network of study of cognitive social structure, exchange/communication, identity negotiation, and social control. Case study of network datasets exemplifies research issues.

Same as SOCIOL 135.

Restriction: Sociology Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 179. Special Topics in Interdisciplinary Studies. 1-4 Units.**

Studies in selected areas of interdisciplinary studies. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 198. Directed Group Study. 1-4 Units.**

Directed study with Cognitive Sciences faculty.

Repeatability: May be repeated for credit unlimited times.

**PSYCH 199. Independent Study. 1-4 Units.**

Independent research with Cognitive Sciences faculty.

**PSYCH 201A. Cognitive Sciences Research Seminar. 1.3 Unit.**

Weekly reports and colloquia by faculty, students, and visitors.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Psychology Majors only.

**PSYCH 201B. Cognitive Sciences Research Seminar. 1.3 Unit.**

Weekly reports and colloquia by faculty, students, and visitors.

Prerequisite: PSYCH 201A

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Psychology Majors only.

**PSYCH 201C. Cognitive Sciences Research Seminar. 1.4 Unit.**

Weekly reports and colloquia by faculty, students, and visitors.

Prerequisite: PSYCH 201B

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Psychology Majors only.

**PSYCH 202A. Proseminar in the Cognitive Sciences. 1 Unit.**

Introduction to the conceptual foundations and basic research results in the cognitive sciences for first-year graduate students.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**PSYCH 203A. Discrete Mathematics and Probability. 4 Units.**

Logic and set theory are covered during the first three weeks, using an interactive computer system. The remaining seven weeks are devoted to probability theory and cover elementary concepts from samples spaces to Chebychev's Inequality and the moment generating function.

Restriction: Graduate students only.

**PSYCH 203C. Algorithmic Statistics. 4 Units.**

Discussion of the fundamentals of statistical inference and computational implementations of common statistical models.

Restriction: Graduate students only.

**PSYCH 203D. Applied Mathematics for Cognitive Sciences Research. 4 Units.**

Covers the basics of linear systems analysis, focusing on linear algebra, Fourier analysis, differential equations, and elementary signal processing. Applications in Cognitive Science and Cognitive Neuroscience research will be developed.

Prerequisite: PSYCH 205A

Restriction: Graduate students only. Psychology Majors only.

**PSYCH 205A. Computational and Research Methods with MATLAB. 4 Units.**

Introduces rudiments of programming, statistical analysis and probability theory, graphic visualization, GUI design, spectral analysis, and simulation models using MATLAB, a software package for solving quantitative problems often encountered in experimental psychology.

Restriction: Graduate students only.

**PSYCH 205B. Running Experiments Using MATLAB. 4 Units.**

Provides an in-depth introduction to writing MATLAB programs to run auditory and visual experiments. Topics covered include program structure, stimulus generation, presentation, and data collection.

Prerequisite: PSYCH 205A

**PSYCH 205C. Computational Statistics. 4 Units.**

Introduction to a number of computational statistics approaches including exploratory data analysis and modeling using a probabilistic framework with Bayesian graphical models. Emphasis will be on in-class programming using MATLAB.

Restriction: Graduate students only.

**PSYCH 210A. Introduction to Cognitive and Brain Sciences I: Perception. 4 Units.**

Discusses models of cognition and evidence linking cognition and the brain. Focus is on visual, auditory, and somatic perception and bottom-up mechanisms of attention.

Restriction: Graduate students only.

**PSYCH 210B. Introduction to Cognitive and Brain Sciences II: Cognition. 4 Units.**

Discusses models of cognition and evidence linking cognition and the brain. Focus is on emotion, top-down attention, goal-directed behavior, categorization, judgment, and decision-making.

Restriction: Graduate students only.

**PSYCH 210C. Introduction to Cognitive and Brain Sciences III: Learning and Development. 4 Units.**

Discusses experimental data, formal models of learning, and evidence linking learning and development to its neural substrates. Topics include Pavlovian and instrumental conditioning, language acquisition, causal reasoning, perceptual learning, category formation, and structure learning.

Restriction: Graduate students only.

**PSYCH 213. The Mind/Body Problem. 4 Units.**

Course is multidisciplinary, drawing on information from the fields of quantum physics, computer vision, artificial intelligence, cognition, neurophysiology, philosophy, and psychophysics.

Restriction: Graduate students only.

**PSYCH 214. Bayesian Cognitive Modeling. 4 Units.**

Considers a range of statistical methods of data analysis and simple cognitive models using the Bayesian graphical modeling framework.

Restriction: Graduate students only.

**PSYCH 218. Hearing. 4 Units.**

Examines auditory sensation and perception using psychophysical and neuroscientific perspectives. Covers physical aspects of sound; subcortical auditory processing; aspects of sensation and perception such as sensitivity, sound localization, and complex-sound recognition; neuroscientific studies of cortical function; and abnormal auditory processing.

Restriction: Graduate students only.

**PSYCH 229. Special Topics in Human Cognition. 1.3-4 Units.**

Current research in brain/ behavior relationships, human memory, and learning theory is presented.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PSYCH 231P. Topics in Philosophy of Psychology. 4 Units.**

Selected topics in the philosophy of psychology, e.g., the nature of psychological explanation, reductionism, issues in cognitive, behavioral, and neuroscience.

Repeatability: Unlimited as topics vary.

Same as LPS 243, PHILOS 243.

**PSYCH 234A. Mathematical Models of Cognitive Processes I . 4 Units.**

Mathematical models of various cognitive processes developed since 1960, including learning, memory, perception, psycholinguistics, and problem solving. Models are formulated in different mathematical languages: calculus, algebra, logic, probability, and computer. Difficulties in testing and validating models discussed.

Restriction: Graduate students only.

**PSYCH 237. Advanced Bayesian Cognitive Modeling. 4 Units.**

Considers a range of advanced cognitive process models including models of signal detection, memory retention, category learning, stimulus representation, and reasoning using the Bayesian graphical modeling framework.

Prerequisite: PSYCH 214

Restriction: Graduate students only.

**PSYCH 239. Special Topics in Methodology and Models. 1.3-4 Units.**

Current research in cognitive sciences methodologies, concepts, and models is presented.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PSYCH 245A. Computational Models of Language Learning. 4 Units.**

Focuses on computational models of native language learning, exploring how probabilistic learning and inference fare on difficult case studies within language acquisition. In all cases, grounds the learning models in available empirical data and considers their psychological plausibility.

Prerequisite: PSYCH 215L

Restriction: Graduate students only.

**PSYCH 245M. Computational Models of Language Learning. 4 Units.**

Focuses on computational models of native language learning, exploring how probabilistic learning and inference fare on difficult case studies within language acquisition. In all cases, grounds the learning models in available empirical data and considers their psychological plausibility.

Prerequisite: LSCI 251. LSCI 251 with a grade of B- or better

Same as LSCI 206C.

Restriction: Graduate students only.

Concurrent with LSCI 106M.

**PSYCH 249. Special Topics in Language Science. 1.3-4 Units.**

Foundations and current research in theoretical, experimental, and computational linguistics.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PSYCH 259. Special Topics in Human Performance. 1.3-4 Units.**

Current research in the human issues involved with sensation, perception, and cognition.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PSYCH 261N. Cortical Neuroscience. 4 Units.**

Physiology of the cerebral cortex, theoretical neuroscience, and the neural basis of perception.

Prerequisite: PSYCH 216

**PSYCH 262. Functional Neuroanatomy. 4 Units.**

It is impossible to truly understand human behavior without some understanding of the physical structure that enables behavior. Examines recent findings in functional neuroanatomy through lectures and papers discussing links between particular behaviors and specific brain structures.

Restriction: Graduate students only.

**PSYCH 265. Introduction to Functional MRI. 4 Units.**

Describes the fundamentals of imaging the human brain function using functional Magnetic Resonance Imaging (fMRI). Topics include basic fMRI physics, experimental design, and data acquisition and analysis.

Restriction: Graduate students only.

**PSYCH 268A. Computational Neuroscience. 4 Units.**

Introduction to computational neuroscience. Mathematical models of single neurons, neural circuits, thalamocortical systems, and cortical mass action can stimulate single-unit, local field potential, and EEG dynamics. These models are used to investigate mechanisms of sensation, motor control, attention, and consciousness.

Prerequisite: PSYCH 205A and (PSYCH 210A or PSYCH 210B or PSYCH 210C)

**PSYCH 268R. Cognitive Robotics. 4 Units.**

Introduces concepts for studying cognitive function by embedding brain models on robotic platforms. Topics include robot construction, computer programming, and the notion of embodiment. Students construct simple robots and program these robots to perform different behaviors.

**PSYCH 269. Special Topics in Cognitive Neuroscience. 1.3-4 Units.**

Current research in cognitive neuroscience.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PSYCH 289. Special Topics in Sensation and Perception. 1.3-4 Units.**

Current research in the reception and processing of visual and auditory stimuli presented.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PSYCH 290. Dissertation Research. 1-12 Units.**

Dissertation research with Cognitive Science faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Psychology Majors only.

**PSYCH 299. Individual Study. 4-12 Units.**

Individual research with Cognitive Science faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Public Health (PUBHLTH)

### Courses

**PUBHLTH 1. Principles of Public Health. 4 Units.**

Introduces the major concepts and principles of public health and the determinants of health status in communities. Emphasizes the ecological model that focuses on the linkages and relationships among multiple natural and social determinants affecting health.

Restriction: Nursing Science Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

(III)

**PUBHLTH 2. Case Studies in Public Health Practice. 4 Units.**

Presents case studies in various themes of public health practice to demonstrate how the principles of public health were established and continue to evolve.

Prerequisite: PUBHLTH 1

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

(II)

**PUBHLTH 7A. Public Health Statistics I. 4 Units.**

Introduces the development and application of statistical reasoning and methods in addressing, analyzing, and solving problems in public health, health care, and biomedical, clinical, and population-based research and practice.

Overlaps with SOCECOL 13, STATS 7, STATS 8, MGMT 7.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

(Va)

**PUBHLTH 7B. Public Health Statistics II. 4 Units.**

Introduces the development and application of statistical reasoning and methods in addressing, analyzing, and solving problems in public health, health care, and biomedical, clinical, and population-based research and practice.

Prerequisite: PUBHLTH 7A

Restriction: Public Health Majors only. Public Health Sciences Majors only. Public Health Policy Majors only.

(Va)

**PUBHLTH 10. Special Topics in Public Health . 2-4 Units.**

Introduction to emerging topics in public health. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PUBHLTH 30. Introduction to Urban Environmental Health. 4 Units.**

Study of natural and physical components of earth's environmental problems due to human activities. Topics include global air, water, soil, biodiversity, rainforests, energy, demographics, agriculture, and urbanization. Theme is sustainability. Integrated into the science are social, legal, and economic considerations.

(II)

**PUBHLTH 60. Environmental Quality and Health. 4 Units.**

Overviews how pollution in the environment affects human health. Topics are toxicology, epidemiology, risk assessment, water, food, air, radiation, pesticides, solid and hazardous waste. Included are interdisciplinary elements of environmental regulations, education, and consumer protection.

(II)

**PUBHLTH 80. AIDS Fundamentals. 4 Units.**

Considers the biological and sociological bases of the AIDS epidemic. Topics include the history of AIDS, current medical knowledge, transmission, risk reduction, and how the community can respond.

Same as BIO SCI 45.

(II)

**PUBHLTH 90. Natural Disasters. 4 Units.**

Natural disasters are natural Earth processes that adversely affect humans. Topics include tectonics, earthquakes, tsunami, volcanoes, landslides, severe weather, flooding, coastal processes, wildfire, related topics, and use of GIS for hazard and risk assessment.

Overlaps with EARTHSS 17.

(II)

**PUBHLTH 91. Disparities in Health Care. 2-8 Units.**

Student participatory course practicing initiation, planning, and coordination of various speakers on the subject of Disparities in Health Care.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 8 units.

**PUBHLTH 100. Special Topics in Public Health. 4 Units.**

Studies in selected areas of public health. Topics addressed vary each quarter. Course may be offered online when topic is Public Health in the Corporate World.

Prerequisite: PUBHLTH 1

Repeatability: Unlimited as topics vary.

**PUBHLTH 101. Introduction to Epidemiology. 4 Units.**

The distribution of disease and injury across time, space, and populations. Covers basic concepts and methods of descriptive epidemiology including the natural history of disease, data, and indices of health.

Prerequisite: STATS 7 or STATS 8 or PUBHLTH 7 or PUBHLTH 7A

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 102. Social Epidemiology. 4 Units.**

Overviews evidence linking environmental factors to mental and physical disorders including such variables as socioeconomic status, income inequality, work stress, job loss, social capital, location, and other demographic characteristics. Measurement and research design issues of both individual and aggregate levels.

Prerequisite: (PSCI 9 or PSCI 11C or PSYCH 7A or PSYCH 9C) and SOCECOL 10 and SOCECOL 13

Same as PSCI 183S.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PUBHLTH 105. Introduction to Medical Informatics. 4 Units.**

Broad overview of medical informatics for students with varied backgrounds. Electronic medical records, online resources, mobile technologies, patient safety, and computational design. Legal, ethical, and public policy issues. Health systems management. Evaluation and fieldwork for health systems.

Prerequisite: WRITING 39C or WRITING 30 or WRITING 31 or HUMAN 1C or HUMAN H1C. WRITING 39C with a grade of C or better. WRITING 30 with a grade of C or better. WRITING 31 with a grade of C or better. HUMAN 1C with a grade of C or better. HUMAN H1C with a grade of C or better

Same as IN4MATX 171.

Restriction: Upper-division students only. Satisfactory completion of the Lower-Division Writing requirement.

**PUBHLTH 106. Project in Health Informatics. 4 Units.**

Students undertake significant quarter-long projects related to health informatics. Topics may include field evaluations of health care technologies, prototypes, iterative design, and system implementations.

Prerequisite: PUBHLTH 105 or IN4MATX 171

Same as IN4MATX 172.

**PUBHLTH 107. Epidemiology of Drug Use and Misuse. 4 Units.**

Applies epidemiologic concepts to the use and misuse of licit/illicit substances. Emphasizes descriptive aspects of drug use and determinants of progressing from experimental use to misuse. Assesses subgroups of abusers, risk factors, trends, and surveillance techniques for estimating drug prevalence.

Prerequisite: PUBHLTH 101

Restriction: Upper-division students only. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 115. Community, Social Justice, and Health Equity Research for Action. 4 Units.**

Focuses on community as a unit of identity, community, well-being, and social justice perspectives and initiatives to promote community health. Addresses community change and improvements in community well-being, with a focus on health equity research for action.

Prerequisite: PUBHLTH 1 or PUBHLTH 2 or CHC/LAT 61 or CHC/LAT 62 or CHC/LAT 63

Same as CHC/LAT 152B.

**PUBHLTH 119. Special Topics in Epidemiology and Genetics. 4 Units.**

Studies in selected areas of epidemiology and genetics. Topics addressed vary each quarter.

Prerequisite: PUBHLTH 1

Repeatability: Unlimited as topics vary.

**PUBHLTH 120. Nutrition and Global Health. 4 Units.**

Global issues related to nutrition and public health. Evaluation of nutritional risk factors associated with the development of chronic diseases and the role of nutritional medicine in prevention. Topics include food safety, communicable diseases, supplements, and regulatory issues.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 121. Introduction to Complementary and Alternative Medicine. 4 Units.**

Examines health and disease in contemporary American culture/society with definitions, models, and practices of what has come to be known as 'orthodox' or 'conventional' medicine. Selected 'alternative' or 'complementary' modes of promoting health and well-being including homeopathy, herbology, and chiropractic.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 122. Health Policy. 4 Units.**

Considers social and economic aspects of health and disease in the United States. What are the proper roles of the individual, community, and government in improving health and health care? International comparisons will be made wherever possible.

Same as UPPP 170.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**PUBHLTH 125. Foundations of Community Health. 4 Units.**

A social ecological framework for understanding community health is presented. Measures of individual and community health are compared, and the influence of personal and environmental factors on individual, group, and population health is examined. Community health promotion strategies are discussed.

Same as UPPP 112.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**PUBHLTH 126. Public Health Law: Fundamentals in Action. 4 Units.**

Addresses the relationship of U.S. public health law to health systems at the individual and population levels. Examines legislative and judicial concepts and how they are applied to disease prevention strategies, health services, management, and policy.

**PUBHLTH 127. Public Health Programs for the Corporate World. 4 Units.**

International perspective on workplace health promotion. Strategies for developing programs to improve employee health and to decrease risks of chronic degenerative diseases. Case studies include assessment of employee health, program design, implementation, and evaluation. Emphasis on disease prevention.

**PUBHLTH 129. Public Health Administration. 4 Units.**

Examines historical aspects of public health administration including policies, procedures, trends, and development of organizations. Addresses information and skills necessary to succeed in public health leadership roles. Discusses strategic planning, collaborations, and ethical considerations for successful management in public health.

Prerequisite: PUBHLTH 1

Restriction: Upper-division students only. Public Health Policy Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment.

**PUBHLTH 132. American Public Policy. 4 Units.**

Focuses on the development and implementation of public policy in the United States. Lectures cover theoretical models of the policy process as well as significant problems facing contemporary American decision-makers.

Same as POL SCI 121G, SOC SCI 152C, UPPP 129.

**PUBHLTH 135. Medical Sociology. 4 Units.**

Current problems in U.S. health-care system and proposals for reform. Examines financial barriers to access; problem of patient dumping; underinsurance; prenatal and perinatal care; child services; preventative care and needs of the elderly; minorities; low-income people; undocumented.

Same as SOCIOL 154.

Restriction: Upper-division students only. Sociology Majors have first consideration for enrollment.

**PUBHLTH 138. Tobacco Control Policy. 4 Units.**

Examines the challenges that governments encounter in regulating the marketing, sales and acquisition, and use of tobacco products. Students assess the supply and demand for tobacco from the perspectives of the industry and consumer.

Restriction: Public Health Majors only. Public Health Sciences Majors only. Public Health Policy Majors only.

**PUBHLTH 139. Special Topics in Health Policy and Administration. 4 Units.**

Studies in selected areas of health policy and administration. Topics addressed vary each quarter.

Prerequisite: PUBHLTH 1

Repeatability: Unlimited as topics vary.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 141. Clinical Health Psychology. 4 Units.**

Behavioral role in etiology, treatment, and prevention of certain diseases. Behavioral intervention including biofeedback, stress-, pain-management, health habit counseling, and other skills to assist patients make cognitive, emotional, and behavioral changes needed to cope with disease or achieve better health.

Prerequisite: PSCI 9 or PSCI 11C or PSYCH 7A or PSYCH 9C

Same as PSCI 141H.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PUBHLTH 144. Health Behavior Theory. 4 Units.**

Introduces theoretical perspectives from the social sciences to understand health behavior from the vantage point of individuals, their interpersonal contacts, communities, and ecological contexts. Application of theory to public health problems is a central focus.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 146. Health Promotion Programs. 4 Units.**

Examines ecological perspectives of health promotion programs and risk factors related to mortality/morbidity. Analyzes effectiveness of health promotion strategies and issues in the existing healthcare systems in light of sociocultural beliefs and economical/political conditions.

Prerequisite: PUBHLTH 1

Restriction: Upper-division students only. Public Health Policy Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment.

**PUBHLTH 147. Drug Abuse and Its Prevention. 4 Units.**

Theoretical and practical underpinnings of drug abuse and its prevention at the individual and population levels. Students practice developing drug abuse prevention schemes for specific populations. Recent developments in pharmacological and biobehavioral theories of drug dependence are explored.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 148. Public Health Communication. 4 Units.**

Theoretical underpinnings and practical applications of communication sciences in public health practice. Techniques of effective communication, including fear appeal and deterrence; social marketing; public-private partnerships; health service delivery; and outreach in rural and urban settings, and for international health strategies.

Prerequisite: PUBHLTH 1 and PUBHLTH 2

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 150. Public Health and Wellness. 4 Units.**

Presents information about wellness from both science and policy perspectives in order to demonstrate the role of wellness in public health. Emphasizes the conditions that create wellness in the individual, the community, the nation, and the world.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 151. Environmental Psychology. 4 Units.**

Impact of the physical environment on individual and group behaviour. Three basic concerns examined: (a) environmental determinants of behaviour at the individual and interpersonal level; (b) social planning and urban design; (c) methodological approaches to the study of environmental issues.

Prerequisite: ENVIRON E8 and (SOCECOL 10 or PP&D 4)

**PUBHLTH 159. Special Topics in Social and Behavioral Health Science. 4 Units.**

Studies in selected areas of social and behavioral health sciences. Topics addressed vary each quarter.

Prerequisite: PUBHLTH 1

Repeatability: Unlimited as topics vary.

**PUBHLTH 161. Environmental Geology. 4 Units.**

Introduction to geologic principles and applications to environmental problems. Topics include: tectonic processes, earth materials, soils, river processes, groundwater, the coastal environment, slope failures, seismic hazards, mineral resources, and land-use evaluation based on geologic conditions. Examples from case studies.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 163. Introduction to Environmental Health Science. 4 Units.**

Focuses on processes of exposure to environmental toxins/agents and their impact to human health and the environment. Media transport, exposure assessment, susceptibility, behavior, and health effect of several toxins are discussed.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 167. Air Pollution, Climate, and Health. 4 Units.**

Introduction to how air pollutants are emitted into the atmosphere, how people are most exposed to air pollutants in developed and developing areas, physical and meteorological processes that affect transport, and the influence of air pollutants on global warming.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 168. Nuclear Environments. 4 Units.**

Understanding the impact of the nuclear age on the environment and human health through interrelated developments of nuclear power and nuclear weapons. The early years of weapon development, catastrophic environmental pollution, perils of nuclear power in the U.S. and Russia.

Same as INTL ST 122, SOCECOL E127.

**(VIII)****PUBHLTH 170. Introduction to Global Health. 4 Units.**

Provides a foundational interdisciplinary understanding of global health issues and their importance to various societal goals, including poverty reduction, economic productivity, and peace promotion. Covers major communicable and non-communicable diseases and demographic patterns of disease burden.

Prerequisite: PUBHLTH 1

**(VIII)****PUBHLTH 171. Human Exposure to Environmental Contaminants. 4 Units.**

Introduces origins of human's realization that chemicals in the environment may adversely affect health. Introduces the theory and principles of exposure assessment. Covers estimation of exposure, variability of measures, the way exposure assessment is incorporated into the risk-assessment paradigm.

**PUBHLTH 172. Climate Change and Disaster Management. 4 Units.**

Examines the social, economic, environmental, and health impacts of anthropogenic climate change through engaged learning that integrates practice and theory.

**PUBHLTH 173. Health and Global Environmental Change . 4 Units.**

Overview of scientific underpinnings of global environmental change and human health consequences. Provides an understanding of the fundamental dependency of human health on global environmental integrity. Encourages disciplinary cross-fertilization through interaction of students in environmental, health, and policy sciences.

Prerequisite: One upper-division course in environmental science, public health, environmental policy, and/or environmental management.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 174. Global Health Ethics. 4 Units.**

Provides a foundation for understanding and application of key issues.

**(VIII)**

**PUBHLTH 176. War and Public Health. 4 Units.**

Explores how war impacts public health both globally and domestically in the United States. Focus on the link between war and the burden that it ultimately places on physical, mental, environmental, and societal health as well as on health systems.

**PUBHLTH 179. Special Topics in Environmental and Global Health Science. 4 Units.**

Studies in selected areas of environmental and global health sciences. Topics addressed vary each quarter.

Prerequisite: PUBHLTH 1

Repeatability: Unlimited as topics vary.

**PUBHLTH 180. Epidemiology of Infectious Disease. 4 Units.**

Examines the distribution of infectious disease and the health and disease risk among human populations. Introduces basic methods for infectious disease epidemiology. Case studies of important diseases, including HIV and malaria, are conducted.

Prerequisite: PUBHLTH 1

**PUBHLTH 181. Infectious Disease Dynamics. 4 Units.**

Learn how the immune system interacts with infectious diseases, in particular with viral infections. An introduction to basic virology and immunology, it concentrates on the way in which the immune system is critical to the prevention of infections.

Same as BIO SCI E124.

**PUBHLTH 182. Evolutionary and Ecological Principles in Medicine. 4 Units.**

Explore the dynamics of populations on an ecological, epidemiological, and medical level. Considers the dynamics of competition, predation, and parasitism; the spread and control of infectious diseases; and the in vivo dynamics of viral infections and the immune system.

Prerequisite: BIO SCI 93

Same as BIO SCI E151.

Concurrent with ECO EVO 251.

**PUBHLTH 189. Special Topics in Infectious Diseases. 4 Units.**

Studies in selected areas of infectious diseases. Topics addressed vary each quarter.

Prerequisite: PUBHLTH 1

Repeatability: Unlimited as topics vary.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 190. Geographic Information Systems for Public Health. 4 Units.**

Provides a broad introduction to the use of Geographic Information Systems software to carry out projects for visualizing and analyzing spatial data to address significant issues of health care and policy-planning.

Concurrent with PUBHLTH 283.

**PUBHLTH 191A. Seminar: Advances and Challenges in Public Health. 2 Units.**

Forum for exploring recent advances and challenges in all disciplines of public health research and practice. Features case studies exemplifying the integration of core competencies with cross-cutting interdisciplinary themes of public health.

Grading Option: Pass/no pass only.

Concurrent with PUBHLTH 291A.

**PUBHLTH 191B. Seminar: Advances and Challenges in Public Health. 2 Units.**

Forum for exploring recent advances and challenges in all disciplines of public health research and practice. Features case studies exemplifying the integration of core competencies with cross-cutting interdisciplinary themes of public health.

Grading Option: Pass/no pass only.

Concurrent with PUBHLTH 291B.

**PUBHLTH 191C. Seminar: Advances and Challenges in Public Health. 2 Units.**

Forum for exploring recent advances and challenges in all disciplines of public health research and practice. Features case studies exemplifying the integration of core competencies with cross-cutting interdisciplinary themes of public health.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

Concurrent with PUBHLTH 291C.

**PUBHLTH H192A. Public Health Honors Seminar and Thesis I. 4 Units.**

Provides an opportunity for selected students to pursue advanced work in research and earn Public Health Honors. Students will conduct their honors research project with faculty through lectures, guest speakers, creating timelines and assignments.

Corequisite: PUBHLTH 199

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Public Health Policy Majors only. Public Health Sciences Majors only.

**PUBHLTH H192B. Public Health Honors Seminar and Thesis II. 4 Units.**

Students initiate and complete data collection for the honors thesis. In addition, students begin data analysis and summarize results at a class symposium at the end of the quarter. A faculty mentor provides supervision and feedback on thesis chapters.

Corequisite: PUBHLTH 199

Prerequisite: PUBHLTH H192A

Grading Option: Pass/no pass only.

Restriction: Public Health Policy Majors only. Public Health Sciences Majors only.

**PUBHLTH H192C. Public Health Honors Seminar and Thesis III. 4 Units.**

Students write their honors research project (PUBHLTH H192A-PUBHLTH H192B) and prepare an oral report to be presented at a class symposium at the end of the quarter. A faculty mentor provides supervision and feedback on thesis chapters.

Corequisite: PUBHLTH 199

Prerequisite: PUBHLTH H192B

Restriction: Public Health Policy Majors only. Public Health Sciences Majors only.

**PUBHLTH 193. Ethics and Responsible Conduct of Research in Public Health. 4 Units.**

Issues of scientific integrity and satisfies the requirements for training in public health ethics. Includes guidelines for responsible conduct of research, federal and international codes, administrative review and approval, conflict of interest, and privacy and safety of research participants. Course may be offered online.

Restriction: Upper-division students only. Public Health Sciences Majors only. Public Health Policy Majors only.

**PUBHLTH 194A. Clinical and Translational Research Preparatory I. 4 Units.**

Provides training for students with an interest in clinical and translational research in the health care setting. Cultivates skills for study design, research literature review, ethics, responsible conduct of research, and cultural competence while emphasizing professionalism and personal responsibility.

Prerequisite: BIO SCI 99 and BIO SCI 194S and CHEM 1C and CHEM 1LC and CHEM 1LD. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only.

**PUBHLTH 194B. Clinical and Translational Research Preparatory II. 1-4 Units.**

Provides opportunities for students to participate in clinical and translational research through rotations in at least two health care settings. Builds on preparation through the first course (194A) in the sequence to support exploration of various research topics.

Prerequisite: PUBHLTH 194A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only.

**PUBHLTH 194C. Clinical and Translational Research Preparatory III. 4 Units.**

Provides opportunities for students to work closely in a particular clinical and translational research setting. Builds on preparation through the didactic instruction presented in first course of the sequence (194A) to support deeper engagement on a particular research topic.

Prerequisite: PUBHLTH 194B. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**PUBHLTH 194D. Clinical and Translational Research Preparatory IV. 4 Units.**

Provides opportunities for students to participate in clinical and translational research through placement in a research laboratory. This course is a continuation of 194C in which students have the opportunity to participate in a permanent research rotation.

Prerequisite: PUBHLTH 194C

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**PUBHLTH 195W. Public Health Practicum and Culminating Experience. 8 Units.**

Provides direct opportunities for Public Health majors to observe and participate in public health activities and/or research; and to cultivate skills for verbal and written communication of contemporary public health topics for an integrative culminating experience.

Prerequisite: PUBHLTH 1 and PUBHLTH 2. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Public Health Sciences Majors only. Public Health Policy Majors only.

**(Ib)****PUBHLTH 196A. Clinical and Translational Research Preparatory I - Community-Based Research and Evaluation. 4 Units.**

Provides training for students with an interest in clinical and translational research in a community-based setting. Cultivates skills for study design, research literature review, ethics, responsible conduct of research, and cultural competence while emphasizing professionalism and personal responsibility.

Overlaps with PUBHLTH 194A.

**PUBHLTH 196B. Clinical and Translational Research Preparatory II - Community-Based Research and Evaluation. 4 Units.**

Provides the unique opportunity for students to participate in research in two or more community-based settings. Builds on preparation through PUBHLTH 196A to support exploration of various research topics.

Prerequisite: PUBHLTH 196A

**PUBHLTH 196C. Clinical and Translational Research Preparatory III - Community-Based Research and Evaluation III. 4 Units.**

Final course in the 196 series where students have the unique opportunity to participate in permanent research rotation. Instructs students how to design, perform, interpret, and discuss independent research in a collaborative atmosphere.

Prerequisite: PUBHLTH 196B

**PUBHLTH 197. Field Studies in Public Health. 2-12 Units.**

For students who may either accompany faculty members on field trips or engage in post-practicum work at a field agency.

Prerequisite: PUBHLTH 1 and PUBHLTH 2

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 12 units.

**PUBHLTH 198. Directed Studies. 1-4 Units.**

Student participation in a series of research-related activities performed in an individual or small-group setting under the guidance of a faculty advisor.

Prerequisite: PUBHLTH 1

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**PUBHLTH 199. Undergraduate Research. 1-4 Units.**

Original research with Public Health faculty. Attendance at regular research group meetings is also generally expected, and a quarterly written report is required. Strongly recommended for students considering research careers and/or graduate degree programs.

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**PUBHLTH 200. Foundations of Public Health. 4 Units.**

Presents the overarching framework, principles, and core responsibilities of public health research and practice from a multidisciplinary perspective. Provides necessary foundation for further studies toward advanced cross-cutting approaches essential for public health practice.

Restriction: College of Health Sciences students only. Program in Public Health students only. Master of Public Health Degree students only. Graduate students only. Public Health Majors only.

**PUBHLTH 204. Biostatistics I: Introduction to Statistical Methods. 4 Units.**

Designed to help students develop an appreciation for statistician's view of the research process, emphasizing biomedical research. Instills an understanding of how statistical models are used to yield insights about data that form evidence-based understanding of the world around us.

Same as EPIDEM 204A.

Restriction: Graduate students only.

**PUBHLTH 204B. Biostatistics II: Intermediate Statistical Methods. 4 Units.**

Intended for graduate students in epidemiology, public health, and clinical research fields. Covers common regression-modeling techniques frequently used in biologic and medical applications.

Prerequisite: EPIDEM 204. EPIDEM 204 with a grade of B or better

Repeatability: May be taken for credit 2 times.

Same as EPIDEM 204B.

Restriction: Graduate students only.

**PUBHLTH 204C. Biostatistics III: Advanced Statistical Methods. 4 Units.**

Intended for graduate students in epidemiology, public health, and related fields. Introduces statistical methods for analyzing survival and longitudinal/clustered data, and techniques to resolve missing data.

Prerequisite: EPIDEM 204B. EPIDEM 204B with a grade of B or better

Repeatability: May be taken for credit 2 times.

Same as EPIDEM 204C.

Restriction: Graduate students only.

**PUBHLTH 206A. Principles of Epidemiology. 4 Units.**

Fundamental principles of epidemiology, biostatistics, and epidemiological research. Topics include research methods of measuring health problems in populations, disease control and prevention in populations, how epidemiology contributes to knowledge of disease etiology, and biostatistical analysis and interpretation of epidemiologic data.

Same as EPIDEM 200A.

Restriction: Graduate students only.

**PUBHLTH 206B. Intermediate Epidemiology. 4 Units.**

Learn to design and conduct epidemiologic studies using common designs. Determine why bias and measurement error arise in observational studies, and how they influence effect estimates. Perform and interpret epidemiologic data analyses using statistical software.

Prerequisite: PUBHLTH 206A. PUBHLTH 206A with a grade of B or better

Same as EPIDEM 200B.

Restriction: College of Health Sciences students only. Program in Public Health students only. Master of Public Health Degree students only. Graduate students only. Epidemiology Majors only.

**PUBHLTH 206C. Advanced Epidemiologic Methods. 4 Units.**

Advanced topics in the design and statistical analysis of epidemiologic studies. Topics include simulation methods, counter-matching and multiphase study designs, missing data, and Bayesian analysis. Published simulation studies are discussed and replicated using the R software package.

Prerequisite: EPIDEM 200A and EPIDEM 200B. EPIDEM 200A with a grade of B or better. EPIDEM 200B with a grade of B or better

Same as EPIDEM 200C.

**PUBHLTH 207A. Probability and Statistics in Public Health. 4 Units.**

An introduction to probability and statistical methods, using examples in public health. Topics include descriptive statistics, laws of probability, discrete and continuous probability distributions, estimation, confidence intervals, hypothesis testing, and power calculations for one- and two-sample comparisons.

Prerequisite: PUBHLTH 206A. PUBHLTH 206A with a grade of B or better

Restriction: Program in Public Health students only. Master of Public Health Degree students only. Graduate students only. Public Health Majors only.

**PUBHLTH 207B. Analysis of Public Health Data Using Statistical Software. 4 Units.**

Overview of common statistical methods in public health and how to implement them in R. Topics include linear regression, ANOVA, the Kruskal-Wallis test, logistic regression, missing data and censoring, Kaplan-Meier survival curves, log-rank tests, and Cox regression.

Prerequisite: PUBHLTH 207A. PUBHLTH 207A with a grade of B or better

Restriction: Program in Public Health students only. Master of Public Health Degree students only. Graduate students only. Public Health Majors only.

**PUBHLTH 208. Advances in Social Epidemiology. 4 Units.**

Advances understanding of social distribution and social determinants of disease through multiple risk factor models and mechanisms that emphasize developmental and socio-environmental risk factors on mental and physical health across the life span.

Restriction: Graduate students only.

**PUBHLTH 209. Methods of Demographic Analysis. 4 Units.**

Introduces basic demographic methods used in social science and public health research. Topics include sources and limitations of demographic data; components of population growth; measures of nuptiality, fertility, mortality, and population mobility projection methods; and demographic models.

Same as SOCIOL 226A.

Restriction: Graduate students only.

**PUBHLTH 210. Theory-Driven Secondary Data Analysis. 4 Units.**

Learn how to develop and test theoretically-driven research questions in secondary data sources. Logic of theory building and testing, how to conduct statistical analyses on testable research questions, and interpret results. There is also a lab component.

Restriction: Graduate students only. Environmental Health Sciences Majors only. Epidemiology Majors only. Public Health Majors only.

**PUBHLTH 211A. Latinos/Latinas and Medical Care: Contemporary Issues. 2 Units.**

Introduction to medical anthropological and social science perspectives on Latinos/Latinas in relation to a number of health and medically-related issues, i.e., immigration, gender, reproduction, culture, social structure, political economy, sexuality, utilization of medical services, and health beliefs.

Same as CHC/LAT 211A.

**PUBHLTH 211B. Latinos/Latinas and Medical Care: Contemporary Issues. 2 Units.**

Introduction to medical anthropological and social science perspectives on Latinos/Latinas in relation to a number of health and medically-related issues, i.e., immigration, gender, reproduction, culture, social structure, political economy, sexuality, utilization of medical services, and health beliefs.

Prerequisite: CHC/LAT 211A

Same as CHC/LAT 211B.

**PUBHLTH 213. Epidemiology in Global Health. 4 Units.**

Examines major topics in epidemiology and global health. Research topics within these two disciplines are focused on resource-poor communities, with an application to the global world.

Restriction: Graduate students only. Environmental Health Sciences Majors only. Epidemiology Majors only. Public Health Majors only.

**PUBHLTH 214. Surveillance Systems. 4 Units.**

Surveillance as a fundamental element of the practice of public health is examined in terms of the application and evaluation of monitoring systems. Topics include surveillance of infectious and chronic diseases, environmental constituents, and other indicators of population health.

Prerequisite: PUBH 206

Restriction: Graduate students only.

**PUBHLTH 219. Special Topics in Biostatistics, Epidemiology, and Health Informatics. 4 Units.**

Current research in biostatistics, epidemiology, and health informatics. Topics vary from quarter to quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PUBHLTH 222. Health Policy and Management. 4 Units.**

Multidisciplinary inquiry into theory and practice concerned with delivery, quantity, costs of health care for individuals and populations. Explores managerial and policy concerns regarding structure, process, outcomes of health services including the costs, financing, organization, outcomes, and accessibility of care.

Same as UPPP 243.

Restriction: Master of Public Health Degree students have first consideration for enrollment. Master of Public Policy Degree students have first consideration for enrollment. Graduate students only. Public Health Majors have first consideration for enrollment. Urban and Regional Planning Majors have first consideration for enrollment.

**PUBHLTH 223. Risk Communication. 4 Units.**

Examines theory and research related to the communication of scientific information in risk communication contexts, risk perceptions, and behavior as related to decision-making under risk.

Restriction: Graduate students only.

**PUBHLTH 239. Special Topics in Health Policy and Management. 4 Units.**

Current research in health policy and management. Topics vary from quarter to quarter.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PUBHLTH 241. Environmental Policy and Global Sustainability. 4 Units.**

Organized around four transcendent questions: does the world value sustainability, what challenges must be met to move toward it, what are the roots of inequality, and is capitalism compatible with sustainability.

Restriction: Graduate students only.

**PUBHLTH 242. Theories of Health Communication. 4 Units.**

Explores the concepts, constructs, and theories of communication in health and risk contexts. Examines interpersonal, family, organizational, and mediated communicative processes about health care and conditions from a global perspective.

Restriction: Graduate students only.

**PUBHLTH 244. Health Behavior Theory. 4 Units.**

Introduces the field of Health Behavior and segues into major theoretical perspectives. Focus on health behavior change from the vantage point of individual health behavior and theoretical abstraction. Explores how to relate theory to behavior-change intervention programs.

Restriction: Master of Public Health Degree students only. Graduate students only. Public Health Majors only.

**PUBHLTH 245. Health Promotion Planning. 4 Units.**

Introduces strategic planning integral to intervention planning in public health practice and research, emphasizing the fundamental domains of social and behavioral health science and practices. Students develop an intervention plan for a specific health problem, health behavior, and target population.

Restriction: Graduate students only.

**PUBHLTH 246. Social Research Methods. 4 Units.**

An interactive graduate seminar covering topics related to the research process and study design. Begins with conceptualizing research questions, hypotheses, and then turns to topics in measurement and concludes with experimental, quasi-experimental, and observational study designs.

Restriction: Graduate students only.

**PUBHLTH 247. Program Evaluation. 4 Units.**

Introduces methods, tools, and procedures for systematic investigation of the effectiveness of programs in health and social services for disease intervention, prevention, and health promotion. Includes development of program evaluation plans, logic models, contextual frameworks, study designs, and data analyses.

Restriction: Graduate students only.

**PUBHLTH 248. Fundamentals of Maternal and Child Health - Programs, Problems, and Policy. 4 Units.**

Overview of issues facing women, children, and families from a public health perspective. Discusses role of socio-economic, political, biological, environmental factors on population health. Studies historical foundations and current factors impacting Maternal Child Health programs and legislation in the US.

Restriction: Graduate students only.

**PUBHLTH 250. Health Status and Care Disparities. 4 Units.**

Expert health care providers present viewpoints and interdisciplinary strategies for addressing sociocultural, economic, gender, age, and other disparities in population health status and care provision.

Restriction: Graduate students only.

**PUBHLTH 251. Models of Practice and Intervention at the Community Level. 4 Units.**

Examines and critiques current models, frameworks, theories for.

Prerequisite: CHC/LAT 200A or PUBHLTH 246

Same as CHC/LAT 251.

Restriction: Graduate students only.

**PUBHLTH 259. Special Topics in Social and Behavioral Health Sciences. 4 Units.**

Current research in Social and Behavioral Health Sciences. Topics vary from quarter to quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PUBHLTH 260. Human Exposure Modeling. 4 Units.**

Explores the basic principles and methods in estimating human exposure to environmental pollutants. Topics include source emissions, spatial/temporal aspects of human exposures, air pollution exposure modeling, time-activity patterns, micro-environmental exposure assessment, the uncertainty/variability analysis.

Restriction: Graduate students only.

**PUBHLTH 264. Introduction to Environmental Health Science. 4 Units.**

Convergence of agents (chemical, physical, biological, or psychosocial) in environment can emerge as diseases influenced by social, political, and economic factors, allowing them to become rooted in society. How these agents from various spheres come together and impact human health.

Same as EPIDEM 264, EHS 264.

Restriction: Graduate students only. Environmental Health Sciences Majors only. Epidemiology Majors only. Public Health Majors only. Environ Health Sci and Policy Majors only.

**PUBHLTH 265. Advanced Environmental Health Science. 4 Units.**

Explores the complex relationships among exposure processes and adverse health effects of environmental toxins focusing on specific chemicals, sources, transport media, exposure pathways, and human behaviors. Techniques of environmental sampling for exposure assessment are discussed.

Same as EPIDEM 265.

Restriction: Graduate students only.

**PUBHLTH 269. Air Pollution, Climate, and Health. 4 Units.**

Emission of air pollutants into the atmosphere, physical and meteorological processes that affect transport, and influence on global warming. Concepts of how and where people are most exposed, and how exposures and health effects differ in developed and developing regions.

Same as EPIDEM 269, EHS 269.

**PUBHLTH 270. Human Exposure to Environmental Contaminants. 4 Units.**

Introduces founders of conceptual thought that environmental contaminants can impact health. Theory and principles of exposure assessment, the continuum from emissions of a contaminant into the environment to evidence of health effects in a population.

Same as EPIDEM 270, EHS 270.

**PUBHLTH 272. Occupational Health Psychology. 4 Units.**

Introduction to psychological and social factors in the workplace that affect health and productivity. Goal is to support redesign of the workplace and social situations that can reduce stress-related illness risks, and increase humane forms of productivity and competence development.

Same as EHS 294.

Restriction: Graduate students only.

**PUBHLTH 275. Environmental Modeling and Risk Management. 4 Units.**

Surveys the general principles, basic mathematical methods, and practices of environmental modeling and human health risk assessment. Topics include advection-dispersion models, risk management, and risk perception. Students conduct an original risk assessment as a final group project.

Prerequisite: MATH 2A and STATS 7

Same as EHS 275.

Restriction: Graduate students only.

Concurrent with PUBHLTH 175.

**PUBHLTH 277A. Target Organ Toxicology I. 4 Units.**

Mechanistic analysis of responses occurring in various organ systems of experimental animals and humans exposed to environmental and occupational chemicals and radiation. Review distinctive cellular and tissue structure and physiological function of the various organ systems.

Same as EHS 206A.

Restriction: Graduate students only.

**PUBHLTH 277B. Target Organ Toxicology II. 4 Units.**

Mechanistic analysis of responses occurring in various organ systems of experimental animals and humans exposed to environmental and occupational chemicals and radiation. Review of distinctive cellular and tissue structure and physiological function of the various organ systems.

Prerequisite: PUBHLTH 277A or EHS 206A

Same as EHS 206B.

Restriction: Graduate students only.

**PUBHLTH 278. Industrial Toxicology. 4 Units.**

Analysis of responsibilities toxicologists have in industry, including product safety, generating material safety, data sheets, animal testing, ecotoxicological testing, risk/hazard communication, and assisting industrial hygienists and occupational physicians; emphasis on interdisciplinary nature of industrial toxicology and communication skills.

Prerequisite: PUBHLTH 277B or EHS 206B

Same as EHS 220.

**PUBHLTH 279. Special Topics in Environmental & Occupational Health. 4 Units.**

Current research in environmental and occupational health. Topics vary from quarter to quarter.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PUBHLTH 280. Global Burden of Disease. 4 Units.**

Introduces composite measures of disease burden, including Disability Adjusted Life Years and their use in prioritizing disease burden at local, regional, and global levels. Focuses on WHO's landmark assessments and introduces DISMOD software for specific analyses.

Restriction: Graduate students only.

**PUBHLTH 281. Infectious Disease Epidemiology. 4 Units.**

Geographical distribution of infectious diseases and the health and disease risk in diverse human populations. Introduces basic methods for infectious disease epidemiology and case studies of important diseases. Includes surveillance, outbreak investigation, emerging pathogens, traditional and molecular epidemiology.

Restriction: Graduate students only.

**PUBHLTH 282. Climate Change and Global Health. 4 Units.**

Designed for students to examine major topics in climate change and global health. Draws heavily on the literature in order to develop an understanding of micro- and macro-level impacts and drivers with regard to climate change and health.

Restriction: Graduate students only. Environmental Health Sciences Majors only. Epidemiology Majors only. Public Health Majors only.

**PUBHLTH 283. Geographic Information Systems for Public Health. 4 Units.**

Provides a broad introduction to the use of Geographic Information Systems software to carry out projects for visualizing and analyzing spatial data to address significant issues of health care and policy-planning.

Prerequisite: PUBH 206

Restriction: Graduate students only.

Concurrent with PUBHLTH 190.

**PUBHLTH 286. Advanced Geographic Information Systems and Spatial Epidemiology. 4 Units.**

Students expand their current knowledge of the ArcGIS software to develop advanced geographic-related research questions, learn how to apply spatial epidemiologic methods to public health data, and integrate their skills in a GIS project of their design.

Prerequisite: PUBHLTH 283

Restriction: Graduate students only.

**PUBHLTH 287. Qualitative Research Methods in Public Health. 4 Units.**

General introduction to qualitative research methods for investigating public health questions at various scales from community level to global populations. Emphasizes systematic approaches to the collection, analysis, interpretation of qualitative data.

Restriction: Graduate students only.

**PUBHLTH 288. Research Proposal Writing in Global Health. 4 Units.**

Overview of financial support for research in global health and disease prevention. Collaborative agreements, guidelines for proposal writing, team building, budgeting, peer-review process, and transitioning from proposal to research project implementation.

Restriction: Graduate students only.

**PUBHLTH 289. Special Topics in Global Health and Disease Prevention. 4 Units.**

Current research in global health and disease prevention. Topics vary from quarter to quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PUBHLTH 290. Special Topics in Public Health. 4 Units.**

Studies in selected areas of public health. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PUBHLTH 291A. Seminar: Advances and Challenges in Public Health. 2 Units.**

Forum for exploring recent advances and challenges in all disciplines of public health research and practice. Features case studies exemplifying the integration of core competencies with cross-cutting interdisciplinary themes of public health.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

Concurrent with PUBHLTH 191A.

**PUBHLTH 291B. Seminar: Advances and Challenges in Public Health. 2 Units.**

Forum for exploring recent advances and challenges in all disciplines of public health research and practice. Features case studies exemplifying the integration of core competencies with cross-cutting interdisciplinary themes of public health.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

Concurrent with PUBHLTH 191B.

**PUBHLTH 291C. Seminar: Advances and Challenges in Public Health. 2 Units.**

Forum for exploring recent advances and challenges in all disciplines of public health research and practice. Features case studies exemplifying the integration of core competencies with cross-cutting interdisciplinary themes of public health.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

Concurrent with PUBHLTH 191C.

**PUBHLTH 292. Ethics and Responsible Conduct of Research in Public Health. 4 Units.**

Issues of scientific integrity and satisfies the requirements for training in public health ethics. Includes guidelines for responsible conduct of research, federal and international codes, administrative review and approval, conflict of interest, and privacy and safety of research participants.

Restriction: Graduate students only.

Concurrent with PUBHLTH 193.

**PUBHLTH 293. Foundations of Clinical and Translational Science. 4 Units.**

Introduces rationale and imperative for clinical translational science and various approaches being developed to speed-up discoveries and their transformation into health care practices. Compares and contrasts current impediments to clinical research with the potential and transformative power of translational science.

Restriction: Graduate students only.

**PUBHLTH 294. Research Communication in Public Health. 4 Units.**

Strategies for effective writing and oral presentation of research characteristics and results to various audiences. Includes exercises in writing for the public, for scholarly journals, and at conferences.

Restriction: Graduate students only.

**PUBHLTH 295. Graduate Practicum and Culminating Experience in Public Health. 8 Units.**

Provides opportunities for hands-on experience for graduate students at agencies or organizations engaged in public health practice. Students are matched with placement sites based on academic preparation and students' career goals. The practicum report is integrated into the culminating experience.

Prerequisite: PUBHLTH 200 and PUBHLTH 244 and PUBHLTH 222 and PUBHLTH 264 and PUBHLTH 207A. PUBHLTH 200 with a grade of B or better. PUBHLTH 244 with a grade of B or better. PUBHLTH 222 with a grade of B or better. PUBHLTH 264 with a grade of B or better. PUBHLTH 207A with a grade of B or better

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Public Health Majors only.

**PUBHLTH 296. Doctoral Dissertation Research and Writing. 1-12 Units.**

Dissertation research with Public Health faculty.

Prerequisite: Advancement to candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit for 12 units.

Restriction: Graduate students only. Public Health Majors only.

**PUBHLTH 297. Research Design and Proposal Writing. 4 Units.**

Evaluate strengths of research findings based on methods used by researchers to develop research proposals. Components such as collaborative agreements, guidelines for proposal writing, budgeting, peer-review process, and transitioning from proposal to research project implementation are addressed.

Restriction: College of Health Sciences students only. Program in Public Health students only. Master of Public Health Degree students only. Graduate students only. Public Health Majors only.

**PUBHLTH 298. Directed Studies in Public Health. 2-8 Units.**

Directed study with Public Health faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PUBHLTH 299. Independent Study in Public Health . 2-8 Units.**

Independent research with Public Health faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PUBHLTH 399. University Teaching. 2-4 Units.**

Limited to teaching assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## Public Policy (PUB POL)

### Courses

**PUB POL 215. Statistics and Methods for Public Policy. 4 Units.**

Introductory course with focus on gaining a sound understanding of what constitutes credible evidence in support of policy arguments and management decisions.

Restriction: Graduate students only.

**PUB POL 219. Information and Public Policy. 4 Units.**

Evaluates strengths and weaknesses of qualitative and quantitative methods and the data used in making public policy claims. Looks at the bases of certain widely accepted measures of poverty, growth, environmental quality, and the like.

Repeatability: May be taken for credit 2 times.

Restriction: Public Policy Majors have first consideration for enrollment.

**PUB POL 221. Public Policy . 4 Units.**

Explores different approaches to public policy analysis, the diverse conceptions of the goals and objectives that should be served by policy, and the appropriate role of the policy analyst. Policy consequences are traced to indirect and subtle incentives and disincentives.

Repeatability: May be taken for credit 2 times.

Same as PP&D 221.

Restriction: Public Policy Majors have first consideration for enrollment.

**PUB POL 225. Qualitative Methods . 4 Units.**

Fieldwork, data collections techniques, and related issues for anti-positivistic research. Data collection techniques include observation, physical traces, participation, in-depth interview. Data checks include veracity, detail, completeness, rigor.

Repeatability: May be taken for credit 2 times.

Restriction: Public Policy Majors only.

**PUB POL 227. Economics of Government. 4 Units.**

Prepares students to analyze public policy questions with tools from economics. By the end, students should be able to identify important economic issues in public policy debates and consume and critique economic research on these topics.

Same as ECON 275.

**PUB POL 240. Microeconomics and Public Policy. 4 Units.**

Introduces the fundamental principles of microeconomics that are required for applied policy analysis. Provides students with an intuitive understanding of the microeconomic approach, and familiarizes them with concepts used in applied public policy analysis.

Repeatability: May be taken for credit 2 times.

Same as ECON 255.

Restriction: Graduate students only.

**PUB POL 260. Policy and Ethics . 4 Units.**

Examines the challenge of identifying ethical principles that can guide us in formulating and assessing public policy, the public policy process from an ethical perspective, and the ethics of the individual engaged in the public policy arena.

Restriction: Public Policy Majors only.

**PUB POL 283. Collaborative Governance and Public Management. 4 Units.**

Introduction to inclusive management. To make effective use of public resources, public managers are inventing ways of managing that alter relationships within organizations, between organizations, between sectors, and with the public. Requires rethinking fundamentals such as leadership and motivation.

Same as UPPP 283.

Restriction: Public Policy Majors have first consideration for enrollment.

## Radiological Sciences (RAD SCI)

## Radiology (RADIO)

# Religious Studies (REL STD)

## Courses

### REL STD 5A. World Religions I. 4 Units.

An introduction to the history, doctrine, culture, and writing of Judaism, Christianity, and Islam.

Same as HISTORY 16A.

(IV and VIII ).

### REL STD 5B. World Religions II. 4 Units.

An introduction to various religious traditions in selected areas of the world—including India and South Asia, East Asia, Africa, and the Americas.

Same as HISTORY 16B.

(IV and VIII ).

### REL STD 5C. Religious Dialogue. 4 Units.

Lectures and discussion on controversial topics in religion: sexual morality; religious violence; science; treatment of women and girls; religious truth, American Constitutional matters; secularization; the future of religion, and other topics.

Same as HISTORY 16C.

(IV, VIII)

### REL STD 17. An Economic Approach to Religion. 4 Units.

Introduction to how basic economic concepts such as demand, supply, consumption, production, competition, free-riding, innovation, regulation, and rent-seeking can be applied to understand observed religious behavior.

Same as ECON 17.

(III)

### REL STD 21. Philosophy and Religion. 4 Units.

Examines the intersection of religion and philosophy from a standpoint that does not presuppose previous academic study of either. Both Western and Eastern traditions and perspectives may be explored.

Repeatability: Unlimited as topics vary.

Same as PHILOS 21.

(IV)

### REL STD 61. Gender and Religion. 4 Units.

Introduces the topic of religion in a feminist context by performing cross-cultural exploration of gender, authority, and faith in various traditions. Study includes (but is not limited to) writings of contemporary Jewish, Christian, and Muslim feminists.

Same as GEN&SEX 60C.

(III and VIII ).

### REL STD 90. Aspects of Religion. 4 Units.

A presentation of selected issues in the study of religion.

Repeatability: May be taken for credit 3 times as topics vary.

### REL STD 91. Topics in Aspects of Asian Religions. 4 Units.

A survey course of a specific Asian religious tradition such as Hinduism, Buddhism, Jainism, Sikhism, Daoism, Confucianism, or Shinto in its manifestation in Asia or in its transmission to the Americas.

Repeatability: May be taken for credit 3 times as topics vary.

### REL STD 100. Topics in the Study of Religion. 4 Units.

The intersection of religious belief and practices with selected subjects of continuing interest.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 103. Topics in the Philosophy of Religion. 4 Units.**

Critical examination of philosophical concepts in religious scripture and theology, e.g., the nature and existence of God, miracles, the problem of evil, and divine command theories in ethics. May include any religious tradition.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 106. Topics in Gender and Religion. 4 Units.**

Critical examination of how religious beliefs and practices have shaped (and been shaped by) attitudes toward gender and sexuality in modern and/or premodern society.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 110. Thinking about Religion: Theories and Methodologies. 4 Units.**

A survey and investigation of the major thinkers, theories, and methodologies in the study of religions. Designed to develop the student's ability to analyze and articulate theoretical arguments; includes a paper on relevant Religious Studies topics.

Prerequisite: (REL STD 5A or HISTORY 16A) and (REL STD 5B or HISTORY 16B) and (REL STD 5C or HISTORY 16C)

Overlaps with REL STD 110W.

Restriction: Religious Studies Majors have first consideration for enrollment.

**REL STD 110W. Thinking about Religion: Theories and Methodologies. 4 Units.**

A survey and investigation of the major thinkers, theories, and methodologies in the study of religions. Designed to develop the student's ability to analyze and articulate theoretical arguments in writing; includes a paper on relevant Religious Studies topics.

Prerequisite: (REL STD 5A or HISTORY 16A) and (REL STD 5B or HISTORY 16B) and (REL STD 5C or HISTORY 16C). Satisfactory completion of the Lower-Division Writing requirement.

Overlaps with REL STD 110.

Restriction: Religious Studies Majors have first consideration for enrollment.

**(Ib)****REL STD 115. Religion and World Politics. 4 Units.**

Examines the relationship between religion and world politics historically and today, focusing on connections with peace/war, democracy, human rights, secularism(s), and globalization. Covers major debates, scholarship, concepts, and theories through class exercises, exams, and essays.

Prerequisite: POL SCI 41A or INTL ST 11 or INTL ST 12 or REL STD 5A or REL STD 5B or REL STD 5C

Same as POL SCI 146B, INTL ST 151B.

**REL STD 120. Topics in Asian Religious Traditions. 4 Units.**

Studies involving (but not limited to) Hinduism, Buddhism, Confucianism, Jainism, Sikhism, Daoism, Shinto or Shamanism, including both elite and doctrinal aspects and forms of more popular religiosity.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 122. Ancient India. 4 Units.**

Examines the visual and religious history of the region defined as 'India' today, but necessarily encompassing modern Bangladesh and Pakistan. Culminates with the supposed Golden Age of the Gupta empire and its far-reaching legacies.

Same as HISTORY 170A, ART HIS 155A.

Concurrent with ART HIS 255A.

**REL STD 123. Medieval India. 4 Units.**

Begins with the Gupta period's aesthetic legacies in South Asia's architecture, sculpture, and painting. Explores the dispersal of Islam throughout South Asia, including the Muslim communities of southern India.

Same as HISTORY 170B, ART HIS 155B.

Concurrent with ART HIS 255B.

**REL STD 124. Topics in Modern Indian Religion. 4 Units.**

Topics in religions of the Indian subcontinent including, but not confined to, Hinduism, Jainism, Sikhism, Islam, and Buddhism from the founding of the Mughal Empire in 1526 to the creation of the several modern states of the Indian subcontinent.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 130. Jewish, Islamic, and Middle Eastern Religious Traditions. 4 Units.**

Character and evolution of Egyptian, Jewish, Zoroastrian, Muslim, and other religious communities of the region from their formative periods to the present era.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 130F. Jews and Power. 4 Units.**

Examines the relationship between the Jewish people and political power over a 3500 year period. How have Jews preserved their communal interests and personal safety? How have they defined the proper relationship of the people to political authority.

Same as HISTORY 130F, POL SCI 154J.

**REL STD 131A. History of Zoroastrianism. 4 Units.**

Reviews major trends in the history of Zoroastrianism.

Same as HISTORY 131A.

**REL STD 140. Early Western Religious Traditions. 4 Units.**

Religious perspectives of the Mediterranean and European regions from the earliest times to approximately 1500 C.E.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 141. Recent Western Religious Traditions. 4 Units.**

Studies related to Catholic, Protestant, and Orthodox Christianity as well as alternative belief systems in Europe of the early modern and modern eras.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 150. Religion in the Americas. 4 Units.**

Religious belief and social context in North and South America from the earliest human societies to the present.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 160. Diaspora Religions. 4 Units.**

Examination of what happens to belief and practice as religious communities are scattered geographically.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 170. Topics in Comparative Studies in Religion. 4 Units.**

Literary, historical, or philosophical comparison of selected religious and quasi-religious traditions, their beliefs and practices.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 199. Independent Study. 1-4 Units.**

Directed reading and research in consultation with a faculty member. Substantial written work required.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only.

**REL STD 399. University Teaching . 4 Units.**

Limited to teaching assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

# Reserve Officers' Training Corps (ROTC)

## Courses

### **ROTC 10L. Military Science-Basic Leadership Laboratory. 1 Workload Unit.**

Provides hands-on and practical military science material covered in the corresponding military science courses.

Grading Option: Workload Credit P/NP Only.

Repeatability: May be repeated for credit unlimited times.

### **ROTC 11. Military Science-Personal Development. 1 Workload Unit.**

Focuses on life skills such as physical fitness, nutrition, and time management while providing an introduction to military knowledge, customs, and skills.

Grading Option: Workload Credit Letter Grade with P/NP.

### **ROTC 12. Military Science-Leadership I. 1 Workload Unit.**

Focuses on the fundamentals of leadership, Army leadership values, ethics, and counseling techniques.

Grading Option: Workload Credit Letter Grade with P/NP.

### **ROTC 13. Military Science-Tactical Leadership I. 1 Workload Unit.**

Focuses on leadership at the tactical level and includes instruction in fundamental military skills such as map reading, land navigation, squad and platoon operations, and resource planning techniques.

Grading Option: Workload Credit Letter Grade with P/NP.

### **ROTC 21. Military Science-Team Leadership I. 2 Workload Units.**

Explores the dimensions of creative and innovative tactical leadership strategies and styles by examining team dynamics and two historical leadership theories that form the basis of the Army leadership requirements model.

Grading Option: Workload Credit Letter Grade with P/NP.

### **ROTC 22. Military Science-Team Leadership II. 2 Workload Units.**

Explores team dynamics and two historical leadership theories that form the basis of the Army leadership requirements model.

Grading Option: Workload Credit Letter Grade with P/NP.

### **ROTC 23. Military Science-Tactical Leadership II. 2 Workload Units.**

Examines the challenges of leading tactical teams in the OE. Highlights dimensions of terrain analysis, patrolling, and operation orders.

Grading Option: Workload Credit Letter Grade with P/NP.

### **ROTC 100L. Military Science-Advanced Leadership Laboratory. 1 Workload Unit.**

Provides hands-on and practical exercises for the military science material covered in the corresponding military science courses as well as leader training through practical application of the Leadership Development Program.

Corequisite: ROTC 131 or ROTC 132 or ROTC 133 or ROTC 141 or ROTC 142 or ROTC 143 or ROTC 197.

Grading Option: Workload Credit P/NP Only.

Repeatability: May be repeated for credit unlimited times.

### **ROTC 131. Military Science-Leadership II. 3 Workload Units.**

Challenges cadets to study, practice, and evaluate adaptive leadership skills as they are presented with challenging scenarios related to squad tactical operations. Cadets receive systematic and specified feedback on their leadership attributes and core leader competencies.

Corequisite: ROTC 100L

Prerequisite: ROTC 11 and ROTC 12 and ROTC 13 and ROTC 21 and ROTC 22 and ROTC 23

Grading Option: Workload Credit Letter Grade with P/NP.

**ROTC 132. Military Science-Team Leadership III. 3 Workload Units.**

Provides cadets systematic and specific feedback on their leadership attributes and core leader competencies. Based on such feedback, as well as their own self-evaluations, cadets continue to develop their leadership and critical thinking abilities.

Corequisite: ROTC 100L

Prerequisite: ROTC 11 and ROTC 12 and ROTC 13 and ROTC 21 and ROTC 22 and ROTC 23

Grading Option: Workload Credit Letter Grade with P/NP.

**ROTC 133. Military Science-Tactical Leadership III. 3 Workload Units.**

Uses increasingly intense situational leadership challenges to build cadet awareness and skills in leading small units. Skills in decision-making, persuading, and motivating team members when 'under fire' are explored, evaluated, and developed.

Corequisite: ROTC 100L

Prerequisite: ROTC 11 and ROTC 12 and ROTC 13 and ROTC 21 and ROTC 22 and ROTC 23

Grading Option: Workload Credit Letter Grade with P/NP.

**ROTC 141. Military Science-Leadership III . 3 Workload Units.**

Transitions the focus of student learning from being trained, mentored, and evaluated as a cadet to learning how to train, mentor, and evaluate cadets. Cadets begin to learn the duties and responsibilities of an Army staff officer.

Corequisite: ROTC 100L

Prerequisite: ROTC 131 and ROTC 132 and ROTC 133

Grading Option: Workload Credit Letter Grade with P/NP.

**ROTC 142. Military Science-Leadership IV. 3 Workload Units.**

Requires students to continue to train, mentor, and evaluate underclass cadets. Cadets learn to safely conduct training by understanding and employing the Composite Risk Management Process and the Comprehensive Soldier Fitness (CSF) program.

Corequisite: ROTC 100L

Prerequisite: ROTC 131 and ROTC 132 and ROTC 133 and ROTC 141

Grading Option: Workload Credit Letter Grade with P/NP.

**ROTC 143. Military Science-Officership. 3 Workload Units.**

Explores the dynamics of leading in the complex situations of current military operations in the OE. Cadets examine differences in customs and courtesies, military law, principles of war, and rules of engagement in the face of international terrorism.

Corequisite: ROTC 100L

Prerequisite: ROTC 131 and ROTC 132 and ROTC 133 and ROTC 141 and ROTC 142

**ROTC 151. United States Military History-1607 to 1865. 3 Workload Units.**

Examines the creation of the American military establishment and traces its evolution in the context of the changing nature of warfare, the progression of military professionalism, and social, political, economic, and technological developments through the Civil War.

Grading Option: Workload Credit Letter Grade with P/NP.

**ROTC 152. United States Military History-1865 to 1945. 3 Workload Units.**

Examines the evolution of the American military establishment and the progression of military professionalism in terms of social, political, economic, military, and technological developments from the end of the Civil War through World War II.

Grading Option: Workload Credit Letter Grade with P/NP.

**ROTC 153. United States Military History-1945 to 2001. 3 Workload Units.**

Examines the evolution of the American military establishment and the progression of military professionalism in terms of social, political, economic, military, and technological developments from the Cold War to the War on Terrorism.

Grading Option: Workload Credit Letter Grade with P/NP.

**ROTC 197. Military Science Independent Studies. 2-4 Workload Units.**

Provides intensive, individual study with scheduled meetings to be arranged between Cadre and student. Assigned reading and tangible evidence of mastery of subject matter required.

Grading Option: Workload Credit Letter Grade with P/NP.

Repeatability: May be taken for credit for 12 units.

## Russian (RUSSIAN)

### Courses

**RUSSIAN 1A. Fundamentals of Russian. 5 Units.**

Focuses on reading, comprehension, basic composition, and conversation skills, and gives the student an initial exposure to the Russian cultural scene.

Prerequisite: Placement into RUSSIAN 1A.

**RUSSIAN 1B. Fundamentals of Russian. 5 Units.**

Focuses on reading, comprehension, basic composition, and conversation skills, and gives the student an initial exposure to the Russian cultural scene.

Prerequisite: RUSSIAN 1A. RUSSIAN 1A with a grade of C or better. Placement into RUSSIAN 1B is also accepted.

**RUSSIAN 1C. Fundamentals of Russian. 5 Units.**

Focuses on reading, comprehension, basic composition, and conversation skills, and gives the student an initial exposure to the Russian cultural scene.

Prerequisite: RUSSIAN 1AB or RUSSIAN 1B. RUSSIAN 1AB with a grade of C or better. RUSSIAN 1B with a grade of C or better. Placement into RUSSIAN 1C is also accepted.

### (VI)

**RUSSIAN 2A. Intermediate Russian. 4 Units.**

Students read simple passages from contemporary Russian literary texts and newspapers. Development of oral skills and exposure to Russian culture continue.

Prerequisite: RUSSIAN 1BC or RUSSIAN 1C. RUSSIAN 1BC with a grade of C or better. RUSSIAN 1C with a grade of C or better. Placement into RUSSIAN 2A is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

### (VIII)

**RUSSIAN 2B. Intermediate Russian. 4 Units.**

Students read simple passages from contemporary Russian literary texts and newspapers. Development of oral skills and exposure to Russian culture continue.

Prerequisite: RUSSIAN 2A. RUSSIAN 2A with a grade of C or better. Placement into RUSSIAN 2B is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

### (VIII)

**RUSSIAN 2C. Intermediate Russian. 4 Units.**

Students read simple passages from contemporary Russian literary texts and newspapers. Development of oral skills and exposure to Russian culture continue.

Prerequisite: RUSSIAN 2B. RUSSIAN 2B with a grade of C or better. Placement into RUSSIAN 2C is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

### (VIII)

**RUSSIAN 50. Russian Culture . 4 Units.**

Study of varied topics in Russian culture, area studies, and society, both in the present and in historical perspective.

Repeatability: May be taken for credit 4 times as topics vary.

### (IV, VIII)

**RUSSIAN 99. Special Studies Russian. 1-5 Units.**

Special studies under faculty supervision.

Repeatability: May be taken for credit 2 times.

**RUSSIAN 150. Topics in Russian Literature. 4 Units.**

Examines major themes in Russian literature, film, and other media from the eighteenth to twenty-first centuries. Taught in English.

Repeatability: Unlimited as topics vary.

**RUSSIAN 190. Topics in Russian Language Through Film. 4 Units.**

Uses Russian films of the late 20th century to enhance students' language skills and deepen their cultural knowledge. Work involves intensive conversation, reading and listening comprehension, and the acquisition of written skills and grammatical accuracy. Conducted primarily in Russian.

Prerequisite or corequisite: RUSSIAN 2C

Repeatability: Unlimited as topics vary.

**RUSSIAN 199. Independent Study. 1-4 Units.**

Independent study under direct faculty supervision.

Repeatability: May be taken for credit 2 times.

## Social Ecology (SOCECOL)

### Courses

**SOCECOL 10. Research Design. 4 Units.**

An introduction to the logic behind and methods of designing and conducting research studies in Social Ecology. Topics include how to measure variables of interest, identifying causal relationships, sampling, survey research methods, experiments, quasi-experimental designs, and ethics in research.

Overlaps with EDUC 10.

Restriction: School of Social Ecology students only. Environmental Science and Policy Majors only.

**SOCECOL 13. Statistical Analysis in Social Ecology. 4 Units.**

Introduction to the techniques of statistical analysis in Social Ecology. Topics include probability, statistical inference, significance testing, univariate descriptive statistics, and multivariate analysis from an interdisciplinary perspective.

Overlaps with PSYCH 10A, SOCIOL 10A, SOC SCI 10A, POL SCI 10A, STATS 7, STATS 8.

Restriction: School of Social Ecology students have first consideration for enrollment. Environmental Science and Policy Majors have first consideration for enrollment. No credit for SOCECOL 13 if taken concurrently with or after PSYCH 10A, SOCIOL 10A, POL SCI 10A, SOC SCI 10A, STATS 7, STATS 8, STATS 67, EDUC 15

**(Va)****SOCECOL H20A. Honors: Critical Issues on the Social Sciences. 6 Units.**

Major themes, methods, and works in the social sciences from an interdisciplinary perspective. Each quarter focuses on a different topic. Weekly seminars emphasizing development of critical thinking skills and quantitative analysis through written work are integral to the course.

Same as SOC SCI H1E.

Restriction: Campuswide Honors Collegium students only.

**(III)**

**SOCECOL H20B. Honors: Critical Issues on the Social Sciences. 6 Units.**

Major themes, methods, and works in the social sciences from an interdisciplinary perspective. Each quarter focuses on a different topic. Weekly seminars emphasizing development of critical thinking skills and quantitative analysis through written work are integral to the course.

Prerequisite: SOC SCI H1E or SOCECOL H20A

Same as SOC SCI H1F.

Restriction: Campuswide Honors Collegium students only.

**(III)****SOCECOL H20C. Honors: Critical Issues on the Social Sciences. 6 Units.**

Major themes, methods, and works in the social sciences from an interdisciplinary perspective. Each quarter focuses on a different topic. Weekly seminars emphasizing development of critical thinking skills and quantitative analysis through written work are integral to the course.

Prerequisite: SOC SCI H1F or SOCECOL H20B

Same as SOC SCI H1G.

Restriction: Campuswide Honors Collegium students only.

**(III)****SOCECOL 74A. Moral Development and Just Communities. 4 Units.**

A three-quarter sequence exploring interpersonal, personal, and social issues based on principles of fairness and justice. Both the living environment of a University residence hall and selected institutions of society are analyzed in terms of moral development theory.

Grading Option: Pass/no pass only.

**SOCECOL 74B. Moral Development and Just Communities. 4 Units.**

A three-quarter sequence exploring interpersonal, personal, and social issues based on principles of fairness and justice. Both the living environment of a University residence hall and selected institutions of society are analyzed in terms of moral development theory.

Prerequisite: SOCECOL 74A

Grading Option: Pass/no pass only.

**SOCECOL 74C. Moral Development and Just Communities. 4 Units.**

A three-quarter sequence exploring interpersonal, personal, and social issues based on principles of fairness and justice. Both the living environment of a University residence hall and selected institutions of society are analyzed in terms of moral development theory.

Prerequisite: SOCECOL 74B

Grading Option: Pass/no pass only.

**SOCECOL 100. Special Topics in Social Ecology. 4 Units.**

Special topics courses are offered from time to time. In general they will focus on a topic from interdisciplinary perspectives. Course content varies with the interest of the instructor.

Repeatability: Unlimited as topics vary.

Restriction: School of Social Ecology students only.

**SOCECOL 111W. Advanced Research Methods. 4 Units.**

For students planning to conduct senior research projects or apply to graduate school in social research fields. Topics include reviewing literature, preparing a research proposal, protecting human subjects, citing scholarly work, building measures, estimating sample size, interview and presentation skills.

Prerequisite: SOCECOL 10 and SOCECOL 13. Satisfactory completion of the Lower-Division Writing requirement.

Same as CRM/LAW C169W, PSCI 111W, UPPP 114W.

**(Ib)**

**SOCECOL 118. Domestic Violence. 4 Units.**

General perspectives about domestic violence and theoretical accounts about what causes such behavior.

Same as CRM/LAW C118.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**SOCECOL 119. Violence in Intimate Relationships. 4 Units.**

Responses to various forms of domestic violence, such as intimate partner violence and child abuse. Covers barriers to reporting to the police, and prosecutors and courts. Human services, such as safety planning for victims, treatment programs, and restorative justice approaches.

Corequisite:

Same as CRM/LAW C119.

**SOCECOL E127. Nuclear Environments. 4 Units.**

Understanding the impact of the nuclear age on the environment and human health through interrelated developments of nuclear power and nuclear weapons. The early years of weapon development, catastrophic environmental pollution, perils of nuclear power in the U.S. and Russia.

Same as INTL ST 122, PUBHLTH 168.

**(VIII)****SOCECOL 183A. Global and International Studies Forum. 4 Units.**

A faculty-student forum featuring lectures from a variety of institutions with discussion issues related to Global and International Studies.

Repeatability: May be taken for credit 4 times.

Same as INTL ST 183A, SOC SCI 183A.

**SOCECOL 183B. Seminar in Mediation. 4 Units.**

Students develop mediation skills and refine knowledge in the practice and theory of conflict resolution. Students who complete this course may serve as mediators in the Campus Mediation Program. Course is a prerequisite to completing Indep Study as an intern.

Same as INTL ST 183B, SOC SCI 183B.

Restriction: International Studies Majors have first consideration for enrollment. School of Humanities students have first consideration for enrollment. School of Social Ecology students have first consideration for enrollment. School of Social Sciences students have first consideration for enrollment.

**SOCECOL 183CW. Seminar Conflict Resolution. 4 Units.**

Designed for seniors who are pursuing the minor in Conflict Resolution and/or International Studies major. Provides a forum in which students will refine skills and theory in the study of cooperation and conflict, from local to global arenas.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as SOC SCI 183CW, INTL ST 183CW.

**(Ib)****SOCECOL 186A. Senior Seminar on Global Sustainability I. 2 Units.**

Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum is also required. Seminar utilized to analyze forum presentations. Prepare bibliography.

Same as BIO SCI 191A, EARTHSS 190A.

Restriction: Seniors only. Global Sustainability Minors have first consideration for enrollment.

**SOCECOL 186B. Senior Seminar on Global Sustainability II. 2 Units.**

Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum is also required. Seminar utilized to analyze forum presentations. Prepare research proposal.

Prerequisite: BIO SCI 191A or SOCECOL 186A or EARTHSS 190A

Same as BIO SCI 191B, EARTHSS 190B.

Restriction: Seniors only.

**SOCECOL 186CW. Writing/Senior Seminar on Global Sustainability III. 4 Units.**

Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum also is required. Seminar utilized to analyze Forum presentations and to prepare senior research paper. Prepare/write research paper under direction of faculty member.

Prerequisite: BIO SCI 191B or EARTHSS 190B or SOCECOL 186B. BIO SCI 191B or EARTHSS 190B or SOCECOL 186B. Satisfactory completion of the Lower-Division Writing requirement.

Same as BIO SCI 191CW, EARTHSS 190CW.

Restriction: Seniors only.

**(Ib)**

**SOCECOL 189. Global Service Scholars Advanced Seminar. 4 Units.**

For students who are accepted into the Global Service Scholars Program. Provides advanced training in empathy and compassion, and prepares students for their summer international field experience.

Prerequisite: PSCI 192B

**SOCECOL 190. Applied Statistics in Social and Behavioral Research. 4 Units.**

Covers statistical techniques used to describe and make generalizations about phenomena represented by data. Hands-on experience in data analysis and interpretation using statistical software (SPSS, STATA) is emphasized. Topics include data visualization, ANOVA, multiple regression, and categorical data analyses.

Prerequisite: SOCECOL 13

Same as CRM/LAW C190, PSCI 190, UPPP 190.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**SOCECOL H190A. Honors Research. 4 Units.**

Independent work on an individual research project in addition to participation in a mini proseminar in which faculty discuss their ongoing research. Students prepare a written proposal for a research project.

Restriction: Seniors only.

**SOCECOL H190B. Honors Research. 4 Units.**

Independent work on an individual research project in addition to participation in a mini proseminar in which faculty discuss their ongoing research. Students prepare a written proposal for a research project.

Prerequisite: SOCECOL H190A

Grading Option: Pass/no pass only.

Restriction: Seniors only.

**SOCECOL H190W. Honors Research. 4 Units.**

Students write up their honors research project (H190A-B) and prepare an oral report which is presented at the honors seminar.

Prerequisite: SOCECOL H190B

Restriction: Seniors only.

**(Ib)**

**SOCECOL 194W. Naturalistic Field Research. 4 Units.**

Introduction to alternative models of experiential learning and to various methods of observation, assessment, and evaluation. Introduction to the nature of organizations and ethical issues that emerge from research and intervention in natural settings.

Prerequisite: SOCECOL 10. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: School of Social Ecology students only.

**(Ib)**

**SOCECOL 195. Field Study. 2-8 Units.**

Community engagement to facilitate civic education through field research experience, social intervention, and professionalization. Small group instruction, discussion, writing, and presentations synthesizing students' experiences in the field with theory, paradigms, and ideas learned about in their course work.

Prerequisite: SOCECOL 10

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 12 units.

Restriction: Upper-division students only. School of Social Ecology students only.

**SOCECOL 195A. Advanced Field Study. 4 Units.**

While completing 10 hours of field work per week, students become acquainted with the goals and activities of their placement and will work closely with the placement supervisor and AFS instructor to identify the scope of a research project.

Prerequisite: SOCECOL 10 and SOCECOL 13. Acceptance to Advanced Field Study required.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

Restriction: Upper-division students only. School of Social Ecology students only.

**SOCECOL 195B. Advanced Field Study. 4 Units.**

While completing 10 hours of field work per week, students implement their research project through data collection and observations which allow them to reflect on, apply, and synthesize their academic training through observations and experiences at the placement.

Prerequisite: SOCECOL 195A. Acceptance to Advanced Field Study required.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

Restriction: Upper-division students only. School of Social Ecology students only.

**SOCECOL 195CW. Advanced Field Study. 4 Units.**

While completing 10 hours per week of field work, students write and finalize their AFS Client Project in consultation with the placement and the FS instructor, and make a final written and oral presentation to the placement and invited guests.

Prerequisite: SOCECOL 195B. Acceptance to Advanced Field Study required. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times.

Restriction: Upper-division students only. School of Social Ecology students only.

**(Ib)****SOCECOL 195W. Field Study Writing Seminar. 4-8 Units.**

Community engagement to promote civic education through field research experience, and the opportunity to study social issues and the environments where they occur. Develop discipline-specific writing and communication skills, methodology, and integrate information from multiple sources. Course may be offered online.

Prerequisite: SOCECOL 10. Cumulative UC GPA of 2.0. Authorization is required. Successful completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit for 8 units.

Restriction: Upper-division students only. Criminology, Law and Society Majors only. Psychology and Social Behavior Majors only. Social Ecology Majors only. Urban Studies Majors only.

**(Ib)**

**SOCECOL 198. Directed Studies. 2-4 Units.**

Directed study with Social Ecology faculty.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**SOCECOL 199. Special Studies. 1-4 Units.**

Special Studies with Social Ecology faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**SOCECOL 200. Seminar in Social Ecology. 4 Units.**

Students are introduced to the classic and contemporary literature of human and social ecology and are expected to use the ecological paradigm to analyze social phenomena of interest to the differing subprograms.

Restriction: Graduate students only.

**SOCECOL 261. Strategies of Theory Development. 4 Units.**

Examines key issues and controversies facing the development of social ecological theory, and encourages students to develop their own abilities as theorists. Strategies for enhancing creative hypothesis formation are emphasized.

Restriction: Graduate students only.

**SOCECOL 264A. Data Analysis. 4 Units.**

Provides an appreciation and understanding of statistics necessary to conduct applied research. Topics include approaches to and presentation of data, robust statistics, standardization techniques, multivariate regression, and analysis of variance.

Restriction: Graduate students only.

**SOCECOL 264B. Data Analysis. 4 Units.**

Provides an appreciation and understanding of statistics necessary to conduct applied research. Topics include approaches to and presentation of data, robust statistics, standardization techniques, multivariate regression, and analysis of variance.

Prerequisite: SOCECOL 264A

Restriction: Graduate students only.

**SOCECOL 266D. Analysis of Survival Data. 4 Units.**

Provides an introduction to survival analysis methods for the analysis of change in discrete dependent variables. Focuses on data collection strategies for obtaining longitudinal data and continuous-time hazards models. Communicates the variety and power of multivariate hazard models.

**SOCECOL 272A. Structural Equation Modeling I. 4 Units.**

The general structural equation model is developed including path models, recursive and nonrecursive structural models, multiple indicator models, and confirmatory factor models. Use of LISREL and other software for estimating model parameters is covered.

Prerequisite: SOCECOL 264A and SOCECOL 264B

**SOCECOL 272B. Structural Equation Modeling II: Longitudinal and Advanced Topics. 4 Units.**

Provides hands-on experience with longitudinal and advanced structural equation models and is of interest to students from a range of disciplines. Topics covered include confirmatory factor, latent growth curve, general growth mixture, and multi-level modeling.

Prerequisite: SOCECOL 272A

Restriction: Graduate students only.

**SOCECOL 275. Special Topics in Social Ecology. 2-4 Units.**

Topics covered vary with interests of the instructor.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SOCECOL 291. Program Evaluation. 4 Units.**

Students are introduced to the use of research techniques and statistical methods in assessing the effectiveness of social programs. Different evaluative models are discussed using examples of actual program evaluations.

Restriction: Graduate students only.

**SOCECOL 295. Masters Thesis Research & Writing. 1-8 Units.**

Independent research with Social Ecology faculty.

Prerequisite: Advancement to candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**SOCECOL 296. Doctoral Dissertation Research & Writing. 1-12 Units.**

Dissertation research with Social Ecology faculty.

Prerequisite: Advancement to Candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**SOCECOL 297. Field Study. 2-4 Units.**

Field studies in Social Ecology.

Restriction: Graduate students only.

**SOCECOL 298. Directed Studies. 2-4 Units.**

Directed study with Social Ecology faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**SOCECOL 299. Independent Study. 1-8 Units.**

Independent study with Social Ecology faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**SOCECOL 399. University Supervised Teaching. 2-4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Social Policy and Public Service (SPPS)

### Courses

**SPPS 40. Social Policy and Public Service. 4 Units.**

An introduction to the basic theories and principles of public policy. Students examine various influences on the development of public policy and the principle actors in the process, and learn to identify tools and techniques employed in policy making.

Same as SSCI 40.

(III)

**SPPS 70A. Race and Ethnicity. 4 Units.**

Focuses on racial and ethnic relations in the United States and compares them with those found in other societies. Analyzes the conditions that favor either cooperation and integration or rivalry, tension, and conflict. Appraises strategies for reducing and resolving conflicts.

Same as SOCL 63.

**(VII)****SPPS 101A. Immigration, Nation, and Media. 4 Units.**

Examines media shapes and reflects public opinion on immigration and its representation of immigrants, citizens, and ideas about the nation, and who belongs and who is a potential threat; as well as the relationship between scholars and journalists.

Same as CHLT 123, ANTH 125U.

**SPPS H190A. Honors Research Workshop. 4 Units.**

Student develops a 10–15-page prospectus of research for the honors thesis which includes: the research question, literature review, methods of investigation, and bibliography. Student selects a faculty mentor who will supervise thesis research and writing in winter and spring.

Same as SSCI H190A.

Restriction: Social Science Majors only. Social Policy/Public Service Majors only. Social Science Honors students only.

**SPPS H190B. Honors Thesis Research. 4 Units.**

The student initiates and completes data collection for the honors thesis. A faculty mentor provides supervision and feedback on thesis chapters.

Prerequisite: SSCI H190A or SPPS H190A

Same as SSCI H190B.

**SPPS H190C. Honors Thesis. 4 Units.**

The student completes, with the approval of the faculty mentor, an honors thesis containing: statement of the problem, literature review, research hypotheses, methods of investigation, results, discussion, and bibliography.

Prerequisite: SSCI H190B or SPPS H190B. Satisfactory completion of the Lower-Division Writing requirement.

Same as SSCI H190C.

**(Ib)****SPPS 193A. Field Studies in Social Policy and Public Service. 4 Units.**

Advanced training in qualitative and ethnographic research centered on community service. Students pursue field studies at nonprofit agencies (200 hours) to understand current social problems in underrepresented and underserved communities. Through field placement, students apply theory to practice.

Prerequisite: SSCI 70C or SOCL 63. Satisfactory completion of the Lower-Division Writing requirement.

Same as SSCI 193A.

Restriction: Social Policy/Public Service Majors only.

**SPPS 193B. Field Studies in Social Policy and Public Service. 4 Units.**

Advanced training in qualitative and ethnographic research centered on community service. Students pursue field studies at nonprofit agencies (200 hours) to understand current social problems in underrepresented and underserved communities. Through field placement, students apply theory to practice.

Prerequisite: SSCI 193A

Same as SSCI 193B.

**SPPS 193C. Field Studies in Social Policy and Public Service. 4 Units.**

Advanced training in qualitative and ethnographic research centered on community service. Students pursue field studies at nonprofit agencies (200 hours) to understand current social problems in underrepresented and underserved communities. Through field placement, students apply theory to practice.

Prerequisite: SSCI 193B

Same as SSCI 193C.

**SPPS 193CW. Field Studies in Social Policy and Public Service. 4 Units.**

Advanced training in qualitative and ethnographic research centered on community service. Students pursue field studies at nonprofit agencies (200 hours) to understand current social problems in underrepresented and under-served communities. Through field placement, students apply theory to practice.

Prerequisite: SSCI 193B

Same as SSCI 193CW.

Overlaps with SPPS 193C.

Restriction: Social Science Majors only.

(Ib)

## Social Science (SOC SCI)

### Courses

**SOC SCI 1A. Principles in the Social Sciences. 4 Units.**

Introduction to various disciplines within the social sciences. Provides an interdisciplinary perspective on understanding human behavior and social institutions, including interpersonal, economic, and cultural activities.

(III)

**SOC SCI H1E. Honors: Critical Issues on the Social Sciences. 6 Units.**

Major themes, methods, and works in the social sciences from an interdisciplinary perspective. Each quarter focuses on a different topic. Weekly seminars emphasizing development of critical thinking skills and quantitative analysis through written work are integral to the course.

Same as SOCECOL H20A.

Restriction: Campuswide Honors Collegium students only.

(III)

**SOC SCI H1F. Honors: Critical Issues on the Social Sciences. 6 Units.**

Major themes, methods, and works in the social sciences from an interdisciplinary perspective. Each quarter focuses on a different topic. Weekly seminars emphasizing development of critical thinking skills and quantitative analysis through written work are integral to the course.

Prerequisite: SOC SCI H1E or SOCECOL H20A

Same as SOCECOL H20B.

Restriction: Campuswide Honors Collegium students only.

(III)

**SOC SCI H1G. Honors: Critical Issues on the Social Sciences. 6 Units.**

Major themes, methods, and works in the social sciences from an interdisciplinary perspective. Each quarter focuses on a different topic. Weekly seminars emphasizing development of critical thinking skills and quantitative analysis through written work are integral to the course.

Prerequisite: SOC SCI H1F or SOCECOL H20B

Same as SOCECOL H20C.

Restriction: Campuswide Honors Collegium students only.

(III)

**SOC SCI 2A. Introduction to Social Science Analysis. 4 Units.**

Introduction to social science research and analytical models. Theory construction and use of research methods in an interdisciplinary context. Discussion of the application of social science research to public policy. Computer laboratories develop creative thinking, graphing, and data presentation skills.

Restriction: School of Social Sciences students have first consideration for enrollment.

(III)

**SOC SCI 3A. Computer-Based Research in the Social Sciences. 4 Units.**

Focuses on the data manipulation, data visualization, and information searching techniques. Hands-on experience in hypothesis testing, mapping, graphics, and data arrays.

Restriction: School of Social Sciences students have first consideration for enrollment.

**SOC SCI 4A. Introduction to Global Studies. 4 Units.**

Ongoing historical processes that increase global integration, the social, economic, and political interdependence of different regions, cultures, and peoples. Topics include ancient empires, colonialism, nationalism, industrialization, modern imperialism and warfare, decolonization, global social movements, conflict, inequality, and global governance.

Same as INTL ST 1.

Restriction: International Studies Majors have first consideration for enrollment.

(III and VIII ).

**SOC SCI 5A. Introduction to Human Geography. 4 Units.**

Human behavior in a geographical context. Spatial patterns and organization of the cultural, social, and economic activities of man as imposed on and influenced by the earth's physical setting.

(III)

**SOC SCI 5B. Introduction to Physical Geography. 4 Units.**

An introduction to the physical world we live in. Distribution and dynamics of the earth's air, water, and solid crust. Concepts and principles from climatology and geology. Selected examples from North America and beyond.

**SOC SCI 5D. US & World Geography. 4 Units.**

Survey of general geographical principles and facts on a world scale, as well as introduction to the broad regional and resource geography of the U.S., emphasizing in particular the interactions of physical and cultural factors.

(III, VIII)

**SOC SCI 10A. Probability and Statistics in Social Sciences I. 4 Units.**

Introduction to the variety of statistical applications in the social sciences. Descriptive statistics. Measures of central tendency and dispersion. Percentile ranks. Standardization and normal approximation. Basic probability theory focuses on application to statistical inference and binomial distribution. Laboratory required.

Corequisite: SOC SCI 3A

Prerequisite: SOC SCI 3A

Overlaps with PSYCH 10A, SOCECOL 13, POL SCI 10A, SOCIOL 10A, ECON 15A.

Restriction: Lower-division students only. Social Science Majors have first consideration for enrollment. SOC SCI 10A may not be taken for credit if taken after or concurrently with ECON 15A.

(Va)

**SOC SCI 10B. Probability and Statistics in Social Sciences II. 4 Units.**

Introduction to statistical inference, sampling distribution, standard error. Hypothesis tests for proportions and means. Inferential techniques for nominal variables including chi-square, study measures of strengths, significance of relationships between variables, assumptions, data requirements, and types of error in significance tests.

Prerequisite: SOC SCI 10A

Overlaps with ANTHRO 10B, POL SCI 10B, SOCECOL 13, SOCIOL 10B, PSYCH 10B.

Restriction: School of Social Sciences students have first consideration for enrollment.

(Va)

**SOC SCI 10C. Probability and Statistics in Social Sciences III. 4 Units.**

Focus on correlation, regression, and control for effects of variables. One-way and two-way factorial analysis of variance. A priori and a posteriori comparisons. Introduction to repeated measures design and non-parametric statistics. Discuss use of statistics in newspapers and popular magazines.

Prerequisite: SOC SCI 10B

Overlaps with ANTHRO 10C, POL SCI 10C, PSYCH 10C, SOCECOL 13, SOCIOL 10C.

Restriction: School of Social Sciences students have first consideration for enrollment.

**(Vb)**

**SOC SCI 11A. Barter to Bitcoin: Society, Technology and the Future of Money. 4 Units.**

Digital money has captured the broad imagination of speculators, coders, regulators, criminals and the mass media. Course puts this change in context: how do we understand money as a social, political and technological phenomenon?

Same as IN4MATX 12.

**(II and III ).**

**SOC SCI 12. Global Political Ideologies. 4 Units.**

An overview of the major political ideologies shaping the current world order and global conflict. Topics include liberalism, democracy, nationalism, capitalism, communism, socialism, fascism, neoliberalism, clash of civilizations, sectarian violence, populist nationalism, and de-globalization.

Same as POL SCI 44B, INTL ST 12.

Restriction: International Studies Majors have first consideration for enrollment.

**(III and VIII ).**

**SOC SCI 15. Global Political Economy. 4 Units.**

The global economy as an integrated system. The rise of world trade, capitalism, national economies, market cycles, competing economic ideologies, development, globalization, transnational labor, multinational corporations, and the role of UN, World Bank, WTO, and the IMF in global governance.

Same as INTL ST 15.

Restriction: International Studies Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment.

**(III and VIII ).**

**SOC SCI 16. Human Rights and Global Governance. 4 Units.**

Historical development of civil, political rights and the rise of human rights in international law. Explores role, and limitations, of the UN, ICJ, and ICC in global governance. Reconceptualizing democracy and political representation in a postnational 21st century.

Same as POL SCI 45A, INTL ST 16.

Restriction: International Studies Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment.

**(III and VIII ).**

**SOC SCI 17. Global Environmental Issues. 4 Units.**

Examines problems such as global climate change, growing human populations, fisheries depletion, ocean acidification, biodiversity loss, deforestation, and food security. Introduces political, social, and economic factors contributing to environmental issues and their disproportional impacts on the world's poor and minorities.

Same as INTL ST 17.

Restriction: International Studies Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment.

**(III and VIII ).**

**SOC SCI 20. Model United Nations. 2 Units.**

Focuses on simulations of the foreign policy pursuits of selected countries in the international community. Emphasis placed on understanding the rules of debate, as well as the policy positions of the student's selected country in the United Nations.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 6 times.

**SOC SCI H30D. Social Science Perspectives on the Sustainability of Societies. 4 Units.**

Introduces the perspectives of social science using examples from different countries to explore how social issues regarding sustainability are influenced by a society's changing economic and political institutions, and how economic, political, and other social choices affect their sustainability.

Prerequisite: EARTHSS H30C. EARTHSS H30C with a grade of C or better

Restriction: Campuswide Honors Collegium students only.

(III)

**SOC SCI 40. Social Policy and Public Service. 4 Units.**

An introduction to the basic theories and principles of public policy. Students examine various influences on the development of public policy and the principle actors in the process, and learn to identify tools and techniques employed in policy making.

Same as SPPS 40.

(III)

**SOC SCI 66. Introduction to Gangs . 4 Units.**

Introduces students to street gang subculture and explores risk factors associated with gang membership. Students develop a working definition for street gang and understand the difference between social and legal definitions. Also explores the connection between prison and street gangs.

**SOC SCI 70C. Comparing Cultures. 4 Units.**

Introduces students to the scope of cross-cultural comparisons by analyzing the theories, methodologies, and facts utilized by anthropologists, sociologists, social psychologists, political scientists, and historians in comparing cultures.

(III, VII)

**SOC SCI 78A. Asian American Histories. 4 Units.**

Examines and compares diverse experiences of major Asian American groups since the mid-nineteenth century. Topics include origins of emigration; the formation and transformation of community; gender and family life; changing roles of Asian Americans in American society. Formerly ASIANAM 60A.

Same as ASIANAM 50, HISTORY 15C.

((III or IV) and VII ).

**SOC SCI 78B. Asian American Communities. 4 Units.**

Examines the renewal of Asian immigration following World War II. Explores contemporary Asian American populations and communities in the U.S., and the impact of contemporary Asian immigration on the U.S. political economy and social order.

Same as ASIANAM 52.

(III, VII)

**SOC SCI 78C. Asian Americans and Race . 4 Units.**

Analyzes the Asian American experience in comparative perspective, which includes comparisons of different ethnic and racial groups, and across gender and class. Possible topics include labor, economy, politics, migration, nation, popular culture, gender, family, sexuality, and multiraciality.

Same as ASIANAM 53.

(III, VII)

**SOC SCI 89. Special Topics in Social Sciences. 2-4 Units.**

Studies in selected areas of Social Sciences. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**SOC SCI 102A. Introduction to Geographic Information Systems in Social Sciences. 4 Units.**

Hands-on laboratory course introduces students to the fundamentals of Geographic Information Systems (GIS) technology using social science applications. Students learn to organize, manipulate, and display spatial data leading to the design of their own GIS research project.

Restriction: School of Social Sciences students have first consideration for enrollment.

**SOC SCI 102B. Intermediate Geographic Information Systems in Social Sciences. 4 Units.**

Expands Geographic Information Systems (GIS) skills to more advanced theories and concepts in the spatial analysis of social science issues and particularly to analyzing and interpreting spatial data. Students develop and complete a GIS research project of their own choosing.

Prerequisite: SOC SCI 102A

Restriction: School of Social Sciences students have first consideration for enrollment.

**SOC SCI 103A. Game Theory and Politics I. 4 Units.**

Introduction to game theory and a survey of its political applications. Examples of topics covered include voting in small committees, legislatures, and mass elections; interest group activities and environmental issues; institutional design, and the evolution of cooperative behavior.

Same as SOCIOL 134, POL SCI 130A.

Restriction: Social Policy/Public Service Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**SOC SCI 103B. Game Theory and Politics II. 4 Units.**

More advanced game theory and its political applications, beginning where Game Theory and Politics I ends. Examples of topics covered include revolutions; arms race; spatial models of party competition; political manipulation; political coalitions and their power.

Prerequisite: POL SCI 130A or ECON 116A

Same as POL SCI 130B.

Restriction: Social Policy/Public Service Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**SOC SCI 115D. International Business. 4 Units.**

Introduction to conducting business in the international arena, decision making in the organization, and globalization of markets and production. Topics covered range from tax and finance to ethics, marketing, and more. Continuing corporate regulatory scandals discussed.

Same as INTL ST 112A.

**SOC SCI 119. Special Topics in Geography. 4 Units.**

Studies in selected areas of geography. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**SOC SCI 120. Transnational Gangs. 4 Units.**

Examines the internationalization of U.S. domestic street gangs. The relationship between California gangs Mara Salvatrucha and 18th Street and Mexico/Central American gangs is assessed. Specified topics include: mobilization, migration, territorialism, culture, organization, and use of technology.

Same as INTL ST 130.

Overlaps with SOC SCI XI120, INTL ST XI130.

**SOC SCI 121T. Voting and Political Manipulation. 4 Units.**

Introduction to social choice and cooperative games. Topics include majority rule, types of voting methods, apportionment and proportional representation, agenda manipulation, coalition formation, voting power, political consequences of electoral laws.

Same as INTL ST 156A, POL SCI 151H, ECON 154.

Restriction: International Studies Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**SOC SCI 132. Veterans in History and Society. 4 Units.**

Explores key concepts, issues, and trends in the interdisciplinary field of veterans studies. Students gain a deep understanding of the ways that social scientists and historians have analyzed the identities, experiences, and worldviews of U.S. military veterans.

Same as HISTORY 149.

**SOC SCI 133. Veterans' Transitions. 4 Units.**

Provides veteran and non-veteran students with a comprehensive and academically rigorous overview of the ways and means through which diverse communities of veterans have made and continue to make the complex and multi-faceted transition from active military.

**SOC SCI 134W. Veterans' Voices. 4 Units.**

Uses the medium of academic writing to develop a broad understanding and appreciation for the wide range of worldviews, priorities, and values embodied in the creative production and activism of diverse U.S. military veterans.

(Ib)

**SOC SCI 152A. Non-Government Organization (NGO) Fundamentals. 4 Units.**

Introduction to non-governmental organizations, including their role in U.S. society and the international community. Explores varying definitions of NGOs and the characteristics held in common by all NGOs.

Same as INTL ST 152A.

**SOC SCI 152C. American Public Policy. 4 Units.**

Focuses on the development and implementation of public policy in the United States. Lectures cover theoretical models of the policy process as well as significant problems facing contemporary American decision-makers.

Same as PUBHLTH 132, POL SCI 121G, UPPP 129.

**SOC SCI 163A. Urban America . 4 Units.**

Students examine the historical, social, political, and economic factors that contributed to the construction of the American urban context, one that is poverty concentrated and racially/ethnically segregated. Students also critically assess the consequence of growing up in America's urban neighborhoods.

Same as CHC/LAT 162A, UPPP 104.

**SOC SCI 164B. Domestic Gangs. 4 Units.**

Examines the history and development of California street gangs and the role of historical events in that development. Students will be able to contrast and compare gang cohort behaviors between some of the major gangs in California.

Restriction: School of Social Sciences students have first consideration for enrollment.

**SOC SCI 164C. Prison Gangs. 4 Units.**

Examines the growth and spread of prison gangs throughout the country. Relationships between prison and street gangs, and possible relationships with foreign drug trafficking organizations studied. Violence examined as the standard to establish dominance in and out of prison.

Restriction: School of Social Sciences students have first consideration for enrollment.

**SOC SCI 164D. Juvenile Gangs. 4 Units.**

Examines risk factors that can be used to predict gang membership. Compares generational with non-generational gangs and develops a working sociological definition that can be used to identify street gangs. Myths about juveniles, street gangs.

Restriction: School of Social Sciences students have first consideration for enrollment.

**SOC SCI 165. Chicano/Latino Families. 4 Units.**

Introduction to the research, literature, and issues surrounding the topic of Chicano/Latino families including cultural history, contemporary issues, organization of family, traditions, lifestyles, values, beliefs, generational differences, gender issues, ethnic identity, evolution of demographic patterns, current economic and political standings.

Same as CHC/LAT 170, PSCI 166S, PSYCH 174H.

**SOC SCI 168B. Immigration and Inequality. 4 Units.**

Explores immigration, ethnicity, and inequality as interconnected social forces. International migration, propelled by global inequalities, plays a central role in the formation of multinational societies, shapes inter-group relations and patterns of ethnic inequality, and transforms the immigrants themselves.

Same as SOCIOL 166.

**SOC SCI 170A. Research Methods in the Social Sciences. 4 Units.**

Examines how interdisciplinary social science research questions are formulated and studies several research methods including: experimental method, quasi-experimental methods, survey research, field research, evaluation research, and meta-analysis. Parametric and non-parametric statistical methods are illustrated using the SPSS program.

Prerequisite: SOC SCI 1A and SOC SCI 2A and SOC SCI 3A and (SOC SCI 10A or STATS 7)

Restriction: Upper-division students only. School of Social Sciences students have first consideration for enrollment.

**SOC SCI 172AW. American Culture. 4 Units.**

A survey of the historical development of dominant American culture and society; emphasis on a close reading of key cultural texts, with weekly text as a model of writing, examining its use of language and rhetoric.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: School of Social Sciences students have first consideration for enrollment.

**(Ib)****SOC SCI 172D. Law in the Twenty-First Century. 4 Units.**

Examines the complex relationship between law, the social sciences, and modern society. Lectures explore such issues as the interplay between technology and constitutional rights, the impact of science on law, and the evolving roles of attorneys and judges.

Same as POL SCI 171F.

Restriction: Political Science Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment.

**SOC SCI 173L. Latinos in a Global Society. 4 Units.**

Examines interconnections between diverse Latino groups in the U.S. and the effects of globalization on their social, cultural, and political realities. Topics include immigration, demographics, socioeconomic differentiation, familial relations, political protest/resistance, law and policy, and links to 'homeland' issues.

Same as CHC/LAT 167.

**(VII)****SOC SCI 173N. Revolution in Latin America. 4 Units.**

Presents a comparative analysis of the causes, development, and consequences of selected revolutionary movements, focusing on outbreaks in Mexico, Bolivia, Cuba, Chile, Nicaragua, and Grenada. Explores topics of state formation, economic nationalism, social justice, ethnicity, and role of international affairs.

Same as CHC/LAT 151B, HISTORY 166D, INTL ST 177C.

**SOC SCI 177B. Asian American Women. 4 Units.**

Examines the representations and experiences of Asian American women from diverse perspectives. Explores the commonalities and differences among various groups of Asian American women, with particular focus on history, culture, values, and family roles.

Same as ASIANAM 162.

**SOC SCI 178C. Korean American Studies. 4 Units.**

Explores the factors that have distinctly shaped the Korean American experience, including patterns of racial domination, the profile of immigrant flow, immigrant roles in the urban political economy, politics in Korea, and the role of the church.

Same as ASIANAM 151C.

**SOC SCI 178D. Vietnamese American Studies. 4 Units.**

Studies the resettlement of Vietnamese in the United States following their exodus from Southeast Asia. Topics include the Vietnam War, the 1975 evacuation, boat and land refugees, the shaping of Vietnamese communities, and Vietnamese American literature.

Same as ASIANAM 151D.

**SOC SCI 178E. Japanese American Studies. 4 Units.**

Studies the settlement of Japanese in Hawaii and the continental United States since the late 19th century. Topics include sugar plantations, development of rural Japanese America, World War II internment, post-War community development, and persistence of Japanese American identity.

Same as ASIANAM 151E.

**SOC SCI 178F. South Asian American Studies. 4 Units.**

Examines and compares the experiences of South Asian immigrants in the U.S. over time. Looks at the economic, political, and social positions of the immigrants, with special emphasis on religious changes and the changes in the second and later generations.

Same as ASIANAM 151F.

Restriction: Asian American Studies Majors have first consideration for enrollment. Social Policy/Public Service Majors have first consideration for enrollment.

**SOC SCI 178H. Southeast Asian American Studies. 4 Units.**

Analyzes experiences of refugees and immigrants from Southeast Asia, which may include those from Cambodia, Laos, Vietnam, and the Philippines. Examines political and economic factors for their exodus and how they reconstruct their identities, histories, and communities.

Same as ASIANAM 151H.

**SOC SCI 178J. Chinese American Studies. 4 Units.**

Analyzes the experiences of Chinese in the United States. Immigration, Chinese exclusion, racial and gender identity. Historical overview and contemporary issues covered.

Same as ASIANAM 151J.

**SOC SCI 178K. Filipina/Filipino American Studies. 4 Units.**

Explores the experience of Filipina/Filipino Americans from the era of Spanish colonization of the Philippines to present-day community formations in the United States, with special emphasis on the 20th century. Topics include colonialism, nation, migration, gender, and culture.

Same as ASIANAM 151K.

**SOC SCI 179. Special Topics in Asian American Studies. 4 Units.**

Studies in selected areas of Asian American Studies. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**SOC SCI 181A. Ethical Leadership. 4 Units.**

Explores historical and contemporary theories of ethical and unethical leadership. Examines models of 'good leadership' such as cardinal and monastic virtues; and models of 'bad leadership,' such as Machiavelli's Prince. Explores the philosophies, styles, and accomplishments of leaders.

Restriction: School of Social Sciences students have first consideration for enrollment.

**SOC SCI 183A. Global and International Studies Forum. 4 Units.**

A faculty-student forum featuring lectures from a variety of institutions with discussion issues related to Global and International Studies.

Repeatability: May be taken for credit 4 times.

Same as SOCECOL 183A, INTL ST 183A.

**SOC SCI 183B. Seminar in Mediation. 4 Units.**

Student develop mediation skills and refine knowledge in the practice and theory of conflict resolution. Students who complete this course may serve as mediators in the Campus Mediation Program. Course is a prerequisite to completing Indep Study as an intern.

Same as INTL ST 183B, SOCECOL 183B.

Restriction: International Studies Majors have first consideration for enrollment. School of Humanities students have first consideration for enrollment. School of Social Ecology students have first consideration for enrollment. School of Social Sciences students have first consideration for enrollment.

**SOC SCI 183CW. Seminar Conflict Resolution. 4 Units.**

Designed for seniors who are pursuing the minor in Conflict Resolution and/or International Studies major. Provides a forum in which students will refine skills and theory in the study of cooperation and conflict, from local to global arenas.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as SOCECOL 183CW, INTL ST 183CW.

(Ib)

**SOC SCI 183E. Conflict Resolution in Cross-Cultural Perspective. 4 Units.**

Examines theories of conflict management. Analyzes how conflict is mitigated in diverse cultures: at the interpersonal level, between groups, and on the international scale. Students discuss readings, hear from conflict management practitioners, and simulate negotiations.

Same as ANTHRO 136D, POL SCI 154G, INTL ST 183E.

(VIII)

**SOC SCI 184A. Sage Leader Research I. 2 Units.**

Participants in the SAGE Scholars Program learn to define leadership concepts, discover various leadership styles, and develop strong leadership and communication skills resulting in strengthened ability to contribute to and interact with UCI and the Orange County community.

Grading Option: Pass/no pass only.

Restriction: SAGE Scholars Program students only.

**SOC SCI 184B. Sage Leader Research II. 4 Units.**

Provides a survey of contemporary topics and challenges in the fields of management and leadership. Case studies and text by leading authors are used to analyze key leadership issues in twenty-first century, with particular emphasis on current events.

Restriction: SAGE Scholars Program students only.

**SOC SCI 184GW. Media Writing. 4 Units.**

Designed to teach reporting and news writing basics. Students learn how to gather and organize information, ask effective questions, develop story ideas, research facts, and write stories on deadline.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Overlaps with INTL ST XI155B, SOC SCI XI184G.

Restriction: International Studies Majors have first consideration for enrollment.

**(Ib)**

**SOC SCI 185W. People in Society. 4 Units.**

Through readings about people in distinctly different societies throughout history, students learn concepts that cross the boundaries of the social science disciplines. Such themes as democracy, elitism, power, social class, and gender are the basis for discussion and writing.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: School of Social Sciences students only.

**(Ib)**

**SOC SCI 187. Twenty-First-Century Graduate Education. 2 Units.**

Graduate and professional education in twenty-first century United States. Examines strategies for admission to postbaccalaureate programs and success in graduate study culture. Introduction to processes including planning and preparation, school selection, entrance examination preparation, submission of applications, writing personal statements.

Grading Option: Pass/no pass only.

Restriction: Upper-division students only.

**SOC SCI 188A. Introduction to Contemporary Middle East Politics. 4 Units.**

An overview of basic issues that shape the politics of the Middle East and North Africa. Themes include implication of the colonization era, nation-state formation, inter-Arab relations, nationalism, Arab-Israel conflict, Islamic resurgence, and more.

Same as INTL ST 165, POL SCI 158D.

**SOC SCI 188K. Political Islam. 4 Units.**

Political Islam is a diverse phenomenon. While noticeable barriers exist to 'Islamist democracy,' it is the Islamists who will define the political future of much of the Muslim world. Reviews the experience of Saudi Arabia, Egypt, Pakistan, Turkey, and Indonesia.

Same as INTL ST 161A.

**SOC SCI 189. Special Topics in Social Sciences. 2-4 Units.**

Studies in selected areas of social sciences. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: School of Social Sciences students have first consideration for enrollment.

**SOC SCI H190A. Honors Research Workshop. 4 Units.**

Student develops a 10–15-page prospectus of research for the honors thesis which includes: the research question, literature review, methods of investigation, and bibliography. Student selects a faculty mentor who will supervise thesis research and writing in winter and spring.

Same as SPPS H190A.

Restriction: Social Science Majors only. Social Policy/Public Service Majors only. Social Science Honors students only.

**SOC SCI H190B. Honors Thesis Research. 4 Units.**

The student initiates and completes data collection for the honors thesis. A faculty mentor provides supervision and feedback on thesis chapters.

Prerequisite: SOC SCI H190A or SPPS H190A

Same as SPPS H190B.

**SOC SCI H190C. Honors Thesis. 4 Units.**

The student completes, with the approval of the faculty mentor, an honors thesis containing: statement of the problem, literature review, research hypotheses, methods of investigation, results, discussion, and bibliography.

Prerequisite: SOC SCI H190B or SPPS H190B. Satisfactory completion of the Lower-Division Writing requirement.

Same as SPPS H190C.

**(Ib)****SOC SCI 191. Graduate-Mentored Study in the Social Sciences. 4 Units.**

Offers a hands-on research experience while increasing awareness of the various disciplines in the social sciences and of the requirements of graduate school. Features graduate-mentored study under the supervision of the Associate Dean.

Prerequisite: Identification of a graduate student (who is in good standing) as a mentor.

Grading Option: Pass/no pass only.

**SOC SCI 193A. Field Studies in Social Policy and Public Service. 4 Units.**

Advanced training in qualitative and ethnographic research centered on community service. Students pursue field studies at nonprofit agencies (200 hours) to understand current social problems in underrepresented and underserved communities. Through field placement, students apply theory to practice.

Prerequisite: SOC SCI 70C or SOCIOL 63. Satisfactory completion of the Lower-Division Writing requirement.

Same as SPPS 193A.

Restriction: Social Policy/Public Service Majors only.

**SOC SCI 193B. Field Studies in Social Policy and Public Service. 4 Units.**

Advanced training in qualitative and ethnographic research centered on community service. Students pursue field studies at nonprofit agencies (200 hours) to understand current social problems in underrepresented and underserved communities. Through field placement, students apply theory to practice.

Prerequisite: SOC SCI 193A

Same as SPPS 193B.

**SOC SCI 193C. Field Studies in Social Policy and Public Service. 4 Units.**

Advanced training in qualitative and ethnographic research centered on community service. Students pursue field studies at nonprofit agencies (200 hours) to understand current social problems in underrepresented and underserved communities. Through field placement, students apply theory to practice.

Prerequisite: SOC SCI 193B

Same as SPPS 193C.

**SOC SCI 193CW. Field Studies in Social Policy and Public Service. 4 Units.**

Advanced training in qualitative and ethnographic research centered on community service. Students pursue field studies at nonprofit agencies (200 hours) to understand current social problems in underrepresented and under-served communities. Through field placement, students apply theory to practice.

Prerequisite: SOC SCI 193B

Same as SPPS 193CW.

Overlaps with SPPS 193C.

Restriction: Social Science Majors only.

**(Ib)**

**SOC SCI 194A. Public Service Internship. 2-4 Units.**

Introduces the role of etiquette and leadership in the professional environment. With a two-unit (50 hours) or four-unit (100 hours) credit option, students intern at a nonprofit agency exploring their roles as community leaders and improving their professional skills.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 8 units.

Restriction: Social Policy/Public Service Majors only.

**SOC SCI 194C. Management and Leadership Practicum-Social Science . 2-4 Units.**

Social Sciences Academic Resource Center (SSARC) Resource Managers (RMs) report directly to the Director and Associate Director, serving as frontline resource consultants, assisting visitors with resume development, graduate and professional school planning, internship placement, and professional development.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 12 units.

**SOC SCI 195A. Educational Policy Field Studies. 4 Units.**

Integrates academic course work with experiential learning; examines the effects of educational policy on urban and suburban schools; explores the relationship between community service and personal academic interests; and develops awareness about the challenges of public education.

Repeatability: May be taken for credit 3 times.

**SOC SCI 195B. Educational Policy Field Studies. 4 Units.**

Integrates academic course work with experiential learning; examines the effects of educational policy on urban and suburban schools; explores the relationship between community service and personal academic interests; and develops awareness about the challenges of public education.

Prerequisite: SOC SCI 195A

Repeatability: May be taken for credit 3 times.

**SOC SCI 195C. Educational Policy Field Studies . 4 Units.**

Integrates academic course work with experiential learning; examines the effects of educational policy on urban and suburban schools; explores the relationship between community service and personal academic interests; and develops awareness about the challenges of public education.

Prerequisite: SOC SCI 195B

Repeatability: May be taken for credit 3 times.

**SOC SCI 196. Global Connect. 2-4 Units.**

Identifies factors of change that influence the twenty-first century. Students serve as mentors at high schools to introduce globalization issues through workshops and lectures. Students must submit an application and have a 3.0 or higher overall GPA.

Repeatability: May be taken for credit 3 times.

**SOC SCI 197. Professional Internship. 2-4 Units.**

Students apply classroom knowledge through research projects in nonprofit agencies (local, state, and government) and the private sector. They pose solutions to agency-posed questions. Students gain field experience through 50 hours (for 2 units) or 100 (for 4 units).

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 8 units.

Restriction: School of Social Sciences students only.

**SOC SCI 198. Directed Group Study. 2-4 Units.**

Directed study with Social Science faculty.

Repeatability: May be taken for credit for 12 units.

**SOC SCI 199. Individual Study. 2-4 Units.**

Opportunities to do research and learn new skills outside the normal classroom environment. Students participate in planned research and study activities under a written contract with a supervising UCI instructor. Students may enroll for only one 199 each quarter.

Repeatability: May be taken for credit for 16 units.

Restriction: Upper-division students only.

**SOC SCI 211A. Mathematical Behavioral Sciences Colloquium. 2 Units.**

Weekly reports and colloquia by faculty, students, and visitors.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**SOC SCI 211B. Mathematical Behavioral Sciences Colloquium. 2 Units.**

Weekly reports and colloquia by faculty, students, and visitors.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**SOC SCI 211C. Mathematical Behavioral Sciences Colloquium. 2 Units.**

Weekly reports and colloquia by faculty, students, and visitors.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**SOC SCI 253K. Race and Justice Studies Writing Seminar . 4 Units.**

A required writing-intensive seminar conducted by an instructor affiliated with the Race and Justice Studies emphasis. Students with manuscripts on relevant topics will read and critique peer manuscripts, and revise manuscripts toward completion of articles, dissertation chapters, and other publications.

Prerequisite: CRM/LAW C260C

Same as HUMAN 261, CRM/LAW C261.

Restriction: Graduate students only.

**SOC SCI 254A. Transnational Migration. 4 Units.**

Examines borders and boundaries as material and semiotic constructs. Drawing upon an array of literatures, but loosely situated in U.S. geo/biopolitics, explores transformative troubleings of places, spaces, borders, and bodies of all sorts.

Same as ANTHRO 235A, CHC/LAT 215.

Restriction: Graduate students only.

**SOC SCI 272A. Origin and Evolution of Marxist Social Thought. 4 Units.**

Focuses on the genesis and evolution of Marxist social thought. The 'systemic' method of Marx and Engels to questions of economic production and reproduction is compared and contrasted with modern world-system grand visions, feminist-theoretic approaches, and postmodern critiques.

Prerequisite: Undergraduate course in political theory or equivalent.

Restriction: Graduate students only.

**SOC SCI 289. Special Topics in Social Science. 4 Units.**

Current research in Social Science.

Repeatability: Unlimited as topics vary.

**SOC SCI 290. Dissertation Research. 4-12 Units.**

Dissertation research with Social Science faculty.

Repeatability: May be repeated for credit unlimited times.

**SOC SCI 299. Independent Study. 1-12 Units.**

Independent research with Social Science faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**SOC SCI 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Letter Grade only.

Repeatability: May be repeated for credit unlimited times.

## Sociology (SOCIOL)

### Courses

**SOCIOL 1. Introduction to Sociology. 4 Units.**

Considers major sociological concepts, theories, and research findings illuminating processes of interpersonal interaction, social differentiation and stratification, integration and conflict, and change, with attention to variation in class, race/ethnic, gender, multicultural, and cross-national perspectives and experiences.

(III, VII)

**SOCIOL 2. Globalization and Transnational Sociology. 4 Units.**

Examines globalization and international issues from the perspective of sociology and related fields. Issues include economic globalization and global inequality, international environmental problems, international politics, trends in global culture, and global conflict.

(III, VIII)

**SOCIOL 3. Social Problems. 4 Units.**

Focuses on how institutional and organizational features of societies generate problems for people. Particular attention directed at a set of problems related to political and economic inequality: poverty, racism, sexism, urban and population problems, the environment, the criminal justice system.

(III, VII)

**SOCIOL 10A. Probability and Statistics. 4 Units.**

An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Same as ANTHRO 10A.

Overlaps with PSYCH 10A, SOCECOL 13, SOC SCI 10A, POL SCI 10A.

Restriction: Anthropology Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

(Va)

**SOCIOL 10B. Probability and Statistics. 4 Units.**

An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Prerequisite: SOCIOL 10A or ANTHRO 10A

Same as ANTHRO 10B.

Overlaps with PSYCH 10B, SOCECOL 13, SOC SCI 10B, POL SCI 10B.

Restriction: Anthropology Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**(Va)****SOCIOL 10C. Probability and Statistics. 4 Units.**

An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Prerequisite: SOCIOL 10B or ANTHRO 10B

Same as ANTHRO 10C.

Overlaps with PSYCH 10C, SOCECOL 13, SOC SCI 10C, POL SCI 10C.

Restriction: Anthropology Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**(Vb)****SOCIOL 19. Special Topics: Methods. 4 Units.**

Studies in selected areas of methods. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**SOCIOL 29. Special Topics: Theory. 4 Units.**

Studies in selected areas of theory. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: May be repeated for credit unlimited times.

**SOCIOL 31. Self-Identity and Society. 4 Units.**

Studies sociological contributions to theory and research in social psychology, with focus on the social influences on personality, attitudes, beliefs, and behavior; socialization, human groups, and social interaction.

Same as PSYCH 78A.

**(III)****SOCIOL 39. Special Topics: Social Psychology. 4 Units.**

Studies in selected areas of social psychology. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**SOCIOL 41. Small Group Dynamics. 4 Units.**

Deals with models for understanding behavior in small groups, including coalition formation, socialization, group norms and decision rules, leadership, conformity, group structure, and communication processes.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 43. City and Community. 4 Units.**

Examines nature, causes, and consequences of urbanization along with changing scale and complexity, demographic/ecological city growth patterns, quality of life in urban areas, processes of decision-making, and bearing of sociological investigation on public policy concerns in contemporary urban society.

Overlaps with UPPP 40.

**SOCIOL 44. Births, Deaths, and Migration. 4 Units.**

Introduction to the analysis of human population including fertility, mortality dispersion, sex distribution. Attention is focused on the effects of these variables on, e.g., over-population, social disorganization, and the stability of social institutions.

(VIII)

**SOCIOL 49. Special Topics: Structures. 4 Units.**

Studies in selected areas of structures. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**SOCIOL 51. Asian American Family & Community. 4 Units.**

Briefly examines the history of different Asian American groups and provides an in-depth analysis of issues related to family composition, mate selection, changing gender roles, and intergenerational conflict.

(VII)

**SOCIOL 56. Religion and Society. 4 Units.**

A critical and personal examination of the varieties of religious and spiritual experiences human beings are undergoing in contemporary society. The role of conscious understanding and unconscious conditioning regarding religion and spirituality.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 59. Special Topics: Social Institutions and Culture. 4 Units.**

Studies in selected areas of social institutions and culture. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**SOCIOL 62. Families and Intimate Relations. 4 Units.**

Sociological theories/research on marriage, kinship, intimacy, and divorce. Emphasis on comparing family patterns in different social classes, ethnic groups, and societies, and on relating family life to the economy and other social institutions. Topics include gender roles, child-rearing, historical change. Materials fee.

(III)

**SOCIOL 63. Race and Ethnicity. 4 Units.**

Focuses on racial and ethnic relations in the United States and compares them with those found in other societies. Analyzes the conditions that favor either cooperation and integration or rivalry, tension, and conflict. Appraises strategies for reducing and resolving conflicts.

Same as SPPS 70A.

(VII)

**SOCIOL 64. Sociology of Sexuality. 4 Units.**

Provides an introduction to and overview of the sociology of sex and sexuality. Considers the social meanings of sex and sexuality, the social contexts of sex and sexuality, and the social regulations of sex and sexuality.

(VII)

**SOCIOL 68. Gender and Race Inequality in the Workplace. 4 Units.**

Analysis of current state and trends in major inequality measures including the wage gap, occupational segregation, and access to managerial positions. Theories that purport to explain such differences, and the related empirical evidence, are also covered.

**SOCIOL 68A. Ethnic and Immigrant America. 4 Units.**

Focusing on Asian, Latino, and Black immigrant groups, examines the second generation's experience of straddling two cultures and growing up American. Covers topics such as assimilation, bilingualism, race relations, education, bicultural conflicts, interracial marriage, and multiracial identities.

Same as CHC/LAT 65.

(VII)

**SOCIOL 69. Special Topics: Age, Gender, Race, and Ethnicity. 4 Units.**

Studies in selected areas of age, gender, race, and ethnicity. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**SOCIOL 79. Special Topics: Societies and Social Inequality. 4 Units.**

Studies in selected areas of societies and social inequality. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**SOCIOL 110. Research Methods. 4 Units.**

Methods of data collection and analysis used by sociologists. Experimental methods, surveys, and interviews, field research and participant observation, demographic methods, historical and comparative approaches.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 119. Special Topics: Methods. 4 Units.**

Studies in selected areas of methods. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 120. Sociological Theory. 4 Units.**

What a theory of society is and is not. Historical and contemporary models, perspectives, and schools.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 120W. Sociological Theory. 4 Units.**

What a theory of society is and is not. Historical and contemporary models, perspectives, and schools.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology Majors have first consideration for enrollment.

**(Ib)****SOCIOL 129. Special Topics: Theory. 4 Units.**

Studies in selected areas of theory. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 134. Game Theory and Politics I. 4 Units.**

Introduction to game theory and a survey of its political applications. Examples of topics covered include voting in small committees, legislatures, and mass elections; interest group activities and environmental issues; institutional design, and the evolution of cooperative behavior.

Same as POL SCI 130A, SOC SCI 103A.

Restriction: Social Policy/Public Service Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**SOCIOL 135. Social Psychology of Networks. 4 Units.**

Review of network methods used in small group and organizational research. Discussion of social psychological literature relevant to the network of study of cognitive social structure, exchange/communication, identity negotiation, and social control. Case study of network datasets exemplifies research issues.

Same as PSYCH 178N.

Restriction: Sociology Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**SOCIOL 136. Religious Traditions of Asian Americans. 4 Units.**

Studies the religious traditions of Asian Americans, focusing on the transplantation of religious institutions, establishment of sacred spaces, celebration of religious holidays, socialization of children, as well as birth, marriage, gender relations, death, family.

Same as ASIANAM 143.

**SOCIOL 138. Business Decisions. 4 Units.**

Surveys normative and descriptive models of decision-making behavior, with an emphasis on organizational and policy contexts. Topics include rational choice theory, biases and heuristics, framing effects, and overconfidence. Management fads, panics, and herd behavior are also discussed.

Prerequisite: (ANTHRO 10A and ANTHRO 10B and ANTHRO 10C) or (SOCIOL 10A and SOCIOL 10B and SOCIOL 10C) or (SOC SCI 10A and SOC SCI 10B and SOC SCI 10C) or (MATH 2A and MATH 2B and (STATS 7 or MGMT 7)) or (STATS 120A and STATS 120B and STATS 120C) or (ECON 15A and ECON 15B)

Same as ECON 148.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 139. Special Topics: Social Psychology. 4 Units.**

Studies in selected areas of social psychology. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 141. Organizations. 4 Units.**

How bureaucracies, formal organizations, and voluntary associations work, how/why they grow, and where they are going. History and structure of organizational rationality; dynamics of organized groups; behavior in organizations; limits of bureaucratization and attempts to overcome these limits through decentralization.

Same as POL SCI 155C.

Restriction: Sociology Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment.

**SOCIOL 142. White-Collar Crime. 4 Units.**

Examines criminal activity in business and corporate enterprise, organizations, and the professions. Theories regarding the causes and control of white-collar and corporate crime are covered as well as the numerous definitions of these terms.

Same as CRM/LAW C142.

Restriction: Sociology Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**SOCIOL 143. Social Networks and Social Support. 4 Units.**

Examines the manner in which behaviors/attitudes of individuals are affected by their network ties to others. How are peoples' opportunities and well-being increased/decreased by their social networks? May include studies in mental/physical health, job seeking, separation and loss, and aging.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 144. Politics, Power, and Society. 4 Units.**

Includes an examination of the major theoretical approaches to political sociology, and the application of these ideas to the politics of advanced capitalist societies. Also considers stability and change in power structures.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 145. Occupations and Professions. 4 Units.**

What makes some jobs satisfying and others boring? How does technology influence the workplace? What changes are coming in the U.S. job market? Sociology and psychology of occupations. Students interview workers and study aspects of their occupations.

Restriction: Upper-division students only. Sociology Majors have first consideration for enrollment.

**SOCIOL 145W. Occupations and Professions. 4 Units.**

What makes some jobs satisfying and others boring? How does technology influence the workplace? What changes are coming in the U.S. job market? Sociology and psychology of occupations. Students interview workers and study aspects of their occupations.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Sociology Majors have first consideration for enrollment.

(Ib)

**SOCIOL 149. Special Topics: Structures. 4 Units.**

Studies in selected areas of structures. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 150. Sociological Lens on Religion. 4 Units.**

Examines the effects of religious beliefs, belonging, and institutions on social dynamics, including class, gender, and racial stratification, politics, and social movements. Additional topics: the sociological significance of conversion, commitment, and secularization/sacralization.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 151. Social Inequalities and Health. 4 Units.**

Introduces ways in which social inequalities produce health disparities. Begins with general perspectives on social causation of health, and then considers how particular individual attributes (e.g., gender, SES, race/ethnicity, nativity) and social contexts (e.g., neighborhoods) can get "under the skin."

**SOCIOL 154. Medical Sociology. 4 Units.**

Current problems in U.S. health-care system and proposals for reform. Examines financial barriers to access; problem of patient dumping; underinsurance; prenatal and perinatal care; child services; preventative care and needs of the elderly; minorities; low-income people; undocumented.

Same as PUBHLTH 135.

Restriction: Upper-division students only. Sociology Majors have first consideration for enrollment.

**SOCIOL 154W. Medical Sociology. 4 Units.**

Current problems in U.S. health-care system and proposals for reform. Examines financial barriers to access; problem of patient dumping; underinsurance; prenatal and perinatal care; child services; preventative care and needs of the elderly; minorities; low-income people; undocumented.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Sociology Majors have first consideration for enrollment.

(Ib)

**SOCIOL 155B. Baseball and Society. 4 Units.**

An examination of baseball's role in American social life over the last 150 years. Issues of fraternal organizations, national development, capitalism, rationalization, race and ethnicity, gender, economic organization, labor relations, and politics are discussed.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 155BW. Baseball and Society. 4 Units.**

An examination of baseball's role in American social life over the last 150 years. Issues of fraternal organizations, national development, capitalism, rationalization, race and ethnicity, gender, economic organization, labor relations, and politics are discussed.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology Majors have first consideration for enrollment.

**(Ib)**

**SOCIOL 156. Deviance. 4 Units.**

Perspectives on deviance and criminality in behavior, institution, community, and myth. The suitability of contemporary theories of deviant behavior.

Same as CRM/LAW C107, PSYCH 177D.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

Sociology Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**SOCIOL 157A. Sociology of Education. 4 Units.**

Focuses on education's role in creating and redressing inequality, and in shaping how we understand our place in society. Education from cross-national and historical perspectives, and education as a vehicle for examining and solving social problems. Course may be offered online.

**SOCIOL 157AW. Sociology of Education. 4 Units.**

Focuses on education's role in creating and redressing inequality, and in shaping how we understand our place in society. Education from cross-national and historical perspectives, and education as a vehicle for examining and solving social problems.

Overlaps with SOCIOL 157A.

**(Ib)**

**SOCIOL 157C. Comparing European and US Societies. 4 Units.**

Society, culture, institutions of U.S. and European countries. Fertility to football, guns to government, work to welfare, health to housework. Cross-national approaches for understanding the world and thinking critically about taken-for-granted practices. Policies the U.S. might borrow for social issues.

Same as INTL ST 157C.

**SOCIOL 158C. Money, Work, and Social Life . 4 Units.**

Sociological perspective on issues related to money and work. Consumption practices and lifestyles, jobs and organizations, issues of money in intimate relations, marriage, and households, illegal work, discrimination, economic globalization are discussed.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 158CW. Money, Work, and Social Life. 4 Units.**

Sociological perspective on issues related to money and work. Consumption practices and lifestyles, jobs and organizations, issues of money in intimate relations, marriage, and households, illegal work, discrimination, economic globalization are discussed.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology Majors have first consideration for enrollment.

**(Ib)**

**SOCIOL 159. Special Topics: Social Institutions and Culture. 4 Units.**

Studies in selected areas of social institutions and culture. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 161. Sociology of Sex and Gender. 4 Units.**

Explores complex processes contributing to social construction of gender and sexuality in the U.S. with focus on intersection of gender, race, ethnicity, sexuality, and class; evaluates how men and women are differentially constituted in family, education, work, politics, media, language.

**SOCIOL 161W. Sociology of Sex and Gender. 4 Units.**

Explores complex processes contributing to social construction of gender and sexuality in the U.S. with focus on intersection of gender, race, ethnicity, sexuality, and class; evaluates how men and women are differentially constituted in family, education, work, politics, media, language.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

**SOCIOL 164. Sociology of Aging . 4 Units.**

Introduction to sociology of age, aging, and the aged. Problems posed by aging population. Life course transitions and how social organizations influence the life course. Addresses work, health, and family in later life.

Overlaps with SOCIOL 164W.

Restriction: Upper-division students only. Sociology Majors have first consideration for enrollment.

**SOCIOL 164W. Sociology of Aging . 4 Units.**

Introduction to sociology of age, aging, and the aged. Problems posed by aging population. Life course transitions. How social organizations influence the life course. Work, health, family in later life.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Sociology Majors have first consideration for enrollment.

(Ib)

**SOCIOL 166. Immigration and Inequality. 4 Units.**

Explores immigration, ethnicity, and inequality as interconnected social forces. International migration, propelled by global inequalities, plays a central role in the formation of multinational societies, shapes inter-group relations and patterns of ethnic inequality, and transforms the immigrants themselves.

Same as SOC SCI 168B.

**SOCIOL 167A. Racial and Ethnic Relations in the United States. 4 Units.**

Examines central questions and issues in the field of race and ethnicity; the emergence, maintenance, and consequences of the ethnic and racial stratification system in the United States; the future of racial and ethnic relations; and relevant public policy issues.

Same as CHC/LAT 148.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**SOCIOL 167AW. Racial and Ethnic Relations in the United States. 4 Units.**

Examines central questions and issues in the field of race and ethnicity; the emergence, maintenance, and consequences of the ethnic and racial stratification system in the United States; the future of racial and ethnic relations; and relevant public policy issues.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as CHC/LAT 148W.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

(Ib)

**SOCIOL 169. Special Topics in Age, Gender, Race, and Ethnicity. 4 Units.**

Studies in selected areas of age, gender, race, and ethnicity. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 170A. Vietnam War. 4 Units.**

Examines social structures and social changes in Vietnamese and U.S. societies through the study of the Vietnam War.

Same as INTL ST 143A.

**SOCIOL 170B. U.S. War on Terrorism. 4.0 Units.**

Analyzes the United States war on terrorism by focusing on terrorism, the U.S. wars in Afghanistan and Iraq, and changes in police powers through the Patriot Act, as well as the political leadership which directs the war.

Same as INTL ST 175A.

**SOCIOL 171. Environment and Society. 4 Units.**

Examines society's changing relationship to the natural world. Delineates different models of 'nature' and then explores their institutional roots, the social responses they have generated, and their implications for social inequality.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 172. Revolution and Social Transformation in China. 4 Units.**

Introduces the major political events in Mao's communist revolution and the social transformations afterward. Helps students understand the historic and political landscape from which China is now departing.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 173. Social Inequality. 4 Units.**

Sources, functions, and dynamics of the unequal distribution of wealth, prestige, knowledge, and power in American and other societies.

Overlaps with SOCIOL 173W.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 173W. Social Inequality. 4 Units.**

Sources, functions, and dynamics of the unequal distribution of wealth, prestige, knowledge, and power in American and other societies.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Overlaps with SOCIOL 173.

Restriction: Upper-division students only.

**(Ib)****SOCIOL 174. Protests, Movements, and Revolutions. 4 Units.**

A survey of models of collective action drawn from sociology, economics, psychology, and political science. Focus on areas such as social movements, strikes, crowd psychology, cults, fads, fashions, public opinion, and symbolic and mythical elements in collective culture.

Prerequisite: SOCIOL 1 or POL SCI 11A or ECON 1

Same as POL SCI 156D.

Restriction: Political Science Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**SOCIOL 175B. China in the Global Age. 4 Units.**

Chinese society from 1949 to present. Social change in the context of political control and ideological considerations. Focus on the power structure, political decision processes, and ideological legitimation, and interplay with the Chinese community and its culture.

Same as INTL ST 158D.

**SOCIOL 176. International Divided Cities. 4 Units.**

Investigates urban divisions in international cities where deep-seated nationalistic ethnic differences create pressures for intergroup conflicts, autonomy, or territorial separation, and can incite violence. Urban political polarization as it is manifest in the urban setting.

Same as POL SCI 157B, UPPP 178.

**SOCIOL 177. Immigration and Social Policy. 4 Units.**

Explains how people decide to migrate and how they are incorporated into a host society (both historically and currently), examines the effects of immigration on the U.S., analyzes how the framing of immigration shapes the discourse about the issue.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 177C. Undocumented Immigrant Experiences. 4 Units.**

Examines the experiences of undocumented immigrants and the policies that structure their educational, economic, social, and political participation.

Same as ASIANAM 130, CRM/LAW C187, CHC/LAT 164A.

(III and VII ).

**SOCIOL 177W. Immigration and Social Policy. 4 Units.**

Explains how people decide to migrate and how they are incorporated into a host society (both historically and currently), examines the effects of immigration on the U.S., analyzes how the framing of immigration shapes the discourse about the issue.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology Majors have first consideration for enrollment.

(Ib)

**SOCIOL 179. Special Topics: Societies and Social Inequality. 4 Units.**

Studies in selected areas of societies and social inequality. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 180A. Sociology Majors Seminar. 4 Units.**

Students learn sociology by doing it. A modest-sized research project is planned and implemented by each student.

Prerequisite: SOCIOL 110

Restriction: Sociology Majors only.

**SOCIOL 180AW. Sociology Majors Seminar. 4 Units.**

Students learn sociology by doing it. A modest-sized research project is planned and implemented by each student.

Prerequisite: SOCIOL 110. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology Majors only.

(Ib)

**SOCIOL 188BW. Honors Research and Thesis. 4 Units.**

Focuses on the design and implementation of individual research projects undertaken by senior Sociology majors. Writing projects consist of a proposal and paper on some empirical research.

Prerequisite: SOCIOL H188A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology Honors students only.

(Ib)

**SOCIOL H188A. Honors Research and Thesis. 4 Units.**

Focuses on the design and implementation of individual research projects undertaken by senior Sociology majors. Writing projects consist of a proposal and paper on some empirical research.

Restriction: Sociology Honors students only.

**SOCIOL 189. Special Topics: Honors Sequence. 4 Units.**

Independent honors research with Social Sciences faculty.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 197. Field Study. 4 Units.**

Field study with Sociology faculty.

Repeatability: May be repeated for credit unlimited times.

**SOCIOL 198. Directed Group Study . 4 Units.**

Directed study with Sociology faculty.

Repeatability: May be repeated for credit unlimited times.

**SOCIOL 199. Independent Study. 1-4 Units.**

Independent research with Sociology faculty.

Repeatability: May be repeated for credit unlimited times.

**SOCIOL 202A. Proseminar I in Sociology. 1 Unit.**

Introduces first-year graduate students in Sociology to the current research interests of Sociology faculty, as well as to other aspects of graduate life at UCI and to the profession of sociology more generally.

Restriction: Graduate students only.

**SOCIOL 202B. Proseminar II in Sociology. 4 Units.**

Focus is on second-year research projects, design, development, data gathering, analysis, and preparing oral and written presentations of the results. Students learn analytic and writing skills, gain experience with research processes, and become socialized about professional standards, customs, and institutions.

Restriction: Graduate students only.

**SOCIOL 210A. Classical Social Theory. 4 Units.**

Examines the development of classical sociological theory through the writings of Karl Marx, Emile Durkheim, Max Weber, Georg Simmel, and George Herbert Mead.

Restriction: Graduate students only.

**SOCIOL 210B. Contemporary Social Theory. 4 Units.**

Familiarizes students with 20th-century developments in social thought that have influenced sociological research, suggesting 'what is living and what is dead' in the 'classics' and offering an overview of the main outlines of recent sociological theorizing.

Restriction: Graduate students only.

**SOCIOL 211A. Sociology of Gender. 4 Units.**

An introduction to the sociology of gender in the U.S. and globally. The social construction of gender and sexuality; theoretical perspectives and feminist frameworks. Theories of economy, patriarchy, and race, and the social positions of women and men.

Restriction: Graduate students only.

**SOCIOL 212. Network Theory. 4 Units.**

An introduction to theoretical work in the field of social networks. Topics include baseline models, homophily, and propinquity, exchange and power, balance theory, diffusion and social influence, equivalence, and cohesion. Deductive use of theory to make novel predictions is emphasized.

Restriction: Graduate students only.

**SOCIOL 219. Special Topics: Theory. 2-4 Units.**

Studies in selected areas of theory. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SOCIOL 220A. Research Design. 4 Units.**

Data collection, organization, and analysis in ethnographic or quasi-experimental settings, including interviewing, participant observations, behavior observations, and questionnaires. Research design issues include sampling, longitudinal research, and comparative research. Emphasis on the integration of qualitative and quantitative data.

Overlaps with SOCIOL 265.

Restriction: Graduate students only.

**SOCIOL 221A. Graduate Statistics I. 4 Units.**

Statistics with emphasis on applications in sociology and anthropology. Examines exploratory uses of statistical tools in these fields as well as univariate, bivariate, and multivariate applications in the context of the general linear model.

Restriction: Graduate students only.

**SOCIOL 221B. Graduate Statistics II. 4 Units.**

Statistics with emphasis on applications in sociology and anthropology. Examines exploratory uses of statistical tools in these fields as well as univariate, bivariate, and multivariate applications in the context of the general linear model.

Prerequisite: SOCIOL 221A

Restriction: Graduate students only.

**SOCIOL 221C. Graduate Statistics III. 4 Units.**

Statistics with emphasis on applications in sociology and anthropology. Examines exploratory uses of statistical tools in these fields as well as univariate, bivariate, and multivariate applications in the context of the general linear model.

Prerequisite: SOCIOL 221A and SOCIOL 221B

Restriction: Graduate students only.

**SOCIOL 222A. Comparative and Historical Sociological Methods. 4 Units.**

Topics include the logic of comparative and historical analysis techniques and the examination of exemplar works in representative problem areas.

Restriction: Graduate students only.

**SOCIOL 224. Interview Methods . 4 Units.**

Hands-on introduction to the use of interviews in social scientific research. Topics include when to use interviews and/or focus groups; how to design an interview-based study, how to conduct interviews, analyze interview data, and write up and publish interview-based results.

Restriction: Graduate students only.

**SOCIOL 226A. Methods of Demographic Analysis. 4 Units.**

Introduces basic demographic methods used in social science and public health research. Topics include sources and limitations of demographic data; components of population growth; measures of nuptiality, fertility, mortality, and population mobility projection methods; and demographic models.

Same as PUBHLTH 209.

Restriction: Graduate students only.

**SOCIOL 227A. Seminar Ethnographic & Qualitative Field Methods. 4 Units.**

Comprehensive and critical discussion of the traditions of qualitative fieldwork; detailed examination of the collection, coding, analysis, and presentation of ethnographic/qualitative field data; and close mentoring of student projects culminating in an original research paper.

Grading Option: In Progress (Letter Grade with S/U).

Restriction: Graduate students only.

**SOCIOL 227B. Seminar Ethnographic & Qualitative Field Methods. 4 Units.**

Comprehensive and critical discussion of the traditions of qualitative fieldwork; detailed examination of the collection, coding, analysis, and presentation of ethnographic/qualitative field data; and close mentoring of student projects culminating in an original research paper.

Prerequisite: SOCIOL 227A

Restriction: Graduate students only.

**SOCIOL 229. Special Topics: Methods . 1-4 Units.**

Studies in selected areas of methods. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SOCIOL 230A. Race and Ethnicity. 4 Units.**

An examination of central questions and issues in the field of race and ethnicity through a critical analysis and discussion of the principal theoretical perspectives and paradigms that have framed much of the scholarship in the area.

Restriction: Graduate students only.

**SOCIOL 232. Inequality. 4 Units.**

Theoretical and empirical approaches to the study of social and economic inequality, with special attention to race/ethnicity, class, and gender.

Restriction: Graduate students only.

**SOCIOL 234. Ethnic America. 4 Units.**

Examines critically the meaning and measurement of ethnicity, race, and nation in sociological theory and research. Theories of ethnicity are explored, along with empirical studies of the construction of ethnic and pan-ethnic identities in historical and contemporary contexts.

Same as CHC/LAT 223.

Restriction: Graduate students only.

**SOCIOL 235. Poverty and Development . 4 Units.**

Examines competing conceptualizations, methods of measurement, and poverty alleviation strategies widely used in developing countries. Focuses on poverty conceptualized as economic deprivation, well-being, vulnerability, and social exclusion.

Same as UPPP 251.

Restriction: Graduate students only.

**SOCIOL 237. Educational Inequality. 4 Units.**

Focuses on macro-level explanations of inequality of schooling, particularly in the U.S. context. Explores traditional models, such as conflict, functionalism, status-attainment, cultural reproduction, and newer synthetic accounts. Emphasis on higher education access and the intersection of education and work.

Restriction: Graduate students only.

**SOCIOL 239. Special Topics: Social Inequality. 2-4 Units.**

Studies in selected areas of social inequality. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SOCIOL 240A. Social Movements. 4 Units.**

A survey of the field of Social Movements, oriented around critical themes in the major theoretical traditions and contemporary exemplars.

Restriction: Graduate students only.

**SOCIOL 241A. Political Sociology. 4 Units.**

Begins with an examination of the three major orientations to the State (Pluralist, Elitist, and Class). Next considers current topics in political sociology including the Welfare State, the New Deal, political behavior, social movements, participation, and democracy.

Restriction: Graduate students only.

**SOCIOL 242. Sociology of Culture. 4 Units.**

Major perspectives in the sociology of culture. Topics include the role of cultural dynamics in the reproduction of inequality, collective action, political and organizational decision making, emotional experience, and the social impacts of new technologies.

**SOCIOL 249. Special Topics: Political Sociology and Social Movements. 2-4 Units.**

Studies in selected areas of political sociology and social movements. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SOCIOL 252A. Global Urbanization. 4 Units.**

Examines the spread of cities worldwide in the 20th century. What are the political and economic causes of this process? What are the social-cultural, political, and economic effects? How is contemporary urbanization linked to global restructuring of other kinds.

Same as UPPP 273.

Restriction: Graduate students only.

**SOCIOL 259. Special Topics: Global Studies and Comparative Development. 2-4 Units.**

Studies in selected areas of global studies and comparative development. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SOCIOL 262A. Population. 4 Units.**

Introduces the interrelationships between population and social organization. Considers measurement and explanation of historical and contemporary trends in birth rates, death rates, migration, and marriage and divorce. Case material is drawn primarily from the U.S. and other industrialized nations.

Restriction: Graduate students only.

**SOCIOL 264. Immigrant America. 4 Units.**

The study of the causes and consequences of international migration has become one of the most vital fields of sociological theory and research. Examines principal theoretical perspectives and empirical research on contemporary immigration flows and the processes of incorporation.

Same as CHC/LAT 224.

Restriction: Graduate students only.

**SOCIOL 265. DASA Research Design. 4 Units.**

Data collection, organization, and analysis in population studies and demography. Research design issues include sampling, longitudinal research, and comparative research.

Prerequisite: Enrollment in DASA program.

Overlaps with SOCIOL 220A.

Restriction: Graduate students only.

**SOCIOL 268. Crimmigration. 4 Units.**

Examines the criminalization of immigration, with an emphasis on U.S. enforcement procedures and outcomes. Analyzes the devolution of federal immigration law to local authorities, the rise in immigrant detention and deportation, and the militarization of the U.S.-Mexico border.

Same as CHC/LAT 225, CRM/LAW C258.

Restriction: Graduate students only.

**SOCIOL 269. Special Topics: Social Demography. 4 Units.**

Studies in selected areas of social demography. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SOCIOL 279. Special Topics: Social Organizations and Institutions. 2-4 Units.**

Studies in selected areas of social organizations and institutions. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SOCIOL 280. Analysis of Social Network Data. 4 Units.**

Overview and application of methods for analyzing social network data. Topics include: data structures, visualization, graph theory, centrality, subgroups, positions, blockmodels, local properties, and statistical models. Social network analysis software is used to analyze a range of examples.

Restriction: Graduate students only.

**SOCIOL 281. Introduction to Social Networks. 4 Units.**

Provides a broad overview of the history, concepts, and applications of social networks. Students have the opportunity to delve deeply into applications of the network approach in their individual areas of interest.

Restriction: Graduate students only.

**SOCIOL 282. Theorizing Illegality and the Experiences of Undocumented Immigrants. 4 Units.**

Examines theories of illegality and citizenship, historical and contemporary undocumented immigrant experiences, and methodological concerns in this area of study.

Same as CHC/LAT 222.

Restriction: Graduate students only.

**SOCIOL 289. Special Topics . 2-4 Units.**

Studies in selected areas of Social Sciences. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SOCIOL 290. Dissertation Research. 1-12 Units.**

Dissertation research with Sociology faculty.

Repeatability: May be taken for credit 10 times.

Restriction: Graduate students only.

**SOCIOL 299. Independent Study. 1-12 Units.**

Independent research with Sociology faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Software Engineering (SWE)

### Courses

**SWE 211. Software Engineering. 4 Units.**

Study of the concepts, methods, and tools for the analysis, design, construction, and measurement of complex software-intensive systems. Underlying principles emphasized. State-of-the-art software engineering and promising research areas covered, including project management.

**SWE 212. Analysis of Programming Languages. 4 Units.**

Concepts in modern programming languages, their interaction, and the relationship between programming languages and methods for large-scale, extensible software development. Empirical analysis of programming language usage.

Same as CS 253.

**SWE 213. Requirements Engineering and Specification. 4 Units.**

Rigorous techniques in requirements engineering - the requirements definition phase of software development - with a focus on modeling and specification. Topics include notations and models for requirements specification; and methods, tools, and processes for software requirements elicitation, representation, analysis.

Restriction: Graduate students only.

**SWE 214. Program Analysis. 4 Units.**

Covers principles and concepts of automated program analysis. Topics include program representations; intra-procedural data-flow analysis; call-graph construction; pointer analysis; alias analysis; inter-procedural analysis; inter-procedural finite distributive subset problems; inter-procedural distributive environment problems; symbolic execution; and program-analysis applications.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Graduate students only.

**SWE 215. Software Analysis and Testing. 4 Units.**

Studies techniques for developing confidence in software from traditional testing schemes to integrated, multitechnique analytic approaches. Considers strengths and weaknesses and explores opportunities for synergistic technique application. Emphasis is on approaches integrated into the software process.

Restriction: Graduate students only.

**SWE 221. Software Architecture. 4 Units.**

Study of the concepts, representation techniques, development methods, and tools for architecture-centric software engineering. Topics include domain-specific software architectures, architectural styles, architecture description languages, software connectors, and dynamism in architectures.

Restriction: Graduate students only.

**SWE 225. Information Retrieval, Filtering, and Classification. 4 Units.**

Algorithms for the storage, retrieval, filtering, and classification of textual and multimedia data. The vector space model, Boolean and probabilistic queries, and relevance feedback. Latent semantic indexing; collaborative filtering; and relationship to machine learning methods.

Prerequisite: CS 161 and CS 171 and (ICS 6N or MATH 3A or MATH 6G)

Same as CS 221.

Restriction: Graduate students only.

**SWE 233. Intelligent User Interfaces. 4 Units.**

Explores example software systems and their underlying concepts that leverage computing to empower and augment human individuals in their activities. Topics span the fields of user interface design, human-computer interaction, software engineering, and cognitive computing.

Prerequisite: CS 171

Restriction: Graduate students only.

**SWE 234. Human Aspects of Software Engineering. 4 Units.**

Selected topics about the cooperative and human aspects of software engineering from the perspective that software engineering is inherently an endeavor involving human stakeholders. Topics may include but are not limited to collaboration, trust, emotion, language, gender, and software tools.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Graduate students only.

**SWE 241P. Applied Data Structures and Algorithms. 2 Units.**

Exploration of strategies to tackle computational problems whose solutions include well-known algorithms and data structures. Topics include sorting, searching, indexing, among others.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only.

**SWE 242P. Network Programming. 2 Units.**

Exploration of networking principles and concepts for the development of distributed software. Topics include programming against well-known network protocols, ports and sockets, and network APIs.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only.

**SWE 243P. Database Programming . 2 Units.**

Exploration of software development with substantial reliance on a database for storage and retrieval of data. Topics include relational databases, structured query language, relational database management systems, APIs and libraries for database programming, among others.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only.

**SWE 244P. Concurrent Programming. 2 Units.**

Exploration of concepts and mechanisms for the development of concurrent software. Topics include threads, locks, race conditions, and deadlocks, among others.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 245P. GUI Programming . 2 Units.**

Exploration of interactive software with substantial graphical user interface elements. Topics include libraries and frameworks for GUI programming, layout design and alternatives, event-driven programming, among others.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 246P. Mobile Programming. 2 Units.**

Exploration of contemporary libraries and frameworks for construction of mobile applications. Topics include emulators, mobile development standards and patterns, energy consumption issues, screen layout, among others.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 247P. Applied Information Retrieval. 2 Units.**

Exploration of principles and concepts for textual information retrieval. Topics include tokenization, inverted indexes, scored retrieval, and precision and recall.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 248P. Neural Network Programming . 2 Units.**

Exploration of the concepts, terminology, and processes for training and using deep neural networks for classification problems. Topics include tensors and tensor operations, gradient-based optimization, feature engineering and learning, and workflow of learning systems.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 249P. Applied Data Analytics. 2 Units.**

Exploration of the concepts, terminology, and processes used in supervised and unsupervised learning for classification and clustering, from a software engineering perspective. Topics include K-Nearest Neighbors, Logistic Regression, Random Forests, Support Vector Machines, K-Means, and model assessment.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only.

**SWE 250P. Web Programming. 2 Units.**

Exploration of the concepts, terminology, and popular frameworks for developing full-stack web applications. Students develop simple applications using multiple development stacks, and deploy them on the cloud.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only.

**SWE 261P. Software Testing and Debugging. 4 Units.**

Designed to teach students how to ensure high-quality software by means of testing, debugging, and other quality assurance activities. Students learn a combination of both theoretical and practical skills, including hands-on experience with modern tools and approaches.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 262P. Programming Styles. 4 Units.**

Designed to teach students the various ways software can be decomposed and put back together. Students are exposed to a variety of different programming styles and composition mechanisms.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 263P. User Experience and Interaction. 4 Units.**

Provides an introduction to the basic principles of human-computer interaction (HCI) and the pragmatic aspects of usability engineering. Topics include the fundamentals of interaction, user experience, design for usability, and evaluation of products for their usability.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 264P. Distributed Software Architecture. 4 Units.**

Study of software system architectures and architectural styles for large-scale distributed applications, and contemporary technologies and standards for their construction. Topics include client-server, peer-to-peer, publish-subscribe, REST, cloud computing, content distribution networks, scalability, latency, caching, and security, among others.

Restriction: Master of Software Engineering Degree students only.

**SWE 265P. Reverse Engineering and Modeling. 4 Units.**

Introduces theories, concepts, representations, techniques, and case studies in understanding large-scale, complex software systems. Topics include static and dynamic modeling notations, manual and (semi-)automated reverse engineering techniques, APIs, patterns, and styles. A significant, hands-on project is included.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 266P. Software Security and Dependability . 4 Units.**

Principles and concepts for the design and construction of secure software. Topics include common types of software security vulnerabilities, methods for detecting vulnerabilities, design and process methodologies to improve security of software, and techniques for assessing security properties of software.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 271P. Career and Entrepreneurship. 4 Units.**

Teaches practical skills for spoken, written, and electronic communication in a range of business and technical contexts, including promoting project ideas and portfolio development. Students practice their skills in classroom presentations and written exercises.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 272P. Project Management. 4 Units.**

Provides an introduction to project management in software engineering from several perspectives. Topics include team behavior; globally distributed work; resource estimation, scheduling, and budgeting. Students apply their knowledge in an ongoing class project.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 275P. Curricular Practical Training. 1 Unit.**

Mandatory internship in which students individually work at an outside organization to gain experience with the challenges involved in the practice of software engineering.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 276P. Capstone Project in Software Engineering. 4 Units.**

Quarter-long software-intensive project focusing on the design and implementation of a novel software system. Students are expected to bring to bear the concepts acquired during the program.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 290. Research Seminar. 2 Units.**

Forum for presentation and criticism by students of research work in progress. Presentation of problem areas and related work. Specific goals and progress of research.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**SWE 290P. Advisement. 0.3 Units.**

Mandatory weekly meetings with a faculty advisor.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 295. Special Topics in Software Engineering. 4 Units.**

Studies in selected areas of software engineering. Topics addressed vary each quarter.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**SWE 298. Thesis Supervision. 2-12 Units.**

Individual research or investigation conducted in preparation for the M.S. thesis option or the dissertation requirements for the Ph.D. program.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**SWE 299. Individual Study. 1-12 Units.**

Individual research or investigation under the direction of an individual faculty member.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Spanish (SPANISH)

### Courses

**SPANISH 1A. Fundamentals of Spanish. 5 Units.**

Communicative approach with emphasis on conversational skills: the students and their environment, their experiences, and their opinions about issues. Reading and writing skills also introduced.

Prerequisite: Placement into SPANISH 1A.

Overlaps with SPANISH 1AB, SPANISH S1AB.

Restriction: SPANISH 1A and SPANISH 1AB and SPANISH S1AB may not be taken for full credit.

**SPANISH 1AB. Fundamentals Intensive Spanish. 10 Units.**

An intensive, proficiency-oriented, and task-based approach, designed to develop basic oral communicative abilities in Spanish. Reading and writing skills, along with an introduction to Hispanic cultures.

Prerequisite: Placement into SPANISH 1A.

Overlaps with SPANISH 1A, SPANISH 1B, SPANISH S1AB.

Restriction: SPANISH 1AB and SPANISH 1A and SPANISH 1B and SPANISH S1AB may not be taken for full credit.

**SPANISH 1B. Fundamentals of Spanish. 5 Units.**

Communicative approach with emphasis on conversational skills: the students and their environment, their experiences, and their opinions about issues. Reading and writing skills also introduced.

Prerequisite: SPANISH 1A. SPANISH 1A with a grade of C or better. Placement into SPANISH 1B is also accepted.

Overlaps with SPANISH 1AB, SPANISH S1AB.

Restriction: SPANISH 1B and SPANISH 1AB and SPANISH S1AB may not be taken for full credit.

**SPANISH 1C. Fundamentals of Spanish. 5 Units.**

Communicative approach with emphasis on conversational skills: the students and their environment, their experiences, and their opinions about issues. Reading and writing skills also introduced.

Prerequisite: SPANISH 1AB or SPANISH 1B or SPANISH S1AB. SPANISH 1AB with a grade of C or better. SPANISH 1B with a grade of C or better. SPANISH S1AB with a grade of B or better. Placement into SPANISH 1C is also accepted.

Overlaps with SPANISH S1BC.

Restriction: SPANISH 1C and SPANISH S1BC may not be taken for full credit.

(VI)

**SPANISH S1AB. Fundamentals of Spanish. 7.5 Units.**

First half of first-year Spanish in an intensified form. Communicative approach with emphasis on conversational skills.

Prerequisite: Placement into SPANISH 1A.

Overlaps with SPANISH 1A, SPANISH 1B, SPANISH 1AB.

Restriction: SPANISH S1AB and SPANISH 1A and SPANISH 1B and SPANISH 1AB may not be taken for full credit.

**SPANISH S1BC. Fundamentals of Spanish. 7.5 Units.**

Second half of first-year Spanish in an intensified form. Communicative approach with emphasis on conversational skills.

Prerequisite: SPANISH S1AB or SPANISH 1A or SPANISH 1B. SPANISH S1AB with a grade of C or better. SPANISH 1A with a grade of C or better. SPANISH 1B with a grade of C or better. Placement into SPANISH 1B or SPANISH 1C is also accepted.

Overlaps with SPANISH 1B, SPANISH 1C, SPANISH 1AB.

Restriction: SPANISH S1BC and SPANISH 1B and SPANISH 1C and SPANISH 1AB may not be taken for full credit.

**(VI)****SPANISH 2A. Intermediate Spanish. 4 Units.**

Conversation, reading, and composition skills are developed using texts of literary and social interest. Emphasis on grammar review.

Prerequisite: SPANISH 1C or SPANISH S1BC. SPANISH 1C with a grade of C or better. SPANISH S1BC with a grade of C or better. Placement into SPANISH 2A is also accepted.

Overlaps with SPANISH 2AB, SPANISH S2AB.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)****SPANISH 2AB. Intermediate Intensive Spanish. 8 Units.**

Intensive intermediate course designed to improve student's abilities in reading, writing, speaking, and comprehension, including a thorough introduction to Hispanic cultures. Grammatical component of the language is gradually reviewed and tested.

Prerequisite: SPANISH 1C or SPANISH S1BC. SPANISH 1C with a grade of C or better. SPANISH S1BC with a grade of C or better. Placement into SPANISH 2A is also accepted.

Overlaps with SPANISH 2A, SPANISH 2B, SPANISH S2AB.

**(VIII)****SPANISH 2B. Intermediate Spanish. 4 Units.**

Conversation, reading, and composition skills are developed using texts of literary and social interest. Emphasis on grammar review.

Prerequisite: SPANISH 2A. SPANISH 2A with a grade of C or better. Placement into SPANISH 2B is also accepted.

Overlaps with SPANISH 2AB, SPANISH S2AB.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)****SPANISH 2C. Intermediate Spanish. 4 Units.**

Conversation, reading, and composition skills are developed using texts of literary and social interest. Emphasis on grammar review.

Prerequisite: SPANISH 2AB or SPANISH 2B or SPANISH S2AB. SPANISH 2AB with a grade of C or better. SPANISH 2B with a grade of C or better. SPANISH S2AB with a grade of B or better. Placement into SPANISH 2C is also accepted.

Overlaps with SPANISH S2BC.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)**

**SPANISH S2AB. Intermediate Spanish. 6 Units.**

First half of second-year Spanish in an intensified form. Conversation, reading, and composition skills are developed using texts of literary and social interest. Emphasis on grammar review.

Prerequisite: SPANISH 1C or SPANISH S1BC. SPANISH 1C with a grade of C or better. SPANISH S1BC with a grade of C or better. Placement into SPANISH 2A is also accepted.

Overlaps with SPANISH 2A, SPANISH 2B, SPANISH 2AB.

**(VIII)****SPANISH S2BC. Intermediate Spanish. 6 Units.**

Second half of second-year Spanish in an intensified form. Conversation, reading, and composition skills are developed using texts of literary and social interest. Emphasis on grammar review.

Prerequisite: SPANISH 2B or SPANISH S2AB or SPANISH 2A. SPANISH 2B with a grade of C or better. SPANISH S2AB with a grade of C or better. SPANISH 2A with a grade of B or better. Placement into SPANISH 2B or SPANISH 2C is also accepted.

Overlaps with SPANISH 2B, SPANISH 2C, SPANISH 2AB, SPANISH 2.

Restriction: SPANISH S2BC and SPANISH 2B and SPANISH 2C and SPANISH 2AB and SPANISH 2 may not be taken for full credit.

**(VIII)****SPANISH 3. US Latino Communities. 4 Units.**

Focuses on intermediate to advanced grammar and composition. Emphasis is placed on key elements of grammar, which constitutes about 70 percent of the curriculum, and composition writing, which constitutes the remaining 30 percent.

Prerequisite: SPANISH 2C or SPANISH S2BC. SPANISH 2C with a grade of C or better. SPANISH S2BC with a grade of C or better. Placement into SPANISH 3 is also accepted.

Overlaps with SPANISH 3H.

**(VIII)****SPANISH 3H. Heritage Spanish: Latinidad. 4 Units.**

Designed for students who grew up speaking Spanish in their homes/communities, whose schooling has been primarily in English, and need additional practice writing in Spanish.

Prerequisite: Placement into SPANISH 3H.

Overlaps with SPANISH 3.

**(VII)****SPANISH 44. Hispanic Literatures for Nonmajors. 4 Units.**

Focuses on major Spanish and Latin American literary texts within a historical and theoretical perspective. Taught in English with literary texts read in the original language.

Prerequisite: SPANISH 2 or SPANISH 2C or SPANISH S2BC

Restriction: No Spanish Majors.

**(VIII)****SPANISH 50. Latin America, U.S. Latino, and Iberian Cultures. 4 Units.**

Introduction (for non-majors) to the culture of the Spanish- and Portuguese-speaking worlds (Europe, Latin America, U.S., Africa). May focus on any time period. Taught in English.

Repeatability: May be taken for credit 3 times as topics vary.

**(IV and VIII ).**

**SPANISH 60E. Mexico and Central America: A Survey . 4 Units.**

Panoramic view of Mexico and Central America examining key texts throughout history. Shows the richness of the culture, and an appraisal of various forms of representation, including images, chronicles, novels, essays, poems, and a film. Taught in English.

Overlaps with SPANISH 60S.

(IV and VIII ).

**SPANISH 60S. Mexico and Central America: A Survey . 4 Units.**

Panoramic view of Mexico and Central America examining key texts throughout history. Shows the richness of the culture, and an appraisal of various forms of representation, including images, chronicles, novels, essays, poems, and a film. Taught in Spanish.

Prerequisite: Placement into SPANISH 2A or higher via Spanish Placement Test B is required.

Overlaps with SPANISH 60E.

(IV and VIII ).

**SPANISH 61. The Culture of the Visual Image in Latin America . 4 Units.**

A survey of visual forms of expression which have endured through more than five centuries of pre-colonial, colonial, and independent Latin America. Forms to be treated in the class include painting, monuments, sculpture, urban planning, graffiti, comics, and photography.

(IV and VIII ).

**SPANISH 62. Latinx, Multilingualism, and Social Justice . 4 Units.**

Explores the role of multilingualism (Spanish, indigenous languages, Latino English) in Latinx social justice movements in the United States with an emphasis on California. Course is taught in English.

(VII)

**SPANISH 97. Fundamentals of Spanish (with Emphasis on Reading). 4 Units.**

Designed for students interested in acquiring a solid reading knowledge of Spanish, and to facilitate the understanding and translating of Spanish texts covering a variety of disciplines. Does not fulfill any undergraduate foreign language requirement. Taught in English.

Prerequisite: Does not serve as prerequisite for any higher-level Spanish courses.

Restriction: No Spanish Majors.

**SPANISH 101A. Introduction to Iberian Literature and Culture. 4 Units.**

Introduction to the major authors and movements of Iberian literature and culture from the Middle Ages to the present.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

**SPANISH 101B. Introductory Studies to Latin American Literature and Culture. 4 Units.**

A historical overview of Latin American literature and culture mainly focused on canonical texts. Topics include colonialism and postcolonialism, the nation, indigenismo, gender, and literary movements. Also introduces literary analysis, research methods, and cultural critique.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

**SPANISH 104. Writing in Spanish. 4 Units.**

Focuses on the use of writing as a medium to encourage critical thinking and the practical analysis of literary texts, as well as the study of historical and social issues in the Spanish-speaking world.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

**SPANISH 105. Spanish Communication. 4 Units.**

Designed to help students develop Spanish oral skills by exposing them to different verbal Spanish language registers. Special emphasis placed on abilities essential to professional or academic careers. Intended for Spanish majors as an important component of their overall education.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

**SPANISH 107. Advanced Spanish Grammar. 4 Units.**

Designed for students who have demonstrated a substantial level of proficiency in their studies of the Spanish language. Takes thorough approach to advanced grammatical problems, in order to assist students in their mastery of the elements of the Spanish language.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

**SPANISH 110A. Topics in Peninsular Literature and Cultures. 4 Units.**

Topics in Peninsular literature and cultures.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: Unlimited as topics vary.

**SPANISH 110B. Topics in Latin American Literature and Cultures. 4 Units.**

Topics in Latin American literature and cultures.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: Unlimited as topics vary.

**SPANISH 110C. U.S. Latino Literature and Cultures. 4 Units.**

Focuses on aspects of literature, art, cultural production, and history of the multifaceted Latino cultures that have developed within the United States. Focuses on one group, such as Caribbean Americans, Chicanos, Central Americans, or a comparative perspective of several groups.

Same as CHC/LAT 134.

**SPANISH 113A. Spanish Phonetics. 4 Units.**

Introduction to fundamental notions of Spanish phonetics. Particular attention paid to problems of pronunciation that arise in native and non-native speakers of Spanish due to interference between Spanish and English. Phonology (the system that underlies phonetics) and Spanish dialectology included.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

**SPANISH 113B. Introduction to Spanish Linguistics. 4 Units.**

Application of basic notions of linguistics to Spanish, Spanish phonology, morphology, syntax, and semantics. Special attention to the application of linguistics to the teaching of Spanish.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

**SPANISH 119. Textual Analysis and Interpretation. 4 Units.**

Focus on analysis and interpretation of literary texts. Emphasis on narrative, poetry, theater/performance, and visual media. Introduces students to major currents in theoretical thought, such as cultural studies, postmodernism, and others. Oral presentations and short essays required. Taught in Spanish.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

**SPANISH 121. Topics in Golden Age Literature and Culture. 4 Units.**

Golden Age Literature in Spain, including the Renaissance and Baroque periods. Works of poetry, narrative, and theater. Historical and cultural background.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: May be taken for credit 3 times as topics vary.

**SPANISH 122. Topics in 18th and 19th Century Spanish Literature and Culture. 4 Units.**

The main literary and ideological trends in 18th and 19th century Spain, including the enlightenment, romanticism, realism, and naturalism.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: May be taken for credit 3 times as topics vary.

**SPANISH 123. Topics in 20th and 21st Century Spanish Literature and Culture. 4 Units.**

20th century Spanish authors. Works of poetry, narrative, or theater. Historical context of the period and principles of literary theory.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: May be taken for credit 3 times as topics vary.

**SPANISH 130A. Topics in Latin American Colonial Literature and Culture. 4 Units.**

Topics in Latin American colonial literature and culture.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: Unlimited as topics vary.

**SPANISH 130B. Topics in Latin American Literature and Culture of the 19th Century. 4 Units.**

Topics in Latin American literature and culture of the 19th century.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: Unlimited as topics vary.

**SPANISH 130C. Topics in Latin American Literature and Culture of the 20th Century. 4 Units.**

Topics in Latin American literature and culture of the 20th century.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: Unlimited as topics vary.

**SPANISH 140. Topics in Chicano Literature and Culture. 4 Units.**

Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter. Taught in English.

Repeatability: May be taken for credit 4 times as topics vary.

Same as CHC/LAT 110.

**SPANISH 150. Topics in Literature in Translation. 4 Units.**

Study of texts by modern and contemporary Peninsular, Latin American, and/or U.S. Latino writers in translation. Taught in English. Not applicable toward Spanish major or minor requirements.

Repeatability: Unlimited as topics vary.

**SPANISH 160. Topics in Luso-Hispanic Film Studies. 4 Units.**

Study of Peninsular, Latin-American, and/or U.S. Latino film. Taught in English or Spanish.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: Unlimited as topics vary.

**SPANISH 185. Selected Topics in Peninsular Literature and Culture. 4 Units.**

Selection of representative topics in Spanish and/or Portuguese literature and culture.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: Unlimited as topics vary.

**SPANISH 186. Selected Topics in Latin American Literature and Culture. 4 Units.**

Selection of representative topics in the history of Latin American literature and culture.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: Unlimited as topics vary.

**SPANISH 187. Selected Topics in Spanish Linguistics. 4 Units.**

Major topics in Spanish linguistics.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: Unlimited as topics vary.

**SPANISH 190. Colloquium. 4 Units.**

Specialized, discussion-based course dealing primarily with a research topic that reflects the instructor's current intellectual interests. Required oral presentation(s) and final research paper. Limited to 15 students.

Prerequisite: SPANISH 107 or SPANISH 113A

Restriction: Upper-division students only. Spanish Majors only.

**SPANISH 199. Independent Study. 1-4 Units.**

Research paper required.

Repeatability: May be repeated for credit unlimited times.

**SPANISH 201. History of the Spanish Language. 4 Units.**

Diachronic survey of phonological changes from Latin to Old Spanish to Modern Spanish. Focuses in Castilian including Romance languages and other peninsula dialects for comparative purposes. Morphological changes.

**SPANISH 204. Spanish in Contact. 4 Units.**

Sociohistorical and linguistic overview of Spanish in contact with Basque, Catalan, English, German, American Indian, and African languages in Spain, Latin America, and the United States. Examines theories about language contact, and linguistic changes in Spanish phonology and grammar.

**SPANISH 205. Spanish Dialectology. 4 Units.**

Phonological, morphological, and syntactic variations in Spanish as spoken in the Hispanic world, from synchronic and diachronic points of view. The study of Spanish as spoken in the United States.

Restriction: Graduate students only.

**SPANISH 214. Topics in Golden Age Literature and Culture. 4 Units.**

Topics in Golden Age literature and culture.

Repeatability: Unlimited as topics vary.

**SPANISH 218. Topics in Enlightenment and Romanticism. 4 Units.**

Topics in Enlightenment and Romanticism.

Repeatability: Unlimited as topics vary.

**SPANISH 219. Topics in Nineteenth Century. 4 Units.**

Topics in nineteenth-century Spanish literature and culture.

Repeatability: Unlimited as topics vary.

**SPANISH 220. Topics in Twentieth Century. 4 Units.**

Topics in twentieth-century Spanish literature and culture.

Repeatability: Unlimited as topics vary.

**SPANISH 221. Topics in Iberian Studies. 4 Units.**

Cross-cultural connections and interactions between different ethnicities in the Iberian Peninsula.

Repeatability: Unlimited as topics vary.

**SPANISH 231. Topics in Colonial Latin America. 4 Units.**

Topics in Colonial Latin America.

Repeatability: Unlimited as topics vary.

**SPANISH 232. Topics in Nineteenth-Century Latin America. 4 Units.**

Topics in nineteenth-century Latin America.

Repeatability: Unlimited as topics vary.

**SPANISH 233. Topics in Twentieth-Century Latin America. 4 Units.**

Topics in twentieth-century Latin America.

Repeatability: Unlimited as topics vary.

**SPANISH 234. Topics in Latin America. 4 Units.**

Topics in Latin America.

Repeatability: Unlimited as topics vary.

**SPANISH 235. Topics in Trans-Oceanic Studies. 4 Units.**

Focuses on meaningful connections between different geographical and cultural areas.

Repeatability: Unlimited as topics vary.

**SPANISH 239A. Topics in Literary Theory I. 4 Units.**

Traces the development of Western literary critical principles from Aristotle to the twentieth century through selected readings of key figures in intellectual history (Aristotle, St. Augustine, Descartes, Kant, Hegel, Marx, Nietzsche, William James, Freud).

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SPANISH 239B. Topics in Literary Theory II. 4 Units.**

Study of major critical movements of the twentieth century, from Modernism's varied trends to those of the Postmodern/Postcolonial period. Emphasis on the development of prior critical discourses as well as revisionary theories.

Prerequisite: SPANISH 239A

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SPANISH 239C. Special Topics in Theory. 4 Units.**

Focus on issues related to critical theory, theory of literature, cultural criticism and visual arts as they pertain specifically to Latin America, Spain, Portugal, and Brazil. Topics vary. Examples: Latin American cultural studies; theory, film, and media in post-war Spain.

Repeatability: Unlimited as topics vary.

**SPANISH 245. Topics in Luso-Hispanic Film. 4 Units.**

Topics in Luso-Hispanic Film.

Repeatability: Unlimited as topics vary.

**SPANISH 251. Topics in Chicano Literature and Culture. 4 Units.**

Topics in Chicano Literature and Culture.

Repeatability: Unlimited as topics vary.

**SPANISH 252. Topics in U.S. Latino Literature and Culture. 4 Units.**

Topics in U.S. Latino Literature and Culture.

Repeatability: Unlimited as topics vary.

**SPANISH 260. Seminar in Spanish . 4 Units.**

Topics in Spanish.

Repeatability: Unlimited as topics vary.

**SPANISH 270. Creative Writing Workshop in Spanish/English. 4 Units.**

Discussion of theory and practice of creative writing. Focus on critical analysis of participant's work in progress. Texts may be written in Spanish and/or English and may be written in poetry or prose format.

Repeatability: Unlimited as topics vary.

**SPANISH 290. Individual Study. 4 Units.**

Individual Study.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SPANISH 291. Directed Reading. 4 Units.**

Directed Reading in Spanish.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SPANISH 292. Teaching Practicum. 4 Units.**

Teaching Practicum.

Grading Option: Satisfactory/unsatisfactory only.

**SPANISH 299. Dissertation Research. 4-12 Units.**

Dissertation Research.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Humanities students only.

**SPANISH 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Statistics (STATS)

### Courses

**STATS 5. Seminar in Data Science. 1 Unit.**

An introduction to the field of Data Science; intended for entering freshman and transfers.

Grading Option: Pass/no pass only.

Restriction: Information Computer Science Majors only.

**STATS 7. Basic Statistics. 4 Units.**

Introduces basic inferential statistics including confidence intervals and hypothesis testing on means and proportions, t-distribution, Chi Square, regression and correlation. F-distribution and nonparametric statistics included if time permits.

Overlaps with STATS 8, MGMT 7, SOCECOL 13.

Restriction: STATS 7 may not be taken for credit concurrently with or after STATS 110, STATS 111, STATS 112.

(Va)

**STATS 8. Introduction to Biological Statistics . 4 Units.**

Introductory statistical techniques used to collect and analyze experimental and observational data from health sciences and biology. Includes exploration of data, probability and sampling distributions, basic statistical inference for means and proportions, linear regression, and analysis of variance.

Overlaps with SOCECOL 13, MGMT 7, STATS 7.

Restriction: STATS 8 may not be taken for credit concurrently with or after STATS 110, STATS 111, STATS 112.

(Va)

**STATS 67. Introduction to Probability and Statistics for Computer Science. 4 Units.**

Introduction to the basic concepts of probability and statistics with discussion of applications to computer science.

Prerequisite: MATH 2B

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment. STATS 67 may not be taken for credit concurrently with or after STATS 120B.

(Va)

**STATS 68. Statistical Computing and Exploratory Data Analysis. 4 Units.**

Introduces key concepts in statistical computing. Techniques such as exploratory data analysis, data visualization, simulation, and optimization methods, will be presented in the context of data analysis within a statistical computing environment.

Prerequisite: STATS 7 and I&C SCI 31

**STATS 110. Statistical Methods for Data Analysis I. 4 Units.**

Introduction to statistical methods for analyzing data from experiments and surveys. Methods covered include two-sample procedures, analysis of variance, simple and multiple linear regression.

Prerequisite: STATS 7 or STATS 8 or AP90 or (STATS 120A and STATS 120B and STATS 120C). AP90 with a minimum score of 3

Restriction: School of Info & Computer Sci students only.

**STATS 111. Statistical Methods for Data Analysis II. 4 Units.**

Introduction to statistical methods for analyzing data from surveys or experiments. Emphasizes application and understanding of methods for categorical data including contingency tables, logistic and Poisson regression, loglinear models.

Prerequisite: STATS 110

Concurrent with STATS 202.

**STATS 112. Statistical Methods for Data Analysis III. 4 Units.**

Introduction to statistical methods for analyzing longitudinal data from experiments and cohort studies. Topics covered include survival methods for censored time-to-event data, linear mixed models, non-linear mixed effects models, and generalized estimating equations.

Prerequisite: STATS 111

Concurrent with STATS 203.

**STATS 115. Introduction to Bayesian Data Analysis. 4 Units.**

Basic Bayesian concepts and methods with emphasis on data analysis. Special emphasis on specification of prior distributions. Development for one-two samples and on to binary, Poisson, and linear regression. Analyses performed using free OpenBugs software.

Prerequisite: STATS 120C. Recommended: STATS 110.

**STATS 120A. Introduction to Probability and Statistics I. 4 Units.**

Introduction to basic principles of probability and statistical inference. Axiomatic definition of probability, random variables, probability distributions, expectation.

Prerequisite: MATH 2A and MATH 2B and (MATH 2D or MATH 4)

Restriction: Data Science Majors have first consideration for enrollment. Quantitative Economics majors have second consideration.

Concurrent with STATS 281A.

**STATS 120B. Introduction to Probability and Statistics II. 4 Units.**

Introduction to basic principles of probability and statistical inference. Point estimation, interval estimating, and testing hypotheses, Bayesian approaches to inference.

Prerequisite: STATS 120A

Restriction: Data Science Majors have first consideration for enrollment. Quantitative Economics majors have second consideration.

Concurrent with STATS 281B.

**STATS 120C. Introduction to Probability and Statistics III. 4 Units.**

Introduction to basic principles of probability and statistical inference. Linear regression, analysis of variance, model checking.

Prerequisite: STATS 120B and (MATH 3A or MATH 6G or I&C SCI 6N)

Restriction: Data Science Majors have first consideration for enrollment. Quantitative Economics majors have second consideration.

Concurrent with STATS 281C.

**STATS 140. Multivariate Statistical Methods. 4 Units.**

Theory and application of multivariate statistical methods. Topics include statistical inference for the multivariate normal model and its extensions to multiple samples and regression, use of statistical packages for data visualization and reduction, discriminant analysis, cluster analysis, and factor analysis.

Prerequisite: STATS 120C and (MATH 3A or I&C SCI 6N)

Concurrent with STATS 240.

**STATS 170A. Project in Data Science I. 4 Units.**

Problem definition and analysis, data representation, algorithm selection, solution validation, and results presentation. Students do team projects and lectures cover analysis alternatives, project planning, and data analysis issues. First quarter emphasizes approach selection, project planning, and experimental design.

Prerequisite: STATS 68 and STATS 112 and IN4MATX 43 and COMPSCI 122A and COMPSCI 161 and COMPSCI 178

Grading Option: In Progress (Letter Grade with P/NP).

Restriction: Seniors only. Data Science Majors have first consideration for enrollment.

**STATS 170B. Project in Data Science II. 4 Units.**

Problem definition and analysis, data representation, algorithm selection, solution validation, and results presentation. Students do team projects and lectures cover analysis alternatives, project planning, and data analysis issues. Second quarter emphasizes project execution and analysis, and presentation of results.

Prerequisite: STATS 170A. In Progress (IP) grade for STATS 170A is also accepted.

Restriction: Seniors only. Data Science Majors have first consideration for enrollment.

**STATS 199. Individual Study. 2-5 Units.**

Individual research or investigations under the direction of an individual faculty member.

Repeatability: May be repeated for credit unlimited times.

**STATS 200A. Intermediate Probability and Statistical Theory. 4 Units.**

Basics of probability theory, random variables and basic transformations, univariate distributions—discrete and continuous, multivariate distributions.

Prerequisite: STATS 120C

**STATS 200B. Intermediate Probability and Statistical Theory. 4 Units.**

Random samples, transformations, limit laws, normal distribution theory, introduction to stochastic processes, data reduction, point estimation (maximum likelihood).

Prerequisite: STATS 200A

**STATS 200C. Intermediate Probability and Statistical Theory. 4 Units.**

Interval estimation, hypothesis testing, decision theory and Bayesian inference, basic linear model theory.

Prerequisite: STATS 200B

**STATS 201. Statistical Methods for Data Analysis I. 4 Units.**

Introduction to statistical methods for analyzing data from experiments and surveys. Methods covered include two-sample procedures, analysis of variance, simple and multiple linear regression.

Prerequisite: STATS 7 or STATS 8

Restriction: STATS 201 cannot be taken for credit after taking STATS 210.

**STATS 202. Statistical Methods for Data Analysis II. 4 Units.**

Introduction to statistical methods for analyzing data from surveys or experiments. Emphasizes application and understanding of methods for categorical data including contingency tables, logistic and Poisson regression, loglinear models.

Prerequisite: STATS 201 or STATS 210

Concurrent with STATS 111.

**STATS 203. Statistical Methods for Data Analysis III. 4 Units.**

Introduction to statistical methods for analyzing longitudinal data from experiments and cohort studies. Topics covered include survival methods for censored time-to-event data, linear mixed models, non-linear mixed effects models, and generalized estimating equations.

Prerequisite: STATS 202

Concurrent with STATS 112.

**STATS 205. Introduction to Bayesian Data Analysis. 4 Units.**

Basic Bayesian concepts and methods with emphasis on data analysis. Special emphasis on specification of prior distributions. Development for one-two samples and on to binary, Poisson and linear regression. Analyses performed using free OpenBugs software.

Prerequisite: STATS 120C. Recommended: STATS 201 or STATS 210.

**STATS 210. Statistical Methods I: Linear Models. 4 Units.**

Statistical methods for analyzing data from surveys and experiments. Topics include randomization and model-based inference, two-sample methods, analysis of variance, linear regression and model diagnostics.

Prerequisite: Knowledge of basic statistics, calculus, linear algebra.

**STATS 210A. Statistical Methods I: Linear Models. 4 Units.**

Statistical methods for analyzing data from surveys and experiments. Topics include randomization and model-based inference, two-sample methods, analysis of variance, linear regression, and model diagnostics.

Prerequisite: Knowledge of basic statistics (at the level of STATS 7), calculus, and linear algebra.

Restriction: Graduate students only.

**STATS 210B. Statistical Methods II: Categorical Data. 4 Units.**

Introduction to statistical methods for analyzing discrete and non-normal outcomes. Emphasizes the development and application of methods for categorical data, including contingency tables, logistic and Poisson regression, loglinear models.

Prerequisite: STATS 210. May not be taken for graduate credit by Ph.D. students in Statistics.

Restriction: Graduate students only.

**STATS 210C. Statistical Methods III: Longitudinal Data. 4 Units.**

Introduction to statistical methods for analyzing longitudinal outcomes. Emphasizes the development and application of regression methods for correlated and censored outcomes. Methods for continuous and discrete correlated outcomes, as well as censored outcomes, are covered.

Prerequisite: STATS 210B. May not be taken for graduate credit by Ph.D. students in Statistics.

Restriction: Graduate students only.

**STATS 211. Statistical Methods II: Generalized Linear Models. 4 Units.**

Development of the theory and application of generalized linear models. Topics include likelihood estimation and asymptotic distributional theory for exponential families, quasi-likelihood and mixed model development. Emphasizes methodological development and application to real scientific problems.

Prerequisite or corequisite: STATS 210

**STATS 212. Statistical Methods III: Methods for Correlated Data. 4 Units.**

Development and application of statistical methods for analyzing correlated data. Topics covered include repeated measures ANOVA, linear mixed models, non-linear mixed effects models, and generalized estimating equations. Emphasizes both theoretical development and application of the presented methodology.

Prerequisite: STATS 211

**STATS 220A. Advanced Probability and Statistics Topics. 4 Units.**

Advanced topics in probability and statistical inference including measure theoretic probability, large sample theory, decision theory, resampling and Monte Carlo methods, nonparametric methods.

Prerequisite: STATS 200C

**STATS 220B. Advanced Probability and Statistics Topics. 4 Units.**

Advanced topics in probability and statistical inference, including measure theoretic probability, large sample theory, decision theory, resampling and Monte Carlo methods, nonparametric methods.

Prerequisite: STATS 220A and MATH 140B

**STATS 225. Bayesian Statistical Analysis. 4 Units.**

Introduction to the Bayesian approach to statistical inference. Topics include univariate and multivariate models, choice of prior distributions, hierarchical models, computation including Markov chain Monte Carlo, model checking, and model selection.

Prerequisite: STATS 205 and STATS 230

**STATS 226. Advanced Topics in Modern Bayesian Statistical Inference. 4 Units.**

Modern Bayesian Statistics: selected topics from theory of Markov chains, application of theory to modern methods of Markov chain Monte Carlo sampling; Bayesian non-parametric and semiparametric modeling, including Dirichlet Process Mixtures; Mixtures of Polya Trees.

Prerequisite: STATS 200C and STATS 225

**STATS 230. Statistical Computing Methods. 4 Units.**

Numerical computations and algorithms with applications in statistics. Topics include optimization methods including the EM algorithm, random number generation and simulation, Markov chain simulation tools, and numerical integration.

Prerequisite: Two quarters of upper-division or graduate training in probability and statistics.

Overlaps with COMPSCI 206.

**STATS 235. Modern Data Analysis Methods . 4 Units.**

Introduces selected modern tools for data analysis. Emphasizes use of computational and resampling techniques for data analyses when the data do not conform to standard toolbox of regression models and/or complexity of modeling problem threatens validity of standard methods.

Prerequisite: STATS 120C and STATS 205 and (STATS 201 or STATS 210)

Restriction: Graduate students only.

**STATS 240. Multivariate Statistical Methods. 4 Units.**

Theory and application of multivariate statistical methods. Topics include statistical inference for the multivariate normal model and its extensions to multiple samples and regression, use of statistical packages for data visualization and reduction, discriminant analysis, cluster analysis, and factor analysis.

Prerequisite: STATS 120C and (MATH 3A or I&C SCI 6N)

Concurrent with STATS 140.

**STATS 245. Time Series Analysis. 4 Units.**

Statistical models for analysis of time series from time and frequency domain perspectives. Emphasizes theory and application of time series data analysis methods. Topics include ARMA/ARIMA models, model identification/estimation, linear operators, Fourier analysis, spectral estimation, state space models, Kalman filter.

Corequisite: STATS 200C

Prerequisite or corequisite: STATS 201 or STATS 210

**STATS 250. Biostatistics. 4 Units.**

Statistical methods commonly used to analyze data arising from clinical studies. Topics include analysis of observational studies and randomized clinical trials, techniques in the analysis of survival and longitudinal data, approaches to handling missing data, meta-analysis, nonparametric methods.

Prerequisite: STATS 210

**STATS 255. Statistical Methods for Survival Data. 4 Units.**

Statistical methods for analyzing survival data from cohort studies. Topics include parametric and nonparametric methods, the Kaplan-Meier estimator, log-rank tests, regression models, the Cox proportional hazards model and accelerated failure time models, efficient sampling designs, discrete survival models.

Corequisite: STATS 202 or STATS 211.

Prerequisite: STATS 210

Restriction: Graduate students only.

**STATS 257. Introduction to Statistical Genetics. 4 Units.**

Provides students with knowledge of the basic principles, concepts, and methods used in statistical genetic research. Topics include principles of population genetics, and statistical methods for family- and population-based studies.

Prerequisite: Two quarters of upper-division or graduate training in statistical methods.

Same as EPIDEM 215.

**STATS 260. Inference with Missing Data. 4 Units.**

Statistical methods and theory useful for analysis of multivariate data with partially observed variables. Bayesian and likelihood-based methods developed. Topics include EM-type algorithms, MCMC samplers, multiple imputation, and general location model. Applications from economics, education, and medicine are discussed.

Prerequisite or corequisite: STATS 210 or STATS 200C. STATS 230.

**STATS 262. Theory and Practice of Sample Surveys. 4 Units.**

Basic techniques and statistical methods used in designing surveys and analyzing collected survey data. Topics include simple random sampling, ratio and regression estimates, stratified sampling, cluster sampling, sampling with unequal probabilities, multistage sampling, and methods to handle nonresponse.

Prerequisite: STATS 120C

**STATS 265. Causal Inference. 4 Units.**

Various approaches to causal inference focusing on the Rubin causal model and propensity-score methods. Topics include randomized experiments, observational studies, non-compliance, ignorable and non-ignorable treatment assignment, instrumental variables, and sensitivity analysis. Applications from economics, politics, education, and medicine.

Prerequisite: STATS 200C and STATS 210

**STATS 270. Stochastic Processes. 4 Units.**

Introduction to the theory and application of stochastic processes. Topics include Markov chains, continuous-time Markov processes, Poisson processes, and Brownian motion. Applications include Markov chain Monte Carlo methods and financial modeling (for example, option pricing).

Prerequisite: STATS 120C

Overlaps with MATH 271A, MATH 271B, MATH 271C.

**STATS 275. Statistical Consulting. 4 Units.**

Training in collaborative research and practical application of statistics. Emphasis on effective communication as it relates to identifying scientific objectives, formulating a statistical analysis plan, choice of statistical methods, and interpretation of results and their limitations to non-statisticians.

Prerequisite: STATS 203 or STATS 212 or STATS 210C. STATS 203 with a grade of B or better. STATS 212 with a grade of B or better. STATS 210C with a grade of B or better

Restriction: Graduate students only.

**STATS 280. Seminar in Statistics. 0.5 Units.**

Periodic seminar series covering topics of current research in statistics and its application.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**STATS 281A. Introduction to Probability and Statistics I. 4 Units.**

Introduction to basic principles of probability and statistical inference. Axiomatic definition of probability, random variables, probability distributions, expectation.

Restriction: Graduate students only.

Concurrent with STATS 120A.

**STATS 281B. Introduction to Probability and Statistics II. 4 Units.**

Introduction to basic principles of probability and statistical inference. Point estimation, interval estimating, and testing hypotheses, Bayesian approaches to inference.

Restriction: Graduate students only.

Concurrent with STATS 120B.

**STATS 281C. Introduction to Probability and Statistics III. 4 Units.**

Introduction to basic principles of probability and statistical inference. Contingency table analysis, linear regression, analysis of variance, model checking.

Restriction: Graduate students only.

Concurrent with STATS 120C.

**STATS 295. Special Topics in Statistics. 4 Units.**

Studies in selected areas of statistics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**STATS 298. Thesis Supervision. 2-12 Units.**

Individual research or investigation conducted in preparation for the M.S. thesis option or the dissertation requirements for the Ph.D. program.

Repeatability: May be repeated for credit unlimited times.

**STATS 299. Individual Study. 2-12 Units.**

Individual research or investigation under the direction of an individual faculty member.

Repeatability: May be repeated for credit unlimited times.

## Studio Art (ART STU)

## Surgery (SURGERY)

## Tagalog (TAGALOG)

## Toxicology (TOX)

## UC Washington DC (UCDC)

### Courses

**UCDC 170. Washington DC Internship. 4-8 Units.**

Supervised internship (20-40 hours per week) in Washington DC government, nonprofit, or private institution consistent with student's interest.

Corequisite: UCDC 180

Prerequisite: Selected for Washington DC Center Program.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**UCDC 180. Washington-Themed Seminar. 4 Units.**

UCDC core course (multiple topics offered each quarter). Enhances students' experiential learning and imparts knowledge and skills to help them transition into public service/private sector positions. One core course per quarter mandatory for all participants in Washington DC Center Program.

Prerequisite: Selected for Washington DC Center Program.

Repeatability: May be taken for credit 3 times as topics vary.

**UCDC 190. Washington DC Elective. 4 Units.**

Studies in selected areas related to the UC Washington, DC Center Program (UCDC).

Prerequisite: Selected for Washington DC Center Program.

Repeatability: May be taken for credit 3 times as topics vary.

## University Affairs (UNI AFF)

### Courses

**UNI AFF 1A. Student Participation. 1.3 Unit.**

Campus projects with a University department to enrich academic growth and development as well as academic growth and development of UCI. Includes 30 hours per quarter working on proposed project under faculty/staff supervision. Paper required.

Prerequisite: Project must be approved by a Student Affairs Department head and the instructor.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**UNI AFF 1B. Student Participation. 1.3 Unit.**

Campus projects with a University department to enrich academic growth and development as well as academic growth and development of UCI. Includes 30 hours per quarter working on proposed project under faculty/staff supervision. Paper required.

Prerequisite: UNI AFF 1A

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**UNI AFF 1C. Student Participation. 1.3 Unit.**

Campus projects with a University department to enrich academic growth and development as well as academic growth and development of UCI. Includes 30 hours per quarter working on proposed project under faculty/staff supervision. Paper required.

Prerequisite: UNI AFF 1B

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

## University Studies (UNI STU)

### Courses

**UNI STU 1. Freshman Experience. 2 Units.**

An introduction to the freshman experience provides an overview of the University's aims and resources and exploration of developmental theories and skills necessary for academic success. Attention is also paid to questions of personal development and major choice. Materials fee.

Grading Option: Pass/no pass only.

**UNI STU 3. Mini-Seminars . 1 Unit.**

Designed primarily for freshmen as introduction to scholarly inquiry. Each section is taught by a faculty member from one of the academic disciplines and presents interesting and challenging topics representing the instructor's interest. Students participate in discussions, presentations, and projects.

Repeatability: May be taken for credit 3 times as topics vary.

**UNI STU 4. Transfer Student Seminars. 1 Unit.**

Designed primarily for transfer students during their first year at UCI. Each section is taught by a faculty member from one of the academic disciplines as introduction to scholarly inquiry in their discipline. Students participate in discussions, presentations, and projects.

Repeatability: May be taken for credit 2 times.

Restriction: New students only. Upper-division only until first week of classes.

**UNI STU 6. University Studies International Village Seminar. 1 Unit.**

Seminars held in International Village that are specifically designed to either (a) introduce visiting international students to the U.S. and/or local area and institutions or (b) engage both international and U.S. students in discussion of topics of international interest.

Grading Option: Pass/no pass only.

Repeatability: Unlimited as topics vary.

**UNI STU 7. UTeach: Student-Taught Seminar. 1 Unit.**

Student-taught seminar courses on selected topics. Topics vary each year according to the interest of the students teaching the classes.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**UNI STU 10. Introduction to Civic and Community Engagement and Community Research. 4 Units.**

Provides a foundation for understanding the role of public scholarship, civic engagement, and social action, and the relationship between service learning and engaged citizenship. Introduces key theoretical and research methodologies on the traditions and innovations of civic and community engagement.

**UNI STU 13A. Introduction to Global Sustainability I. 4 Units.**

Introduces Earth as a system and living planet. Examines physical and biological resources as well as energy, water, climate, and ecosystems. Introduces and applies analytic lens of environmental, social, and economic sustainability to examine human impacts and resource use.

Restriction: Lower-division students only.

(II)

**UNI STU 13B. Introduction to Global Sustainability II. 4 Units.**

Introduces Earth as a system and living planet. Examines physical and biological resources as well as energy, water, climate, and ecosystems. Introduces and applies analytic lens of environmental, social, and economic sustainability to examine human impacts and resource use.

Prerequisite: UNI STU 13A

(II)

**UNI STU 13C. Introduction to Global Sustainability III. 4 Units.**

Introduces Earth as a system and living planet. Examines physical and biological resources as well as energy, water, climate, and ecosystems. Introduces and applies analytic lens of environmental, social, and economic sustainability to examine human impacts and resource use.

Prerequisite: UNI STU 13B

(III)

**UNI STU 43. Topics in Illuminations . 1 Unit.**

This course connects students to Illuminations, the Chancellor's Arts and Culture Initiative. Students will attend five Illuminations-sponsored events and engage in brief preparatory and reflective activities in response to these events.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times as topics vary.

**UNI STU 45. Graduate School Opportunities and Preparation. 1 Unit.**

Explores the opportunities associated with graduate school by considering a wide range of disciplines and career paths. Reviews professional and academic paths in graduate school and the ways to prepare for a chosen path.

**UNI STU H80. Neurodivergent. 4 Units.**

Examines the evolution of the diagnosis of autism through history. Deep inquiry of the neuroscience, etiology, and genetics of neurodivergent individuals as well as a review of the validity of the varied treatments will inform critical thinking.

Restriction: Campuswide Honors Collegium students only.

(III)

**UNI STU 83. Pathways to University Success. 2 Units.**

Helps first-year students transition to UC Irvine and promotes a successful University experience. Students learn about academic resources and programs that support acclimation to the campus and enhance academic development through lectures, discussions, and a range of co-curricular activities.

Overlaps with UNI STU 84.

**UNI STU 84. Bridges to University Success. 4 Units.**

Helps first-year students transition to UC Irvine and promotes a successful University experience. Students learn about academic resources/programs that support acclimation to the campus and enhance academic development through lectures, writing laboratories, discussions, and a range of co-curricular activities.

Overlaps with UNI STU 83.

**UNI STU 85A. Leading from Within. 4 Units.**

Students examine characteristics and behaviors of effective leaders. Study the history and theoretical framework for understanding effective leadership. In addition, examine their own leadership strengths and weakness and become familiar with the theory behind and use of comprehensive self-assessment tools.

(III)

**UNI STU 85B. Leading Others. 4 Units.**

Students examine best practices within a team environment. They learn goal setting, diagnosing performance problems, designing solutions, and recognizing relevant differences in culture, priorities, and values within a team through lectures, writing, discussions, and practical activities.

(III)

**UNI STU 85C. Leading Change. 4 Units.**

Focused on a global viewpoint, students learn the theoretical framework behind innovation and change management. Develop innovative solutions to real-world challenges, design strategies to bring an expansive vision into fruition, and learn to communicate a vision and strategies.

(III)

**UNI STU 93. Strategies for Success. 2 Workload Units.**

Designed to develop good study skills in technical fields and the participation of students as active learners in their education. Topics include time management, analytical thinking, text analysis, academic survival strategies, and goal setting.

Grading Option: Workload Credit P/NP Only.

**UNI STU 100. Doing Research in the Community. 4 Units.**

Critically reimagines the research endeavor and its participants/outcomes. Grapples with methods, values, and relationships involved in research. Explores alternative conceptions of research; focus is community-based. Students work in teams on real-world community research projects with faculty mentors and community partners.

Prerequisite: UNI STU 10

**UNI STU 110. Philanthropy in the Community. 4 Units.**

Introduces the role of community engagement, social action and philanthropy. Examines theories and practices of philanthropy, and strategies for social change. Involves hand-on engagement with philanthropy in the form of students making decisions about the distribution of a real fund.

**UNI STU 170. Advanced Internship in Undergraduate Education. 1-2 Workload Units.**

Advanced interns have a year's internship experience and return to contribute to Undergraduate Education programs in a leadership position. Students work three-five hours per week in a DUE office to coordinate or lead less-experienced interns and/or events.

Prerequisite: UNI AFF 1A and UNI AFF 1B and UNI AFF 1C

Grading Option: Workload Credit P/NP Only.

Repeatability: May be taken for credit for 6 units.

**UNI STU 175. Methods and Application in Small Group Instruction. 2 Workload Units.**

Explores various theories and methods of learning and development and their practical application in small group settings. Peer tutors receive instruction in the design, implementation, and evaluation of an effective learning environment for undergraduate students.

Grading Option: Workload Credit P/NP Only.

Restriction: Learning and Academic Resource Center employed tutors only.

**UNI STU 176. Pedagogy of Small Group Facilitation - LAs. 2 Units.**

Overview and readings in evidence-based instruction for undergraduate learning assistants. LAs receive instruction, training, and feedback on effective small group facilitation and active learning. To be taken while serving as a learning assistant in a course.

**UNI STU H176A. Campuswide Honors Thesis Seminar. 2 Units.**

Supports the honors thesis research activities of Campuswide Honors Program students. Students set research goals, discuss, and develop their research interests.

Corequisite: Students must sign up separately for 8 units of independent study with faculty mentors.

Grading Option: Pass/no pass only.

Restriction: Campuswide Honors Collegium students only.

**UNI STU H176C. Campuswide Honors Thesis Seminar. 2 Units.**

Supports the honors thesis research activities of Campuswide Honors Program students. Students work with each other to improve both written and spoken presentations of their results.

Corequisite: Students must sign up separately for 8 units of independent study with faculty mentors.

Prerequisite: UNI STU H176A

Grading Option: Pass/no pass only.

Restriction: Campuswide Honors Collegium students only.

**UNI STU 181. Internship in Civic and Community Engagement. 2-4 Workload Units.**

Provides an opportunity to extend learning into a community-based setting addressing important social, environmental, and public issues. The internship project has a creative and scholarly component where students initiate their own action or inquiry experience.

Prerequisite: UNI STU 10

Grading Option: Workload Credit P/NP Only.

Repeatability: May be taken for credit for 8 units.

**UNI STU 190. Teaching Seminar: Theory and Practice. 2 Units.**

For students selected to be discussion leaders for University Studies 2. Models of teaching, developmental theory applied to college freshmen, curriculum development. Practice of teaching techniques and group management skills.

Repeatability: May be taken for credit 2 times.

**UNI STU 192. Group Project for Discussion Leaders. 4 Units.**

For discussion leaders for University Studies 2. Weekly discussion group training for leading effective groups in addition to evaluations of weekly discussion sections and completion of a special project on issues of freshman development. Materials fee.

Repeatability: May be taken for credit 4 times.

Restriction: Discussion leaders only.

**UNI STU 193. Internship. 2-4 Units.**

Enables students from all majors to receive credit for an approved internship on or off-campus. Internship sites may be public or private, for profit or non-profit agencies, organizations, companies, or corporations offering paid or unpaid learning experiences.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**UNI STU 196. Directed Studies in Undergraduate Education. 1-4 Units.**

Students do directed study (research, readings, etc.) on a topic related to Undergraduate Education under the supervision of one of the faculty who serve as Deans or Faculty Directors in the Division of Undergraduate Education.

Repeatability: May be taken for credit for 12 units.

**UNI STU 197A. UTeach Special Study. 2 Units.**

Students accepted to teach a UTeach course in spring quarter enroll in Special or Independent Study with their faculty mentor during the preceding fall quarter to develop their detailed course syllabus.

Repeatability: Unlimited as topics vary.

Restriction: UTeach Program students only.

**UNI STU 197B. UTeach: Teaching Theory and Practice. 2 Units.**

Students accepted to teach a UTeach course in spring quarter enroll during the winter to develop their teaching skills in preparation for teaching the following quarter.

Prerequisite: UNI STU 197A

Grading Option: Pass/no pass only.

Restriction: UTeach Program students only.

**UNI STU 197C. UTeach: Teaching Practicum. 2 Units.**

Students selected to teach in the UTeach Program teach their courses and meet weekly in a seminar to continue to develop and enhance their teaching skills.

Prerequisite: UNI STU 197B

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

Restriction: UTeach Program students only.

**UNI STU 197D. Study Abroad Experiential Learning. 1 Unit.**

Study abroad on an approved program. Complete critical reflection (written paper, blog, etc.) submitted no later than the end of the quarter following the completion of the study abroad program. Enroll while studying abroad or the quarter immediately following return.

Grading Option: Pass/no pass only.

**UNI STU 197E. Reflections While Abroad. 1 Unit.**

For students while they are studying abroad; maximizing learning outcomes by critically reflecting on learning experiences while abroad. Topics include cultural observations, professional issues, cultural competence, etc. Participants are located in different countries around the world.

Grading Option: Pass/no pass only.

**UNI STU 197F. Internship Plus. 1 Unit.**

Provides training and development of career readiness competencies in parallel with a student's internship experience. Internship sites may be public or private, for profit or non-profit agencies, organizations, companies, or corporations offering paid or unpaid learning experiences.

Grading Option: Pass/no pass only.

**UNI STU 198. Mentored Learning Assistant Field Work. 1-3 Units.**

Oversight of trained learning assistants by the course instructor, including training in the discipline and responsibilities associated with supporting active group work. Instructor mentors LAs in how assisting small groups supports their career goals.

Corequisite: UNI STU 176

Repeatability: May be taken for credit for 9 units.

**UNI STU 296. Graduate Legal Studies . 0.3 Units.**

Monthly faculty/student colloquium to present and discuss socio-legal related research/issues. Course convened by Law School faculty with other faculty participation. Required for PLGS students enrolled in Law portion of degree.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Law students only.

**UNI STU 297. California Community College Internship. 2-8 Units.**

The California Community College Internship offers graduate students the opportunity to learn about faculty life, governance, and teaching at local community colleges. Structures fieldwork for students to participate in and reflect on the educational mission of community colleges.

Prerequisite: Teaching experience.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit for 10 units.

Restriction: MFA or Doctoral students who have advanced to candidacy.

**UNI STU 390A. Advanced Pedagogy and Academic Job Preparation. 2-4 Units.**

Focuses on advanced pedagogical research and practices. Students design and implement an integrated curriculum in the context of the TA Professional Development Program. Prepare for the academic job market by developing application materials and reviewing Pedagogical Fellow applicants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Must be a pedagogical fellow.

**UNI STU 390B. Advanced Pedagogy and Academic Job Preparation. 2-4 Units.**

Focuses on advanced pedagogical research and practices. Students design and implement an integrated curriculum in the context of the TA Professional Development Program. Prepare for the academic job market by developing application materials and reviewing Pedagogical Fellow applicants.

Prerequisite: UNI STU 390A

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Must be a pedagogical fellow.

**UNI STU 390C. Advanced Pedagogy and Academic Job Preparation. 2-4 Units.**

Focuses on advanced pedagogical research and practices. Students design and implement an integrated curriculum in the context of the TA Professional Development Program. Prepare for the academic job market by developing application materials and reviewing Pedagogical Fellow applicants.

Prerequisite: UNI STU 390B

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Must be a pedagogical fellow.

**UNI STU 390X. Developing Teaching Excellence. 2-4 Units.**

An introduction to evidence-based instructional design and methods, specifically for higher education courses. Students practice, observe, and design instruction based on pedagogical literature. Meets most of the requirements for the Certificate in Teaching Excellence Program.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit for 8 units.

**UNI STU 390Z. Advanced Course Design for Instructors of Record. 2-4 Units.**

Confirmed instructors of record who have earned the Certificate in Teaching Excellence design their course (syllabus, lesson plans, activities, assessments, assignments) using best practices in pedagogy. By the end of the course, participants have their full course mapped.

Prerequisite: Certificate of Teaching Excellence required, proof of instructor of record appointment required.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit for 12 units.

Restriction: Graduate students only.

**UNI STU 395. Seminar for Teaching as Research. 1 Unit.**

Preparation and implementation of a teaching as research project in higher education. Participants learn research, experimental design, human subjects, and statistical analysis.

Prerequisite: UNI STU 390B

Repeatability: May be taken for credit 2 times.

## Urban Policy and Public Planning (UPPP)

### Courses

**UPPP 4. Introduction to Urban Studies. 4 Units.**

Introduces the substantive areas, concepts, and tools in the field of urban studies. Acquaints students with physical, environmental, social, economic, and political dimensions of cities. Examines the challenges facing cities, including poverty, sustainability, development, globalization, and others.

Restriction: School of Social Ecology students have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

(III)

**UPPP 5. Introduction to Urban Planning and Policy. 4 Units.**

Introduces students to the basic issues in urban planning and public policy.

(III)

**UPPP 8. Introduction to Environmental Analysis and Design. 4 Units.**

Overview of general concepts, theoretical principles, and analytical techniques for investigating environmental systems. Integrates tools from natural and social sciences to analyze contemporary environmental challenges such as pollution, resource acquisition, facility and ecosystem design, impact assessments, formulation of environmental policy.

(III)

**UPPP H30E. Cities: Focal Point for Sustainability Problems and Solutions I. 4 Units.**

Explores the nature of cities, focusing on the challenges facing cities today, their possible solutions, and the technical and social constraints on those solutions.

Prerequisite: SSCI H30D

Restriction: Campuswide Honors Collegium students only.

(III)

**UPPP H30F. Cities: Focal Point for Sustainability Problems and Solutions II. 4 Units.**

Explores the nature of cities, focusing on the challenges facing cities today, their possible solutions, and the technical and social constraints on those solutions.

Prerequisite: UPPP H30E

Restriction: Campuswide Honors Collegium students only.

(II)

**UPPP 40. Urban Sociology. 4 Units.**

Overview of theoretical, substantive, and policy issues in urban sociology. History of urbanization, the school of human ecology, and recent trends regarding urbanism. Time is devoted to understanding the causes and possible solutions to urban problems.

Overlaps with SOCL 43.

**UPPP 100. Special Topics in Urban Studies. 4 Units.**

Course content varies with interest of the instructor.

Repeatability: Unlimited as topics vary.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 101. History of Cities. 4 Units.**

Surveys the global and historical co-evolution of cities and social institutions, including religion, the economy, governance, the arts, technology, and family life.

**UPPP 102. Urban Inequality. 4 Units.**

Examines structural inequality and the influence that urbanization has in affecting race, ethnic, and class relations. Explores how race/ethnicity, class, urban space, housing, economic development, public education, and land policy intersect in cities, both historically and today.

Restriction: Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 103. Comparative Approaches to Urban Regions. 4 Units.**

An introduction to comparative urbanization in developing countries. Introduces students to the geography, history, and theories of urbanization, and then reviews urban planning, public policy, and governance.

Restriction: Public Health Policy Majors only. Social Ecology Majors only. Urban Studies Majors only.

**UPPP 104. Urban America . 4 Units.**

Students examine the historical, social, political, and economic factors that contributed to the construction of the American urban context, one that is poverty concentrated and racially/ethnically segregated. Students also critically assess the consequence of growing up in America's urban neighborhoods.

Same as CHLT 162A, SSCI 163A.

**UPPP 107. Urban and Regional Planning. 4 Units.**

Important substantive areas, concepts, tools in the field of urban and regional planning. Topics include: forces that have historically guided and are currently guiding U.S. urbanization; land use, economic development, housing and community development, environmental planning; legal, environmental, governmental contexts.

Restriction: Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 108. Cities and Transportation. 4 Units.**

The relationship between urban areas and transportation systems. Economic analysis of cities, transportation and urban form, highway congestion, environmental impacts of transportation, public transit, land use and transportation, and political influences on transportation planning.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 109. Housing and Urban Development Policy. 4 Units.**

Surveys public policy issues and develops analytic techniques in the areas of housing and urban development. Examines a range of policy topics including housing assistance to low- and moderate-income families, housing finance system, incentives for economic development, and neighborhood preservation.

Prerequisite: Recommended: Previous course work in economics.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 110. Urban Economic Development Policy. 4 Units.**

Theoretical and practical perspectives on local economic development policy. Integrates economic, planning, and political perspectives. Overview of economic role of cities and metropolitan areas. Specific development issues include: link between taxes, regulation, job growth; redevelopment planning; evaluation economic development policy.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 111. Climate Solutions. 4 Units.**

Focuses on carbon neutrality and climate stability, addressing.

Same as ESS 179, MAE 119.

Restriction: Upper-division students only.

**UPPP 112. Foundations of Community Health. 4 Units.**

A social ecological framework for understanding community health is presented. Measures of individual and community health are compared, and the influence of personal and environmental factors on individual, group, and population health is examined. Community health promotion strategies are discussed.

Same as PUBH 125.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 113. Poverty and Change in Developing Countries. 4 Units.**

Focuses on poverty in developing countries. Analyzes the magnitude and changing nature of poverty in the global south. Critically examines poverty conceptualized in terms of economic deprivation, well-being, and social exclusion.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 114W. Advanced Research Methods. 4 Units.**

For students planning to conduct senior research projects or apply to graduate school in social research fields. Topics include reviewing literature, preparing a research proposal, protecting human subjects, citing scholarly work, building measures, estimating sample size, interview and presentation skills.

Prerequisite: SE 10 and SE 13. Satisfactory completion of the Lower-Division Writing requirement.

Same as CLS C169W, PSCI 111W, SE 111W.

(Ib)

**UPPP 115. Global Poverty and Inequality in the 21st Century. 4 Units.**

Explores a multidisciplinary understanding of poverty and inequality in the 21st century and assesses impact of education, health, technology, and other interventions. Course offered online only.

Same as IS 115.

**UPPP 117. Environmental Justice. 4 Units.**

Engages students to critically analyze and evaluate environmental problems, environmental responses, and planning and policy debates regarding 'environmental justice' - essentially the race, class, and equity implications of environmental problems and policies.

**UPPP 118. Gentrification. 4 Units.**

Gentrification is a complex process that changes the makeup of neighborhoods and fuels political and policy conflicts. Students are provided with tools to understand the process and conceive of policies to ensure more inclusive and equitable cities.

**UPPP 120. Introduction to GIS for Planning and Policy. 4 Units.**

Provides hands-on experience creating, visualizing, and interpreting spatial data, with a focus on Geographic Information Systems (GIS) applications for urban planning and public policy.

**UPPP 129. American Public Policy. 4 Units.**

Focuses on the development and implementation of public policy in the United States. Lectures cover theoretical models of the policy process as well as significant problems facing contemporary American decision-makers.

Same as PUBH 132, SSCI 152C, PLSC 121G.

**UPPP 130. Cities and Food . 4 Units.**

Explores the role of cities in transforming global diets: how urbanization has shaped what and how we eat, and what the co-evolution of diets and city life portend for the future.

**UPPP 131. Environmental Sustainability I. 4 Units.**

Provides an introduction to sustainability from different points of view; historical, scientific, political, ethical, and economic.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 132. Environmental Sustainability II. 4 Units.**

Investigates how sustainability can be implemented in a variety of contexts including water, energy, non-renewable resources, biodiversity, and urban policy, and also how it could be measured.

Restriction: Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 133. Environmental Law and Policy . 4 Units.**

Environmental law as a combination of traditional legal principles and newly created statutes, rules, and decisions applied to environmental protection. Investigates roles of courts, legislature, executive branch and administrative agencies, and private citizens attempting to regulate environmental quality.

Same as CLS C128.

Restriction: Criminology, Law and Society Majors only. Planning, Policy, and Design Majors only.

**UPPP 139. Water Resource Policy. 4 Units.**

Examination of contemporary water problems worldwide, with particular attention to the competing water demands in the western U.S., and water demand by the poor in developing countries. History and analysis of U.S. water policies at local, state, and federal levels.

Restriction: Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 142. Environmental Hazards in an Urbanizing World. 4 Units.**

Development patterns, including urbanization, can contribute to environmental hazard severity. Humans can plan, mitigate, and prepare to reduce costly hazard losses. Students learn about environmental hazards and human response to these threats.

(III)

**UPPP 145. Environmental Governance. 4 Units.**

How should the environment be managed and who should be responsible? What is effective environmental management, and for whom? These questions are answered by exploring traditional and emerging theoretical frameworks and applying them to real world environmental challenges.

**UPPP 146. Principles of Economics for Planning and Policy. 4 Units.**

Provides an introduction into economics for planning and policy students.

**UPPP 152. Cultural Ecology and Environmental Design. 4 Units.**

Introduction to cultural ecology and environmental and architectural design. Addresses the understanding of people's relationships with their built environments, the basic elements of architecture, architectural analysis, and cultural analysis are covered. Examines values in design and design for multicultural societies.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 153. Elements of Environmental Design. 4 Units.**

Basic elements of environmental design such as scale, proportion, rhythm, color, sound, lighting, surfaces, texture, architectural definition of spaces, volumes, massing volumetric analysis, solids and voids, and cultural aspects of design. Excitement and creativity in design, imageability.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 155. Urban Design Principles. 4 Units.**

Introduction to principles of urban design and its applications. Study of contemporary and traditional theories of urban design formulated to improve physical characteristics of built environment to facilitate an enhanced quality of life. A variety of case studies are discussed.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 166. Urban Politics and Policy . 4 Units.**

Examines why and how urban policies are enacted and carried out in contemporary U.S. cities and regions. Topics include evolution and organization of city governments and policymaking over the past century; who directs public policy and controls how cities develop.

(III)

**UPPP 167. Public Policy and Management. 4 Units.**

Exposes students to best management practices that assure effective planning and implementation of policies and programs in government, business, and nonprofit sectors. Includes guest lecturers who are proven leaders in four principal institutions of community: business, education, government, and nonprofit.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 170. Health Policy. 4 Units.**

Considers social and economic aspects of health and disease in the United States. What are the proper roles of the individual, community, and government in improving health and health care? International comparisons will be made wherever possible.

Same as PUBH 122.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 172. Latino Metropolis. 4 Units.**

Explores the processes of Latino urbanization in the United States and the spatialization of Latino identities, particularly in the context of Southern California with selected comparisons drawing from other cities.

Same as CHLT 154.

**(VII)****UPPP 177. Chicano Movement. 4 Units.**

Explores the history of Mexicans in the U.S. with particular attention paid to their integration into the U.S. capitalist economy. Examines this economic history and the Chicano movement, 'El Movimiento,' within the wide context of socio-economic change.

Same as CHLT 166.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 178. International Divided Cities. 4 Units.**

Investigates urban divisions in international cities where deep-seated nationalistic ethnic differences create pressures for intergroup conflicts, autonomy, or territorial separation, and can incite violence. Urban political polarization as it is manifest in the urban setting.

Same as PLSC 157B, SOCL 176.

**UPPP 190. Applied Statistics in Social and Behavioral Research. 4 Units.**

Covers statistical techniques used to describe and make generalizations about phenomena represented by data. Hands-on experience in data analysis and interpretation using statistical software (SPSS, STATA) is emphasized. Topics include data visualization, ANOVA, multiple regression, and categorical data analyses.

Prerequisite: SE 13

Same as CLS C190, SE 190, PSCI 190.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 202. History of Urban Planning. 4 Units.**

Introduction to the historical roots and fundamental perspectives of urban and regional planning. Exploration of the significant historical phases and personalities which have shaped the profession. The roles and responsibilities, the limitations and potential, of urban planning.

Restriction: Graduate students only.

**UPPP 203. Theoretical Foundations of Planning. 4 Units.**

Intellectual excursion into central themes in policy and planning, including philosophy of the market, institutionalization of space, hypostatizations of policy, constructions of communities, logics of spatial analysis. Objective is engagement of the professional in thoughtful reflections on practice and institutions.

Restriction: Graduate students only.

**UPPP 204. Plan Development and Communication . 4 Units.**

Graphic representation and communication of physical place characteristics, design and physical planning ideas, and concepts using a variety of graphic techniques of free hand drawing, sketching, orthographic representations, scale drawings, 3D representations, maps, photo-documentation, and various media.

Restriction: Urban and Regional Planning Majors only.

**UPPP 205. Environmental Economics and Policy. 4 Units.**

Provides a broad introduction to environmental economics and to environmental policy. Environmental problems facing the United States and Europe are analyzed, and whenever possible, the environmental problems facing developing countries.

Restriction: Graduate students only.

**UPPP 206. Microeconomic Analysis for Urban Planning. 4 Units.**

Provides students with a working knowledge of basic microeconomic concepts. Emphasizes applications related to urban planning and policy analysis. Topics covered include demand analysis, firm behavior, market structure, public goods, externalities, and the role of economics in land markets.

Restriction: Graduate students only.

**UPPP 207. Land-Use Law. 4 Units.**

Investigates legal and institutional frameworks for development control. Review of constitutional issues implicated in land-use regulation. Traces development control historically and analyzes contemporary approaches to land-use control which reflect environmental and economic development concerns.

Same as CLS C207.

Restriction: Graduate students only.

**UPPP 209. Qualitative Research Methods: Overview. 4 Units.**

Introduction to fundamentals of "qualitative" research and non-positivistic inquiry. Formulation of research questions, selection of method, data collection techniques, and analysis (briefly). Overview of selected methods from ethnography, naturalistic field research, phenomenology, ethnoarchaeology, critical approaches, and others.

Restriction: Graduate students only.

**UPPP 210. Practice Experience . 4 Units.**

Provides Master of Urban and Regional Planning students an opportunity to link classroom knowledge with real planning situations through a 10-week unpaid practice experience.

Restriction: Urban and Regional Planning Majors only.

**UPPP 212. Transportation Planning and Policy. 4 Units.**

Introduces current topics in transportation planning. Includes an analysis of the economic role of transportation in urban areas, land-use impacts of transportation projects, traffic congestion, air quality, alternatives to the automobile, and other transportation topics.

Restriction: Graduate students only.

**UPPP 213. Advanced Qualitative Methods: Analyzing Qualitative Data. 4 Units.**

Introduction to the theory and practice of analyzing qualitative data. Students must have already learned about data collection and research design for qualitative research and must have qualitative data they can analyze.

Same as MPHD 297K, PLSC 273A.

Restriction: Graduate students only.

**UPPP 214. Quantitative Analysis for Planners. 4 Units.**

Introduces students to the basic statistical concepts used to address issues of public concern. Prepares students to perform, interpret, and evaluate quantitative data analyses commonly used in professional studies.

Restriction: Graduate students only.

**UPPP 215. Analytical Methods for Planning. 4 Units.**

Emphasizes the development of analytical techniques proven useful in the fields of management and administration. Topics include multiple regression, cost-benefit analysis and discounting, decision trees, and other techniques useful for the purposes of community analysis and planning.

Restriction: Graduate students only.

**UPPP 220. Qualitative Methods: Fieldwork and Data Collection. 4 Units.**

Covers fieldwork, data collections techniques, and related issues for anti-positivistic research. Data collection techniques include observation, physical traces, participation, in-depth interview. Data checks include veracity, detail, completeness, rigor.

Restriction: Graduate students only.

**UPPP 221. Public Policy. 4 Units.**

Explores different approaches to public policy analysis, the diverse conceptions of the goals and objectives that should be served by policy, and the appropriate role of the policy analyst. Policy consequences are traced to indirect and subtle incentives and disincentives.

Same as CLS C255, PLSC 221A.

Restriction: Graduate students only.

**UPPP 224. Environmental Politics and Policy. 4 Units.**

Reviews and critiques literature on discussion topics including: the nature and effectiveness of environmental movements and policies; the role of science and technology; the use of economic incentives in policy; decentralization of decision making; and creating arenas for public involvement.

Restriction: Graduate students only.

**UPPP 228. Demographics for Planning and Policy. 4 Units.**

Provides planning and policy practitioners with a condensed, nonspecialist orientation to the sources, applications, and interpretation of population statistics, and conveys the steps used in constructing local-area population forecasts and projections.

Restriction: Graduate students only.

**UPPP 231. Transportation and Environmental Health. 4 Units.**

Critically evaluates how transportation can promote sustainable, healthy, and equitable cities. Examines the interaction of transportation systems with urban form, land use, community health, and environmental quality.

Restriction: Graduate students only.

**UPPP 235. Geographic Information Systems (GIS) Problem Solving in Planning. 4 Units.**

Explores the application of geographic information systems (GIS) in urban planning. Steps through a GIS-based planning procedure that balances housing, jobs, tax base, utilities, transportation, and the natural environment.

Restriction: Graduate students only.

**UPPP 237. Introduction to Geographic Information Systems. 4 Units.**

Application of Geographic Information Systems (GIS) to the field of urban and regional planning. Emphasizes current issues that occur in actual implementation settings. Lecture/discussion followed by laboratory demonstrating the area of GIS discussed. Offers 'hands-on' student usage of GIS software.

**UPPP 239. Urban Design Theories and Applications. 4 Units.**

Introduction to contemporary and traditional theories of urban design and their applications. Organized around one question: How might planning and design of built environment contribute to making a good city? National and international case studies are introduced.

Restriction: Graduate students only.

**UPPP 243. Health Policy and Management. 4 Units.**

Multidisciplinary inquiry into theory and practice concerned with delivery, quantity, costs of health care for individuals and populations. Explores managerial and policy concerns regarding structure, process, outcomes of health services including the costs, financing, organization, outcomes, and accessibility of care.

Same as PUBH 222.

Restriction: Master of Public Health Degree students have first consideration for enrollment. Master of Public Policy Degree students have first consideration for enrollment. Graduate students only. Public Health Majors have first consideration for enrollment. Urban and Regional Planning Majors have first consideration for enrollment.

**UPPP 244. Land-Use Policy. 4 Units.**

Examination of the role of public policy in guiding growth and development in urban and suburban environments. Description of a wide-ranging set of growth policies, the rationales underlying their use, controversies and legal constraints, and evaluation of their effectiveness.

Restriction: Graduate students only.

**UPPP 246. Housing Policy. 4 Units.**

Examines theories and practices of housing policy and the relationship of housing to larger neighborhood, community, and regional development issues. Considers the roles of private for-profit and not-for-profit developers, lenders, and all levels of government in the provision of housing.

Prerequisite: Familiarity with basic statistics is required.

**UPPP 251. Poverty and Development . 4 Units.**

Examines competing conceptualizations, methods of measurement, and poverty alleviation strategies widely used in developing countries. Focuses on poverty conceptualized as economic deprivation, well-being, vulnerability, and social exclusion.

Same as SOCL 235.

Restriction: Graduate students only.

**UPPP 252. Issues in Environmental Law and Policy. 4 Units.**

Treatment of legal and policy strategies for promoting environmental protection and deterring environmental degradation within the context of other societal objectives. Topical approach with a focus on problems of special interest to criminologists and to environmental policy specialists.

Same as CLS C252.

Restriction: Graduate students only.

**UPPP 266. Economic Democracy . 4 Units.**

Explores a wide range of radical democratic and egalitarian visions (including but not limited to the Marxist tradition) for a more sane, just, and sustainable future.

Restriction: Graduate students only.

**UPPP 273. Global Urbanization. 4 Units.**

Examines the spread of cities worldwide in the 20th century. What are the political and economic causes of this process? What are the social-cultural, political, and economic effects? How is contemporary urbanization linked to global restructuring of other kinds.

Same as SOCL 252A.

Restriction: Graduate students only.

**UPPP 275. Special Topics in Urban Planning. 4 Units.**

Special topics in urban and regional planning are offered from time to time, but not on a regular basis. Course content varies with interest of the instructor.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**UPPP 279. Theories of Power and Empowerment. 4 Units.**

Studies different ways of thinking about power and its uses. Explores theories of power that inform various notions of empowerment, including resistance, participatory democracy, and workplace empowerment.

Same as MPHD 297R, PLSC 223A.

Restriction: Graduate students only.

**UPPP 281. Advanced Theory. 4 Units.**

Provides urban planning and public policy students with an introduction to advanced theory. Addresses broad theoretical approaches that cut across disciplinary and topical boundaries. Designed primarily for Ph.D. students.

**UPPP 282. Urban Design Studio for Planners: An Introduction. 4 Units.**

Introductory urban design for planners. Organized around a variety of assignments to encourage learning by design in a studio setting. Students work on design projects and drawing assignments to learn practical aspects of urban design.

Restriction: Graduate students only.

**UPPP 283. Collaborative Governance and Public Management. 4 Units.**

Introduction to inclusive management. To make effective use of public resources, public managers are inventing ways of managing that alter relationships within organizations, between organizations, between sectors, and with the public. Requires rethinking fundamentals such as leadership and motivation.

Same as PPOL 283.

Restriction: Public Policy Majors have first consideration for enrollment.

**UPPP 292. Professional Report. 4 Units.**

Workshop designed to assist M.U.R.P. students in conducting their professional reports. Students select topics, design projects, conduct professional investigations, and write up reports.

**UPPP 294A. Urban Planning Practicum I. 4 Units.**

Engages students in practical planning projects in the community under a central theme within Planning. Students take a problem-solving approach and employ and further develop data gathering, analysis, graphic and oral communication, public engagement, and report writing skills.

Restriction: Graduate students only.

**UPPP 294B. Urban Planning Practicum II. 4 Units.**

Engages students in practical planning projects in the community under a central theme within Planning. Students take a problem-solving approach and employ and further develop data gathering, analysis, graphic and oral communication, public engagement, and report writing skills.

Prerequisite: PPD 294A

Restriction: Graduate students only.

**UPPP 296. Doctoral Dissertation Research and Writing. 2-12 Units.**

Dissertation research with Urban Planning and Public Policy faculty.

Prerequisite: Advancement to candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**UPPP 297. Research Design. 4 Units.**

Provides training in research design and methods. Students learn how to evaluate the strength of research findings based on the methods used by a researcher and learn to use lessons from the course to develop a research proposal.

Restriction: Graduate students only.

**UPPP 298. Directed Studies in Urban Planning. 2-4 Units.**

Directed studies in Urban Planning.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**UPPP 299. Independent Study in Urban Planning. 2-8 Units.**

Independent Study in Urban Planning.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

## Vietnamese (VIETMSE)

### Courses

**VIETMSE 1A. Fundamentals of Vietnamese. 5 Units.**

Designed for students with little or no exposure to Vietnamese. Natural approach with emphasis on four fundamental skills of listening, speaking, reading, and writing. Conducted in Vietnamese.

Prerequisite: Placement into VIETMSE 1A is required.

**VIETMSE 1B. Fundamentals of Vietnamese. 5 Units.**

Designed for students with little or no exposure to Vietnamese. Natural approach with emphasis on four fundamental skills of listening, speaking, reading, and writing. Conducted in Vietnamese.

Prerequisite: VIETMSE 1A. VIETMSE 1A with a grade of C or better. Placement into VIETMSE 1B is also accepted.

**VIETMSE 1C. Fundamentals of Vietnamese. 5 Units.**

Designed for students with little or no exposure to Vietnamese. Natural approach with emphasis on four fundamental skills of listening, speaking, reading, and writing. Conducted in Vietnamese.

Prerequisite: VIETMSE 1B or VIETMSE S1AB. VIETMSE 1B with a grade of C or better. VIETMSE S1AB with a grade of C or better. Placement into VIETMSE 1C is also accepted.

**(VI)****VIETMSE 2A. Intermediate Vietnamese. 4 Units.**

Designed for students to advance their Vietnamese language skills from introductory to intermediate level. Designed to develop writing and reading skills and communicative skills in authentic situations. Students are introduced to aspects of Vietnamese culture relating to lesson topics.

Prerequisite: VIETMSE 1C and VIETMSE S1BC. VIETMSE 1C with a grade of C or better. VIETMSE S1BC with a grade of C or better. Placement into VIETMSE 2A is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)****VIETMSE 2B. Intermediate Vietnamese. 4 Units.**

Designed for students to advance their Vietnamese language skills from introductory to intermediate level. Designed to develop writing and reading skills and communicative skills in authentic situations. Students are introduced to aspects of Vietnamese culture relating to lesson topics.

Prerequisite: VIETMSE 2A. VIETMSE 2A with a grade of C or better. Placement into VIETMSE 2B is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)****VIETMSE 2C. Intermediate Vietnamese. 4 Units.**

Designed for students to advance their Vietnamese language skills from introductory to intermediate level. Designed to develop writing and reading skills and communicative skills in authentic situations. Students are introduced to aspects of Vietnamese culture relating to lesson topics.

Prerequisite: VIETMSE 2B. VIETMSE 2B with a grade of C or better. Placement into VIETMSE 2C is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)****VIETMSE 10A. Vietnamese Peer-to-Peer Language Mentor Program. 1 Unit.**

Peer-to-Peer Language Mentor Program in which student mentors work with student mentees to increase the language skills of both participants. One hour weekly meetings. VIETMSE 10A is for language mentors.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**VIETMSE 10B. Vietnamese Peer-to-Peer Language Mentor Program. 1 Unit.**

Peer-to-Peer Language Mentor Program in which student mentors work with student mentees to increase the language skills of both participants. One hour weekly meetings. VIETMSE 10B is for language mentees.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**VIETMSE 50. Vietnamese Culture . 4 Units.**

Vietnamese culture and society in modern and historical contexts through the study of literary works, film, and other media. Philosophy and religious practices may also be examined. Course is taught in English.

**(IV)****VIETMSE 150. Vietnamese Literature and Culture in Translation. 4 Units.**

Major works in Vietnamese literature and culture in context.

Repeatability: Unlimited as topics vary.

# Visual Studies (VIS STD)

## Courses

**VIS STD 290A. Art History: Theories and Methods. 4 Units.**

Examines canonical texts and explores current directions in Art History.

**VIS STD 290B. Film & Media Studies: Theories and Methods. 4 Units.**

Examines canonical texts and explores current directions in Film and Media Studies.

**VIS STD 290C. Visual Studies: Theories and Methods. 4 Units.**

Examines canonical texts and explores current directions in Visual Studies.

**VIS STD 294. Getty Consortium Seminar. 4 Units.**

Special graduate seminar offered at the Getty Research Institute in Los Angeles, involving faculty and graduate students from the five graduate programs in Art History or Visual Studies located in southern California (UCI, UCLA, UCR, UCSB, and USC).

Repeatability: Unlimited as topics vary.

**VIS STD 295. Graduate Seminar in Visual Studies. 4 Units.**

Studies in selected areas of Visual Studies. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**VIS STD 296. Directed Reading. 4 Units.**

Directed reading on a specific topic agreed upon by student and instructor.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**VIS STD 297. Writing Practicum. 4 Units.**

Offered winter quarter each year and taught in a workshop format. Assists students with the preparation and revision of the dissertation prospectus so that they may advance to candidacy.

Prerequisite: VIS STD 290A and VIS STD 290B and VIS STD 290C

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**VIS STD 298A. Reading for the Preliminary Examination. 4-12 Units.**

Directed reading in preparation for the preliminary examination. Formerly Visual Studies 298.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**VIS STD 298B. Prospectus Research. 4-12 Units.**

Research and writing of the dissertation prospectus.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**VIS STD 299. Dissertation Research. 4-12 Units.**

Research and writing of the dissertation.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

# Women's Studies (WOMN ST)

## Writing (WRITING)

### Courses

**WRITING 30. The Art of Writing: Poetry. 4 Units.**

Beginners' workshop in the writing of poetry, evaluation of student manuscripts, and parallel readings.

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

Repeatability: May be taken for credit 2 times.

(Ia)

**WRITING 31. The Art of Writing: Prose Fiction. 4 Units.**

Beginners' workshop in fiction writing, evaluation of student manuscripts, and parallel readings.

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

Repeatability: May be taken for credit 2 times.

(Ia)

**WRITING 37. Intensive Writing. 6 Units.**

Critical reading and analysis conducted through literary, academic, journalistic, and fictional genres with additional instruction in paragraph development and sentence-level mechanics. Students analyze and apply rhetorical principles in a range of writing assignments.

Prerequisite: Students must have taken the UC Analytical Writing Placement Examination.

Grading Option: Letter Grade only.

Overlaps with WRITING 39A, WRITING 39B.

(Ia)

**WRITING 39A. Introduction to Writing and Rhetoric. 4 Units.**

Introduction to the principles of rhetoric through readings and writing assignments across a range of genres, including fiction, non-fiction, journalism and academic essays. Rigorous instruction in composition and style, including organization, paragraph development, and sentence-level mechanics.

Prerequisite: Placement via the UC Analytical Writing Placement Examination is required.

Grading Option: Letter Grade only.

Overlaps with WRITING 37, WRITING 39AP.

**WRITING 39AP. Introduction to Writing and Rhetoric with Lab. 6 Units.**

Introduces the principles of rhetoric through readings and writing assignments across a range of genres. Rigorous instruction in composition and style. Designed for students seeking additional English language support.

Prerequisite: Students must have taken the UC Analytical Writing Placement Examination and the Academic English Placement Test.

Grading Option: Letter Grade only.

Overlaps with WRITING 39A, WRITING 37.

**WRITING 39B. Critical Reading and Rhetoric. 4 Units.**

Critical reading and analysis conducted through literary, academic, journalistic, and fictional genres. Students analyze and apply rhetorical principles in a range of writing assignments.

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

Overlaps with WRITING 37.

(Ia)

**WRITING 39C. Argument and Research. 4 Units.**

Intensive instruction in research methods, argumentation, and rhetorical invention. Readings selected from current nonfiction and materials located by students from the University library's holdings, to include databases across a range of disciplines.

Prerequisite: WRITING 37 or WRITING 39B or AP36 or AP37. WRITING 37 with a grade of C or better. WRITING 39B with a grade of C or better. AP36 with a minimum score of 4. AP37 with a minimum score of 4

(Ia)

**WRITING 90. Intermediate Poetry Writing. 4 Units.**

Intermediate workshop in the writing of poetry, evaluation of student manuscripts, and parallel readings.

Prerequisite: WRITING 30

Repeatability: May be taken for credit 2 times.

**WRITING 91. Intermediate Fiction Writing. 4 Units.**

Intermediate workshop in the writing of fiction, evaluation of student manuscripts, and parallel readings.

Prerequisite: WRITING 31

Repeatability: May be taken for credit 2 times.

**WRITING 101W. Undergraduate Seminar: Applications in Literary Theory and Criticism for Creative Writing. 4 Units.**

Readings in literature, with discussions and written rhetorical responses on their making.

Prerequisite: (WRITING 30 or WRITING 31) and (WRITING 90 or WRITING 91) and (WRITING 30 or WRITING 31 or WRITING 90 or WRITING 91 or ENGLISH 16 or ENGLISH 17). Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: English Majors only. Literary Journalism Majors only.

(Ib)

**WRITING 110. Short Story Writing. 4 Units.**

Three-hour workshop in short fiction; discussion of student writing and of relevant literary texts.

Repeatability: May be taken for credit 2 times.

**WRITING 111. Poetry Writing. 4 Units.**

Three-hour advanced poetry writing workshop; discussion of student writing and of relevant literary texts.

Repeatability: May be taken for credit 2 times.

**WRITING 113. Novel Writing. 4 Units.**

Three-hour advanced workshop in fiction writing; discussion of student writing and of relevant literary texts.

**WRITING 139W. Advanced Expository Writing. 4 Units.**

Study of rhetoric, disciplinary genres, and modes of knowledge production; practice in writing effective prose. Essays of varying lengths, totaling at least 4,000 words.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only.

(Ib)

**WRITING 197. Writing Internship . 2-4 Units.**

Internships focused on writing. In consultation with a faculty advisor, students create a course from response essays, research essays, and assessment project data. Internships may include editing and publication projects, supervised teaching and tutoring assignments, community literacy projects.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**WRITING 250A. Graduate Writers' Workshop (Fiction). 4 Units.**

Graduate fiction workshop open to students enrolled in the MFA program in Writing.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

**WRITING 250B. Graduate Writers' Workshop (Fiction). 4 Units.**

Graduate fiction workshop open to students enrolled in the MFA program in Writing.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

**WRITING 250C. Graduate Writers' Workshop (Poetry). 8 Units.**

Graduate poetry workshop open to students enrolled in the M.F.A. Programs in Writing.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

**WRITING 251A. Writing in Conference (Fiction). 4 Units.**

Graduate fiction workshop open to students enrolled in the MFA program in Writing.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

**WRITING 251B. Writing in Conference (Fiction). 4 Units.**

Graduate fiction workshop open to students enrolled in the MFA program in Writing.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

**WRITING 251C. Writing in Conference (Poetry). 8 Units.**

Graduate poetry workshop open to students enrolled in the M.F.A. Programs in Writing.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

## University Administration

Under the State constitution, governance of the University is entrusted to The Board of Regents. The Regents appoint the President of the University, and with the President's advice, the officers of the University. Authority in academic matters is delegated by The Regents to the Academic Senate, which consists of faculty and certain administrative officers. The Academic Senate determines academic policy for the University as a whole, sets conditions for admission and the granting of degrees, authorizes and supervises courses and curricula, and advises the University administration on faculty appointments, promotions, and budgets. Additionally, each campus has a divisional Academic Senate.

The President is executive head of the total institution. Each campus has a Chancellor as its chief administrative officer. Students participate in policy-making at both the campus and Universitywide levels.

## The Regents of the University of California

### Regents Ex Officio

Governor of California: Gavin Newsom

Lieutenant Governor of California: Eleni Kounalakis

Speaker of the Assembly: Anthony Rendon

State Superintendent of Public Instruction: Tony Thurmond

President of the Alumni Associations of the University of California: Darin Anderson

Vice President of the Alumni Associations of the University of California: Jason Morimoto

President of the University: Michael V. Drake

### Appointed Regents <sup>1</sup>

Maria Anguiano (2028)

Richard C. Blum (2026)

Laphonza Butler (2030)

Michael Cohen (2030)

Gareth Elliott (2025)

Cecilia Estolano (2022)

Howard Guber (2029)

George Kieffer (2021)

Sherry L. Lansing (2022)

Richard Leib (2026)

Hadi Makarechian (2020)

Jamaal Muwwakkil (Student Regent - July 1, 2020 - June 30, 2021)

Eloy Otiz Oakley (2024)

Lark Park (2029)

John Pérez (2024)

Janet Reilly (2028)

Richard Sherman (2025)

Jonathan Sures (2032)

Charlene Zettel (2021)

### Regents-Designate <sup>2</sup>

Cheryl Lott (July 1, 2020 - June 30, 2021)

Art Torres (July 1, 2020 - June 30, 2021)

- <sup>1</sup> Regents except ex-officio Regents and the student Regent, are appointed by the Governor to 12-year terms commencing on March 1. Ex-officio Regents serve by virtue of their elected or appointed positions; the student Regent is appointed by the Regents to a one-year term commencing on July 1.
- <sup>2</sup> One-year terms expiring June 30.

### **Faculty Representatives to The Regents**

Kum-Kum Bhavnani (September 1, 2018 - August 31, 2020)

Mary Gauvain (September 1, 2019 - August 31, 2021)

### **Staff Advisors to The Regents**

Ann Jeffrey (July 1, 2020 - June 30, 2021)

### **Principal Officers of The Regents**

General Counsel and Vice President – Legal Affairs: Charles F. Robinson

Treasurer of The Regents and Chief Investment Officer and Vice President – Investments: Jagdeep Singh Bachher

Secretary and Chief of Staff to The Regents: Anne Shaw

Senior Vice President – Chief Compliance and Audit Officer: Alexander Bustamante

### **Office of the President**

President of the University: Michael V. Drake

Interim Vice President – Office of the National Laboratories: Craig Leasure

Interim Executive Vice President – Chief Financial Officer: Paul Jenny

Provost and Executive Vice President – Academic Affairs: Michael Brown

Executive Vice President – UC Health: Carrie L. Byington

Executive Vice President – Chief Operating Officer: Rachael Nava

### **Chancellors**

Chancellor at Berkeley: Carol Christ

Chancellor at Davis: Gary S. May

Chancellor at Irvine: Howard Gillman

Chancellor at Los Angeles: Gene D. Block

Chancellor at Merced: Juan Sánchez Muñoz

Chancellor at Riverside: Kim A. Wilcox

Chancellor at San Diego: Pradeep K. Khosla

Chancellor at San Francisco: Sam Hawgood

Chancellor at Santa Barbara: Henry T. Y. Yang

Chancellor at Santa Cruz: Cynthia Larive

### **UCI Administrative Officers**

Chancellor: Howard Gillman

Interim Provost and Executive Vice Chancellor: Hal S. Stern

Chief Financial Officer and Vice Chancellor, Division of Finance and Administration: Ronald Cortez

Vice Chancellor, Research: Pramod Khargonekar

Vice Chancellor, Equity, Diversity and Inclusion: Douglas M. Haynes

Vice Chancellor, Student Affairs: Willie L. Banks, Jr.

Vice Chancellor, University Advancement: Brian Hervey

Vice Chancellor, Health Affairs: Steven A. N. Goldstein

Chief Executive Officer, Medical Center: Chad T. Lefteris

Vice Provost, Academic Personnel: Diane K. O'Dowd

Acting Vice Provost, Academic Planning: Valerie Jenness

Vice Provost, Career Pathways: Gary W. Matkin

Vice Provost, Graduate Education: Gillian R. Hayes

Vice Provost, Teaching and Learning: Michael Dennin

### **UCI Deans and Other Academic Officers**

Dean, Claire Trevor School of the Arts: Stephen Barker

Dean, School of Biological Sciences: Frank M. LaFerla

Dean, The Paul Merage School of Business: Eric Spangenberg

Dean, School of Education: Richard Arum

Interim Dean, The Henry Samueli School of Engineering: Michael Green

Dean, School of Humanities: Tyrus Miller

Dean, Donald Bren School of Information and Computer Sciences: Marios Papaefthymiou  
 Dean, School of Law: L. Song Richardson  
 Dean, School of Medicine: Michael Stamos  
 Dean, Sue and Bill Gross School of Nursing: Adeline Nyamathi  
 Dean, School of Physical Sciences: James Bullock  
 Dean, School of Social Ecology: Nancy Guerra  
 Dean, School of Social Sciences: William M. Maurer  
 Director and Founding Dean, Pharmaceutical Sciences: Jan Hirsch  
 Director and Founding Dean, Population Health: Bernadette Boden-Albala  
 Dean, Graduate Division: Gillian R. Hayes  
 Dean, Division of Undergraduate Education: Michael Dennin  
 Dean, Division of Continuing Education: Gary W. Matkin  
 University Librarian: Lorelei Tanji

## Academic Integrity Policy

### THE MANUAL OF THE IRVINE DIVISION OF THE ACADEMIC SENATE

#### PART III - APPENDICES OF THE IRVINE DIVISION

##### Appendix VIII: UCI Academic Senate Policy on Academic Integrity

Revised: 12/12/96, 10/12/00, 11/21/02, 1/21/03, 1/26/06, 4/05/07, 6/7/2007, 6/5/08, 4/23/15

#### I. Preamble

The University of California, Irvine is an institution of learning, research, and scholarship that is strengthened by the existence of an environment of integrity. As members of the academic community, instructors, students, and administrators are responsible for maintaining this environment. It is essential that all members of the University practice academic integrity and accept individual responsibility for their work and actions. Violating the Academic Integrity Policy is unacceptable, devaluing the teaching and learning experience for the entire community. While at UCI, members of the academic community should become better educated about the ethical framework underpinning academic integrity and improve their moral standards supporting it.

The UCI Academic Senate Policy on Academic Integrity states the general rules and procedures associated with student academic integrity. This Academic Integrity Policy applies to undergraduate and graduate students enrolled in a UCI course. A separate policy governs the integrity of research.

Medical students are governed by policies specified in the UCI School of Medicine Handbook (<https://ucisom.instructure.com/courses/106/>).

Law students are governed by policies specified in School of Law Academic Honor Code ([http://www.law.uci.edu/academics/registrar/policies/UCI\\_Law\\_Honor\\_Code.pdf](http://www.law.uci.edu/academics/registrar/policies/UCI_Law_Honor_Code.pdf)).

#### II. Defined Terms

1. Academic Integrity Policy: the UCI Academic Senate Policy on Academic Integrity.
2. Academic Integrity Policy Violations: outlined in the **Procedures** document of the Academic Integrity Policy.
3. Academic Consequences: grades assigned by Instructor.
4. Administrative Sanctions: outlined in the **Procedures** document of the Academic Integrity Policy.
5. AIAO: Academic Integrity Administrative Office.
6. Instructor: faculty member or instructor of record.
7. Student: any student or students who have allegedly violated the Academic Integrity Policy.
8. Hearing Panel: subcommittee of the Council of Student Experience as outlined in the **Procedures** document of the Academic Integrity Policy.

#### III. Students' Responsibilities

All students are expected to complete a course in compliance with the Instructor's standards. No student shall engage in any activity involving any Academic Integrity Policy Violations. No student shall engage in any activity that involves attempting to receive a grade by means other than honest effort, and shall not aid another student who is attempting to do so. All students are encouraged to notify instructors, but may also notify the AIAO, about observed incidents of Academic Integrity Policy Violations. Instructors should take reasonable steps to preserve the confidentiality of students making such reports.

All students have the responsibility to become familiar with and abide by the Academic Integrity Policy.

#### IV. Instructors' Responsibilities

Instructors should create an environment in their classes where academic integrity is understood and supported. They should assign grades in a transparent and equitable manner. Specifically:

When an Instructor believes that a Student has violated the Academic Integrity Policy, the Instructor should report the incident to the AIAO within thirty instructional days of discovering the possible Academic Integrity Policy Violation. The Instructor shall participate in the process according to the Academic Integrity Policy.

In all cases, the Instructor shall determine the Student's grade in the course.

#### V. Teaching Assistant's (TA) and Reader's Responsibilities

A student acting in the capacity of a Teaching Assistant (TA) or Reader has a special responsibility to safeguard academic integrity. A TA/Reader shall equitably grade student work in the manner set by the Instructor. A TA/Reader shall not provide a student with any information or collaboration that would aid the student in completing the course in a dishonest manner (e.g. providing access to unauthorized material related to tests, examinations, or homework).

When a TA/Reader has evidence of an Academic Integrity Policy Violation, the TA/Reader should report the incident to the Instructor. The Instructor should report the incident to the AIAO.

#### VI. Responsibility for Resolution of Cases of Violation of the Policy

The responsibility for maintaining the standards of academic integrity rests with two University authorities: the Instructor and the AIAO. Under the Standing Orders of the Regents, discipline is the exclusive responsibility of the campus administration while authority over courses and curricula is under the exclusive authority of the Instructor through the Academic Senate.

##### A. Role of the Instructor

The Instructor shall assign grades in the course as appropriate to the work involved. All Academic consequences (e.g. scores on the assignments and course grades) are under the sole purview of the Instructor in the course.

##### B. Role of The AIAO

The AIAO manages the cases for all students accused of Academic Integrity Policy Violations and is the central repository for all case-related materials. The AIAO is the initial contact for the Instructor or students on all cases of Academic Integrity Policy Violations.

The AIAO is also responsible for imposing administrative sanctions. These sanctions shall be in accordance with guidelines authorized by the Council on Student Experience. Administrative sanctions range in severity from administrative probation to dismissal from the University. Students found responsible for multiple cases of Academic Integrity Policy Violations may be subject to dismissal from the University.

The AIAO must notify the Student (and if needed, the Instructor) of any allegations of Academic Integrity Policy Violations. The AIAO adjudicates cases when the Student disputes the possible imposition of administrative sanctions related to Academic Integrity Policy Violations. The AIAO can request meetings with the Instructor and Student to discuss the case, sanction, or procedure. The AIAO must follow the procedures and communicate in a timely manner. He or she may extend any timelines in the Academic Integrity Policy when practical exigencies so dictate, in which case all involved parties will be notified in writing and via email.

If the Student appeals the AIAO's decision, the AIAO shall schedule a Hearing Panel (see below) to review the case and make a final determination of the appropriate sanction.

The duty of the AIAO is not merely disciplinary. The office is encouraged to work with faculty and students to create a culture in which academic integrity is valued.

##### C. Records Management

The AIAO must archive its records to reflect the resolution of the case, and shall maintain a record of all cases as described in the **Procedures** document. The AIAO shall report annually to the Academic Senate Council on Student Experience, to the Vice Chancellor of Student Affairs, the Provost and Executive Vice Chancellor, the Associated Undergraduate Students of the University of California, Irvine, and the Associated Graduate Students of the University of California, Irvine on all of the following: (1) the number, nature, and type of cases; (2) the pattern of decision-making; (3) the severity and type of academic consequences and administrative sanctions; and (4) other relevant matters as directed by the Council on Student Experience.

##### D. Role of the Hearing Panel

If the Student requests a hearing, the AIAO will request the Subcommittee on Academic Integrity of the Council on Student Experience to convene a Hearing Panel to review the case. (See the **Procedures** document.) The Hearing Panel will hear evidence on the case from the Student, Instructor, and other relevant parties as determined by the panel. The Hearing Panel shall communicate the final decision to the AIAO.

## VII. Procedures for Resolution of Cases of Academic Integrity Policy Violations

These are described in the **Procedures** document of the Policy.

## VIII. MAINTENANCE OF DISCIPLINARY RECORDS

The AIAO will maintain a record of each student who receives a letter(s) of Academic Integrity Policy Violations as described in the **Procedures** document. Maintaining such a record is not an administrative sanction.

# Academic Integrity Procedures

## PROCEDURES FOR RESOLUTION OF CASES OF ACADEMIC INTEGRITY POLICY VIOLATIONS

### I. Overview

The procedure for resolution of Academic Integrity Policy Violations is divided into four phases:

1. **The Reporting Phase.** During this phase, the Instructor or a student communicates to the AIAO about any alleged Academic Integrity Policy Violation;
2. **The Review Phase.** During this phase, the Student is afforded the opportunity to review the charges. The AIAO reviews the evidence in consultation with the various parties and decides responsibility.
3. **The Decision Phase.** During this phase, the AIAO decides on the Administrative Sanctions and communicates the decision to the various parties; and
4. **The Hearing Phase.** During this phase, if the Student chooses to contest the sanctions, a Hearing Panel will be convened to review the case and make a final decision.

The four phases are described in more detail below.

### II. The Reporting Phase

When an Instructor has evidence that a Student has committed an Academic Integrity Policy Violation, the Instructor should meet with the Student to discuss the alleged Academic Integrity Policy Violation. If the Instructor suspects that there is evidence of an Academic Integrity Policy Violation, he or she should submit a formal charge describing the alleged Academic Integrity Policy Violation to the AIAO and the AIAO will send a copy of the charge to the Student.

All cases of alleged Academic Integrity Policy Violations should be reported to the AIAO. Within thirty (30) instructional days of the confirmation of evidence of an Academic Integrity Policy Violation, the Instructor should notify the AIAO of the case by submitting through an online form the following information: the Student's name, the Student's ID, the course name and number, the date of the incident, and a description of the incident.

If, after reporting a charge to the AIAO, the Instructor decides to withdraw the charge, the Instructor shall notify the AIAO via email of his or her decision. The AIAO shall notify the Student and the appropriate Associate Dean (if necessary) that the Instructor has withdrawn the charge against the Student. All notation of the charge shall be removed from the Student's academic record. Should new evidence become available, the charge may be reinstated in accordance with the Academic Integrity Policy.

In all cases, the Instructor shall determine the grade for the assignment and for the course.

If a student reports an incident of a violation of academic integrity to the AIAO, the AIAO shall communicate the allegation to all involved parties.

### III. The Review Phase

Once the Instructor or student has reported a charge of an Academic Integrity Policy Violation to the AIAO, the AIAO shall notify the Student in writing and via email that the Student is charged with an Academic Integrity Policy Violation. The official notice shall be sent to the Student's UCI email address. Reference to (or a copy of) the UCI Academic Senate Policies on Academic Integrity should be included in the notice. The letter may include a notification to the student to schedule a meeting with the AIAO to discuss the case. The student will have ten (10) instructional days to schedule the meeting to review the case. If the student does not schedule or fails to attend a scheduled meeting, the AIAO will move forward with determining a policy violation and will impose sanctions without the students input.

If the Student schedules a review, the AIAO shall review the charge(s) with the Student and may advise the student regarding possible administrative sanctions and the process for resolution of the charge(s) of an Academic Integrity Policy Violation. The AIAO will conduct the review by collecting the relevant documents, including the facts of the charge and the Student's description of the disagreement with the facts of the charge. The AIAO can request meetings with the Instructor and Student to discuss the case, the sanctions, or the procedures. The AIAO decides, based on the preponderance of the evidence, whether there was an Academic Integrity Policy Violation justifying administrative sanctions.

### IV. The Decision Phase

If the Student is found responsible for an Academic Integrity Policy Violation, administrative sanctions shall be determined by the AIAO. Administrative sanctions can range from administrative probation to dismissal from the University, depending on the severity of the case, any previously recorded offenses, and any mitigating circumstances. In such cases, these sanctions, as described below, will be administered by the AIAO.

In the decision letter, the student will be notified of the hearing process and will be provided with a link to the procedures.

The AIAO shall notify the Instructor and the appropriate Associate Dean(s) of the administrative sanction(s). A record of the administrative sanction(s) shall be maintained by the AIAO. The AIAO shall notify the Student of the decision.

## V. The Hearing Phase

Once the AIAO has issued a decision and sanctions, the Student may contest the decision and/or sanctions within ten instructional days of receiving notification by the AIAO, by requesting an Academic Integrity Hearing Panel. The Student may request a hearing by submitting a written appeal to the AIAO. The AIAO will forward the appeal to the Academic Integrity Review Board (AIRB), which will schedule a hearing of the case before the Hearing Panel. The hearing will be scheduled as soon as possible, but no later than sixty (60) instructional days after the Student requests a hearing.

## VI. Hearing Panel on Academic Integrity

The AIRB will hear undergraduate and graduate student cases. The AIRB will be a standing senate committee comprised of fourteen senate faculty members, three Associate Deans representing undergraduate student education, and three Associate Deans representing graduate student education.

## VII. Hearings

If the Student requests a hearing, the AIRB shall schedule a hearing of the case. The student will be afforded two options.

*Option A: (for outcomes of warning, probation and educational sanctions)*

1. A student contests in writing within ten (10) instructional days to request a hearing;
2. The student contests outcome(s) based on three criteria
  - a. New evidence which could not be adduced earlier which is likely to change the results;
  - b. Violation of due process; or
  - c. An imposed sanction that is too harsh given the findings of fact.
3. The student is not present; hearing panel reviews all written information;
4. The hearing panel will convene and review the written request, and all materials that were utilized in the original finding of responsibility;
5. The hearing panel will complete review and may affirm, modify, or reverse original sanction;
6. Decision is final and communicated to AIAO to notify student.

*Option B: (for outcomes of suspension and dismissal)*

1. A student contests decision in writing within ten (10) instructional days to request a hearing;
2. The request is to hear the case from the beginning;
3. The student is present;
4. The student will have the opportunity to present to the hearing panel, have an advisor \*;
5. The AIAO will present all relevant information to the hearing panel;
6. The hearing panel will determine a finding and sanctions, if appropriate; they may affirm, modify or reverse original sanction
7. Decision is final and communicated to AIAO to notify student.

• Students are allowed to have an advisor. An advisor can be an attorney, parent, friend, etc. During the hearing, an advisor may act as a consultant for the student; however, an advisor may not speak on behalf of the student. If a student chooses to have an attorney as the advisor, the student shall pay all fees, costs, and expenses for the retention of an attorney. If the student chooses to be accompanied by an advisor or attorney during the hearing, the student must sign a Family Educational Rights and Privacy Act of 1974 (FERPA) waiver, to grant access to the information. In the interest of expediency, as a general practice, hearings shall not be delayed due to the unavailability of an advisor/attorney.

Once the hearing is scheduled, the AIRB must provide written notice to the parties involved regarding the date, time, and place of the hearing. The AIRB will rule on all questions of procedure, the admission or exclusion of evidence, and the need to call witnesses for additional testimony. Hearings shall be held in accordance with generally accepted standards of procedural due process.

Hearings will be closed. Reasonable efforts will be made by all parties to preserve confidentiality during the process. The Chancellor shall establish and publish campus regulations providing for the handling of academic integrity cases in accordance with basic standards of procedural due process. Authority may be delegated to the Vice Chancellor of Student Affairs as outlined in Section 11.00 Authority of the University of California Policies Applying to Campus Activities, Organizations and, Students (<http://ucop.edu/student-affairs/policies/student-life-policies/pacaos.html>). Consistent with this requirement, procedures specified in such regulations shall be appropriate to the nature of the case and the severity of the potential discipline.

When a formal hearing is held, the following minimum procedural standards will ensure the accused student a fair hearing:

1. Written notice within a reasonable time before the hearing. The written notice shall include the following information: (1) a brief statement of the factual basis of the charges; (2) the University policies or campus regulations allegedly violated; and (3) the time and place of the hearing.
2. The opportunity for a prompt and fair hearing where the University shall bear the burden of proof, and at which the student shall have the opportunity to present documents and witnesses, to contest evidence, and to confront and cross-examine witnesses presented by the University. Notwithstanding the preceding sentence, no inference shall be drawn from the silence of the accused student.
3. A record of the hearing and an expeditious written decision based upon the preponderance of evidence, which shall be accompanied by a written summary of the findings of fact.

#### **VIII. Report of the AIRB Hearing Panel on Academic Integrity Hearing Panel**

After the hearing, the Hearing Panel shall arrive at a final decision. When a decision is reached, the AIAO will be informed of the decision. There are no further appeals or processes.

#### **IX. IMPLEMENTATION**

Once the decision has been rendered, the AIAO will notify the Student by issuing a letter to the Student and initiate any other necessary administrative actions. In case of a change in sanctions, the AIAO shall notify the Instructor and the appropriate Associate Dean(s) of the new administrative sanction(s). A record of the administrative sanction(s) shall be maintained by the AIAO.

Students found in violation of the Academic Integrity Policy must complete an online tutorial reviewing the Academic Integrity Policy. Students must complete this before they can enroll for courses during the year following the incident or, in the case of seniors, before a degree is awarded.

When, as a result of violations of the Academic Integrity Policy, a student is suspended or dismissed, a notation that the discipline was imposed must be posted on the academic transcript for the duration of the suspension or dismissal.

If a student receives a reduced grade in a course because of an Academic Integrity Policy Violation, the reduced grade will remain on the transcript even if the student retakes the course and obtains an improved grade.

Students with Academic Integrity Policy Violations may be excluded by the Associate Deans from consideration for academic honors at graduation. For students who wish to change majors, individual majors may take into account the commission of an act of dishonesty. Exclusions from consideration for honors and exclusion from major change are not determined at the time of the violation and do not fall under this Policy. Thus, students so affected are not eligible to request a formal hearing on the exclusion.

#### **X. MAINTENANCE OF DISCIPLINARY RECORDS**

The AIAO will maintain a record of each student who receives letter(s) of Academic Integrity Policy Violations and produce annual reports. The AIAO is required to report annually to the Academic Senate Council on Teaching, Learning, and Student Experience (CTLSE), the Vice Chancellor of Student Affairs, the Provost and Executive Vice Chancellor, the Associated Undergraduate Students of the University of California, Irvine, and the Associated Graduate Students of the University of California, Irvine, as outlined in Section VI.C. of the Academic Integrity Policy.

Records will normally be destroyed after seven years, unless the AIAO determines in any particular case that there is good reason to extend the period of retention. To ensure that minor (refers to anything below a suspension) and nonrecurring infractions do not hurt a student's career beyond UCI, the AIAO will expunge academic records upon reward of degree. The University will release a student's disciplinary records to potential employers, governmental agencies, other educational institutions, or other organizations or individuals only if authorized to do so by the student in question or if compelled by law. Any record expunged by the AIAO will also be expunged in the offices of the appropriate Associate Deans.

#### **XI. TYPES OF ACADEMIC INTEGRITY POLICY VIOLATIONS**

Academic integrity applies equally to electronic media and print, and involves text, images, and ideas. Violations include but are not limited to the following examples:

##### **A. Cheating**

1. Copying from others during an examination.
2. Communicating examination answers to other students during an examination, or communicating examination questions to students who will take the same examination later.
3. Offering another person's work as one's own.
4. Taking an examination for another student.
5. Asking or allowing a student to take an examination for oneself or another student.
6. Sharing or collaborating on answers for a take-home examination or assignment unless specifically authorized by the instructor.
7. Tampering with an examination after it has been graded, and then returning it in an attempt to earn more credit.
8. Using unauthorized materials, prepared answers, written notes, or other information concealed in a blue book or elsewhere during an examination.

**B. Dishonest Conduct**

1. Stealing or attempting to steal an examination or answer key from the instructor.
2. Submitting substantial portions of the same work for credit in more than one course without consulting all instructors involved.
3. Falsifying or forging academic documents or records.

**C. Plagiarism**

Plagiarism is intellectual theft. It means use of the intellectual creations of another without proper attribution. Plagiarism may take two main forms, which are clearly related:

1. To steal or pass off as one's own the ideas or words, images, or other creative works of another.
2. To use a creative production without crediting the source, even if only minimal information is available to identify it for citation.

Credit must be given for every direct quotation, for paraphrasing or summarizing a work (in whole, or in part), and for information which is not common knowledge.

**D. Collusion**

Any student who knowingly or intentionally helps another student perform any of the above acts of cheating or plagiarism is subject to discipline under the Academic Integrity Policy. Examples of collusion include:

1. Allowing others to do the research and writing of an assigned paper (including use of the services of a commercial term-paper company).
2. Allowing another student to copy one's own work during a test or take-home assignment.

**XII. GUIDELINES FOR ADMINISTRATIVE SANCTIONS FOR POLICY VIOLATIONS**

When a student is found to have violated University policies or campus regulations, any of the following disciplinary actions may be imposed. Any sanction imposed should be appropriate to the violation, taking into consideration the context and seriousness of the violation.

**A. Educational Course**

A tutorial or course which the student will be required to take.

**B. Warning**

Written notice or reprimand to the student that a violation of specified University policies or campus regulations has occurred, and that continued or repeated violations of University policies or campus regulations may be cause for further disciplinary action, normally in the form of disciplinary probation, loss of privileges and exclusion from activities, suspension, dismissal, or any combination of the preceding disciplinary actions.

**C. Disciplinary Probation**

Disciplinary probation is a status imposed for a specified period of time during which a student must demonstrate conduct that conforms to University standards of conduct. Conditions restricting the student's privileges or eligibility for activities may be imposed. Violation of any conditions of the probation or the policy may result in further disciplinary action, normally in the form of suspension or dismissal.

**D. Suspension**

Suspension is termination of student status at the campus for a specified period of time with reinstatement thereafter certain, provided that the student has complied with all conditions imposed as part of the suspension and provided that the student otherwise qualifies for reinstatement. Violation of the conditions of suspension or of University policies or campus regulations during the period of suspension may be cause for further disciplinary action, normally in the form of dismissal.

**E. Dismissal**

Dismissal is termination of student status for an indefinite period. Readmission to the University shall require the specific approval of the Chancellor of the campus to which a dismissed student has applied. Readmission after dismissal may be granted only under exceptional circumstances.

**F. Revoking Awarding of Degree**

Subject to the concurrence of the Academic Senate, a student's degree may be revoked if obtained by fraud. Such revocation is subject to review on appeal by the Chancellor.

**G. Other**

Other disciplinary actions may include community service.

**Principles of Community**

UCI is a multicultural community of people from diverse backgrounds. Our activities, programs, classes, workshops, lectures, and everyday interactions are enriched by our acceptance of one another, and we strive to learn from each other in an atmosphere of positive engagement and mutual respect.

Our legacy for an increasingly multicultural academic community and for a learning climate free from expressions of bigotry is drawn from the United States and California constitutions and from the charter of the University of California, which protects diversity and reaffirms our commitment to the protection of lawful free speech. Affirmation of that freedom is an effective way of ensuring that acts of bigotry and abusive behavior will not go unchallenged within the university. Tolerance, civility and mutual respect for diversity of background, gender, ethnicity, race and religion are as crucial within our campus community as are tolerance, civility and mutual respect for diversity of political beliefs, sexual orientation, and physical abilities. Education and a clear, rational and vigorous challenge are positive responses to prejudice and acts of bigotry.

The university's nondiscrimination policy, in compliance with applicable federal and state law, covers treatment in university programs and activities as well as admission and employment. UCI expects all those affiliated with it to adhere to the letter and the spirit of university nondiscrimination policies and related federal and state laws. Information concerning these policies is available at the University of California Office of the President (<http://www.ucop.edu/>).

Allegations of physical abuse, threats of violence, or conduct that threatens the health or safety of any person on university property or in connection with official university functions will be investigated promptly and, where found to exist, appropriate actions will be taken in accordance with university policy.

All who work, live, study and teach at UCI are here by choice and, as part of that choice, should be committed to these Principles of Community (<https://aisc.uci.edu/policies/pacaos/principles-of-community.php>) which are an integral part of the guidelines by which the university community can successfully conduct its affairs.

Click here to visit the Rights of Free Speech and Academic Freedom website. (<http://freespeech.uci.edu/>)

## Student Conduct and Discipline

Students enrolling in the university are expected to assume an obligation to conduct themselves in a manner compatible with the university's function as an educational institution. The *University of California Policies Applying to Campus Activities, Organizations and Students* set forth standards of conduct expected of UCI students. The *Policies* lists rules concerning conduct and related matters, as established by the policies of the Regents and the President of the University, and incorporates campus regulations.

## Anti-Hazing Compliance

The State of California and the University of California have expressly and repeatedly asserted their opposition to hazing and preinitiation activities which do not contribute to the positive development and welfare of the individuals involved.

In February 2006, the Education Code of the State of California was repealed and amended to codify within the Penal Code a new definition of hazing. In accordance with the revised Education Code and Penal Code, students are advised of the following:

### Education Code 32052

Any person who participates in the hazing of another, or any corporation or association which knowingly permits hazing to be conducted by its members or by others subject to its direction or control, shall forfeit any entitlement to State funds, scholarships or awards which are enjoyed by him, by her, or by it, and shall be deprived of any sanction or approval granted by any public educational institution or agency.

### Penal Code 245.6

Section 245.6 of the Penal Code reads:

1. It shall be unlawful to engage in hazing, as defined in this section.
2. "Hazing" means any method of initiation or preinitiation into a student organization or student body, whether or not the organization or body is officially recognized by an educational institution, which is likely to cause serious bodily injury to any former, current or prospective student of any school, community college, college, university or other educational institution in this state. The term "hazing" does not include customary athletic events or school-sanctioned events.
3. A violation of this section that does not result in serious bodily injury is a misdemeanor, punishable by a fine of not less than one hundred dollars (\$100), nor more than five thousand dollars (\$5,000), or imprisonment in the county jail for not more than one year, or both.
4. Any person who personally engages in hazing that results in death or serious bodily injury as defined in paragraph (4) of subdivision (f) of Section 243 of the Penal Code, is guilty of either a misdemeanor or a felony, and shall be punished by imprisonment in county jail not exceeding one year, or by imprisonment in the state prison.
5. The person against whom the hazing is directed may commence a civil action for injury or damages. The action may be brought against any participants in the hazing, or any organization to which the student is seeking membership whose agents, directors, trustees, managers or officers authorized, requested, commanded, participated in or ratified the hazing.
6. Prosecution under this section shall not prohibit prosecution under any other provision of law.

## Campus Safety and Security

The UCI Police Department is responsible for the safety and security of the UCI campus and the UC Irvine Health Medical Center campus. Safety and security at UCI and UC Irvine Health is a collaborative effort. UCI Police Department strives to foster a secure and supportive environment at UCI and UC Irvine Health.

### Crime Prevention

The UCI Police Department offers many educational programs and presentations to the campus community. The UCI Police Department teaches a variety of prevention and awareness topics. These topics include workplace violence and active shooter, drug and alcohol abuse prevention education, dating violence, domestic violence, sexual assault, and stalking awareness and prevention programs, identity theft, property and auto theft, and personal safety. For more information or to schedule a presentation, call 949-824-5223 or visit the UCI P (<http://www.police.uci.edu/>) public Safety website (<http://www.police.uci.edu/>). Crime prevention tips are also available on the website. In addition, the UCI Police Department maintains a Daily Crime and Fire Log for both the UCI and UC Irvine Health Medical Center campuses which contains a record of all crime reported to the UCI Police Department that occurred on or near UCI and the UC Irvine Health Medical Center for the most recent 60 day period. The Daily Crime and Fire Logs are open to the public at the front desk of the UCI Police Department administrative lobby during normal business hours (generally Monday through Friday, 8:00 a.m. - 5:00 p.m.). For more information, visit <https://www.police.uci.edu/clery/about-crime-fire-log.php>.

### Safety Tips

All members of the UCI community should be aware of their surroundings. Theft is the most common crime on the UCI campus. In order to help prevent theft, personal belongings (e.g. backpack, laptop computer, cellular phone) should be kept in sight, within arm's length or secured in a locked place. Students living on the UCI campus should keep their doors and windows locked at all times. Faculty and staff should keep valuables locked up while they are in their workplace. The last person to leave a laboratory or building should lock the doors before they leave. Report the presence of suspicious activity to the UCI Police Department as soon as possible by dialing 949-824-5223.

While on the UCI campus at night, it is suggested that you do not walk alone. The UCI Safety Escort Program is a free service available to all members of the UCI community. Safety escorts are also available at the UC Irvine Health Medical Center. Safety escorts will offer immediate (or as soon as possible) or pre-arranged safety escorts. Safety escorts on the UCI campus may be requested for free by dialing 949-824-7233 (SAFE) and on the UC Irvine Medical Center campus by dialing 714-456-5493. For more information, visit <https://www.police.uci.edu/how-do-i/safety-escort.php>.

### Emergency Call Boxes (Blue Light Phones)

Blue Light emergency call boxes are located throughout the UCI campus and the UC Irvine Health Medical Center campus. These call boxes are to be used to report emergencies, crimes, suspicious persons or activities, accidents, and safety hazards.

The UCI campus has over 150 Blue Light emergency phones installed around the ring mall, housing communities, and in parking structures and parking lots. Blue Light emergency phones are represented by a diamond on the UCI campus map (<https://uci.edu/visit/maps.php>). Blue Light call boxes are easily identified by the blue light on top of the terminal and the boxes have the ability to detect all sounds within a 15-foot radius. In order to activate the emergency call box, push the red button located on the front of the terminal. This will automatically connect the blue light phone to the UCI Police Department Dispatch Center. The UC Irvine Health Medical Center has emergency call boxes located throughout the complex and in the southeast corner of the Manchester parking lot. These call boxes are also connected to the UC Irvine Police Department Dispatch Center.

### Emergency Procedures and zotALERT Emergency Notification

The Emergency Management Division is charged with helping to continuously improve the resilience and readiness of the UCI campus community to respond to and recover from natural and human caused emergencies through mitigation, preparedness, response, and recovery. Emergency preparedness and evacuation information is provided to ensure the UCI community is prepared to respond in the event of a campus emergency. The UCI emergency procedures, preparedness, and evacuation information is available on the UCI Public Safety website (<https://www.police.uci.edu/>)

zotALERT (<http://www.oit.uci.edu/zotalert/>) is an emergency alert system that uses cell phone text messaging and UCI email to quickly notify the UCI community when a significant emergency or dangerous situation is confirmed, which poses an immediate threat to the health or safety of the UCI campus community. The zotALERT system is also available to members of the UC Irvine Health Medical Center community.

Students are strongly encouraged to sign up for zotALERT messages. A "text-enabled" mobile phone is needed. In order to sign up:

1. Login to StudentAccess (<https://www.reg.uci.edu/access/student/welcome/>)
2. Click "Contact Information"
3. Enter your mobile phone number
4. Click the "submit changes" button

### Timely Warning (Crime Alert) Notifications

In order to help safeguard the UCI and UC Irvine Health Medical Center campus communities and to increase crime awareness, a Crime Alert may be issued following the timely report of a Clery Act reportable crime to the UCI Police Department where the reported crime is considered by the UCI Police Department to represent a serious or continuing threat to students and employees. Crime Alerts are used to alert the entire community about certain crimes in a manner that aids in the prevention of similar crimes and to allow people to take precautions for their personal safety. The determination to

issue a Crime Alert is made on a case-by-case basis in light of all of the facts surrounding a reported crime. Each Crime Alert is sent community-wide at UCI and/or UC Irvine Health Medical Center via the Zot Mail email system.

### Community Advisory Notifications

The UCI Police Department may issue a Community Advisory notification for reported incidents that do not rise to the level of a zotALERT or Crime Alert notification. A community advisory notification may be issued for a specific segments of the campus population and may be sent to certain school and/or department head personnel for notification to their respective populations, as deemed necessary on a case-by-case basis. Community advisories may be distributed via electronic or physical distribution methods.

### Substance Abuse Policies

UCI is designated a drug-free environment. The sale, manufacture, distribution, or possession of any illegal controlled substance is a violation of both state and federal laws and will be strictly enforced by UCI Police Department. The consumption of alcohol is allowed only under certain conditions in compliance with state law. All members of the UCI community who violate substance abuse laws are subject to disciplinary action, criminal prosecution, fines, and/or imprisonment.

The sale, consumption, and furnishing of alcohol on the UCI campus is restricted by UCI's Alcohol Policy and California State law. These laws are controlled by the California Department of Alcohol and Beverage Control (ABC). ABC and UCI Police Department share the enforcement responsibility of alcohol laws on the UCI campus. It is unlawful to sell, furnish, or give alcohol to a person under the age of 21 years old (including at the Anthill Pub & Grille on the UCI campus). The possession of alcohol by anyone under 21 years old in a public place, or in a place open to the public, is also illegal. Additionally, it is also a violation of UCI's Alcohol Policy for anyone under the age of 21 to consume or possess alcohol in any public or private housing area on campus. Students and employees found violating alcohol/substance policies or laws could be subject to disciplinary sanctions by UCI.

### Weapons Policy

The California Penal Code contains several sections regarding the possession or control of weapons on college campuses. The UCI Police Department encourages all members of the campus community to be familiar with the following statutes that regulate the possession or control of weapons:

*Penal Code Section 626.9* – Felony Violation – Bringing or possessing a firearm on the grounds of a University of California campus, or any property owned or operated by the University of California, without written permission from the UCPD Chief of Police.

*Penal Code Section 626.10(b)* – Misdemeanor or Felony Violation – Bringing or possessing any dirk, dagger, ice pick, or knife having a fixed blade longer than 2 ½ inches on university grounds.

*Penal Code Section 16590* – Misdemeanor or Felony Violation – Possessing an undetectable firearm, cane gun, wallet gun, zip gun, belt buckle knife, blackjack, billy club, nunchaku, shuriken, metal knuckles and other prohibited weapons.

*Penal Code Section 21510* – Misdemeanor Violation – Carry upon the person, or in the passenger or driver's area of a vehicle, a switch blade knife having a blade longer than 2 ½ inches in length.

Immediately report any situation in which a person states they have a firearm on campus, or that they intend to use a firearm on campus, to the UCI Police Department by dialing 9-1-1. The UCI Police Department Dispatch Center may also be reached 24/7 on its non-emergency telephone line by dialing 949-824-5223. You can choose to remain anonymous when making a report.

### To Report an Incident

UCI Police Department needs your help to build and maintain a safe community. If you witness suspicious or unusual behavior on campus, please contact UCI Police Department immediately 24/7 by dialing 949-824-5223. UCI police officers will assess the situation and take the appropriate action. Please report all crimes. You can ask to remain anonymous.

On the UCI and UC Irvine Medical Center campuses, dial 9-1-1 for a police, medical, or fire emergency. For non-emergency police services, dial 949-824-5223 on the UCI campus and 714-456-5493 on the UC Irvine Medical Center campus.

The UCI Police Department's campus office is open 24/7 and is located on the ground floor of the Public Services Building, at the corner of East Peltason Drive and Pereira Drive, 100 Public Services Building.

Crimes occurring off campus should be reported immediately to the city or state law enforcement agency where the crime occurred.

The UCIPD Resource Guide can be found here ([http://catalogue.uci.edu/appendix/%20https://www.police.uci.edu/how-do-i/\\_brochures/resource-guide.pdf](http://catalogue.uci.edu/appendix/%20https://www.police.uci.edu/how-do-i/_brochures/resource-guide.pdf)).

### Annual Disclosure Notification - Clery Act Annual Security Report and Annual Fire Safety Report

The UCI Police Department publishes and makes available to all current and prospective students, staff, and faculty the UCI and UC Irvine Health Medical Center Annual Security Report and UCI Annual Fire Safety Report pursuant to the federal Clery Act (<http://www.police.uci.edu/police/clery/>). Both of these annual reports may be directly accessed at:

[https://www.police.uci.edu/clery/annual-reports/uci\\_security\\_report.pdf](https://www.police.uci.edu/clery/annual-reports/uci_security_report.pdf)

[www.ehs.uci.edu/programs/fire/UCI\\_HEOA\\_Report.pdf](http://www.ehs.uci.edu/programs/fire/UCI_HEOA_Report.pdf) ([http://www.ehs.uci.edu/programs/fire/UCI\\_HEOA\\_Report.pdf](http://www.ehs.uci.edu/programs/fire/UCI_HEOA_Report.pdf))

The Annual Security Report, coordinated by the UCI Police Department, includes information about crime prevention and reporting; emergency response and evacuation; emergency notifications; timely warnings; alcohol, drug, and weapon policies; security and safety policy information; sexual violence prevention; and other topics. This report also includes statistics for the past three calendar years for crimes that occurred at the UCI and UC Irvine Health Medical Center campuses; in certain off-campus buildings or property; and on public property within, or immediately adjacent to and accessible from each campus.

The Annual Fire Safety Report, coordinated by UCI Environmental Health & Safety department, includes information on fire safety policies and fire safety systems as well as statistics for the past three calendar years for fires that occurred in UCI on-campus student housing facilities.

Paper copies of these reports are available upon request by calling the UCI Police Department at 949-824-1885 or at 100 Public Services Building at UCI during normal business hours.

## **Computer- and Network-Use Policy**

The University of California, Irvine provides computing resources and worldwide network access to members of the UCI electronic community for legitimate academic and administrative pursuits to communicate, access knowledge, and retrieve and disseminate information. All members of the UCI community (faculty, staff, students, and authorized guests) sharing these resources also share the rights and responsibilities for their use.

### **Rights and Responsibilities**

Worldwide, open-access electronic communication is a privilege and continued access requires that users act responsibly. Users should be able to trust that the products of their intellectual efforts will be safe from violation, destruction, theft, or other abuse. Users sharing computing resources must respect and value the rights and privacy of others, respect the integrity of the systems and related physical resources, and observe all relevant laws, regulations, and contractual obligations. Users are responsible for refraining from acts that waste resources, prevent others from using them, harm resources or information, or abuse other people. To help protect files, users are responsible for setting passwords appropriately and for keeping passwords confidential by not giving them to another person.

Most UCI-owned computers are under the control of a system administrator or lab manager. These administrators are expected to respect the privacy of computer system users. However, UCI computer system administrators may access user files or suspend services on the systems they manage without notice as required to protect the integrity of computer systems or to examine accounts that are suspected of unauthorized use, misuse, or have been corrupted or damaged. This includes temporarily locking vulnerable accounts, removing hung jobs, reprioritizing resource intensive jobs, and such.

Many UCI departments have their own computing and networking resources and policies. When accessing computing resources, users are responsible for obeying both the policies described here and the policies of other departments. Student responsibilities are also described in the University of California Policies Applying to Campus Activities, Organizations, and Students (<http://ucop.edu/student-affairs/policies/student-life-policies/pacaos.html>). In addition, all users are responsible for obeying policies of off-campus network services accessed using UCI resources.

### **Examples of Misuse**

Examples of misuse include, but are not limited to:

- Knowingly running or installing on any computer system or network, or giving to another user, a program intended solely for the purpose of damaging or placing excessive load on a computer system or network. This includes, but is not limited to, computer viruses, Trojan horses, worms, bots, flash programs, or password cracking programs.
- Attempting to circumvent data protection schemes or uncover security loopholes without prior written consent of the system administrator. This includes creating and/or running programs that are designed to identify security loopholes and/or intentionally decrypt secure data.
- Using computers or electronic mail to act abusively toward others or to provoke a violent reaction, such as stalking, acts of bigotry, threats of violence, or other hostile or intimidating "fighting words." Such words include those terms widely recognized to victimize or stigmatize individuals on the basis of race, ethnicity, religion, sex, sexual orientation, disability, and other protected characteristics.
- Posting on electronic bulletin boards or Web pages materials that violate the University's codes of conduct (faculty, student). This includes posting information that is slanderous or defamatory in nature or displaying graphically disturbing or sexually harassing images or text in a public computer facility or location that are in view of other individuals.
- Attempting to monitor or tamper with another user's electronic communications or reading, copying, changing, or deleting another user's files or software without the explicit agreement of the owner.
- Violating terms of applicable software licensing agreements or copyright laws.
- Using campus networks to gain, or attempt to gain, unauthorized access to any computer system.
- Using a computer account or obtaining a password without appropriate authorization.
- Facilitating or allowing use of a computer account and/or password by an unauthorized person.
- Employing, either directly or by implication, a false identity when using an account or other electronic resources. This includes sending unauthorized mail that appears to come from someone else.
- Performing an act without authorization that will interfere with the normal operation of computers, terminals, peripherals, networks, or will interfere with others' ability to make use of the resources.

- Using an account for any activity that is commercial in nature not related to work at UCI, such as consulting services, typing services, developing software for sale, advertising products, and/or other commercial enterprises for personal financial gain.
- Deliberately wasting computing resources, such as playing games (for example, MUDES or IRC) while someone else is waiting to use the computer for UCI-related work, sending chain letters, spamming, treating printers like copy machines, storing or moving large files that could compromise system integrity or preclude other users' right of access to disk storage, and the like.

### Consequences of Misuse

Misuse of computing, networking, or information is unacceptable, and users will be held accountable for their conduct. Serious infractions can result in temporary or permanent loss of computing and/or network privileges and/or Federal or State legal prosecution. Appropriate corrective action or discipline may be taken in conformance with applicable personnel policies, student policies, collective bargaining agreements, and procedures established by the Academic Senate. California Penal Code, Section 502 makes certain computer abuses a crime, (such as illegal reproduction of software protected by U. S. copyright law) and penalties can include a fine and/or imprisonment. Files may be subject to search under proper authorization.

Minor infractions of this policy, such as poorly chosen passwords, overloading systems, excessive disk space consumption, are typically handled internally to the department in an informal manner. More serious infractions such as abusive behavior, account invasion or destruction, attempting to circumvent system security, and the like are handled formally through the Office of the Dean of Students or by other appropriate officials.

### Contact Information

For additional information, contact the Office of Information Technology by calling 949-824-2222, or by sending email to [oit@uci.edu](mailto:oit@uci.edu). OIT Help Desk offices are located in Administrative Module B, Building 423 - parking lot 16.

### Privacy and Student Records

The University of California campuses maintain various types of records pertaining to students; some are maintained for academic purposes; others, such as hospital and employment records, are maintained for other specific purposes. Student records—that is, those pertaining to students in their capacity as students—include but are not limited to academic evaluations, transcripts, test scores and other academic records, general counseling and advising records, disciplinary records, and financial aid records. At UCI, an “applicant” becomes a “student” at the time of submission of their Statement of Intent to Register form.

The disclosure of information from student records is governed in large measure by the Federal Family Educational Rights and Privacy Act of 1974 (FERPA), by the State of California Education Code, and by University policy and procedures implementing these laws which protect the student's right of privacy, provide safeguards for the confidentiality of student records, and permit students access to their own records.

Pursuant to the Federal Family Educational Rights and Privacy Act of 1974 and the University of California Policies Applying to the Disclosure of Information from Student Records, students at the University have the following five rights:

1. To inspect and review records pertaining to themselves in their capacity as students.
2. To inspect records maintained by the campus of disclosure of personally identifiable information from their student records.
3. To seek correction of their student records through a request to amend the records or a request for a hearing.
4. To file complaints regarding alleged violation of the rights accorded students by the Federal Act with the Family Policy Compliance Office (<http://www2.ed.gov/policy/gen/guid/fpco/>), U.S. Department of Education, 400 Maryland Avenue S.W., Washington, D.C. 20202-5920.
5. To have withheld from disclosure, in the absence of their prior consent for release, personally identifiable information from their student records, with exceptions as noted in the University student records policies.

There are instances in which information can be disclosed without prior written consent of the student. University officials may require access to student records in the course of the performance of their assigned duties. Further, confidential information can be disclosed without prior written consent of the student (a) in connection with conditions of certain financial aid awards; (b) when the campus is complying with a judicial order or subpoena; and (c) when authorized federal or State officials are conducting an audit or evaluation of federally supported educational programs. There are also other situations in which the University is required to disclose information. The *University of California Policies Applying to Campus Activities, Organizations, and Students*, Part B, Section 130.721 contains a list of exceptions.

Normally, the campus will release the following as personally identifiable information which can be made public:

- student's name
- photo
- date and place of birth
- telephone numbers
- campus email address
- dates of attendance
- major field of study
- grade level
- number of course units in which enrolled

- enrollment status, (e.g., undergraduate or graduate, full-time, or part-time)
- degrees and honors received
- most recent previous educational institution attended
- participation in officially recognized activities, including intercollegiate athletics
- name, weight, and height of participants on intercollegiate University athletic teams

However, students have the right to refuse to permit any or all of these categories to be designated public information with respect to themselves. Students should view the Privacy section on the University Registrar's website (<http://www.reg.uci.edu/>) to see what information is available for release, and what groups may have access to that information.

Students wishing to restrict release of public information should contact the University Registrar for instructions on how to do so.

If a student requests that information from his or her records not be regarded as public information, then the information will not be released to anyone without the written consent of the student. The student should be aware of the important implications of exercising this right. For example, if a request is made to withhold from disclosure a student's name and degrees and honors received, the campus cannot release for publication information on any honors received by the student, such as election to Phi Beta Kappa, and cannot include the student's name and degree earned in the campus commencement program without the written consent of the student. Similarly, if a request is made to withhold from disclosure a student's name and dates of attendance, a student's status as a student cannot be verified for potential employers without the written consent of the student. Further, if a student's last instruction to the campus was to withhold from disclosure the degree granted to that student and the date on which the degree was conferred, that information cannot be confirmed for a third party in connection with the appointment of that graduate to a new position or in connection with an honor that individual received without the written consent of the student.

It is extremely important for each student to keep the University Registrar currently informed as personal data changes occur to assure that accurate and complete records are maintained.

Students are informed annually of their rights under the University's student records policies and FERPA. Copies of the FERPA and University and campus policies are available for review in the Reference Room, Langson Library. In addition, University policies are published in the *University of California Policies Applying to Campus Activities, Organizations, and Students* (<http://ucop.edu/student-affairs/policies/student-life-policies/pacaos.html>).

Complaints regarding alleged violation of the rights accorded students by FERPA may be filed with the University Registrar. A complaint must be made within 180 days of when the alleged violation was discovered (not necessarily when the alleged violation may have occurred). Additionally, a student may file a complaint with the U.S. Department of Education's Family Policy Compliance Office (<http://www2.ed.gov/policy/gen/guid/fpco/>).

Types and locations of major student records maintained by the campus are listed in the following table; consult the UCI website (<http://www.uci.edu/>), or the Campus Directory, or building directories for room numbers.

Type of Record	Location of Record	Responsible Official
School, department, or program	Administrative office for particular unit	Dean, Chair, or Director
Academic Testing Center	Anteater Instruction and Research Bldg. (AIRB) Room 3040	Director, Testing Center
Admissions—Undergraduate	Aldrich Hall	Director, Admissions and Relations with Schools
Admissions—Graduate	Aldrich Hall	Dean, Graduate Division
Admissions—School of Law	Law Building	Assistant Dean, Admissions
Admissions—School of Medicine	Medical Education Building	Director, Admissions
Career Pathways	Student Services I	Director, Division of Career Pathways
Child Care Services	Early Childhood Education Center	Director, Child Care Services
Counseling	Student Services I	Director, Counseling Services
Dean of Students	Student Center	Dean of Students
Disability Services	Disability Services Center	Director, Disability Services
Education Abroad Program	Student Services II	Coordinator, Study Abroad Center
Financial Aid	Aldrich Hall	Director, Financial Aid
Financial Services (Cashier, Collections)	Aldrich Hall	Manager, Financial Services
Housing	Student Center	Director, Housing
International Center	Student Center	Director, International Center
Learning and Academic Resource Center	Second Floor, Rowland Hall	Director, Learning and Academic Resource Center
Ombudsman Services	205 Multipurpose Science & Technology Bldg. (MSTB)	University Ombudsman
Parking	Public Services Building	Parking Supervisor

Registrar—Graduate/Undergraduate	Aldrich Hall	University Registrar
Registrar—School of Medicine	Medical Education Building	Assistant Deputy Registrar
Registrar—School of Law	Law Building	Law School Registrar
Relations with Schools	Aldrich Hall	Director, Admissions and Relations with Schools
Academic Integrity & Student Conduct	800 W. Peltason Dr.	Director, Academic Integrity & Student Conduct
Student Health	Student Health Center	Director, Student Health
Summer Session	UCI Division of Continuing Education	Director, Summer Session
Undergraduate Education	Aldrich Hall	Dean, Undergraduate Education
UCI Division of Continuing Education	UCI Division of Continuing Education	Dean, Continuing Education
Veterans	Student Center	Coordinator, Veterans Student Services
Incidental Records (minutes of various committees, copies of correspondence in offices not listed above, and other records not listed)	Aldrich Hall	Vice Chancellor Student Affairs, or other Student Affairs officials (for conduct issues, could be Dean of Students, Dean of Undergraduate Education, or Dean of the Graduate Division)

NOTE: Pursuant to the Federal Family Educational Rights and Privacy Act of 1974 (FERPA), individual institutions may implement disclosure policies that exceed those outlined in the Act. It should be noted that University of California policies are more restrictive than those outlined in FERPA. The disclosure policies for the UC campuses are outlined in the *University of California Policies Applying to Campus Activities, Organizations, and Students*, sections 130.00-134.00.

## Employment and Salary Information

### Average Salaries by Discipline <sup>1</sup>

Field of Study	Bachelor's
Business	\$53,192.00
Computer & Information Sciences	\$81,292.00
Engineering	\$69,180.00
Liberal Arts and Humanities	\$45,350.00
Mathematics and Statistics	\$68,785.00
Social Sciences	\$53,792.00

<sup>1</sup> Source: The National Association of Colleges and Employers (NACE) collected salary data from July 10, 2019, through September 27, 2019, from 89 colleges and universities nationwide that participate in NACE's national First-Destination Survey. The figures reported are for base salaries only and do not include bonuses, commissions, fringe benefits, or overtime rates. It should be noted that a wide variation in starting salaries exists within each discipline based on job location, type of employer, personal qualifications of the individual, and employment conditions at the time of job entry.

**Nondiscrimination and Sexual Harassment Policy Statements**

UC Irvine is committed to creating and maintaining an environment in which all persons who participate in university programs and activities can work and learn together in an atmosphere free of all forms of discrimination and harassment. Such behavior is prohibited by law and university policy. The university will respond promptly and effectively to reports of discrimination and harassment, and will take appropriate action to prevent, to correct, and when necessary, to discipline behavior that violates university policy.

**Student-Related Matters.** The University of California, in accordance with the applicable Federal and State law and university policy, does not discriminate on the basis of race, color, national origin, religion, sex, gender identity, pregnancy,<sup>1</sup> physical or mental disability, medical condition (cancer-related or genetic characteristics), ancestry, marital status, age, sexual orientation, citizenship, or service in the uniformed services.<sup>2</sup> The university also prohibits sexual harassment. This nondiscrimination policy covers admission, access, and treatment in university programs and activities.

**Employment Practices.** The University of California prohibits discrimination against any person employed; seeking employment; or applying for or engaged in a paid or unpaid internship or training program leading to employment with the University of California on the basis of race, color, national origin, religion, sex, gender, gender expression, gender identity, gender transition status, pregnancy,<sup>1</sup> physical or mental disability, medical condition (cancer-related or genetic characteristics), genetic information (including family medical history), ancestry, marital status, age, sexual orientation,

citizenship, or service in the uniformed services,<sup>2</sup> including protected veterans.<sup>3</sup> This policy applies to all employment practices, including recruitment, selection, promotion, transfer, merit increase, salary, training and development, demotion, and separation.

In addition, the university prohibits harassment based on the above protected categories of an employee, applicant, paid or unpaid intern, volunteer, person participating in a program leading to employment, or person providing services pursuant to a contract. If the harassment is sexual in nature, the university's Sexual Violence and Sexual Harassment policy will apply.

Consensual sexual or romantic relationships between members of the university community are subject to other university policies, including the Faculty Code of Conduct and the UCI Policy on Conflicts of Interest Created by Consensual Relationships.

University policy also prohibits retaliation against any person employed; seeking employment; providing services pursuant to a contract; or applying for or engaged in a paid or unpaid internship, volunteer capacity, or training program leading to employment with the university for bringing a complaint of discrimination or harassment pursuant to these policies or against a person who assists someone with a complaint of discrimination or harassment, or who participates in any manner in an investigation or resolution of a complaint of discrimination or harassment. Retaliation includes threats, intimidation, reprisals, and/or adverse actions related to employment.

In addition, it is the policy of the university to undertake affirmative action, consistent with its obligations as a federal contractor, to assure equal employment opportunity for minorities and women, for persons with disabilities, and for protected veterans.

University policy is intended to be consistent with the provisions of applicable State and Federal laws. Inquiries regarding the University's nondiscrimination and sexual harassment policies may be directed to: Kirsten K. Quanbeck, Associate Chancellor of Equal Opportunity and Compliance or the Title IX Officer in the UCI Office of Equal Opportunity and Diversity, 103 Multipurpose Science and Technology Building, Irvine, CA 92697-1130; [oeod@uci.edu](mailto:oeod@uci.edu); telephone 949-824-5594 (voice), 824-7593 (TDD).

<sup>1</sup> Pregnancy includes pregnancy, childbirth, and medical conditions related to pregnancy or childbirth.

<sup>2</sup> 'Service in the uniformed services' as defined by the Uniformed Services Employment and Reemployment Rights Act of 1994 (USERRA), as well as state military and naval service.

<sup>3</sup> Protected veterans includes veterans with disabilities, recently separated veterans, Vietnam-era veterans, active duty wartime or campaign badge veteran, or Armed Forces service medal veterans.

## Sexual Violence and Sexual Harassment Policy

UC Irvine is committed to creating and maintaining a community dedicated to the advancement, application, and transmission of knowledge and creative endeavors through academic excellence, where all individuals who participate in University programs, activities, and services can work and learn together in an atmosphere free of harassment, exploitation, or intimidation. Sexual violence, sexual harassment, retaliation, and other behavior prohibited by this policy interfere with those goals. The university will respond promptly and effectively to reports of such conduct. This includes action to stop, prevent, correct, and when necessary, discipline behavior that violates this policy.

Questions or reports regarding the University's policy on sexual violence and sexual harassment may be directed to Kirsten K. Quanbeck, Associate Chancellor of Equal Opportunity and Compliance or the Title IX Officer in the UCI Office of Equal Opportunity and Diversity, 103 Multipurpose Science and Technology Building, Irvine, CA 92697-1130; telephone 949-824-5594 5594 (voice), 824-7593 (TDD); [oeod@uci.edu](mailto:oeod@uci.edu).

Links to the full text of the university policies on Nondiscrimination, Sexual Violence/Sexual Harassment, the Faculty Code of Conduct, and Conflicts of Interest Created by Consensual Relationships are available at the Office of Equal Opportunity and Diversity Policies and Laws that Guide OEOD Investigations website (<http://oeod.uci.edu/policies/>). Information about how to prevent and respond to sex offenses, as well as resources for Complainants and Respondents, are available at [sexualviolence.uci.edu](http://sexualviolence.uci.edu) (<http://sexualviolence.uci.edu/html>).

# Chancellor's Welcome

---

**Welcome to the University of California, Irvine.** As a UC Irvine student, you have access to resources that extend across our campus, throughout our state, and beyond. This *Catalogue* will serve as an invaluable guide to enhancing your UCI experience.

UCI is consistently ranked among the nation's best universities. Achievements in the sciences, arts, humanities, medicine, and management have garnered top 50 national rankings for more than 40 academic programs. Three UCI researchers have won Nobel Prizes—two in chemistry and one in physics. We were the youngest campus ever to be welcomed into the prestigious Association of American Universities. *The New York Times*, in its College Access Index, ranked UCI as number one in the nation for economic diversity in its student body, citing us as 'doing the most for the American dream.' And you will be especially glad to hear that *Money* magazine named UCI the top university for beach lovers.

These are some of the reasons why UCI attracted more than 116,000 undergraduate applications in 2017, the third largest number of applications in the entire nation, for only 8,300 spots. Our graduate programs are also extremely competitive. You are on this campus because we know you have what it takes to succeed at the highest level.

UCI reaches beyond the classroom and laboratory to help solve societal issues and support human development. We are a hub for stem cell research, a trailblazer in understanding global warming, and a leader in the fight against breast cancer. Our nationally ranked medical center in Orange serves as Orange County's only Level I trauma center, and our state-of-the-art UC Irvine Douglas Hospital has been ranked among the country's top 50 hospitals for more than 10 years, providing outstanding care for the region's citizens. We ranked fourth in the University Global Health Impact Report Card, which evaluates top U.S. and Canadian research universities on their contributions to urgent global health research and access to treatment worldwide. Our law school, the state's first public law school to open in more than 40 years, graduated its first class in 2012. In July 2012, the Regents established the UC Irvine School of Education from the existing Department of Education in recognition of its national academic profile. Our newest school, the Sue and Bill Gross School of Nursing, was established in January 2017.

A major intellectual and cultural center, UCI offers numerous public activities and events. The Claire Trevor School of the Arts and the School of Humanities produce engaging and entertaining cultural programs, including the award-winning New Swan Theater, our summertime outdoor Shakespeare Festival. UCI's Anteater athletes have won more than two dozen national championships.

We are also national leaders in research and practice relating to sustainability and environmental protection. UCI is the most energy-efficient campus in California, with among the most LEED Platinum and Gold certified buildings in the U.S. We are consistently among the top 10 "Coolest Schools" in *Sierra* magazine's annual ranking of the nation's greenest universities.

UCI is benefiting the community and the world in countless ways through its scholarly, scientific, creative, and economic contributions. Orange County's second largest employer, UCI generates an annual economic impact on the county of \$5 billion.

I encourage you to take advantage of all that UCI has to offer. I look forward to seeing you on campus and to being a part of this very important time in your life.

Sincerely,

Howard Gillman  
Chancellor

# Claire Trevor School of the Arts

---

**Stephen Barker, Dean**

Office of Student Affairs  
101 Mesa Arts Building  
949-824-6646  
<http://www.arts.uci.edu/>

The Claire Trevor School of the Arts is among the nation's most acclaimed creative centers for the performance and study of the arts through their history, theory, and cultural context. The School consists of four departments: Art, Dance, Drama, and Music, offering a B.A., B.F.A., and B.Mus. at the undergraduate level, and M.F.A.s in a variety of specializations. The Drama and Music Departments house a total of three doctoral programs - Drama's in Performance Theory (jointly with UC San Diego's Department of Theater and Dance), and Music's in Integrated Composition, Improvisation, and Technology (ICIT) and History and Theory of Music. The Art Department also offers minors in Digital Arts and Digital Filmmaking, and the Drama Department offers a minor in Drama.

The School's departments are located in and around UCI's Arts Village, providing daily interaction among students and faculty in all Arts disciplines. The School's facilities are creative laboratories for the development of skills and for the exploration and articulation of the human experience. They include studios and technologically enhanced classrooms, five theatres (including the Irvine Barclay Theatre, located on the UCI campus), the Experimental Media Performance Laboratory (xMPL), a theatre/concert hall, three art galleries, the Donald R. and Joan F. Beall Center for Art + Technology, the Gassman Electronic Music Studio, the Motion Capture Studio, the Arts Media Center, the Arts Computing Laboratory, the Digital Arts Teaching and Research Laboratories, a television studio, professionally managed and staffed production shops, and publicity and box offices supporting the School's extensive production, performance, and exhibition schedule.

The Steven Ehrlich-designed Contemporary Arts Center, the latest major expansion of the School, provides 59,000 square feet of technology-driven instructional and research spaces, as well as a 4,000-square-foot gallery and a "black-box" performance space. Along with its motion-capture studio, these facilities place the School of the Arts and UCI at the forefront of these fields.

Arts students work collaboratively across disciplines in addition to deeply exploring their own chosen disciplinary fields. Faculty and students from across the campus are engaged in the School's Institute for 21st Century Creativity, a platform for theoretical and practical exploration of the creative process.

The School's artists, performers, and scholars' work are regularly recognized globally. The School has an extensive program of visiting and residential distinguished artists and teachers featured in numerous School activities.

Students receive assistance with program planning and a variety of other services from the professional and student-support staff in the School's Office of Student Affairs; the staff also provide academic counseling to Arts students. An extensive network of School of the Arts alumni work with faculty and staff to provide mentorship and professional guidance for current and graduating students.

The Claire Trevor School of the Arts is committed to the highest levels of excellence in exploring, researching, studying, and presenting the best of both traditional art forms and to playing a central role in creating new, emerging art forms for the 21st century.

## Change of Major

Students wishing to change to an Arts major should contact the Arts Student Affairs Office for information about change-of-major requirements, procedures, and policies. Additionally, students should refer to the Change of Major Criteria website (<http://www.changeofmajor.uci.edu/>) for more information.

## Special Programs of Study

### Campuswide Honors Collegium

The Campuswide Honors Collegium is available to selected high-achieving students from all academic majors from their freshman through senior years. For more information contact the Campuswide Honors Collegium, 1200 Student Services II; 949-824-5461; [honors@uci.edu](mailto:honors@uci.edu); or visit the Campuswide Honors Collegium website (<http://honors.uci.edu/>).

### UC Education Abroad Program

Upper-division and, in some cases, graduate students have the opportunity to experience a different culture while making progress toward degree objectives through the University's Education Abroad Program (UCEAP). UCEAP is an overseas study program which operates in cooperation with host universities and colleges throughout the world. For additional information, visit the Study Abroad Center website (<http://www.studyabroad.uci.edu/>).

## Honors

Students who have distinguished themselves academically will be considered for honors at graduation. General criteria are that students must have completed at least 72 units in residence at a University of California campus and must have a cumulative grade point average of 3.5 or better, including the grades from the final quarter. In keeping with the Academic Senate Resolution, no more than 16 percent of the graduating seniors may receive such

academic honors. For additional information, visit the Honors page. Individual departments may offer other special honors to students who have excelled in their major subject.

## Creative Connections Opportunities

Arts Outreach at the Claire Trevor School of the Arts partners with local school districts, arts organizations, and community centers to share the School's talents and knowledge beyond the UCI campus. One such outreach program is Creative Connections, which provides exceptional opportunities for School of the Arts students to earn valuable practical experience in K–12 classrooms and in community settings. Projects range from integrating arts into core curriculum in K–6, to workshops in the arts for middle and high schools, to college application mentorship for high school juniors and seniors interested in arts majors. One to four units of independent study credit are available, and in some cases stipends may be available. All Claire Trevor School of the Arts students who hold a minimum 3.0 GPA may apply for these programs.

## Scholarships

The Claire Trevor School of the Arts has some scholarship monies available to incoming and to continuing students on both the undergraduate and graduate levels.

**AstaireAwards™ Scholarship:** Up to \$2,000 awarded to an outstanding student majoring in Dance.

**Edna Helen Beach Scholarship:** Up to \$3,000 awarded to an incoming freshman student and transfer student. Recipient must be gifted and talented, and will be selected from eligible students with special emphasis on those from underprivileged backgrounds who would not otherwise be able to attend a major research institution.

**Steven Criqui Memorial Scholarship:** Up to \$2,375 awarded to outstanding undergraduate students majoring in Art or Art History with financial need.

**Kris and Linda Elftmann Scholarship:** Up to \$3,000 awarded to an outstanding student.

**Leo Freedman Graduate Fellowship:** For outstanding applicants from Orange County, California, preferably from Anaheim; two fellowships of approximately \$7,000 each for the academic year.

**William J. Gillespie Foundation Scholarships:** Several scholarships in varying amounts, awarded to outstanding Dance majors with an emphasis in ballet.

**William C. Holmes Fellowship:** For graduate students studying Music.

**Cloud Hsueh Foundation Scholarship:** Up to \$3,000 awarded to outstanding undergraduate students.

**Alice Lowell Memorial Scholarship:** For students majoring in Music.

**Beth & Walter, Beth L. Koehler Scholarship:** For dancers who show potential in the area of contemporary modern dance, a high level of creative achievement, and high academic performance.

**Norma Barnard MacLeod Scholarship:** For Music students studying Guitar or Lute.

**Margie McDade Memorial Scholarship:** For students majoring in Music and studying piano.

**Donald McKayle Scholarship:** One or more scholarships awarded to current Dance students based on their abilities in contemporary modern dance.

**Medici Circle Scholarship:** Up to \$1,425 awarded to students participating in research, exhibitions, festivals, or conferences.

**Gregory Browne Osborne Memorial Scholarship:** Several scholarships in varying amounts, awarded to outstanding Dance majors with an emphasis in ballet.

**Marjorie and Robert Rawlins Scholarship:** For full-time students majoring in Music and studying piano, violin, viola, or cello.

**Frederick & Sylvia Reines Music Scholarship:** For undergraduate and graduate students studying Music.

**Sylvia Reines Dance Scholarship:** \$1,000 awarded to graduate and undergraduate students in Dance.

**Harry and Marjorie Ann Slim Memorial Scholarship:** For students majoring in Music.

**Winifred W. Smith Scholarship:** For students majoring in Music and studying cello, violin, or piano (preferably cello).

**Elizabeth and Thomas Tierney Scholarship:** Up to \$3,000 awarded annually to an outstanding student.

**Phyllis Kovach Vacca Memorial Scholarship:** For students majoring in Music and studying cello, piano, or violin.

**Bette and Steven Warner Scholarship:** For outstanding students in the Music Department's voice program and the Drama Department.

**H.B. and Isabelle Yolen Memorial Scholarship:** Up to \$2,000 awarded to students majoring in Art or Drama with financial need.

- Department of Art
- Department of Dance
- Department of Drama
- Department of Music
  
- Art, B.A.
- Art, M.F.A.
- Dance, B.A.
- Dance, B.F.A.
- Dance, M.F.A.
- Digital Arts, Minor
- Digital Filmmaking, Minor
- Drama and Theatre, Ph.D.
- Drama, B.A.
- Drama, M.F.A.
- Drama, Minor
- History and Theory of Music, Ph.D.
- Integrated Composition, Improvisation, and Technology, Ph.D.
- Music Theatre, B.F.A.
- Music, B.A.
- Music, B.Mus.
- Music, M.F.A.

Applications are accepted for fall quarter admission only, and ordinarily must be completed by January 15 for the Ph.D. in Drama and Theatre, the M.F.A. in Art, the M.F.A. in Dance, and the M.F.A. in Music, and by March 1 for the M.F.A. in Art with a concentration in Critical and Curatorial Studies. Applications for the M.A. and Ph.D. in ICIT must be submitted by December 1. The number of graduate students that can be admitted to the Claire Trevor School of the Arts is limited. Applicants are advised to arrange for auditions, interviews, and the submission of portfolios, compositions, and dossiers by the appropriate deadlines. Students applying for scholarships and fellowships should do so by January 15, and are also encouraged to apply for financial assistance through the Office of Financial Aid and Scholarships. The Claire Trevor School of the Arts has a modest number of teaching assistantships available in all areas, and all candidates are automatically reviewed for teaching assistantship positions; the School informs successful candidates by June 1 for the following academic year.

Upon admission to the program the student is assigned an advisor. Students should discuss with their advisor the scope of undergraduate preparation to determine any areas which may need strengthening if full benefit from graduate study is to be derived.

## Faculty

Kei Akagi, B.A. International Christian University, *Professor of Music; Asian American Studies*

Lonnie R. Alcaraz, M.F.A. University of California, Irvine, *Professor of Drama* (lighting design, digital imaging)

David Allan, Choreographer/Former Soloist, National Ballet of Canada; Choreographer, ballet companies, operas, film, and television, *Professor Emeritus of Dance* (ballet, pas de deux, choreography)

Rhea Anastas, Ph.D. The Graduate Center of The City University of New York, *Associate Professor of Art* (20th century experimentalism in the visual arts, critical theory, cultural theory)

Kevin H. Appel, M.F.A. University of California, Los Angeles, *Department Chair and Executive Director of University Art Galleries and Professor of Art* (painting)

Sarah Awad, M.F.A. University of California, Los Angeles, *Assistant Professor of Teaching of Art* (drawing, painting)

Stephen F. Barker, Ph.D. University of Arizona, *Dean of the Claire Trevor School of the Arts and Professor of Drama* (post-modern theatre, Beckett, critical theory)

Cynthia M. Bassham, M.F.A. American Conservatory Theatre, *Associate Professor of Teaching of Drama* (voice, speech for actors, acting)

Amy Bauer, Ph.D. Yale University, *Associate Professor of Music*

Haroutune Bedelian, M.A. Royal Academy of Arts, *Professor of Music*

Lorna Griffitt Bedelian, D.M.A. Indiana University, *Professor of Teaching of Music*

Frances Bennett, B.F.A. University of California, Irvine, *Lecturer of Music*

Andrew L. Borba, M.F.A. New York University, *Co-Head of Acting and Assistant Professor of Drama* (acting)

Jennifer Bornstein, M.F.A. University of California, Los Angeles, *Associate Professor of Art* (photography)

Richard A. Brestoff, M.F.A. New York University, *Professor of Drama* (film and television acting)

David Brodbeck, Ph.D. University of Pennsylvania, *Professor of Music; European Languages and Studies*

Juliette A. Carrillo, M.F.A. Yale University, *Assistant Professor of Drama* (directing)

Juli C. Carson, Ph.D. Massachusetts Institute of Technology, *Professor of Art* (art history, critical theory, curatorial practice )

Dennis R. Castellano, M.F.A. University of California, Irvine, *Professor of Teaching Emeritus of Drama* (music theatre)

Eleanore Choate, M.A. California State University, Long Beach, *Lecturer of Music*

Patricia Cloud, M.M. University of Southern California, *Lecturer of Music*

Robert S. Cohen, D.F.A. Yale University, *Professor Emeritus of Drama* (acting theory, acting, directing)

Miles C. Coolidge, M.F.A. California Institute of the Arts, *Professor of Art* (photography)

Mary Corey, M.A. University of California, Riverside; Certified Professional Labanotator, *Professor of Dance* (dance history, dance notation and reconstruction)

John L. Crawford, Media Artist and Software Designer, *Professor of Dance; Informatics* (screendance, interactive media, telematic performance, motion capture, digital arts)

Jonathan Davis, D.M.A. Juilliard School, *Lecturer of Music*

Myrona L. DeLaney, Ed.D. University of California, Irvine, *Head of Music Theatre and Associate Professor of Teaching of Drama* (music theatre, singing, acting)

Tony Delap, Claremont Graduate University, *Professor Emeritus of Art*

Michael Dessen, Ph.D. University of California, San Diego, *Professor of Music*

Diane L. Diefenderfer, Former Soloist, Los Angeles Ballet, Eglevsky Ballet Company, Frankfurt Ballet Company, Director of Pilates Program for Dance Wellness, Undergraduate Advisor, *Associate Professor of Teaching of Dance* (ballet, pointe, repertory)

John Christopher Dobrian, Ph.D. University of California, San Diego, *Professor of Music; Informatics*

Holly Durbin, M.F.A. University of California, Los Angeles, *Professor of Drama* (costume design)

Clifford L. Faulkner, M.A. California State University, Long Beach, *Professor of Teaching Emeritus of Drama* (scenery design, history of design, gay theatre)

Nohema Fernandez, D.M.A. Stanford University, *Professor Emerita of Music*

Jennifer J. Fisher, Ph.D. University of California, Riverside; founder and editor of Dance Major Journal, *Professor of Dance* (critical dance studies)

Keith Fowler, D.F.A. Yale University, *Professor Emeritus of Drama* (directing, acting)

Marcia G. Froehlich, M.F.A. University of Michigan, *Assistant Professor of Drama* (costume design)

Israel Gabriel, Bat-Dor Dance Company; Former Assistant Artistic Director, *Associate Professor of Teaching Emeritus of Dance* (ballet, modern, pas de deux, repertory)

Michel Gervais, *Lecturer of Dance*

Martha Gever, Ph.D. City College of the City University of New York, *Professor Emerita of Art* (history and criticism: video, media studies, popular culture)

Lindsay Gilmour, M.F.A. University of Wisconsin, Milwaukee, *Assistant Professor of Dance* (modern choreography, improvisation)

Douglas S. Goheen, Ph.D. University of Denver, *Professor Emeritus of Drama* (scenery design, digital imaging)

Frederick Greene, B.M. University of Southern California, *Lecturer of Music*

Charlotte Griffin, M.F.A. University of Texas, Austin, *Assistant Professor of Dance* (choreography, modern, screen dance)

Nicole Grimes, Ph.D. University of Dublin, *Associate Professor of Music*

Chad Michael Hall, M.F.A. Ohio State University, *Artistic Director - MULTIPLEX DANCE and Assistant Professor of Dance* (contemporary technique, choreography, improvisation, dance, and video)

Stephan Hammel, Ph.D. University of Pennsylvania, *Assistant Professor of Music*

Matthew Hare, D.M.A. University of Iowa, *Lecturer of Music*

Jason Harnell, *Lecturer of Music*

George C. Harvey, M.F.A. University of California, Irvine, *Professor Emeritus of Drama* (artistic direction, producing, lighting design)

Gary Heaton-Smith, D.M.A. University of California, Los Angeles, *Lecturer of Music*

Donald D. Hill, M.F.A. University of Southern California, *Department Chair and Co-Head of Stage Management, Associate Producer and Professor of Teaching of Drama* (stage management, directing, acting)

Michael K. Hooker, M.F.A. California Institute of the Arts, *Head of Design and Professor of Drama* (sound design)

Joseph Huszti, MM Northwestern University, *Professor Emeritus of Music*

Bryan Jackson, M.F.A. University of California, Los Angeles, *Continuing Lecturer of Art* (digital filmmaking)

Jesse C. Jackson, M.A. University of Toronto, *Director of the Minor in Digital Arts and Associate Professor of Art; Informatics* (digital art, informatics, design, architecture)

Ulysses S. Jenkins, M.F.A. Otis Art Institute, *Professor of Art; African American Studies* (video, performance art)

Ketu H. Katrak, Ph.D. Bryn Mawr College, *Professor of Drama; Comparative Literature; English* (drama and performance, African drama and Ancient Sanskrit drama [from India], postcolonial literature and theory, women writers and feminist theory)

Mari Kimura, D.M.A. Juilliard School, *Professor of Music*

Sarah Koo, M.M. The Juilliard School, *Lecturer of Music*

Jerzy Kosmala, D.M. Indiana University, *Lecturer of Music*

Madeline Kozlowski, M.F.A. Brandeis University, *Professor Emerita of Drama* (costume design)

Peter O. Krapp, Ph.D. University of California, Santa Barbara, *Professor of Film and Media Studies; English; European Languages and Studies; Informatics; Music; Visual Studies* (digital culture, media history, cultural memory)

Anthony James Kubiak, Ph.D. University of Wisconsin-Madison, *Professor of Drama* (American and modern drama, modern poetry, critical theory, philosophy)

Antoinette Lafarge, M.F.A. School of Visual Arts, *Professor of Art* (digital media)

Daphne Pi-Wei Lei, Ph.D. Tufts University, *Head of Doctoral Studies and Professor of Drama; Asian American Studies* (Asian theatre, Asian American theatre, intercultural theatre, gender theory, performance theory)

Simon Leung, B.A. University of California, Los Angeles, *Professor of Art; Asian American Studies* (new genres, critical theory, contemporary art history, performance)

Joseph S. Lewis, M.F.A. Maryland Institute College of Art, *Professor of Art* (public art)

Lukas Ligeti, *Assistant Professor of Music*

Eric Lindsay, D.M. Indiana University, *Lecturer of Music*

Loretta Livingston, Ph.D. Texas Woman's University; Certified Laban Movement Analyst; former principal with Bella Lewitzky Dance Company, Graduate TA Advisor, Co-Advisor for B.F.A. Choreography/Senior Thesis/Honors Thesis concerts, *Professor of Dance* (choreography, Laban movement analysis, body and practice)

Mara Jane Lonner, M.F.A. California Institute of the Arts, *Associate Professor of Teaching Emerita of Art* (drawing, painting, 3D design)

Catherine B. Lord, M.F.A. State University of New York at Buffalo, *Professor Emerita of Art* (queer theory, feminism, photography)

Annie M. Loui, *Co-Head of Acting and Professor of Drama* (movement, directing, acting)

Lar Lubovitch, Honorary Doctorate, Juilliard School of the Arts, *Founder and Director of New York-based Lar Lubovitch Dance Company and UCI Distinguished Professor of Dance* (choreography, repertory, technique, and special projects)

Molly L. Lynch, M.F.A. University of California, Irvine; Pilates Certified; Choreographer/Artistic Director of the National Choreographers Initiative, *Department Chair and Professor of Dance* (ballet, repertory, arts management, and senior seminar)

Monica Majoli, M.F.A. University of California, Los Angeles, *Professor of Art* (painting)

Mihai Maniutiu, Ph.D. Caragiale Academy of Theatrical Arts and Cinematography, *UCI Distinguished Professor of Drama* (directing)

Daniel J. Martinez, B.F.A. California Institute of the Arts, *Claire Trevor Professor and Professor of Art* (public art, sculpture, installation, performance)

Kevin McKeown, M.A. University of California, Los Angeles, *Lecturer of Music*

Irene Messoloras, D.M.A. University of California, Los Angeles, *Lecturer of Music*

Yong Soon Min, M.F.A. University of California, Berkeley, *Professor Emerita of Art* (minority, diasporic, and third cinemas; media, nationalism, and globalization; race, sexuality, and popular culture)

Elliott Moreau, M.M. University of Southern California, *Lecturer of Music*

Ian Andrew Munro, Ph.D. Harvard University, *Associate Professor of Drama; English* (European drama and performance, early modern popular culture, theatrical performance of wit)

Margaret Murata, Ph.D. University of Chicago, *Professor Emerita of Music*

Lisa Marie Naugle, Ph.D. New York University, *Director of International Initiative for CTSA, Artistic Director for DTM2 Performance Ensemble and Professor of Dance* (modern dance, choreography, online/interactive technology, improvisation, teaching of dance)

Adedeji Ogunfolu, M.M. University of Michigan, Ann Arbor, *Lecturer of Music*

Dariusz Oleszkiewicz, B.A. California Institute of the Arts, *Lecturer of Music*

Deborah Oliver, M.F.A. California Institute of the Arts, *Lecturer of Art* (performance art, new genres)

Vincent Olivieri, M.F.A. Yale University, *Associate Dean of Graduate Affairs and Professor of Drama* (sound design)

Hossein Omoumi, Ph.D. University of Florence, *Maseeh Professor in Persian Performing Arts and Professor of Music*

Jane M. Page, M.F.A. Indiana University, *Head of Directing and Professor of Drama* (directing, acting)

Andrew A. Palermo, B.F.A. University of Cincinnati, College-Conservatory of Music, *Associate Professor of Drama* (music theatre choreography)

Jennifer Pastor, M.F.A. University of California, Los Angeles, *Professor of Art* (sculpture)

Simon G. Penny, M.F.A. Sydney College of the Arts, *Professor of Art; Informatics* (informatics, robotic sculpture, interactive environments, electronic media)

James W. Penrod, M.F.A. University of California, Irvine; C.M.A. Laban Institute of Movement Studies, *Professor Emeritus of Dance* (ballet, modern, dance notation, choreography, movement analysis)

Barry Perkins, M.A. New England Conservatory of Music, *Lecturer of Music*

Gerald Pinter, B.A. University of North Texas, *Lecturer of Music*

Janice G. Plastino, Ph.D. University of Southern California, *Professor Emerita of Dance* (kinesiology/anatomy, research methods, choreography, dance science/medicine)

Yvonne Rainer, *Claire Trevor Professor and Professor Emerita of Art* (performance, dance, video)

Colleen Reardon, Ph.D. University of California, Los Angeles, *Professor of Music*

Janelle Reinelt, Ph.D. Stanford University, *Professor Emerita of Drama* (British theatre, political theory, performance)

Bryan R. Reynolds, Ph.D. Harvard University, *UCI Chancellor's Professor and Claire Trevor and Professor of Drama* (Shakespeare, Renaissance drama, critical theory, feminist theory, performance theory, cultural studies)

William S. Roberts, M.F.A. California Institute of the Arts, *Associate Professor of Teaching of Art* (photography)

Tara Rodman, Ph.D. Northwestern University, *Assistant Professor of Drama; Asian American Studies* (modernist performance, Japanese theatre and dance, transnationalism, racial formation, global Asias)

Bobby Rodriguez, D.M.A. University of California, Los Angeles, *Lecturer of Music*

Amanda Ross-Ho, M.F.A. University of Southern California, *Associate Professor of Art* (sculpture)

Nancy L. Ruyter, Ph.D. Claremont Graduate University, *Professor Emerita of Dance* (dance history, Spanish dance, bibliography and research)

Constance J. Samaras, M.F.A. Eastern Michigan University, *Professor Emerita of Art* (photography, intermedia, cultural criticism)

John Schneiderman, M.F.A. University of California, Irvine, *Professor of Teaching of Music*

Nina Scolnik, B.M. Oberlin College, *Professor of Teaching of Music*

Kelli Sharp, D.P.T. Chapman University, *Assistant Professor of Dance; Physical Medicine and Rehabilitation* (somatic practices, dance science, kinesiology, physical therapy, motor learning and performance)

Eli Simon, M.F.A. Brandeis University, *UCI Chancellor's Professor and Professor of Drama* (acting, directing)

Jaymi Smith, B.F.A. DePaul University, *Professor of Drama* (lighting design)

David Stetson, B.M. University of Southern California, *Lecturer of Music*

Darryl Taylor, D.M.A. University of Michigan, *Professor of Music; African American Studies*

Alan Terricciano, M.A. Eastman School of Music, *Associate Dean for Undergraduate Affairs and Professor of Dance; Music* (music for dance, musical resources, critical issues in dance, music theory, keyboard skills, and repertoire)

Philip D. Thompson, M.F.A. University of California, Irvine, *Professor of Drama* (voice, speech for actors, acting)

David K. Trend, Ph.D. Miami University, *Professor of Art* (visual culture)

Richard J. Triplett, M.A. Otis Art Institute, *Professor Emeritus of Drama* (scenery and costume design, history of design)

Stephen Tucker, D.M.A. University of California, Los Angeles, *Robert and Marjorie Rawlins Chair in Music and Associate Professor of Music*

Kojiro Umezaki, M.A. Dartmouth College, *Professor of Music; Computer Science*

Joel R. Veenstra, M.F.A. University of California, Irvine, *Co-Head of Stage Management and Associate Professor of Teaching of Drama* (stage management, acting)

Sunil P. Verma, M.D. University of Southern California, *Assistant Dean of Workforce Development and Health Sciences Associate Clinical Professor of Otolaryngology; Music*

Amanda Jane Walker, M.F.A. University of California, Los Angeles, *Lecturer of Music*

Tong Wang, M.F.A. University of Utah; Principal dancer with the Shanghai Ballet, Tulsa Ballet Theatre, Dayton Ballet, Ballet West, *Associate Professor of Dance* (ballet, choreography, men's ballet, pas de deux)

S. Ama Wray, Ph.D. University of Surrey, *Associate Professor of Dance; African American Studies* (jazz, choreography, improvisation, teaching of dance, jazz ensemble)

Bruce N. Yonemoto, M.F.A. Otis Art Institute, *Professor of Art; Asian American Studies* (video, experimental media, film theory)

## Arts Courses

### **ARTS 1. ArtsCore. 4 Units.**

An introduction to the arts in general, and to the arts at UCI. Concentration on (1) the interdisciplinary nature of the arts, and (2) the content of particular arts disciplines.

(IV)

### **ARTS 75. Digital Media: Exhibition. 4 Units.**

A discussion and critique course in all media arts. Includes a review of key media arts concepts and the preparation of an end-of-quarter exhibition.

Prerequisite: Proposal submission required.

### **ARTS H81. Improvisation and Modes of Research / Creative Expression. 4 Units.**

Through immersion, readings, analysis, and observation, students are trained to recognize, build, and engage a set of "improvisatory" cognitive skills in order to enhance artistic creation, the generation of language, data analysis, and the application of the scientific method.

Restriction: Campuswide Honors Collegium students only. Seniors only.

(IV)

### **ARTS 173. Athletics Bands . 1-2 Units.**

Bands support athletics events. Includes Pep Band: Rehearsal and performance of band standards; Marching Band: Exercises and performance involving marching fundamentals, formations, and half-time pageantry; and, Drumline: Study and rehearsal of rudiments, cadences, and arrangements.

Repeatability: Unlimited as topics vary.

### **ARTS 199. Independent Study. 1-4 Units.**

Individual study or directed projects as arranged with faculty member.

Repeatability: May be repeated for credit unlimited times.

## Art Courses

### **ART 1A. Art in Context: History, Theory, and Practice. 4 Units.**

First in a three-quarter foundation sequence introducing students to a broad range of contemporary art, media, and practices in relation to their twentieth-century cultural and historical antecedents. ART 1A deals specifically with contemporary painting and photography.

Restriction: Art Majors have first consideration for enrollment.

(IV)

### **ART 1B. Art in Context: History, Theory, and Practice. 4 Units.**

Deals with film/video/performance. Concerned with the development of modern/contemporary film, video, and performance, with a focus on experimental and avant-garde production from the early twentieth-century to today.

Restriction: Art Majors have first consideration for enrollment.

(IV)

### **ART 1C. Art in Context: History, Theory, and Practice. 4 Units.**

Third in a three-quarter foundation sequence introducing students to a broad range of contemporary art, media, and practice in relation to their twentieth-century cultural and historical antecedents. Deals specifically with space and cyberspace.

Restriction: Art Majors have first consideration for enrollment.

(IV)

### **ART 8. Changing Creativity. 4 Units.**

Explores creativity as a changing concept in historical and contemporary terms from the perspectives of producers, consumers, and institutions. Encompasses international perspectives and the role of new technologies in considering creativity as a resource for innovation and social change.

(IV)

**ART 9A. Visual Culture: Media, Art, and Technology. 4 Units.**

Examines creative activities in all spheres of life, including the 'artistic' impulses that dwell in the individual. Culture is addressed in broad terms of the many institutions and cultural forces that shape everyday activities of listening, seeing, doing.

Restriction: Art Majors have first consideration for enrollment.

(IV)

**ART 9B. Visual Culture: A Culture Divided. 4 Units.**

Throughout the 1980s and 1990s, controversies flourished in the mainstream media over purportedly obscene art, anti-American writing, and moral decay, among other issues. Examines these new conflicts as they manifest themselves in public life and everyday experience.

Restriction: Art Majors have first consideration for enrollment.

(IV)

**ART 9C. Visual Culture: Thematic Investigations. 4 Units.**

Considers a broad range of concerns and questions raised by various acts of appropriation in contemporary art and visual culture, such as originality, authenticity, authorship, translation, audience and aesthetics, temporal dimensions of a work, and context.

Restriction: Art Majors have first consideration for enrollment.

(IV)

**ART 11A. Topics in History of Contemporary Art. 4 Units.**

Surveys mid-nineteenth and twentieth-century art production, from modernity through post-modernity, in a historical and cultural context.

Prerequisite: ART 9A

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Art Majors only.

**ART 12A. Art, Design, and Electronic Culture. 4 Units.**

Introduction to historical and theoretical foundations of digital media art, tracing how information technologies seeded growth of new expressive medium. Considers how today's pervasive digital culture evolved through interdisciplinary collaborations between artists, engineers, scientists, scholars.

(IV)

**ART 12B. Technology, Culture, and Society: Steam to Steampunk. 4 Units.**

A survey of the ongoing interactions between technological and social change through the 19th century and 20th century, with special attention to the history of computing, changing arts and cultural practices, and the idea of the Anthropocene.

(IV)

**ART 12C. Intelligences of Arts. 4 Units.**

Introduces contemporary neuroscience and new approaches to cognition – embodied, enactive, extended, situated, distributed. Reviews the history of related ethological, biological, psychological, technological, and philosophical traditions. Considers arts and cultural practices from these and other perspectives, and considers case studies.

(III)

**ART 20A. Basic Drawing I. 4 Units.**

Encourages an investigation of the premises and limits of drawing, primarily, but not inevitably, as a two-dimensional medium. Includes slide presentations and discussions of the historical uses of a wide range of drawing. Materials fee.

Restriction: Art Majors have first consideration for enrollment.

**ART 20B. Basic Drawing II. 4 Units.**

Continuation of the investigation initiated in ART 20A, with an emphasis on experimentation, personal investigation, and development of conceptual working premises, as well as the acquisition of necessary skills. Group discussion and critique are emphasized. Materials fee.

Prerequisite: ART 20A

Restriction: Art Majors have first consideration for enrollment.

**ART 30A. Basic Painting I. 4 Units.**

Examination of the fundamental components of painting: color, form, space, surface, scale, and content. Studio work, slide presentations, and critiques of student work. Materials fee.

Restriction: Art Majors have first consideration for enrollment.

**ART 30B. Basic Painting II. 4 Units.**

Further examinations of the essential qualities of painting: color, form, space, surface, scale, and content. Studio work, slide presentations, and critiques of student work. Materials fee.

Prerequisite: ART 30A

Restriction: Art Majors have first consideration for enrollment.

**ART 40. Basic Sculpture. 4 Units.**

The practice of sculpture in the contemporary arts; inclusion of spatial interventions, site-specific and environmental design, appropriation of found materials; techniques in cutting joining, and assembly of wood, metals, and plastics. May include casting, welding, and ceramics. Materials fee.

Restriction: Art Majors have first consideration for enrollment.

**ART 50A. Matter and Media . 4 Units.**

A project-based introduction to tools and approaches for creating and sharing digital media content within Internet-mediated social environments, with a particular emphasis on art-making and personal expression. Includes an overview of basic user experience and interaction design principles.

**ART 50B. Interaction and Experience. 4 Units.**

An overview of digital video and audio production for the Web, emphasizing art-making and personal expression. Includes digital media aesthetics and conceptual design, basic audio and video recording, and fundamentals of desktop video, audio, and Web authoring software applications.

Prerequisite: ART 50A

**ART 50C. Digital Media: Interaction Design. 4 Units.**

Principles and practices of interaction design for interactive digital media systems that provide for active involvement of the participant. Students gain experience with interaction design issues through a series of media art projects, emphasizing art-making and personal expression.

Prerequisite: ART 12A and ART 12B and ART 50A and ART 50B

**ART 51. Basic Ceramic Sculpture. 4 Units.**

Exploration of use of clay as sculptural basis with an emphasis on development of an idea and its relation to contemporary and experimental art practice. Hand-building, glazing, finishing processes, and use of other structural materials. Materials fee.

Restriction: Art Majors have first consideration for enrollment.

**ART 65A. Foundations in Media Design. 4 Units.**

Provides an overview of media design in the digital age, covering principles of design for different media (2D, time-based, interactive); history of relationship between art and design; and practice in working with different design approaches. Materials fee.

Restriction: Art Majors have first consideration for enrollment.

**ART 65B. Foundations in Internet Art and Design. 4 Units.**

Introduction to creating art for the Internet, covering history and structure of networks; key types of net-based interactivity; basics of Web design and scripting. Materials fee.

Prerequisite: ART 65A. Recommended: ART 11B.

Restriction: Art Majors have first consideration for enrollment.

**ART 65C. Gizmology and Kinetics. 4 Units.**

Provides students with basic skills in materials, construction and design applicable to making machines, musical instruments and things with moving parts enabling work in kinetic sculpture, custom interactive systems, Mechatronics, Robotics, and Maker/DIY culture. Materials fee.

**ART 71A. Introduction to Photography I. 4 Units.**

Introduction to technical underpinnings emphasizing photography as a contemporary art practice. Topics include 35mm non-automatic camera operation, exposure and lighting, black and white printing, introduction to digital photography, discussion of critical and historical issues. Materials fee.

Restriction: Art Majors have first consideration for enrollment.

**ART 71B. Introduction to Photography II. 4 Units.**

Techniques covered include medium and large format cameras, digital photography, studio lighting, digital and analog color printing, mural room. Conceptual direction is developed through critiques, critical readings, discussions, slide lectures. Materials fee.

Prerequisite: ART 71A

Restriction: Art Majors have first consideration for enrollment.

**ART 81A. Digital Filmmaking Production I. 4 Units.**

Introduction to three production stages of video making. Study of the narrative structure of cinema and acquisition of video production skills in camera, lighting, sound, and editing. Production work, readings, and screenings outside of class are assigned. Materials fee.

Restriction: Art Majors have first consideration for enrollment.

**ART 81B. Digital Filmmaking Production II. 4 Units.**

Focuses on video stage production, technical skills including camera operation, stage lighting, sound recording, and construction of basic scenic elements. Emphasis is placed on the function and responsibilities of the production crew and proper working and safety procedures. Materials fee.

Prerequisite: ART 81A

Restriction: Art Majors have first consideration for enrollment.

**ART 91. Basic Performance Art. 4 Units.**

Exploration of objects, gesture, action, text, image, and media to create narrative or non-narrative works. Elements of theory and history of performance art are discussed to illustrate techniques and styles to understand, identify, and articulate artistic vision and voice.

Repeatability: May be taken for credit 2 times.

Restriction: Art Majors have first consideration for enrollment.

**ART 95. SPECIAL TOPICS IN BASIC MEDIA. 4 Units.**

Basic instruction in media or disciplines not otherwise represented in the regular curriculum. Topics vary according to the instructor.

Repeatability: Unlimited as topics vary.

Restriction: Art Majors have first consideration for enrollment.

**ART 100. Special Topics in Art. 4 Units.**

Materials fee, topic dependent.

Prerequisite: ART 9A. Lower-division writing strongly recommended.

Repeatability: May be taken for credit 6 times as topics vary.

Restriction: Art Majors only.

**ART 101W. Artists as Writers. 4 Units.**

Contemporary art practice involves text, as final form or an integral element. Many contemporary artists consider writing as essential to their practice. Covers historical and contemporary uses of text and image as well as artists' writing.

Prerequisite: ART 9A and ART 11A. Satisfactory completion of the lower-division writing requirement.

Restriction: Art Majors only.

**(Ib)****ART 106A. Programming for Artists. 4 Units.**

Programming as a means to create interactive artworks with an emphasis on the integration of video, sound, text, and stills. Topics include basic concepts in programming, understanding the limits of code, working with video and audio files, interface design. Materials fee.

Prerequisite: ART 65A. Recommended: ART 11B.

Repeatability: May be taken for credit 2 times.

Restriction: Art Majors only.

**ART 106C. Design for Print. 4 Units.**

Investigates the use of print for communication as an artist. Covers the fundamentals of print design and output using digital media. Materials fee.

Prerequisite: ART 65A. Recommended: ART 11B.

Repeatability: May be taken for credit 2 times.

Restriction: Art Majors only.

**ART 108. Digital Filmmaking Project I. 4 Units.**

Students learn to conceive, develop, and produce original video works building directly upon previously learned skills. Use of video stage and post-production editing facilities. Lectures on video/film subjects, production strategies, readings, screening, field trips, and group critiques. Materials fee.

Prerequisite: ART 81A and ART 81B

Restriction: Art Majors only.

**ART 109. Performance and the Camera. 4 Units.**

Surveys the development of contemporary artists who use performance strategies in the making of videos and films. Students analyze the artist's conceptual approach to performative gestures, actions, and landscapes created for their video or film art.

Prerequisite: ART 1B or ART 81A or ART 91 or ART 128

Restriction: Art Majors only.

**ART 110A. Mechatronic Art I. 4 Units.**

Introduces the practice and theory of analog electronics, emphasizing the design and development of simple interactive systems and the integration of such systems into real-world contexts of performance, installation, sculpture, and automated artifacts. Materials fee.

**ART 110B. Mechatronic Art II. 4 Units.**

Introduces the practice and theory of embedded microcontrollers, digital electronics, coding, sensor interfacing, motor control, and output stages along with mechanical and electromechanical design and construction, emphasizing the integration of such systems into real-world contexts of performance, installation, and art-making. Materials fee.

Prerequisite: ART 110A

**ART 110C. Mechatronic Art III. 4 Units.**

As the capstone to the Mechatronic Art series, students develop major projects utilizing electronics, microcontrollers, sensors, and electromechanical devices, in a methodical and supervised context, with technical, design, and aesthetic advice and critique. Materials fee.

Prerequisite: ART 110A

**ART 113. How to be Clever with Stuff. 4 Units.**

How to Be Clever with Stuff is an introduction to the skilled embodied practices of arts and crafts, working with hand tools, wood, and steel. Class includes technical lecture/demos, short technical assignments, a self-initiated final project, and design drawing. Materials fee.

Restriction: Art Majors have first consideration for enrollment.

**ART 115W. Writing Nearby. 4 Units.**

Art writing is increasingly an area of scholarship unto itself as well as a discursive arm of contemporary art practice. Investigates the politics of art writing as well as training students in its various writing practices.

Prerequisite: ART 9A and ART 11A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only.

**(Ib)****ART 119. Issues in Contemporary Painting. 4 Units.**

Investigation of issues in modern and contemporary art work and criticism, wherein an assessment of Modernist influences is followed by the examination of contemporary painting as a cross-disciplinary practice employing popular culture, 'high art,' theory, and new technology.

Prerequisite: ART 9A. Recommended: Satisfactory completion of the upper-division writing requirement.

Repeatability: May be taken for credit 2 times.

Restriction: Art Majors only.

**ART 119A. Issues in Contemporary Drawing. 4 Units.**

Investigation of drawing as a primary practice rather than a developmental tool. Explores the relationship between Conceptualism, process and content, and considers the historical changes in method, presentation, and theory, from past to present.

Prerequisite: ART 9A

**ART 121A. Afro-Futurism I. 4 Units.**

First of a two-part course on the futuristic artistic vision of Black film, video, and cyberspace. Deals with critical analyses of the Black image in Western Art history, and its association to contemporary Hip Hop culture, art, and music.

Prerequisite: ART 9A. Satisfactory completion of upper-division writing strongly recommended.

Restriction: Art Majors only.

**ART 121B. Afro-Futurism II. 4 Units.**

Second of a two-part course on the futuristic artistic visions of Black film, video, and cyberspace. Deals with modern techno-culture, digital activism, and designing technology based on African aesthetic principles of contemporary Hip Hop International Culture.

Prerequisite: ART 9A. Satisfactory completion of upper-division writing strongly recommended.

Restriction: Art Majors only.

**ART 123B. Issues in Media, Violence, and Fear. 4 Units.**

Violence has been instrumental in story-telling throughout history in art, literature, religion, and entertainment. Continuing presence of media violence provoked debates among parents, politicians, media producers, and academics. Examines history, theory, aesthetics, economics, and politics of violent representation.

Prerequisite: ART 9A. Satisfactory completion of the Upper-Division Writing requirement is recommended.

Restriction: Art Majors only.

**ART 125. Issues in Photography. 4 Units.**

Rigorous investigation of photographic practices and critical writings, the relationship of photography to the construction and maintenance of cultural institutions, the circulation of photographic ideas in society, and photography and technology.

Prerequisite: ART 1A or ART 71A or ART 71B or ART 152A or ART 152B or ART 152C or ART 152D or ART 152E or ART 190B. Recommended: Satisfactory completion of the Upper-Division Writing requirement.

Repeatability: May be taken for credit 2 times.

Restriction: Art Majors only.

**ART 126. Issues in Media and Migration: Asia. 4 Units.**

Media and migration are profound, twinned influences on contemporary globalized experience. A discourse on Asian cultural production and of its transnational dimensions. Students will explore migration in its multiple facets to include migrations of people, ideas, and technologies.

Prerequisite: ART 9A

**ART 126B. Issues in Techno-Arts. 4 Units.**

Addresses issues related to artmaking practices that emerge in tandem with new technologies. Topics include sociopolitical contexts of techno-art; utopic/dystopic framings; key moments in the history of techno-arts.

Prerequisite: ART 9A. Recommended: ART 11B.

Restriction: Art Majors only.

**ART 127B. Issues in Experimental Film History. 4 Units.**

A critical study of experimental film/video art genres and production techniques considering their narrative, structural, iconographic, and cultural aspects. Hollywood narrative, Nouvelle Vague, American Independent, and Video Art compared in terms of production innovation, design, and conceptual content. Materials fee.

Prerequisite: ART 9A

Restriction: Art Majors only.

**ART 128. Issues in New Genres. 4 Units.**

Investigates issues in post-studio practices, including concepts of time, relational aesthetics, site-specificity, institutional critique, and the post-medium condition.

Prerequisite: ART 9A. Recommended: Satisfactory completion of the Upper-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Art Majors only.

**ART 130A. Projects in New Technologies. 4 Units.**

Working with media such as electronic still cameras, desktop publishing, faxes, satellites, virtual reality, digitized imaging. Cultural issues pertinent to the emergence of new technology (e.g., ethical concerns, social impact, copyright laws, nontraditional approaches to distribution, cyberpunk, global markets).

Prerequisite: ART 65A. Recommended: ART 11B and ART 106A.

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 131. Projects in Installation. 4 Units.**

Investigates interior installation in particular spaces. Working in teams, students install, discuss, and remove projects. Technical information and hands-on experience with various media is provided. Materials fee.

Prerequisite: ART 40

Repeatability: May be repeated for credit unlimited times.

**ART 132A. Digital Filmmaking Pre-Production. 4 Units.**

Examines the preparatory and planning stages of video production, including script writing, story boarding, location scouting, script breakdown, and budgeting. Projects may encompass one or more of these stages which will be explored through readings, discussions, and demonstrations. Materials fee.

Prerequisite: ART 81A and ART 81B

Restriction: Art Majors only.

**ART 132B. Digital Filmmaking Post-Production. 4 Units.**

Examines procedures and techniques utilized in video production after principal shooting is completed, including effects processing, composting, sound design, and DVD authoring. Projects focus on these processes, and are explored through readings, discussions, and demonstrations. Materials fee.

Prerequisite: ART 81A and ART 81B

Restriction: Art Majors only.

**ART 133. The Graphic Novel . 4 Units.**

An intensive workshop during which students will create a short graphic novel, taking the process all the way from concept to publication. Course work will focus on understanding how narrative emerges from a combination of visual and textual elements.

Prerequisite: ART 65A. Strongly recommended: ART 106C.

**ART 138. Place Making and Public Art. 4 Units.**

How do art interventions in public spaces inform our definition of 'place' and develop culturally informed audiences? Students will engage in class projects and group investigations that question the traditional and institutional conceptual boundaries of exhibition/distribution.

Prerequisite: ART 40 and ART 9A

Restriction: Art Majors only.

**ART 141. Digital Filmmaking Advanced Project I. 4 Units.**

Incorporating narrative structures in a multi-screen context. Students design and produce an active space in which activities will move from one screen to another. Materials fee.

Prerequisite: ART 81A and ART 81B

Restriction: Art Majors only.

**ART 144. Artist Books as Objects. 4 Units.**

Are artist books still relevant in the contemporary creative community? Focusing on intellectual content and raw physicality, students will explore this question and image/text relationships by creating handmade one-of-a-kind or edition book projects utilizing various mechanical reproduction techniques.

Prerequisite: (ART 20A or ART 30A or ART 40 or ART 51 or ART 65A or ART 71A or ART 81A or ART 91) and ART 9A

**ART 150. Advanced Studio Topics--Painting. 4 Units.**

Provides an intensive and specialized working environment. Thematic issues and material strategies will be explored. Materials fee.

Prerequisite: ART 30B

Repeatability: Unlimited as topics vary.

Restriction: Art Majors only.

**ART 150C. Advanced Drawing . 4 Units.**

Advanced studio problems in visual exploration. Students pursue individual solutions to self-defined and presubscribed projects. Techniques/materials are individual choice. Continual analysis of the personal process.

Prerequisite: ART 20B

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 150F. Advanced Figure Drawing. 4 Units.**

Students develop technical skills in rendering the figure. Live model sessions and an introduction to anatomy. Investigates use of the figure in contemporary art. Materials fee.

Prerequisite: ART 20B

Repeatability: May be taken for credit 2 times.

Restriction: Art Majors only.

**ART 150G. Advanced Figure Painting. 4 Units.**

Students develop technical skills in painting the figure. Live model sessions and projects that investigate the use of the figure in contemporary art.

Prerequisite: ART 150F

**ART 151. Advanced Studio Topics--Sculpture. 4 Units.**

Provides an intensive and specialized working environment. Thematic issues and material strategies will be explored. Materials fee.

Prerequisite: ART 40

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 152A. Advanced Studio Topics: Photography. 4 Units.**

Focused investigation of a range of issues in photographic practice, with an emphasis on developing individual student projects, refining critical thinking, and conceptual framing. Technical topics covered as required. Readings, lectures, critiques, labs. Materials fee.

Prerequisite: ART 71B

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 152B. Documentary Photography. 4 Units.**

Documentary practice is examined through the realization of photo-based projects. Thematic focus of student's choosing will be refined through lectures, discussion, technical demonstrations, field trips, labs, and individual meetings. Materials fee.

Prerequisite: ART 71B

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 152C. The Public Image. 4 Units.**

Strategies for artistic intervention in the public circulation of images are examined alongside the role images play in constructing public identity. Individual or collaborative student projects will be directed around course themes. Materials fee.

Prerequisite: ART 71B

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 152D. The Photographic Tableau. 4 Units.**

Examines and develops photographic projects intended for traditional artistic venues (i.e., galleries and museums). In addition to exploring appropriate techniques and presentation strategies, students consider the interdependency between construction of images and semantic shaping of traditional art venues. Materials fee.

Prerequisite: ART 71B

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 152E. The Constructed Image. 4 Units.**

A studio investigation of theoretical ideas, critical possibilities, historical precedents, and various techniques involving the production of fabricated images. Techniques may include montage, digital, chemical and in-camera manipulations, studio constructions, appropriations, performance, and projected images. Materials fee.

Prerequisite: ART 71B

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 152F. Seminar Production Component. 4 Units.**

Photographic and/or inter-media production course tied to a specific Issues course (for example, Issues in Photography, Issues in Feminism, Issues in New Genres). Critiques, labs, field trips, discussion, demonstrations. Materials fee.

Prerequisite: ART 71B

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 153. Digital Filmmaking Advanced Project II. 4 Units.**

Directed to the production of individual or collaborative videotapes, using studio, portable camera, editing facilities, and sound and computer elements. Emphasis will be on individually initiated projects. Readings and screenings are assigned. Materials fee.

Prerequisite: ART 81A and ART 81B

Restriction: Art Majors only.

**ART 154. Advanced Studio Topics: Performance. 4 Units.**

An intensive investigation of the practice of performance art, with an emphasis on the development of individual projects, and the refinement of various technical skills, as well as audiences, spaces, and cultural connections.

Prerequisite: ART 91 or ART 109 or ART 128

Repeatability: May be taken for credit 3 times.

Restriction: Art Majors only.

**ART 156. Advanced Studio Topics: Ceramic Sculpture. 4 Units.**

Discussion of ideas, techniques, and personal control of form. Clay body, fabrication, glazing, and firing. Emphasis on development of personal direction. Materials fee.

Prerequisite: ART 51

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 166A. Digital Filmmaking Web Series. 4 Units.**

Original video projects produced in collaborative teams combining advanced video students with students from other areas, including Dance, Drama, and Music. Shoots may be carried out on the video stage as well as field locations. Materials fee.

Prerequisite: ART 81A and ART 81B

Restriction: Art Majors only.

**ART 170. Advanced Projects. 4 Units.**

Students working in different mediums will focus on ambitious research, planning, development, and experimentation, leading to a single work or focused series that is large in scope. The project will be exhibited and documented at the end of the quarter. Materials fee.

Prerequisite: ART 150 or ART 150C or ART 151 or ART 152A or ART 152B or ART 152C or ART 152D or ART 152E or ART 152F or ART 153 or ART 166A or ART 190 or ART 190B or ART 190C

Restriction: Art Majors only.

**ART 189. Critical Aesthetics . 4 Units.**

Surveys critical thought that has influenced twentieth-century art production, preparing the student to engage contemporary art with a critical eye, specifically addressing aesthetic and political debates of the historical avant-garde, the neo-avant garde, and postmodern culture.

Prerequisite: ART 1A and ART 1B and ART 1C

Restriction: Upper-division students only. Art Majors only.

**ART 190. Senior Project and Critique. 4 Units.**

Directed-study critique class in preparation for final project and life after graduation; documentation and portfolio preparation for graduate school. Investigation of exhibition spaces and funding opportunities, participation in artists' communities outside the university, and artists' rights issues.

Repeatability: May be repeated for credit unlimited times.

Restriction: Seniors only. Art Majors only.

**ART 190B. Senior Projects and Critique in Photography. 4 Units.**

Directed group study focused on production of photographic projects of significant scope and ambition. Emphasis on preparation for continued study and/or practice in photography in advanced settings beyond the undergraduate university experience. Materials fee.

Prerequisite: ART 1A and ART 1B and ART 1C and ART 71A and ART 71B

Repeatability: May be repeated for credit unlimited times.

Restriction: Seniors only. Art Majors only.

**ART 197. Art Internship. 1-4 Units.**

Under faculty supervision, students participate directly in a variety of art institution settings, including museums, galleries, and nonprofit organizations.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

Restriction: Juniors only.

**ART 198. Honors Exhibition. 4 Units.**

Preparation, installation, and participation in the annual honors exhibition. Materials fee.

Grading Option: Pass/no pass only.

Restriction: Upper-division students only. School of Arts Honors students only.

**ART 199. Independent Study. 1-4 Units.**

Individual study or directed creative projects as arranged with faculty member. Materials fee.

Repeatability: May be repeated for credit unlimited times.

**ART 210. First-Year Graduate Seminar. 4 Units.**

Introductory theory class to contemporary art: intellectual history, theoretical antecedents, and current critical concerns.

Restriction: Graduate students only.

**ART 215. Graduate Seminar Topics. 4 Units.**

In-depth discussion of contemporary art production in relation to a variety of theoretical, cultural, and historical topics. Material is determined by the given instructor's current research interest. Topics vary.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ART 220. Graduate Seminar: Issues in Contemporary Art. 4 Units.**

Classroom interaction with artists, curators, critics, lecturers from fields outside of the arts or from cross-disciplines. Includes recommended readings, discussions, panel participation, writing assignments.

Prerequisite: ART 210

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

**ART 230. Graduate Group Critique. 4 Units.**

Focus on studio production. Students are expected to help foster and develop an environment in which serious and sophisticated peer critique can take place.

Repeatability: May be taken for credit 9 times.

Restriction: Graduate students only.

**ART 236. Graduate Topics in Studio Production. 4 Units.**

Graduate group study of a specific medium or art practice (e.g., painting; video, installation, photography, sculpture/3D, performance, digital media, public art, sound art; film). Includes consideration of technical, theoretical, historical, and/or formal issues.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ART 240. Interdisciplinary Projects. 4 Units.**

Intensive faculty-led discussion of in-progress graduate studio projects--can be discipline driven or working across fields in a rigorous interdisciplinary studio environment where students meet with the professor both individually and in small groups.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ART 250. Directed Reading and Research. 4 Units.**

Independent study with a supervising faculty member to direct academic research, develop bibliographies, and discuss assigned readings.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ART 251. Special Topics Seminar. 4 Units.**

Directed reading and/or study group on a given research topic. Agreed-upon meeting structure may be flexible in order to accommodate off-campus field trips and travel.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ART 255. Graduate Interdisciplinary and Collaborative Projects. 4 Units.**

For graduate students working collaboratively across the School of the Arts or cross-university. May be team taught with one of the faculty members based in the Department of Art.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ART 261. Graduate Thesis Writing Seminar. 4 Units.**

Seminar for writing as a component of the thesis. Different models of writing, text, and spoken word will be discussed. Required second year.

Corequisite: ART 262

Prerequisite: ART 210 and ART 215 and ART 220

Restriction: Graduate students only.

**ART 262. Graduate Thesis Independent Study. 1-4 Units.**

Tutorials and directed study in thesis writing, research and/or studio production with thesis committee chair and/or thesis committee members to be taken during final quarters of study.

Corequisite: ART 261

Prerequisite: ART 210 and ART 215 and ART 220

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ART 263. Graduate Thesis, Exhibition Critique. 4 Units.**

Group critique required for matriculating M.F.A. students during the quarter in which their thesis exhibitions are scheduled. Public presentation/lecture on student's work required.

Prerequisite: ART 210 and ART 215 and ART 220 and ART 230 and ART 240 and ART 261 and ART 262

Restriction: Graduate students only.

**ART 264. Critical and Curatorial Thesis Exhibition. 8 Units.**

Intensive tutorial geared toward execution of professional gallery exhibition, which is one half of the degree requirement for the M.F.A. concentration in Critical and Curatorial Studies. Must be taken under direction of Committee Chair.

**ART 280. Contemporary Exhibition Systems. 4 Units.**

Investigates contemporary case studies of curatorial practice. Sometimes taught in collaboration with a host institution. The history, theory and criticism or curatorial practice are tested through the explication of real exhibitions.

Prerequisite: ART 280A

Repeatability: May be taken for credit 4 times.

**ART 280A. Introduction to Exhibition Systems. 4 Units.**

Introduces the basics of curating, covering the fundamentals of collection, research, fundraising, publicity, and installation. Also introduces the related categories of public programming and art criticism.

Restriction: M.F.A. students only.

**ART 399. University Teaching. 4 Units.**

Limited to Teaching Associates working under the active guidance and supervision of a regular rank faculty member responsible for curriculum and instruction at the University.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit for 12 units.

Restriction: Graduate students only.

## Dance Courses

### **DANCE 2. Dance Health and Injury Prevention. 4 Units.**

An overview of factors that affect the health of dancers. Includes evaluation of general health measures and prevention and management of common dance injuries.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

### **DANCE 3. Scientific Concepts of Health. 4 Units.**

Introduction to the scientific foundations of health, emphasizing those pertaining to success in college and lifetime wellness. Includes principles of cardiorespiratory, musculoskeletal, flexibility, and nutritional fitness. A variety of learning experiences are offered to apply science to real life.

## **(II)**

### **DANCE 14. Social Dance. 2 Units.**

Contemporary and historical forms. Current ballroom, disco, and Western square dance forms; Latin ballroom dances; dances from the 20s, 30s, and 40s.

Grading Option: Pass/no pass only.

### **DANCE 21A. Music for Dancers. 4 Units.**

Emphasis on the development of musical skills most pertinent to the dancer: vocabulary, notational literacy, rhythmic and melodic acuity, score reading, and fundamental analysis; working with live accompaniment.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

### **DANCE 30A. Studio Workshop in Ballet I. 2 Units.**

Beginning ballet: fundamentals and principles of classical ballet with an emphasis on technique.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

### **DANCE 30B. Studio Workshop in Ballet I. 2 Units.**

Beginning ballet: fundamentals and principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 30A

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

### **DANCE 30C. Studio Workshop in Ballet I. 2 Units.**

Beginning ballet: fundamentals and principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 30A and DANCE 30B

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

### **DANCE 34. Men's Studio Workshop in Ballet. 2 Units.**

Emphasis on men's traditional ballet, techniques, and movements.

Prerequisite: DANCE 30A and DANCE 30B and DANCE 30C

Repeatability: May be repeated for credit unlimited times.

### **DANCE 40A. Studio Workshop in Modern I. 2 Units.**

Fundamentals of modern dance: principles of modern tradition developed from Graham, Humphrey, and Wigman.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**DANCE 40B. Studio Workshop in Modern I. 2 Units.**

Fundamentals of modern dance: principles of modern tradition developed from Graham, Humphrey, and Wigman.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**DANCE 40C. Studio Workshop in Modern I. 2 Units.**

Fundamentals of modern dance: principles of modern tradition developed from Graham, Humphrey, and Wigman.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**DANCE 50A. Studio Workshop on Jazz I. 2 Units.**

Fundamentals of jazz: principles of jazz dance and contemporary forms incorporating the personal point of view of the instructor.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**DANCE 50B. Studio Workshop on Jazz I. 2 Units.**

Fundamentals of jazz: principles of jazz dance and contemporary forms incorporating the personal point of view of the instructor.

Prerequisite: DANCE 50A

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**DANCE 50C. Studio Workshop on Jazz I. 2 Units.**

Fundamentals of jazz: principles of jazz dance and contemporary forms incorporating the personal point of view of the instructor.

Prerequisite: DANCE 50B

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**DANCE 52A. Workshop in Tap I. 2 Units.**

Beginning tap: principles of rhythm and basic tap steps.

Repeatability: May be taken for credit 2 times.

**DANCE 52B. Workshop in Tap I. 2 Units.**

Beginning tap: principles of rhythm and basic tap steps.

Prerequisite: DANCE 52A

Repeatability: May be taken for credit 2 times.

**DANCE 52C. Workshop in Tap I. 2 Units.**

Beginning tap: principles of rhythm and basic tap steps.

Prerequisite: DANCE 52B

Repeatability: May be taken for credit 2 times.

**DANCE 60A. Choreography. 4 Units.**

Beginning-to-intermediate study of principles of dance composition. May include composition assignments for stage and video. By audition, works may be shown quarterly in public studio performances.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 60B. Choreography. 4 Units.**

Beginning-to-intermediate study of principles of dance composition. May include composition assignments for stage and video. By audition, works may be shown quarterly in public studio performances.

Prerequisite: DANCE 60A

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 60C. Choreography. 4 Units.**

Beginning-to-intermediate study of principles of dance composition. May include composition assignments for stage and video. By audition, works may be shown quarterly in public studio performances.

Prerequisite: DANCE 60A and DANCE 60B

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 80. Introduction to Ballet and Modern Dance. 4 Units.**

Survey of nineteenth and twentieth-century ballet, modern dance, and theatre dance.

Overlaps with DANCE 90B, DANCE 90C, DANCE 90A.

Restriction: Non-major only.

**(IV, VIII)**

**DANCE 81. American Ballet and Modern Dance since 1900. 4 Units.**

A survey of American ballet and modern dance in the twentieth and twenty-first centuries. Lectures are supplemented by video.

Overlaps with DANCE 90C.

Restriction: Non-major only. Dance 81 and Dance 90C may not both be taken for credit.

**(IV)**

**DANCE 82. Topics in World Dance. 4 Units.**

Various topics in world dance studies focusing on historical, social, and cultural contexts.

Repeatability: May be repeated for credit unlimited times.

**(VIII)**

**DANCE 83. Dance in Feature Film. 4 Units.**

Dance in film musicals and commercial dance films, concentrating especially on films from the 1930s through the 1970s.

**(IV)**

**DANCE 85. What Dance Does: From Ballet to Hip-Hop. 4 Units.**

Explores the way dance reflects culture and embodies new ideas. Examples for viewing and analysis come from ballet (with roots in Europe) and hip-hop (with roots in the African diaspora). Themes include gender, perceived racial difference, identity.

**(IV)**

**DANCE 90A. Dance History I. 4 Units.**

Global perspectives. Topics and histories of dance and movement practices from various parts of the world.

Overlaps with DANCE 80.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**(IV and VIII ).**

**DANCE 90B. Dance History II. 4 Units.**

The history of dance in the western tradition from the Renaissance through the 19th century.

Prerequisite: DANCE 90A

Overlaps with DANCE 80.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

(IV and VIII ).

**DANCE 90C. Dance History III. 4 Units.**

The history of dance in the western tradition in the the 20th and 21st centuries.

Prerequisite: DANCE 90B

Overlaps with DANCE 80, DANCE 81.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

(IV ).

**DANCE 100. Kinesiology for Dance. 4 Units.**

The study of the production of dance movement by the musculoskeletal system. Anatomical and dynamic analysis of dance movement.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 103. Pilates. 2 Units.**

Basics of technique emphasizing alignment, breath control, correction of muscular imbalances.

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 104. Pilates Reformer. 2 Units.**

Utilizes the Universal Reformer apparatus, aiding the student in core stabilization, correcting muscular imbalances, increasing flexibility, and improving strength.

Prerequisite: DANCE 103

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 110. World Dance . 2 Units.**

Studio workshop of dances and movement sources of specified countries or areas.

Repeatability: May be taken for credit 6 times as topics vary.

**DANCE 125A. Teaching of Dance. 4 Units.**

Pedagogy. The methods and theory of teaching dance forms.

Prerequisite: DANCE 133A and DANCE 133B and DANCE 133C and DANCE 143A and DANCE 143B and DANCE 143C

Restriction: Upper-division students only. Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 127A. Costume Design for Dance. 4 Units.**

Costume design and construction specific to the body in motion. Theoretical study and practical execution.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 130A. Pointe Class. 2 Units.**

Beginning and intermediate pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 132A and DANCE 132B and DANCE 132C

Repeatability: May be taken for credit 3 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 132A. Studio Workshop in Ballet II. 2 Units.**

Intermediate ballet and beginning pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: (DANCE 30A and DANCE 30B and DANCE 30C) or audition. Prerequisites are for non-Dance majors only.

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**DANCE 132B. Studio Workshop in Ballet II. 2 Units.**

Intermediate ballet and beginning pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 132A

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**DANCE 132C. Studio Workshop in Ballet II. 2 Units.**

Intermediate ballet and beginning pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 132A and DANCE 132B

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**DANCE 133A. Advanced Studio Workshop in Ballet III. 2 Units.**

Advanced intermediate ballet and pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 132C. DANCE 132C with a grade of B+ or better. Placement by audition is also accepted.

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 133B. Advanced Studio Workshop in Ballet III. 2 Units.**

Advanced intermediate ballet and pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 133A

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 133C. Advanced Studio Workshop in Ballet III. 2 Units.**

Advanced intermediate ballet and pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 133A and DANCE 133B

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 134A. Advanced Studio Workshop in Ballet IV. 4 Units.**

Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 133A and DANCE 133B and DANCE 133C. DANCE 133C with a grade of B+ or better. Placement by audition is also accepted.

Repeatability: May be taken for credit 3 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 134B. Advanced Studio Workshop in Ballet IV. 4 Units.**

Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 134A

Repeatability: May be taken for credit 3 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 134C. Advanced Studio Workshop in Ballet IV. 4 Units.**

Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 134A and DANCE 134B

Repeatability: May be taken for credit 3 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 135A. Advanced Studio Workshop in Ballet V. 4 Units.**

Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 134A and DANCE 134B and DANCE 134C. DANCE 134C with a grade of B+ or better. Placement by audition is also accepted.

Repeatability: May be taken for credit 3 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 135B. Advanced Studio Workshop in Ballet V. 4 Units.**

Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 135A

Repeatability: May be taken for credit 3 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 135C. Advanced Studio Workshop in Ballet V. 4 Units.**

Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 135A and DANCE 135B

Repeatability: May be taken for credit 3 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 137. Repertory . 2 Units.**

Rehearsal and performance of repertoire from established ballet, modern, or jazz choreographers.

Prerequisite: (DANCE 133A and DANCE 133B and DANCE 133C) or (DANCE 143A and DANCE 143B and DANCE 143C)

Repeatability: May be taken for credit 3 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 139. Partnering. 2 Units.**

Principles of partnering techniques in various dance performance styles.

Prerequisite: DANCE 133A and DANCE 133B and DANCE 133C and DANCE 143A and DANCE 143B and DANCE 143C

Repeatability: May be taken for credit 4 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 142A. Studio Workshop in Modern II. 2 Units.**

Introduction to the principles of motion, including the use of breath, gravity, spatial awareness, and time values.

Prerequisite: DANCE 40A and DANCE 40B and DANCE 40C. Prerequisites are for non-Dance majors only.

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**DANCE 142B. Studio Workshop in Modern II. 2 Units.**

Introduction to the principles of motion, including the use of breath, gravity, spatial awareness, and time values.

Prerequisite: DANCE 142A

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**DANCE 142C. Studio Workshop in Modern II. 2 Units.**

Introduction to the principles of motion, including the use of breath, gravity, spatial awareness, and time values.

Prerequisite: DANCE 142A and DANCE 142B

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**DANCE 143A. Advanced Studio Workshop in Modern III. 2 Units.**

Builds on fundamentals of Dance 142A-B-C and introduces performance techniques.

Prerequisite: DANCE 142C. DANCE 142C with a grade of B+ or better

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 143B. Advanced Studio Workshop in Modern III. 2 Units.**

Builds on the fundamentals of DANCE 142A-DANCE 142B-DANCE 142C and introduces performance techniques.

Prerequisite: DANCE 143A

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 143C. Advanced Studio Workshop in Modern III. 2 Units.**

Builds on fundamentals of DANCE 142A-DANCE 142B-DANCE 142C and introduces performance techniques.

Prerequisite: DANCE 143A and DANCE 143B

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 144A. Advanced Studio Workshop in Modern IV. 2 Units.**

Synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Prerequisite: DANCE 143C. DANCE 143C with a grade of B+ or better

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 144B. Advanced Studio Workshop in Modern IV. 2 Units.**

Synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Prerequisite: DANCE 144A

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 144C. Advanced Studio Workshop in Modern IV. 2 Units.**

Synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Prerequisite: DANCE 144A and DANCE 144B

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 152A. Intermediate Studio Workshop in Jazz II. 2 Units.**

Intermediate jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: Prerequisites for non-Dance majors: DANCE 50A and DANCE 50B and DANCE 50C.

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**DANCE 152B. Intermediate Studio Workshop in Jazz II. 2 Units.**

Intermediate jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 152A

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**DANCE 152C. Intermediate Studio Workshop in Jazz II. 2 Units.**

Intermediate jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 152A and DANCE 152B

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**DANCE 153A. Advanced Studio Workshop in Jazz III. 2 Units.**

Advanced jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 152C. DANCE 152C with a grade of B+ or better

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 153B. Advanced Studio Workshop in Jazz III. 2 Units.**

Advanced jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 153A

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 153C. Advanced Studio Workshop in Jazz III. 2 Units.**

Advanced jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 153A and DANCE 153B

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 154A. Advanced Jazz: Performance Techniques IV. 2 Units.**

Advanced jazz emphasizing performance techniques.

Prerequisite: DANCE 153C. DANCE 153C with a grade of B+ or better

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 154B. Advanced Jazz: Performance Techniques IV. 2 Units.**

Advanced jazz emphasizing performance techniques.

Prerequisite: DANCE 154A

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 154C. Advanced Jazz: Performance Techniques IV. 2 Units.**

Advanced jazz emphasizing performance techniques.

Prerequisite: DANCE 154A and DANCE 154B

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only.

**DANCE 160. Improvisation. 2 Units.**

Structured and experiential improvisation to heighten the personal intuitive processes, the kinesthetic sense, spatial and temporal awareness, and to encourage insights into the potential movement resources of the individual for performance and choreography. Course encourages freedom of exploration.

Repeatability: May be taken for credit 2 times.

**DANCE 162A. Choreography II. 4 Units.**

Directed choreographic projects for stage or video integrating the elements of stagecraft. In process or completed works may be shown quarterly in public studio or stage performances.

Prerequisite: DANCE 60A and DANCE 60B and DANCE 60C. Audition required.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 162B. Choreography II. 4 Units.**

Directed choreographic projects for stage or video integrating the elements of stagecraft. In process or completed works may be shown quarterly in public studio or stage performances.

Prerequisite: DANCE 162A. Audition required.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 162C. Choreography II. 4 Units.**

Directed choreographic projects for stage or video integrating the elements of stagecraft. In process or completed works may be shown quarterly in public studio or stage performances.

Prerequisite: DANCE 162A and DANCE 162B. Audition required.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 163. Dance and Video Technology. 4 Units.**

Introduction to video and audio documentation of dance performance. Integrating dance performance within the film aesthetic. Techniques and technologies of video cameras, formats, editing, and projection. Overview of video compression and DVD authoring.

Prerequisite: DANCE 60A

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 164. Screendance. 4 Units.**

Overview of dance for film and choreography for the camera. Aesthetics of creating dance for the screen. Approaches for delivery of dance films to an audience, including projection, DVD, Web, and mobile devices. A final dance film project is required.

Prerequisite: DANCE 163

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 165. Choreographic Projects. 1-4 Units.**

Supervised choreographic projects for workshop productions.

Prerequisite: Audition required.

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 170. Dance Performance. 1-4 Units.**

Rehearsal and performance in a faculty-choreographed production.

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

**DANCE 171. Dance Workshop. 1-4 Units.**

Rehearsal and performance in a student-choreographed production.

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

**DANCE 172. Master of Fine Arts Concert. 1-4 Units.**

Rehearsal and performance in a graduate student-choreographed production.

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

**DANCE 174. UCI Dance Ensemble Performance. 1-4 Units.**

Performance with the UCI Dance Ensemble.

Repeatability: May be taken for credit 6 times.

Restriction: Sophomores only. Upper-division students only.

**DANCE 176. UCI Jazz Dance Ensemble. 2-4 Units.**

Rehearsal and performance in theatrical jazz dance, designed to provide an experience in assimilating various styles of jazz dance and in refining dance performance techniques. Students will master aspects of dance company promotion.

Prerequisite: DANCE 152A and DANCE 152B and DANCE 152C

Repeatability: May be taken for credit 6 times.

Restriction: Sophomores only. Upper-division students only.

**DANCE 178. Performance Laboratory. 2 Units.**

Rehearsal and performance of graduate student-choreographed dance works for the M.F.A. thesis.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**DANCE 179. UCI Etude Ensemble. 4 Units.**

Repertory and performances by undergraduate Dance majors. Concert presentations on and off campus. Faculty directed, student/faculty choreographed.

Prerequisite: Audition required.

Repeatability: May be taken for credit 9 times.

Restriction: Sophomores only. Upper-division students only.

**DANCE 180C. Laban Studies. 4 Units.**

Laban movement analysis.

Prerequisite: DANCE 21A

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 185W. Critical Issues in Dance. 4 Units.**

Critical thinking and writing about dance, with a section on dance criticism and a major emphasis on persuasive writing about significant issues in the dance world.

Prerequisite: DANCE 90A and DANCE 90B and DANCE 90C. Satisfactory completion of the lower-division writing requirement.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**(Ib)****DANCE 193. Selected Topics in Dance. 1-4 Units.**

Directed group studies of topics in dance.

Repeatability: May be taken for credit 3 times as topics vary.

**DANCE 194. Topics Vary. 4 Units.**

Seminar in Dance Studies. Variable topics related to gender, race, politics, and dance writing, and criticism, with attention to linking dance practices to the wider world.

Prerequisite: DANCE 90A and DANCE 90B and DANCE 90C

Repeatability: Unlimited as topics vary.

**DANCE 195. Arts Management. 4 Units.**

Designed for students interested in the developmental and management of nonprofit arts organizations. Examines the organizational structure and areas of operation such as marketing, fundraising, budgeting, production, and administration.

Repeatability: May be taken for credit 2 times.

**DANCE 197. Independent Study. 1-4 Units.**

Individual independent projects in experimental laboratory, library, field, performance, under instructor's direction. Students can receive conceptual, creative, and theoretical instruction in the successful completion of a written report or performance.

Repeatability: May be repeated for credit unlimited times.

**DANCE 199. Senior Thesis. 4 Units.**

Directed research or creative activity for senior Dance majors. Research consists of a substantial essay on dance history, research in dance science, or the creation of original or reconstructed choreography.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 201. Seminar in Kinesiology for Dance. 4 Units.**

Introduction to the anatomical, biomechanical, and physiological principles of dance movement.

Prerequisite: DANCE 100

**DANCE 222. Musical Resources. 4 Units.**

Detailed study of music as it relates to dance. Historical overview of musical form, style, and other elements. Analysis of various affinities between music and dance. Practical applications.

**DANCE 225. Seminar in the Teaching of Dance Techniques. 4 Units.**

Principles and theories of teaching dance techniques. Supervised presentation and teaching of technique class.

**DANCE 231A. Graduate Studio: Ballet. 2 Units.**

Advanced ballet, pointe work, and performance style: principles of the classical ballet with an emphasis on technique.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

**DANCE 231B. Graduate Studio: Ballet. 2 Units.**

Advanced ballet, pointe work, and performance style: principles of the classical ballet with an emphasis on technique.

Prerequisite: DANCE 231A

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

**DANCE 231C. Graduate Studio: Ballet. 2 Units.**

Advanced ballet, pointe work, and performance style: principles of the classical ballet with an emphasis on technique.

Prerequisite: DANCE 231B

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

**DANCE 241A. Graduate Studio: Modern. 2 Units.**

Advanced modern dance: synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

**DANCE 241B. Graduate Studio: Modern. 2 Units.**

Advanced modern dance: synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Prerequisite: DANCE 241A

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

**DANCE 241C. Graduate Studio: Modern. 2 Units.**

Advanced modern dance: synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Prerequisite: DANCE 241B

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

**DANCE 251A. Graduate Studio: Jazz. 2 Units.**

Principles of jazz dance and contemporary forms, incorporating the personal views of the instructor.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

**DANCE 251B. Graduate Studio: Jazz. 2 Units.**

Principles of jazz dance and contemporary forms, incorporating the personal views of the instructor.

Prerequisite: DANCE 251A

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

**DANCE 251C. Graduate Studio: Jazz. 2 Units.**

Principles of jazz dance and contemporary forms, incorporating the personal views of the instructor.

Prerequisite: DANCE 251B

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

**DANCE 252A. Graduate Studio: Tap. 2 Units.**

An overview of tap concentrating on the development of various technique forms using basic and intermediate principles.

Repeatability: May be taken for credit 4 times.

**DANCE 252B. Graduate Studio: Tap. 2 Units.**

An overview of tap concentrating on the development of various technique forms using basic and intermediate principles.

Prerequisite: DANCE 252A

Repeatability: May be taken for credit 4 times.

**DANCE 252C. Graduate Studio: Tap. 2 Units.**

An overview of tap concentrating on the development of various technique forms using basic and intermediate principles.

Prerequisite: DANCE 252B

Repeatability: May be taken for credit 4 times.

**DANCE 261A. Graduate Studio in Choreography. 4 Units.**

Graduate work in dance composition emphasizing the individual aesthetic. Assignments in movement discovery, solo and group forms, with the main emphasis on independent work.

Repeatability: May be repeated for credit unlimited times.

**DANCE 261B. Graduate Studio in Choreography. 4 Units.**

Graduate work in dance composition emphasizing the individual aesthetic. Assignments in movement discovery, solo and group forms, with the main emphasis on independent work.

Prerequisite: DANCE 261A

Repeatability: May be repeated for credit unlimited times.

**DANCE 264. Screendance. 4 Units.**

Overview of dance for film and choreography for the camera. Aesthetics of creating dance for the screen. Approaches for delivery of dance films to an audience, including projection, DVD, Web, and mobile devices. A final dance film project is required.

Prerequisite: DANCE 281

**DANCE 281. Dance and Video Technology. 4 Units.**

Introduction to video and audio documentation of dance performance. Integrating dance performance within the film aesthetic. Techniques and technologies of video cameras, formats, editing, and projection. Overview of video compression and DVD authoring.

**DANCE 282. Seminar in Movement Analysis. 4 Units.**

Theories of movement analysis and nonverbal communication applied to dance.

**DANCE 283. Critical Issues in Dance. 4 Units.**

Reading, writing, discussing, and presenting key issues that relate to dance studies. Basics of dance analysis and criticism. Special emphasis on effective ways of defining, clarifying, and arguing for points of view.

Prerequisite: DANCE 284

**DANCE 284. Bibliography and Research. 4 Units.**

Understanding the field of dance studies, available resources, research methods, and academic formats in preparation for thesis writing.

**DANCE 285. Graduate Projects. 4 Units.**

Projects may be educational, choreographic, scientific, historical, or philosophical in scope and must have faculty advisor approval.

Repeatability: May be taken for credit 6 times.

**DANCE 286. Thesis. 4 Units.**

Substantial research in a topic approved by the student's graduate committee. Results of the research must be written in approved thesis style.

Repeatability: May be taken for credit 6 times.

**DANCE 287. Graduate Lectures in Dance. 1-4 Units.**

A series of lectures and discussions of announced topics in dance. Content may be from history, ethnology, notation, medicine, music, or other areas in the field.

Repeatability: Unlimited as topics vary.

**DANCE 296. Proseminar in Dance History. 4 Units.**

Discussion seminar with emphasis on reading and thinking about problems in dance history; presentation of oral and written reports.

Repeatability: May be taken for credit 2 times as topics vary.

**DANCE 297. Directed Reading. 1-4 Units.**

Topic to be approved by instructor. Paper required.

Repeatability: May be repeated for credit unlimited times.

**DANCE 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Dance Majors only.

## Drama Courses

**DRAMA 10. Introduction to Theatre. 4 Units.**

An interactive introduction to the world of theatre that serves to develop an appreciation of theatrical arts, to establish an awareness of landmarks within the performance history, and to create an understanding of the collaborative roles and departments that exist.

(IV)

**DRAMA 11. The Rock and Roll Spectacle Show. 4 Units.**

A thorough overview to the development and cultural significance of the Rock 'n' Roll Spectacle show. Focus on historical and recent developments of the spectacle show, trends in the aesthetics of the field, and various sub-genres.

(IV)

**DRAMA 14. Performing Rock 'N' Roll. 4 Units.**

Explores major movements in the history of rock 'n' roll in terms of performance, not virtuosity necessarily of the performers as musicians, rather as performances of aesthetics in modes of embodied ideology, iconoclastic spectacle, mixed media fashion, and subcultural formation.

**DRAMA 15. Performance Now. 4 Units.**

Exposes students to what is most current in the world of performance and theatre. Begins with a series of lectures on the idea of performance, and the various theories that frame it.

Restriction: Music Theatre Majors have first consideration for enrollment. Drama Majors have first consideration for enrollment.

(IV)

**DRAMA 16. Performing Culture. 4 Units.**

Culture, aesthetics, and ideology (combined in the concept 'subculture') work to fashion social identities. Using theories and methodologies of performance studies, with an emphasis on American culture, this course explores why and how culture is reinforced through performance.

(IV)

**DRAMA 20A. Culture in Performance. 4 Units.**

A three-quarter foundation series exploring the rich depth of theatre, drama, and other genres of performance across a wide variety of worldwide forms, for performer and audience.

(IV)

**DRAMA 20B. Culture in Performance. 4 Units.**

A three-quarter foundation series exploring the rich depth of theatre, drama, and other genres of performance across a wide variety of worldwide forms, for performer and audience.

(IV)

**DRAMA 20C. Culture in Performance. 4 Units.**

A three-quarter foundation series exploring the rich depth of theatre, drama, and other genres of performance across a wide variety of worldwide forms, for performer and audience.

(IV)

**DRAMA 30A. Acting. 4 Units.**

Focuses on Stanislavski-based terminology and technique through theatre exercises and improvisation. The first part of a one-year series in basic acting technique and discipline.

Repeatability: May be taken for credit 2 times.

Restriction: Music Theatre Majors have first consideration for enrollment. Drama Majors have first consideration for enrollment.

**DRAMA 30B. Acting. 4 Units.**

Focuses on scene work and character development. The second part of a one-year series in basic acting technique and discipline.

Prerequisite: DRAMA 30A

Repeatability: May be taken for credit 2 times.

Restriction: Music Theatre Majors have first consideration for enrollment. Drama Majors have first consideration for enrollment.

**DRAMA 30C. Acting. 4 Units.**

Focuses on monologues, auditions, callbacks, and the profession of acting. The third part of a one-year series in basic acting technique and discipline.

Prerequisite: DRAMA 30A and DRAMA 30B

Repeatability: May be taken for credit 2 times.

Restriction: Music Theatre Majors have first consideration for enrollment. Drama Majors have first consideration for enrollment.

**DRAMA 34. Movement for Actors. 4 Units.**

A studio course in fundamentals of stretch, strength, and alignment; exploring spatial awareness and physical control through mime isolations, techniques, and related improvisation.

Repeatability: May be taken for credit 3 times.

**DRAMA 35. Speech for the Theatre. 4 Units.**

An introductory course in voice and speech for actors, combining the body-based approach to voice developed by Fitzmaurice, and speech work of Knight and Thompson. Designed for the needs of actors and is not a public speaking course.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 40A. Development of Drama. 4 Units.**

The development of Western Drama, concentrating on the drama's intellectual, social, and artistic foundations. About 10 plays and supplementary critical material are read each quarter. Greek Drama through Shakespeare.

Prerequisite or corequisite: DRAMA 10

Restriction: Music Theatre Majors have first consideration for enrollment. Drama Majors have first consideration for enrollment.

(IV and VIII ).

**DRAMA 40B. Development of Drama. 4 Units.**

The development of Western Drama, concentrating on the drama's intellectual, social, and artistic foundations. About 10 plays and supplementary critical material are read each quarter. Restoration Drama through Ibsen.

Prerequisite or corequisite: DRAMA 10

Restriction: Music Theatre Majors have first consideration for enrollment. Drama Majors have first consideration for enrollment.

(IV and VIII ).

**DRAMA 40C. Development of Drama. 4 Units.**

The development of Western Drama, concentrating on the drama's intellectual, social, and artistic foundations. About 10 plays and supplementary material are read each quarter. Contemporary Drama. Post Naturalistic theatre.

Prerequisite or corequisite: DRAMA 10

Restriction: Music Theatre Majors have first consideration for enrollment. Drama Majors have first consideration for enrollment.

(IV and VIII ).

**DRAMA 50A. Introduction to Costume Design. 4 Units.**

Introduction to the process and procedures employed by the costume designer for the theatre. The elements of design are discussed in the context of character development, historical period, and style. Exercises extend to drawing, rendering, and investigation of human proportions.

Prerequisite or corequisite: DRAMA 10

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 50B. Introduction to Scenic Design. 4 Units.**

Introduction to the principles and practice of scenic design. Weekly problems include research into various periods and styles of production with an emphasis on the conceptual idea. Perspective drawing, rendering, and model building are covered in studio exercises and assignments.

Prerequisite or corequisite: DRAMA 10

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 50C. Introduction to Lighting Design. 4 Units.**

Introduction to the principles, theories, and equipment employed by the lighting designer for the stage. Areas of investigation include history, technology, and script analysis. Detailed studio attention is given to the theory and practice of design.

Prerequisite or corequisite: DRAMA 10

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 50D. Introduction to Sound Design. 4 Units.**

Principles, theories, equipment use, and terminology employed by the sound designer for the stage. Areas of study include history, technology, and script analysis. Focuses on the theory and practice of design.

Prerequisite or corequisite: DRAMA 10

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 50E. Introduction to Stage Management. 4 Units.**

A basic study of theatrical, dance, and opera stage management practices, forms, and methods, from first script reading to closing night. Opportunity to observe professionals at work in regional and touring situations as available.

Prerequisite or corequisite: DRAMA 10

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 60. Topics in Advanced Stage Management. 4 Units.**

Nurtures a greater appreciation for the stage manager and his or her process, and supports students who are interested in pursuing a career in professional stage management.

Repeatability: May be taken for credit 3 times as topics vary.

**DRAMA 65. Music Theatre Workshop I. 2 Units.**

Basic vocal technique and characterization of musical theatre repertoire explored.

Prerequisite: Audition required.

Repeatability: May be taken for credit 2 times.

**DRAMA 80. Directing I . 4 Units.**

Introduction to comprehensive directing process from pre-production to opening. Focus on fundamental skills: analysis, staging, action, actor coaching, and elements of design. Skills applied to scripted theatrical material. Develop a language for commenting on theatrical production. Attending and critiquing productions.

Prerequisite: DRAMA 30A and DRAMA 30B

**DRAMA 100. University Theatre . 4 Units.**

Rehearsal and performance in a faculty-directed.

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

**DRAMA 101A. Theatre Production: Costume. 1-6 Units.**

The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

**DRAMA 101B. Theatre Production: Scenic. 1-6 Units.**

The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

**DRAMA 101C. Theatre Production: Lighting. 1-6 Units.**

The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

**DRAMA 101D. Theatre Production: Stage Management. 1-8 Units.**

The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit 24 times.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

**DRAMA 101E. Theatre Production: Audio. 1-6 Units.**

The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

**DRAMA 101S. Theatre Production: Theatre Management. 1-6 Units.**

The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

**DRAMA 103. Lectures in Dramatic Literature. 4 Units.**

Courses include Medieval and Tudor Drama, Elizabethan and Jacobean Drama, Shakespeare, Restoration and Eighteenth Century Drama, Modern British Drama, Modern American Drama, Tragedy, and Comedy.

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 103W. Lectures in Dramatic Literature. 4 Units.**

Courses include Medieval and Tudor Drama, Elizabethan and Jacobean Drama, Shakespeare, Restoration and Eighteenth-Century Drama, Modern British Drama, Modern American Drama, Tragedy, and Comedy.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 109. Special Topics in Theory and Criticism. 4 Units.**

Discussion of recent major trends and ideas in critical theory, concentrating on in-depth readings and lectures in particular facets of theory and criticism: Derrida, Butler, Lacan, Deleuze, and others.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 109W. Special Topics in Theory and Criticism. 4 Units.**

Discussion of recent major trends and ideas in critical theory, concentrating on in-depth readings and lectures in particular facets of theory and criticism: Derrida, Butler, Lacan, Deleuze, and others.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**(Ib)**

**DRAMA 110. Special Topics in Classical Dramas . 4 Units.**

Designed to introduce students to various classical traditions-early Greek and Roman theatres, to be sure, but also, by way of comparison, the classical traditions of non-European cultures.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C. Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 110W. Special Topics in Classical Dramas. 4 Units.**

Designed to introduce students to various classical traditions-early Greek and Roman theatres, to be sure, but also, by way of comparison, the classical traditions of non-European cultures.

Prerequisite: DRAMA 40A or DRAMA 40B or DRAMA 40C. Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**(Ib)****DRAMA 112. Special Topics in Early Modern and Neoclassical Theatre. 4 Units.**

Investigates aspects of European theatre and culture in the sixteenth, seventeenth, and eighteenth centuries; individual courses may focus on specific topics within this broad expanse.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 112W. Special Topics in Early Modern and Neoclassical Theatre. 4 Units.**

Investigates aspects of European theatre and culture in the sixteenth, seventeenth, and eighteenth centuries; individual courses may focus on specific topics within this broad expanse.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**(Ib)****DRAMA 116. Special Topics in Nineteenth-Century Dramas. 4 Units.**

Looks at the various trends and conventions of theatres in the nineteenth century, both Euro-American and beyond, paying special attention to the culture and political milieu within which these various traditions appeared.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C. Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 116W. Special Topics in Nineteenth-Century Dramas. 4 Units.**

Looks at the various trends and conventions of theatres in the nineteenth century, both Euro-American and beyond, paying special attention to the culture and political milieu within which these various traditions appeared.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**(Ib)**

**DRAMA 118. Special Topics in Modern and Contemporary Drama. 4 Units.**

An investigation into the many forms and permutations of modern (1880-1945), and contemporary (since 1945) drama, paying special attention to the historical and philosophical interpretations of text and performance.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 118W. Special Topics in Modern and Contemporary Drama . 4 Units.**

An investigation into the many forms and permutations of modern (1880-1945), and contemporary (since 1945) drama, paying special attention to the historical and philosophical interpretations of text and performance.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C. Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**(Ib)****DRAMA 121. Introduction to Asian Theatre. 4 Units.**

An introduction to some of the major traditional theatrical forms and dramatic texts from India, China, and Japan. Other than dramatic texts (in English translation), attention is also paid to theory, history, and performance styles of traditional Asian theatre.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 122. Asian American Theatre. 4 Units.**

An introduction to the history and development of Asian American theatre and drama. Besides play analysis, special attention is also paid to the history and politics of Asian American identity and experience, as well as to aspects of theatrical performance.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 123. Multicultural Theatres. 4 Units.**

A study of the history, culture, aesthetics, and literature of various traditional performing arts and their connections to the contemporary multicultural society.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 126. African American Film and Drama. 4 Units.**

A critical investigation of films and plays written by African Americans, with emphasis on dramaturgical and cinematic strategies, individual and collective representation, and the legacy of African American political struggle.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 126W. African American Film and Drama. 4 Units.**

A critical investigation of films and plays written by African Americans, with emphasis on dramaturgical and cinematic strategies, individual and collective representation, and the legacy of African American political struggle.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Restriction: Music Theatre Majors only. Drama Majors only.

**(Ib)**

**DRAMA 129. Advanced Topics in Performance. 4 Units.**

Addresses particular issues in theatre and performance that typically lie outside of regular course offerings. May address such issues as the theatre of the Avant Garde, performing gender, transversality and performance, body art, installation and performance art, among other topics.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 129W. Advanced Topics in Performance. 4 Units.**

Addresses particular issues in theatre and performance that typically lie outside of regular course offerings. May address such issues as the theatre of the Avant Garde, performing gender, transversality and performance, body art, installation and performance art, among other topics.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**(Ib)****DRAMA 130. Intermediate Acting. 4 Units.**

Rehearsal and presentation of scenes from contemporary material. Focus on connection with scene partner, playing actions, and text analysis. Introduction to the credibility and theatricality of characterization and style.

Prerequisite: DRAMA 30A and DRAMA 30B and DRAMA 30C with an average grade of B or better. For transfer students: one year of beginning acting with an average grade of B or better.

Repeatability: May be taken for credit 2 times.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 132A. Writing for Performance. 4 Units.**

Completion of a full-length play or its equivalent; discussion of student writing and of relevant literary texts.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 134. Studio for Advanced Movement for Actors. 4 Units.**

Studio course in conditioning and partnering techniques to the practice of contact improvisation. Contact improvisation is explored and applied in scene study.

Prerequisite: DRAMA 34. DRAMA 34 with a grade of B or better

Repeatability: May be taken for credit 3 times.

**DRAMA 135. Master Classes in Acting. 1-4 Units.**

Advanced acting in specialized areas including acting for the camera: situation comedy, commercials; auditioning and industry preparation; Shakespeare; Molière; Chekov; improvisation; advanced movement and voice and speech for the actor; self-starting; stage combat; repertory acting, singing; comedy; clowning; and masks.

Prerequisite: DRAMA 130. DRAMA 130 with a grade of B or better

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 136. Music Theatre Acting. 4 Units.**

An acting class exclusive to the students in the B.F.A. in Music Theatre program.

Prerequisite: DRAMA 30A and DRAMA 30B and DRAMA 30C

Repeatability: May be taken for credit 4 times.

Restriction: Music Theatre Majors only.

**DRAMA 142. Music Theatre Workshop II. 4 Units.**

A workshop in audition technique and song interpretation.

Prerequisite: Audition required.

Repeatability: May be taken for credit 4 times.

**DRAMA 143A. Music Theatre Workshop III. 4 Units.**

Scene study and song repertoire examined by era for the advanced Music Theatre student. 1800s-1940.

Prerequisite: DRAMA 142. Audition required.

**DRAMA 143B. Music Theatre Workshop III. 4 Units.**

Scene study and song repertoire examined by era for the advanced Music Theatre student. 1940s-1970s.

Prerequisite: DRAMA 142. Audition required.

**DRAMA 143C. Music Theatre Workshop III. 4 Units.**

Scene study and song repertoire examined by era for the advanced Music Theatre student. 1970's-present.

Prerequisite: DRAMA 142. Audition required.

**DRAMA 144. Music Theatre Workshop IV. 4 Units.**

A performance class concentrating on role building. Work culminates with in-class performances of abbreviated versions of musicals.

Prerequisite: For B.F.A. students: DRAMA 143A, DRAMA 143B, DRAMA 143C, and audition. For Drama graduate students: audition required.

Repeatability: May be taken for credit 4 times.

Restriction: Graduate students only. Music Theatre Majors only. Drama Majors only.

**DRAMA 145. Music Theatre Singing. 1 Unit.**

Private weekly voice lessons for the advanced Music Theatre student.

Corequisite: DRAMA 143A

Repeatability: May be taken for credit 9 times.

Restriction: Music Theatre Majors only.

**DRAMA 146. NYSP-Preparation. 4 Units.**

Class preparation for the New York Satellite Program (NYSP) - an immersion experience in New York City for the musical theatre performer.

Prerequisite: Admission is by audition and the following prerequisites: DRAMA 30C and two quarters of DRAMA 148A, DRAMA 148B, or DRAMA 148C (if the 148 prerequisite is not complete at the time of auditions, student must enroll during the fall and winter quarters in the same year as the trip to New York); senior Drama majors must have successfully completed DRAMA 40C and DRAMA 120C; non-Drama majors must have sophomore standing or higher and must carefully plan their course schedule as many spring quarter classes cannot be taken while part of the NYSP.

Repeatability: May be taken for credit 2 times.

**DRAMA 148A. History of American Musical Theatre. 4 Units.**

A survey of the influential artists who produce, write, direct, and perform on America's musical stages. Surveys 1700s-1940s.

Restriction: Drama Majors only. Music Theatre Majors only.

Concurrent with DRAMA 248A.

**DRAMA 148B. History of American Musical Theatre. 4 Units.**

A survey of the influential artists who produce, write, direct, and perform on America's musical stages. Surveys 1940s-1970s.

Restriction: Drama Majors only. Music Theatre Majors only.

Concurrent with DRAMA 248B.

**DRAMA 148C. History of American Musical Theatre. 4 Units.**

A survey of the influential artists who produce, write, direct, and perform on America's musical stages. Surveys 1970s to present day.

Restriction: Drama Majors only. Music Theatre Majors only.

Concurrent with DRAMA 248C.

**DRAMA 149. Music Proficiency for Actors. 2 Units.**

A musicianship class introducing basic musical terminology, theory, and sight singing skills.

Repeatability: May be taken for credit 2 times.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 150. Costume Production Techniques. 4 Units.**

Studio instruction in pattern making, draping, millinery, and construction techniques.

Prerequisite: DRAMA 50A

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 157. Lighting Composition. 4 Units.**

Provides an opportunity for students to pursue stage lighting composition in a studio atmosphere. Laboratory practice includes weekly exercises in style and genre. Emphasis is placed on the realization of conceptual ideas.

Prerequisite: DRAMA 50C

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 158. Topics in Theatre Design. 4 Units.**

Examines the various functions of scenery and costume: locale, historical period, mood, and atmosphere, with special assignments in each area. Discussion of problems in scenic metaphors and visualization, emphasizing techniques of planning and presentation (e.g., floor plans, models, and rendering).

Prerequisite: DRAMA 50A or DRAMA 50B

Repeatability: May be repeated for credit unlimited times.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 159. Proseminar in Theatre Design. 4 Units.**

Topics in theatre design.

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 164A. History of Costume. 4 Units.**

A study of the development of dress and the influence of cultural factors on clothing from the time of Egyptians to Early Baroque.

Prerequisite: DRAMA 50A

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 164B. History of Costume. 4 Units.**

A study of the development of dress and the influence of cultural factors on clothing from late Baroque to World War I.

Prerequisite: DRAMA 50A

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 176. Script and Score. 4 Units.**

A form and analysis seminar discussing the libretto and score of landmark musicals.

Prerequisite: Two courses from DRAMA 148A or DRAMA 148B or DRAMA 148C.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 177. Song Repertoire. 2 Units.**

A song coaching class culminating in a song recital or showcase. Each quarter will feature a different composer, lyricist, or musical style.

Repeatability: May be taken for credit 6 times.

Restriction: Music Theatre Majors only.

**DRAMA 180. Contemporary Dramatic Criticism and Theory. 4 Units.**

Reading and analysis of theories and critical approaches to contemporary theatre: Brecht, Artaud, and others who have contributed to the form and idea of the modern theatre. Writing of assigned exercises in dramatic criticism.

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 180W. Contemporary Dramatic Criticism and Theory. 4 Units.**

Reading and analysis of theories and critical approaches to contemporary theatre: Brecht, Artaud, and others who have contributed to the form and idea of the modern theatre. Writing of assigned exercises in dramatic criticism.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only. Music Theatre Majors only.

**(Ib)****DRAMA 182A. Dance Technique, Level I. 4 Units.**

Advanced beginner and intermediate dance training including musical theatre, ballet, jazz and contemporary modern techniques and repertoire. Body conditioning is also a major component of the course.

Prerequisite: DRAMA 65 or DRAMA 142. Audition required.

Repeatability: May be taken for credit 4 times.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 182B. Dance Technique, Level I. 4 Units.**

Advanced beginner and intermediate dance training including musical theatre, ballet, jazz and contemporary modern techniques and repertoire. Body conditioning is also a major component of the course.

Prerequisite: (DRAMA 65 or DRAMA 142) and DRAMA 182A. Audition required.

Repeatability: May be taken for credit 4 times.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 183A. Dance Technique, Level II. 4 Units.**

Intermediate and advanced dance training including musical theatre, ballet, jazz and contemporary modern techniques and repertoire. Body conditioning is also a major component of the course.

Prerequisite: DRAMA 65 or DRAMA 142. Audition required.

Repeatability: May be taken for credit 4 times.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 183B. Dance Technique, Level II. 4 Units.**

Intermediate and advanced dance training including musical theatre, ballet, jazz and contemporary modern techniques and repertoire. Body conditioning is also a major component of the course.

Prerequisite: (DRAMA 65 or DRAMA 142) and DRAMA 183A. Audition required.

Repeatability: May be taken for credit 4 times.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 184. Directing II. 4 Units.**

The principles of stage directing, covering the director's functions in the areas of interpretation, composition, coaching, and styling a theatrical production. Directing exercises and projects; the final project is the preparation of a hypothetical proposal for a play production.

Prerequisite: DRAMA 30A and DRAMA 30B and DRAMA 40A and DRAMA 40B and DRAMA 40C and DRAMA 80

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 185. Advanced Directing. 4 Units.**

A seminar in directorial organization and research. Student prepares a textual and dramaturgical analysis, a production timetable, and a hypothetical production book of an assigned play.

Prerequisite: DRAMA 184

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 190. NYSP-Acting. 1-4 Units.**

New York Satellite Program acting classes taught by guest faculty in New York.

Prerequisite: DRAMA 146

Repeatability: May be taken for credit 2 times.

**DRAMA 191. NYSP - Dance. 4 Units.**

New York Satellite Program dance classes in ballet, tap, jazz, and musical theatre styles taught by guest faculty in New York.

Prerequisite: DRAMA 146

Repeatability: May be taken for credit 2 times.

**DRAMA 192. NYSP - Singing. 4 Units.**

New York Satellite Program private and group lessons in musical theatre singing taught by guest faculty in New York.

Prerequisite: DRAMA 146

Repeatability: May be taken for credit 2 times.

**DRAMA 193. NYSP - Performance. 4 Units.**

New York Satellite Program rehearsals and public, staged readings of original musicals in New York.

Prerequisite: DRAMA 146

Repeatability: May be taken for credit 2 times.

**DRAMA 194. NYSP-UCI Residency. 4 Units.**

New York Satellite Program follow-up classes and performances back on Irvine campus upon the return from New York.

Prerequisite: DRAMA 146

Repeatability: May be taken for credit 2 times.

**DRAMA 195. Music Theatre Dance - Special Topics. 1-4 Units.**

Advanced dance classes in specialized areas including the dance styles of a choreographer (de Mille, Fosse, Robbins, Tune, Stroman), genre (tap, ballroom, jazz, swing, hip-hop), or in musical theatre choreography.

Prerequisite: DRAMA 182A or DRAMA 182B or DRAMA 183A or DRAMA 183B. Audition required.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 198. Director Class Project. 1-8 Units.**

For students who are involved in the Director Class Projects at UCI as actors, directors, designers, stage managers and their assistants. M.F.A. Directors and the Head of Directing (HoD) supervise the projects.

Grading Option: Pass/no pass only.

Repeatability: Unlimited as topics vary.

**DRAMA H198. Honors Director Class Project. 1-4 Units.**

For graduate student actors and undergraduate directors who are candidates for Honors in Directing and involved in the Director Class Projects. The Head of Directing (HoD) supervises these students.

Repeatability: Unlimited as topics vary.

**DRAMA 199. Project in Theatre . 1-4 Units.**

Independent theatre projects with Drama faculty.

Repeatability: Unlimited as topics vary.

**DRAMA 200. Graduate Studio: Acting. 4 Units.**

Work in graduate studio taken in tandem with graduate studios in stage voice (DRAMA 201), stage speech (DRAMA 202), and stage movement (DRAMA 203).

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 201. Graduate Studio: Voice. 1 Unit.**

Graduate studio in vocal production for actors.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 202. Graduate Studio: Speech. 1 Unit.**

Graduate studio in speech for actors.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 203. Graduate Studio: Movement. 2 Units.**

Work in graduate studio: stage movement taken in tandem with nine graduate studios in acting (DRAMA 200), voice (DRAMA 201), speech (DRAMA 202), and voice/movement dynamics (DRAMA 206).

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 206. Graduate Studio: Voice/Movement Dynamics. 2 Units.**

Daily conditioning exercises.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 211. Graduate Studio: Directing. 4 Units.**

Graduate studio in directing.

Repeatability: Unlimited as topics vary.

Restriction: Drama graduate students only.

**DRAMA 219. Graduate Master Class. 1-4 Units.**

Various topics such as Shakespeare, comedy, Molière, improvisation, Kabuki, television acting.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 220. Seminar in Dramatic Literature. 4 Units.**

Topics in Dramatic Literature.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 225. Seminar on Theatre Pedagogy. 4 Units.**

A seminar on the major teaching systems in the dramatic arts with particular attention to professional arts training. Required prior to applying for Teaching Assistantships in studio areas.

Restriction: Drama graduate students only.

**DRAMA 240. Graduate Projects . 1-4 Units.**

Various projects depending on student's concentration (acting, design, musical theatre, directing).

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Drama and Theatre Majors only. Drama Majors only.

**DRAMA 241. Singing Pedagogy . 2 Units.**

Learning how to teach voice lessons and coach musical theatre singing. Experiences include both private voice lessons and observing the lessons given to the B.F.A./Music Theatre students.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate Music Direction students only.

**DRAMA 242. Conducting . 2 Units.**

Private conducting instruction to develop freedom of movement/expression, baton technique, ear training, and tempo memory for both rehearsal and performance situations in musical theatre.

Repeatability: May be taken for credit 9 times.

Restriction: Graduate Music Directors only.

**DRAMA 243. Script and Score . 4 Units.**

A form and analysis seminar discussing the libretto and score of landmark musicals.

Restriction: Graduate students only. Music Majors only.

Concurrent with DRAMA 176.

**DRAMA 244. Dramaturgy: Theory and Methods. 4 Units.**

Examines the practice, place, and theory of dramaturgy. Explores plays in terms of how they work: dramatic form and structure, historical context, and more. Study includes dramaturgy as a theatrical practice.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 246A. Musical Scene Study I. 4 Units.**

Musically directing scenes from musicals of various time periods. Features works from the late 19th and early 20th centuries, including songwriters Gilbert and Sullivan, Irving Berlin, George Gershwin, Rodgers and Hart, and Cole Porter.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate Music Director students only.

**DRAMA 246B. Musical Scene Study II. 4 Units.**

Musically directing scenes from musicals of various time periods. Features works from the middle of the 20th century including songwriters Rodgers and Hammerstein, Lerner and Loewe, Julie Styne, Kander and Ebb, and Jerry Herman.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate Music Directors only.

**DRAMA 246C. Musical Scene Study III. 4 Units.**

Musically directing scenes from musicals of various time periods. Features works from the late 20th and early 21st centuries including songwriters Stephen Sondheim, Andrew Lloyd Webber, Stephen Schwartz, Flaherty and Ahrens, and Jeanine Tesori.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate Music Directors only.

**DRAMA 247. Musicals Abridged . 4 Units.**

Musically directing abridged versions of musicals from various time periods and genres.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate Music Directors only.

**DRAMA 248A. History of American Music Theatre. 4 Units.**

A survey of the influential artists who produce, write, direct, and perform on America's musical stages. Surveys 1700s-1940s.

Restriction: Graduate students only.

Concurrent with DRAMA 148A.

**DRAMA 248B. History of American Musical Theatre. 4 Units.**

A survey of the influential artists who produce, write, direct and perform on America's musical stages. Surveys 1940s-1970s.

Restriction: Graduate students only.

Concurrent with DRAMA 148B.

**DRAMA 248C. History of American Musical Theatre. 4 Units.**

A survey of the influential artists who produce, write, direct and perform on America's musical stages. Surveys 1970s to present day.

Concurrent with DRAMA 148C.

**DRAMA 249. Graduate Music Direction. 4 Units.**

Various musical direction activities including the vocal direction, accompanying, and conducting of musical theatre performances.

Repeatability: May be taken for credit 9 times.

Restriction: Graduate students only. Music Majors only.

**DRAMA 251A. Foundations of Theatre. 4 Units.**

Seeks to create greater understanding in the roots and theories of theatrical models, aesthetics, action vs. reaction of differing thoughts in theatrical doctrine, and art, architecture, music, and fashion that contributed to the style and practice of theatre.

Restriction: Drama graduate students only.

**DRAMA 251B. Foundations of Theatre. 4 Units.**

Seeks to create greater understanding in the roots and theories of theatrical models, aesthetics, action vs. reaction of differing thoughts in theatrical doctrine, and art, architecture, music, and fashion that contributed to the style and practice of theatre.

Restriction: Drama graduate students only.

**DRAMA 251C. Foundations of Theatre. 4 Units.**

Seeks to create greater understanding in the roots and theories of theatrical models, aesthetics, action vs. reaction of differing thoughts in theatrical doctrine, and art, architecture, music, and fashion that contributed to the style and practice of theatre.

Restriction: Drama graduate students only.

**DRAMA 254. Graduate Stage Management. 4 Units.**

Studio exercises and projects in stage management.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama Majors only.

**DRAMA 255. Graduate Design Seminar. 4 Units.**

Projects, lectures, and critical discussion in costume, scenery, lighting, and sound design.

Restriction: Drama Majors only.

**DRAMA 256. Survival and Professional Practice in Design. 4 Units.**

Provides an in-depth examination of business skills needed to survive as a theatrical designer. Required 'Bridge' course in the Design MFA programs, relevant to all disciplines.

Restriction: Drama graduate students only.

**DRAMA 257A. Costume Thesis Project. 4 Units.**

Development of thesis project with focus on organization, research, timeline, and execution.

Prerequisite: DRAMA 240

Restriction: Drama graduate students only.

**DRAMA 257B. Scenic Thesis Project. 4 Units.**

Development of thesis project with focus on organization, research, timeline, and execution.

**DRAMA 257E. Thesis Writing Project-Stage Management. 4 Units.**

Development of thesis topic with focus on organization, research, timeline, and execution.

Prerequisite: 12 units of DRAMA 254.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Drama graduate students only.

**DRAMA 258. Drawing for Designers. 2 Units.**

A multi-skill level course in drawing technique focusing on skills essential to stage designers including line, proportion, perspective and creating dynamic compositions. Focus will primarily be in figure drawing but may include still-life, landscape, and architectural drawings. Materials fee.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 9 times.

**DRAMA 259. Theatre Colloquium. 1 Unit.**

Exposes students to a wider range of theatrical practitioners, theories, and topics through guest lecturers, special projects, and cross-disciplinary dialogue.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 260A. Digital Costume Rendering. 4 Units.**

A studio course in costume rendering for the theatre using computer image manipulation. Instruction in compositing and painting techniques and performance design conventions.

**DRAMA 260B. Digital Textile Design and Printing. 4 Units.**

A studio course in textile design using digital printing and embossing techniques. Instruction in state-of-the-art software and output manipulation for artistic expression.

**DRAMA 261. Digital Design: Drawing/Painting/Rendering. 4 Units.**

A studio course in scenic or costume rendering for the theatre using the computer for drawing/painting through the use of the digital pen/tablet.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 262. Digital Design: 2D/3D Modeling. 4 Units.**

A studio course in CAD's 2D drafting and 3D modeling capabilities for theatrical design. Instruction in state-of-the-art software for 2D and 3D object creation and theatrical presentation conventions.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 263. Digital Design: 3D Rendering. 4 Units.**

A studio course in theatrical design through 3d modeling on computer and use of state-of-the-art rendering software. Instruction emphasizes collaborative design process through the use of scenic designer/lighting designer teams for all projects.

Prerequisite: DRAMA 262

Restriction: Graduate students only. Drama and Theatre Majors only. Drama Majors only.

**DRAMA 264. Lighting Graphics. 4 Units.**

A studio course in the various graphic methods employed by lighting designers in the theatre. Projects include manual and CAD techniques for Light Plot and Paperwork creation.

Prerequisite: DRAMA 262

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 265. Digital Design: 2D CAD. 4 Units.**

A studio course in theatrical design and architectural lighting design on the computer. Instruction in state-of-the-art software for 2D object creation. Theatrical and architectural standards implemented in performance design.

Prerequisite: DRAMA 262

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 266. Digital Design: Digital Audio Systems. 4 Units.**

Comprehensive tutorial on digital audio including hard disk recording, editing, data compression, and ethernet audio distribution. Focus is on recording, editing, and delivery of audio as used by the sound designer in the digital domain.

Restriction: Drama graduate students only.

**DRAMA 267. Digital Design: Creating Sounds from Scratch. 4 Units.**

The process of analyzing sounds for their core timbral components and using that data to create new sounds - from realistic to fantastic - by means of digital manipulation.

Prerequisite: DRAMA 266

Restriction: Drama Majors only.

**DRAMA 271. Conceptual Sound Design. 4 Units.**

An intensive, project-based seminar for exploring relationships between sound and sight. Synesthesia, creative intent vs. audience perception, and sound/movement are typical of the many topics to be explored. A series of creative projects are assigned and critiqued in peer review.

Prerequisite: DRAMA 266

Restriction: Drama Majors only.

**DRAMA 272. Musical Theatre Sound/Concert Sound. 4 Units.**

A concept-to-opening study of the process of designing sound systems for musicals and live/touring sound. Special attention given to the paperwork and documentation required to package, build, and mix these shows.

Restriction: Drama Majors only.

**DRAMA 277. Critical Listening. 4 Units.**

Exploration of the many variables that affect (and effect) the audio chain. Perceiving and understanding these parameters unlocks the art of controlling sound and stylizing cues. Also includes the process of equalizing/aligning sound systems and the art of audio mastering.

Prerequisite: DRAMA 266

Restriction: Drama Majors only.

**DRAMA 279. Advanced Sound Design. 4 Units.**

An in-depth investigation into sound design for the theatre. Special emphasis is placed on text analysis, design conception, content creation, content delivery, and design organization. Class projects include creating paper designs and paperwork for different texts.

**DRAMA 280A. Techniques in Costume Design. 4 Units.**

Student exercises in the techniques and implementation of costume design.

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only.

**DRAMA 280B. Techniques in Scenery Design. 4 Units.**

Student exercises in the techniques and implementation of scenic design.

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only.

**DRAMA 280C. Techniques in Lighting Design. 4 Units.**

Student exercises in the techniques and implementation of lighting design.

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only.

**DRAMA 280D. Techniques in Sound Design. 4 Units.**

Student exercises in the techniques and implementation of sound design.

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only.

**DRAMA 282. Stage Electronics/Introduction to Show Control. 4 Units.**

Using computers and dedicated hardware to cue, control or automate sound, scenery, and lighting for live performance and themed entertainment applications.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 290. Dramatic Literature and Theatre History Prior to 1900. 4 Units.**

Studies in selected areas of dramatic literature and theatre history prior to 1900. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**DRAMA 291. Dramatic Literature and Theatre History, 1900 to Present. 4 Units.**

Studies in selected areas of dramatic literature and theatre history, 1900 to present. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**DRAMA 292. Cultural and Critical Theory. 4 Units.**

Studies in selected areas of cultural and critical theory. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**DRAMA 293. Directed Studies. 4-12 Units.**

Directed study with Drama faculty.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

**DRAMA 294. Dissertation Research. 4-12 Units.**

Dissertation research with Drama faculty.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**DRAMA 295. Professional Internship. 1-12 Units.**

An arranged internship at the South Coast Repertory Theatre, or other equity theatre company, for qualifying M.F.A. students. A stipend and equity points are provided by the theatre company.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama graduate students only.

**DRAMA 297. Dramaturgy Practicum. 4 Units.**

Requires doctoral students to identify two plays from the Drama Department's season to work as dramaturges. Students write a Dramaturgy Booklet recording their research and interactions with director, actors, and the design team. Students will work with doctoral faculty.

Restriction: Graduate students only. Drama and Theatre Majors only.

**DRAMA 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

## Music Courses

**MUSIC 3. Introduction to Music. 4 Units.**

Introduction to musical concepts and active listening skills. Students develop musical understanding through critical readings, selected repertoire, fundamental concepts related to rhythm, pitch, and genre. Students apply those concepts to music from a wide range of historical and cultural origins.

(IV)

**MUSIC 4. Introduction to Opera. 4 Units.**

Introduces students with no musical background to the dramatic and performance conventions of opera, and suggests ways of developing a critical stance vis-a-vis the social, political, gender-related and moral conflicts that are presented by composers and librettists.

(IV)

**MUSIC 5. Popular Music in the United States. 4 Units.**

Examines the cultural, social, political, and economic dimensions of popular music in the United States over the last century and a half, with an emphasis on matters related to class, race, ethnicity, and gender.

(IV)

**MUSIC 8. The Beatles and the Sixties. 4 Units.**

Through a study of the music of the Beatles, students are introduced to selected broader historical and cultural themes (e.g., race and music, gender and music, music and the counterculture) while developing an understanding of the basic elements of music.

(IV)

**MUSIC 9. Rock: The Early Years. 4 Units.**

Surveys the social and cultural fabric of the post-World War II United States (from the late 1940s through the early 1970s) as seen through the prism of music - rock and roll music.

(IV)

**MUSIC 10. Piano for Majors. 1 Unit.**

For Music majors with little or no piano experience. Provides the necessary background for realizing keyboard exercises required in the theory and harmony courses, and develops skills to play and sight-read simple music from different periods.

Repeatability: May be taken for credit 3 times.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 15A. Musicianship I. 2 Units.**

Interval and chord quality identification, melodic and harmonic dictation, tonal and chromatic sight-singing, and rhythmic reading and dictation.

Corequisite: MUSIC 16A

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 15B. Musicianship II. 2 Units.**

Interval and chord quality identification, melodic and harmonic dictation, tonal and chromatic sight-singing, and rhythmic reading and dictation.

Corequisite: MUSIC 16B

Prerequisite: MUSIC 15A and MUSIC 16A. MUSIC 15A with a grade of C- or better. MUSIC 16A with a grade of C- or better

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 15C. Musicianship III. 2 Units.**

Interval and chord quality identification, melodic and harmonic dictation, tonal and chromatic sight-singing, and rhythmic reading and dictation.

Corequisite: MUSIC 16C

Prerequisite: MUSIC 15B and MUSIC 16B. MUSIC 15B with a grade of C- or better. MUSIC 16B with a grade of C- or better

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 16A. Music Theory. 4 Units.**

Review of music fundamentals. Triad and seventh chords, musical texture, chord spacing, embellishing tones, and introduction to diatonic harmony. Part-writing and model composition with tonic, dominant seventh, and subdominant harmonies.

Corequisite: MUSIC 15A

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 16B. Music Theory. 4 Units.**

Introduction to phrase structure. Part-writing and harmonization with predominants, linear dominants, 6/4 embellishing chords, leading-tone and other diatonic seventh chords. Advanced meters and rhythmic-metric dissonance. Diatonic sequence. Introduction to tonicization and modulation through motion to V and III.

Corequisite: MUSIC 15B

Prerequisite: MUSIC 15A and MUSIC 16A. MUSIC 15A with a grade of C- or better. MUSIC 16A with a grade of C- or better

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 16C. Music Theory. 4 Units.**

Tonicization and modulation to closely related keys. Simple binary and ternary forms. Voice-leading reductions and simple forms. Diatonic sequence with seventh chords. Introduction to chromatic harmony I: modal exchange and mixture chords, the Neapolitan and augmented sixth chords.

Corequisite: MUSIC 15C

Prerequisite: MUSIC 15B and MUSIC 16B. MUSIC 15B with a grade of C- or better. MUSIC 16B with a grade of C- or better

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 16D. Theory/Musicianship. 4 Units.**

Extended homophonic and contrapuntal formal designs (continuous variations, rondo form, sonata form, invention, fugue). Embellishing chromatic chords, dominant prolongation, modulations to foreign keys, extended harmonies, chromatic sequence, chromatic voice-leading and symmetrical divisions of the octave.

Prerequisite: MUSIC 15C and MUSIC 16C. MUSIC 15C with a grade of C- or better. MUSIC 16C with a grade of C- or better

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 21A. Keyboard Skills. 1 Unit.**

Designed to develop the foundational skills of sight-reading, harmonization, transposition, improvisation, figured bass realization, and score reading.

Repeatability: May be taken for credit 6 times.

Restriction: Lower-division students only. Music Majors only. Music - Performance Majors only.

**MUSIC 21B. Keyboard Skills. 1 Unit.**

Designed to develop the foundational skills of sight-reading, harmonization, transposition, improvisation, figured bass realization, and score reading.

Repeatability: May be taken for credit 6 times.

Restriction: Lower-division students only. Music Majors only. Music - Performance Majors only.

**MUSIC 21C. Keyboard Skills. 1 Unit.**

Designed to develop the foundational skills of sight-reading, harmonization, transposition, improvisation, figured bass realization, and score reading.

Repeatability: May be taken for credit 6 times.

Restriction: Lower-division students only. Music Majors only. Music - Performance Majors only.

**MUSIC 25. Fundamentals of Music. 4 Units.**

Gain comprehensive insight into the fundamental concepts of music theory, including notation, harmony, and score analysis. Designed for students of all levels to improve their understanding of how music is composed, performed, and heard. Formerly MUSIC 25A.

(IV)

**MUSIC 40B. History of European Music: From the Renaissance through the Baroque. 4 Units.**

An introduction to the analysis of musical styles and forms, to the sources for constructing music history and reconstructing historical music, and to J.S. Bach.

Prerequisite: MUSIC 16C. MUSIC 16C with a grade of C- or better

Restriction: Music Majors have first consideration for enrollment. Music - Performance Majors have first consideration for enrollment.

(IV and VIII ).

**MUSIC 40C. History of European Music: Hasse to Mahler. 4 Units.**

An introduction to the analysis of musical styles and forms, and to the sources for constructing music history and reconstructing historical music, to Richard Wagner.

Prerequisite: MUSIC 40B. MUSIC 40B with a grade of D or better. Recommended: MUSIC 16D

Restriction: Music Majors have first consideration for enrollment. Music - Performance Majors have first consideration for enrollment.

(IV and VIII ).

**MUSIC 40D. 20th Century Music. 4 Units.**

Survey of principal composers, movements, and compositional techniques of Western art music of the modern era.

Prerequisite: MUSIC 16C. MUSIC 16C with a grade of C- or better

Restriction: Music Majors have first consideration for enrollment. Music - Performance Majors have first consideration for enrollment.

(IV and VIII ).

**MUSIC 41. Major Composer. 4 Units.**

Study of the works of an important composer with emphasis on their significance in historical and social contexts. Composers selected represent a wide variety of historical periods, nationalities, and stylistic orientations.

Repeatability: May be taken for credit 2 times as topics vary.

(IV)

**MUSIC 42. Music and Gender. 4 Units.**

Explores various intersections between music and gender. Examines ways in which gender and sexuality have played a vital role in the creation, dissemination, and consumption of music ranging from medieval Christian mysticism to contemporary hip-hop artists.

(IV, VIII)

**MUSIC 44. Classical Music in Society. 4 Units.**

Examines some ways in which classical music has played an integral role in aspects of society. Studies pieces from different cultural, political, and historical contexts in order to understand how musical meaning is created and interpreted.

(IV, VIII)

**MUSIC 45. History of Film Music. 4 Units.**

Course provides an overview of film music history. Special emphasis will be placed on developing an analytic vocabulary for musical elements and cultivating an understanding of how music can function within a film.

(IV)

**MUSIC 46. Music in Multimedia. 4 Units.**

Students explore intersections between music and other media forms through creating multimedia projects, readings, lectures, and discussion. Students produce music, edit video, increase media literacy, and study theories behind how music communicates meaning.

(IV)

**MUSIC 47. Introductory Topics in Music Technology. 4 Units.**

Introductory topics in electronic music, digital audio, and other aspects of music technology.

Repeatability: Unlimited as topics vary.

(IV)

**MUSIC 48. Introductory Topics in Music and Culture. 4 Units.**

Examines music and musical practices in different historical periods, societies, and cultural settings.

Repeatability: Unlimited as topics vary.

(IV)

**MUSIC 51. Music Technology and Computers. 4 Units.**

A study of the influence of technology on the musical culture and aesthetics from the 20th century to the present, with particular emphasis on the role of the computer. Work includes lectures, readings, listenings, discussions, demonstrations, writing, and experimentation.

(IV)

**MUSIC 65. Piano for Music Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times as topics vary.

Restriction: Music Majors only.

**MUSIC 66. Strings for Music Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times as topics vary.

Restriction: Music Majors only.

**MUSIC 67. Winds for Music Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times as topics vary.

Restriction: Music Majors only.

**MUSIC 68. Voice for Music Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music Majors only.

**MUSIC 69. Percussion for Music Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times as topics vary.

Restriction: Music Majors only.

**MUSIC 70. Guitar, Lute, and Other Plucked Instruments for Music Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music Majors only.

**MUSIC 78. History of Jazz. 4 Units.**

Development of jazz from African and African American folk origins through blues, early jazz, swing, bebop, 'cool' jazz, fusion, free jazz, and contemporary trends.

Restriction: Music Majors have first consideration for enrollment. Music - Performance Majors have first consideration for enrollment.

(IV and VII ).

**MUSIC H80. Experiments in Music. 4 Units.**

Scientists explain the cognition of music using experimental methodology; artists expand the domain of music by trying previously unknown ways of making it. These two types of experiment deepen our understanding of music, from both scientific and artistic vantage points.

Restriction: Campuswide Honors Collegium students only.

(IV)

**MUSIC 82A. MAHUR-Pish Radif: Introduction to Classical Persian Music. 4 Units.**

Survey of art music in Iran and basic structures of classical Persian music, with emphasis on MAHUR modal system and different instruments of classical Persian music. No musical experience required, but interest in vocal music is strongly recommended.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 82B. HOMAYUN-Pish Radif: Introduction to Classical Persian Music. 4 Units.**

Survey of art music in Iran and basic structures of classical Persian music, with emphasis on HOMAYUN modal system and famous musicians and performers of classical Persian music. No musical experience required, but interest in vocal music is strongly recommended.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 82C. SHUR-Pish Radif: Introduction to Classical Persian Music. 4 Units.**

Survey of art music in Iran and basic structures of classical Persian music, with emphasis on the SHUR modal system and different poetic rhythms in classical Persian music. No musical experience required, but interest in vocal music is strongly recommended.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 122A. Piano Literature. 2 Units.**

Survey of stringed keyboard literature from the English Virginalists through twentieth-century composers. Historical, formal, and stylistic considerations of music presented. Performances by class participants and occasional outside guests.

Prerequisite: MUSIC 16A and MUSIC 16B and MUSIC 16C

Restriction: Upper-division students only. Music Majors only. Music - Performance Majors only.

**MUSIC 122B. Piano Literature. 2 Units.**

Survey of stringed keyboard literature from the English Virginalists through twentieth-century composers. Historical, formal, and stylistic considerations of music presented. Performances by class participants and occasional outside guests.

Prerequisite: MUSIC 16A and MUSIC 16B and MUSIC 16C

Restriction: Upper-division students only. Music Majors only. Music - Performance Majors only.

**MUSIC 122C. Piano Literature. 2 Units.**

Survey of stringed keyboard literature from the English Virginalists through twentieth-century composers. Historical, formal, and stylistic considerations of music presented. Performances by class participants and occasional outside guests.

Prerequisite: MUSIC 16A and MUSIC 16B and MUSIC 16C

Restriction: Upper-division students only. Music Majors only. Music - Performance Majors only.

**MUSIC 126. Piano Pedagogy. 2 Units.**

The materials and methods of piano instruction are examined and evaluated.

Restriction: Upper-division students only. Music Majors only. Music - Performance Majors only.

**MUSIC 131. Post-Tonal Theory. 4 Units.**

Significant harmonic, rhythmic, and structural practices since 1900. Analysis and written work exploring free atonality and serialism; neo-tonal practices such as use of extended tertian harmonies, modalism, pandiatonicism, and non-tertian harmonies; structural principles such as aleatory, metric modulation and minimalism.

Prerequisite: MUSIC 16D

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 132. Jazz Theory. 4 Units.**

Study of jazz harmony and melody construction in improvisation. Covered topics include terminology, chord symbols, notation, voicings, and scales as commonly used in jazz and popular music. Issues regarding tonality and ramifications of the blue scale are also examined.

Prerequisite: MUSIC 16D

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 136. Instrumentation. 4 Units.**

Ranges and capabilities of modern orchestral instruments. Exercise in writing for various combinations of wind, string, and percussion instruments and for full orchestra.

Prerequisite: MUSIC 16C

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 140. Topics in Medieval Music. 4 Units.**

Topics in medieval music.

Prerequisite: MUSIC 40B. MUSIC 40B with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 141. Topics in Renaissance Music. 4 Units.**

Topics in renaissance music.

Prerequisite: MUSIC 40B. MUSIC 40B with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 142. Topics in Baroque Music. 4 Units.**

Topics in Baroque music.

Prerequisite: MUSIC 40B. MUSIC 40B with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 142W. Topics in Baroque Music . 4 Units.**

Topics in Baroque music.

Prerequisite: MUSIC 40B. MUSIC 40B with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

(Ib)

**MUSIC 143. Topics in Classical Music. 4 Units.**

Topics in Classical music.

Prerequisite: MUSIC 40C. MUSIC 40C with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 143W. Topics in Classical Music. 4 Units.**

Topics in Classical music.

Prerequisite: MUSIC 40C. MUSIC 40C with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**(Ib)**

**MUSIC 144. Topics in Romantic Music. 4 Units.**

Topics in Romantic music.

Prerequisite: MUSIC 40C. MUSIC 40C with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 144W. Topics in Romantic Music. 4 Units.**

Topics in Romantic music.

Prerequisite: MUSIC 40C. MUSIC 40C with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only.

**(Ib)**

**MUSIC 145. Topics in 20th Century Music. 4 Units.**

Topics in 20th century music.

Prerequisite: MUSIC 40D. MUSIC 40D with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 145W. Topics in 20th Century Music. 4 Units.**

Topics in 20th century music.

Prerequisite: MUSIC 40D. MUSIC 40D with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Upper-division students only. Music Majors only. Music - Performance Majors only.

**(Ib)**

**MUSIC 146. Studies in Jazz Music. 4 Units.**

Topics in Jazz Music.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 147. Studies in Music Technology. 4 Units.**

Specialized topics in electronic music, computer-aided music, and other aspects of music technology.

Repeatability: May be taken for credit 2 times as topics vary.

**MUSIC 148. Studies in Ethnomusicology. 4 Units.**

Topics in Ethnomusicology.

Repeatability: May be taken for credit 2 times.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 149. Studies in Music History. 4 Units.**

Specialized topics in musical genres; culture and social issues; performance practices; and interrelated arts.

Prerequisite: MUSIC 40B and MUSIC 40C and MUSIC 40D. Satisfactory completion of the lower-division writing requirement.

Repeatability: May be taken for credit 3 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 150. Composition. 4 Units.**

Exercises and projects for diverse instrumental-vocal combinations; contemporary techniques and problems. Participation in the improvisation ensemble and working with electronic media.

Prerequisite: MUSIC 16C

Repeatability: May be repeated for credit unlimited times.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 151. Computer Music Composition. 4 Units.**

Exercises in the composition of music uniquely possible by computer, including digital signal processing, computer control of synthesizers and processors, and algorithmic composition. Demonstrations and musical analyses in class; considerable studio work outside class.

Prerequisite: MUSIC 51

**MUSIC 152. Interactive Arts Programming. 4 Units.**

Study of artistic issues and programming techniques involved in the development of interactive computer art and music. Theoretical background, basic tenets of programming, and practical exercises in programming interactive computer multimedia art.

Prerequisite: MUSIC 51 or ART 65A or DANCE 163

**MUSIC 153. Counterpoint. 4 Units.**

Studies in contrapuntal practices of various style periods such as the 16th, 18th, and 20th centuries.

Prerequisite: MUSIC 16B. MUSIC 16B with a grade of C- or better

Restriction: Music Majors only.

**MUSIC 155. Analysis. 4 Units.**

Methods of formal analysis applicable to all Western musical styles: additive, continuous, transformational, and hierarchic forms; rhythm, texture, and sonority as form and process.

Prerequisite: MUSIC 16D

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 156A. Song Literature. 2 Units.**

A survey of song literature. Designed as an overview of the song repertoire, German Lied.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 156B. Song Literature. 2 Units.**

A survey of song literature. Designed as an overview of the song repertoire, French mélodie.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 157. Advanced Study in Composition. 4 Units.**

Individual weekly lessons in composition.

Prerequisite: MUSIC 150. MUSIC 150 with a grade of C- or better

Repeatability: May be taken for credit 6 times.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 158A. Diction. 2 Units.**

In-depth study of the International Phonetic Alphabet (IPA), including its transcription and pronunciation, and its application for singers. Introduction to IPA and Italian Diction.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 158B. Diction. 2 Units.**

In-depth study of the International Phonetic Alphabet (IPA), including its transcription and pronunciation, and its application for singers. German Diction.

Prerequisite: MUSIC 158A

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 158C. Diction. 2 Units.**

In-depth study of the International Phonetic Alphabet (IPA), including its transcription and pronunciation, and its application for singers. French Diction.

Prerequisite: MUSIC 158A and MUSIC 158B

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 159. Vocal Pedagogy. 2 Units.**

Survey about the physical structure of the singing mechanism, science, and philosophy of studio instruction.

Restriction: Music - Performance Majors only.

**MUSIC 160. University Orchestra. 2 Units.**

Study and performance of standard orchestral repertory and works by contemporary composers. Membership is open to all qualified students by audition only.

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 161. Wind Ensemble. 2 Units.**

Study and performance of works written for varying combinations of wind and percussion instruments. Membership is open to all qualified students by audition only.

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 162. University Chorus. 2 Units.**

Make-up of the ensembles varies and may include University Chorus, Chamber Choir, Madrigal Singers, Women's Chorus, and Reading Choir. Membership is open to all qualified students by audition only.

Corequisite: MUSIC 162L

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 162P. University Chorus: Accompanying. 2 Units.**

Keyboard accompanying for one of the UCI choral organizations, with individual coaching in sight reading, score reading, and other accompanying skills.

Repeatability: May be taken for credit 12 times.

**MUSIC 164. Opera Workshop. 2-4 Units.**

Preparation and performance of operatic repertoire, including arias, scenes, and fully staged operas, and/or stage training and role analysis.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 164P. Opera Workshop: Accompanying. 2-4 Units.**

Training in techniques and operatic repertory for keyboard players.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 165. Piano for Music Performance Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music - Performance Majors only.

**MUSIC 166. Strings for Music Performance Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music - Performance Majors only.

**MUSIC 166P. String Accompaniment. 2 Units.**

Chamber ensemble experience with the solo string repertory for keyboard, participation in the weekly string master class, performance in public recitals.

Repeatability: May be taken for credit 3 times.

**MUSIC 167. Winds for Music Performance Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music - Performance Majors only.

**MUSIC 168. Voice for Music Performance Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music - Performance Majors only.

**MUSIC 169. Percussion for Music Performance Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music - Performance Majors only.

**MUSIC 170. Guitar, Lute, and Other Plucked Instruments for Music Performance Majors. 2 Units.**

Private weekly lessons and a weekly master class/workshop for the discussion of solo repertory and performance practice, including special topics such as historical notational systems, traditional American guitar styles, and demonstrations of period plucked instruments. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music - Performance Majors only.

**MUSIC 171. Chamber Singers. 2 Units.**

A select ensemble specializing in vocal chamber music from all periods. Frequent performances on and off campus. Membership is open to all singers by audition.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 176. Chamber Ensembles . 2 Units.**

Make-up of the ensembles varies and may include various Classical ensembles, Latin Jazz Ensemble, Small Jazz Combos, Percussion Ensemble, and Guitar Ensemble. Membership is open to all qualified students by audition only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music Majors have first consideration for enrollment. Music - Performance Majors have first consideration for enrollment.

**MUSIC 178. Jazz Orchestra. 2 Units.**

Rehearsal and performance of literature written for large jazz ensemble with emphasis on methods and materials. Laboratory setting for new arrangers and/or composers of modern jazz pieces.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 181. Improvisation. 4 Units.**

Improvisation has been central to all music traditions. Course explores real-time music-making in a variety of non-notated contexts. Different improvisational styles are presented, including jazz, Asian improvisation, and experimental modern music. Emphasis on actual classroom performance.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 182. Advanced Jazz Combo. 2 Units.**

Small-group jazz ensemble and improvisational workshop. Range of music covered encompasses the full traditional jazz from improvised ragtime up through the most current avant-garde musical techniques.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 183A. Jazz Composition I. 4 Units.**

Performance and lecture course for writing and performing original jazz compositions. Emphasis is placed on composing as a way to create new improvisational frameworks. Cyclical forms, modal compositions, blues-oriented compositions, and ballad writing.

Prerequisite: MUSIC 78 and MUSIC 132

Restriction: Music Majors only.

**MUSIC 183B. Jazz Composition II. 4 Units.**

Performance and lecture course for writing and performing original jazz compositions. Emphasis is placed on composing as a way to create new improvisational frameworks. Non-functional harmony, contemporary forms, free-bop, and current trends.

Prerequisite: MUSIC 78 and MUSIC 132 and MUSIC 183A

Restriction: Music Majors only.

**MUSIC 183C. Jazz Composition III. 4 Units.**

Performance and lecture course for writing and performing original jazz compositions. Emphasis is placed on composing as a way to create new improvisational frameworks. Study of modern tonal-center compositions, intervallic compositions, and alternate rhythms.

Prerequisite: MUSIC 78 and MUSIC 132 and MUSIC 183A and MUSIC 183B

Restriction: Music Majors only.

**MUSIC 189. Accompanying for Plucked Strings: Continuo and Changes. 2 Units.**

Students apply theory to their instruments as they learn the basics of pre-1800 continuo playing and post-1900 jazz charts. Includes discussions of appropriate repertory, treatment of harmonic progressions, and finer points of style and technique.

Prerequisite: MUSIC 16C

Repeatability: May be repeated for credit unlimited times.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 191. Tutorial in Music. 1-4 Units.**

Supplemental instruction related to student's area of study. Taken only when the materials studied lie outside regular departmental offerings, and when the student has no formal chance to pursue the subject.

Prerequisite: Undergraduate advisor approval required.

Repeatability: May be taken for credit 3 times.

**MUSIC 193. Conducting. 4 Units.**

Introduces students to the basic techniques employed in the practice of conducting and includes score study and development of leadership skills.

Prerequisite: MUSIC 16D and MUSIC 40B and MUSIC 40C

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 195A. Senior Thesis. 2 Units.**

With consultation in regularly scheduled meetings, students identify and study relevant texts and materials and prepare a prospectus for an original thesis.

Prerequisite: Senior standing in the Honors Program in Music and Culture.

Grading Option: In Progress (Letter Grade with P/NP).

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 195B. Senior Thesis. 2 Units.**

Students submit an outline and preliminary drafts of section of their thesis to the instructor, on a schedule supervised by the instructor. The final version will address the instructor's comments and criticisms.

Prerequisite: MUSIC 195A

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 197. Word and Music. 2 Units.**

Performance class for advanced singers and pianists with emphasis on collaborative approach to vocal literature.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 199. Independent Study. 2-4 Units.**

Student-devised research/composition project, with faculty guidance, resulting in a formal paper/project. Taken only when materials studied lie outside regular departmental offerings or when students have no formal chance to pursue the subject.

Prerequisite: Undergraduate or graduate advisor approval required.

Repeatability: May be taken for credit 3 times.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 200. Bibliography and Research. 4 Units.**

Required of all entering students. A systematic introduction to the bibliographical tools both in the general field of music and in the student's areas of specialization.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 201. Topics in Analysis . 4 Units.**

Seminar focusing on different analytical methods, modal, tonal, and post-tonal, and their applications to repertoires drawn from various historical periods through to the present day.

Prerequisite: Placement into MUSIC 201.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Music Majors only.

**MUSIC 202. Proseminar in Musicology. 4 Units.**

Introduces significant issues and recent developments in musicology and music criticism, including exposure to the controversies that have brought change and reflection to the discipline.

Corequisite: Recommended for musicology students: MUSIC 200

Prerequisite or corequisite: MUSIC 200. MUSIC 200 with a grade of B or better

Restriction: Graduate students only.

**MUSIC 203. Music Thesis . 4 Units.**

Intensive work dedicated to researching and writing a Master's thesis under the supervision of a faculty advisor.

Prerequisite: MUSIC 200. MUSIC 200 with a grade of B or better

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 204. Proseminar in Music Theory and Analysis. 4 Units.**

Introduction to music theories, analytic approaches, and methodologies as applied to repertoires drawn from Western art and popular music.

Corequisite: Recommended for musicology students: MUSIC 200

Prerequisite or corequisite: MUSIC 200. MUSIC 200 with a grade of B or better

Restriction: Graduate students only.

**MUSIC 209. Seminar in Creative Practices. 1-4 Units.**

Core first-year seminar required for graduate students in the Integrated Composition, Improvisation, and Technology emphasis of the M.A. and Ph.D. programs. Composition and presentation of original student works, lecture, and discussion.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 210. Choral Conducting . 4 Units.**

Intensive private instruction and study of the various choral literatures.

Repeatability: May be taken for credit 6 times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 211. Performance . 4 Units.**

Contents vary according to the student's major instrument. Intensive private instruction and study of the various literatures.

Repeatability: May be taken for credit 6 times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 212. Composition. 4 Units.**

Intensive work in composition geared to each student's level of competence.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 213. Orchestral Conducting. 4 Units.**

Intensive private instruction in instrumental conducting.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 214. Graduate Recital.**

Performance of public recital.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 215A. Computer Music Composition and Production. 4 Units.**

Study of the composition and production of music made uniquely possible by the computer, including usage of prevalent digital music technology, techniques of digital signal processing, and computer control of synthesizers and audio processors.

Restriction: Graduate students only. Music Majors only.

**MUSIC 215B. Computer Music Programming. 4 Units.**

Study of the artistic issues and programming techniques involved in the development of original applications for computer music composition and interactive performance.

Restriction: Graduate students only. Music Majors only.

**MUSIC 220. Seminar in Music History. 4 Units.**

Topics in music history.

Corequisite: MUSIC 200

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Music Majors only.

**MUSIC 222. Seminar in Musicology . 4 Units.**

Focuses on current scholarship in musicology and related fields with a strong critical content. Addresses topics relative to their historical and stylistic periods. Recent topics have included Stravinsky, Holy Women, Mahler, Historiography, Issues in Performance Practice, and Brahms's Chamber Music.

Corequisite: Recommended for musicology students: MUSIC 200

Prerequisite or corequisite: MUSIC 200. MUSIC 200 with a grade of B or better

Repeatability: May be taken for credit for 4 units as topics vary.

Restriction: Graduate students only.

**MUSIC 224. Seminar in Music Theory and Analysis. 4 Units.**

Typical topics include Schenkerian theory and analysis, contemporary form theory, and advanced techniques in the analysis of late 19th-century and contemporary music (e.g., transformational theory, Neo-Riemannian, and scale network theory).

Corequisite: Recommended for musicology students: MUSIC 200

Prerequisite or corequisite: MUSIC 200. MUSIC 200 with a grade of B or better

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**MUSIC 230. Seminar in Contemporary Music. 4 Units.**

Special seminar projects dealing with contemporary music with emphasis on analytical techniques and style criticism.

Prerequisite or corequisite: MUSIC 200. MUSIC 200 with a grade of B or better

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Music Majors only.

**MUSIC 231. Improvisation. 4 Units.**

Introduces the practice and history of improvisation in diverse fields of Western music since 1950. Performance projects and group critiques, weekly reading and listening assignments, participation in a class concert, and a research paper.

Restriction: Graduate students only. Music Majors only.

**MUSIC 235. Critical Studies in Music. 4 Units.**

A critical examination of music traditions, institutions, and aesthetics, employing new scholarship in music and new critical studies in other disciplines.

Corequisite: Recommended for musicology students: MUSIC 200

Prerequisite or corequisite: MUSIC 200. MUSIC 200 with a grade of B or better

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Music Majors only.

**MUSIC 236. Theoretical ICIT Seminar. 1-4 Units.**

Seminar studying new genres and topics that integrate composition, improvisation, new technologies, and non-classical cultures.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Music Majors only.

**MUSIC 237. Practical ICIT Seminar. 1-4 Units.**

Study of new practices and techniques that integrate composition, improvisation, new technologies, and non-classical cultures.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Music Majors only.

**MUSIC 239. Thesis Colloquium. 1-2 Units.**

ICIT students present their thesis work-in-progress for discussion and criticism. Faculty and visiting artists/scholars also present their current work.

Repeatability: May be taken for credit for 8 units.

Restriction: Graduate students only. Music Majors only.

**MUSIC 240. Graduate Projects . 4 Units.**

Substantial projects in performance, conducting, or composition (other than those specifically required for the degree), accompanied by a summary paper.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Music Majors only.

**MUSIC 242A. First-Year Research and Writing Seminar I. 4 Units.**

Guided reading for one quarter on a broad subject selected by the instructor, followed by one quarter in which the student undertakes independent research on the selected topic, leading to a substantial term paper.

Prerequisite: MUSIC 200. MUSIC 200 with a grade of B or better

Restriction: Graduate students only.

**MUSIC 242B. First-Year Research and Writing Seminar II. 4 Units.**

Guided reading for one quarter on a broad subject selected by the instructor, followed by one quarter in which the student undertakes independent research on the selected topic, leading to a substantial term paper.

Prerequisite: MUSIC 200 and MUSIC 242A. MUSIC 200 with a grade of B or better. MUSIC 242A with a grade of B or better

Restriction: Graduate students only.

**MUSIC 243A. Second-Year Research and Writing Tutorial I. 4 Units.**

In this two-quarter sequence, students gain expertise in a first area of research concentration by undertaking directed reading on a topic of their choice and then writing a paper of near-publishable length and quality on that topic.

Prerequisite: MUSIC 242B. MUSIC 242B with a grade of B or better

Restriction: Graduate students only.

**MUSIC 243B. Second-Year Research and Writing Tutorial II. 4 Units.**

In this two-quarter sequence, students gain expertise in a first area of research concentration by undertaking directed reading on a topic of their choice and then writing a paper of near-publishable length and quality on that topic.

Prerequisite: MUSIC 243A. MUSIC 243A with a grade of B or better

Restriction: Graduate students only.

**MUSIC 244. Readings for the Qualifying Examination. 4-12 Units.**

Directed reading in preparation for the Qualifying Examination.

Prerequisite: MUSIC 243B. MUSIC 243B with a grade of B or better

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**MUSIC 245. Prospectus Research. 4-12 Units.**

Research and writing of the Dissertation Prospectus.

Prerequisite: MUSIC 244. MUSIC 244 with a grade of B or better

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**MUSIC 250. Directed Research. 4 Units.**

Preparation for qualifying exams and dissertation, or an individual research project resulting in a substantial paper or comparable documentation of the research results.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Music Majors only.

**MUSIC 276. Contemporary Ensemble. 2 Units.**

Chamber ensemble for the performance of contemporary music, including newly composed and improvised forms.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 290. Dissertation Research. 4-12 Units.**

Research and writing of the dissertation for the History and Music Theory Ph.D.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**MUSIC 299. Independent Study. 2-4 Units.**

Student-devised research/composition project, with faculty guidance, resulting in a formal paper/project. Taken only when materials studied lie outside regular departmental offerings or when students have no formal chance to pursue the subject.

Prerequisite: Graduate advisor approval required.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 399. University Teaching. 1-4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Department of Art

**Kevin Appel, Department Chair**

3229 Art, Culture and Technology Building

949-824-6648

<http://art.arts.uci.edu/>

The Department of Art houses a multitude of dynamic paths to engage in art making. The faculty is committed to providing students the tools with which they can create work at the highest levels of aesthetic, intellectual, and social/political inquiry. The department's flexible curriculum facilitates serious engagement with painting, drawing, photography, sculpture, digital filmmaking, installation, performance, electronic art and design, art writing, critical theory, and curatorial studies within the context of an interdisciplinary approach to the study of contemporary art.

The Art faculty is comprised of a group of nationally and internationally recognized artists and scholars who are engaged in their fields and dedicated to sharing their expertise in helping students develop informed approaches to media, materials, and techniques while fostering individual approaches in the students' overall art practice. They believe that a vital part of artistic development comes from an accessible faculty and regular contact with active practitioners. To that end, alongside a broad and diverse curriculum, the department also invites visiting artists, curators, and critics to our campus to discuss their work and to get to know students.

The Art department attracts gifted and motivated students who thrive in an environment that encourages autonomy and rigor. Art students are drawn not only to the outstanding creative faculty, the university's resources, and its location in one of the world's leading art centers, but also to a program that encourages their long-term development as artists. The result is a distinguished list of graduates who have made and continue to make significant contributions across the field of art, and who participate in a lasting community of artists from the Art program and beyond.

- Art, B.A.
- Art, M.F.A.
- Digital Arts, Minor
- Digital Filmmaking, Minor

## Faculty

Rhea Anastas, Ph.D. The Graduate Center of The City University of New York, *Associate Professor of Art* (20th century experimentalism in the visual arts, critical theory, cultural theory)

Kevin H. Appel, M.F.A. University of California, Los Angeles, *Department Chair and Executive Director of University Art Galleries and Professor of Art* (painting)

Sarah Awad, M.F.A. University of California, Los Angeles, *Assistant Professor of Teaching of Art* (drawing, painting)

Jennifer Bornstein, M.F.A. University of California, Los Angeles, *Associate Professor of Art* (photography)

Juli C. Carson, Ph.D. Massachusetts Institute of Technology, *Professor of Art* (art history, critical theory, curatorial practice )

Miles C. Coolidge, M.F.A. California Institute of the Arts, *Professor of Art* (photography)

Tony Delap, Claremont Graduate University, *Professor Emeritus of Art*

Martha Gever, Ph.D. City College of the City University of New York, *Professor Emerita of Art* (history and criticism: video, media studies, popular culture)

Bryan Jackson, M.F.A. University of California, Los Angeles, *Continuing Lecturer of Art* (digital filmmaking)

Jesse C. Jackson, M.A. University of Toronto, *Director of the Minor in Digital Arts and Associate Professor of Art; Informatics* (digital art, informatics, design, architecture)

Ulysses S. Jenkins, M.F.A. Otis Art Institute, *Professor of Art; African American Studies* (video, performance art)

Antoinette Lafarge, M.F.A. School of Visual Arts, *Professor of Art* (digital media)

Simon Leung, B.A. University of California, Los Angeles, *Professor of Art; Asian American Studies* (new genres, critical theory, contemporary art history, performance)

Joseph S. Lewis, M.F.A. Maryland Institute College of Art, *Professor of Art* (public art)

Mara Jane Lonner, M.F.A. California Institute of the Arts, *Associate Professor of Teaching Emerita of Art* (drawing, painting, 3D design)

Catherine B. Lord, M.F.A. State University of New York at Buffalo, *Professor Emerita of Art* (queer theory, feminism, photography)

Monica Majoli, M.F.A. University of California, Los Angeles, *Professor of Art* (painting)

Daniel J. Martinez, B.F.A. California Institute of the Arts, *Claire Trevor Professor and Professor of Art* (public art, sculpture, installation, performance)

Yong Soon Min, M.F.A. University of California, Berkeley, *Professor Emerita of Art* (minority, diasporic, and third cinemas; media, nationalism, and globalization; race, sexuality, and popular culture)

Deborah Oliver, M.F.A. California Institute of the Arts, *Lecturer of Art* (performance art, new genres)

Jennifer Pastor, M.F.A. University of California, Los Angeles, *Professor of Art* (sculpture)

Simon G. Penny, M.F.A. Sydney College of the Arts, *Professor of Art; Informatics* (informatics, robotic sculpture, interactive environments, electronic media)

Yvonne Rainer, *Claire Trevor Professor and Professor Emerita of Art* (performance, dance, video)

William S. Roberts, M.F.A. California Institute of the Arts, *Associate Professor of Teaching of Art* (photography)

Amanda Ross-Ho, M.F.A. University of Southern California, *Associate Professor of Art* (sculpture)

Constance J. Samaras, M.F.A. Eastern Michigan University, *Professor Emerita of Art* (photography, intermedia, cultural criticism)

David K. Trend, Ph.D. Miami University, *Professor of Art* (visual culture)

Bruce N. Yonemoto, M.F.A. Otis Art Institute, *Professor of Art; Asian American Studies* (video, experimental media, film theory)

## Courses

### ART 1A. Art in Context: History, Theory, and Practice. 4 Units.

First in a three-quarter foundation sequence introducing students to a broad range of contemporary art, media, and practices in relation to their twentieth-century cultural and historical antecedents. ART 1A deals specifically with contemporary painting and photography.

Restriction: Art Majors have first consideration for enrollment.

(IV)

### ART 1B. Art in Context: History, Theory, and Practice. 4 Units.

Deals with film/video/performance. Concerned with the development of modern/contemporary film, video, and performance, with a focus on experimental and avant-garde production from the early twentieth-century to today.

Restriction: Art Majors have first consideration for enrollment.

(IV)

### ART 1C. Art in Context: History, Theory, and Practice. 4 Units.

Third in a three-quarter foundation sequence introducing students to a broad range of contemporary art, media, and practice in relation to their twentieth-century cultural and historical antecedents. Deals specifically with space and cyberspace.

Restriction: Art Majors have first consideration for enrollment.

(IV)

### ART 8. Changing Creativity. 4 Units.

Explores creativity as a changing concept in historical and contemporary terms from the perspectives of producers, consumers, and institutions. Encompasses international perspectives and the role of new technologies in considering creativity as a resource for innovation and social change.

(IV)

### ART 9A. Visual Culture: Media, Art, and Technology. 4 Units.

Examines creative activities in all spheres of life, including the 'artistic' impulses that dwell in the individual. Culture is addressed in broad terms of the many institutions and cultural forces that shape everyday activities of listening, seeing, doing.

Restriction: Art Majors have first consideration for enrollment.

(IV)

**ART 9B. Visual Culture: A Culture Divided. 4 Units.**

Throughout the 1980s and 1990s, controversies flourished in the mainstream media over purportedly obscene art, anti-American writing, and moral decay, among other issues. Examines these new conflicts as they manifest themselves in public life and everyday experience.

Restriction: Art Majors have first consideration for enrollment.

(IV)

**ART 9C. Visual Culture: Thematic Investigations. 4 Units.**

Considers a broad range of concerns and questions raised by various acts of appropriation in contemporary art and visual culture, such as originality, authenticity, authorship, translation, audience and aesthetics, temporal dimensions of a work, and context.

Restriction: Art Majors have first consideration for enrollment.

(IV)

**ART 11A. Topics in History of Contemporary Art. 4 Units.**

Surveys mid-nineteenth and twentieth-century art production, from modernity through post-modernity, in a historical and cultural context.

Prerequisite: ART 9A

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Art Majors only.

**ART 12A. Art, Design, and Electronic Culture. 4 Units.**

Introduction to historical and theoretical foundations of digital media art, tracing how information technologies seeded growth of new expressive medium. Considers how today's pervasive digital culture evolved through interdisciplinary collaborations between artists, engineers, scientists, scholars.

(IV)

**ART 12B. Technology, Culture, and Society: Steam to Steampunk. 4 Units.**

A survey of the ongoing interactions between technological and social change through the 19th century and 20th century, with special attention to the history of computing, changing arts and cultural practices, and the idea of the Anthropocene.

(IV)

**ART 12C. Intelligences of Arts. 4 Units.**

Introduces contemporary neuroscience and new approaches to cognition – embodied, enactive, extended, situated, distributed. Reviews the history of related ethological, biological, psychological, technological, and philosophical traditions. Considers arts and cultural practices from these and other perspectives, and considers case studies.

(III)

**ART 20A. Basic Drawing I. 4 Units.**

Encourages an investigation of the premises and limits of drawing, primarily, but not inevitably, as a two-dimensional medium. Includes slide presentations and discussions of the historical uses of a wide range of drawing. Materials fee.

Restriction: Art Majors have first consideration for enrollment.

**ART 20B. Basic Drawing II. 4 Units.**

Continuation of the investigation initiated in ART 20A, with an emphasis on experimentation, personal investigation, and development of conceptual working premises, as well as the acquisition of necessary skills. Group discussion and critique are emphasized. Materials fee.

Prerequisite: ART 20A

Restriction: Art Majors have first consideration for enrollment.

**ART 30A. Basic Painting I. 4 Units.**

Examination of the fundamental components of painting: color, form, space, surface, scale, and content. Studio work, slide presentations, and critiques of student work. Materials fee.

Restriction: Art Majors have first consideration for enrollment.

**ART 30B. Basic Painting II. 4 Units.**

Further examinations of the essential qualities of painting: color, form, space, surface, scale, and content. Studio work, slide presentations, and critiques of student work. Materials fee.

Prerequisite: ART 30A

Restriction: Art Majors have first consideration for enrollment.

**ART 40. Basic Sculpture. 4 Units.**

The practice of sculpture in the contemporary arts; inclusion of spatial interventions, site-specific and environmental design, appropriation of found materials; techniques in cutting joining, and assembly of wood, metals, and plastics. May include casting, welding, and ceramics. Materials fee.

Restriction: Art Majors have first consideration for enrollment.

**ART 50A. Matter and Media . 4 Units.**

A project-based introduction to tools and approaches for creating and sharing digital media content within Internet-mediated social environments, with a particular emphasis on art-making and personal expression. Includes an overview of basic user experience and interaction design principles.

**ART 50B. Interaction and Experience. 4 Units.**

An overview of digital video and audio production for the Web, emphasizing art-making and personal expression. Includes digital media aesthetics and conceptual design, basic audio and video recording, and fundamentals of desktop video, audio, and Web authoring software applications.

Prerequisite: ART 50A

**ART 50C. Digital Media: Interaction Design. 4 Units.**

Principles and practices of interaction design for interactive digital media systems that provide for active involvement of the participant. Students gain experience with interaction design issues through a series of media art projects, emphasizing art-making and personal expression.

Prerequisite: ART 12A and ART 12B and ART 50A and ART 50B

**ART 51. Basic Ceramic Sculpture. 4 Units.**

Exploration of use of clay as sculptural basis with an emphasis on development of an idea and its relation to contemporary and experimental art practice. Hand-building, glazing, finishing processes, and use of other structural materials. Materials fee.

Restriction: Art Majors have first consideration for enrollment.

**ART 65A. Foundations in Media Design. 4 Units.**

Provides an overview of media design in the digital age, covering principles of design for different media (2D, time-based, interactive); history of relationship between art and design; and practice in working with different design approaches. Materials fee.

Restriction: Art Majors have first consideration for enrollment.

**ART 65B. Foundations in Internet Art and Design. 4 Units.**

Introduction to creating art for the Internet, covering history and structure of networks; key types of net-based interactivity; basics of Web design and scripting. Materials fee.

Prerequisite: ART 65A. Recommended: ART 11B.

Restriction: Art Majors have first consideration for enrollment.

**ART 65C. Gizmology and Kinetics. 4 Units.**

Provides students with basic skills in materials, construction and design applicable to making machines, musical instruments and things with moving parts enabling work in kinetic sculpture, custom interactive systems, Mechatronics, Robotics, and Maker/DIY culture. Materials fee.

**ART 71A. Introduction to Photography I. 4 Units.**

Introduction to technical underpinnings emphasizing photography as a contemporary art practice. Topics include 35mm non-automatic camera operation, exposure and lighting, black and white printing, introduction to digital photography, discussion of critical and historical issues. Materials fee.

Restriction: Art Majors have first consideration for enrollment.

**ART 71B. Introduction to Photography II. 4 Units.**

Techniques covered include medium and large format cameras, digital photography, studio lighting, digital and analog color printing, mural room. Conceptual direction is developed through critiques, critical readings, discussions, slide lectures. Materials fee.

Prerequisite: ART 71A

Restriction: Art Majors have first consideration for enrollment.

**ART 81A. Digital Filmmaking Production I. 4 Units.**

Introduction to three production stages of video making. Study of the narrative structure of cinema and acquisition of video production skills in camera, lighting, sound, and editing. Production work, readings, and screenings outside of class are assigned. Materials fee.

Restriction: Art Majors have first consideration for enrollment.

**ART 81B. Digital Filmmaking Production II. 4 Units.**

Focuses on video stage production, technical skills including camera operation, stage lighting, sound recording, and construction of basic scenic elements. Emphasis is placed on the function and responsibilities of the production crew and proper working and safety procedures. Materials fee.

Prerequisite: ART 81A

Restriction: Art Majors have first consideration for enrollment.

**ART 91. Basic Performance Art. 4 Units.**

Exploration of objects, gesture, action, text, image, and media to create narrative or non-narrative works. Elements of theory and history of performance art are discussed to illustrate techniques and styles to understand, identify, and articulate artistic vision and voice.

Repeatability: May be taken for credit 2 times.

Restriction: Art Majors have first consideration for enrollment.

**ART 95. SPECIAL TOPICS IN BASIC MEDIA. 4 Units.**

Basic instruction in media or disciplines not otherwise represented in the regular curriculum. Topics vary according to the instructor.

Repeatability: Unlimited as topics vary.

Restriction: Art Majors have first consideration for enrollment.

**ART 100. Special Topics in Art. 4 Units.**

Materials fee, topic dependent.

Prerequisite: ART 9A. Lower-division writing strongly recommended.

Repeatability: May be taken for credit 6 times as topics vary.

Restriction: Art Majors only.

**ART 101W. Artists as Writers. 4 Units.**

Contemporary art practice involves text, as final form or an integral element. Many contemporary artists consider writing as essential to their practice. Covers historical and contemporary uses of text and image as well as artists' writing.

Prerequisite: ART 9A and ART 11A. Satisfactory completion of the lower-division writing requirement.

Restriction: Art Majors only.

**(Ib)****ART 106A. Programming for Artists. 4 Units.**

Programming as a means to create interactive artworks with an emphasis on the integration of video, sound, text, and stills. Topics include basic concepts in programming, understanding the limits of code, working with video and audio files, interface design. Materials fee.

Prerequisite: ART 65A. Recommended: ART 11B.

Repeatability: May be taken for credit 2 times.

Restriction: Art Majors only.

**ART 106C. Design for Print. 4 Units.**

Investigates the use of print for communication as an artist. Covers the fundamentals of print design and output using digital media. Materials fee.

Prerequisite: ART 65A. Recommended: ART 11B.

Repeatability: May be taken for credit 2 times.

Restriction: Art Majors only.

**ART 108. Digital Filmmaking Project I. 4 Units.**

Students learn to conceive, develop, and produce original video works building directly upon previously learned skills. Use of video stage and post-production editing facilities. Lectures on video/film subjects, production strategies, readings, screening, field trips, and group critiques. Materials fee.

Prerequisite: ART 81A and ART 81B

Restriction: Art Majors only.

**ART 109. Performance and the Camera. 4 Units.**

Surveys the development of contemporary artists who use performance strategies in the making of videos and films. Students analyze the artist's conceptual approach to performative gestures, actions, and landscapes created for their video or film art.

Prerequisite: ART 1B or ART 81A or ART 91 or ART 128

Restriction: Art Majors only.

**ART 110A. Mechatronic Art I. 4 Units.**

Introduces the practice and theory of analog electronics, emphasizing the design and development of simple interactive systems and the integration of such systems into real-world contexts of performance, installation, sculpture, and automated artifacts. Materials fee.

**ART 110B. Mechatronic Art II. 4 Units.**

Introduces the practice and theory of embedded microcontrollers, digital electronics, coding, sensor interfacing, motor control, and output stages along with mechanical and electromechanical design and construction, emphasizing the integration of such systems into real-world contexts of performance, installation, and art-making. Materials fee.

Prerequisite: ART 110A

**ART 110C. Mechatronic Art III. 4 Units.**

As the capstone to the Mechatronic Art series, students develop major projects utilizing electronics, microcontrollers, sensors, and electromechanical devices, in a methodical and supervised context, with technical, design, and aesthetic advice and critique. Materials fee.

Prerequisite: ART 110A

**ART 113. How to be Clever with Stuff. 4 Units.**

How to Be Clever with Stuff is an introduction to the skilled embodied practices of arts and crafts, working with hand tools, wood, and steel. Class includes technical lecture/demos, short technical assignments, a self-initiated final project, and design drawing. Materials fee.

Restriction: Art Majors have first consideration for enrollment.

**ART 115W. Writing Nearby. 4 Units.**

Art writing is increasingly an area of scholarship unto itself as well as a discursive arm of contemporary art practice. Investigates the politics of art writing as well as training students in its various writing practices.

Prerequisite: ART 9A and ART 11A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only.

**(Ib)****ART 119. Issues in Contemporary Painting. 4 Units.**

Investigation of issues in modern and contemporary art work and criticism, wherein an assessment of Modernist influences is followed by the examination of contemporary painting as a cross-disciplinary practice employing popular culture, 'high art,' theory, and new technology.

Prerequisite: ART 9A. Recommended: Satisfactory completion of the upper-division writing requirement.

Repeatability: May be taken for credit 2 times.

Restriction: Art Majors only.

**ART 119A. Issues in Contemporary Drawing. 4 Units.**

Investigation of drawing as a primary practice rather than a developmental tool. Explores the relationship between Conceptualism, process and content, and considers the historical changes in method, presentation, and theory, from past to present.

Prerequisite: ART 9A

**ART 121A. Afro-Futurism I. 4 Units.**

First of a two-part course on the futuristic artistic vision of Black film, video, and cyberspace. Deals with critical analyses of the Black image in Western Art history, and its association to contemporary Hip Hop culture, art, and music.

Prerequisite: ART 9A. Satisfactory completion of upper-division writing strongly recommended.

Restriction: Art Majors only.

**ART 121B. Afro-Futurism II. 4 Units.**

Second of a two-part course on the futuristic artistic visions of Black film, video, and cyberspace. Deals with modern techno-culture, digital activism, and designing technology based on African aesthetic principles of contemporary Hip Hop International Culture.

Prerequisite: ART 9A. Satisfactory completion of upper-division writing strongly recommended.

Restriction: Art Majors only.

**ART 123B. Issues in Media, Violence, and Fear. 4 Units.**

Violence has been instrumental in story-telling throughout history in art, literature, religion, and entertainment. Continuing presence of media violence provoked debates among parents, politicians, media producers, and academics. Examines history, theory, aesthetics, economics, and politics of violent representation.

Prerequisite: ART 9A. Satisfactory completion of the Upper-Division Writing requirement is recommended.

Restriction: Art Majors only.

**ART 125. Issues in Photography. 4 Units.**

Rigorous investigation of photographic practices and critical writings, the relationship of photography to the construction and maintenance of cultural institutions, the circulation of photographic ideas in society, and photography and technology.

Prerequisite: ART 1A or ART 71A or ART 71B or ART 152A or ART 152B or ART 152C or ART 152D or ART 152E or ART 190B. Recommended: Satisfactory completion of the Upper-Division Writing requirement.

Repeatability: May be taken for credit 2 times.

Restriction: Art Majors only.

**ART 126. Issues in Media and Migration: Asia. 4 Units.**

Media and migration are profound, twinned influences on contemporary globalized experience. A discourse on Asian cultural production and of its transnational dimensions. Students will explore migration in its multiple facets to include migrations of people, ideas, and technologies.

Prerequisite: ART 9A

**ART 126B. Issues in Techno-Arts. 4 Units.**

Addresses issues related to artmaking practices that emerge in tandem with new technologies. Topics include sociopolitical contexts of techno-art; utopic/dystopic framings; key moments in the history of techno-arts.

Prerequisite: ART 9A. Recommended: ART 11B.

Restriction: Art Majors only.

**ART 127B. Issues in Experimental Film History. 4 Units.**

A critical study of experimental film/video art genres and production techniques considering their narrative, structural, iconographic, and cultural aspects. Hollywood narrative, Nouvelle Vague, American Independent, and Video Art compared in terms of production innovation, design, and conceptual content. Materials fee.

Prerequisite: ART 9A

Restriction: Art Majors only.

**ART 128. Issues in New Genres. 4 Units.**

Investigates issues in post-studio practices, including concepts of time, relational aesthetics, site-specificity, institutional critique, and the post-medium condition.

Prerequisite: ART 9A. Recommended: Satisfactory completion of the Upper-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Art Majors only.

**ART 130A. Projects in New Technologies. 4 Units.**

Working with media such as electronic still cameras, desktop publishing, faxes, satellites, virtual reality, digitized imaging. Cultural issues pertinent to the emergence of new technology (e.g., ethical concerns, social impact, copyright laws, nontraditional approaches to distribution, cyberpunk, global markets).

Prerequisite: ART 65A. Recommended: ART 11B and ART 106A.

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 131. Projects in Installation. 4 Units.**

Investigates interior installation in particular spaces. Working in teams, students install, discuss, and remove projects. Technical information and hands-on experience with various media is provided. Materials fee.

Prerequisite: ART 40

Repeatability: May be repeated for credit unlimited times.

**ART 132A. Digital Filmmaking Pre-Production. 4 Units.**

Examines the preparatory and planning stages of video production, including script writing, story boarding, location scouting, script breakdown, and budgeting. Projects may encompass one or more of these stages which will be explored through readings, discussions, and demonstrations. Materials fee.

Prerequisite: ART 81A and ART 81B

Restriction: Art Majors only.

**ART 132B. Digital Filmmaking Post-Production. 4 Units.**

Examines procedures and techniques utilized in video production after principal shooting is completed, including effects processing, composting, sound design, and DVD authoring. Projects focus on these processes, and are explored through readings, discussions, and demonstrations. Materials fee.

Prerequisite: ART 81A and ART 81B

Restriction: Art Majors only.

**ART 133. The Graphic Novel . 4 Units.**

An intensive workshop during which students will create a short graphic novel, taking the process all the way from concept to publication. Course work will focus on understanding how narrative emerges from a combination of visual and textual elements.

Prerequisite: ART 65A. Strongly recommended: ART 106C.

**ART 138. Place Making and Public Art. 4 Units.**

How do art interventions in public spaces inform our definition of 'place' and develop culturally informed audiences? Students will engage in class projects and group investigations that question the traditional and institutional conceptual boundaries of exhibition/distribution.

Prerequisite: ART 40 and ART 9A

Restriction: Art Majors only.

**ART 141. Digital Filmmaking Advanced Project I. 4 Units.**

Incorporating narrative structures in a multi-screen context. Students design and produce an active space in which activities will move from one screen to another. Materials fee.

Prerequisite: ART 81A and ART 81B

Restriction: Art Majors only.

**ART 144. Artist Books as Objects. 4 Units.**

Are artist books still relevant in the contemporary creative community? Focusing on intellectual content and raw physicality, students will explore this question and image/text relationships by creating handmade one-of-a-kind or edition book projects utilizing various mechanical reproduction techniques.

Prerequisite: (ART 20A or ART 30A or ART 40 or ART 51 or ART 65A or ART 71A or ART 81A or ART 91) and ART 9A

**ART 150. Advanced Studio Topics--Painting. 4 Units.**

Provides an intensive and specialized working environment. Thematic issues and material strategies will be explored. Materials fee.

Prerequisite: ART 30B

Repeatability: Unlimited as topics vary.

Restriction: Art Majors only.

**ART 150C. Advanced Drawing . 4 Units.**

Advanced studio problems in visual exploration. Students pursue individual solutions to self-defined and presubscribed projects. Techniques/materials are individual choice. Continual analysis of the personal process.

Prerequisite: ART 20B

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 150F. Advanced Figure Drawing. 4 Units.**

Students develop technical skills in rendering the figure. Live model sessions and an introduction to anatomy. Investigates use of the figure in contemporary art. Materials fee.

Prerequisite: ART 20B

Repeatability: May be taken for credit 2 times.

Restriction: Art Majors only.

**ART 150G. Advanced Figure Painting. 4 Units.**

Students develop technical skills in painting the figure. Live model sessions and projects that investigate the use of the figure in contemporary art.

Prerequisite: ART 150F

**ART 151. Advanced Studio Topics--Sculpture. 4 Units.**

Provides an intensive and specialized working environment. Thematic issues and material strategies will be explored. Materials fee.

Prerequisite: ART 40

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 152A. Advanced Studio Topics: Photography. 4 Units.**

Focused investigation of a range of issues in photographic practice, with an emphasis on developing individual student projects, refining critical thinking, and conceptual framing. Technical topics covered as required. Readings, lectures, critiques, labs. Materials fee.

Prerequisite: ART 71B

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 152B. Documentary Photography. 4 Units.**

Documentary practice is examined through the realization of photo-based projects. Thematic focus of student's choosing will be refined through lectures, discussion, technical demonstrations, field trips, labs, and individual meetings. Materials fee.

Prerequisite: ART 71B

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 152C. The Public Image. 4 Units.**

Strategies for artistic intervention in the public circulation of images are examined alongside the role images play in constructing public identity. Individual or collaborative student projects will be directed around course themes. Materials fee.

Prerequisite: ART 71B

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 152D. The Photographic Tableau. 4 Units.**

Examines and develops photographic projects intended for traditional artistic venues (i.e., galleries and museums). In addition to exploring appropriate techniques and presentation strategies, students consider the interdependency between construction of images and semantic shaping of traditional art venues. Materials fee.

Prerequisite: ART 71B

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 152E. The Constructed Image. 4 Units.**

A studio investigation of theoretical ideas, critical possibilities, historical precedents, and various techniques involving the production of fabricated images. Techniques may include montage, digital, chemical and in-camera manipulations, studio constructions, appropriations, performance, and projected images. Materials fee.

Prerequisite: ART 71B

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 152F. Seminar Production Component. 4 Units.**

Photographic and/or inter-media production course tied to a specific Issues course (for example, Issues in Photography, Issues in Feminism, Issues in New Genres). Critiques, labs, field trips, discussion, demonstrations. Materials fee.

Prerequisite: ART 71B

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 153. Digital Filmmaking Advanced Project II. 4 Units.**

Directed to the production of individual or collaborative videotapes, using studio, portable camera, editing facilities, and sound and computer elements. Emphasis will be on individually initiated projects. Readings and screenings are assigned. Materials fee.

Prerequisite: ART 81A and ART 81B

Restriction: Art Majors only.

**ART 154. Advanced Studio Topics: Performance. 4 Units.**

An intensive investigation of the practice of performance art, with an emphasis on the development of individual projects, and the refinement of various technical skills, as well as audiences, spaces, and cultural connections.

Prerequisite: ART 91 or ART 109 or ART 128

Repeatability: May be taken for credit 3 times.

Restriction: Art Majors only.

**ART 156. Advanced Studio Topics: Ceramic Sculpture. 4 Units.**

Discussion of ideas, techniques, and personal control of form. Clay body, fabrication, glazing, and firing. Emphasis on development of personal direction. Materials fee.

Prerequisite: ART 51

Repeatability: May be repeated for credit unlimited times.

Restriction: Art Majors only.

**ART 166A. Digital Filmmaking Web Series. 4 Units.**

Original video projects produced in collaborative teams combining advanced video students with students from other areas, including Dance, Drama, and Music. Shoots may be carried out on the video stage as well as field locations. Materials fee.

Prerequisite: ART 81A and ART 81B

Restriction: Art Majors only.

**ART 170. Advanced Projects. 4 Units.**

Students working in different mediums will focus on ambitious research, planning, development, and experimentation, leading to a single work or focused series that is large in scope. The project will be exhibited and documented at the end of the quarter. Materials fee.

Prerequisite: ART 150 or ART 150C or ART 151 or ART 152A or ART 152B or ART 152C or ART 152D or ART 152E or ART 152F or ART 153 or ART 166A or ART 190 or ART 190B or ART 190C

Restriction: Art Majors only.

**ART 189. Critical Aesthetics . 4 Units.**

Surveys critical thought that has influenced twentieth-century art production, preparing the student to engage contemporary art with a critical eye, specifically addressing aesthetic and political debates of the historical avant-garde, the neo-avant garde, and postmodern culture.

Prerequisite: ART 1A and ART 1B and ART 1C

Restriction: Upper-division students only. Art Majors only.

**ART 190. Senior Project and Critique. 4 Units.**

Directed-study critique class in preparation for final project and life after graduation; documentation and portfolio preparation for graduate school. Investigation of exhibition spaces and funding opportunities, participation in artists' communities outside the university, and artists' rights issues.

Repeatability: May be repeated for credit unlimited times.

Restriction: Seniors only. Art Majors only.

**ART 190B. Senior Projects and Critique in Photography. 4 Units.**

Directed group study focused on production of photographic projects of significant scope and ambition. Emphasis on preparation for continued study and/or practice in photography in advanced settings beyond the undergraduate university experience. Materials fee.

Prerequisite: ART 1A and ART 1B and ART 1C and ART 71A and ART 71B

Repeatability: May be repeated for credit unlimited times.

Restriction: Seniors only. Art Majors only.

**ART 197. Art Internship. 1-4 Units.**

Under faculty supervision, students participate directly in a variety of art institution settings, including museums, galleries, and nonprofit organizations.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

Restriction: Juniors only.

**ART 198. Honors Exhibition. 4 Units.**

Preparation, installation, and participation in the annual honors exhibition. Materials fee.

Grading Option: Pass/no pass only.

Restriction: Upper-division students only. School of Arts Honors students only.

**ART 199. Independent Study. 1-4 Units.**

Individual study or directed creative projects as arranged with faculty member. Materials fee.

Repeatability: May be repeated for credit unlimited times.

**ART 210. First-Year Graduate Seminar. 4 Units.**

Introductory theory class to contemporary art: intellectual history, theoretical antecedents, and current critical concerns.

Restriction: Graduate students only.

**ART 215. Graduate Seminar Topics. 4 Units.**

In-depth discussion of contemporary art production in relation to a variety of theoretical, cultural, and historical topics. Material is determined by the given instructor's current research interest. Topics vary.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ART 220. Graduate Seminar: Issues in Contemporary Art. 4 Units.**

Classroom interaction with artists, curators, critics, lecturers from fields outside of the arts or from cross-disciplines. Includes recommended readings, discussions, panel participation, writing assignments.

Prerequisite: ART 210

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

**ART 230. Graduate Group Critique. 4 Units.**

Focus on studio production. Students are expected to help foster and develop an environment in which serious and sophisticated peer critique can take place.

Repeatability: May be taken for credit 9 times.

Restriction: Graduate students only.

**ART 236. Graduate Topics in Studio Production. 4 Units.**

Graduate group study of a specific medium or art practice (e.g., painting; video, installation, photography, sculpture/3D, performance, digital media, public art, sound art; film). Includes consideration of technical, theoretical, historical, and/or formal issues.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ART 240. Interdisciplinary Projects. 4 Units.**

Intensive faculty-led discussion of in-progress graduate studio projects--can be discipline driven or working across fields in a rigorous interdisciplinary studio environment where students meet with the professor both individually and in small groups.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ART 250. Directed Reading and Research. 4 Units.**

Independent study with a supervising faculty member to direct academic research, develop bibliographies, and discuss assigned readings.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ART 251. Special Topics Seminar. 4 Units.**

Directed reading and/or study group on a given research topic. Agreed-upon meeting structure may be flexible in order to accommodate off-campus field trips and travel.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ART 255. Graduate Interdisciplinary and Collaborative Projects. 4 Units.**

For graduate students working collaboratively across the School of the Arts or cross-university. May be team taught with one of the faculty members based in the Department of Art.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ART 261. Graduate Thesis Writing Seminar. 4 Units.**

Seminar for writing as a component of the thesis. Different models of writing, text, and spoken word will be discussed. Required second year.

Corequisite: ART 262

Prerequisite: ART 210 and ART 215 and ART 220

Restriction: Graduate students only.

**ART 262. Graduate Thesis Independent Study. 1-4 Units.**

Tutorials and directed study in thesis writing, research and/or studio production with thesis committee chair and/or thesis committee members to be taken during final quarters of study.

Corequisite: ART 261

Prerequisite: ART 210 and ART 215 and ART 220

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ART 263. Graduate Thesis, Exhibition Critique. 4 Units.**

Group critique required for matriculating M.F.A. students during the quarter in which their thesis exhibitions are scheduled. Public presentation/lecture on student's work required.

Prerequisite: ART 210 and ART 215 and ART 220 and ART 230 and ART 240 and ART 261 and ART 262

Restriction: Graduate students only.

**ART 264. Critical and Curatorial Thesis Exhibition. 8 Units.**

Intensive tutorial geared toward execution of professional gallery exhibition, which is one half of the degree requirement for the M.F.A. concentration in Critical and Curatorial Studies. Must be taken under direction of Committee Chair.

**ART 280. Contemporary Exhibition Systems. 4 Units.**

Investigates contemporary case studies of curatorial practice. Sometimes taught in collaboration with a host institution. The history, theory and criticism or curatorial practice are tested through the explication of real exhibitions.

Prerequisite: ART 280A

Repeatability: May be taken for credit 4 times.

**ART 280A. Introduction to Exhibition Systems. 4 Units.**

Introduces the basics of curating, covering the fundamentals of collection, research, fundraising, publicity, and installation. Also introduces the related categories of public programming and art criticism.

Restriction: M.F.A. students only.

**ART 399. University Teaching. 4 Units.**

Limited to Teaching Associates working under the active guidance and supervision of a regular rank faculty member responsible for curriculum and instruction at the University.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit for 12 units.

Restriction: Graduate students only.

## Art, B.A.

The Department of Art in the Claire Trevor School of the Arts takes a wide-ranging, interdisciplinary view of contemporary art practice. With an emphasis on experimentation and innovation, the Department of Art is viewed as a leader in genres addressing cultural identity and emerging technologies. The Department provides students a solid theoretical and technical foundation from which to approach art making as both process and product. Each student

is encouraged to develop an individual, disciplined direction approach to media, materials, and techniques. To this end, the curriculum provides studio experiences in drawing, painting, sculpture, photography, digital imaging, video, performance art, and new media. Visiting artists, theorists, curators, and other arts professionals are an integral part of the program.

The Art Culture Technology (ACT) building houses the ROOM Gallery, CATALYST student gallery, undergraduate honors studios, the Digital Filmmaking Studio, department administrative offices, faculty studios, and graduate student studios. The University Art Gallery provides a venue for student shows as well as faculty and guest artist presentations. The original Art buildings have been seismically retro-fitted and extensively remodeled and renovated.

## Requirements for the B.A. in Art

**All students must meet the University Requirements.**

**School Requirements: None.**

Departmental Requirements for the Major in Art

A. Complete the following:

ART 1A	Art in Context: History, Theory, and Practice
ART 1B	Art in Context: History, Theory, and Practice
ART 1C	Art in Context: History, Theory, and Practice (ART 1A, ART 1B, and ART 1C all taken the first year in residence.)
ART 9A	Visual Culture: Media, Art, and Technology
ART 11A	Topics in History of Contemporary Art

B. Select one of the following:

ART HIS 40A	Ancient Greek and Roman Art, and Architecture
ART HIS 40B	Arts of Europe: Medieval and Renaissance
ART HIS 40C	Early Modern and Modern Art in Europe and America
ART HIS 42A	History of Asian Art: Arts of India
ART HIS 42B	History of Asian Art: Arts of China
ART HIS 42C	History of Asian Art: Arts of Japan
ART HIS 42D	History of Asian Art: Arts of Islam

C. Select four of the following:

Lower-division ART 20–99
--------------------------

D. Select six of the following:

Upper-division ART 100–115 (no more than three in this category),
Upper-division ART 130–195 (minimum of three in this category);

E. Select two of the following:

Issues courses from ART 116–129
---------------------------------

## Honors in Art

The Honors in Art program gives qualifying students a more rigorous course of study in contemporary art practices, thus challenging superior students beyond the scholarly requirements demanded of the Art major. This program is designed to further develop students' critical, analytical, research, and technical skills. It is particularly suited to those wishing to go on to graduate school and/or exhibition careers.

### Eligibility Requirements

1. One year in good standing as an Art major;
2. An overall GPA of 3.2 or higher with a GPA of at least 3.4 in ART courses.
3. Completion of:

ART 1A	Art in Context: History, Theory, and Practice
ART 1B	Art in Context: History, Theory, and Practice
ART 1C	Art in Context: History, Theory, and Practice

Four lower-division courses selected from ART 20–99

One Art History course from either the ART HIS 40 or 42 series.

## Application Deadline

The annual application deadline is May 15. Late applications will not be accepted.

## Application Requirements

All applicants must upload the following at <https://ctsa.slideroom.com>. There is a fee associated with submission of materials via Slideroom.

1. A portfolio of up to 10 images and/or other media samples. Images/media samples must include title of the work, size, year, medium, description, and duration of the work, if time-based.
2. A brief statement (250 words maximum) of research and career goals; and
3. UCI transcript (downloadable from StudentAccess).

The applicant's name, UCI student ID number, and email address must be printed legibly on all submitted materials.

All applicants will be notified of their application status no later than the end of spring quarter finals week.

Students accepted to the program will share the Catherine Lord Undergraduate Honors Studio for the entire academic year. Students accepted to the program must actively participate in programmatic activities. Students must follow the Department's studio occupancy guidelines in order to maintain their studios. GPAs will be reviewed each quarter to ensure programmatic requirements.

Beyond fulfilling regular courses for the Art major, honors students must take the following:

Select two additional courses from the following: ART 100–191, 199;

Select one ART HIST course of the student's choosing; and

Complete ART 198.

Honors Exhibition ART 198 (this course will prepare students for a mandatory, group interdisciplinary honors gallery exhibition to take place during either winter or spring quarter of the student's matriculating year, at which time students will defend their thesis work to faculty on the Undergraduate Committee).

Non-compliance with any of the requirements will result in dismissal from the program.

NOTE: Students may be assessed a course materials fee for certain courses. Consult the online *Schedule of Classes* on the University Registrar's website (<http://www.reg.uci.edu/>) for the most up-to-date information about which courses require a materials fee and the amount of the fee.

## Art Sample Program for Freshman

### Freshman

Fall	Winter	Spring
ART 1A	ART 1B	ART 1C
Art History	Lower-Division Art	Lower-Division Art
WRITING 39B	General Education	General Education
Lower-Division Art	WRITING 39C	General Education

Departmental faculty and the range of artists whose work is represented in the University Art Gallery exhibitions provide diverse career models. Some graduates go on to careers as exhibiting artists or teachers; others work in arts-related activities in museums, galleries, and artists' organizations. A bachelor's degree in Art is usually required as preparation for graduate-level study in Art.

## Art, M.F.A.

The program is designed to provide intensive professional training for independently motivated students wishing to pursue careers in the field of contemporary art. The overall emphasis in the program is on studio production. Experimental and interdisciplinary approaches to art making are emphasized. Students undergo a rigorous course of study combining seminar classes, intensive critique courses, and independent study.

Applicants for admission to the M.F.A. program must meet the general requirements for admission to graduate study, hold a B.A. or B.F.A. in Art, have completed one year of Twentieth-Century Art History (students who have not completed this will be required to do so as part of their graduate studies).

### HOW TO APPLY

1. Complete the Online Application for Graduate Admissions (<http://www.grad.uci.edu/>), which includes submission of a **Statement of Purpose** and three (3) **letters of recommendations** (recommenders must submit letters via online application).

2. Submit a **portfolio** of 20 images and/or other media samples, to be uploaded at <https://ctsa.slideroom.com> (<https://ctsa.slideroom.com/>). Images must include title of the work, size, year, medium, description, and duration of the work, if time-based. Slideroom will ask for a 'student number;' please enter the application number given to you when you apply online,

3. One copy of **transcripts** from the Undergraduate institution(s) attended by the applicant. Undergraduate institutions must send transcripts directly to:  
*University of California, Irvine*  
*Art Department*  
*3229 Art Culture and Technology*  
*Irvine, CA 92697-2775*  
*Attn: Graduate Application*

#### **ALL PARTS OF THE APPLICATION MUST BE SUBMITTED BY JANUARY 15; THERE IS NO GRACE PERIOD.**

Topic-based seminars cover a range of critical issues dealing with the relationship of culture to contemporary art and are designed for students interested in positioning their art practices within an interdisciplinary discursive framework. All incoming students must take the First-Year Graduate Seminar in preparation for further course work. As students progress in the program, they are required to take a series of additional seminars aimed at training them to develop research skills and a written component augmenting their culminating thesis exhibitions. Various approaches to developing text and word are considered, and students are encouraged to approach developing the thesis textual component following a path best suited to their postgraduate interests (e.g., critical writing, spoken word/performance, critical memoir, digital narrative structures).

Throughout a three-year residence, students take a series of critique seminars in which work-in-progress is intensively discussed within a group context. Each quarter, students also meet, on an independent basis, with faculty of their choice. Students are encouraged to work with a range of faculty members. Towards the end of the second year, students select a thesis committee with whom they will work closely on the development of a thesis exhibition in their third year. After selecting a thesis committee, a student may continue to work with a range of faculty, either independently or in a critique seminar, to continue to explore a diversity of ideas and differing approaches to both studio production and art distribution systems.

During the first two years, students are required to take courses from a structured curriculum totaling a minimum of 12 units each quarter. Beyond that, students can select additional course work from any sector of the department or University including approved upper-division undergraduate courses. The third year is structured so that students can individualize their course of study through a wide selection of classes. For example, students wishing to focus primarily on studio production can do so through a combination of independent studies and critique classes, or students can design their third year to focus on both studio production and acquire additional course work in a given research area or graduate emphasis.

In addition to the graduate degree in Art, several emphases offered by the University are available to M.F.A. students. They include, but are not limited to, emphases in Visual Studies, Critical Theory, Feminist Studies, and Asian American Studies (refer to the Visual Studies, Critical Theory Emphasis, Department of Gender and Sexuality Studies, or the Department of Asian American Studies sections of the *Catalogue* for information).

Throughout the first two years, students must also undergo a series of progress checks including open studio reviews and a second-year exhibition where they are evaluated by faculty committees. Satisfactory opinion by these committees, coupled with both satisfactory independent study evaluations and grades of at least a B or above, will allow the student to progress to candidacy for the degree. During the third year, candidates must mount a thesis exhibition. In tandem with the final thesis exhibition, students are required to do a presentation on their work as part of the final defense before their thesis committee. The normal time to degree for students in the M.F.A. program is three years. Residence is required.

Each M.F.A. candidate is provided with an individual or shared studio space. Facilities include photography laboratories (analog and digital), video production studios, data laboratories, and sculpture laboratories for work in wood and metal. There are also facilities to support work in digital media, painting, performance, drawing, and ceramics. Students have regular opportunities to exhibit in three galleries.

Various programs of visiting artists and lecturers are an integral part of the student experience. Visiting artists, curators, critics, and gallerists are invited to give lectures and conduct studio visits with graduate students. Some Art faculty, in addition to their departmental appointment, are affiliated with other UCI and UC programs, e.g., Asian American Studies, African American Studies, Gender and Sexuality Studies, Engineering, Information and Computer Science, Critical Theory Emphasis, Visual Studies, Calit2 Gaming Studies Initiative, Center for Law, Society and Culture, Center for Asian Studies, Center for Global Peace and Conflict Studies, and the UC Institute for Research in the Arts (UCIRA).

## **Admission**

Applicants for admission to the M.F.A. program must meet the general requirements for admission to graduate study, hold a B.A. or B.F.A. in Art, have completed one year of Twentieth-Century Art History (students who have not completed this will be required to do so as part of their graduate studies).

#### **HOW TO APPLY**

1. Complete the Online Application for Graduate Admissions (<http://www.grad.uci.edu/>), which includes submission of a **Statement of Purpose** and three (3) **letters of recommendations** (recommenders must submit letters via online application).
2. Submit a **portfolio** of 20 images and/or other media samples, to be uploaded at <https://ctsa.slideroom.com> (<https://ctsa.slideroom.com/>). Images must include title of the work, size, year, medium, description, and duration of the work, if time-based. Slideroom will ask for a 'student number;' please enter the application number given to you when you apply online,
3. One copy of **transcripts** from the Undergraduate institution(s) attended by the applicant. Undergraduate institutions must send transcripts directly to:

University of California, Irvine  
 Art Department  
 3229 Art Culture and Technology  
 Irvine, CA 92697-2775  
 Attn: Graduate Application

**ALL PARTS OF THE APPLICATION MUST BE SUBMITTED BY JANUARY 15; THERE IS NO GRACE PERIOD.**

## Specific Degree Requirements

107-116 units over a three-year course of study are required. Residency is required. Students must take a minimum of 12 units per quarter.

### First Year:

ART 210	First-Year Graduate Seminar (one in fall)
ART 215 or ART 251	Graduate Seminar Topics (one in any quarter) Special Topics Seminar
ART 220	Graduate Seminar: Issues in Contemporary Art (one in winter)
ART 230	Graduate Group Critique (one in fall, one in winter)
ART 240	Interdisciplinary Projects (one in fall, one in winter, two in spring)

### Second Year:

ART 215 or ART 251	Graduate Seminar Topics (one in any quarter) Special Topics Seminar
ART 220	Graduate Seminar: Issues in Contemporary Art (one in winter)
ART 230	Graduate Group Critique (one in fall, one in winter)
ART 240	Interdisciplinary Projects (two in fall, two in winter, two in spring)

### Third Year:

ART 230	Graduate Group Critique (one in fall)
ART 261	Graduate Thesis Writing Seminar (one in spring)
ART 262	Graduate Thesis Independent Study (one per quarter)
ART 263	Graduate Thesis, Exhibition Critique (one in winter)

### Two courses selected from the following (in any quarter):

ART 215	Graduate Seminar Topics
ART 236	Graduate Topics in Studio Production
ART 250	Directed Reading and Research
ART 251	Special Topics Seminar
ART 255	Graduate Interdisciplinary and Collaborative Projects

Two courses selected from ART 215, ART 240, ART 251, ART 399, or outside 4-unit graduate courses (in any quarter).

## Digital Arts, Minor

### Jesse C. Jackson, Director

The minor in Digital Arts provides opportunities to explore creativity through digital media arts. This program is open to students from all areas of UCI who want to acquire a working knowledge of how digital media content is conceived, constructed, and performed.

In the studio, students receive hands-on experience with current software tools, creating and sharing digital media art projects, developing an appreciation of digital media aesthetics and conceptual design, and learning the fundamentals of desktop video, audio, and Web authoring software applications. Lectures and discussions examine how today's pervasive digital culture evolves through interdisciplinary collaborations among artists, engineers, scientists, and scholars. Course work considers relationships between digital media practices, touching on such areas as social networking, video/audio podcasting, interface design, digital music, telematic performance, intelligent agents, virtual realities, artificial life, and ubiquitous computing. The program investigates critical issues related to emerging technologies and the arts, and surveys recent works by leading digital media artists.

Prospective students should have basic proficiency with Web, email, word processing, and presentation software. It is highly recommended that students have their own computer. Further information is available at the Digital Arts Minor website (<http://sites.uci.edu/elad/minor/>).

### Jesse C. Jackson, Director

The minor in Digital Arts provides opportunities to explore creativity through digital media arts. This program is open to students from all areas of UCI who want to acquire a working knowledge of how digital media content is conceived, constructed, and performed. In the studio, students receive hands-on experience with current software tools, creating and sharing digital media art projects, developing an appreciation of digital media aesthetics and conceptual design, and learning the fundamentals of desktop video, audio, and Web authoring software applications. Lectures and discussions examine how today's pervasive digital culture evolves through interdisciplinary collaborations among artists, engineers, scientists, and scholars. The program investigates critical issues related to emerging technologies and the arts, and surveys recent works by leading digital media artists.

Prospective students should have basic proficiency with Web, email, word processing, and presentation software. It is highly recommended that students have their own computer. Further information is available at the Digital Arts Minor website (<http://sites.uci.edu/elad/minor/>).

The minor in Digital Arts consists of a minimum of eight courses which fall into two categories: A. Required and B. Elective.

A. Complete the following:

ARTS 1	ArtsCore
ART 12A	Art, Design, and Electronic Culture
ART 12B	Technology, Culture, and Society: Steam to Steampunk
ART 50A	Matter and Media
ART 50B	Interaction and Experience
ART 50C	Digital Media: Interaction Design

B. Select two of the following

ART 65A	Foundations in Media Design
ART 65B	Foundations in Internet Art and Design
ART 81A	Digital Filmmaking Production I
ART 81B	Digital Filmmaking Production II
ART 100	Special Topics in Art
ART 106A	Programming for Artists
ART 106C	Design for Print
ART 143	
ARTS 75	Digital Media: Exhibition
DANCE 163	Dance and Video Technology
DANCE 164	Screendance
MUSIC 51	Music Technology and Computers
MUSIC 147	Studies in Music Technology
MUSIC 151	Computer Music Composition
MUSIC 152	Interactive Arts Programming

Each of these courses may be taken one time only for credit toward the minor (with the exception of topics vary courses, e.g., ART 100 ). No course in the requirements for the minor may be taken Pass/Not Pass.

## Digital Filmmaking, Minor

**Bruce Yonemoto, Director**

The minor in Digital Filmmaking in the Claire Trevor School of the Arts provides opportunities to explore creative digital film production techniques and structures basic to the creation of new film works. Undergraduate students from all areas of UCI will have the opportunity to produce digital film works with content that contributes to the future of film as an art form.

Through the minor in Digital Filmmaking students will learn how traditional production techniques create content through form. Theories of studio production and art film history will inform the production of new narrative, documentary, fictional, and experimental film works. Students will learn to produce films which will lend themselves to emerging distribution platforms. The future of film as an art form depends on students to learn traditional as well as experimental components of structure and content. In the studio, students will acquire advanced skills in camera, lighting, sound, re-production, and post-production. Through issues and projects courses the program investigates experimental techniques developed by historical and contemporary film artists.

Application to the Minor in Digital Filmmaking is open to all undergraduate UCI students. There are no restrictions based on major or level. Admission is on a competitive basis and students must submit an online application with a statement of purpose and links to online work samples. A limited number of students are admitted to the minor on a quarterly basis. The quarterly deadline is Friday, Week 3 by 5:00 p.m. Applicants that meet the deadline will

be notified of their admission status via email by Week 7. Interested students are encouraged to obtain further information from the Digital Filmmaking website (<http://digifilmuci.com/>). Course Materials fees are required for all courses in the Minor.

Online Application Form: [digifilm.arts.uci.edu/apply](http://digifilm.arts.uci.edu/apply) (<http://digifilm.arts.uci.edu/apply/>)

### **Bruce Yonemoto, Director**

The minor in Digital Filmmaking in the Claire Trevor School of the Arts provides opportunities to explore creative digital film production techniques and structures basic to the creation of new film works. Undergraduate students from all areas of UCI will have the opportunity to produce digital film works with content that contributes to the future of film as an art form.

Through the minor in Digital Filmmaking students will learn how traditional production techniques create content through form. Theories of studio production and art film history will inform the production of new narrative, documentary, fictional, and experimental film works. Students will learn to produce films which will lend themselves to emerging distribution platforms. The future of film as an art form depends on students to learn traditional as well as experimental components of structure and content. In the studio, students will acquire advanced skills in camera, lighting, sound, re-production, and post-production. Through issues and projects courses the program investigates experimental techniques developed by historical and contemporary film artists.

### **Application**

Application to the Minor in Digital Filmmaking is open to all undergraduate UCI students. There are no restrictions based on major or level. Admission is on a competitive basis and students must submit an online application with a statement of purpose and links to online work samples. A limited number of students are admitted to the minor on a quarterly basis. The quarterly deadline is Friday, Week 3 by 5:00 p.m. Applicants that meet the deadline will be notified of their admission status via email by Week 7. Interested students are encouraged to obtain further information from the Digital Filmmaking website (<http://digifilmuci.com/>). Course Materials fees are required for all courses in the Minor.

Online Application Form: [digifilm.arts.uci.edu/apply](http://digifilm.arts.uci.edu/apply) (<http://digifilm.arts.uci.edu/apply/>)

### **Requirements for the Minor in Digital Filmmaking**

A. Complete the following:

ART 81A	Digital Filmmaking Production I
ART 81B	Digital Filmmaking Production II
ART 108	Digital Filmmaking Project I
ART 127B	Issues in Experimental Film History
ART 132A	Digital Filmmaking Pre-Production
ART 132B	Digital Filmmaking Post-Production
ART 141	Digital Filmmaking Advanced Project I
ART 153	Digital Filmmaking Advanced Project II
or ART 166A	Digital Filmmaking Web Series

This minor requires eight four-unit quarter courses. Two courses in the minor may overlap with the Art major requirements. One course may be taken Pass/No Pass (unless the course overlaps with Art major requirements).

## **Department of Dance**

### **Molly Lynch, Department Chair**

300 Mesa Arts Building  
949-824-7283  
<http://dance.arts.uci.edu/>

The Department of Dance fosters an educational environment in which performance opportunities, creative projects, and theoretical studies complement and reinforce each other, providing a foundation for careers in dance. The program focuses on the dance techniques of ballet, modern, jazz, tap, world dance, and dance and technology. Theoretical studies include dance history and theory; dance writing; Laban studies; dance pedagogy; dance ethnography; dance science; and aesthetics of digital media. Creative opportunities bridge the studio and theoretical work through performance and choreography for multiple contexts; creative applications of animation, motion capture, audio and video technologies; lecture demonstration; and critical, historical, ethnographical, and scientific writing.

The objective of studio work is to develop kinesthetic resources, precision, flexibility, creativity, and freedom in a coordinated and intelligently responsive dancer. The techniques of classical ballet, modern dance, and jazz constitute crafts and styles for the dancer that serve not only as a basis for the training of the body, but also as a basic language of movement for the choreographer.

The theoretical, historical, and scientific courses are designed both to broaden the perspective of those students whose first interest is performance or choreography, and to provide a foundation for those students who plan to pursue careers in the academic, scientific, technological, or administrative fields of dance.

The dance archives in the UCI Langson Library Special Collections offer a rich source of research materials which enhance the Dance program. Among other special holdings, the archives include the extensive Ruth Clark Lert collection of dance books, journals, photographs, original costume sketches, and memorabilia of dance in Europe and the United States from pre-World War I to the present.

- Dance, M.F.A.

## Faculty

David Allan, Choreographer/Former Soloist, National Ballet of Canada; Choreographer, ballet companies, operas, film, and television, *Professor Emeritus of Dance* (ballet, pas de deux, choreography)

Mary Corey, M.A. University of California, Riverside; Certified Professional Labanotator, *Professor of Dance* (dance history, dance notation and reconstruction)

John L. Crawford, Media Artist and Software Designer, *Professor of Dance; Informatics* (screendance, interactive media, telematic performance, motion capture, digital arts)

Diane L. Diefenderfer, Former Soloist, Los Angeles Ballet, Eglevsky Ballet Company, Frankfurt Ballet Company, Director of Pilates Program for Dance Wellness, Undergraduate Advisor, *Associate Professor of Teaching of Dance* (ballet, pointe, repertory)

Jennifer J. Fisher, Ph.D. University of California, Riverside; founder and editor of Dance Major Journal, *Professor of Dance* (critical dance studies)

Israel Gabriel, Bat-Dor Dance Company; Former Assistant Artistic Director, *Associate Professor of Teaching Emeritus of Dance* (ballet, modern, pas de deux, repertory)

Michel Gervais, *Lecturer of Dance*

Lindsay Gilmour, M.F.A. University of Wisconsin, Milwaukee, *Assistant Professor of Dance* (modern choreography, improvisation)

Charlotte Griffin, M.F.A. University of Texas, Austin, *Assistant Professor of Dance* (choreography, modern, screen dance)

Chad Michael Hall, M.F.A. Ohio State University, *Artistic Director - MULTIPLEX DANCE and Assistant Professor of Dance* (contemporary technique, choreography, improvisation, dance, and video)

Loretta Livingston, Ph.D. Texas Woman's University; Certified Laban Movement Analyst; former principal with Bella Lewitzky Dance Company, Graduate TA Advisor, Co-Advisor for B.F.A. Choreography/Senior Thesis/Honors Thesis concerts, *Professor of Dance* (choreography, Laban movement analysis, body and practice)

Lar Lubovitch, Honorary Doctorate, Juilliard School of the Arts, *Founder and Director of New York-based Lar Lubovitch Dance Company and UCI Distinguished Professor of Dance* (choreography, repertory, technique, and special projects)

Molly L. Lynch, M.F.A. University of California, Irvine; Pilates Certified; Choreographer/Artistic Director of the National Choreographers Initiative, *Department Chair and Professor of Dance* (ballet, repertory, arts management, and senior seminar)

Lisa Marie Naugle, Ph.D. New York University, *Director of International Initiative for CTSA, Artistic Director for DTM2 Performance Ensemble and Professor of Dance* (modern dance, choreography, online/interactive technology, improvisation, teaching of dance)

James W. Penrod, M.F.A. University of California, Irvine; C.M.A. Laban Institute of Movement Studies, *Professor Emeritus of Dance* (ballet, modern, dance notation, choreography, movement analysis)

Janice G. Plastino, Ph.D. University of Southern California, *Professor Emerita of Dance* (kinesiology/anatomy, research methods, choreography, dance science/medicine)

Nancy L. Ruyter, Ph.D. Claremont Graduate University, *Professor Emerita of Dance* (dance history, Spanish dance, bibliography and research)

Kelli Sharp, D.P.T. Chapman University, *Assistant Professor of Dance; Physical Medicine and Rehabilitation* (somatic practices, dance science, kinesiology, physical therapy, motor learning and performance)

Alan Terricciano, M.A. Eastman School of Music, *Associate Dean for Undergraduate Affairs and Professor of Dance; Music* (music for dance, musical resources, critical issues in dance, music theory, keyboard skills, and repertoire)

Tong Wang, M.F.A. University of Utah; Principal dancer with the Shanghai Ballet, Tulsa Ballet Theatre, Dayton Ballet, Ballet West, *Associate Professor of Dance* (ballet, choreography, men's ballet, pas de deux)

S. Ama Wray, Ph.D. University of Surrey, *Associate Professor of Dance; African American Studies* (jazz, choreography, improvisation, teaching of dance, jazz ensemble)

## Courses

### **DANCE 2. Dance Health and Injury Prevention. 4 Units.**

An overview of factors that affect the health of dancers. Includes evaluation of general health measures and prevention and management of common dance injuries.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

### **DANCE 3. Scientific Concepts of Health. 4 Units.**

Introduction to the scientific foundations of health, emphasizing those pertaining to success in college and lifetime wellness. Includes principles of cardiorespiratory, musculoskeletal, flexibility, and nutritional fitness. A variety of learning experiences are offered to apply science to real life.

## (II)

### **DANCE 14. Social Dance. 2 Units.**

Contemporary and historical forms. Current ballroom, disco, and Western square dance forms; Latin ballroom dances; dances from the 20s, 30s, and 40s.

Grading Option: Pass/no pass only.

### **DANCE 21A. Music for Dancers. 4 Units.**

Emphasis on the development of musical skills most pertinent to the dancer: vocabulary, notational literacy, rhythmic and melodic acuity, score reading, and fundamental analysis; working with live accompaniment.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

### **DANCE 30A. Studio Workshop in Ballet I. 2 Units.**

Beginning ballet: fundamentals and principles of classical ballet with an emphasis on technique.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

### **DANCE 30B. Studio Workshop in Ballet I. 2 Units.**

Beginning ballet: fundamentals and principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 30A

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

### **DANCE 30C. Studio Workshop in Ballet I. 2 Units.**

Beginning ballet: fundamentals and principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 30A and DANCE 30B

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

### **DANCE 34. Men's Studio Workshop in Ballet. 2 Units.**

Emphasis on men's traditional ballet, techniques, and movements.

Prerequisite: DANCE 30A and DANCE 30B and DANCE 30C

Repeatability: May be repeated for credit unlimited times.

**DANCE 40A. Studio Workshop in Modern I. 2 Units.**

Fundamentals of modern dance: principles of modern tradition developed from Graham, Humphrey, and Wigman.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**DANCE 40B. Studio Workshop in Modern I. 2 Units.**

Fundamentals of modern dance: principles of modern tradition developed from Graham, Humphrey, and Wigman.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**DANCE 40C. Studio Workshop in Modern I. 2 Units.**

Fundamentals of modern dance: principles of modern tradition developed from Graham, Humphrey, and Wigman.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**DANCE 50A. Studio Workshop on Jazz I. 2 Units.**

Fundamentals of jazz: principles of jazz dance and contemporary forms incorporating the personal point of view of the instructor.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**DANCE 50B. Studio Workshop on Jazz I. 2 Units.**

Fundamentals of jazz: principles of jazz dance and contemporary forms incorporating the personal point of view of the instructor.

Prerequisite: DANCE 50A

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**DANCE 50C. Studio Workshop on Jazz I. 2 Units.**

Fundamentals of jazz: principles of jazz dance and contemporary forms incorporating the personal point of view of the instructor.

Prerequisite: DANCE 50B

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**DANCE 52A. Workshop in Tap I. 2 Units.**

Beginning tap: principles of rhythm and basic tap steps.

Repeatability: May be taken for credit 2 times.

**DANCE 52B. Workshop in Tap I. 2 Units.**

Beginning tap: principles of rhythm and basic tap steps.

Prerequisite: DANCE 52A

Repeatability: May be taken for credit 2 times.

**DANCE 52C. Workshop in Tap I. 2 Units.**

Beginning tap: principles of rhythm and basic tap steps.

Prerequisite: DANCE 52B

Repeatability: May be taken for credit 2 times.

**DANCE 60A. Choreography. 4 Units.**

Beginning-to-intermediate study of principles of dance composition. May include composition assignments for stage and video. By audition, works may be shown quarterly in public studio performances.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 60B. Choreography. 4 Units.**

Beginning-to-intermediate study of principles of dance composition. May include composition assignments for stage and video. By audition, works may be shown quarterly in public studio performances.

Prerequisite: DANCE 60A

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 60C. Choreography. 4 Units.**

Beginning-to-intermediate study of principles of dance composition. May include composition assignments for stage and video. By audition, works may be shown quarterly in public studio performances.

Prerequisite: DANCE 60A and DANCE 60B

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 80. Introduction to Ballet and Modern Dance. 4 Units.**

Survey of nineteenth and twentieth-century ballet, modern dance, and theatre dance.

Overlaps with DANCE 90B, DANCE 90C, DANCE 90A.

Restriction: Non-major only.

(IV, VIII)

**DANCE 81. American Ballet and Modern Dance since 1900. 4 Units.**

A survey of American ballet and modern dance in the twentieth and twenty-first centuries. Lectures are supplemented by video.

Overlaps with DANCE 90C.

Restriction: Non-major only. Dance 81 and Dance 90C may not both be taken for credit.

(IV)

**DANCE 82. Topics in World Dance. 4 Units.**

Various topics in world dance studies focusing on historical, social, and cultural contexts.

Repeatability: May be repeated for credit unlimited times.

(VIII)

**DANCE 83. Dance in Feature Film. 4 Units.**

Dance in film musicals and commercial dance films, concentrating especially on films from the 1930s through the 1970s.

(IV)

**DANCE 85. What Dance Does: From Ballet to Hip-Hop. 4 Units.**

Explores the way dance reflects culture and embodies new ideas. Examples for viewing and analysis come from ballet (with roots in Europe) and hip-hop (with roots in the African diaspora). Themes include gender, perceived racial difference, identity.

(IV)

**DANCE 90A. Dance History I. 4 Units.**

Global perspectives. Topics and histories of dance and movement practices from various parts of the world.

Overlaps with DANCE 80.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

(IV and VIII ).

**DANCE 90B. Dance History II. 4 Units.**

The history of dance in the western tradition from the Renaissance through the 19th century.

Prerequisite: DANCE 90A

Overlaps with DANCE 80.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

(IV and VIII ).

**DANCE 90C. Dance History III. 4 Units.**

The history of dance in the western tradition in the the 20th and 21st centuries.

Prerequisite: DANCE 90B

Overlaps with DANCE 80, DANCE 81.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

(IV ).

**DANCE 100. Kinesiology for Dance. 4 Units.**

The study of the production of dance movement by the musculoskeletal system. Anatomical and dynamic analysis of dance movement.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 103. Pilates. 2 Units.**

Basics of technique emphasizing alignment, breath control, correction of muscular imbalances.

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 104. Pilates Reformer. 2 Units.**

Utilizes the Universal Reformer apparatus, aiding the student in core stabilization, correcting muscular imbalances, increasing flexibility, and improving strength.

Prerequisite: DANCE 103

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 110. World Dance . 2 Units.**

Studio workshop of dances and movement sources of specified countries or areas.

Repeatability: May be taken for credit 6 times as topics vary.

**DANCE 125A. Teaching of Dance. 4 Units.**

Pedagogy. The methods and theory of teaching dance forms.

Prerequisite: DANCE 133A and DANCE 133B and DANCE 133C and DANCE 143A and DANCE 143B and DANCE 143C

Restriction: Upper-division students only. Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 127A. Costume Design for Dance. 4 Units.**

Costume design and construction specific to the body in motion. Theoretical study and practical execution.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 130A. Pointe Class. 2 Units.**

Beginning and intermediate pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 132A and DANCE 132B and DANCE 132C

Repeatability: May be taken for credit 3 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 132A. Studio Workshop in Ballet II. 2 Units.**

Intermediate ballet and beginning pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: (DANCE 30A and DANCE 30B and DANCE 30C) or audition. Prerequisites are for non-Dance majors only.

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**DANCE 132B. Studio Workshop in Ballet II. 2 Units.**

Intermediate ballet and beginning pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 132A

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**DANCE 132C. Studio Workshop in Ballet II. 2 Units.**

Intermediate ballet and beginning pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 132A and DANCE 132B

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**DANCE 133A. Advanced Studio Workshop in Ballet III. 2 Units.**

Advanced intermediate ballet and pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 132C. DANCE 132C with a grade of B+ or better. Placement by audition is also accepted.

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 133B. Advanced Studio Workshop in Ballet III. 2 Units.**

Advanced intermediate ballet and pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 133A

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 133C. Advanced Studio Workshop in Ballet III. 2 Units.**

Advanced intermediate ballet and pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 133A and DANCE 133B

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 134A. Advanced Studio Workshop in Ballet IV. 4 Units.**

Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 133A and DANCE 133B and DANCE 133C. DANCE 133C with a grade of B+ or better. Placement by audition is also accepted.

Repeatability: May be taken for credit 3 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 134B. Advanced Studio Workshop in Ballet IV. 4 Units.**

Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 134A

Repeatability: May be taken for credit 3 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 134C. Advanced Studio Workshop in Ballet IV. 4 Units.**

Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 134A and DANCE 134B

Repeatability: May be taken for credit 3 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 135A. Advanced Studio Workshop in Ballet V. 4 Units.**

Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 134A and DANCE 134B and DANCE 134C. DANCE 134C with a grade of B+ or better. Placement by audition is also accepted.

Repeatability: May be taken for credit 3 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 135B. Advanced Studio Workshop in Ballet V. 4 Units.**

Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 135A

Repeatability: May be taken for credit 3 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 135C. Advanced Studio Workshop in Ballet V. 4 Units.**

Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 135A and DANCE 135B

Repeatability: May be taken for credit 3 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 137. Repertory . 2 Units.**

Rehearsal and performance of repertoire from established ballet, modern, or jazz choreographers.

Prerequisite: (DANCE 133A and DANCE 133B and DANCE 133C) or (DANCE 143A and DANCE 143B and DANCE 143C)

Repeatability: May be taken for credit 3 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 139. Partnering. 2 Units.**

Principles of partnering techniques in various dance performance styles.

Prerequisite: DANCE 133A and DANCE 133B and DANCE 133C and DANCE 143A and DANCE 143B and DANCE 143C

Repeatability: May be taken for credit 4 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 142A. Studio Workshop in Modern II. 2 Units.**

Introduction to the principles of motion, including the use of breath, gravity, spatial awareness, and time values.

Prerequisite: DANCE 40A and DANCE 40B and DANCE 40C. Prerequisites are for non-Dance majors only.

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**DANCE 142B. Studio Workshop in Modern II. 2 Units.**

Introduction to the principles of motion, including the use of breath, gravity, spatial awareness, and time values.

Prerequisite: DANCE 142A

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**DANCE 142C. Studio Workshop in Modern II. 2 Units.**

Introduction to the principles of motion, including the use of breath, gravity, spatial awareness, and time values.

Prerequisite: DANCE 142A and DANCE 142B

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**DANCE 143A. Advanced Studio Workshop in Modern III. 2 Units.**

Builds on fundamentals of Dance 142A-B-C and introduces performance techniques.

Prerequisite: DANCE 142C. DANCE 142C with a grade of B+ or better

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 143B. Advanced Studio Workshop in Modern III. 2 Units.**

Builds on the fundamentals of DANCE 142A-DANCE 142B-DANCE 142C and introduces performance techniques.

Prerequisite: DANCE 143A

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 143C. Advanced Studio Workshop in Modern III. 2 Units.**

Builds on fundamentals of DANCE 142A-DANCE 142B-DANCE 142C and introduces performance techniques.

Prerequisite: DANCE 143A and DANCE 143B

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 144A. Advanced Studio Workshop in Modern IV. 2 Units.**

Synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Prerequisite: DANCE 143C. DANCE 143C with a grade of B+ or better

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 144B. Advanced Studio Workshop in Modern IV. 2 Units.**

Synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Prerequisite: DANCE 144A

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 144C. Advanced Studio Workshop in Modern IV. 2 Units.**

Synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Prerequisite: DANCE 144A and DANCE 144B

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 152A. Intermediate Studio Workshop in Jazz II. 2 Units.**

Intermediate jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: Prerequisites for non-Dance majors: DANCE 50A and DANCE 50B and DANCE 50C.

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**DANCE 152B. Intermediate Studio Workshop in Jazz II. 2 Units.**

Intermediate jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 152A

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**DANCE 152C. Intermediate Studio Workshop in Jazz II. 2 Units.**

Intermediate jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 152A and DANCE 152B

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors have first consideration for enrollment. Dance - Choreography Majors have first consideration for enrollment. Dance - Performance Majors have first consideration for enrollment.

**DANCE 153A. Advanced Studio Workshop in Jazz III. 2 Units.**

Advanced jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 152C. DANCE 152C with a grade of B+ or better

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 153B. Advanced Studio Workshop in Jazz III. 2 Units.**

Advanced jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 153A

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 153C. Advanced Studio Workshop in Jazz III. 2 Units.**

Advanced jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 153A and DANCE 153B

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 154A. Advanced Jazz: Performance Techniques IV. 2 Units.**

Advanced jazz emphasizing performance techniques.

Prerequisite: DANCE 153C. DANCE 153C with a grade of B+ or better

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 154B. Advanced Jazz: Performance Techniques IV. 2 Units.**

Advanced jazz emphasizing performance techniques.

Prerequisite: DANCE 154A

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 154C. Advanced Jazz: Performance Techniques IV. 2 Units.**

Advanced jazz emphasizing performance techniques.

Prerequisite: DANCE 154A and DANCE 154B

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only.

**DANCE 160. Improvisation. 2 Units.**

Structured and experiential improvisation to heighten the personal intuitive processes, the kinesthetic sense, spatial and temporal awareness, and to encourage insights into the potential movement resources of the individual for performance and choreography. Course encourages freedom of exploration.

Repeatability: May be taken for credit 2 times.

**DANCE 162A. Choreography II. 4 Units.**

Directed choreographic projects for stage or video integrating the elements of stagecraft. In process or completed works may be shown quarterly in public studio or stage performances.

Prerequisite: DANCE 60A and DANCE 60B and DANCE 60C. Audition required.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 162B. Choreography II. 4 Units.**

Directed choreographic projects for stage or video integrating the elements of stagecraft. In process or completed works may be shown quarterly in public studio or stage performances.

Prerequisite: DANCE 162A. Audition required.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 162C. Choreography II. 4 Units.**

Directed choreographic projects for stage or video integrating the elements of stagecraft. In process or completed works may be shown quarterly in public studio or stage performances.

Prerequisite: DANCE 162A and DANCE 162B. Audition required.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 163. Dance and Video Technology. 4 Units.**

Introduction to video and audio documentation of dance performance. Integrating dance performance within the film aesthetic. Techniques and technologies of video cameras, formats, editing, and projection. Overview of video compression and DVD authoring.

Prerequisite: DANCE 60A

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 164. Screendance. 4 Units.**

Overview of dance for film and choreography for the camera. Aesthetics of creating dance for the screen. Approaches for delivery of dance films to an audience, including projection, DVD, Web, and mobile devices. A final dance film project is required.

Prerequisite: DANCE 163

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 165. Choreographic Projects. 1-4 Units.**

Supervised choreographic projects for workshop productions.

Prerequisite: Audition required.

Repeatability: May be taken for credit 2 times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 170. Dance Performance. 1-4 Units.**

Rehearsal and performance in a faculty-choreographed production.

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

**DANCE 171. Dance Workshop. 1-4 Units.**

Rehearsal and performance in a student-choreographed production.

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

**DANCE 172. Master of Fine Arts Concert. 1-4 Units.**

Rehearsal and performance in a graduate student-choreographed production.

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

**DANCE 174. UCI Dance Ensemble Performance. 1-4 Units.**

Performance with the UCI Dance Ensemble.

Repeatability: May be taken for credit 6 times.

Restriction: Sophomores only. Upper-division students only.

**DANCE 176. UCI Jazz Dance Ensemble. 2-4 Units.**

Rehearsal and performance in theatrical jazz dance, designed to provide an experience in assimilating various styles of jazz dance and in refining dance performance techniques. Students will master aspects of dance company promotion.

Prerequisite: DANCE 152A and DANCE 152B and DANCE 152C

Repeatability: May be taken for credit 6 times.

Restriction: Sophomores only. Upper-division students only.

**DANCE 178. Performance Laboratory. 2 Units.**

Rehearsal and performance of graduate student-choreographed dance works for the M.F.A. thesis.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**DANCE 179. UCI Etude Ensemble. 4 Units.**

Repertory and performances by undergraduate Dance majors. Concert presentations on and off campus. Faculty directed, student/faculty choreographed.

Prerequisite: Audition required.

Repeatability: May be taken for credit 9 times.

Restriction: Sophomores only. Upper-division students only.

**DANCE 180C. Laban Studies. 4 Units.**

Laban movement analysis.

Prerequisite: DANCE 21A

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 185W. Critical Issues in Dance. 4 Units.**

Critical thinking and writing about dance, with a section on dance criticism and a major emphasis on persuasive writing about significant issues in the dance world.

Prerequisite: DANCE 90A and DANCE 90B and DANCE 90C. Satisfactory completion of the lower-division writing requirement.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**(Ib)**

**DANCE 193. Selected Topics in Dance. 1-4 Units.**

Directed group studies of topics in dance.

Repeatability: May be taken for credit 3 times as topics vary.

**DANCE 194. Topics Vary. 4 Units.**

Seminar in Dance Studies. Variable topics related to gender, race, politics, and dance writing, and criticism, with attention to linking dance practices to the wider world.

Prerequisite: DANCE 90A and DANCE 90B and DANCE 90C

Repeatability: Unlimited as topics vary.

**DANCE 195. Arts Management. 4 Units.**

Designed for students interested in the developmental and management of nonprofit arts organizations. Examines the organizational structure and areas of operation such as marketing, fundraising, budgeting, production, and administration.

Repeatability: May be taken for credit 2 times.

**DANCE 197. Independent Study. 1-4 Units.**

Individual independent projects in experimental laboratory, library, field, performance, under instructor's direction. Students can receive conceptual, creative, and theoretical instruction in the successful completion of a written report or performance.

Repeatability: May be repeated for credit unlimited times.

**DANCE 199. Senior Thesis. 4 Units.**

Directed research or creative activity for senior Dance majors. Research consists of a substantial essay on dance history, research in dance science, or the creation of original or reconstructed choreography.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Dance Majors only. Dance - Choreography Majors only. Dance - Performance Majors only.

**DANCE 201. Seminar in Kinesiology for Dance. 4 Units.**

Introduction to the anatomical, biomechanical, and physiological principles of dance movement.

Prerequisite: DANCE 100

**DANCE 222. Musical Resources. 4 Units.**

Detailed study of music as it relates to dance. Historical overview of musical form, style, and other elements. Analysis of various affinities between music and dance. Practical applications.

**DANCE 225. Seminar in the Teaching of Dance Techniques. 4 Units.**

Principles and theories of teaching dance techniques. Supervised presentation and teaching of technique class.

**DANCE 231A. Graduate Studio: Ballet. 2 Units.**

Advanced ballet, pointe work, and performance style: principles of the classical ballet with an emphasis on technique.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

**DANCE 231B. Graduate Studio: Ballet. 2 Units.**

Advanced ballet, pointe work, and performance style: principles of the classical ballet with an emphasis on technique.

Prerequisite: DANCE 231A

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

**DANCE 231C. Graduate Studio: Ballet. 2 Units.**

Advanced ballet, pointe work, and performance style: principles of the classical ballet with an emphasis on technique.

Prerequisite: DANCE 231B

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

**DANCE 241A. Graduate Studio: Modern. 2 Units.**

Advanced modern dance: synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

**DANCE 241B. Graduate Studio: Modern. 2 Units.**

Advanced modern dance: synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Prerequisite: DANCE 241A

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

**DANCE 241C. Graduate Studio: Modern. 2 Units.**

Advanced modern dance: synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Prerequisite: DANCE 241B

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

**DANCE 251A. Graduate Studio: Jazz. 2 Units.**

Principles of jazz dance and contemporary forms, incorporating the personal views of the instructor.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

**DANCE 251B. Graduate Studio: Jazz. 2 Units.**

Principles of jazz dance and contemporary forms, incorporating the personal views of the instructor.

Prerequisite: DANCE 251A

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

**DANCE 251C. Graduate Studio: Jazz. 2 Units.**

Principles of jazz dance and contemporary forms, incorporating the personal views of the instructor.

Prerequisite: DANCE 251B

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

**DANCE 252A. Graduate Studio: Tap. 2 Units.**

An overview of tap concentrating on the development of various technique forms using basic and intermediate principles.

Repeatability: May be taken for credit 4 times.

**DANCE 252B. Graduate Studio: Tap. 2 Units.**

An overview of tap concentrating on the development of various technique forms using basic and intermediate principles.

Prerequisite: DANCE 252A

Repeatability: May be taken for credit 4 times.

**DANCE 252C. Graduate Studio: Tap. 2 Units.**

An overview of tap concentrating on the development of various technique forms using basic and intermediate principles.

Prerequisite: DANCE 252B

Repeatability: May be taken for credit 4 times.

**DANCE 261A. Graduate Studio in Choreography. 4 Units.**

Graduate work in dance composition emphasizing the individual aesthetic. Assignments in movement discovery, solo and group forms, with the main emphasis on independent work.

Repeatability: May be repeated for credit unlimited times.

**DANCE 261B. Graduate Studio in Choreography. 4 Units.**

Graduate work in dance composition emphasizing the individual aesthetic. Assignments in movement discovery, solo and group forms, with the main emphasis on independent work.

Prerequisite: DANCE 261A

Repeatability: May be repeated for credit unlimited times.

**DANCE 264. Screendance. 4 Units.**

Overview of dance for film and choreography for the camera. Aesthetics of creating dance for the screen. Approaches for delivery of dance films to an audience, including projection, DVD, Web, and mobile devices. A final dance film project is required.

Prerequisite: DANCE 281

**DANCE 281. Dance and Video Technology. 4 Units.**

Introduction to video and audio documentation of dance performance. Integrating dance performance within the film aesthetic. Techniques and technologies of video cameras, formats, editing, and projection. Overview of video compression and DVD authoring.

**DANCE 282. Seminar in Movement Analysis. 4 Units.**

Theories of movement analysis and nonverbal communication applied to dance.

**DANCE 283. Critical Issues in Dance. 4 Units.**

Reading, writing, discussing, and presenting key issues that relate to dance studies. Basics of dance analysis and criticism. Special emphasis on effective ways of defining, clarifying, and arguing for points of view.

Prerequisite: DANCE 284

**DANCE 284. Bibliography and Research. 4 Units.**

Understanding the field of dance studies, available resources, research methods, and academic formats in preparation for thesis writing.

**DANCE 285. Graduate Projects. 4 Units.**

Projects may be educational, choreographic, scientific, historical, or philosophical in scope and must have faculty advisor approval.

Repeatability: May be taken for credit 6 times.

**DANCE 286. Thesis. 4 Units.**

Substantial research in a topic approved by the student's graduate committee. Results of the research must be written in approved thesis style.

Repeatability: May be taken for credit 6 times.

**DANCE 287. Graduate Lectures in Dance. 1-4 Units.**

A series of lectures and discussions of announced topics in dance. Content may be from history, ethnology, notation, medicine, music, or other areas in the field.

Repeatability: Unlimited as topics vary.

**DANCE 296. Proseminar in Dance History. 4 Units.**

Discussion seminar with emphasis on reading and thinking about problems in dance history; presentation of oral and written reports.

Repeatability: May be taken for credit 2 times as topics vary.

**DANCE 297. Directed Reading. 1-4 Units.**

Topic to be approved by instructor. Paper required.

Repeatability: May be repeated for credit unlimited times.

**DANCE 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Dance Majors only.

## Dance, B.A.

The Bachelor of Arts (B.A.) is designed for those who wish to obtain a broad undergraduate background as preparation for careers or graduate work and related fields. It offers students a dance education that stresses performance and choreography, and, at the same time, intellectual depth and scope. In addition to the core, 12 units of elective Dance courses are required. The remaining elective units required for graduation may be chosen from Dance or other disciplines in relation to a student's individual interest. While the program of study in Dance stresses technical proficiency and academic understanding in dance, the B.A. degree program also enables students to pursue elective subjects in their special areas of interest in other academic disciplines.

### Proficiency Levels

In addition to meeting the general requirements for admission to UCI, applicants must demonstrate technical and creative promise. The Department holds annual entrance auditions for potential freshmen and transfer students during the winter quarter prior to the fall quarter when entrance is anticipated. First-year students wishing to major in Dance must be at technique level II in at least one of the three major genres (ballet, modern, jazz).

Placement auditions for admitted students are held during Welcome Week to determine levels of technical ability for placement in courses. It is suggested that transfer students wishing to pursue a B.A. in Dance complete, in addition to their general education requirements, one course in choreography, two courses in dance technique, and one course in music for dancers prior to transfer to UCI.

Transfer students wishing to pursue the B.F.A. must declare their intention in writing at the time of their entrance audition and demonstrate technique and/or choreography levels appropriate to their year. It is suggested that transfer students complete, in addition to their general education requirements, one course in choreography, two courses in dance technique, one course in music for dancers, and one course in dance performance prior to transfer to UCI.

Students deficient in level of performance or academic preparation should be prepared to extend their studies beyond the normal four-year program in order to meet the requirements for graduation.

**All students must meet the University Requirements.**

**School Requirements: None.**

**Departmental Requirements for the Major**

A. Complete the following:

DANCE 2	Dance Health and Injury Prevention
DANCE 21A	Music for Dancers
DANCE 60A	Choreography
DANCE 90A	Dance History I
DANCE 90B	Dance History II
DANCE 90C	Dance History III
DANCE 100	Kinesiology for Dance
DANCE 180C	Laban Studies
DANCE 185	

B. Complete one four-unit course from the following:

DANCE 125A	Teaching of Dance
DANCE 127A	Costume Design for Dance
DANCE 162A	Choreography II
DANCE 163	Dance and Video Technology
DANCE 164	Screendance
DANCE 180A	
DANCE 194	Topics Vary
DANCE 195	Arts Management

C. Technique: Students must complete at least one Dance technique course (ballet, modern dance, jazz, Spanish, world dance, pointe, social dance, tap, or repertory) each quarter in residence. At a minimum, students must complete level II in Ballet, Modern, and Jazz (DANCE 132A-DANCE 132B-DANCE 132C, DANCE 142A-DANCE 142B-DANCE 142C, and DANCE 152A-DANCE 152B-DANCE 152C) and level III in either Ballet or Modern (DANCE 133A-DANCE 133B-DANCE 133C or DANCE 143A-DANCE 143B-DANCE 143C). Students who place above level II in any technique must take a year of that technique at the level in which they are placed. All students must also complete one course chosen from DANCE 14 (Social Dance), DANCE 52A, DANCE 52B, DANCE 52C (Tap I) or DANCE 110 (World Dance). NOTE: Units earned in ballet, jazz, and modern technique courses beyond the required amount do not count toward departmental elective requirements but may count toward University requirements.

D. Performance:

Select two of the following:

DANCE 170	Dance Performance
DANCE 171	Dance Workshop
DANCE 172	Master of Fine Arts Concert

E. Four units of DRAMA 101 (Theater Production) must be taken during the first year in residence.

F. Electives: 12 units of electives must be completed within the major.

## Sample Program for Freshmen

Fall	Winter	Spring
WRITING 39B	WRITING 39C	DANCE 2
DANCE 21A	General Education	General Education
Technique	General Education	General Education
General Education	Technique	Technique
	Drama 101 (2 units)	Drama 101 (2 units)

Careers in dance require excellent training and extraordinary discipline, tenacity, and dedication. Graduates of the Department have an excellent record of placement in the many fields of dance. Some have become professional dancers in ballet companies (including the Metropolitan Opera Ballet, San Francisco Ballet, Nashville Ballet, Complexions Contemporary Ballet, and Joffrey Ballet); in modern dance companies (including Hubbard Street Dance Company, MOMIX, and Martha Graham Dance Ensemble); in touring companies (including Wicked, Newsies, Dirty Dancing, The Lion King, Fame: The Musical, Carousel, and Cirque du Soleil); and in films, television, and theatre.

In addition to training for professional dance performance and choreography, the major in dance serves as a basis for graduate study or job opportunities in fields such as dance history, dance science, dance pedagogy, dance reconstruction, dance criticism, dance video, and technology. Related fields, such as arts administration, law in relation to the arts, arts therapies, design and production, and music also offer positions for graduates. Students who are interested in a career in athletic training, physical therapy, or dance science will find a major in Dance, with related course work in chemistry, physics, biology, and mathematics, to be excellent preparation for further study.

## Dance, B.F.A.

The Bachelor of Fine Arts (B.F.A.) program with specializations in Performance and Choreography, is designed for students who wish to prepare intensively for careers in those areas. The courses required in addition to the core are primarily in Dance. The B.F.A. program allows for a few free electives in other areas. Admission to the B.F.A. program with a specialization in Choreography is by faculty approval only.

The B.F.A. program with a specialization in Performance does not require additional faculty approval beyond the required audition for admission to the Dance major; students should declare their intention to pursue this specialization during spring quarter of their sophomore year.

### Proficiency Levels

In addition to meeting the general requirements for admission to UCI, applicants must demonstrate technical and creative promise. The Department holds annual entrance auditions for potential freshmen and transfer students during the winter quarter prior to the fall quarter when entrance is anticipated. First-year students wishing to major in Dance must be at technique level II in at least one of the three major genres (ballet, modern, jazz).

Placement auditions for admitted students are held during Welcome Week to determine levels of technical ability for placement in courses. It is suggested that transfer students wishing to pursue a B.A. in Dance complete, in addition to their general education requirements, one course in choreography, two courses in dance technique, and one course in music for dancers prior to transfer to UCI.

Transfer students wishing to pursue the B.F.A. must declare their intention in writing at the time of their entrance audition and demonstrate technique and/or choreography levels appropriate to their year. It is suggested that transfer students complete, in addition to their general education requirements, one course in choreography, two courses in dance technique, one course in music for dancers, and one course in dance performance prior to transfer to UCI.

Students deficient in level of performance or academic preparation should be prepared to extend their studies beyond the normal four-year program in order to meet the requirements for graduation.

**All students must meet the University Requirements.**

**School Requirements: None.**

### Departmental Requirements for the Major

Students must complete the departmental requirements as listed for the B.A. degree in Dance. In addition, B.F.A. students must complete the requirements for either the specialization in Choreography or Performance.

#### Choreography Specialization:

DANCE 60B	Choreography
DANCE 60C	Choreography
DRAMA 30A	Acting
DRAMA 50C	Introduction to Lighting Design

One course selected from the following:

DRAMA 50A	Introduction to Costume Design
DRAMA 50B	Introduction to Scenic Design
DRAMA 50D	Introduction to Sound Design
DRAMA 50E	Introduction to Stage Management
DANCE 127A	Costume Design for Dance

Any three quarters of courses chosen from the following:

DANCE 162A- 162B- 162C	Choreography II and Choreography II and Choreography II
DANCE 164	Screendance

Select two courses in DANCE 165 <sup>1</sup>

Four units (one or two courses) in Art History, Music, Studio Art, or Drama (in addition to DRAMA 30A, DRAMA 50C, and DRAMA 101 requirements).

#### Performance Specialization:

Technique: At a minimum, students must complete level III in Ballet, Modern, and Jazz (DANCE 133A, DANCE 133B, DANCE 133C, DANCE 143A, DANCE 143B, DANCE 143C, and DANCE 153A, DANCE 153B, DANCE 153C) and level IV in either Ballet or Modern (DANCE 134A-DANCE 134B-DANCE 134C or DANCE 144A-DANCE 144B-DANCE 144C). Students who place above level III in any technique must take a year of that technique at the level in which they are placed.

DANCE 139 Partnering

Performance:

DANCE 137 Repertory  
or DANCE 179 UCI Etude Ensemble

DANCE 170 Dance Performance (series) <sup>2</sup>

Select one of the following:

DRAMA 30A Acting

or a fourth additional performance in the DANCE 170 series.

- <sup>1</sup> Choreographic Projects—one original choreographic work, approved by the faculty, must be presented in both the junior and senior years.
- <sup>2</sup> DANCE 170 series: must be in three additional performances beyond the B.A. requirements, one of which must be DANCE 170, DANCE 171, DANCE 172, or DANCE 174. DANCE 171 and DANCE 172 may be repeated for credit. Students must demonstrate proficiency in at least two dance genres in these performances.

## Sample Program for Freshmen

Fall	Winter	Spring
WRITING 39B	WRITING 39C	DANCE 2
DANCE 21A	General Education	General Education
Technique	General Education	General Education
General Education	Technique	Technique
	Drama 101 (2 units)	Drama 101 (2 units)

Careers in dance require excellent training and extraordinary discipline, tenacity, and dedication. Graduates of the Department have an excellent record of placement in the many fields of dance. Some have become professional dancers in ballet companies (including the Metropolitan Opera Ballet, San Francisco Ballet, Nashville Ballet, Complexions Contemporary Ballet, and Joffrey Ballet); in modern dance companies (including Hubbard Street Dance Company, MOMIX, and Martha Graham Dance Ensemble); in touring companies (including Wicked, Newsies, Dirty Dancing, The Lion King, Fame: The Musical, Carousel, and Cirque du Soleil); and in films, television, and theatre.

In addition to training for professional dance performance and choreography, the major in dance serves as a basis for graduate study or job opportunities in fields such as dance history, dance science, dance pedagogy, dance reconstruction, dance criticism, dance video, and technology. Related fields, such as arts administration, law in relation to the arts, arts therapies, design and production, and music also offer positions for graduates. Students who are interested in a career in athletic training, physical therapy, or dance science will find a major in Dance, with related course work in chemistry, physics, biology, and mathematics, to be excellent preparation for further study.

## Dance, M.F.A.

The M.F.A. program is an intensive program requiring a core of courses in studio and academic areas. The student's individual area of interest is explored through the thesis project in the second year. Projects or written theses may be pursued in choreography, video choreography, dance training, dance history and theory, ethnography, dance science, dance reconstruction, and dance and digital technology.

Applicants for admission to the degree program must meet the general requirements for admission to graduate study and hold a B.A. or B.F.A. in Dance or the equivalent. Candidates must meet the minimum requirements for the B.A. in Dance at UCI. Proposals for three choreographic works that could be completed in the graduate program must be submitted. An audition in ballet and modern technique is required for admission and is held in winter quarter. At this audition, applicants must also present a prepared five-minute choreographed piece, which may be a solo performed by the applicant, or a videotape of the applicant's choreography. Interviews with faculty are conducted following the audition, and applicants are given a short writing exercise.

## General Degree Requirements

Normally two years of residence are required. Each candidate must enroll for three courses each quarter for six quarters, exclusive of summer sessions.

In the second year, satisfactory attainment must be demonstrated by a major thesis; in choreography this consists of the composition and production of a choreographic work; in other areas, such as dance history, dance training, or dance science, this consists of a written thesis or a comprehensive project in a chosen area of study. All theses must be defended in a one-hour oral examination which may also test the candidate's general knowledge in the area.

The normative time to degree for students in the M.F.A. program is two years. Residence is required. The normative time to degree can be extended to three years only when a student requests extra time for more involved thesis research through a petition to the Chair of the Department. The maximum time to degree is three years. Students who do not complete the degree in three years will be dropped from the program.

## Specific Degree Requirements

Seventy-two quarter units in graduate or approved upper-division undergraduate courses must be completed with a grade of at least B in each course. No more than 20 units in upper-division courses may count toward the degree. Fulfillment of the technique course requirements must be approved by the faculty advisor.

A. Complete the following:

DANCE 201	Seminar in Kinesiology for Dance
DANCE 222	Musical Resources
DANCE 225	Seminar in the Teaching of Dance Techniques
DANCE 261A- 261B	Graduate Studio in Choreography and Graduate Studio in Choreography
DANCE 281	Dance and Video Technology
DANCE 282	Seminar in Movement Analysis
DANCE 283	Critical Issues in Dance
DANCE 284	Bibliography and Research
DANCE 286	Thesis
DANCE 296	Proseminar in Dance History

Also required: Six courses chosen from any graduate or upper-division dance technique course.

By the end of their first year, students will choose their area of study for their thesis. Students who wish to produce a choreographic thesis must apply to the graduate choreography advisor during winter of their first year. The faculty will review the applications and will consider the quality of the student's work in DANCE 261, as well as the choreographic proposal, in making their selection.

Graduate students are encouraged to apply for teaching assistantships in areas such as notation, dance science, history, music for dancers, choreography, world dance, dance video, critical issues, and all technique classes. Students with expertise in any of these areas are given special consideration.

## Department of Drama

### Donald D. Hill, Department Chair

249 Drama Building

949-824-6614

<http://drama.arts.uci.edu/>

The Department of Drama, widely recognized and ranked as one of the top ten training programs in the country, combines broad liberal study and comprehensive training in several sub-disciplines of drama. The Department of Drama produces a full season of plays, musicals, and world premieres with varying dimensions and audience/actor relationships.

The vision of the Department of Drama's founding faculty was "to produce students who combine a critical intelligence with disciplined theatrical experience." To this end, the Department fosters an environment of creativity, in-depth learning of design, performance, and scholarly activity. The Department's rare combination of distinguished permanent faculty, high profile guest master class teachers, an interactive student population, and excellent facilities allows it to offer a program that is creatively robust and intellectually rigorous. The current faculty includes active and highly regarded individuals in their fields of practice, and so remains able to impart current, relevant knowledge to drama students.

## Department Facilities

The Department's facilities include the following theatre spaces:

Irvine Barclay Theatre - 760-seat proscenium stage

Claire Trevor Theatre - 290-seat proscenium stage

Winifred Smith Hall - 230-seat thrust platform stage

Robert Cohen Theatre - 80-seat 'black box' stage

Little Theatre - 165-seat proscenium stage

Nixon Theatre - 60-seat laboratory and cabaret stage

Productions have been mounted in the school's six theatre spaces, University Art Gallery, Motion Capture Studio, Beall Center for Art and Technology, Experimental Media Performance Lab (xMPL), Maya Lin designed Arts Plaza, Jerzy Grotowski-inspired UCI Barn and Yurt, and the New Swan Theater (featuring a buildable Elizabethan theatre).

- Drama and Theatre, Ph.D.
- Drama, B.A.
- Drama, M.F.A.
- Drama, Minor
- Music Theatre, B.F.A.

## Faculty

Lonnie R. Alcaraz, M.F.A. University of California, Irvine, *Professor of Drama* (lighting design, digital imaging)

Stephen F. Barker, Ph.D. University of Arizona, *Dean of the Claire Trevor School of the Arts and Professor of Drama* (post-modern theatre, Beckett, critical theory)

Cynthia M. Bassham, M.F.A. American Conservatory Theatre, *Associate Professor of Teaching of Drama* (voice, speech for actors, acting)

Andrew L. Borba, M.F.A. New York University, *Co-Head of Acting and Assistant Professor of Drama* (acting)

Richard A. Brestoff, M.F.A. New York University, *Professor of Drama* (film and television acting)

Juliette A. Carrillo, M.F.A. Yale University, *Assistant Professor of Drama* (directing)

Dennis R. Castellano, M.F.A. University of California, Irvine, *Professor of Teaching Emeritus of Drama* (music theatre)

Robert S. Cohen, D.F.A. Yale University, *Professor Emeritus of Drama* (acting theory, acting, directing)

Myrona L. DeLaney, Ed.D. University of California, Irvine, *Head of Music Theatre and Associate Professor of Teaching of Drama* (music theatre, singing, acting)

Holly Durbin, M.F.A. University of California, Los Angeles, *Professor of Drama* (costume design)

Clifford L. Faulkner, M.A. California State University, Long Beach, *Professor of Teaching Emeritus of Drama* (scenery design, history of design, gay theatre)

Keith Fowler, D.F.A. Yale University, *Professor Emeritus of Drama* (directing, acting)

Marcia G. Froehlich, M.F.A. University of Michigan, *Assistant Professor of Drama* (costume design)

Douglas S. Goheen, Ph.D. University of Denver, *Professor Emeritus of Drama* (scenery design, digital imaging)

George C. Harvey, M.F.A. University of California, Irvine, *Professor Emeritus of Drama* (artistic direction, producing, lighting design)

Donald D. Hill, M.F.A. University of Southern California, *Department Chair and Co-Head of Stage Management, Associate Producer and Professor of Teaching of Drama* (stage management, directing, acting)

Michael K. Hooker, M.F.A. California Institute of the Arts, *Head of Design and Professor of Drama* (sound design)

Ketu H. Katrak, Ph.D. Bryn Mawr College, *Professor of Drama; Comparative Literature; English* (drama and performance, African drama and Ancient Sanskrit drama [from India], postcolonial literature and theory, women writers and feminist theory)

Madeline Kozlowski, M.F.A. Brandeis University, *Professor Emerita of Drama* (costume design)

Anthony James Kubiak, Ph.D. University of Wisconsin-Madison, *Professor of Drama* (American and modern drama, modern poetry, critical theory, philosophy)

Daphne Pi-Wei Lei, Ph.D. Tufts University, *Head of Doctoral Studies and Professor of Drama; Asian American Studies* (Asian theatre, Asian American theatre, intercultural theatre, gender theory, performance theory)

Annie M. Loui, *Co-Head of Acting and Professor of Drama* (movement, directing, acting)

Mihai Maniutiu, Ph.D. Caragiale Academy of Theatrical Arts and Cinematography, *UCI Distinguished Professor of Drama* (directing)

Ian Andrew Munro, Ph.D. Harvard University, *Associate Professor of Drama; English* (European drama and performance, early modern popular culture, theatrical performance of wit)

Vincent Olivieri, M.F.A. Yale University, *Associate Dean of Graduate Affairs and Professor of Drama* (sound design)

Jane M. Page, M.F.A. Indiana University, *Head of Directing and Professor of Drama* (directing, acting)

Andrew A. Palermo, B.F.A. University of Cincinnati, College-Conservatory of Music, *Associate Professor of Drama* (music theatre choreography)

Janelle Reinelt, Ph.D. Stanford University, *Professor Emerita of Drama* (British theatre, political theory, performance)

Bryan R. Reynolds, Ph.D. Harvard University, *UCI Chancellor's Professor and Claire Trevor and Professor of Drama* (Shakespeare, Renaissance drama, critical theory, feminist theory, performance theory, cultural studies)

Tara Rodman, Ph.D. Northwestern University, *Assistant Professor of Drama; Asian American Studies* (modernist performance, Japanese theatre and dance, transnationalism, racial formation, global Asias)

Eli Simon, M.F.A. Brandeis University, *UCI Chancellor's Professor and Professor of Drama* (acting, directing)

Jaymi Smith, B.F.A. DePaul University, *Professor of Drama* (lighting design)

Philip D. Thompson, M.F.A. University of California, Irvine, *Professor of Drama* (voice, speech for actors, acting)

Richard J. Triplett, M.A. Otis Art Institute, *Professor Emeritus of Drama* (scenery and costume design, history of design)

Joel R. Veenstra, M.F.A. University of California, Irvine, *Co-Head of Stage Management and Associate Professor of Teaching of Drama* (stage management, acting)

## Courses

### **DRAMA 10. Introduction to Theatre. 4 Units.**

An interactive introduction to the world of theatre that serves to develop an appreciation of theatrical arts, to establish an awareness of landmarks within the performance history, and to create an understanding of the collaborative roles and departments that exist.

(IV)

### **DRAMA 11. The Rock and Roll Spectacle Show. 4 Units.**

A thorough overview to the development and cultural significance of the Rock 'n' Roll Spectacle show. Focus on historical and recent developments of the spectacle show, trends in the aesthetics of the field, and various sub-genres.

(IV)

### **DRAMA 14. Performing Rock 'N' Roll. 4 Units.**

Explores major movements in the history of rock 'n' roll in terms of performance, not virtuosity necessarily of the performers as musicians, rather as performances of aesthetics in modes of embodied ideology, iconoclastic spectacle, mixed media fashion, and subcultural formation.

### **DRAMA 15. Performance Now. 4 Units.**

Exposes students to what is most current in the world of performance and theatre. Begins with a series of lectures on the idea of performance, and the various theories that frame it.

Restriction: Music Theatre Majors have first consideration for enrollment. Drama Majors have first consideration for enrollment.

(IV)

### **DRAMA 16. Performing Culture. 4 Units.**

Culture, aesthetics, and ideology (combined in the concept 'subculture') work to fashion social identities. Using theories and methodologies of performance studies, with an emphasis on American culture, this course explores why and how culture is reinforced through performance.

(IV)

### **DRAMA 20A. Culture in Performance. 4 Units.**

A three-quarter foundation series exploring the rich depth of theatre, drama, and other genres of performance across a wide variety of worldwide forms, for performer and audience.

(IV)

**DRAMA 20B. Culture in Performance. 4 Units.**

A three-quarter foundation series exploring the rich depth of theatre, drama, and other genres of performance across a wide variety of worldwide forms, for performer and audience.

(IV)

**DRAMA 20C. Culture in Performance. 4 Units.**

A three-quarter foundation series exploring the rich depth of theatre, drama, and other genres of performance across a wide variety of worldwide forms, for performer and audience.

(IV)

**DRAMA 30A. Acting. 4 Units.**

Focuses on Stanislavski-based terminology and technique through theatre exercises and improvisation. The first part of a one-year series in basic acting technique and discipline.

Repeatability: May be taken for credit 2 times.

Restriction: Music Theatre Majors have first consideration for enrollment. Drama Majors have first consideration for enrollment.

**DRAMA 30B. Acting. 4 Units.**

Focuses on scene work and character development. The second part of a one-year series in basic acting technique and discipline.

Prerequisite: DRAMA 30A

Repeatability: May be taken for credit 2 times.

Restriction: Music Theatre Majors have first consideration for enrollment. Drama Majors have first consideration for enrollment.

**DRAMA 30C. Acting. 4 Units.**

Focuses on monologues, auditions, callbacks, and the profession of acting. The third part of a one-year series in basic acting technique and discipline.

Prerequisite: DRAMA 30A and DRAMA 30B

Repeatability: May be taken for credit 2 times.

Restriction: Music Theatre Majors have first consideration for enrollment. Drama Majors have first consideration for enrollment.

**DRAMA 34. Movement for Actors. 4 Units.**

A studio course in fundamentals of stretch, strength, and alignment; exploring spatial awareness and physical control through mime isolations, techniques, and related improvisation.

Repeatability: May be taken for credit 3 times.

**DRAMA 35. Speech for the Theatre. 4 Units.**

An introductory course in voice and speech for actors, combining the body-based approach to voice developed by Fitzmaurice, and speech work of Knight and Thompson. Designed for the needs of actors and is not a public speaking course.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 40A. Development of Drama. 4 Units.**

The development of Western Drama, concentrating on the drama's intellectual, social, and artistic foundations. About 10 plays and supplementary critical material are read each quarter. Greek Drama through Shakespeare.

Prerequisite or corequisite: DRAMA 10

Restriction: Music Theatre Majors have first consideration for enrollment. Drama Majors have first consideration for enrollment.

(IV and VIII ).

**DRAMA 40B. Development of Drama. 4 Units.**

The development of Western Drama, concentrating on the drama's intellectual, social, and artistic foundations. About 10 plays and supplementary critical material are read each quarter. Restoration Drama through Ibsen.

Prerequisite or corequisite: DRAMA 10

Restriction: Music Theatre Majors have first consideration for enrollment. Drama Majors have first consideration for enrollment.

(IV and VIII ).

**DRAMA 40C. Development of Drama. 4 Units.**

The development of Western Drama, concentrating on the drama's intellectual, social, and artistic foundations. About 10 plays and supplementary material are read each quarter. Contemporary Drama. Post Naturalistic theatre.

Prerequisite or corequisite: DRAMA 10

Restriction: Music Theatre Majors have first consideration for enrollment. Drama Majors have first consideration for enrollment.

(IV and VIII ).

**DRAMA 50A. Introduction to Costume Design. 4 Units.**

Introduction to the process and procedures employed by the costume designer for the theatre. The elements of design are discussed in the context of character development, historical period, and style. Exercises extend to drawing, rendering, and investigation of human proportions.

Prerequisite or corequisite: DRAMA 10

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 50B. Introduction to Scenic Design. 4 Units.**

Introduction to the principles and practice of scenic design. Weekly problems include research into various periods and styles of production with an emphasis on the conceptual idea. Perspective drawing, rendering, and model building are covered in studio exercises and assignments.

Prerequisite or corequisite: DRAMA 10

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 50C. Introduction to Lighting Design. 4 Units.**

Introduction to the principles, theories, and equipment employed by the lighting designer for the stage. Areas of investigation include history, technology, and script analysis. Detailed studio attention is given to the theory and practice of design.

Prerequisite or corequisite: DRAMA 10

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 50D. Introduction to Sound Design. 4 Units.**

Principles, theories, equipment use, and terminology employed by the sound designer for the stage. Areas of study include history, technology, and script analysis. Focuses on the theory and practice of design.

Prerequisite or corequisite: DRAMA 10

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 50E. Introduction to Stage Management. 4 Units.**

A basic study of theatrical, dance, and opera stage management practices, forms, and methods, from first script reading to closing night. Opportunity to observe professionals at work in regional and touring situations as available.

Prerequisite or corequisite: DRAMA 10

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 60. Topics in Advanced Stage Management. 4 Units.**

Nurtures a greater appreciation for the stage manager and his or her process, and supports students who are interested in pursuing a career in professional stage management.

Repeatability: May be taken for credit 3 times as topics vary.

**DRAMA 65. Music Theatre Workshop I. 2 Units.**

Basic vocal technique and characterization of musical theatre repertoire explored.

Prerequisite: Audition required.

Repeatability: May be taken for credit 2 times.

**DRAMA 80. Directing I . 4 Units.**

Introduction to comprehensive directing process from pre-production to opening. Focus on fundamental skills: analysis, staging, action, actor coaching, and elements of design. Skills applied to scripted theatrical material. Develop a language for commenting on theatrical production. Attending and critiquing productions.

Prerequisite: DRAMA 30A and DRAMA 30B

**DRAMA 100. University Theatre . 4 Units.**

Rehearsal and performance in a faculty-directed.

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

**DRAMA 101A. Theatre Production: Costume. 1-6 Units.**

The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

**DRAMA 101B. Theatre Production: Scenic. 1-6 Units.**

The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

**DRAMA 101C. Theatre Production: Lighting. 1-6 Units.**

The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

**DRAMA 101D. Theatre Production: Stage Management. 1-8 Units.**

The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit 24 times.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

**DRAMA 101E. Theatre Production: Audio. 1-6 Units.**

The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

**DRAMA 101S. Theatre Production: Theatre Management. 1-6 Units.**

The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

**DRAMA 103. Lectures in Dramatic Literature. 4 Units.**

Courses include Medieval and Tudor Drama, Elizabethan and Jacobean Drama, Shakespeare, Restoration and Eighteenth Century Drama, Modern British Drama, Modern American Drama, Tragedy, and Comedy.

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 103W. Lectures in Dramatic Literature. 4 Units.**

Courses include Medieval and Tudor Drama, Elizabethan and Jacobean Drama, Shakespeare, Restoration and Eighteenth-Century Drama, Modern British Drama, Modern American Drama, Tragedy, and Comedy.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 109. Special Topics in Theory and Criticism. 4 Units.**

Discussion of recent major trends and ideas in critical theory, concentrating on in-depth readings and lectures in particular facets of theory and criticism: Derrida, Butler, Lacan, Deleuze, and others.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 109W. Special Topics in Theory and Criticism. 4 Units.**

Discussion of recent major trends and ideas in critical theory, concentrating on in-depth readings and lectures in particular facets of theory and criticism: Derrida, Butler, Lacan, Deleuze, and others.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**(Ib)****DRAMA 110. Special Topics in Classical Dramas . 4 Units.**

Designed to introduce students to various classical traditions-early Greek and Roman theatres, to be sure, but also, by way of comparison, the classical traditions of non-European cultures.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C. Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 110W. Special Topics in Classical Dramas. 4 Units.**

Designed to introduce students to various classical traditions-early Greek and Roman theatres, to be sure, but also, by way of comparison, the classical traditions of non-European cultures.

Prerequisite: DRAMA 40A or DRAMA 40B or DRAMA 40C. Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**(Ib)**

**DRAMA 112. Special Topics in Early Modern and Neoclassical Theatre. 4 Units.**

Investigates aspects of European theatre and culture in the sixteenth, seventeenth, and eighteenth centuries; individual courses may focus on specific topics within this broad expanse.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 112W. Special Topics in Early Modern and Neoclassical Theatre. 4 Units.**

Investigates aspects of European theatre and culture in the sixteenth, seventeenth, and eighteenth centuries; individual courses may focus on specific topics within this broad expanse.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**(Ib)****DRAMA 116. Special Topics in Nineteenth-Century Dramas. 4 Units.**

Looks at the various trends and conventions of theatres in the nineteenth century, both Euro-American and beyond, paying special attention to the culture and political milieu within which these various traditions appeared.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C. Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 116W. Special Topics in Nineteenth-Century Dramas. 4 Units.**

Looks at the various trends and conventions of theatres in the nineteenth century, both Euro-American and beyond, paying special attention to the culture and political milieu within which these various traditions appeared.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**(Ib)****DRAMA 118. Special Topics in Modern and Contemporary Drama. 4 Units.**

An investigation into the many forms and permutations of modern (1880-1945), and contemporary (since 1945) drama, paying special attention to the historical and philosophical interpretations of text and performance.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 118W. Special Topics in Modern and Contemporary Drama . 4 Units.**

An investigation into the many forms and permutations of modern (1880-1945), and contemporary (since 1945) drama, paying special attention to the historical and philosophical interpretations of text and performance.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C. Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**(Ib)**

**DRAMA 121. Introduction to Asian Theatre. 4 Units.**

An introduction to some of the major traditional theatrical forms and dramatic texts from India, China, and Japan. Other than dramatic texts (in English translation), attention is also paid to theory, history, and performance styles of traditional Asian theatre.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 122. Asian American Theatre. 4 Units.**

An introduction to the history and development of Asian American theatre and drama. Besides play analysis, special attention is also paid to the history and politics of Asian American identity and experience, as well as to aspects of theatrical performance.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 123. Multicultural Theatres. 4 Units.**

A study of the history, culture, aesthetics, and literature of various traditional performing arts and their connections to the contemporary multicultural society.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 126. African American Film and Drama. 4 Units.**

A critical investigation of films and plays written by African Americans, with emphasis on dramaturgical and cinematic strategies, individual and collective representation, and the legacy of African American political struggle.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 126W. African American Film and Drama. 4 Units.**

A critical investigation of films and plays written by African Americans, with emphasis on dramaturgical and cinematic strategies, individual and collective representation, and the legacy of African American political struggle.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Restriction: Music Theatre Majors only. Drama Majors only.

**(Ib)****DRAMA 129. Advanced Topics in Performance. 4 Units.**

Addresses particular issues in theatre and performance that typically lie outside of regular course offerings. May address such issues as the theatre of the Avant Garde, performing gender, transversality and performance, body art, installation and performance art, among other topics.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 129W. Advanced Topics in Performance. 4 Units.**

Addresses particular issues in theatre and performance that typically lie outside of regular course offerings. May address such issues as the theatre of the Avant Garde, performing gender, transversality and performance, body art, installation and performance art, among other topics.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**(Ib)****DRAMA 130. Intermediate Acting. 4 Units.**

Rehearsal and presentation of scenes from contemporary material. Focus on connection with scene partner, playing actions, and text analysis. Introduction to the credibility and theatricality of characterization and style.

Prerequisite: DRAMA 30A and DRAMA 30B and DRAMA 30C with an average grade of B or better. For transfer students: one year of beginning acting with an average grade of B or better.

Repeatability: May be taken for credit 2 times.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 132A. Writing for Performance. 4 Units.**

Completion of a full-length play or its equivalent; discussion of student writing and of relevant literary texts.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 134. Studio for Advanced Movement for Actors. 4 Units.**

Studio course in conditioning and partnering techniques to the practice of contact improvisation. Contact improvisation is explored and applied in scene study.

Prerequisite: DRAMA 34. DRAMA 34 with a grade of B or better

Repeatability: May be taken for credit 3 times.

**DRAMA 135. Master Classes in Acting. 1-4 Units.**

Advanced acting in specialized areas including acting for the camera: situation comedy, commercials; auditioning and industry preparation; Shakespeare; Molière; Chekov; improvisation; advanced movement and voice and speech for the actor; self-starting; stage combat; repertory acting, singing; comedy; clowning; and masks.

Prerequisite: DRAMA 130. DRAMA 130 with a grade of B or better

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 136. Music Theatre Acting. 4 Units.**

An acting class exclusive to the students in the B.F.A. in Music Theatre program.

Prerequisite: DRAMA 30A and DRAMA 30B and DRAMA 30C

Repeatability: May be taken for credit 4 times.

Restriction: Music Theatre Majors only.

**DRAMA 142. Music Theatre Workshop II. 4 Units.**

A workshop in audition technique and song interpretation.

Prerequisite: Audition required.

Repeatability: May be taken for credit 4 times.

**DRAMA 143A. Music Theatre Workshop III. 4 Units.**

Scene study and song repertoire examined by era for the advanced Music Theatre student. 1800s-1940.

Prerequisite: DRAMA 142. Audition required.

**DRAMA 143B. Music Theatre Workshop III. 4 Units.**

Scene study and song repertoire examined by era for the advanced Music Theatre student. 1940s-1970s.

Prerequisite: DRAMA 142. Audition required.

**DRAMA 143C. Music Theatre Workshop III. 4 Units.**

Scene study and song repertoire examined by era for the advanced Music Theatre student. 1970's-present.

Prerequisite: DRAMA 142. Audition required.

**DRAMA 144. Music Theatre Workshop IV. 4 Units.**

A performance class concentrating on role building. Work culminates with in-class performances of abbreviated versions of musicals.

Prerequisite: For B.F.A. students: DRAMA 143A, DRAMA 143B, DRAMA 143C, and audition. For Drama graduate students: audition required.

Repeatability: May be taken for credit 4 times.

Restriction: Graduate students only. Music Theatre Majors only. Drama Majors only.

**DRAMA 145. Music Theatre Singing. 1 Unit.**

Private weekly voice lessons for the advanced Music Theatre student.

Corequisite: DRAMA 143A

Repeatability: May be taken for credit 9 times.

Restriction: Music Theatre Majors only.

**DRAMA 146. NYSP-Preparation. 4 Units.**

Class preparation for the New York Satellite Program (NYSP) - an immersion experience in New York City for the musical theatre performer.

Prerequisite: Admission is by audition and the following prerequisites: DRAMA 30C and two quarters of DRAMA 148A, DRAMA 148B, or DRAMA 148C (if the 148 prerequisite is not complete at the time of auditions, student must enroll during the fall and winter quarters in the same year as the trip to New York); senior Drama majors must have successfully completed DRAMA 40C and DRAMA 120C; non-Drama majors must have sophomore standing or higher and must carefully plan their course schedule as many spring quarter classes cannot be taken while part of the NYSP.

Repeatability: May be taken for credit 2 times.

**DRAMA 148A. History of American Musical Theatre. 4 Units.**

A survey of the influential artists who produce, write, direct, and perform on America's musical stages. Surveys 1700s-1940s.

Restriction: Drama Majors only. Music Theatre Majors only.

Concurrent with DRAMA 248A.

**DRAMA 148B. History of American Musical Theatre. 4 Units.**

A survey of the influential artists who produce, write, direct, and perform on America's musical stages. Surveys 1940s-1970s.

Restriction: Drama Majors only. Music Theatre Majors only.

Concurrent with DRAMA 248B.

**DRAMA 148C. History of American Musical Theatre. 4 Units.**

A survey of the influential artists who produce, write, direct, and perform on America's musical stages. Surveys 1970s to present day.

Restriction: Drama Majors only. Music Theatre Majors only.

Concurrent with DRAMA 248C.

**DRAMA 149. Music Proficiency for Actors. 2 Units.**

A musicianship class introducing basic musical terminology, theory, and sight singing skills.

Repeatability: May be taken for credit 2 times.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 150. Costume Production Techniques. 4 Units.**

Studio instruction in pattern making, draping, millinery, and construction techniques.

Prerequisite: DRAMA 50A

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 157. Lighting Composition. 4 Units.**

Provides an opportunity for students to pursue stage lighting composition in a studio atmosphere. Laboratory practice includes weekly exercises in style and genre. Emphasis is placed on the realization of conceptual ideas.

Prerequisite: DRAMA 50C

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 158. Topics in Theatre Design. 4 Units.**

Examines the various functions of scenery and costume: locale, historical period, mood, and atmosphere, with special assignments in each area. Discussion of problems in scenic metaphors and visualization, emphasizing techniques of planning and presentation (e.g., floor plans, models, and rendering).

Prerequisite: DRAMA 50A or DRAMA 50B

Repeatability: May be repeated for credit unlimited times.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 159. Proseminar in Theatre Design. 4 Units.**

Topics in theatre design.

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 164A. History of Costume. 4 Units.**

A study of the development of dress and the influence of cultural factors on clothing from the time of Egyptians to Early Baroque.

Prerequisite: DRAMA 50A

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 164B. History of Costume. 4 Units.**

A study of the development of dress and the influence of cultural factors on clothing from late Baroque to World War I.

Prerequisite: DRAMA 50A

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 176. Script and Score. 4 Units.**

A form and analysis seminar discussing the libretto and score of landmark musicals.

Prerequisite: Two courses from DRAMA 148A or DRAMA 148B or DRAMA 148C.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 177. Song Repertoire. 2 Units.**

A song coaching class culminating in a song recital or showcase. Each quarter will feature a different composer, lyricist, or musical style.

Repeatability: May be taken for credit 6 times.

Restriction: Music Theatre Majors only.

**DRAMA 180. Contemporary Dramatic Criticism and Theory. 4 Units.**

Reading and analysis of theories and critical approaches to contemporary theatre: Brecht, Artaud, and others who have contributed to the form and idea of the modern theatre. Writing of assigned exercises in dramatic criticism.

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 180W. Contemporary Dramatic Criticism and Theory. 4 Units.**

Reading and analysis of theories and critical approaches to contemporary theatre: Brecht, Artaud, and others who have contributed to the form and idea of the modern theatre. Writing of assigned exercises in dramatic criticism.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only. Music Theatre Majors only.

(Ib)

**DRAMA 182A. Dance Technique, Level I. 4 Units.**

Advanced beginner and intermediate dance training including musical theatre, ballet, jazz and contemporary modern techniques and repertoire. Body conditioning is also a major component of the course.

Prerequisite: DRAMA 65 or DRAMA 142. Audition required.

Repeatability: May be taken for credit 4 times.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 182B. Dance Technique, Level I. 4 Units.**

Advanced beginner and intermediate dance training including musical theatre, ballet, jazz and contemporary modern techniques and repertoire. Body conditioning is also a major component of the course.

Prerequisite: (DRAMA 65 or DRAMA 142) and DRAMA 182A. Audition required.

Repeatability: May be taken for credit 4 times.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 183A. Dance Technique, Level II. 4 Units.**

Intermediate and advanced dance training including musical theatre, ballet, jazz and contemporary modern techniques and repertoire. Body conditioning is also a major component of the course.

Prerequisite: DRAMA 65 or DRAMA 142. Audition required.

Repeatability: May be taken for credit 4 times.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 183B. Dance Technique, Level II. 4 Units.**

Intermediate and advanced dance training including musical theatre, ballet, jazz and contemporary modern techniques and repertoire. Body conditioning is also a major component of the course.

Prerequisite: (DRAMA 65 or DRAMA 142) and DRAMA 183A. Audition required.

Repeatability: May be taken for credit 4 times.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 184. Directing II. 4 Units.**

The principles of stage directing, covering the director's functions in the areas of interpretation, composition, coaching, and styling a theatrical production. Directing exercises and projects; the final project is the preparation of a hypothetical proposal for a play production.

Prerequisite: DRAMA 30A and DRAMA 30B and DRAMA 40A and DRAMA 40B and DRAMA 40C and DRAMA 80

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 185. Advanced Directing. 4 Units.**

A seminar in directorial organization and research. Student prepares a textual and dramaturgical analysis, a production timetable, and a hypothetical production book of an assigned play.

Prerequisite: DRAMA 184

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama Majors only. Music Theatre Majors only.

**DRAMA 190. NYSP-Acting. 1-4 Units.**

New York Satellite Program acting classes taught by guest faculty in New York.

Prerequisite: DRAMA 146

Repeatability: May be taken for credit 2 times.

**DRAMA 191. NYSP - Dance. 4 Units.**

New York Satellite Program dance classes in ballet, tap, jazz, and musical theatre styles taught by guest faculty in New York.

Prerequisite: DRAMA 146

Repeatability: May be taken for credit 2 times.

**DRAMA 192. NYSP - Singing. 4 Units.**

New York Satellite Program private and group lessons in musical theatre singing taught by guest faculty in New York.

Prerequisite: DRAMA 146

Repeatability: May be taken for credit 2 times.

**DRAMA 193. NYSP - Performance. 4 Units.**

New York Satellite Program rehearsals and public, staged readings of original musicals in New York.

Prerequisite: DRAMA 146

Repeatability: May be taken for credit 2 times.

**DRAMA 194. NYSP-UCI Residency. 4 Units.**

New York Satellite Program follow-up classes and performances back on Irvine campus upon the return from New York.

Prerequisite: DRAMA 146

Repeatability: May be taken for credit 2 times.

**DRAMA 195. Music Theatre Dance - Special Topics. 1-4 Units.**

Advanced dance classes in specialized areas including the dance styles of a choreographer (de Mille, Fosse, Robbins, Tune, Stroman), genre (tap, ballroom, jazz, swing, hip-hop), or in musical theatre choreography.

Prerequisite: DRAMA 182A or DRAMA 182B or DRAMA 183A or DRAMA 183B. Audition required.

Repeatability: Unlimited as topics vary.

Restriction: Music Theatre Majors only. Drama Majors only.

**DRAMA 198. Director Class Project. 1-8 Units.**

For students who are involved in the Director Class Projects at UCI as actors, directors, designers, stage managers and their assistants. M.F.A. Directors and the Head of Directing (HoD) supervise the projects.

Grading Option: Pass/no pass only.

Repeatability: Unlimited as topics vary.

**DRAMA H198. Honors Director Class Project. 1-4 Units.**

For graduate student actors and undergraduate directors who are candidates for Honors in Directing and involved in the Director Class Projects. The Head of Directing (HoD) supervises these students.

Repeatability: Unlimited as topics vary.

**DRAMA 199. Project in Theatre . 1-4 Units.**

Independent theatre projects with Drama faculty.

Repeatability: Unlimited as topics vary.

**DRAMA 200. Graduate Studio: Acting. 4 Units.**

Work in graduate studio taken in tandem with graduate studios in stage voice (DRAMA 201), stage speech (DRAMA 202), and stage movement (DRAMA 203).

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 201. Graduate Studio: Voice. 1 Unit.**

Graduate studio in vocal production for actors.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 202. Graduate Studio: Speech. 1 Unit.**

Graduate studio in speech for actors.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 203. Graduate Studio: Movement. 2 Units.**

Work in graduate studio: stage movement taken in tandem with nine graduate studios in acting (DRAMA 200), voice (DRAMA 201), speech (DRAMA 202), and voice/movement dynamics (DRAMA 206).

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 206. Graduate Studio: Voice/Movement Dynamics. 2 Units.**

Daily conditioning exercises.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 211. Graduate Studio: Directing. 4 Units.**

Graduate studio in directing.

Repeatability: Unlimited as topics vary.

Restriction: Drama graduate students only.

**DRAMA 219. Graduate Master Class. 1-4 Units.**

Various topics such as Shakespeare, comedy, Molière, improvisation, Kabuki, television acting.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 220. Seminar in Dramatic Literature. 4 Units.**

Topics in Dramatic Literature.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 225. Seminar on Theatre Pedagogy. 4 Units.**

A seminar on the major teaching systems in the dramatic arts with particular attention to professional arts training. Required prior to applying for Teaching Assistantships in studio areas.

Restriction: Drama graduate students only.

**DRAMA 240. Graduate Projects . 1-4 Units.**

Various projects depending on student's concentration (acting, design, musical theatre, directing).

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Drama and Theatre Majors only. Drama Majors only.

**DRAMA 241. Singing Pedagogy . 2 Units.**

Learning how to teach voice lessons and coach musical theatre singing. Experiences include both private voice lessons and observing the lessons given to the B.F.A./Music Theatre students.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate Music Direction students only.

**DRAMA 242. Conducting . 2 Units.**

Private conducting instruction to develop freedom of movement/expression, baton technique, ear training, and tempo memory for both rehearsal and performance situations in musical theatre.

Repeatability: May be taken for credit 9 times.

Restriction: Graduate Music Directors only.

**DRAMA 243. Script and Score . 4 Units.**

A form and analysis seminar discussing the libretto and score of landmark musicals.

Restriction: Graduate students only. Music Majors only.

Concurrent with DRAMA 176.

**DRAMA 244. Dramaturgy: Theory and Methods. 4 Units.**

Examines the practice, place, and theory of dramaturgy. Explores plays in terms of how they work: dramatic form and structure, historical context, and more. Study includes dramaturgy as a theatrical practice.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 246A. Musical Scene Study I. 4 Units.**

Musically directing scenes from musicals of various time periods. Features works from the late 19th and early 20th centuries, including songwriters Gilbert and Sullivan, Irving Berlin, George Gershwin, Rodgers and Hart, and Cole Porter.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate Music Director students only.

**DRAMA 246B. Musical Scene Study II. 4 Units.**

Musically directing scenes from musicals of various time periods. Features works from the middle of the 20th century including songwriters Rodgers and Hammerstein, Lerner and Loewe, Julie Styne, Kander and Ebb, and Jerry Herman.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate Music Directors only.

**DRAMA 246C. Musical Scene Study III. 4 Units.**

Musically directing scenes from musicals of various time periods. Features works from the late 20th and early 21st centuries including songwriters Stephen Sondheim, Andrew Lloyd Webber, Stephen Schwartz, Flaherty and Ahrens, and Jeanine Tesori.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate Music Directors only.

**DRAMA 247. Musicals Abridged . 4 Units.**

Musically directing abridged versions of musicals from various time periods and genres.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate Music Directors only.

**DRAMA 248A. History of American Music Theatre. 4 Units.**

A survey of the influential artists who produce, write, direct, and perform on America's musical stages. Surveys 1700s-1940s.

Restriction: Graduate students only.

Concurrent with DRAMA 148A.

**DRAMA 248B. History of American Musical Theatre. 4 Units.**

A survey of the influential artists who produce, write, direct and perform on America's musical stages. Surveys 1940s-1970s.

Restriction: Graduate students only.

Concurrent with DRAMA 148B.

**DRAMA 248C. History of American Musical Theatre. 4 Units.**

A survey of the influential artists who produce, write, direct and perform on America's musical stages. Surveys 1970s to present day.

Concurrent with DRAMA 148C.

**DRAMA 249. Graduate Music Direction. 4 Units.**

Various musical direction activities including the vocal direction, accompanying, and conducting of musical theatre performances.

Repeatability: May be taken for credit 9 times.

Restriction: Graduate students only. Music Majors only.

**DRAMA 251A. Foundations of Theatre. 4 Units.**

Seeks to create greater understanding in the roots and theories of theatrical models, aesthetics, action vs. reaction of differing thoughts in theatrical doctrine, and art, architecture, music, and fashion that contributed to the style and practice of theatre.

Restriction: Drama graduate students only.

**DRAMA 251B. Foundations of Theatre. 4 Units.**

Seeks to create greater understanding in the roots and theories of theatrical models, aesthetics, action vs. reaction of differing thoughts in theatrical doctrine, and art, architecture, music, and fashion that contributed to the style and practice of theatre.

Restriction: Drama graduate students only.

**DRAMA 251C. Foundations of Theatre. 4 Units.**

Seeks to create greater understanding in the roots and theories of theatrical models, aesthetics, action vs. reaction of differing thoughts in theatrical doctrine, and art, architecture, music, and fashion that contributed to the style and practice of theatre.

Restriction: Drama graduate students only.

**DRAMA 254. Graduate Stage Management. 4 Units.**

Studio exercises and projects in stage management.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama Majors only.

**DRAMA 255. Graduate Design Seminar. 4 Units.**

Projects, lectures, and critical discussion in costume, scenery, lighting, and sound design.

Restriction: Drama Majors only.

**DRAMA 256. Survival and Professional Practice in Design. 4 Units.**

Provides an in-depth examination of business skills needed to survive as a theatrical designer. Required 'Bridge' course in the Design MFA programs, relevant to all disciplines.

Restriction: Drama graduate students only.

**DRAMA 257A. Costume Thesis Project. 4 Units.**

Development of thesis project with focus on organization, research, timeline, and execution.

Prerequisite: DRAMA 240

Restriction: Drama graduate students only.

**DRAMA 257B. Scenic Thesis Project. 4 Units.**

Development of thesis project with focus on organization, research, timeline, and execution.

**DRAMA 257E. Thesis Writing Project-Stage Management. 4 Units.**

Development of thesis topic with focus on organization, research, timeline, and execution.

Prerequisite: 12 units of DRAMA 254.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Drama graduate students only.

**DRAMA 258. Drawing for Designers. 2 Units.**

A multi-skill level course in drawing technique focusing on skills essential to stage designers including line, proportion, perspective and creating dynamic compositions. Focus will primarily be in figure drawing but may include still-life, landscape, and architectural drawings. Materials fee.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 9 times.

**DRAMA 259. Theatre Colloquium. 1 Unit.**

Exposes students to a wider range of theatrical practitioners, theories, and topics through guest lecturers, special projects, and cross-disciplinary dialogue.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 260A. Digital Costume Rendering. 4 Units.**

A studio course in costume rendering for the theatre using computer image manipulation. Instruction in compositing and painting techniques and performance design conventions.

**DRAMA 260B. Digital Textile Design and Printing. 4 Units.**

A studio course in textile design using digital printing and embossing techniques. Instruction in state-of-the-art software and output manipulation for artistic expression.

**DRAMA 261. Digital Design: Drawing/Painting/Rendering. 4 Units.**

A studio course in scenic or costume rendering for the theatre using the computer for drawing/painting through the use of the digital pen/tablet.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 262. Digital Design: 2D/3D Modeling. 4 Units.**

A studio course in CAD's 2D drafting and 3D modeling capabilities for theatrical design. Instruction in state-of-the-art software for 2D and 3D object creation and theatrical presentation conventions.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 263. Digital Design: 3D Rendering. 4 Units.**

A studio course in theatrical design through 3d modeling on computer and use of state-of-the-art rendering software. Instruction emphasizes collaborative design process through the use of scenic designer/lighting designer teams for all projects.

Prerequisite: DRAMA 262

Restriction: Graduate students only. Drama and Theatre Majors only. Drama Majors only.

**DRAMA 264. Lighting Graphics. 4 Units.**

A studio course in the various graphic methods employed by lighting designers in the theatre. Projects include manual and CAD techniques for Light Plot and Paperwork creation.

Prerequisite: DRAMA 262

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 265. Digital Design: 2D CAD. 4 Units.**

A studio course in theatrical design and architectural lighting design on the computer. Instruction in state-of-the-art software for 2D object creation. Theatrical and architectural standards implemented in performance design.

Prerequisite: DRAMA 262

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 266. Digital Design: Digital Audio Systems. 4 Units.**

Comprehensive tutorial on digital audio including hard disk recording, editing, data compression, and ethernet audio distribution. Focus is on recording, editing, and delivery of audio as used by the sound designer in the digital domain.

Restriction: Drama graduate students only.

**DRAMA 267. Digital Design: Creating Sounds from Scratch. 4 Units.**

The process of analyzing sounds for their core timbral components and using that data to create new sounds - from realistic to fantastic - by means of digital manipulation.

Prerequisite: DRAMA 266

Restriction: Drama Majors only.

**DRAMA 271. Conceptual Sound Design. 4 Units.**

An intensive, project-based seminar for exploring relationships between sound and sight. Synesthesia, creative intent vs. audience perception, and sound/movement are typical of the many topics to be explored. A series of creative projects are assigned and critiqued in peer review.

Prerequisite: DRAMA 266

Restriction: Drama Majors only.

**DRAMA 272. Musical Theatre Sound/Concert Sound. 4 Units.**

A concept-to-opening study of the process of designing sound systems for musicals and live/touring sound. Special attention given to the paperwork and documentation required to package, build, and mix these shows.

Restriction: Drama Majors only.

**DRAMA 277. Critical Listening. 4 Units.**

Exploration of the many variables that affect (and effect) the audio chain. Perceiving and understanding these parameters unlocks the art of controlling sound and stylizing cues. Also includes the process of equalizing/aligning sound systems and the art of audio mastering.

Prerequisite: DRAMA 266

Restriction: Drama Majors only.

**DRAMA 279. Advanced Sound Design. 4 Units.**

An in-depth investigation into sound design for the theatre. Special emphasis is placed on text analysis, design conception, content creation, content delivery, and design organization. Class projects include creating paper designs and paperwork for different texts.

**DRAMA 280A. Techniques in Costume Design. 4 Units.**

Student exercises in the techniques and implementation of costume design.

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only.

**DRAMA 280B. Techniques in Scenery Design. 4 Units.**

Student exercises in the techniques and implementation of scenic design.

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only.

**DRAMA 280C. Techniques in Lighting Design. 4 Units.**

Student exercises in the techniques and implementation of lighting design.

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only.

**DRAMA 280D. Techniques in Sound Design. 4 Units.**

Student exercises in the techniques and implementation of sound design.

Repeatability: Unlimited as topics vary.

Restriction: Drama Majors only.

**DRAMA 282. Stage Electronics/Introduction to Show Control. 4 Units.**

Using computers and dedicated hardware to cue, control or automate sound, scenery, and lighting for live performance and themed entertainment applications.

Restriction: Graduate students only. Drama Majors only. Drama and Theatre Majors only.

**DRAMA 290. Dramatic Literature and Theatre History Prior to 1900. 4 Units.**

Studies in selected areas of dramatic literature and theatre history prior to 1900. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**DRAMA 291. Dramatic Literature and Theatre History, 1900 to Present. 4 Units.**

Studies in selected areas of dramatic literature and theatre history, 1900 to present. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**DRAMA 292. Cultural and Critical Theory. 4 Units.**

Studies in selected areas of cultural and critical theory. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**DRAMA 293. Directed Studies. 4-12 Units.**

Directed study with Drama faculty.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

**DRAMA 294. Dissertation Research. 4-12 Units.**

Dissertation research with Drama faculty.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**DRAMA 295. Professional Internship. 1-12 Units.**

An arranged internship at the South Coast Repertory Theatre, or other equity theatre company, for qualifying M.F.A. students. A stipend and equity points are provided by the theatre company.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama graduate students only.

**DRAMA 297. Dramaturgy Practicum. 4 Units.**

Requires doctoral students to identify two plays from the Drama Department's season to work as dramaturges. Students write a Dramaturgy Booklet recording their research and interactions with director, actors, and the design team. Students will work with doctoral faculty.

Restriction: Graduate students only. Drama and Theatre Majors only.

**DRAMA 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

## Drama and Theatre, Ph.D.

This is a joint program offered by the UCI Department of Drama and the UCSD Department of Theatre and Dance.

This program has the largest dedicated doctoral faculty of any Drama program in the nation and one of the lowest teacher-student ratios. The program is designed to encourage students to develop a unique body of research working closely with a small group of faculty at both UCI and UCSD. This 'boutique' approach calls on each student to explore avenues of research and scholarship that will maximize opportunities for entrance into the highest levels of academia.

The program's goal is to prepare students for a successful career at either a research university or a major liberal arts institution, in a variety of possible disciplines ranging from Drama and Theatre, English, and Performance Studies, to Cultural, Gender, and Ethnic Studies. The Drama Department places a high value on collegiality and professionalism, and nurtures these qualities through cooperative work within seminars, independent studies, organized events, teaching opportunities and professional trainings.

Students with a B.A. (minimum GPA of 3.5), M.A., or M.F.A. in Drama and Theatre are eligible for admission to the doctoral program. Students with training in literature (or another area in the humanities) will also be considered, provided they can demonstrate a background in drama or theatre. Experience in one of the creative activities of theatre (acting, directing, playwriting, design, dramaturgy) enhances a student's chances of admission.

All applicants are required to take the Graduate Record Examination and to submit samples of their critical writing.

While not required for admission, a working knowledge of a second language is highly desirable (see Language Requirement).

## Course of Study

Students are required to take a minimum of 144 units, which is equivalent to four years of full-time study (full-time students must enroll for a minimum of 12 units each quarter). Forty of these units are taken in required seminars; the balance is made up of elective seminars, independent study and research projects (including preparing the three qualifying papers), and dissertation research. Students must take a minimum of one seminar per year in the UCSD Department of Theatre and Dance. The program of study makes it possible for students to take a significant number of elective courses and independent studies both with faculty in Drama and Theatre and in other departments.

## Required Courses

A. Complete:

DRAMA 290	Dramatic Literature and Theatre History Prior to 1900 (three seminars/12 units)
DRAMA 291	Dramatic Literature and Theatre History, 1900 to Present (three seminars/12 units)
DRAMA 292	Cultural and Critical Theory (four seminars/16 units)

All graduate courses may be repeated when the topic varies. Descriptions of the topics to be treated in a given academic year are published by the Department in the fall. Enrollment in each course requires the consent of the instructor. The courses are limited to registered doctoral students.

These 10 required seminars must be completed by all students, including those who have an M.A. or an M.F.A., before the end of the third year. In addition, students must pass comprehensive examinations at the end of their first and second years.

DRAMA 293 Directed Studies and DRAMA 294 Dissertation Research are also required.

## Graduate Emphasis in Dramaturgy (Elective):

This Emphasis may be taken at any time during a graduate student's doctoral work, preferably during the first 4 years of graduate study, prior to the dissertation. The Emphasis includes 3 courses:

A. Complete:

DRAMA 244	Dramaturgy: Theory and Methods
DRAMA 297	Dramaturgy Practicum
DRAMA 290 or DRAMA 291	Dramatic Literature and Theatre History Prior to 1900 Dramatic Literature and Theatre History, 1900 to Present

The emphasis also includes a research component on dramaturgy in consultation with the Instructor .

## Comprehensive Examinations

In the first year, students prepare for the Written Comprehensive Examination, which is based on a reading list of approximately 150 titles ranging from the Ancient Greeks to the present. Students take this examination at the beginning of the fall quarter of their second year. (Comprehensive examinations are scheduled at the beginning of fall quarter in order to allow students the summer to prepare.) Students who fail the Written Comprehensive may retake it no later than the first week of winter quarter of their second year. Students who fail the Written Comprehensive for a second time are dismissed from the program.

In their second year, students prepare for the Oral Comprehensive Examination. The reading list for this examination is designed to permit students to acquire a knowledge of their dissertation subject area, broadly conceived. The reading list is compiled by the student and the dissertation advisor,

in consultation with other members of the faculty, as appropriate; the reading list must be established by the end of winter quarter of the second year. Students take the Oral Comprehensive at the beginning of the fall quarter of their third year. Students also submit a dissertation prospectus (approximately five pages) when they take this examination. Students who fail the Oral Comprehensive may retake it no later than the first week of winter quarter of their third year. Students who fail the Oral Comprehensive for a second time are dismissed from the program.

### **Advancement to Candidacy: Three Qualifying Papers**

Students normally select a dissertation advisor during their second year and must do so before the end of spring quarter of that year. In consultation with the dissertation advisor and other faculty members, students develop topics for three qualifying papers, which are written during their third year. The three qualifying papers—one long (approximately 50 pages) and two short (approximately 30 pages each)—must be completed by the end of the third year; these completed papers provide the basis for the Oral Qualifying Examination. Students write the long paper under the direction of their dissertation advisor; it is understood that the long paper is preparatory to the dissertation. The short papers deal with other related topics, subject to the approval of the student's advisors; the two short papers are understood as engaging in exploring the larger contexts of the dissertation. The normative time for students to pass the Qualifying Examination and advance to candidacy is at the end of their third year; students must advance to candidacy no later than the end of fall quarter of their fourth year. Once advanced to candidacy, students write their dissertation which, upon completion, is defended in a final oral examination.

Students may select a dissertation advisor from either the UCI Department of Drama or the UCSD Department of Theatre and Dance. All UCI doctoral dissertation committees must include at least one faculty member from UCSD.

### **Language Requirement**

Students are required to complete an advanced research project using primary and secondary material in a second language (materials may include live and/or recorded performance; interviews with artists, critics, and scholars; and other non-documentary sources, as well as more conventional textual sources). This requirement may be satisfied by writing a seminar paper or a qualifying paper (see Advancement to Candidacy above) that makes extensive use of materials in a second language. The second-language requirement must be satisfied before the end of the third year. This requirement will not be waived for students who are bi- or multilingual; all students are required to do research-level work in more than one language.

It is assumed that students will have acquired a second language before entering the doctoral program, although second-language proficiency is not a requirement for admission. While students may study one or more second languages while at UCI or UCSD, language courses may not be counted toward doctoral program requirements.

### **Teaching**

Students are required to teach a minimum of four quarters, via DRAMA 399. No more than eight units of apprentice teaching may be counted toward the required 144 units.

### **Departmental Ph.D. Time-Limit Policies**

Students must advance to candidacy by the end of the fall quarter of their fourth year. Departmental normative time for completion of the degree is five years; total registered time in the Ph.D. program at UCI or UCSD cannot exceed seven years.

### **Financial Support**

Ph.D. students entering the program with a B.A. may be supported (either by teaching assignments or fellowships) for five years. Students who have an M.A. and have been given transfer credit may be supported for four years. Such support depends upon the funds available, the number of students eligible, and the student's rate of progress.

Graduates from the Department of Drama perform, stage manage, or design on Broadway, in national tours, regional and summer theatres, in films and on television. UC Irvine's Drama alumni serve as artistic directors, business managers, designers, art directors, and performers at more than 100 theatre companies, and are faculty at more than 75 institutions of higher learning.

A degree in Drama may or may not lead to professional employment in theatre or film. While some alumni may pursue careers as professional theatre artists, many may use the skills learned from their degree and embark upon careers in law, business, arts management, advertising, and teaching. Others may pursue further study at UC Irvine or other notable institutions.

## **Drama, B.A.**

The B.A. program consists of a comprehensive study of acting, directing, design, music theatre, playwriting, stage management, theatre production, and dramatic theory, criticism, literature, and history. It involves hands-on participation in productions as an actor, designer, writer, technician, or stage manager. Auditions for all productions at UCI are open to undergraduates, and some productions are open exclusively to undergraduates. The B.A. program does not require an entrance audition.

There can be few subjects as broad or as fundamental to human civilization as those of Drama and Theatre. The B.A. in Drama is part of a larger education which includes close consideration of world history and politics; human psychology and desire; music, dance, literature and art; visual and aural aesthetics, and both ancient and contemporary technologies of communication. While Drama is rightfully considered an entertainment, it is an entertainment that begins with the greatest literature ever written – from the classics of Euripides, Shakespeare and Molière to modern Americans

like Tennessee Williams, August Wilson and David Henry Hwang – as presented in the most sophisticated performance techniques from Europe, Asia, Africa, and the Americas developed over 3,000 years. And Theatre – the practice of Drama – is a hands-on collaboration that involves real-time interactions with other artists, and displaying the results to real-life audiences.

**All students must meet the University Requirements.**

**School Requirements: None.**

**Departmental Requirements for the Major in Drama**

A. Complete the following:

DRAMA 10	Introduction to Theatre
----------	-------------------------

B. Select one of the following:

DRAMA 15	Performance Now
DRAMA 20A	Culture in Performance
DRAMA 20B	Culture in Performance
DRAMA 20C	Culture in Performance

C. Complete the following:

DRAMA 30A	Acting
-----------	--------

D. Complete one year survey in the development of drama: <sup>1</sup>

DRAMA 40A- 40B- 40C	Development of Drama and Development of Drama and Development of Drama
---------------------	--

E. Select five of the following, of which at least one must be DRAMA 50C, DRAMA 50D, or DRAMA 50E: <sup>2</sup>

DRAMA 30B	Acting
DRAMA 30C	Acting
DRAMA 50A	Introduction to Costume Design
DRAMA 50B	Introduction to Scenic Design
DRAMA 50C	Introduction to Lighting Design
DRAMA 50D	Introduction to Sound Design
DRAMA 50E	Introduction to Stage Management

F. Select seven of the following:

DRAMA 80	Directing I
Upper-division Drama courses, which must include three dramatic literature courses from DRAMA 103-129, or 180 (excluding DRAMA 101, 198, and 199).	

**Theatre Production (DRAMA 101) requirements:**

Freshmen—eight units, of which four units must be completed during the first year of residency at UCI;

Transfer Students: Sophomores—six units, of which four units must be completed during the first year of residency at UCI; Juniors and Seniors—four units, which must be completed during the first year of residency at UCI.

- <sup>1</sup> Students are required to take DRAMA 40A, DRAMA 40B, DRAMA 40C in their sophomore year, after completion of the lower-division writing requirement.
- <sup>2</sup> Students entering the Department as freshman must complete the requirement of three courses chosen from DRAMA 50A, DRAMA 50B, DRAMA 50C, DRAMA 50D, DRAMA 50E by the end of their junior year. All other students must complete these courses within one year of entering the major.

## Sample Program for Freshmen

Fall	Winter	Spring
DRAMA 30A	DRAMA 30B	DRAMA 30C
DRAMA 10	DRAMA 15	DRAMA 50
DRAMA 101 (2 units)	DRAMA 101 (2 units)	General Education
WRITING 39B	WRITING 39C	General Education

## Honors in Drama Program

The Honors in Drama is a designation designed to recognize the generalist undergraduate Drama student, one who has chosen to focus on breadth in their education, as opposed to depth in one area. Such students are often ineligible to be considered for Honors in a specific area (Acting, Design, etc.), and the Honors in Drama designation is a recognition of the high quality of scholarship and work that the student has accomplished within the Department.

Eligibility requirements include: 1) at least one year in good standing as a Drama major; 2) anticipated graduation date within one year of application; 3) not currently receiving any other honors through the Drama Department; 4) completion of at least three upper-division courses, spanning at least three areas (acting, directing, design, stage management, music direction, dramaturgy, or literature/theory/criticism); 5) minimum overall GPA of at least 3.2, with a minimum GPA of 3.4 in all UCI Drama courses; 6) completed participation in at least five UCI Drama mainstage, director class projects, or faculty mentored productions as cast, designer, stage manager, dramaturg, crew chief, assistant director, assistant designer, or assistant stage manager (DRAMA 100, DRAMA 198, or DRAMA 199); 7) completion of four DRAMA 101 units.

Admission to the Honors in Drama program is competitive; only truly exceptional students (no more than 10 to 20 percent of those eligible) will be admitted to the program. To apply, a student must have a faculty recommender. Students may apply directly to the program, or faculty members may submit nominations. Completed applications and a resume, CV, dossier, or portfolio are due on the first day of spring quarter. After reviewing the application and resume, etc., faculty will vote on admissions to the honors program. A simple majority is required to make the award. In the event of a tie, the Drama Chair casts the deciding vote.

Criteria for admission include a demonstrated commitment and contributions to UCI Drama productions and scholarship that spans multiple areas of the Department, including acting, directing, design, stage management, music direction, dramaturgy, literature/theory/criticism, producing, technical production, and/or playwrighting. Students should have also demonstrated commitment and contributions to UCI Drama's culture, including issues of leadership, diversity and mentorship.

## Honors in Acting Program

Admission to the Honors in Acting Program requires both eligibility and a special audition. The eligibility requirements for sophomore-level transfer students and native UCI students are (1) at least one year in good standing as a UCI Drama major; (2) completion of DRAMA 130 or DRAMA 136 and at least one section of either DRAMA 135 or DRAMA 142, all at UCI; (3) honors students must possess and maintain an overall GPA of at least 3.2, with a GPA of 3.4 or higher in all acting courses; (4) performance in at least three official UCI Drama productions; (5) completion of six units of DRAMA 101 (Production/Crew); and (6) completion of the eligibility form.

The eligibility requirements for junior-level transfer students are (1) one year in good standing as a UCI Drama major; (2) completion of DRAMA 130 or DRAMA 136 at UCI; (3) honors students must possess and maintain an overall GPA of at least 3.2, with a GPA of 3.4 or higher in all acting courses; (4) completed performance in at least one official UCI Drama production; (5) completion of four units of DRAMA 101; and (6) completion of eligibility form.

A student's audition will determine final admission to the Honors in Acting program. Only truly exceptional students, no more than 10 to 20 percent of those eligible, will be admitted. The Honors auditions, for eligible candidates only, are held at the end of fall quarter and by special arrangement. Auditions will consist of a standard presentation: one classical and one modern monologue, totaling no more than three minutes.

Honors in Acting Program students receive (1) the "Honors in Acting" notation on their official transcript at graduation; and (2) nomination and recommendation for national University/Resident Theatre Association (U/RTA) auditions. Honors in Acting students may also be eligible to join M.F.A. Acting students in on-campus auditions for professional theatres and attend M.F.A. Actors' "Dynamics" classes.

## Honors in Design/Technology Program

The Honors in Design/Technology Program provides the opportunity for Drama majors to concentrate on the study and practice of scenery, costume, lighting, sound design, or technology. Honors in Design/Technology students study basic and advanced design and production techniques, participate in classes with graduate design students, and may serve as an assistant to a graduate student or faculty designer, or design a production at UCI.

Eligibility requirements are (1) at least one year in good standing at UCI as a Drama major; (2) completion of DRAMA 50A, DRAMA 50B, DRAMA 50C, DRAMA 50D for Scenic or Costume designers; or completion of DRAMA 50C, DRAMA 50D and two of DRAMA 50A or DRAMA 50B for Sound or Lighting designers (3) completion of at least two courses selected from DRAMA 50E, upper-division studio courses (DRAMA 150–162, 167–169, 171, or 179), or graduate-level design courses, including at least one from the design area in which the student is applying for honors; (4) possess and maintain an overall GPA of at least 3.2, with a GPA of 3.4 or higher in all design and production technique courses; (5) completion of four out of eight units of DRAMA 101 (Theatre Production); and (6) completion of the eligibility form.

Admission to the Honors in Design/Technology Program is competitive. Students may be admitted as early as the winter quarter of their sophomore year. Upon completion of eligibility requirements, the student will schedule an informal portfolio review with a member of the design faculty appropriate to the student's specialty area(s).

Only truly exceptional students will be admitted to Honors in Design/Technology as determined by the Design faculty.

If the faculty mentor determines that the student is a good candidate for the Honors in Design/Technology Program, the mentor will present the student's portfolio to the Design Faculty. The Design Faculty, led by the Head of Design, will then decide if the student shall be admitted to the Honors in Design Program.

Honors in Design/Technology students receive (1) the "Honors in Design/Technology" notation on their official transcript at graduation; (2) an assistant designer assignment with a graduate student or faculty designer; (3) special consideration to design a budgeted and technically supported production; and (4) Honors in Design students may also receive nomination and recommendation for national University/Resident Theatre Association (U/RTA) interviews.

Honors in Design/Technology students are expected to maintain a high level of performance and commitment to their work and the Drama Department. Honors students meet with their faculty mentor at the beginning of every quarter to evaluate their progress and check that all grade, course, and production requirements are being satisfied.

Once admitted into the Honors in Design/Technology Program, students are expected to:

1. Maintain an overall GPA of at least 3.2, with a GPA of at least 3.4 in all design and production technique courses.
2. Remain in good standing as a Drama major.
3. Satisfy any provisional conditions for acceptance into the Honors in Design/Technology program.
4. Complete production assignments as assigned by the faculty mentor.
5. Continue to take at least two courses (as enumerated in the eligibility section) or independent studies per year, at least half of which must come from the area of design in which the student is applying for honors.
6. Complete any safety and auxiliary training commensurate with M.F.A. students in a particular discipline.
7. Maintain the Drama Department's CORE values (<http://drama.arts.uci.edu/graduate-programs/directing/mfa-directing/>).

Should a student, having been previously admitted to the Honors in Design Program, fail to meet expectations, the Design Faculty will meet to evaluate the situation; the student may lose their Honors in Design status and have to re-apply to the Program.

For more information contact the Head of Design in Drama or Area Head of design discipline.

## Honors in Directing Program

The Honors in Directing Program provides the opportunity for Drama majors to concentrate on the study and practice of stage direction. Honors in Directing students study basic and advanced directing techniques, participate in the directing studio classes with graduate Directing students, and direct two full plays in the Director Class Projects series. Honors students also have the opportunity to receive credit as the assistant director to a Drama Department main season show, or as a production internship with a professional theatre company.

Admission to the Honors in Directing Program is competitive. Candidates must first complete DRAMA 184 (Directing) and receive instructor approval to enroll in DRAMA 185 (Advanced Directing). Candidates must apply, as a director, for DRAMA 198 (Director Class Project) by submitting a proposal to direct a play in the Director Class Project. If the proposal is accepted, the candidate must declare to the Head of Directing that the production is to be counted as an audition for admission to the Honors in Directing Program. A committee of three Drama faculty members, including the Head of Directing, will then see and evaluate the production for clarity of interpretation, unity of style, strength of acting, and ensemble performance, and will examine the candidate's self-evaluation and the evaluations of the director by members of the cast. The Head of Directing will inform the candidate of the committee's decision as to whether or not the candidate is admitted to the Honors Program.

Undergraduate Drama majors can be admitted into the program as early as the winter quarter of their freshman year but no later than the spring quarter of their junior year. Students may be admitted to the program retroactively if all the requirements for Directing Honors have been met by their final year, but only if a faculty committee of three has seen their workshops and agrees to admit the candidate.

To achieve the Honors in Directing distinction, students must fulfill all the courses required of the regular Drama major, with an overall GPA of 3.2 or higher. In addition, students must complete the following courses with a GPA of 3.4 or higher:

1. DRAMA 184 (Directing).
2. Two courses in DRAMA 185 (Advanced Directing). In this course, undergraduate Directing students present work in the Directing Laboratory along with graduate Directing students.
3. Two Director Class projects, one of which must be taken as DRAMA 198 (Director Class Project) with the candidate serving as director. The candidate must stage a second Director Class Project as DRAMA H198 (Honors Director Class Project), for which a letter grade is earned.
4. Four additional units to be satisfied by any of the following: DRAMA 199 (as a summer internship, approved by the Head of Directing, with the candidate serving a professional theatre company as director, assistant director, or production assistant); DRAMA 199 (as a production/directing project for Playwright's Workshop); DRAMA 100 (as assistant director to a faculty director); or DRAMA 199 (as assistant director to a graduate director's thesis production).

Honors candidates meet with the Head of Directing at the beginning of every quarter to evaluate their progress and to check that all grade and course requirements are being satisfied. Successful graduating seniors will receive the "Honors in Directing" notation on their official transcript and will receive a nomination and recommendation for national University/Resident Theatre Association (U/RTA) interviews.

NOTE: All of the above courses are open to all students even though they may not qualify for the Honors Program.

## Honors in Dramatic Literature, History, and Theory Program

The Honors in Dramatic Literature, History, and Theory Program is designed to challenge superior students beyond the scholarly requirements of the Drama major. It provides them with the opportunity to advance their knowledge of dramatic literature, history, and theory and to further develop their writing, analytical, and research skills. An additional purpose of the program is to better prepare students for graduate study in not only dramatic literature, history, and theory, but in all fields in the humanities and social sciences, as well as in law.

Eligibility requirements are (1) completion of DRAMA 40A, DRAMA 40B, DRAMA 40C and two courses selected from DRAMA 103–129 (for upper-division writing credit), or equivalents to these courses from other institutions; (2) possess and maintain an overall GPA of at least 3.2, with a GPA of 3.4 or higher in all dramatic literature, history, and theory courses; and (3) completion of the eligibility form.

Admission to the Honors in Dramatic Literature, History, and Theory Program is competitive. Students must apply to the program prior to the spring quarter of their junior year. Upon completion of eligibility requirements, applicants must submit at least two critical essays, most likely written previously for courses, totaling no more than 30 pages. These essays will be used by the Honors Committee (comprised of the Head of Dramatic Literature, History, and Theory and two additional members of the Drama faculty) to determine admission. Only truly exceptional students (no more than 10 to 20 percent of those eligible) will be admitted.

Beyond fulfilling the regular requirements of the Drama major, honors students must take three additional upper-division courses in dramatic literature, history, and/or theory, one of which must be focused on theory. Upper-division courses in other departments may be used to fulfill these requirements, as long as the Honors Committee approves them.

Honors students must also write an honors thesis, a 30–40 page research paper written under the supervision of a faculty member on a topic chosen by the student. In consultation with the student, the adviser for this project is selected before the end of the fall quarter of the student's senior year. Students develop their projects until the spring quarter when they enter the writing phase. It is only during the spring quarter that students achieve full course credit for their work on the thesis, in the form of an independent study course with their advisor. This independent study is the final course of the program.

Successful graduating seniors will receive the "Honors in Dramatic Literature, History, and Theory" notation on their official transcript.

## Honors in Music Theatre

Successful graduating seniors in both the B.A. in Drama and the B.F.A. in Music Theatre can achieve Honors in Music Theatre. An overall GPA of 3.2 or higher is required along with an overall GPA of 3.4 in all music theatre courses. B.F.A. students need to complete all course work listed under "Departmental Requirements for the B.F.A. Major" while B.A. students need to complete the following additional music theatre courses:

A. Complete the following:

DRAMA 142	Music Theatre Workshop II
DRAMA 143A- 143B- 143C	Music Theatre Workshop III and Music Theatre Workshop III and Music Theatre Workshop III
DRAMA 145	Music Theatre Singing (taken three times)
DRAMA 146	NYSP-Preparation
DRAMA 148A- 148B- 148C	History of American Musical Theatre and History of American Musical Theatre and History of American Musical Theatre
DRAMA 149	Music Proficiency for Actors
DRAMA 176	Script and Score
DRAMA 190	NYSP-Acting
DRAMA 191	NYSP - Dance
DRAMA 192	NYSP - Singing
DRAMA 193	NYSP - Performance
DRAMA 194	NYSP-UCI Residency
Two ballet classes in Dance.	
One tap class in Dance.	
One jazz class in Dance.	

B. Select one of the following in any combination:

DRAMA 182A- 182B	Dance Technique, Level I and Dance Technique, Level I
DRAMA 183A- 183B	Dance Technique, Level II and Dance Technique, Level II

At graduation, successful Honors students receive the "Honors in Music Theatre" notation on their transcripts.

## Honors in Stage Management Program

The Honors in Stage Management Program provides the opportunity for Drama majors to concentrate on the study and practice of stage management. Honors students study basic and advanced stage management techniques, participate in classes with graduate stage managers, work as assistant

stage managers with the graduate stage managers on graduate student-directed and faculty-directed productions, and stage manage a graduate student-directed or faculty-directed production at UCI.

Eligibility requirements are (1) minimum one year in good standing at UCI as a Drama major; (2) completion of three of the following: DRAMA 50A, DRAMA 50B, DRAMA 50C, DRAMA 50D or equivalent courses; (3) completion of DRAMA 50E; (4) possess and maintain an overall GPA of at least 3.2, with a GPA of 3.4 or higher in all stage management and production courses; (5) completion of eight units of Drama 101 (Theatre Production); and (6) completion of the eligibility form.

Admission to the Honors in Stage Management Program is competitive. Students may be admitted as early as the winter quarter of their sophomore year but no later than the spring quarter of their junior year. Only truly exceptional students (no more than 10 to 20 percent of those eligible) will be admitted to the program as determined by the Honors Committee. Upon completion of eligibility requirements, the student will submit to the Honors Committee: (1) two prompt books; (2) a resume including all stage management and production experience; (3) letters of reference from two directors with whom the student has worked; and (4) a written paper on the subject of stage management.

Students receive the "Honors in Stage Management" notation on their final transcript; nomination and recommendation for national University/Resident Theatre Association (U/RTA) interviews; assistant stage manager assignments working with graduate stage managers; and a stage management assignment on a graduate student-directed or faculty-directed production.

Honors candidates meet with the Head of Stage Management at the beginning of every quarter to evaluate their progress.

Graduates from the Department of Drama perform, stage manage, or design on Broadway, in national tours, regional and summer theatres, in films and on television. UC Irvine's Drama alumni serve as artistic directors, business managers, designers, art directors, and performers at more than 100 theatre companies, and are faculty at more than 75 institutions of higher learning.

A degree in Drama may or may not lead to professional employment in theatre or film. While some alumni may pursue careers as professional theatre artists, many may use the skills learned from their degree and embark upon careers in law, business, arts management, advertising, and teaching. Others may pursue further study at UC Irvine or other notable institutions.

## **Drama, M.F.A.**

The Department of Drama offers an M.F.A. in Drama, with emphases in Acting, Directing, Design, Music Direction, or Stage Management.

The Acting faculty is devoted to the development of working professional actors who possess the skills, insight, intelligence, creativity, and vision to create the theatre of the future. UCI has proven itself notably successful in training working professionals with alumni who perform on stages around the country, on and off Broadway, in regional theatres, or in feature films and television series. Many graduates of the program hold faculty positions in university theatre.

The Directing program is dedicated to the idea that theatre should challenge and expand the mind, move the soul, and delight the spirit. The Directing program is a three-year course of study. The program's first year focuses on directing realistic "character driven" work, along with script analysis and collaboration skills. In the second year, the student director focuses on "language driven" plays, the components of production, and communication in collaboration. The third year centers on original and devised work as well as self-produced projects. Each student is expected to direct every quarter – in the classroom, with student directed projects, and/or in production. In addition, each student will be engaged in full-length plays in the second year. During their course of study, each student will receive, at a minimum, one fully produced show in the main season. One of these will be the student's thesis production in their third year.

The Design program provides a challenging and creative environment for the curious and resourceful design student. Students in this program will be exceptionally well-suited to a career in the theatre and related entertainment arts. Incoming students specialize in a specific discipline: sound design, lighting design, costume design, or scenic design. Study of that specific discipline is at the heart of the student's education. Students will also develop a solid working knowledge of the basic principles and procedures of the other disciplines in order to foster more productive collaboration. In addition, the design curriculum includes the study of theatre history, art history, and dramatic literature. Instruction is focused on the growth of each student's individual design abilities. Students will work in a shared studio space, creating an atmosphere of constructive critique and support. Beyond the regular course load, additional learning opportunities can occur during weekly round tables, design tutorials, masterclasses, and post-performance critiques. The Design program provides professional training that respects our theatrical heritage and the traditional skills of a designer. In addition, a strong emphasis is placed on new technologies and how they affect and enhance contemporary design practices. Training on high-end computers and equipment using the latest software is required in all design disciplines, preparing students for a seamless transition to the professional world.

The Music Direction program prepares artists for a professional life in the theatre as musical directors. Students work with faculty members and other professionals in the Musical Theatre field, receiving instruction and mentoring in conducting, vocal coaching for the actor, musical preparation, script and score analysis, composing and arranging music for the stage, sound design, and singing pedagogy. Students also gain valuable first-hand experience through internships. The program is designed to help students refine/ improve their knowledge base and experience in vocal coaching, conducting, musical preparation of singers, rehearsal techniques, composing, arranging, and producing. Applicants are required to have excellent keyboard skills (including sight-reading, transposition), basic orchestra score-reading and conducting skills, and an understanding and appreciation of musical theatre as a genre. Students have the opportunity to work on musical productions each quarter while being closely mentored by the department's Musical Theatre and associated faculty.

The Stage Management program is dedicated to the professional training of advanced students interested in developing their skills, knowledge, and abilities in stage management. Graduate stage managers work with directors, choreographers, musical directors, and designers in various genres including drama, musical theatre, dance, opera, concerts and special events. Through the course of the program, production assignments grow in complexity. Each graduate student will stage manage or assistant stage manage seven productions. The faculty provides training not only in the area of stage management but also in dramatic literature, the development of theatre, concepts and collaboration, and script analysis which helps stage managers understand how to communicate effectively with all members of the production team on a professional level. In addition, instruction supplemented with visiting professionals from all areas of the live entertainment industry, television, and film.

Applicants for admission to the degree program must meet the general requirements for admission to graduate study and hold a B.A., B.F.A., or higher degree.

Applicants must submit dossiers of biographical information and theatrical experience, together with photographs, essays, reviews, production books, and portfolios, as appropriate.

An audition is typically required for all applicants who intend to enter the Acting program. UCI coordinates its auditions with the University/Resident Theatre Association (U/RTA), and conducts auditions, both for U/RTA finalists and UCI applicants, in New York, Chicago, Los Angeles, and Irvine during January and February. Other U/RTA audition sites may be considered. Interviews for applicants in Directing, in Design, in Music Direction, and in Stage Management are also required.

Normally three years of residence is required. Each candidate must enroll for three courses each quarter for nine quarters, exclusive of summer sessions.

The normative time to degree for students in the M.F.A. program is three years. Residence is required. The maximum time to degree can be extended to four years only through petition to the Head of the Program for extenuating circumstances. Students who do not complete the degree in four years will be recommended for academic disqualification.

During the first year of residence each candidate will prepare, for credit, two graduate projects, in acting, directing, design, music direction, stage management, theatrical research, or a combination of two of these. Satisfactory completion of these projects, as determined by the faculty, is prerequisite to entering the second year of the program.

The required thesis normally consists of directing, designing, musically directing, stage managing, or playing a principal role in a major production, and collecting in essay form the evidences of research, analysis, and judgments which formed a part of the production experience.

Each graduate student is expected to participate in productions throughout residence at UCI.

Specific course requirements must be satisfied in one of the following five areas:

### Acting Requirements

A. Select nine graduate studios in acting:

DRAMA 200	Graduate Studio: Acting
-----------	-------------------------

B. Students must enroll in each of the following studios every quarter for a total of nine quarters:

DRAMA 201	Graduate Studio: Voice
DRAMA 202	Graduate Studio: Speech
DRAMA 203	Graduate Studio: Movement
DRAMA 206	Graduate Studio: Voice/Movement Dynamics

C. Select three master classes in acting from various topics offered in DRAMA 219.

D. Complete the following:

DRAMA 251A	Foundations of Theatre
------------	------------------------

E. Select one seminar in dramatic literature, performance theory, criticism, history of theatre, or contemporary theatre from the following:

DRAMA 220–225
---------------

F. Select six graduate projects, of which two may be the following professional internships:

DRAMA 240	Graduate Projects
or DRAMA 295	Professional Internship

A total of 110 quarter units in graduate or approved upper-division undergraduate courses must be completed with a grade of at least B in each course.

### Design Requirements

A. Select seven graduate studios in design seminars:

DRAMA 255	Graduate Design Seminar
-----------	-------------------------

B. Select six courses in graduate projects (one of which may be a professional internship: DRAMA 295):

DRAMA 240	Graduate Projects
C. Select two elective courses from courses numbered 100 and above.	
D. Select four courses in dramatic literature, performance theory, criticism, or history of theater from the following:	
DRAMA 220	Seminar in Dramatic Literature
DRAMA 221	
DRAMA 248A- 248B- 248C	History of American Music Theatre and History of American Musical Theatre and History of American Musical Theatre
DRAMA 164A	History of Costume
DRAMA 164B	History of Costume
or other substitutions as approved by mentor.	
E. Select three courses in design techniques from the following:	
DRAMA 258–282	
F. Complete three foundation courses taken during the first year of study:	
DRAMA 251A- 251B- 251C	Foundations of Theatre and Foundations of Theatre and Foundations of Theatre
G. Select eight Colloquium courses:	
DRAMA 259	Theatre Colloquium
H. Complete the following:	
DRAMA 256	Survival and Professional Practice in Design

A total of 112 quarter units in graduate or approved upper-division undergraduate courses must be completed with a grade of at least B in each course.

### Directing Requirements

A. Select nine graduate studios in directing:	
DRAMA 211	Graduate Studio: Directing (one of which is the creation of a thesis portfolio and resume)
B. Complete two courses in Foundations:	
DRAMA 251A- 251C	Foundations of Theatre and Foundations of Theatre
C. Select one course in Multiculturalism:	
DRAMA 220	Seminar in Dramatic Literature
D. Select two courses as professional internships:	
DRAMA 295	Professional Internship
E. Select two courses in acting:	
DRAMA 200	Graduate Studio: Acting (may include movement, voice classes approved by the Head of Directing)
F. Select two seminars in dramatic literature, performance theory, criticism, theatre history (approved by the Head of Directing)	
DRAMA 199	Project in Theatre
DRAMA 221	
DRAMA 248A- 248B- 248C	History of American Music Theatre and History of American Musical Theatre and History of American Musical Theatre
G. Select six projects:	
DRAMA 240	Graduate Projects (of which one is the thesis and one is an off-site production)
H. Select two design or stage management courses (approved by the Head of Directing)	
DRAMA 157	Lighting Composition
DRAMA 159	Proseminar in Theatre Design
DRAMA 199	Project in Theatre
DRAMA 254	Graduate Stage Management
DRAMA 255	Graduate Design Seminar
I. And a minimum of three electives.	

A total of 116 quarter units in graduate or approved upper-division undergraduate courses must be completed with a grade of at least B in each course.

### Music Direction Requirements

A. Select three projects in theatre:

DRAMA 199	Project in Theatre
-----------	--------------------

B. Complete three courses in singing:

DRAMA 241	Singing Pedagogy
-----------	------------------

C. Complete nine courses in conducting:

DRAMA 242	Conducting
-----------	------------

D. Complete one course in form and analysis:

DRAMA 243	Script and Score
-----------	------------------

E. Complete three courses in scene study:

DRAMA 246A	Musical Scene Study I
------------	-----------------------

DRAMA 246B	Musical Scene Study II
------------	------------------------

DRAMA 246C	Musical Scene Study III
------------	-------------------------

F. Complete three quarters in abbreviated musicals:

DRAMA 247	Musicals Abridged
-----------	-------------------

G. Complete three courses in American Musical Theatre History:

DRAMA 248A	History of American Music Theatre
------------	-----------------------------------

DRAMA 248B	History of American Musical Theatre
------------	-------------------------------------

DRAMA 248C	History of American Musical Theatre
------------	-------------------------------------

H. Complete nine quarters in musical direction projects:

DRAMA 249	Graduate Music Direction
-----------	--------------------------

I. Complete two courses in foundations of theatre:

DRAMA 251A	Foundations of Theatre
------------	------------------------

DRAMA 251C	Foundations of Theatre
------------	------------------------

J. Complete one course in orchestration:

MUSIC 136	Instrumentation
-----------	-----------------

K. Complete one elective

A total of 128 quarter units in graduate or approved upper-division undergraduate courses must be completed with a grade of at least B in each course.

### Stage Management Requirements

A. Select seven graduate studios in stage management:

DRAMA 254	Graduate Stage Management
-----------	---------------------------

B. Complete one thesis project course:

DRAMA 257E	Thesis Writing Project-Stage Management
------------	---

C. Select seven courses in graduate projects:

DRAMA 240	Graduate Projects
-----------	-------------------

D. Complete one professional internship course:

DRAMA 295	Professional Internship
-----------	-------------------------

E. Select three electives as approved by the faculty advisor from the following:

graduate-level (DRAMA 200+)
-----------------------------

upper-division (DRAMA 100–199)
--------------------------------

F. Complete three courses in foundations in theatre:

DRAMA 251A- 251B- 251C	Foundations of Theatre and Foundations of Theatre and Foundations of Theatre
------------------------	--

G. Select two courses in production techniques from the following:

DRAMA 150–159, 162–164, 167–168, 170–171, 260A, B–262, 265–266
--

H. Select one course in dramatic literature, criticism, contemporary theatre, or history of music theatre from the following:

DRAMA 220	Seminar in Dramatic Literature
-----------	--------------------------------

DRAMA 221
-----------

## DRAMA 248A- 248B- 248C

History of American Music Theatre  
and History of American Musical Theatre  
and History of American Musical Theatre

A total of 112 quarter units in graduate or approved upper-division undergraduate courses must be completed with a grade of at least B in each course.

Graduates from the Department of Drama perform, stage manage, or design on Broadway, in national tours, regional and summer theatres, in films and on television. UC Irvine's Drama alumni serve as artistic directors, business managers, designers, art directors, and performers at more than 100 theatre companies, and are faculty at more than 75 institutions of higher learning.

A degree in Drama may or may not lead to professional employment in theatre or film. While some alumni may pursue careers as professional theatre artists, many may use the skills learned from their degree and embark upon careers in law, business, arts management, advertising, and teaching. Others may pursue further study at UC Irvine or other notable institutions.

## Drama, Minor

The Drama minor provides opportunities for students to engage in research and creative work throughout the Drama department. The program is open to all undergraduate students. Coursework includes history, theory, culture, and practice topics. Students will also participate in drama productions of both large and small scales.

The minor provides the flexibility to allow students to explore areas of particular interest to them, including performance, design, scholarship, stage management, directing, and more.

The minor in Drama consists of eight courses (32 units) as specified below:

A. Complete the following:

DRAMA 10	Introduction to Theatre
----------	-------------------------

B. Select one of the following:

DRAMA 15	Performance Now
DRAMA 20A	Culture in Performance
DRAMA 20B	Culture in Performance
DRAMA 20C	Culture in Performance

C. Select one of the following:

DRAMA 30A	Acting
DRAMA 65	Music Theatre Workshop I
DRAMA 142	Music Theatre Workshop II
DRAMA 146	NYSP-Preparation
DRAMA 50A	Introduction to Costume Design
DRAMA 50B	Introduction to Scenic Design
DRAMA 50C	Introduction to Lighting Design
DRAMA 50D	Introduction to Sound Design
DRAMA 50E	Introduction to Stage Management

D. Select one of the following:

DRAMA 40A	Development of Drama
DRAMA 40B	Development of Drama
DRAMA 40C	Development of Drama

E. Complete four units of DRAMA 101, selected from the following: <sup>1</sup>

DRAMA 101A	Theatre Production: Costume
DRAMA 101B	Theatre Production: Scenic
DRAMA 101C	Theatre Production: Lighting
DRAMA 101D	Theatre Production: Stage Management
DRAMA 101E	Theatre Production: Audio

F. Select one of the following:

DRAMA 100	University Theatre
DRAMA 198	Director Class Project

# DRAMA 199

## Project in Theatre

G. Select two Drama electives, one of which must be upper division (100-199)

<sup>1</sup> DRAMA 101 units may not overlap with any other major or minor requirements.

Students may elect to take a maximum of two courses in the minor Pass/Not Pass. Students in the Music Theatre and Drama majors may not declare a minor in Drama.

## Music Theatre, B.F.A.

The B.F.A. in Music Theatre includes high-level training curriculum including song repertoire building, audition technique, dance technique and repertoire, singing for the stage, and study in the history of the American musical. Each quarter, those students that have completed one quarter of Music Theatre Workshop, Level III (DRAMA 143A , DRAMA 143B , or DRAMA 143C ) can audition for entry into the B.F.A. track.

A. Complete the following:

DRAMA 10	Introduction to Theatre
DRAMA 30A- 30B- 30C	Acting and Acting and Acting
DRAMA 40A- 40B- 40C	Development of Drama and Development of Drama and Development of Drama

B. Select one of the following:

DRAMA 15	Performance Now
DRAMA 20A	Culture in Performance
DRAMA 20B	Culture in Performance
DRAMA 20C	Culture in Performance

C. Select one of the following design courses:

DRAMA 50A	Introduction to Costume Design
DRAMA 50B	Introduction to Scenic Design
DRAMA 50C	Introduction to Lighting Design
DRAMA 50D	Introduction to Sound Design
DRAMA 50E	Introduction to Stage Management

D. Complete:

DRAMA 100	University Theatre
DRAMA 136	Music Theatre Acting
DRAMA 142	Music Theatre Workshop II
DRAMA 143A- 143B- 143C	Music Theatre Workshop III and Music Theatre Workshop III and Music Theatre Workshop III
DRAMA 144	Music Theatre Workshop IV
DRAMA 145	Music Theatre Singing (taken three times)
DRAMA 146	NYSP-Preparation
DRAMA 148A- 148B- 148C	History of American Musical Theatre and History of American Musical Theatre and History of American Musical Theatre
DRAMA 149	Music Proficiency for Actors
DRAMA 176	Script and Score
DRAMA 177	Song Repertoire

E. Complete:

DRAMA 182A- 182B	Dance Technique, Level I and Dance Technique, Level I
or	
DRAMA 183A- 183B	Dance Technique, Level II and Dance Technique, Level II

F. Select one Dramatic Literature course from DRAMA 103-129 or 180.

**Theatre Production (DRAMA 101) requirements:**

Freshmen—eight units, of which four units must be completed during the first year of residency at UCI.

Transfer Students: Sophomores—six units, of which four units must be completed during the first year of residency at UCI; Juniors and Seniors—four units, which must be completed during the first year of residency at UCI.

Plus each of the following courses when in residence in the New York Satellite Program:

DRAMA 190	NYSP-Acting
DRAMA 191	NYSP - Dance
DRAMA 192	NYSP - Singing
DRAMA 193	NYSP - Performance
DRAMA 194	NYSP-UCI Residency

Also complete two ballet classes, one tap class, and one jazz class in Dance.

**Application Process to Declare the Major**

Drama majors may audition for the program upon acceptance into the Music Theatre Workshop, Level III (DRAMA 143A, DRAMA 143B, or DRAMA 143C). B.F.A. auditions are held three times per year: during Welcome Week and finals week of the fall and winter quarters. A grade point average of 3.0 in music theatre courses completed prior to the B.F.A. audition is required.

**Honors in Drama Program**

The Honors in Drama is a designation designed to recognize the generalist undergraduate Drama student, one who has chosen to focus on breadth in their education, as opposed to depth in one area. Such students are often ineligible to be considered for Honors in a specific area (Acting, Design, etc.), and the Honors in Drama designation is a recognition of the high quality of scholarship and work that the student has accomplished within the Department.

Eligibility requirements include: 1) at least one year in good standing as a Drama major; 2) anticipated graduation date within one year of application; 3) not currently receiving any other honors through the Drama Department; 4) completion of at least three upper-division courses, spanning at least three areas (acting, directing, design, stage management, music direction, dramaturgy, or literature/theory/criticism); 5) minimum overall GPA of at least 3.2, with a minimum GPA of 3.4 in all UCI Drama courses; 6) completed participation in at least five UCI Drama mainstage, director class projects, or faculty mentored productions as cast, designer, stage manager, dramaturg, crew chief, assistant director, assistant designer, or assistant stage manager (DRAMA 100, DRAMA 198, or DRAMA 199); 7) completion of four DRAMA 101 units.

Admission to the Honors in Drama program is competitive; only truly exceptional students (no more than 10 to 20 percent of those eligible) will be admitted to the program. To apply, a student must have a faculty recommender. Students may apply directly to the program, or faculty members may submit nominations. Completed applications and a resume, CV, dossier, or portfolio are due on the first day of spring quarter. After reviewing the application and resume, etc., faculty will vote on admissions to the honors program. A simple majority is required to make the award. In the event of a tie, the Drama Chair casts the deciding vote.

Criteria for admission include a demonstrated commitment and contributions to UCI Drama productions and scholarship that spans multiple areas of the Department, including acting, directing, design, stage management, music direction, dramaturgy, literature/theory/criticism, producing, technical production, and/or playwrighting. Students should have also demonstrated commitment and contributions to UCI Drama's culture, including issues of leadership, diversity and mentorship.

**Honors in Acting Program**

Admission to the Honors in Acting Program requires both eligibility and a special audition. The eligibility requirements for sophomore-level transfer students and native UCI students are (1) at least one year in good standing as a UCI Drama major; (2) completion of DRAMA 130 or DRAMA 136 and at least one section of either DRAMA 135 or DRAMA 142, all at UCI; (3) honors students must possess and maintain an overall GPA of at least 3.2, with a GPA of 3.4 or higher in all acting courses; (4) performance in at least three official UCI Drama productions; (5) completion of six units of DRAMA 101 (Production/Crew); and (6) completion of the eligibility form.

The eligibility requirements for junior-level transfer students are (1) one year in good standing as a UCI Drama major; (2) completion of DRAMA 130 or DRAMA 136 at UCI; (3) honors students must possess and maintain an overall GPA of at least 3.2, with a GPA of 3.4 or higher in all acting courses; (4) completed performance in at least one official UCI Drama production; (5) completion of four units of DRAMA 101; and (6) completion of eligibility form.

A student's audition will determine final admission to the Honors in Acting program. Only truly exceptional students, no more than 10 to 20 percent of those eligible, will be admitted. The Honors auditions, for eligible candidates only, are held at the end of fall quarter and by special arrangement. Auditions will consist of a standard presentation: one classical and one modern monologue, totaling no more than three minutes.

Honors in Acting Program students receive (1) the "Honors in Acting" notation on their official transcript at graduation; and (2) nomination and recommendation for national University/Resident Theatre Association (U/RTA) auditions. Honors in Acting students may also be eligible to join M.F.A. Acting students in on-campus auditions for professional theatres and attend M.F.A. Actors' "Dynamics" classes.

## Honors in Design/Technology Program

The Honors in Design/Technology Program provides the opportunity for Drama majors to concentrate on the study and practice of scenery, costume, lighting, sound design, or technology. Honors in Design/Technology students study basic and advanced design and production techniques, participate in classes with graduate design students, and may serve as an assistant to a graduate student or faculty designer, or design a production at UCI.

Eligibility requirements are (1) at least one year in good standing at UCI as a Drama major; (2) completion of DRAMA 50A, DRAMA 50B, DRAMA 50C, DRAMA 50D for Scenic or Costume designers; or completion of DRAMA 50C, DRAMA 50D and two of DRAMA 50A or DRAMA 50B for Sound or Lighting designers (3) completion of at least two courses selected from DRAMA 50E, upper-division studio courses (DRAMA 150–162, 167–169, 171, or 179), or graduate-level design courses, including at least one from the design area in which the student is applying for honors; (4) possess and maintain an overall GPA of at least 3.2, with a GPA of 3.4 or higher in all design and production technique courses; (5) completion of four out of eight units of DRAMA 101 (Theatre Production); and (6) completion of the eligibility form.

Admission to the Honors in Design/Technology Program is competitive. Students may be admitted as early as the winter quarter of their sophomore year. Upon completion of eligibility requirements, the student will schedule an informal portfolio review with a member of the design faculty appropriate to the student's specialty area(s).

Only truly exceptional students will be admitted to Honors in Design/Technology as determined by the Design faculty.

If the faculty mentor determines that the student is a good candidate for the Honors in Design/Technology Program, the mentor will present the student's portfolio to the Design Faculty. The Design Faculty, led by the Head of Design, will then decide if the student shall be admitted to the Honors in Design Program.

Honors in Design/Technology students receive (1) the "Honors in Design/Technology" notation on their official transcript at graduation; (2) an assistant designer assignment with a graduate student or faculty designer; (3) special consideration to design a budgeted and technically supported production; and (4) Honors in Design students may also receive nomination and recommendation for national University/Resident Theatre Association (U/RTA) interviews.

Honors in Design/Technology students are expected to maintain a high level of performance and commitment to their work and the Drama Department. Honors students meet with their faculty mentor at the beginning of every quarter to evaluate their progress and check that all grade, course, and production requirements are being satisfied.

Once admitted into the Honors in Design/Technology Program, students are expected to:

1. Maintain an overall GPA of at least 3.2, with a GPA of at least 3.4 in all design and production technique courses.
2. Remain in good standing as a Drama major.
3. Satisfy any provisional conditions for acceptance into the Honors in Design/Technology program.
4. Complete production assignments as assigned by the faculty mentor.
5. Continue to take at least two courses (as enumerated in the eligibility section) or independent studies per year, at least half of which must come from the area of design in which the student is applying for honors.
6. Complete any safety and auxiliary training commensurate with M.F.A. students in a particular discipline.
7. Maintain the Drama Department's CORE values (<http://drama.arts.uci.edu/graduate-programs/directing/mfa-directing/>).

Should a student, having been previously admitted to the Honors in Design Program, fail to meet expectations, the Design Faculty will meet to evaluate the situation; the student may lose their Honors in Design status and have to re-apply to the Program.

For more information contact the Head of Design in Drama or Area Head of design discipline.

## Honors in Directing Program

The Honors in Directing Program provides the opportunity for Drama majors to concentrate on the study and practice of stage direction. Honors in Directing students study basic and advanced directing techniques, participate in the directing studio classes with graduate Directing students, and direct two full plays in the Director Class Projects series. Honors students also have the opportunity to receive credit as the assistant director to a Drama Department main season show, or as a production internship with a professional theatre company.

Admission to the Honors in Directing Program is competitive. Candidates must first complete DRAMA 184 (Directing) and receive instructor approval to enroll in DRAMA 185 (Advanced Directing). Candidates must apply, as a director, for DRAMA 198 (Director Class Project) by submitting a proposal to direct a play in the Director Class Project. If the proposal is accepted, the candidate must declare to the Head of Directing that the production is to be counted as an audition for admission to the Honors in Directing Program. A committee of three Drama faculty members, including the Head of Directing, will then see and evaluate the production for clarity of interpretation, unity of style, strength of acting, and ensemble performance, and will examine the candidate's self-evaluation and the evaluations of the director by members of the cast. The Head of Directing will inform the candidate of the committee's decision as to whether or not the candidate is admitted to the Honors Program.

Undergraduate Drama majors can be admitted into the program as early as the winter quarter of their freshman year but no later than the spring quarter of their junior year. Students may be admitted to the program retroactively if all the requirements for Directing Honors have been met by their final year, but only if a faculty committee of three has seen their workshops and agrees to admit the candidate.

To achieve the Honors in Directing distinction, students must fulfill all the courses required of the regular Drama major, with an overall GPA of 3.2 or higher. In addition, students must complete the following courses with a GPA of 3.4 or higher:

1. DRAMA 184 (Directing).
2. Two courses in DRAMA 185 (Advanced Directing). In this course, undergraduate Directing students present work in the Directing Laboratory along with graduate Directing students.
3. Two Director Class projects, one of which must be taken as DRAMA 198 (Director Class Project) with the candidate serving as director. The candidate must stage a second Director Class Project as DRAMA H198 (Honors Director Class Project), for which a letter grade is earned.
4. Four additional units to be satisfied by any of the following: DRAMA 199 (as a summer internship, approved by the Head of Directing, with the candidate serving a professional theatre company as director, assistant director, or production assistant); DRAMA 199 (as a production/directing project for Playwright's Workshop); DRAMA 100 (as assistant director to a faculty director); or DRAMA 199 (as assistant director to a graduate director's thesis production).

Honors candidates meet with the Head of Directing at the beginning of every quarter to evaluate their progress and to check that all grade and course requirements are being satisfied. Successful graduating seniors will receive the "Honors in Directing" notation on their official transcript and will receive a nomination and recommendation for national University/Resident Theatre Association (U/RTA) interviews.

NOTE: All of the above courses are open to all students even though they may not qualify for the Honors Program.

## Honors in Dramatic Literature, History, and Theory Program

The Honors in Dramatic Literature, History, and Theory Program is designed to challenge superior students beyond the scholarly requirements of the Drama major. It provides them with the opportunity to advance their knowledge of dramatic literature, history, and theory and to further develop their writing, analytical, and research skills. An additional purpose of the program is to better prepare students for graduate study in not only dramatic literature, history, and theory, but in all fields in the humanities and social sciences, as well as in law.

Eligibility requirements are (1) completion of DRAMA 40A, DRAMA 40B, DRAMA 40C and two courses selected from DRAMA 103–129 (for upper-division writing credit), or equivalents to these courses from other institutions; (2) possess and maintain an overall GPA of at least 3.2, with a GPA of 3.4 or higher in all dramatic literature, history, and theory courses; and (3) completion of the eligibility form.

Admission to the Honors in Dramatic Literature, History, and Theory Program is competitive. Students must apply to the program prior to the spring quarter of their junior year. Upon completion of eligibility requirements, applicants must submit at least two critical essays, most likely written previously for courses, totaling no more than 30 pages. These essays will be used by the Honors Committee (comprised of the Head of Dramatic Literature, History, and Theory and two additional members of the Drama faculty) to determine admission. Only truly exceptional students (no more than 10 to 20 percent of those eligible) will be admitted.

Beyond fulfilling the regular requirements of the Drama major, honors students must take three additional upper-division courses in dramatic literature, history, and/or theory, one of which must be focused on theory. Upper-division courses in other departments may be used to fulfill these requirements, as long as the Honors Committee approves them.

Honors students must also write an honors thesis, a 30–40 page research paper written under the supervision of a faculty member on a topic chosen by the student. In consultation with the student, the adviser for this project is selected before the end of the fall quarter of the student's senior year. Students develop their projects until the spring quarter when they enter the writing phase. It is only during the spring quarter that students achieve full course credit for their work on the thesis, in the form of an independent study course with their advisor. This independent study is the final course of the program.

Successful graduating seniors will receive the "Honors in Dramatic Literature, History, and Theory" notation on their official transcript.

## Honors in Music Theatre

Successful graduating seniors in both the B.A. in Drama and the B.F.A. in Music Theatre can achieve Honors in Music Theatre. An overall GPA of 3.2 or higher is required along with an overall GPA of 3.4 in all music theatre courses. B.F.A. students need to complete all course work listed under "Departmental Requirements for the B.F.A. Major" while B.A. students need to complete the following additional music theatre courses:

A. Complete the following:

DRAMA 142	Music Theatre Workshop II
DRAMA 143A- 143B- 143C	Music Theatre Workshop III and Music Theatre Workshop III and Music Theatre Workshop III
DRAMA 145	Music Theatre Singing (taken three times)
DRAMA 146	NYSP-Preparation

DRAMA 148A- 148B- 148C	History of American Musical Theatre and History of American Musical Theatre and History of American Musical Theatre
DRAMA 149	Music Proficiency for Actors
DRAMA 176	Script and Score
DRAMA 190	NYSP-Acting
DRAMA 191	NYSP - Dance
DRAMA 192	NYSP - Singing
DRAMA 193	NYSP - Performance
DRAMA 194	NYSP-UCI Residency
Two ballet classes in Dance.	
One tap class in Dance.	
One jazz class in Dance.	
B. Select one of the following in any combination:	
DRAMA 182A- 182B	Dance Technique, Level I and Dance Technique, Level I
DRAMA 183A- 183B	Dance Technique, Level II and Dance Technique, Level II

At graduation, successful Honors students receive the "Honors in Music Theatre" notation on their transcripts.

## Honors in Stage Management Program

The Honors in Stage Management Program provides the opportunity for Drama majors to concentrate on the study and practice of stage management. Honors students study basic and advanced stage management techniques, participate in classes with graduate stage managers, work as assistant stage managers with the graduate stage managers on graduate student-directed and faculty-directed productions, and stage manage a graduate student-directed or faculty-directed production at UCI.

Eligibility requirements are (1) minimum one year in good standing at UCI as a Drama major; (2) completion of three of the following: DRAMA 50A, DRAMA 50B, DRAMA 50C, DRAMA 50D or equivalent courses; (3) completion of DRAMA 50E; (4) possess and maintain an overall GPA of at least 3.2, with a GPA of 3.4 or higher in all stage management and production courses; (5) completion of eight units of Drama 101 (Theatre Production); and (6) completion of the eligibility form.

Admission to the Honors in Stage Management Program is competitive. Students may be admitted as early as the winter quarter of their sophomore year but no later than the spring quarter of their junior year. Only truly exceptional students (no more than 10 to 20 percent of those eligible) will be admitted to the program as determined by the Honors Committee. Upon completion of eligibility requirements, the student will submit to the Honors Committee: (1) two prompt books; (2) a resume including all stage management and production experience; (3) letters of reference from two directors with whom the student has worked; and (4) a written paper on the subject of stage management.

Students receive the "Honors in Stage Management" notation on their final transcript; nomination and recommendation for national University/Resident Theatre Association (U/RTA) interviews; assistant stage manager assignments working with graduate stage managers; and a stage management assignment on a graduate student-directed or faculty-directed production.

Honors candidates meet with the Head of Stage Management at the beginning of every quarter to evaluate their progress.

Graduates from the Department of Drama perform, stage manage, or design on Broadway, in national tours, regional and summer theatres, in films and on television. UC Irvine's Drama alumni serve as artistic directors, business managers, designers, art directors, and performers at more than 100 theatre companies, and are faculty at more than 75 institutions of higher learning.

A degree in Drama may or may not lead to professional employment in theatre or film. While some alumni may pursue careers as professional theatre artists, many may use the skills learned from their degree and embark upon careers in law, business, arts management, advertising, and teaching. Others may pursue further study at UC Irvine or other notable institutions.

## Department of Music

**Stephen Tucker, Department Chair**

303 Music and Media Building

949-824-6615

<http://music.arts.uci.edu/>

The curricular philosophy of the Department of Music is based on the ideals of the conservatory within the academy. The faculty are concerned with the performance and creation of music within the context of the highest standards of historical, aesthetic, and theoretical inquiry.

The faculty includes composers, musicologists and music theorists, conductors, and performers. All members of the faculty are highly active in their fields as publishing scholars, concert and recording artists, and well-known composers. Many of the instrumental instructors are drawn from the ranks of the Los Angeles Philharmonic, the Los Angeles Chamber Orchestra, the Pacific Symphony, and other orchestras in Southern California. The department also presents frequent performances and master classes by renowned guest artists, and houses several state of the art music technology facilities.

## Career Opportunities

Musicians develop a wide range of transferable skills during their undergraduate career. Musicians learn how to think, to write, to present themselves in public, and to work collaboratively in different kinds of teams. They also demonstrate over the long term a determination and commitment, and a desire to succeed. With a degree in Music, students will find that many career paths lie before them, both within and beyond the diverse field of music.

- History and Theory of Music, Ph.D.
- Integrated Composition, Improvisation, and Technology, Ph.D.
- Music, B.A.
- Music, B.Mus.
- Music, M.F.A.

## Faculty

Kei Akagi, B.A. International Christian University, *Professor of Music; Asian American Studies*

Amy Bauer, Ph.D. Yale University, *Associate Professor of Music*

Haroutune Bedelian, M.A. Royal Academy of Arts, *Professor of Music*

Lorna Griffitt Bedelian, D.M.A. Indiana University, *Professor of Teaching of Music*

Frances Bennett, B.F.A. University of California, Irvine, *Lecturer of Music*

David Brodbeck, Ph.D. University of Pennsylvania, *Professor of Music; European Languages and Studies*

Eleanore Choate, M.A. California State University, Long Beach, *Lecturer of Music*

Patricia Cloud, M.M. University of Southern California, *Lecturer of Music*

Jonathan Davis, D.M.A. Juilliard School, *Lecturer of Music*

Michael Dessen, Ph.D. University of California, San Diego, *Professor of Music*

John Christopher Dobrian, Ph.D. University of California, San Diego, *Professor of Music; Informatics*

Nohema Fernandez, D.M.A. Stanford University, *Professor Emerita of Music*

Frederick Greene, B.M. University of Southern California, *Lecturer of Music*

Nicole Grimes, Ph.D. University of Dublin, *Associate Professor of Music*

Stephan Hammel, Ph.D. University of Pennsylvania, *Assistant Professor of Music*

Matthew Hare, D.M.A. University of Iowa, *Lecturer of Music*

Jason Harnell, *Lecturer of Music*

Gary Heaton-Smith, D.M.A. University of California, Los Angeles, *Lecturer of Music*

Joseph Huszti, MM Northwestern University, *Professor Emeritus of Music*

Mari Kimura, D.M.A. Juilliard School, *Professor of Music*

Sarah Koo, M.M. The Juilliard School, *Lecturer of Music*

Jerzy Kosmala, D.M. Indiana University, *Lecturer of Music*

Peter O. Krapp, Ph.D. University of California, Santa Barbara, *Professor of Film and Media Studies; English; European Languages and Studies; Informatics; Music; Visual Studies* (digital culture, media history, cultural memory)

Lukas Ligeti, *Assistant Professor of Music*

Eric Lindsay, D.M. Indiana University, *Lecturer of Music*

Kevin McKeown, M.A. University of California, Los Angeles, *Lecturer of Music*

Irene Messoloras, D.M.A. University of California, Los Angeles, *Lecturer of Music*

Elliott Moreau, M.M. University of Southern California, *Lecturer of Music*

Margaret Murata, Ph.D. University of Chicago, *Professor Emerita of Music*

Adedeji Ogunfolu, M.M. University of Michigan, Ann Arbor, *Lecturer of Music*

Dariusz Oleszkiewicz, B.A. California Institute of the Arts, *Lecturer of Music*

Hossein Omoumi, Ph.D. University of Florence, *Maseeh Professor in Persian Performing Arts and Professor of Music*

Barry Perkins, M.A. New England Conservatory of Music, *Lecturer of Music*

Gerald Pinter, B.A. University of North Texas, *Lecturer of Music*

Colleen Reardon, Ph.D. University of California, Los Angeles, *Professor of Music*

Bobby Rodriguez, D.M.A. University of California, Los Angeles, *Lecturer of Music*

John Schneiderman, M.F.A. University of California, Irvine, *Professor of Teaching of Music*

Nina Scolnik, B.M. Oberlin College, *Professor of Teaching of Music*

David Stetson, B.M. University of Southern California, *Lecturer of Music*

Darryl Taylor, D.M.A. University of Michigan, *Professor of Music; African American Studies*

Alan Terricciano, M.A. Eastman School of Music, *Associate Dean for Undergraduate Affairs and Professor of Dance; Music* (music for dance, musical resources, critical issues in dance, music theory, keyboard skills, and repertoire)

Stephen Tucker, D.M.A. University of California, Los Angeles, *Robert and Marjorie Rawlins Chair in Music and Associate Professor of Music*

Kojiro Umezaki, M.A. Dartmouth College, *Professor of Music; Computer Science*

Sunil P. Verma, M.D. University of Southern California, *Assistant Dean of Workforce Development and Health Sciences Associate Clinical Professor of Otolaryngology; Music*

Amanda Jane Walker, M.F.A. University of California, Los Angeles, *Lecturer of Music*

## Courses

### **MUSIC 3. Introduction to Music. 4 Units.**

Introduction to musical concepts and active listening skills. Students develop musical understanding through critical readings, selected repertoire, fundamental concepts related to rhythm, pitch, and genre. Students apply those concepts to music from a wide range of historical and cultural origins.

(IV)

### **MUSIC 4. Introduction to Opera. 4 Units.**

Introduces students with no musical background to the dramatic and performance conventions of opera, and suggests ways of developing a critical stance vis-a-vis the social, political, gender-related and moral conflicts that are presented by composers and librettists.

(IV)

### **MUSIC 5. Popular Music in the United States. 4 Units.**

Examines the cultural, social, political, and economic dimensions of popular music in the United States over the last century and a half, with an emphasis on matters related to class, race, ethnicity, and gender.

(IV)

**MUSIC 8. The Beatles and the Sixties. 4 Units.**

Through a study of the music of the Beatles, students are introduced to selected broader historical and cultural themes (e.g., race and music, gender and music, music and the counterculture) while developing an understanding of the basic elements of music.

(IV)

**MUSIC 9. Rock: The Early Years. 4 Units.**

Surveys the social and cultural fabric of the post-World War II United States (from the late 1940s through the early 1970s) as seen through the prism of music - rock and roll music.

(IV)

**MUSIC 10. Piano for Majors. 1 Unit.**

For Music majors with little or no piano experience. Provides the necessary background for realizing keyboard exercises required in the theory and harmony courses, and develops skills to play and sight-read simple music from different periods.

Repeatability: May be taken for credit 3 times.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 15A. Musicianship I. 2 Units.**

Interval and chord quality identification, melodic and harmonic dictation, tonal and chromatic sight-singing, and rhythmic reading and dictation.

Corequisite: MUSIC 16A

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 15B. Musicianship II. 2 Units.**

Interval and chord quality identification, melodic and harmonic dictation, tonal and chromatic sight-singing, and rhythmic reading and dictation.

Corequisite: MUSIC 16B

Prerequisite: MUSIC 15A and MUSIC 16A. MUSIC 15A with a grade of C- or better. MUSIC 16A with a grade of C- or better

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 15C. Musicianship III. 2 Units.**

Interval and chord quality identification, melodic and harmonic dictation, tonal and chromatic sight-singing, and rhythmic reading and dictation.

Corequisite: MUSIC 16C

Prerequisite: MUSIC 15B and MUSIC 16B. MUSIC 15B with a grade of C- or better. MUSIC 16B with a grade of C- or better

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 16A. Music Theory. 4 Units.**

Review of music fundamentals. Triad and seventh chords, musical texture, chord spacing, embellishing tones, and introduction to diatonic harmony. Part-writing and model composition with tonic, dominant seventh, and subdominant harmonies.

Corequisite: MUSIC 15A

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 16B. Music Theory. 4 Units.**

Introduction to phrase structure. Part-writing and harmonization with predominants, linear dominants, 6/4 embellishing chords, leading-tone and other diatonic seventh chords. Advanced meters and rhythmic-metric dissonance. Diatonic sequence. Introduction to tonicization and modulation through motion to V and III.

Corequisite: MUSIC 15B

Prerequisite: MUSIC 15A and MUSIC 16A. MUSIC 15A with a grade of C- or better. MUSIC 16A with a grade of C- or better

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 16C. Music Theory. 4 Units.**

Tonicization and modulation to closely related keys. Simple binary and ternary forms. Voice-leading reductions and simple forms. Diatonic sequence with seventh chords. Introduction to chromatic harmony I: modal exchange and mixture chords, the Neapolitan and augmented sixth chords.

Corequisite: MUSIC 15C

Prerequisite: MUSIC 15B and MUSIC 16B. MUSIC 15B with a grade of C- or better. MUSIC 16B with a grade of C- or better

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 16D. Theory/Musicianship. 4 Units.**

Extended homophonic and contrapuntal formal designs (continuous variations, rondo form, sonata form, invention, fugue). Embellishing chromatic chords, dominant prolongation, modulations to foreign keys, extended harmonies, chromatic sequence, chromatic voice-leading and symmetrical divisions of the octave.

Prerequisite: MUSIC 15C and MUSIC 16C. MUSIC 15C with a grade of C- or better. MUSIC 16C with a grade of C- or better

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 21A. Keyboard Skills. 1 Unit.**

Designed to develop the foundational skills of sight-reading, harmonization, transposition, improvisation, figured bass realization, and score reading.

Repeatability: May be taken for credit 6 times.

Restriction: Lower-division students only. Music Majors only. Music - Performance Majors only.

**MUSIC 21B. Keyboard Skills. 1 Unit.**

Designed to develop the foundational skills of sight-reading, harmonization, transposition, improvisation, figured bass realization, and score reading.

Repeatability: May be taken for credit 6 times.

Restriction: Lower-division students only. Music Majors only. Music - Performance Majors only.

**MUSIC 21C. Keyboard Skills. 1 Unit.**

Designed to develop the foundational skills of sight-reading, harmonization, transposition, improvisation, figured bass realization, and score reading.

Repeatability: May be taken for credit 6 times.

Restriction: Lower-division students only. Music Majors only. Music - Performance Majors only.

**MUSIC 25. Fundamentals of Music. 4 Units.**

Gain comprehensive insight into the fundamental concepts of music theory, including notation, harmony, and score analysis. Designed for students of all levels to improve their understanding of how music is composed, performed, and heard. Formerly MUSIC 25A.

**(IV)****MUSIC 40B. History of European Music: From the Renaissance through the Baroque. 4 Units.**

An introduction to the analysis of musical styles and forms, to the sources for constructing music history and reconstructing historical music, and to J.S. Bach.

Prerequisite: MUSIC 16C. MUSIC 16C with a grade of C- or better

Restriction: Music Majors have first consideration for enrollment. Music - Performance Majors have first consideration for enrollment.

**(IV and VIII ).****MUSIC 40C. History of European Music: Hasse to Mahler. 4 Units.**

An introduction to the analysis of musical styles and forms, and to the sources for constructing music history and reconstructing historical music, to Richard Wagner.

Prerequisite: MUSIC 40B. MUSIC 40B with a grade of D or better. Recommended: MUSIC 16D

Restriction: Music Majors have first consideration for enrollment. Music - Performance Majors have first consideration for enrollment.

**(IV and VIII ).**

**MUSIC 40D. 20th Century Music. 4 Units.**

Survey of principal composers, movements, and compositional techniques of Western art music of the modern era.

Prerequisite: MUSIC 16C. MUSIC 16C with a grade of C- or better

Restriction: Music Majors have first consideration for enrollment. Music - Performance Majors have first consideration for enrollment.

(IV and VIII ).

**MUSIC 41. Major Composer. 4 Units.**

Study of the works of an important composer with emphasis on their significance in historical and social contexts. Composers selected represent a wide variety of historical periods, nationalities, and stylistic orientations.

Repeatability: May be taken for credit 2 times as topics vary.

(IV)

**MUSIC 42. Music and Gender. 4 Units.**

Explores various intersections between music and gender. Examines ways in which gender and sexuality have played a vital role in the creation, dissemination, and consumption of music ranging from medieval Christian mysticism to contemporary hip-hop artists.

(IV, VIII)

**MUSIC 44. Classical Music in Society. 4 Units.**

Examines some ways in which classical music has played an integral role in aspects of society. Studies pieces from different cultural, political, and historical contexts in order to understand how musical meaning is created and interpreted.

(IV, VIII)

**MUSIC 45. History of Film Music. 4 Units.**

Course provides an overview of film music history. Special emphasis will be placed on developing an analytic vocabulary for musical elements and cultivating an understanding of how music can function within a film.

(IV)

**MUSIC 46. Music in Multimedia. 4 Units.**

Students explore intersections between music and other media forms through creating multimedia projects, readings, lectures, and discussion. Students produce music, edit video, increase media literacy, and study theories behind how music communicates meaning.

(IV)

**MUSIC 47. Introductory Topics in Music Technology. 4 Units.**

Introductory topics in electronic music, digital audio, and other aspects of music technology.

Repeatability: Unlimited as topics vary.

(IV)

**MUSIC 48. Introductory Topics in Music and Culture. 4 Units.**

Examines music and musical practices in different historical periods, societies, and cultural settings.

Repeatability: Unlimited as topics vary.

(IV)

**MUSIC 51. Music Technology and Computers. 4 Units.**

A study of the influence of technology on the musical culture and aesthetics from the 20th century to the present, with particular emphasis on the role of the computer. Work includes lectures, readings, listenings, discussions, demonstrations, writing, and experimentation.

(IV)

**MUSIC 65. Piano for Music Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times as topics vary.

Restriction: Music Majors only.

**MUSIC 66. Strings for Music Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times as topics vary.

Restriction: Music Majors only.

**MUSIC 67. Winds for Music Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times as topics vary.

Restriction: Music Majors only.

**MUSIC 68. Voice for Music Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music Majors only.

**MUSIC 69. Percussion for Music Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times as topics vary.

Restriction: Music Majors only.

**MUSIC 70. Guitar, Lute, and Other Plucked Instruments for Music Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music Majors only.

**MUSIC 78. History of Jazz. 4 Units.**

Development of jazz from African and African American folk origins through blues, early jazz, swing, bebop, 'cool' jazz, fusion, free jazz, and contemporary trends.

Restriction: Music Majors have first consideration for enrollment. Music - Performance Majors have first consideration for enrollment.

(IV and VII ).

**MUSIC H80. Experiments in Music. 4 Units.**

Scientists explain the cognition of music using experimental methodology; artists expand the domain of music by trying previously unknown ways of making it. These two types of experiment deepen our understanding of music, from both scientific and artistic vantage points.

Restriction: Campuswide Honors Collegium students only.

(IV)

**MUSIC 82A. MAHUR-Pish Radif: Introduction to Classical Persian Music. 4 Units.**

Survey of art music in Iran and basic structures of classical Persian music, with emphasis on MAHUR modal system and different instruments of classical Persian music. No musical experience required, but interest in vocal music is strongly recommended.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 82B. HOMAYUN-Pish Radif: Introduction to Classical Persian Music. 4 Units.**

Survey of art music in Iran and basic structures of classical Persian music, with emphasis on HOMAYUN modal system and famous musicians and performers of classical Persian music. No musical experience required, but interest in vocal music is strongly recommended.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 82C. SHUR-Pish Radif: Introduction to Classical Persian Music. 4 Units.**

Survey of art music in Iran and basic structures of classical Persian music, with emphasis on the SHUR modal system and different poetic rhythms in classical Persian music. No musical experience required, but interest in vocal music is strongly recommended.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 122A. Piano Literature. 2 Units.**

Survey of stringed keyboard literature from the English Virginalists through twentieth-century composers. Historical, formal, and stylistic considerations of music presented. Performances by class participants and occasional outside guests.

Prerequisite: MUSIC 16A and MUSIC 16B and MUSIC 16C

Restriction: Upper-division students only. Music Majors only. Music - Performance Majors only.

**MUSIC 122B. Piano Literature. 2 Units.**

Survey of stringed keyboard literature from the English Virginalists through twentieth-century composers. Historical, formal, and stylistic considerations of music presented. Performances by class participants and occasional outside guests.

Prerequisite: MUSIC 16A and MUSIC 16B and MUSIC 16C

Restriction: Upper-division students only. Music Majors only. Music - Performance Majors only.

**MUSIC 122C. Piano Literature. 2 Units.**

Survey of stringed keyboard literature from the English Virginalists through twentieth-century composers. Historical, formal, and stylistic considerations of music presented. Performances by class participants and occasional outside guests.

Prerequisite: MUSIC 16A and MUSIC 16B and MUSIC 16C

Restriction: Upper-division students only. Music Majors only. Music - Performance Majors only.

**MUSIC 126. Piano Pedagogy. 2 Units.**

The materials and methods of piano instruction are examined and evaluated.

Restriction: Upper-division students only. Music Majors only. Music - Performance Majors only.

**MUSIC 131. Post-Tonal Theory. 4 Units.**

Significant harmonic, rhythmic, and structural practices since 1900. Analysis and written work exploring free atonality and serialism; neo-tonal practices such as use of extended tertian harmonies, modalism, pandiatonicism, and non-tertian harmonies; structural principles such as aleatory, metric modulation and minimalism.

Prerequisite: MUSIC 16D

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 132. Jazz Theory. 4 Units.**

Study of jazz harmony and melody construction in improvisation. Covered topics include terminology, chord symbols, notation, voicings, and scales as commonly used in jazz and popular music. Issues regarding tonality and ramifications of the blue scale are also examined.

Prerequisite: MUSIC 16D

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 136. Instrumentation. 4 Units.**

Ranges and capabilities of modern orchestral instruments. Exercise in writing for various combinations of wind, string, and percussion instruments and for full orchestra.

Prerequisite: MUSIC 16C

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 140. Topics in Medieval Music. 4 Units.**

Topics in medieval music.

Prerequisite: MUSIC 40B. MUSIC 40B with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 141. Topics in Renaissance Music. 4 Units.**

Topics in renaissance music.

Prerequisite: MUSIC 40B. MUSIC 40B with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 142. Topics in Baroque Music. 4 Units.**

Topics in Baroque music.

Prerequisite: MUSIC 40B. MUSIC 40B with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 142W. Topics in Baroque Music . 4 Units.**

Topics in Baroque music.

Prerequisite: MUSIC 40B. MUSIC 40B with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**(Ib)**

**MUSIC 143. Topics in Classical Music. 4 Units.**

Topics in Classical music.

Prerequisite: MUSIC 40C. MUSIC 40C with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 143W. Topics in Classical Music. 4 Units.**

Topics in Classical music.

Prerequisite: MUSIC 40C. MUSIC 40C with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**(Ib)**

**MUSIC 144. Topics in Romantic Music. 4 Units.**

Topics in Romantic music.

Prerequisite: MUSIC 40C. MUSIC 40C with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 144W. Topics in Romantic Music. 4 Units.**

Topics in Romantic music.

Prerequisite: MUSIC 40C. MUSIC 40C with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only.

**(Ib)**

**MUSIC 145. Topics in 20th Century Music. 4 Units.**

Topics in 20th century music.

Prerequisite: MUSIC 40D. MUSIC 40D with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 145W. Topics in 20th Century Music. 4 Units.**

Topics in 20th century music.

Prerequisite: MUSIC 40D. MUSIC 40D with a grade of D or better. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Upper-division students only. Music Majors only. Music - Performance Majors only.

**(Ib)****MUSIC 146. Studies in Jazz Music. 4 Units.**

Topics in Jazz Music.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 147. Studies in Music Technology. 4 Units.**

Specialized topics in electronic music, computer-aided music, and other aspects of music technology.

Repeatability: May be taken for credit 2 times as topics vary.

**MUSIC 148. Studies in Ethnomusicology. 4 Units.**

Topics in Ethnomusicology.

Repeatability: May be taken for credit 2 times.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 149. Studies in Music History. 4 Units.**

Specialized topics in musical genres; culture and social issues; performance practices; and interrelated arts.

Prerequisite: MUSIC 40B and MUSIC 40C and MUSIC 40D. Satisfactory completion of the lower-division writing requirement.

Repeatability: May be taken for credit 3 times as topics vary.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 150. Composition. 4 Units.**

Exercises and projects for diverse instrumental-vocal combinations; contemporary techniques and problems. Participation in the improvisation ensemble and working with electronic media.

Prerequisite: MUSIC 16C

Repeatability: May be repeated for credit unlimited times.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 151. Computer Music Composition. 4 Units.**

Exercises in the composition of music uniquely possible by computer, including digital signal processing, computer control of synthesizers and processors, and algorithmic composition. Demonstrations and musical analyses in class; considerable studio work outside class.

Prerequisite: MUSIC 51

**MUSIC 152. Interactive Arts Programming. 4 Units.**

Study of artistic issues and programming techniques involved in the development of interactive computer art and music. Theoretical background, basic tenets of programming, and practical exercises in programming interactive computer multimedia art.

Prerequisite: MUSIC 51 or ART 65A or DANCE 163

**MUSIC 153. Counterpoint. 4 Units.**

Studies in contrapuntal practices of various style periods such as the 16th, 18th, and 20th centuries.

Prerequisite: MUSIC 16B. MUSIC 16B with a grade of C- or better

Restriction: Music Majors only.

**MUSIC 155. Analysis. 4 Units.**

Methods of formal analysis applicable to all Western musical styles: additive, continuous, transformational, and hierarchic forms; rhythm, texture, and sonority as form and process.

Prerequisite: MUSIC 16D

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 156A. Song Literature. 2 Units.**

A survey of song literature. Designed as an overview of the song repertoire, German Lieder.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 156B. Song Literature. 2 Units.**

A survey of song literature. Designed as an overview of the song repertoire, French mélodie.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 157. Advanced Study in Composition. 4 Units.**

Individual weekly lessons in composition.

Prerequisite: MUSIC 150. MUSIC 150 with a grade of C- or better

Repeatability: May be taken for credit 6 times.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 158A. Diction. 2 Units.**

In-depth study of the International Phonetic Alphabet (IPA), including its transcription and pronunciation, and its application for singers. Introduction to IPA and Italian Diction.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 158B. Diction. 2 Units.**

In-depth study of the International Phonetic Alphabet (IPA), including its transcription and pronunciation, and its application for singers. German Diction.

Prerequisite: MUSIC 158A

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 158C. Diction. 2 Units.**

In-depth study of the International Phonetic Alphabet (IPA), including its transcription and pronunciation, and its application for singers. French Diction.

Prerequisite: MUSIC 158A and MUSIC 158B

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 159. Vocal Pedagogy. 2 Units.**

Survey about the physical structure of the singing mechanism, science, and philosophy of studio instruction.

Restriction: Music - Performance Majors only.

**MUSIC 160. University Orchestra. 2 Units.**

Study and performance of standard orchestral repertory and works by contemporary composers. Membership is open to all qualified students by audition only.

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 161. Wind Ensemble. 2 Units.**

Study and performance of works written for varying combinations of wind and percussion instruments. Membership is open to all qualified students by audition only.

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 162. University Chorus. 2 Units.**

Make-up of the ensembles varies and may include University Chorus, Chamber Choir, Madrigal Singers, Women's Chorus, and Reading Choir. Membership is open to all qualified students by audition only.

Corequisite: MUSIC 162L

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 162P. University Chorus: Accompanying. 2 Units.**

Keyboard accompanying for one of the UCI choral organizations, with individual coaching in sight reading, score reading, and other accompanying skills.

Repeatability: May be taken for credit 12 times.

**MUSIC 164. Opera Workshop. 2-4 Units.**

Preparation and performance of operatic repertoire, including arias, scenes, and fully staged operas, and/or stage training and role analysis.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 164P. Opera Workshop: Accompanying. 2-4 Units.**

Training in techniques and operatic repertory for keyboard players.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 165. Piano for Music Performance Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music - Performance Majors only.

**MUSIC 166. Strings for Music Performance Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music - Performance Majors only.

**MUSIC 166P. String Accompaniment. 2 Units.**

Chamber ensemble experience with the solo string repertory for keyboard, participation in the weekly string master class, performance in public recitals.

Repeatability: May be taken for credit 3 times.

**MUSIC 167. Winds for Music Performance Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music - Performance Majors only.

**MUSIC 168. Voice for Music Performance Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music - Performance Majors only.

**MUSIC 169. Percussion for Music Performance Majors. 2 Units.**

Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music - Performance Majors only.

**MUSIC 170. Guitar, Lute, and Other Plucked Instruments for Music Performance Majors. 2 Units.**

Private weekly lessons and a weekly master class/workshop for the discussion of solo repertoire and performance practice, including special topics such as historical notational systems, traditional American guitar styles, and demonstrations of period plucked instruments. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music - Performance Majors only.

**MUSIC 171. Chamber Singers. 2 Units.**

A select ensemble specializing in vocal chamber music from all periods. Frequent performances on and off campus. Membership is open to all singers by audition.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 176. Chamber Ensembles . 2 Units.**

Make-up of the ensembles varies and may include various Classical ensembles, Latin Jazz Ensemble, Small Jazz Combos, Percussion Ensemble, and Guitar Ensemble. Membership is open to all qualified students by audition only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music Majors have first consideration for enrollment. Music - Performance Majors have first consideration for enrollment.

**MUSIC 178. Jazz Orchestra. 2 Units.**

Rehearsal and performance of literature written for large jazz ensemble with emphasis on methods and materials. Laboratory setting for new arrangers and/or composers of modern jazz pieces.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 181. Improvisation. 4 Units.**

Improvisation has been central to all music traditions. Course explores real-time music-making in a variety of non-notated contexts. Different improvisational styles are presented, including jazz, Asian improvisation, and experimental modern music. Emphasis on actual classroom performance.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 182. Advanced Jazz Combo. 2 Units.**

Small-group jazz ensemble and improvisational workshop. Range of music covered encompasses the full traditional jazz from improvised ragtime up through the most current avant-garde musical techniques.

Repeatability: May be repeated for credit unlimited times.

**MUSIC 183A. Jazz Composition I. 4 Units.**

Performance and lecture course for writing and performing original jazz compositions. Emphasis is placed on composing as a way to create new improvisational frameworks. Cyclical forms, modal compositions, blues-oriented compositions, and ballad writing.

Prerequisite: MUSIC 78 and MUSIC 132

Restriction: Music Majors only.

**MUSIC 183B. Jazz Composition II. 4 Units.**

Performance and lecture course for writing and performing original jazz compositions. Emphasis is placed on composing as a way to create new improvisational frameworks. Non-functional harmony, contemporary forms, free-bop, and current trends.

Prerequisite: MUSIC 78 and MUSIC 132 and MUSIC 183A

Restriction: Music Majors only.

**MUSIC 183C. Jazz Composition III. 4 Units.**

Performance and lecture course for writing and performing original jazz compositions. Emphasis is placed on composing as a way to create new improvisational frameworks. Study of modern tonal-center compositions, intervallic compositions, and alternate rhythms.

Prerequisite: MUSIC 78 and MUSIC 132 and MUSIC 183A and MUSIC 183B

Restriction: Music Majors only.

**MUSIC 189. Accompanying for Plucked Strings: Continuo and Changes. 2 Units.**

Students apply theory to their instruments as they learn the basics of pre-1800 continuo playing and post-1900 jazz charts. Includes discussions of appropriate repertoire, treatment of harmonic progressions, and finer points of style and technique.

Prerequisite: MUSIC 16C

Repeatability: May be repeated for credit unlimited times.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 191. Tutorial in Music. 1-4 Units.**

Supplemental instruction related to student's area of study. Taken only when the materials studied lie outside regular departmental offerings, and when the student has no formal chance to pursue the subject.

Prerequisite: Undergraduate advisor approval required.

Repeatability: May be taken for credit 3 times.

**MUSIC 193. Conducting. 4 Units.**

Introduces students to the basic techniques employed in the practice of conducting and includes score study and development of leadership skills.

Prerequisite: MUSIC 16D and MUSIC 40B and MUSIC 40C

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 195A. Senior Thesis. 2 Units.**

With consultation in regularly scheduled meetings, students identify and study relevant texts and materials and prepare a prospectus for an original thesis.

Prerequisite: Senior standing in the Honors Program in Music and Culture.

Grading Option: In Progress (Letter Grade with P/NP).

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 195B. Senior Thesis. 2 Units.**

Students submit an outline and preliminary drafts of section of their thesis to the instructor, on a schedule supervised by the instructor. The final version will address the instructor's comments and criticisms.

Prerequisite: MUSIC 195A

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 197. Word and Music. 2 Units.**

Performance class for advanced singers and pianists with emphasis on collaborative approach to vocal literature.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 199. Independent Study. 2-4 Units.**

Student-devised research/composition project, with faculty guidance, resulting in a formal paper/project. Taken only when materials studied lie outside regular departmental offerings or when students have no formal chance to pursue the subject.

Prerequisite: Undergraduate or graduate advisor approval required.

Repeatability: May be taken for credit 3 times.

Restriction: Music Majors only. Music - Performance Majors only.

**MUSIC 200. Bibliography and Research. 4 Units.**

Required of all entering students. A systematic introduction to the bibliographical tools both in the general field of music and in the student's areas of specialization.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 201. Topics in Analysis . 4 Units.**

Seminar focusing on different analytical methods, modal, tonal, and post-tonal, and their applications to repertoires drawn from various historical periods through to the present day.

Prerequisite: Placement into MUSIC 201.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Music Majors only.

**MUSIC 202. Proseminar in Musicology. 4 Units.**

Introduces significant issues and recent developments in musicology and music criticism, including exposure to the controversies that have brought change and reflection to the discipline.

Corequisite: Recommended for musicology students: MUSIC 200

Prerequisite or corequisite: MUSIC 200. MUSIC 200 with a grade of B or better

Restriction: Graduate students only.

**MUSIC 203. Music Thesis . 4 Units.**

Intensive work dedicated to researching and writing a Master's thesis under the supervision of a faculty advisor.

Prerequisite: MUSIC 200. MUSIC 200 with a grade of B or better

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 204. Proseminar in Music Theory and Analysis. 4 Units.**

Introduction to music theories, analytic approaches, and methodologies as applied to repertoires drawn from Western art and popular music.

Corequisite: Recommended for musicology students: MUSIC 200

Prerequisite or corequisite: MUSIC 200. MUSIC 200 with a grade of B or better

Restriction: Graduate students only.

**MUSIC 209. Seminar in Creative Practices. 1-4 Units.**

Core first-year seminar required for graduate students in the Integrated Composition, Improvisation, and Technology emphasis of the M.A. and Ph.D. programs. Composition and presentation of original student works, lecture, and discussion.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 210. Choral Conducting . 4 Units.**

Intensive private instruction and study of the various choral literatures.

Repeatability: May be taken for credit 6 times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 211. Performance . 4 Units.**

Contents vary according to the student's major instrument. Intensive private instruction and study of the various literatures.

Repeatability: May be taken for credit 6 times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 212. Composition. 4 Units.**

Intensive work in composition geared to each student's level of competence.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 213. Orchestral Conducting. 4 Units.**

Intensive private instruction in instrumental conducting.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 214. Graduate Recital.**

Performance of public recital.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 215A. Computer Music Composition and Production. 4 Units.**

Study of the composition and production of music made uniquely possible by the computer, including usage of prevalent digital music technology, techniques of digital signal processing, and computer control of synthesizers and audio processors.

Restriction: Graduate students only. Music Majors only.

**MUSIC 215B. Computer Music Programming. 4 Units.**

Study of the artistic issues and programming techniques involved in the development of original applications for computer music composition and interactive performance.

Restriction: Graduate students only. Music Majors only.

**MUSIC 220. Seminar in Music History. 4 Units.**

Topics in music history.

Corequisite: MUSIC 200

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Music Majors only.

**MUSIC 222. Seminar in Musicology . 4 Units.**

Focuses on current scholarship in musicology and related fields with a strong critical content. Addresses topics relative to their historical and stylistic periods. Recent topics have included Stravinsky, Holy Women, Mahler, Historiography, Issues in Performance Practice, and Brahms's Chamber Music.

Corequisite: Recommended for musicology students: MUSIC 200

Prerequisite or corequisite: MUSIC 200. MUSIC 200 with a grade of B or better

Repeatability: May be taken for credit for 4 units as topics vary.

Restriction: Graduate students only.

**MUSIC 224. Seminar in Music Theory and Analysis. 4 Units.**

Typical topics include Schenkerian theory and analysis, contemporary form theory, and advanced techniques in the analysis of late 19th-century and contemporary music (e.g., transformational theory, Neo-Riemannian, and scale network theory).

Corequisite: Recommended for musicology students: MUSIC 200

Prerequisite or corequisite: MUSIC 200. MUSIC 200 with a grade of B or better

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**MUSIC 230. Seminar in Contemporary Music. 4 Units.**

Special seminar projects dealing with contemporary music with emphasis on analytical techniques and style criticism.

Prerequisite or corequisite: MUSIC 200. MUSIC 200 with a grade of B or better

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Music Majors only.

**MUSIC 231. Improvisation. 4 Units.**

Introduces the practice and history of improvisation in diverse fields of Western music since 1950. Performance projects and group critiques, weekly reading and listening assignments, participation in a class concert, and a research paper.

Restriction: Graduate students only. Music Majors only.

**MUSIC 235. Critical Studies in Music. 4 Units.**

A critical examination of music traditions, institutions, and aesthetics, employing new scholarship in music and new critical studies in other disciplines.

Corequisite: Recommended for musicology students: MUSIC 200

Prerequisite or corequisite: MUSIC 200. MUSIC 200 with a grade of B or better

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Music Majors only.

**MUSIC 236. Theoretical ICIT Seminar. 1-4 Units.**

Seminar studying new genres and topics that integrate composition, improvisation, new technologies, and non-classical cultures.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Music Majors only.

**MUSIC 237. Practical ICIT Seminar. 1-4 Units.**

Study of new practices and techniques that integrate composition, improvisation, new technologies, and non-classical cultures.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Music Majors only.

**MUSIC 239. Thesis Colloquium. 1-2 Units.**

ICIT students present their thesis work-in-progress for discussion and criticism. Faculty and visiting artists/scholars also present their current work.

Repeatability: May be taken for credit for 8 units.

Restriction: Graduate students only. Music Majors only.

**MUSIC 240. Graduate Projects . 4 Units.**

Substantial projects in performance, conducting, or composition (other than those specifically required for the degree), accompanied by a summary paper.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Music Majors only.

**MUSIC 242A. First-Year Research and Writing Seminar I. 4 Units.**

Guided reading for one quarter on a broad subject selected by the instructor, followed by one quarter in which the student undertakes independent research on the selected topic, leading to a substantial term paper.

Prerequisite: MUSIC 200. MUSIC 200 with a grade of B or better

Restriction: Graduate students only.

**MUSIC 242B. First-Year Research and Writing Seminar II. 4 Units.**

Guided reading for one quarter on a broad subject selected by the instructor, followed by one quarter in which the student undertakes independent research on the selected topic, leading to a substantial term paper.

Prerequisite: MUSIC 200 and MUSIC 242A. MUSIC 200 with a grade of B or better. MUSIC 242A with a grade of B or better

Restriction: Graduate students only.

**MUSIC 243A. Second-Year Research and Writing Tutorial I. 4 Units.**

In this two-quarter sequence, students gain expertise in a first area of research concentration by undertaking directed reading on a topic of their choice and then writing a paper of near-publishable length and quality on that topic.

Prerequisite: MUSIC 242B. MUSIC 242B with a grade of B or better

Restriction: Graduate students only.

**MUSIC 243B. Second-Year Research and Writing Tutorial II. 4 Units.**

In this two-quarter sequence, students gain expertise in a first area of research concentration by undertaking directed reading on a topic of their choice and then writing a paper of near-publishable length and quality on that topic.

Prerequisite: MUSIC 243A. MUSIC 243A with a grade of B or better

Restriction: Graduate students only.

**MUSIC 244. Readings for the Qualifying Examination. 4-12 Units.**

Directed reading in preparation for the Qualifying Examination.

Prerequisite: MUSIC 243B. MUSIC 243B with a grade of B or better

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**MUSIC 245. Prospectus Research. 4-12 Units.**

Research and writing of the Dissertation Prospectus.

Prerequisite: MUSIC 244. MUSIC 244 with a grade of B or better

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**MUSIC 250. Directed Research. 4 Units.**

Preparation for qualifying exams and dissertation, or an individual research project resulting in a substantial paper or comparable documentation of the research results.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Music Majors only.

**MUSIC 276. Contemporary Ensemble. 2 Units.**

Chamber ensemble for the performance of contemporary music, including newly composed and improvised forms.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 290. Dissertation Research. 4-12 Units.**

Research and writing of the dissertation for the History and Music Theory Ph.D.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**MUSIC 299. Independent Study. 2-4 Units.**

Student-devised research/composition project, with faculty guidance, resulting in a formal paper/project. Taken only when materials studied lie outside regular departmental offerings or when students have no formal chance to pursue the subject.

Prerequisite: Graduate advisor approval required.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only. Music Majors only.

**MUSIC 399. University Teaching. 1-4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## History and Theory of Music, Ph.D.

The Ph.D. in History and Theory of Music is unique and combines both historical musicology and music theory and analysis to offer a Ph.D. program with a particular emphasis on music theory and analysis, critical theory, and the aesthetics and philosophy of music. The program rests on two central pillars: a sustained engagement with musical works that is underpinned by a thorough grounding in musical skills and literacy, and a strong focus on critical theory, which students learn to apply to musicological sub-disciplines such as music analysis and historical musicology.

The doctoral program in the History and Theory of Music is taught by a core faculty whose primary and secondary research interests cover a wide area: vocal music of the Italian baroque, Central European music and culture from the 19th century to the present, experimental music of the 20th century, popular music since 1950, American musical theater, especially that of Stephen Sondheim, and the intersection of theory, philosophy, and culture.

The program seeks students with a strong academic foundation, excellent writing skills, and a desire to develop a research idea into an original thesis. Applicants should possess an undergraduate degree in music or an equivalent level of training, and should demonstrate potential for creative research. Students are expected to have reading knowledge of French, German, Italian, or Spanish.

Applicants are normally expected to have earned an undergraduate degree with a major in music (B.A. or B.Mus.) and to possess strong analytical and writing skills. Applicants whose undergraduate major was in a subject other than music but who can demonstrate a strong background in music are otherwise qualified may also be considered.

The online application and all supporting materials must be received by December 1. Supporting materials must include:

- A personal statement of the applicant's experiences, primary interests, and career goals
- Two samples of academic writing on historical and/or analytical music topics, demonstrating writing and critical thinking skills
- Results of the GRE exam, taken within the last five years
- Three letters of recommendation

### Required Courses

At least 60 units must be earned in the first two years, excluding units earned in MUSIC 399. The number of units earned thereafter will vary in accordance with the time required to pass the qualifying examination, advance to candidacy, and complete the dissertation.

During the first two years in the program, students complete the following:

A. Complete:

MUSIC 200	Bibliography and Research
MUSIC 202	Proseminar in Musicology
MUSIC 204	Proseminar in Music Theory and Analysis

B. Select six topical seminars <sup>1</sup>

MUSIC 222	Seminar in Musicology <sup>2</sup>
MUSIC 224	Seminar in Music Theory and Analysis <sup>3</sup>

C. Select two elective courses <sup>4</sup>

D. Complete the following research and writing courses:

MUSIC 242A- 242B	First-Year Research and Writing Seminar I and First-Year Research and Writing Seminar II
------------------	---

## MUSIC 243A- 243B

Second-Year Research and Writing Tutorial I  
and Second-Year Research and Writing Tutorial II

During the third year, students complete the following:

A. Complete:

MUSIC 244	Readings for the Qualifying Examination (two quarters)
MUSIC 245	Prospectus Research (one quarter)

During the fourth and fifth years, as needed, students take up to three quarters each year of MUSIC 290.

- 1 Normally three topical seminars are taken in the first year and three in the second.
- 2 Of the six topical seminars, at least two must be MUSIC 222.
- 3 Of the six topical seminars, at least two must be MUSIC 224.
- 4 These courses may be taken inside or outside the Department. At least two electives are required during the first two years.

## En Route M.A.

For students who enter the program without an M.A. in an appropriate area of study, the substantial research paper written in MUSIC 243B will constitute the Master's essay. If in the judgement of the advisor and the other two readers, the essay and the student's overall academic record are determined to be satisfactory, the student will be awarded the en route M.A. and be considered to have met the standards for continued Ph.D. study.

Students who enter the program with an M.A. in an appropriate area of study are not eligible for the en route M.A. The advisor and the other two readers will determine whether the student's essay in MUSIC 243B and overall academic record have met the standards for continued Ph.D. study.

## Language Requirement

Before advancing to candidacy, students must demonstrate a reading knowledge of one language other than English relevant to the student's program of study. This requirement is met by passing a translation examination administered by the Department.

## Advancement to Candidacy

The Qualifying Examination, administered by a committee of three faculty members, is typically taken in late winter or early spring quarter of the third year. It consists of an oral exam and a written, take-home exam in music analysis. The oral portion of the exam comprises two parts. In the first, the student is given short excerpts from several musical scores and is asked to identify each as closely as possible in terms of style and period. In the second, the student is examined in the two fields. The first field is related to the topic of the student's second-year research and writing project. The second field is prepared in the third year during completion of MUSIC 244. The take-home exam in music analysis is completed in 72 hours and shall take the form of an extended essay on an assigned composition.

The dissertation prospectus, typically growing out of one of the student's two fields, is presented in a colloquium that includes all three members of the dissertation committee. It cannot be presented until the foreign-language requirement and all course requirements outlined above have been met. Upon acceptance of the prospectus the student will advance to doctoral candidacy.

## Dissertation

The dissertation is an original research project of substantial length approved by the dissertation committee of three faculty members.

## Integrated Composition, Improvisation, and Technology, Ph.D.

The Ph.D. program in Integrated Composition, Improvisation, and Technology (ICIT) is taught by a core faculty whose work embraces diverse forms of music making, challenging conventional distinctions between classical composition, computer music, improvisation, and jazz. Students will receive close personal attention from faculty, and are encouraged to work on interdisciplinary projects. Applicants should possess an undergraduate degree in music or an equivalent level of training and should demonstrate potential for creative and innovative work integrating a wide range of contemporary music and ideas. In addition to the core ICIT faculty, the Music Department includes many other performers, musicologists, theorists, and historians, making for a rich environment in which to develop critical skills that are essential for the 21st-century musician.

In addition to meeting all general requirements for admission to graduate study, applicants should normally hold a B.A. in Music or a B.Mus. A master's degree is not required, but students with prior graduate study may request course requirement waivers as detailed below under Course Requirements. Applicants must demonstrate proficiency in vocal or instrumental performance commensurate with at least two years of individual undergraduate instruction, including exposure to improvisation and non-notated music.

The online application must be submitted and all supporting materials must be received by December 1. Supporting materials must include the following: Composition portfolio, Academic writing sample, and Performance audition (video).

Applicants are expected to have good general knowledge of music history and music theory and competence in basic musicianship skills. Entering students will be given diagnostic tests in these areas prior to the beginning of classes and will be expected to remedy any evident deficiencies during the first year in residence.

## Required Courses

Students may request that specific course requirements be waived based on equivalent graduate coursework completed at other institutions, up to a maximum of 12 units. Such requests must be submitted in fall quarter of their first year and accompanied by relevant course syllabi and transcripts.

### A. Complete:

MUSIC 200	Bibliography and Research
MUSIC 235	Critical Studies in Music
MUSIC 250	Directed Research (at least two quarters) <sup>2</sup>
MUSIC 215A	Computer Music Composition and Production
MUSIC 212	Composition (two quarters)
MUSIC 276	Contemporary Ensemble (two quarters) <sup>2</sup>
MUSIC 239	Thesis Colloquium (one quarter for one unit per year until advancement to candidacy) <sup>1,2</sup>

### B. Select 44 units of additional courses chosen from the following: <sup>3</sup>

MUSIC 209	Seminar in Creative Practices
MUSIC 236	Theoretical ICIT Seminar
MUSIC 237	Practical ICIT Seminar
MUSIC 215B	Computer Music Programming
MUSIC 276	Contemporary Ensemble
MUSIC 230	Seminar in Contemporary Music
MUSIC 231	Improvisation
MUSIC 220	Seminar in Music History
MUSIC 201	Topics in Analysis

<sup>1</sup> May be taken for 2 units with permission of instructor, for students presenting research in progress.

<sup>2</sup> Not eligible for equivalency from another institution.

<sup>3</sup> May satisfy up to 8 units with an approved comparable graduate seminar in another department.

Assuming advancement to candidacy by the end of the third year, these requirements amount to 79 required units, leaving sufficient room for students to take additional coursework in other departments.

## Language Requirement

Before advancing to candidacy, Ph.D. students must demonstrate a reading knowledge of a language other than English, at a level sufficient to conduct research in that language. This requirement may be met either by attaining a passing score in a translation examination administered by the department or by earning a grade of B or higher in level 2C (representing ability equivalent to two full years) of an approved undergraduate language course.

## Advancement to Candidacy

The normative time for students to pass the Qualifying Examination and advance to candidacy is nine quarters (three years). Candidacy Committee chairs are assigned in the spring quarter of the first year of Ph.D. study. Students must sign up for two quarters of MUSIC 250 with their Candidacy Committee chair to prepare for qualifying exams. During these quarters of MUSIC 250, the student works with the Candidacy Committee chair to designate the remaining four committee members, and develops a dissertation prospectus to submit to the committee prior to the candidacy exam. The candidacy exam consists of a response of roughly 20 single-spaced pages to a set of questions provided by the committee, followed by an oral examination with the Candidacy Committee.

Students are not admitted to an M.A.-only program, but may be granted an M.A. in recognition of progress toward the Ph.D. by completing six quarters of ICIT coursework and submitting a portfolio of original musical work completed during that period.

## Dissertation

After advancing to candidacy, the normative time to degree is three quarters (one year). The dissertation committee is chaired by a member of the core ICIT faculty and must include at least one other member of the Senate faculty in Music. A third committee member must be a UC Senate faculty from outside the UCI Music Department, and a fourth member must be a qualified faculty from any department including Music.

The Ph.D. dissertation in ICIT combines innovative creative activity with scholarly research. The goal of the dissertation is to address a major intellectual issue in the integration of composition, improvisation, and technology, and to make an original contribution to existing knowledge of that issue through

research and new artistic work. The tangible product will be a written dissertation that presents and contextualizes substantial innovative work in integrated composition/improvisation/technology, and music of significant scope that clearly demonstrates that work.

## Music, B.A.

The **Bachelor of Arts (B.A.)** degree program enables students to study music history, music theory, composition, or performance within a curriculum that is flexible enough to allow for a second major, study abroad, and other curricular options.

All applicants, regardless of their degree objective, apply to the B.A. program and must demonstrate appropriate vocal or instrumental proficiency, as determined by the results of the Department's required entrance audition (typically scheduled on campus in late January or early February). *For the most up-to-date audition information, visit the Music Department website (<http://music.arts.uci.edu>).*

**All students must meet University Requirements.**

**School Requirements: None.**

Departmental Requirements—Common Curriculum: All courses must be completed with a grade of C- or higher, with an exception listed below.\*

**A student who does not receive a passing grade in the departmental Common Curriculum may retake the course one additional time. If the student does not pass the course on the second attempt, they will be dismissed from the music major.**

The **Bachelor of Arts (B.A.)** degree program enables students to study music history, music theory, composition, or performance within a curriculum that is flexible enough to allow for a second major, study abroad, and other curricular options. A senior thesis or project is required.

All applicants, regardless of their degree objective, apply to the B.A. program and must demonstrate appropriate vocal or instrumental proficiency, as determined by the results of the Department's required entrance audition (typically scheduled on campus in late January or early February). *For the most up-to-date audition information, visit the Music Department website (<http://music.arts.uci.edu>).*

A. Complete the following:

MUSIC 15A- 15B- 15C	Musicianship I and Musicianship II and Musicianship III
MUSIC 16A- 16B- 16C	Music Theory and Music Theory and Music Theory
MUSIC 16D	Theory/Musicianship
MUSIC 40B- 40C	History of European Music: From the Renaissance through the Baroque and History of European Music: Hasse to Mahler
MUSIC 40D	20th Century Music

\*Exception: MUSIC 40B, MUSIC 40C, MUSIC 40D must be completed with a grade of D or higher.

B. Select six quarters of instrumental or vocal instruction for Music majors from the following:

MUSIC 65–70

### Additional Requirements for the Bachelor of Arts Degree

In addition to completing the common curriculum, students in the B.A. program must pass the departmental piano proficiency examination or take three quarters of MUSIC 10 (Piano for Majors) with a grade of C or better and complete the following course requirements:

A. Select three courses in Theory, Composition, and Technology from the following:

MUSIC 153	Counterpoint
MUSIC 51	Music Technology and Computers
MUSIC 131	Post-Tonal Theory
MUSIC 132	Jazz Theory
MUSIC 136	Instrumentation
MUSIC 147	Studies in Music Technology
MUSIC 150	Composition
MUSIC 151	Computer Music Composition
MUSIC 152	Interactive Arts Programming
MUSIC 155	Analysis
MUSIC 157	Advanced Study in Composition
MUSIC 183A	Jazz Composition I
MUSIC 183B	Jazz Composition II

MUSIC 183C	Jazz Composition III
MUSIC 189	Accompanying for Plucked Strings: Continuo and Changes
B. Select three courses in Music and Culture (including at least two upper-division courses) from the following:	
AFAM 143	Topics in African American Music
AFAM 144	Topics in Expressive Forms
MUSIC 4	Introduction to Opera
MUSIC 8	The Beatles and the Sixties
MUSIC 9	Rock: The Early Years
MUSIC 41	Major Composer
MUSIC 42	Music and Gender
MUSIC 44	Classical Music in Society
MUSIC 45	History of Film Music
MUSIC 48	Introductory Topics in Music and Culture
MUSIC 78	History of Jazz
MUSIC 82A	MAHUR-Pish Radif: Introduction to Classical Persian Music
MUSIC 82B	HOMAYUN-Pish Radif: Introduction to Classical Persian Music
MUSIC 82C	SHUR-Pish Radif: Introduction to Classical Persian Music
MUSIC 140	Topics in Medieval Music
MUSIC 141	Topics in Renaissance Music
MUSIC 142	Topics in Baroque Music
MUSIC 143	Topics in Classical Music
MUSIC 144	Topics in Romantic Music
MUSIC 145	Topics in 20th Century Music
MUSIC 146	Studies in Jazz Music
MUSIC 148	Studies in Ethnomusicology
MUSIC 149	Studies in Music History
MUSIC 156A	Song Literature
MUSIC 156B	Song Literature
MUSIC 180	
MUSIC 181	Improvisation
C. Select six courses in Performance and Practice from the following:	
MUSIC 21A	Keyboard Skills
MUSIC 21B	Keyboard Skills
MUSIC 21C	Keyboard Skills
MUSIC 158A	Diction
MUSIC 158B	Diction
MUSIC 158C	Diction
MUSIC 160	University Orchestra
MUSIC 161	Wind Ensemble
MUSIC 162	University Chorus
MUSIC 164	Opera Workshop
MUSIC 171	Chamber Singers
MUSIC 176	Chamber Ensembles
MUSIC 178	Jazz Orchestra
MUSIC 182	Advanced Jazz Combo
MUSIC 193	Conducting
MUSIC 197	Word and Music
D. Depending upon the student's area of emphasis, one of the following BA projects (which may develop work originally completed in meeting the requirements of another course) must be completed:	
(1) a formal lecture or lecture/performance lasting a minimum of 20 minutes	
(2) a composition or portfolio of compositions of appropriate length growing out of work done in MUSIC 157	
(3) a thesis of at least 20 double-spaced pages on an appropriate musical subject	

Proposed projects, along with the name of the Senate faculty member who has agreed to supervise it, must be submitted to the undergraduate faculty advisor by November 1 of the academic year in which graduation is expected. Upon approval of the project proposal the student may register for up to two quarters of independent study (MUSIC 199) in which to complete the project.

**NOTE:** In order to cover the extra costs generated by private lesson instruction, the Claire Trevor School of the Arts charges a laboratory fee for students enrolled in such courses (MUSIC 65-70, MUSIC 165-170).

## Departmental Honors Program in Music and Culture

The Honors Program in Music and Culture is designed to challenge superior students in the B.A. or B.Mus. program beyond the academic requirements of the Music major. It provides them with the opportunity to advance their knowledge in the scholarly fields of music while developing their writing, analytical, and research skills. The honors program is ideally suited for students who wish to study music at the graduate level, but not in performance, and who may be preparing for graduate work in arts criticism, the humanities, the social sciences, and the law.

Eligibility requirements are (1) completion of the core requirements for the major; (2) an overall GPA of 3.5 or higher; and (3) completion of the eligibility form (available for download through the Departmental website).

Admission to the Honors Program in Music and Culture is competitive. Students must apply no later than the spring quarter of their junior year. The application should be accompanied by two substantial writing samples. These may represent work done for courses at UCI. Only truly exceptional students may undertake Honors projects.

Students who are admitted to the Honors Program, regardless of whether they are in the B.A. or B.Mus. program, are required to complete three additional courses in categories 1 and 2 under Additional Requirements for the Bachelor of Arts Degree beyond those taken in fulfillment of the core requirement; all three must be upper-division courses (numbered 100 or higher). Relevant upper-division courses in other departments may be taken to fulfill this requirement by approval of the Department Honors Committee.

The capstone project is a senior thesis, an extended original research project prepared under the supervision of the faculty advisor on a topic chosen by the student in consultation with that advisor. The thesis topic must be approved by the Departmental Honors Committee prior to the end of the fall quarter of the senior year. Students develop their topic during an ensuing two-quarter sequence of Senior Thesis (MUSIC 195A-MUSIC 195B). Upon successful completion of the thesis, a single grade is applied for both quarters and 4 units (total) are posted to the student's record (2 units each for MUSIC 195A and MUSIC 195B).

## Music, B.Mus.

The **Bachelor of Music (B.Mus.)** degree program provides pre-professional training in music performance and is designed for students who aspire to work as professional musicians. The B.Mus. program offers students the opportunity in their junior and senior years to specialize in piano performance, vocal performance, instrumental performance (flute, oboe, clarinet, bassoon, horn, trumpet, trombone, tuba, percussion, violin, viola, violoncello, double bass, and harp), jazz studies (piano, saxophone, trumpet, trombone, bass, and percussion), and guitar and lute performance. Students in this program receive weekly private instrumental or vocal instruction, and present a public solo recital during their senior year.

Admission to the B.Mus. degree program is by a second audition (the B.Mus. audition), typically taken in the spring quarter of the second year (for most students) or, in certain circumstances, in the first year (for third-year transfers only). The B.Mus. audition is evaluated by at least two members of the faculty. No student will be allowed to begin the B.Mus. program before having completed MUSIC 15A, MUSIC 15B, MUSIC 15C and MUSIC 16A, MUSIC 16B, MUSIC 16C (or their equivalents at another institution).

In addition to completing the common curriculum, students in the B.Mus. program must pass the departmental piano proficiency examination, perform a senior recital (and, for voice students only, a junior recital), and complete the following course requirements:

A. Select three courses in Theory, Composition, and Technology from the following:

MUSIC 155	Analysis
-----------	----------

and select two others from the following:

MUSIC 153	Counterpoint
MUSIC 51	Music Technology and Computers
MUSIC 131	Post-Tonal Theory
MUSIC 132	Jazz Theory
MUSIC 136	Instrumentation
MUSIC 147	Studies in Music Technology
MUSIC 150	Composition
MUSIC 151	Computer Music Composition
MUSIC 152	Interactive Arts Programming
MUSIC 157	Advanced Study in Composition
MUSIC 183A	Jazz Composition I

MUSIC 183B	Jazz Composition II
MUSIC 183C	Jazz Composition III
MUSIC 189	Accompanying for Plucked Strings: Continuo and Changes
B. Select three courses in Music and Culture from the following:	
AFAM 143	Topics in African American Music
AFAM 144	Topics in Expressive Forms
MUSIC 41	Major Composer
MUSIC 42	Music and Gender
MUSIC 44	Classical Music in Society
MUSIC 45	History of Film Music
MUSIC 48	Introductory Topics in Music and Culture
MUSIC 82A	MAHUR-Pish Radif: Introduction to Classical Persian Music
MUSIC 82B	HOMAYUN-Pish Radif: Introduction to Classical Persian Music
MUSIC 82C	SHUR-Pish Radif: Introduction to Classical Persian Music
MUSIC 140	Topics in Medieval Music
MUSIC 141	Topics in Renaissance Music
MUSIC 142	Topics in Baroque Music
MUSIC 143	Topics in Classical Music
MUSIC 144	Topics in Romantic Music
MUSIC 145	Topics in 20th Century Music
MUSIC 146	Studies in Jazz Music
MUSIC 148	Studies in Ethnomusicology
MUSIC 149	Studies in Music History
MUSIC 180	
MUSIC 181	Improvisation
C. Select six quarters of instrumental or vocal instruction for Music Performance majors from the following:	
MUSIC 165–170	
D. Completion of the following courses according to the approved Bachelor of Music specialization:	
Guitar and Lute:	
MUSIC 176	Chamber Ensembles (every quarter in residence)
Jazz Studies:	
MUSIC 78	History of Jazz
MUSIC 132	Jazz Theory
MUSIC 160	University Orchestra (or MUSIC 161 Wind Ensemble or MUSIC 178 Jazz Orchestra, every quarter in residence)
MUSIC 176	Chamber Ensembles (or MUSIC 182 Advanced Jazz Combo, every quarter in residence)
Piano:	
MUSIC 21A	Keyboard Skills
MUSIC 21B	Keyboard Skills
MUSIC 21C	Keyboard Skills
MUSIC 122A	Piano Literature
MUSIC 122B	Piano Literature
MUSIC 122C	Piano Literature
MUSIC 126	Piano Pedagogy
MUSIC 176	Chamber Ensembles (six quarters, as assigned by the Department)
Select three quarters of the following as assigned by the Department:	
MUSIC 162P	University Chorus: Accompanying
or MUSIC 164P	Opera Workshop: Accompanying
or MUSIC 166P	String Accompaniment
or MUSIC 197	Word and Music
Transfer students must complete six quarters of chamber ensembles and/or accompanying in residence.	

Voice:

MUSIC 156A	Song Literature
MUSIC 156B	Song Literature
MUSIC 158A	Diction
MUSIC 158B	Diction
MUSIC 158C	Diction
MUSIC 164	Opera Workshop (two quarters)
Select nine quarters of choral ensembles (minimum of three quarters for junior transfers; minimum of six quarters for sophomore transfers) from the following:	
MUSIC 162	University Chorus
MUSIC 171	Chamber Singers

Woodwinds, Brass, Percussion, and Strings:

MUSIC 160	University Orchestra (or MUSIC 161 Wind Ensemble, every quarter in residence)
MUSIC 176	Chamber Ensembles (every quarter in residence)

**NOTE:** In order to cover the extra costs generated by private lesson instruction, the Claire Trevor School of the Arts charges a laboratory fee for students enrolled in such courses (MUSIC 65-70, MUSIC 165-170).

## Departmental Honors Program in Music and Culture

The Honors Program in Music and Culture is designed to challenge superior students in the B.A. or B.Mus. program beyond the academic requirements of the Music major. It provides them with the opportunity to advance their knowledge in the scholarly fields of music while developing their writing, analytical, and research skills. The honors program is ideally suited for students who wish to study music at the graduate level, but not in performance, and who may be preparing for graduate work in arts criticism, the humanities, the social sciences, and the law.

Eligibility requirements are (1) completion of the core requirements for the major; (2) an overall GPA of 3.5 or higher; and (3) completion of the eligibility form (available for download through the Departmental website).

Admission to the Honors Program in Music and Culture is competitive. Students must apply no later than the spring quarter of their junior year. The application should be accompanied by two substantial writing samples. These may represent work done for courses at UCI. Only truly exceptional students may undertake Honors projects.

Students who are admitted to the Honors Program, regardless of whether they are in the B.A. or B.Mus. program, are required to complete three additional courses in categories 1 and 2 under Additional Requirements for the Bachelor of Arts Degree beyond those taken in fulfillment of the core requirement; all three must be upper-division courses (numbered 100 or higher). Relevant upper-division courses in other departments may be taken to fulfill this requirement by approval of the Department Honors Committee.

The capstone project is a senior thesis, an extended original research project prepared under the supervision of the faculty advisor on a topic chosen by the student in consultation with that advisor. The thesis topic must be approved by the Departmental Honors Committee prior to the end of the fall quarter of the senior year. Students develop their topic during an ensuing two-quarter sequence of Senior Thesis (MUSIC 195A-MUSIC 195B). Upon successful completion of the thesis, a single grade is applied for both quarters and 4 units (total) are posted to the student's record (2 units each for MUSIC 195A and MUSIC 195B).

## Music, M.F.A.

The Department of Music offers an M.F.A. in Music with emphases in Choral Conducting, Collaborative Piano, Guitar/Lute Performance, Instrumental Performance, Piano Performance, and Vocal Arts. The graduate curriculum provides courses in music analysis, history, theory, critical studies, and research in addition to intensive performance training.

### Admission

In addition to meeting all general requirements for admission to graduate study, applicants should hold a B.A. in Music, a B.Mus., or the equivalent.

The online application must be submitted and all supporting materials must be received by January 15. Late applications cannot be considered. Supporting materials must include at least one substantial writing sample, preferably on a musical subject. This requirement may be fulfilled by the submission of an undergraduate paper of appropriate scope, preferably on a musical topic.

Applicants must audition for members of the Music faculty by February 1. In exceptional cases (as approved in advance by the departmental graduate advisor), a recently recorded performance may be accepted in lieu of a live audition. Applicants in composition must, in addition, submit a representative sample of scores and recordings of their works.

Applicants are expected to have good general knowledge of music history and music theory, competence in basic musicianship skills, including sight-singing, written and keyboard harmony, dictation, and basic keyboard facility (including sight-reading). Entering students will be given diagnostic tests in music theory prior to the beginning of classes and will be advised to remedy any evident deficiencies during the first year in residence by registering for the appropriate undergraduate courses or through other appropriate means. Credit earned in such courses cannot be counted toward fulfillment of any degree requirement.

## General Degree Requirements

Course requirements may be fulfilled only by graduate courses (numbered 200 and higher) and upper-division undergraduate courses (numbered 100 and higher), and only by those courses in which a grade of B or higher has been earned.

All students must complete the graduate core curriculum in bibliography (MUSIC 200). All students, except for those in Vocal Arts, must register for tutorial study in the major field (MUSIC 210, MUSIC 211, or MUSIC 212) during every quarter in residence. Students in the emphasis in Vocal Arts must register for MUSIC 211 every quarter for a minimum of 24 units. Students in the emphasis in Instrumental Performance must enroll in an approved large ensemble during every quarter in residence.

Students enrolled in the emphasis in Choral Conducting, Collaborative Piano, Piano Performance, and Vocal Arts must fulfill a foreign language requirement, as described in the individual emphasis descriptions below. This requirement may be met either by attaining a passing score in the departmental examination or by earning a grade of B or higher in level 2A of an approved undergraduate language course.

All students must pass the Comprehensive Examination (normally taken during the fifth quarter in residence) and perform one or more public recitals. Details are found in the individual emphasis descriptions below.

The normative time to degree for students in the M.F.A. program is two years. Residence is required. The normative time to degree can be extended to three years only through a petition to the Chair of the Department. The maximum time to degree is three years. Students who do not complete the degree in three years will be dropped from the program.

## Individual Emphasis Requirements

### Choral Conducting

*Languages:* Reading knowledge of French, German, or Italian.

*Course Work:*

A. Complete the following:

MUSIC 131	Post-Tonal Theory
MUSIC 158A- 158B- 158C	Diction and Diction and Diction <sup>1</sup>
MUSIC 200	Bibliography and Research
MUSIC 201	Topics in Analysis
MUSIC 210	Choral Conducting (every quarter in residence, maximum 24 units)

B. Select three seminars from the following:

MUSIC 220	Seminar in Music History
MUSIC 230	Seminar in Contemporary Music
MUSIC 235	Critical Studies in Music
MUSIC 236	Theoretical ICIT Seminar

C. Twelve units of electives, selected with advisor.

MUSIC 214	Graduate Recital
-----------	------------------

<sup>1</sup> Note: This requirement is waived for students who demonstrate competence in this area by passing a diagnostic exam, in which case these 6 units are taken as electives

The total number of units for the specific course requirements that must be completed with a grade of at least B is 66.

*Comprehensive Examination:* This is a special field exam, related to (but not limited to) repertoire selected for the Graduate Recital. It is taken no later than March of the second year. The graduate committee sets the exam 24 hours in advance; the student makes an oral presentation and then fields the committee's questions.

### Collaborative Piano

*Languages:* Reading knowledge of French, German, Italian, or Spanish.

*Course Work:*

## A. Complete the following:

MUSIC 131	Post-Tonal Theory
MUSIC 156A- 156B	Song Literature and Song Literature
MUSIC 158A- 158B- 158C	Diction and Diction and Diction <sup>1</sup>
MUSIC 176	Chamber Ensembles (6 units)
MUSIC 200	Bibliography and Research
MUSIC 201	Topics in Analysis
MUSIC 211	Performance (every quarter in residence, maximum 24 units)

## B. Select one seminar from the following:

MUSIC 220	Seminar in Music History
MUSIC 230	Seminar in Contemporary Music
MUSIC 235	Critical Studies in Music
MUSIC 236	Theoretical ICIT Seminar

## C. Two Graduate Recitals:

MUSIC 214	Graduate Recital (one instrumental and one vocal)
-----------	---

<sup>1</sup> Note: This requirement is waived for students who demonstrate competence in this area by passing a diagnostic exam, in which case these 6 units are taken as electives.

The total number of units for the specific course requirements that must be completed with a grade of at least B is 53.

*Comprehensive Examination:* This is a special field exam, related to (but not limited to) repertoire selected for the Graduate Recitals. It is taken no later than March of the second year. The graduate committee sets the exam 24 hours in advance; the student makes an oral presentation and then fields the committee's questions.

**Guitar/Lute Performance***Course Work:*

## A. Complete the following:

MUSIC 131	Post-Tonal Theory
MUSIC 176	Chamber Ensembles (6 units)
MUSIC 189	Accompanying for Plucked Strings: Continuo and Changes (taken three times)
MUSIC 200	Bibliography and Research
MUSIC 201	Topics in Analysis
MUSIC 211	Performance (every quarter in residence, maximum of 24 units)
MUSIC 214	Graduate Recital <sup>1</sup>
MUSIC 240	Graduate Projects

## B. Select two seminars from the following:

MUSIC 220	Seminar in Music History
MUSIC 230	Seminar in Contemporary Music
MUSIC 235	Critical Studies in Music
MUSIC 236	Theoretical ICIT Seminar

<sup>1</sup> Note: The recital is supported by a written essay, presented in advance of the Comprehensive Examination.

The total number of units for the specific course requirements that must be completed with a grade of at least B is 57.

*Comprehensive Examination:* This is a special field exam, related to (but not limited to) repertoire selected for the Graduate Recital. It is taken no later than March of the second year. The graduate committee sets the exam 24 hours in advance; the student makes an oral presentation and then fields the committee's questions.

**Instrumental Performance***Course Work:*

A. Complete the following:

MUSIC 131	Post-Tonal Theory
MUSIC 160	University Orchestra (taken every quarter in residence, maximum of 12 units)
or MUSIC 161	Wind Ensemble
MUSIC 176	Chamber Ensembles (6 units)
MUSIC 200	Bibliography and Research
MUSIC 201	Topics in Analysis
MUSIC 211	Performance (every quarter in residence, maximum of 24 units)
MUSIC 214	Graduate Recital

B. Select two seminars from the following:

MUSIC 220	Seminar in Music History
MUSIC 230	Seminar in Contemporary Music
MUSIC 235	Critical Studies in Music
MUSIC 236	Theoretical ICIT Seminar

The total number of units for the specific course requirements that must be completed with a grade of at least B is 59.

*Comprehensive Examination:* This is a special field exam, related to (but not limited to) repertoire selected for the Graduate Recital. It is taken no later than March of the second year. The graduate committee sets the exam 24 hours in advance; the student makes an oral presentation and then fields the committee's questions.

### Piano Performance

*Languages:* Reading knowledge of French, German, Italian, or Spanish.

*Course Work:*

A. Complete the following:

MUSIC 131	Post-Tonal Theory
MUSIC 176	Chamber Ensembles (6 units)
MUSIC 200	Bibliography and Research
MUSIC 201	Topics in Analysis
MUSIC 211	Performance (every quarter in residence, maximum of 24 units)
MUSIC 214	Graduate Recital (twice)

B. Select two seminars from the following:

MUSIC 220	Seminar in Music History
MUSIC 230	Seminar in Contemporary Music
MUSIC 235	Critical Studies in Music
MUSIC 236	Theoretical ICIT Seminar

C. Four units of electives, selected with advisor (upper-division or graduate, Music or non-Music).

The total number of units for the specific course requirements that must be completed with a grade of at least B is 51.

*Comprehensive Examination:* This is a special field exam, related to (but not limited to) repertoire selected for the Graduate Recitals. It is taken no later than March of the second year. The graduate committee sets the exam 24 hours in advance; the student makes an oral presentation and then fields the committee's questions.

### Vocal Arts

*Languages:* Reading knowledge of French, German, Italian, or Spanish.

*Course Work:*

A. Complete the following:

MUSIC 158A	Diction
MUSIC 158B	Diction
MUSIC 158C	Diction
MUSIC 164	Opera Workshop (4 units)
MUSIC 200	Bibliography and Research

MUSIC 211	Performance (every quarter, minimum of 24 units)
MUSIC 214	Graduate Recital
B. Select one of the following:	
MUSIC 131	Post-Tonal Theory
MUSIC 201	Topics in Analysis
C. Select two seminars from the following:	
MUSIC 140	Topics in Medieval Music
MUSIC 141	Topics in Renaissance Music
MUSIC 142	Topics in Baroque Music
MUSIC 143	Topics in Classical Music
MUSIC 144	Topics in Romantic Music
MUSIC 145	Topics in 20th Century Music
MUSIC 146	Studies in Jazz Music
MUSIC 147	Studies in Music Technology
MUSIC 148	Studies in Ethnomusicology
MUSIC 220	Seminar in Music History
MUSIC 230	Seminar in Contemporary Music
MUSIC 235	Critical Studies in Music
MUSIC 236	Theoretical ICIT Seminar
D. Complete four units of electives selected with advisor (upper-division or graduate, music or non-music, lower-division acceptable for language study).	

The total number of units for the specific course requirements that must be completed with a grade of at least B is 52.

*Comprehensive Examination:* This is a special field exam, related to (but not limited to) repertoire selected for the Graduate Recital. It is taken no later than March of the second year. The graduate committee sets the exam 24 hours in advance; the student makes an oral presentation and then fields the committee's questions.

# Department of Pharmaceutical Sciences

---

**Jan Hirsch, Dean**

**A. Richard Chamberlin, Department of Pharmaceutical Sciences Chair**

**Alexandre Chan, Department of Clinical Pharmacy Practice Chair**

209 Steinhaus Hall

949-824-1991

<http://www.pharmsci.uci.edu>

The Department of Pharmaceutical Sciences offers undergraduate and PhD & MSP students unparalleled training for future careers in biomedical research, pharmacy, medicine, and various other positions within the health sciences and pharmaceutical industry. Our innovative, rigorous curriculum integrates concepts from biology, chemistry, chemical engineering, pharmacology and physiology, and collaborative interdisciplinary research is supported by joint faculty appointments shared with other UCI departments. Alumni pursue exciting professional opportunities that improve our society's health and well-being.

## Honors

**Undergraduate Honors.** Honors at graduation, e.g., *cum laude*, *magna cum laude*, *summa cum laude*, are awarded to approximately the top 16 percent of the graduating seniors. To be eligible for honors, a general criterion is that students must have completed at least 72 units in residence at a University of California campus. Other important factors are considered visit at Honors Recognition.

- Pharmaceutical Sciences, B.S.
- Pharmacological Sciences, Ph.D.
- Pharmacology, M.S.

## Faculty

Amal Alachkar, Ph.D. University of Manchester, *Associate Professor of Teaching of Pharmaceutical Sciences* (neurotransmitter systems, molecular pharmacology, neuropsychopharmacology)

Kevin T. Beier, Ph.D. Harvard University, *Assistant Professor of Physiology and Biophysics; Pharmaceutical Sciences*

James D. Belluzzi, Ph.D. University of Chicago, *Adjunct Professor of Pharmaceutical Sciences*

Claudia Benavente, Ph.D. University of Arizona, *Assistant Professor of Pharmaceutical Sciences; Developmental and Cell Biology* (genetics, epigenetics, cancer, pediatric cancer, retinoblastoma, osteosarcoma)

Bruce Blumberg, Ph.D. University of California, Los Angeles, *Professor of Developmental and Cell Biology; Biomedical Engineering; Environmental Health Sciences; Pharmaceutical Sciences* (gene regulation by nuclear hormone receptors in vertebrate development physiology, endocrine disruption)

Emiliana Borrelli, Ph.D. University of Strasbourg, *Chancellor's Professor of Microbiology and Molecular Genetics; Pharmaceutical Sciences*

Rémi Buisson, Ph.D. Université Laval, *Assistant Professor of Biological Chemistry; Pharmaceutical Sciences*

A. Richard Chamberlin, Ph.D. University of California, San Diego, *Department Chair and Professor Emeritus of Pharmaceutical Sciences; Chemistry* (chemical biology, organic and synthetic)

Alexandre Chan, Pharm.D. Rutgers University, *Department Chair and Professor of Clinical Pharmacy Practice*

John Charles Chaput, Ph.D. University of California, Riverside, *Professor of Pharmaceutical Sciences; Chemistry; Molecular Biology and Biochemistry* (chemical and synthetic biology)

Olivier Civelli, Ph.D. Swiss Federal Institute of Technology in Zurich, *Professor of Pharmaceutical Sciences; Developmental and Cell Biology* (novel neuroactive molecules, molecular neuropharmacology)

Melanie Cocco, Ph.D. Pennsylvania State University, *Associate Professor of Molecular Biology and Biochemistry; Pharmaceutical Sciences*

Dan M. Cooper, M.D. University of California, San Francisco, *Senior Associate Dean, Clinical Translational Science and Associate Vice Chancellor, Clinical Translational Research and Professor of Pediatrics; Biomedical Engineering; Pharmaceutical Sciences*

Sue P. Duckles, Ph.D. University of California, San Francisco, *Professor Emeritus of Pharmaceutical Sciences*

John P. Fruehauf, M.D. Rush University, *Professor Emeritus of Medicine; Pharmaceutical Sciences*

Kelvin W. Gee, Ph.D. University of California, Davis, *Professor of Pharmaceutical Sciences*

Celia Goulding, Ph.D. King's College London, *Professor of Molecular Biology and Biochemistry; Pharmaceutical Sciences*

Stephen Hanessian, Ph.D. Ohio State University, *Professor of Pharmaceutical Sciences; Chemistry* (organic chemistry, medicinal chemistry)

Jan Hirsch, Ph.D. University of South Carolina, *Director and Founding Dean and Professor of Clinical Pharmacy Practice*

Naoto Hoshi, Ph.D. Kanazawa University, *Associate Professor of Pharmaceutical Sciences; Physiology and Biophysics*

Lan Huang, Ph.D. University of Florida, *Professor of Physiology and Biophysics; Biological Chemistry; Biomedical Engineering; Pharmaceutical Sciences*

Mahtab F. Jafari, Pharm.D. University of California, San Francisco, *Director of the Center for Healthspan Pharmacology and Professor of Pharmaceutical Sciences; Ecology and Evolutionary Biology* (anti-aging pharmacology and preventive medicine)

Diana N. Krause, Ph.D. University of California, Los Angeles, *Adjunct Professor of Pharmaceutical Sciences*

Young Jik Kwon, Ph.D. University of Southern California, *Professor of Pharmaceutical Sciences; Biomedical Engineering; Chemical and Biomolecular Engineering; Molecular Biology and Biochemistry* (gene therapy, drug delivery, cancer-targeted therapeutics, artificially-induced cellular vesicles, multi-modal therapies)

Frances L. Leslie, Ph.D. University of Aberdeen, *Professor Emeritus of Pharmaceutical Sciences*

Anthony D. Long, Ph.D. McMaster University, *Professor of Ecology and Evolutionary Biology; Pharmaceutical Sciences*

Shahrdad Lotfipour, Ph.D. University of California, Irvine, *Assistant Professor of Emergency Medicine; Pharmaceutical Sciences*

Zhigang D. Luo, M.D., Ph.D. State University of New York at Buffalo, *Professor of Anesthesiology and Perioperative Care; Pharmacology*

Andrej Luptak, Ph.D. Yale University, *Professor of Pharmaceutical Sciences; Chemistry; Molecular Biology and Biochemistry* (chemical biology)

Sarah McBane, Pharm.D. University of North Carolina at Chapel Hill, *Health Sciences Clinical Professor of Clinical Pharmacy Practice*

David L. Mobley, Ph.D. University of California, Davis, *Vice Chair and Professor of Pharmaceutical Sciences; Chemistry* (chemical biology, physical chemistry and chemical physics, theoretical and computational)

Trina Norden-Krichmar, Ph.D. University of California, San Diego, *Assistant Professor of Epidemiology; Biological Chemistry; Computer Science; Pharmaceutical Sciences*

James S. Nowick, Ph.D. Massachusetts Institute of Technology, *Professor of Chemistry; Pharmaceutical Sciences* (chemical biology, organic and synthetic, polymer, materials, nanoscience)

Brian Paegel, Ph.D. University of California, Berkeley, *Professor of Pharmaceutical Sciences* (chemical biology, drug discovery, drug discovery, miniaturization, evolution)

Daniele Piomelli, Ph.D. Columbia University, *Louise Turner Arnold Chair in the Neurosciences and Distinguished Professor of Anatomy and Neurobiology; Biological Chemistry; Pharmaceutical Sciences*

Lawrence Plon, Pharm.D. M.A. University of Southern California, *Assistant Adjunct Professor of Pharmaceutical Sciences*

Thomas L. Poulos, Ph.D. University of California, San Diego, *Distinguished Professor of Molecular Biology and Biochemistry; Chemistry; Pharmaceutical Sciences* (chemical biology)

Jennifer A. Prescher, Ph.D. University of California, Berkeley, *Professor of Chemistry; Molecular Biology and Biochemistry; Pharmaceutical Sciences* (chemical biology, organic and synthetic)

Ralph Purdy, Ph.D. University of California, Los Angeles, *Professor Emeritus of Pharmaceutical Sciences*

Paolo Sassone-Corsi, Ph.D. University of Naples Federico II, *Donald Bren Professor and Distinguished Professor of Biological Chemistry; Microbiology and Molecular Genetics; Pharmaceutical Sciences*

Samuel E. Schriener, Ph.D. University of Washington, *Vice Chair and Assistant Professor of Teaching of Pharmaceutical Sciences* (aging, genetics, biochemistry, mitochondria)

Robert Spitale, Ph.D. University of Rochester, *Director of the UCI Transcriptomics Core and Associate Professor of Pharmaceutical Sciences; Chemistry; Molecular Biology and Biochemistry* (chemistry, chemical biology, RNA biology)

Shiou-Chuan (Sheryl) Tsai, Ph.D. University of California, Berkeley, *Professor of Molecular Biology and Biochemistry; Chemistry; Pharmaceutical Sciences*

Christopher Vanderwal, Ph.D. Scripps Research Institute, *Professor of Chemistry; Pharmaceutical Sciences* (organic and synthetic)

Gregory A. Weiss, Ph.D. Harvard University, *Professor of Chemistry; Molecular Biology and Biochemistry; Pharmaceutical Sciences* (analytical, chemical biology, organic and synthetic, polymer, materials, nanoscience)

Weian Zhao, Ph.D. McMaster University, *Associate Professor of Pharmaceutical Sciences; Biological Chemistry; Biomedical Engineering; Materials Science and Engineering* (stem cell therapy, diagnostics, biosensors, immunotherapy, single-cell analysis)

Qun-Yong Zhou, Ph.D. Oregon Health & Science University, *Professor of Pharmaceutical Sciences*

Xiaolin Zi, Ph.D. Shanghai University, *Associate Professor of Urology; Pharmaceutical Sciences*

## Medical Pharmacology Courses

### **PHARM 241. Advanced Topics in Pharmacology. 2 Units.**

Application of pharmacological principles in disease therapy. Advanced pharmacological mechanisms and in-depth study of drug action. Discussion of several major drug classes/therapeutic strategies: molecular mechanisms of action, physiological consequences of administration, and clinical use.

### **PHARM 251. Experimental Pharmacology. 4 Units.**

Introduction to the concepts and techniques used in pharmacological science. Molecular biology, quantitative and biochemical pharmacology, fluorescent probes, behavior, genetics, animal handling, anatomical and receptor binding analysis, methods for ion channel study, the absorption, distribution, metabolism and elimination of drugs.

### **PHARM 254. Introduction to Pharmacology. 4 Units.**

Ligand-gated ion channels, G protein-coupled receptors, receptor tyrosine kinases, ligand-regulated transcription factors, their signaling mechanisms, trafficking, macromolecular complexes, and physiological responses.

### **PHARM 255. Neuropharmacology. 2 Units.**

Mechanisms underlying chemical signaling processes in the brain and periphery. Molecular biology, signal transduction, transmitter synthesis, and inactivation of major neurotransmitter systems. Drugs that act on these major neurotransmitters.

Restriction: Graduate students only.

### **PHARM 256. Experimental Design for Pharmacologists. 1 Unit.**

Population and sample statistics, hypothesis testing, analysis of variance, nonparametric statistics, experimental design, power, and the use of statistical computer software.

Prerequisite: PHARM 251

### **PHARM 257. Ethics in Research. 1 Unit.**

Ethical conduct in research including data handling, authorship, conflict of interest, animal rights, handling of misconduct.

Prerequisite: PHARM 299

Repeatability: May be taken for credit 2 times.

### **PHARM 270. Applied Pharmacology . 3 Units.**

One week (five days, 40 hours) in-residence course offered on the UCI campus. Introduction to pharmacological techniques and current research problems; includes laboratory demonstrations and research seminars.

Restriction: Pharmacology Majors only.

### **PHARM 271. Principles of Pharmacology . 3 Units.**

Principles of pharmacology: pharmacodynamics, pharmacokinetics, pharmacogenetics, drug interactions, and toxicity.

Restriction: Pharmacology Majors only.

### **PHARM 272. Receptors and Drug Targets . 3 Units.**

Molecular basis of drug-receptor interaction. Receptor properties including gene and protein structure, signaling mechanisms, trafficking and physiological effects: G-protein linked receptors, ligand-gated ion channels, receptor tyrosine kinases, nuclear receptors, and ligand regulated transcription factors.

Restriction: Pharmacology Majors only.

**PHARM 274. Research Techniques in Pharmacology. 3 Units.**

Experimental techniques and model systems used in pharmacological research. Receptor analysis, bioassay, molecular biology, in vitro pharmacology, biochemical pharmacology, imaging, electrophysiology, in vivo pharmacology, disease models.

Restriction: Pharmacology Majors only.

**PHARM 276. Experimental Design and Data Analysis . 3 Units.**

Experimental design, data analysis and interpretation. Population and sample statistics, hypothesis testing, analysis of variance, nonparametric statistics, and power calculations.

Restriction: Pharmacology Majors only.

**PHARM 277. Ethics in Scientific Research. 3 Units.**

Ethical conduct in research including data handling, authorship, conflict of interest, animal rights, and handling of misconduct.

Restriction: Pharmacology Majors only.

**PHARM 278. Concepts in Drug Discovery. 3 Units.**

Critical steps involved in discovery and optimization of a new drug. Target selection, relationship of molecular structure to pharmacological activities, screening methods, strategies to identify lead compounds, and preclinical characterization necessary for development of the drug for clinical trials.

Restriction: Pharmacology Majors only.

**PHARM 279. Special Topics in Pharmacology. 3 Units.**

Topics of current interest in pharmacology; discussion of recent research publications.

Restriction: Pharmacology Majors only.

**PHARM 280. Master's Project in Pharmacology. 3 Units.**

Capstone research paper on topic of interest in pharmacology.

Restriction: Pharmacology Majors only.

**PHARM 281. Neuropharmacology . 3 Units.**

Autonomic and central nervous system pharmacology, including major drug classes and therapeutic uses. Mechanisms underlying chemical signaling processes in the brain and peripheral nervous system, including neurotransmitter synthesis, inactivation, and receptor action.

Restriction: Pharmacology Majors only.

**PHARM 282. Behavioral Pharmacology. 3 Units.**

Pharmacology of integrative function and behavior. Drug treatment of pain. Mechanisms of reward, addiction, and drugs of abuse.

Restriction: Pharmacology Majors only.

**PHARM 283. Cardiovascular Pharmacology. 3 Units.**

Basic understanding of drugs used in the prevention and treatment of cardiovascular disease. Mechanisms of action, clinical and adverse effects.

Restriction: Pharmacology Majors only.

**PHARM 284. Endocrine, Respiratory, and Gastrointestinal Pharmacology . 3 Units.**

Basic understanding of drugs used in endocrine, respiratory, and gastrointestinal conditions, including hormone replacement, contraceptives, and drugs for diabetes, asthma, obesity, ulcer, and gastric reflux. Mechanisms of drug action, clinical and adverse effects.

Restriction: Pharmacology Majors only.

**PHARM 298. Seminar. 2 Units.**

Presentation and discussion of current problems and methods in teaching and research in pharmacology, toxicology, and therapeutics.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHARM 299. Research. 1-12 Units.**

Independent research with Pharmacology and Toxicology faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Pharmaceutical Sciences Courses

### **PHRMSCI 1. New Student Seminar. 1 Unit.**

Weekly meetings consisting of presentations by faculty, professional staff, and Peer Academic Advisors provide information about the Pharmaceutical Sciences major, campus resources, learning skills, and special programs and opportunities.

Grading Option: Pass/no pass only.

Restriction: Pharmaceutical Sciences Majors only. New students only.

### **PHRMSCI 3. Professional Development and Careers in the Pharmaceutical Sciences. 1 Workload Unit.**

Designed to help Pharmaceutical Science majors select a career track and prepare for graduate program applications and careers in industry.

Grading Option: Workload Credit Letter Grade with P/NP.

Restriction: Juniors only. Pharmaceutical Sciences Majors only.

### **PHRMSCI 42. Life 101 . 2 Units.**

Covers the latest scientific work on the impact of nutrition, exercise, and lifestyle choices on mental and physical health. Motivates students to make positive changes by fostering personal growth.

### **PHRMSCI 76. Ethical Conduct of Research. 2 Units.**

Covers the ethical responsibilities of biomedical scientists. Topics include, as discussions and case studies, the high standards of science, the responsible conduct of research, animal experimentation, and clinical trials as they relate to the pharmaceutical sciences.

### **PHRMSCI H80. Drugs and Society. 4 Units.**

Where drugs come from, how drugs work, how and why people abuse drugs, the costs of drug abuse on society, which drugs are commonly abused, and how drug abuse can be prevented and treated. Course intended for non-science majors.

Prerequisite: Recommended: High school chemistry and biology.

Restriction: Campuswide Honors Collegium students only.

## **(II)**

### **PHRMSCI 90. Speaking about Science. 4 Units.**

Students learn to effectively prepare and present public speeches and slide presentations. Included are storytelling, informative, commemorative, and persuasive speeches, and scientific presentation. Evaluating speeches and strategies to reduce speaker apprehension is also covered.

Restriction: Pharmaceutical Sciences Majors have first consideration for enrollment.

### **PHRMSCI 120. Human Physiology. 4 Units.**

Covers the function of the human body. All major organ systems are discussed. Designed to prepare students for healthcare careers, such as medicine, pharmacy, dentistry, and for research careers which require basic knowledge of how the human body functions.

Corequisite: PHRMSCI 120L

Prerequisite: BIO SCI 99

Overlaps with BIO SCI E109.

### **PHRMSCI 120L. Human Physiology Lab. 3 Units.**

Designed to complement PHRMSCI 120. Computer-based lab simulations will be used to study the function of the human body. Class will physically meet for review sessions and exams.

Corequisite: PHRMSCI 120

Prerequisite: BIO SCI E109

Overlaps with BIO SCI E112L.

### **PHRMSCI 142. Healthspan Sciences. 4 Units.**

Covers the complex and multi-factorial process of aging and increases the understanding of factors that contribute to enhanced lifespan, including basic principles of health and wellness and scientifically proven interventions, both pharmacological and non-pharmacological.

Prerequisite: BIO SCI 98 and BIO SCI 99 and PHRMSCI 120

Restriction: Upper-division students only.

**PHRMSCI 155. Neuropsychopharmacology. 4 Units.**

Mechanisms underlying chemical signaling processes in the nervous system. Fundamental knowledge for understanding the cellular and molecular actions of drugs and their mechanisms of action on synaptic transmission. Applied neuropsychopharmacology including major drug classes and therapeutic uses.

Prerequisite: PHRMSCI 170A. PHRMSCI 170A with a grade of C- or better

Restriction: Upper-division students only.

**PHRMSCI 163. Pharmacogenomics and Epigenetics. 4 Units.**

Survey of the genetic and epigenetic basis of inter-subject variability in response to drugs. Covers drug efficacy, safety, and need for their optimization in pharmacotherapy. Emphasizes genetic mechanisms of polymorphisms in the pharmacokinetics and pharmacodynamics of representative therapeutic drugs.

Prerequisite: BIO SCI 99

Concurrent with PHRMSCI 263.

**PHRMSCI 170A. Molecular Pharmacology I. 4 Units.**

Molecular basis of drug-receptor action at the molecular and cellular levels. Structure-function of drug targets emphasizing enzymes, ion channels, and membrane transport proteins. Understanding how the drugs' mechanisms of action contribute to the development of more efficacious and safer drugs.

Prerequisite or corequisite: (CHEM 51C or CHEM H52C) and (PHRMSCI 120 or BIO SCI E109)

Restriction: Pharmaceutical Sciences Majors have first consideration for enrollment.

**PHRMSCI 170B. Molecular Pharmacology II. 4 Units.**

Introductory survey covering the molecular mechanisms of drugs that target the nervous system, such as anxiolytics, antidepressants, antipsychotics, hypnotics, muscle relaxants, and recreational drugs; drugs related to the immune system, including antibiotics, antihistamines, and immunosuppressants; drugs used to treat cancer.

Prerequisite: PHRMSCI 170A

**PHRMSCI 171. Physical Biochemistry. 4 Units.**

Thermodynamics and kinetic fundamentals as applied to problems relevant to pharmaceutical sciences such as receptor/enzyme-ligand interactions. Fundamentals of biophysical methods used in the pharmaceutical sciences including structure determination and biomolecular spectroscopy.

Prerequisite: MATH 2B and PHYSICS 3C and (CHEM 1C or CHEM H2C) and BIO SCI 99

Restriction: Pharmaceutical Sciences Majors have first consideration for enrollment.

**PHRMSCI 172. Topics in Pharmaceutical Sciences. 2 Units.**

Presents information about various fields of research, study, careers, and graduate school opportunities in pharmaceutical sciences. Taught by guest lecturers from various disciplines including 199 research course faculty. Helps Pharmaceutical Sciences students select electives appropriate to their future goals.

Prerequisite or corequisite: BIO SCI 99 and (CHEM 51C or CHEM H52C)

Grading Option: Pass/no pass only.

**PHRMSCI 173. Pharmacotherapy. 4 Units.**

An exploration of the clinical application of medications to selected disease states. Focus is on an understanding of underlying principles of pharmacology and how this knowledge can be applied to treatment of diseases.

Prerequisite or corequisite: PHRMSCI 170B

**PHRMSCI 174. Biopharmaceutics and Nanomedicine. 4 Units.**

Introduces theories and tools of new drug formulations. Particularly new novel therapeutics based on biological materials, pathological characteristics utilized to achieve the maximum efficacy and specificity, and drug delivery systems based on emerging nanotechnology are extensively discussed.

Prerequisite: PHRMSCI 170B

Restriction: Pharmaceutical Sciences Majors have first consideration for enrollment.

**PHRMSCI 174L. Biopharmaceutics and Nanomedicine Lab. 3 Units.**

Introduction to cancer drug screening using cellular models, and confirmation of comprehensive therapeutic efficacy using a live animal model. Includes basic cell culture, cytotoxicity assays, cell analysis, drug circulation test, and tumor eradication and imaging experiments. Materials fee.

Prerequisite: PHRMSCI 170B and BIO SCI 100

(Ib)

**PHRMSCI 175. Drug Discovery Computing Techniques. 4 Units.**

Techniques used in computer-aided drug discovery, including theory behind these techniques and practical applications. Topics include scientific computing; python; classical force fields and simulations; visualization and movie-making; quantum mechanics in drug discovery; molecular dynamics; solvation models; and several others.

Prerequisite: CSE 41 or I&C SCI 31. CSE 42 or I&C SCI 32 is recommended.

Concurrent with PHRMSCI 275.

**PHRMSCI 177. Medicinal Chemistry. 4 Units.**

An introduction of the basics of drug activity and mechanisms. Strategies used to identify lead compounds such as natural product chemistry, combinatorial chemistry, molecular modeling, and high-through put screening. Relationship of molecular structure to pharmacological activity.

Prerequisite: CHEM 51A and CHEM 51B and CHEM 51C and (BIO SCI 98 or CHEM 128)

Same as CHEM 177.

Restriction: Pharmaceutical Sciences Majors have first consideration for enrollment.

**PHRMSCI 177L. Medicinal Chemistry Laboratory. 3 Units.**

An introduction of the basics of drug activity and mechanisms. Strategies used to identify lead compounds such as natural product chemistry, combinatorial chemistry, molecular modeling, and high-through put screening. Relationship of molecular structure to pharmacological activity. Materials fee.

Corequisite: PHRMSCI 177 or CHEM 177.

Prerequisite: CHEM 51A and CHEM 51B and CHEM 51C and BIO SCI 100 and (BIO SCI 98 or CHEM 128)

Same as CHEM 177L.

Restriction: Pharmaceutical Sciences Majors have first consideration for enrollment.

(Ib)

**PHRMSCI 178. Stem Cell Therapy . 4 Units.**

Introduces new paradigms in regenerative medicine involving stem cells, and emerging molecular, nano- and micro-engineered tools for in vivo imaging that is critical for studying and monitoring regeneration. Selected topics include stem cell biology and in vivo imaging modalities.

Prerequisite: BIO SCI D103

Concurrent with PHRMSCI 278.

**PHRMSCI 179. Emerging Technologies in Pharmaceutical Sciences and Medicine. 4 Units.**

Introduces emerging, ground-breaking technologies in pharmaceutical sciences and medicine, including pharmacogenomics, genome editing, and stem cell and engineered T cell therapies. Explores these novel technologies with both their underlying theories and forward-thinking applications.

Concurrent with PHRMSCI 279.

**PHRMSCI 197. Professional Internship. 4 Units.**

Provides students with opportunity to develop leadership and professional skills necessary for competitive placement in their chosen industry. Students gain new and field-specific skills outside the classroom environment while participating in a supervised internship for a total of 100 hours.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Seniors only.

**PHRMSCI 198. Independent Study in Pharmaceutical Sciences. 1-4 Units.**

Students interested in independent study should arrange with a faculty member to sponsor and supervise such work. A time commitment of three hours per week per unit is expected. A written report is required at the end of each quarter.

Repeatability: May be taken for credit for 4 units.

**PHRMSCI 199. Undergraduate Research. 1-4 Units.**

Original research in the laboratory of Pharmaceutical Sciences faculty. Attendance at regular research group meetings is also generally expected, and a quarterly written report is required. Strongly recommended for students considering research careers and/or graduate degree programs.

Repeatability: May be repeated for credit unlimited times.

**PHRMSCI H199. Honors Research in Pharmaceutical Sciences. 1-4 Units.**

Undergraduate honors research in Pharmaceutical Sciences. A student time commitment of 10-15 hours per week is required.

Repeatability: May be repeated for credit unlimited times.

**PHRMSCI 223. Biological Macromolecules. 4 Units.**

Introduction to nucleic acid and protein structure, dynamics, and function. Topics include analytical methods, molecular evolution, folding, and catalysis.

Same as CHEM 223.

**PHRMSCI 250A. Current Topics in Pharmaceutical Sciences. 1 Unit.**

Intended to expose students to the primary literature and current research in the field of Pharmaceutical Sciences. Students analyze and present information for discussion. Guest speakers from academia and industry may participate throughout the quarter.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only. Math and Computational Biology Majors only.

**PHRMSCI 250B. Current Topics in Pharmaceutical Sciences. 1 Unit.**

Intended to expose students to the primary literature and current research in the field of Pharmaceutical Sciences. Students analyze and present information for discussion. Guest speakers from academia and industry may participate throughout the quarter.

Prerequisite: PHRMSCI 250A

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only. Math and Computational Biology Majors only.

**PHRMSCI 250C. Current Topics in Pharmaceutical Sciences. 1 Unit.**

Intended to expose students to the primary literature and current research in the field of Pharmaceutical Sciences. Students analyze and present information for discussion. Guest speakers from academia and industry may participate throughout the quarter.

Prerequisite: PHRMSCI 250B

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only. Math and Computational Biology Majors only.

**PHRMSCI 263. Pharmacogenomics and Epigenetics. 4 Units.**

Survey of the genetic and epigenetic basis of inter-subject variability in response to drugs. Covers drug efficacy, safety, and the need for their optimization in pharmacotherapy. Emphasizes genetic mechanisms of polymorphisms in the pharmacokinetics and pharmacodynamics of representative therapeutic drugs.

Restriction: Graduate students only.

Concurrent with PHRMSCI 163.

**PHRMSCI 264. The RNA World: From Discovery to Mechanism. 4 Units.**

Provides a comprehensive understanding of RNA in biology. Use of knowledge gained in organic chemistry, biochemistry, genomics, and molecular biology to understand how RNA is integrated into contemporary biology.

Restriction: Graduate students only.

**PHRMSCI 265. New Frontiers in Chemical and Synthetic Biology. 4 Units.**

Explores new developments in chemical and synthetic biology that span the areas of chemistry, molecular biology, genetics, bioengineering, systems biology, and computational genomics.

Restriction: Graduate students only.

**PHRMSCI 270. Advanced Pharmacology. 4 Units.**

Provides a mechanism-based overview of pharmacology with strong emphasis on clinical application of pharmacology. Students learn the most recent advances in pharmacology as they relate to drug discovery, development, and clinical application.

Restriction: Graduate students only.

Concurrent with PHRMSCI 170A.

**PHRMSCI 272. Special Topics in Pharmaceutical Sciences. 2-4 Units.**

Reserved for current topics of particular interest in areas of pharmaceutical sciences that are not covered by other courses. The subject will vary from year to year, highlighting, for example, significant emerging fields or highly specialized but vital research areas.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PHRMSCI 275. Drug Discovery Computing Techniques. 4 Units.**

Techniques used in computer-aided drug discovery, including theory behind these techniques and practical applications. Topics include scientific computing; python; classical force fields and simulations; visualization and movie-making; quantum mechanics in drug discovery; molecular dynamics; solvation models; and several others.

Restriction: Graduate students only.

Concurrent with PHRMSCI 175.

**PHRMSCI 277. Medicinal Chemistry. 4 Units.**

Fundamentals of medicinal chemistry covering diverse aspects of drug design, discovery, synthesis, and development. Molecular basis of drug action with an emphasis on the structure-to-function continuum.

**PHRMSCI 278. Stem Cell Therapy . 4 Units.**

Introduces new paradigms in regenerative medicine particularly those that involve stem cells, and emerging molecular, nano- and micro-engineered tools for in vivo imaging that is critical for studying and monitoring regeneration.

Restriction: Graduate students only.

**PHRMSCI 279. Emerging Technologies in Pharmaceutical Sciences and Medicine. 4 Units.**

Introduces emerging, ground-breaking technologies in pharmaceutical sciences and medicine, including pharmacogenomics, genome editing, and stem cell and engineered T cell therapies. Explores these novel technologies with both their underlying theories and forward-thinking applications.

Concurrent with PHRMSCI 179.

**PHRMSCI 298. Research Seminar . 2 Units.**

Presentation and discussion of current problems and methods in teaching and research in pharmaceutical sciences.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHRMSCI 299. Graduate Research. 1-12 Units.**

Supervised original research or investigation under the direction of an individual faculty member.

Repeatability: May be repeated for credit unlimited times.

**PHRMSCI 399. University Teaching. 1-4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## Pharmaceutical Sciences, B.S.

The B.S. program in Pharmaceutical Sciences trains students in a multidisciplinary approach so that they can contribute to the advancement of new pharmaceutical technologies such as accelerated chemical synthesis, molecular-based assays using cloned enzymes, biopharmaceutical techniques, novel diagnostics, computational chemistry, and gene therapies. Pharmaceutical scientists are rapidly changing the field of drug discovery and development. The graduates of this program may seek employment in public and private sectors or choose to pursue graduate degrees such as a Ph.D., M.D., or Pharm.D.

**Undergraduate Honors.** Honors at graduation, e.g., *cum laude*, *magna cum laude*, *summa cum laude*, are awarded to approximately the top 16 percent of the graduating seniors. To be eligible for honors, a general criterion is that students must have completed at least 72 units in residence at a University of California campus. Other important factors are considered visit at Honors Recognition.

Students may be admitted to the Pharmaceutical Sciences major upon entering the University as freshmen, via change of major, or as transfer students from other colleges and universities.

Information about change-of-major policies is available in the Department of Pharmaceutical Sciences office and at the UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu/>).

**Transfer Students:** All applicants must have completed the following required courses with a grade of B- or better in all courses: one year of general chemistry with laboratory equivalent to UCI's CHEM 1A-CHEM 1B-CHEM 1C and CHEM 1LC-CHEM 1LD **AND** one year of organic chemistry with laboratory equivalent to UCI's CHEM 51A-CHEM 51B-CHEM 51C and CHEM 51LB-CHEM 51LC-CHEM 51LD. Transfer students must also complete two years of biology courses equivalent to UCI's BIO SCI 93, BIO SCI 94, BIO SCI 97, BIO SCI 98, and BIO SCI 99. Moreover, all transfer applicants must have a cumulative GPA of 3.0 or better. Additional courses that are recommended, but not required: one year of calculus and one year of calculus-based physics.

**All students must meet the University Requirements.**

### Major Requirements

#### A. Lower-Division Requirements:

1. Select one of the following sequences:

CHEM 1A- 1B- 1C

General Chemistry  
and General Chemistry  
and General Chemistry

CHEM H2A- H2B- H2C

Honors General Chemistry  
and Honors General Chemistry  
and Honors General Chemistry

and select one of the following lab sequences:

CHEM 1LC- 1LD

General Chemistry Laboratory  
and General Chemistry Laboratory

CHEM H2LA- H2LB- H2LC

Honors General Chemistry Laboratory  
and Honors General Chemistry Laboratory  
and Honors General Chemistry Laboratory

CHEM M2LA- M2LB- M3LC

Majors General Chemistry Laboratory  
and Majors General Chemistry Laboratory  
and Majors Quantitative Analytical Chemistry Laboratory

Complete the following organic chemistry sequence and accompanying labs:

CHEM 51A- 51B- 51C

Organic Chemistry  
and Organic Chemistry  
and Organic Chemistry<sup>3</sup>

CHEM 51LB- 51LC- 51LD

Organic Chemistry Laboratory  
and Organic Chemistry Laboratory  
and Organic Chemistry Laboratory

2. Complete:

MATH 2A- 2B

Single-Variable Calculus  
and Single-Variable Calculus

and select one of the following:

MATH 2D	Multivariable Calculus
MATH 3A	Introduction to Linear Algebra
STATS 7	Basic Statistics
STATS 8	Introduction to Biological Statistics

3. Select one of the following physics sequences:

PHYSICS 3A- 3B- 3C	Basic Physics I and Basic Physics II and Basic Physics III
--------------------	--

or

PHYSICS 7C- 7D- 7E	Classical Physics and Classical Physics and Classical Physics
--------------------	---

4. Complete:

BIO SCI 93	From DNA to Organisms
BIO SCI 94	From Organisms to Ecosystems
BIO SCI 97	Genetics
BIO SCI 98	Biochemistry
BIO SCI 99	Molecular Biology

5. Complete: <sup>2</sup>

PHRMSCI 1	New Student Seminar
PHRMSCI 42	Life 101
PHRMSCI 76	Ethical Conduct of Research

#### **B. Upper-Division Requirements:**

Complete:

BIO SCI 100	Scientific Writing
BIO SCI 194S	Safety and Ethics for Research
PHRMSCI 120- 120L	Human Physiology and Human Physiology Lab <sup>2</sup>
PHRMSCI 170A- 170B	Molecular Pharmacology I and Molecular Pharmacology II <sup>2</sup>
PHRMSCI 171	Physical Biochemistry <sup>2</sup>
PHRMSCI 172	Topics in Pharmaceutical Sciences <sup>2</sup>
PHRMSCI 173	Pharmacotherapy <sup>2</sup>
PHRMSCI 174- 174L	Biopharmaceutics and Nanomedicine and Biopharmaceutics and Nanomedicine Lab <sup>2</sup>
PHRMSCI 177- 177L	Medicinal Chemistry and Medicinal Chemistry Laboratory <sup>2</sup>

#### **C. Upper-Division Electives (8 units):**

The upper-division electives may be selected from the following: <sup>1,2</sup>

BIO SCI D103	Cell Biology
BIO SCI D104	Developmental Biology
BIO SCI D111L	Developmental and Cell Biology Laboratory
BIO SCI D136	Human Anatomy
BIO SCI D137	Eukaryotic and Human Genetics
BIO SCI D145	Genomics, Development, and Medicine
BIO SCI D148	Development and Disease
BIO SCI D170	Applied Human Anatomy
BIO SCI E136	The Physiology of Human Nutrition
BIO SCI E142W	Writing/Philosophy of Biology
BIO SCI E189	Environmental Ethics
BIO SCI M114	Advanced Biochemistry
BIO SCI M114L	Biochemistry Laboratory

BIO SCI M116L	Molecular Biology Laboratory
BIO SCI M118L	Experimental Microbiology Laboratory
BIO SCI M120	Signal Transduction in Mammalian Cells
BIO SCI M121	Immunology with Hematology
BIO SCI M122	General Microbiology
BIO SCI M123	Introduction to Computational Biology
BIO SCI M124A	Virology
BIO SCI M124B	Viral Pathogenesis and Immunity
BIO SCI M125	Molecular Biology of Cancer
BIO SCI M137	Microbial Genetics
BIO SCI M143	Human Parasitology
BIO SCI M144	Cell Organelles and Membranes
BIO SCI N110	Neurobiology and Behavior
BIO SCI N113L	Neurobiology Laboratory
BIO SCI N153	Neuropharmacology
BIO SCI N154	Molecular Neurobiology
CHEM 107	Inorganic Chemistry
CHEM 107L	Inorganic Chemistry Laboratory
CHEM 125	Advanced Organic Chemistry
CHEM 128	Introduction to Chemical Biology
CHEM 128L	Introduction to Chemical Biology Laboratory Techniques
CHEM 138	Introduction to Computational Organic Chemistry
CHEM 156	Advanced Laboratory in Chemistry and Synthesis of Materials
CHEM 160	Organic Synthesis Laboratory
CHEM 170	Radioisotope Techniques
PUBHLTH 121	Introduction to Complementary and Alternative Medicine

<sup>1</sup> Course may not be used to satisfy more than one requirement.

<sup>2</sup> Courses must be completed with a grade of C- or better.

<sup>3</sup> Courses must be completed with a grade of C- or better by winter quarter of the second year.

**Upper-Division Writing Requirement:** Pharmaceutical Sciences majors satisfy the upper-division writing requirement by completing BIO SCI 100 with a grade of C or better, followed by the completion of PHRMSCI 174L and PHRMSCI 177L.

**NOTE:** Double majors with Pharmaceutical Sciences, Public Health Sciences, Nursing Science, Biomedical Engineering: Premedical, or with any of the School of Biological Sciences majors are not permitted.

Freshman		
Fall	Winter	Spring
BIO SCI 93	BIO SCI 94	CHEM 1C- 1LC
CHEM 1A	CHEM 1B	MATH 2A
HUMAN 1A	WRITING 39B	WRITING 39C or HUMAN 1C
PHRMSCI 1	General Education	General Education
General Education		
Sophomore		
Fall	Winter	Spring
BIO SCI 97	BIO SCI 98	BIO SCI 99
CHEM 51A- 1LD	CHEM 51B- 51LB	CHEM 51C- 51LC
MATH 2B	PHRMSCI 42	General Education
BIO SCI 194S	General Education	
Junior		
Fall	Winter	Spring
PHRMSCI 120- 120L	PHRMSCI 170A	PHRMSCI 170B
BIO SCI 100	General Education	Elective
PHYSICS 3A, 7C, or 7LD	PHYSICS 3B, 7D, or 7LD	PHYSICS 3C or 7E
CHEM 51LD	Elective	PHRMSCI 76
	STATS 7, 8, MATH 2D, or MATH 3A	

Senior		
Fall	Winter	Spring
PHRMSCI 171	PHRMSCI 177- 177L	General Education
PHRMSCI 174- 174L	General Education	Upper-Division Elective
General Education	Upper-Division Elective	PHRMSCI 173
PHRMSCI 172		

## Pharmacological Sciences, Ph.D.

The Pharmacological Sciences Ph.D. program provides a unique opportunity for students interested in any scientific discipline represented by the Department of Pharmaceutical Sciences faculty to have a year of broad, interdisciplinary training followed by focused doctoral research in the Pharmaceutical Sciences research group of their choice. Students in the program choose one of three tracks in Pharmaceutical Sciences, Pharmacology, or Medicinal Chemistry at the start of their first year. At the end of their first year of interdisciplinary training, they transition into a research group to begin their more focused doctoral research under the guidance of a Pharmaceutical Sciences faculty member. The Ph.D. program prepares students for careers in academic research institutions, in the biotechnology and pharmaceutical industry, in federal and state agencies, and in private research institutions by providing a research-intensive approach to the study of pharmaceutical sciences.

Faculty research programs in the Pharmacological Sciences Ph.D. program include molecular and cellular pharmacology, circadian rhythms, epigenetic modifications, neuropharmacology, psychopharmacology, cardiovascular pharmacology, the pharmacology of aging, structure-based drug design, screening-based drug discovery, medicinal chemistry, structural biology, natural product biosynthesis, synthase engineering, cancer detection, prevention and therapy, gene regulation and intercellular signaling, computational biology and bioinformatics, and nanomedicine for targeted drug and gene delivery testing.

### Prerequisites

- An M.S. degree is not required for consideration. However, research experience (laboratory or fieldwork) is a primary criterion for acceptance into your graduate programs.
- Some biology and chemistry courses are required. However, because we are an interdisciplinary program, we admit students from various academic backgrounds, so there are no specific course requirements. Applicants recently admitted to our program have undergraduate degrees in a wide range of disciplines, including molecular biology, psychology, and chemical engineering, as well as chemistry and biology.
- Minimum cumulative undergraduate GPA of 3.0

### Application Instructions

The online application (<https://apply.grad.uci.edu/apply/>) and supporting materials should be received by December 1 for full consideration, but submissions received up until January 5 may be considered.

In addition to the online application and all supporting materials required by the UCI Graduate Admissions Office, applicants should include specific research interests and three possible research advisors in their personal statement.

### International Applicants

- TOEFL scores are required for all international applicants
- However, if your undergraduate degree was obtained in a country where English was the primary language, the TOEFL exam is not required. For more information regarding admissions requirements for international students, visit the Academic Qualifications (<https://grad.uci.edu/admissions/applying-to-uci/international-qualifications.php>) webpage.
- Teaching Assistant (TA) Eligibility
  - A score of 26 or higher on the speaking component of the TOEFL IBT;
  - A score of 8 or higher on the speaking module of the IELTS; or
  - A score of 50 or higher on the TSE.
- For more information about the English language requirements for TAs, please visit the English Language Proficiency Requirements for TAs webpage (<https://grad.uci.edu/admissions/applying-to-uci/english-proficiency.php>).
- Information regarding visas, student employment, and any other services to help international students transition into life at UCI is overseen by the UCI International Center (<https://ic.uci.edu/>).

## Course Requirements

The primary difference between the three tracks are the first-year course requirements, where the Pharmacology Track focuses on mainline pharmacology topics, while the Pharmaceutical Sciences and Medicinal Chemistry Tracks encompass a broad range of allied fields. Students will choose a track during orientation before the start of their first quarter.

### Coursework Requirements - Pharmacology Track

New students who select the Pharmacology Track are subject to the coursework requirement as listed below.

## Required Courses:

PHARM 241	Advanced Topics in Pharmacology
PHARM 251	Experimental Pharmacology
PHARM 254	Introduction to Pharmacology
PHARM 255	Neuropharmacology
PHARM 256	Experimental Design for Pharmacologists
PHARM 257	Ethics in Research
PHARM 298	Seminar
PHARM 299	Research

Courses from the Pharmaceutical Sciences Track required course list below may be substituted for some of the Pharmacology Track required courses with the consent of the Track or Graduate Advisor, in alignment with the student's research interests.

**Coursework Requirements - Pharmaceutical Sciences Track**

New students who select the Pharmaceutical Sciences Track are subject to the first year coursework requirements listed below.

Choose three of the following plus three electives:

PHRMSCI 223	Biological Macromolecules
PHARM 254	Introduction to Pharmacology
or PHRMSCI 270	Advanced Pharmacology
PHARM 255	Neuropharmacology
PHRMSCI 263	Pharmacogenomics and Epigenetics
PHRMSCI 264	The RNA World: From Discovery to Mechanism
PHRMSCI 265	New Frontiers in Chemical and Synthetic Biology
PHRMSCI 272	Special Topics in Pharmaceutical Sciences
PHRMSCI 275	Drug Discovery Computing Techniques
PHRMSCI 277	Medicinal Chemistry
PHRMSCI 278	Stem Cell Therapy
PHRMSCI 279	Emerging Technologies in Pharmaceutical Sciences and Medicine

First-year coursework must include training in the ethical conduct of research (e.g., PHARM 257 or equivalent), three courses from the required list above, and three electives chosen from 1) the same list; 2) from the Pharmacology Track required courses above; 3) from the Medicinal Chemistry Track elective list below; or 4) any UCI four-unit letter-graded graduate course approved as an elective by the Pharmaceutical Sciences Track Advisor.

**Coursework Requirements - Medicinal Chemistry Track**

New students who select the Medicinal Chemistry Track are subject to the first year coursework requirements listed below

PHRMSCI 223	Biological Macromolecules
PHARM 254	Introduction to Pharmacology
PHRMSCI 277	Medicinal Chemistry
PHRMSCI 250A	Current Topics in Pharmaceutical Sciences

In addition to the above required courses, Medicinal Chemistry Track students must take at least two elective courses from the Medicinal Chemistry elective list below or any UCI four-unit letter-graded graduate course approved as an elective by the Graduate Advisor by the end of Year 1.

**Medicinal Chemistry Elective Course List****Chemistry Department**

CHEM 201	Organic Reaction Mechanisms I
CHEM 202	Organic Reaction Mechanisms II
CHEM 203	Organic Spectroscopy
CHEM 204	Organic Synthesis I
CHEM 205	Organic Synthesis II
CHEM 218	Metallobiochemistry
CHEM 219	Chemical and Structural Biology
CHEM 221A	Fundamentals of Molecular Biophysics

**Molecular Biology and Biochemistry Department**

MOL BIO 203	Nucleic Acid Structure and Function
MOL BIO 204	Protein Structure and Function
MOL BIO 211	High-Resolution Structures: NMR and X-ray
<b>Pharmaceutical Sciences Department</b>	
PHRMSCI 263	Pharmacogenomics and Epigenetics
PHRMSCI 264	The RNA World: From Discovery to Mechanism
PHRMSCI 265	New Frontiers in Chemical and Synthetic Biology
PHRMSCI 270	Advanced Pharmacology
PHRMSCI 275	Drug Discovery Computing Techniques
PHRMSCI 278	Stem Cell Therapy
PHRMSCI 279	Emerging Technologies in Pharmaceutical Sciences and Medicine
PHARM 255	Neuropharmacology

## Comprehensive Exam

After completion of first year courses, each student must pass a Comprehensive Exam or equivalent covering first year coursework subjects. For Pharmacology Track students, it will be offered once per year during the summer and will normally be taken prior to the second year. It may be deferred to the following year only under unusual circumstances and with the prior approval of the Graduate Advisor. There will be a single Comprehensive Exam offered, covering subjects appropriate for students in any concentration. Each candidate for the Ph.D. must pass the Comprehensive Exam or equivalent no later than the end of their second year.

## Advancement to Candidacy

Each student must complete an advancement examination, consisting of a written document and an oral presentation, for their Advancement Committee in accordance with Graduate Council and Department of Pharmaceutical Sciences procedures. To form the five-member Advancement Committee, students must provide the Graduate Advisor with two faculty names and the Graduate Advisor selects three additional faculty. The Advancement Exam will normally take place no earlier than the sixth quarter or no later than the ninth quarter; exceptions must be approved in advance by the Graduate Advisor. After all members of the Advancement Committee vote to pass a student at the time of their oral exam, the student will officially advance to candidacy.

## Dissertation

A three-member Doctoral Committee formed from the Advancement Committee will meet with the candidate annually to assess and guide the student's progress toward completion of the dissertation. When the student's research advisor and Doctoral Committee members determine that a sufficient body of original research has been completed, the student will prepare the dissertation for a public defense before the Doctoral Committee.

## Final Examination

Upon completion of the dissertation the student will take a public oral examination on the content of his or her dissertation or related topics. The examination will be conducted by all members of the student's Doctoral Committee.

# Pharmacology, M.S.

The online M.S. in Pharmacology is designed to meet the needs of working professionals and non-traditional students by providing educational access and flexibility in an online format. It is well-suited to meet the goals of individuals who are seeking leadership positions within their organizations in a variety of fields.

The curriculum emphasizes both theoretical and practical applications and an interdisciplinary approach that serves not only as excellent pathways to career advancement, but also provides a solid foundation from which to pursue doctoral study in related fields.

The M.S. in Pharmacology prepares students for careers in academic research institutions, in the biotechnology and pharmaceutical industry, in federal and state agencies, and in private research institutions.

The online M.S. in Pharmacology is targeted to working professionals in the pharmaceutical industry and related fields, and is open to any non-traditional student who can benefit from the flexibility and convenience of online learning. Admission requirements include:

- A bachelor's degree from a recognized and accredited academic institution with degree standards equivalent to UC
- A minimum cumulative undergraduate GPA of 3.0
- Some coursework in biology is required, but applicants may be admitted with a variety of undergraduate disciplines, including biology, molecular biology, psychology, chemistry, etc.
- Some research experience is required
- GRE is NOT required

To apply to the program, applicants must complete the UCI Graduate Division's online application for admission and upload the following materials:

- Personal statement: The personal statement should include a personal history describing your professional and academic achievements, and in particular, your laboratory and research experience; current and future goals, specifically how and why the MSP will help you achieve them; and your understanding of the challenges of online learning and your readiness to participate in this type of instructional modality.
- Three letters of recommendation uploaded to the application directly by individuals who can evaluate your academic and/or professional achievements, describe your strengths and weaknesses, and comment on your character, integrity and motivation.
- Unofficial transcripts uploaded to the application. (Official transcripts will be requested by the Graduate Division if you are admitted and plan to enroll.)
- Non-refundable application fee
- International students must submit recent TOEFL exam scores (institution code: 4859)

The priority deadline for applications is March 1. The final deadline to apply is June 15.

## Requirements

The program consists of 13 required courses (39 units) to be completed sequentially over two years of study (six quarters).

A. Complete the following:

PHARM 270	Applied Pharmacology <sup>1</sup>
PHARM 271	Principles of Pharmacology
PHARM 272	Receptors and Drug Targets
PHARM 274	Research Techniques in Pharmacology
PHARM 276	Experimental Design and Data Analysis
PHARM 277	Ethics in Scientific Research
PHARM 278	Concepts in Drug Discovery
PHARM 279	Special Topics in Pharmacology
PHARM 280	Master's Project in Pharmacology
PHARM 281	Neuropharmacology
PHARM 282	Behavioral Pharmacology
PHARM 283	Cardiovascular Pharmacology
PHARM 284	Endocrine, Respiratory, and Gastrointestinal Pharmacology

<sup>1</sup> Students take PHARM 270 at the beginning of the first year; it is an accelerated five-day in-residence course offered on the UCI campus.

The capstone paper is written while the student is enrolled in PHARM 280. The student, in consultation with their faculty mentor, selects a topic of interest in pharmacology. The final product will be evaluated by the mentor and the course director for acceptability in meeting the capstone requirement.

Students submit an application for advancement to candidacy in the fifth quarter of study. The capstone research project and required courses for the fifth and sixth quarters must be completed before the degree will be conferred. The normative time to degree is two years.

# Division of Undergraduate Education

---

**Michael Dennin, Dean**

**Dean's Office**

611 Aldrich Hall

949-824-3291

<http://www.due.uci.edu>

The core mission of the Division of Undergraduate Education is to support and enrich the academic experiences of undergraduate students so that they succeed and thrive. The Division provides campus leadership, programs, and services that enhance the quality of undergraduate education at UCI. An advocate and steward for educational excellence, the Division works with all academic units, programs, and members of the UCI community to foster a climate of learning, discovery, and engagement for every undergraduate student. Through its diverse and innovative programs and services, the Division provides support for student academic achievement, for a rich and coherent curriculum, and for outstanding teaching through the integration of teaching and research activities and the facilitation of effective pedagogy.

The Division also supports excellence in undergraduate education through assessment of student learning outcomes and a comprehensive program of research and evaluation conducted by its Center for Assessment and Applied Research. This center coordinates the campus approach to educational assessment and provides data and information on undergraduate students, programs, and policies for use in decision-making by the Dean of the Division and other campus leaders. It also provides consultation and technical advice for faculty and staff on assessment of student learning, program evaluation, survey research, statistical analyses of student data, and development of new undergraduate majors and minors with a view to enhance undergraduate education at UCI. For further information visit the Center (<http://www.assessment.uci.edu>) for Assessment and Applied Research website (<http://assessment.uci.edu/>).

A current list of DUE Program faculty directors and advisors can be found on the DUE Homepage. (<http://home.due.uci.edu/>)

The Division of Undergraduate Education is responsible for the following student programs and services. These programs and services are described in detail below.

## Academic Testing Center

3040 Anteater Instructional Research Building (AIRB)

949-824-6207

<http://testingcenter.uci.edu> (<http://testingcenter.uci.edu/>)

### Placement Testing

UCI's Academic Testing Center (ATC) administers placement tests to new and continuing students to ensure correct placement in selected introductory courses and to help students assess their readiness for University-level work. These tests are selected or developed by UCI faculty who also determine the grading criteria for each test. Results from placement tests are used by students and their academic counselors to create a plan of study which is best suited to the students' learning needs and career goals and to determine enrollment in introductory courses. Additional information, such as entrance examination scores, Advanced Placement (AP) scores, and high school work, also may be used to determine course placement.

Placement tests are given in the areas of Calculus, Arabic, Chinese, French, German, Armenian, Japanese, Korean, Persian, Russian, Spanish, Vietnamese, and Academic English/English as a Second Language. Detailed information about who needs to take which test is available on the Academic Testing Center website (<http://www.testingcenter.uci.edu/which%20tests%20to%20take.html>).

All newly admitted freshmen will be directed to information about summer orientation, placement testing, and registering for courses in late spring. Participation in summer orientation and advising is required of new freshmen. Freshmen will register for their fall quarter courses at orientation. Students are strongly advised, therefore, to take any required placement tests *before* their orientation program.

The Academic Testing Center also administers other language tests for exemptions from general education categories VI and VIII. More information is available at the Language Testing Program website (<http://www.testingcenter.uci.edu/Language%20Testing%20Program.html>). The Academic Testing Center administers the challenge by examination for I&C SCI 31, I&C SCI 45C, and I&C SCI 45J in cooperation with the Donald Bren School of Information and Computer Sciences.

For further information on placement testing and summer testing dates, visit the Academic Testing Center website (<http://www.testingcenter.uci.edu/>) or email the Center at [testcenter@uci.edu](mailto:testcenter@uci.edu).

### UC Analytical Writing Placement Examination

The Academic Testing Center is responsible for the campus-based administration of the UC Analytical Writing Placement Examination. The Academic Testing Center also processes results from the state-wide Analytical Writing Placement Examination given in May.

Results from the UC Analytical Writing Placement Examination are used to place students in UCI writing courses. There is a nonrefundable administrative fee associated with the examination. The fee payment process and waiver information are explained in materials students receive in April from the University of California Office of the President. Students who receive admission application fee waivers will automatically have this examination fee waived. Refer to the section on Requirements for a Bachelor's Degree for complete information on the UC Analytical Writing Placement Examination (<http://catalogue.uci.edu/informationforadmittedstudents/requirementsforabachelorsdegree/>) and the UC Entry Level Writing requirement (<http://catalogue.uci.edu/informationforadmittedstudents/requirementsforabachelorsdegree/>). Important information about the examination is also available here (<http://www.testingcenter.uci.edu/analyticalWriting.html>).

## **ANTrepreneur Center**

233 Pereira Drive  
(949) 614-0101  
<http://antrepreneur.uci.edu/>  
[antrepreneur@uci.edu](mailto:antrepreneur@uci.edu)

In partnership with UCI Applied Innovation, the ANTrepreneur Center has the mission of integrating entrepreneurial and innovative thinking into the UC Irvine campus and to UC Irvine students in starting new ventures. This center provides free mentorship learning opportunities, resources to help students scale their business, and connections to the greater Irvine entrepreneurial network.

For more information visit the ANTrepreneur Center website (<http://antrepreneur.uci.edu>).

## **Blum Center for Poverty Alleviation**

5548 Social & Behavioral Sciences Gateway  
949-824-6307  
<http://blumcenter.uci.edu/>  
[blumcenter@uci.edu](mailto:blumcenter@uci.edu) (%20blumcenter@uci.edu)

The UCI Blum Center's mission is to promote social change and inspire the next generation of leaders to action with research on poverty alleviation. By collaborating across disciplines with students, faculty and practitioners, the UCI Blum Center rigorously explores systemic, geopolitical, technological and climate forces affecting poverty. The UCI Blum Center's innovative education programs, basic and applied research, and work in community development and policy-making engage future leaders to reduce the risks of poverty for vulnerable populations and improve humanity and its institutions. The Blum Center at University of California Irvine focuses its work around 3 key division areas: 1. Flood Hazards, 2. Human Trafficking and 3. Science & Practice of Compassion with partnerships in Environmental Peacemaking, Technology Innovation for Humanitarian Action and policy making in Washington D.C.

The Blum Center's signature offerings include:

- Global Service Scholars (<http://globalservicescholars.uci.edu/>)
- Small Change, Better World (<http://blumcenter.uci.edu/smallchange/>) micro grant program
- The Science and Practice of Compassion (PSCI 192B) (<http://blumcenter.uci.edu/students/education/science-compassion/>) online course
- Global Poverty & Inequality in the 21st Century (UPPP 115) (<http://blumcenter.uci.edu/students/education/global-poverty/>) online course
- Poverty Track, Civic & Community Engagement Minor (<http://engage.due.uci.edu/>)

## **Campuswide Honors Collegium**

**Charles E. Wright, Associate Dean**  
1200 Student Services II  
949-824-5461  
<http://honors.uci.edu>  
[honors@uci.edu](mailto:honors@uci.edu)

The Campuswide Honors Collegium is dedicated to promoting high standards of scholastic excellence and personal growth by combining the qualities and support of a liberal arts college with the resources and prestige offered by a major research university. The unique opportunities provided by the Campuswide Honors Collegium for students to learn and engage with other talented and motivated students and with faculty in a supportive learning community help students get the most out of their education, achieve ambitious goals, and prepare for future careers and graduate and professional school.

For more information, visit the honors section.

## **Capital Internship Program**

1100 Student Services II  
949-824-5400  
<http://capitalinternships.uci.edu/>

dccenter@uci.edu

### **UC Washington, D.C. (UCDC) Academic Internship Program**

The UCDC Academic Internship Program supervises and supports students who pursue internships, elective courses, research, and creative activities in the nation's capital. This UC systemwide program, situated in the exciting environment of Washington, D.C., is open to students in all majors. Students may enroll for fall, winter, or spring quarter. While living in Washington, D.C., students are enrolled at UCI and earn 12–16 units of credit. Financial aid eligibility is maintained and is adjusted to cover the total cost of the program. Students live in the UC Washington Center building together with students from all of the participating UC campuses, which provides a social and intellectual community throughout the quarter. Internship opportunities are available in almost any setting including Capitol Hill, the White House, government agencies, nonprofit organizations, think tanks, art museums, educational institutions, media outlets, and scientific organizations, just to name a few. Interested students with strong academic records are encouraged to apply.

### **UC Center Sacramento Internship Program**

The UCCS Internship Program supervises and supports students who pursue internships, elective courses, research, and creative activities in the state capital. This UC systemwide program is open to students in all majors, and is available for the fall, winter, spring, or summer terms. While living in Sacramento, students are enrolled at UC and earn 12–16 units of credit. Financial aid eligibility is maintained. Internship opportunities are available for students in many different settings including the offices of Assembly Members, Senators, and the Governor, as well as with State agencies, nonprofit organizations, and lobbying organizations. Interested students with strong academic records are encouraged to apply.

## **Center for Excellence in Writing and Communication**

193 Science Library

949-824-8949

<http://writingcenter.uci.edu> (<http://www.writingcenter.uci.edu/>)

writing-center@uci.edu

The UCI Center for Excellence in Writing and Communication offers free writing support to all enrolled UCI undergraduate students; we strive to make better writers, not just better writing. Our services include individual writing consultations (<http://www.writingcenter.uci.edu/appointments/>), online tutorials (<http://www.writingcenter.uci.edu/resources/resources-for-students/>), peer tutoring (<http://www.writingcenter.uci.edu/peer-tutors/>), workshops (<http://writing.uci.edu/services/workshops/>) about writing for different occasions and needs, and assistance with developing research skills.

The Writing Center, in conjunction with the Campus Writing Coordinator and the Division of Undergraduate Education, also conducts research (<http://writing.uci.edu/research/>) about best practices (<http://writing.uci.edu/resources/student-resources/>) in the teaching of writing, and is the central campus hub for developing a culture of writing and communication at UCI.

## **Civic and Community Engagement Minor**

<http://engage.uci.edu/>

CCEMinor@uci.edu

The Minor in Civic and Community Engagement is an interdisciplinary program that provides students with the knowledge, skills, attitudes, and values to engage as citizens and active community members in the 21st century. It provides a theoretical and empirical framework to increase students' understanding of public problems (environmental, social, and other) from multiple disciplinary perspectives. Students learn about strategies to address public problems, including through public policy; through the involvement of community-based and nonprofit organizations; and through the cultivation of leadership. The minor also empowers students by providing them opportunities to cultivate leadership in public and private settings. The minor is open to students of all majors and is distinguished both by what students learn and by how they learn it - through a combination of coursework, research, and service.

Additional information is available at the Interdisciplinary section of the *Catalogue*.

## **Freshman Seminar Program**

611C Aldrich Hall

949-824-1955

<http://freshmanseminar.uci.edu/> (Freshmen)

seminars@uci.edu

Small seminars are offered to new Freshmen students to introduce them to the academic culture of UC Irvine. Faculty from a broad range of disciplines teach about topics of current interest in sections of up to 15 students. These seminars are a great way for new students to learn about a variety of academic fields, meet a faculty member who can serve as a mentor, get to know other new students with similar interests, and take a small class as one of their first courses on campus.

Freshman Seminars (UNI STU 3 classes) are offered all three quarters, with priority given to new students who can enroll in a maximum of three sections during their time at UCI. Details of each quarter's offerings are available on the program website and in the Schedule of Classes.

## International Students Excellence Program

949-824-2422

<http://isep.due.uci.edu/>khuie@uci.edu (<http://catalogue.uci.edu/divisionofundergraduateeducation/mail%20to:khuie@uci.edu>)

The International Student Excellence Program's (ISEP) mission is to assist UCI's international freshmen in making a smooth transition into university life. ISEP provides both academic excellence and social support in order to engage international students in UCI's vibrant campus life and help them create solid relationships in their new environment. Its signature program, the International Peer Group Scholars Program (IPG), is based on strong mentor/mentee relationships that encourage cultural exploration as well as academic and personal success. In addition to individual mentoring, ISEP offers small group meetings and larger group events during Welcome Week and throughout the year. Students with questions or who do not yet have a mentor should contact the office.

## Learning and Academic Resource Center

3500 Anteater Learning Pavilion

949-824-6451

<http://larc.uci.edu>

larc@uci.edu

The Learning and Academic Resource Center (LARC) provides academic support programs for undergraduate students. These include course-specific tutorials, as well as Academic Learning Skills workshops on specific study skills (e.g. time management, academic reading, preparing for exams, etc.) that can be applied to all courses. Tutorials are regularly-scheduled, informal review sessions in which 12-15 students enrolled in the same lecture compare notes, discuss readings, develop organizational tools, and predict test items in two, 50-minute LARC Sessions per week. The primary goal of the LARC program is to facilitate student collaboration among peers to increase understanding and retention of course-specific material for academic success. By working together, students learn how to integrate course content and learning skills to become independent, successful learners.

## Scholarship Opportunities Program

193 Science Library

949-824-0189

<http://scholars.uci.edu> (<http://scholars.uci.edu/>)sklrship@uci.edu ([sklrship@uci.edu](mailto:sklrship@uci.edu))

**The Scholarship Opportunities Program (SOP)** works toward UCI's mission to encourage high-achieving undergraduates to compete successfully for the most prestigious scholarships, grants, and graduate fellowships available, and to begin learning about the process as early as possible. **SOP** organizes and disseminates information on a select group of prestigious awards that are national and international in scope, including opportunities for funded research and study at both the undergraduate and graduate levels. **SOP** also facilitates UCI's processes for evaluating applications and endorsing candidates for awards requiring University nomination. Additionally, staff provide individual and group counseling, present workshops, assist students with curriculum vitae (CVs), and edit Statements of Purpose and research/project proposals, and strengthen interviewing skills.

## Student Success Initiatives

2200 Student Services II

949-824-6234

<http://ssi.uci.edu> (<http://sss.uci.edu>)

Student Success Initiatives (SSI) provides students with the personal, academic, and professional support and development to thrive and succeed at UCI and beyond. SSI is dedicated to serving and assisting with the transitions of low-income students, first-generation students, undocumented students, former foster youth, transfer students, post-traditional students, students with dependents, international students, students in transition, and students with disabilities. SSI also provides a learning community that empowers students to be productive and engaged in their academic careers and personal endeavors. Drop-in counseling, scholarships for tutoring, peer mentoring, and weekly workshops are offered throughout the year.

Programs within SSI include:

- Dream Scholars
- Foster Youth Resilience in Education (FYRE) Scholars Program
- Gateway Scholars and Gateway Initiative
- TRIO Scholars Program
- Summer Bridge Scholars Program

- International Student Excellence Program
- SPF (Student Parents and Families Program)
- Transfer Success Programs
- Summer Edge Programs

Students are encouraged to visit SSI and meet our staff. Appointments can be made with the SSI staff by phone or email. Additional information is available on the SSI website (<http://ssi.uci.edu/>).

## Study Abroad Center

### Study Abroad Center

1100 Student Services II

949-824-6343

<http://studyabroad.uci.edu> (<http://studyabroad.uci.edu/>)

[studyabroad@uci.edu](mailto:studyabroad@uci.edu)

In partnership with the Office of Global Engagement, the Study Abroad Center is a comprehensive resource and counseling center that helps students take advantage of the many worldwide opportunities that exist for study, work, internship, volunteering, research, and non-credentialed teaching that relates to their degree programs at UCI.

Studying abroad is an important resource for achieving the skills, knowledge, and understanding that will make today's undergraduates effective citizens and leaders in local, national, and global affairs once they depart the University. In today's political and business environment, college graduates must be informed decision-makers with a capacity to reflect on their own values while understanding the complex identities, histories, and cultures of others. Studying abroad provides students with the language skills and cultural competence necessary to meet the current demands of business, government, and educational institutions.

Professional staff and peer advisors, who have returned from experiences abroad, are available to guide students in making appropriate choices of international programs for their educational goals. Advising is available when UCI is in session. Participants are provided with pre-departure and reentry orientations.

Students are advised to plan early in their academic career in order to best match studying abroad with their major to graduate on time. Programs are available for students in every major. The wide variety of programs includes those offering general curriculum, intensive language study, and programs focusing on a specific academic subject area. Preliminary guidance is available at the How to Study Abroad (<https://studyabroad.uci.edu/how-to-study-abroad/choose/academic-counselors-study-abroad-advising/>) webpage. Students are encouraged to combine undergraduate research and studying abroad. Coordinated advising between the [Undergraduate Research Opportunities Program](http://www.urop.uci.edu/) (<http://www.urop.uci.edu/>) and the Study Abroad Center facilitates this option. Participation in study abroad satisfies category VIII, international/global issues, of the UCI general education requirement. Students are encouraged to study abroad as a sophomore or junior, allowing the opportunity to incorporate their international learning into their final year at UCI.

The cost of studying abroad is often comparable to the cost of studying at UCI, while some options cost more and some cost less. Financial aid and scholarships (<https://studyabroad.uci.edu/finances/>) are available.

Students may participate in the University of California Education Abroad Program (UCEAP) offering more than 200 programs in 50 countries for UC students; other programs offered by UC campuses; and approved Independent Programs offered by private providers and foreign institutions.

Some UCI academic units have faculty-led programs abroad, such as the Olive Tree Initiative (<https://www.olivetreeinitiative.org/>). The Study Abroad Center is supporting those initiatives and working to develop more UCI Departmental faculty-led programs. For more information, contact Ms. Jeanne d'Arc Gomis ([%20jagomis@uci.edu](mailto:%20jagomis@uci.edu)).

## Transfer Student Hub

2200 Student Services II

949-824-1142

<http://transferhub.uci.edu/>

[transfer@uci.edu](mailto:transfer@uci.edu)

The Transfer Student Hub (TSH) works with new and returning transfer students to facilitate their transition and overall success at UCI by directing them to appropriate campus programs and services, organizing weekly workshops, providing formal and informal mentoring, and offering a space for study. The Transfer Student Hub strives to foster a sense of community among the transfer student population at UCI and advocates for transfer students in order to enhance their academic and social experience. The Transfer Student Hub works closely with Tau Sigma National Honor Society for transfer students and provides guidance in this organizations' work to advocate and support transfer students at UCI.

Students are encouraged to visit TSH and meet with the staff. TSH staff can be reached in person, by telephone or via e-mail. Additional information is available on the TSH website (<http://transfercenter.uci.edu/>). (<http://transferhub.uci.edu/>)

## Undergraduate Research Opportunities Program

2100 Student Services II  
949-824-4189  
<http://uop.uci.edu> (<http://uop.uci.edu/>)  
[uop@uci.edu](mailto:uop@uci.edu)

The Undergraduate Research Opportunities Program (UROP) encourages and facilitates research and creative activities by undergraduates. Research opportunities are available not only from every discipline, interdisciplinary programs, and schools, but also from many outside agencies, including national laboratories, industrial partners, and other universities. UROP offers assistance to students and faculty through all phases of the research activity: proposal writing, developing research plans, resource support, conducting the research and analyzing data, and presenting results of the research at the annual spring UCI Undergraduate Research Symposium. Calls for proposals are issued in the fall and spring quarters. Projects supported by UROP may be done at any time during the academic year and/or summer, and the research performed must meet established academic standards and emphasize interaction between the student and the faculty supervisor. In addition, all students participating in faculty-guided research activities are welcome to submit their research papers for faculty review and possible publication in the annual *UCI Undergraduate Research Journal*.

UROP also sponsors the following programs:

- On- and off-campus research opportunities
- UROP grants and fellowships
- Multidisciplinary Design Program (MDP)
- Summer Undergraduate Research Program (SURP)
- Summer Undergraduate Research Fellowship in the Internet of Things (SURF-IoT)
- Edwards Lifesciences Summer Undergraduate Research Program (E-SURP)
- International Summer Undergraduate Research Fellowship (I-SURF)

Complete information on current UROP programs can be found on the [UROP website \(http://www.urop.uci.edu/\)](http://www.urop.uci.edu/). For additional questions, contact UROP in person, telephone or by email.

## Undergraduate/Undeclared Advising Program

256 Aldrich Hall  
949-824-6987  
<http://uu.uci.edu>

Students who enter the University as freshmen or sophomores may be uncertain about which major they should choose and may not feel ready to declare their major or even to identify their interests with a particular school. Such students participate in the Undergraduate/Undeclared Advising Program, which is administered by the Division of Undergraduate Education. The goal of the Undergraduate/Undeclared Advising Program is to help students make the best informed choice of a major that is possible to meet their academic goals. All students at UCI are required to choose their major by the time they reach junior status.

To make a good decision about which major to declare, students should know the range of programs UCI offers and have some experience with them, have a good knowledge of their own abilities and interests, have clear educational goals, and have a sense of their vocational goals and of the academic programs at UCI that will provide appropriate preparation. Students in the Undergraduate/Undeclared Advising Program receive quarterly individualized staff counseling that helps them explore the variety of course offerings on campus, become more aware of their own interests and abilities, formulate sound educational goals, and learn how to prepare for graduate education and/or possible careers.

To assist students in choosing a major, the program offers a course designed to expose undeclared students to a variety of opportunities and resources available to them and to introduce students to the schools and majors offered. In addition, students learn about research and career opportunities within different disciplines.

## UTeach

611C Aldrich Hall  
949-824-1955  
<http://sites.uci.edu/uteach/>  
[uci.uteach@gmail.com](mailto:uci.uteach@gmail.com)

The UTeach program enables upper-division UCI undergraduates to design, develop, and deliver their own lower-division seminar classes. This provides an opportunity to integrate research, teaching, and learning, as contemplated by UC's mission.

Candidate student-instructors (prospective “UTeachers”) apply for the program in the spring quarter, describing their proposed course and designating a faculty mentor to supervise their research and development. Applications are reviewed near the end of the quarter by the UTeach Student-Faculty Advisory Board (for more information, see the UTeach website (<http://sites.uci.edu/uteach/>)).

During the summer and fall, prospective UTeachers are expected to conduct research with their faculty mentor. They enroll in an independent study course (UNI STU 197A) with their mentor in the fall, producing a draft syllabus and course plan. The Advisory Board reviews these documents at the end of fall quarter. UTeachers whose courses pass the review enroll in a pedagogy seminar (UNI STU 197B) in the winter quarter; this seminar focuses on presentation skills, classroom management, active learning, and discussion of each other's teaching presentations. After final approval of the syllabus and course plan, UTeachers deliver their seminars in the spring quarter and attend a weekly seminar (UNI STU 197C) that addresses practical teaching issues that have come up in the UTeachers' classes.

The UTeach seminars (sections of UNI STU 7) are offered for one unit of P/NP credit in spring quarter. In their entire time at UCI, students may enroll for credit in at most two sections of UNI STU 7.

## Reserve Officers Training Corps Courses

### **ROTC 10L. Military Science-Basic Leadership Laboratory. 1 Workload Unit.**

Provides hands-on and practical military science material covered in the corresponding military science courses.

Grading Option: Workload Credit P/NP Only.

Repeatability: May be repeated for credit unlimited times.

### **ROTC 11. Military Science-Personal Development. 1 Workload Unit.**

Focuses on life skills such as physical fitness, nutrition, and time management while providing an introduction to military knowledge, customs, and skills.

Grading Option: Workload Credit Letter Grade with P/NP.

### **ROTC 12. Military Science-Leadership I. 1 Workload Unit.**

Focuses on the fundamentals of leadership, Army leadership values, ethics, and counseling techniques.

Grading Option: Workload Credit Letter Grade with P/NP.

### **ROTC 13. Military Science-Tactical Leadership I. 1 Workload Unit.**

Focuses on leadership at the tactical level and includes instruction in fundamental military skills such as map reading, land navigation, squad and platoon operations, and resource planning techniques.

Grading Option: Workload Credit Letter Grade with P/NP.

### **ROTC 21. Military Science-Team Leadership I. 2 Workload Units.**

Explores the dimensions of creative and innovative tactical leadership strategies and styles by examining team dynamics and two historical leadership theories that form the basis of the Army leadership requirements model.

Grading Option: Workload Credit Letter Grade with P/NP.

### **ROTC 22. Military Science-Team Leadership II. 2 Workload Units.**

Explores team dynamics and two historical leadership theories that form the basis of the Army leadership requirements model.

Grading Option: Workload Credit Letter Grade with P/NP.

### **ROTC 23. Military Science-Tactical Leadership II. 2 Workload Units.**

Examines the challenges of leading tactical teams in the OE. Highlights dimensions of terrain analysis, patrolling, and operation orders.

Grading Option: Workload Credit Letter Grade with P/NP.

### **ROTC 100L. Military Science-Advanced Leadership Laboratory. 1 Workload Unit.**

Provides hands-on and practical exercises for the military science material covered in the corresponding military science courses as well as leader training through practical application of the Leadership Development Program.

Corequisite: ROTC 131 or ROTC 132 or ROTC 133 or ROTC 141 or ROTC 142 or ROTC 143 or ROTC 197.

Grading Option: Workload Credit P/NP Only.

Repeatability: May be repeated for credit unlimited times.

**ROTC 131. Military Science-Leadership II. 3 Workload Units.**

Challenges cadets to study, practice, and evaluate adaptive leadership skills as they are presented with challenging scenarios related to squad tactical operations. Cadets receive systematic and specified feedback on their leadership attributes and core leader competencies.

Corequisite: ROTC 100L

Prerequisite: ROTC 11 and ROTC 12 and ROTC 13 and ROTC 21 and ROTC 22 and ROTC 23

Grading Option: Workload Credit Letter Grade with P/NP.

**ROTC 132. Military Science-Team Leadership III. 3 Workload Units.**

Provides cadets systematic and specific feedback on their leadership attributes and core leader competencies. Based on such feedback, as well as their own self-evaluations, cadets continue to develop their leadership and critical thinking abilities.

Corequisite: ROTC 100L

Prerequisite: ROTC 11 and ROTC 12 and ROTC 13 and ROTC 21 and ROTC 22 and ROTC 23

Grading Option: Workload Credit Letter Grade with P/NP.

**ROTC 133. Military Science-Tactical Leadership III. 3 Workload Units.**

Uses increasingly intense situational leadership challenges to build cadet awareness and skills in leading small units. Skills in decision-making, persuading, and motivating team members when 'under fire' are explored, evaluated, and developed.

Corequisite: ROTC 100L

Prerequisite: ROTC 11 and ROTC 12 and ROTC 13 and ROTC 21 and ROTC 22 and ROTC 23

Grading Option: Workload Credit Letter Grade with P/NP.

**ROTC 141. Military Science-Leadership III. 3 Workload Units.**

Transitions the focus of student learning from being trained, mentored, and evaluated as a cadet to learning how to train, mentor, and evaluate cadets. Cadets begin to learn the duties and responsibilities of an Army staff officer.

Corequisite: ROTC 100L

Prerequisite: ROTC 131 and ROTC 132 and ROTC 133

Grading Option: Workload Credit Letter Grade with P/NP.

**ROTC 142. Military Science-Leadership IV. 3 Workload Units.**

Requires students to continue to train, mentor, and evaluate underclass cadets. Cadets learn to safely conduct training by understanding and employing the Composite Risk Management Process and the Comprehensive Soldier Fitness (CSF) program.

Corequisite: ROTC 100L

Prerequisite: ROTC 131 and ROTC 132 and ROTC 133 and ROTC 141

Grading Option: Workload Credit Letter Grade with P/NP.

**ROTC 143. Military Science-Officership. 3 Workload Units.**

Explores the dynamics of leading in the complex situations of current military operations in the OE. Cadets examine differences in customs and courtesies, military law, principles of war, and rules of engagement in the face of international terrorism.

Corequisite: ROTC 100L

Prerequisite: ROTC 131 and ROTC 132 and ROTC 133 and ROTC 141 and ROTC 142

**ROTC 151. United States Military History-1607 to 1865. 3 Workload Units.**

Examines the creation of the American military establishment and traces its evolution in the context of the changing nature of warfare, the progression of military professionalism, and social, political, economic, and technological developments through the Civil War.

Grading Option: Workload Credit Letter Grade with P/NP.

**ROTC 152. United States Military History-1865 to 1945. 3 Workload Units.**

Examines the evolution of the American military establishment and the progression of military professionalism in terms of social, political, economic, military, and technological developments from the end of the Civil War through World War II.

Grading Option: Workload Credit Letter Grade with P/NP.

**ROTC 153. United States Military History-1945 to 2001. 3 Workload Units.**

Examines the evolution of the American military establishment and the progression of military professionalism in terms of social, political, economic, military, and technological developments from the Cold War to the War on Terrorism.

Grading Option: Workload Credit Letter Grade with P/NP.

**ROTC 197. Military Science Independent Studies. 2-4 Workload Units.**

Provides intensive, individual study with scheduled meetings to be arranged between Cadre and student. Assigned reading and tangible evidence of mastery of subject matter required.

Grading Option: Workload Credit Letter Grade with P/NP.

Repeatability: May be taken for credit for 12 units.

## UC Washington DC Courses

**UCDC 170. Washington DC Internship. 4-8 Units.**

Supervised internship (20-40 hours per week) in Washington DC government, nonprofit, or private institution consistent with student's interest.

Corequisite: UCDC 180

Prerequisite: Selected for Washington DC Center Program.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**UCDC 180. Washington-Themed Seminar. 4 Units.**

UCDC core course (multiple topics offered each quarter). Enhances students' experiential learning and imparts knowledge and skills to help them transition into public service/private sector positions. One core course per quarter mandatory for all participants in Washington DC Center Program.

Prerequisite: Selected for Washington DC Center Program.

Repeatability: May be taken for credit 3 times as topics vary.

**UCDC 190. Washington DC Elective. 4 Units.**

Studies in selected areas related to the UC Washington, DC Center Program (UCDC).

Prerequisite: Selected for Washington DC Center Program.

Repeatability: May be taken for credit 3 times as topics vary.

## University Affairs Courses

**UNI AFF 1A. Student Participation. 1.3 Unit.**

Campus projects with a University department to enrich academic growth and development as well as academic growth and development of UCI. Includes 30 hours per quarter working on proposed project under faculty/staff supervision. Paper required.

Prerequisite: Project must be approved by a Student Affairs Department head and the instructor.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**UNI AFF 1B. Student Participation. 1.3 Unit.**

Campus projects with a University department to enrich academic growth and development as well as academic growth and development of UCI. Includes 30 hours per quarter working on proposed project under faculty/staff supervision. Paper required.

Prerequisite: UNI AFF 1A

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**UNI AFF 1C. Student Participation. 1.3 Unit.**

Campus projects with a University department to enrich academic growth and development as well as academic growth and development of UCI. Includes 30 hours per quarter working on proposed project under faculty/staff supervision. Paper required.

Prerequisite: UNI AFF 1B

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

## University Studies Courses

**UNI STU 1. Freshman Experience. 2 Units.**

An introduction to the freshman experience provides an overview of the University's aims and resources and exploration of developmental theories and skills necessary for academic success. Attention is also paid to questions of personal development and major choice. Materials fee.

Grading Option: Pass/no pass only.

**UNI STU 3. Mini-Seminars . 1 Unit.**

Designed primarily for freshmen as introduction to scholarly inquiry. Each section is taught by a faculty member from one of the academic disciplines and presents interesting and challenging topics representing the instructor's interest. Students participate in discussions, presentations, and projects.

Repeatability: May be taken for credit 3 times as topics vary.

**UNI STU 4. Transfer Student Seminars. 1 Unit.**

Designed primarily for transfer students during their first year at UCI. Each section is taught by a faculty member from one of the academic disciplines as introduction to scholarly inquiry in their discipline. Students participate in discussions, presentations, and projects.

Repeatability: May be taken for credit 2 times.

Restriction: New students only. Upper-division only until first week of classes.

**UNI STU 6. University Studies International Village Seminar. 1 Unit.**

Seminars held in International Village that are specifically designed to either (a) introduce visiting international students to the U.S. and/or local area and institutions or (b) engage both international and U.S. students in discussion of topics of international interest.

Grading Option: Pass/no pass only.

Repeatability: Unlimited as topics vary.

**UNI STU 7. UTeach: Student-Taught Seminar. 1 Unit.**

Student-taught seminar courses on selected topics. Topics vary each year according to the interest of the students teaching the classes.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**UNI STU 10. Introduction to Civic and Community Engagement and Community Research. 4 Units.**

Provides a foundation for understanding the role of public scholarship, civic engagement, and social action, and the relationship between service learning and engaged citizenship. Introduces key theoretical and research methodologies on the traditions and innovations of civic and community engagement.

**UNI STU 13A. Introduction to Global Sustainability I. 4 Units.**

Introduces Earth as a system and living planet. Examines physical and biological resources as well as energy, water, climate, and ecosystems. Introduces and applies analytic lens of environmental, social, and economic sustainability to examine human impacts and resource use.

Restriction: Lower-division students only.

(II)

**UNI STU 13B. Introduction to Global Sustainability II. 4 Units.**

Introduces Earth as a system and living planet. Examines physical and biological resources as well as energy, water, climate, and ecosystems. Introduces and applies analytic lens of environmental, social, and economic sustainability to examine human impacts and resource use.

Prerequisite: UNI STU 13A

(II)

**UNI STU 13C. Introduction to Global Sustainability III. 4 Units.**

Introduces Earth as a system and living planet. Examines physical and biological resources as well as energy, water, climate, and ecosystems. Introduces and applies analytic lens of environmental, social, and economic sustainability to examine human impacts and resource use.

Prerequisite: UNI STU 13B

(III)

**UNI STU 43. Topics in Illuminations . 1 Unit.**

This course connects students to Illuminations, the Chancellor's Arts and Culture Initiative. Students will attend five Illuminations-sponsored events and engage in brief preparatory and reflective activities in response to these events.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times as topics vary.

**UNI STU 45. Graduate School Opportunities and Preparation. 1 Unit.**

Explores the opportunities associated with graduate school by considering a wide range of disciplines and career paths. Reviews professional and academic paths in graduate school and the ways to prepare for a chosen path.

**UNI STU H80. Neurodivergent. 4 Units.**

Examines the evolution of the diagnosis of autism through history. Deep inquiry of the neuroscience, etiology, and genetics of neurodivergent individuals as well as a review of the validity of the varied treatments will inform critical thinking.

Restriction: Campuswide Honors Collegium students only.

(III)

**UNI STU 83. Pathways to University Success. 2 Units.**

Helps first-year students transition to UC Irvine and promotes a successful University experience. Students learn about academic resources and programs that support acclimation to the campus and enhance academic development through lectures, discussions, and a range of co-curricular activities.

Overlaps with UNI STU 84.

**UNI STU 84. Bridges to University Success. 4 Units.**

Helps first-year students transition to UC Irvine and promotes a successful University experience. Students learn about academic resources/programs that support acclimation to the campus and enhance academic development through lectures, writing laboratories, discussions, and a range of co-curricular activities.

Overlaps with UNI STU 83.

**UNI STU 85A. Leading from Within. 4 Units.**

Students examine characteristics and behaviors of effective leaders. Study the history and theoretical framework for understanding effective leadership. In addition, examine their own leadership strengths and weakness and become familiar with the theory behind and use of comprehensive self-assessment tools.

(III)

**UNI STU 85B. Leading Others. 4 Units.**

Students examine best practices within a team environment. They learn goal setting, diagnosing performance problems, designing solutions, and recognizing relevant differences in culture, priorities, and values within a team through lectures, writing, discussions, and practical activities.

(III)

**UNI STU 85C. Leading Change. 4 Units.**

Focused on a global viewpoint, students learn the theoretical framework behind innovation and change management. Develop innovative solutions to real-world challenges, design strategies to bring an expansive vision into fruition, and learn to communicate a vision and strategies.

(III)

**UNI STU 93. Strategies for Success. 2 Workload Units.**

Designed to develop good study skills in technical fields and the participation of students as active learners in their education. Topics include time management, analytical thinking, text analysis, academic survival strategies, and goal setting.

Grading Option: Workload Credit P/NP Only.

**UNI STU 100. Doing Research in the Community. 4 Units.**

Critically reimagines the research endeavor and its participants/outcomes. Grapples with methods, values, and relationships involved in research. Explores alternative conceptions of research; focus is community-based. Students work in teams on real-world community research projects with faculty mentors and community partners.

Prerequisite: UNI STU 10

**UNI STU 110. Philanthropy in the Community. 4 Units.**

Introduces the role of community engagement, social action and philanthropy. Examines theories and practices of philanthropy, and strategies for social change. Involves hand-on engagement with philanthropy in the form of students making decisions about the distribution of a real fund.

**UNI STU 170. Advanced Internship in Undergraduate Education. 1-2 Workload Units.**

Advanced interns have a year's internship experience and return to contribute to Undergraduate Education programs in a leadership position. Students work three-five hours per week in a DUE office to coordinate or lead less-experienced interns and/or events.

Prerequisite: UNI AFF 1A and UNI AFF 1B and UNI AFF 1C

Grading Option: Workload Credit P/NP Only.

Repeatability: May be taken for credit for 6 units.

**UNI STU 175. Methods and Application in Small Group Instruction. 2 Workload Units.**

Explores various theories and methods of learning and development and their practical application in small group settings. Peer tutors receive instruction in the design, implementation, and evaluation of an effective learning environment for undergraduate students.

Grading Option: Workload Credit P/NP Only.

Restriction: Learning and Academic Resource Center employed tutors only.

**UNI STU 176. Pedagogy of Small Group Facilitation - LAs. 2 Units.**

Overview and readings in evidence-based instruction for undergraduate learning assistants. LAs receive instruction, training, and feedback on effective small group facilitation and active learning. To be taken while serving as a learning assistant in a course.

**UNI STU H176A. Campuswide Honors Thesis Seminar. 2 Units.**

Supports the honors thesis research activities of Campuswide Honors Program students. Students set research goals, discuss, and develop their research interests.

Corequisite: Students must sign up separately for 8 units of independent study with faculty mentors.

Grading Option: Pass/no pass only.

Restriction: Campuswide Honors Collegium students only.

**UNI STU H176C. Campuswide Honors Thesis Seminar. 2 Units.**

Supports the honors thesis research activities of Campuswide Honors Program students. Students work with each other to improve both written and spoken presentations of their results.

Corequisite: Students must sign up separately for 8 units of independent study with faculty mentors.

Prerequisite: UNI STU H176A

Grading Option: Pass/no pass only.

Restriction: Campuswide Honors Collegium students only.

**UNI STU 181. Internship in Civic and Community Engagement. 2-4 Workload Units.**

Provides an opportunity to extend learning into a community-based setting addressing important social, environmental, and public issues. The internship project has a creative and scholarly component where students initiate their own action or inquiry experience.

Prerequisite: UNI STU 10

Grading Option: Workload Credit P/NP Only.

Repeatability: May be taken for credit for 8 units.

**UNI STU 190. Teaching Seminar: Theory and Practice. 2 Units.**

For students selected to be discussion leaders for University Studies 2. Models of teaching, developmental theory applied to college freshmen, curriculum development. Practice of teaching techniques and group management skills.

Repeatability: May be taken for credit 2 times.

**UNI STU 192. Group Project for Discussion Leaders. 4 Units.**

For discussion leaders for University Studies 2. Weekly discussion group training for leading effective groups in addition to evaluations of weekly discussion sections and completion of a special project on issues of freshman development. Materials fee.

Repeatability: May be taken for credit 4 times.

Restriction: Discussion leaders only.

**UNI STU 193. Internship. 2-4 Units.**

Enables students from all majors to receive credit for an approved internship on or off-campus. Internship sites may be public or private, for profit or non-profit agencies, organizations, companies, or corporations offering paid or unpaid learning experiences.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**UNI STU 196. Directed Studies in Undergraduate Education. 1-4 Units.**

Students do directed study (research, readings, etc.) on a topic related to Undergraduate Education under the supervision of one of the faculty who serve as Deans or Faculty Directors in the Division of Undergraduate Education.

Repeatability: May be taken for credit for 12 units.

**UNI STU 197A. UTeach Special Study. 2 Units.**

Students accepted to teach a UTeach course in spring quarter enroll in Special or Independent Study with their faculty mentor during the preceding fall quarter to develop their detailed course syllabus.

Repeatability: Unlimited as topics vary.

Restriction: UTeach Program students only.

**UNI STU 197B. UTeach: Teaching Theory and Practice. 2 Units.**

Students accepted to teach a UTeach course in spring quarter enroll during the winter to develop their teaching skills in preparation for teaching the following quarter.

Prerequisite: UNI STU 197A

Grading Option: Pass/no pass only.

Restriction: UTeach Program students only.

**UNI STU 197C. UTeach: Teaching Practicum. 2 Units.**

Students selected to teach in the UTeach Program teach their courses and meet weekly in a seminar to continue to develop and enhance their teaching skills.

Prerequisite: UNI STU 197B

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

Restriction: UTeach Program students only.

**UNI STU 197D. Study Abroad Experiential Learning. 1 Unit.**

Study abroad on an approved program. Complete critical reflection (written paper, blog, etc.) submitted no later than the end of the quarter following the completion of the study abroad program. Enroll while studying abroad or the quarter immediately following return.

Grading Option: Pass/no pass only.

**UNI STU 197E. Reflections While Abroad. 1 Unit.**

For students while they are studying abroad; maximizing learning outcomes by critically reflecting on learning experiences while abroad. Topics include cultural observations, professional issues, cultural competence, etc. Participants are located in different countries around the world.

Grading Option: Pass/no pass only.

**UNI STU 197F. Internship Plus. 1 Unit.**

Provides training and development of career readiness competencies in parallel with a student's internship experience. Internship sites may be public or private, for profit or non-profit agencies, organizations, companies, or corporations offering paid or unpaid learning experiences.

Grading Option: Pass/no pass only.

**UNI STU 198. Mentored Learning Assistant Field Work. 1-3 Units.**

Oversight of trained learning assistants by the course instructor, including training in the discipline and responsibilities associated with supporting active group work. Instructor mentors LAs in how assisting small groups supports their career goals.

Corequisite: UNI STU 176

Repeatability: May be taken for credit for 9 units.

**UNI STU 296. Graduate Legal Studies . 0.3 Units.**

Monthly faculty/student colloquium to present and discuss socio-legal related research/issues. Course convened by Law School faculty with other faculty participation. Required for PLGS students enrolled in Law portion of degree.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Law students only.

**UNI STU 297. California Community College Internship. 2-8 Units.**

The California Community College Internship offers graduate students the opportunity to learn about faculty life, governance, and teaching at local community colleges. Structures fieldwork for students to participate in and reflect on the educational mission of community colleges.

Prerequisite: Teaching experience.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit for 10 units.

Restriction: MFA or Doctoral students who have advanced to candidacy.

**UNI STU 390A. Advanced Pedagogy and Academic Job Preparation. 2-4 Units.**

Focuses on advanced pedagogical research and practices. Students design and implement an integrated curriculum in the context of the TA Professional Development Program. Prepare for the academic job market by developing application materials and reviewing Pedagogical Fellow applicants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Must be a pedagogical fellow.

**UNI STU 390B. Advanced Pedagogy and Academic Job Preparation. 2-4 Units.**

Focuses on advanced pedagogical research and practices. Students design and implement an integrated curriculum in the context of the TA Professional Development Program. Prepare for the academic job market by developing application materials and reviewing Pedagogical Fellow applicants.

Prerequisite: UNI STU 390A

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Must be a pedagogical fellow.

**UNI STU 390C. Advanced Pedagogy and Academic Job Preparation. 2-4 Units.**

Focuses on advanced pedagogical research and practices. Students design and implement an integrated curriculum in the context of the TA Professional Development Program. Prepare for the academic job market by developing application materials and reviewing Pedagogical Fellow applicants.

Prerequisite: UNI STU 390B

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Must be a pedagogical fellow.

**UNI STU 390X. Developing Teaching Excellence. 2-4 Units.**

An introduction to evidence-based instructional design and methods, specifically for higher education courses. Students practice, observe, and design instruction based on pedagogical literature. Meets most of the requirements for the Certificate in Teaching Excellence Program.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit for 8 units.

**UNI STU 390Z. Advanced Course Design for Instructors of Record. 2-4 Units.**

Confirmed instructors of record who have earned the Certificate in Teaching Excellence design their course (syllabus, lesson plans, activities, assessments, assignments) using best practices in pedagogy. By the end of the course, participants have their full course mapped.

Prerequisite: Certificate of Teaching Excellence required, proof of instructor of record appointment required.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit for 12 units.

Restriction: Graduate students only.

**UNI STU 395. Seminar for Teaching as Research. 1 Unit.**

Preparation and implementation of a teaching as research project in higher education. Participants learn research, experimental design, human subjects, and statistical analysis.

Prerequisite: UNI STU 390B

Repeatability: May be taken for credit 2 times.

# Donald Bren School of Information and Computer Sciences

---

**Marios C. Papaefthymiou, Dean**

6210 Donald Bren Hall

Academic Counseling: 949-824-5156

<http://www.ics.uci.edu> (<http://www.ics.uci.edu/>)

The Donald Bren School of Information and Computer Sciences (ICS) embodies excellence, creativity, and collaborative innovation in computer science and information technology. As the only independent computing school in the University of California system, it is well-positioned to continue its tradition of exploring and advancing the boundaries of a broad, multidisciplinary field on a global scale.

ICS faculty have extensive training in traditional computer science, as well as engineering, mathematics and statistics, and the social sciences. The School's stand-alone structure, as opposed to being part of an engineering school, enables the faculty to take the broadest possible view of computer science and information technology. This breadth is reflected in the diverse set of academic degree options for undergraduate and graduate students, some of which are interdisciplinary and jointly administered with other academic units.

The School's three departments — Computer Science, Informatics, and Statistics — fuel a wide range of instructional and research efforts, including: design of algorithms and data structures; computer architecture and embedded computer systems; networked and distributed systems; systems software; social and mobile computing; artificial intelligence, machine learning and data mining; computer games and virtual worlds; databases and information retrieval; computer graphics and visualization; bioinformatics, computational biology and genomics; computer-supported cooperative work, human-centered computing and human-computer interaction; security and privacy; software engineering; managerial and social aspects of computing technology; and statistics. The vibrant ICS community continues to explore innovative topics ranging from building complete computer systems on chips smaller than a human fingernail to developing user-interface systems that allow workers on opposite sides of the world to collaborate effectively. ICS research continues to focus on how computing and information technology can be used to solve a broad set of real-world problems, such as improving how first responders communicate during a crisis, optimizing transportation systems, analyzing data to expedite biological research, and improving network security.

ICS faculty actively lead and participate in a variety of research laboratories, institutes and centers, including the Institute for Genomics and Bioinformatics; Institute for Software Research; Institute for Virtual Environments and Computer Games; California Institute for Telecommunications and Information Technology (Calit2); Data Science Initiative; Center for Machine Learning and Intelligent Systems; Center for Digital Transformation; Center for Emergency Response Technologies; Center for Algorithms and Theory of Computation; Center for Research in Sustainability, Collapse-Preparedness & Information Technology; Secure Computing and Networking Center; Center for Ethnography; Social & Technological Action Research Group; Secure Systems and Software Laboratory; Software Engineering and Analysis Lab; Computational Vision Lab; Transformative Play Lab; Laboratory for Ubiquitous Computing and Interaction; and Institute for Future Health.

Faculty and student-driven research in ICS is supported through a variety of grants, gifts, and contracts from public and private institutions such as the State of California, the U.S. Department of Education, various U.S. defense agencies, the National Science Foundation, the National Institutes of Health, NASA, and various companies, including The Aerospace Corporation, Boeing, Disney, Experian, Google, IBM, Intel, Microsoft, Samsung, Facebook, and Yahoo!

Faculty and alumni of ICS have contributed some of computing's most significant advancements, including revolutionizing computer-aided drafting techniques; the creation of the current Hypertext Transfer Protocol (HTTP/1.1); development of the Internet standards for HTTP and Uniform Resource Identifiers (URI); the founding of the Apache HTTP Server Project that produces the software for more than 60 percent of public Internet websites; and the creation of the Domain Name System (DNS) that translates Web and e-mail addresses into the numeric system used to route information along the Internet.

ICS is committed to increasing diversity in the computing and information technology fields. The Office of Access and Inclusion (<http://tech.uci.edu/access/>) was created in 2014 as a joint initiative between ICS and UCI's Samueli School of Engineering to support the recruitment, retention, and graduation of undergraduate and graduate students from populations underrepresented in engineering and computer science. The School is also an active partner of the National Center for Women & Information Technology (NCWIT), whose overarching goal is parity in the professional information technology workforce, and a committed BRAID (Building, Recruiting And Inclusion for Diversity) Institution, working to increase the percentage of women and students of color majoring in computer science.

## Honors

Honors at graduation, e.g., *cum laude*, *magna cum laude*, *summa cum laude*, are awarded to approximately the top 16 percent of the graduating seniors. A general criterion is that a student must have completed at least 72 units in residence at the University of California. The student's cumulative record at the end of the final quarter is the basis for consideration of awarding Latin Honors. Other important factors are considered, please visit Honors Recognition.

## Careers

Graduates of the Donald Bren School of Information and Computer Sciences go on to pursue a variety of careers in both industry and academia in the areas of cutting-edge technology, science and business. With the goal of solving real-world problems with a global impact, ICS graduates find limitless opportunities as leaders in virtually every domain—from aerospace, automotive, biomedical, business information management, consumer products, cybersecurity, data science, engineering, entertainment, environmental, finance, gaming, national defense, pharmacology, and software engineering. ICS graduates often find jobs as members of research and development teams—building advanced technologies; designing software and hardware systems; analyzing and securing data; and specifying, designing, and maintaining computing infrastructures for a variety of institutions—while others venture off to form successful start-up companies or work as independent consultants. It is also common for ICS graduates to spend a few years in their related industry before moving into management or advanced technical positions, while others find that the undergraduate educational experience in ICS is the perfect stepping-stone for pursuing graduate studies in various computer science, informatics and statistics degrees, or venturing off into other academic areas such as medicine, law, engineering, or management.

## Undergraduate Programs

A Donald Bren School of ICS undergraduate education is a blend of scholarship, science, technology, and practical application that forms an excellent foundation for professional life.

The basis of the undergraduate programs are a set of fundamental courses in mathematics and computer science, supplemented by general education courses from other academic disciplines. A premium is placed on both communication and quantitative skills. Students quickly gain hands-on experience with advanced computing systems, and intense use of computer and network technologies continues throughout the undergraduate program. Students study data organization, algorithm design and analysis, design and organization of hardware and network systems, software engineering, artificial

intelligence, social aspects of system design and use, and management of technology. In the process, students work with state-of-the-art hardware and software technologies, and learn several contemporary programming languages.

Visit the ICS Student Affairs Office website for Majors and Minors restrictions ([http://www.ics.uci.edu/ugrad/degrees/MajorMinor\\_Restrictions\\_Chart.pdf](http://www.ics.uci.edu/ugrad/degrees/MajorMinor_Restrictions_Chart.pdf)) and Double Major Restrictions ([http://www.ics.uci.edu/ugrad/degrees/DbI\\_Major\\_Restrictions\\_Chart.pdf](http://www.ics.uci.edu/ugrad/degrees/DbI_Major_Restrictions_Chart.pdf)).

## Admissions

To ensure admission consideration for the fall quarter, students should be sure to file their application by November 30 of the prior year. The selection criteria include grades, test scores, and other considerations.

## Transfer Student Policy

Transfer requirements vary by major.

Business Information Management  
Computer Game Science  
Computer Science  
Computer Science and Engineering  
Data Science  
Informatics  
Software Engineering

**NOTE TO TRANSFER APPLICANTS:** These majors require a series of lower-division courses, and prerequisites constrain the order in which they can be taken. Junior-level transfer students who must complete a significant part of this sequence may find that it will take longer than two years at UCI to complete their degree. Python, Java, and C++ are used in the curriculum; therefore, transfer students should plan to learn these languages by studying on their own or by completing related programming courses prior to their first quarter at UCI. **Please note:** a minimum grade of B will be expected for each major's required courses for admission.

It is recommended that students review the articulation agreement between their community colleges and a major at UC Irvine. This will allow them to make efficient progress toward the major.

## Change of Major

Students interested in changing their major to one offered by the School should contact the ICS Student Affairs Office for more information and assistance. Information is also available at the UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu>).

## Major and Minor Restrictions

ICS majors (including shared majors, BIM and CSE) pursuing minors within the Donald Bren School of ICS may not count more than five courses toward both the major and minor. Some ICS majors and minors outside of the School are not permitted due to significant overlap. Visit the ICS Student Affairs Office website for Majors and Minors restrictions. ([http://www.ics.uci.edu/ugrad/degrees/MajorMinor\\_Restrictions\\_Chart.pdf](http://www.ics.uci.edu/ugrad/degrees/MajorMinor_Restrictions_Chart.pdf)) All students should check the Double Major Restrictions Chart ([http://www.ics.uci.edu/ugrad/degrees/DbI\\_Major\\_Restr\\_Chart.pdf](http://www.ics.uci.edu/ugrad/degrees/DbI_Major_Restr_Chart.pdf)) and view our information page ([http://www.ics.uci.edu/ugrad/degrees/Double\\_Majors.php](http://www.ics.uci.edu/ugrad/degrees/Double_Majors.php)) on double majoring to see what degree programs are eligible for double majoring.

## Special Programs and Courses

### The ICS Honors Program

The ICS Honors Program provides selected upper-division students an opportunity to carry out a research project under the direction of a faculty member in the School. Eligible students participate in the ICS Honors Seminar (I&C SCI H197), which provides an introduction to the range of current faculty research. Each student then affiliates with an ICS faculty advisor who agrees to supervise a minimum of two quarters of research. The participating student prepares a final written research report and submits a copy for review to both the faculty advisor and the Honors Program advisor. Successful completion of the Honors Program earns the student a certificate and medal from the School. Further, a notation of successful completion is added to the student's transcript. For more information about course requirements, application procedures, and deadlines visit <http://honors.ics.uci.edu/>, or contact the Student Affairs Office at 949 824-5156.

### Other Opportunities

ICS undergraduates may complement their educational experience by participating in other programs. Information about the following programs is available elsewhere in the *Catalogue* and via the program Web sites: Campuswide Honors Collegium, Undergraduate Research Opportunities Program, Education Road Program, and Student Achievement Guided by Experience (SAGE Scholars).

## Graduate Programs in Information and Computer Sciences

### Admission

Applicants will be evaluated on the basis of their prior academic record. Applicants for the M.S. are expected to have a bachelor's degree in computer science or a related field. Ph.D. applicants will additionally be evaluated in their potential for creative research and teaching in Information and Computer Sciences.

Applicants are expected to have (1) skills in computer programming at least equivalent to those obtained in college-level courses in programming and language development; (2) skills in mathematics equivalent to those obtained in complete college-level courses in logic and set theory, analysis, linear algebra and modern algebra, or probability and statistics; (3) data structures, analysis of algorithms, automata theory, or formal languages; and (4) computer architectures.

All applicants are evaluated on the materials submitted: letters of recommendation, official GRE test scores (optional for M.S./Ph.D. in Informatics, M.S./Ph.D. in Software Engineering, the Master of Human Computer Interaction and Design, and the Master of Software Engineering) official college transcripts, statement of purpose, and personal history statement.

An applicant to the M.S./Ph.D. in Informatics, M.S./Ph.D. in Software Engineering, the Master of Human Computer Interaction and Design, or the Master of Software Engineering is strongly encouraged to submit additional material that enriches their application and speaks to the applicant's strengths (e.g., design portfolio, link to GitHub profile, GRE test scores, scholarly papers submitted and/or published, writing samples).

For more information, contact the ICS graduate counselor at 949-824-5156 or send an email to [gcounsel@ics.uci.edu](mailto:gcounsel@ics.uci.edu) (%20gcounsel@ics.uci.edu).

### Financial Assistance

Financial assistance is available to Ph.D. students in the form of fellowships, teaching assistantships, and research assistantships. Although assistance varies, it is the School's goal to support all entering Ph.D. students, subject to availability of funds. International students who are not citizens of countries where English is either the primary or dominant language, as approved by Graduate Council, and who apply for teaching assistantships must take one of the approved English proficiency examinations. More information is available in the Graduate Division section of the *Catalogue*.

### Students with a Previously Earned Master's Degree

Credit for one or all required courses may be given at the time of admission to those students who have completed a master's degree in computer science or a closely related field. Course equivalency will be determined by the Bren School Associate Dean for Student Affairs following a written recommendation from a sponsoring research advisor. Research advisors can require that a student take additional courses when this is appropriate.

An additional M.S. will not be awarded if the student currently holds an M.S. in computer science or a related field from another university.

### Faculty

Iftekhar Ahmed, Ph.D. Oregon State University, *Assistant Professor of Informatics* (data mining, software engineering, software testing and analysis, software maintenance, empirical studies)

Mohammad A. Al Faruque, Ph.D. University of Kaiserslautern, *Chair of Emulex Career Development and Associate Professor of Electrical Engineering and Computer Science; Computer Science; Mechanical and Aerospace Engineering* (cyber-physical systems, internet of things, embedded systems, CPS security)

Jonathan Alexander, Ph.D. Louisiana State University, *Associate Dean, Division of Undergraduate Education and Campus Writing Coordinator and Chancellor's Professor of English; Culture and Theory; Education; Gender and Sexuality Studies; Informatics* (writing studies, sexuality studies, queer theory, new media studies)

Shannon L. Alfaro, M.S. University of California, Irvine, *Continuing Lecturer of Computer Science* (design/analysis of combinational and sequential systems using SSI/MSI/LSI modules, hardware/firmware implementation of algorithms)

Animashree Anandkumar, Ph.D. Cornell University, *Assistant Professor of Computer Science* (statistical inference and learning of graphical models, scalable network algorithms)

Nader Bagherzadeh, Ph.D. University of Texas at Austin, *Professor of Electrical Engineering and Computer Science; Computer Science* (parallel processing, computer architecture, computer graphics, memory systems, 3-D ICs, heterogeneous computing, low-power processing)

Brigitte Baldi, Ph.D. Massachusetts Institute of Technology, *Lecturer of Statistics*

Pierre F. Baldi, Ph.D. California Institute of Technology, *Director of the Institute for Genomics and Bioinformatics and Distinguished Professor of Computer Science; Biological Chemistry; Biomedical Engineering; Developmental and Cell Biology; Mathematics* (artificial intelligence and machine learning, biomedical informatics, databases and data mining, environmental informatics, statistics and statistical theory)

Scott Bartell, Ph.D. University of California, Davis, *Associate Professor of Program in Public Health; Environmental Health Sciences; Statistics*

Veronica Berrocal, Ph.D. University of Washington, *Associate Professor of Statistics*

Lubomir Bic, Ph.D. University of California, Irvine, *Professor of Computer Science* (parallel and distributed computing, mobile agents, networks, and distributed systems)

Rebecca W. Black, Ph.D. University of Wisconsin-Madison, *Associate Professor of Informatics; Education* (digital media and learning, fan studies)

Geoffrey C. Bowker, Ph.D. University of Melbourne, *Chancellor's and Donald Bren Professor of Informatics; Visual Studies* (values in design, social studies of databases, science and technology studies)

Elaheh Bozorgzadeh, Ph.D. University of California, Los Angeles, *Professor of Computer Science* (computer architecture and design, design automation and synthesis for embedded systems, VLSI CAD, reconfigurable computing)

Stacy Branham, Ph.D. Virginia Tech, *Assistant Professor of Informatics* (human-computer interaction, design, assistive technology, safe and brave space, well-being, disability, feminism, marginality, inclusion, interdependence)

Anton Burtsev, Ph.D. University of Utah, *Assistant Adjunct Professor of Computer Science* (novel low-latency datacenters, microkernels, virtualization, datacenter environments)

Carter Butts, Ph.D. Carnegie Mellon University, *Professor of Sociology; Computer Science; Electrical Engineering and Computer Science; Statistics* (mathematical sociology, social networks, quantitative methodology, human judgment and decision making, economic sociology)

Michael Carey, Ph.D. University of California, Berkeley, *Donald Bren Professor of Information & Computer Sciences and Distinguished Professor of Computer Science* (databases and data mining, parallel and distributed systems)

Aparna Chandramowlishwaran, Ph.D. Georgia Institute of Technology, *Assistant Professor of Electrical Engineering and Computer Science; Computer Science; Mechanical and Aerospace Engineering* (high-performance computing, domain-specific compilers, algorithm-architecture co-design, data analysis, and scientific computing)

Peter Chang, M.D. Northwestern University, *Assistant Professor in Residence of Radiological Sciences; Computer Science; Pathology and Laboratory Medicine*

Qi Alfred Chen, Ph.D. University of Michigan, *Assistant Professor of Computer Science* (smart systems and IoT)

Yunan Chen, Ph.D. Drexel University, *Associate Professor of Informatics; Program in Public Health* (medical informatics, human computer interaction)

John L. Crawford, Media Artist and Software Designer, *Professor of Dance; Informatics* (screendance, interactive media, telematic performance, motion capture, digital arts)

Roderic N. Crooks, Ph.D. University of California, Los Angeles, *Assistant Professor of Informatics* (science and technology studies, education technology, critical data studies, data visualization, community archives)

Rina Dechter, Ph.D. University of California, Los Angeles, *UCI Chancellor's Professor of Computer Science* (automated reasoning, knowledge-representation, planning and learning)

Darren Denenberg, Ph.D. University of Maryland, *Lecturer of Informatics*

Michael B. Dillencourt, Ph.D. University of Maryland, College Park, *Professor of Computer Science* (algorithms and complexity, networks and distributed systems, data structures, computational geometry, graph algorithms)

John Christopher Dobrian, Ph.D. University of California, San Diego, *Professor of Music; Informatics*

Rainer B. Doemer, Ph.D. Dortmund University, *Professor of Electrical Engineering and Computer Science; Computer Science* (system-level design, embedded computer systems, design methodologies, specification and modeling languages, advanced parallel simulation, integration of hardware and software systems)

Mine Dogucu, Ph.D. Ohio State University, *Assistant Professor of Teaching of Statistics*

Shayan Doroudi, Ph.D. Carnegie Mellon University, *Assistant Professor of Education; Informatics* (learning analytics, learning sciences, educational technology)

James P. Dourish, Ph.D. University College London, *Chancellor's Professor of Informatics* (human-computer interaction, computer-supported cooperative work)

Nikil D. Dutt, Ph.D. University of Illinois at Urbana-Champaign, *UCI Chancellor's Professor of Computer Science; Cognitive Sciences; Electrical Engineering and Computer Science* (embedded systems, computer architecture, electronic design automation, software systems, brain-inspired architectures and computing)

Magda S. El Zarki, Ph.D. Columbia University, *Professor of Computer Science; Informatics* (telecommunications, networks, wireless communication, video transmission)

David A. Eppstein, Ph.D. Columbia University, *UCI Chancellor's Professor of Computer Science* (algorithms and complexity; computer graphics and visualization; geometric optimization)

Daniel Epstein, Ph.D. University of Washington, *Assistant Professor of Informatics; Computer Science* (human-computer interaction, personal informatics, ubiquitous computing, social computing, health informatics)

Julian Feldman, Ph.D. Carnegie Institute of Technology, *Professor Emeritus of Computer Science*

Charles C. Fowlkes, Ph.D. University of California, Berkeley, *Professor of Computer Science; Cognitive Sciences* (artificial intelligence, computer vision, machine learning, computational biology)

Roy Fox, Ph.D. The Hebrew University of Jerusalem, *Assistant Professor of Computer Science* (theory and applications of reinforcement learning, dynamical systems, information theory, robotics)

Michael S. Franz, Ph.D. Swiss Federal Institute of Technology in Zurich, *UCI Chancellor's Professor of Computer Science; Electrical Engineering and Computer Science* (systems software, particularly compilers and virtual machines, trustworthy computing, software engineering)

Daniel H. Frost, M.S. University of California, Irvine, *Professor of Teaching Emeritus of Computer Science* (artificial intelligence, software engineering, computer graphics, teaching of programming)

Richard Futrell, Ph.D. Massachusetts Institute of Technology, *Assistant Professor of Computer Science; Language Science* (language processing, Bayesian modeling, NLP)

Sergio Gago-Masague, Ph.D., *Assistant Professor of Teaching of Computer Science* (pervasive computing, user-centric software design, human computer interaction, serious games)

Joshua Garcia, Ph.D. University of Southern California, *Assistant Professor of Informatics* (software engineering, software security, software analysis and testing, software architecture, software maintenance)

Irene Gassko, Ph.D. Boston University, *Lecturer of Computer Science*

Jean-Luc Gaudiot, Ph.D. University of California, Los Angeles, *Professor of Electrical Engineering and Computer Science; Computer Science* (parallel processing, computer architecture, processor architecture)

Daniel L. Gillen, Ph.D. University of Washington, *Department Chair and Professor of Statistics; Program in Public Health*

Tony D. Givargis, Ph.D. University of California, Riverside, *Professor of Computer Science* (embedded systems, platform-based system-on-a-chip design, low-power electronics)

Michael T. Goodrich, Ph.D. Purdue University, *UCI Chancellor's Professor of Computer Science* (computer security, algorithm design, data structures, Internet algorithmics, geometric computing, graphic drawing)

Richard H. Granger, Ph.D. Yale University, *Professor Emeritus of Computer Science*

Michele Guindani, Ph.D. Università Luigi Bocconi, *Professor of Statistics*

Vijay Gurbaxani, Ph.D. University of Rochester, *Taco Bell Chair in Information Technology Management and Professor of Paul Merage School of Business; Informatics* (economics of information systems management, impact of information technology on organization and market structure)

Matthew Harding, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Economics; Statistics*

Ian G. Harris, Ph.D. University of California, San Diego, *Professor of Computer Science; Electrical Engineering and Computer Science* (hardware/software covalidation, manufacturing test)

Gillian Hayes, Ph.D. Georgia Institute of Technology, *Robert A. and Barbara L. Kleist Professor of Informatics; Education* (interactive and collaborative technology, human-computer interaction, computer-supported cooperative work, educational technology, ubiquitous computing)

Wayne B. Hayes, Ph.D. University of Toronto, *Associate Professor of Computer Science* (biomedical informatics and computational biology, computer vision, scientific and numerical computing)

Dan S. Hirschberg, Ph.D. Princeton University, *Professor of Computer Science* (analyses of algorithms, concrete complexity, data structures, models of computation)

Mustafa Ibrahim, M.S. California State University, *Lecturer of Computer Science* (software engineering)

Alexander T. Ihler, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Computer Science* (artificial intelligence and machine learning, probabilistic models, sensor networks, and distributed systems)

Sandra S. Irani, Ph.D. University of California, Berkeley, *Professor of Computer Science* (algorithms and complexity)

Jesse C. Jackson, M.A. University of Toronto, *Director of the Minor in Digital Arts and Associate Professor of Art; Informatics* (digital art, informatics, design, architecture)

Ramesh Chandra Jain, Ph.D. Indian Institute of Technology Kharagpur, *Donald Bren Professor of Information & Computer Sciences and Distinguished Professor of Computer Science* (computer vision, multimedia computing, image databases, machine vision, intelligent systems)

Stanislaw M. Jarecki, Ph.D. Massachusetts Institute of Technology, *Professor of Computer Science* (algorithms and complexity, applies and distributed cryptograph)

Ivan G. Jeliazkov, Ph.D. Washington University, *Associate Professor of Economics; Statistics*

Wesley O. Johnson, Ph.D. University of Minnesota, *Professor Emeritus of Statistics*

James Jones, Ph.D. Georgia Institute of Technology, *Associate Professor of Informatics* (software engineering, software testing and analysis, debugging and fault localization, static and dynamic analysis, software visualization)

Scott A. Jordan, Ph.D. University of California, Berkeley, *Professor of Computer Science; Electrical Engineering and Computer Science* (pricing and differentiated services in the Internet, resource allocation in wireless networks, telecommunications policy)

Sang-Woo Jun, Ph.D. Massachusetts Institute of Technology, *Assistant Professor of Computer Science* (computer systems architecture, hardware acceleration, non-volatile memory)

Kalev Kask, Ph.D. University of California, Irvine, *Lecturer of Computer Science* (artificial intelligence focusing on automated reasoning, graphical models)

David G. Kay, J.D. Loyola Marymount University, *Professor Emeritus of Teaching of Informatics; Computer Science* (computer law, computer science education)

Solmaz S. Kia, Ph.D. University of California, Irvine, *Assistant Professor of Mechanical and Aerospace Engineering; Computer Science* (systems and control, decentralized/distributed algorithm design for multi-agent systems, cooperative robotics)

Dennis F. Kibler, Ph.D. University of California, Irvine, *Professor Emeritus of Computer Science* (artificial intelligence and machine learning, gene regulation, biological genomes)

Raymond O. Klefstad, Ph.D. University of California, Irvine, *Associate Professor of Teaching of Computer Science* (embedded systems, networks and distributed systems, programming languages and systems)

Alfred Kobsa, Ph.D. University of Vienna, *Professor Emeritus of Informatics; Computer Science* (user modeling, human-computer interaction, artificial intelligence, cognitive science, interdisciplinary computer science)

Peter O. Krapp, Ph.D. University of California, Santa Barbara, *Professor of Film and Media Studies; English; European Languages and Studies; Informatics; Music; Visual Studies* (digital culture, media history, cultural memory)

Jeffrey L. Krichmar, Ph.D. George Mason University, *Professor of Cognitive Sciences; Computer Science* (computational neuroscience, robotics)

Fadi J. Kurdahi, Ph.D. University of Southern California, *Director, Center for Embedded Computer Systems and Associate Dean for Graduate and Professional Studies and Professor of Electrical Engineering and Computer Science; Computer Science* (embedded and cyber-physical systems, VLSI system design, design automation of digital systems)

Richard H. Lathrop, Ph.D. Massachusetts Institute of Technology, *Professor of Computer Science* (modeling structure and function, machine learning, intelligent systems and molecular biology, protein structure/function prediction)

Marco Levorato, Ph.D. University of Padua, *Assistant Professor of Computer Science; Electrical Engineering and Computer Science* (artificial intelligence and machine learning, networks and distributed systems, statistics and statistical theory, stochastic modeling, signal processing)

Chen Li, Ph.D. Stanford University, *Professor of Computer Science* (databases and text processing, multimedia databases, data integration)

Kwei-Jay Lin, Ph.D. University of Maryland, College Park, *Professor of Electrical Engineering and Computer Science; Computer Science* (real-time systems, distributed systems, service-oriented computing)

Cristina V. Lopes, Ph.D. Northeastern University, *Professor of Informatics* (programming languages, acoustic communications, operating systems, software engineering)

George S. Lueker, Ph.D. Princeton University, *Professor Emeritus of Computer Science* (algorithms and complexity)

Scott Mahlke, Ph.D. University of Illinois at Urbana-Champaign, *Professor of Computer Science* (custom-fit architectures for energy efficiency and reliability, compilers and run-time systems)

Aditi Majumder, Ph.D. University of North Carolina at Chapel Hill, *Professor of Computer Science; Electrical Engineering and Computer Science* (novel displays and cameras for computer graphics and visualization, human-computer interaction, applied computer vision)

Sam Malek, Ph.D. University of Southern California, *Associate Professor of Informatics* (software engineering, software architecture, software security, software analysis and testing)

Stephan Mandt, Ph.D. University of Cologne, *Assistant Professor of Computer Science* (artificial intelligence and machine learning, probabilistic modeling, Bayesian deep learning, variational inference)

Gloria J. Mark, Ph.D. Columbia University, *Professor of Informatics* (computer-supported cooperative work, human-computer interaction)

Athina Markopoulou, Ph.D. Stanford University, *Nicolaos G. and Sue Curtis Alexopoulos Presidential Chair in Electrical Engineering and Computer Science and Department Chair and Professor of Electrical Engineering and Computer Science; Computer Science* (networking: including network protocols, network measurement and analysis, mobile systems and mobile data analysis, network security and privacy)

Melissa Mazmanian, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Informatics* (computer-mediated communication, organization studies, information and communication technologies in practice, social response to emerging technologies, work/non-work negotiations in the information age)

Gopi Meenakshisundaram, Ph.D. University of North Carolina at Chapel Hill, *Professor of Computer Science* (geometry and topology for computer graphics, image-based rendering, object representation, surface reconstruction, collision detection, virtual reality, telepresence)

Sharad Mehrotra, Ph.D. University of Texas at Austin, *Professor of Computer Science* (databases and data mining, multimedia computing, networks and distributed systems)

Milena Mihail, Ph.D. Harvard University, *Associate Professor of Computer Science* (randomization, expander graphs, Markov chains, network design)

Volodymyr Minin, Ph.D. University of California, Los Angeles, *Professor of Statistics*

Eric D. Mjolsness, Ph.D. California Institute of Technology, *Professor of Computer Science; Mathematics* (artificial intelligence and machine learning, biomedical informatics and computational biology, applied mathematics, mathematical biology, modeling languages)

Bin Nan, Ph.D. University of Washington, *Professor of Statistics*

Bonnie A. Nardi, Ph.D. University of California, Irvine, *Professor Emeritus of Informatics* (computer-supported collaborative work, human-computer interaction, computer-mediated communication, user studies methods, activity theory, cultural responses to technology development)

Emily Navarro, Ph.D. University of California, Irvine, *Lecturer of Informatics*

Emre Neftci, Ph.D. University of Zurich, *Assistant Professor of Cognitive Sciences; Computer Science* (computational neuroscience, neuromorphic engineering, machine learning)

Alexandru Nicolau, Ph.D. Yale University, *Department Chair and Professor of Computer Science* (architecture, parallel computation, programming languages and compilers)

Trina Norden-Krichmar, Ph.D. University of California, San Diego, *Assistant Professor of Epidemiology; Biological Chemistry; Computer Science; Pharmaceutical Sciences*

Gary Olson, Ph.D. Stanford University, *Professor Emeritus of Informatics* (interactive and collaborative technology, human-computer interaction, computer-supported cooperative work)

Judith Olson, Ph.D. University of Michigan, *Professor Emeritus of Informatics; Paul Merage School of Business; Urban Planning and Public Policy* (interactive and collaborative technology, human-computer interaction, computer-supported cooperative work)

Marios Papaefthymiou, Ph.D. Massachusetts Institute of Technology, *Ted and Janice Smith Family Foundation Dean and Professor of Computer Science* (computer architecture and design, networks and distributed systems)

Richard Pattis, M.S. Stanford University, *Professor of Teaching of Computer Science; Informatics* (MicroWorlds for teaching programming, debugging, computational tools for non-computer scientists)

Simon G. Penny, M.F.A. Sydney College of the Arts, *Professor of Art; Informatics* (informatics, robotic sculpture, interactive environments, electronic media)

Kylie Peppler, Ph.D. University of California, Los Angeles, *Associate Professor of Informatics; Education* (learning sciences, design, maker culture, arts, game design, computer programming, wearables)

Kavita S. Philip, Ph.D. Cornell University, *Professor of History; Informatics* (history of modern South Asia, science and technology, political ecology, critical theoretical studies of race, gender, colonialism, new media, and globalization)

Annie Qu, Ph.D. The Pennsylvania State University, *Professor of Statistics*

David F. Redmiles, Ph.D. University of Colorado Boulder, *Professor of Informatics* (computer-supported cooperative work, human computer interaction, software engineering, globally distributed development teams, user interfaces, software tools)

Amelia C. Regan, Ph.D. University of Texas at Austin, *Professor of Computer Science* (algorithm development and complexity, networks and distributed systems, network optimization)

Stephanie Reich, Ph.D. Vanderbilt University, *Associate Professor of Education; Informatics; Psychological Science* (child development, parenting, peer interactions, media, program evaluation)

Debra J. Richardson, Ph.D. University of Massachusetts, *Professor Emeritus of Informatics* (software engineering, program testing, life-cycle validation, software environments)

Katie Salen Tekinba#, M.F.A. Rhode Island School of Design, *Professor of Informatics* (game design, connected learning design, human-computer interaction)

Ardalan Amiri Sani, Ph.D. Rice University, *Assistant Professor of Computer Science* (involves building efficient, high performance, and reliable systems)

Isaac D. Scherson, Ph.D. Weizmann Institute of Science, *Professor of Computer Science; Electrical Engineering and Computer Science* (parallel computing architectures, massively parallel systems, parallel algorithms, interconnection networks, performance evaluation)

Patricia Seed, Ph.D. University of Wisconsin-Madison, *Professor of History; Informatics* (mapping: history and design, game design, navigation)

Babak Shahbaba, Ph.D. University of Toronto, *Professor of Statistics; Computer Science*

Weining Shen, Ph.D. North Carolina State University, *Assistant Professor of Statistics*

Phillip C-Y Sheu, Ph.D. University of California, Berkeley, *Professor of Electrical Engineering and Computer Science; Biomedical Engineering; Computer Science* (semantic computing, robotic computing, artificial intelligence, biomedical computing, multimedia computing)

Michael Shindler, Ph.D. University of California, Los Angeles, *Assistant Professor of Teaching of Computer Science* (theory and machine learning, computer science education)

Alice Silverberg, Ph.D. Princeton University, *Distinguished Professor Emerita of Mathematics; Computer Science* (algebra and number theory)

Sameer Singh, Ph.D. University of Massachusetts Amherst, *Assistant Professor of Computer Science; Electrical Engineering and Computer Science; Language Science* (artificial intelligence and machine learning, databases and data mining, scientific and numerical computing)

Padhraic J. Smyth, Ph.D. California Institute of Technology, *Professor of Computer Science; Education; Statistics* (artificial intelligence and machine learning, pattern recognition, applied statistics, data mining, information theory)

Kurt Squire, Ph.D. Indiana University, *Professor of Informatics; Education* (video game design, games for learning, mobile technologies, civic engagement, place-based learning)

Thomas A. Standish, Ph.D. Carnegie Institute of Technology, *Professor Emeritus of Information and Computer Sciences* (software testing and analysis, software semantics and epistemology, programming and cognition, software comprehension)

Constance Steinkuehler, Ph.D. University of Wisconsin-Madison, *Professor of Informatics; Education* (video games for impact, game-mediated cognition and learning, online social interaction, video games and policy)

Hal S. Stern, Ph.D. Stanford University, *UCI Chancellor's Professor of Statistics; Cognitive Sciences*

Mark Steyvers, Ph.D. Indiana University, *Professor of Cognitive Sciences; Computer Science; Psychological Science* (higher-order cognition, cognitive neuroscience, computational modeling, collective intelligence)

Erik B. Sudderth, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Computer Science; Statistics* (artificial intelligence and machine learning, computer vision, statistics and statistical theory)

Theresa Tanenbaum, Ph.D. Simon Fraser University, *Assistant Professor of Informatics* (digital games and narrative, tangible and wearable interaction, maker and DIY culture, nonverbal communication and virtual worlds)

Richard N. Taylor, Ph.D. University of Colorado Boulder, *Professor Emeritus of Informatics* (software engineering, user interfaces, environments, team support)

Alexander W. Thornton, B.S. University of California, Irvine, *Continuing Lecturer of Computer Science*

William M. Tomlinson, Ph.D. Massachusetts Institute of Technology, *Professor of Informatics; Education* (environmental informatics, educational technology, computer graphics/visualization/digital arts)

Gene Y. Tsudik, Ph.D. University of Southern California, *UCI Chancellor's Professor of Computer Science* (computer and network security and privacy; applied cryptography)

Kojiro Umezaki, M.A. Dartmouth College, *Professor of Music; Computer Science*

Jessica Utts, Ph.D. Pennsylvania State University, *Professor Emeritus of Statistics*

André W. Van der Hoek, Ph.D. University of Colorado Boulder, *Professor of Informatics* (software engineering)

Joachim S. Vandekerckhove, Ph.D. University of Leuven, *Associate Professor of Cognitive Sciences; Statistics* (response time modeling, model fitting, computational statistics, psychometrics, bayesian statistics)

Vijay Vazirani, Ph.D. University of California, Berkeley, *Distinguished Professor of Computer Science* (algorithms and complexity, scientific and numerical computing)

Alexander Veidenbaum, Ph.D. University of Illinois at Urbana-Champaign, *Professor of Computer Science* (computer architecture, embedded systems, compilers, programming languages and systems, database and data mining)

Nalini Venkatasubramanian, Ph.D. University of Illinois at Urbana-Champaign, *Professor of Computer Science* (multimedia computing, networks and distributed systems, global information infrastructure, multiple resource management services)

Richert Wang, Ph.D. University of California, Irvine, *Lecturer of Computer Science*

Mark J. Warschauer, Ph.D. University of Hawaii at Manoa, *Professor of Education; Informatics* (language, literacy, technology, STEM)

Jennifer Wong-Ma, Ph.D. University of California, Los Angeles, *Associate Professor of Teaching of Computer Science* (computer architecture and design, embedded systems, hardware intellectual property protection, statistical optimization)

Xaiohui Xie, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Computer Science; Developmental and Cell Biology* (computational biology, bioinformatics, genomics, neural computation, machine learning)

Xiangmin Xu, Ph.D. Vanderbilt University, *Professor of Anatomy and Neurobiology; Biomedical Engineering; Computer Science*

Yaming Yu, Ph.D. Harvard University, *Associate Professor of Statistics*

Zhaoxia Yu, Ph.D. William Marsh Rice University, *Associate Professor of Statistics*

Charles S. Zender, Ph.D. University of Colorado Boulder, *Professor of Earth System Science; Computer Science*

Hong-Kai Zhao, Ph.D. University of California, Los Angeles, *Chancellor's Professor of Mathematics; Computer Science* (applied and computational mathematics, inverse problems and imaging)

Shuang Zhao, Ph.D. Cornell University, *Assistant Professor of Computer Science* (computer graphics with a focus on material appearance modeling and physically-based rendering)

Kai Zheng, Ph.D. Carnegie Mellon University, *Associate Professor of Informatics* (health informatics, human factors and human-computer interaction, technology adoption and acceptance, outcomes and evaluation)

Hadar Ziv, Ph.D. University of California, Irvine, *Associate Professor of Teaching of Informatics* (software testing, requirements engineering, Bayesian modeling)

## Computer Science Courses

### **COMPSCI 103. Advanced Programming and Problem Solving with C++. 4 Units.**

Advanced programming language concepts for more complex, higher performance software design. Builds depth of programming skills in C++ as a foundation for upper-division courses and projects. Focuses on strengthening programming, debugging, and problem solving skills.

Prerequisite: I&C SCI 45C

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

### **COMPSCI 111. Digital Image Processing. 4 Units.**

Introduction to the fundamental concepts of digital signal and image processing as applicable in areas such as multimedia, graphics, AI, data mining, databases, vision, or video games. Topics include image representation, space- and frequency-domain transformations, filters, segmentation, and compression.

Prerequisite: (I&C SCI 46 or CSE 46) and I&C SCI 6D and (MATH 3A or I&C SCI 6N). I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better. I&C SCI 6D with a grade of C or better. MATH 3A with a grade of C or better. I&C SCI 6N with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

### **COMPSCI 112. Computer Graphics. 4 Units.**

Introduction to the fundamental principles of 3D computer graphics including polygonal modeling, geometric transformations, visibility algorithms, illumination models, texturing, and rasterization. Use of an independently-learned 3D graphics API to implement these techniques.

Prerequisite: (I&C SCI 45C or CSE 45C) and (MATH 3A or I&C SCI 6N). I&C SCI 45C with a grade of C or better. CSE 45C with a grade of C or better. MATH 3A with a grade of C or better. I&C SCI 6N with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

### **COMPSCI 113. Computer Game Development. 4 Units.**

Introduction to the principles of interactive 2D and 3D computer game development. Concepts in computer graphics, algorithms, software engineering, art and graphics, music and sound, story analysis, and artificial intelligence are presented and are the basis for student work.

Prerequisite: COMPSCI 112 or COMPSCI 171 or IN4MATX 121 or ART 106B or I&C SCI 163 or I&C SCI 166

Same as IN4MATX 125.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

### **COMPSCI 114. Projects in Advanced 3D Computer Graphics. 4 Units.**

Projects in advanced 3D graphics such as illumination, geometric modeling, visualization, and animation. Topics include physically based and global illumination, solid modeling, curved surfaces, multiresolution modeling, image-based rendering, basic concepts of animation, and scientific visualization.

Prerequisite: COMPSCI 112 and (I&C SCI 45C or CSE 45C). I&C SCI 45C with a grade of C or better. CSE 45C with a grade of C or better.

Recommended: COMPSCI 161 or CSE 161 or COMPSCI 164 or COMPSCI 165.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

### **COMPSCI 115. Computer Simulation. 4 Units.**

Discrete event-driven simulation; continuous system simulation; basic probability as pertaining to input distributions and output analysis; stochastic and deterministic simulation; static and dynamic system simulation.

Prerequisite: I&C SCI 6B and (I&C SCI 6N or MATH 3A) and (STATS 67 or STATS 7) and STATS 120A and I&C SCI 51 and IN4MATX 43. I&C SCI 6B with a grade of C or better. I&C SCI 6N with a grade of C or better. MATH 3A with a grade of C or better. STATS 67 with a grade of C or better. STATS 7 with a grade of C or better. STATS 120A with a grade of C or better. I&C SCI 51 with a grade of C or better. IN4MATX 43 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 116. Computational Photography and Vision. 4 Units.**

Introduces the problems of computer vision through the application of computational photography. Specific topics include photo-editing (image warping, compositing, hole filling), panoramic image stitching, and face detection for digital photographs.

Prerequisite: I&C SCI 6D and (MATH 6G or MATH 3A or I&C SCI 6N) and MATH 2B and (I&C SCI 46 or CSE 46). I&C SCI 6D with a grade of C or better. MATH 6G with a grade of C or better. MATH 3A with a grade of C or better. I&C SCI 6N with a grade of C or better. MATH 2B with a grade of C or better. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 117. Project in Computer Vision. 4 Units.**

Students undertake construction of a computer vision system. Topics include automatically building 3D models from photographs, searching photo collections, robot navigation, and human motion tracking.

Prerequisite: I&C SCI 6D and (MATH 3A or I&C SCI 6N) and MATH 2B and (I&C SCI 46 or CSE 46) and (COMPSCI 112 or COMPSCI 116 or COMPSCI 171 or COMPSCI 178). I&C SCI 6D with a grade of C or better. MATH 3A with a grade of C or better. I&C SCI 6N with a grade of C or better. MATH 2B with a grade of C or better. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 121. Information Retrieval. 4 Units.**

An introduction to information retrieval including indexing, retrieval, classifying, and clustering text and multimedia documents.

Prerequisite: (I&C SCI 45C or I&C SCI 45J) and (STATS 7 or STATS 67). I&C SCI 45C with a grade of C or better. I&C SCI 45J with a grade of C or better

Same as IN4MATX 141.

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**COMPSCI 122A. Introduction to Data Management. 4 Units.**

Introduction to the design of databases and the use of database management systems (DBMS) for applications. Topics include entity-relationship modeling for design, relational data model, relational algebra, relational design theory, and Structured Query Language (SQL) programming.

Prerequisite: I&C SCI 33 or CSE 43 or EECS 114. I&C SCI 33 with a grade of C or better. CSE 43 with a grade of C or better

Same as EECS 116.

Restriction: Computer Science Engineering Majors have first consideration for enrollment. School of Info & Computer Sci students have first consideration for enrollment.

**COMPSCI 122B. Project in Databases and Web Applications. 4 Units.**

Introduces students to advanced database technologies and Web applications. Topics include database connectivity (ODBC/JDBC), extending databases using stored procedures, database administration, Web servers, Web programming languages (Java servlets, XML, Ajax, and mobile platforms).

Prerequisite: (COMPSCI 122A or EECS 116) and I&C SCI 45J

Overlaps with COMPSCI 137, IN4MATX 124.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 122C. Principles of Data Management. 4 Units.**

Covers fundamental principles underlying data management systems. Content includes key techniques including storage management, buffer management, record-oriented file system, access methods, query optimization, and query processing.

Prerequisite: COMPSCI 122A and (I&C SCI 53 or COMPSCI 143A)

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

Concurrent with COMPSCI 222.

**COMPSCI 122D. Beyond SQL Data Management. 4 Units.**

Survey of modern data management and analysis technologies beyond relational (SQL) database management. Topics include semistructured data, NoSQL databases, big data analysis, and text search/query engines. Additional topics vary and may include data frames, streaming data, and/or time-series data.

Prerequisite: I&C SCI 46 and I&C SCI 51 and (COMPSCI 122A or EECS 116)

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**COMPSCI 125. Next Generation Search Systems. 4 Units.**

Discusses concepts and techniques related to all aspects of search systems. After considering basic search technology and the state-of-art systems, rapidly developing techniques for multimedia search, local search, event-search, and video-on-demand are explored.

Prerequisite: I&C SCI 31 or CSE 41 or I&C SCI 32A

Restriction: Upper-division students only. School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

Concurrent with COMPSCI 225.

**COMPSCI 131. Parallel and Distributed Computing. 4 Units.**

Parallel and distributed computer systems. Parallel programming models. Common parallel and distributed programming issues. Specific topics include parallel programming, performance models, coordination and synchronization, consistency and replication, transactions, fault tolerance.

Prerequisite: (I&C SCI 53 and I&C SCI 53L) or COMPSCI 143A

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 132. Computer Networks. 4 Units.**

Computer network architectures, protocols, and applications. Internet congestion control, addressing, and routing. Local area networks. Multimedia networking.

Prerequisite: EECS 55 or STATS 67

Same as EECS 148.

Restriction: Computer Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 133. Advanced Computer Networks. 4 Units.**

Fundamental principles in computer networks are applied to obtain practical experience and skills necessary for designing and implementing computer networks, protocols, and network applications. Various network design techniques, simulation techniques, and UNIX network programming are covered.

Prerequisite: COMPSCI 132 or EECS 148

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 134. Computer and Network Security. 4 Units.**

Overview of modern computer and networks security, attacks, and countermeasures. Authentication, identification, data secrecy, data integrity, authorization, access control, computer viruses, network security. Also covers secure e-commerce and applications of public key methods, digital certificates, and credentials.

Prerequisite: I&C SCI 6D and (I&C SCI 33 or CSE 43) and (COMPSCI 122A or EECS 116 or COMPSCI 132 or COMPSCI 143A)

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 137. Internet Applications Engineering. 4 Units.**

Concepts in Internet applications engineering with emphasis on the Web. Peer-to-Peer and Interoperability. Topics include HTTP and REST, Remote Procedure/Method Calls, Web Services, data representations, content distribution networks, identity management, relevant W3C/IETF standards, and relevant new large-scale computing styles.

Prerequisite: (COMPSCI 132 or EECS 148) and I&C SCI 45J

Same as IN4MATX 124.

Overlaps with COMPSCI 122B.

Restriction: Upper-division students only. School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 141. Concepts in Programming Languages I. 4 Units.**

In-depth study of several contemporary programming languages stressing variety in data structures, operations, notation, and control. Examination of different programming paradigms, such as logic programming, functional programming and object-oriented programming; implementation strategies, programming environments, and programming style.

Prerequisite: (I&C SCI 51 or CSE 31 or EECS 31) and (I&C SCI 46 or CSE 46). I&C SCI 51 with a grade of C or better. CSE 31 with a grade of C or better. EECS 31 with a grade of C or better. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better

Same as IN4MATX 101.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 142A. Compilers and Interpreters. 4 Units.**

Introduction to the theory of programming language processors covering lexical analysis, syntax analysis, semantic analysis, intermediate representations, code generation, optimization, interpretation, and run-time support.

Prerequisite: CSE 141 or COMPSCI 141 or IN4MATX 101

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 142B. Language Processor Construction. 4 Units.**

Project course which provides working laboratory experience in construction and behavior of compilers and interpreters. Students build actual language processors and perform experiments which reveal their behaviors.

Prerequisite: COMPSCI 142A or CSE 142

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 143A. Principles of Operating Systems. 4 Units.**

Principles and concepts of process and resource management, especially as seen in operating systems. Processes, memory management, protection, scheduling, file systems, and I/O systems are covered. Concepts illustrated in the context of several well-known systems.

Prerequisite: (I&C SCI 46 or CSE 46) and (I&C SCI 51 or EECS 31 or CSE 31)

Overlaps with EECS 111.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 143B. Project in Operating System Organization. 4 Units.**

Detailed specification and design of critical components of an actual operating system including a memory manager, a process server, and a file/IO subsystem. Hardware/software tradeoffs. Emphasis on logical organization of system and communication.

Prerequisite: COMPSCI 143A

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 145. Embedded Software. 4 Units.**

Principles of embedded computing systems: embedded systems architecture, hardware/software components, system software and interfacing, real-time operating systems, hardware/software co-development, and communication issues. Examples of embedded computing in real-world application domains. Simple programming using an embedded systems development environment.

Corequisite: COMPSCI 145L

Prerequisite: (CSE 46 or I&C SCI 46) and (I&C SCI 51 or EECS 31 or CSE 31)

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 145L. Embedded Software Laboratory. 2 Units.**

Laboratory section to accompany COMPSCI 145.

Corequisite: COMPSCI 145

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 146. Programming in Multitasking Operating Systems. 4 Units.**

User- and systems-level programming of modern Internet-connected, multi-user, multitasking operating systems. Shells, scripting, filters, pipelines, programmability, extensibility, concurrency, inter-process communication. Concrete examples of a modern operating system (such as, but not necessarily, Unix programmed in C) are used.

Prerequisite: (I&C SCI 46 or CSE 46) and I&C SCI 51. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better. I&C SCI 51 with a grade of C or better. Recommended: COMPSCI 143A.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 147. Internet of Things (IoT) Software and Systems. 4 Units.**

Introduction to the Internet of Things (IoT) from a systems and software perspective. IoT ecosystem including sensors, embedded CPUs, networking protocols, software, cloud services, and security and privacy requirements. IoT use cases, system design, and programming project.

Prerequisite: I&C SCI 33 or CSE 43

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 151. Digital Logic Design. 4 Units.**

Boolean algebra. Design/analysis of combinational and sequential systems using SSI/MSI/LSI modules. Number systems. Error detecting and correction codes. Arithmetic algorithms. Hardware/ firmware implementation of algorithms.

Prerequisite: (I&C SCI 33 or CSE 43) and I&C SCI 51 and I&C SCI 6B and I&C SCI 6D. I&C SCI 33 with a grade of C or better. CSE 43 with a grade of C or better. I&C SCI 51 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 152. Computer Systems Architecture. 4 Units.**

Design of computer elements; ALU, control unit, and arithmetic circuits. Memory hierarchy and organization. Caches. Function unit sharing and pipelining. I/O and interrupt processing. RTL and behavioral modeling using hardware description languages. Microprocessor organization and implementation techniques.

Prerequisite: COMPSCI 151

Overlaps with I&C SCI 160, EECS 112.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 153. Logic Design Laboratory. 4 Units.**

Introduction to standard integrated circuits. Construction and debugging techniques. Design of digital systems using LSI and MSI components. Practical use of circuits in a laboratory environment, including implementation of small digital systems such as arithmetic modules, displays, and timers.

Prerequisite: COMPSCI 151

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 154. Computer Design Laboratory. 4 Units.**

Underlying primitives of computer instruction sets. Principles of microprogramming. Microprogramming. Microprograms written for one or more systems. Typical microprogramming applications discussed and implemented or simulated.

Prerequisite or corequisite: COMPSCI 151

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 161. Design and Analysis of Algorithms. 4 Units.**

Techniques for efficient algorithm design, including divide-and-conquer and dynamic programming, and time/space analysis. Fast algorithms for problems applicable to networks, computer games, and scientific computing, such as sorting, shortest paths, minimum spanning trees, network flow, and pattern matching.

Prerequisite: (I&C SCI 46 or CSE 46) and I&C SCI 6B and I&C SCI 6D and MATH 2B. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Software Engineering Majors have first consideration for enrollment. Data Science Majors have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment. Computer Science Majors have first consideration for enrollment. Business Information Management, Computer Game Science, and Informatics majors have second right of consideration.

**COMPSCI 162. Formal Languages and Automata. 4 Units.**

Formal aspects of describing and recognizing languages by grammars and automata. Parsing regular and context-free languages. Ambiguity, nondeterminism. Elements of computability; Turing machines, random access machines, undecidable problems, NP-completeness.

Prerequisite: (I&C SCI 46 or CSE 46) and MATH 2B and I&C SCI 6B and I&C SCI 6D. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better

Same as LSCI 102.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment. Language Science Majors have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 163. Graph Algorithms. 4 Units.**

Algorithms for solving fundamental problems in graph theory. Graph representations, graph traversal, network flow, connectivity, graph layout, matching problems.

Prerequisite: COMPSCI 161 or CSE 161

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

Concurrent with COMPSCI 265.

**COMPSCI 164. Computational Geometry and Geometric Modeling. 4 Units.**

Algorithms and data structures for computational geometry and geometric modeling, with applications to game and graphics programming. Topics: convex hulls, Voronoi diagrams, algorithms for triangulation, motion planning, and data structures for geometric searching and modeling of 2D and 3D objects.

Prerequisite: I&C SCI 46 or CSE 46. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 165. Project In Algorithms And Data Structures. 4 Units.**

Design, implementation, execution, and analysis of algorithms for problems such as sorting, searching, data compression, and data encryption. Time-space-structure trade-offs.

Prerequisite: COMPSCI 161 or CSE 161. Recommended: I&C SCI 45C OR CSE 45C.

**COMPSCI 166. Quantum Computation and Information. 4 Units.**

Basic models for quantum computation and their foundations in quantum mechanics. Quantum complexity classes and quantum algorithms, including algorithms for factoring and quantum simulation. Introduction to quantum information theory and quantum entanglement.

Prerequisite: (I&C SCI 6N or MATH 3A) and COMPSCI 161

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 167. Introduction to Applied Cryptography. 4 Units.**

An introduction to the essential aspects of applied cryptography, as it is used in practice. Topics include classical cryptography, block ciphers, stream ciphers, public-key cryptography, digital signatures, one-way hash functions, basic cryptographic protocols, and digital certificates and credentials.

Prerequisite: COMPSCI 161 or CSE 161

Restriction: Upper-division students only. School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 169. Introduction to Optimization. 4 Units.**

A broad introduction to optimization. Unconstrained and constrained optimization. Equality and inequality constraints. Linear and integer programming. Stochastic dynamic programming.

Prerequisite: (I&C SCI 6N or MATH 3A) and (STATS 67 or (STATS 7 and STATS 120A))

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

Concurrent with COMPSCI 268.

**COMPSCI 171. Introduction to Artificial Intelligence. 4 Units.**

Different means of representing knowledge and uses of representations in heuristic problem solving. Representations considered include predicate logic, semantic nets, procedural representations, natural language grammars, and search trees.

Prerequisite or corequisite: ((STATS 7 and STATS 120A) or STATS 67) ( and (I&C SCI 46 or CSE 46) and MATH 2B)

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 172B. Neural Networks and Deep Learning . 4 Units.**

Neural network and deep learning from multiple perspectives. Theory of parallel distributed processing systems, algorithmic approaches for learning from data in various manners, applications to difficult problems in AI from computer vision, to natural language understanding, to bioinformatics and chemoinformatics.

Prerequisite: (STATS 120A and STATS 120B) or MATH 121A or COMPSCI 178 or COMPSCI 273A

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

Concurrent with COMPSCI 274C.

**COMPSCI 172C. Artificial Intelligence Frontiers: Technical, Ethical, and Societal. 4 Units.**

Explores the frontiers of artificial intelligence and related technologies with a focus on the underlying ethical, legal, and societal challenges and opportunities they create. Encourages critical thinking about these issues.

Prerequisite: COMPSCI 171 and COMPSCI 172B. Recommended: COMPSCI 178

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

Concurrent with COMPSCI 274D.

**COMPSCI 175. Project in Artificial Intelligence. 4 Units.**

Construction of a working artificial intelligence system. Evaluation of capabilities of the system including impact of knowledge representation.

Prerequisite: COMPSCI 171 and COMPSCI 178

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 177. Applications of Probability in Computer Science. 4 Units.**

Application of probability to real-world problems in computer science. Typical topics include analysis of algorithms and graphs, probabilistic language models, network traffic modeling, data compression, and reliability modeling.

Prerequisite: MATH 2B and STATS 67 and I&C SCI 6B and I&C SCI 6D and (MATH 3A or I&C SCI 6N)

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 178. Machine Learning and Data-Mining. 4 Units.**

Introduction to principles of machine learning and data-mining applied to real-world datasets. Typical applications include spam filtering, object recognition, and credit scoring.

Prerequisite: I&C SCI 6B and I&C SCI 6D and (I&C SCI 6N or MATH 3A) and MATH 2B and (STATS 67 or (STATS 7 and STATS 120A))

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 179. Algorithms for Probabilistic and Deterministic Graphical Models. 4 Units.**

Graphical model techniques dealing with probabilistic and deterministic knowledge representations. Focuses on graphical models such as constraint networks, Bayesian networks, and Markov networks that have become a central paradigm for knowledge representation and reasoning in AI and general computer science.

Prerequisite: COMPSCI 171

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 183. Introduction to Computational Biology. 4 Units.**

The use of theories and methods based on computer science, mathematics, and physics in molecular biology and biochemistry. Basics in biomolecular modeling. Analysis of sequence and structural data of biomolecules. Analysis of biomolecular functions.

Prerequisite: MATH 2D or MATH 3A or STATS 7 or STATS 8

Same as BME 132, BIO SCI M123.

Concurrent with MOL BIO 223 and BME 232.

**COMPSCI 184A. Artificial Intelligence in Biology and Medicine. 4 Units.**

Introduction to computational methods in molecular biology, aimed at those interested in learning about this interdisciplinary area. Covers computational approaches to understanding and predicting the structure, function, interactions, and evolution of DNA, RNA, proteins, and related molecules and processes.

Prerequisite: I&C SCI 6N or MATH 3A

Restriction: Upper-division students only. School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

Concurrent with COMPSCI 284A.

**COMPSCI 184C. Computational Systems Biology. 4 Units.**

Computational inference and modeling of gene regulation networks, signal transduction pathways, and the effects of regulatory networks in cellular processes, development, and disease. Introduction of required mathematical, computational, and data handling tools.

Prerequisite: COMPSCI 184A

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

Concurrent with COMPSCI 284C.

**COMPSCI 190. Special Topics in Information and Computer Science. 4 Units.**

Studies in selected areas of Information and Computer Science. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**COMPSCI H198. Honors Research. 4 Units.**

Directed independent research in computer science for honors students.

Repeatability: May be repeated for credit unlimited times.

Restriction: Campuswide Honors Collegium students only. Bren School of ICS Honors students only. Upper-division students only.

**COMPSCI 199. Individual Study. 2-5 Units.**

Individual research or investigation with Computer Science faculty.

Repeatability: May be repeated for credit unlimited times.

**COMPSCI 200S. Seminar in Computer Science Research. 1 Unit.**

Graduate colloquium series. Includes weekly talks by notable computer scientists.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**COMPSCI 201. Foundations of Cryptographic Protocols. 4 Units.**

Explores fundamental cryptographic tools, including encryption, signatures, and identification schemes. Students are introduced to the provable security paradigm of modern cryptography, focusing on understanding of security properties provided by cryptographic tools, and on proving security (or insecurity) of cryptographic constructions.

Prerequisite: COMPSCI 260 or COMPSCI 263

**COMPSCI 201P. Introduction to Computer Security. 4 Units.**

Introduction to computer security, including systems, technology, and management. Topics include authorization, authentication, data integrity, malware, operating systems security, network security, web security, and basic cryptography.

Prerequisite: Knowledge of Python or C++ programming is required.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 202. Applied Cryptography. 4 Units.**

Design and analysis of algorithms for applied cryptography. Topics include symmetric and asymmetric key encryption, digital signatures, one-way hash functions, digital certificates and credentials, and techniques for authorization, non-repudiation, authentication, identification, data integrity, proofs of knowledge, and access control.

Prerequisite: COMPSCI 260 and COMPSCI 263

**COMPSCI 202P. Applied Cryptography . 4 Units.**

Design and analysis of algorithms for applied cryptography. Topics include symmetric and asymmetric key encryption, digital signatures, one-way hash functions, digital certificates and credentials, and techniques for authorization, non-repudiation, authentication, identification, data integrity, proofs of knowledge, and access control.

Restriction: Graduate students only.

**COMPSCI 203. Network and Distributed Systems Security. 4 Units.**

Modern computer and networks security: attacks and countermeasures, authentication, identification, data secrecy, data integrity, authorization, access control, computer viruses, network security. Group communication and multicast security techniques. Covers secure e-commerce and applications of public key methods, digital certificates, and credentials.

Prerequisite: EECS 148 or COMPSCI 132

Same as NET SYS 240.

**COMPSCI 203P. Network Security. 4 Units.**

Introduction to network security, including network threats and attacks, as well as defenses against such attacks. Topics include network infrastructure security, mobile and Wi-Fi security, spam, phishing, firewalls, anonymity, secure email, secure and private cloud computing, and web security.

Prerequisite: COMPSCI 201P or COMPSCI 202P

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 204. Usable Security and Privacy. 4 Units.**

Introduces usability problems in security and privacy methods, tools, and software. Overviews prominent examples of both failures and successes in usable security and privacy. Surveys state-of-the-art techniques and evaluation methodologies.

Same as IN4MATX 237.

Overlaps with IN4MATX 231, COMPSCI 203.

Restriction: Informatics Majors have first consideration for enrollment. Computer Science Majors have first consideration for enrollment. Undergraduate degree in CompSci or Informatics is strongly recommended.

**COMPSCI 205. Computer and Systems Security . 4 Units.**

Lecture and discuss latest security research in software, OS, protocols, mobile devices, machine learning, sensors, and emerging IoT/CPS systems such as smart home and smart transportation. Students perform research projects and gain hands-on experience evaluating and designing secure systems.

Prerequisite: COMPSCI 134 and COMPSCI 142A and COMPSCI 143A

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Graduate students only.

**COMPSCI 206. Principles of Scientific Computing. 4 Units.**

Overview of widely used principles and methods of numerical and scientific computing, including basic concepts and computational methods in linear algebra, optimization, and probability.

Prerequisite: Basic courses in multivariate calculus, linear algebra, and probability.

Overlaps with STATS 230.

**COMPSCI 206P. Principles of Scientific Computing. 4 Units.**

Overview of widely used principles and methods of numerical and scientific computing, including basic concepts and computational methods in floating-point, linear algebra, optimization, simulation, modeling, and probability/statistics as it relates to model evaluation.

Prerequisite: Basic knowledge of multivariate calculus, linear algebra, and familiarity with MATLAB.

Restriction: Graduate students only.

**COMPSCI 210P. Computer Graphics and Visualization . 4 Units.**

Interactive 3D graphics rendering pipeline, illumination and shading, ray tracing, texture-, bump-, mip-mapping, hidden surface removal, anti-aliasing, multiresolution representations, volume rendering techniques, iso-surface extraction.

Prerequisite: Familiarity with linear algebra is required.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 211A. Visual Computing. 4 Units.**

Fundamentals of image processing (convolution, linear filters, spectral analysis), vision geometry (projective geometry, camera models and calibration, stereo reconstruction), radiometry (color, shading, illumination, BRDF), and visual content synthesis (graphics pipeline, texture- bump-, mip-mapping, hidden surface removal, anti-aliasing).

**COMPSCI 211B. Computer Graphics and Visualization. 4 Units.**

Interactive 3D graphics rendering pipeline, illumination and shading, ray tracing, texture-, bump-, mip-mapping, hidden surface removal, anti-aliasing, multiresolution representations, volume rendering techniques, iso-surface extraction.

Prerequisite: COMPSCI 211A

**COMPSCI 211P. Visual Computing . 4 Units.**

Develops a comprehensive understanding of fundamentals of image processing (convolution, linear filters, spectral analysis), vision geometry (projective geometry, camera models and calibration, stereo reconstruction), radiometry (color, shading, illumination, BRDF), visual content synthesis (graphics pipeline, texture- bump-, mip-mapping, hidden surface, anti-aliasing).

Prerequisite: Undergraduate-level familiarity with Linear algebra (matrices and operations), eigenvalue, eigenvectors, linear regression; basic of algorithms; programming in C/C++

Restriction: Graduate students only.

**COMPSCI 212. Multimedia Systems and Applications. 4 Units.**

Organization and structure of modern multimedia systems; audio and video encoding/compression; quality of service concepts; scheduling algorithms for multimedia; resource management in distributed and multimedia systems; multimedia protocols over high-speed networks; synchronization schemes; multimedia applications; and teleservices.

Prerequisite: COMPSCI 143A and COMPSCI 161. B.S. degree in Computer Science is also accepted. Recommended: COMPSCI 131 and COMPSCI 132 and COMPSCI 133.

**COMPSCI 213. Introduction to Visual Perception. 4 Units.**

Introduction to the process of human visual perception. Offers the physiological and psychophysical approach to understand vision, introducing concepts of perception of color, depth, movement. Examples of quantification and application of these models in computer vision, computer graphics, multimedia, HCI.

Prerequisite: MATH 121A

**COMPSCI 216. Image Understanding. 4 Units.**

The goal of image understanding is to extract useful semantic information from image data. Course covers low-level image and video processing techniques, feature descriptors, segmentation, objection recognition, and tracking.

Prerequisite: I&C SCI 6D and (I&C SCI 6N or MATH 6G or MATH 3A) and MATH 2B and I&C SCI 46

**COMPSCI 217. Light and Geometry in Computer Vision. 4 Units.**

Examines the issues of light transport and multiview geometry in computer vision. Applications include camera calibration, 3D understanding, stereo reconstruction, and illumination estimation.

Prerequisite: I&C SCI 6D and (I&C SCI 6N or MATH 6G or MATH 3A) and MATH 2B and I&C SCI 46 and COMPSCI 211A

**COMPSCI 221. Information Retrieval, Filtering, and Classification. 4 Units.**

Algorithms for the storage, retrieval, filtering, and classification of textual and multimedia data. The vector space model, Boolean and probabilistic queries, and relevance feedback. Latent semantic indexing; collaborative filtering; and relationship to machine learning methods.

Prerequisite: COMPSCI 161 and COMPSCI 171 and (I&C SCI 6N or MATH 3A or MATH 6G)

Same as SWE 225.

Restriction: Graduate students only.

**COMPSCI 222. Principles of Data Management. 4 Units.**

Covers fundamental principles underlying data management systems. Content includes key techniques including storage management, buffer management, record-oriented file system, access methods, query optimization, and query processing.

Prerequisite: COMPSCI 122A and (I&C SCI 53 or COMPSCI 143A)

Concurrent with COMPSCI 122C.

**COMPSCI 222P. Principles of Data Management. 4 Units.**

Covers fundamental principles underlying data management systems. Understanding and implementation of key techniques including storage management, buffer management, record-oriented file system, access methods, query optimization, and query processing.

Prerequisite: C++ programming skills, understanding of Data Structures and Algorithms

Restriction: Graduate students only.

**COMPSCI 223. Transaction Processing and Distributed Data Management. 4 Units.**

Covers fundamental principles underlying transaction processing including database consistency, concurrency control, database recovery, and fault-tolerance. Includes transaction processing in centralized, distributed, parallel, and client-server environments.

Prerequisite: COMPSCI 222 and COMPSCI 131

**COMPSCI 225. Next Generation Search Systems. 4 Units.**

Discusses concepts and techniques related to all aspects of search systems. After considering basic search technology and the state-of-art systems, rapidly developing techniques for multimedia search, local search, event-search, and video-on-demand are explored.

Prerequisite: I&C SCI 21 or CSE 21 or IN4MATX 41 or I&C SCI 31 or CSE 41

Restriction: Upper-division students only. Graduate students only.

Concurrent with COMPSCI 125.

**COMPSCI 230. Distributed Computer Systems. 4 Units.**

Principles of distributed computing systems. Topics covered include message-passing, remote procedure calls, distributed shared memory synchronization, resource and process/thread management, distributed file systems, naming and security.

**COMPSCI 230P. Distributed Computer Systems . 4 Units.**

Principles of distributed computing systems. Topics covered include message-passing, remote procedure calls, distributed shared memory synchronization, resource and process/thread management, distributed file systems, naming and security.

Restriction: Graduate students only.

**COMPSCI 231P. Parallel and Distributed Computing for Professionals . 4 Units.**

Covers a wide variety of concepts related to the design and application of high-performance concurrent computing systems, including architectural features, communications networks and models, parallel program development for numerical and non-numerical applications, programming models, and more.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 232. Computer and Communication Networks. 4 Units.**

Network architecture of the Internet, telephone networks, cable networks, and cell phone networks. Network performance models. Network performance models. Advanced concepts and implementations of flow and congestion control, addressing, internetworking, forwarding, routing, multiple access, streaming, and quality-of-service.

Prerequisite: EECS 148 or COMPSCI 132

Same as EECS 248A, NET SYS 201.

Restriction: Graduate students only.

**COMPSCI 232P. Computer and Communication Networks . 4 Units.**

Internet architecture, protocols, and services. Advanced concepts of IP and TCP, including addressing, internetworking, forwarding, routing, and implementations of flow and congestion control. Internet services such as Network Address Translation and Domain Name Servers. Overview of Local Area Networks.

Restriction: Graduate students only.

**COMPSCI 233. Networking Laboratory. 4 Units.**

A laboratory-based introduction to basic networking concepts such as addressing, sub-netting, bridging, ARP, and routing. Network simulation and design. Structured around weekly readings and laboratory assignments.

Prerequisite: EECS 148 or COMPSCI 132

Same as NET SYS 202.

**COMPSCI 234. Advanced Networks. 4 Units.**

Design principles of networked systems, advanced routing and congestion control algorithms, network algorithms, network measurement, management, security, Internet economics, and emerging networks.

Prerequisite: NET SYS 201 or COMPSCI 232 or EECS 248A

Same as NET SYS 210.

**COMPSCI 236. Wireless and Mobile Networking. 4 Units.**

Introduction to wireless networking. The focus is on layers 2 and 3 of the OSI reference model, design, performance analysis, and protocols. Topics covered include: an introduction to wireless networking, digital cellular, next generation cellular, wireless LANs, and mobile IP.

Prerequisite: EECS 148 or COMPSCI 132

Same as NET SYS 230.

**COMPSCI 237. Middleware for Networked and Distributed Systems. 4 Units.**

Discusses concepts, techniques, and issues in developing distributed systems middleware that provides high performance and Quality of Service for emerging applications. Also covers existing standards (e.g., CORBA, DCOM, Jini, Espeak) and their relative advantages and shortcomings.

Prerequisite: An undergraduate-level course in operating systems and networks.

Same as NET SYS 260.

**COMPSCI 238. Advanced Operating Systems. 4 Units.**

Focuses on advanced and graduate-level topics in operating systems. Presents important recent developments in operating systems, topics not covered in undergraduate operating systems courses. This includes novel operating system designs and techniques to improve existing ones.

Prerequisite: COMPSCI 143A

**COMPSCI 238P. Operating Systems. 4 Units.**

In-depth organization of the core operating system abstraction and its implementation (virtual memory, kernel and user mode, system calls, threads, context switches, interrupts, inter-process communication, hardware interface, etc.) and a range of recent developments in de-facto industry standard operating systems.

Prerequisite: Working knowledge of C and the Linux environment.

Restriction: School of Info & Computer Sci students only. Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 241. Advanced Compiler Construction. 4 Units.**

Advanced study of programming language implementation techniques: optimizations such as common sub-expression elimination, register allocation, and instruction scheduling. Implementation of language features such as type-directed dispatch, garbage collection, dynamic linking, and just-in-time code generation.

Prerequisite: COMPSCI 142A

**COMPSCI 242. Parallel Computing. 4 Units.**

Definition of parallel processing systems. Theory and application of arrays, trees, and hypercubes. Computational models, applications: sorting, integer arithmetic, matrix operations, Fast Fourier Transform, and others. Interconnection networks: a framework for the description, analysis, and construction of hypercube-derived networks.

**COMPSCI 242P. Compilers and Interpreters. 4 Units.**

Provides in-depth study of compilers and interpreters which are the primary forms of programming language processing in computing.

Prerequisite: Knowledge of C++ programming is required.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 243. High-Performance Architectures and Their Compilers. 4 Units.**

Emphasis on the development of automatic tools (i.e., compilers/environments) for the efficient exploitation of parallel machines, and the trade-offs between hardware and software in the design of supercomputing and high-performance machines.

**COMPSCI 244. Introduction to Embedded and Ubiquitous Systems. 4 Units.**

Embedded and ubiquitous system technologies including processors, DSP, memory, and software. System interfacing basics; communication strategies; sensors and actuators, mobile and wireless technology. Using pre-designed hardware and software components. Design case studies in wireless, multimedia, and/or networking domains.

Prerequisite: I&C SCI 51 and COMPSCI 152 and COMPSCI 161 and (I&C SCI 6N or MATH 3A or MATH 6G or I&C SCI 6D). B.S. degree in Computer Science is also accepted.

Same as IN4MATX 244.

**COMPSCI 244P. Introduction to the Internet of Things. 4 Units.**

Develops a comprehensive understanding of the hardware and software technology, the communication protocols, and the security and privacy requirements underlying the Internet of Things ecosystem, particularly those using computing elements (processors, DSPs/ ASIPs), sensors, and accessing cloud services.

Prerequisite: Undergraduate-level familiarity with fundamentals of integrated circuit blocks, processors, optimization/algorithm design, and some programming experience.

Restriction: Graduate students only.

**COMPSCI 245. Software for Embedded Systems. 4 Units.**

Embedded computing elements, device interfaces, time-critical IO handling. Embedded software design under size, performance, and reliability constraints. Software timing and functional validation. Programming methods and compilation for embeddable software. Embedded runtime systems. Case studies of real-time software systems.

Prerequisite: I&C SCI 51 and COMPSCI 152 and COMPSCI 161 and (I&C SCI 6N or MATH 3A or MATH 6G or I&C SCI 6D). B.S. degree in Computer Science is also accepted.

**COMPSCI 246. Dependability, Validation, and Testing of Embedded Systems. 4 Units.**

Embedded system building blocks, including IP cores. Dependability and Resilience. Co-simulation. Formal verification using model checking. Verification environments. Test challenges in core integration: compliance, feature, random, and collision testing. Core access and test integration. Interface-based verification and standards.

Prerequisite: B.S. degree in Computer Science or basic courses in algorithms and data structures, calculus, discrete math, linear algebra, symbolic logic.

**COMPSCI 247. Complex Software Systems: Project Course. 4 Units.**

Building complex systems software systems, such as Database Management Systems, Operating Systems, and Optimizing Compilers. Such systems often involve low-level programming and intricate performance optimizations. Students learn how to build such a system.

Prerequisite or corequisite: COMPSCI 222 or COMPSCI 238 or COMPSCI 241

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**COMPSCI 248A. Introduction to Ubiquitous Computing. 4 Units.**

The 'disappearing computer' paradigm. Differences to the desktop computing model: applications, interaction in augmented environments, security, alternate media, small operating systems, sensors, and embedded systems design. Evaluation by project work and class participation.

Same as IN4MATX 241.

**COMPSCI 250A. Computer Systems Architecture. 4 Units.**

Study of architectural issues and their relation to technology and software: design of processor, interconnections, and memory hierarchies.

Prerequisite: COMPSCI 152

**COMPSCI 250B. Modern Computer Systems. 4 Units.**

Fundamental concepts and recent advances in computer systems architecture necessary to achieve high performance and efficiency on systems available today. Topics span modern processor features, accelerators, storage and network architectures, as well as architecture-optimized software.

Prerequisite: Required: Undergraduate-level understanding of computer architecture concepts.

Overlaps with COMPSCI 243.

**COMPSCI 250P. Computer Systems Architecture . 4 Units.**

Study of architectural issues and their relation to technology and software: design of processor, interconnections, and memory hierarchies.

Prerequisite: Undergraduate-level familiarity with fundamentals of integrated circuit blocks, processors, and optimization/algorithm design, and some programming experience.

Restriction: Graduate students only.

**COMPSCI 252. Introduction to Computer Design. 4 Units.**

The methodology and use of CAD tools for computer design, accomplished by a lab in which students practice design using commercially available silicon compilers and other tools.

Prerequisite: COMPSCI 151 and COMPSCI 152

**COMPSCI 253. Analysis of Programming Languages. 4 Units.**

Concepts in modern programming languages, their interaction, and the relationship between programming languages and methods for large-scale, extensible software development. Empirical analysis of programming language usage.

Same as SWE 212.

**COMPSCI 253P. Advanced Programming and Problem Solving. 4 Units.**

Provides in-depth preparation for industry interviews requiring demonstration of problem solving and programming skills. Emphasis is on understanding problem statements, considering edge cases, developing effective test cases, designing correct solutions, explaining these clearly, and implementing a solution correctly.

Corequisite: COMPSCI 260P

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 259S. Seminar in Design Science. 2 Units.**

Current research and research trends in design science. Forum for presentation and criticism by students of research work in progress.

Repeatability: May be taken for credit 18 times.

**COMPSCI 260. Fundamentals of the Design and Analysis of Algorithms. 4 Units.**

Covers fundamental concepts in the design and analysis of algorithms and is geared toward non-specialists in theoretical computer science. Topics include: deterministic and randomized graph algorithms, fundamental algorithmic techniques like divide-and-conquer strategies and dynamic programming, and NP-completeness.

Prerequisite: COMPSCI 161

**COMPSCI 260P. Fundamentals of Algorithms with Applications. 4 Units.**

Covers fundamental concepts in the design and analysis of algorithms and is geared toward practical application and implementation. Topics include greedy algorithms, deterministic and randomized graph algorithms, models of network flow, fundamental algorithmic techniques, and NP-completeness.

Restriction: Graduate students only.

**COMPSCI 261. Data Structures. 4 Units.**

An in-depth treatment of data structures and their associated management algorithms including resource complexity analysis.

Prerequisite: I&C SCI 46 and COMPSCI 161

**COMPSCI 261P. Data Structures with Applications . 4 Units.**

Data structures and their associated management algorithms, including their applications and analysis.

Restriction: Graduate students only.

**COMPSCI 262. Computational Complexity. 4 Units.**

Advanced course in computational models and complexity classes. Covers the fundamentals of Turing Machines, Decidability, and NP-completeness. Includes discussion of more advanced topics including polynomial hierarchy, randomized complexity classes, #P-completeness and hardness of approximation.

Prerequisite: COMPSCI 162

**COMPSCI 262P. Text Processing and Pattern Matching. 4 Units.**

Techniques for pattern matching and parsing character strings. Topics include substring searching, finite state machines, regular expressions, and context-free grammars, as well as applications in lexical analyzers, compilers, word processors, malware detectors, and search engines.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 263. Analysis of Algorithms. 4 Units.**

Analysis of correctness and complexity of various efficient algorithms; discussion of problems for which no efficient solutions are known.

Prerequisite: COMPSCI 161 and COMPSCI 261

**COMPSCI 264. Quantum Computation and Information. 4 Units.**

Basic models for quantum computation and their foundations in quantum mechanics. Quantum complexity classes and quantum algorithms, including algorithms for factoring and quantum simulation. Introduction to quantum information theory and quantum entanglement.

Prerequisite: Basic courses in linear algebra and algorithms.

**COMPSCI 265. Graph Algorithms. 4 Units.**

Graph definitions, representation methods, graph problems, algorithms, approximation methods, and applications.

Prerequisite: COMPSCI 161 and COMPSCI 261

Concurrent with COMPSCI 163.

**COMPSCI 266. Computational Geometry. 4 Units.**

An overview of some of the basic problems in computational geometry and of some algorithmic and data-structuring techniques appropriate to their solution.

Prerequisite: COMPSCI 161 and COMPSCI 261

**COMPSCI 267P. Data Compression. 4 Units.**

An introduction to the theory and practice of modern data compression techniques. Topics include codes, coding, modeling, text compression, lossless and lossy image compression standards and systems, audio compression.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 268. Introduction to Optimization. 4 Units.**

A broad introduction to optimization. Unconstrained and constrained optimization. Equality and inequality constraints. Linear and integer programming. Stochastic dynamic programming.

Prerequisite: STATS 67 or (STATS 7 and STATS 120A) and (I&C SCI 6N or MATH 3A)

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

Concurrent with COMPSCI 169.

**COMPSCI 268P. Introduction to Optimization Modeling . 4 Units.**

A broad introduction to optimization methods and their applications. Unconstrained and constrained optimization. Direct, first, and second order methods. Use of optimization software libraries. Equality and inequality constraints, optimal conditions, and methods. Applications to modeling in computer science, engineering.

Restriction: Graduate students only.

**COMPSCI 269S. Seminar in the Theory of Algorithms and Data Structures. 2 Units.**

Current research and research trends in the Theory of algorithms and data structures.

Repeatability: May be taken for credit 18 times.

**COMPSCI 271. Introduction to Artificial Intelligence. 4 Units.**

The study of theories and computational models for systems which behave and act in an intelligent manner. Fundamental subdisciplines of artificial intelligence including knowledge representation, search, deduction, planning, probabilistic reasoning, natural language parsing and comprehension, knowledge-based systems, and learning.

**COMPSCI 271P. Introduction to Artificial Intelligence. 4 Units.**

The study of theories and computational models for systems which behave and act in an intelligent manner. Fundamental sub-disciplines of artificial intelligence, including knowledge representation, search, deduction, planning, probabilistic reasoning, natural language parsing and comprehension, knowledge-based systems, and learning.

Restriction: Graduate students only.

**COMPSCI 272. Statistical Natural Language Processing. 4 Units.**

Statistical models, machine learning algorithms, and computational tasks involved in natural language processing. Focuses on approaches that learn these models from data, and covers applications such as information extraction, dialog systems, machine translation, and question answering.

Prerequisite: COMPSCI 171 and COMPSCI 178

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Graduate students only.

**COMPSCI 273A. Machine Learning. 4 Units.**

Computational approaches to learning algorithms for classifications, regression, and clustering. Emphasis is on discriminative classification methods such as decision trees, rules, nearest neighbor, linear models, and naive Bayes.

Prerequisite: COMPSCI 271 and COMPSCI 206

**COMPSCI 273P. Machine Learning and Data Mining . 4 Units.**

Introduction to principles of machine learning and data-mining. Learning algorithms for classifications, regression, and clustering. Emphasis is on discriminative classification methods such as decision trees, rules, nearest neighbor, linear models, and naive Bayes.

Prerequisite: Python programming knowledge is required.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 274A. Probabilistic Learning: Theory and Algorithms. 4 Units.**

An introduction to probabilistic and statistical techniques for learning from data, including parameter estimation, density estimation, regression, classification, and mixture modeling.

Prerequisite: COMPSCI 206

**COMPSCI 274B. Learning in Graphical Models. 4 Units.**

Models for data analysis are presented in the unifying framework of graphical models. The emphasis is on learning from data but inference is also covered. Real world examples are used to illustrate the material.

Prerequisite: COMPSCI 274A

**COMPSCI 274C. Neural Networks and Deep Learning. 4 Units.**

Neural network and deep learning from multiple perspectives. Theory of parallel distributed processing systems, algorithmic approaches for learning from data in various manners, applications to difficult problems in AI from computer vision, to natural language understanding, to bioinformatics and chemoinformatics.

Prerequisite: (STATS 120A and STATS 120B) or MATH 121A or COMPSCI 178 or COMPSCI 273A

Overlaps with COMPSCI 274A, COMPSCI 277, COMPSCI 276, COMPSCI 278, COMPSCI 274B, COMPSCI 273A.

Concurrent with COMPSCI 172B.

**COMPSCI 274D. Artificial Intelligence Frontiers: Technical, Ethical, and Societal. 4 Units.**

Explores the frontiers of artificial intelligence and related technologies with a focus on the underlying ethical, legal, and societal challenges and opportunities they create. Encourages critical thinking about these issues.

Prerequisite: Recommended: COMPSCI 172B and COMPSCI 178.

Restriction: Graduate students only.

Concurrent with COMPSCI 172C.

**COMPSCI 274E. Deep Generative Models. 4 Units.**

Discusses probabilistic approaches to deep learning such as generative models and their applications in computer vision, NLP, the natural sciences, and other fields. Coursework may include both homework and project components.

Prerequisite: COMPSCI 178 or COMPSCI 273A or STATS 120B. Recommended: Advanced machine learning or graphical models courses such as COMPSCI 274A or COMPSCI 274B or CS 273C or COMPSCI 276.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Graduate students only.

**COMPSCI 274P. Neural Networks and Deep Learning. 4 Units.**

Introduction to principles of machine learning and neural networks. Architecture design. Feedforward and recurrent networks. Learning models and algorithms. Applications to data analysis and prediction problems in areas such as machine vision, natural language processing, biomed, and finance.

Prerequisite: COMPSCI 271P. COMPSCI 271P with a grade of B or better. Knowledge of Python programming is required.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 276. Reasoning in Probabilistic Graphical Models. 4 Units.**

Focuses on algorithms for probabilistic reasoning using graphical models such as Bayesian Networks and Markov Networks that encode knowledge as local probabilistic relations. Tasks include finding most likely scenarios over a subset of variables, or updating posterior probability, given observations.

Prerequisite: A basic course in probability.

**COMPSCI 278. Probability Models. 4 Units.**

Advanced probability, discrete time Markov chains, Poisson processes, continuous time Markov chains. Queuing or simulation as time permits.

Prerequisite: STATS 120A

Concurrent with STATS 121.

**COMPSCI 284A. Artificial Intelligence in Biology and Medicine. 4 Units.**

Introduction to computational methods in molecular biology, aimed at those interested in learning about this interdisciplinary area. Covers computational approaches to understanding and predicting the structure, function, interactions, and evolution of DNA, RNA, proteins, and related molecules and processes.

Prerequisite: A Basic course in algorithms or a basic course in molecular biology.

Concurrent with COMPSCI 184A.

**COMPSCI 284C. Computational Systems Biology. 4 Units.**

Computational inference and modeling of gene regulation networks, signal transduction pathways, and the effects of regulatory networks in cellular processes, development, and disease. Introduction of required mathematical, computational, and data handling tools.

Prerequisite: COMPSCI 284A or (BIO SCI 99 and MATH 2D)

Concurrent with COMPSCI 184C.

**COMPSCI 285. Mathematical and Computational Biology . 4 Units.**

Analytical and numerical methods for dynamical systems, temporal-spatial dynamics, steady state, stability, stochasticity. Application to life sciences: genetics, tissue growth and patterning, cancers, ion channels gating, signaling networks, morphogen gradients. Probabilistic methods.

Prerequisite: MATH 227A

Same as MATH 227C.

**COMPSCI 290. Research Seminar. 2 Units.**

Forum for presentation and criticism by students of research work in progress. Presentation of problem areas and related work. Specific goals and progress of research.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**COMPSCI 294P. Keystone Professional Writing and Communication for Computer Science Careers. 4 Units.**

Well-developed written and oral communication skills relevant to computer science professionals including oral presentations, short descriptive writing assignments, and one longer writing assignment related to a research replication project.

Restriction: Graduate students only.

**COMPSCI 295. Special Topics in Information and Computer Science . 4 Units.**

Studies in selected areas of Information and Computer Science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**COMPSCI 295P. Keystone Project for Computer Science. 4 Units.**

Design and development of a software system or a hardware component of a system based on knowledge of advanced computer science principles. Students implement at least a working prototype and test this using relevant input data.

Restriction: Graduate students only.

**COMPSCI 296. Elements of Scientific Writing. 4 Units.**

Introduces the concepts and principles of good scientific writing, demonstrates them by examples drawn from the literature, and uses a hands-on approach to apply them to documents being written by the participants.

Grading Option: Satisfactory/unsatisfactory only.

**COMPSCI 296P. Capstone Professional Writing and Communication for Computer Science Careers . 4 Units.**

Written and oral communication for computer science and IT careers. Production of the detailed design and development document for the concurrent capstone design class and refinement of written documents and oral communications skills needed for a successful job search.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 297P. Capstone Design Project for Computer Science . 4 Units.**

Design and development of app, software system, or hardware component of system based on students' prior knowledge of advanced computer science principles. Implement at least a working prototype and test this using relevant use cases and/or input data.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 298. Thesis Supervision. 2-12 Units.**

Individual research or investigation conducted in preparation for the M.S. thesis option or the dissertation requirements for the Ph.D. program.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Information and Computer Science majors only.

**COMPSCI 298P. Computer Science Practicum. 1-4 Units.**

Internship in which students work individually at an outside organization to gain experience with the challenges involved in technology-related work.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: School of Info & Computer Sci students only. Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 299. Individual Study. 1-12 Units.**

Individual research or investigation with Computer Science faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Information and Computer Science majors only.

**COMPSCI 299P. Individual Study. 4-8 Units.**

Supervised individual study in computer science.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 4 times.

Restriction: Master of Computer Science Degree students have first consideration for enrollment. Graduate students only.

## Informatics Courses

### **IN4MATX 12. Barter to Bitcoin: Society, Technology and the Future of Money. 4 Units.**

Digital money has captured the broad imagination of speculators, coders, regulators, criminals and the mass media. Course puts this change in context: how do we understand money as a social, political and technological phenomenon?.

Same as SOC SCI 11A.

(II and III ).

### **IN4MATX 43. Introduction to Software Engineering. 4 Units.**

Concepts, methods, and current practice of software engineering. Large-scale software production, software life cycle models, principles and techniques for each stage of development.

Prerequisite: I&C SCI 32 or I&C SCI 32A

Overlaps with I&C SCI 105.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

### **IN4MATX H81. Ethics, Technology, and Design. 4 Units.**

Provides a critical framework for how and why biases of many kinds are built into everyday digital tools. Reflections on ethics, technology, and design through case studies drawn from machine learning, CS education, engineering, social media, and criminal justice.

Restriction: Campuswide Honors Collegium students only.

(III)

### **IN4MATX 101. Concepts in Programming Languages I. 4 Units.**

In-depth study of several contemporary programming languages stressing variety in data structures, operations, notation, and control. Examination of different programming paradigms, such as logic programming, functional programming and object-oriented programming; implementation strategies, programming environments, and programming style.

Prerequisite: (I&C SCI 51 or CSE 31 or EECS 31) and (I&C SCI 46 or CSE 46). I&C SCI 51 with a grade of C or better. CSE 31 with a grade of C or better. EECS 31 with a grade of C or better. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better

Same as COMPSCI 141.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

### **IN4MATX 102. Concepts of Programming Language II. 4 Units.**

In-depth study of major programming paradigms: imperative, functional, declarative, object-oriented, and aspect-oriented. Understanding the role of programming languages in software development and the suitability of languages in context. Domain-specific languages. Designing new languages for better software development support.

Prerequisite: IN4MATX 101 or COMPSCI 141 or CSE 141

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

### **IN4MATX 113. Requirements Analysis and Engineering. 4 Units.**

Equips students to develop techniques of software-intensive systems through successful requirements analysis techniques and requirements engineering. Students learn systematic process of developing requirements through cooperative problem analysis, representation, and validation.

Prerequisite: (I&C SCI 33 or CSE 43) and IN4MATX 43. I&C SCI 33 with a grade of C or better. CSE 43 with a grade of C or better. IN4MATX 43 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 115. Software Testing, Analysis, and Quality Assurance. 4 Units.**

Preparation for developing high-quality software through successful verification and validation techniques. Fundamental principles of software testing, implementing software testing practices, ensuring the thoroughness of testing to gain confidence in the correctness of the software.

Prerequisite: (I&C SCI 45J or I&C SCI 45C or I&C SCI 46 or CSE 46) and IN4MATX 43. I&C SCI 45J with a grade of C or better. I&C SCI 45C with a grade of C or better. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better. IN4MATX 43 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 117. Project in Software System Design. 4 Units.**

Specification, design, construction, testing, and documentation of a complete software system. Special emphasis on the need for and use of teamwork, careful planning, and other techniques for working with large systems.

Prerequisite: (IN4MATX 43 and I&C SCI 33) or CSE 43

Restriction: Upper-division students only. School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 121. Software Design: Applications. 4 Units.**

Introduction to application design: designing the overall functionality of a software application. Topics include general design theory, software design theory, and software architecture. Includes practice in designing and case studies of existing designs.

Prerequisite: I&C SCI 33 or CSE 43. I&C SCI 33 with a grade of C or better. CSE 43 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 122. Software Design: Structure and Implementation. 4 Units.**

Introduction to implementation design: designing the internals of a software application. Topics include design aesthetics, design implementation, design recovery, design patterns, and component reuse. Includes practice in designing and case studies of existing designs.

Prerequisite: (I&C SCI 45J or I&C SCI 46 or IN4MATX 45) and (IN4MATX 101 or COMPSCI 141 or CSE 141)

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 124. Internet Applications Engineering. 4 Units.**

Concepts in Internet applications engineering with emphasis on the Web. Peer-to-Peer and Interoperability. Topics include HTTP and REST, Remote Procedure/Method Calls, Web Services, data representations, content distribution networks, identity management, relevant W3C/IETF standards, and relevant new large-scale computing styles.

Prerequisite: (COMPSCI 132 or EECS 148) and I&C SCI 45J

Same as COMPSCI 137.

Overlaps with COMPSCI 122B.

Restriction: Upper-division students only. School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 125. Computer Game Development. 4 Units.**

Introduction to the principles of interactive 2D and 3D computer game development. Concepts in computer graphics, algorithms, software engineering, art and graphics, music and sound, story analysis, and artificial intelligence are presented and are the basis for student work.

Prerequisite: COMPSCI 112 or COMPSCI 171 or IN4MATX 121 or ART 106B or I&C SCI 163 or I&C SCI 166

Same as COMPSCI 113.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 131. Human Computer Interaction. 4 Units.**

Basic principles of human-computer interaction (HCI). Introduces students to user interface design techniques, design guidelines, and usability testing. Students gain the ability to design and evaluate user interfaces and become familiar with some of the outstanding research problems in HCI.

Prerequisite: I&C SCI 10 or I&C SCI 31 or I&C SCI 32A or CSE 41 or ENGR 10 or ENGRMAE 10 or EECS 10. I&C SCI 10 with a grade of C or better. I&C SCI 31 with a grade of C or better. I&C SCI 32A with a grade of C or better. CSE 41 with a grade of C or better. ENGR 10 with a grade of C or better. ENGRMAE 10 with a grade of C or better. EECS 10 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 132. Project in Human-Computer Interaction Requirements and Evaluation. 4 Units.**

Students undertake significant projects in the elicitation and specification of HCI requirements and the thorough evaluation of user interfaces.

Prerequisite: IN4MATX 131

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 133. User Interaction Software. 4 Units.**

Introduction to human-computer interaction programming. Emphasis on current tools, standards, methodologies for implementing effective interaction designs. Widget toolkits, Web interface programming, geo-spatial and map interfaces, mobile phone interfaces.

Prerequisite: I&C SCI 45J or I&C SCI 45C. I&C SCI 45J with a grade of C or better. I&C SCI 45C with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 134. Project in User Interaction Software. 4 Units.**

Students complete an end-to-end user interface programming project based on an iterative design paradigm. Topics may include requirements brainstorming, paper prototyping, iterative development, cognitive walk-through, quantitative evaluation, and acceptance testing. Materials fee.

Prerequisite: IN4MATX 131 and IN4MATX 133

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 141. Information Retrieval. 4 Units.**

An introduction to information retrieval including indexing, retrieval, classifying, and clustering text and multimedia documents.

Prerequisite: (I&C SCI 45C or I&C SCI 45J) and (STATS 7 or STATS 67). I&C SCI 45C with a grade of C or better. I&C SCI 45J with a grade of C or better

Same as COMPSCI 121.

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**IN4MATX 143. Information Visualization. 4 Units.**

Introduction to interactive visual interfaces for large datasets, and to principles of human visual perception and human computer interaction that inform their design. Various applications for data analysis and monitoring are discussed.

Prerequisite: (IN4MATX 131 or IN4MATX 43) and (I&C SCI 31 or I&C SCI 32A or CSE 41). IN4MATX 131 with a grade of C or better. IN4MATX 43 with a grade of C or better. I&C SCI 31 with a grade of C or better. I&C SCI 32A with a grade of C or better. CSE 41 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**IN4MATX 148. Project in Ubiquitous Computing. 4 Units.**

Introduction to ubiquitous computing research methods, tools, and techniques. Prototyping, design, and evaluation of physical computing applications, smart environments, embedded systems, and future computing scenarios. Includes hands-on in-class laboratory exercises. Materials fee.

Prerequisite: I&C SCI 10 or I&C SCI 31 or CSE 41 or I&C SCI 32A. I&C SCI 10 with a grade of C or better. I&C SCI 31 with a grade of C or better. CSE 41 with a grade of C or better. I&C SCI 32A with a grade of C or better

Restriction: Upper-division students only. School of Info & Computer Sci students have first consideration for enrollment.

**IN4MATX 151. Project Management. 4 Units.**

Introduces theoretical and practical aspects of project management. Topics include organizational theory, group behavior, project management skills, case studies, personal and group productivity tools, management of distributed work, stakeholders, consultants, and knowledge management. Students do a project exercise.

Prerequisite: IN4MATX 43

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**IN4MATX 153. Computer Supported Cooperative Work. 4 Units.**

Introduces concepts and principles of collaborative systems. Topics may include shared workspaces, group interaction, workflow, architectures, interaction between social and technical features of group work, and examples of collaborative systems used in real-world settings. Students develop a simple collaborative application.

Prerequisite: (IN4MATX 161 or IN4MATX 43) and (I&C SCI 31 or I&C SCI 32A or CSE 41). I&C SCI 31 with a grade of C or better. I&C SCI 32A with a grade of C or better. CSE 41 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**IN4MATX 161. Social Analysis of Computing. 4 Units.**

Introduction of computing as a social process. Examines the social opportunities and problems raised by new information technologies, and the consequences of different ways of organizing. Topics include computing and work life, privacy, virtual communities, productivity paradox, systems risks.

Prerequisite: I&C SCI 10 or I&C SCI 31 or I&C SCI 32A or CSE 41 or ENGR 10 or EECS 10 or ENGRMAE 10. I&C SCI 10 with a grade of C or better. I&C SCI 31 with a grade of C or better. I&C SCI 32A with a grade of C or better. CSE 41 with a grade of C or better. ENGR 10 with a grade of C or better. EECS 10 with a grade of C or better. ENGRMAE 10 with a grade of C or better. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**IN4MATX 162W. Organizational Information Systems. 4 Units.**

Introduction to role of information systems in organizations, components and structure of organizational information systems, and techniques used in information systems analysis, design, and implementation.

Prerequisite: IN4MATX 161. Satisfactory completion of the Lower-Division Writing requirement.

**(Ib)****IN4MATX 163. Project in the Social and Organizational Impacts of Computing . 4 Units.**

Students undertake projects intended to gather and analyze data from situations in which computers are used, organize and conduct experiments intended to test hypotheses about impacts, and explore the application of concepts learned in previous courses.

Prerequisite: IN4MATX 162W

**IN4MATX 164. Children's Learning and Media. 4 Units.**

Examines how popular media may impact how young people learn, develop, and communicate by looking at research related to the impacts of a wide range of popular media including television, video games, digital environments, mobile devices, and other multimedia.

Same as EDUC 130.

Restriction: Education Sciences Majors only. Informatics Majors only. Informatics Minors only.

**IN4MATX 171. Introduction to Medical Informatics. 4 Units.**

Broad overview of medical informatics for students with varied backgrounds. Electronic medical records, online resources, mobile technologies, patient safety, and computational design. Legal, ethical, and public policy issues. Health systems management. Evaluation and fieldwork for health systems.

Prerequisite: WRITING 39C or WRITING 30 or WRITING 31 or HUMAN 1C or HUMAN H1C. WRITING 39C with a grade of C or better. WRITING 30 with a grade of C or better. WRITING 31 with a grade of C or better. HUMAN 1C with a grade of C or better. HUMAN H1C with a grade of C or better

Same as PUBHLTH 105.

Restriction: Upper-division students only. Satisfactory completion of the Lower-Division Writing requirement.

**IN4MATX 172. Project in Health Informatics. 4 Units.**

Students undertake significant quarter-long projects related to health informatics. Topics may include field evaluations of health care technologies, prototypes, iterative design, and system implementations.

Prerequisite: PUBHLTH 105 or IN4MATX 171

Same as PUBHLTH 106.

**IN4MATX 190. Special Topics in Informatics. 4 Units.**

Studies in selected areas of informatics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**IN4MATX 191A. Senior Design Project. 4 Units.**

Group supervised project in which students analyze, specify, design, construct, evaluate, and adapt a significant information processing system. Topics include team management, professional ethics, and systems analysis.

Prerequisite: IN4MATX 113 and IN4MATX 121 and IN4MATX 131 and IN4MATX 151

Grading Option: In Progress (Letter Grade with P/NP).

Restriction: Seniors only. Software Engineering Majors have first consideration for enrollment. Informatics Majors have first consideration for enrollment.

**IN4MATX 191B. Senior Design Project. 4 Units.**

Group supervised project in which students analyze, specify, design, construct, evaluate, and adapt a significant information processing system. Topics include team management, professional ethics, and systems analysis.

Prerequisite: IN4MATX 191A. In Progress (IP) grade for IN4MATX 191A is also accepted.

Restriction: Seniors only.

**IN4MATX H198. Honors Research. 4 Units.**

Directed independent research in Informatics for honors students.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be repeated for credit unlimited times.

Restriction: Bren School of ICS Honors students only. Campuswide Honors Collegium students only.

**IN4MATX 199. Individual Study. 2-5 Units.**

Individual research or investigation under the direction of an individual faculty member.

Repeatability: May be repeated for credit unlimited times.

**IN4MATX 201. Research Methodology for Informatics. 4 Units.**

Introduction to strategies and idioms of research in Informatics. Includes examination of issues in scientific inquiry, qualitative and quantitative methods, and research design. Both classic texts and contemporary research literature are read and analyzed.

**IN4MATX 203. Qualitative Research Methods in Information Systems. 4 Units.**

Introduction to qualitative research methods used to study computerization and information systems, such as open-ended interviewing, participant observation, and ethnography. Studies of the methods in practice through examination of research literature.

Prerequisite: IN4MATX 261 or IN4MATX 251

**IN4MATX 205. Quantitative Research Methods in Information Systems. 4 Units.**

Quantitative research methods used to study computerization and information systems. Design of instruments, sampling, sample sizes, and data analysis. Validity and reliability. Longitudinal versus cross-sectional designs. Analysis of secondary data. Studies of the methods through examination of research literature.

Prerequisite: IN4MATX 251 or IN4MATX 261. Basic knowledge of elementary statistics is also required.

**IN4MATX 207S. Doctoral Seminar on Research and Writing. 2 Units.**

Doctoral seminar centered on original research and writing. Provides a chance for doctoral students at all levels to present original work, brainstorm ongoing issues, and learn to provide and receive critical feedback from peers.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**IN4MATX 209S. Seminar in Informatics. 2 Units.**

Current research and research trends in informatics. Forum for presentation and criticism by students of research work in progress.

Repeatability: Unlimited as topics vary.

**IN4MATX 231. User Interface Design and Evaluation. 4 Units.**

Introduction to the design and evaluation of user interfaces, with an emphasis on methodology. Cognitive principles, design life cycle, on-line and off-line prototyping techniques. Toolkits and architectures for interactive systems. Evaluation techniques, including heuristic and laboratory methods.

**IN4MATX 232. Research in Human-Centered Computing. 4 Units.**

Introduction to contemporary topics in human-computer interaction, including methods, technologies, design, and evaluation. Emerging application domains and their challenges to traditional research methods. Advanced architectures and technologies. Critical issues.

Prerequisite: Some familiarity with HCI principles.

**IN4MATX 237. Usable Security and Privacy. 4 Units.**

Introduces usability problems in security and privacy methods, tools, and software. Overviews prominent examples of both failures and successes in usable security and privacy. Surveys state-of-the-art techniques and evaluation methodologies.

Same as COMPSCI 204.

Overlaps with IN4MATX 231, COMPSCI 203.

Restriction: Informatics Majors have first consideration for enrollment. Computer Science Majors have first consideration for enrollment. Undergraduate degree in CompSci or Informatics is strongly recommended.

**IN4MATX 241. Introduction to Ubiquitous Computing. 4 Units.**

The 'disappearing computer' paradigm. Differences to the desktop computing model: applications, interaction in augmented environments, security, alternate media, small operating systems, sensors, and embedded systems design. Evaluation by project work and class participation.

Same as COMPSCI 248A.

**IN4MATX 244. Introduction to Embedded and Ubiquitous Systems. 4 Units.**

Embedded and ubiquitous system technologies including processors, DSP, memory, and software. System interfacing basics; communication strategies; sensors and actuators, mobile and wireless technology. Using pre-designed hardware and software components. Design case studies in wireless, multimedia, and/or networking domains.

Prerequisite: I&C SCI 51 and COMPSCI 152 and COMPSCI 161 and (I&C SCI 6N or MATH 3A or MATH 6G or I&C SCI 6D). B.S. degree in Computer Science is also accepted.

Same as COMPSCI 244.

**IN4MATX 251. Computer-Supported Cooperative Work. 4 Units.**

The role of information systems in supporting work in groups and organizations. Examines various technologies designed to support communication, information sharing, and coordination. Focuses on behavioral and social aspects of designing and using group support technologies.

**IN4MATX 261. Social Analysis of Computing. 4 Units.**

The social and economic impacts of computing and information technologies on groups, organizations, and society. Topics include computerization and changes in the character of work, social control and privacy, electronic communities, and risks of safety-critical systems to people.

**IN4MATX 263. Computerization, Work, and Organizations. 4 Units.**

Selected topics in the influence of computerization and information systems in transforming work and organizations. Theories of organization and organizational change. Processes by which diverse information technologies influence changes in work and organizations over short and long time periods.

Prerequisite: IN4MATX 251 or IN4MATX 261

**IN4MATX 265. Theories of Information Society . 4 Units.**

Social and economic conceptions of information technology. Macrosocial and economic conditions that foster changes in information technologies. Social construction of information and computer technology in professional worlds. Theories of information technology and large-scale social change.

Prerequisite: IN4MATX 251 or IN4MATX 261

**IN4MATX 267. Digital Media and Society. 4 Units.**

Selected topics in the technological and social aspects of online interactions, and policy including online games, social media, electronic activism, e-commerce, and digital libraries. Media-theoretic approaches to digital technology. Architectures, infrastructure considerations, and their consequences.

Prerequisite: IN4MATX 251 or IN4MATX 261

**IN4MATX 273. Information Technology in Global Sustainability. 4 Units.**

Explores the relationship between recent developments in information technology and the global transition to sustainability. Topics include the role of IT systems in the provision of human needs and wants (e.g., smart grids, food systems, and other IT-enabled infrastructure).

Restriction: Graduate students only.

**IN4MATX 280. Overview of Human-Computer Interaction and Design . 4 Units.**

Introduction to human-computer interaction and user-centered design. The material is focused on laying the groundwork for understanding the history, importance, and methods of human-computer interaction and design.

**IN4MATX 281. User Needs Analysis . 4 Units.**

Understanding the user's context, needs, and preferences. Topics include interviews and observations, modeling the context, flow, culture, space and artifacts involved in an endeavor, ways of aggregating what is found, and presenting these findings to others.

Prerequisite: IN4MATX 280

**IN4MATX 282. Design and Prototyping . 4 Units.**

Introduction to user-centered design and prototyping. Focused on practical methods for interaction design. Topics include the nature of design and the challenges to creating and evaluating good designs, as well specific skills for designing interactive systems.

Prerequisite: IN4MATX 280

**IN4MATX 283. User Experience Evaluation . 4 Units.**

Evaluating prototypes and completed systems. Topics include comparative analysis, laboratory experiments, heuristic evaluation, cognitive walkthroughs, surveys, clickstreams, and help-desk.

Prerequisite: IN4MATX 280

**IN4MATX 284. Advanced Design and Prototyping . 4 Units.**

Develop and communicate interactive technology design prototypes. Moving concepts from brainstorming and paper prototypes to wireframe and limited functionality mock-ups.

Prerequisite: IN4MATX 282

**IN4MATX 285. Interactive Technology Studio . 4 Units.**

Technologies, languages, and skills required for creating prototypes to communicate interactive technology concepts. Topics include HTTP, CSS, CSS scripting, AJAX, Design Patterns, Javascript, Javascript libraries such as jQuery, SQL, MVC, and cloud architectures.

Prerequisite: IN4MATX 280

**IN4MATX 286. Innovations in HCI and Design . 4 Units.**

Recent social and technological developments in human-computer interaction and design. Topics will vary as the field progresses but include novel input techniques, novel platforms, and innovations in theory and methods of design.

Prerequisite: IN4MATX 280

**IN4MATX 287. Capstone Project in HCI and Design . 4 Units.**

Group project that reinforces all concepts learned in this program, including knowing where user experience work is most appropriate and essential, and executing the appropriate steps.

Prerequisite: IN4MATX 283 and IN4MATX 284

**IN4MATX 288. Capstone Project and Portfolio . 4 Units.**

Completion of capstone projects and development of portfolios. Ideation, critique, development, and critique.

Prerequisite: IN4MATX 287

**IN4MATX 290. Research Seminar. 2 Units.**

Forum for presentation and criticism by students of research work in progress. Presentation of problem areas and related work. Specific goals and progress of research.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**IN4MATX 291S. Literature Survey in Software Engineering. 2 Units.**

Reading and analysis of relevant literature in Software Engineering under the direction of a faculty member.

Repeatability: May be repeated for credit unlimited times.

**IN4MATX 295. Special Topics in Informatics. 4 Units.**

Studies in selected areas of informatics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**IN4MATX 298. Thesis Supervision. 2-12 Units.**

Individual research or investigation conducted in preparation for the M.S. thesis option or the dissertation requirements for the Ph.D. program.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**IN4MATX 299. Individual Study. 1-12 Units.**

Individual research or investigation under the direction of an individual faculty member.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Information and Computer Sci Courses

**I&C SCI 3. Internet Technologies and their Social Impact. 4 Units.**

Examines current Internet technologies and social implications at the individual, group, and societal level. Blogs, wikis, sharing of video, photos, and music, e-commerce, social networking, gaming, and virtual environments. Issues include privacy, trust, identity, reputation, governance, copyright, and malicious behavior.

(III)

**I&C SCI 4. Human Factors for the Web. 4 Units.**

Principles of human-computer interaction in evaluating, designing, and developing information presented on the World Wide Web. User characteristics, usability analysis, navigation and organization. Color, typography, multimedia, information visualization, prototyping, user studies, evaluation strategies. Web accessibility.

Restriction: May not be taken for credit after IN4MATX 131.

(II)

**I&C SCI 5. Global Disruption and Information Technology. 4 Units.**

Explores how new forms of information technology may support transition to a sustainable civilization. Topics include design and implementation of IT systems, science of global change, online community building, and "green IT". Activities involve reading, writing, discussion, and final project.

(II)

**I&C SCI 6B. Boolean Logic and Discrete Structures. 4 Units.**

Relations and their properties; Boolean algebras, formal languages; finite automata.

Prerequisite: High school mathematics through trigonometry.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**(Vb)**

**I&C SCI 6D. Discrete Mathematics for Computer Science. 4 Units.**

Covers essential tools from discrete mathematics used in computer science with an emphasis on the process of abstracting computational problems and analyzing them mathematically. Topics include mathematical induction, combinatorics, and recurrence relations.

Prerequisite: Recommended: I&C SCI 6B

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment. Computer Engineering majors have second consideration.

**(Vb)**

**I&C SCI 6N. Computational Linear Algebra. 4 Units.**

Matrices and linear transformations, systems of linear equations, determinants, linear vector spaces, eigenvalues and eigenvectors, orthogonal matrices, diagonalization, and least squares. Topics taught primarily from an algorithmic perspective, including computational solutions, applications, and numerical error analysis.

Overlaps with MATH 6G, MATH 3A.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**(II and V.B ).**

**I&C SCI 7. Introducing Modern Computational Tools. 4 Units.**

A unified look at a spectrum of modern tools for building, solving, and analyzing simple computational models (deterministic and random) in diverse subject areas. Tools include those for numeric/symbolic computation, and those for acquiring, organizing, translating, processing, and displaying information.

**(Va)**

**I&C SCI 10. How Computers Work. 4 Units.**

Introduction to digital computer and communication systems. Capabilities and limitations of information technology. Representing information in digital form. Overview of computer organization, internet, operating systems, software. Human-computer interaction and social impact.

Restriction: May not be taken for credit after I&C SCI 31, I&C SCI 32, I&C SCI 32A, I&C SCI 51, I&C SCI 105, or IN4MATX 43.

**(II)**

**I&C SCI 11. The Internet and Public Policy. 4 Units.**

How the Internet works. Current public policy issues concerning the Internet. Introductory economics. Communications law. Interactions between information technology, economics, and law. Case studies about Internet and communications policy.

Same as ECON 11.

**(II or III ).**

**I&C SCI 20. Invitation to Computing. 4 Units.**

Foundational principles of computer science for students with no computing background that are interested in a related career. Big ideas of computing explored, including programming through use of sequential, conditional, iterative logic. Good computational practices, problem solving, and organization discussed.

**I&C SCI 31. Introduction to Programming. 4 Units.**

Introduction to fundamental concepts and techniques for writing software in a high-level programming language. Covers the syntax and semantics of data types, expressions, exceptions, control structures, input/output, methods, classes, and pragmatics of programming.

Overlaps with EECS 10, EECS 12, ENGRMAE 10.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**(II and VB ).**

**I&C SCI 32. Programming with Software Libraries. 4 Units.**

Construction of programs for problems and computing environments more varied than in I&C SCI 31. Using library modules for applications such as graphics, sound, GUI, database, Web, and network programming. Language features beyond those in I&C SCI 31 are introduced as needed.

Prerequisite: I&C SCI 31 or CSE 41. I&C SCI 31 with a grade of C or better. CSE 41 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**(II and (VA or VB) ).**

**I&C SCI 32A. Python Programming and Libraries (Accelerated). 4 Units.**

Introduces Python syntax and semantics for fundamental programming concepts. Constructing programs for varied problems and environments. Using library modules for applications such as graphics, sound, GUI, database, Web, and network programming. Accelerated course for students with previous programming background.

Prerequisite: AP Computer Science A. AP Computer Science A with a minimum score of 3. Placement via a transfer course in computer programming or equivalent experience may also be accepted upon review.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**(II and (VA or VB) ).**

**I&C SCI 33. Intermediate Programming. 4 Units.**

Intermediate-level language features and programming concepts for larger, more complex, higher-quality software. Functional programming, name spaces, modules, class protocols, inheritance, iterators, generators, operator overloading, reflection. Analysis of time and space efficiency.

Prerequisite: I&C SCI 32 or CSE 42 or I&C SCI 32A. I&C SCI 32 with a grade of C or better. CSE 42 with a grade of C or better. I&C SCI 32A with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**(II and VB ).**

**I&C SCI 45C. Programming in C/C++ as a Second Language. 4 Units.**

An introduction to the lexical, syntactic, semantic, and pragmatic characteristics of the C/C++ languages for experienced programmers. Emphasis on object-oriented programming, using standard libraries, and programming with manual garbage collection.

Prerequisite: I&C SCI 33 or CSE 43 or EECS 40. I&C SCI 33 with a grade of C or better. CSE 43 with a grade of C or better. EECS 40 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**I&C SCI 45J. Programming in Java as a Second Language. 4 Units.**

An introduction to the lexical, syntactic, semantic, and pragmatic characteristics of the Java language for experienced programmers. Emphasis on object-oriented programming, using standard libraries, and programming with automatic garbage collection.

Prerequisite: I&C SCI 33 or CSE 43. I&C SCI 33 with a grade of C or better. CSE 43 with a grade of C or better

Overlaps with I&C SCI 22, I&C SCI 23, CSE 23.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment. I&C SCI 45J may not be taken for credit after I&C SCI 22, I&C SCI 23, or CSE 23.

**I&C SCI 46. Data Structure Implementation and Analysis. 4 Units.**

Focuses on implementation and mathematical analysis of fundamental data structures and algorithms. Covers storage allocation and memory management techniques.

Prerequisite: CSE 45C or I&C SCI 45C. CSE 45C with a grade of C or better. I&C SCI 45C with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**(Vb)****I&C SCI 51. Introductory Computer Organization. 6 Units.**

Multilevel view of system hardware and software. Operation and interconnection of hardware elements. Instruction sets and addressing modes. Virtual memory and operating systems. Laboratory work using low-level programming languages.

Prerequisite: (I&C SCI 31 or CSE 41 or I&C SCI 32A) and I&C SCI 6B

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**(II)****I&C SCI 53. Principles in System Design. 4 Units.**

Introduces basic principles of system software: operating systems, compilers, and networking. Exposure to the following topics through theoretical and practical programming experiences: linking and loading, process and memory management, concurrency and synchronization, network communication, programming for performance, etc.

Corequisite: I&C SCI 53L

Prerequisite: I&C SCI 46 and I&C SCI 51. I&C SCI 46 with a grade of C or better. I&C SCI 51 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**I&C SCI 53L. Principles in System Design Library. 2 Units.**

Required laboratory section and co-requisite for I&C SCI 53.

Corequisite: I&C SCI 53

Prerequisite: I&C SCI 51

**I&C SCI 60. Computer Games and Society. 4 Units.**

The study and critical analysis of computer games as art objects, cultural artifacts, gateways to virtual worlds, educational aids, and tools for persuasion and social change. Emphasis on understanding games in their historical and cultural context.

Prerequisite: Satisfaction of the UC Entry Level Writing Requirement.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Game Science Majors have first consideration for enrollment.

**(III)****I&C SCI 61. Game Systems and Design. 4 Units.**

Principles and usage of game design elements. Introduction to technologies that support modern computer games. Students design, implement, and critique several small games.

Restriction: Computer Game Science Majors have first consideration for enrollment.

**(II)****I&C SCI 62. Game Technologies and Interactive Media. 4 Units.**

Technologies for interactive media and game design. Web-based software systems, virtual world platforms, and game engines. Emphasis is on conceptual and architectural aspects of these technologies.

Prerequisite: I&C SCI 31 or I&C SCI 32A

**I&C SCI 90. New Students Seminar. 1 Unit.**

Introduces students to the Donald Bren School of Information and Computer Sciences. Focuses on advising students making the transition to UCI, community building, and mostly surveying the technical areas within departments in ICS, via talks by faculty on their research.

Grading Option: Pass/no pass only.

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**I&C SCI 105. Digital Information Systems. 4 Units.**

Design and analysis of digital information systems. Covers underlying database and network technology, and software engineering principles used to build these systems. Evaluating digital information systems, and recognizing common flaws and vulnerabilities.

Prerequisite: I&C SCI 10 or I&C SCI 21 or CSE 21 or I&C SCI H21 or IN4MATX 41. I&C SCI 10 with a grade of C or better. I&C SCI 21 with a grade of C or better. CSE 21 with a grade of C or better. I&C SCI H21 with a grade of C or better. IN4MATX 41 with a grade of C or better

Overlaps with I&C SCI 52, IN4MATX 43.

**I&C SCI 139W. Critical Writing on Information Technology. 4 Units.**

Study and practice of critical writing and oral communication as it applies to information technology. Each student writes assignments of varying lengths, totaling at least 4,000 words.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. School of Info & Computer Sci students have first consideration for enrollment.

**(Ib)****I&C SCI 161. Game Engine Lab. 4 Units.**

The use of an open source game or graphics engine in the design and implementation of a computer game. Principles of game engine design. Students work on teams to design, implement, and evaluate new computer games based on an engine.

Prerequisite: I&C SCI 45C or CSE 45C

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**I&C SCI 162. Modeling and World Building. 4 Units.**

Use of 3D modeling software and related tools to design and create animated, textured models, and expansive virtual worlds incorporating objects, scenes, and venues for activity within game worlds and online environments.

Prerequisite or corequisite: I&C SCI 33 and (I&C SCI 6N or MATH 3A) and I&C SCI 61

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**I&C SCI 163. Mobile and Ubiquitous Games. 4 Units.**

Design and technology of mobile games, including mixed reality gaming, urban games, and locative media. Case studies of significant systems. Uses and limitations of location-based technologies. Infrastructures and their relationships to gameplay and design.

Prerequisite: I&C SCI 61 and (I&C SCI 10 or I&C SCI 31 or I&C SCI 32A)

**I&C SCI 166. Game Design. 4 Units.**

Game design takes into consideration psychology, narrative, platform features and limitations, marketing, computer science capabilities, human-computer interface principles, industry trends, aesthetic judgment, and other factors. Students focus on video game design through lectures, readings, presentations, implementation, and play testing.

Prerequisite: I&C SCI 61 and IN4MATX 43

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Game Science Majors have first consideration for enrollment.

**I&C SCI 167. Multiplayer Game Systems. 4 Units.**

Foundations and technologies that enable multiuser, networked, and persistent virtual environments. Emphasis on database design and management, network protocols, and concurrency control to accommodate large numbers of simultaneous users.

Prerequisite: I&C SCI 51

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Game Science Majors have first consideration for enrollment.

**I&C SCI 168. Multiplayer Game Project. 4 Units.**

Designing and implementing a multiuser, networked, and persistent virtual environment or game. Emphasis on cultural aspects, community building, user interface issues and design, security, privacy, and economics.

Prerequisite: IN4MATX 43 and I&C SCI 167. IN4MATX 43 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Game Science Majors have first consideration for enrollment.

**I&C SCI 169A. Capstone Game Project I. 4 Units.**

Students work in teams to design and implement a new computer game or virtual world. Emphasis on sound, art, and level design, building a community, cut scenes, production values, full utilization of hardware and software platform, and current industry trends.

Prerequisite: I&C SCI 168

Grading Option: In Progress (Letter Grade with P/NP).

Restriction: Computer Game Science Majors have first consideration for enrollment.

**I&C SCI 169B. Capstone Game Project II. 4 Units.**

Students work in teams to design and implement a new computer game or virtual world. Emphasis on sound, art, and level design, building a community, cut scenes, production values, full utilization of hardware and software platform, and current industry trends.

Prerequisite: I&C SCI 169A. I&C SCI 169A with a grade of D- or better. In Progress grade for I&C SCI 169A also accepted.

Restriction: Computer Game Science Majors have first consideration for enrollment.

**I&C SCI 192. Industrial or Public Sector Field Study. 2-4 Units.**

Students participate in an off-campus, supervised internship for a minimum of 60 hours. Students apply classroom knowledge through internship projects in the private sector or nonprofit agencies.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**I&C SCI 193. Tutoring in ICS. 2 Units.**

Principles and practice of providing technical assistance to novice learners in information and computer sciences.

Repeatability: May be taken for credit for 18 units.

Restriction: ICS Peer Tutoring Program students only.

**I&C SCI H197. Honors Seminar. 2 Units.**

An overview of computer science and selected recent trends in research. Students attend talks on current faculty research, with opportunities for discussion.

Grading Option: Pass/no pass only.

Restriction: Bren School of ICS Honors students only. Campuswide Honors Collegium students only.

**I&C SCI 398A. Teaching Assistant Training Seminar. 2 Units.**

Theories, methods, and resources for teaching computer science at the university level, particularly by teaching assistants. Classroom presentations, working with individuals, grading, motivating students. Participants will give and critique presentations and may be videotaped while teaching.

Grading Option: Satisfactory/unsatisfactory only.

**I&C SCI 398B. Advanced Teaching Assistant Seminar. 4 Units.**

Teaching computer science at the university level, emphasizing issues in teaching an entire course. Course organization, designing examinations and projects, grading, motivating students. Participants will begin to assemble teaching portfolios.

Prerequisite: I&C SCI 398A

Grading Option: Satisfactory/unsatisfactory only.

**I&C SCI 399. University Teaching. 4 Units.**

Involves on-the-job experience for Teaching Assistants.

Repeatability: May be repeated for credit unlimited times.

Restriction: Teaching assistants only.

## Software Engineering Courses

**SWE 211. Software Engineering. 4 Units.**

Study of the concepts, methods, and tools for the analysis, design, construction, and measurement of complex software-intensive systems. Underlying principles emphasized. State-of-the-art software engineering and promising research areas covered, including project management.

**SWE 212. Analysis of Programming Languages. 4 Units.**

Concepts in modern programming languages, their interaction, and the relationship between programming languages and methods for large-scale, extensible software development. Empirical analysis of programming language usage.

Same as CS 253.

**SWE 213. Requirements Engineering and Specification. 4 Units.**

Rigorous techniques in requirements engineering - the requirements definition phase of software development - with a focus on modeling and specification. Topics include notations and models for requirements specification; and methods, tools, and processes for software requirements elicitation, representation, analysis.

Restriction: Graduate students only.

**SWE 214. Program Analysis. 4 Units.**

Covers principles and concepts of automated program analysis. Topics include program representations; intra-procedural data-flow analysis; call-graph construction; pointer analysis; alias analysis; inter-procedural analysis; inter-procedural finite distributive subset problems; inter-procedural distributive environment problems; symbolic execution; and program-analysis applications.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Graduate students only.

**SWE 215. Software Analysis and Testing. 4 Units.**

Studies techniques for developing confidence in software from traditional testing schemes to integrated, multitechnique analytic approaches. Considers strengths and weaknesses and explores opportunities for synergistic technique application. Emphasis is on approaches integrated into the software process.

Restriction: Graduate students only.

**SWE 221. Software Architecture. 4 Units.**

Study of the concepts, representation techniques, development methods, and tools for architecture-centric software engineering. Topics include domain-specific software architectures, architectural styles, architecture description languages, software connectors, and dynamism in architectures.

Restriction: Graduate students only.

**SWE 225. Information Retrieval, Filtering, and Classification. 4 Units.**

Algorithms for the storage, retrieval, filtering, and classification of textual and multimedia data. The vector space model, Boolean and probabilistic queries, and relevance feedback. Latent semantic indexing; collaborative filtering; and relationship to machine learning methods.

Prerequisite: CS 161 and CS 171 and (ICS 6N or MATH 3A or MATH 6G)

Same as CS 221.

Restriction: Graduate students only.

**SWE 233. Intelligent User Interfaces. 4 Units.**

Explores example software systems and their underlying concepts that leverage computing to empower and augment human individuals in their activities. Topics span the fields of user interface design, human-computer interaction, software engineering, and cognitive computing.

Prerequisite: CS 171

Restriction: Graduate students only.

**SWE 234. Human Aspects of Software Engineering. 4 Units.**

Selected topics about the cooperative and human aspects of software engineering from the perspective that software engineering is inherently an endeavor involving human stakeholders. Topics may include but are not limited to collaboration, trust, emotion, language, gender, and software tools.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Graduate students only.

**SWE 241P. Applied Data Structures and Algorithms. 2 Units.**

Exploration of strategies to tackle computational problems whose solutions include well-known algorithms and data structures. Topics include sorting, searching, indexing, among others.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only.

**SWE 242P. Network Programming. 2 Units.**

Exploration of networking principles and concepts for the development of distributed software. Topics include programming against well-known network protocols, ports and sockets, and network APIs.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only.

**SWE 243P. Database Programming . 2 Units.**

Exploration of software development with substantial reliance on a database for storage and retrieval of data. Topics include relational databases, structured query language, relational database management systems, APIs and libraries for database programming, among others.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only.

**SWE 244P. Concurrent Programming. 2 Units.**

Exploration of concepts and mechanisms for the development of concurrent software. Topics include threads, locks, race conditions, and deadlocks, among others.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 245P. GUI Programming . 2 Units.**

Exploration of interactive software with substantial graphical user interface elements. Topics include libraries and frameworks for GUI programming, layout design and alternatives, event-driven programming, among others.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 246P. Mobile Programming. 2 Units.**

Exploration of contemporary libraries and frameworks for construction of mobile applications. Topics include emulators, mobile development standards and patterns, energy consumption issues, screen layout, among others.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 247P. Applied Information Retrieval. 2 Units.**

Exploration of principles and concepts for textual information retrieval. Topics include tokenization, inverted indexes, scored retrieval, and precision and recall.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 248P. Neural Network Programming . 2 Units.**

Exploration of the concepts, terminology, and processes for training and using deep neural networks for classification problems. Topics include tensors and tensor operations, gradient-based optimization, feature engineering and learning, and workflow of learning systems.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 249P. Applied Data Analytics. 2 Units.**

Exploration of the concepts, terminology, and processes used in supervised and unsupervised learning for classification and clustering, from a software engineering perspective. Topics include K-Nearest Neighbors, Logistic Regression, Random Forests, Support Vector Machines, K-Means, and model assessment.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only.

**SWE 250P. Web Programming. 2 Units.**

Exploration of the concepts, terminology, and popular frameworks for developing full-stack web applications. Students develop simple applications using multiple development stacks, and deploy them on the cloud.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only.

**SWE 261P. Software Testing and Debugging. 4 Units.**

Designed to teach students how to ensure high-quality software by means of testing, debugging, and other quality assurance activities. Students learn a combination of both theoretical and practical skills, including hands-on experience with modern tools and approaches.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 262P. Programming Styles. 4 Units.**

Designed to teach students the various ways software can be decomposed and put back together. Students are exposed to a variety of different programming styles and composition mechanisms.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 263P. User Experience and Interaction. 4 Units.**

Provides an introduction to the basic principles of human-computer interaction (HCI) and the pragmatic aspects of usability engineering. Topics include the fundamentals of interaction, user experience, design for usability, and evaluation of products for their usability.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 264P. Distributed Software Architecture. 4 Units.**

Study of software system architectures and architectural styles for large-scale distributed applications, and contemporary technologies and standards for their construction. Topics include client-server, peer-to-peer, publish-subscribe, REST, cloud computing, content distribution networks, scalability, latency, caching, and security, among others.

Restriction: Master of Software Engineering Degree students only.

**SWE 265P. Reverse Engineering and Modeling. 4 Units.**

Introduces theories, concepts, representations, techniques, and case studies in understanding large-scale, complex software systems. Topics include static and dynamic modeling notations, manual and (semi-)automated reverse engineering techniques, APIs, patterns, and styles. A significant, hands-on project is included.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 266P. Software Security and Dependability . 4 Units.**

Principles and concepts for the design and construction of secure software. Topics include common types of software security vulnerabilities, methods for detecting vulnerabilities, design and process methodologies to improve security of software, and techniques for assessing security properties of software.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 271P. Career and Entrepreneurship. 4 Units.**

Teaches practical skills for spoken, written, and electronic communication in a range of business and technical contexts, including promoting project ideas and portfolio development. Students practice their skills in classroom presentations and written exercises.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 272P. Project Management. 4 Units.**

Provides an introduction to project management in software engineering from several perspectives. Topics include team behavior; globally distributed work; resource estimation, scheduling, and budgeting. Students apply their knowledge in an ongoing class project.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 275P. Curricular Practical Training. 1 Unit.**

Mandatory internship in which students individually work at an outside organization to gain experience with the challenges involved in the practice of software engineering.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 276P. Capstone Project in Software Engineering. 4 Units.**

Quarter-long software-intensive project focusing on the design and implementation of a novel software system. Students are expected to bring to bear the concepts acquired during the program.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 290. Research Seminar. 2 Units.**

Forum for presentation and criticism by students of research work in progress. Presentation of problem areas and related work. Specific goals and progress of research.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**SWE 290P. Advisement. 0.3 Units.**

Mandatory weekly meetings with a faculty advisor.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 295. Special Topics in Software Engineering. 4 Units.**

Studies in selected areas of software engineering. Topics addressed vary each quarter.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**SWE 298. Thesis Supervision. 2-12 Units.**

Individual research or investigation conducted in preparation for the M.S. thesis option or the dissertation requirements for the Ph.D. program.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**SWE 299. Individual Study. 1-12 Units.**

Individual research or investigation under the direction of an individual faculty member.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Statistics Courses

### **STATS 5. Seminar in Data Science. 1 Unit.**

An introduction to the field of Data Science; intended for entering freshman and transfers.

Grading Option: Pass/no pass only.

Restriction: Information Computer Science Majors only.

### **STATS 7. Basic Statistics. 4 Units.**

Introduces basic inferential statistics including confidence intervals and hypothesis testing on means and proportions, t-distribution, Chi Square, regression and correlation. F-distribution and nonparametric statistics included if time permits.

Overlaps with STATS 8, MGMT 7, SOCECOL 13.

Restriction: STATS 7 may not be taken for credit concurrently with or after STATS 110, STATS 111, STATS 112.

**(Va)**

### **STATS 8. Introduction to Biological Statistics . 4 Units.**

Introductory statistical techniques used to collect and analyze experimental and observational data from health sciences and biology. Includes exploration of data, probability and sampling distributions, basic statistical inference for means and proportions, linear regression, and analysis of variance.

Overlaps with SOCECOL 13, MGMT 7, STATS 7.

Restriction: STATS 8 may not be taken for credit concurrently with or after STATS 110, STATS 111, STATS 112.

**(Va)**

### **STATS 67. Introduction to Probability and Statistics for Computer Science. 4 Units.**

Introduction to the basic concepts of probability and statistics with discussion of applications to computer science.

Prerequisite: MATH 2B

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment. STATS 67 may not be taken for credit concurrently with or after STATS 120B.

**(Va)**

### **STATS 68. Statistical Computing and Exploratory Data Analysis. 4 Units.**

Introduces key concepts in statistical computing. Techniques such as exploratory data analysis, data visualization, simulation, and optimization methods, will be presented in the context of data analysis within a statistical computing environment.

Prerequisite: STATS 7 and I&C SCI 31

### **STATS 110. Statistical Methods for Data Analysis I. 4 Units.**

Introduction to statistical methods for analyzing data from experiments and surveys. Methods covered include two-sample procedures, analysis of variance, simple and multiple linear regression.

Prerequisite: STATS 7 or STATS 8 or AP90 or (STATS 120A and STATS 120B and STATS 120C). AP90 with a minimum score of 3

Restriction: School of Info & Computer Sci students only.

### **STATS 111. Statistical Methods for Data Analysis II. 4 Units.**

Introduction to statistical methods for analyzing data from surveys or experiments. Emphasizes application and understanding of methods for categorical data including contingency tables, logistic and Poisson regression, loglinear models.

Prerequisite: STATS 110

Concurrent with STATS 202.

**STATS 112. Statistical Methods for Data Analysis III. 4 Units.**

Introduction to statistical methods for analyzing longitudinal data from experiments and cohort studies. Topics covered include survival methods for censored time-to-event data, linear mixed models, non-linear mixed effects models, and generalized estimating equations.

Prerequisite: STATS 111

Concurrent with STATS 203.

**STATS 115. Introduction to Bayesian Data Analysis. 4 Units.**

Basic Bayesian concepts and methods with emphasis on data analysis. Special emphasis on specification of prior distributions. Development for one-two samples and on to binary, Poisson, and linear regression. Analyses performed using free OpenBugs software.

Prerequisite: STATS 120C. Recommended: STATS 110.

**STATS 120A. Introduction to Probability and Statistics I. 4 Units.**

Introduction to basic principles of probability and statistical inference. Axiomatic definition of probability, random variables, probability distributions, expectation.

Prerequisite: MATH 2A and MATH 2B and (MATH 2D or MATH 4)

Restriction: Data Science Majors have first consideration for enrollment. Quantitative Economics majors have second consideration.

Concurrent with STATS 281A.

**STATS 120B. Introduction to Probability and Statistics II. 4 Units.**

Introduction to basic principles of probability and statistical inference. Point estimation, interval estimating, and testing hypotheses, Bayesian approaches to inference.

Prerequisite: STATS 120A

Restriction: Data Science Majors have first consideration for enrollment. Quantitative Economics majors have second consideration.

Concurrent with STATS 281B.

**STATS 120C. Introduction to Probability and Statistics III. 4 Units.**

Introduction to basic principles of probability and statistical inference. Linear regression, analysis of variance, model checking.

Prerequisite: STATS 120B and (MATH 3A or MATH 6G or I&C SCI 6N)

Restriction: Data Science Majors have first consideration for enrollment. Quantitative Economics majors have second consideration.

Concurrent with STATS 281C.

**STATS 140. Multivariate Statistical Methods. 4 Units.**

Theory and application of multivariate statistical methods. Topics include statistical inference for the multivariate normal model and its extensions to multiple samples and regression, use of statistical packages for data visualization and reduction, discriminant analysis, cluster analysis, and factor analysis.

Prerequisite: STATS 120C and (MATH 3A or I&C SCI 6N)

Concurrent with STATS 240.

**STATS 170A. Project in Data Science I. 4 Units.**

Problem definition and analysis, data representation, algorithm selection, solution validation, and results presentation. Students do team projects and lectures cover analysis alternatives, project planning, and data analysis issues. First quarter emphasizes approach selection, project planning, and experimental design.

Prerequisite: STATS 68 and STATS 112 and IN4MATX 43 and COMPSCI 122A and COMPSCI 161 and COMPSCI 178

Grading Option: In Progress (Letter Grade with P/NP).

Restriction: Seniors only. Data Science Majors have first consideration for enrollment.

**STATS 170B. Project in Data Science II. 4 Units.**

Problem definition and analysis, data representation, algorithm selection, solution validation, and results presentation. Students do team projects and lectures cover analysis alternatives, project planning, and data analysis issues. Second quarter emphasizes project execution and analysis, and presentation of results.

Prerequisite: STATS 170A. In Progress (IP) grade for STATS 170A is also accepted.

Restriction: Seniors only. Data Science Majors have first consideration for enrollment.

**STATS 199. Individual Study. 2-5 Units.**

Individual research or investigations under the direction of an individual faculty member.

Repeatability: May be repeated for credit unlimited times.

**STATS 200A. Intermediate Probability and Statistical Theory. 4 Units.**

Basics of probability theory, random variables and basic transformations, univariate distributions—discrete and continuous, multivariate distributions.

Prerequisite: STATS 120C

**STATS 200B. Intermediate Probability and Statistical Theory. 4 Units.**

Random samples, transformations, limit laws, normal distribution theory, introduction to stochastic processes, data reduction, point estimation (maximum likelihood).

Prerequisite: STATS 200A

**STATS 200C. Intermediate Probability and Statistical Theory. 4 Units.**

Interval estimation, hypothesis testing, decision theory and Bayesian inference, basic linear model theory.

Prerequisite: STATS 200B

**STATS 201. Statistical Methods for Data Analysis I. 4 Units.**

Introduction to statistical methods for analyzing data from experiments and surveys. Methods covered include two-sample procedures, analysis of variance, simple and multiple linear regression.

Prerequisite: STATS 7 or STATS 8

Restriction: STATS 201 cannot be taken for credit after taking STATS 210.

**STATS 202. Statistical Methods for Data Analysis II. 4 Units.**

Introduction to statistical methods for analyzing data from surveys or experiments. Emphasizes application and understanding of methods for categorical data including contingency tables, logistic and Poisson regression, loglinear models.

Prerequisite: STATS 201 or STATS 210

Concurrent with STATS 111.

**STATS 203. Statistical Methods for Data Analysis III. 4 Units.**

Introduction to statistical methods for analyzing longitudinal data from experiments and cohort studies. Topics covered include survival methods for censored time-to-event data, linear mixed models, non-linear mixed effects models, and generalized estimating equations.

Prerequisite: STATS 202

Concurrent with STATS 112.

**STATS 205. Introduction to Bayesian Data Analysis. 4 Units.**

Basic Bayesian concepts and methods with emphasis on data analysis. Special emphasis on specification of prior distributions. Development for one-two samples and on to binary, Poisson and linear regression. Analyses performed using free OpenBugs software.

Prerequisite: STATS 120C. Recommended: STATS 201 or STATS 210.

**STATS 210. Statistical Methods I: Linear Models. 4 Units.**

Statistical methods for analyzing data from surveys and experiments. Topics include randomization and model-based inference, two-sample methods, analysis of variance, linear regression and model diagnostics.

Prerequisite: Knowledge of basic statistics, calculus, linear algebra.

**STATS 210A. Statistical Methods I: Linear Models. 4 Units.**

Statistical methods for analyzing data from surveys and experiments. Topics include randomization and model-based inference, two-sample methods, analysis of variance, linear regression, and model diagnostics.

Prerequisite: Knowledge of basic statistics (at the level of STATS 7), calculus, and linear algebra.

Restriction: Graduate students only.

**STATS 210B. Statistical Methods II: Categorical Data. 4 Units.**

Introduction to statistical methods for analyzing discrete and non-normal outcomes. Emphasizes the development and application of methods for categorical data, including contingency tables, logistic and Poisson regression, loglinear models.

Prerequisite: STATS 210. May not be taken for graduate credit by Ph.D. students in Statistics.

Restriction: Graduate students only.

**STATS 210C. Statistical Methods III: Longitudinal Data. 4 Units.**

Introduction to statistical methods for analyzing longitudinal outcomes. Emphasizes the development and application of regression methods for correlated and censored outcomes. Methods for continuous and discrete correlated outcomes, as well as censored outcomes, are covered.

Prerequisite: STATS 210B. May not be taken for graduate credit by Ph.D. students in Statistics.

Restriction: Graduate students only.

**STATS 211. Statistical Methods II: Generalized Linear Models. 4 Units.**

Development of the theory and application of generalized linear models. Topics include likelihood estimation and asymptotic distributional theory for exponential families, quasi-likelihood and mixed model development. Emphasizes methodological development and application to real scientific problems.

Prerequisite or corequisite: STATS 210

**STATS 212. Statistical Methods III: Methods for Correlated Data. 4 Units.**

Development and application of statistical methods for analyzing correlated data. Topics covered include repeated measures ANOVA, linear mixed models, non-linear mixed effects models, and generalized estimating equations. Emphasizes both theoretical development and application of the presented methodology.

Prerequisite: STATS 211

**STATS 220A. Advanced Probability and Statistics Topics. 4 Units.**

Advanced topics in probability and statistical inference including measure theoretic probability, large sample theory, decision theory, resampling and Monte Carlo methods, nonparametric methods.

Prerequisite: STATS 200C

**STATS 220B. Advanced Probability and Statistics Topics. 4 Units.**

Advanced topics in probability and statistical inference, including measure theoretic probability, large sample theory, decision theory, resampling and Monte Carlo methods, nonparametric methods.

Prerequisite: STATS 220A and MATH 140B

**STATS 225. Bayesian Statistical Analysis. 4 Units.**

Introduction to the Bayesian approach to statistical inference. Topics include univariate and multivariate models, choice of prior distributions, hierarchical models, computation including Markov chain Monte Carlo, model checking, and model selection.

Prerequisite: STATS 205 and STATS 230

**STATS 226. Advanced Topics in Modern Bayesian Statistical Inference. 4 Units.**

Modern Bayesian Statistics: selected topics from theory of Markov chains, application of theory to modern methods of Markov chain Monte Carlo sampling; Bayesian non-parametric and semiparametric modeling, including Dirichlet Process Mixtures; Mixtures of Polya Trees.

Prerequisite: STATS 200C and STATS 225

**STATS 230. Statistical Computing Methods. 4 Units.**

Numerical computations and algorithms with applications in statistics. Topics include optimization methods including the EM algorithm, random number generation and simulation, Markov chain simulation tools, and numerical integration.

Prerequisite: Two quarters of upper-division or graduate training in probability and statistics.

Overlaps with COMPSCI 206.

**STATS 235. Modern Data Analysis Methods . 4 Units.**

Introduces selected modern tools for data analysis. Emphasizes use of computational and resampling techniques for data analyses when the data do not conform to standard toolbox of regression models and/or complexity of modeling problem threatens validity of standard methods.

Prerequisite: STATS 120C and STATS 205 and (STATS 201 or STATS 210)

Restriction: Graduate students only.

**STATS 240. Multivariate Statistical Methods. 4 Units.**

Theory and application of multivariate statistical methods. Topics include statistical inference for the multivariate normal model and its extensions to multiple samples and regression, use of statistical packages for data visualization and reduction, discriminant analysis, cluster analysis, and factor analysis.

Prerequisite: STATS 120C and (MATH 3A or I&C SCI 6N)

Concurrent with STATS 140.

**STATS 245. Time Series Analysis. 4 Units.**

Statistical models for analysis of time series from time and frequency domain perspectives. Emphasizes theory and application of time series data analysis methods. Topics include ARMA/ARIMA models, model identification/estimation, linear operators, Fourier analysis, spectral estimation, state space models, Kalman filter.

Corequisite: STATS 200C

Prerequisite or corequisite: STATS 201 or STATS 210

**STATS 250. Biostatistics. 4 Units.**

Statistical methods commonly used to analyze data arising from clinical studies. Topics include analysis of observational studies and randomized clinical trials, techniques in the analysis of survival and longitudinal data, approaches to handling missing data, meta-analysis, nonparametric methods.

Prerequisite: STATS 210

**STATS 255. Statistical Methods for Survival Data. 4 Units.**

Statistical methods for analyzing survival data from cohort studies. Topics include parametric and nonparametric methods, the Kaplan-Meier estimator, log-rank tests, regression models, the Cox proportional hazards model and accelerated failure time models, efficient sampling designs, discrete survival models.

Corequisite: STATS 202 or STATS 211.

Prerequisite: STATS 210

Restriction: Graduate students only.

**STATS 257. Introduction to Statistical Genetics. 4 Units.**

Provides students with knowledge of the basic principles, concepts, and methods used in statistical genetic research. Topics include principles of population genetics, and statistical methods for family- and population-based studies.

Prerequisite: Two quarters of upper-division or graduate training in statistical methods.

Same as EPIDEM 215.

**STATS 260. Inference with Missing Data. 4 Units.**

Statistical methods and theory useful for analysis of multivariate data with partially observed variables. Bayesian and likelihood-based methods developed. Topics include EM-type algorithms, MCMC samplers, multiple imputation, and general location model. Applications from economics, education, and medicine are discussed.

Prerequisite or corequisite: STATS 210 or STATS 200C. STATS 230.

**STATS 262. Theory and Practice of Sample Surveys. 4 Units.**

Basic techniques and statistical methods used in designing surveys and analyzing collected survey data. Topics include simple random sampling, ratio and regression estimates, stratified sampling, cluster sampling, sampling with unequal probabilities, multistage sampling, and methods to handle nonresponse.

Prerequisite: STATS 120C

**STATS 265. Causal Inference. 4 Units.**

Various approaches to causal inference focusing on the Rubin causal model and propensity-score methods. Topics include randomized experiments, observational studies, non-compliance, ignorable and non-ignorable treatment assignment, instrumental variables, and sensitivity analysis. Applications from economics, politics, education, and medicine.

Prerequisite: STATS 200C and STATS 210

**STATS 270. Stochastic Processes. 4 Units.**

Introduction to the theory and application of stochastic processes. Topics include Markov chains, continuous-time Markov processes, Poisson processes, and Brownian motion. Applications include Markov chain Monte Carlo methods and financial modeling (for example, option pricing).

Prerequisite: STATS 120C

Overlaps with MATH 271A, MATH 271B, MATH 271C.

**STATS 275. Statistical Consulting. 4 Units.**

Training in collaborative research and practical application of statistics. Emphasis on effective communication as it relates to identifying scientific objectives, formulating a statistical analysis plan, choice of statistical methods, and interpretation of results and their limitations to non-statisticians.

Prerequisite: STATS 203 or STATS 212 or STATS 210C. STATS 203 with a grade of B or better. STATS 212 with a grade of B or better. STATS 210C with a grade of B or better

Restriction: Graduate students only.

**STATS 280. Seminar in Statistics. 0.5 Units.**

Periodic seminar series covering topics of current research in statistics and its application.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**STATS 281A. Introduction to Probability and Statistics I. 4 Units.**

Introduction to basic principles of probability and statistical inference. Axiomatic definition of probability, random variables, probability distributions, expectation.

Restriction: Graduate students only.

Concurrent with STATS 120A.

**STATS 281B. Introduction to Probability and Statistics II. 4 Units.**

Introduction to basic principles of probability and statistical inference. Point estimation, interval estimating, and testing hypotheses, Bayesian approaches to inference.

Restriction: Graduate students only.

Concurrent with STATS 120B.

**STATS 281C. Introduction to Probability and Statistics III. 4 Units.**

Introduction to basic principles of probability and statistical inference. Contingency table analysis, linear regression, analysis of variance, model checking.

Restriction: Graduate students only.

Concurrent with STATS 120C.

**STATS 295. Special Topics in Statistics. 4 Units.**

Studies in selected areas of statistics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**STATS 298. Thesis Supervision. 2-12 Units.**

Individual research or investigation conducted in preparation for the M.S. thesis option or the dissertation requirements for the Ph.D. program.

Repeatability: May be repeated for credit unlimited times.

**STATS 299. Individual Study. 2-12 Units.**

Individual research or investigation under the direction of an individual faculty member.

Repeatability: May be repeated for credit unlimited times.

## Computer Game Science, B.S.

**NOTE:** Effective Fall 2021, the B.S. in Computer Game Science will be renamed as the B.S. in Game Design and Interactive Media. For additional information on the program, visit the following website: <https://www.informatics.uci.edu/undergrad/bs-game-design-interactive-media> (<https://www.informatics.uci.edu/undergrad/bs-computer-game-science/>)

The Computer Game Science major gives students a strong foundation in introductory information and computer science, an extensive education in technologies and design practices associated with computer games, and an opportunity to focus in two areas of particular interest to the student. Students who complete the major will be able to create interactive and human-centered game designs; implement games using skills in modeling, graphics, software engineering, hardware architectures, human interfaces, and aesthetics; and evaluate games and game technology for their use in education, art, and social change.

Freshman Applicants: See the Undergraduate Admissions section.

**Transfer Applicants:**

Transfer applicants who satisfactorily complete course prerequisites will be given preference for admission. All applicants must complete the following required courses: one year of approved calculus, one year of object-oriented programming (python, java, C++), additional courses as specified by the major, and completion of lower-division writing. Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. Visit the *UCI Office of Admissions website* for information on transfer requirements for our major.

**Lower-division**

A. Select one of the following series:

I&C SCI 31- 32- 33

Introduction to Programming  
and Programming with Software Libraries  
and Intermediate Programming

or

I&C SCI 32A- 33

Python Programming and Libraries (Accelerated)  
and Intermediate Programming

B. Complete:

I&C SCI 45C

Programming in C/C++ as a Second Language

I&C SCI 46

Data Structure Implementation and Analysis

I&C SCI 51

Introductory Computer Organization

I&C SCI 60

Computer Games and Society

I&C SCI 61

Game Systems and Design

I&C SCI 62

Game Technologies and Interactive Media

IN4MATX 43

Introduction to Software Engineering

MATH 2A

Single-Variable Calculus

MATH 2B

Single-Variable Calculus

I&C SCI 6N

Computational Linear Algebra

or MATH 3A

Introduction to Linear Algebra

I&C SCI 6B

Boolean Logic and Discrete Structures

I&C SCI 6D

Discrete Mathematics for Computer Science

STATS 67

Introduction to Probability and Statistics for Computer Science

PHYSICS 3A

Basic Physics I

FLM&MDA 85A

Introduction to Film and Visual Analysis

or FLM&MDA 85C

New Media and Digital Technologies

**Upper-division**

A. Computer Game Science Core Requirements

COMPSCI 171	Introduction to Artificial Intelligence
I&C SCI 161	Game Engine Lab
I&C SCI 162	Modeling and World Building
I&C SCI 167	Multiplayer Game Systems
I&C SCI 168	Multiplayer Game Project
I&C SCI 169A- 169B	Capstone Game Project I and Capstone Game Project II
and select two of the following:	
COMPSCI 112	Computer Graphics
I&C SCI 163	Mobile and Ubiquitous Games
I&C SCI 166	Game Design
B. Select two of the following:	
COMPSCI 122A	Introduction to Data Management
COMPSCI 132	Computer Networks
COMPSCI 143A	Principles of Operating Systems
COMPSCI 152	Computer Systems Architecture
IN4MATX 113	Requirements Analysis and Engineering
IN4MATX 121	Software Design: Applications
IN4MATX 131	Human Computer Interaction
C. CGS Elective Courses:	
Five additional courses:	
1. Two courses from A-C.	
2. Three courses must be in the same Bren ICS track.	

**Bren ICS Tracks:****Algorithms**

COMPSCI 161	Design and Analysis of Algorithms
COMPSCI 162	Formal Languages and Automata
COMPSCI 163	Graph Algorithms
COMPSCI 164	Computational Geometry and Geometric Modeling
COMPSCI 165	Project In Algorithms And Data Structures

**Artificial Intelligence**

COMPSCI 171	Introduction to Artificial Intelligence
COMPSCI 175	Project in Artificial Intelligence
COMPSCI 177	Applications of Probability in Computer Science
COMPSCI 178	Machine Learning and Data-Mining
COMPSCI 179	Algorithms for Probabilistic and Deterministic Graphical Models

**Computational Biology**

COMPSCI 183	Introduction to Computational Biology
COMPSCI 184A	Artificial Intelligence in Biology and Medicine
COMPSCI 184C	Computational Systems Biology

**Computer Graphics and Vision**

COMPSCI 111	Digital Image Processing
COMPSCI 112	Computer Graphics
COMPSCI 114	Projects in Advanced 3D Computer Graphics
COMPSCI 116	Computational Photography and Vision
COMPSCI 117	Project in Computer Vision

**Computer Networks**

COMPSCI 131	Parallel and Distributed Computing
COMPSCI 132	Computer Networks
COMPSCI 133	Advanced Computer Networks
COMPSCI 134	Computer and Network Security
COMPSCI 137/IN4MATX 124	Internet Applications Engineering

**Databases**

COMPSCI 121/IN4MATX 141	Information Retrieval
COMPSCI 122A	Introduction to Data Management
COMPSCI 122B	Project in Databases and Web Applications
COMPSCI 125	Next Generation Search Systems

**Hardware**

COMPSCI 145	Embedded Software
COMPSCI 151	Digital Logic Design
COMPSCI 153	Logic Design Laboratory
COMPSCI 154	Computer Design Laboratory

**Human-Computer Interaction**

IN4MATX 131	Human Computer Interaction
IN4MATX 132	Project in Human-Computer Interaction Requirements and Evaluation
IN4MATX 133	User Interaction Software
IN4MATX 134	Project in User Interaction Software

**Operating Systems**

COMPSCI 143A	Principles of Operating Systems
COMPSCI 143B	Project in Operating System Organization
COMPSCI 146	Programming in Multitasking Operating Systems

**Programming Languages and Compilers**

IN4MATX 101	Concepts in Programming Languages I (same as COMPSCI 141)
IN4MATX 102	Concepts of Programming Language II
COMPSCI 142A	Compilers and Interpreters
COMPSCI 142B	Language Processor Construction

**Social and Organizational Computing**

IN4MATX 151	Project Management
IN4MATX 153	Computer Supported Cooperative Work
IN4MATX 161	Social Analysis of Computing
IN4MATX 162W	Organizational Information Systems
IN4MATX 163	Project in the Social and Organizational Impacts of Computing
IN4MATX 171	Introduction to Medical Informatics

**Software Engineering**

IN4MATX 113	Requirements Analysis and Engineering
IN4MATX 115	Software Testing, Analysis, and Quality Assurance
IN4MATX 117	Project in Software System Design
IN4MATX 121	Software Design: Applications
IN4MATX 122	Software Design: Structure and Implementation
IN4MATX 124	Internet Applications Engineering (same as COMPSCI 137)

**Non-Track Courses (some of these courses have prerequisites that are not part of the CGS major):****Computer Game Science**

I&C SCI 162	Modeling and World Building
I&C SCI 163	Mobile and Ubiquitous Games
I&C SCI 166	Game Design

**Business Management**

MGMT 101	Management Science
MGMT 102	Managing Organizational Behavior
MGMT 105	Introduction to Marketing
MGMT 154	Global Marketing
MGMT 155	Brand Management

**Cognitive Science**

PSYCH 130A	Perception and Sensory Processes
PSYCH 131A	Vision

PSYCH 131B	Hearing
PSYCH 135M	The Mind/Body Problem
PSYCH 140C	Cognitive Science
<b>Mathematics</b>	
MATH 112A- 112B- 112C	Introduction to Partial Differential Equations and Applications and Introduction to Partial Differential Equations and Applications and Introduction to Partial Differential Equations and Applications
MATH 115	Mathematical Modeling
MATH 121A- 121B	Linear Algebra and Linear Algebra
<b>Film and Media Studies</b>	
FLM&MDA 113	Narrative/Image
FLM&MDA 114	Film, Media, and the Arts
FLM&MDA 117A	Introduction to Screenwriting
FLM&MDA 144	Studies in New Media

With prior approval of the ICS Associate Dean for Student Affairs, a student may design a new track, or an Independent Study, Honors Research, or Special Topics course may be substituted for a course in a track. Computer Game Science (CGS) elective courses may not be counted as part of the Management minor. NOTE: All proposed courses must be upper-division and at least 4 units in value.

**Major and minor restrictions:** Click on the 'Majors/Minors Restrictions' tab at the top of this page.

COMPSCI 112, IC SCI 163, or IC SCI 166	I&C SCI 167	COMPSCI 112, IC SCI 163, or IC SCI 166
COMPSCI 171	COMPSCI 122A, IN4MATX 113, IN4MATX 121, or IN4MATX 131 <sup>3</sup>	I&C SCI 168
FLM&MDA 85A or 85C <sup>2</sup>	U-D Writing	Computer Game Science Elective
PHYSICS 3A		
<b>Senior</b>		
<b>Fall</b>	<b>Winter</b>	<b>Spring</b>
I&C SCI 169A	I&C SCI 169B	Computer Game Science Elective
General Education III	Computer Game Science Elective	General Education VI
General Education IV	General Education IV	General Education VIII

<sup>1</sup> Fulfills GE III. Note, you must satisfy the UC Entry Level Writing requirement to enroll in I&C SCI 60.

<sup>2</sup> Fulfills GE IV.

<sup>3</sup> Select two of these.

#### NOTES:

1. Students are advised that this sample program lists the minimum requirements; it is possible that students may have to take additional courses to prepare for required courses.

2. The lower-division writing requirement must be completed by the end of the seventh quarter at UCI.

3. This is only a sample plan. Course offerings may be moved due to unforeseen circumstances. It is strongly recommended that students meet with an academic advisor to create an academic plan tailored to meet their specific areas of interest.

A wide variety of careers and graduate programs are open to Computer Game Science (CGS) graduates. The video game industry is comparable in size to the film and music industries, and job growth projections are strong for people with strong technical backgrounds. Many other fields, including mobile software development, interactive entertainment, and training and education software have demand for similar skill sets and knowledge. CGS graduates are well-trained in computer science, and can thus pursue graduate programs or any career that involves designing, implementing, evaluating, or interacting with computer-based systems.

## Department of Computer Science

**Alexandru Nicolau, Department Chair**

**Sandy Irani, Department Vice Chair**

3019 Donald Bren Hall

949-824-1546

<http://www.cs.uci.edu/>

With over 56 full-time faculty members, 300+ graduate students, and more than 2,000 undergraduates, we provide a world-class research environment spanning not only the core areas of computer science — including computer architecture, system software, networking and distributed computing, data and information systems, the theory of computation, artificial intelligence, and computer graphics — but also highly interdisciplinary programs, such as biomedical informatics, data mining, security and privacy, and ubiquitous computing.

The diverse research interests of our faculty are reflected directly in our educational programs. Computer Science faculty teach most of the undergraduate and graduate courses for the degree programs in both Computer Science and Information and Computer Science. We jointly offer with our colleagues in The Henry Samueli School of Engineering an undergraduate degree in Computer Science and Engineering, as well as the graduate program in Networked Systems. We also have a major in Computer Game Science, jointly offered with the Department of Informatics.

Our department collaborates with many other institutions in the United States and abroad, and its doors are always open to a multitude of visitors and collaborators from all corners of the globe.

- Bioinformatics, Minor
- Computer Science and Engineering, B.S.
- Computer Science, B.S.
- Computer Science, M.S.
- Computer Science, Ph.D.
- Master of Computer Science
- Mathematical, Computational, and Systems Biology, M.S.
- Mathematical, Computational, and Systems Biology, Ph.D.
- Networked Systems, M.S.

## Faculty

Mohammad A. Al Faruque, Ph.D. University of Kaiserslautern, *Chair of Emulex Career Development and Associate Professor of Electrical Engineering and Computer Science; Computer Science; Mechanical and Aerospace Engineering* (cyber-physical systems, internet of things, embedded systems, CPS security)

Shannon L. Alfaro, M.S. University of California, Irvine, *Continuing Lecturer of Computer Science* (design/analysis of combinational and sequential systems using SSI/MSI/LSI modules, hardware/firmware implementation of algorithms)

Animashree Anandkumar, Ph.D. Cornell University, *Assistant Professor of Computer Science* (statistical inference and learning of graphical models, scalable network algorithms)

Nader Bagherzadeh, Ph.D. University of Texas at Austin, *Professor of Electrical Engineering and Computer Science; Computer Science* (parallel processing, computer architecture, computer graphics, memory systems, 3-D ICs, heterogeneous computing, low-power processing)

Pierre F. Baldi, Ph.D. California Institute of Technology, *Director of the Institute for Genomics and Bioinformatics and Distinguished Professor of Computer Science; Biological Chemistry; Biomedical Engineering; Developmental and Cell Biology; Mathematics* (artificial intelligence and machine learning, biomedical informatics, databases and data mining, environmental informatics, statistics and statistical theory)

Lubomir Bic, Ph.D. University of California, Irvine, *Professor of Computer Science* (parallel and distributed computing, mobile agents, networks, and distributed systems)

Elaheh Bozorgzadeh, Ph.D. University of California, Los Angeles, *Professor of Computer Science* (computer architecture and design, design automation and synthesis for embedded systems, VLSI CAD, reconfigurable computing)

Anton Burtsev, Ph.D. University of Utah, *Assistant Adjunct Professor of Computer Science* (novel low-latency datacenters, microkernels, virtualization, datacenter environments)

Carter Butts, Ph.D. Carnegie Mellon University, *Professor of Sociology; Computer Science; Electrical Engineering and Computer Science; Statistics* (mathematical sociology, social networks, quantitative methodology, human judgment and decision making, economic sociology)

Michael Carey, Ph.D. University of California, Berkeley, *Donald Bren Professor of Information & Computer Sciences and Distinguished Professor of Computer Science* (databases and data mining, parallel and distributed systems)

Aparna Chandramowlishwaran, Ph.D. Georgia Institute of Technology, *Assistant Professor of Electrical Engineering and Computer Science; Computer Science; Mechanical and Aerospace Engineering* (high-performance computing, domain-specific compilers, algorithm-architecture co-design, data analysis, and scientific computing)

Peter Chang, M.D. Northwestern University, *Assistant Professor in Residence of Radiological Sciences; Computer Science; Pathology and Laboratory Medicine*

Qi Alfred Chen, Ph.D. University of Michigan, *Assistant Professor of Computer Science* (smart systems and IoT)

Rina Dechter, Ph.D. University of California, Los Angeles, *UCI Chancellor's Professor of Computer Science* (automated reasoning, knowledge-representation, planning and learning)

Michael B. Dillencourt, Ph.D. University of Maryland, College Park, *Professor of Computer Science* (algorithms and complexity, networks and distributed systems, data structures, computational geometry, graph algorithms)

Rainer B. Doemer, Ph.D. Dortmund University, *Professor of Electrical Engineering and Computer Science; Computer Science* (system-level design, embedded computer systems, design methodologies, specification and modeling languages, advanced parallel simulation, integration of hardware and software systems)

Nikil D. Dutt, Ph.D. University of Illinois at Urbana–Champaign, *UCI Chancellor's Professor of Computer Science; Cognitive Sciences; Electrical Engineering and Computer Science* (embedded systems, computer architecture, electronic design automation, software systems, brain-inspired architectures and computing)

Magda S. El Zarki, Ph.D. Columbia University, *Professor of Computer Science; Informatics* (telecommunications, networks, wireless communication, video transmission)

David A. Eppstein, Ph.D. Columbia University, *UCI Chancellor's Professor of Computer Science* (algorithms and complexity; computer graphics and visualization; geometric optimization)

Daniel Epstein, Ph.D. University of Washington, *Assistant Professor of Informatics; Computer Science* (human-computer interaction, personal informatics, ubiquitous computing, social computing, health informatics)

Julian Feldman, Ph.D. Carnegie Institute of Technology, *Professor Emeritus of Computer Science*

Charles C. Fowlkes, Ph.D. University of California, Berkeley, *Professor of Computer Science; Cognitive Sciences* (artificial intelligence, computer vision, machine learning, computational biology)

Roy Fox, Ph.D. The Hebrew University of Jerusalem, *Assistant Professor of Computer Science* (theory and applications of reinforcement learning, dynamical systems, information theory, robotics)

Michael S. Franz, Ph.D. Swiss Federal Institute of Technology in Zurich, *UCI Chancellor's Professor of Computer Science; Electrical Engineering and Computer Science* (systems software, particularly compilers and virtual machines, trustworthy computing, software engineering)

Daniel H. Frost, M.S. University of California, Irvine, *Professor of Teaching Emeritus of Computer Science* (artificial intelligence, software engineering, computer graphics, teaching of programming)

Richard Futrell, Ph.D. Massachusetts Institute of Technology, *Assistant Professor of Computer Science; Language Science* (language processing, Bayesian modeling, NLP)

Sergio Gago-Masague, Ph.D., *Assistant Professor of Teaching of Computer Science* (pervasive computing, user-centric software design, human computer interaction, serious games)

Irene Gassko, Ph.D. Boston University, *Lecturer of Computer Science*

Jean-Luc Gaudiot, Ph.D. University of California, Los Angeles, *Professor of Electrical Engineering and Computer Science; Computer Science* (parallel processing, computer architecture, processor architecture)

Tony D. Givargis, Ph.D. University of California, Riverside, *Professor of Computer Science* (embedded systems, platform-based system-on-a-chip design, low-power electronics)

Michael T. Goodrich, Ph.D. Purdue University, *UCI Chancellor's Professor of Computer Science* (computer security, algorithm design, data structures, Internet algorithmics, geometric computing, graphic drawing)

Richard H. Granger, Ph.D. Yale University, *Professor Emeritus of Computer Science*

Ian G. Harris, Ph.D. University of California, San Diego, *Professor of Computer Science; Electrical Engineering and Computer Science* (hardware/software covalidation, manufacturing test)

Wayne B. Hayes, Ph.D. University of Toronto, *Associate Professor of Computer Science* (biomedical informatics and computational biology, computer vision, scientific and numerical computing)

Dan S. Hirschberg, Ph.D. Princeton University, *Professor of Computer Science* (analyses of algorithms, concrete complexity, data structures, models of computation)

Mustafa Ibrahim, M.S. California State University, *Lecturer of Computer Science* (software engineering)

Alexander T. Ihler, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Computer Science* (artificial intelligence and machine learning, probabilistic models, sensor networks, and distributed systems)

Sandra S. Irani, Ph.D. University of California, Berkeley, *Professor of Computer Science* (algorithms and complexity)

Ramesh Chandra Jain, Ph.D. Indian Institute of Technology Kharagpur, *Donald Bren Professor of Information & Computer Sciences and Distinguished Professor of Computer Science* (computer vision, multimedia computing, image databases, machine vision, intelligent systems)

Stanislaw M. Jarecki, Ph.D. Massachusetts Institute of Technology, *Professor of Computer Science* (algorithms and complexity, applies and distributed cryptograph)

Scott A. Jordan, Ph.D. University of California, Berkeley, *Professor of Computer Science; Electrical Engineering and Computer Science* (pricing and differentiated services in the Internet, resource allocation in wireless networks, telecommunications policy)

Sang-Woo Jun, Ph.D. Massachusetts Institute of Technology, *Assistant Professor of Computer Science* (computer systems architecture, hardware acceleration, non-volatile memory)

Kalev Kask, Ph.D. University of California, Irvine, *Lecturer of Computer Science* (artificial intelligence focusing on automated reasoning, graphical models)

David G. Kay, J.D. Loyola Marymount University, *Professor Emeritus of Teaching of Informatics; Computer Science* (computer law, computer science education)

Solmaz S. Kia, Ph.D. University of California, Irvine, *Assistant Professor of Mechanical and Aerospace Engineering; Computer Science* (systems and control, decentralized/distributed algorithm design for multi-agent systems, cooperative robotics)

Dennis F. Kibler, Ph.D. University of California, Irvine, *Professor Emeritus of Computer Science* (artificial intelligence and machine learning, gene regulation, biological genomes)

Raymond O. Klefstad, Ph.D. University of California, Irvine, *Associate Professor of Teaching of Computer Science* (embedded systems, networks and distributed systems, programming languages and systems)

Alfred Kobsa, Ph.D. University of Vienna, *Professor Emeritus of Informatics; Computer Science* (user modeling, human-computer interaction, artificial intelligence, cognitive science, interdisciplinary computer science)

Jeffrey L. Krichmar, Ph.D. George Mason University, *Professor of Cognitive Sciences; Computer Science* (computational neuroscience, robotics)

Fadi J. Kurdahi, Ph.D. University of Southern California, *Director, Center for Embedded Computer Systems and Associate Dean for Graduate and Professional Studies and Professor of Electrical Engineering and Computer Science; Computer Science* (embedded and cyber-physical systems, VLSI system design, design automation of digital systems)

Richard H. Lathrop, Ph.D. Massachusetts Institute of Technology, *Professor of Computer Science* (modeling structure and function, machine learning, intelligent systems and molecular biology, protein structure/function prediction)

Marco Levorato, Ph.D. University of Padua, *Assistant Professor of Computer Science; Electrical Engineering and Computer Science* (artificial intelligence and machine learning, networks and distributed systems, statistics and statistical theory, stochastic modeling, signal processing)

Chen Li, Ph.D. Stanford University, *Professor of Computer Science* (databases and text processing, multimedia databases, data integration)

Kwei-Jay Lin, Ph.D. University of Maryland, College Park, *Professor of Electrical Engineering and Computer Science; Computer Science* (real-time systems, distributed systems, service-oriented computing)

George S. Lueker, Ph.D. Princeton University, *Professor Emeritus of Computer Science* (algorithms and complexity)

Scott Mahlke, Ph.D. University of Illinois at Urbana-Champaign, *Professor of Computer Science* (custom-fit architectures for energy efficiency and reliability, compilers and run-time systems)

Aditi Majumder, Ph.D. University of North Carolina at Chapel Hill, *Professor of Computer Science; Electrical Engineering and Computer Science* (novel displays and cameras for computer graphics and visualization, human-computer interaction, applied computer vision)

Stephan Mandt, Ph.D. University of Cologne, *Assistant Professor of Computer Science* (artificial intelligence and machine learning, probabilistic modeling, Bayesian deep learning, variational inference)

Athina Markopoulou, Ph.D. Stanford University, *Nicolaos G. and Sue Curtis Alexopoulos Presidential Chair in Electrical Engineering and Computer Science and Department Chair and Professor of Electrical Engineering and Computer Science; Computer Science* (networking: including network protocols, network measurement and analysis, mobile systems and mobile data analysis, network security and privacy)

Gopi Meenakshisundaram, Ph.D. University of North Carolina at Chapel Hill, *Professor of Computer Science* (geometry and topology for computer graphics, image-based rendering, object representation, surface reconstruction, collision detection, virtual reality, telepresence)

Sharad Mehrotra, Ph.D. University of Texas at Austin, *Professor of Computer Science* (databases and data mining, multimedia computing, networks and distributed systems)

Milena Mihail, Ph.D. Harvard University, *Associate Professor of Computer Science* (randomization, expander graphs, Markov chains, network design)

Eric D. Mjolsness, Ph.D. California Institute of Technology, *Professor of Computer Science; Mathematics* (artificial intelligence and machine learning, biomedical informatics and computational biology, applied mathematics, mathematical biology, modeling languages)

Emre Neftci, Ph.D. University of Zurich, *Assistant Professor of Cognitive Sciences; Computer Science* (computational neuroscience, neuromorphic engineering, machine learning)

Alexandru Nicolau, Ph.D. Yale University, *Department Chair and Professor of Computer Science* (architecture, parallel computation, programming languages and compilers)

Trina Norden-Krichmar, Ph.D. University of California, San Diego, *Assistant Professor of Epidemiology; Biological Chemistry; Computer Science; Pharmaceutical Sciences*

Marios Papaefthymiou, Ph.D. Massachusetts Institute of Technology, *Ted and Janice Smith Family Foundation Dean and Professor of Computer Science* (computer architecture and design, networks and distributed systems)

Richard Pattis, M.S. Stanford University, *Professor of Teaching of Computer Science; Informatics* (MicroWorlds for teaching programming, debugging, computational tools for non-computer scientists)

Amelia C. Regan, Ph.D. University of Texas at Austin, *Professor of Computer Science* (algorithm development and complexity, networks and distributed systems, network optimization)

Ardalan Amiri Sani, Ph.D. Rice University, *Assistant Professor of Computer Science* (involves building efficient, high performance, and reliable systems)

Isaac D. Scherson, Ph.D. Weizmann Institute of Science, *Professor of Computer Science; Electrical Engineering and Computer Science* (parallel computing architectures, massively parallel systems, parallel algorithms, interconnection networks, performance evaluation)

Babak Shahbaba, Ph.D. University of Toronto, *Professor of Statistics; Computer Science*

Phillip C-Y Sheu, Ph.D. University of California, Berkeley, *Professor of Electrical Engineering and Computer Science; Biomedical Engineering; Computer Science* (semantic computing, robotic computing, artificial intelligence, biomedical computing, multimedia computing)

Michael Shindler, Ph.D. University of California, Los Angeles, *Assistant Professor of Teaching of Computer Science* (theory and machine learning, computer science education)

Alice Silverberg, Ph.D. Princeton University, *Distinguished Professor Emerita of Mathematics; Computer Science* (algebra and number theory)

Sameer Singh, Ph.D. University of Massachusetts Amherst, *Assistant Professor of Computer Science; Electrical Engineering and Computer Science; Language Science* (artificial intelligence and machine learning, databases and data mining, scientific and numerical computing)

Padhraic J. Smyth, Ph.D. California Institute of Technology, *Professor of Computer Science; Education; Statistics* (artificial intelligence and machine learning, pattern recognition, applied statistics, data mining, information theory)

Mark Steyvers, Ph.D. Indiana University, *Professor of Cognitive Sciences; Computer Science; Psychological Science* (higher-order cognition, cognitive neuroscience, computational modeling, collective intelligence)

Erik B. Sudderth, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Computer Science; Statistics* (artificial intelligence and machine learning, computer vision, statistics and statistical theory)

Alexander W. Thornton, B.S. University of California, Irvine, *Continuing Lecturer of Computer Science*

Gene Y. Tsudik, Ph.D. University of Southern California, *UCI Chancellor's Professor of Computer Science* (computer and network security and privacy; applied cryptography)

Kojiro Umezaki, M.A. Dartmouth College, *Professor of Music; Computer Science*

Vijay Vazirani, Ph.D. University of California, Berkeley, *Distinguished Professor of Computer Science* (algorithms and complexity, scientific and numerical computing)

Alexander Veidenbaum, Ph.D. University of Illinois at Urbana-Champaign, *Professor of Computer Science* (computer architecture, embedded systems, compilers, programming languages and systems, database and data mining)

Nalini Venkatasubramanian, Ph.D. University of Illinois at Urbana-Champaign, *Professor of Computer Science* (multimedia computing, networks and distributed systems, global information infrastructure, multiple resource management services)

Richert Wang, Ph.D. University of California, Irvine, *Lecturer of Computer Science*

Jennifer Wong-Ma, Ph.D. University of California, Los Angeles, *Associate Professor of Teaching of Computer Science* (computer architecture and design, embedded systems, hardware intellectual property protection, statistical optimization)

Xiaohui Xie, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Computer Science; Developmental and Cell Biology* (computational biology, bioinformatics, genomics, neural computation, machine learning)

Xiangmin Xu, Ph.D. Vanderbilt University, *Professor of Anatomy and Neurobiology; Biomedical Engineering; Computer Science*

Charles S. Zender, Ph.D. University of Colorado Boulder, *Professor of Earth System Science; Computer Science*

Hong-Kai Zhao, Ph.D. University of California, Los Angeles, *Chancellor's Professor of Mathematics; Computer Science* (applied and computational mathematics, inverse problems and imaging)

Shuang Zhao, Ph.D. Cornell University, *Assistant Professor of Computer Science* (computer graphics with a focus on material appearance modeling and physically-based rendering)

## Courses

### **COMPSCI 103. Advanced Programming and Problem Solving with C++. 4 Units.**

Advanced programming language concepts for more complex, higher performance software design. Builds depth of programming skills in C++ as a foundation for upper-division courses and projects. Focuses on strengthening programming, debugging, and problem solving skills.

Prerequisite: I&C SCI 45C

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

### **COMPSCI 111. Digital Image Processing. 4 Units.**

Introduction to the fundamental concepts of digital signal and image processing as applicable in areas such as multimedia, graphics, AI, data mining, databases, vision, or video games. Topics include image representation, space- and frequency-domain transformations, filters, segmentation, and compression.

Prerequisite: (I&C SCI 46 or CSE 46) and I&C SCI 6D and (MATH 3A or I&C SCI 6N). I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better. I&C SCI 6D with a grade of C or better. MATH 3A with a grade of C or better. I&C SCI 6N with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 112. Computer Graphics. 4 Units.**

Introduction to the fundamental principles of 3D computer graphics including polygonal modeling, geometric transformations, visibility algorithms, illumination models, texturing, and rasterization. Use of an independently-learned 3D graphics API to implement these techniques.

Prerequisite: (I&C SCI 45C or CSE 45C) and (MATH 3A or I&C SCI 6N). I&C SCI 45C with a grade of C or better. CSE 45C with a grade of C or better. MATH 3A with a grade of C or better. I&C SCI 6N with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 113. Computer Game Development. 4 Units.**

Introduction to the principles of interactive 2D and 3D computer game development. Concepts in computer graphics, algorithms, software engineering, art and graphics, music and sound, story analysis, and artificial intelligence are presented and are the basis for student work.

Prerequisite: COMPSCI 112 or COMPSCI 171 or IN4MATX 121 or ART 106B or I&C SCI 163 or I&C SCI 166

Same as IN4MATX 125.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 114. Projects in Advanced 3D Computer Graphics. 4 Units.**

Projects in advanced 3D graphics such as illumination, geometric modeling, visualization, and animation. Topics include physically based and global illumination, solid modeling, curved surfaces, multiresolution modeling, image-based rendering, basic concepts of animation, and scientific visualization.

Prerequisite: COMPSCI 112 and (I&C SCI 45C or CSE 45C). I&C SCI 45C with a grade of C or better. CSE 45C with a grade of C or better.

Recommended: COMPSCI 161 or CSE 161 or COMPSCI 164 or COMPSCI 165.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 115. Computer Simulation. 4 Units.**

Discrete event-driven simulation; continuous system simulation; basic probability as pertaining to input distributions and output analysis; stochastic and deterministic simulation; static and dynamic system simulation.

Prerequisite: I&C SCI 6B and (I&C SCI 6N or MATH 3A) and (STATS 67 or STATS 7) and STATS 120A and I&C SCI 51 and IN4MATX 43. I&C SCI 6B with a grade of C or better. I&C SCI 6N with a grade of C or better. MATH 3A with a grade of C or better. STATS 67 with a grade of C or better. STATS 7 with a grade of C or better. STATS 120A with a grade of C or better. I&C SCI 51 with a grade of C or better. IN4MATX 43 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 116. Computational Photography and Vision. 4 Units.**

Introduces the problems of computer vision through the application of computational photography. Specific topics include photo-editing (image warping, compositing, hole filling), panoramic image stitching, and face detection for digital photographs.

Prerequisite: I&C SCI 6D and (MATH 6G or MATH 3A or I&C SCI 6N) and MATH 2B and (I&C SCI 46 or CSE 46). I&C SCI 6D with a grade of C or better. MATH 6G with a grade of C or better. MATH 3A with a grade of C or better. I&C SCI 6N with a grade of C or better. MATH 2B with a grade of C or better. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 117. Project in Computer Vision. 4 Units.**

Students undertake construction of a computer vision system. Topics include automatically building 3D models from photographs, searching photo collections, robot navigation, and human motion tracking.

Prerequisite: I&C SCI 6D and (MATH 3A or I&C SCI 6N) and MATH 2B and (I&C SCI 46 or CSE 46) and (COMPSCI 112 or COMPSCI 116 or COMPSCI 171 or COMPSCI 178). I&C SCI 6D with a grade of C or better. MATH 3A with a grade of C or better. I&C SCI 6N with a grade of C or better. MATH 2B with a grade of C or better. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 121. Information Retrieval. 4 Units.**

An introduction to information retrieval including indexing, retrieval, classifying, and clustering text and multimedia documents.

Prerequisite: (I&C SCI 45C or I&C SCI 45J) and (STATS 7 or STATS 67). I&C SCI 45C with a grade of C or better. I&C SCI 45J with a grade of C or better

Same as IN4MATX 141.

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**COMPSCI 122A. Introduction to Data Management. 4 Units.**

Introduction to the design of databases and the use of database management systems (DBMS) for applications. Topics include entity-relationship modeling for design, relational data model, relational algebra, relational design theory, and Structured Query Language (SQL) programming.

Prerequisite: I&C SCI 33 or CSE 43 or EECS 114. I&C SCI 33 with a grade of C or better. CSE 43 with a grade of C or better

Same as EECS 116.

Restriction: Computer Science Engineering Majors have first consideration for enrollment. School of Info & Computer Sci students have first consideration for enrollment.

**COMPSCI 122B. Project in Databases and Web Applications. 4 Units.**

Introduces students to advanced database technologies and Web applications. Topics include database connectivity (ODBC/JDBC), extending databases using stored procedures, database administration, Web servers, Web programming languages (Java servlets, XML, Ajax, and mobile platforms).

Prerequisite: (COMPSCI 122A or EECS 116) and I&C SCI 45J

Overlaps with COMPSCI 137, IN4MATX 124.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 122C. Principles of Data Management. 4 Units.**

Covers fundamental principles underlying data management systems. Content includes key techniques including storage management, buffer management, record-oriented file system, access methods, query optimization, and query processing.

Prerequisite: COMPSCI 122A and (I&C SCI 53 or COMPSCI 143A)

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

Concurrent with COMPSCI 222.

**COMPSCI 122D. Beyond SQL Data Management. 4 Units.**

Survey of modern data management and analysis technologies beyond relational (SQL) database management. Topics include semistructured data, NoSQL databases, big data analysis, and text search/query engines. Additional topics vary and may include data frames, streaming data, and/or time-series data.

Prerequisite: I&C SCI 46 and I&C SCI 51 and (COMPSCI 122A or EECS 116)

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**COMPSCI 125. Next Generation Search Systems. 4 Units.**

Discusses concepts and techniques related to all aspects of search systems. After considering basic search technology and the state-of-art systems, rapidly developing techniques for multimedia search, local search, event-search, and video-on-demand are explored.

Prerequisite: I&C SCI 31 or CSE 41 or I&C SCI 32A

Restriction: Upper-division students only. School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

Concurrent with COMPSCI 225.

**COMPSCI 131. Parallel and Distributed Computing. 4 Units.**

Parallel and distributed computer systems. Parallel programming models. Common parallel and distributed programming issues. Specific topics include parallel programming, performance models, coordination and synchronization, consistency and replication, transactions, fault tolerance.

Prerequisite: (I&C SCI 53 and I&C SCI 53L) or COMPSCI 143A

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 132. Computer Networks. 4 Units.**

Computer network architectures, protocols, and applications. Internet congestion control, addressing, and routing. Local area networks. Multimedia networking.

Prerequisite: EECS 55 or STATS 67

Same as EECS 148.

Restriction: Computer Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 133. Advanced Computer Networks. 4 Units.**

Fundamental principles in computer networks are applied to obtain practical experience and skills necessary for designing and implementing computer networks, protocols, and network applications. Various network design techniques, simulation techniques, and UNIX network programming are covered.

Prerequisite: COMPSCI 132 or EECS 148

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 134. Computer and Network Security. 4 Units.**

Overview of modern computer and networks security, attacks, and countermeasures. Authentication, identification, data secrecy, data integrity, authorization, access control, computer viruses, network security. Also covers secure e-commerce and applications of public key methods, digital certificates, and credentials.

Prerequisite: I&C SCI 6D and (I&C SCI 33 or CSE 43) and (COMPSCI 122A or EECS 116 or COMPSCI 132 or COMPSCI 143A)

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 137. Internet Applications Engineering. 4 Units.**

Concepts in Internet applications engineering with emphasis on the Web. Peer-to-Peer and Interoperability. Topics include HTTP and REST, Remote Procedure/Method Calls, Web Services, data representations, content distribution networks, identity management, relevant W3C/IETF standards, and relevant new large-scale computing styles.

Prerequisite: (COMPSCI 132 or EECS 148) and I&C SCI 45J

Same as IN4MATX 124.

Overlaps with COMPSCI 122B.

Restriction: Upper-division students only. School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 141. Concepts in Programming Languages I. 4 Units.**

In-depth study of several contemporary programming languages stressing variety in data structures, operations, notation, and control. Examination of different programming paradigms, such as logic programming, functional programming and object-oriented programming; implementation strategies, programming environments, and programming style.

Prerequisite: (I&C SCI 51 or CSE 31 or EECS 31) and (I&C SCI 46 or CSE 46). I&C SCI 51 with a grade of C or better. CSE 31 with a grade of C or better. EECS 31 with a grade of C or better. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better

Same as IN4MATX 101.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 142A. Compilers and Interpreters. 4 Units.**

Introduction to the theory of programming language processors covering lexical analysis, syntax analysis, semantic analysis, intermediate representations, code generation, optimization, interpretation, and run-time support.

Prerequisite: CSE 141 or COMPSCI 141 or IN4MATX 101

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 142B. Language Processor Construction. 4 Units.**

Project course which provides working laboratory experience in construction and behavior of compilers and interpreters. Students build actual language processors and perform experiments which reveal their behaviors.

Prerequisite: COMPSCI 142A or CSE 142

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 143A. Principles of Operating Systems. 4 Units.**

Principles and concepts of process and resource management, especially as seen in operating systems. Processes, memory management, protection, scheduling, file systems, and I/O systems are covered. Concepts illustrated in the context of several well-known systems.

Prerequisite: (I&C SCI 46 or CSE 46) and (I&C SCI 51 or EECS 31 or CSE 31)

Overlaps with EECS 111.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 143B. Project in Operating System Organization. 4 Units.**

Detailed specification and design of critical components of an actual operating system including a memory manager, a process server, and a file/IO subsystem. Hardware/software tradeoffs. Emphasis on logical organization of system and communication.

Prerequisite: COMPSCI 143A

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 145. Embedded Software. 4 Units.**

Principles of embedded computing systems: embedded systems architecture, hardware/software components, system software and interfacing, real-time operating systems, hardware/software co-development, and communication issues. Examples of embedded computing in real-world application domains. Simple programming using an embedded systems development environment.

Corequisite: COMPSCI 145L

Prerequisite: (CSE 46 or I&C SCI 46) and (I&C SCI 51 or EECS 31 or CSE 31)

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 145L. Embedded Software Laboratory. 2 Units.**

Laboratory section to accompany COMPSCI 145.

Corequisite: COMPSCI 145

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 146. Programming in Multitasking Operating Systems. 4 Units.**

User- and systems-level programming of modern Internet-connected, multi-user, multitasking operating systems. Shells, scripting, filters, pipelines, programmability, extensibility, concurrency, inter-process communication. Concrete examples of a modern operating system (such as, but not necessarily, Unix programmed in C) are used.

Prerequisite: (I&C SCI 46 or CSE 46) and I&C SCI 51. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better. I&C SCI 51 with a grade of C or better. Recommended: COMPSCI 143A.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 147. Internet of Things (IoT) Software and Systems. 4 Units.**

Introduction to the Internet of Things (IoT) from a systems and software perspective. IoT ecosystem including sensors, embedded CPUs, networking protocols, software, cloud services, and security and privacy requirements. IoT use cases, system design, and programming project.

Prerequisite: I&C SCI 33 or CSE 43

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 151. Digital Logic Design. 4 Units.**

Boolean algebra. Design/analysis of combinational and sequential systems using SSI/MSI/LSI modules. Number systems. Error detecting and correction codes. Arithmetic algorithms. Hardware/ firmware implementation of algorithms.

Prerequisite: (I&C SCI 33 or CSE 43) and I&C SCI 51 and I&C SCI 6B and I&C SCI 6D. I&C SCI 33 with a grade of C or better. CSE 43 with a grade of C or better. I&C SCI 51 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 152. Computer Systems Architecture. 4 Units.**

Design of computer elements; ALU, control unit, and arithmetic circuits. Memory hierarchy and organization. Caches. Function unit sharing and pipelining. I/O and interrupt processing. RTL and behavioral modeling using hardware description languages. Microprocessor organization and implementation techniques.

Prerequisite: COMPSCI 151

Overlaps with I&C SCI 160, EECS 112.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 153. Logic Design Laboratory. 4 Units.**

Introduction to standard integrated circuits. Construction and debugging techniques. Design of digital systems using LSI and MSI components. Practical use of circuits in a laboratory environment, including implementation of small digital systems such as arithmetic modules, displays, and timers.

Prerequisite: COMPSCI 151

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 154. Computer Design Laboratory. 4 Units.**

Underlying primitives of computer instruction sets. Principles of microprogramming. Microprogramming. Microprograms written for one or more systems. Typical microprogramming applications discussed and implemented or simulated.

Prerequisite or corequisite: COMPSCI 151

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 161. Design and Analysis of Algorithms. 4 Units.**

Techniques for efficient algorithm design, including divide-and-conquer and dynamic programming, and time/space analysis. Fast algorithms for problems applicable to networks, computer games, and scientific computing, such as sorting, shortest paths, minimum spanning trees, network flow, and pattern matching.

Prerequisite: (I&C SCI 46 or CSE 46) and I&C SCI 6B and I&C SCI 6D and MATH 2B. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Software Engineering Majors have first consideration for enrollment. Data Science Majors have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment. Computer Science Majors have first consideration for enrollment. Business Information Management, Computer Game Science, and Informatics majors have second right of consideration.

**COMPSCI 162. Formal Languages and Automata. 4 Units.**

Formal aspects of describing and recognizing languages by grammars and automata. Parsing regular and context-free languages. Ambiguity, nondeterminism. Elements of computability; Turing machines, random access machines, undecidable problems, NP-completeness.

Prerequisite: (I&C SCI 46 or CSE 46) and MATH 2B and I&C SCI 6B and I&C SCI 6D. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better

Same as LSCI 102.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment. Language Science Majors have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 163. Graph Algorithms. 4 Units.**

Algorithms for solving fundamental problems in graph theory. Graph representations, graph traversal, network flow, connectivity, graph layout, matching problems.

Prerequisite: COMPSCI 161 or CSE 161

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

Concurrent with COMPSCI 265.

**COMPSCI 164. Computational Geometry and Geometric Modeling. 4 Units.**

Algorithms and data structures for computational geometry and geometric modeling, with applications to game and graphics programming. Topics: convex hulls, Voronoi diagrams, algorithms for triangulation, motion planning, and data structures for geometric searching and modeling of 2D and 3D objects.

Prerequisite: I&C SCI 46 or CSE 46. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 165. Project In Algorithms And Data Structures. 4 Units.**

Design, implementation, execution, and analysis of algorithms for problems such as sorting, searching, data compression, and data encryption. Time-space-structure trade-offs.

Prerequisite: COMPSCI 161 or CSE 161. Recommended: I&C SCI 45C OR CSE 45C.

**COMPSCI 166. Quantum Computation and Information. 4 Units.**

Basic models for quantum computation and their foundations in quantum mechanics. Quantum complexity classes and quantum algorithms, including algorithms for factoring and quantum simulation. Introduction to quantum information theory and quantum entanglement.

Prerequisite: (I&C SCI 6N or MATH 3A) and COMPSCI 161

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 167. Introduction to Applied Cryptography. 4 Units.**

An introduction to the essential aspects of applied cryptography, as it is used in practice. Topics include classical cryptography, block ciphers, stream ciphers, public-key cryptography, digital signatures, one-way hash functions, basic cryptographic protocols, and digital certificates and credentials.

Prerequisite: COMPSCI 161 or CSE 161

Restriction: Upper-division students only. School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 169. Introduction to Optimization. 4 Units.**

A broad introduction to optimization. Unconstrained and constrained optimization. Equality and inequality constraints. Linear and integer programming. Stochastic dynamic programming.

Prerequisite: (I&C SCI 6N or MATH 3A) and (STATS 67 or (STATS 7 and STATS 120A))

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

Concurrent with COMPSCI 268.

**COMPSCI 171. Introduction to Artificial Intelligence. 4 Units.**

Different means of representing knowledge and uses of representations in heuristic problem solving. Representations considered include predicate logic, semantic nets, procedural representations, natural language grammars, and search trees.

Prerequisite or corequisite: ((STATS 7 and STATS 120A) or STATS 67) ( and (I&C SCI 46 or CSE 46) and MATH 2B)

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 172B. Neural Networks and Deep Learning . 4 Units.**

Neural network and deep learning from multiple perspectives. Theory of parallel distributed processing systems, algorithmic approaches for learning from data in various manners, applications to difficult problems in AI from computer vision, to natural language understanding, to bioinformatics and chemoinformatics.

Prerequisite: (STATS 120A and STATS 120B) or MATH 121A or COMPSCI 178 or COMPSCI 273A

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

Concurrent with COMPSCI 274C.

**COMPSCI 172C. Artificial Intelligence Frontiers: Technical, Ethical, and Societal. 4 Units.**

Explores the frontiers of artificial intelligence and related technologies with a focus on the underlying ethical, legal, and societal challenges and opportunities they create. Encourages critical thinking about these issues.

Prerequisite: COMPSCI 171 and COMPSCI 172B. Recommended: COMPSCI 178

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

Concurrent with COMPSCI 274D.

**COMPSCI 175. Project in Artificial Intelligence. 4 Units.**

Construction of a working artificial intelligence system. Evaluation of capabilities of the system including impact of knowledge representation.

Prerequisite: COMPSCI 171 and COMPSCI 178

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 177. Applications of Probability in Computer Science. 4 Units.**

Application of probability to real-world problems in computer science. Typical topics include analysis of algorithms and graphs, probabilistic language models, network traffic modeling, data compression, and reliability modeling.

Prerequisite: MATH 2B and STATS 67 and I&C SCI 6B and I&C SCI 6D and (MATH 3A or I&C SCI 6N)

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 178. Machine Learning and Data-Mining. 4 Units.**

Introduction to principles of machine learning and data-mining applied to real-world datasets. Typical applications include spam filtering, object recognition, and credit scoring.

Prerequisite: I&C SCI 6B and I&C SCI 6D and (I&C SCI 6N or MATH 3A) and MATH 2B and (STATS 67 or (STATS 7 and STATS 120A))

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 179. Algorithms for Probabilistic and Deterministic Graphical Models. 4 Units.**

Graphical model techniques dealing with probabilistic and deterministic knowledge representations. Focuses on graphical models such as constraint networks, Bayesian networks, and Markov networks that have become a central paradigm for knowledge representation and reasoning in AI and general computer science.

Prerequisite: COMPSCI 171

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**COMPSCI 183. Introduction to Computational Biology. 4 Units.**

The use of theories and methods based on computer science, mathematics, and physics in molecular biology and biochemistry. Basics in biomolecular modeling. Analysis of sequence and structural data of biomolecules. Analysis of biomolecular functions.

Prerequisite: MATH 2D or MATH 3A or STATS 7 or STATS 8

Same as BME 132, BIO SCI M123.

Concurrent with MOL BIO 223 and BME 232.

**COMPSCI 184A. Artificial Intelligence in Biology and Medicine. 4 Units.**

Introduction to computational methods in molecular biology, aimed at those interested in learning about this interdisciplinary area. Covers computational approaches to understanding and predicting the structure, function, interactions, and evolution of DNA, RNA, proteins, and related molecules and processes.

Prerequisite: I&C SCI 6N or MATH 3A

Restriction: Upper-division students only. School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

Concurrent with COMPSCI 284A.

**COMPSCI 184C. Computational Systems Biology. 4 Units.**

Computational inference and modeling of gene regulation networks, signal transduction pathways, and the effects of regulatory networks in cellular processes, development, and disease. Introduction of required mathematical, computational, and data handling tools.

Prerequisite: COMPSCI 184A

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

Concurrent with COMPSCI 284C.

**COMPSCI 190. Special Topics in Information and Computer Science. 4 Units.**

Studies in selected areas of Information and Computer Science. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**COMPSCI H198. Honors Research. 4 Units.**

Directed independent research in computer science for honors students.

Repeatability: May be repeated for credit unlimited times.

Restriction: Campuswide Honors Collegium students only. Bren School of ICS Honors students only. Upper-division students only.

**COMPSCI 199. Individual Study. 2-5 Units.**

Individual research or investigation with Computer Science faculty.

Repeatability: May be repeated for credit unlimited times.

**COMPSCI 200S. Seminar in Computer Science Research. 1 Unit.**

Graduate colloquium series. Includes weekly talks by notable computer scientists.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**COMPSCI 201. Foundations of Cryptographic Protocols. 4 Units.**

Explores fundamental cryptographic tools, including encryption, signatures, and identification schemes. Students are introduced to the provable security paradigm of modern cryptography, focusing on understanding of security properties provided by cryptographic tools, and on proving security (or insecurity) of cryptographic constructions.

Prerequisite: COMPSCI 260 or COMPSCI 263

**COMPSCI 201P. Introduction to Computer Security. 4 Units.**

Introduction to computer security, including systems, technology, and management. Topics include authorization, authentication, data integrity, malware, operating systems security, network security, web security, and basic cryptography.

Prerequisite: Knowledge of Python or C++ programming is required.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 202. Applied Cryptography. 4 Units.**

Design and analysis of algorithms for applied cryptography. Topics include symmetric and asymmetric key encryption, digital signatures, one-way hash functions, digital certificates and credentials, and techniques for authorization, non-repudiation, authentication, identification, data integrity, proofs of knowledge, and access control.

Prerequisite: COMPSCI 260 and COMPSCI 263

**COMPSCI 202P. Applied Cryptography . 4 Units.**

Design and analysis of algorithms for applied cryptography. Topics include symmetric and asymmetric key encryption, digital signatures, one-way hash functions, digital certificates and credentials, and techniques for authorization, non-repudiation, authentication, identification, data integrity, proofs of knowledge, and access control.

Restriction: Graduate students only.

**COMPSCI 203. Network and Distributed Systems Security. 4 Units.**

Modern computer and networks security: attacks and countermeasures, authentication, identification, data secrecy, data integrity, authorization, access control, computer viruses, network security. Group communication and multicast security techniques. Covers secure e-commerce and applications of public key methods, digital certificates, and credentials.

Prerequisite: EECS 148 or COMPSCI 132

Same as NET SYS 240.

**COMPSCI 203P. Network Security. 4 Units.**

Introduction to network security, including network threats and attacks, as well as defenses against such attacks. Topics include network infrastructure security, mobile and Wi-Fi security, spam, phishing, firewalls, anonymity, secure email, secure and private cloud computing, and web security.

Prerequisite: COMPSCI 201P or COMPSCI 202P

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 204. Usable Security and Privacy. 4 Units.**

Introduces usability problems in security and privacy methods, tools, and software. Overviews prominent examples of both failures and successes in usable security and privacy. Surveys state-of-the-art techniques and evaluation methodologies.

Same as IN4MATX 237.

Overlaps with IN4MATX 231, COMPSCI 203.

Restriction: Informatics Majors have first consideration for enrollment. Computer Science Majors have first consideration for enrollment. Undergraduate degree in CompSci or Informatics is strongly recommended.

**COMPSCI 205. Computer and Systems Security . 4 Units.**

Lecture and discuss latest security research in software, OS, protocols, mobile devices, machine learning, sensors, and emerging IoT/CPS systems such as smart home and smart transportation. Students perform research projects and gain hands-on experience evaluating and designing secure systems.

Prerequisite: COMPSCI 134 and COMPSCI 142A and COMPSCI 143A

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Graduate students only.

**COMPSCI 206. Principles of Scientific Computing. 4 Units.**

Overview of widely used principles and methods of numerical and scientific computing, including basic concepts and computational methods in linear algebra, optimization, and probability.

Prerequisite: Basic courses in multivariate calculus, linear algebra, and probability.

Overlaps with STATS 230.

**COMPSCI 206P. Principles of Scientific Computing. 4 Units.**

Overview of widely used principles and methods of numerical and scientific computing, including basic concepts and computational methods in floating-point, linear algebra, optimization, simulation, modeling, and probability/statistics as it relates to model evaluation.

Prerequisite: Basic knowledge of multivariate calculus, linear algebra, and familiarity with MATLAB.

Restriction: Graduate students only.

**COMPSCI 210P. Computer Graphics and Visualization . 4 Units.**

Interactive 3D graphics rendering pipeline, illumination and shading, ray tracing, texture-, bump-, mip-mapping, hidden surface removal, anti-aliasing, multiresolution representations, volume rendering techniques, iso-surface extraction.

Prerequisite: Familiarity with linear algebra is required.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 211A. Visual Computing. 4 Units.**

Fundamentals of image processing (convolution, linear filters, spectral analysis), vision geometry (projective geometry, camera models and calibration, stereo reconstruction), radiometry (color, shading, illumination, BRDF), and visual content synthesis (graphics pipeline, texture- bump-, mip-mapping, hidden surface removal, anti-aliasing).

**COMPSCI 211B. Computer Graphics and Visualization. 4 Units.**

Interactive 3D graphics rendering pipeline, illumination and shading, ray tracing, texture-, bump-, mip-mapping, hidden surface removal, anti-aliasing, multiresolution representations, volume rendering techniques, iso-surface extraction.

Prerequisite: COMPSCI 211A

**COMPSCI 211P. Visual Computing . 4 Units.**

Develops a comprehensive understanding of fundamentals of image processing (convolution, linear filters, spectral analysis), vision geometry (projective geometry, camera models and calibration, stereo reconstruction), radiometry (color, shading, illumination, BRDF), visual content synthesis (graphics pipeline, texture- bump-, mip-mapping, hidden surface, anti-aliasing).

Prerequisite: Undergraduate-level familiarity with Linear algebra (matrices and operations), eigenvalue, eigenvectors, linear regression; basic of algorithms; programming in C/C++

Restriction: Graduate students only.

**COMPSCI 212. Multimedia Systems and Applications. 4 Units.**

Organization and structure of modern multimedia systems; audio and video encoding/compression; quality of service concepts; scheduling algorithms for multimedia; resource management in distributed and multimedia systems; multimedia protocols over high-speed networks; synchronization schemes; multimedia applications; and teleservices.

Prerequisite: COMPSCI 143A and COMPSCI 161. B.S. degree in Computer Science is also accepted. Recommended: COMPSCI 131 and COMPSCI 132 and COMPSCI 133.

**COMPSCI 213. Introduction to Visual Perception. 4 Units.**

Introduction to the process of human visual perception. Offers the physiological and psychophysical approach to understand vision, introducing concepts of perception of color, depth, movement. Examples of quantification and application of these models in computer vision, computer graphics, multimedia, HCI.

Prerequisite: MATH 121A

**COMPSCI 216. Image Understanding. 4 Units.**

The goal of image understanding is to extract useful semantic information from image data. Course covers low-level image and video processing techniques, feature descriptors, segmentation, objection recognition, and tracking.

Prerequisite: I&C SCI 6D and (I&C SCI 6N or MATH 6G or MATH 3A) and MATH 2B and I&C SCI 46

**COMPSCI 217. Light and Geometry in Computer Vision. 4 Units.**

Examines the issues of light transport and multiview geometry in computer vision. Applications include camera calibration, 3D understanding, stereo reconstruction, and illumination estimation.

Prerequisite: I&C SCI 6D and (I&C SCI 6N or MATH 6G or MATH 3A) and MATH 2B and I&C SCI 46 and COMPSCI 211A

**COMPSCI 221. Information Retrieval, Filtering, and Classification. 4 Units.**

Algorithms for the storage, retrieval, filtering, and classification of textual and multimedia data. The vector space model, Boolean and probabilistic queries, and relevance feedback. Latent semantic indexing; collaborative filtering; and relationship to machine learning methods.

Prerequisite: COMPSCI 161 and COMPSCI 171 and (I&C SCI 6N or MATH 3A or MATH 6G)

Same as SWE 225.

Restriction: Graduate students only.

**COMPSCI 222. Principles of Data Management. 4 Units.**

Covers fundamental principles underlying data management systems. Content includes key techniques including storage management, buffer management, record-oriented file system, access methods, query optimization, and query processing.

Prerequisite: COMPSCI 122A and (I&C SCI 53 or COMPSCI 143A)

Concurrent with COMPSCI 122C.

**COMPSCI 222P. Principles of Data Management. 4 Units.**

Covers fundamental principles underlying data management systems. Understanding and implementation of key techniques including storage management, buffer management, record-oriented file system, access methods, query optimization, and query processing.

Prerequisite: C++ programming skills, understanding of Data Structures and Algorithms

Restriction: Graduate students only.

**COMPSCI 223. Transaction Processing and Distributed Data Management. 4 Units.**

Covers fundamental principles underlying transaction processing including database consistency, concurrency control, database recovery, and fault-tolerance. Includes transaction processing in centralized, distributed, parallel, and client-server environments.

Prerequisite: COMPSCI 222 and COMPSCI 131

**COMPSCI 225. Next Generation Search Systems. 4 Units.**

Discusses concepts and techniques related to all aspects of search systems. After considering basic search technology and the state-of-art systems, rapidly developing techniques for multimedia search, local search, event-search, and video-on-demand are explored.

Prerequisite: I&C SCI 21 or CSE 21 or IN4MATX 41 or I&C SCI 31 or CSE 41

Restriction: Upper-division students only. Graduate students only.

Concurrent with COMPSCI 125.

**COMPSCI 230. Distributed Computer Systems. 4 Units.**

Principles of distributed computing systems. Topics covered include message-passing, remote procedure calls, distributed shared memory synchronization, resource and process/thread management, distributed file systems, naming and security.

**COMPSCI 230P. Distributed Computer Systems . 4 Units.**

Principles of distributed computing systems. Topics covered include message-passing, remote procedure calls, distributed shared memory synchronization, resource and process/thread management, distributed file systems, naming and security.

Restriction: Graduate students only.

**COMPSCI 231P. Parallel and Distributed Computing for Professionals . 4 Units.**

Covers a wide variety of concepts related to the design and application of high-performance concurrent computing systems, including architectural features, communications networks and models, parallel program development for numerical and non-numerical applications, programming models, and more.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 232. Computer and Communication Networks. 4 Units.**

Network architecture of the Internet, telephone networks, cable networks, and cell phone networks. Network performance models. Network performance models. Advanced concepts and implementations of flow and congestion control, addressing, internetworking, forwarding, routing, multiple access, streaming, and quality-of-service.

Prerequisite: EECS 148 or COMPSCI 132

Same as EECS 248A, NET SYS 201.

Restriction: Graduate students only.

**COMPSCI 232P. Computer and Communication Networks . 4 Units.**

Internet architecture, protocols, and services. Advanced concepts of IP and TCP, including addressing, internetworking, forwarding, routing, and implementations of flow and congestion control. Internet services such as Network Address Translation and Domain Name Servers. Overview of Local Area Networks.

Restriction: Graduate students only.

**COMPSCI 233. Networking Laboratory. 4 Units.**

A laboratory-based introduction to basic networking concepts such as addressing, sub-netting, bridging, ARP, and routing. Network simulation and design. Structured around weekly readings and laboratory assignments.

Prerequisite: EECS 148 or COMPSCI 132

Same as NET SYS 202.

**COMPSCI 234. Advanced Networks. 4 Units.**

Design principles of networked systems, advanced routing and congestion control algorithms, network algorithms, network measurement, management, security, Internet economics, and emerging networks.

Prerequisite: NET SYS 201 or COMPSCI 232 or EECS 248A

Same as NET SYS 210.

**COMPSCI 236. Wireless and Mobile Networking. 4 Units.**

Introduction to wireless networking. The focus is on layers 2 and 3 of the OSI reference model, design, performance analysis, and protocols. Topics covered include: an introduction to wireless networking, digital cellular, next generation cellular, wireless LANs, and mobile IP.

Prerequisite: EECS 148 or COMPSCI 132

Same as NET SYS 230.

**COMPSCI 237. Middleware for Networked and Distributed Systems. 4 Units.**

Discusses concepts, techniques, and issues in developing distributed systems middleware that provides high performance and Quality of Service for emerging applications. Also covers existing standards (e.g., CORBA, DCOM, Jini, Espeak) and their relative advantages and shortcomings.

Prerequisite: An undergraduate-level course in operating systems and networks.

Same as NET SYS 260.

**COMPSCI 238. Advanced Operating Systems. 4 Units.**

Focuses on advanced and graduate-level topics in operating systems. Presents important recent developments in operating systems, topics not covered in undergraduate operating systems courses. This includes novel operating system designs and techniques to improve existing ones.

Prerequisite: COMPSCI 143A

**COMPSCI 238P. Operating Systems. 4 Units.**

In-depth organization of the core operating system abstraction and its implementation (virtual memory, kernel and user mode, system calls, threads, context switches, interrupts, inter-process communication, hardware interface, etc.) and a range of recent developments in de-facto industry standard operating systems.

Prerequisite: Working knowledge of C and the Linux environment.

Restriction: School of Info & Computer Sci students only. Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 241. Advanced Compiler Construction. 4 Units.**

Advanced study of programming language implementation techniques: optimizations such as common sub-expression elimination, register allocation, and instruction scheduling. Implementation of language features such as type-directed dispatch, garbage collection, dynamic linking, and just-in-time code generation.

Prerequisite: COMPSCI 142A

**COMPSCI 242. Parallel Computing. 4 Units.**

Definition of parallel processing systems. Theory and application of arrays, trees, and hypercubes. Computational models, applications: sorting, integer arithmetic, matrix operations, Fast Fourier Transform, and others. Interconnection networks: a framework for the description, analysis, and construction of hypercube-derived networks.

**COMPSCI 242P. Compilers and Interpreters. 4 Units.**

Provides in-depth study of compilers and interpreters which are the primary forms of programming language processing in computing.

Prerequisite: Knowledge of C++ programming is required.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 243. High-Performance Architectures and Their Compilers. 4 Units.**

Emphasis on the development of automatic tools (i.e., compilers/environments) for the efficient exploitation of parallel machines, and the trade-offs between hardware and software in the design of supercomputing and high-performance machines.

**COMPSCI 244. Introduction to Embedded and Ubiquitous Systems. 4 Units.**

Embedded and ubiquitous system technologies including processors, DSP, memory, and software. System interfacing basics; communication strategies; sensors and actuators, mobile and wireless technology. Using pre-designed hardware and software components. Design case studies in wireless, multimedia, and/or networking domains.

Prerequisite: I&C SCI 51 and COMPSCI 152 and COMPSCI 161 and (I&C SCI 6N or MATH 3A or MATH 6G or I&C SCI 6D). B.S. degree in Computer Science is also accepted.

Same as IN4MATX 244.

**COMPSCI 244P. Introduction to the Internet of Things. 4 Units.**

Develops a comprehensive understanding of the hardware and software technology, the communication protocols, and the security and privacy requirements underlying the Internet of Things ecosystem, particularly those using computing elements (processors, DSPs/ ASIPs), sensors, and accessing cloud services.

Prerequisite: Undergraduate-level familiarity with fundamentals of integrated circuit blocks, processors, optimization/algorithm design, and some programming experience.

Restriction: Graduate students only.

**COMPSCI 245. Software for Embedded Systems. 4 Units.**

Embedded computing elements, device interfaces, time-critical IO handling. Embedded software design under size, performance, and reliability constraints. Software timing and functional validation. Programming methods and compilation for embeddable software. Embedded runtime systems. Case studies of real-time software systems.

Prerequisite: I&C SCI 51 and COMPSCI 152 and COMPSCI 161 and (I&C SCI 6N or MATH 3A or MATH 6G or I&C SCI 6D). B.S. degree in Computer Science is also accepted.

**COMPSCI 246. Dependability, Validation, and Testing of Embedded Systems. 4 Units.**

Embedded system building blocks, including IP cores. Dependability and Resilience. Co-simulation. Formal verification using model checking. Verification environments. Test challenges in core integration: compliance, feature, random, and collision testing. Core access and test integration. Interface-based verification and standards.

Prerequisite: B.S. degree in Computer Science or basic courses in algorithms and data structures, calculus, discrete math, linear algebra, symbolic logic.

**COMPSCI 247. Complex Software Systems: Project Course. 4 Units.**

Building complex systems software systems, such as Database Management Systems, Operating Systems, and Optimizing Compilers. Such systems often involve low-level programming and intricate performance optimizations. Students learn how to build such a system.

Prerequisite or corequisite: COMPSCI 222 or COMPSCI 238 or COMPSCI 241

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**COMPSCI 248A. Introduction to Ubiquitous Computing. 4 Units.**

The 'disappearing computer' paradigm. Differences to the desktop computing model: applications, interaction in augmented environments, security, alternate media, small operating systems, sensors, and embedded systems design. Evaluation by project work and class participation.

Same as IN4MATX 241.

**COMPSCI 250A. Computer Systems Architecture. 4 Units.**

Study of architectural issues and their relation to technology and software: design of processor, interconnections, and memory hierarchies.

Prerequisite: COMPSCI 152

**COMPSCI 250B. Modern Computer Systems. 4 Units.**

Fundamental concepts and recent advances in computer systems architecture necessary to achieve high performance and efficiency on systems available today. Topics span modern processor features, accelerators, storage and network architectures, as well as architecture-optimized software.

Prerequisite: Required: Undergraduate-level understanding of computer architecture concepts.

Overlaps with COMPSCI 243.

**COMPSCI 250P. Computer Systems Architecture . 4 Units.**

Study of architectural issues and their relation to technology and software: design of processor, interconnections, and memory hierarchies.

Prerequisite: Undergraduate-level familiarity with fundamentals of integrated circuit blocks, processors, and optimization/algorithm design, and some programming experience.

Restriction: Graduate students only.

**COMPSCI 252. Introduction to Computer Design. 4 Units.**

The methodology and use of CAD tools for computer design, accomplished by a lab in which students practice design using commercially available silicon compilers and other tools.

Prerequisite: COMPSCI 151 and COMPSCI 152

**COMPSCI 253. Analysis of Programming Languages. 4 Units.**

Concepts in modern programming languages, their interaction, and the relationship between programming languages and methods for large-scale, extensible software development. Empirical analysis of programming language usage.

Same as SWE 212.

**COMPSCI 253P. Advanced Programming and Problem Solving. 4 Units.**

Provides in-depth preparation for industry interviews requiring demonstration of problem solving and programming skills. Emphasis is on understanding problem statements, considering edge cases, developing effective test cases, designing correct solutions, explaining these clearly, and implementing a solution correctly.

Corequisite: COMPSCI 260P

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 259S. Seminar in Design Science. 2 Units.**

Current research and research trends in design science. Forum for presentation and criticism by students of research work in progress.

Repeatability: May be taken for credit 18 times.

**COMPSCI 260. Fundamentals of the Design and Analysis of Algorithms. 4 Units.**

Covers fundamental concepts in the design and analysis of algorithms and is geared toward non-specialists in theoretical computer science. Topics include: deterministic and randomized graph algorithms, fundamental algorithmic techniques like divide-and-conquer strategies and dynamic programming, and NP-completeness.

Prerequisite: COMPSCI 161

**COMPSCI 260P. Fundamentals of Algorithms with Applications. 4 Units.**

Covers fundamental concepts in the design and analysis of algorithms and is geared toward practical application and implementation. Topics include greedy algorithms, deterministic and randomized graph algorithms, models of network flow, fundamental algorithmic techniques, and NP-completeness.

Restriction: Graduate students only.

**COMPSCI 261. Data Structures. 4 Units.**

An in-depth treatment of data structures and their associated management algorithms including resource complexity analysis.

Prerequisite: I&C SCI 46 and COMPSCI 161

**COMPSCI 261P. Data Structures with Applications . 4 Units.**

Data structures and their associated management algorithms, including their applications and analysis.

Restriction: Graduate students only.

**COMPSCI 262. Computational Complexity. 4 Units.**

Advanced course in computational models and complexity classes. Covers the fundamentals of Turing Machines, Decidability, and NP-completeness. Includes discussion of more advanced topics including polynomial hierarchy, randomized complexity classes, #P-completeness and hardness of approximation.

Prerequisite: COMPSCI 162

**COMPSCI 262P. Text Processing and Pattern Matching. 4 Units.**

Techniques for pattern matching and parsing character strings. Topics include substring searching, finite state machines, regular expressions, and context-free grammars, as well as applications in lexical analyzers, compilers, word processors, malware detectors, and search engines.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 263. Analysis of Algorithms. 4 Units.**

Analysis of correctness and complexity of various efficient algorithms; discussion of problems for which no efficient solutions are known.

Prerequisite: COMPSCI 161 and COMPSCI 261

**COMPSCI 264. Quantum Computation and Information. 4 Units.**

Basic models for quantum computation and their foundations in quantum mechanics. Quantum complexity classes and quantum algorithms, including algorithms for factoring and quantum simulation. Introduction to quantum information theory and quantum entanglement.

Prerequisite: Basic courses in linear algebra and algorithms.

**COMPSCI 265. Graph Algorithms. 4 Units.**

Graph definitions, representation methods, graph problems, algorithms, approximation methods, and applications.

Prerequisite: COMPSCI 161 and COMPSCI 261

Concurrent with COMPSCI 163.

**COMPSCI 266. Computational Geometry. 4 Units.**

An overview of some of the basic problems in computational geometry and of some algorithmic and data-structuring techniques appropriate to their solution.

Prerequisite: COMPSCI 161 and COMPSCI 261

**COMPSCI 267P. Data Compression. 4 Units.**

An introduction to the theory and practice of modern data compression techniques. Topics include codes, coding, modeling, text compression, lossless and lossy image compression standards and systems, audio compression.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 268. Introduction to Optimization. 4 Units.**

A broad introduction to optimization. Unconstrained and constrained optimization. Equality and inequality constraints. Linear and integer programming. Stochastic dynamic programming.

Prerequisite: STATS 67 or (STATS 7 and STATS 120A) and (I&C SCI 6N or MATH 3A)

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

Concurrent with COMPSCI 169.

**COMPSCI 268P. Introduction to Optimization Modeling . 4 Units.**

A broad introduction to optimization methods and their applications. Unconstrained and constrained optimization. Direct, first, and second order methods. Use of optimization software libraries. Equality and inequality constraints, optimal conditions, and methods. Applications to modeling in computer science, engineering.

Restriction: Graduate students only.

**COMPSCI 269S. Seminar in the Theory of Algorithms and Data Structures. 2 Units.**

Current research and research trends in the Theory of algorithms and data structures.

Repeatability: May be taken for credit 18 times.

**COMPSCI 271. Introduction to Artificial Intelligence. 4 Units.**

The study of theories and computational models for systems which behave and act in an intelligent manner. Fundamental subdisciplines of artificial intelligence including knowledge representation, search, deduction, planning, probabilistic reasoning, natural language parsing and comprehension, knowledge-based systems, and learning.

**COMPSCI 271P. Introduction to Artificial Intelligence. 4 Units.**

The study of theories and computational models for systems which behave and act in an intelligent manner. Fundamental sub-disciplines of artificial intelligence, including knowledge representation, search, deduction, planning, probabilistic reasoning, natural language parsing and comprehension, knowledge-based systems, and learning.

Restriction: Graduate students only.

**COMPSCI 272. Statistical Natural Language Processing. 4 Units.**

Statistical models, machine learning algorithms, and computational tasks involved in natural language processing. Focuses on approaches that learn these models from data, and covers applications such as information extraction, dialog systems, machine translation, and question answering.

Prerequisite: COMPSCI 171 and COMPSCI 178

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Graduate students only.

**COMPSCI 273A. Machine Learning. 4 Units.**

Computational approaches to learning algorithms for classifications, regression, and clustering. Emphasis is on discriminative classification methods such as decision trees, rules, nearest neighbor, linear models, and naive Bayes.

Prerequisite: COMPSCI 271 and COMPSCI 206

**COMPSCI 273P. Machine Learning and Data Mining . 4 Units.**

Introduction to principles of machine learning and data-mining. Learning algorithms for classifications, regression, and clustering. Emphasis is on discriminative classification methods such as decision trees, rules, nearest neighbor, linear models, and naive Bayes.

Prerequisite: Python programming knowledge is required.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 274A. Probabilistic Learning: Theory and Algorithms. 4 Units.**

An introduction to probabilistic and statistical techniques for learning from data, including parameter estimation, density estimation, regression, classification, and mixture modeling.

Prerequisite: COMPSCI 206

**COMPSCI 274B. Learning in Graphical Models. 4 Units.**

Models for data analysis are presented in the unifying framework of graphical models. The emphasis is on learning from data but inference is also covered. Real world examples are used to illustrate the material.

Prerequisite: COMPSCI 274A

**COMPSCI 274C. Neural Networks and Deep Learning. 4 Units.**

Neural network and deep learning from multiple perspectives. Theory of parallel distributed processing systems, algorithmic approaches for learning from data in various manners, applications to difficult problems in AI from computer vision, to natural language understanding, to bioinformatics and chemoinformatics.

Prerequisite: (STATS 120A and STATS 120B) or MATH 121A or COMPSCI 178 or COMPSCI 273A

Overlaps with COMPSCI 274A, COMPSCI 277, COMPSCI 276, COMPSCI 278, COMPSCI 274B, COMPSCI 273A.

Concurrent with COMPSCI 172B.

**COMPSCI 274D. Artificial Intelligence Frontiers: Technical, Ethical, and Societal. 4 Units.**

Explores the frontiers of artificial intelligence and related technologies with a focus on the underlying ethical, legal, and societal challenges and opportunities they create. Encourages critical thinking about these issues.

Prerequisite: Recommended: COMPSCI 172B and COMPSCI 178.

Restriction: Graduate students only.

Concurrent with COMPSCI 172C.

**COMPSCI 274E. Deep Generative Models. 4 Units.**

Discusses probabilistic approaches to deep learning such as generative models and their applications in computer vision, NLP, the natural sciences, and other fields. Coursework may include both homework and project components.

Prerequisite: COMPSCI 178 or COMPSCI 273A or STATS 120B. Recommended: Advanced machine learning or graphical models courses such as COMPSCI 274A or COMPSCI 274B or CS 273C or COMPSCI 276.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Graduate students only.

**COMPSCI 274P. Neural Networks and Deep Learning. 4 Units.**

Introduction to principles of machine learning and neural networks. Architecture design. Feedforward and recurrent networks. Learning models and algorithms. Applications to data analysis and prediction problems in areas such as machine vision, natural language processing, biomed, and finance.

Prerequisite: COMPSCI 271P. COMPSCI 271P with a grade of B or better. Knowledge of Python programming is required.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 276. Reasoning in Probabilistic Graphical Models. 4 Units.**

Focuses on algorithms for probabilistic reasoning using graphical models such as Bayesian Networks and Markov Networks that encode knowledge as local probabilistic relations. Tasks include finding most likely scenarios over a subset of variables, or updating posterior probability, given observations.

Prerequisite: A basic course in probability.

**COMPSCI 278. Probability Models. 4 Units.**

Advanced probability, discrete time Markov chains, Poisson processes, continuous time Markov chains. Queuing or simulation as time permits.

Prerequisite: STATS 120A

Concurrent with STATS 121.

**COMPSCI 284A. Artificial Intelligence in Biology and Medicine. 4 Units.**

Introduction to computational methods in molecular biology, aimed at those interested in learning about this interdisciplinary area. Covers computational approaches to understanding and predicting the structure, function, interactions, and evolution of DNA, RNA, proteins, and related molecules and processes.

Prerequisite: A Basic course in algorithms or a basic course in molecular biology.

Concurrent with COMPSCI 184A.

**COMPSCI 284C. Computational Systems Biology. 4 Units.**

Computational inference and modeling of gene regulation networks, signal transduction pathways, and the effects of regulatory networks in cellular processes, development, and disease. Introduction of required mathematical, computational, and data handling tools.

Prerequisite: COMPSCI 284A or (BIO SCI 99 and MATH 2D)

Concurrent with COMPSCI 184C.

**COMPSCI 285. Mathematical and Computational Biology . 4 Units.**

Analytical and numerical methods for dynamical systems, temporal-spatial dynamics, steady state, stability, stochasticity. Application to life sciences: genetics, tissue growth and patterning, cancers, ion channels gating, signaling networks, morphogen gradients. Probabilistic methods.

Prerequisite: MATH 227A

Same as MATH 227C.

**COMPSCI 290. Research Seminar. 2 Units.**

Forum for presentation and criticism by students of research work in progress. Presentation of problem areas and related work. Specific goals and progress of research.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**COMPSCI 294P. Keystone Professional Writing and Communication for Computer Science Careers. 4 Units.**

Well-developed written and oral communication skills relevant to computer science professionals including oral presentations, short descriptive writing assignments, and one longer writing assignment related to a research replication project.

Restriction: Graduate students only.

**COMPSCI 295. Special Topics in Information and Computer Science . 4 Units.**

Studies in selected areas of Information and Computer Science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**COMPSCI 295P. Keystone Project for Computer Science. 4 Units.**

Design and development of a software system or a hardware component of a system based on knowledge of advanced computer science principles. Students implement at least a working prototype and test this using relevant input data.

Restriction: Graduate students only.

**COMPSCI 296. Elements of Scientific Writing. 4 Units.**

Introduces the concepts and principles of good scientific writing, demonstrates them by examples drawn from the literature, and uses a hands-on approach to apply them to documents being written by the participants.

Grading Option: Satisfactory/unsatisfactory only.

**COMPSCI 296P. Capstone Professional Writing and Communication for Computer Science Careers . 4 Units.**

Written and oral communication for computer science and IT careers. Production of the detailed design and development document for the concurrent capstone design class and refinement of written documents and oral communications skills needed for a successful job search.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 297P. Capstone Design Project for Computer Science . 4 Units.**

Design and development of app, software system, or hardware component of system based on students' prior knowledge of advanced computer science principles. Implement at least a working prototype and test this using relevant use cases and/or input data.

Restriction: Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 298. Thesis Supervision. 2-12 Units.**

Individual research or investigation conducted in preparation for the M.S. thesis option or the dissertation requirements for the Ph.D. program.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Information and Computer Science majors only.

**COMPSCI 298P. Computer Science Practicum. 1-4 Units.**

Internship in which students work individually at an outside organization to gain experience with the challenges involved in technology-related work.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: School of Info & Computer Sci students only. Master of Computer Science Degree students only. Graduate students only.

**COMPSCI 299. Individual Study. 1-12 Units.**

Individual research or investigation with Computer Science faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Information and Computer Science majors only.

**COMPSCI 299P. Individual Study. 4-8 Units.**

Supervised individual study in computer science.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 4 times.

Restriction: Master of Computer Science Degree students have first consideration for enrollment. Graduate students only.

## Bioinformatics, Minor

The minor provides a focused study of bioinformatics to supplement a student's major program of study and prepares students for a profession, career, or academic pursuit in which biomedical computing is an integral part but is not the primary focus. The Bioinformatics minor contributes to students' competence in computing applied to biomedical problems and data, as well as exposing them to the fundamentals of the life sciences from a computer science perspective. The minor allows students sufficient flexibility to pursue courses that complement their major field or address specific interests.

Students who complete the minor requirements will be able to do the following: synthesize computer science, quantitative methods, and biological science; understand the synergistic set of reciprocal influences between life and computational sciences and technologies; discuss biomedical computing problems and corresponding computer science perspectives; and employ principles, methods, and technologies fundamental to biomedical computing.

A. Complete all of the following:

I&C SCI 31	Introduction to Programming
I&C SCI 32	Programming with Software Libraries
I&C SCI 33	Intermediate Programming
BIO SCI 93	From DNA to Organisms
COMPSCI 184A	Artificial Intelligence in Biology and Medicine
BIO SCI M123/COMPSCI 183	Introduction to Computational Biology
COMPSCI 184C	Computational Systems Biology

NOTE: A maximum of two courses may be taken Pass/Not Pass toward a minor. Bren School majors should refer to the Majors/Minors Restrictions *Catalogue* section before attempting to minor in Bioinformatics. Students who are considering a major in Computer Science or Computer Science and Engineering must complete the major requirements for a letter grade. Visit the ICS Student Affairs Office website for Majors and Minors restrictions ([http://www.ics.uci.edu/ugrad/degrees/MajorMinor\\_Restrictions\\_Chart.pdf](http://www.ics.uci.edu/ugrad/degrees/MajorMinor_Restrictions_Chart.pdf))

## Computer Science, B.S.

The Computer Science major emphasizes the principles of computing that underlie our modern world, and provides a strong foundational education to prepare students for the broad spectrum of careers in computing. This major can serve as preparation for either graduate study or a career in industry. Students receive a solid background in low-level architecture and systems; middle-level infrastructure, algorithms, and mathematical foundations. This

is a highly flexible degree that allows students to explore a broad range of topics in modern computing. In order to achieve some focus in their upper-division studies, students are required to satisfy the requirements for one of the nine specializations described below.

**Algorithms.** This specialization focuses on fundamental computational techniques, including their analysis and applications to topics in computer vision, computer games, graphics, artificial intelligence, and information retrieval. Topics include data structures, graph and network algorithms, computational geometry, probabilistic algorithms, complexity theory, and cryptography.

**Architecture and Embedded Systems.** This specialization integrates principles of embedded systems, software, hardware, computer architecture, distributed systems and networks, and prepares students to design and create efficient hardware/software architectures for emerging application areas. Students in this specialization will build upon a strong foundation in software and hardware and learn how to design networked embedded systems, and efficient computer architectures for a diverse set of application domains such as gaming, visualization, search, databases, transaction processing, data mining, and high-performance and scientific computing.

**Bioinformatics.** This specialization introduces students to the interdisciplinary intersection of biology and medicine with computer science and information technology. Students who complete the specialization will understand biomedical computing problems from the computer science perspectives, and be able to design and develop software that solves computational problems in biology and medicine.

**General Computer Science.** This specialization allows students to acquire a well-rounded knowledge of computer science that may be tailored to their individual interests. Students choose 11 upper-division computer science courses, including two project courses. This specialization will appeal to those who are interested in a broad education in computer science, or who wish to create their own unique specialization not found in the current list of (other) specializations under this major.

**Information.** This specialization is intended to prepare students for working with and developing a wide variety of modern data and information systems. Topics covered by this concentration include database management, information retrieval, Web search, data mining, and data-intensive computing.

**Intelligent Systems.** This specialization will introduce students to the principles underlying intelligent systems, including topics such as representing human knowledge, building automated reasoning systems, developing intelligent search techniques, and designing algorithms that adapt and learn from data. Students in this specialization will use these principles to solve problems across a variety of applications such as computer vision, information retrieval, data mining, automated recommender systems, bioinformatics, as well as individually designed projects.

**Networked Systems.** This specialization focuses on Internet architecture, Internet applications, and network security. It also encourages students to learn about operating systems, databases, search, programming, embedded systems, and performance.

**Systems and Software.** This specialization deals with principles and design of systems and software. It emphasizes the interaction between software and the computing infrastructure on which it runs and the performance impact of design decisions. Core topics include the hardware/software interface, languages and compilers, operating systems, parallel and distributed computing. Elective topics include networking, security, graphics, and databases.

**Visual Computing.** This specialization encompasses the digital capture, processing, synthesis and display of visual data such as images and video. This specialization includes computer vision, image processing, and graphics, and covers such topics as the representation of 3D objects, visual recognition of objects and people, interactive and photo-realistic image rendering, and physics and perception of light and color.

The Department also offers a joint undergraduate degree in Computer Science and Engineering, in conjunction with The Henry Samueli School of Engineering; information is available in the Interdisciplinary Studies section of the *Catalogue*.

**Freshman Applicants:** See the Undergraduate Admissions section.

#### Transfer Applicants:

Transfer applicants who satisfactorily complete course prerequisites will be given preference for admission. All applicants must complete the following required courses: one year of approved calculus, one year of object-oriented programming (python, java, C++), additional courses as specified by the major, and completion of lower-division writing. Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. Visit the *UCI Office of Admissions website* for information on transfer requirements for our major.

### Major and Minor Restrictions

Bren School of ICS majors (including shared majors, BIM and CSE) pursuing minors within the Bren School of ICS may not count more than five courses toward both the major and minor. Some ICS majors and minors outside of the School are not permitted due to significant overlap. Visit the ICS Student Affairs Office website for Majors and Minors restrictions. ([http://www.ics.uci.edu/ugrad/degrees/MajorMinor\\_Restrictions\\_Chart.pdf](http://www.ics.uci.edu/ugrad/degrees/MajorMinor_Restrictions_Chart.pdf)) All students should check the Double Major Restrictions Chart ([https://www.ics.uci.edu/ugrad/degrees/Dbl\\_Major\\_Restrictions\\_Chart.pdf](https://www.ics.uci.edu/ugrad/degrees/Dbl_Major_Restrictions_Chart.pdf)) and view our information page ([http://www.ics.uci.edu/ugrad/degrees/Double\\_Majors.php](http://www.ics.uci.edu/ugrad/degrees/Double_Majors.php)) on double majoring to see what degree programs are eligible for double majoring.

## Requirements for the B.S. in Computer Science

All students must meet the University Requirements.

### Major Requirements

#### Lower-division

A. Select one of the following series:

I&C SCI 31- 32- 33	Introduction to Programming and Programming with Software Libraries and Intermediate Programming
--------------------	--

or

I&C SCI 32A- 33	Python Programming and Libraries (Accelerated) and Intermediate Programming
-----------------	--

B. Complete:

I&C SCI 45C	Programming in C/C++ as a Second Language
-------------	---

I&C SCI 46	Data Structure Implementation and Analysis
------------	--

I&C SCI 51	Introductory Computer Organization
------------	------------------------------------

I&C SCI 53	Principles in System Design
------------	-----------------------------

I&C SCI 53L	Principles in System Design Library
-------------	-------------------------------------

IN4MATX 43	Introduction to Software Engineering
------------	--------------------------------------

MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
-------------	--

I&C SCI 6B	Boolean Logic and Discrete Structures
------------	---------------------------------------

I&C SCI 6D	Discrete Mathematics for Computer Science
------------	---

I&C SCI 6N or MATH 3A	Computational Linear Algebra Introduction to Linear Algebra
--------------------------	--

STATS 67	Introduction to Probability and Statistics for Computer Science
----------	---

C. Two courses approved for General Education category II except those offered by CSE, Economics, Engineering, ICS, or Mathematics. University Studies courses can be used with the approval of the CS Vice Chair for Undergraduate Studies.

#### Upper-division

A. Core

COMPSCI 161	Design and Analysis of Algorithms
-------------	-----------------------------------

I&C SCI 139W	Critical Writing on Information Technology
--------------	--

B. Upper-division electives: Select 11 upper-division courses from the list below. Sections B-1 and B-2 must be completed as part of the 11 upper-division electives.

COMPSCI 103–160, 162-189

IN4MATX 102	Concepts of Programming Language II
-------------	-------------------------------------

IN4MATX 113	Requirements Analysis and Engineering
-------------	---------------------------------------

IN4MATX 115	Software Testing, Analysis, and Quality Assurance
-------------	---

IN4MATX 117	Project in Software System Design
-------------	-----------------------------------

IN4MATX 121	Software Design: Applications
-------------	-------------------------------

IN4MATX 122	Software Design: Structure and Implementation
-------------	---

IN4MATX 124	Internet Applications Engineering
-------------	-----------------------------------

IN4MATX 131	Human Computer Interaction
-------------	----------------------------

IN4MATX 133	User Interaction Software
-------------	---------------------------

IN4MATX 134	Project in User Interaction Software
-------------	--------------------------------------

I&C SCI 161	Game Engine Lab
-------------	-----------------

I&C SCI 162	Modeling and World Building
-------------	-----------------------------

B-1. Project Courses: Choose at least two projects courses from the following list:

COMPSCI 113	Computer Game Development
-------------	---------------------------

COMPSCI 114	Projects in Advanced 3D Computer Graphics
-------------	---

COMPSCI 117	Project in Computer Vision
-------------	----------------------------

COMPSCI 122B	Project in Databases and Web Applications
--------------	---

COMPSCI 122C	Principles of Data Management
--------------	-------------------------------

COMPSCI 122D	Beyond SQL Data Management
--------------	----------------------------

COMPSCI 125	Next Generation Search Systems
COMPSCI 133	Advanced Computer Networks
COMPSCI 142B	Language Processor Construction
COMPSCI 143B	Project in Operating System Organization
COMPSCI 145- 145L	Embedded Software and Embedded Software Laboratory
COMPSCI 147	Internet of Things (IoT) Software and Systems
COMPSCI 153	Logic Design Laboratory
COMPSCI 154	Computer Design Laboratory
COMPSCI 165	Project In Algorithms And Data Structures
COMPSCI 175	Project in Artificial Intelligence
IN4MATX 117	Project in Software System Design
IN4MATX 134	Project in User Interaction Software

B-2. Specialization: Select and satisfy the requirements for one of the specializations below. (Note: Students may not pursue more than one specialization.)

Some of the specializations include recommended electives. These are courses related to the specialization and intended to help students choose courses to take toward their upper-division elective requirement.

**Algorithms: Four courses from the following list:**

COMPSCI 162	Formal Languages and Automata
COMPSCI 163	Graph Algorithms
COMPSCI 164	Computational Geometry and Geometric Modeling
COMPSCI 165	Project In Algorithms And Data Structures
COMPSCI 166	Quantum Computation and Information
COMPSCI 167	Introduction to Applied Cryptography
COMPSCI 169	Introduction to Optimization

**Architecture and Embedded Systems: four courses from the following list:**

COMPSCI 145- 145L	Embedded Software and Embedded Software Laboratory
COMPSCI 147	Internet of Things (IoT) Software and Systems
COMPSCI 151	Digital Logic Design
COMPSCI 152	Computer Systems Architecture
COMPSCI 153	Logic Design Laboratory
COMPSCI 154	Computer Design Laboratory

**Bioinformatics: three courses from the following list:**

COMPSCI 184A	Artificial Intelligence in Biology and Medicine
and complete:	
COMPSCI 172B	Neural Networks and Deep Learning
COMPSCI 172C	Artificial Intelligence Frontiers: Technical, Ethical, and Societal
COMPSCI 184C	Computational Systems Biology

**General CS track**

COMPSCI 103-189, except COMPSCI 161

**Information**

COMPSCI 121	Information Retrieval
COMPSCI 122A	Introduction to Data Management
COMPSCI 178	Machine Learning and Data-Mining

and four courses from:

I&C SCI 45J	Programming in Java as a Second Language
COMPSCI 122B	Project in Databases and Web Applications
COMPSCI 122C	Principles of Data Management
COMPSCI 122D	Beyond SQL Data Management
COMPSCI 125	Next Generation Search Systems
COMPSCI 132	Computer Networks
COMPSCI 134	Computer and Network Security

COMPSCI 141	Concepts in Programming Languages I
COMPSCI 142A	Compilers and Interpreters
COMPSCI 143A	Principles of Operating Systems
COMPSCI 163	Graph Algorithms
COMPSCI 165	Project In Algorithms And Data Structures
COMPSCI 167	Introduction to Applied Cryptography
COMPSCI 179	Algorithms for Probabilistic and Deterministic Graphical Models
at least one of which must be:	
COMPSCI 122B	Project in Databases and Web Applications
COMPSCI 122C	Principles of Data Management
COMPSCI 122D	Beyond SQL Data Management
COMPSCI 125	Next Generation Search Systems
COMPSCI 179	Algorithms for Probabilistic and Deterministic Graphical Models
<b>Intelligent Systems</b>	
COMPSCI 171	Introduction to Artificial Intelligence
COMPSCI 175	Project in Artificial Intelligence
COMPSCI 178	Machine Learning and Data-Mining
and at least three courses from:	
COMPSCI 116	Computational Photography and Vision
COMPSCI 121	Information Retrieval
COMPSCI 125	Next Generation Search Systems
COMPSCI 162	Formal Languages and Automata
COMPSCI 163	Graph Algorithms
COMPSCI 164	Computational Geometry and Geometric Modeling
COMPSCI 169	Introduction to Optimization
COMPSCI 177	Applications of Probability in Computer Science
COMPSCI 179	Algorithms for Probabilistic and Deterministic Graphical Models
<b>Networked Systems</b>	
COMPSCI 132	Computer Networks
COMPSCI 133	Advanced Computer Networks
COMPSCI 134	Computer and Network Security
COMPSCI 143A	Principles of Operating Systems
<b>Systems and Software: three courses from the following list:</b>	
COMPSCI 131	Parallel and Distributed Computing
COMPSCI 141	Concepts in Programming Languages I
COMPSCI 142A	Compilers and Interpreters
COMPSCI 142B	Language Processor Construction
COMPSCI 143A	Principles of Operating Systems
COMPSCI 143B	Project in Operating System Organization
<b>Visual Computing: four courses from the following list:</b>	
COMPSCI 111	Digital Image Processing
COMPSCI 112	Computer Graphics
COMPSCI 114	Projects in Advanced 3D Computer Graphics
COMPSCI 116	Computational Photography and Vision
COMPSCI 117	Project in Computer Vision
I&C SCI 162	Modeling and World Building

**NOTES:**

1. Students are advised that this sample program lists the minimum requirements; it is possible that students may have to take additional courses to prepare for required courses.
2. The lower-division writing requirement must be completed by the end of the seventh quarter at UCI.
3. This is only a sample plan. Course offerings may be moved due to unforeseen circumstances. It is strongly recommended that students meet with an academic advisor to create an academic plan tailored to meet their specific areas of interest.

## Computer Science, M.S.

Computer Science encompasses both theoretical and practical aspects of design, analysis, and implementation of computer systems, as well as applications of computing to numerous other fields. Core research areas include: (1) artificial intelligence and machine learning, (2) bioinformatics, (3) computer architecture, (4) embedded systems, (5) graphics and computer vision, (6) database systems and information management, (7) multimedia and gaming, (8) networks and distributed systems, (9) programming languages and compilers, (10) security, privacy, and cryptography, (11) design and analysis of algorithms, and (12) scientific computing.

The M.S. degree in Computer Science (CS) is a broad and flexible program, offering students opportunities for in-depth graduate study and cutting-edge research, covering a broad range of topics in Computer Science.

The course requirements for the M.S. are identical to those of the Ph.D., although completion plans differ. M.S. students can choose a thesis option that allows them to undertake a research-based thesis in lieu of two elective courses. For general information about admissions, the M.S. completion plan options, visit the Bren School of ICS Graduate Programs (<http://catalogue.uci.edu/donaldbrenschoolofinformationandcomputersciences/#graduatetext>) section (<http://catalogue.uci.edu/donaldbrenschoolofinformationandcomputersciences/#graduatetext>) of the *Catalogue*.

### Required Courses

Each student must complete at least 47 units of course work. In addition, students must receive at least a B in each course counted toward filling these requirements.

Students must complete three quarters of COMPSCI 200S, four core courses, and seven elective courses. The course requirements are as follows:

Students must select four areas from the list of seven areas given below. From each area, they must select at least one of the courses listed for that area.

#### Data Structures and Algorithms

COMPSCI 260	Fundamentals of the Design and Analysis of Algorithms
COMPSCI 261	Data Structures
COMPSCI 263	Analysis of Algorithms

#### Architecture/Embedded Systems

COMPSCI 250A	Computer Systems Architecture
COMPSCI 244	Introduction to Embedded and Ubiquitous Systems

#### System Software

COMPSCI 241	Advanced Compiler Construction
-------------	--------------------------------

COMPSCI 243	High-Performance Architectures and Their Compilers
COMPSCI 230	Distributed Computer Systems
<b>Artificial Intelligence</b>	
COMPSCI 271	Introduction to Artificial Intelligence
COMPSCI 273A	Machine Learning
<b>Networks/Multimedia</b>	
COMPSCI 232	Computer and Communication Networks
COMPSCI 203	Network and Distributed Systems Security
COMPSCI 212	Multimedia Systems and Applications
<b>Database Systems</b>	
COMPSCI 222	Principles of Data Management
COMPSCI 223	Transaction Processing and Distributed Data Management
<b>Scientific and Visual Computing</b>	
COMPSCI 206	Principles of Scientific Computing
COMPSCI 211A	Visual Computing

Seven elective courses selected from any ICS graduate program, except any course with a suffix of "S", "W", or "P" (e.g., 209S), and any non-COMPSCI course with a prefix of '29' (e.g., 295).

### Notes/Restrictions

1. At most two COMPSCI 295 courses are allowed.
2. At most two upper-division undergraduate courses are allowed from the list below:

COMPSCI 111	Digital Image Processing
COMPSCI 112	Computer Graphics
COMPSCI 122A	Introduction to Data Management
COMPSCI 132	Computer Networks
COMPSCI 142A	Compilers and Interpreters
COMPSCI 143A	Principles of Operating Systems
COMPSCI 152	Computer Systems Architecture
COMPSCI 161	Design and Analysis of Algorithms
COMPSCI 171	Introduction to Artificial Intelligence
COMPSCI 178	Machine Learning and Data-Mining
I&C SCI 161	Game Engine Lab
I&C SCI 162	Modeling and World Building
I&C SCI 163	Mobile and Ubiquitous Games
I&C SCI 166	Game Design

3. At most two courses from combined 1 and 2 above are allowed.
4. At most two courses are allowed from non-ICS UCI graduate programs, with written consent of the Vice Chair for Graduate Studies.
5. Any course that was used toward an undergraduate degree cannot be used toward graduate requirements.

## Computer Science, Ph.D.

Computer Science encompasses both theoretical and practical aspects of design, analysis, and implementation of computer systems, as well as applications of computing to numerous other fields. Core research areas include: (1) artificial intelligence and machine learning, (2) bioinformatics, (3) computer architecture, (4) embedded systems, (5) graphics and computer vision, (6) database systems and information management, (7) multimedia and gaming, (8) networks and distributed systems, (9) programming languages and compilers, (10) security, privacy, and cryptography, (11) design and analysis of algorithms, and (12) scientific computing.

The Ph.D. degree in Computer Science (CS) is a broad and flexible program, offering students opportunities for in-depth graduate study and cutting-edge research, covering a broad range of topics in Computer Science.

## Required Courses

Each student must complete at least 47 units of course work with an average GPA of at least 3.5 for Ph.D. students. In addition, students must receive at least a B in each course counted toward filling these requirements. The set of core and elective courses chosen by a student must be approved by the student's research advisor before advancement to candidacy. Faculty associated with each research area will provide suggested curricula for that area to guide students in their selection of courses. These curricula will also help Ph.D. students to prepare for their candidacy examination (see below) which must be taken in a specific research area.

Students must complete three quarters of COMPSCI 200S, four core courses, and seven elective courses. The course requirements are as follows:

Students must select four areas from the list of seven areas given below. From each area, they must select at least one of the courses listed for that area.

### Data Structures and Algorithms

COMPSCI 260	Fundamentals of the Design and Analysis of Algorithms
COMPSCI 261	Data Structures
COMPSCI 263	Analysis of Algorithms

### Architecture/Embedded Systems

COMPSCI 250A	Computer Systems Architecture
COMPSCI 244	Introduction to Embedded and Ubiquitous Systems

### System Software

COMPSCI 241	Advanced Compiler Construction
COMPSCI 243	High-Performance Architectures and Their Compilers
COMPSCI 230	Distributed Computer Systems

### Artificial Intelligence

COMPSCI 271	Introduction to Artificial Intelligence
COMPSCI 273A	Machine Learning

### Networks/Multimedia

COMPSCI 232	Computer and Communication Networks
COMPSCI 203	Network and Distributed Systems Security
COMPSCI 212	Multimedia Systems and Applications

### Database Systems

COMPSCI 222	Principles of Data Management
COMPSCI 223	Transaction Processing and Distributed Data Management

### Scientific and Visual Computing

COMPSCI 206	Principles of Scientific Computing
COMPSCI 211A	Visual Computing

Seven elective courses selected from any ICS graduate program, except any course with a suffix of 'S', 'W', or 'P' (e.g., 209S), and any non-COMPSCI course with a prefix '29' (e.g., 295).

### Notes/Restrictions:

1. At most, two COMPSCI 295 courses are allowed.
2. At most, two upper-division undergraduate courses are allowed, from the list below:

COMPSCI 111	Digital Image Processing
COMPSCI 112	Computer Graphics
COMPSCI 122A	Introduction to Data Management
COMPSCI 132	Computer Networks
COMPSCI 142A	Compilers and Interpreters
COMPSCI 143A	Principles of Operating Systems
COMPSCI 152	Computer Systems Architecture
COMPSCI 161	Design and Analysis of Algorithms
COMPSCI 171	Introduction to Artificial Intelligence
COMPSCI 178	Machine Learning and Data-Mining
I&C SCI 161	Game Engine Lab
I&C SCI 162	Modeling and World Building

I&amp;C SCI 163

Mobile and Ubiquitous Games

I&amp;C SCI 166

Game Design

3. At most, two courses from combined 1 and 2 above are allowed.
4. At most, two courses are allowed from non-ICS UCI graduate programs, with written consent of the advisor.
5. Any course that was used toward an undergraduate degree cannot be used toward graduate requirements.

Ph.D. students are required to serve as teaching assistants for at least two quarters.

### Research Project for the Ph.D.

Doctoral students must find a faculty advisor and successfully complete a research project with that faculty member by the end of their second year. In coordination with this project the student must also take at least one independent studies course (COMPSCI 299) with their faculty advisor. The objective of the research project is to demonstrate early in the program the student's ability to carry out basic research in computer science.

Finally, the student must present the outcome of the research in a technical report, which must be approved by the advisor. The project may or may not be a stepping-stone toward a dissertation, and must be completed by the end of the second year, and prior to advancement to candidacy.

### Advancement to Candidacy Examination

The objective of the candidacy examination is to demonstrate in-depth knowledge of an area of computer science and readiness to carry out independent research at the doctoral level in that area. The student must complete all pre-candidacy course requirements and the research project prior to advancing to candidacy. All requirements for candidacy including the candidacy examination must be completed by the end of the third year (or, for students entering the program with an M.S. in Computer Science, by the end of the second year). If the student does not pass on the first trial, the student will be allowed until the end of the first quarter of the fourth year to advance to candidacy. Consult the ICS Graduate Office for policies regarding committee membership. The format is an oral examination during which the student is tested on knowledge relevant to the chosen area of specialization. Each area is defined by a set of topics and reading list, which are maintained by the Computer Science Department office. New areas or changes to existing areas must be approved by a majority vote of the CS faculty in accordance with the Department's bylaws. The current areas include the following: Algorithms and Data Structures; Computer Architecture and Embedded Systems; Database Systems and Multimedia; Computer Networks; Distributed Systems; Artificial Intelligence and Machine Learning; Informatics in Biology and Medicine; Computer Graphics and Visual Computing; Cryptography and Computer Security; Computational Neuroscience; Scientific Computing; Systems Software.

The examination is graded pass or fail. In order to pass, the Candidacy Committee must unanimously approve the final outcome. In the case of a fail, the examination may be retaken once. Students who fail on the second try will be recommended for disqualification from the doctoral program.

### Doctoral Dissertation Topic Defense

The student must produce a substantial written document representing the dissertation plan. This must include the proposed dissertation abstract, a dissertation outline, and a detailed plan for completing the work. A dissertation defense committee is formed in accordance with UCI Senate regulations. The dissertation committee must unanimously approve the student's proposal. At the discretion of the student's advisor, the student may be required to give an oral presentation of the proposed plan to the committee. This must be completed by the end of the fourth year. It is expected that this will be done at least a year prior to the final examination and before most of the dissertation research and writing are undertaken. The idea is for students to demonstrate that they have a clear plan for carrying out the research for their dissertation. It also gives the student an understanding of what will be expected for final approval of the dissertation.

### Doctoral Dissertation and Final Examination

Ph.D. students are required to complete a Ph.D. dissertation in accordance with Academic Senate regulations. In addition, they must pass an oral dissertation defense which consists of a public seminar presenting results followed by a private examination by the doctoral committee and other interested members of the Computer Science Department faculty.

Students entering the Ph.D. program with an M.S. in Computer Science must advance to candidacy within two years. All others must advance within three years. The normative time for completion of the Ph.D. is six years, and the maximum time permitted is seven years.

## Master of Computer Science

The Master of Computer Science Program prepares students for immediate entry into the technology workforce as well as supports students for enhanced job opportunities and mobility. The program emphasizes computer science that applies to a wide variety of applications and industries where students learn or reinforce key computer science concepts through classroom and project-based learning, and through individual and collaborative assignments.

The program spans four academic quarters - fall, winter, spring, and fall in addition to a summer component that includes either an internship or additional coursework.

A key feature of the program is the capstone design courses. These include design, development, and professional writing components, as well as a capstone showcase event with opportunities to network with tech companies.

Most students come from a computing-related undergraduate program; however, applications from students with other technical backgrounds and sufficient preparation in programming are also welcomed. Applications are also encouraged from students with non-technical academic backgrounds who have sufficient preparation in programming and extensive technical employment experience. Any admitted students who have not taken a course in discrete mathematics and data structures should complete these (at a community college or online) prior to entering the program in the fall.

For specific information regarding admissions requirements and the application process, please refer to the Graduate Division website (<https://grad.uci.edu/>).

A. Complete three of the following core courses:

COMPSCI 222P	Principles of Data Management
COMPSCI 232P	Computer and Communication Networks
COMPSCI 238P	Operating Systems
COMPSCI 250P	Computer Systems Architecture
COMPSCI 260P	Fundamentals of Algorithms with Applications
COMPSCI 261P	Data Structures with Applications
COMPSCI 273P	Machine Learning and Data Mining

B. Complete two capstone courses:

COMPSCI 296P	Capstone Professional Writing and Communication for Computer Science Careers
COMPSCI 297P	Capstone Design Project for Computer Science

C. Select at least six of the following: <sup>1</sup>

COMPSCI 201P	Introduction to Computer Security
COMPSCI 202P	Applied Cryptography
COMPSCI 203P	Network Security
COMPSCI 206P	Principles of Scientific Computing
COMPSCI 210P	Computer Graphics and Visualization
COMPSCI 211P	Visual Computing
COMPSCI 222P	Principles of Data Management
COMPSCI 231P	Parallel and Distributed Computing for Professionals
COMPSCI 232P	Computer and Communication Networks
COMPSCI 238P	Operating Systems
COMPSCI 242P	Compilers and Interpreters
COMPSCI 244P	Introduction to the Internet of Things
COMPSCI 250P	Computer Systems Architecture
COMPSCI 253P	Advanced Programming and Problem Solving
COMPSCI 260P	Fundamentals of Algorithms with Applications
COMPSCI 261P	Data Structures with Applications
COMPSCI 262P	Text Processing and Pattern Matching
COMPSCI 267P	Data Compression
COMPSCI 268P	Introduction to Optimization Modeling
COMPSCI 271P	Introduction to Artificial Intelligence
COMPSCI 273P	Machine Learning and Data Mining
COMPSCI 274P	Neural Networks and Deep Learning

<sup>1</sup> Courses completed as core courses in Section A cannot also be counted toward Section C.

All Master of Computer Science students are expected to maintain a minimum GPA of 3.0 throughout the program, with no individual grade lower than a B-. The normative time to degree is four quarters; the maximum time to degree is three years.

## Department of Informatics

**André van der Hoek, Department Chair**

5019 Donald Bren Hall

949-824-2901

ichair@ics.uci.edu

## Introduction

Our world runs on information, with more and more aspects of daily life having information technologies and digital systems at their core. Topics such as open-source software, virtual organizations, online political campaigns, digital television, social media, and computer games need to be understood and advanced from both a technical and human perspective simultaneously.

This is what Informatics does.

We seek to make a positive difference in how people live, work, and build in a digital world. To that end, we study interactions among information technologies and people, create innovative information technologies that serve the diverse needs of society, and educate our students to be leaders in these endeavors.

## Values

Our work is shaped by four key values:

- **Creativity.** We create new technologies, new experiences, and new ways of understanding. We believe that information technology provides a rich platform for expression, from programming environments to digital media, and creative arts.
- **Engagement.** We focus on real-world concerns, with a strong empirical focus and a commitment to understanding and advancing technology in real life, around the world.
- **Interdisciplinarity.** We use knowledge and methods from multiple disciplines to study and improve the relationships among people, information, and technology from a holistic perspective.
- **Partnership.** We build relationships across campus and beyond, partnering with other schools and educational institutions; with corporations and technology providers; with civic agencies and nonprofits; and with consumers, advocates, and interest groups to locate novel and important contexts for conducting and applying our work.

These values help us deliver results that matter. Our research has, as just a few examples, resulted in technology that improves the early diagnosis of cerebral palsy in preterm babies; in apps that help kids with autism spectrum disorder live fuller lives; and in new tools that assist software developers in locating and fixing bugs — real results that make a difference every day.

Our values similarly define the nature of our teaching. Our students' experience is not confined to campus. Instead, they are constantly exposed to the real world, the issues at play, and the possibilities of information technology making a difference. For instance, students in our capstone design course have designed a customizable Analytics dashboard for Google; a new web portal for the Down Syndrome Foundation; an at-home energy saving recommender for Edison; a mobile application to capture statistical data related to clinical cases for the UC Irvine Medical Center; and a freelance game in which a mystical fish has to protect its aquatic environment.

- 
- Business Information Management, B.S.
  - Computer Game Science, B.S.
  - Digital Information Systems, Minor
  - Health Informatics, Minor
  - Informatics, B.S.
  - Informatics, M.S.
  - Informatics, Minor
  - Informatics, Ph.D.
  - Master of Human Computer Interaction and Design
  - Master of Software Engineering
  - Software Engineering, B.S.
  - Software Engineering, M.S.
  - Software Engineering, Ph.D.

## Faculty

Iftekhar Ahmed, Ph.D. Oregon State University, *Assistant Professor of Informatics* (data mining, software engineering, software testing and analysis, software maintenance, empirical studies)

Rebecca W. Black, Ph.D. University of Wisconsin-Madison, *Associate Professor of Informatics; Education* (digital media and learning, fan studies)

Geoffrey C. Bowker, Ph.D. University of Melbourne, *Chancellor's and Donald Bren Professor of Informatics; Visual Studies* (values in design, social studies of databases, science and technology studies)

Stacy Branham, Ph.D. Virginia Tech, *Assistant Professor of Informatics* (human-computer interaction, design, assistive technology, safe and brave space, well-being, disability, feminism, marginality, inclusion, interdependence)

Yunan Chen, Ph.D. Drexel University, *Associate Professor of Informatics; Program in Public Health* (medical informatics, human computer interaction)

Roderic N. Crooks, Ph.D. University of California, Los Angeles, *Assistant Professor of Informatics* (science and technology studies, education technology, critical data studies, data visualization, community archives)

Darren Denenberg, Ph.D. University of Maryland, *Lecturer of Informatics*

James P. Dourish, Ph.D. University College London, *Chancellor's Professor of Informatics* (human-computer interaction, computer-supported cooperative work)

Daniel Epstein, Ph.D. University of Washington, *Assistant Professor of Informatics; Computer Science* (human-computer interaction, personal informatics, ubiquitous computing, social computing, health informatics)

Joshua Garcia, Ph.D. University of Southern California, *Assistant Professor of Informatics* (software engineering, software security, software analysis and testing, software architecture, software maintenance)

Gillian Hayes, Ph.D. Georgia Institute of Technology, *Robert A. and Barbara L. Kleist Professor of Informatics; Education* (interactive and collaborative technology, human-computer interaction, computer-supported cooperative work, educational technology, ubiquitous computing)

James Jones, Ph.D. Georgia Institute of Technology, *Associate Professor of Informatics* (software engineering, software testing and analysis, debugging and fault localization, static and dynamic analysis, software visualization)

David G. Kay, J.D. Loyola Marymount University, *Professor Emeritus of Teaching of Informatics; Computer Science* (computer law, computer science education)

Alfred Kobsa, Ph.D. University of Vienna, *Professor Emeritus of Informatics; Computer Science* (user modeling, human-computer interaction, artificial intelligence, cognitive science, interdisciplinary computer science)

Cristina V. Lopes, Ph.D. Northeastern University, *Professor of Informatics* (programming languages, acoustic communications, operating systems, software engineering)

Sam Malek, Ph.D. University of Southern California, *Associate Professor of Informatics* (software engineering, software architecture, software security, software analysis and testing)

Gloria J. Mark, Ph.D. Columbia University, *Professor of Informatics* (computer-supported cooperative work, human-computer interaction)

Melissa Mazmanian, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Informatics* (computer-mediated communication, organization studies, information and communication technologies in practice, social response to emerging technologies, work/non-work negotiations in the information age)

Bonnie A. Nardi, Ph.D. University of California, Irvine, *Professor Emeritus of Informatics* (computer-supported collaborative work, human-computer interaction, computer-mediated communication, user studies methods, activity theory, cultural responses to technology development)

Emily Navarro, Ph.D. University of California, Irvine, *Lecturer of Informatics*

Gary Olson, Ph.D. Stanford University, *Professor Emeritus of Informatics* (interactive and collaborative technology, human-computer interaction, computer-supported cooperative work)

Judith Olson, Ph.D. University of Michigan, *Professor Emeritus of Informatics; Paul Merage School of Business; Urban Planning and Public Policy* (interactive and collaborative technology, human-computer interaction, computer-supported cooperative work)

Richard Pattis, M.S. Stanford University, *Professor of Teaching of Computer Science; Informatics* (MicroWorlds for teaching programming, debugging, computational tools for non-computer scientists)

Kylie Peppler, Ph.D. University of California, Los Angeles, *Associate Professor of Informatics; Education* (learning sciences, design, maker culture, arts, game design, computer programming, wearables)

David F. Redmiles, Ph.D. University of Colorado Boulder, *Professor of Informatics* (computer-supported cooperative work, human computer interaction, software engineering, globally distributed development teams, user interfaces, software tools)

Debra J. Richardson, Ph.D. University of Massachusetts, *Professor Emeritus of Informatics* (software engineering, program testing, life-cycle validation, software environments)

Katie Salen Tekinba#, M.F.A. Rhode Island School of Design, *Professor of Informatics* (game design, connected learning design, human-computer interaction)

Kurt Squire, Ph.D. Indiana University, *Professor of Informatics; Education* (video game design, games for learning, mobile technologies, civic engagement, place-based learning)

Constance Steinkuehler, Ph.D. University of Wisconsin-Madison, *Professor of Informatics; Education* (video games for impact, game-mediated cognition and learning, online social interaction, video games and policy)

Theresa Tanenbaum, Ph.D. Simon Fraser University, *Assistant Professor of Informatics* (digital games and narrative, tangible and wearable interaction, maker and DIY culture, nonverbal communication and virtual worlds)

Richard N. Taylor, Ph.D. University of Colorado Boulder, *Professor Emeritus of Informatics* (software engineering, user interfaces, environments, team support)

William M. Tomlinson, Ph.D. Massachusetts Institute of Technology, *Professor of Informatics; Education* (environmental informatics, educational technology, computer graphics/visualization/digital arts)

André W. Van der Hoek, Ph.D. University of Colorado Boulder, *Professor of Informatics* (software engineering)

Kai Zheng, Ph.D. Carnegie Mellon University, *Associate Professor of Informatics* (health informatics, human factors and human-computer interaction, technology adoption and acceptance, outcomes and evaluation)

Hadar Ziv, Ph.D. University of California, Irvine, *Associate Professor of Teaching of Informatics* (software testing, requirements engineering, Bayesian modeling)

## Affiliate Faculty

Jonathan Alexander, Ph.D. Louisiana State University, *Associate Dean, Division of Undergraduate Education and Campus Writing Coordinator and Chancellor's Professor of English; Culture and Theory; Education; Gender and Sexuality Studies; Informatics* (writing studies, sexuality studies, queer theory, new media studies)

John L. Crawford, Media Artist and Software Designer, *Professor of Dance; Informatics* (screendance, interactive media, telematic performance, motion capture, digital arts)

John Christopher Dobrian, Ph.D. University of California, San Diego, *Professor of Music; Informatics*

Shayan Doroudi, Ph.D. Carnegie Mellon University, *Assistant Professor of Education; Informatics* (learning analytics, learning sciences, educational technology)

Magda S. El Zarki, Ph.D. Columbia University, *Professor of Computer Science; Informatics* (telecommunications, networks, wireless communication, video transmission)

Vijay Gurbaxani, Ph.D. University of Rochester, *Taco Bell Chair in Information Technology Management and Professor of Paul Merage School of Business; Informatics* (economics of information systems management, impact of information technology on organization and market structure)

Jesse C. Jackson, M.A. University of Toronto, *Director of the Minor in Digital Arts and Associate Professor of Art; Informatics* (digital art, informatics, design, architecture)

Peter O. Krapp, Ph.D. University of California, Santa Barbara, *Professor of Film and Media Studies; English; European Languages and Studies; Informatics; Music; Visual Studies* (digital culture, media history, cultural memory)

Simon G. Penny, M.F.A. Sydney College of the Arts, *Professor of Art; Informatics* (informatics, robotic sculpture, interactive environments, electronic media)

Kavita S. Philip, Ph.D. Cornell University, *Professor of History; Informatics* (history of modern South Asia, science and technology, political ecology, critical theoretical studies of race, gender, colonialism, new media, and globalization)

Stephanie Reich, Ph.D. Vanderbilt University, *Associate Professor of Education; Informatics; Psychological Science* (child development, parenting, peer interactions, media, program evaluation)

Patricia Seed, Ph.D. University of Wisconsin-Madison, *Professor of History; Informatics* (mapping: history and design, game design, navigation)

Mark J. Warschauer, Ph.D. University of Hawaii at Manoa, *Professor of Education; Informatics* (language, literacy, technology, STEM)

## Informatics Courses

### **IN4MATX 12. Barter to Bitcoin: Society, Technology and the Future of Money. 4 Units.**

Digital money has captured the broad imagination of speculators, coders, regulators, criminals and the mass media. Course puts this change in context: how do we understand money as a social, political and technological phenomenon?.

Same as SOC SCI 11A.

(II and III ).

### **IN4MATX 43. Introduction to Software Engineering. 4 Units.**

Concepts, methods, and current practice of software engineering. Large-scale software production, software life cycle models, principles and techniques for each stage of development.

Prerequisite: I&C SCI 32 or I&C SCI 32A

Overlaps with I&C SCI 105.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

### **IN4MATX H81. Ethics, Technology, and Design. 4 Units.**

Provides a critical framework for how and why biases of many kinds are built into everyday digital tools. Reflections on ethics, technology, and design through case studies drawn from machine learning, CS education, engineering, social media, and criminal justice.

Restriction: Campuswide Honors Collegium students only.

(III)

### **IN4MATX 101. Concepts in Programming Languages I. 4 Units.**

In-depth study of several contemporary programming languages stressing variety in data structures, operations, notation, and control. Examination of different programming paradigms, such as logic programming, functional programming and object-oriented programming; implementation strategies, programming environments, and programming style.

Prerequisite: (I&C SCI 51 or CSE 31 or EECS 31) and (I&C SCI 46 or CSE 46). I&C SCI 51 with a grade of C or better. CSE 31 with a grade of C or better. EECS 31 with a grade of C or better. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better

Same as COMPSCI 141.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

### **IN4MATX 102. Concepts of Programming Language II. 4 Units.**

In-depth study of major programming paradigms: imperative, functional, declarative, object-oriented, and aspect-oriented. Understanding the role of programming languages in software development and the suitability of languages in context. Domain-specific languages. Designing new languages for better software development support.

Prerequisite: IN4MATX 101 or COMPSCI 141 or CSE 141

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

### **IN4MATX 113. Requirements Analysis and Engineering. 4 Units.**

Equips students to develop techniques of software-intensive systems through successful requirements analysis techniques and requirements engineering. Students learn systematic process of developing requirements through cooperative problem analysis, representation, and validation.

Prerequisite: (I&C SCI 33 or CSE 43) and IN4MATX 43. I&C SCI 33 with a grade of C or better. CSE 43 with a grade of C or better. IN4MATX 43 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 115. Software Testing, Analysis, and Quality Assurance. 4 Units.**

Preparation for developing high-quality software through successful verification and validation techniques. Fundamental principles of software testing, implementing software testing practices, ensuring the thoroughness of testing to gain confidence in the correctness of the software.

Prerequisite: (I&C SCI 45J or I&C SCI 45C or I&C SCI 46 or CSE 46) and IN4MATX 43. I&C SCI 45J with a grade of C or better. I&C SCI 45C with a grade of C or better. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better. IN4MATX 43 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 117. Project in Software System Design. 4 Units.**

Specification, design, construction, testing, and documentation of a complete software system. Special emphasis on the need for and use of teamwork, careful planning, and other techniques for working with large systems.

Prerequisite: (IN4MATX 43 and I&C SCI 33) or CSE 43

Restriction: Upper-division students only. School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 121. Software Design: Applications. 4 Units.**

Introduction to application design: designing the overall functionality of a software application. Topics include general design theory, software design theory, and software architecture. Includes practice in designing and case studies of existing designs.

Prerequisite: I&C SCI 33 or CSE 43. I&C SCI 33 with a grade of C or better. CSE 43 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 122. Software Design: Structure and Implementation. 4 Units.**

Introduction to implementation design: designing the internals of a software application. Topics include design aesthetics, design implementation, design recovery, design patterns, and component reuse. Includes practice in designing and case studies of existing designs.

Prerequisite: (I&C SCI 45J or I&C SCI 46 or IN4MATX 45) and (IN4MATX 101 or COMPSCI 141 or CSE 141)

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 124. Internet Applications Engineering. 4 Units.**

Concepts in Internet applications engineering with emphasis on the Web. Peer-to-Peer and Interoperability. Topics include HTTP and REST, Remote Procedure/Method Calls, Web Services, data representations, content distribution networks, identity management, relevant W3C/IETF standards, and relevant new large-scale computing styles.

Prerequisite: (COMPSCI 132 or EECS 148) and I&C SCI 45J

Same as COMPSCI 137.

Overlaps with COMPSCI 122B.

Restriction: Upper-division students only. School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 125. Computer Game Development. 4 Units.**

Introduction to the principles of interactive 2D and 3D computer game development. Concepts in computer graphics, algorithms, software engineering, art and graphics, music and sound, story analysis, and artificial intelligence are presented and are the basis for student work.

Prerequisite: COMPSCI 112 or COMPSCI 171 or IN4MATX 121 or ART 106B or I&C SCI 163 or I&C SCI 166

Same as COMPSCI 113.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 131. Human Computer Interaction. 4 Units.**

Basic principles of human-computer interaction (HCI). Introduces students to user interface design techniques, design guidelines, and usability testing. Students gain the ability to design and evaluate user interfaces and become familiar with some of the outstanding research problems in HCI.

Prerequisite: I&C SCI 10 or I&C SCI 31 or I&C SCI 32A or CSE 41 or ENGR 10 or ENGRMAE 10 or EECS 10. I&C SCI 10 with a grade of C or better. I&C SCI 31 with a grade of C or better. I&C SCI 32A with a grade of C or better. CSE 41 with a grade of C or better. ENGR 10 with a grade of C or better. ENGRMAE 10 with a grade of C or better. EECS 10 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 132. Project in Human-Computer Interaction Requirements and Evaluation. 4 Units.**

Students undertake significant projects in the elicitation and specification of HCI requirements and the thorough evaluation of user interfaces.

Prerequisite: IN4MATX 131

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 133. User Interaction Software. 4 Units.**

Introduction to human-computer interaction programming. Emphasis on current tools, standards, methodologies for implementing effective interaction designs. Widget toolkits, Web interface programming, geo-spatial and map interfaces, mobile phone interfaces.

Prerequisite: I&C SCI 45J or I&C SCI 45C. I&C SCI 45J with a grade of C or better. I&C SCI 45C with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 134. Project in User Interaction Software. 4 Units.**

Students complete an end-to-end user interface programming project based on an iterative design paradigm. Topics may include requirements brainstorming, paper prototyping, iterative development, cognitive walk-through, quantitative evaluation, and acceptance testing. Materials fee.

Prerequisite: IN4MATX 131 and IN4MATX 133

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**IN4MATX 141. Information Retrieval. 4 Units.**

An introduction to information retrieval including indexing, retrieval, classifying, and clustering text and multimedia documents.

Prerequisite: (I&C SCI 45C or I&C SCI 45J) and (STATS 7 or STATS 67). I&C SCI 45C with a grade of C or better. I&C SCI 45J with a grade of C or better

Same as COMPSCI 121.

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**IN4MATX 143. Information Visualization. 4 Units.**

Introduction to interactive visual interfaces for large datasets, and to principles of human visual perception and human computer interaction that inform their design. Various applications for data analysis and monitoring are discussed.

Prerequisite: (IN4MATX 131 or IN4MATX 43) and (I&C SCI 31 or I&C SCI 32A or CSE 41). IN4MATX 131 with a grade of C or better. IN4MATX 43 with a grade of C or better. I&C SCI 31 with a grade of C or better. I&C SCI 32A with a grade of C or better. CSE 41 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**IN4MATX 148. Project in Ubiquitous Computing. 4 Units.**

Introduction to ubiquitous computing research methods, tools, and techniques. Prototyping, design, and evaluation of physical computing applications, smart environments, embedded systems, and future computing scenarios. Includes hands-on in-class laboratory exercises. Materials fee.

Prerequisite: I&C SCI 10 or I&C SCI 31 or CSE 41 or I&C SCI 32A. I&C SCI 10 with a grade of C or better. I&C SCI 31 with a grade of C or better. CSE 41 with a grade of C or better. I&C SCI 32A with a grade of C or better

Restriction: Upper-division students only. School of Info & Computer Sci students have first consideration for enrollment.

**IN4MATX 151. Project Management. 4 Units.**

Introduces theoretical and practical aspects of project management. Topics include organizational theory, group behavior, project management skills, case studies, personal and group productivity tools, management of distributed work, stakeholders, consultants, and knowledge management. Students do a project exercise.

Prerequisite: IN4MATX 43

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**IN4MATX 153. Computer Supported Cooperative Work. 4 Units.**

Introduces concepts and principles of collaborative systems. Topics may include shared workspaces, group interaction, workflow, architectures, interaction between social and technical features of group work, and examples of collaborative systems used in real-world settings. Students develop a simple collaborative application.

Prerequisite: (IN4MATX 161 or IN4MATX 43) and (I&C SCI 31 or I&C SCI 32A or CSE 41). I&C SCI 31 with a grade of C or better. I&C SCI 32A with a grade of C or better. CSE 41 with a grade of C or better

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**IN4MATX 161. Social Analysis of Computing. 4 Units.**

Introduction of computing as a social process. Examines the social opportunities and problems raised by new information technologies, and the consequences of different ways of organizing. Topics include computing and work life, privacy, virtual communities, productivity paradox, systems risks.

Prerequisite: I&C SCI 10 or I&C SCI 31 or I&C SCI 32A or CSE 41 or ENGR 10 or EECS 10 or ENGRMAE 10. I&C SCI 10 with a grade of C or better. I&C SCI 31 with a grade of C or better. I&C SCI 32A with a grade of C or better. CSE 41 with a grade of C or better. ENGR 10 with a grade of C or better. EECS 10 with a grade of C or better. ENGRMAE 10 with a grade of C or better. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: School of Info & Computer Sci students have first consideration for enrollment.

**IN4MATX 162W. Organizational Information Systems. 4 Units.**

Introduction to role of information systems in organizations, components and structure of organizational information systems, and techniques used in information systems analysis, design, and implementation.

Prerequisite: IN4MATX 161. Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

**IN4MATX 163. Project in the Social and Organizational Impacts of Computing . 4 Units.**

Students undertake projects intended to gather and analyze data from situations in which computers are used, organize and conduct experiments intended to test hypotheses about impacts, and explore the application of concepts learned in previous courses.

Prerequisite: IN4MATX 162W

**IN4MATX 164. Children's Learning and Media. 4 Units.**

Examines how popular media may impact how young people learn, develop, and communicate by looking at research related to the impacts of a wide range of popular media including television, video games, digital environments, mobile devices, and other multimedia.

Same as EDUC 130.

Restriction: Education Sciences Majors only. Informatics Majors only. Informatics Minors only.

**IN4MATX 171. Introduction to Medical Informatics. 4 Units.**

Broad overview of medical informatics for students with varied backgrounds. Electronic medical records, online resources, mobile technologies, patient safety, and computational design. Legal, ethical, and public policy issues. Health systems management. Evaluation and fieldwork for health systems.

Prerequisite: WRITING 39C or WRITING 30 or WRITING 31 or HUMAN 1C or HUMAN H1C. WRITING 39C with a grade of C or better. WRITING 30 with a grade of C or better. WRITING 31 with a grade of C or better. HUMAN 1C with a grade of C or better. HUMAN H1C with a grade of C or better

Same as PUBHLTH 105.

Restriction: Upper-division students only. Satisfactory completion of the Lower-Division Writing requirement.

**IN4MATX 172. Project in Health Informatics. 4 Units.**

Students undertake significant quarter-long projects related to health informatics. Topics may include field evaluations of health care technologies, prototypes, iterative design, and system implementations.

Prerequisite: PUBHLTH 105 or IN4MATX 171

Same as PUBHLTH 106.

**IN4MATX 190. Special Topics in Informatics. 4 Units.**

Studies in selected areas of informatics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**IN4MATX 191A. Senior Design Project. 4 Units.**

Group supervised project in which students analyze, specify, design, construct, evaluate, and adapt a significant information processing system. Topics include team management, professional ethics, and systems analysis.

Prerequisite: IN4MATX 113 and IN4MATX 121 and IN4MATX 131 and IN4MATX 151

Grading Option: In Progress (Letter Grade with P/NP).

Restriction: Seniors only. Software Engineering Majors have first consideration for enrollment. Informatics Majors have first consideration for enrollment.

**IN4MATX 191B. Senior Design Project. 4 Units.**

Group supervised project in which students analyze, specify, design, construct, evaluate, and adapt a significant information processing system. Topics include team management, professional ethics, and systems analysis.

Prerequisite: IN4MATX 191A. In Progress (IP) grade for IN4MATX 191A is also accepted.

Restriction: Seniors only.

**IN4MATX H198. Honors Research. 4 Units.**

Directed independent research in Informatics for honors students.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be repeated for credit unlimited times.

Restriction: Bren School of ICS Honors students only. Campuswide Honors Collegium students only.

**IN4MATX 199. Individual Study. 2-5 Units.**

Individual research or investigation under the direction of an individual faculty member.

Repeatability: May be repeated for credit unlimited times.

**IN4MATX 201. Research Methodology for Informatics. 4 Units.**

Introduction to strategies and idioms of research in Informatics. Includes examination of issues in scientific inquiry, qualitative and quantitative methods, and research design. Both classic texts and contemporary research literature are read and analyzed.

**IN4MATX 203. Qualitative Research Methods in Information Systems. 4 Units.**

Introduction to qualitative research methods used to study computerization and information systems, such as open-ended interviewing, participant observation, and ethnography. Studies of the methods in practice through examination of research literature.

Prerequisite: IN4MATX 261 or IN4MATX 251

**IN4MATX 205. Quantitative Research Methods in Information Systems. 4 Units.**

Quantitative research methods used to study computerization and information systems. Design of instruments, sampling, sample sizes, and data analysis. Validity and reliability. Longitudinal versus cross-sectional designs. Analysis of secondary data. Studies of the methods through examination of research literature.

Prerequisite: IN4MATX 251 or IN4MATX 261. Basic knowledge of elementary statistics is also required.

**IN4MATX 207S. Doctoral Seminar on Research and Writing. 2 Units.**

Doctoral seminar centered on original research and writing. Provides a chance for doctoral students at all levels to present original work, brainstorm ongoing issues, and learn to provide and receive critical feedback from peers.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**IN4MATX 209S. Seminar in Informatics. 2 Units.**

Current research and research trends in informatics. Forum for presentation and criticism by students of research work in progress.

Repeatability: Unlimited as topics vary.

**IN4MATX 231. User Interface Design and Evaluation. 4 Units.**

Introduction to the design and evaluation of user interfaces, with an emphasis on methodology. Cognitive principles, design life cycle, on-line and off-line prototyping techniques. Toolkits and architectures for interactive systems. Evaluation techniques, including heuristic and laboratory methods.

**IN4MATX 232. Research in Human-Centered Computing. 4 Units.**

Introduction to contemporary topics in human-computer interaction, including methods, technologies, design, and evaluation. Emerging application domains and their challenges to traditional research methods. Advanced architectures and technologies. Critical issues.

Prerequisite: Some familiarity with HCI principles.

**IN4MATX 237. Usable Security and Privacy. 4 Units.**

Introduces usability problems in security and privacy methods, tools, and software. Overviews prominent examples of both failures and successes in usable security and privacy. Surveys state-of-the-art techniques and evaluation methodologies.

Same as COMPSCI 204.

Overlaps with IN4MATX 231, COMPSCI 203.

Restriction: Informatics Majors have first consideration for enrollment. Computer Science Majors have first consideration for enrollment. Undergraduate degree in CompSci or Informatics is strongly recommended.

**IN4MATX 241. Introduction to Ubiquitous Computing. 4 Units.**

The 'disappearing computer' paradigm. Differences to the desktop computing model: applications, interaction in augmented environments, security, alternate media, small operating systems, sensors, and embedded systems design. Evaluation by project work and class participation.

Same as COMPSCI 248A.

**IN4MATX 244. Introduction to Embedded and Ubiquitous Systems. 4 Units.**

Embedded and ubiquitous system technologies including processors, DSP, memory, and software. System interfacing basics; communication strategies; sensors and actuators, mobile and wireless technology. Using pre-designed hardware and software components. Design case studies in wireless, multimedia, and/or networking domains.

Prerequisite: I&C SCI 51 and COMPSCI 152 and COMPSCI 161 and (I&C SCI 6N or MATH 3A or MATH 6G or I&C SCI 6D). B.S. degree in Computer Science is also accepted.

Same as COMPSCI 244.

**IN4MATX 251. Computer-Supported Cooperative Work. 4 Units.**

The role of information systems in supporting work in groups and organizations. Examines various technologies designed to support communication, information sharing, and coordination. Focuses on behavioral and social aspects of designing and using group support technologies.

**IN4MATX 261. Social Analysis of Computing. 4 Units.**

The social and economic impacts of computing and information technologies on groups, organizations, and society. Topics include computerization and changes in the character of work, social control and privacy, electronic communities, and risks of safety-critical systems to people.

**IN4MATX 263. Computerization, Work, and Organizations. 4 Units.**

Selected topics in the influence of computerization and information systems in transforming work and organizations. Theories of organization and organizational change. Processes by which diverse information technologies influence changes in work and organizations over short and long time periods.

Prerequisite: IN4MATX 251 or IN4MATX 261

**IN4MATX 265. Theories of Information Society . 4 Units.**

Social and economic conceptions of information technology. Macrosocial and economic conditions that foster changes in information technologies. Social construction of information and computer technology in professional worlds. Theories of information technology and large-scale social change.

Prerequisite: IN4MATX 251 or IN4MATX 261

**IN4MATX 267. Digital Media and Society. 4 Units.**

Selected topics in the technological and social aspects of online interactions, and policy including online games, social media, electronic activism, e-commerce, and digital libraries. Media-theoretic approaches to digital technology. Architectures, infrastructure considerations, and their consequences.

Prerequisite: IN4MATX 251 or IN4MATX 261

**IN4MATX 273. Information Technology in Global Sustainability. 4 Units.**

Explores the relationship between recent developments in information technology and the global transition to sustainability. Topics include the role of IT systems in the provision of human needs and wants (e.g., smart grids, food systems, and other IT-enabled infrastructure).

Restriction: Graduate students only.

**IN4MATX 280. Overview of Human-Computer Interaction and Design . 4 Units.**

Introduction to human-computer interaction and user-centered design. The material is focused on laying the groundwork for understanding the history, importance, and methods of human-computer interaction and design.

**IN4MATX 281. User Needs Analysis . 4 Units.**

Understanding the user's context, needs, and preferences. Topics include interviews and observations, modeling the context, flow, culture, space and artifacts involved in an endeavor, ways of aggregating what is found, and presenting these findings to others.

Prerequisite: IN4MATX 280

**IN4MATX 282. Design and Prototyping . 4 Units.**

Introduction to user-centered design and prototyping. Focused on practical methods for interaction design. Topics include the nature of design and the challenges to creating and evaluating good designs, as well specific skills for designing interactive systems.

Prerequisite: IN4MATX 280

**IN4MATX 283. User Experience Evaluation . 4 Units.**

Evaluating prototypes and completed systems. Topics include comparative analysis, laboratory experiments, heuristic evaluation, cognitive walkthroughs, surveys, clickstreams, and help-desk.

Prerequisite: IN4MATX 280

**IN4MATX 284. Advanced Design and Prototyping . 4 Units.**

Develop and communicate interactive technology design prototypes. Moving concepts from brainstorming and paper prototypes to wireframe and limited functionality mock-ups.

Prerequisite: IN4MATX 282

**IN4MATX 285. Interactive Technology Studio . 4 Units.**

Technologies, languages, and skills required for creating prototypes to communicate interactive technology concepts. Topics include HTTP, CSS, CSS scripting, AJAX, Design Patterns, Javascript, Javascript libraries such as jQuery, SQL, MVC, and cloud architectures.

Prerequisite: IN4MATX 280

**IN4MATX 286. Innovations in HCI and Design . 4 Units.**

Recent social and technological developments in human-computer interaction and design. Topics will vary as the field progresses but include novel input techniques, novel platforms, and innovations in theory and methods of design.

Prerequisite: IN4MATX 280

**IN4MATX 287. Capstone Project in HCI and Design . 4 Units.**

Group project that reinforces all concepts learned in this program, including knowing where user experience work is most appropriate and essential, and executing the appropriate steps.

Prerequisite: IN4MATX 283 and IN4MATX 284

**IN4MATX 288. Capstone Project and Portfolio . 4 Units.**

Completion of capstone projects and development of portfolios. Ideation, critique, development, and critique.

Prerequisite: IN4MATX 287

**IN4MATX 290. Research Seminar. 2 Units.**

Forum for presentation and criticism by students of research work in progress. Presentation of problem areas and related work. Specific goals and progress of research.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**IN4MATX 291S. Literature Survey in Software Engineering. 2 Units.**

Reading and analysis of relevant literature in Software Engineering under the direction of a faculty member.

Repeatability: May be repeated for credit unlimited times.

**IN4MATX 295. Special Topics in Informatics. 4 Units.**

Studies in selected areas of informatics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**IN4MATX 298. Thesis Supervision. 2-12 Units.**

Individual research or investigation conducted in preparation for the M.S. thesis option or the dissertation requirements for the Ph.D. program.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**IN4MATX 299. Individual Study. 1-12 Units.**

Individual research or investigation under the direction of an individual faculty member.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Software Engineering Courses

**SWE 211. Software Engineering. 4 Units.**

Study of the concepts, methods, and tools for the analysis, design, construction, and measurement of complex software-intensive systems. Underlying principles emphasized. State-of-the-art software engineering and promising research areas covered, including project management.

**SWE 212. Analysis of Programming Languages. 4 Units.**

Concepts in modern programming languages, their interaction, and the relationship between programming languages and methods for large-scale, extensible software development. Empirical analysis of programming language usage.

Same as CS 253.

**SWE 213. Requirements Engineering and Specification. 4 Units.**

Rigorous techniques in requirements engineering - the requirements definition phase of software development - with a focus on modeling and specification. Topics include notations and models for requirements specification; and methods, tools, and processes for software requirements elicitation, representation, analysis.

Restriction: Graduate students only.

**SWE 214. Program Analysis. 4 Units.**

Covers principles and concepts of automated program analysis. Topics include program representations; intra-procedural data-flow analysis; call-graph construction; pointer analysis; alias analysis; inter-procedural analysis; inter-procedural finite distributive subset problems; inter-procedural distributive environment problems; symbolic execution; and program-analysis applications.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Graduate students only.

**SWE 215. Software Analysis and Testing. 4 Units.**

Studies techniques for developing confidence in software from traditional testing schemes to integrated, multitechnique analytic approaches. Considers strengths and weaknesses and explores opportunities for synergistic technique application. Emphasis is on approaches integrated into the software process.

Restriction: Graduate students only.

**SWE 221. Software Architecture. 4 Units.**

Study of the concepts, representation techniques, development methods, and tools for architecture-centric software engineering. Topics include domain-specific software architectures, architectural styles, architecture description languages, software connectors, and dynamism in architectures.

Restriction: Graduate students only.

**SWE 225. Information Retrieval, Filtering, and Classification. 4 Units.**

Algorithms for the storage, retrieval, filtering, and classification of textual and multimedia data. The vector space model, Boolean and probabilistic queries, and relevance feedback. Latent semantic indexing; collaborative filtering; and relationship to machine learning methods.

Prerequisite: CS 161 and CS 171 and (ICS 6N or MATH 3A or MATH 6G)

Same as CS 221.

Restriction: Graduate students only.

**SWE 233. Intelligent User Interfaces. 4 Units.**

Explores example software systems and their underlying concepts that leverage computing to empower and augment human individuals in their activities. Topics span the fields of user interface design, human-computer interaction, software engineering, and cognitive computing.

Prerequisite: CS 171

Restriction: Graduate students only.

**SWE 234. Human Aspects of Software Engineering. 4 Units.**

Selected topics about the cooperative and human aspects of software engineering from the perspective that software engineering is inherently an endeavor involving human stakeholders. Topics may include but are not limited to collaboration, trust, emotion, language, gender, and software tools.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Graduate students only.

**SWE 241P. Applied Data Structures and Algorithms. 2 Units.**

Exploration of strategies to tackle computational problems whose solutions include well-known algorithms and data structures. Topics include sorting, searching, indexing, among others.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only.

**SWE 242P. Network Programming. 2 Units.**

Exploration of networking principles and concepts for the development of distributed software. Topics include programming against well-known network protocols, ports and sockets, and network APIs.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only.

**SWE 243P. Database Programming . 2 Units.**

Exploration of software development with substantial reliance on a database for storage and retrieval of data. Topics include relational databases, structured query language, relational database management systems, APIs and libraries for database programming, among others.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only.

**SWE 244P. Concurrent Programming. 2 Units.**

Exploration of concepts and mechanisms for the development of concurrent software. Topics include threads, locks, race conditions, and deadlocks, among others.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 245P. GUI Programming . 2 Units.**

Exploration of interactive software with substantial graphical user interface elements. Topics include libraries and frameworks for GUI programming, layout design and alternatives, event-driven programming, among others.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 246P. Mobile Programming. 2 Units.**

Exploration of contemporary libraries and frameworks for construction of mobile applications. Topics include emulators, mobile development standards and patterns, energy consumption issues, screen layout, among others.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 247P. Applied Information Retrieval. 2 Units.**

Exploration of principles and concepts for textual information retrieval. Topics include tokenization, inverted indexes, scored retrieval, and precision and recall.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 248P. Neural Network Programming . 2 Units.**

Exploration of the concepts, terminology, and processes for training and using deep neural networks for classification problems. Topics include tensors and tensor operations, gradient-based optimization, feature engineering and learning, and workflow of learning systems.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 249P. Applied Data Analytics. 2 Units.**

Exploration of the concepts, terminology, and processes used in supervised and unsupervised learning for classification and clustering, from a software engineering perspective. Topics include K-Nearest Neighbors, Logistic Regression, Random Forests, Support Vector Machines, K-Means, and model assessment.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only.

**SWE 250P. Web Programming. 2 Units.**

Exploration of the concepts, terminology, and popular frameworks for developing full-stack web applications. Students develop simple applications using multiple development stacks, and deploy them on the cloud.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Software Engineering Degree students only.

**SWE 261P. Software Testing and Debugging. 4 Units.**

Designed to teach students how to ensure high-quality software by means of testing, debugging, and other quality assurance activities. Students learn a combination of both theoretical and practical skills, including hands-on experience with modern tools and approaches.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 262P. Programming Styles. 4 Units.**

Designed to teach students the various ways software can be decomposed and put back together. Students are exposed to a variety of different programming styles and composition mechanisms.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 263P. User Experience and Interaction. 4 Units.**

Provides an introduction to the basic principles of human-computer interaction (HCI) and the pragmatic aspects of usability engineering. Topics include the fundamentals of interaction, user experience, design for usability, and evaluation of products for their usability.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 264P. Distributed Software Architecture. 4 Units.**

Study of software system architectures and architectural styles for large-scale distributed applications, and contemporary technologies and standards for their construction. Topics include client-server, peer-to-peer, publish-subscribe, REST, cloud computing, content distribution networks, scalability, latency, caching, and security, among others.

Restriction: Master of Software Engineering Degree students only.

**SWE 265P. Reverse Engineering and Modeling. 4 Units.**

Introduces theories, concepts, representations, techniques, and case studies in understanding large-scale, complex software systems. Topics include static and dynamic modeling notations, manual and (semi-)automated reverse engineering techniques, APIs, patterns, and styles. A significant, hands-on project is included.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 266P. Software Security and Dependability . 4 Units.**

Principles and concepts for the design and construction of secure software. Topics include common types of software security vulnerabilities, methods for detecting vulnerabilities, design and process methodologies to improve security of software, and techniques for assessing security properties of software.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 271P. Career and Entrepreneurship. 4 Units.**

Teaches practical skills for spoken, written, and electronic communication in a range of business and technical contexts, including promoting project ideas and portfolio development. Students practice their skills in classroom presentations and written exercises.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 272P. Project Management. 4 Units.**

Provides an introduction to project management in software engineering from several perspectives. Topics include team behavior; globally distributed work; resource estimation, scheduling, and budgeting. Students apply their knowledge in an ongoing class project.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 275P. Curricular Practical Training. 1 Unit.**

Mandatory internship in which students individually work at an outside organization to gain experience with the challenges involved in the practice of software engineering.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 276P. Capstone Project in Software Engineering. 4 Units.**

Quarter-long software-intensive project focusing on the design and implementation of a novel software system. Students are expected to bring to bear the concepts acquired during the program.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 290. Research Seminar. 2 Units.**

Forum for presentation and criticism by students of research work in progress. Presentation of problem areas and related work. Specific goals and progress of research.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**SWE 290P. Advisement. 0.3 Units.**

Mandatory weekly meetings with a faculty advisor.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Master of Software Engineering Degree students only. Graduate students only.

**SWE 295. Special Topics in Software Engineering. 4 Units.**

Studies in selected areas of software engineering. Topics addressed vary each quarter.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**SWE 298. Thesis Supervision. 2-12 Units.**

Individual research or investigation conducted in preparation for the M.S. thesis option or the dissertation requirements for the Ph.D. program.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**SWE 299. Individual Study. 1-12 Units.**

Individual research or investigation under the direction of an individual faculty member.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Digital Information Systems, Minor

The minor in digital information systems is designed for students who want to learn about information systems and their role in business, without preparing to be computer programmers. Many businesses, whether commerce- or service-oriented, are now driven by the information their IT systems capture about customers, their habits, and relevant aspects of the business. Students completing the digital information systems minor learn about the "why" of digital information systems, the technological underpinnings of these systems, and constraints on their design and use.

The minor is ideally suited for students in programs such as business administration, economics, civil engineering or urban studies, where digital information systems are essential to the primary task at hand.

The minor includes course work covering the opportunities and limitations of digital information systems, their design and advanced topics such as information retrieval and visualization. Students completing the minor will gain practical experience designing digital information systems and their interfaces in a variety of different domains.

The minor offers flexibility in the courses that students choose to take, and does not require prior programming experience. While it is possible to enroll in more technical classes, it is also possible to complete the minor without taking courses in programming.

A. Select one of the following:

I&C SCI 10	How Computers Work
I&C SCI 20	Invitation to Computing
I&C SCI 31	Introduction to Programming

B. Select two of the following:

I&C SCI 3	Internet Technologies and their Social Impact
I&C SCI 4	Human Factors for the Web
I&C SCI 5	Global Disruption and Information Technology
I&C SCI 11	The Internet and Public Policy
I&C SCI 32	Programming with Software Libraries
I&C SCI 32A	Python Programming and Libraries (Accelerated)
IN4MATX 43	Introduction to Software Engineering <sup>1</sup>
I&C SCI 61	Game Systems and Design

C. Select four of the following:

I&C SCI 105	Digital Information Systems <sup>1</sup>
IN4MATX 131	Human Computer Interaction
IN4MATX 132	Project in Human-Computer Interaction Requirements and Evaluation
IN4MATX 143	Information Visualization
IN4MATX 148	Project in Ubiquitous Computing
IN4MATX 151	Project Management
IN4MATX 161	Social Analysis of Computing
IN4MATX 162W	Organizational Information Systems
IN4MATX 163	Project in the Social and Organizational Impacts of Computing

IN4MATX 171	Introduction to Medical Informatics
IN4MATX 172	Project in Health Informatics

<sup>1</sup> Students cannot take both IN4MATX 43 and I&C SCI 105.

NOTE: Bren School of ICS majors may not minor in Digital Information Systems. Courses used to complete the minor in Digital Information Systems may not also count toward the requirements for the Information and Computer Science minor or the Informatics minor.

## Health Informatics, Minor

The minor in health informatics prepares students to understand the expanding role of information technology in health care. Doctors, nurses, public health officials, and administrators all interact with information technology and, at times, are intimately involved in the design of information technology solutions to health care issues. Students in the minor learn about the possibilities and limitations of information technology, how its use is changing the health care profession, and how the design of information technology must be performed principally with the users and a range of domain considerations in mind.

The minor is ideally suited for students in programs such as nursing science, public health sciences, and pharmaceutical sciences, as well as students in Bren School majors who wish to gain strong exposure to the domain of health informatics.

The minor includes course work and fieldwork covering a variety of health care settings, including the hospital, doctor's office, and home care. Students completing the minor will gain practical experience in understanding the health care needs of communities and individuals, and in designing information technology solutions that serve them better.

The minor offers flexibility in the courses that students choose to take, and does not require prior programming experience. While it is possible to enroll in more technical classes, it is also possible to complete the minor without taking courses in programming.

### A. Complete:

IN4MATX 171	Introduction to Medical Informatics
IN4MATX 172	Project in Health Informatics

### B. Select two of the following:

I&C SCI 4	Human Factors for the Web <sup>1</sup>
I&C SCI 10	How Computers Work <sup>1</sup>
I&C SCI 20	Invitation to Computing
I&C SCI 31	Introduction to Programming <sup>1</sup>
I&C SCI 32	Programming with Software Libraries <sup>1</sup>
I&C SCI 32A	Python Programming and Libraries (Accelerated)
IN4MATX 121	Software Design: Applications
IN4MATX 131	Human Computer Interaction
IN4MATX 133	User Interaction Software
IN4MATX 143	Information Visualization
COMPSCI 111	Digital Image Processing
COMPSCI 121/IN4MATX 141	Information Retrieval
COMPSCI 122A	Introduction to Data Management
COMPSCI 131	Parallel and Distributed Computing
COMPSCI 134	Computer and Network Security
COMPSCI 145	Embedded Software
COMPSCI 171	Introduction to Artificial Intelligence
COMPSCI 178	Machine Learning and Data-Mining

### C. Select two of the following:

NUR SCI 110W	Frameworks for Professional Nursing Practice
PUBHLTH 101	Introduction to Epidemiology
PUBHLTH 122	Health Policy

### D. Select one of the following:

IN4MATX 151	Project Management
IN4MATX 161	Social Analysis of Computing
IN4MATX 162W	Organizational Information Systems
STATS 7	Basic Statistics

STATS 8

Introduction to Biological Statistics

STATS 67

Introduction to Probability and Statistics for Computer Science

<sup>1</sup> This course may only be counted by majors outside of the Bren School of ICS.

NOTE: A student must earn a grade of C or better in all courses used to satisfy the requirements of this minor.

## Informatics, B.S.

Want to learn how to design better user interfaces? Curious to learn how to observe people when they use information technology and how to turn your findings into innovative products? Wondering how evolving privacy laws affect the design of software worldwide? Care about helping people in need with smart apps? Interested in learning how organizations work and how information technology can support their practices?

If you answered yes to one or more of these questions, UC Irvine's Informatics major just might be the choice for you.

The B.S. in Informatics is designed around a small set of core courses that introduce the fundamentals of Informatics (human computer interaction, design), software (programming, requirements analysis), and human behavior (social analysis of computerization). From there, three specializations — human-computer interaction, health informatics, and organizations and information technology — enable students to focus their learning with more than three dozen courses from which they can choose. The major is inherently interdisciplinary, with courses ranging from sociology and psychology to management and public health, depending on the specialization chosen.

Throughout the major, a variety of project courses offer students hands-on experiences in creative design practices, app development, ethnography, information management, business IT, and other topics. You learn how to apply your skills in different domains and work in different teams, culminating in a two-quarter capstone course in which you engage in a real-world project sponsored by a company or organization outside the university.

Overall, the major strongly emphasizes people and design; building an understanding of how existing technologies shape human behavior, society, and culture; and how we can design future technologies that better fit human and organizational practices. Given the fluid nature of people's expectations for information technology and what tomorrow's technology can offer, students learn how to adapt to the continuous new circumstances of the profession — whether it is a new client and their habits, an emerging new device or software capability, or a new team and its practices.

Informatics majors complete one of four specializations: Human-Computer Interaction (HCI), Organizations and Information Technology (OIT), Health Informatics (HI), or Specialization in Individual Studies. More information is available at the Department of Informatics website (<http://www.informatics.uci.edu/undergrad/bs-informatics/>).

Freshmen Applicants: See the Undergraduate Admissions section.

### Transfer Applicants:

Transfer applicants who satisfactorily complete course prerequisites will be given preference for admission. All applicants must complete the following required courses: one course in statistics or boolean algebra, one year of object-oriented programming (python, java, C++), and completion of lower-division writing. Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. Visit the *UCI Office of Admissions website* for information on transfer requirements for our major.

Bren School of ICS majors (including shared majors, BIM, and CSE) pursuing minors within the Bren School of ICS may not count more than five courses toward both the major and minor. Some ICS majors and minors outside of the School are not permitted due to significant overlap. Visit the ICS Student Affairs Office website for Majors and Minors restrictions. ([http://www.ics.uci.edu/ugrad/degrees/MajorMinor\\_Restrictions\\_Chart.pdf](http://www.ics.uci.edu/ugrad/degrees/MajorMinor_Restrictions_Chart.pdf)) All students should check the Double Major Restrictions Chart ([http://www.ics.uci.edu/ugrad/degrees/DbI\\_Major\\_Restr\\_Chart.pdf](http://www.ics.uci.edu/ugrad/degrees/DbI_Major_Restr_Chart.pdf)) and view our information page ([http://www.ics.uci.edu/ugrad/degrees/Double\\_Majors.php](http://www.ics.uci.edu/ugrad/degrees/Double_Majors.php)) on double majoring to see what degree programs are eligible for double majoring.

**All students must meet the University Requirements.**

### Major Requirements

#### Lower-division

A. Select one of the following series:

I&C SCI 31- 32- 33

Introduction to Programming  
and Programming with Software Libraries  
and Intermediate Programming

or

I&C SCI 32A- 33

Python Programming and Libraries (Accelerated)  
and Intermediate Programming

B. Complete:

I&C SCI 45J

Programming in Java as a Second Language

IN4MATX 43

Introduction to Software Engineering

I&C SCI 6B	Boolean Logic and Discrete Structures
STATS 7	Basic Statistics
or STATS 67	Introduction to Probability and Statistics for Computer Science

**Upper-division****A. Informatics Core Requirements:**

IN4MATX 113	Requirements Analysis and Engineering
IN4MATX 121	Software Design: Applications
IN4MATX 131	Human Computer Interaction
IN4MATX 151	Project Management
IN4MATX 161	Social Analysis of Computing
IN4MATX 191A- 191B	Senior Design Project and Senior Design Project

**B. One of the following specializations:****1. Specialization in Human-Computer Interaction**

Complete:

IN4MATX 132	Project in Human-Computer Interaction Requirements and Evaluation
-------------	---

and select three of the following:

IN4MATX 133	User Interaction Software
IN4MATX 141	Information Retrieval
IN4MATX 143	Information Visualization
IN4MATX 153	Computer Supported Cooperative Work
IN4MATX 162W	Organizational Information Systems
IN4MATX 171	Introduction to Medical Informatics

and select two project courses from the following:

IN4MATX 125	Computer Game Development
IN4MATX 134	Project in User Interaction Software
IN4MATX 148	Project in Ubiquitous Computing
IN4MATX 163	Project in the Social and Organizational Impacts of Computing
IN4MATX 172	Project in Health Informatics

and select two additional courses from the following:

IN4MATX 100–190

**2. Specialization in Organizations and Information Technology**

Complete:

IN4MATX 141	Information Retrieval
IN4MATX 162W	Organizational Information Systems
IN4MATX 163	Project in the Social and Organizational Impacts of Computing
MGMT 5	Management of Contemporary Organizations
MGMT 102	Managing Organizational Behavior

and select four of the following:

MGMT 107	Introduction to Management Information Systems
MGMT 173	Business Intelligence for Analytical Decisions
MGMT 178	Management of Information Technology
PSCI 9	Introduction to Psychology
PSCI 104S	Social Animal: An Introduction to Social Psychology
PSCI 176S	Motivation
SOCIOL 41	Small Group Dynamics
SOCIOL 135	Social Psychology of Networks
SOCIOL 141	Organizations
SOCIOL 143	Social Networks and Social Support
SOCIOL 145	Occupations and Professions

IN4MATX 100–190

and select two additional courses from the following:

IN4MATX 100–190

COMPSCI 100–199

**3. Specialization in Health Informatics**

Complete the following:

IN4MATX 171 Introduction to Medical Informatics

IN4MATX 172 Project in Health Informatics

Select four from the following:

IN4MATX 124	Internet Applications Engineering
IN4MATX 132	Project in Human-Computer Interaction Requirements and Evaluation
IN4MATX 133	User Interaction Software
IN4MATX 134	Project in User Interaction Software
IN4MATX 141	Information Retrieval
IN4MATX 143	Information Visualization
IN4MATX 148	Project in Ubiquitous Computing
IN4MATX 153	Computer Supported Cooperative Work
IN4MATX 162W	Organizational Information Systems
IN4MATX 163	Project in the Social and Organizational Impacts of Computing
COMPSCI 111	Digital Image Processing
COMPSCI 122A	Introduction to Data Management
COMPSCI 131	Parallel and Distributed Computing
COMPSCI 134	Computer and Network Security
COMPSCI 145- 145L	Embedded Software and Embedded Software Laboratory
COMPSCI 171	Introduction to Artificial Intelligence
COMPSCI 178	Machine Learning and Data-Mining

and select two courses from the following:

NUR SCI 110W	Frameworks for Professional Nursing Practice
PUBHLTH 101	Introduction to Epidemiology
PUBHLTH 122	Health Policy

and select two additional courses from the following:

IN4MATX 100-199
COMPSCI 100-199
PUBHLTH 100-199

**4. Specialization in Individual Studies <sup>1</sup>**

<sup>1</sup> Informatics majors must complete a detailed proposal to apply for this specialization. All candidates must meet the following minimum qualifications for consideration:

- UCI transcript demonstrating at least 3.0 UC GPA.
- Completion of at least 46 units or sophomore standing at UC Irvine.

Proposals must include the following:

- Syllabi and/or course descriptions of intended coursework.
- Academic plan demonstrating completion of 40 units of credit that significantly complements the core Informatics courses to create a coherent curriculum focused on studying some aspect of living, working, and building in a digital world.
- Students entering as freshmen should plan to submit their proposals no later than the beginning of spring quarter of the freshman year. Students entering as transfers must submit their proposals no later than the beginning of spring quarter of their first year at UCI.
- Students must submit their approval proposals to the ICS Student Affairs no later than two weeks after receiving a signature.

All proposals are to be submitted to the Department of Informatics' Undergraduate Vice Chair for approval. Failure to receive approval will require majors to choose another specialization for the major. Information about the Department of Informatics can be found at [informatics.uci.edu](http://informatics.uci.edu) (<http://www.informatics.uci.edu>).

## Informatics, M.S.

Information technology is transforming the world around us, from electronic medical records, to games for learning and social change, from information systems that help us live together more sustainably to devices and applications that allow us to track the body in unprecedented ways. The M.S. program in informatics at UC Irvine helps position students to understand the relationship between people and computing: How do existing technologies shape human behavior, society and culture, and how can we design future technologies to better serve humanity?

The M.S. in Informatics is a heavily research oriented program aimed at students with bachelor's degrees in a variety of disciplines (e.g. computer science, social science, the arts) who may or may not have been part of the full time workforce already. In particular, this program is aimed toward students who seek to develop a deeper understanding of the relationship between people and technology. While not all M.S. students will choose to do a Ph.D. following their Master's, the research focus of this program makes it ideal for those considering a Ph.D. (such as our Ph.D. Informatics (<https://www.informatics.uci.edu/grad/phd-informatics/>) program).

For students interested in pursuing a professionally-oriented degree, looking to find a position or advance their careers within a corporate context, and working directly with industry mentors and clients around questions of user experience and design, we encourage you to consider our MHCID program (<https://www.informatics.uci.edu/grad/mhcid/>).

The research oriented M.S. in Informatics is organized around a set of core courses that introduces the fundamentals of informatics, followed by a broader range of potential elective courses through which students can choose to focus their learning. Throughout, students are exposed to the theory, tools, methods, approaches and practicalities of informatics research, including topics such as social computing, human-computer interaction and collaborative work. Many of the courses include project work, typically performed in teams, and frequently leading to concrete outcomes in the form of papers that may be developed into scholarly publications.

Most students in this program write a Master's thesis to explore a particular research topic in depth. For two (or more if you wish) quarters, students writing theses will join a research group, contribute to a research project, and write a thesis summarizing your efforts. There is an alternate pathway in which students take a comprehensive examination instead of completing a thesis. With one of the largest and most diverse faculty in the world dedicated to the topic of informatics, UCI offers a broad range of projects from which to choose.

For additional information about this degree program, please see: <https://www.informatics.uci.edu/grad/ms-informatics/>

### Requirements

Students must complete courses, including a research methods core, and research experience courses related to their final thesis. Students must maintain satisfactory academic progress according to the requirements of the program as maintained by the faculty and posted publicly.

A. Complete the following:

#### Core Courses

IN4MATX 261	Social Analysis of Computing
IN4MATX 232	Research in Human-Centered Computing
IN4MATX 209S	Seminar in Informatics (twice, usually in the first year)

B. Complete the following:

#### Research Methods Core

IN4MATX 201	Research Methodology for Informatics
IN4MATX 203	Qualitative Research Methods in Information Systems
IN4MATX 205	Quantitative Research Methods in Information Systems

C. Complete two quarters of IN4MATX 298.<sup>1</sup>

D. Select six graduate-level electives.<sup>2</sup>

<sup>1</sup> To coincide with the completion of the M.S. thesis.

<sup>2</sup> The selection of courses should form a coherent educational plan to be approved by the student's faculty advisor. Although the courses may be chosen from any graduate-level courses on campus, it is recommended that at least three be chosen from within the School of Information and Computer Sciences. At most, 12 units of IN4MATX 298 and IN4MATX 299 may be used as electives.

### Final Examination

#### Plan One

The M.S. thesis defense committee is formed in accordance to UCI Senate regulations. This committee must approve the following for the student to pass the final examination:

**Thesis document:** The student must prepare the written dissertation in accordance with Academic Senate regulations and present this document to the committee with enough advance notice for appropriate review and critique prior to an oral defense. Following an oral defense of this document, any changes required must be approved by the entire committee.

**Oral defense:** The student must pass an oral dissertation defense that consists of a public presentation of the student's research followed by an oral examination by the student's doctoral committee. To ensure the public has an opportunity to participate in this examination, the student must announce the defense title, date, and time at least two weeks prior to the event to all faculty and doctoral students in the department.

## Plan Two

In the final quarter of study, the student must take a comprehensive examination given by Informatics faculty. The examination covers the core requirements.

Students transferring from the Ph.D. program in Informatics to the M.S. program in Informatics who pass the Ph.D. Advancement exam at a Master's level may substitute that exam for the comprehensive exam.

## Informatics, Minor

The minor in informatics prepares students to understand the relationship between information technology and people. The finance, movie, journalism, and pharmaceutical industries are just a few examples of where the use of innovative information technology has radically changed our world, in terms of what is now possible, how humans perform their jobs, and how society has critically reacted and adapted to new realities brought forth by information technology use. Students in the minor learn how existing technologies shape human behavior, society and culture, and are introduced to techniques that will enable them to design future technologies that better fit human and organizational practices.

The minor is ideally suited for students in programs such as film and media studies, education sciences or social policy, and public service, where information technology is an integral part of the profession, but not necessarily the primary focus.

The minor includes course work covering a variety of topics, including programming, software engineering, human computer interaction, and social analysis of computerization. Students completing the minor will gain practical experience in designing and building small software systems, creating novel user interfaces, and examining how information technology affects those around it.

The minor offers flexibility in the courses that students choose to take, and does not require prior programming experience. The minor does have a technical underpinning, however, with core courses that teach students how to program software.

A. Select one of the following series:

I&C SCI 31- 32- 33	Introduction to Programming and Programming with Software Libraries and Intermediate Programming
or	
I&C SCI 32A- 33	Python Programming and Libraries (Accelerated) and Intermediate Programming

B. Complete:

IN4MATX 43	Introduction to Software Engineering
IN4MATX 131	Human Computer Interaction
IN4MATX 161	Social Analysis of Computing

and at least two additional upper-division courses in Informatics.

**NOTE:** A maximum of two courses can be taken Pass/Not Pass toward a minor. Bren School majors should refer to the Majors/Minors Restrictions *Catalogue* section before attempting to minor in Digital Information Systems, Health Informatics, or Informatics. Students who are considering a major in Informatics must complete the major requirements for a letter grade.

## Informatics, Ph.D.

A new app assisting kids with autism spectrum disorder. New insights on creativity and how it develops in tech startups in the U.S. and abroad. New techniques for balancing privacy versus personalization in web apps. New lessons about the impact of multitasking on our health. A new tool that helps people design sustainable gardens.

These are just some examples of the wide variety of projects being worked on by current Ph.D. students in the Informatics Ph.D. program at UC Irvine.

With information technology redefining our personal and work lives everywhere, it is critical that it be designed to fit human needs and capabilities. Whether in medicine, entertainment, science, education, environmental sustainability, family life or crisis management, much work needs to be done to improve our understanding of the role information technology can play, how it should be designed, and what its true impact really can be.

The Informatics Ph.D. program offers students the opportunity to study all aspects of living, working and building in a digital world, including: developing an understanding of human needs by going into the field; designing new technology; putting technology to use in laboratory experiments and trial deployment; or devising theories about information technology and its role in society. With one of the largest and most diverse faculty in the world dedicated to the topic of informatics, the program offers opportunities for everyone, whether you prefer to work directly with people, are more technically inclined, or both.

A strong core of classes introduces students to classic material and recent innovations. At the same time, we focus on research from the beginning. New students are encouraged to work with multiple faculty members in their first two years to gain a broad exposure to the many aspects of informatics. It is crucial for early-career scholars to become familiar with the varied nature of research, write papers, attend conferences and begin to be a part of the broader community. The focus on research continues throughout, with an emphasis on publishing novel results in the appropriate venues in order to help students position themselves well for the competitive job market.

For additional information about this degree program, please see: <https://www.informatics.uci.edu/grad/phd-informatics/>

## Program of Study

### Pre-Candidacy Course Requirements

#### 1. Required Core Courses

IN4MATX 209S	Seminar in Informatics (twice, usually in the first year)
IN4MATX 232	Research in Human-Centered Computing
IN4MATX 261	Social Analysis of Computing

#### 2. Research Methods Core

IN4MATX 201	Research Methodology for Informatics
IN4MATX 203	Qualitative Research Methods in Information Systems
IN4MATX 205	Quantitative Research Methods in Information Systems
IN4MATX 207S	Doctoral Seminar on Research and Writing (once, usually after first year)

#### 3. Research Experience

IN4MATX 299	Individual Study (four quarters required pre-advancement, recommended at least two quarters per year in each of the first two years)
-------------	--

#### 4. Electives in Informatics (6 Ph.D. level classes, all four units)

A set of six elective courses. The selection of courses should form a coherent educational plan to be approved by the student's faculty advisor and by the Informatics Ph.D. program director. A written record of this plan and its approval must be filed with the Ph.D. program director prior to advancement. Although the courses may be chosen from any Ph.D. level courses on campus, it is recommended that at least three be chosen from within the School of ICS.

## Teaching Requirements

To enhance their education and experience in teaching, all students will be required to work as readers or TAs for at least two quarters. Additionally, before or during the first quarter in which they are working in this capacity, all students will enroll in I&C SCI 398A, a two-unit seminar. Those students wishing to gain more instruction around their teaching may also enroll in I&C SCI 398B, the advanced teaching seminar, which is also a two-unit seminar.

## Field Examinations

There will be no formal field evaluations. However, each year, students will be evaluated individually and given written feedback about their progress (for first year students, this evaluation will take place before the end of Spring quarter; for continuing students, it will take place before the end of Fall quarter.) In preparation, students will write a statement about their progress and meet with their advisors who give some feedback and complete a form reporting their assessment of the student's progress. The program faculty as a whole will then meet to discuss all the students, with a letter written to the student summarizing the assessment and, if necessary, deadlines for specific activities to be finished or goals to be achieved. This evaluation letter will state either that the student is making good progress or has been given cautionary status. The students who have certain activities to finish will be reviewed again six months after this evaluation. A second cautionary review constitutes formal failure to make adequate progress within the program.

## Qualifying Exam

*At the end of the student's second year.* The student develops an appropriate reading list to fit his/her areas of interest within Informatics, co-developed with the advisor. The student then writes a paper synthesizing this literature and noting the areas that are currently interesting and under-researched. The paper serves as the basis for an oral examination, generally in the Spring quarter of the second year.

*At the end of the third year.* The student will be evaluated by an assessment of a research portfolio. A portfolio should comprise three papers of publishable quality, as judged by the faculty. These papers might well be expansions or developments from term papers developed in class; the goal

is to determine the student's capacity to produce research writing of publishable quality. Student may work on papers collaboratively, but the portfolio as a whole must demonstrate writing ability through single-authored or lead-authored work. (Collaboratively written papers will be accompanied by a statement of contributions signed by all authors.)

The students are encouraged to report on projects conducted with at least two different faculty members. Advancement to candidacy is on the basis of an oral defense of the research portfolio, normally in the Spring of the third year. The advancement committee is formed in accordance with UCI campus regulations.

### Doctoral Dissertation

Students are required to complete a doctoral dissertation in accordance with Academic Senate regulations. In addition, they must pass an oral dissertation defense that consists of a public presentation of the student's research followed by an oral examination by the student's doctoral committee. The dissertation must be approved unanimously by the committee.

### Final Examination

The dissertation defense committee is formed in accordance to UCI Senate regulations. This committee must approve the following for the student to pass the final examination:

**Dissertation topic:** The student must present a substantial written document representing the student's dissertation plan. This document must include the proposed dissertation abstract, a dissertation outline, a comprehensive survey of related work, and a detailed plan for completing the work. The student must present this dissertation plan to the dissertation committee, who must unanimously approve the student's proposal.

**Dissertation document:** The student must prepare the written dissertation in accordance with Academic Senate regulations and present this document to the committee with enough advance notice for appropriate review and critique prior to an oral defense. Following an oral defense of this document, any changes required must be approved by the entire committee.

**Oral defense:** The student must pass an oral dissertation defense that consists of a public presentation of the student's research followed by an oral examination by the student's doctoral committee. To ensure the public has an opportunity to participate in this examination, the student must announce the defense title, date, and time at least two weeks prior to the event to all faculty and doctoral students in the department.

### Normative Time from Matriculation to Degree

Students making normal progress are expected to complete their coursework and produce 2-3 research papers of publishable quality in three years. The dissertation proposal is expected midway through the fourth year, with completion in the sixth.

## Master of Human Computer Interaction and Design

This is a professional degree that prepares students to be the leaders of the future in human-computer interaction, user experience design and research, product management, and more. This degree should be undertaken by early and mid-career professionals and executives looking to take the next step in their careers. For additional information about this degree program, please see: <https://www.informatics.uci.edu/grad/mhcid/>

Applicants are evaluated on the basis of their prior academic record and letters of reference from people either in the student's academic history or work settings. Students applying to the program may have degrees in any field, though preference is generally given to those with a technical, social science, or design background and those with work experience. All applicants are evaluated on the materials submitted: letters of recommendation, official college transcripts, and personal statement. Applicants are strongly encouraged to additionally submit either official GRE test scores or a relevant work portfolio. For more information, contact the ICS graduate counselor at 949-824-5156 or [mhcid@ics.uci.edu](mailto:mhcid@ics.uci.edu). For additional information about this degree program, please see: <https://mhcid.ics.uci.edu/>

All Master of Human Computer Interaction and Design students are expected to maintain a minimum GPA of 3.0 throughout the program, with no individual grade lower than a B-.

A. Complete the following:

IN4MATX 280	Overview of Human-Computer Interaction and Design
IN4MATX 281	User Needs Analysis
IN4MATX 282	Design and Prototyping
IN4MATX 283	User Experience Evaluation
IN4MATX 284	Advanced Design and Prototyping
IN4MATX 285	Interactive Technology Studio
IN4MATX 286	Innovations in HCI and Design
IN4MATX 287	Capstone Project in HCI and Design
IN4MATX 288	Capstone Project and Portfolio

The final examination for the M.H.C.I.D. includes three components: 1) Performance on a capstone project that incorporates skills and knowledge from the entire program; 2) Individual and peer evaluations of performance within the capstone project team; and 3) Assessment of a completed portfolio.

Students making normal progress are expected to complete the degree program in approximately 12 months. A guide to sensible program completion in two years is provided, but the 12-month completion time is recommended.

## Master of Software Engineering

The Master of Software Engineering (MSWE) program is a highly focused degree program that prepares students to acquire deep knowledge of software engineering – both in terms of foundational skills and in terms of application of that foundation to practice.

At the completion of the program, students will be knowledgeable in the underlying principles of software engineering and will have acquired solid practical skills. They will be able to effectively participate in large-scale software development efforts by applying a range of techniques for design, development, validation, and verification of high-quality software.

The program consists of four thrusts: (1) programming breadth, provided by a set of courses whose purpose is to solidify and broaden the students' knowledge of the computing landscape through programming; (2) software engineering principles, introduced via a set of courses covering the fundamental technical knowledge in software engineering; (3) professional development, covered by a pair of courses discussing topics related to career and professional development; and (4) practice, included pervasively throughout the program and emphasized strongly by two courses focused on practical applications of the principled material in the program.

Applicants must have a bachelor's degree or equivalent.

Applicants are evaluated on the following:

- Demonstrated interest in pursuing a career as a software engineer (evidence of this may be in the form of contributions to open source projects, extra-curricular activities at the undergraduate level involving software development, current or past employment as a software developer, course selections as an undergraduate, or having been involved as a programmer in at least one non-trivial software application).
- Proficiency in at least two programming languages
- Knowledge of algorithms and data structures
- Proficiency in written and spoken English
- (Optional, but strongly encouraged) Additional material that enriches the application and speaks to the applicant's strengths (e.g., design portfolio, link to GitHub profile, GRE test scores, scholarly papers submitted and/or published, writing samples).

For more information, contact the MSWE Program Director at 949-824-8956 or email [mswe@ics.uci.edu](mailto:mswe@ics.uci.edu) (%20mswe@ics.uci.edu).

### Program Requirements

All MSWE students must maintain a minimum 3.0 GPA throughout the program with no individual grade lower than a B-. In order to stay in the program past the first quarter, students must complete two-thirds of the programming breadth courses for which they are enrolled with a grade of B or higher. Students who do not meet this special requirement will be considered for dismissal from the program.

A. Complete:

SWE 261P	Software Testing and Debugging
SWE 262P	Programming Styles
SWE 263P	User Experience and Interaction
SWE 264P	Distributed Software Architecture
SWE 265P	Reverse Engineering and Modeling
SWE 266P	Software Security and Dependability
SWE 271P	Career and Entrepreneurship
SWE 272P	Project Management
SWE 275P	Curricular Practical Training
SWE 276P	Capstone Project in Software Engineering
SWE 290P	Advisement

B. Select six courses from SWE 240P to SWE 259P

### Final Examination

For the final examination, students are required to write a technical report and prepare an oral presentation describing their capstone project. The final examination takes place in the final quarter of the program and is conducted by the faculty teaching the Capstone Project in Software Engineering course.

## Normative Time to Degree

Full-time MSWE students are expected to complete the degree requirements within one year and one quarter (15 months). A maximum one-year extension may be granted to students who, due to unforeseen circumstances, are unable to fulfill the program's requirements within 15 months. As such, the normative time to degree for full-time students is 15 months, with 27 months as maximum time to degree.

Part-time MSWE students are expected to complete the degree requirements within two years and one quarter (27 months). A maximum one-year extension may be granted to students who, due to unforeseen circumstances, are unable to fulfill the program's requirements within 27 months. As such, the normative time to degree for part-time students is 27 months, with 39 months as maximum time to degree.

## Software Engineering, M.S.

Software engineering is the application of a systematic, disciplined, quantifiable approach to development, operation, and maintenance of software; that is, the application of engineering to software. It is an interdisciplinary field of study that bridges the boundaries of computer science, engineering, mathematics, and behavioral science.

The M.S. Software Engineering (MSSE) program at UC Irvine is a heavily research-oriented program aimed at students with a computer science (or related) bachelor's degree, who may or may not have been out in the workforce already, and who seek to build a strong background in software engineering. In particular, this program is aimed toward students who seek to develop a deeper understanding of the processes, tools, and techniques involved in the creation of dependable, large-scale software systems. While not all M.S. students will choose to do a Ph.D. following their Master's, the research focus of this program makes it ideal for those considering a Ph.D. (such as our Ph.D. Software Engineering (<https://www.informatics.uci.edu/grad/phd-software-engineering/>) program).

For students interested in pursuing a professionally-oriented degree, working directly with industry mentors and clients on software engineering projects, and looking to find a position or advance their career within a corporate context, we encourage you to consider our MSWE (<https://www.informatics.uci.edu/grad/mswe/>) program.

The MSSE program is designed around a set of core courses that introduces the fundamentals of software engineering, followed by a broader range of courses through which students can choose to focus their learning. Students could choose to augment their core with more computer science-oriented courses (e.g., network and distributed systems security, next generation search systems), data science courses (e.g., machine learning, data mining), end-user oriented courses (e.g., user interface design and evaluation, ubiquitous computing and interaction), or advanced software engineering courses (e.g., software architecture, software analysis and testing).

Throughout, students are exposed to the theory, tools, methods, approaches and practicalities of software engineering. Many of the courses include project work, often performed in teams, and frequently culminating in a system, prototype or conceptual design.

The students are required to complete and defend an M.S. thesis under the direction of a faculty advisor. For at least three quarters, the student will join a research group, contribute to a research project, and write a thesis summarizing the outcome of their research. With no fewer than seven faculty members running software engineering research groups, you will have a diverse range of projects from which to choose. The M.S. thesis provides an excellent experience for students interested in continuing toward a Ph.D. program or to pursue a career as a researcher in corporate or government laboratories.

For additional information about this degree program, please see: <https://www.informatics.uci.edu/grad/ms-software-engineering/>

## Course Requirements

A. Complete

SWE 211	Software Engineering
---------	----------------------

B. Complete five elective courses <sup>1</sup>

C. Complete at least three quarters of individual study and/or thesis supervision courses

D. Select additional courses in order to fulfill 48 units <sup>2</sup>

<sup>1</sup> All five elective courses must be regular, 4-unit courses from the School of Information and Computer Sciences. At least three of the elective courses should be from the SWE 2XX series. Individual study, thesis supervision, and seminars do not qualify as electives.

<sup>2</sup> The selection of courses should form a coherent educational plan that is approved by the student's faculty advisor.

Additionally, students are expected to attend at least 20 talks from within the several seminar series in ICS. Attendance bears no course credit, but it is required for advancement to candidacy. The student's faculty advisor is responsible for ensuring this requirement is met.

## Capstone Requirement

**Thesis:** Students must take and pass the Research Assessment examination. Additionally, students are required to defend their thesis in a public exam according to UCI Senate Policy. This requirement must be completed by the end of the second year.

## Restriction

The M.S. will not be awarded to students who currently hold a M.S. in Software Engineering or a related field from the same or another university.

## Requirements Beyond Graduate Division Minimum Requirements

All M.S. students are expected to maintain a minimum GPA of 3.0 throughout the program. Failure to maintain this minimum will result in a recommendation that the student be disqualified. In addition, no grade lower than a B is counted toward satisfying any course requirements.

# Software Engineering, Ph.D.

A new code search engine. New insights into how trust emerges (or doesn't) in distributed software development organizations. New visualizations to aid developers in debugging code. New lessons about the quality of open-source components. A new Internet infrastructure that enables secure computational exchange.

These are just some examples of the wide variety of projects being worked on by current Ph.D. students in the software engineering Ph.D. program at UC Irvine.

As software continues to transform society in dramatic and powerful ways, we must improve our ability to reliably develop high-quality systems. From early incarnations as just an idea or set of requirements to when software is actually built, deployed and customized in the field, many challenges exist across the lifecycle that make creating software still a non-trivial endeavor today.

The software engineering Ph.D. program offers students the opportunity to tackle these challenges, whether it is through designing new tools, performing studies of developers and teams at work, creating new infrastructures or developing new theories about software and how it is developed. No fewer than six faculty members bring a broad range of expertise and perspectives to the program, guaranteeing a diverse yet deep education in the topic.

A strong core of classes introduces students to classic material and recent innovations. At the same time, we focus on research from the beginning. New students are required to identify and experiment with one or more research topics early, so that they can become familiar with the nature of research, write papers, attend conferences and begin to become part of the broader software engineering community. This focus on research naturally continues throughout the program, with an emphasis on publishing novel results in the appropriate venues.

For additional information about this degree program, please see: <https://www.informatics.uci.edu/grad/phd-software-engineering/>

## Program of Study

### Pre-Candidacy Course Requirements

Students must complete a software engineering core course, five elective courses, and at least three quarters of individual study and/or thesis supervision courses. Students must take additional courses of their own choosing or additional individual studies, in order to fulfill 48 units before advancement to candidacy. The selection of courses should form a coherent educational plan to be approved by the student's faculty advisor.

1. Software Engineering Core Courses:

SWE 211	Software Engineering
---------	----------------------

2. Complete five Software Engineering electives. <sup>1</sup>

3. Complete at least three quarters of individual study and/or thesis supervision courses.

4. Students must complete additional courses of their own choosing or additional individual studies, in order to fulfill 48 units before advancement to candidacy. <sup>2</sup>

Additionally, students are expected to attend at least 20 talks from within the several seminar series in ICS. Attendance bears no course credit, but it is required for advancement to candidacy. <sup>3</sup>

<sup>1</sup> All five elective courses must be regular, 4-unit courses from the School of Information and Computer Sciences. At least three of the elective courses should be from the SWE 2XX series. Individual study, thesis supervision, and seminars do not qualify as electives.

<sup>2</sup> The selection of courses should form a coherent educational plan to be approved by the student's faculty advisor.

<sup>3</sup> The student's faculty advisor is responsible for ensuring this requirement is met.

## Qualifying Examinations

### Research Assessment

Students must find a faculty advisor and successfully complete a research project with that faculty member. The research project should be done over at least two quarters of independent study with that faculty member. The goal of this research assessment is to introduce the student to the practice of scientific publication.

Based on the project, the student must produce a research paper of publishable quality. This research paper must be reviewed by three faculty members in a peer-review process, revised by the student, and approved by the three faculty members.

The research assessment is graded Ph.D. PASS, M.S. PASS, or FAIL. In case of M.S. PASS or FAIL, the student can re-submit the paper at most one more time within the maximum period of six months. A second M.S. PASS or FAIL results in disqualification from the doctoral program.

### **Advancement to Candidacy Examination**

Each Ph.D. student must pass the oral advancement to candidacy exam, which assesses the student's ability to conduct, present, and orally defend research work at the doctoral level. The research project and paper are the basis for the student's oral advancement to candidacy exam. The oral candidacy exam consists of the research presentation by the student, followed by questions from the candidacy committee.

The student must complete the course requirements, and pass the research assessment prior to advancing to candidacy. The candidacy committee will consist of five faculty members, the majority of whom must be members of the student's program, and is conducted in accordance with UCI Senate regulations.

### **Dissertation Topic Defense**

The student must present a carefully articulated document representing the student's dissertation plan. This document must include the proposed dissertation abstract, a discussion of the approach, a comprehensive survey of related work, and a plan for completing the work. The dissertation plan is presented by the student to the dissertation committee, who must unanimously approve the student's proposal. The dissertation defense committee is formed in accordance to UCI Senate regulations.

### **Doctoral Dissertation and Final Examination**

Students are required to complete a doctoral dissertation in accordance with Academic Senate regulations. In addition, they must pass an oral thesis defense which consists of a public presentation of the student's research followed by an oral examination by the student's doctoral committee. The committee must approve the thesis unanimously.

The normative time for advancement to candidacy is three years. The normative time for completion of the Ph.D. is six years, and the maximum time permitted is seven years.

### **Requirements Beyond Graduate Division Minimum Requirements**

All Ph.D. students are expected to maintain a minimum GPA of 3.5 throughout the program. Failure to maintain this minimum will result in a recommendation that the student be disqualified. In addition, no grade lower than a B is counted toward satisfying any course requirements.

## **Department of Statistics**

### **Daniel L. Gillen, Department Chair**

2038 Donald Bren Hall

949-824-9862

Fax: 949-824-9863

<http://www.stat.uci.edu/>

Statistics is the science concerned with developing and studying methods for collecting, analyzing, interpreting, and presenting empirical data. Statistical principles and methods are important for addressing questions in public policy, medicine, industry, and virtually every branch of science. Interest in statistical methods has increased dramatically with the abundance of large databases in fields like computer science (Internet and Web traffic), business and marketing (transaction records), and biology (the human genome and related data). It is the substantive questions in such areas of application that drive the development of new statistical methods and motivate the mathematical study of the properties of these methods.

- Data Science, B.S.
- Statistics, M.S.
- Statistics, Minor
- Statistics, Ph.D.

## **Faculty**

Brigitte Baldi, Ph.D. Massachusetts Institute of Technology, *Lecturer of Statistics*

Scott Bartell, Ph.D. University of California, Davis, *Associate Professor of Program in Public Health; Environmental Health Sciences; Statistics*

Veronica Berrocal, Ph.D. University of Washington, *Associate Professor of Statistics*

Carter Butts, Ph.D. Carnegie Mellon University, *Professor of Sociology; Computer Science; Electrical Engineering and Computer Science; Statistics* (mathematical sociology, social networks, quantitative methodology, human judgment and decision making, economic sociology)

Mine Dogucu, Ph.D. Ohio State University, *Assistant Professor of Teaching of Statistics*

Daniel L. Gillen, Ph.D. University of Washington, *Department Chair and Professor of Statistics; Program in Public Health*

Michele Guindani, Ph.D. Università Luigi Bocconi, *Professor of Statistics*

Matthew Harding, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Economics; Statistics*

Ivan G. Jeliaskov, Ph.D. Washington University, *Associate Professor of Economics; Statistics*

Wesley O. Johnson, Ph.D. University of Minnesota, *Professor Emeritus of Statistics*

Volodymyr Minin, Ph.D. University of California, Los Angeles, *Professor of Statistics*

Bin Nan, Ph.D. University of Washington, *Professor of Statistics*

Annie Qu, Ph.D. The Pennsylvania State University, *Professor of Statistics*

Babak Shahbaba, Ph.D. University of Toronto, *Professor of Statistics; Computer Science*

Weining Shen, Ph.D. North Carolina State University, *Assistant Professor of Statistics*

Padhraic J. Smyth, Ph.D. California Institute of Technology, *Professor of Computer Science; Education; Statistics* (artificial intelligence and machine learning, pattern recognition, applied statistics, data mining, information theory)

Hal S. Stern, Ph.D. Stanford University, *UCI Chancellor's Professor of Statistics; Cognitive Sciences*

Erik B. Sudderth, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Computer Science; Statistics* (artificial intelligence and machine learning, computer vision, statistics and statistical theory)

Jessica Utts, Ph.D. Pennsylvania State University, *Professor Emeritus of Statistics*

Joachim S. Vandekerckhove, Ph.D. University of Leuven, *Associate Professor of Cognitive Sciences; Statistics* (response time modeling, model fitting, computational statistics, psychometrics, bayesian statistics)

Yaming Yu, Ph.D. Harvard University, *Associate Professor of Statistics*

Zhaoxia Yu, Ph.D. William Marsh Rice University, *Associate Professor of Statistics*

## Courses

### **STATS 5. Seminar in Data Science. 1 Unit.**

An introduction to the field of Data Science; intended for entering freshman and transfers.

Grading Option: Pass/no pass only.

Restriction: Information Computer Science Majors only.

### **STATS 7. Basic Statistics. 4 Units.**

Introduces basic inferential statistics including confidence intervals and hypothesis testing on means and proportions, t-distribution, Chi Square, regression and correlation. F-distribution and nonparametric statistics included if time permits.

Overlaps with STATS 8, MGMT 7, SOCECOL 13.

Restriction: STATS 7 may not be taken for credit concurrently with or after STATS 110, STATS 111, STATS 112.

**(Va)**

### **STATS 8. Introduction to Biological Statistics . 4 Units.**

Introductory statistical techniques used to collect and analyze experimental and observational data from health sciences and biology. Includes exploration of data, probability and sampling distributions, basic statistical inference for means and proportions, linear regression, and analysis of variance.

Overlaps with SOCECOL 13, MGMT 7, STATS 7.

Restriction: STATS 8 may not be taken for credit concurrently with or after STATS 110, STATS 111, STATS 112.

**(Va)**

**STATS 67. Introduction to Probability and Statistics for Computer Science. 4 Units.**

Introduction to the basic concepts of probability and statistics with discussion of applications to computer science.

Prerequisite: MATH 2B

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment. STATS 67 may not be taken for credit concurrently with or after STATS 120B.

(Va)

**STATS 68. Statistical Computing and Exploratory Data Analysis. 4 Units.**

Introduces key concepts in statistical computing. Techniques such as exploratory data analysis, data visualization, simulation, and optimization methods, will be presented in the context of data analysis within a statistical computing environment.

Prerequisite: STATS 7 and I&C SCI 31

**STATS 110. Statistical Methods for Data Analysis I. 4 Units.**

Introduction to statistical methods for analyzing data from experiments and surveys. Methods covered include two-sample procedures, analysis of variance, simple and multiple linear regression.

Prerequisite: STATS 7 or STATS 8 or AP90 or (STATS 120A and STATS 120B and STATS 120C). AP90 with a minimum score of 3

Restriction: School of Info & Computer Sci students only.

**STATS 111. Statistical Methods for Data Analysis II. 4 Units.**

Introduction to statistical methods for analyzing data from surveys or experiments. Emphasizes application and understanding of methods for categorical data including contingency tables, logistic and Poisson regression, loglinear models.

Prerequisite: STATS 110

Concurrent with STATS 202.

**STATS 112. Statistical Methods for Data Analysis III. 4 Units.**

Introduction to statistical methods for analyzing longitudinal data from experiments and cohort studies. Topics covered include survival methods for censored time-to-event data, linear mixed models, non-linear mixed effects models, and generalized estimating equations.

Prerequisite: STATS 111

Concurrent with STATS 203.

**STATS 115. Introduction to Bayesian Data Analysis. 4 Units.**

Basic Bayesian concepts and methods with emphasis on data analysis. Special emphasis on specification of prior distributions. Development for one-two samples and on to binary, Poisson, and linear regression. Analyses performed using free OpenBugs software.

Prerequisite: STATS 120C. Recommended: STATS 110.

**STATS 120A. Introduction to Probability and Statistics I. 4 Units.**

Introduction to basic principles of probability and statistical inference. Axiomatic definition of probability, random variables, probability distributions, expectation.

Prerequisite: MATH 2A and MATH 2B and (MATH 2D or MATH 4)

Restriction: Data Science Majors have first consideration for enrollment. Quantitative Economics majors have second consideration.

Concurrent with STATS 281A.

**STATS 120B. Introduction to Probability and Statistics II. 4 Units.**

Introduction to basic principles of probability and statistical inference. Point estimation, interval estimating, and testing hypotheses, Bayesian approaches to inference.

Prerequisite: STATS 120A

Restriction: Data Science Majors have first consideration for enrollment. Quantitative Economics majors have second consideration.

Concurrent with STATS 281B.

**STATS 120C. Introduction to Probability and Statistics III. 4 Units.**

Introduction to basic principles of probability and statistical inference. Linear regression, analysis of variance, model checking.

Prerequisite: STATS 120B and (MATH 3A or MATH 6G or I&C SCI 6N)

Restriction: Data Science Majors have first consideration for enrollment. Quantitative Economics majors have second consideration.

Concurrent with STATS 281C.

**STATS 140. Multivariate Statistical Methods. 4 Units.**

Theory and application of multivariate statistical methods. Topics include statistical inference for the multivariate normal model and its extensions to multiple samples and regression, use of statistical packages for data visualization and reduction, discriminant analysis, cluster analysis, and factor analysis.

Prerequisite: STATS 120C and (MATH 3A or I&C SCI 6N)

Concurrent with STATS 240.

**STATS 170A. Project in Data Science I. 4 Units.**

Problem definition and analysis, data representation, algorithm selection, solution validation, and results presentation. Students do team projects and lectures cover analysis alternatives, project planning, and data analysis issues. First quarter emphasizes approach selection, project planning, and experimental design.

Prerequisite: STATS 68 and STATS 112 and IN4MATX 43 and COMPSCI 122A and COMPSCI 161 and COMPSCI 178

Grading Option: In Progress (Letter Grade with P/NP).

Restriction: Seniors only. Data Science Majors have first consideration for enrollment.

**STATS 170B. Project in Data Science II. 4 Units.**

Problem definition and analysis, data representation, algorithm selection, solution validation, and results presentation. Students do team projects and lectures cover analysis alternatives, project planning, and data analysis issues. Second quarter emphasizes project execution and analysis, and presentation of results.

Prerequisite: STATS 170A. In Progress (IP) grade for STATS 170A is also accepted.

Restriction: Seniors only. Data Science Majors have first consideration for enrollment.

**STATS 199. Individual Study. 2-5 Units.**

Individual research or investigations under the direction of an individual faculty member.

Repeatability: May be repeated for credit unlimited times.

**STATS 200A. Intermediate Probability and Statistical Theory. 4 Units.**

Basics of probability theory, random variables and basic transformations, univariate distributions—discrete and continuous, multivariate distributions.

Prerequisite: STATS 120C

**STATS 200B. Intermediate Probability and Statistical Theory. 4 Units.**

Random samples, transformations, limit laws, normal distribution theory, introduction to stochastic processes, data reduction, point estimation (maximum likelihood).

Prerequisite: STATS 200A

**STATS 200C. Intermediate Probability and Statistical Theory. 4 Units.**

Interval estimation, hypothesis testing, decision theory and Bayesian inference, basic linear model theory.

Prerequisite: STATS 200B

**STATS 201. Statistical Methods for Data Analysis I. 4 Units.**

Introduction to statistical methods for analyzing data from experiments and surveys. Methods covered include two-sample procedures, analysis of variance, simple and multiple linear regression.

Prerequisite: STATS 7 or STATS 8

Restriction: STATS 201 cannot be taken for credit after taking STATS 210.

**STATS 202. Statistical Methods for Data Analysis II. 4 Units.**

Introduction to statistical methods for analyzing data from surveys or experiments. Emphasizes application and understanding of methods for categorical data including contingency tables, logistic and Poisson regression, loglinear models.

Prerequisite: STATS 201 or STATS 210

Concurrent with STATS 111.

**STATS 203. Statistical Methods for Data Analysis III. 4 Units.**

Introduction to statistical methods for analyzing longitudinal data from experiments and cohort studies. Topics covered include survival methods for censored time-to-event data, linear mixed models, non-linear mixed effects models, and generalized estimating equations.

Prerequisite: STATS 202

Concurrent with STATS 112.

**STATS 205. Introduction to Bayesian Data Analysis. 4 Units.**

Basic Bayesian concepts and methods with emphasis on data analysis. Special emphasis on specification of prior distributions. Development for one-two samples and on to binary, Poisson and linear regression. Analyses performed using free OpenBugs software.

Prerequisite: STATS 120C. Recommended: STATS 201 or STATS 210.

**STATS 210. Statistical Methods I: Linear Models. 4 Units.**

Statistical methods for analyzing data from surveys and experiments. Topics include randomization and model-based inference, two-sample methods, analysis of variance, linear regression and model diagnostics.

Prerequisite: Knowledge of basic statistics, calculus, linear algebra.

**STATS 210A. Statistical Methods I: Linear Models. 4 Units.**

Statistical methods for analyzing data from surveys and experiments. Topics include randomization and model-based inference, two-sample methods, analysis of variance, linear regression, and model diagnostics.

Prerequisite: Knowledge of basic statistics (at the level of STATS 7), calculus, and linear algebra.

Restriction: Graduate students only.

**STATS 210B. Statistical Methods II: Categorical Data. 4 Units.**

Introduction to statistical methods for analyzing discrete and non-normal outcomes. Emphasizes the development and application of methods for categorical data, including contingency tables, logistic and Poisson regression, loglinear models.

Prerequisite: STATS 210. May not be taken for graduate credit by Ph.D. students in Statistics.

Restriction: Graduate students only.

**STATS 210C. Statistical Methods III: Longitudinal Data. 4 Units.**

Introduction to statistical methods for analyzing longitudinal outcomes. Emphasizes the development and application of regression methods for correlated and censored outcomes. Methods for continuous and discrete correlated outcomes, as well as censored outcomes, are covered.

Prerequisite: STATS 210B. May not be taken for graduate credit by Ph.D. students in Statistics.

Restriction: Graduate students only.

**STATS 211. Statistical Methods II: Generalized Linear Models. 4 Units.**

Development of the theory and application of generalized linear models. Topics include likelihood estimation and asymptotic distributional theory for exponential families, quasi-likelihood and mixed model development. Emphasizes methodological development and application to real scientific problems.

Prerequisite or corequisite: STATS 210

**STATS 212. Statistical Methods III: Methods for Correlated Data. 4 Units.**

Development and application of statistical methods for analyzing corrected data. Topics covered include repeated measures ANOVA, linear mixed models, non-linear mixed effects models, and generalized estimating equations. Emphasizes both theoretical development and application of the presented methodology.

Prerequisite: STATS 211

**STATS 220A. Advanced Probability and Statistics Topics. 4 Units.**

Advanced topics in probability and statistical inference including measure theoretic probability, large sample theory, decision theory, resampling and Monte Carlo methods, nonparametric methods.

Prerequisite: STATS 200C

**STATS 220B. Advanced Probability and Statistics Topics. 4 Units.**

Advanced topics in probability and statistical inference, including measure theoretic probability, large sample theory, decision theory, resampling and Monte Carlo methods, nonparametric methods.

Prerequisite: STATS 220A and MATH 140B

**STATS 225. Bayesian Statistical Analysis. 4 Units.**

Introduction to the Bayesian approach to statistical inference. Topics include univariate and multivariate models, choice of prior distributions, hierarchical models, computation including Markov chain Monte Carlo, model checking, and model selection.

Prerequisite: STATS 205 and STATS 230

**STATS 226. Advanced Topics in Modern Bayesian Statistical Inference. 4 Units.**

Modern Bayesian Statistics: selected topics from theory of Markov chains, application of theory to modern methods of Markov chain Monte Carlo sampling; Bayesian non-parametric and semiparametric modeling, including Dirichlet Process Mixtures; Mixtures of Polya Trees.

Prerequisite: STATS 200C and STATS 225

**STATS 230. Statistical Computing Methods. 4 Units.**

Numerical computations and algorithms with applications in statistics. Topics include optimization methods including the EM algorithm, random number generation and simulation, Markov chain simulation tools, and numerical integration.

Prerequisite: Two quarters of upper-division or graduate training in probability and statistics.

Overlaps with COMPSI 206.

**STATS 235. Modern Data Analysis Methods . 4 Units.**

Introduces selected modern tools for data analysis. Emphasizes use of computational and resampling techniques for data analyses when the data do not conform to standard toolbox of regression models and/or complexity of modeling problem threatens validity of standard methods.

Prerequisite: STATS 120C and STATS 205 and (STATS 201 or STATS 210)

Restriction: Graduate students only.

**STATS 240. Multivariate Statistical Methods. 4 Units.**

Theory and application of multivariate statistical methods. Topics include statistical inference for the multivariate normal model and its extensions to multiple samples and regression, use of statistical packages for data visualization and reduction, discriminant analysis, cluster analysis, and factor analysis.

Prerequisite: STATS 120C and (MATH 3A or I&C SCI 6N)

Concurrent with STATS 140.

**STATS 245. Time Series Analysis. 4 Units.**

Statistical models for analysis of time series from time and frequency domain perspectives. Emphasizes theory and application of time series data analysis methods. Topics include ARMA/ARIMA models, model identification/estimation, linear operators, Fourier analysis, spectral estimation, state space models, Kalman filter.

Corequisite: STATS 200C

Prerequisite or corequisite: STATS 201 or STATS 210

**STATS 250. Biostatistics. 4 Units.**

Statistical methods commonly used to analyze data arising from clinical studies. Topics include analysis of observational studies and randomized clinical trials, techniques in the analysis of survival and longitudinal data, approaches to handling missing data, meta-analysis, nonparametric methods.

Prerequisite: STATS 210

**STATS 255. Statistical Methods for Survival Data. 4 Units.**

Statistical methods for analyzing survival data from cohort studies. Topics include parametric and nonparametric methods, the Kaplan-Meier estimator, log-rank tests, regression models, the Cox proportional hazards model and accelerated failure time models, efficient sampling designs, discrete survival models.

Corequisite: STATS 202 or STATS 211.

Prerequisite: STATS 210

Restriction: Graduate students only.

**STATS 257. Introduction to Statistical Genetics. 4 Units.**

Provides students with knowledge of the basic principles, concepts, and methods used in statistical genetic research. Topics include principles of population genetics, and statistical methods for family- and population-based studies.

Prerequisite: Two quarters of upper-division or graduate training in statistical methods.

Same as EPIDEM 215.

**STATS 260. Inference with Missing Data. 4 Units.**

Statistical methods and theory useful for analysis of multivariate data with partially observed variables. Bayesian and likelihood-based methods developed. Topics include EM-type algorithms, MCMC samplers, multiple imputation, and general location model. Applications from economics, education, and medicine are discussed.

Prerequisite or corequisite: STATS 210 or STATS 200C. STATS 230.

**STATS 262. Theory and Practice of Sample Surveys. 4 Units.**

Basic techniques and statistical methods used in designing surveys and analyzing collected survey data. Topics include simple random sampling, ratio and regression estimates, stratified sampling, cluster sampling, sampling with unequal probabilities, multistage sampling, and methods to handle nonresponse.

Prerequisite: STATS 120C

**STATS 265. Causal Inference. 4 Units.**

Various approaches to causal inference focusing on the Rubin causal model and propensity-score methods. Topics include randomized experiments, observational studies, non-compliance, ignorable and non-ignorable treatment assignment, instrumental variables, and sensitivity analysis. Applications from economics, politics, education, and medicine.

Prerequisite: STATS 200C and STATS 210

**STATS 270. Stochastic Processes. 4 Units.**

Introduction to the theory and application of stochastic processes. Topics include Markov chains, continuous-time Markov processes, Poisson processes, and Brownian motion. Applications include Markov chain Monte Carlo methods and financial modeling (for example, option pricing).

Prerequisite: STATS 120C

Overlaps with MATH 271A, MATH 271B, MATH 271C.

**STATS 275. Statistical Consulting. 4 Units.**

Training in collaborative research and practical application of statistics. Emphasis on effective communication as it relates to identifying scientific objectives, formulating a statistical analysis plan, choice of statistical methods, and interpretation of results and their limitations to non-statisticians.

Prerequisite: STATS 203 or STATS 212 or STATS 210C. STATS 203 with a grade of B or better. STATS 212 with a grade of B or better. STATS 210C with a grade of B or better

Restriction: Graduate students only.

**STATS 280. Seminar in Statistics. 0.5 Units.**

Periodic seminar series covering topics of current research in statistics and its application.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**STATS 281A. Introduction to Probability and Statistics I. 4 Units.**

Introduction to basic principles of probability and statistical inference. Axiomatic definition of probability, random variables, probability distributions, expectation.

Restriction: Graduate students only.

Concurrent with STATS 120A.

**STATS 281B. Introduction to Probability and Statistics II. 4 Units.**

Introduction to basic principles of probability and statistical inference. Point estimation, interval estimating, and testing hypotheses, Bayesian approaches to inference.

Restriction: Graduate students only.

Concurrent with STATS 120B.

**STATS 281C. Introduction to Probability and Statistics III. 4 Units.**

Introduction to basic principles of probability and statistical inference. Contingency table analysis, linear regression, analysis of variance, model checking.

Restriction: Graduate students only.

Concurrent with STATS 120C.

**STATS 295. Special Topics in Statistics. 4 Units.**

Studies in selected areas of statistics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**STATS 298. Thesis Supervision. 2-12 Units.**

Individual research or investigation conducted in preparation for the M.S. thesis option or the dissertation requirements for the Ph.D. program.

Repeatability: May be repeated for credit unlimited times.

**STATS 299. Individual Study. 2-12 Units.**

Individual research or investigation under the direction of an individual faculty member.

Repeatability: May be repeated for credit unlimited times.

## Data Science, B.S.

The Data Science Major prepares students for a career in data analysis, combining foundational statistical concepts with computational principles from computer science. In the first two years of the program students will take core courses in both the Statistics and Computer Science Departments, providing a strong foundation in the principles of each field. In the 3rd and 4th years of the program, students will take more specialized courses, on topics such as design of algorithms, machine learning, information visualization, and Bayesian statistics. A major component of this degree is the final year capstone project course, a 2-quarter course that teaches students how to apply statistical and computational principles to solve large-scale real-world data analysis problems.

**Freshman Applicants:** See the Undergraduate Admissions section.

**Transfer Applicants:** See the Undergraduate Admissions section.

Bren School of ICS majors (including shared majors, BIM and CSE) pursuing minors within the Bren School of ICS may not count more than five courses toward both the major and minor. Some ICS majors and minors outside of the School are not permitted due to significant overlap. Visit the ICS Student Affairs Office website for Majors and Minors restrictions. ([http://www.ics.uci.edu/ugrad/degrees/MajorMinor\\_Restrictions\\_Chart.pdf](http://www.ics.uci.edu/ugrad/degrees/MajorMinor_Restrictions_Chart.pdf)) All students should check the Double Major Restrictions Chart ([http://www.ics.uci.edu/ugrad/degrees/DbI\\_Major\\_Restr\\_Chart.pdf](http://www.ics.uci.edu/ugrad/degrees/DbI_Major_Restr_Chart.pdf)) and view our information page ([http://www.ics.uci.edu/ugrad/degrees/Double\\_Majors.php](http://www.ics.uci.edu/ugrad/degrees/Double_Majors.php)) on double majoring to see what degree programs are eligible for double majoring.

**All students must meet the University Requirements.**

### Data Science Major Requirements

Lower-division:

A. Select one of the following series:

I&C SCI 31- 32- 33

Introduction to Programming  
and Programming with Software Libraries  
and Intermediate Programming

or	
I&C SCI 32A- 33	Python Programming and Libraries (Accelerated) and Intermediate Programming
B. Complete:	
I&C SCI 45C	Programming in C/C++ as a Second Language
I&C SCI 46	Data Structure Implementation and Analysis
I&C SCI 51	Introductory Computer Organization
IN4MATX 43	Introduction to Software Engineering
C. Complete:	
MATH 2A	Single-Variable Calculus
MATH 2B	Single-Variable Calculus
MATH 2D	Multivariable Calculus
MATH 3A	Introduction to Linear Algebra
or I&C SCI 6N	Computational Linear Algebra
I&C SCI 6B	Boolean Logic and Discrete Structures
I&C SCI 6D	Discrete Mathematics for Computer Science
STATS 5	Seminar in Data Science
STATS 7	Basic Statistics
STATS 68	Statistical Computing and Exploratory Data Analysis
Upper-division:	
A. Data Science core requirements:	
STATS 110	Statistical Methods for Data Analysis I
STATS 111	Statistical Methods for Data Analysis II
STATS 112	Statistical Methods for Data Analysis III
STATS 115	Introduction to Bayesian Data Analysis
STATS 120A	Introduction to Probability and Statistics I
STATS 120B	Introduction to Probability and Statistics II
STATS 120C	Introduction to Probability and Statistics III
I&C SCI 139W	Critical Writing on Information Technology
COMPSCI 122A	Introduction to Data Management
COMPSCI 161	Design and Analysis of Algorithms
COMPSCI 178	Machine Learning and Data-Mining
IN4MATX 143	Information Visualization
B. Three elective courses from the list below:	
MATH 130B	Probability II
MATH 130C	Stochastic Processes
STATS 140	Multivariate Statistical Methods
I&C SCI 53	Principles in System Design
COMPSCI 111	Digital Image Processing
COMPSCI 115	Computer Simulation
COMPSCI 121	Information Retrieval
COMPSCI 122B	Project in Databases and Web Applications
COMPSCI 122C	Principles of Data Management
COMPSCI 125	Next Generation Search Systems
COMPSCI 131	Parallel and Distributed Computing
COMPSCI 134	Computer and Network Security
COMPSCI 163	Graph Algorithms
COMPSCI 165	Project In Algorithms And Data Structures
COMPSCI 169	Introduction to Optimization
COMPSCI 171	Introduction to Artificial Intelligence
COMPSCI 172B	Neural Networks and Deep Learning
IN4MATX 131	Human Computer Interaction

IN4MATX 141	Information Retrieval
IN4MATX 161	Social Analysis of Computing
C. Data Science capstone team-based project courses: STATS 170A and STATS 170B	

<b>Freshman</b>		
<b>Fall</b>	<b>Winter</b>	<b>Spring</b>

STATS 115	STATS 170A	STATS 170B
Data Science Major Elective	Data Science Major Elective	Data Science Major Elective
General Education III	General Education IV	General Education IV

A wide variety of careers and graduate programs are open to graduates of the Data Science major. Demand for graduates with skills in both statistics and computer science currently outpaces supply - thus, students with these skills typically find employment quickly, across a wide variety of sectors, including internet companies, finance, engineering, business, medicine, and more. Data Science graduates are well-qualified for job titles such as "data scientist," "data analyst," or "statistician," both in the public and private sectors. Graduate school in area such as Computer Science or Statistics is also a possible career path.

## Statistics, M.S.

Research in statistics can range from mathematical studies of the theoretical underpinnings of a statistical model or method to the development of novel statistical models and methods and a thorough study of their properties. Frequently, statistics research is motivated and informed by collaborations with experts in a particular substantive field. Their scientific studies and data collection efforts may yield complex data that cannot be adequately handled using standard statistical methodology. Statisticians aim to develop methods that address the scientific or policy questions of the researcher. In doing so, statisticians must consider how efficiently and effectively the proposed methodology can be implemented and what guarantees can be provided as to the performance of the proposed methods. Such questions can often be answered using a combination of mathematical, analytical, and computational techniques.

**Background:** Individuals from a variety of backgrounds can make significant contributions to the field of statistics as long as they have sufficient background in statistics, mathematics, and computing. Undergraduate preparation in statistics, mathematics, and computing should include multivariate calculus (the equivalent of UCI courses MATH 2A-MATH 2B, MATH 2D-MATH 2E), linear algebra (MATH 121A), elementary analysis (MATH 140A-MATH 140B), introductory probability and statistics (STATS 120A-STATS 120B-STATS 120C), and basic computing (I&C SCI 31). For students with undergraduate majors outside of mathematics and statistics, it is possible to make up one or two missing courses during the first year in the program.

For additional information about the Bren School of ICS's graduate programs and admissions information, [click here](#).

A. Complete:

STATS 200A- 200B- 200C	Intermediate Probability and Statistical Theory and Intermediate Probability and Statistical Theory and Intermediate Probability and Statistical Theory
STATS 210	Statistical Methods I: Linear Models
STATS 210B	Statistical Methods II: Categorical Data <sup>1</sup>
STATS 210C	Statistical Methods III: Longitudinal Data <sup>1</sup>
STATS 205	Introduction to Bayesian Data Analysis

B. Complete three quarters of seminar in STATS 280.

C. Select five additional graduate courses in or related to statistics, at least two of which are offered by the Department of Statistics.<sup>2</sup>

<sup>1</sup> STATS 211 and STATS 212 may be substituted for STATS 210B and STATS 210C.

<sup>2</sup> At most one of the five elective courses may be an Individual Study (STATS 299), and only with prior approval of the Department Graduate Committee. STATS 281A-STATS 281B-STATS 281C may not be taken as an elective.

The entire program of courses must be approved by the Statistics Department Graduate Committee. Students with previous graduate training in statistics may petition the Committee to substitute other courses for a subset of the required courses. Students are required to pass a written comprehensive examination ordinarily at the end of the first year, covering the material from STATS 200A-STATS 200B-STATS 200C, and either STATS 210, STATS 210B, and STATS 210C, *or* STATS 210, STATS 211, and STATS 212.

## Statistics, Minor

The minor in Statistics is designed to provide students with exposure to both statistical theory and practice. The minor requires a total of seven courses. These include a mathematics course, five core statistics courses, and an elective that may be taken from among several departments. Some of the courses used to complete the minor may include prerequisites that may or may not be part of a student's course requirements for their major. Because of this, the minor is somewhat intensive, but it is a useful complement to a variety of undergraduate fields for mathematically inclined students. The minor, supplemented with a few additional courses (mathematics and computing), would provide sufficient background for graduate study in statistics. Students considering a minor in Statistics should meet with the academic counselor of their major as early as possible to plan their course work and incorporate the required courses into their four-year academic plan.

NOTE: Students may not receive both a minor in Statistics and a specialization in Statistics within the Mathematics major.

### Required Courses

MATH 3A or I&C SCI 6N	Introduction to Linear Algebra Computational Linear Algebra
STATS 110- 111	Statistical Methods for Data Analysis I and Statistical Methods for Data Analysis II
STATS 120A- 120B- 120C	Introduction to Probability and Statistics I and Introduction to Probability and Statistics II and Introduction to Probability and Statistics III

Select one elective from the following: <sup>1</sup>

I&C SCI 31	Introduction to Programming
MATH 130B or MATH 130C	Probability II Stochastic Processes
STATS 7	Basic Statistics (or equivalent course) <sup>2</sup>
STATS 112	Statistical Methods for Data Analysis III
STATS 115	Introduction to Bayesian Data Analysis
STATS 140	Multivariate Statistical Methods

<sup>1</sup> Or can substitute another course with approval of the Director of Undergraduate Studies.

<sup>2</sup> Only if taken prior to STATS 110

NOTE: A maximum of two courses can be taken Pass/Not Pass toward a minor. Visit the ICS Student Affairs Office website for Majors and Minors restrictions. ([http://www.ics.uci.edu/ugrad/degrees/MajorMinor\\_Restrictions\\_Chart.pdf](http://www.ics.uci.edu/ugrad/degrees/MajorMinor_Restrictions_Chart.pdf))

## Statistics, Ph.D.

Research in statistics can range from mathematical studies of the theoretical underpinnings of a statistical model or method to the development of novel statistical models and methods and a thorough study of their properties. Frequently, statistics research is motivated and informed by collaborations with experts in a particular substantive field. Their scientific studies and data collection efforts may yield complex data that cannot be adequately handled using standard statistical methodology. Statisticians aim to develop methods that address the scientific or policy questions of the researcher. In doing so, statisticians must consider how efficiently and effectively the proposed methodology can be implemented and what guarantees can be provided as to the performance of the proposed methods. Such questions can often be answered using a combination of mathematical, analytical, and computational techniques.

*Background:* Individuals from a variety of backgrounds can make significant contributions to the field of statistics as long as they have sufficient background in statistics, mathematics, and computing. Undergraduate preparation in statistics, mathematics, and computing should include multivariate calculus (the equivalent of UCI courses MATH 2A-MATH 2B, MATH 2D-MATH 2E), linear algebra (MATH 121A), elementary analysis

(MATH 140A-MATH 140B), introductory probability and statistics (STATS 120A-STATS 120B-STATS 120C), and basic computing (I&C SCI 31). For students with undergraduate majors outside of mathematics and statistics, it is possible to make up one or two missing courses during the first year in the program.

For additional information about the Bren School of ICS's graduate programs and admissions information, click [here](#).

### Statistics Course Requirements

A. Complete:

STATS 200A- 200B- 200C	Intermediate Probability and Statistical Theory and Intermediate Probability and Statistical Theory and Intermediate Probability and Statistical Theory
STATS 210	Statistical Methods I: Linear Models
STATS 211	Statistical Methods II: Generalized Linear Models
STATS 212	Statistical Methods III: Methods for Correlated Data
STATS 220A- 220B	Advanced Probability and Statistics Topics and Advanced Probability and Statistics Topics
STATS 225	Bayesian Statistical Analysis
STATS 230	Statistical Computing Methods
STATS 275	Statistical Consulting

B. Select four additional graduate courses in or related to statistics, at least two of which are offered by the Department of Statistics.<sup>1</sup>

C. In addition, continual enrollment in STATS 280 is required in all quarters.

<sup>1</sup> STATS 202, STATS 203, and STATS 281A-STATS 281B-STATS 281C may not be taken as electives. These courses must be completed prior to candidacy.

### Additional Ph.D. requirements

Each Ph.D. student is required to take a written comprehensive examination, ordinarily at the end of the first year, covering the material from STATS 200A-STATS 200B-STATS 200C, STATS 210, STATS 211, and STATS 212. In addition, each student is required to take a written comprehensive examination after completion of the second year course work, covering material from STATS 220A-STATS 220B.

Ph.D. students who have passed the written comprehensive examinations are required to give a post-comprehensive research presentation each year.

Ph.D. students are required to serve as teaching assistants for at least two quarters.

Ph.D. students are required to demonstrate substantive knowledge of an application area outside of statistics (e.g., computer science, economics, cognitive sciences, biology, or medicine). Such knowledge can be demonstrated by course work in the application area (three quarter courses), co-authorship of publishable research in the application area, or other evidence of supervised collaborative work that is substantiated by an expert in the field. In the case of a theoretically oriented student, the outside application area may be mathematics.

The normative time for advancement to candidacy is three years. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

## Engineering and Computer Science in the Global Context, Concentration

The globalization of the marketplace for information technology services and products makes it likely that ICS graduates will work in multicultural settings or be employed by companies with extensive international operations or customer bases. The goal of the concentration is to help students develop and integrate knowledge of the history, language, and culture of a country or geographic region outside the United States, through course work both at UCI and an international host campus, followed by a technology-related internship in the host country.

All ICS majors in good standing may propose an academic plan that demonstrates the ability to complete the concentration (a minimum of eight courses) and other requirements for graduation in a reasonable time frame. It is expected that a student's proposal will reflect a high degree of planning that includes the guidance of academic counselors and those at the UCI Study Abroad Center regarding course selection, as well as considerations related to internship opportunities, housing, and financial aid. Each student's proposed program of study must be approved by the ICS Associate Dean for Student Affairs. The Associate Dean will be available to assist qualified students with the development of a satisfactory academic plan, as needed.

The concentration consists of the following components:

1. A minimum of eight courses at UCI or at the international campus with an emphasis on the culture, language (if applicable and necessary), history, literature of the country that corresponds to the international portion of the program, international law, international labor policy, global issues, global institutions, global conflict and negotiation, and global economics;

2. A one- or two-semester sequence of technical courses related to the major and, possibly, culture, history, and literature courses taken at an international university;
3. A two-month or longer technical internship experience in the same country as the international educational experience.

More information about the requirements for the concentration is available in the ICS Student Affairs Office.

## Information and Computer Science, B.S.

The Information and Computer Science major is intended for highly motivated students who are currently enrolled at UCI, who find that their academic and career interests are not well served by any of the existing ICS majors, and would be better served by a uniquely designed course of study.

New students are not admitted directly to the Information and Computer Science major. Continuing students can apply to change their major to Information and Computer Science no earlier than the fall quarter of their sophomore year. Students must submit a proposal for a four-year plan of study, along with rationale explaining why the proposed plan is a well-motivated and coherent set of courses that does not fit into any of the existing ICS majors. Students submitting proposals are strongly encouraged to follow the lower-division requirements for one of the ICS majors (or provide a rationale for why this is not appropriate) and should include at least 48 units of upper-division ICS, Computer Science, Informatics, or Statistics courses. Proposals must be approved by the ICS Associate Dean for Student Affairs. See the ICS Student Affairs Office for more details. Complete information about changing majors to ICS is available at the UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu/>).

New students are not admitted directly to the Information and Computer Science major.

### Transfer Applicants:

Students are strongly encouraged to follow the transfer preparation guidelines for any of the other Bren ICS majors.

**All students must meet the University Requirements.**

**Major Requirements: See the ICS Student Affairs Office.**

## Information and Computer Science, M.S.

Students pursuing the M.S. in Information and Computer Science must complete a concentration in Embedded Systems.

M.S. students may select one of two options, the thesis plan or the comprehensive examination plan, as described below. The normative time for completion of the M.S. is two years. All study must be completed within four calendar years from the date of admission.

### Plan I: Thesis Plan

The thesis option is available for graduate students who may wish to continue on to a Ph.D. program or those who wish to concentrate on a specific problem. To qualify for this option, students must be in good academic standing with their Department. The student must enroll in at least two quarters of Thesis Supervision (COMPSCI 298 or IN4MATX 298) that will substitute for two required courses as specified under the concentration area or specialization of choice. All required courses must be completed with a grade of B or better, and the student must write a research or thesis project. A committee of three faculty members (voting members of the Academic Senate) will guide the student and give final approval of the thesis. The committee will consist of an advisor (faculty member from the student's department) who is willing to supervise the thesis project, and two other faculty members (one of which must be from the student's department) who are willing to serve on the committee as readers of the thesis. An oral presentation of the thesis to the committee will be required. Seminar courses that have an "S" suffix (e.g., 209S) do not count toward degree requirements.

### Plan II: Comprehensive Examination Plan

The student completes the required units as specified under the concentration area. Each course must be completed with a grade of B or better. Seminar courses that have an "S" suffix (e.g., 209S) do not count toward degree requirements. The student must take a comprehensive examination given by ICS faculty. The examination covers the core requirements.

## ICS Concentration in Embedded Systems—M.S.

The goal of this program is to prepare students for challenges in developing future embedded systems. These future systems will further integrate communications, multimedia, and advanced processors with complex embedded and real-time software for automotive, medical, telecommunications, and many other application domains. Furthermore, embedded systems are becoming parallel, deploying multiprocessor systems-on-a-chip and parallel application software. An in-depth knowledge of the underlying scientific and engineering principles is required to understand these advances and to contribute productively to development of such systems. This program helps students master embedded system fundamentals, advanced computer architecture and compilers, networking, security, embedded, parallel and distributed software, and computer graphics in a sequence of courses and labs. Students also complete a large embedded systems project and may choose to write a Master's thesis.

### Required Courses

The following courses must be completed with a grade of B or better.

Select six of the following:

**List A**

COMPSCI 244	Introduction to Embedded and Ubiquitous Systems
COMPSCI 250A	Computer Systems Architecture
COMPSCI 232	Computer and Communication Networks
COMPSCI 203	Network and Distributed Systems Security
COMPSCI 242	Parallel Computing
COMPSCI 250B	Modern Computer Systems
COMPSCI 230	Distributed Computer Systems
COMPSCI 243	High-Performance Architectures and Their Compilers

Select six additional courses in one of the following two ways:

1. For students pursuing the M.S. thesis option, two four-unit courses in Thesis Supervision (COMPSCI 298) plus four graduate courses taken from List A or the following List B
2. For all other students, six graduate courses taken from List A or the following List B

**List B**

COMPSCI 241	Advanced Compiler Construction
COMPSCI 245	Software for Embedded Systems
COMPSCI 252	Introduction to Computer Design
EECS 211	Advanced System Software
COMPSCI 211A	Visual Computing
COMPSCI 248A/IN4MATX 241	Introduction to Ubiquitous Computing
SWE 211	Software Engineering
COMPSCI 236	Wireless and Mobile Networking
COMPSCI 265	Graph Algorithms
EECS 223	Real-Time Computer Systems

M.S. Students who do not have an undergraduate degree in Computer Science or equivalent must also take COMPSCI 260.

### Comprehensive Examination or Thesis

Each student must either (1) pass a comprehensive examination administered by the Embedded Systems faculty; or (2) submit a thesis for approval by a three-person committee consisting of an advisor (who is an ICS Embedded Systems full-time faculty member) and two other full-time faculty members (one of which must be from ICS).

## Information and Computer Science, Minor

Students outside the School may also pursue a minor in Information and Computer Science. The minor provides a focused study of Information and Computer Science to supplement a student's major program of study and prepares students for a profession, career, or academic pursuit in which computer science is an integral part but is not the primary focus. The ICS minor contributes to students' competence in computing technology and proficiency in programming as well as exposing them to the fundamentals of computer science. The minor allows students sufficient flexibility to pursue courses that complement their major field or address specific interests.

A. Complete:

I&C SCI 31- 32- 33- 45C- 46	Introduction to Programming and Programming with Software Libraries and Intermediate Programming and Programming in C/C++ as a Second Language and Data Structure Implementation and Analysis
I&C SCI 6D	Discrete Mathematics for Computer Science

B. Select one of the following:

I&C SCI 51	Introductory Computer Organization
or IN4MATX 43	Introduction to Software Engineering

C. Select two upper-division from the following: <sup>1</sup>

COMPSCI 111-144
COMPSCI 151-177
IN4MATX 101-102
IN4MATX 111-119

IN4MATX 125	Computer Game Development
IN4MATX 131	Human Computer Interaction
IN4MATX 132–134	
IN4MATX 141	Information Retrieval
IN4MATX 148	Project in Ubiquitous Computing
IN4MATX 153	Computer Supported Cooperative Work
IN4MATX 161–163	
IN4MATX 171	Introduction to Medical Informatics

<sup>1</sup> COMPSCI 190–199 and IN4MATX 190–199 may not be applied to the minor.

#### NOTES:

1. Visit the ICS Student Affairs Office website for Majors and Minors restrictions ([http://www.ics.uci.edu/ugrad/degrees/MajorMinor\\_Restrictions\\_Chart.pdf](http://www.ics.uci.edu/ugrad/degrees/MajorMinor_Restrictions_Chart.pdf)).
2. A maximum of two courses may be taken for the Pass/Not Pass grade option toward any minor
3. There are no applications for an ICS minor. Students must have a peer advisor or academic counselor of their major add the minor to their Degree Audit once they begin pursuing the minor.
4. To ensure you are certified for the minor at graduation, the minor must be on your Degree Audit and Application for Graduation. Your Student Affairs Office can add the minor to your Degree Audit and will certify your minor at time of graduation, so it is important to keep them updated on your academic progress.
5. Some ICS majors may not minor in Information and Computer Science. For those who may, 5 courses cannot overlap between your major and minor.

## Software Engineering, B.S.

The Software Engineering major gives students a strong foundation in software engineering as well as a solid basis in computer science. Students who complete the major will be able to be productive members of software engineering teams in a variety of application domains including, but not restricted to, Web and mobile applications. The acquired technical knowledge and appreciation for life-long learning, combined with the ability to place software in the social context in which it is developed, empowers students to create novel applications that have the potential to bring social change.

Freshman Applicants: See the Undergraduate Admissions section.

#### Transfer Applicants:

Transfer applicants who satisfactorily complete course prerequisites will be given preference for admission. All applicants must complete the following required courses: one year of approved calculus, one year of object-oriented programming (python, java, C++), additional courses as specified by the major, and completion of lower-division writing. Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. Visit the *UCI Office of Admissions website* for information on transfer requirements for our major.

**All students must meet the University Requirements.**

#### Lower-division

A. Select one of the following series:

I&C SCI 31- 32- 33	Introduction to Programming and Programming with Software Libraries and Intermediate Programming
or	
I&C SCI 32A- 33	Python Programming and Libraries (Accelerated) and Intermediate Programming

B. Complete:

I&C SCI 45C	Programming in C/C++ as a Second Language
I&C SCI 45J	Programming in Java as a Second Language
I&C SCI 46	Data Structure Implementation and Analysis
I&C SCI 51	Introductory Computer Organization
IN4MATX 43	Introduction to Software Engineering

**NOTES:**

1. Students are advised that this sample program lists the minimum requirements; it is possible that students may have to take additional courses to prepare for required courses.
2. The lower-division writing requirement must be completed by the end of the seventh quarter at UCI.
3. This is only a sample plan. Course offerings may be moved due to unforeseen circumstances. It is strongly recommended that students meet with an academic advisor to create an academic plan tailored to meet their specific areas of interest. Please pay close attention to course prerequisites while creating your academic plan. For example, IN4MATX 124 requires CS 132 and CS 132 requires Stats 67.

# Graduate Degrees

---

## GRADUATE DEGREES (organized alphabetically)

### A

- Accountancy, M.P.Ac.
- Anthropology, M.A.
- Anthropology, Ph.D.
- Art, M.F.A.
- Art History, M.A.
- Asian American Studies, M.A.

### B

- Biological Sciences, M.S.
- Biological Sciences, Ph.D.
- Biomedical and Translational Science, M.S.
- Biomedical Engineering, M.S.
- Biomedical Engineering, Ph.D.
- Biomedical Sciences, M.S.
- Biomedical Sciences, Ph.D.
- Biotechnology Management, M.S.
- Business Administration, M.B.A. (also: Fully Employed program or Executive program)
- Business Analytics, M.S.

### C

- Chemical and Biomolecular Engineering, M.S.
- Chemical and Biomolecular Engineering, Ph.D.
- Chemistry, M.S.
- Chemistry, Ph.D.
- Civil and Environmental Engineering, M.S.
- Civil and Environmental Engineering, Ph.D.
- Classics, M.A.
- Classics, Ph.D.
- Cognitive Sciences, M.S.
- Cognitive Sciences, Ph.D.
- Cognitive Neuroscience, M.S.
- Comparative Literature, M.A.
- Comparative Literature, Ph.D.
- Computational Science, M.S.
- Computational Science, Ph.D.
- Computer Science, M.C.S.
- Computer Science, M.S.
- Computer Science, Ph.D.
- Conservation and Restoration Science, M.C.R.S.
- Criminology, Law and Society, M.A.S.
- Criminology, Law and Society, Ph.D.
- Culture and Theory, M.A.
- Culture and Theory, Ph.D.

**D**

- Dance, M.F.A.
- Drama, M.F.A.
- Drama and Theatre, Ph.D.

**E**

- Earth System Science, M.S.
- Earth System Science, Ph.D.
- East Asian Studies, M.A.
- East Asian Studies, Ph.D.
- Economics, M.A.
- Economics, Ph.D.
- Education, Credential Programs
- Education, M.A.
- Education, Ph.D.
- Electrical and Computer Engineering, M.S.
- Electrical and Computer Engineering, Ph.D.
- Elementary and Secondary Education, M.A.T.
- Embedded and Cyber-Physical Systems, M.E.C.P.S.
- Engineering, M.Engr.
- Engineering, M.S.
- Engineering, Ph.D.
- Engineering Management, M.S.
- English, M.E.
- English, M.F.A.
- English, Ph.D.
- Environmental Health Sciences, M.S.
- Environmental Health Sciences, Ph.D.
- Epidemiology, M.S.
- Epidemiology, Ph.D.
- European Thought and Culture, M.A.

**F**

- Finance, M.Fin.

**G**

- Genetic Counseling, M.S.
- German, M.A.
- German, Ph.D.
- Global Studies, M.A.
- Global Studies, Ph.D.

**H**

- History, M.A.
- History, Ph.D.
- History and Theory of Music, M.A.
- History and Theory of Music, Ph.D.
- Human Computer Interaction and Design, M.H.C.I.D.

**I**

- Informatics, M.S.
- Informatics, Ph.D.
- Information and Computer Science, M.S.

- Innovation and Entrepreneurship, M.I.E.
- Integrated Composition, Improvisation, and Technology, M.A.
- Integrated Composition, Improvisation, and Technology, Ph.D.

## L

- Language Science, M.A.
- Language Science, Ph.D.
- Law, J.D.
- Laws, LL.M.
- Legal and Forensic Psychology, M.L.F.P.

## M

- Management, M.S.
- Management, Ph.D.
- Materials Science and Engineering, M.S.
- Materials Science and Engineering, Ph.D.
- Mathematical, Computational, and Systems Biology, M.S.
- Mathematical, Computational, and Systems Biology, Ph.D.
- Mathematics, M.S.
- Mathematics, Ph.D.
- Mechanical and Aerospace Engineering, M.S.
- Mechanical and Aerospace Engineering, Ph.D.
- Medical Science, M.S.
- Medicine, M.D.
- Music, M.F.A.

## N

- Networked Systems, M.S.
- Networked Systems, Ph.D.
- Nursing, D.N.P.
- Nursing Science, M.S.
- Nursing Science, Ph.D.

## P

- Pharmacological Sciences, M.S.
- Pharmacological Sciences, Ph.D.
- Pharmacology, M.S.
- Philosophy, M.A.
- Philosophy, Ph.D. (Humanities)
- Philosophy, Ph.D. (Social Sciences)
- Philosophy, Political Science, and Economics, M.A.
- Physics, M.S.
- Physics, Ph.D.
- Political Science, M.A.
- Political Science, Ph.D.
- Psychological Science, Ph.D.
- Public Health, M.P.H.
- Public Health, M.S.
- Public Health, Ph.D.
- Public Policy, M.P.P.

**S**

- Social Ecology, M.A.
- Social Ecology, Ph.D.
- Social Science, M.A.
- Social Science, Ph.D.
- Sociology, M.A.
- Sociology, Ph.D.
- Software Engineering, M.S.
- Software Engineering, M.S.E.
- Software Engineering, Ph.D.

- Transportation, Concentration

**V**

- Visual Studies, Graduate Emphasis
- Vocal Arts, Graduate Emphasis

# Graduate Division

---

## Gillian R. Hayes, Vice Provost for Graduate Education and Dean of the Graduate Division

With the exception of programs conducted by the School of Medicine for the training of physicians, and the J.D. program in the School of Law, the Vice Provost for Graduate Education, and Dean of the Graduate Division administers graduate education in accordance with academic policies established by the University of California, the Irvine Division of the Academic Senate, and the UCI Graduate Council, a standing committee of the Irvine Division of the Academic Senate. Graduate education includes those students engaged in the pursuit of a master's degree, a doctoral degree, or a teaching credential, as well as individuals engaged in postdoctoral training at UCI. There is no separate graduate faculty at UCI; all graduate work is supervised by academic units and faculty members who have concurrent responsibility for undergraduate education.

Information about graduate education at UCI is published here in the *UCI General Catalogue*, on the Graduate Division website, and in individual graduate program publications. The staff of the Graduate Division and departmental academic advisors are prepared to answer questions about admission, academic policies and procedures, graduate programs and degrees, financial assistance, student services, and other matters of concern to applicants or graduate students. The Graduate Division is located in 120 Aldrich Hall; 949-824-4611; or visit the Graduate Division website (<http://www.grad.uci.edu/>).

The University of California believes that a diverse student and faculty population is integral to the advancement of academic excellence and is critical to promoting the lively intellectual exchange and the variety of ideas and perspectives that are essential to advanced scholarly research and debate. The University is committed to expand student outreach, recruitment, and retention efforts. Through the Graduate Division's diversity programs, steps are taken to increase the participation of diverse groups of U.S. citizens and permanent residents who have been educationally or socioeconomically disadvantaged.

It is the goal of UCI's Graduate Division to award fellowships to many admitted students based upon merit or financial need. In addition, diversity fellowships for new and continuing Ph.D. and M.F.A. students are based on demonstrated scholastic achievement, full-time status, U.S. citizenship or permanent residency, and socioeconomic and educational limitations. Each academic department identifies those students whose scholarship, background, and life experiences can best enhance the level of diversity within a department or discipline.

---

## Admission to Graduate Standing

Applicants for admission to graduate study at UCI must apply for acceptance into a specific graduate program to work toward a specific advanced degree. A general requirement for admission is that the applicant hold the degree of Bachelor of Arts, Letters, Philosophy, or Science (or an acceptable equivalent) from an **accredited academic institution with degree standards equivalent to those of the University of California**. A minimum undergraduate grade point average of at least B (3.0 on a 4.0 scale) is required.

Each applicant's file is comprehensively evaluated by the faculty admissions committee of the applicant's specific graduate program on the basis of such factors as academic subject preparation, scholarship, letters of recommendation, test scores, and examples of previous work. One critical evaluative question is whether the applicant's academic objectives can reasonably be satisfied by a particular graduate program on this campus. Please note that the University of California does not have the capacity to accommodate/admit all applicants who meet the minimum admission requirements.

## Application Procedures

### How to Apply

Prospective students should apply online using the *Application for Graduate Study* available at Graduate Division website (<http://www.grad.uci.edu/>). Detailed instructions are included in the electronic application. For additional information, send email to [grad@uci.edu](mailto:grad@uci.edu) or call 949-824-4611.

The mandatory application fee is \$120 (\$140 for international students) and is not refundable under any circumstances. (Please note, however, that the application fee for M.B.A. programs offered by The Paul Merage School of Business is \$150.) Payment instructions are provided in the electronic application as well as on the Graduate Division website (<http://www.grad.uci.edu/>). Diversity program and/or financial-need-based application fee waivers may be available for a few **domestic** (U.S. Citizen or U.S. Permanent Resident) applicants.

### When to Apply

For all graduate programs, applications should be completed and submitted by the respective program's stated deadline. Some programs have deadlines as early as December 1; others have deadlines of January 15, and still others may accept applications until March or thereafter. In order to process applications in time for the applicant to receive full consideration, letters of recommendation, unofficial transcripts, and official test scores must be received before the published deadlines. Some schools and departments have earlier or later deadlines for filing the application. Applicants should consult their prospective department or school for more detailed information. Contact information for the schools and departments may be obtained by visiting their individual websites or via the list of department and school contacts on the Graduate Division website (<http://www.grad.uci.edu/academics/degree-programs/>).

## Required Supporting Documents

### Letters of Recommendation

Applicants should arrange to have three letters of recommendation uploaded to the application system. Instructions for contacting recommenders and for uploading letters of recommendation are available on the application. Only one set of three recommendation letters needs to be submitted in support of an application for admission and fellowship or assistantship consideration, although additional letters are allowed. It is important that letters of recommendation be completed primarily by professors or instructors in disciplines related to the proposed course of study who are in a position to analyze an applicant's abilities and academic promise.

### Graduate Record Examination (GRE) Scores

Many programs require applicants to take the Graduate Record Examination (GRE) General Test; however, many do not. Many programs in the Paul Merage School of Business require that M.B.A. applicants take either the Graduate Management Admission Test (GMAT) or the GRE; applicants to the Master of Finance must also take either the GMAT or the GRE. However, several other master's programs in the Paul Merage School of Business may exempt some or all applicants from the test requirement. **Applicants must check with their program of interest to determine specific requirements.**

**All** applicants are strongly encouraged to check the testing requirements of their program of interest, as they may have changed. Several programs also require, or strongly recommend, that an applicant report the score of a GRE Subject Test. There is no minimum GRE score. Applicants should register for either the October or December test dates to ensure the timely receipt of their score results for admission consideration. The GRE is administered by the Educational Testing Service (<http://www.ets.org>). GRE scores that are more than five years old are not acceptable.

### Academic Records

For application review purposes only, applicants must scan and upload copies of transcripts for all institutions attended since high school. In the online application, applicants will be prompted to upload their scanned documents. Unofficial transcripts must also be submitted by applicants who attended or graduated from any University of California campus, including UC Irvine. Applicants must upload both the front and back sides of the transcript. Uploaded transcripts should be recent and include the following: applicant name, dates of attendance, grades/marks received, credits, and grading legend. UCI reserves the right to require official transcripts at any time during the admission process, and rescind any offer of admission made if discrepancies between uploaded and official transcript(s) are found. Official transcripts will be requested at such time that an applicant is admitted and decides to attend UCI. Applicants should not send official transcripts until this time, unless requested to do so. Applicants with academic work in progress must expect to complete their undergraduate degree programs before the intended date of enrollment at UCI and must submit evidence of degree conferral before officially enrolling.

### Foreign Academic Records

If a student who has attended a foreign institution is admitted and decides to attend UCI, official academic records from any foreign institutions attended will be required. Records of academic study from foreign institutions must be official, bearing the original signature of the registrar and the seal of the issuing institution. Applicants should not send the original of an academic record which cannot be replaced; they should obtain instead properly certified copies. Unless academic records and diplomas are issued in English by the institution, the official records in their original language must be submitted with an authorized, complete, and exact English translation. Foreign academic records must include all subjects or courses taken on a yearly basis, together with the units of credit or time allotted to each subject each term or year and the marks or ratings in each subject or examination passed. In all cases the institutional grading scale or other standard of evaluation, including maximal passing and failing marks and definition of grades between them, should appear on official records or as an official attachment. Official evidence of degree conferral must also be supplied, together with evidence of rank in class if available.

### Demonstration of English Language Proficiency for Admission

Applicants whose primary language is not English are required to demonstrate proficiency in English for admission consideration. A student may receive a waiver to the Test of English as a Foreign Language (TOEFL or TOEFL iBT) requirement **only for purposes of admission** to a UCI graduate program if the student completed all of the requirements for their high school diploma, bachelor's degree, or an advanced degree in a country where the primary and/or dominant language is English, **and** where English was the language of instruction of the school where the requirements were completed. The TOEFL/TOEFL iBT requirement may be waived for **admissions purposes only**. In addition, this policy pertains to the minimum UCI campus

admission policy for English Language proficiency. **Individual departments may have stricter requirements than the minimum campus standard.** Applicants should always consult the department in which they are interested for specific requirements.

Proficiency in English may be demonstrated by passing one of two standardized, internationally administered tests: TOEFL (the Test of English as a Foreign Language), or IELTS (International English Language Testing System). The applicant should take one of these tests at the earliest available date to ensure that the scores are reported in time to meet application deadlines. Applicants will not be admitted provisionally if they lack an acceptable proficiency score or have not yet taken an acceptable proficiency examination.

The TOEFL is administered by Educational Testing Service (<http://www.ets.org>) (ETS). For the TOEFL iBT, the minimum required overall score for admissions consideration is 80; the minimum score required for admissions consideration is 550 for the paper-based test. TOEFL and TOEFL iBT scores that are two years old or older are not acceptable. Results of institutional (non-ETS) administrations of the TOEFL or TOEFL iBT are not acceptable.

English language proficiency may also be demonstrated by passing the Academic Modules of the International English Language Testing System (<http://www.ielts.org>) (IELTS) examination. The minimum requirements for admissions consideration are an overall score of 7, with a score of no less than 6 on any individual module. IELTS test scores that are two years old or older are not acceptable.

### Demonstration of Oral English Proficiency for International Teaching Assistant/Associate Employment

Many UCI degree programs require students to serve as a Teaching Assistant for training purposes, as a graduation requirement and to provide students with financial support. UCI encourages **(and some individual graduate programs require)** prospective international students to take and pass one of the accepted oral English proficiency examinations prior to application/admission. International and U.S. Permanent Resident graduate students who are not citizens of countries where English is either the primary or dominant language as approved by the UCI Graduate Council, who wish to be considered for appointment as a Teaching Assistant/Associate, must pass one of the following English proficiency examinations: Test of English as a Foreign Language Internet-based Test (TOEFL iBT), International English Language Testing System (IELTS), or UCI campus Speaking Proficiency English Assessment Kit (SPEAK) test. TOEFL iBT is administered by the Educational Testing Service (ETS). IELTS, on the other hand, is administered through the partnership of the British Council, IDP: IELTS Australia and the University of Cambridge ESOL Examinations. Once a student is admitted to UCI, the SPEAK test, which is administered by the UCI Humanities Studio for Academic Resources and Technology, is an option to satisfy this requirement. Achieving a minimum score of 26 on the speaking portion of the TOEFL iBT, a score of 8 on the speaking module of the IELTS, or a score of 50 on the SPEAK test satisfies the oral proficiency requirement and *may* establish eligibility for a Teaching Assistant/Associate appointment. Graduate students are responsible for ensuring that the UCI Graduate Division is notified directly of their scores by the testing centers. There is no exception to this requirement.

A full discussion of English proficiency options and links to the agency sites offering these examinations are available at the Graduate Division's English Proficiency website (<http://www.grad.uci.edu/admissions/applying-to-uci/english-proficiency.html>).

Students who are citizens of the United States (regardless of country of origin) and citizens of countries where English is either the primary or dominant language as approved by the UCI Graduate Council are exempt from the requirement of taking and passing the English language proficiency examinations for admission purposes only. Non-U.S. citizens who are U.S. Permanent Residents or hold other non-citizen status and are residing in the United States, who have completed their undergraduate education in the United States, or have attended American schools abroad are *still* required to pass one of the English language proficiency examinations noted above in order to be eligible for an appointment as a Teaching Assistant/Associate.

Any student who was waived of the English proficiency requirement for admissions purposes will still be required to take a campus-based test. No student is permitted to begin an appointment as a Teaching Assistant/Associate until an English proficiency test has been taken and the student has passed.

### Special Note to Foreign Applicants

If admitted, foreign applicants will be required to certify that they possess sufficient funds to cover all tuition, fees, transportation, and living expenses for the first year of their studies at UCI. A Visa Request Form which contains a section for verification of financial resources will be forwarded to foreign applicants by the admitting academic program upon admission to graduate study. The required financial verification must be provided before a visa can be issued.

## Admission and Registration

A formal notice of the admission decision is sent to each applicant as soon as possible after the application and complete records are received, and after the department has made a recommendation. The official notification will be mailed well in advance of the beginning of the quarter for which application has been made.

Admission to graduate standing does not constitute registration for classes. A student is not officially registered for classes until the entire registration procedure is completed each quarter, including payment of Tuition, Student Services Fee, and other University fees, and enrollment in courses. Information on registration dates and procedures will be sent to newly admitted students prior to the registration cycle. Extensive information for newly admitted students is available at the Admitted Students website (<https://grad.uci.edu/admissions/admitted-students/>).

If an applicant wishes to defer admission to a later academic quarter (up to a maximum of three quarters after the original quarter of admission), the Graduate Division must be notified of the request in writing. After formal admission has been offered, the request for deferral must first be approved by the academic program to which the applicant was admitted.

## Campuswide New Graduate Student Orientations

Incoming graduate students are strongly encouraged to attend the Campuswide New Graduate Student Welcome and Orientation, and all international students are encouraged to also attend the International Graduate Student Welcome and Orientation, both held during the third week of September each fall. The Campuswide New Graduate Student Welcome and Orientation covers all aspects of navigating graduate education at UC Irvine, including graduate student services. It augments school/department-based orientations, and students should attend both. The International Graduate Student Welcome and Orientation covers unique aspects of the international graduate student experience, and provides information on campus support services; international students are encouraged to attend both campuswide orientation events. Information about the Campuswide New Graduate Student Welcome and Orientation is e-mailed to incoming graduate students the summer prior to the event; information about the International Graduate Student Welcome and Orientation is also provided at that time to incoming international students. Inquiries may be directed to [gradorientation@uci.edu](mailto:gradorientation@uci.edu), and details are available at the Graduate Welcome and Orientation website (<https://grad.uci.edu/services/campus-orientation/>).

## Academic Advising

In each academic unit with an advanced degree program, there is at least one formally appointed faculty graduate advisor or director of graduate studies. The graduate program advisor is a regular faculty member responsible for supervising graduate study in that unit, for monitoring the academic progress of graduate students, and for seeing that each graduate student is assigned a faculty advisor. The graduate student's faculty research advisor is responsible for mentoring the student, which includes meeting with the student at least once during each quarter of enrollment and providing an annual assessment of each student's timely academic progress. The graduate program advisor plays a key role in the academic lives of graduate students, advising students and other faculty members about program requirements and the academic policies pertaining to graduate students, approving study lists, and evaluating academic petitions. In many academic units the graduate program advisor is instrumental in the nomination of students for fellowship support, the selection of students for assistantships and fellowship appointments, and in the supervision of graduate student teachers. In most schools there also is an associate dean for graduate studies who coordinates many of the functions which affect graduate students within that school. Both graduate advisors as well as deans are important links between the student and the Dean of the Graduate Division.

Most graduate students also will have an individual faculty advisor or advising committee after the first year of graduate study and in order to progress to the Ph.D. degree a student must work with an advisor. When a student is advanced to candidacy for the Ph.D., the doctoral committee becomes the primary source of academic guidance; however, student academic petitions still must be approved by the faculty graduate program advisor. It is the student's responsibility to secure a faculty advisor with whom they will work on their progress to the degree.

## Academic Policies

The academic policies described here apply to students enrolled in study leading to graduate degrees and California education credentials. Other regulations and procedures are covered in the Academic Regulations and Procedures sections, and in the description of each graduate program.

### Academic Honesty

It is essential that all members of the academic community subscribe to the ideal of academic honesty and integrity and accept individual responsibility for their work. Students are urged to become familiar with the UCI Academic Senate Policies on Academic Honesty, available at the Academic Senate website ([http://www.senate.uci.edu/senatweb/default2.asp?active\\_page\\_id=754](http://www.senate.uci.edu/senatweb/default2.asp?active_page_id=754)) and in the *Catalogue's* Appendix. The policies apply equally to electronic media and print, and involve text, images, and ideas.

### Scholastic Requirements

A graduate student is expected to make satisfactory progress toward an approved academic objective, as defined by the faculty of the program in accordance with policies of the Graduate Council, to maintain a satisfactory grade point average for all work undertaken while enrolled in graduate study, and to maintain academic progress within the required time to degree as established by the respective academic program. Satisfactory progress is determined on the basis of both the recent academic record and overall performance. A graduate student normally is expected to complete satisfactorily at least eight units of academic credit applicable to the graduate program in each regular academic session (unless on an approved leave of absence), and satisfy all requirements of the academic program according to an approved schedule. For a graduate student, only the grades A+, A, A-, B+, B, and S represent satisfactory scholarship and may be applied toward advanced degree requirements. However, a UCI course in which a grade of B- is earned may be accepted one time only, via a formal petition process, in partial satisfaction of the degree requirements if the student has a grade point average of at least 3.0 in all courses applicable to the degree. Graduate students may not apply courses graded Pass/Not Pass toward any degree or satisfactory progress requirements. A grade point average below the B level (3.0 on a 4.0 scale) is not satisfactory, and a student whose grade point average is below that level is subject to academic disqualification.

A student's academic progress ordinarily is evaluated on the basis of the academic record, time-to-degree, and the professional judgment of the faculty. A few weeks after the end of a quarter, an updated copy of each enrolled student's permanent academic record is available from the Registrar. This record lists all UCI courses for which a graduate student was enrolled (including courses taken through the Intercampus Exchange Program), the grades

assigned, and the cumulative grade point average. This record also includes formal candidacy for an advanced degree, degrees conferred, certain examinations passed, unit credit accepted from other institutions, and other important academic information.

A graduate student who has not demonstrated satisfactory academic progress is not eligible for any academic appointment such as Reader, Tutor, Graduate Student Researcher, Teaching Associate, or Teaching Assistant, and may not hold a fellowship or other award which is based upon academic merit.

## Satisfaction of Degree Requirements

To graduate, students must satisfy the degree requirements outlined in the *Catalogue* that is in effect for the quarter in which they are registering for a graduate program. If the degree requirements are subsequently revised, the academic unit may, where appropriate, give students the option to meet the new requirements instead. If degree requirements are revised between the time a student is admitted and the time a student registers, the unit should notify the student of the modifications in writing. A student who withdraws from a program, or loses student status for other reasons for one or more quarters, will be bound by the degree requirements in effect at the time of readmission unless otherwise stipulated and agreed to in writing by the academic unit and approved by the Dean of the Graduate Division. A student who defers admission or who changes to another program will be held to the requirements in effect at the time of first registration.

## Grading

With the consent of the academic units involved, and upon approval by the Graduate Council, individual study and research courses at the graduate level may be graded Satisfactory or Unsatisfactory (S/U). Also, with the approval of the Graduate Council certain graduate courses are graded S/U only. A grade of S is assumed equivalent to a grade of B (3.0) or better. No course credit is given to a student for a course in which a grade of U is received.

Graduate students may take one undergraduate course (up to four units) per quarter on a Pass/Not Pass basis. However, such courses are not considered part of the student's graduate program and are not applied toward the requirements for an advanced degree.

The grade Incomplete (I) is assigned when a student's work is of passing quality but is incomplete for good cause. The I grade may be replaced by a permanent grade, provided the student completes the course work in a way authorized by the instructor and within the time limits expressed. The student must complete the course work within the period set by the instructor, or within 12 months following the quarter in which the grade Incomplete was originally awarded, or prior to the end of the quarter immediately preceding award of the degree, whichever comes first. The instructor is not obligated to allow the maximum time period. When the course work is completed within the time allowed, the student must ask the instructor of the course to submit an Academic Record Change Request to the Dean of the School in which the course is taught. During the time allowed for replacing an I grade, the I grade will not be used in computation of a student's grade point average. However, if the incomplete course work is not completed in the manner authorized by the instructor and within the time limits stated above, the I grade shall automatically be replaced with the permanent grade of F, NP, or U, as appropriate in accordance to the grading option selected when the student enrolled in the course, and will be used in computation of the student's grade point average. Graduate students who have not been continuously enrolled should contact their graduate advisor for information about completion of incomplete grades.

IP (In Progress) is a transcript notation restricted to sequential courses extending over two or more quarters for which use of the IP notation has been approved. When the last quarter of the sequence is completed, the grade for the final quarter is assigned for all quarters of the sequence. No credit is given until the student has completed the entire sequence.

A student who received an NR (No Report) transcript notation must immediately contact the instructor and arrange for the removal or replacement of the NR. If no action is taken by the end of the first quarter following the quarter in which the NR was assigned, or by the end of the quarter immediately preceding award of the degree, whichever comes first, the NR becomes an F, U, or NP and will remain permanently on the student's record.

A graduate student may repeat once a course in which a grade below B (3.0) or a grade of U was received. Only the most recently earned grade is used in computing the student's grade point average for the first eight units of repeated work; thereafter both the earlier and the later grades are used. Additional information about grading may be found in the Academic Regulations section.

## Language Policy for Examinations and Theses/Dissertations

English is the language of instruction and examination for graduate courses at UCI, unless the subject matter includes foreign language content. Similarly, examinations that satisfy specific degree requirements, such as preliminary, comprehensive, qualifying/candidacy examinations and thesis/dissertation defenses shall be conducted in English, except for the portions of the examination where the subject matter makes a different language specifically appropriate. (Examples include foreign language literature, linguistics, and others.)

Students must seek permission to write their thesis/dissertation in a language other than English. To do so, immediately after advancement to candidacy, the candidate must submit to the Dean of the Graduate Division a letter approved by the thesis/dissertation chair, committee, and department chair. All members of the candidate's thesis/dissertation committee must have a reading knowledge of the language presented in the thesis/dissertation. There must be legitimate reasons for substituting English with a foreign language such as subject matter, special primary audience, publication arrangements, academic position in a foreign country, historical or literary value, or principal language(s) used in the documents to be analyzed and interpreted. **Inability to write in English is not a valid reason.** If the thesis or dissertation is approved to be written in a foreign language, the candidate must submit two abstracts. One must be in English. The other must be written in the language of the thesis or dissertation. Moreover, the

thesis/dissertation defense will be conducted in English, except as determined by subject matter. See the UCI Thesis and Dissertation Manual ([http://special.lib.uci.edu/dissertations/uci\\_td.html](http://special.lib.uci.edu/dissertations/uci_td.html)) for information about the preparation of manuscripts.

## Academic Disqualification

After consultation with the student's academic unit, the Dean of the Graduate Division may disqualify a student for academic reasons, including, but not limited to, having a grade point average in graduate and upper-division courses below 3.0 for two or more successive quarters; or failing to pass (or not taking) a required examination or course within the time specified for that graduate program; or not maintaining satisfactory academic progress toward completion of an approved program of study. Beginning with students entering in fall 2010, the Graduate Dean will not permit students to enroll past their programs' maximum time to degree (MTTD). Any exception request must be made in writing directly to the Graduate Dean and will be considered in cases involving extenuating circumstances beyond the student's control. The exception request must include a plan and timeline for completion of the degree, must be signed by the student's program advisor and Associate Dean, and must be submitted at least one quarter in advance of maximum time to degree. Note that leaves of absence of up to three quarters and time allotted for parental leave are not counted toward a student's normative or maximum time to degree.

Unsatisfactory academic progress may be determined on the basis of explicit requirements (as described above), but the professional judgment of the faculty upon review of all graduate work undertaken by the student is paramount and the faculty of a particular academic unit may establish more restrictive criteria for satisfactory academic progress. Unsatisfactory progress will also result when a Ph.D. student is unable to secure a faculty advisor or if the student's advisor/advisee relationship is terminated and the student is unable to secure a new faculty advisor within a specified period of time. Ordinarily, a student whose work does not meet academic standards may be given written notice and a reasonable period of time in which to make up all deficiencies.

Prior to taking final action to disqualify, the Dean of the Graduate Division ordinarily will notify a student who is subject to academic disqualification and will provide reasonable opportunity for the student to correct erroneous or outdated academic records, and to submit other information or comments in writing to be included in the Dean's review.

Upon final written notice of academic disqualification by the Dean of the Graduate Division, disqualification will be noted on the formal academic record of that student.

## Academic Residence

A graduate student is considered to be in residence during an academic quarter if at least four units of academic credit are earned in regular upper-division or graduate courses. Credit for one academic quarter of residence may also be earned by completing at least two units of credit in approved courses in each of two six-week summer sessions, or four units of credit in an eight- or ten-week summer session. In the case of Ph.D. students, these must be consecutive sessions.

## Enrollment Policy

Full-time academic enrollment is expected of graduate students at the University of California. Study for the Ph.D. requires a full-time commitment from the doctoral student. Full-time study is defined as enrollment in at least 12 units of upper-division or graduate academic credit per quarter, including credit for supervised research or teaching. Graduate students may enroll in lower-division courses with the approval of their academic advisors, but such courses are not considered to be part of any graduate program.

Graduate students ordinarily may not receive credit for more than 12 units per quarter in graduate courses, or 16 units in upper-division courses, or a proportionate number in combination. Course loads in excess of 16 units must be approved in advance by the student's Graduate Advisor.

Although in most instances completion of an advanced degree at UCI requires full-time study, the University recognizes the legitimate need for part-time study opportunities and is committed to providing those opportunities wherever possible. Graduate degree programs may be opened to part-time students wherever good educational reasons exist for so doing. In general, part-time status is available in master's and credential programs where part-time study has been judged academically feasible by faculty and approved by the Graduate Council. However, on the recommendation of the academic unit, students admitted to a Ph.D. program *may* be approved by the Dean of the Graduate Division for part-time status on an *ad hoc* basis. Under this policy, part-time enrollment at the graduate level is defined as enrollment for eight units or less. Within the guidelines and limitations noted on the application form available on the Graduate Division website (<http://www.grad.uci.edu/>), graduate students may petition for part-time status for a maximum of three consecutive quarters and, if the petition is approved, shall pay the full Student Services Fee and student activities fees, one-half the Tuition, and if applicable, one-half the Nonresident Supplemental Tuition and one-half the Professional Degree Supplemental Tuition. Part-time enrollment and the corresponding fee reduction are generally not available to students enrolled in self-supporting programs in which they pay a program fee.

## Continuous Registration

A graduate student is expected to register for each regular academic session (fall, winter, and spring quarters) until all requirements for an advanced degree or credential have been completed, including final examinations and the submission of an approved thesis or dissertation. Registration is not official or complete until all required tuition and fees have been paid and the student has enrolled in classes. Students are responsible for ensuring that their course enrollment is correct and that their fees and tuition have been paid by the applicable deadlines.

A student engaged in study or research outside the state of California for an entire quarter ordinarily will be required to register *in absentia*. Unless an official leave of absence has been granted, or a petition to pay the Filing Fee in lieu of registration has been approved by the Dean of the Graduate

Division, a student who does not register by the final deadline for any regular quarter will lose graduate standing (i.e., the individual's status as a graduate student will lapse), and candidacy for any advanced degree will lapse. Prior to resuming graduate study in the University, a former student must successfully apply for readmission. If readmitted, the student must satisfy the academic requirements in effect at the time of readmission and may be required to satisfy certain requirements a second time, including those for formal advancement to candidacy. A readmitted student must register and then be advanced to candidacy at least one quarter before receiving an advanced degree. A degree cannot be conferred earlier than the second quarter following readmission. Students must be registered or on approved Filing Fee status for the academic term in which the degree is conferred.

A graduate student who decides to leave the University after enrolling and paying tuition and fees for a quarter must file an official Withdrawal form with the Dean of the Graduate Division. A graduate student in good academic standing who wishes to withdraw temporarily from graduate study and intends to return within one year may submit an application for a leave of absence. A graduate student who wishes to apply for a leave of absence after enrolling and paying tuition and fees for a quarter must file both a Withdrawal form and an application for a leave of absence. If the leave is approved, the student remains in good standing and need not apply for readmission in order to enroll at the expiration of the leave period. Students who file a withdrawal for any reason, including leave of absence, after enrolling and paying tuition and fees are subject to the Schedule of Refunds policy (<http://www.reg.uci.edu/enrollment/withdrawals/#refunds>).

## In Absentia

*In absentia* status is a form of registration available to academic and professional degree graduate students undertaking necessary course work or research related to their degree programs outside of California. The Fee Policy for Graduate Student *in Absentia* Registration promotes continuous enrollment of graduate and professional degree students by providing an appropriate enrollment incentive. Research leaves for work outside of the state of California have been eliminated. Students registered *in absentia* are assessed 15 percent of the Student Services Fee and Tuition, the full health insurance fees, and the Associated Graduate Students fee. If applicable, students are also assessed nonresident supplemental tuition and/or professional degree supplemental tuition. All students pursuing doctoral or master's degrees in academic disciplines as well as those pursuing professional master's or doctoral degrees are eligible for the fee reduction. Students must be enrolled full-time in regular University of California units to be eligible for the reduced *in absentia* fee. Students in self-supporting graduate programs, exchange programs, or programs paying only a program fee are not covered by this policy and are not eligible for *in absentia* registration.

**The research or course work** must be directly related to the student's degree program as evidenced by UC faculty approval; must be of a nature that makes it necessary to be completed outside of California for at least one full academic term; must involve only indirect supervision appropriate to evaluating the student's academic progress and performance by UC faculty during the *in absentia* period; must involve no significant studying or in-person collaboration with UC faculty during the *in absentia* period. Under no circumstances can students participate in coursework, exams or research at UC Irvine for any part of a term in which the student is on *in-absentia* status. Students should be advanced to candidacy before applying for *in-absentia* status.

Students who will be engaged in necessary degree-related course work or research off campus but within the state of California may be eligible to apply for *in-absentia* status by exception, depending on the location of their research. Students shall not use any University of California resources while on *in-absentia* status.

## Leave of Absence

A graduate student who withdraws from the University with the intention of returning within one year and wishes to avoid a lapse of student status should request a leave of absence. A leave of absence of up to one year's duration may be granted by the Dean of the Graduate Division upon the recommendation of the student's academic unit, subject to the following guidelines:

1. The student must have **completed** satisfactorily **at least one** quarter in residence and be in good academic standing. The leave must be consistent with the student's academic objectives.
2. Leave ordinarily is approved in cases of serious illness or other temporary disability, or temporary interruption of the student's academic program for other appropriate reasons.
3. A student on leave is not eligible for assistance from a University fellowship, research grant, or financial aid program, and may not hold an academic appointment or be employed by the University in any capacity. During a period of leave, a student may not take comprehensive or qualifying examinations or earn academic credit (except by a transfer of credit from another institution approved in advance by the Dean of the Graduate Division). University resources and facilities, including housing, are ordinarily unavailable to students on leave.
4. A student failing to register for the next regular academic session following the expiration of leave will lose graduate standing and will be subject to the following readmission policy.

## Readmission

A student who previously withdrew from the University, or whose student status has lapsed, may request readmission to graduate study by submitting online a new *Application for Graduate Study* with the nonrefundable \$120 fee (\$140 for international students). The Dean of the Graduate Division may grant readmission when recommended by the academic unit. If readmitted, a student's previous academic work will be applied toward the requirements for an advanced degree only with the approval of the graduate advisor and the Dean of the Graduate Division. A readmitted student must satisfy the academic requirements in effect at the time of readmission and may be required to satisfy certain requirements a second time, including those for formal advancement to candidacy. A readmitted student must register and then be advanced or reinstated to candidacy at least one quarter before receiving an advanced degree, which will be conferred no earlier than the second quarter following readmission. In exceptional circumstances, a student who has not

registered by the end of the third week of classes may file a Readmission Petition with the Graduate Division during that academic term upon approval of the student's department chair and the respective school's associate dean, and payment of a \$120 readmission fee.

## Intercampus Exchange Program

A graduate student in good standing who wishes to take advantage of educational opportunities available only at another campus of the University of California may do so through the Intercampus Exchange Program. Ordinarily, an exchange student will have demonstrated a high level of scholarship during at least one quarter of graduate study at the home campus and will have well-defined academic objectives. Approval of the faculty advisor, the host department(s), and the respective Deans of Graduate Studies is required. Direct arrangements between faculty members on the two campuses are encouraged so as to ensure that courses, seminars, or facilities will be available to meet the participating student's needs. Students may take courses on more than one campus of the University in the same academic session.

The exchange student enrolls and pays tuition and fees on the home campus and then enrolls at the host campus, following the procedures of that Registrar's Office. A report of academic work completed will be transferred to the student's academic record on the home campus after the term has ended. Although eligible for all normal student services, the exchange student is a visitor and is not formally admitted to graduate study at the host campus. Application forms for the Intercampus Exchange Program may be downloaded from the Graduate Division website (<https://grad.uci.edu/>) and should be filed with the Office at least four weeks before the beginning of the quarter in order to avoid penalties.

## Transfers of Credit

At least one-half of the course requirement for a master's degree must be completed while in residence as a graduate student at UCI. Credit for up to one-fifth of the minimum number of units required for a master's degree may be allowed for graduate-level work completed at another institution (or courses from University of California Extension that are not regularly offered UC courses). Such courses do not count toward the required number of units in 200-series courses. Up to one-half the units required may be accepted from another graduate division of the University of California, from graduate courses taken with University of California Extension through concurrent enrollment (Concurrent enrollment means that the student took regularly offered UCI courses but registered and paid for them through UC Division of Continuing Education), or from graduate courses taken as an undergraduate at UCI that were not applied to another degree, which may reduce the number of required 200-level units. However, it does not reduce the residence requirement.

A student currently enrolled in a master's degree program or on a leave of absence may receive unit credit (not grade credit) for graduate-level work completed at another institution or through UCI Division of Continuing Education only with the prior approval of the departmental graduate advisor and the Dean of the Graduate Division. No transfer credit will be given for any course in which a grade below B or equivalent is received.

A student who begins graduate study at UCI in the fall quarter will receive appropriate credit for courses taken in preceding UCI summer sessions, provided that the formal date of admission precedes summer session enrollment. Continuing graduate students will receive credit for courses taken in intervening UCI summer sessions.

## Graduate Degrees

### Master's Degrees

The master's degree is conferred at the end of the academic quarter in which all requirements have been satisfied, subject to the final approval of the Graduate Council. The student must be advanced to candidacy for the degree prior to the beginning of the final quarter of enrollment. Therefore, an application for advancement to candidacy, initiated by the student and approved by the academic unit, should be submitted to the Dean of the Graduate Division at least 30 days before the opening of the quarter in which the degree is expected.

The Master of Arts (M.A.) or Master of Science (M.S.) degree normally is attained by one of two routes: Plan I, the thesis option; or Plan II, the comprehensive examination option. Both require a minimum of one year in residence, satisfactory completion of prescribed course work, and an appropriate demonstration of achievement. Plan I includes a minimum of seven courses (28 units), 20 units or more of which must be at the graduate level; a thesis; and a general examination. Plan II requires at least nine courses (36 units), including 24 units or more at the graduate level, and a comprehensive examination covering a broad range of subject matter in the discipline. Only approved 200-series courses completed while in residence at the University satisfy the minimum graduate course requirement. Some programs will have course requirements exceeding the minimums cited above and may have additional or alternative degree requirements. Please refer to the description of the specific program for more information.

Master of Fine Arts (M.F.A.) degrees are awarded by the Claire Trevor School of the Arts (M.F.A. in Dance, Drama, Fine Arts, or Music) and by the Program in Creative Writing (M.F.A. in English) upon successful completion of the equivalent of two years or more of full-time study with an emphasis upon creative expression and professional development. Special thesis or comprehensive examination requirements are established for these programs.

Master of Arts in Teaching (M.A.T.) degrees are awarded upon successful completion of programs designed for the professional development of elementary and secondary school teachers. A minimum of one year in residence is required, usually including summer session course work. A thesis project or other comparable evidence of professional attainment is part of each M.A.T. program.

Master of Business Administration (M.B.A.) degrees are awarded by The Paul Merage School of Business upon successful completion of the equivalent of two years of full-time study in the development of professional managerial skills.

Master of Computer Science (M.C.S.) professional degrees are awarded by the Donald Bren School of Information and Computer Science upon successful completion of 11 courses (44 units) to be completed in four quarters. Coursework includes five core courses, including two capstones, six elective courses, and a one-quarter optional summer internship component. Nearly all courses have a lab component that will allow for a more supervised hands-on learning environment with a stronger emphasis on practical applications and implementation.

Master of Advanced Study (M.A.S.) degrees are awarded by the School of Social Ecology in Criminology, Law and Society upon successful completion of 52 units of course work in the broad areas of criminal justice, including corrections, probation, criminal prosecution, defense, and civil law. The program is fully online with the exception of a required one-week in-residence course during the first fall quarter.

Master of Science in Business Analytics prepares students for a wide range of high-demand opportunities in big data and business analytics across a variety of industries throughout California and beyond.

Master in Embedded and Cyber-Physical Systems (M.E.C.P.S.) is an interdisciplinary program offered by the Henry Samueli School of Engineering and the Donald Bren School of Information and Computer Science. The curriculum focuses on Embedded and Cyber-Physical Systems. This program is designed as a one-year, full-time program. Coursework includes seven foundational courses with lectures and laboratory, and two project courses leading to a final project.

Master of Finance (M.Fin.) is awarded by the Paul Merage School of Business upon successful completion of a 12-month, full-time program consisting of six required courses and seven electives (for a total of 52 units). Students have the opportunity to specialize in areas including corporate finance, investment management, wealth management, or real estate.

Master of Human-Computer Interaction and Design (M.H.C.I.D.) is a mixed format, low-residency one year degree is awarded by the Donald Bren School of Information and Computer Science upon successful completion of eight courses, a capstone project and portfolio, and a summer presentation.

Master of Innovation and Entrepreneurship (MIE) is now available in a one-year or two-year format, is the only program of its kind in the UC System, and provides extensive integrated and immersive academic and practical experience for students.

The Master of Legal and Forensic Psychology (M.L.F.P.) degrees are awarded by the School of Social Ecology upon successful completion of 52 units of course work in a broad area that integrates facets of psychology, forensics and the law, and the intersection of psychology and legal issues. The program is a two-year professional degree program that is fully online with the exception of a one-week, in-residence course prior to the first fall quarter of instruction.

Master of Professional Accountancy (M.P.Ac.) degrees are awarded by The Paul Merage School of Business upon successful completion of 44 units of course work including core courses and electives.

Master of Public Health (M.P.H.) degrees are awarded by the Program in Public Health upon successful completion of 60 units of course work including core courses, electives, and courses in the student's emphasis.

Master of Public Policy (M.P.P.) degrees are awarded by the School of Social Ecology upon successful completion of 72 units of course work including core courses and electives. Students also participate in a policy-relevant internship in an appropriate government, business, or nonprofit setting.

Master of Science (M.S.) in Nursing Science degrees are awarded by the Sue and Bill Gross School of Nursing upon successful completion of 68–71 units of course work, depending on the student's chosen area of specialization, as well as 720 hours of clinical practice in the student's area of emphasis to be eligible for certification.

Master of Urban and Regional Planning (M.U.R.P.) degrees are awarded by the School of Social Ecology upon successful completion of the equivalent of two years of full-time study in contemporary methods of planning and policy analysis.

## Doctor of Nursing Practice

The Doctor of Nursing Practice (DNP) degree is a terminal practice-doctoral degree designed to develop competencies for advanced clinical and leadership roles, equipping graduates with the skills and knowledge to be effective contributors to the translation of science and research into healthcare practice.

The Sue and Bill Gross School of Nursing offers two DNP foci: the post-masters Doctor of Nursing Practice degree and the Doctor of Nursing Practice degree with a Family Nurse Practitioner concentration.

## Doctor of Philosophy Degree

The Doctor of Philosophy (Ph.D.) degree is awarded on the basis of evidence that the recipient possesses knowledge of a broad field of learning and expert mastery of a particular area of concentration within it. The research dissertation is expected to demonstrate critical judgment, intellectual synthesis, creativity, and skill in written communication.

Students are required to advance to candidacy for the doctorate, and to complete all requirements for the doctoral degree, within the normative time specified by the individual graduate program. Students who fail to complete the degree within the normative time limit for their program shall be deemed as not making satisfactory academic progress, and may be ineligible to continue to receive non-instructional University resources (e.g., financial aid, teaching assistantships, student housing). Normative time-to-degree parameters for each doctoral program are indicated in the academic unit sections of this *Catalogue*. Students who fail to complete the degree within the maximum time-to-degree limit for their program shall not be permitted to enroll. For details see the section on Academic Disqualification.

The candidate for the Ph.D. is expected to be in full-time residence for at least six regular academic quarters. Four to six years of full-time academic work beyond the bachelor's degree typically is required to complete the degree. At the end of the first year or so of full-time study, many programs administer a preliminary examination on the student's mastery of fundamental knowledge in the discipline. Upon successfully demonstrating a high level of scholarship on this examination and after further study, the student will continue to a series of qualifying examinations which lead to formal advancement to candidacy for the Ph.D.

Graduate students ordinarily attain candidacy status for the Ph.D. degree when all preparatory work has been completed, when qualifying examinations have been passed, and when they are ready for the dissertation phase. Students are recommended for advancement to candidacy by unanimous vote of the candidacy committee nominated by the academic unit and appointed by the Dean of the Graduate Division on behalf of the Graduate Council. The Report of the Ph.D. Candidacy Committee (Form I) must be signed by the committee at the time the candidacy examination is concluded and submitted to the Dean of the Graduate Division. Following a unanimous favorable vote of the committee, the student will be advanced to candidacy upon payment of the \$90 Candidacy Fee. Candidacy for the Ph.D. will lapse automatically if the student loses graduate standing by academic disqualification or failure to comply with the University policy on continuous registration. A readmitted student who was a candidate for the Ph.D. must again advance to candidacy and thereafter enroll as a candidate for at least one academic quarter before the Ph.D. may be conferred.

Following advancement to candidacy for the Ph.D., a doctoral committee nominated by the academic unit chair and appointed by the Dean of the Graduate Division on behalf of the Graduate Council, supervises the student's program, approves the dissertation, and conducts the final oral examination if required. The chair of the doctoral committee is the member of the faculty responsible for providing primary guidance of the student's dissertation. Ordinarily, the final examination will be given just prior to completion of the dissertation and while the student is in residence during a regular academic session. The final examination, or defense, is open to all members of the academic community. All student committees must conform to policy approved by the Graduate Council in effect at the time of examination. Ph.D. degrees are conferred, subject to the final approval of the Graduate Council, as of the last day of the regular academic quarter in which all requirements have been satisfied.

## Theses and Dissertations

Candidates for the Ph.D., Ed.D., and certain master's degrees must conduct an extensive research project and submit a dissertation or thesis in order to fulfill degree requirements. Research expenses are not supported by the University, and the cost of preparing the dissertation or thesis ordinarily ranges from \$200 to \$1,000, but may be considerably more.

After approval by the doctoral or thesis committee appointed for each candidate by the Dean of the Graduate Division, on behalf of the Graduate Council, doctoral and master's students must file their dissertation or thesis with the UC Irvine Library Special Collections and Archives, via the electronic dissertation or thesis submission process (a paper process is also available). Generally, dissertations and theses are made available for public access unless an embargo has been requested for a specific period of time. The final copy must meet the University's requirements for style, format, and appearance before the degree can be conferred. See the *UCI Thesis and Dissertation Manual* for information about the preparation of manuscripts. All doctoral students are required to submit an Exit Survey and a Survey of Earned Doctorates prior to the awarding of their degree.

Dissertations and theses must be filed by the deadline published on the Graduate Division website (<http://www.grad.uci.edu/academics/filing%20deadlines/>) in order for them to be reviewed and accepted in time for the degree to be conferred in that quarter.

Those students who complete requirements and submit theses/dissertations after the end of the tenth week of classes and prior to the start of the subsequent quarter will earn a degree for the following quarter, but *will not* be required to pay tuition and fees for that quarter. Please note that in order to avoid payment of tuition and fees, manuscripts, all forms, and degree paperwork must be submitted prior to the first day of the quarter in which the degree is to be earned. Students should note that this does not apply if the thesis/dissertation is submitted after the deadline for spring quarter degrees. Students who submit after the spring deadline are required to either enroll in Summer Session or pay the Filing Fee if they have not done so previously.

## The Filing Fee

Under certain circumstances, a student who has advanced to candidacy for a graduate degree may be eligible to pay a Filing Fee equal to half of the Student Services Fee in lieu of registration for any academic term including summer, subject to the approval of the Dean of the Graduate Division. International students who wish to go on Filing Fee status must, in addition, secure approval to do so from UCI's International Center. In general, all

requirements for a degree must have been satisfied prior to the start of the quarter, except for the submission of the final version of the dissertation or thesis, or the completion of a final oral or comprehensive examination. A student on Filing Fee status may not make use of any University resource, hold any academic appointment, receive any fellowship, or receive any student service for which official registration and payment of regular tuition and fees is a requirement. A Filing Fee will not be accepted immediately following readmission nor immediately following a leave of absence. The date for payment of the Filing Fee is the same as that for the payment of other student fees. If all degree requirements are not completed during the academic term in which the Filing Fee is paid, the student must subsequently register and pay all applicable tuition and fees. Students may only utilize the filing fee option for one academic quarter during their graduate studies. Additional quarters are not allowed regardless of whether the student changes academic programs.

## Nonresident Supplemental Tuition

Nonresident doctoral students who have advanced to candidacy are eligible for a 100 percent reduction in the annual Nonresident Supplemental Tuition for a maximum of three consecutive calendar years including time on leave of absence. Reduced Nonresident Supplemental Tuition begins with the first academic term following advancement to candidacy. Any nonresident student who continues to be enrolled, or who re-enrolls following the three-year maximum allowance, will be charged the full Nonresident Supplemental Tuition rate that is in effect at that time of enrollment.

## Conferral of Graduate Degrees

Prior to the beginning of the quarter in which an advanced degree is to be conferred, the student must have advanced to candidacy for that degree and should have received formal notice confirming candidacy from the Dean of the Graduate Division. The student should consult the departmental faculty graduate advisor to determine which degree requirements, if any, have not yet been satisfied.

Students are advised by mail when their diplomas are available, which is approximately six months after the quarter in which the degrees are awarded.

**Graduate Hooding Ceremony.** Students completing a Ph.D. or M.F.A. are eligible to walk in the Graduate Hooding Ceremony. Students are required to meet all filing deadlines (<https://grad.uci.edu/academics/filing-deadlines.php>) and satisfy degree requirements (<https://grad.uci.edu/academics/degree-completion/>) in order to participate in the ceremony. Registration for eligible students opens in February. Inquiries about and details regarding the Graduate Hooding Ceremony may be directed to the Commencement Office (<https://commencement.uci.edu/>).

## Financial Assistance for Graduate Students

Several types of financial assistance are available to graduate students at UCI. These include fellowships, teaching and research assistantships, tuition fellowships for nonresident students, grants-in-aid, and student loans. Financial support in the form of fellowships or assistantships is typically only offered to students admitted to the Ph.D., however, some programs may offer such support to students pursuing the master's degree at their discretion.

All domestic graduate students are encouraged to submit the *Free Application for Federal Student Aid* (FAFSA) each year to access state and federal grants and loans. It is available at the FAFSA website (<https://fafsa.ed.gov/>) or in the Office of Financial Aid and Scholarships after January 1, with a submission deadline of March 2 each year. The Financial Aid section in this *Catalogue* and the Office of Financial Aid and Scholarships website (<http://www.ofas.uci.edu/content/>) contain information about assistance based upon financial need that is administered by the Office of Financial Aid and Scholarships.

Applicants interested in assistantships or fellowships should so indicate on their application when applying for admission. Many graduate programs have a deadline for completed graduate applications of January 15; however, many graduate programs have earlier, or later, deadlines. Students should contact the academic program to which they are applying for accurate deadlines, particularly to receive full consideration for fellowship and assistantship awards. Continuing students interested in an assistantship or fellowship should contact the graduate advisor for their academic program. The awarding of fellowships to incoming students for the following academic year begins in the winter quarter.

UCI subscribes to the agreement of the Council of Graduate Schools of the United States, under which successful applicants for awards of financial support are given until April 15 to accept or decline such awards. An award accepted from one of the member universities may be resigned at any time through April 15. However, an acceptance given or left in force after that date commits the student to not accepting another appointment without first obtaining formal release for that purpose from the awarding institution.

Regents', UCI Chancellor's Fellowships, and other merit-based fellowships are awarded by some schools to a number of promising students entering graduate study at UCI leading to the Doctor of Philosophy or Master of Fine Arts degree. Awards may include a stipend, all required tuition and student fees, and, if applicable, Nonresident Supplemental Tuition. Other fellowships are offered, including tuition awards for outstanding applicants who are not residents of California. In many cases, fellowship stipends may be supplemented by partial assistantship appointments. Fellowship awards are typically made by the student's academic unit.

Entering or continuing graduate students may be awarded research or teaching assistantships for all or part of the academic year. The types of assistantships, number available, and required duties vary according to the activities of the academic unit. A graduate assistant who is not a California resident also may receive a tuition fellowship. While enrolled as a graduate student at UCI, students are limited in their employment with the University to no more than 50 percent time during each academic quarter. Fellowship support as well as research or teaching assistantships all require students to maintain satisfactory academic progress as defined by UC and UCI policy as well as by their academic units.

Through the Graduate Division's diversity programs, a number of diversity fellowships are awarded to entering and continuing domestic graduate students who may have been disadvantaged in higher education. Departments nominate candidates on the basis of their merit and contribution to the

diversity of the department or discipline, as well as demonstrated scholastic achievement, full-time status, and U.S. citizenship or permanent residency. Individuals from diverse cultural, geographic, and socioeconomic backgrounds are especially encouraged to apply to UCI's graduate programs. In conformance with State law, applicants may not be given preferential treatment on the basis of race, ethnicity, gender, religion, or national origin.

## Orientation

### Undergraduate Students

Information about UCI's Orientation Programs (<https://orientation.uci.edu/>), sponsored by Student Life & Leadership (<http://www.studentlife.uci.edu/>), is made available in mid-June to admitted students who plan to enroll in the fall. Note that due to complications surrounding the COVID-19 pandemic, all orientation programs for summer 2020 will be offered remotely through various tools.

### Summer Programs

**Student Parent Orientation Program (SPOP).** All freshmen (international and domestic) are required to participate in their orientation program. SPOP provides the opportunity for freshmen to engage with a comprehensive orientation program remotely. Each program includes 5-modules in Canvas that will be made available to students as the summer progresses, starting on July 15. It also includes academic advising and registration for fall classes for domestic students. International students will be contacted directly by their schools for information on how and when they will receive academic advising, and register for fall classes. In addition, information on housing, financial aid, campus resources, student life and more is included. Students will also have lots of opportunities to meet other students, have fun and build their social and support networks. SPOP is designed for all domestic and international freshmen.

**Transfer Student Parent Orientation Program (TSPOP)** is an optional orientation for transfer students looking for a comprehensive introduction to life at UCI. Each program includes 5-modules in Canvas that will be made available to students as the summer progresses, starting on July 15. It offers transfer students a thorough overview of what to expect during their transition to a research university as well as information on housing, financial aid, undergraduate research, campus resources, student life and more. TSPOP also gives new transfer students a leg up in building networks with peers, finding a home on campus and building friendships that can last throughout their time at UCI and beyond.

For more information about all of the orientation programs, visit the Orientation Programs website (<https://orientation.uci.edu/>), telephone 949-824-5182, or email [orientation@uci.edu](mailto:orientation@uci.edu).

### Welcome Week

**Welcome Week** is held each fall a few days prior to the beginning of classes. A variety of academic and social activities for new and returning students are held during this time. For more information, visit the Welcome Week website (<https://www.welcomeweek.uci.edu/>).

### Graduate Students

Incoming graduate students are strongly encouraged to attend the Campuswide New Graduate Student Orientation, held during the third week of September each fall. This orientation covers all aspects of navigating graduate education at UC Irvine, including graduate student services. It augments school/department-based orientations, and students should attend both. Information about the Campuswide New Graduate Student Orientation is emailed to incoming graduate students the summer prior to the event. Inquiries may be directed to [gradorientation@uci.edu](mailto:gradorientation@uci.edu), and details are available at the Campuswide New Graduate Student Orientation website (<https://www.grad.uci.edu/services/campus-orientation/>).

There is an additional orientation event specifically for international graduate students, which focuses specifically on topics that impact international graduate students and building community with fellow students and Peer Mentors. Details are available here (<https://www.grad.uci.edu/services/graduate-interconnect-program.php>). International graduate students should also attend Campuswide Graduate Welcome and Orientation.

# Academic Regulations and Procedures

Except where noted, all information applies to both undergraduate and graduate students. Additional information concerning academic regulations applying only to graduate students is included in the Graduate Division section.

## Declaration of Major

All students are required to declare a major by the time they reach junior status (90 units, excluding college work completed prior to high school graduation) or they will become subject to disqualification from further registration in the University.

## Undergraduate Scholarship Requirements

Requirements for a bachelor's degree include the accumulation of credit for a minimum of 180 quarter units with an average of at least C (grade point average of at least 2.0).

## Class Level

Undergraduate students are classified as freshman, sophomore, junior, or senior students, based on the total number of units completed, as follows:

Class	Units Completed
Freshman	0 - 44.9
Sophomore	45.0 - 89.9
Junior	90.0 - 134.9
Senior	135+

## Course Load Limits

An undergraduate may enroll in as few as 12 units or as many as 20 units. To enroll for more than 20 units or fewer than 12 units, students must obtain the authorization of their dean or, for undecided/undeclared students, the Dean of the Division of Undergraduate Education. Information about the Reduced-Fee Part-Time Study Program is available in the Expenses, Tuition, and Fees section of the *Catalogue*.

## Academic Standing

To remain in good academic standing a student must maintain a grade point average of at least 2.0 and make progress toward the degree at a satisfactory rate.

An undergraduate student normally is subject to academic probation if at the end of any quarter the grade point average for that quarter, or the cumulative grade point average, is less than 2.0.

A student whose grade point average falls below a 1.5 for any quarter, or who after two consecutive quarters on probation has not achieved a cumulative grade point average of 2.0 or a satisfactory rate of progress, is subject to disqualification.

## Normal Progress Requirement

Regular undergraduate students will become subject to probation or to disqualification from further registration in the University if they fail to make normal progress toward the baccalaureate degree, if they fail to declare a major by the time they reach junior status (90 units, excluding college work completed prior to high school graduation), or after declaring a major, if they fail to follow the program of study required by the academic unit of their major. Students who have selected undeclared status within a School may be subject to probation or to disqualification if they fail to follow a program of study leading to completion of lower-division School requirements.

A. Normal progress for all regular undergraduate students is defined in the following table, in terms of quarter units completed at the end of quarters enrolled.

Quarter	Normal Progress	Subject to Probation	Subject to Disqualification
1	12-15	8-11	7
2	26-30	18-25	17
3	41-45	27-40	26
4	56-60	41-55	40
5	71-75	56-70	55
6	86-90	72-85	71
7	101-105	88-100	87
8	116-120	105-115	104
9	132-135	124-131	123
10	148-150	141-147	140

11	164-165	159-163	158
12	180	-----	-----

**B. Status Determination:**

1. Undeclared students who have completed the number of units specified in the given quarter of their enrollment, as shown in the table above, and are following a course of study prescribed by their School are making "Normal Progress."

2. Students who have declared a major must follow the program of study required for their major, as well as complete the units specified in the given quarter of their enrollment, as shown in the table above, in order to make "Normal Progress." Students must declare a major by the time they reach junior status (90 units, excluding college work completed prior to high school graduation).

3. Students who fail to make 'Normal Progress' as defined in (1) or (2) above are subject to being placed on probation by the faculty of their academic unit or its designated agent, or for first-year undecided/undeclared students, by the Faculty Board for Undecided/Undeclared Students or its designated agent.

C. Students who have completed two consecutive quarters on academic probation without having achieved at the end of that period at least the normal rate of progress specified under (A) and (B) above are subject to disqualification.

D. For purposes of calculating "Normal Progress," "Subject to Probation," and "Subject to Disqualification," students admitted to the University with advanced standing will be classified with respect to quarter of enrollment at entrance in accordance with the following table:

Quarter at Entrance	Advanced Standing Quarter Units at Entrance
1	0-14
2	15-29
3	30-44
4	45-59
5	60-74
6	75-89
7	90-104
8	105-119
9	120-134
10	135-149

E. Units earned under the following two circumstances are not to be counted toward determination of the quarter at entrance under (D) above: (1) Advanced Placement Examination; (2) concurrent enrollment in college courses while in high school.

F. UCI students will have the units and grade points of courses taken through Concurrent Enrollment transferred to their record when they have been admitted or readmitted to regular student status. Units taken through Concurrent Enrollment will not be counted toward determination of Advanced Standing Quarter Units at Entrance if they are taken under the circumstances cited in sub-section E.

G. The quarter of enrollment at entrance of students (including baccalaureate degree candidates who already hold a baccalaureate degree) seeking admission to the University with 150 or more advanced standing units will be determined by the faculty offering the curriculum in which such students seek to enroll. This determination will be made consistent with the program required for such students to obtain the desired degree and with University residence requirements.

H. For purposes of this regulation students will be understood to have declared a major when they have been formally accepted by the faculty of a degree-granting program or its designated agent to pursue a defined course of study leading to a baccalaureate degree.

I. All undergraduate students are expected to graduate when they have completed the baccalaureate requirements of their declared major or majors.

*The Normal Progress requirement described above is not to be confused with the Normal Academic Progress requirement for Financial Aid. The former has to do with academic standing, the latter with receipt of financial aid.*

Probation is not a necessary step before disqualification. If a student becomes subject to disqualification, the complete record of grades and other accomplishments will be carefully reviewed by the responsible faculty authorities of the student's School or, for undecided/undeclared students, by a faculty authority designated by the Faculty Board for Undecided/Undeclared Students. If the record indicates little probability that the student will be able to meet the academic standards of the University of California, the student will be disqualified from further enrollment. Faculties of undergraduate degree-granting units and the Faculty Board for Undecided/Undeclared Students are obliged by Academic Senate regulations to maintain a procedure under which a student may contest disqualification actions.

In order to transfer from one campus to another in the University of California or from one UCI School to another, a student who has been disqualified or who is on academic probation must obtain the approval of the appropriate faculty, or its designated agent, into whose jurisdiction the student seeks to transfer.

### Credit Hour Unit Limit (Undergraduate)

A maximum of 216 units is permitted for all students in non-Engineering majors after their 12th quarter of study at UCI. For students in Engineering majors, the maximum number may not exceed 236 units after their 12th quarter of study at UCI. Students with Advanced Placement (AP) or International Baccalaureate (IB) credit may exceed the unit maximum by the amount of that credit.

After completing the maximum number of units, students may not normally continue their enrollment. Students wishing to exceed their unit or quarter maximums, including students pursuing multiple majors, may petition the associate deans of the impacted units (or their delegates) to continue work required to complete their degree.

Full-time transfer students admitted at the junior level are allowed no more than the equivalent of nine quarters (10 quarters for Engineering majors), regardless of units.

Individual Schools may impose additional requirements.

The maximum number of units or quarters does not include units completed at another institution prior to matriculation. After matriculation, work completed over the summer at any institution counts toward the specified unit limit but not the specified quarter count.

This regulation is effective for students who matriculate fall 2011.

### Graduate Scholarship Requirements

For a graduate student, only the grades A+, A, A-, B+, B, and S represent satisfactory scholarship and are accepted toward the graduate degree. Students are expected to maintain satisfactory academic progress at all times. Information concerning graduate student course load requirements and satisfactory academic progress is given in the Graduate Division section.

### Grading System

Grade	Description
A <sup>1</sup>	Excellent (4.0 grade points per unit)
B <sup>1</sup>	Good (3.0 grade points per unit)
C <sup>1</sup>	Fair (2.0 grade points per unit)
D <sup>1</sup>	Lowest passing grade (1.0 grade point per unit)
F	Not passing (no grade points)
I	Incomplete
P	Pass (equal to grade C or better)
NP	Not Pass (equal to grade C- or below)
S	Satisfactory (equal to grade B or better; graduate students only in courses designated by the Graduate Council)
U	Unsatisfactory (graduate students only in courses so designated by the Graduate Council)
IP	In Progress (restricted to certain sequential courses, so designated by the Subcommittee on Courses or Graduate Council, for which the final quarter grade of a multiquarter course is assigned to the previous quarter(s) of the sequence)
NR	No Report (given when an instructor does not submit final grades for a class or individual grades for students whose names appear on the official class roster; NR becomes an "F" (Fail), "NP" (Not Pass), or "U" (Unsatisfactory), whichever is appropriate, after one quarter of subsequent enrollment or at the end of the quarter immediately preceding award of the degree, whichever comes first. The instructor may replace an NR with a grade within one quarter of subsequent enrollment or may authorize the student to drop the class, which would result in the NR becoming a W)
UR	Unauthorized Repeat. A UR notation is recorded for the grade when a student already has a passing grade for a nonrepeatable course and has taken it again.

W	Withdrawal. A W grade is recorded on a student's permanent record for each course a student drops after the end of the sixth week of instruction in a quarter. Courses in which a W has been entered on a student's record carry no grade points, are not calculated in the UC GPA, and will not be considered as courses attempted in assessing the student's satisfaction of the normal progress requirement.
---	---

<sup>1</sup> Plus and minus suffixes may be attached to the grades A, B, C, and D.

The academic record may not be altered except in those cases where a documented procedural or clerical error has occurred.

## Grade Points and Grade Point Average

Grade points are assigned on a four point basis:

Grade	Grade Points
A	4 points per unit
B	3 points per unit
C	2 points per unit
D	1 point per unit
F and I	0 points per unit

Plus or minus suffixes modify the above by plus or minus 0.3 grade point per unit, with the exception of the A+ grade which is assigned 4 points per unit.

Requirements for a bachelor's degree include the accumulation of baccalaureate credit for a minimum of 180 quarter units with an average of at least C (grade point average of at least 2.0). A course at UCI normally offers four quarter units of credit, and, in the following text, the term "course" may be understood to carry four units. The grade point average is the sum of all accumulated grade points (grade points earned in a course taken for a letter grade times the unit value of the course) divided by the sum of all units attempted. P, NP, S, U, NR, IP, and I grades, as well as workload credit, are excluded in computing grade point average.

Baccalaureate credit counts toward degree requirements and is used to compute the grade point average. Workload credit is used to determine full-time status for financial aid, housing, student loans, and other purposes. For most courses at UCI, baccalaureate credit and workload credit are identical. Courses differing in this credit or "workload credit only" courses are identified in the course description.

It should be noted that final grades as reported by instructors are normally permanent and final. An instructor may not change a final grade except to correct a clerical or procedural error. Clerical or procedural errors should be corrected within one regular academic quarter after the grade is assigned. No grade may be revised by reexamination or, with the exception of I and IP grades, by completing additional work. If a student is dissatisfied with a grade, the student should review their work with the instructor and receive an explanation of the grade assigned. A grade may be appealed on any reasonable grounds to the instructor, the chair of the department, and the dean of the School. If the matter is not resolved, the student may go for counsel to the Office of the University Ombudsman.

Under circumstances explained in *The Manual of the Irvine Division of the Academic Senate* (Appendix II: Student Academic Grievance Procedures Relating to Nondiscrimination), a grade may be changed if the Academic Grievance Panel has determined that the grade was assigned on the basis of discrimination.

## Incomplete Grades

The grade Incomplete (I) is assigned when a student's work is of passing quality but is incomplete for good cause. The I grade may be replaced by a permanent grade, provided the student completes the course work in a way authorized by the instructor and within the time limits expressed. During the time allowed for replacing an I grade, the I grade will not be used in computation of a student's grade point average.

Beginning fall 2010, students assigned an I grade must complete the course work within the period set by the instructor, or within 12 months following the quarter in which the I grade was originally awarded, or prior to the end of the quarter immediately preceding award of the degree, whichever comes first. The instructor is not obligated to allow the maximum time period. The student must consult with the instructor to determine how the Incomplete may be made up. It is strongly recommended that the student and the instructor prepare a written agreement specifying how the Incomplete can be made up and the deadline for doing so. Once the work is completed within the time agreed upon by the instructor, the student should ask the instructor to submit an Academic Record Change Request to the advising office of the School in which the course was offered. The student should not re-enroll in the course to make up the Incomplete. If the incomplete course work is not completed in the manner authorized by the instructor and within the time limits stated above, the I grade shall automatically be replaced with the permanent grade of F (Fail), NP (Not Pass), or U (Unsatisfactory), as appropriate in accordance to the grading option selected when the student enrolled in the course, and will be used in computation of the student's grade point average.

Students who have been assigned an I grade prior to fall 2010 have a maximum of 12 months following the quarter in which the grade Incomplete was originally assigned to complete the course work. However, in exceptional individual cases involving the student's prolonged inability to pursue a course of study, extensions of up to two additional years may be granted by the instructor with the approval of the dean of the unit offering the course; students

must petition for such an extension within 12 months following award of the I grade. The I grade assigned prior to fall 2010 will remain permanently on the student's record if the required course work is not completed in the manner authorized by the instructor and within the time limits stated above.

## Pass/Not Pass

The Pass/Not Pass option is available to encourage students to enroll in courses outside their major field. Courses graded Pass/Not Pass are not included in computation of the grade point average which appears on a student's permanent record. However, if a student receives a Pass in a class, course and unit credit for the class is received, except as provided below. If a Not Pass is received, the student receives no credit for the class.

Some courses are designated by academic units as Pass/Not Pass Only. Students do not have the option of taking these courses for a letter grade.

### The use of Pass/Not Pass is governed by all of the following provisions:

1. A student in good standing may take up to an average of four units per quarter on a Pass/Not Pass basis.
2. In addition, students may count a total of 12 units of courses designated Pass/Not Pass Only toward their graduation requirements.
3. A student who earns a grade of C (2.0) or better will have a Pass/Not Pass grade recorded as Pass. If the student earns a grade of C- or below, the grade will be recorded as a Not Pass, and no unit credit will be received for the course. In both cases, the student's grade will not be computed into the grade point average.
4. Courses taken under the Pass/Not Pass option may count toward the unit requirement for the bachelor's degree and toward the general education requirement. With the exception of courses designated Pass/Not Pass Only, courses taken Pass/Not Pass may not be used to satisfy specific course requirements of the student's School and major, unless authorized by the appropriate dean. No more than two courses applied to a minor may be taken Pass/Not Pass.

Graduate students may take one course (up to four units) per quarter on a Pass/Not Pass basis. However, such courses are not considered part of the student's graduate program, may not be applied to the requirements for an advanced degree, and do not count toward the minimum number of units for which a graduate student must enroll.

5. Changes to or from the Pass/Not Pass option can be made during the enrollment period. No changes can be made after the first two weeks of classes without the approval of the dean of the student's School. No changes in the Pass/Not Pass option can be made after the last day of instruction of the quarter.
6. A student on academic probation may not enroll in a course with the Pass/Not Pass option unless the course is offered on that basis only.

## Satisfactory/Unsatisfactory Grades (Graduate Students Only)

Satisfactory/Unsatisfactory grading, unlike Pass/Not Pass, is not a student option. With the consent of the academic units involved, and upon approval of the Graduate Council, individual study and research or other individual graduate work undertaken by a graduate student may be evaluated by means of the grades S or U. Also, with the approval of the Graduate Council, certain graduate courses are graded S/U Only. Additionally, the grade S or U may be assigned provisionally in each but the last quarter of a graduate course extending over more than one quarter. Upon completion of the last quarter, letter grades (A to F) replace such provisional grades. When a grade of S or U has been assigned on a provisional basis and the student does not complete all quarters of the course sequence, the instructor may assign a final letter grade or the grade of I to replace the S or U, or let the grade of S or U stand as a final grade. The grade S is defined as equivalent to a grade of B (3.0) or better. No credit will be allowed for work graded Unsatisfactory.

NOTE: When adding a course via WebReg, there is no option for S/U. In order to select S/U, students must first select the grade option and then, once the course has started, inform the instructor of their preference for the S/U option, not a letter grade. (The Pass/Not Pass option does not correlate to the S/U option and should not be selected.)

## Grades In Progress

IP is a transcript notation, restricted to sequential courses which extend over two or more quarters, indicating that the final grade for the individual quarters will not be assigned until the last quarter of the sequence is completed. The grade for the final quarter is then assigned for all of the previous quarters of the sequence. No credit is given until the student has completed the entire sequence. IP notations may be given only for courses designated by the Academic Senate Subcommittee on Courses or Graduate Council for use of this notation. IP notations are not included in computations of the student's grade point average and do not contribute to the number of quarter units completed.

## Grades Not Reported

A No Report (NR) is assigned when the student's name was on the official class roster but the instructor did not submit a final grade. A student who receives an NR must immediately contact the instructor and arrange for the removal or replacement of the NR. An NR becomes an "F" (Fail), "NP" (Not Pass), or "U" (Unsatisfactory), whichever is appropriate, after one quarter of subsequent enrollment or at the end of the quarter immediately preceding award of the degree, whichever comes first. NR transcript notations are not included in computations of the grade point average and do not contribute to the number of quarter units completed.

## Repetition of Courses

**Undergraduate.** Repetition of courses by undergraduate students not authorized by the Subcommittee on Courses to be taken more than once for credit is subject to the following provisions. Undergraduates may repeat courses only when grades of C-, D+, D, D-, F, or NP were received. (A

C- earned before fall quarter, 1984, is not repeatable.) Unit credit for courses so repeated will be given only once, but the grade assigned at each enrollment shall be permanently recorded. In computing the grade point average of an undergraduate with repeated courses in which a C-, D+, D, D-, F, or NP (if repeated for a letter grade) was received, only the most recently received grades and grade points shall be used for the first 16 units repeated. In case of further repetitions, the grade point average shall be based on all additional grades assigned. Repetition of a course more than once requires approval in all instances of the School (or equivalent) in which the student is enrolled.

All courses which were originally taken for a letter grade must be repeated for a letter grade. Courses originally taken on a Pass/Not Pass basis may be repeated for a Pass/Not Pass, or for a letter grade if the course is so offered.

Information regarding the repetition of language other than English courses is available in the School of Humanities section.

**Graduate.** A graduate student may repeat a course only once in which a grade below B or a grade of U was received. Only the most recently earned grade shall be used in computing the student's grade point average for the first eight units of repeated work; thereafter, both the earlier and the later grades will be used.

**Duplicate Credit Prohibited.** Other than the exceptions related to the repeat of deficient grades as noted above, and the exceptions related to Advanced Placement and International Baccalaureate Credit, undergraduate and graduate students may not receive unit credit or earn grade points for college courses in which the content duplicates material of a previously completed course or examination for which the student has been granted college credit.

If a student repeats a course for which a passing grade has already been received and the course is not approved as repeatable for credit, the student will receive a UR and no credit will be given.

## Student Copies of Quarterly Grades

After each quarter, a complimentary copy of the student's permanent record is available from the University Registrar's Office. On the copy, the student will find grades for all the quarters taken at UCI, a computation of grade point average at the University of California, and a list of the University requirements completed (UC Entry Level Writing, American History and Institutions).

## Satisfaction of the Writing Requirement

Students enrolled at UCI may take only UCI courses in satisfaction of the lower-division and upper-division writing requirements. Continuing UCI students may not take summer courses at another institution to satisfy lower-division or upper-division writing requirements. The two courses taken to fulfill the lower-division writing requirement must be completed with a grade of C or better (or a Pass or Credit grade equivalent to C).

1. Students who fail to attain a letter grade of C or better in WRITING 37 must repeat the course or enroll in the equivalent. It is recommended that these students enroll in WRITING 39A - WRITING 39B - WRITING 39C to assure completion of this requirement. Students who fail to attain a grade of C or better in WRITING 39C must repeat the course.
2. Students who fail to attain a grade of C or better in one or both courses of the WRITING 39B - WRITING 39C sequence must repeat the course or courses in question.
3. Students who fail to attain a grade of C or better in at least two quarters of the writing component of the Humanities Core Course after satisfying the UC Entry Level Writing requirement by attaining a grade of C or better in HUMAN 1AES, should substitute WRITING 39C if they need one quarter of additional work to complete the requirement, or WRITING 39B - WRITING 39C if they need two quarters to complete the requirement. Students who fail to attain a grade of C or better in HUMAN 1AES, enroll in HUMAN 1BES and attain a grade of C or better, but fail to attain a grade of C or better in the writing component of HUMAN 1C, should substitute WRITING 39C to complete the requirement.
4. Students who fail to attain a grade of C or better in either HUMAN 1AES or HUMAN 1BES, should substitute WRITING 39A - WRITING 39B - WRITING 39C to complete the requirement.
5. Students who fail to attain a grade of C (or Pass) or better in each quarter of a First-Year Integrated Program (FIP) sequence should see their academic counselor.

The course taken to fulfill the upper-division writing requirement must be completed with a grade of C or better (or a Pass or Credit grade equivalent to C). See the UCI Requirements section for further information. Majors in the School of Biological Sciences, Physics majors, and Pharmaceutical Sciences majors who fail to attain a grade of C or better in each of the courses taken to satisfy upper-division writing should see their academic counselor.

Students who have not completed the lower-division writing requirement before the beginning of their seventh quarter at UCI will be subject to probation. Students transferring to UCI normally should have satisfied the lower-division writing requirement before entering UCI; if, however, they have not, they must complete it within their first three quarters of enrollment or they will be subject to probation. Academic English/English as a Second Language students must complete the lower-division writing requirement before the beginning of the seventh quarter following the completion of their AE/ESL courses or they will be subject to probation.

## Credit by Examination

An enrolled student may obtain credit for course material previously mastered by taking a special examination administered by a faculty member who normally teaches that course. Detailed procedures for obtaining credit by examination may be obtained from the advising office of the School which

offers the course. Approval of any petition for credit by examination must be obtained from the dean or designee of that School *before* the examination can be administered. After the dean has signed the petition, the student must have it validated by paying a \$5 Credit by Examination service charge at the Cashier's Office.

The instructor giving the examination retains the prerogative: (1) to decide whether the course can be taken by examination, (2) to determine the form such an examination may take, and (3) to stipulate whether the grade will be reported as Pass/Not Pass or as a letter grade (e.g., A, B, C, etc.).

A student may take the examination for a particular course only one time. After receiving the grade, the student may accept it or reject it. If the student is not satisfied with the grade received on the examination, the student may choose not to receive credit or a grade. If the student does choose to accept the results of the examination, grades and grade points (if applicable) will be entered on the record in the same manner as those for regular courses of instruction.

Because of the nature of graduate degree requirements, the credit by examination option is not normally used by graduate students. Graduate level courses cannot be completed through the credit by examination option.

## Final Examinations

Final examinations, or their equivalent, are obligatory in all undergraduate courses except laboratory and studio courses, as individually determined by the Subcommittee on Courses. Normally each such examination shall be conducted in writing and must be completed by all participants by the time scheduled by the University Registrar for the quarter in question. These examinations may not exceed three hours' duration. Special arrangements may be made for disabled students.

Examinations normally are not required in laboratory and studio courses. At its option, the department concerned may require a final examination subject to prior announcement in the *Schedule of Classes* for the term.

Final grades from professors are due in the University Registrar's Office within 72 hours after the final examination.

## Independent Study: Undergraduates Only

A unique class option is available primarily to upper-division students at UCI. The independent-study option allows the student to plan with the instructor a course having a clear relationship to the student's academic program. The plan for the course will include a reading list, a group of assignments, examinations, papers, or similar evidence of intellectual achievement on which academic credit will be based. A description of the course and of its requirements must be approved by the instructor responsible for it and by the department chair or dean.

## Credits From Other Institutions or UCI Division of Continuing Education: Undergraduate Students

UCI undergraduate students who plan to enroll in courses at another institution or UCI Division of Continuing Education in either a summer or regular session, and to use such courses to satisfy any UCI requirements, should first consult with and secure prior approval from the academic dean or chair of their major who will determine if the credits are applicable to major and general education requirements.

UCI undergraduate students *must* submit an official transcript of all course work earned at another institution or college to the Office of Admissions and Relations with Schools (<http://www.admissions.uci.edu/>). If such courses are determined by the Office of Admissions and Relations with Schools to be transferable, do not duplicate other credit granted, and do not exceed limitations of credit, then the units earned may be applied toward the total required for graduation.

As of winter 2009, matriculated UCI undergraduate students can elect to have the full course record included on their academic transcript for all courses taken through UCI Division of Continuing Education. The full course record contains course title, academic department, course number, grade, and grade points earned. This option also pertains to Concurrent Enrollment courses taken by students who are applying for readmission. The full course record can be transferred to their academic record when they have been admitted or readmitted to regular student status.

## Credits From Other Institutions or UCI Division of Continuing Education: Graduate Students

In accordance with UC Academic Senate policy, graduate students may be granted unit credit (not grade credit) toward a master's degree for a limited number of acceptable graduate-level courses completed at another institution or through UCI Division of Continuing Education before enrollment in graduate study at UCI. To receive such credit, the student must submit a formal petition, including an original transcript, after enrollment in graduate study. Approval of the student's graduate advisor and the Dean of the Graduate Division is required. The petition may be downloaded at the Graduate Division website (<https://www.grad.uci.edu/forms/>).

While enrolled at UCI, a graduate student may receive unit credit for graduate-level courses completed at another institution or through UCI Division of Continuing Education only with the prior approval of the student's graduate advisor and the Dean of the Graduate Division.

See the Graduate Division section for further information about graduate transfer credit and the University's Intercampus Exchange Program.

# Intercollegiate Athletics

## UCI Intercollegiate Athletics Program

UCI's Intercollegiate Athletics Program features 18 sports, with nine men's teams and nine women's teams. Men's sports include baseball, basketball, cross country, golf, soccer, tennis, outdoor track and field, volleyball, and water polo. UCI's men's teams compete in the National Collegiate Athletic Association (NCAA) Division I, and the University is a member of the Big West Conference. UCI also competes in the Golden Coast Conference in men's water polo. The UCI women's teams also are members of NCAA Division I and the Big West Conference, competing in basketball, cross country, golf, soccer, tennis, outdoor track and field, volleyball, and water polo. Women's indoor track and field competes in the Mountain Pacific Sports Federation.

UCI, since opening in 1965, has captured 28 national team championships in nine different sports, including men's volleyball in 2012 and 2013, with 64 individuals winning national titles. The Anteaters have claimed 91 conference championships and have amassed 556 All-Americans across 20 different sports, including six in 2019-20. Men's basketball captured its second consecutive Big West title, while three other teams ended the year nationally ranked in 2020.

Since 1981, UCI has garnered 109 conference Players of the Year, 95 Coaches of the Year as well as over 1,700 scholar-athletes.

The Anteaters' success has also been evident on the international level with at least four UCI athletes selected to various national teams for each of the last 11 Summer Olympic Games. Women's water polo head coach Dan Klatt, an Olympian himself, is an assistant coach for the U.S. women's water polo team helping the squad to back-to-back gold medals.

The mission of UCI Intercollegiate Athletics is to facilitate and enrich the education and personal growth of its students through their participation in competitive NCAA Division I athletics. Intercollegiate Athletics is committed to the welfare of student-athletes and staff, and advocates an environment that promotes excellence in athletic and academic performance, sportsmanship, diversity, and gender equity. Intercollegiate Athletics also supports the University of California's mission of public service and serves to generate a unifying spirit among students, faculty, staff, and alumni that transcends communities, cultures, and generations.

The Intercollegiate Athletic offices are located in the Intercollegiate Athletics Building (IAB); UC Irvine Sports website (<https://ucirvinesports.com/>); telephone 949-824-6931.

## Athletic Facilities

On-campus facilities include the Bren Events Center, which seats 5,000 for intercollegiate basketball and volleyball. The Crawford Hall complex also includes the Santora Elite Training Center, Al Irwin Academic Center, and sports medicine. Crawford Court gymnasium has 760 chair-back seats for volleyball. Outdoor facilities include Anteater Stadium, a 2,500-seat facility for soccer and track; the 500-seat Anteater Tennis Stadium; Cicerone Field at Anteater Ballpark, home to the baseball program; and a five-acre multipurpose field complex.

UCI's Anteater Aquatics Complex houses the intercollegiate water polo teams. This 64-meter aquatics facility is designed with a movable bulkhead and is large enough to accommodate multiple activities simultaneously.

## Life on Campus

Whether it is meeting new friends in the residence halls, learning about campus life through student-initiated programs, or securing an internship, the Division of Student Affairs (<https://studentaffairs.uci.edu>) is dedicated to creating a rich experience for the Anteater community. Comprehensive programs and services attract the best, brightest and most diverse students, promote learning and leadership development, foster engagement, cultivate community service and cultural awareness, support physical and mental health and wellness, and enhance the quality of student life.

Auxiliary Services, (<https://studentaffairs.uci.edu/auxiliary-services/>) Student Life & Leadership (<http://studentlife.uci.edu/>), and Wellness, Health & Counseling Services (<https://whcs.uci.edu/>) – all within the Division of Student Affairs – serve to ensure that UCI's learning and living environment positively contributes to students attaining their academic goals and being prepared for the next stage in their lives, be it attending graduate school or pursuing a fulfilling career.

## Student Life & Leadership

The departments within Student Life & Leadership offer diverse programs and services which complement and enrich the educational and beyond-the-classroom life of UCI students. This is achieved through a comprehensive range of cultural, social, wellness and intellectual opportunities that promote student learning and development. For additional information, visit the Student Life & Leadership website (<http://studentlife.uci.edu/>) or contact [sll@uci.edu](mailto:sll@uci.edu), 949-824-5181.

## Office of the Dean of Students

To assist students in becoming more effective leaders, the Office of the Dean of Students (<https://dos.uci.edu/>) offers leadership programs while engaging student issues and concerns. Additionally, the Dean of Students is responsible for upholding the student conduct process and hears student conduct appeals.

The **Randy Lewis All-University Leadership Conference** is the cornerstone of UCI's leadership offerings bringing together students, faculty, staff and administrators. This annual weekend conference involves more than 220 emerging and established student leaders representing the full diversity of campus interest groups.

The **UC Student Regent Recruitment Luncheon** is held during winter quarter prior to the application deadline. The current UC Student Regent informs interested candidates of the issues of the day and is available for questions and answers. The application for the UC Student Regent position is available at UC Board of Regents website (<http://regents.universityofcalifornia.edu/>).

The **University Affairs for Credit Course** (UNI AFF 1A-UNI AFF 1B-UNI AFF 1C) offers students an opportunity to work on campus projects with a UCI department to enrich their academic growth and development. Each student spends a minimum of 30 hours per quarter working on a proposed project under the supervision of a designated faculty or staff member. Students are required to write a three to five page paper at the end of the course addressing the following: (1) description of the experience or project; (2) the impact of the experience or project upon the campus; and (3) the effectiveness (personally and externally) of the experience or project. Students may enroll in University Affairs for Credit a maximum of three times (or 3.9 units), and the course is graded Pass/Not Pass only.

## Campus Organizations & Volunteer Programs

The office of Campus Organizations (<http://www.campusorgs.uci.edu/>) & **Volunteer Programs** (<http://www.studentlife.uci.edu/COVP>) provides opportunities for students to pursue personal and professional goals through involvement with registered campus organizations and community service activities. We promote leadership development by providing resources, innovative programming and advising for Campus Organizations and the campus community. We aspire to provide transformative leadership experiences that foster a community of engagement and campus spirit.

COVP works with over 600 registered campus organizations with a combined membership exceeding 18,000 students. The organizations address a wide range of interests including academic, environmental, faculty/staff, international, multicultural, political, recreational, religious and spiritual, community service, social, performance/entertainment, wellness and sports. In addition, students can create new organizations to fulfill a campus need. Students can learn about organization fundamentals by attending workshops and events or visiting the office of Campus Organizations & Volunteer Programs at the **UCI Student Center, G308**. COVP also sponsors campuswide traditional events like the Anteater Involvement Fair, Anteater Leadership Summit and the Anteater Awards.

In addition to providing campus organization support, COVP also serves as the hub for student activities related to community service and volunteer projects. Community service initiatives include Alternative Break, where students engage in a week of service during their winter and/or spring break, the Community Service & Leadership Fair and the MLK Jr. Day of Service. Through mutually beneficial campus and community partnerships, students explore social issues by engaging in direct service, reflection and critical dialogue.

Involvement opportunities also exist through internship positions with COVP. Students serve as peer advisors and/or Alternative Break site leaders through the Student Life & Leadership internship program.

For additional information visit the Campus Organizations & Volunteer Programs websites:  
 Campus Organizations (<http://www.campusorgs.uci.edu/>) » (<http://www.campusorgs.uci.edu>)  
 Volunteer Programs (<http://volunteer.uci.edu/>) » (<http://volunteer.uci.edu>)

## Center for Black Cultures, Resources & Research

The Center for Black Cultures, Resources & Research (CBCRR) (<http://blackcultures.uci.edu>), established at UCI in 2016, is the first cultural center of its kind instituted at the university. The guiding vision of the CBCRR is anchored in the notion of the greatest good for the greatest number of students, faculty and staff of African ancestry as well as the broader campus community. The CBCRR offers a safe, vibrant, inclusive, supportive and communal atmosphere for UCI's diverse Black student body. Our guiding ethos is Ubuntu ("human-ness") which speaks to the notion that there is a universal bond that connects all African (Black) people, and that there is a common humanity that unites all peoples everywhere. The center provides a space for students that serves as a "home away from home" – a community. The CBCRR's facilities include a conference room for group meetings and/or studying, a lounge for socializing, a virtual computer lab and a host of services including psychological support, tutorial assistance and academic advising. The CBCRR's four pillars – Vitality, Prosperity, Health and Balance – recognize and reinforce our commitment to social justice, health and wellness, interpersonal growth, talent development, transpersonal awareness, community service, academic success and career development.

For additional information contact the Center for Black Cultures, Resources & Research, Student Center Annex, 949-824-7196, or visit the CBCRR website (<http://blackcultures.uci.edu>).

## Center for Student Leadership

The Center for Student Leadership (CSL) (<https://studentlife.uci.edu/leadership/>) is the central hub of student leadership at UCI and new students' first stop as the center that runs new student orientation. The CSL has been designed to support student leadership programming across the campus by serving as a connection point between students seeking opportunities to develop and apply leadership skills and faculty and staff who oversee leadership and development opportunities. The CSL is committed to supporting every student in their leadership development from orientation through graduation.

Through a variety of orientation programs (<https://orientation.uci.edu/>), the CSL provides assistance and information to students who are in the process of transitioning to UCI from high school or transferring from another college. Continuing students can benefit from a wide range of leadership programs (<http://studentlife.uci.edu/leadership/>) offered throughout each academic year. The Center for Student Leadership is located in the Anteater Community Resource Center (ACRC). For additional information contact 949-824-5182 or visit the CSL website (<https://studentleadership.uci.edu/>).

## Cross-Cultural Center

The Cross-Cultural Center (CCC) (<http://www.ccc.uci.edu/>), established at UCI in 1974, was the first multicultural center instituted at any of the UC campuses. The CCC offers an inclusive atmosphere and supportive environment for UCI's diverse student body. It provides meeting space and serves as a "home" for over 70 affiliated student organizations. Center facilities include two conference rooms and an executive boardroom for group meetings, as well as lounges for studying and socializing. Our values-based programs fall into the following areas: Activism & Social Justice, Education & Empowerment and Community & Diversity. For upcoming programs follow us on Instagram (@ucicrossculturalcenter (<https://www.instagram.com/ucicrossculturalcenter/>)) and Facebook (@UCICrossCulturalCenter (<https://www.facebook.com/UCICrossCulturalCenter/>)), and visit the Cross-Cultural Center website (<http://www.ccc.uci.edu/>).

## DREAM Center

The UCI DREAM Center (<https://dream.uci.edu>) stands with and serves those impacted by immigration policy through advancing systemic change, deconstructing oppressive policies and fostering community. We work toward personal growth, collective healing and visible change. The center offers general consultations with students and dedicated programs focused on areas such as first-year experiences, entrepreneurship, graduate school preparations, art and wellness.

Services include referrals to legal services, academic consultations, financial aid guidance, housing relocations and emotional support. The center is located in the Anteater Community Resource Center (ACRC).

For additional information visit the UCI DREAM Center website (<https://dream.uci.edu>).

## FRESH Basic Needs Hub

The FRESH Basic Needs Hub (<http://basicneeds.uci.edu>) is a student-initiated effort that promotes equitable access to basic needs through student empowerment, community collaboration and institutional integration. Our aim is to shift cultural consciousness toward understanding the fulfillment of basic needs which include food and housing security – a guaranteed right for every person. We are committed to making UCI a basic needs-secure campus. We understand that meeting the basic needs of our students greatly impacts their mental and physical health, academic performance, work productivity and holistic success. FRESH offers emergency food and toiletries, connects students to critical on- and off-campus resources and provides educational opportunities for students to take personal responsibility for their wellness and the well-being of their communities. We are a home for all students, a collaborative space for innovative solutions and an advocate for social justice and equity.

Programs and resources offered at FRESH include: A **food pantry** stocked with fresh and non-perishable food as well as toiletries; **CalFresh (or EBT) application assistance**; the **Emergency Meal Swipe Program** – where students can get 10 or more meal swipes uploaded to their ID cards to dine at UCI campus eateries; the **Economic Crisis Response Grant** – a case-specific grant that provides up to \$1,000 to students experiencing an emergency for basic needs purposes; **confidential consultations** with the Director of the FRESH Basic Needs Hub; **Life Skills Workshops & Programs** – a set of workshops intended to provide nutrition, cooking, financial and other life skills to students; and year-round volunteer opportunities.

Additional information can be found on the FRESH Basic Needs website (<https://basicneeds.uci.edu>).

## International Center

The International Center (<http://www.ic.uci.edu/>) contributes to the development of campus diversity and internationalization by providing services and programs to the UCI international population and the campus community. Core functions of the International Center include the following:

- Providing expert immigration services, including visa documentation, interpreting immigration regulations and related advising, and SEVIS and immigration compliance;
- Advising services to academic departments on issues related to the enrollment and visa selection for the employment of international students and scholars;

- Serving as advocates for international students and scholars and as their liaison with institutional, local, state and federal agencies;
- Providing pre-arrival advising, orientation and adjustment assistance for international students and scholars and their families.

The International Center provides all UCI students, scholars, staff and faculty the opportunity to engage in programs, events and services surrounding international education and intercultural learning.

International students and scholars at UCI with F-1 and J-1 visas and UCI-sponsored employment visas are required to complete the check-in process with the International Center upon arrival. The check-in process requires the reporting of a valid address of residence in the United States, submitting a copy of the most recent I-94 document, and for F-1 and J-1 visa holders, completion of the International Center online immigration orientation. **Failure to complete the check-in process puts the student's or scholar's visa status in jeopardy.**

All international students and scholars must be informed on the specific visa status requirements and responsibility of maintaining valid visa status. Immigration regulations require that students and scholars maintain updated records at the International Center and follow all visa status requirements. These include submitting copies of visa documents to the International Center, maintaining valid I-20 or DS-2019, passport and I-94 at all times while in the U.S, reporting changes in name, address and major to the International Center and reporting early completion of the program or when the student is planning to withdraw or otherwise no longer will be enrolled at UCI.

For additional information contact the International Center, G302 Student Center, 949-824-7249, or visit the International Center website (<http://www.ic.uci.edu/>).

---

## Latinx Resource Center

The Latinx Resource Center (LRC) was founded to raise awareness of social, political, economic, historical and cultural realities of the Latinx and Chicanx communities. We accomplish this mission by offering resources, programs and a space where cultura, arte and academia are interconnected. Our vision is that these efforts will broaden access, increase retention and ensure a clear pathway to graduation through the empowerment of Latinx and Chicanx students.

For additional information contact the Latinx Resource Center located at G458 Student Center, 949-824-8045, or visit the Latinx Resource Center website (<https://studentlife.uci.edu/lrc/>).

---

## Lesbian Gay Bisexual Transgender Resource Center

The UCI Lesbian Gay Bisexual Transgender Resource Center (LGBTRC) (<http://lgbtrc.uci.edu>) provides a wide range of education and advocacy services supporting intersectional identity development. We foster community, wellness and an open and inclusive environment for lesbian, gay, bisexual, intersex, transgender, queer, asexual, ally and questioning students, faculty, staff and the larger campus community. We strive to develop an atmosphere of acceptance and well-being in which the campus community can support the academic mission of the university.

LGBTRC sponsors campuswide events, student activities, student volunteer and leadership opportunities, ally development programs, workshops and seminars for campus courses and organizations, and consultation regarding matters of policy related to sexual orientation and gender identity.

The LGBTRC is open Monday through Friday, 9 a.m. to 5 p.m., and is located in G301 Student Center. Contact 949-824-3277, [lgbtrc@uci.edu](mailto:lgbtrc@uci.edu), or visit the LGBTRC website (<http://lgbtrc.uci.edu>).

---

## Office of Academic Integrity & Student Conduct

The Office of Academic Integrity & Student Conduct (<https://aisc.uci.edu/index/>) is responsible for the campuswide administration of academic and student conduct for both graduate and undergraduate students. Please visit the Office of Academic Integrity & Student Conduct website (<https://aisc.uci.edu/index/>) for more detailed information.

Information is also provided in the University of California Policies Applying (<http://ucop.edu/student-affairs/policies/student-life-policies/pacaos.html>) to Campus Activities, Organizations and Students (<http://ucop.edu/student-affairs/policies/student-life-policies/pacaos.html>), available from the Office of Academic Integrity & Student Conduct (<https://aisc.uci.edu/index/>), 949-824-1479, [conduct@uci.edu](mailto:conduct@uci.edu) or [academicintegrity@uci.edu](mailto:academicintegrity@uci.edu).

---

## Sorority & Fraternity Life

The UCI Sorority & Fraternity Life (SFL) (<https://sororityfraternity.uci.edu/>) community is a diverse, ambitious and electrifying student population comprised of over 47 fraternities and sororities that strive to uphold the oaths, values and commitments they were founded upon. Over 2,000 undergraduates make up the SFL population on campus and are active members in UCI community. Students who join sororities and fraternities gain experience and skills in leadership development, communication, networking and leading change. For many undergraduate students, fraternities/sororities become their home away from home.

SFL members strive for high academic achievement and are honored by Order of Omega, UCI's Greek leadership honor society. Three governing councils – Interfraternity Council, Panhellenic Association and Multicultural Greek Council – represent the fraternities and sororities to the UCI campus and surrounding community.

Since 1973, the Sorority & Fraternity Life community remains a great way to be involved, engage on campus and make lifelong friends. Membership in a fraternity or sorority lasts a lifetime and is an experience unlike any other.

For additional information, visit the Sorority & Fraternity Life website (<https://sororityfraternity.uci.edu/>).

## Student Government Student Media

### Associated Students (ASUCI)

All UCI undergraduate students are members of the Associated Students, UC Irvine (ASUCI) (<https://www.asuci.uci.edu/>). ASUCI is the student representative body that advocates to and is liaison between the UCI administration, faculty and staff.

ASUCI is comprised of three branches of government: The Executive Branch (five elected members and over 60 appointed officer positions), The Senate (28 elected members) and The Judicial Board (seven appointed members). Guided by their constitution and by-laws, these student representatives manage the undergraduate quarterly fee (less summer) that supports student life activities, advocacy programs, academic programs, publications/communication and professional support staff as well as essential campus services. For more information contact the Student Government Student Media offices at 949-824-2400, [asuci@uci.edu](mailto:asuci@uci.edu) or visit the ASUCI website (<http://www.asuci.uci.edu/>).

**ASUCI Student Life Activities** include annual events such as Welcome Week, Homecoming, Soulstice and Summerlands. Ongoing events include such programs as major concerts, "Rally Alley" spirit events before athletic games, spirit days and weekly movie screenings. This organization also sponsors student educational programs such as the Visions Leadership class (1.3 units), Speakers & Debate series, a host of Awareness weeks and programming, various small initiative boothing events and the Anteater Mentorship class (1.3 units).

**ASUCI Advocacy programs** include elections (campus and local/state/federal), academic resources and internal initiatives throughout the campus to decrease various insecurity issues while working alongside various departments to enact them, and External Affairs, where students travel to Sacramento to represent student issues. The ASUCI Senate nominates undergraduate students for positions on UCI administrative, Academic Senate and ad-hoc committees, and ensures undergraduate students have a voice in policy and decision-making on the UCI campus.

**ASUCI Services** include the following:

**Club and Organization Accounting:** The ASUCI Business Office provides banking and accounting services to registered campus organizations (RCO).

**Anteater Express:** The Anteater Express shuttle program provides a "pure electric" alternative transportation service to all students, staff, and affiliated members of the UCI community, with fixed shuttle routes to 60 designated stops on- and off-campus. The Anteater Express Shuttle carried more than two million passengers last year and facilitates campus-wide efforts to reduce traffic and improve air quality while helping the UCI community access the services available on campus. For detailed information regarding services, routes and schedules, visit the Anteater Express website (<https://www.shuttle.uci.edu/>).

**Vendor Fair:** The Vendor Fair program is a student-run and managed program where students select local vendors and invite them to the UCI campus for one week approximately four times each year.

**The Green Initiative Fund (T.G.I.F.):** The Green Initiative Fund (T.G.I.F.) is a funding board that allocates money toward sustainable projects and educational programs on campus. Students voted to enact a \$3.50 per quarter T.G.I.F. fee in spring 2009 to support this program.

**The Student Programming Funding Board:** The goal of this board is to provide funding to campus-wide programs coordinated by registered undergraduate organizations that enhance the quality of life, encourage school spirit and promote social, cultural and educational development.

**Discount Ticket Program:** ASUCI offers discount tickets to local attractions including AMC theaters, Edwards/Regal cinemas, Universal Studios, Magic Mountain, Knott's Berry Farm and more. The program is located in the Student Government Student Media offices near the ATMs and is open Monday through Friday from 8:30 a.m. to 5 p.m.; telephone 949-824-2400. Tickets can also be purchased online 24-7 at the ASUCI Discount Tickets website (<https://www.asuci.uci.edu/tickets/>) for attractions including Legoland and Universal Studios.

### Associated Graduate Students

All graduate and professional school students are members of the Associated Graduate Students (AGS) (<https://www.ags.uci.edu/>). AGS works to improve the graduate student quality of life and functions as a liaison between graduate students and the UCI administration, faculty and staff by addressing concerns and working to resolve grievances.

Guided by their constitution and by-laws, these student representatives manage the graduate quarterly fee (less summer) that provides graduate students with numerous social and cultural events of benefit to the graduate community and designed to create a sense of community as well as funds toward graduate student development, special projects and grants.

The AGS Council nominates graduate students for positions on UCI administrative, Academic Senate and ad-hoc committees, and ensures graduate students have a voice in policy and decision-making on the UCI campus. AGS also works on systemwide issues affecting graduate and professional students by membership in the UC Student Association (UCSA).

For more information visit the Associated Graduate Students website (<http://www.ags.uci.edu/>).

### **Associated Medical Student Government**

The Associated Medical Student Government (AMSG) represents the medical student body in all matters relating to the UCI campus, the UC Office of the President and the community, specifically within the School of Medicine. Medical students are members of the Associated Medical Student Government and have access to those services. In addition, the Association utilizes a portion of the quarterly AGS fee, along with their own unique fee, to provide funding for medical student activities that benefit the School of Medicine community.

For more information, visit the Associated Medical Student Government website (<https://www.meded.uci.edu/student-affairs/student-government.asp>).

### **The Merage Student Association**

The Merage Student Association (MSA) (<https://merage.uci.edu/msa/>) represents the graduate Business student body in all matters relating to the UCI campus, the UC Office of the President and the community, specifically within the Paul Merage School of Business. Graduate business students are members of the MSA and have access to those services. In addition, the Association uses a portion of the quarterly AGS fee, along with their own unique fee, to provide funding for student activities that benefit the Paul Merage School of Business community.

For more information, visit the Merage Student Association website (<https://merage.uci.edu/msa/>).

### **The Student Bar Association**

All UCI Law students are members of the Student Bar Association (<http://www.law.uci.edu/campus-life/student-organizations/orgs/sba.html>) (SBA) at the University of California, Irvine School of Law. The Student Bar Association serves as a primary conduit for students to deliver concerns and contribute ideas to the administration. The Student Bar Association distributes their own student fees to fund student groups to help members pursue their passions within the study of law. As the students, faculty and administration work to build the law school of the 21st century, the Student Bar Association works to ensure that all students have the support and resources they need to excel.

### **Student-Produced Media**

UCI students manage five student media products on campus including

- publishing the weekly online campus newspaper entitled the New University (<http://www.newuniversity.org/>);
- operating the radio station, KUCI (<http://www.kuci.org/>) (88.9 FM);
- producing Anthology (<http://www.yearbook.uci.edu/>), the award-winning UCI yearbook;
- operating AnteaterTV (<http://www.anteater.tv/>);
- and produce several Alternative Media newsletters and magazines.

### **Student Outreach and Retention Center (SOAR)**

The mission of the Student Outreach and Retention (SOAR) Center (<https://soar.uci.edu>) is to cultivate a community of authentic student leaders that aspire to develop innovative, student-initiated outreach and retention programs that foster critical dialogue, mentorship and shift the educational paradigm to improve college access, readiness and retention rates for historically marginalized communities in higher education.

SOAR is a dynamic space that empowers student scholars through praxis to advocate and develop a transformative and equitable educational environment where students can use their education as a vehicle for social impact.

For more information, visit the SOAR office at 106 Gateway Study Center, call 949-824-5762, or visit [soar.uci.edu](https://soar.uci.edu) (<https://soar.uci.edu>).

### **Veteran Services Center**

The Veteran Services Center (<http://www.veteran.uci.edu/>) provides active duty, reservists, National Guard, veterans and dependents assistance in obtaining the federal and state educational benefits to which they are entitled. The Veteran Services Center is responsible for submitting entitlement requests for new and continuing students, answering any questions military-connected students may have concerning their educational benefits, and providing resources and services to assist these students in navigating their transition to student life.

The Veteran Services Center is open Monday through Friday from 9:00 a.m. to 5:00 p.m. and is located at the Student Center Building (Room G306). The Veteran Services Center can be reached by phone at 949-824-3500 or email at [veteran@uci.edu](mailto:veteran@uci.edu) (%20veteran@uci.edu). For more information, please visit the Veteran Services Center website (<http://www.veteran.uci.edu>).

- **Readmission due to military orders.** If a student is called on military orders, the readmission fee will be waived. When readmitting, students should meet with their academic counselor to initiate the process and submit proof of their military orders.
- **CalVet College Fee Waiver for Veteran Dependents.** Dependents of veterans eligible for the CalVet College Fee Waiver must submit their eligibility letter from a County Veteran Service Office to the Veteran Services Center. Once the letter is submitted, the student's tuition (including professional school fees) and the student services fee will be waived; *all remaining UCI fees are the responsibility of the student*. This benefit does not apply to self-supporting programs, such as the MAS in Criminology, Law, and Society and the part-time MBA programs. Eligibility must be re-established for each subsequent academic year. The student must meet the UCI California residency requirements to receive this benefit.
- **U.S. Department of Veterans Affairs (VA) Education Benefits.** Students must submit a *Request for Certification* form before tuition and fees are due. Failure to do so may not allow enough time for UCI to place a Financial Aid award on a student's financial aid account while waiting for the VA payment. This is currently a courtesy award and is subject to change at any time. If at any time the VA fails to pay any portion of the estimated amount placed into the student's account, the student will be held liable for the unpaid portion. The student must take the following actions in order for the Veteran Services Center to certify a student for VA education benefits.
  1. **Submit a Certificate of Eligibility (COE)** letter noting entitlement to VA educational assistance no later than the first day of a course of education.
  2. **Submit a Request for Certification (RFC)** form to the Veteran Services Center to use such entitlement. The form can be completed by following this webpage: <https://veteran.uci.edu>.
  3. **Provide additional information necessary** to verify enrollment and that courses will make progress towards chosen degree.

Students requesting to use VA education benefits will be allowed to attend or participate in courses during the period beginning on the date on which the individual provides to the Veteran Services Center a Certificate of Eligibility, Authorization Form (for Chapter 31 beneficiaries), or Statement of Benefits obtained from the VA website and ending on the earlier of the following dates:

1. The date on which payment from VA is made to UCI.
2. 90 days after the date the institution certified tuition and fees following the receipt of the Certificate of Eligibility.

*UCI will not impose any penalty, including the assessment of late fees, the denial of access to classes, libraries or other institutional facilities, or the requirement that a covered individual borrow additional funds, on any covered individual because of the individual's inability to meet his or her financial obligations to the institution due to the delayed disbursement funding from VA.*

- **U.S. Department of Veterans Affairs (VA) Academic Standing.** All students receiving VA educational benefits must be in good academic standing. An undergraduate student with a cumulative GPA below 2.0 or a graduate student with a cumulative GPA below 3.0 for two consecutive academic terms will have their VA benefits terminated. Benefits will be reinstated if and when the undergraduate student's cumulative GPA is 2.0 or above or the graduate student's cumulative GPA is 3.0 or above. *Please note this policy is separate and distinct from the UCI Normal Progress Requirement and the UCI Academic Standing Requirement. The VA Academic Standing Requirement is related to the receipt of VA education benefits.*
- **Readmission for Disqualified Graduate Students.** Graduate students who are academically disqualified may be readmitted to the university with a recommendation from their academic unit and the Dean of the Graduate Division. See Academic Disqualification in the Graduate Division section of this *UCI General Catalogue* for more information.

## Womxn's Hub (W-Hub)

The Womxn's Hub (W-Hub) (<https://womenshub.uci.edu>) aims to advance equality and access to resources for members of the UCI community across lines of ethnicity, gender identity, religion, orientation and social class. This is accomplished by promoting community consciousness, social justice initiatives and individual growth.

The center focuses on womxn-specific needs and ideas through workshops, trainings and space interaction in ways that promote personal empowerment. The space is open and affirming to all who believe in the strength of womxn, womxn-identified persons and all allies. Stop in for a piece of chocolate, a cup of tea, or respite from our chaotic world.

For more information call 949-824-6000, email [womenshub@uci.edu](mailto:womenshub@uci.edu) #or visit the Womxn's Hub website (<https://womenshub.uci.edu>).

## Wellness, Health & Counseling Services

### CARE (Campus Assault Resources & Education)

UCI CARE (<http://www.care.uci.edu/>) provides free and confidential support services to members of the UCI community impacted by sexual assault, relationship abuse, family violence and/or stalking. UCI CARE aims to end these forms of power-based personal violence by engaging the campus community in education, programming and transformative action.

CARE is located at G320 Student Center. All services are confidential and free of charge.

For more information call 949-824-7273 or visit the CARE website (<http://www.care.uci.edu/>).

---

## Campus Recreation

UCI's Department of Campus Recreation (<http://www.campusrec.uci.edu/>) provides programs and facilities for students, faculty and staff to maintain a healthy lifestyle. Campus Recreation is comprised of seven department areas including Facilities, Fitness & Wellness, Intramural Sports, Club Sports, Recreation Activity Classes, Team Challenge and Outdoor Adventure & Boating.

The Anteater Recreation Center (ARC) (<http://www.campusrec.uci.edu/arc/>) is a 115,000 square foot sports and fitness facility featuring 20,000 square feet of strength and cardio space with 282 cardiovascular and weight machines, and more than 30 tons of free weights. In addition, there is a three-court gym, a rounded corner multi-use gym, an elevated running track, three racquetball courts, a rock climbing wall, lap and leisure pool, exercise testing, five multipurpose rooms and a demonstration kitchen and classroom. The ARC Sports Field Complex includes 21 acres of lighted fields that accommodate softball, soccer and flag football. There are six lighted tennis courts, two outdoor lighted basketball courts and a roller rink available for Campus Recreation programs and drop-in use.

Fitness & Wellness (<http://www.campusrec.uci.edu/fitness/>) encompasses programs for participants to begin or improve their personal fitness levels including group exercise classes such as yoga and aerobics as well as comprehensive health services such as personal training, fitness testing and massage therapy. Campus Recreation staff are available to provide assistance with gym equipment and fitness goals in the strength and cardio rooms.

Intramural Sports (<http://www.campusrec.uci.edu/im/>) are structured leagues which are designed for the "everyday athlete." All activities feature skill and competitiveness. Sports leagues include basketball, dodgeball, flag football, floor hockey, indoor and outdoor soccer, softball, volleyball and many more. Special events and tournaments range from badminton, bowling, racquetball and swimming to ping pong, tennis, track and wrestling.

UCI Club Sports (<http://www.campusrec.uci.edu/club/>) comprise a wide variety of student-managed competitive sports. Clubs travel to compete against other universities across the local area, and some travel nationally. Current UCI Club Sports teams include archery, badminton, baseball, basketball, biking, boxing, climbing, cricket, dragon boat, fencing, figure skating, lacrosse, Brazilian Jiu Jitsu, Japanese karate, Kendo, Taekwondo, Wushu, powerlifting, roller hockey, rowing, rugby, running, sailing, soccer, softball, swimming, table tennis, tennis, triathlon, ultimate, volleyball, water polo and wrestling.

Recreation Activity Classes (<http://www.campusrec.uci.edu/classes/>) consist of non-credit activity classes for students and the UCI community. Classes range from sports clinics to the more unique styles of martial arts like Jiu Jitsu and Muay Thai. An array of dance classes such as hip hop, salsa and ballroom are also available. Cooking classes held at the ARC Kitchen classroom are also part of the Recreation Activity Classes department area. Students can also earn their CPR or Wilderness First Aid certification.

Team Challenge (<http://www.campusrec.uci.edu/teamup/>) is a team building and leadership program. Program participants can experience the Odyssey, a high ropes challenge course located at the ARC fields. Customized and facilitated team programs are available on a reservation basis. Team Up! programs led by trained facilitators teach communication, trust and teamwork while providing groups the chance to test their limits and have fun.

Outdoor Adventure & Boating (<http://www.campusrec.uci.edu/outdoor/>) includes a mixture of outdoor activities and water sports like sailing, kayaking, paddleboarding, rock climbing and outdoor adventure trips. The sailing program includes both classes and rentals. Classes range from beginner to advanced and are offered quarterly. The rock climbing programs take place on the 35 foot indoor rock climbing wall at the ARC and include classes and climbing memberships. Boating activities take place at UCI's Crew Base in the Newport Back Bay. Annual outdoor adventure trips include a summer Pacific Crest Trail backpacking trip and the Spring Break Service trip.

More information is available on the Campus Recreation website (<https://www.campusrec.uci.edu>).

---

## Campus Social Worker

The UCI Campus Social Worker (CSW) (<http://www.whcs.uci.edu/CSW/>) is a member of the Wellness, Health & Counseling Services (WH&CS) team and reports to the Associate Vice Chancellor of WH&CS. The CSW provides private support, primarily for students to access and manage services during a medical, physical, familial, financial or emotional crisis. This position helps clients navigate their relationships and responsibilities with UCI academic and administrative departments and, when necessary, with outside community agencies. The CSW serves as the point of contact for individuals when coordinating and monitoring the delivery of services so that they can meet their academic and personal goals. As a liaison, the CSW interfaces with a full range of academic and student affairs units that are involved in the intervention or care of the client population.

### Areas of focus include:

**Respondent Services** – Respondent Services provides assistance for students, faculty or staff navigating personal, academic and disciplinary impacts of being alleged respondents in sexual assault, sexual harassment, stalking and dating/domestic violence cases.

**Basic Needs** – Basic Needs services provides expertise in working with housing and food insecure students, their needs and resources available to them.

**Rapid Rehousing** – Rapid Rehousing supports homeless and housing-insecure students by securing long-term, permanent housing through: housing search and move-in support, rental subsidies and case management to support housing stability.

**Services and responsibilities of the CSW include:** consultation and resource referral, web resources, case management, and coordination of resources upon student death.

Referral to the Campus Social Worker can be made by UCI faculty or staff only. Generally, students may not self-refer. Please call 949-824-0101 or visit the CSW website (<http://www.whcs.uci.edu/CSW/>) for more information.

## Center for Student Wellness & Health Promotion

The Center for Student Wellness & Health Promotion (CSWHP) (<http://www.studentwellness.uci.edu/>) strives to be a leader in collegiate health promotion by focusing on the unique and relevant health needs and concerns of UCI students to support their academic success. CSWHP staff educate and empower students to make informed decisions that support their individual health, as well as support and maintain a healthy campus environment.

CSWHP staff promote healthy choices and behaviors by

- identifying the specific health needs of the campus;
- utilizing evidence-based wellness and health promotion strategies;
- disseminating current and accurate health information;
- facilitating student development and leadership opportunities;
- and offering innovative campus programming.

CSWHP employs several student staff and trained peer educators, advises/supports health-related student organizations and supervises students participating in field study/practicum hours.

CSWHP staff and students present workshops, conduct trainings and classes and consult with students on their health needs and concerns. Services also include a wellness room (massage chairs, bean bags and relaxation/stress-management activities), distribution of free condoms, guided Wednesday Wellness Walks, a lactation station for nursing parents and a gender-neutral restroom. For additional information visit the CSWHP website (<http://www.studentwellness.uci.edu/>).

## Child Care Services

Child Care Services (<http://www.childcare.uci.edu/>) includes five on-campus centers offering early care and education services for children from three months to 12 years of age. The programs are open to children of UCI undergraduate students, graduate students, faculty and staff. Tuition subsidies are available to qualifying undergraduate and graduate students. For information contact 949-824-2100 or visit the Child Care Services website (<http://www.childcare.uci.edu/>).

## Counseling Center

The mission of the Counseling Center (<http://www.counseling.uci.edu>) is to help students achieve optimal mental health and academic success, personal growth and increased capacity to cope with the stresses of being a university student. The Counseling Center also strives to contribute to the overall excellence and well-being of the UC Irvine community. The services offered by the Counseling Center fall into four categories: time-limited clinical treatment; prevention and outreach programs including workshops and courses; mental health consultation and mental health training. Services are primarily directed to enrolled UCI students, though our delivery of services includes students' partners and family members.

In order to optimally serve all of the campus community, the Counseling Center operates from a time-limited contemporary counseling model. The Counseling Center is proud to have a multiculturally diverse and interdisciplinary staff which includes psychologists, psychiatrists, social workers, post-doctoral fellows, doctoral interns and student volunteers who serve as peer educators and mentors. The Counseling Center's services are free of charge to currently registered students. Students with chronic or complex mental health issues needing long-term or extensive services are referred to other appropriate community providers.

The Counseling Center is located on the second floor of Student Services I, and the Counseling Center Annex is located on the fourth floor of the Student Center directly across from the elevator. Contact 949-824-6457 or visit the Counseling Center website (<http://www.counseling.uci.edu/>).

## Disability Services Center

The Disability Services Center (DSC) (<http://disability.uci.edu>) determines, provides and coordinates disability-related accommodations to ensure access for all UCI students with disabilities. Students with varying disabilities – including those with mobility, visual, hearing, learning and chronic and mental health conditions – may be eligible for disability-related accommodations, academic adjustments and auxiliary services through this resource center. Staff assists students from the point of their admission to UCI through graduation. Specialized services may include testing accommodations, priority registration, document conversion, adaptive equipment, assistive technology, notes, interpreters, real time captioning, liaisons with faculty and campus departments and information regarding disability advocacy in the university setting. The DSC provides assistive/adaptive computer technology and training. There is no cost to the student for the services or accommodations provided by the DSC. Students are responsible for

acquainting themselves with the procedures for use of accommodations. These procedures are available on the Disability Services Center website (<http://www.disability.uci.edu/>).

Students with disabilities may qualify for reasonable accommodations based on disability-related needs. Students must provide appropriate documentation about their disabilities to the Disability Services Center. Documentation provided to the DSC is confidential. It is the responsibility of the applicant or student to provide this documentation and, if necessary, to cover the cost for such documentation. This includes the cost for learning disability and attention deficit disorder assessments and mental health evaluations. Contact the Disability Services Center or visit the website (<http://disability.uci.edu>) for more information about disability documentation requirements or to download documentation forms. In most cases there is need for recent documentation about the disability and/or periodic documentation updates. UCI reserves the right to determine the most effective and timely accommodations after consultation with the student about the disability and previous use of accommodations. The provision or use of a disability accommodation does not guarantee or ensure a certain level of achievement for the student. Students with disabilities must meet the same academic standards as all other students. Some academic adjustments or accommodations require approval of the chair or dean of the student's academic unit.

Students with disabilities who need accommodations (in particular reading assistance, textbook conversion including e-text and Braille, American Sign Language interpreting services, real-time captioning services and adaptive computing technology in campus laboratories) that must be planned or arranged in advance of the start of classes should contact the Disability Services Center as quickly as possible after admission to UCI. Failure to do so may delay or in some cases preclude the DSC's ability to provide certain accommodations. This advance notice also allows the DSC to document needs, discuss service procedures and student responsibilities and determine the appropriate accommodations.

Additional information is available by phone: 949-824-7494 (voice), email: [dsc@uci.edu](mailto:dsc@uci.edu) or web: Disability Services Center website. (<http://www.disability.uci.edu/>)

---

## **Student Health Center, UC Student Health Insurance Plan, TB Screening/Immunization Requirements for Incoming Students**

All matriculated students registered in a degree program and continuing education students are eligible to access services at the Student Health Center (<http://www.shc.uci.edu/>) (SHC). Located at the corner of East Peltason Dr. and Pereira Dr. (building 5 on the campus map (<https://uci.edu/visit/maps.php>)), SHC also includes a state-of-the-art dental clinic located in building 6 across the street at the same intersection. The SHC is accredited by the Accreditation Association for Ambulatory Health Care (AAAHC). SHC also administers the UC Student Health Insurance Plan (UC SHIP). In addition, SHC administers and oversees compliance by incoming students with UC's mandatory TB Screening and Immunization requirements.

### **Student Health Center**

SHC includes ambulatory care clinics staffed by board certified and licensed medical, mental health and dental professionals and licensed nurses; a clinical laboratory; radiology; pharmacy; and insurance services office to assist students in navigating UC SHIP and in obtaining referrals to outside specialists. The SHC is open from 8 a.m. to 5 p.m., Monday through Friday. Extended hours may be available during the academic year and will be posted on the Student Health Center website (<https://shc.uci.edu/>). General medical services are offered at the SHC by appointment only and include primary care and women's health. Urgent conditions are triaged and care is provided immediately. If a student with an urgent condition cannot be seen by a provider or nurse immediately, then the student would be referred to a local urgent care center, hospital emergency department or, for less urgent conditions, to an online telemedicine service or nurse advice line. Specialty services are also available by appointment and include psychiatry, dermatology, gynecology, orthopedics, sports medicine, ear/nose/throat, chiropractic services, nutrition therapy services and minor surgical procedures. The Nurse Clinic provides immunizations, health screening/clearances, travel consultation and basic health, wellness and preventive care education. The Dental Clinic offers routine dental examination and cleaning, restorative procedures (fillings and crowns) and certain specialty services. SHC fees are generally lower than those of comparable services in the community. SHC only submits claims to the UC SHIP insurance plan. SHC does not bill third-party insurance plans. Therefore, students not enrolled in the University of California Student Health Insurance Plan (UC SHIP) will pay fees for services through their ZotAccount (Campus Billing System) and may submit a claim to their insurance plans for reimbursement. Students who are enrolled in UC SHIP will pay any required co-pays and/or coinsurance through their ZotAccount (Campus Billing System) after SHC receives payment from the UC SHIP carrier (Anthem).

### **University of California Student Health Insurance Plan (UC SHIP)**

All registered undergraduate, graduate, law and medical students are required to carry health insurance that complies with waiver criteria established by UC. All students are automatically enrolled in and assessed the fees associated with UC SHIP prior to the start of the Fall term of each academic year. Those students with other health insurance that meets the waiver criteria may waive enrollment in UC SHIP during the established waiver periods that occur prior to the start of each quarter (or semester for Law students). A new online waiver application must be submitted at the beginning of each academic year. If approved, the waiver is in effect for the current term and the remainder of the academic year. A waiver approved for the Fall term is in effect for the entire academic year unless a student wishes to "reverse" the waiver and become enrolled in the plan. Following waiver approval, a refund of the fees will appear on the student's ZotAccount typically within ten business days. Additional information regarding health insurance premiums and related fees that are charged to students who are enrolled in UC SHIP is available in the Expenses, Tuition and Fees section of this *Catalogue* and on the Student Health Center website (<https://shc.uci.edu/>).

### **University of California Mandatory TB Screening and Immunization Requirements**

UCI is committed to protecting the health and well-being of our students, the campus community, and beyond. In order to protect the campus from outbreaks of vaccine-preventable diseases, ALL incoming undergraduate and graduate students are REQUIRED to obtain four (4) specific vaccines

and undergo screening for Tuberculosis or provide documentation demonstrating compliance with these requirements. (Medical students have additional admission health requirements that are established by the School of Medicine.) Students who do not comply with these admission health requirements by the published deadlines (<https://shc.uci.edu/new-student-information/immunization-requirements/>) will be subject to a Type 2 academic hold that will be applied for the subsequent term. Students must enter their immunization and TB screening information and upload copies of their immunization records directly into their secured SHC electronic health record through the Wellness, Health & Counseling Services Student Portal (<https://osh.shs.uci.edu/>). Students will be able to access the portal once they have obtained their UCINetID and once their student status has been changed from “applicant” to “student”. This status change typically occurs around the third week of May for incoming undergraduate students, and the third week of June for incoming transfer and graduate students.

Although not mandatory, all students are encouraged to have an annual flu vaccine, dental examination and cleaning and physical examination to screen for health problems. Students enrolled in UC SHIP are covered 100% for any preventive care service whether performed at the SHC or by an in-network provider. SHC is the designated primary care medical provider for all students enrolled in UC SHIP. If the student is enrolled in UC SHIP and has had a recent physical examination or other medical services, they are encouraged to submit copies to SHC for inclusion in their SHC electronic medical record. Students transferring from another UC campus where their medical records are on file should have the records transferred to the UCI Student Health Center.

For the most up to date information about the Student Health Center, TB Screening/Immunization requirements and the UC Student Health Insurance Plan visit the Student Health Center website (<https://shc.uci.edu/>).

## Auxiliary Services

### The Hill (Bookstore)

Come by and visit The Hill (<http://uci.bncollege.com/webapp/wcs/stores/servlet/BNCBHomePage/?storeId=88256&catalogId=10001&langId=-1>), located in the UCI Student Center next to Starbucks. We carry all required and recommended course materials including new, used, rentals and ebook options. We price match textbooks with Amazon and BN.com.

The Hill offers a wide selection of UCI clothing and school spirit gifts and accessories. We carry popular brands such as Adidas, Champion and Under Armour. We also have a general reading section and showcase a variety of UCI faculty authors.

Within the store, you will find **TechHub**, an Apple authorized campus dealer. In addition to Apple you will find various other laptop and tablet brands and accessories. **AntTech**, The Hill's technical services center, is staffed by Apple Certified Mac Technicians who service Macs for customers' hardware and software support needs.

The Hill is open Monday through Thursday, 8 a.m. to 6 p.m., Friday 8 a.m. to 5 p.m. and Saturday 11 a.m. to 5 p.m. Store hours may vary during the holiday breaks and extend for the first week of classes.

For additional information contact 949-UCI-Hill (824-4455) or visit Shopuci.com (<http://uci.bncollege.com/webapp/wcs/stores/servlet/BNCBHomePage/?storeId=88256&catalogId=10001&langId=-1>).

## Hospitality & Dining Services

From a quick bite to eat to an elegantly served catered meal, UCI Dining Services (<http://www.food.uci.edu/>) is here to serve the campus community's dining needs, serving a variety of locations and flavors to fit one's palette. UCI Dining offers over 25 fast and casual retail dining locations throughout the campus, two all-you-care-to-eat residential dining halls and options for catering from both UCI Catering and various retail locations. Please visit the UCI Dining Services website (<http://www.food.uci.edu/>) to see a list of the dining locations, menus, and operating hours.

UCI Dining Services is located in G318 Student Center and can be reached at 949-824-4182.

### Retail Dining Locations

Retail dining locations are conveniently situated throughout the campus to serve your dining needs. Please use the interactive map on our website (<https://map.uci.edu/?id=463#!ce/8396>) for a list of the dining locations on campus.

### Residential Dining

In Middle Earth Housing, we welcome our newest all-you-care-to-eat dining hall, Brandywine, located directly off ring mall. In a hurry? You can also grab a quick snack at Side Door, our newest convenience store located right next to Brandywine. On the other side of campus at Mesa Court Housing is the other all-you-care-to-eat dining hall, The Anteater and the Taza Café. Both dining hall locations offer theme nights, award-winning chefs, made-to-order meals, vegetarian and vegan options and late night meals.

### Catering

UCI Catering (<https://ucicatering.catertrax.com/#Catertrax>) provides a comprehensive list of menu items to choose from or the option to design your own menu; both can be designed to fit your budget or needs. Retail (<https://uci.campusdish.com/Catering.aspx>) locations like Wahoo's, Subway and Panda Express also offer additional catering options.

## Student Center & Event Services

The UCI Student Center (<https://www.studentcenter.uci.edu/>) should be the first stop for prospective students and their parents, alumni and all campus guests who want to learn more about UCI or our Anteater community. Recognized globally by the International Association of Conference Centres as a venue of excellence, it's a place to study and lounge, relax and belong. Services include free art exhibits, a 425-seat theater with 7.1 Dolby Surround Sound, a first-ever Esports arena, name-brand food court franchises, convenience store, campus bookstore (The Hill), The UPS Store, UCI Medical Center Blood Donor Center, banks and ATMs, the Anthill Pub & Grille, world-renowned conferences and professional event services.

The Student Center is also home to campus offices including Student Government Student Media, Student Life & Leadership, the Center for Black Cultures, Resources & Research, the Center for Student Wellness & Health Promotion, Dining Services, UCI CARE (Campus Assault Resources and Education), the Lesbian Gay Bisexual Transgender Resource Center (LGBTRC), the International Center, Veteran Services and a satellite office for the Counseling Center.

All campus visitors are encouraged to explore and experience UCI's Student Center firsthand. Whether you are looking for a place to read while grabbing something to eat or planning an exciting and memorable event, you will find the Student Center a welcoming and inclusive gathering place for all Anteaters to interact, learn and enjoy. Visit the website regularly for a calendar of events, to book study space online, apply for student employment opportunities and so much more.

### A311 Student Center, Irvine CA 92697

**Hours:** Sunday through Saturday, 7:00 a.m. until midnight (Open 24/7 during finals)

Closed on university holidays

**Phone:** 949-824-5252

## Student Housing

### On-Campus Housing

Housing Administrative Services coordinates application and contract processes for on-campus housing. Approximately 43 percent of UCI's student body are housed on campus. For more information including housing rates for the current academic year, visit the Student Housing website (<http://www.housing.uci.edu/>).

### Undergraduate Housing

Three on-campus communities serve full-time single undergraduate students under age 25. Each community offers a group living environment, recreation rooms, a fitness center and outdoor recreation space. Student rooms are furnished, feature cable television and internet connections.

**Residence Halls.** Mesa Court and Middle Earth are two residence hall communities, housing approximately 5,282 single undergraduates who are primarily freshmen and sophomores between 17-20 years of age. Both communities are within walking distance from the center of campus. Most of the halls (a.k.a., "classic halls") are co-ed buildings, each housing between 50-117 residents in suite-style layouts. Each hall has group study rooms, a living room for meetings or informal gatherings, a small kitchen and card-operated laundry facilities. The Mesa Court and Middle Earth towers house approximately 1,521 students on five residential floors, with access to amenities on each floor.

Mesa Court and Middle Earth have complete food service and dining commons. Students who live in the residence halls participate in a prepaid meal plan. Meals are served three times daily on weekdays (with late night hours) and twice daily (brunch and dinner) on weekends. Menus offer a wide selection of foods served cafeteria style at cook-to-order serving stations featuring cuisines from all over the world as well as self-serve cereal, deli and salad bars. For more information about meal plan options, visit the UCI Dining website (<https://uci.campusdish.com/>). The halls remain open during the Thanksgiving holiday, winter recess and the spring recess, but no meals are served during these break periods.

Both Mesa Court and Middle Earth maintain a comprehensive residence life program designed to help freshmen transition to college. Each hall has a live-in Resident Advisor (RA) who provides resources and support to residents. (Larger "tower" halls have multiple RAs.) In each community, special interest halls or hall clusters provide educational programs and informal opportunities to get together with other students who hold similar interests. Community-wide social programs are also offered.

Rates for rooms in the classic halls during the 2019-20 academic year (late September through mid-June) were \$13,817-\$14,297 for a triple room; \$15,866-\$16,346 for a double room; and \$18,155-\$18,635 for a single room. The rates for rooms in the Towers were \$13,655-\$14,135 for a tower quadruple; \$15,593-\$16,073 for a tower triple; and \$17,798-\$18,278 for a tower double. (Rates include room and board and vary by the meal plan selected.) Charges are paid in quarterly payments. Rates for 2020-21 will reflect an increase.

**Arroyo Vista** is a community of 30 sponsored academic themed houses and 12 sorority and fraternity chapter houses. Each house contains 8, 12 or 16 furnished double-occupancy rooms (bed, desk and wardrobe closet for each resident). Residents share bathroom facilities on each floor, a spacious living room with fireplace, a study room, a fully equipped kitchen with dishwasher and microwaves and laundry facilities. Some houses also offer a two-person suite with a private bathroom located on the first floor. All bedrooms in Arroyo Vista feature cable television and internet connections. No meal plan is included in the housing contract. Students make their own meal arrangements, choosing to cook for themselves or to purchase a voluntary meal plan through the UCI Dining website (<http://uci.campusdish.com/>).

Theme houses offer educational programs that advance both a student's academic interests and overall university experience. Members of Greek chapters should consult their Greek chapter for information. The rate for the 2019-20 academic year was \$7,271 for a double-occupancy room and \$9,089 for the two-person suite. Rates for 2020-21 will reflect an increase.

### **Graduate/Family Housing**

Three on-campus apartment communities serve full-time graduate students, medical students and students with families (married, in a domestic partnership and/or with custody of minor children). All apartments have carpeting, draperies, a stove and a refrigerator, and provide cable television and internet connections. Rental rates in all three communities tend to be lower than for comparable units in the local rental market. Rates for 2020-21 will reflect an increase.

**Verano Place** offers 1062 one-, two- and three-bedroom apartments. Monthly rents for 2019-20 ranged from \$411-\$834 for each single student sharing an apartment, and from \$1,057-\$1,668 for families.

**Palo Verde** offers 652 one-, two- and three-bedroom apartments. Monthly rents for 2019-20 ranged from \$643-\$1,187 for each single student sharing an apartment, and from \$901-\$2,169 for families.

**Campus Village** is a community of 400 two-bedroom apartments serving single graduate students (no children). Apartments include bedroom furniture (bed, dresser, desk, lamp and chair for each student) and common space furniture (sofa, coffee table, end tables, lamp and dining room set). Campus Village is located in the campus core adjacent to the Science Library. The 2019-20 monthly rental rate for graduate students living in Campus Village was \$818.

### **To Apply**

Housing information and application instructions are available on the UCI Student Housing website (<http://www.housing.uci.edu/>). Undergraduates apply for housing online via the UCI Admissions website (<http://www.admissions.uci.edu/>) after receiving admissions notification and submitting their *Statement of Intent to Register* (SIR). Graduate applicants can also find housing information and a link to the online application on the UCI Student Housing website (<http://www.housing.uci.edu/>). A \$20 nonrefundable processing fee must accompany the housing application when it is submitted.

Freshmen and transfer undergraduate students enrolling for fall quarter may be eligible for two years of on-campus housing. To qualify for this guarantee, students must apply for housing and submit their *Statement of Intent to Register* (SIR) by May 1, 2020 for freshmen and June 1, 2020 for transfer students, and meet all contract offer deadlines. Applications received after these dates will be handled in the order received, as space becomes available.

The University of California, Irvine guarantees an offer of on-campus housing to every newly-admitted, full-time Ph.D., M.F.A., J.D. and Prime-LC, LEAD-ABC and MSTP M.D. student. Guaranteed housing offers will be made for enrollment in fall only and cannot be deferred. Ph.D. and Prime-LC, LEAD-ABC and MSTP M.D. students who accept this housing offer will be guaranteed placement in on-campus housing for one year less than normal time to degree (NTTD-1) for their academic program. M.F.A. and J.D. students will be provided with housing for their academic programs' normal times to degree, up to three years (NTTD). Students must maintain good academic standing to continue to qualify for the guarantee. Newly admitted students must submit their *Statement of Intent to Register* (SIR) 24 hours before they apply for housing online. The housing application for fall opens March 1, 2020 and guaranteed students must apply by 4:00 p.m. (Pacific Time) May 1, 2020 to receive a guaranteed housing offer. Non-guaranteed students can apply at any time after March 1, 2020 to get on the housing waitlist.

Students who are eligible service members, reservists and veterans are guaranteed an offer of on-campus housing. Visit the UCI Veteran Services Center website (<http://www.veteran.uci.edu/>) for information or call 949-824-3500.

---

### **Alternative Housing on the UCI Campus**

Vista del Campo, Vista del Campo Norte, Camino del Sol, Puerta del Sol and Plaza Verde Apartments are on-campus housing complexes privately owned and managed by American Campus Communities. Vista del Campo, Vista del Campo Norte and Puerta del Sol offer furnished apartments with individual leases for UCI undergraduate and graduate students who are single or married/domestic partners (but without children).

Camino del Sol and Plaza Verde Apartments serve single UCI undergraduate students only. Freshmen are not eligible to live in the American Campus Communities. Community information can be found online (<http://housing.uci.edu/acc/>) (go to [housing.uci.edu/acc](http://housing.uci.edu/acc/) (<http://housing.uci.edu/acc/>) for links) or call 949-326-5600 for more information.

---

### **Housing Administrative Services**

Services are available to assist students during the application and contracting process, as well as those looking for off-campus housing. The Anteater Housing Network, an online housing and roommate finder, provides easy access to listings of local rental properties as well as message boards to find roommates, sublets, buy/sell furniture and more. Students must log in with their UCI NetID and password to view listings. For more information, contact a Housing Advisor at 949-824-6811, send email to [housing@uci.edu](mailto:housing@uci.edu) or visit the Off Campus Housing website (<http://www.housing.uci.edu/och/>).

## Registration and Other Procedures

Except where noted, all information applies to both undergraduate and graduate students. Additional information concerning registration and academic policies applying only to graduate students is presented in the Graduate Division section of the *Catalogue*.

### Schedule of Classes and Registration Information

The *Schedule of Classes* contains current class offerings including time, room, instructor, capacity, number of enrolled students, number of students on the waitlist, Web links, status (open, waitlisted, full), and more. Access the *Schedule of Classes* on the University Registrar's website (<http://www.reg.uci.edu/>). The *Schedule of Classes* is available just prior to the beginning of each quarter's registration period (six weeks before the end of the current quarter).

The University Registrar's website (<http://www.reg.uci.edu/>) also includes registration and related information such as quarterly academic calendars, final examination schedules, and the Academic Honesty policy. The University Registrar's website (<http://www.reg.uci.edu/>) is the most timely source of information on new or changed policies, procedures, tuition and fees that could not be included in the *Catalogue* because of the latter's annual publication schedule.

### Registration Procedures

To receive academic credit for regular courses and other supervised instruction or research, a student must be officially registered prior to undertaking such activities. **The registration process consists of two steps: payment of tuition and fees and enrollment in classes.**

A Quarterly Academic Calendar of dates for enrollment and payment of tuition and fees is available on the University Registrar's website (<http://www.reg.uci.edu/>).

The general procedures for registration are:

1. Consult the appropriate academic advisor to develop an approved program of study. Secure necessary authorizations for courses that require special approval. New undergraduate students entering in the fall should attend one of the Student-Parent Orientation Program (SPOP) (<http://www.orientation.uci.edu/schedules.php?type=spop>) sessions during the summer for academic advising and enrollment.
2. Enroll in classes during the published registration period.
3. Pay required tuition and fees online or to the Central Cashier on or before the published deadline. Other outstanding obligations must be satisfied at this time also.

### Enrolling in Classes

Using WebReg, students may add and drop classes, inquire about open sections, change their grading option or unit value for a variable unit course, put themselves on an official waiting list, and list their confirmed class schedule. Immediate feedback on the availability of a class and a student's eligibility to enroll is provided. This includes course restrictions that may be placed or removed at any time throughout the enrollment periods by the department offering the course. Complete information about WebReg is available on the University Registrar's website (<http://www.reg.uci.edu/>).

Students must enroll in classes before the end of the second week of instruction. Students enrolled in zero (0) units at the close of business at the end of the second week of instruction are assessed a \$50 late enrollment charge.

### Payment of Tuition and Fees

Tuition and fees are assessed quarterly and appear on ZOT Account Online (<https://zotaccount.uci.edu/>). Students who do not pay all required tuition and fees online or to the Central Cashier by the published fee payment deadline are subject to a \$50 late payment charge.

### Late Registration

The student is subject to *both* late charges if tuition and fees are not paid online or to the Central Cashier and the student does not enroll in classes by the registration deadlines, published in the Quarterly Academic Calendar on the University Registrar's website. (<http://www.reg.uci.edu/>)

Students who have not paid tuition and fees and/or have not enrolled in classes by 4 p.m. at the end of the third week of instruction will lose their student status. Visit the University Registrar's website (<http://www.reg.uci.edu/>) for more information on the loss of student status.

To avoid the expense and inconvenience of late registration, students are urged to enroll and pay tuition and fees well before the published registration deadlines. Students with financial need should make advance arrangements with the Office of Financial Aid and Scholarships, or another source, to have funds available when tuition and fees are due.

Late registration (payment of tuition and fees and/or enrollment in classes) is permitted only in exceptional circumstances with the authorization of the student's dean. A student who is allowed to apply late and, as a result, must pay tuition and fees and enroll late, is required to pay both late charges.

### Change of Class Enrollment

Once instruction begins, a student may add or drop classes, change the unit value of a variable unit course, or change the grading option via WebReg.

Generally, an undergraduate student may not enroll in more than 20 units or fewer than 12 units of course work during a given quarter without the permission of the student's academic dean or, for undecided/undeclared students, the Dean of the Division of Undergraduate Education. However, during initial enrollment, undergraduate enrollment will be limited to 18 units. The maximum returns to 20 units during Open Enrollment. Changes to Pass/Not Pass grading must not cause the student to exceed the limitations to Pass/Not Pass enrollment. See the Pass/Not Pass section.

Graduate students may not enroll in more than 16 or fewer than eight units of graduate or upper-division credit without prior approval of the departmental graduate advisor.

Students may add courses through the end of the second week of instruction via WebReg. After the second week of instruction, an Enrollment Exception request is required.

Students may drop courses through the end of the second week of instruction via WebReg. After the second week of instruction through the end of the sixth week of instruction, an Enrollment Exception request is required.

Beginning the seventh week of instruction through the end of instruction, withdrawing from a course will result in the student receiving a W grade. W grades carry no grade points and are not calculated in the UC GPA.

Students may change the grading option and/or unit value of a course through the end of the second week of instruction via WebReg. After the second week of instruction through the end of the sixth week of instruction, an Enrollment Exception request is required.

An Enrollment Exception request requires the authorization of the dean or equivalent of the school or academic unit offering the course and the dean or equivalent of the student's major. The authorization of the instructor may also be required when adding a course or changing the unit value of a variable unit course. Detailed information on Enrollment Exception requests is available on the University Registrar's website (<http://www.reg.uci.edu/>).

Individual courses may occasionally have unique deadlines due to course impaction or instructional needs. Students should refer to the *Schedule of Classes* for information on specific courses.

Students are responsible for their enrollments. They must officially drop or withdraw from classes they have ceased attending. Students cannot simply discontinue attendance in a class. Adds, withdrawals, and changes to class enrollment are not permitted after the last day of instruction.

## Withdrawal from the University

Undergraduate students who pay tuition and fees for a regular academic quarter and then decide to withdraw from the University must submit a Withdrawal form to the University Registrar's Office after obtaining the signatures of their academic dean (or the Dean of the Division of Undergraduate Education, for undecided/undeclared students). Medical students should submit the form to the Student Affairs Office in the School of Medicine. Law students must visit the School of Law Registrar's Office to obtain and submit the withdrawal form. This form serves two purposes: (1) a refund of tuition and fees, if applicable (see the Tuition and Fee Refund section); and (2) automatic withdrawal from classes.

The effective date of withdrawal is used in determining the percentage of tuition and fees to be refunded. This date is normally the date that the student submits the form to the appropriate dean for approval.

A W grade, indicating "withdrawal," will be recorded for each course in which enrollment is withdrawn, if the student's effective date of withdrawal is after the end of the sixth week of classes. (See W grade in the Grading System section.)

A graduate student in good academic standing who wishes to withdraw and intends to return within one year should submit both the Withdrawal form and an application for a Leave of Absence. Further information appears in the Graduate Division section.

New undergraduate students are encouraged to seek advice from their admissions or academic counselor to understand the consequences of withdrawal and their eligibility to return.

If an undergraduate student plans to leave the University after completing all academic work for the latest quarter of enrollment and has not paid tuition and fees for the next quarter, a formal notice of withdrawal is not necessary.

## Lapse of Status

A student's status may lapse for the following reasons: Failure to pay required tuition and fees by the prescribed deadline; failure to respond to official notices; failure to settle financial obligations when due or to make satisfactory arrangements with Campus Billing Services; failure to complete the admission health requirements; or failure to comply with admission conditions.

Each student who becomes subject to lapse of status is given advance notice and ample time to deal with the situation. However, if the student fails to respond to initial notices, action will be taken without further notice. A "hold" will be placed on all of the student's records and the student will be entitled to no further services of the University except assistance toward clearing the hold. A student must satisfy the conditions which caused the lapse of status before the hold can be cleared.

## Enrollment at Other Institutions

Various programs exist that enable currently registered UCI students in good standing to take courses at other UC campuses, as well as at California State University and California Community College campuses. More information is available on the University Registrar's website (<http://www.reg.uci.edu/>) and from the academic advising offices.

## Enrollment in UCI Division of Continuing Education

If a UCI student wishes to enroll in a UCI Division of Continuing Education course concurrently with enrollment in regular courses, the entire program of study must be approved in advance by the dean of the student's school (the Dean of the Division of Undergraduate Education, for undecided/undeclared students; the Dean of the Graduate Division, for graduate students). Fee information is available from the UCI Division of Continuing Education Registration Office.

## Change of Major

Each School or program has its own standards for change of major. Once a student selects a major, or decides to change majors, the student should visit the academic advising office for their prospective major to obtain current information about prerequisites, program planning, and policies and procedures. For most majors, students may request a change of major by submitting an online application through StudentAccess. Further information and a list of excluded majors is available on the University Registrar's website (<http://www.reg.uci.edu/>).

All Schools with exceptional requirements have major-change criteria approved by the Academic Senate and published on the UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu/>). Students changing majors may meet the approved major-change criteria of the unit they wish to enter that are in place at the time of their change of major or those in effect up to one year before.

## Transcripts and Verifications

### Retention of Student Records

The University Registrar's Office maintains a permanent record of academic work completed by each student. Support documents for the academic record are kept for one year.

Students are strongly advised to carefully check their academic record quarterly. (Student copies of the academic record are available from the University Registrar's Office shortly after the close of each quarter.) Discrepancies in the academic record should be reported to the University Registrar immediately. After one year, it is assumed that the student accepts the accuracy of their academic record, and supporting source documents are destroyed.

Student academic records may not be changed after one year or, in some cases, in less than one year if Academic Senate regulations specify a shorter time limit. For example, the notation "NR," which means that no grade has been reported, must be removed within one quarter of subsequent enrollment or it will automatically be converted to the grade "F" (Fail), "NP" (Not Pass), or "U" (Unsatisfactory), whichever is appropriate. Similarly, an "I" grade (Incomplete) will convert to either an "F" (Fail), "NP" (Not Pass), or "U" (Unsatisfactory), whichever is appropriate, after remaining on the student's record for 12 months. Both policies are defined under Senate Regulation IR A345.

### Transcript of Records

The official transcript of a student's academic record will be released only upon receipt of a signed request from the student authorizing the release. All outstanding debts to the University (with the exception of long-term financial aid loans not yet due and payable) must be paid in full before a transcript will be released.

Requests for transcripts by anyone other than the student whose transcript is being sought can be honored only (1) if the request is accompanied by a written authorization signed by the student whose transcript is sought; and (2) upon approval of the University Registrar.

For students subject to the one-time document fee, there is no additional cost for official transcripts. This includes current students, alumni, and former students. For students in self-supporting graduate programs, who are not subject to the one-time document fee, there is a \$17 fee for each official transcript. For transcript orders placed online by all students, a \$2.25 service charge is assessed by the National Student Clearinghouse for each unique order. See the instructions on the University Registrar's website (<http://www.reg.uci.edu/>).

Unofficial transcripts are available, free of charge, at the University Registrar's Office, to students who present photo identification. Currently enrolled students can view their unofficial transcript in StudentAccess at the University Registrar's website (<http://www.reg.uci.edu/>).

### Verification of Student Status

The University Registrar's Office provides verifications of student status. Verifications may be needed for reference checks, bank loans, applications for good-student-driver insurance rates, and Social Security payments. There is a \$17 fee for each verification, however verifications for the purpose of student loan deferments are free of charge. Instructions are available on the University Registrar's website (<http://www.reg.uci.edu/>). For verification purposes, enrollment in 12 units or more in regular sessions is considered full-time status; enrollment in 6.0–11.9 units is considered half-time status; enrollment in 5.9 units or less is considered less than half-time status. Enrollment in six units between all three summer sessions will be considered full-time.

## Readmission

### Undergraduate Student Readmission

Students are strongly urged to consider the readmission policy in formulating plans for leaving or returning to UCI. Every effort will be made to readmit UCI students who were in good academic standing at the time they ceased attending and who have filed readmission applications by the deadline.

Former UCI students seeking readmission must contact the academic advising office of the School or program which offers their intended major to initiate an electronic readmission application. A nonrefundable \$70 Application Fee will be applied to the student's ZOTBill.

Readmission is subject to dean's approval and campus deadlines (Aug. 1 for fall quarter, Nov. 1 for winter quarter, and Feb. 1 for spring quarter).

New undergraduate students who cancel registration prior to the first day of the quarter must reapply to UCI; they are not eligible to file for readmission as described above.

If a student has been academically disqualified from the University or has left the University while on probation or is subject to disqualification, or has lost their student status, the student must apply for readmission.

Transcripts for courses taken at other institutions must be submitted to both the Office of Admissions and the academic advising office of the School or program which offers the intended major of the student applying for readmission.

### Graduate Student Readmission

A graduate student who withdraws and has not been granted a leave of absence approved by the Dean of the Graduate Division is considered to have lapsed student status (i.e., no longer has student status). A student whose status has lapsed must re-apply to a graduate program and can resume graduate study only if readmitted; readmission is not guaranteed. The online *Application for Graduate Study*, including the nonrefundable application fee, must be submitted by the published deadline for graduate admission applications. Refer to the statement on readmission which appears in the Graduate Division section for additional information.

## Commencement

UCI Commencement (<http://www.commencement.uci.edu/>) ceremonies are held each June for all students who graduate any quarter of that academic year. The School of Law ceremony (<http://www.law.uci.edu/events/commencement/>) is held in May. The School of Medicine (<http://www.meded.uci.edu/student-life/commencement.asp>) ceremony is held on the Saturday following Memorial Day. Additional information is available on the Commencement website (<http://www.commencement.uci.edu/#/>).

**Application for Graduation.** In order to receive a degree, an undergraduate student must submit an online Application for Graduation via the StudentAccess link on the University Registrar's website (<http://www.reg.uci.edu/>) no later than the published deadline. Graduate students must submit their advancement to Graduate Division. Specific deadline dates for filing the application and advancement are established quarterly so that candidates' academic records can be reviewed to verify that all graduation requirements have been met. Students should contact their academic advising office for deadline and degree audit information.

**Graduation *in Absentia*.** Undergraduate students planning to graduate after a period of absence from the University must graduate *in absentia*. To graduate *in absentia*, the student must apply to graduate via the StudentAccess link on the University Registrar's website (<http://www.reg.uci.edu/>). Upon degree certification, which takes place six weeks after the end of the quarter, a Graduation *in absentia* filing will be submitted on behalf of the student. The student will not be subject to tuition and fees. The student will be required to pay the readmission fee only if the period of absence was for more than one certifying term.

**Graduate Hooding Ceremony.** Students completing a Ph.D. or M.F.A. are eligible to walk in the Graduate Hooding Ceremony. Students are required to meet all filing deadlines (<https://grad.uci.edu/academics/filing-deadlines.php>) and satisfy degree requirements in order to participate in the ceremony. Registration for eligible students opens in late March or early April; specific dates are listed on the Commencement website. (<http://www.commencement.uci.edu>)

**Diplomas.** Students are advised by email when their diplomas are available, which is typically three months after the quarter in which the student graduated ends. Students may pick up their diplomas at the University Registrar's Office or authorize the University Registrar to send their diplomas by USPS certified mail to domestic addresses, or USPS registered mail to addresses outside the United States. All outstanding debts due to the university, with the exception of long-term financial aid loans, must be paid in full before a student's diploma will be released.

## Requirements for a Bachelor's Degree

### On This Page:

- Catalogue Rights
- First-Year Integrated Program (FIP)

- Minor Programs
- Application for Graduation

There are four groups of requirements that must be met to earn a baccalaureate degree from UCI: general UC requirements; UCI requirements, including the General Education (GE) requirement; school or program requirements; and degree-specific requirements.

School or program and major-specific requirements are described in full in the academic unit sections.

Students with identified learning and/or physical disabilities, including language-acquisition problems, are eligible to receive support through the Disability Services Center; telephone 949-824-7494 (voice), 824-6272 (TTY), email: dsc@uci.edu. Staff can assist students from the time they are admitted to UCI until they graduate.

## Catalogue Rights

Students enrolled at UCI from their freshman year may elect to meet as graduation requirements (UC, UCI, school, and major): (1) those in effect at the time of entrance, or (2) those subsequently established after entrance.

A readmitted student who has not been enrolled at UCI for three or more consecutive quarters (excluding summer sessions) must adhere to the graduation requirements: (1) in effect for the quarter in which the student is readmitted; or (2) those subsequently established.

Students transferring from other collegiate institutions may elect to meet as graduation requirements either: (1) those in effect at the time of enrollment at UCI; (2) those subsequently established; or (3) those in effect at UCI when the student first entered a previous, accredited collegiate institution, provided that the student has been continuously enrolled in a collegiate institution and that entry was not more than four years prior to the time of enrollment at UCI.

A transfer student who has had a break of enrollment of two consecutive semesters or three consecutive quarters (excluding summer sessions) may follow the requirements in effect at UCI: (1) at the time of enrollment at UCI; (2) those subsequently established; or (3) those in effect at the time of reentry into a previous, accredited collegiate institution, provided that reentry was not more than four years prior to enrollment at UCI.

A transfer student who has been continuously enrolled in college for more than four years prior to transfer may use: (1) the requirements in effect at the time of enrollment at UCI; (2) those subsequently established; or (3) those in effect at UCI four years prior to enrollment at UCI.

All students, whether enrolled at UCI from their freshman year, readmitted, or transfer, may elect to fulfill general education requirements as specified above, independent of how they choose to meet all other graduation requirements (UC, UCI [with the exception of general education], school, and major).

Students choosing to complete a minor, whether enrolled at UCI from their freshman year, readmitted, or transfer, may elect to fulfill minor requirements as specified above, independent of how they choose to meet all other graduation requirements (UC, UCI, school, and major).

Transfer students who complete one of the following options will be considered to have met the total UCI general education requirement except the upper-division writing requirement: (1) students who transfer from a four-year institution and who have completed the general education requirements of that college, upon approval of petition; (2) students who transfer from another UC campus and provide official documentation that they have met the general education requirements of that campus; (3) students who transfer from another UC campus and are in the process of completing the general education requirements of that campus, upon approval of petition, and who subsequently complete the remaining requirements of that campus at UCI; or (4) California Community College transfer students who have completed the Intersegmental General Education Transfer Curriculum. Transfer students may also elect to complete the UCI general education requirement.

## First-Year Integrated Program (FIP)

University Studies 13–17 are three-quarter multidisciplinary sequences for freshmen or lower-division students only. These integrated courses are designed to introduce students to the ways different disciplines approach similar problems and to provide a freshman learning community experience. Successful completion of all three quarters will satisfy several courses toward partial fulfillment of different general education (GE) requirement categories. Additional information is available in the First-Year Integrated Program section of this *Catalogue*.

## Minor Programs

For certification in a minor, a student must obtain a minimum overall grade point average of at least C (2.0) in all courses required for the minor program. No more than two courses applied to a minor may be taken Pass/Not Pass. Completion of the minor is noted on a student's transcript. (Students are *not* required to minor in a program in order to graduate from UCI.)

## Application for Graduation

In order to receive a degree, an undergraduate student must submit an online Application for Graduation via the Student Access link at the University Registrar's Office website (<http://www.reg.uci.edu/>) no later than the published deadline. Specific deadline dates for filing are established quarterly so

that candidates' academic records can be reviewed to verify that all graduation requirements have been met. These dates vary among academic units. Students should contact their academic counseling office for deadline and degree audit information.

## General Education (GE) Requirement

UCI is committed to the values of a liberal education. One component of that commitment is the requirement that all undergraduates complete a set of general education (GE) requirements. General education courses introduce students to a range of ideas and intellectual activities that engage UCI scholars, providing both scope and balance to a University degree beyond the study of a specific major.

The general education requirements are intended to help undergraduates place the specialized study undertaken in the major within a broader context. They are designed to cultivate the skills, knowledge, and understanding that will make students effective contributors to society and the world. The general education requirements should enable UCI undergraduates to apply the abilities developed in their studies to identify significant issues, gather and evaluate available evidence, analyze alternatives, reach conclusions, communicate the results effectively, and take considered actions.

The general education requirement is a *graduation* requirement and, with the exception of the lower-division writing requirement, need *not* be satisfied during only the lower-division years. To satisfy the general education requirement, courses are required in each of the following categories:

- I. Writing (two lower-division plus one upper-division course)
- II. Science and Technology (three courses)
- III. Social and Behavioral Sciences (three courses)
- IV. Arts and Humanities (three courses)
- V. Quantitative, Symbolic, and Computational Reasoning, **with subcategories Va and Vb** (three courses that may also satisfy another GE category)
- VI. Language Other Than English (one course)
- VII. Multicultural Studies (one course that may also satisfy another GE category)
- VIII. International/Global Issues (one course that may also satisfy another GE category)

The specific courses in each area that students may use to satisfy the requirements are listed below. When a general education course is cross-listed with another course, that course also is available for fulfillment of the requirement. Students should refer to the *Catalogue* descriptions of the courses to determine which are cross-listed.

A course qualifies for a particular GE category based on its content rather than on the academic unit that offers it. However, to increase students' exposure to a variety of disciplinary approaches, students are encouraged to choose GE courses from a wide range of schools and departments outside of the student's major.

NOTE: The following list of courses approved for GE is effective for the 2020-21 academic year only. Because changes occur each year, students should consult the GE list annually to ensure that the courses they enroll in are on the list. GE credit is awarded for a course only if it appears on the list during the academic year when it is taken. To check the GE course offerings in a particular quarter, consult the *Schedule of Classes* on the University Registrar's website (<http://www.reg.uci.edu/>).

## General Education Categories

### I. Writing

Because of the importance of visual, oral, electronic, and written communication in every academic discipline, in the professions, and in public life, the University is committed to developing a variety of communication abilities in students at all levels and in all areas. The Writing Requirement expresses this broad commitment, but the concern for and attention to rhetorically effective, accurate writing is expected in all courses.

The Writing Requirement consists of two courses at the lower-division level beyond the UC Entry Level Writing requirement and one upper-division course in a discipline.

Except where otherwise noted below, students must satisfy the UC Entry Level Writing requirement prior to fulfilling the UCI writing requirement.

Students who have not completed the lower-division writing requirement before the beginning of their seventh quarter at UCI will be subject to probation. Students transferring to UCI normally should have satisfied the lower-division writing requirement before entering UCI; if, however, they have not, they must complete it within their first three quarters of enrollment or they will be subject to probation. Academic English/English as a Second Language students must complete the lower-division writing requirement before the beginning of the seventh quarter following the completion of their AE/ESL courses or they will be subject to probation.

The third course must be an upper-division writing course, and it must be taken only after the successful completion of the lower-division requirement.

Students enrolled at UCI may take only UCI courses in satisfaction of the lower-division and upper-division writing requirements. Continuing UCI students may not take summer courses at another institution to satisfy lower-division or upper-division writing requirements.

After completing this GE requirement, successful students should be able to do the following:

### Lower-division writing

- demonstrate rhetorically effective, accurate academic writing and communication across a variety of contexts, purposes, audiences, and media using appropriate stance, genre, style, and organization;
- develop flexible strategies for generating, revising, editing, and proofreading texts;
- develop abilities in critical reading across a variety of genres and media;
- and demonstrate information literacy skills by locating, evaluating, and integrating information gathered from multiple sources into a research project.

### Upper-division writing

- demonstrate rhetorically effective, discipline-specific writing for appropriate academic, professional, and public audiences;
- demonstrate, at an advanced level of competence, use of discipline-specific research methods, genres, modes of development, and formal conventions;
- and demonstrate advanced information literacy skills by locating, evaluating, and integrating information gathered from multiple sources into discipline-specific writing.

### Ia. Lower-Division Requirement

The two courses taken to fulfill the lower-division requirement must be completed with a minimum grade of C (or a Pass or Credit grade equivalent to C). Students may select from the courses specified below:

1. WRITING 39B Critical Reading and Rhetoric and WRITING 39C Argument and Research.
2. WRITING 37 Intensive Writing and WRITING 39C Argument and Research. Recommended students only.
3. Completion of the writing component of Humanities Core with a grade of C or better in (HUMAN 1AS or HUMAN H1AS or HUMAN 1BS or HUMAN H1BS or HUMAN 1BES), and in HUMAN 1CS or HUMAN H1CS.
4. Students who complete WRITING 37 or WRITING 39B with a grade of B (3.0) or better may substitute as the second course of the lower-division writing requirement one of the following courses in creative writing: WRITING 30 or WRITING 31.
5. WRITING 39B and completion of a First-Year Integrated Program (FIP) sequence, with a grade of C (or Pass) or better in the third quarter of the sequence.

### Ib. Upper-Division Requirement

The course taken to fulfill the upper-division requirement must be completed with a minimum grade of C (or a Pass or Credit grade equivalent to C). The requirement may be satisfied by completing one of the following options:

1. An upper-division course designated on a list of approved courses in the quarterly *Schedule of Classes* on the University Registrar's website (<http://www.reg.uci.edu/>). NOTE: All courses approved to fulfill the upper-division writing requirement should have a "W" suffix. Students are encouraged to consult the *Schedule of Classes* or their advisor to determine the current upper-division writing requirement course offerings. If a course on the approved list is offered without the "W" suffix, it does not satisfy the upper-division writing requirement.
2. Majors in the School of Biological Sciences, Physics majors, and Pharmaceutical Sciences majors satisfy the upper-division writing requirement in the manner specified in those academic unit sections of the *Catalogue*.

Students who fail to attain the required grades in the courses taken in fulfillment of the writing requirement should refer to the Academic Regulations and Procedures section for further information.

Courses with an asterisk (\*) can meet one or more GE requirement. Click on the course for more information.

## II. Science and Technology

Understanding the nature of scientific inquiry and the operation of the biological, physical, and technological world is essential for making personal and public policy decisions in a technological society.

After completing this GE requirement, successful students should be able to do the following:

- demonstrate a broad understanding of the fundamental laws of science, the principles underlying the design and operation of technology, and the interrelations among science and technology disciplines;
- demonstrate a broad understanding of various natural phenomena that surround and influence our lives;
- describe how scientists approach and solve problems;
- solve problems and draw conclusions based on scientific information and models, using critical thinking and qualitative and quantitative analysis of data and concepts;
- and explain the scope and limitations of scientific inquiry and the scientific method.

Courses with an asterisk (\*) can meet one or more GE requirement. Click on the course for more information.

Students must complete three courses from the following list:

**III. Social and Behavioral Sciences**

Courses will focus on principles, sources, and interpretations of human behavior and on how people organize, govern, understand, and explain social life. This category includes the analysis of human behavior at all levels, from the individual to collective social, economic, and political life, and on the scientific methods used in the acquisition of knowledge and the testing of competing theories.

After completing this GE requirement, successful students should be able to do the following:

- demonstrate knowledge and understanding of principles, sources, and interpretations of human behavior and how people organize, govern, understand, and explain social life;
- demonstrate an understanding of contemporary and historical perspectives on human behavior;
- understand and explain the scientific methods used in the acquisition of knowledge and the testing of competing theories in the social and behavioral sciences;
- and critically evaluate methods, findings, and conclusions in the research literature on human behavior.

Courses with an asterisk (\*) can meet one or more GE requirement. Click on the course for more information.

Urban Politics and Policy

## IV. Arts and Humanities

Study of the Arts and Humanities expands the student's sense of diverse forms of cultural expression, past and present. Students develop their critical capacity as they discover how meaning is created and experience variously interpreted.

After completing this GE requirement, successful students should be able to do the following:

- demonstrate knowledge and understanding of how visual and verbal communication is used in literature and film, art and music, and philosophy and history;
- communicate an understanding and appreciation of diverse forms of cultural expression, past and present;
- understand and explain the research methods used in the acquisition of knowledge and the testing of competing theories in the arts and humanities;
- and think critically about how meaning is created and how experience is variously interpreted.

Courses with an asterisk (\*) can meet one or more GE requirement. Click on the course for more information.

Students must complete three courses from the following list:

## V. Quantitative, Symbolic, and Computational Reasoning

This category consists of two subcategories. Students are required to take one course in each of the subcategories and an additional course from either subcategory, for a total of three courses. A course approved for the GE requirement in category V and also approved for the GE requirement in a category other than V may be used to satisfy the requirements of both categories simultaneously. However, courses approved for both subcategories in category V may only be used once to satisfy one of the subcategories. The two subcategories are indicated as **Va** and **Vb**.

### Va. Quantitative Literacy

Courses in this category focus on the quantitative description, evaluation, and assessment of events occurring in nature or in human social and political systems. This includes quantitative measurements made or data collected to study such events, analysis of the data, and implications of the analysis for our understanding of the events.

After taking a course in category Va, successful students will be able to do all of the following:

- identify appropriate tools for quantitative analysis of processes or events;
- have a basic familiarity with fundamental principles underlying quantitative descriptions of natural or social processes;
- and be able to do one or more of the following:
  - evaluate studies and reports that assess risk and probability in everyday life;
  - use models of natural phenomena to make quantitative predictions of future behavior or events;
  - use models of economic and social structures to make quantitative predictions of future behavior or events.

Courses with an asterisk (\*) can meet one or more GE requirement. Click on the course for more information.

## Vb. Formal Reasoning

Courses in this category focus on aspects of formal reasoning including symbolic logic, mathematical modeling, and algorithmic reasoning.

After taking a course in category Vb, successful students will be able to do all of the following:

- understand the concept and purpose of formal languages such as propositional and first-order logic, simple programming languages, mathematical models or linguistic formalisms;
- possess an elementary grasp of the power and limits of formal methods; and be able to do one or both of the following:
  - apply formal tools of logic or mathematics to the analysis and evaluation of everyday and/or scientific arguments, texts, and communicative situations;
  - apply basic algorithms for the generation of logical deductions, linguistic structures, or computational processes.

Courses with an asterisk (\*) can meet one or more GE requirement. Click on the course for more information.

**VI. Language Other Than English**

Study of a language other than English expands students' horizons by encouraging understanding of another culture through its language and heightens awareness of one's own language through the investigation of another linguistic system.

After completing this GE requirement, successful students should be able to do the following:

- demonstrate competency in reading, writing, speaking, and listening in a non-English language;
- demonstrate an understanding of another (non-English speaking) culture through its language;
- and demonstrate an understanding of one's own language through the investigation of another, non-English linguistic system.

Students must demonstrate competency in a language other than English (includes American Sign Language) by completing one of the following six options:

- College-level course work equivalent to UCI's third quarter of study in a language other than English. UCI courses approved to satisfy this requirement are:

Courses with an asterisk (\*) can meet one or more GE requirement. Click on the course for more information.

*For information on UCI's prerequisites, course placement policies, and the grade required to advance to the next level of instruction, consult the School of Humanities (Language Other Than English Placement and Progression) section in this Catalogue.*

- Credit for three years of high school study or its equivalent in a single language other than English with a C average or better in the third year.
- A score of 3, 4, or 5 on a College Board Advanced Placement Examination in a language other than English. NOTE: Students who earn a 3, 4, or 5 on the AP Chinese Examination must take the UCI Chinese placement examination to determine course credit.
- A score of 570 or better on a College Board SAT Subject Test in a language other than English, with the exception of the test in Modern Hebrew for which a score of 500 or better is required.
- Completion of an approved course of study through the UC Education Abroad Program (EAP). Careful planning is required to ensure that this requirement is fulfilled. Check with an EAP counselor at the Study Abroad Center to determine the programs in countries that fulfill this requirement.
- The equivalent as determined by an appropriate and available means of evaluation. For information on availability of such examinations and testing schedules, consult the Academic Testing Center, 949-824-6207. If an appropriate means of evaluating competence in a non-English language of instruction does not exist, satisfactory completion, with a C average or better, of one year of formal schooling at the sixth grade level or higher in an

institution where the language of instruction is not English will meet the requirement. Appropriate documentation must be presented to substantiate that the course work was completed.

## VII. Multicultural Studies

This requirement develops students' awareness and appreciation of the history, society, and/or culture of one or more underrepresented groups in California and the United States.

After completing this GE requirement, successful students should be able to do one of the following:

- demonstrate knowledge of one or more historically underrepresented groups' culture, history, and development in California and the United States;
- demonstrate an awareness and appreciation of cultural differences and inequities;
- and demonstrate an understanding that cooperation and mutual understanding among all cultural groups is needed to interact successfully in a culturally diverse society.

Students must complete one course from the following list. In fulfilling category VII, students are encouraged to use courses that are also being used in fulfillment of other GE categories. For example, HUMAN 1C simultaneously satisfies category VII and a portion of category IV.

Courses with an asterisk (\*) can meet one or more GE requirement. Click on the course for more information.

## VIII. International/Global Issues

Courses in this category focus on significant cultural, economic, geographical, historical, political, and/or sociological aspects of one or more countries other than the United States.

After completing this GE requirement, successful students should be able to do the following:

- demonstrate specific knowledge of the cultural, historical, social, economic, scientific, and political aspects of one or more foreign countries, and the connections among these aspects;
- develop a broader understanding of the formation of different cultures and countries through the world;
- and be prepared to engage in positive interaction with peoples of different cultures and nationalities.

Students must complete one course from the following list. In fulfilling category VIII, students are encouraged to use courses that are also being used in fulfillment of other GE categories. In addition, category VIII may be satisfied by one quarter's participation in the UC Education Abroad Program (EAP) or one quarter's participation in an International Opportunities Program (IOP) with an approved IOP Credit Contract. Summer study abroad on an EAP or IOP (with approved IOP Credit Contract) satisfies this requirement when the program is at least five weeks long and the student completes at least one course worth at least four quarter units.

Courses with an asterisk (\*) can meet one or more GE requirement. Click on the course for more information.

Or, students may complete one of the following fourth-quarter language options:

1. Credit for four years of high school study or its equivalent in a single language other than English with a C average or better in the fourth year.
2. A score of 4 or 5 on a College Board Advanced Placement Examination in a language other than English. NOTE: Students who earn a 3, 4, or 5 on the AP Chinese Examination must take the UCI Chinese placement examination to determine course credit.
3. A score of 620 or better on a College Board SAT Subject Test in a language other than English, with the exception of the test in Modern Hebrew for which a score of 540 or better is required.
4. The equivalent as determined by an appropriate and available means of evaluation. For information on availability of such examinations and testing schedules, consult the Academic Testing Center, 949-824-6207. If an appropriate means of evaluating competence in a non-English language of instruction does not exist, satisfactory completion, with a C average or better, of two years of formal schooling at the sixth grade level or higher in an institution where the language of instruction is not English will meet the requirement. Appropriate documentation must be presented to substantiate that the course work was completed.

## University Requirements

### English (UC Entry Level Writing)

The Entry Level Writing Requirement (ELWR) is a graduation requirement for the University of California. Every undergraduate must demonstrate proficiency in writing. The Entry Level Writing requirement may be satisfied *prior to enrollment* in any of the following ways:

1. Score 3 or higher on the College Board Advanced Placement (AP) Examination in English (Language or Literature); *or*
2. Score 5 or higher on the International Baccalaureate (IB) Higher Level Examination or score 6 or higher on the IB Standard Level Examination in English (Language A only); *or*
3. Score 680 or higher on the Evidence-Based Reading and Writing section of the new SAT exam (effective for students enrolling in fall 2018/students applying to UC in November 2017); *or*
4. Score 680 or higher on the Writing Section of the SAT Reasoning Test (last administered January 2016); *or*
5. Score 30 or higher on ACT English Language Arts; *or*
6. Score 30 or higher on ACT Combined English/Writing (last administered June 2015); *or*
7. Complete with a grade of C or better a transferable college course in English composition worth four quarter or three semester units.

The UC Entry Level Writing requirement may be met *after admission* by one of the following options:

1. Passing the UC Analytical Writing Placement Examination given in the spring every year at test centers throughout the state to all entering freshmen admitted for fall quarter (see Placement Testing). Freshmen admitted to UC will receive detailed information in April about the exam. Freshman students who are not California residents may take the exam in the fall after they enroll. Transfer students who have not satisfied the UC Entry Level Writing requirement should contact the UCI Composition Program Office, 420 Humanities Instructional Building; telephone 949-824-6717.
2. Prior to enrolling in the University, complete with a grade of C or better a transferable college course in English composition worth four quarter or three semester units. (Once a student enrolls at a UC campus, courses from institutions other than UC may not be used to satisfy the Entry Level Writing Requirement.) Students who meet the University's basic requirements for minimal transfer eligibility, which include two transferable college courses in English composition, satisfy the Entry Level Writing Requirement.

NOTE: Students who have not met the requirement before entrance must satisfy the requirement before the beginning of their fourth quarter at UCI. Students who have not satisfied the requirement by that time will be ineligible to enroll for a fourth quarter.

The UC Entry Level Writing requirement may be met *after enrollment* by one of the following options:

1. Enrolling in Humanities Core writing courses designated "ES." (NOTE: Students held for UC Entry Level Writing and enrolled in the Humanities Core must enroll in an ES section of the Humanities Core during their first quarter. Successful completion of these writing courses with a letter grade of C or better will satisfy the requirement. Students who do not receive a letter grade of C or better in HUMAN 1AES in the fall quarter and who continue to be held for UC Entry Level Writing must enroll in HUMAN 1BES during the winter quarter and satisfy the requirement by earning a letter grade of C or better.)
2. Taking either WRITING 37, WRITING 39A, or WRITING 39AP and receiving a letter grade of C or better in the course.

Students enrolled in Essentials of Academic Writing (AC ENG 20A, AC ENG 20B, AC ENG 20C, AC ENG 20D) must enroll in WRITING 39A immediately after they are authorized to do so by the Academic English/English as a Second Language Program. Students with a score of 2, 3, or 4 from the UC Analytical Writing Placement Examination are also required to enroll in WRITING 39A; some students with these scores may be required to take the Academic English Placement Test before enrolling in WRITING 39A.

The Pass/Not Pass grade option may not be used to satisfy the UC Entry Level Writing requirement.

Students enrolled at UCI may take only UCI courses to satisfy the UC Entry Level Writing requirement. Continuing UCI students may not take summer courses at another institution to satisfy this requirement.

## American History and Institutions

This requirement may be met by one of the following options:

1. Completion in an accredited high school of a one-year course in United States history with a grade of C or better, *or* a half-year course in United States history and a half-year course in American government with grades of C or better; *or*
2. Achieving a score of 3,4, or 5 on the College Board Advanced Placement Examination in United States History; *or*
3. Achieving a score of 550 or better on the SAT Subject Test United States History; *or*
4. Presentation of a certificate of completion of the requirement at another California institution; *or*
5. Completion at UCI or another U.S. institution of one year of college-level United States history with grades of C or better, *or* one course in United States history and one in United States government with grades of C or better. Acceptable UCI courses: United States history—HISTORY 40A, HISTORY 40B, HISTORY 40C; United States government—POL SCI 21A.

## UCI Requirements

### Unit Requirement

Credit for a minimum of 180 quarter units, earned by examination, by other evaluation, or course work is required. A course normally offers four quarter units of credit.

### Grade Requirement

A minimum grade average of at least C (2.0) is required (1) overall, (2) in all of the courses required for the major program, and (3) in the upper-division courses required for the major program. Higher averages than this may be required only in honors programs. Students who fail to attain a C (2.0) average in courses required in the major program may, at the option of the major unit, be denied the privilege of pursuing a major program in that unit. In this context, “the courses required in the major program” are defined as the courses required for the major and offered by the program of the student’s major (or programs, in the case of an interdisciplinary or interdepartmental major). A major can include additional courses required for the major in this set, with the approval of the Council on Education Policy. In this case, the list of additional courses is published in the *Catalogue* with the requirements for the major.

### Residence Requirement

At least 36 of the final 45 units completed by a student for the bachelor’s degree must be earned in residence at the UCI campus. Exceptions to this rule may be allowed, with prior departmental approval, to students enrolled in the Education Abroad Program, the UCDC Academic Internship Program, the UC Center Sacramento Scholar Intern Program, or the International Opportunities Program with International Study Advance Contract.

#### On This Page:

- Transfer Students: Completion of the UCI General Education Requirement
- Intersegmental General Education Transfer Curriculum
- Intersegmental General Education Transfer Curriculum for STEM
- Transferability of Credit
  - Limitations on Transfer Credit
- UCI Division of Continuing Education
- Important Resources for California Community College Students

---

This section provides a guide for transfer students in understanding how their coursework from another collegiate institution applies to fulfilling UCI degree requirements. Transfer students should use this information in conjunction with the Requirements for a Bachelor’s Degree. Transfer students are required to meet University, general education, school, department, and major requirements described in the *Catalogue*. The courses and descriptions in this *Catalogue* may be used by prospective transfer students as a guide for selecting courses of similar content and purpose in their own institutions. No student who has taken a course which is accepted for credit by the Office of Undergraduate Admissions and has been mutually determined with a community college as being acceptable toward completion of the UCI general education requirement shall incur any loss of credit in satisfaction of the requirement.

Transfer students are *strongly* advised to check with the academic counselor in their prospective major or the UCI Office of Undergraduate Admissions about courses that may be used to satisfy UCI requirements.

## Transfer Students: Completion of the UCI General Education Requirement

The general education requirements specify the courses students must take or units they must accumulate in each area. However, each student should consider the general education recommendation for their major, as it may be more important to concentrate on completing the many prerequisites for the major that are screened for in the selection process. Students transferring to UCI must satisfy the UCI general education (GE) requirement by completing either:

1. The current UCI GE requirement;
2. one of the options listed in the Catalogue Rights section; or
3. the California Community College Intersegmental General Education Transfer Curriculum (IGETC); or
4. the California Community College Intersegmental General Education Transfer Curriculum for STEM.

Transfer students do not need to complete the UCI GE requirement prior to matriculating to UCI. The GE requirement, which must be completed prior to graduation, may be satisfied by college-level courses appropriate to UCI offerings and may be met *at any time* during the undergraduate years, *except* in the case of the lower-division writing requirement, which must be completed within the first three quarters of residency at UCI.

NOTE: UCI operates on the quarter system. For the purpose of counting courses for the UCI GE requirement, one semester course is equivalent to one quarter course, and two semester courses are equivalent to three quarter courses.

## Intersegmental General Education Transfer Curriculum

California Community College transfer students may satisfy the UCI GE requirement by completing the Intersegmental General Education Transfer Curriculum (IGETC). The IGETC is a series of courses that California Community College students may complete to satisfy the freshman/sophomore level general education requirements before transferring to UCI. Fulfillment of the IGETC does not satisfy the UCI upper-division writing requirement.

Students who do not complete IGETC prior to transfer may be eligible for partial certification from their community college. Partial certification is defined as completing all but two (2) courses on the IGETC pattern. **Warning:** Students need to meet minimum UC transfer admission requirements. Therefore, partial certification that acknowledges a deficiency in Area 1 and/or Area 2 may also indicate a student does not meet minimum transfer requirements.

Please note:

1. IGETC must be completed in total or partial IGETC certification must be completed prior to enrolling at UCI;
2. students are responsible for requesting IGETC certification from their community college; and
3. the IGETC certification should be submitted to the UCI Office of Undergraduate Admissions no later than the end of the first quarter of UCI enrollment.

Courses used to fulfill the IGETC must be completed with a grade of C or better. (Courses may also be taken on a Pass/No Pass basis provided Pass is equal to a letter grade of C or better.)

Lists of specific approved courses which may be taken in fulfillment of the IGETC are available from California Community Colleges and at the ASSIST website (<http://www.assist.org/web-assist/welcome.html>).

## Intersegmental General Education Transfer Curriculum

**Area 1. English Communication:** One course in English composition and one course in critical thinking/English composition.

**Area 2. Mathematical Concepts and Quantitative Reasoning:** One course.

**Area 3. Arts and Humanities:** Three courses with at least one from the arts and one from the humanities.

**Area 4. Social and Behavioral Sciences:** Three courses from at least two different disciplines, or an interdisciplinary sequence.

**Area 5. Physical and Biological Sciences:** One physical science course and one biological science course, at least one of which includes a laboratory.

**Area 6. Language Other Than English:** Proficiency equivalent to two years of high school courses in the same language.

## Intersegmental General Education Transfer Curriculum for STEM

IGETC for STEM is a pattern of courses that California Community College students may complete to satisfy the lower-division GE requirements before transfer to UCI. IGETC for STEM is a separate IGETC track available for students planning to major in science, technology, engineering, or mathematics. UC will accept IGETC for STEM only if:

- The earned associate degree for transfer (ADT) is at a California Community College that offers IGETC for STEM as an option for those degrees AND
- the UC major program or college accepts partial IGETC certification.

Note: IGETC and IGETC for STEM are not an admission requirement. Completing it does not guarantee admission to UCI.

## Transferability of Credit

The University of California awards unit credit for college courses completed at United States regionally accredited colleges and universities; or at a university recognized by the Ministry of Education (or higher-education authority/appropriate government agency) in another country that offers university-level academic degree program courses comparable to a U.S. associate's or bachelor's degree. To be accepted for credit, the courses must be comparable to those offered at any UC campus. All courses that meet the criteria are used in determining eligibility for admission. The transferability of coursework taken at other institutions for both newly admitted transfer students and for current UCI students who attend other institutions during summer sessions is determined by the Office of Undergraduate Admissions.

Although the Office of Undergraduate Admissions may award unit or subject credit for courses completed at another institution, the courses may not necessarily apply to specific UCI degree requirements (i.e., general education or major requirements). Contact a College, school or department advisor regarding specific credit applications and limitations. Also, be aware of the residence requirements, UCI Requirements section, which are specific to the College or School.

Courses for transfer must be reported on an official transcript from the original college/university and provided in a sealed envelope, or electronically submitted by a campus-acceptable vendor. UCI only accepts electronic transcripts from the following third party vendors: Parchment, Credentials eScript-Safe.

The UCI Office of Undergraduate Admissions mailing address is:

UCI Office of Undergraduate Admissions  
Attention Official Documents  
Irvine, CA 92697-1075

An official transcript must bear the institution's official seal and registrar's signature.

**Duplicate Credit is Prohibited.** Students may not receive unit credit or earn grade points for college courses in which the content duplicates material of a previously completed course or examination for which credit has already been granted, with the exception of the repeat of deficient (C-/D/F) course grades. Students should be advised that college courses taken before or while attending UC may duplicate AP, IB, and/or A-Level examinations. Additionally, exams may duplicate each other (for example AP and IB in the same subject area). If a student does duplicate an exam of the same subject content and/or a college course, we will award credit only once. Exceptions related to Advanced Placement and International Baccalaureate credit and repeat of deficient grades can be found in their respective sections.

## Limitations on Transfer Credit

Students will be granted up to 70 semester/105 quarter units of credit for lower-division coursework completed at any institution or combination of institutions. For units beyond the maximum, subject credit for appropriate coursework taken in excess of this unit limitation will be granted and may be used to satisfy requirements.

Please note:

1. Units earned through Advanced Placement, International Baccalaureate, and/or A-Level examinations are not included in the limitation and do not put applicants at risk of being denied admission.
2. Units earned at any University of California campus (summer, extension/continuing education, cross/concurrent, and regular academic year enrollment) are not included in the limitation but are added to the maximum transfer credit allowed and may put applicants at risk of being denied admission due to excessive units.

In addition, there is a limit to the number of units for which UC grants credit in the following areas:

- English as a Second Language courses: a maximum of 8 semester (12 quarter) units
- Physical education activity courses: a maximum of 4 semester (6 quarter) units

## UCI Division of Continuing Education

UCI Division of Continuing Education courses prefixed by XB, XD, XI, XR, XSB, and XSD are granted unit credit on the same basis as courses taken in residence at any accredited collegiate institution.

Students intending to transfer UCI Division of Continuing Education course credit for a degree at another college or university should verify acceptance of the course with that institution. Resident students of the University of California must obtain the consent of the dean of their school or college prior to enrolling for credit in a UCI Division of Continuing Education course. UCI Division of Continuing Education courses are not accepted as part of the

residence requirements of the University. Grades earned at UCI Division of Continuing Education may, though not in all instances, be calculated as part of the University GPA.

Note: Decisions regarding the acceptability of extension courses taken in institutions other than the University of California rest with the UCI Office of Undergraduate Admissions. Decisions regarding the applicability of such courses toward specific degrees and majors rest with the student's academic dean.

## Important Resources for California Community College Students

Students anticipating transfer to UCI from a California Community College are urged to consult with their community college counselors. The counselors, with the aid of that college's UC Transfer Course Agreement (UCTCA), can advise students about California Community College courses and units which will transfer to the University. In addition, staff in the UCI Office of Undergraduate Admissions can advise students about the transferability of courses. The ASSIST (<http://www.assist.org/>) site (<http://www.assist.org/>) provides information regarding:

- University of California Transfer Course Agreements.
- Selected Major Preparation Articulation Agreements for all California Community Colleges.
  - *The agreements list all lower division course requirements for select majors at UCI and the courses students can complete at their community colleges that satisfy these requirements.*
- Intersegmental General Education Transfer Curriculum (IGETC) course list.
  - *IGETC enables students at California Community Colleges to complete UCI General Education requirements before transfer.*

## School, Departmental, and Major Requirements

In addition to the University and UCI requirements listed above, each undergraduate student must satisfy the degree requirements for the major and, if applicable, the minor or concentration selected. UCI, school, and departmental or major and minor requirements may overlap; courses taken to fulfill a school or departmental requirement may also help fulfill the UCI general education requirement. Students are urged to make sure that they understand how many courses are permitted to satisfy more than one requirement. Information on specific degree requirements and courses is available in the academic unit sections of this *Catalogue*.

Students must declare a major by the time they reach junior status (90 units excluding college work completed prior to high school graduation), and should make certain that the background and the preparation prerequisite to junior and senior work in the major have been accomplished. Transfer students should read the section on Information for Transfer Students: Fulfilling Requirements for a Bachelor's Degree.

Students should note that with the exception of courses designated Pass/Not Pass Only, courses taken Pass/Not Pass may *not* be used to satisfy specific course requirements of the student's school and major, unless authorized by the appropriate dean. Additional information on grading is located in the Academic Regulations and Procedures section.

## Supplementary Educational Programs

Information on Summer Session, the Division of Continuing Education, and ROTC can be found in this section.

### Division of Summer Session

Michael Dennin, **Vice Provost & Dean, OVPTL - Office of the Vice Provost for Teaching & Learning**

#### Summer Session

Summer Session offers 3 different sessions where students can enroll in courses for each summer (SSI, S10 Wk, SSII). Please visit <https://summer.uci.edu/calendar/> for the upcoming academic calendar. Summer Session offers more than 800 courses and annually enrolls more than 14,000 students, most of whom are UCI matriculated students. Those who enroll in these sessions and take an academic program equivalent to a regular quarter may accelerate their progress toward a degree and/or minor.

Courses offered include a wide variety from the regular session, supplemented by offerings available only during the summer, including an increasing number of online courses. Admission is open to all university students, high school graduates, qualified high school students who have completed their sophomore year by summer of the current year, and community members. Admission to Summer Session does not constitute admission to a regular session of the University.

#### Freshman Edge

Incoming first-year students are invited to take part in Freshman Edge. Students begin college during the summer when the campus is more accessible and relaxed. They will be part of a small, highly motivated group of incoming students and have an opportunity to become familiar with the academic rigor and social scene of UCI under ideal conditions of maximum opportunity and support. The program includes special workshops and sessions on various aspects of collegiate life, as well as lecture events that provide an introduction to faculty members, their research, and the interdisciplinary opportunities that students may wish to pursue. For more information, including Freshman Edge fees and schedules, call 949-824-7649; email: [summer-freshman@uci.edu](mailto:summer-freshman@uci.edu); <http://summer.uci.edu/freshman> (<http://summer.uci.edu/programs/freshman/>).

## Transfer Edge

Transfer students can begin their experience in the summer by taking part in Transfer Edge, an innovative, experiential opportunity that provides a small community of transfer students with a rich academic, social, and personal foundation. Special workshops and sessions that help students adjust to the academic rigor and social scene of the university include networking with faculty, research exploration, career planning, leadership development, public speaking, and writing. For more information, including Transfer Edge fees and schedules, call 949-824-7649; email: [summer-transfer@uci.edu](mailto:summer-transfer@uci.edu); <http://summer.uci.edu/transfer> (<http://www.summer.uci.edu/transfer/>).

## High School Students

We offer High School students a chance to experience college level courses at UCI. High Schools interested in taking class at UC, Irvine during the summer must meet our minimum requirements to be eligible. For more information about enrolling as a High School student, please visit <https://summer.uci.edu/programs/highschool> (<https://summer.uci.edu/programs/highschool/>).

## Visiting International Students

International students are welcomed to Summer Session, which is offered on an “open enrollment” basis. International students will need to demonstrate English proficiency with a TOEFL score of 213 computer-based, 550 paper-based, or 79 Internet-based (Summer Session also accepts the equivalent for the IELTS and TOEIC). Housing is available to Summer Session students, as well as a full infrastructure dedicated to helping students succeed with their academic studies. Summer Session also offers students a full range of social activities to broaden and deepen their study abroad experience, and their awareness and understanding of the Orange County area and American culture. For more information, call 949-824-6494; email: [internationalsummer@uci.edu](mailto:internationalsummer@uci.edu); <http://summer.uci.edu/international> (<http://summer.uci.edu/international/>).

# UCI Division of Continuing Education

Gary W. Matkin, Ph.D., **Dean, Division of Continuing Education; Vice Provost, Division of Career Pathways**

UCI Division of Continuing Education (DCE) serves the continuing education needs of the community by providing credit and noncredit courses, certificate programs, specialized studies, seminars, workshops, and lecture programs. For program information, class schedule and fee details, visit the UCI Division of Continuing Education website (<http://ce.uci.edu/>), or call the Student Services office at 949-824-5414. Individual courses promote career advancement and lifelong learning, while certificate programs and specialized studies offer the opportunity for a distinctive achievement in a wide range of fields. Certificate programs and specialized studies are a sequence of courses designed to develop in-depth expertise to improve career opportunities. UCI DCE offers more than 80 programs in fields as diverse as personal financial planning, data science, digital marketing, project management, paralegal, engineering, business, teacher education, medical product development, and human resources. Classes are offered on campus, 100% online, and at corporate sites.

## International Programs

UCI DCE's International Programs (<https://ip.ce.uci.edu/>) offer life-enriching academic, professional and cultural experiences to international students to help them succeed in today's competitive global environment. The experience we provide include superior English-language instruction, high-quality certificates with pathways to internship options and Optical Practical Training (OPT), and comprehensive preparation for successful undergraduate and graduate studies.

International Programs offers intensive, dynamic English language study to students 17 years of age or older, at all levels of English proficiency.

UCI recognizes the value of global exchange, exposure to different learning environments and cultures and encouragement both while in university, and before being ready to apply to college. Our Experience University Research (EUR) programs give high school and university students from around the world exposure to university life in the United States in a safe and prepared schedule.

Custom Designed Programs (CDP) are programs tailored to meet the specific needs of a group. CDPs are ideal for groups who want to participate in a UCI DCE program, but need the time frame, educational focus and content of the course to fit them.

More information can be found at the International Programs website (<http://ip.ce.uci.edu/>) or by contacting International Programs, UCI Division of Continuing Education, P.O. Box 6050, Irvine, CA 92616-6050; telephone 949-824-5991; email [ip@ce.uci.edu](mailto:ip@ce.uci.edu).

## Career Resources for UCI Students

The **Division of Career Pathways** (DCP) is UCI's hub for career development and preparation for students, staff, faculty, and alumni, and serves as the recruitment center for local, regional, and national organizations. The DCP educates and engages UCI students and alumni to realize their career potential by coordinating with the campus community in the professional development of students, providing students and alumni with tools and support to attain their career goals, and delivering exceptional customer service to the employer community.

## Corporate Education

UCI DCE partners with businesses to develop and deliver customized training to their employees. Classes are delivered online, on-site, anywhere the employees are located. Programs are developed following a free consultative intake process and needs assessment. For more information, visit Corporate Training website (<http://unex.uci.edu/corporate/>) or call 949-824-1847.

### Osher Lifelong Learning Institute

UCI DCE supports programs of the Osher Lifelong Learning Institute (OLLI), which offers a wide variety of educational and cultural programs for the retired or semi-retired intellectually active adult, all for one annual membership fee. For more information, visit Osher Lifelong Learning Institute website (<https://ce.uci.edu/olli/>) or call 949-451-1403.

### Concurrent Enrollment

The general public also has an opportunity to take regular UCI courses without formal admission to the University, through UCI DCE's Concurrent Enrollment program. (<https://ce.uci.edu/courses/concurrent/>) Courses are available on a space-available basis with the approval of the course instructor and/or academic department. Call 949-824-5414 for more information.

### Open Education

UCI DCE is also part of the **Open Education Consortium**, a non-profit, global, member-based network of open education institutions and organizations. UCI was the first University of California campus and West Coast University to become a member of the OER and is joined by well-renowned universities such as MIT and Tufts University. UC Irvine's membership in the Open Education Consortium is consistent with its public and land-grant missions and its desire to play a significant role in contributing to the social welfare of the state, the nation and the world. **Open Educational Resources** (OER) showcase the University's high quality education and makes courses and course materials free for everyone in the world. Learn more about **UCI Open Education** initiative.

### On This Page:

- Air Force Reserve Officers Training Corps
- Army ROTC

---

## ROTC

Qualified UCI students may participate in the Air Force Reserve Officers Training Corps (AFROTC) or the Army Reserve Officers Training Corps (Army ROTC). Additional information is available from the ROTC offices listed below, as well as from the UCI Office of Admissions and Relations with Schools and the UCI Division of Undergraduate Education.

### Air Force Reserve Officers Training Corps (AFROTC)

Air Force Reserve Officer Training Corps (AFROTC) is a nationwide program that allows students to pursue commissions (become officers) in the United States Air Force (USAF) while simultaneously attending college. AFROTC consists of four years of Aerospace Studies classes (Foundations of the USAF, Evolution of USAF and Space Power, Air Force Leadership Studies, and National Security Affairs/Preparation for Active Duty), and a corresponding Leadership Laboratory for each year (where students apply leadership skills, demonstrate command and effective communication, develop physical fitness, and practice military customs and courtesies). College students enrolled in the AFROTC program (known as 'cadets') who successfully complete both AFROTC training and college degree requirements will graduate and simultaneously commission as Second Lieutenants in the Active Duty Air Force.

Classes are offered at California State University, San Bernardino and the University of California, Los Angeles; however, UCI students may enroll using our cross-town agreement. For more information on the AFROTC program, please contact the Department of Aerospace Studies at UCLA at 310-825-1742 or contact California State University, San Bernardino at 909-537-5440 or visit <http://afrotc.csusb.edu/>.

### Army ROTC

Natural Sciences I, 3rd floor, rooms 3122–3129  
949-824-8538; 949-824-7581

Army ROTC classes are taught at UCI. Physical training and field training are conducted at UCI and other local training areas. Two-, three-, and four-year Army ROTC programs are available to all qualified UCI students. Successful completion of the ROTC program leads to a commission as a Second Lieutenant in the U.S. Army (Active, Reserve, or National Guard). Two-, three-, and four-year competitive scholarships provide payment for tuition or room and board. Fee payments at UCI, payments for books, and stipends ranging from \$350–\$500 per month are also available. Qualified students currently serving in any Reserve or National Guard unit may transfer to the Army ROTC program to complete their commissioning requirements.

ROTC courses are on the courses tab under the Division of Undergraduate Education course listing in this catalogue.

## Courses

### **ROTC 10L. Military Science-Basic Leadership Laboratory. 1 Workload Unit.**

Provides hands-on and practical military science material covered in the corresponding military science courses.

Grading Option: Workload Credit P/NP Only.

Repeatability: May be repeated for credit unlimited times.

### **ROTC 11. Military Science-Personal Development. 1 Workload Unit.**

Focuses on life skills such as physical fitness, nutrition, and time management while providing an introduction to military knowledge, customs, and skills.

Grading Option: Workload Credit Letter Grade with P/NP.

### **ROTC 12. Military Science-Leadership I. 1 Workload Unit.**

Focuses on the fundamentals of leadership, Army leadership values, ethics, and counseling techniques.

Grading Option: Workload Credit Letter Grade with P/NP.

### **ROTC 13. Military Science-Tactical Leadership I. 1 Workload Unit.**

Focuses on leadership at the tactical level and includes instruction in fundamental military skills such as map reading, land navigation, squad and platoon operations, and resource planning techniques.

Grading Option: Workload Credit Letter Grade with P/NP.

### **ROTC 21. Military Science-Team Leadership I. 2 Workload Units.**

Explores the dimensions of creative and innovative tactical leadership strategies and styles by examining team dynamics and two historical leadership theories that form the basis of the Army leadership requirements model.

Grading Option: Workload Credit Letter Grade with P/NP.

### **ROTC 22. Military Science-Team Leadership II. 2 Workload Units.**

Explores team dynamics and two historical leadership theories that form the basis of the Army leadership requirements model.

Grading Option: Workload Credit Letter Grade with P/NP.

### **ROTC 23. Military Science-Tactical Leadership II. 2 Workload Units.**

Examines the challenges of leading tactical teams in the OE. Highlights dimensions of terrain analysis, patrolling, and operation orders.

Grading Option: Workload Credit Letter Grade with P/NP.

### **ROTC 100L. Military Science-Advanced Leadership Laboratory. 1 Workload Unit.**

Provides hands-on and practical exercises for the military science material covered in the corresponding military science courses as well as leader training through practical application of the Leadership Development Program.

Corequisite: ROTC 131 or ROTC 132 or ROTC 133 or ROTC 141 or ROTC 142 or ROTC 143 or ROTC 197.

Grading Option: Workload Credit P/NP Only.

Repeatability: May be repeated for credit unlimited times.

### **ROTC 131. Military Science-Leadership II. 3 Workload Units.**

Challenges cadets to study, practice, and evaluate adaptive leadership skills as they are presented with challenging scenarios related to squad tactical operations. Cadets receive systematic and specified feedback on their leadership attributes and core leader competencies.

Corequisite: ROTC 100L

Prerequisite: ROTC 11 and ROTC 12 and ROTC 13 and ROTC 21 and ROTC 22 and ROTC 23

Grading Option: Workload Credit Letter Grade with P/NP.

### **ROTC 132. Military Science-Team Leadership III. 3 Workload Units.**

Provides cadets systematic and specific feedback on their leadership attributes and core leader competencies. Based on such feedback, as well as their own self-evaluations, cadets continue to develop their leadership and critical thinking abilities.

Corequisite: ROTC 100L

Prerequisite: ROTC 11 and ROTC 12 and ROTC 13 and ROTC 21 and ROTC 22 and ROTC 23

Grading Option: Workload Credit Letter Grade with P/NP.

**ROTC 133. Military Science-Tactical Leadership III. 3 Workload Units.**

Uses increasingly intense situational leadership challenges to build cadet awareness and skills in leading small units. Skills in decision-making, persuading, and motivating team members when 'under fire' are explored, evaluated, and developed.

Corequisite: ROTC 100L

Prerequisite: ROTC 11 and ROTC 12 and ROTC 13 and ROTC 21 and ROTC 22 and ROTC 23

Grading Option: Workload Credit Letter Grade with P/NP.

**ROTC 141. Military Science-Leadership III . 3 Workload Units.**

Transitions the focus of student learning from being trained, mentored, and evaluated as a cadet to learning how to train, mentor, and evaluate cadets. Cadets begin to learn the duties and responsibilities of an Army staff officer.

Corequisite: ROTC 100L

Prerequisite: ROTC 131 and ROTC 132 and ROTC 133

Grading Option: Workload Credit Letter Grade with P/NP.

**ROTC 142. Military Science-Leadership IV. 3 Workload Units.**

Requires students to continue to train, mentor, and evaluate underclass cadets. Cadets learn to safely conduct training by understanding and employing the Composite Risk Management Process and the Comprehensive Soldier Fitness (CSF) program.

Corequisite: ROTC 100L

Prerequisite: ROTC 131 and ROTC 132 and ROTC 133 and ROTC 141

Grading Option: Workload Credit Letter Grade with P/NP.

**ROTC 143. Military Science-Officership. 3 Workload Units.**

Explores the dynamics of leading in the complex situations of current military operations in the OE. Cadets examine differences in customs and courtesies, military law, principles of war, and rules of engagement in the face of international terrorism.

Corequisite: ROTC 100L

Prerequisite: ROTC 131 and ROTC 132 and ROTC 133 and ROTC 141 and ROTC 142

**ROTC 151. United States Military History-1607 to 1865. 3 Workload Units.**

Examines the creation of the American military establishment and traces its evolution in the context of the changing nature of warfare, the progression of military professionalism, and social, political, economic, and technological developments through the Civil War.

Grading Option: Workload Credit Letter Grade with P/NP.

**ROTC 152. United States Military History-1865 to 1945. 3 Workload Units.**

Examines the evolution of the American military establishment and the progression of military professionalism in terms of social, political, economic, military, and technological developments from the end of the Civil War through World War II.

Grading Option: Workload Credit Letter Grade with P/NP.

**ROTC 153. United States Military History-1945 to 2001. 3 Workload Units.**

Examines the evolution of the American military establishment and the progression of military professionalism in terms of social, political, economic, military, and technological developments from the Cold War to the War on Terrorism.

Grading Option: Workload Credit Letter Grade with P/NP.

**ROTC 197. Military Science Independent Studies. 2-4 Workload Units.**

Provides intensive, individual study with scheduled meetings to be arranged between Cadre and student. Assigned reading and tangible evidence of mastery of subject matter required.

Grading Option: Workload Credit Letter Grade with P/NP.

Repeatability: May be taken for credit for 12 units.

## Office of Undergraduate Admissions

The mission of the Office of Undergraduate Admissions, under the Office of the Provost and Executive Vice Chancellor, is to: (1) optimize UCI's undergraduate enrollments by implementing Academic Senate, universitywide, and campus policies for the selection and admission of new freshman and transfer students; and (2) stimulate and advance cooperative educational relationships between UCI and California schools and colleges. Undergraduate Admissions works to improve the preparation of prospective students for higher education and to promote their access to and success at UCI.

For additional information about the Office of Undergraduate Admissions and the services listed below, call 949-824-6703 or visit the Office of Undergraduate Admissions website (<http://www.admissions.uci.edu>).

### Undergraduate Admissions

Staff are involved in monitoring applications and admission targets; collecting and evaluating personal and academic data to select and admit new undergraduate students; establishing students' permanent UCI academic record; and evaluating coursework taken at other colleges and universities by new and matriculated students for transfer credit.

### Intersegmental Relations

Staff are involved as liaison with regard to curricular articulation between UCI and California Community Colleges as well as various educational organizations designed to facilitate regional cooperation (South Coast Higher Education Council, Southern California Intersegmental Articulation Council).

### School and College Relations

Staff: (1) advise prospective students, their parents, teachers, counselors, and school administrators regarding academic programs, admission requirements, and admission selection, and assist them with UC application and enrollment processes; (2) increase public awareness by making presentations to schools, colleges, and the community regarding UCI and the University of California, and by creating publications and communications which explain admissions policies and procedures, academic options, housing, financial aid, and student life opportunities; (3) provide general information on UC admissions and programs for all UC campuses; (4) explain University Admissions policies and procedures specific to undergraduate enrollment to the public; (5) assist prospective transfer students and community college faculty and staff; and (6) participate in activities and projects designed to enhance the academic success of students.

### On-Campus Services

Staff: (1) host programs for prospective students and educational groups; (2) offer activities for applicants; (3) inform UC and UCI administrators and faculty of developments in California schools and community colleges; and (4) provide consultative services to campus departments wishing to provide programs for schools and colleges or special recruitment for specific majors or programs.

### Transfer Student Services

The Office of Undergraduate Admissions provides advice and guidance to prospective UCI transfer students. Staff regularly visit California Community Colleges throughout the state and meet with prospective transfer students to discuss admission requirements, academic planning and preparation, and UCI lower-division major and general education requirements. Articulation agreements, which identify how community college courses may be used to fulfill lower-division UCI degree requirements, are facilitated through the Undergraduate Admissions office. Articulation agreements are available at the ASSIST website (<http://www.assist.org>).

## Campus Tours

Our student Campus Representatives lead tours that depart promptly at noon from The Hill (210-B), our campus bookstore, in the UCI Student Center. To confirm tour dates, times, and parking instructions and to arrange tours for school groups of 10 or more during the regular academic year, visit the Campus Tours website (<http://www.campustours.uci.edu>).

## Estimated Expenses

The range of estimated nine-month expenses, including projected tuition, fees, books and supplies, room and board, and miscellaneous expenses for California-resident students attending UCI during the 2018-19 academic year are shown in the following chart. Tuition and fees are subject to change without notice, and the university may impose additional fees.

Expenses for students living off campus vary depending upon number of roommates, location of apartment, amenities and other factors. Graduate student expenses assume two students sharing a two-bedroom apartment. All other on- and off-campus estimates are based on two students sharing a bedroom. Figures are based on periodic surveys and are adjusted for inflation for years when surveys are not conducted. These are intended only as a guide in computing average expenses.

### Estimated Expenses

California-Resident Student Status	Living Arrangement	Estimated Nine-Month Expenses
Undergraduate	On campus	\$34,254.12
	Off campus	\$32,448.12
	At home	\$26,259.12

Graduate	On campus – Verano	\$37,471.63
	On campus – Campus Village	\$38,515.63
	On campus – Palo Verde	\$38,484.63
	Off campus	\$48,612.63
	At home	\$37,471.63

## Tuition and Fees

All tuition, fees, and charges are subject to change without notice, and the University may impose additional tuition and fees. Consult the University Registrar's website (<http://www.reg.uci.edu/>) for the most up-to-date information.

### Undergraduate Student Tuition and Fees for Academic Year 2020-21 <sup>1,2</sup>

Fee	Resident	Nonresident
Tuition	\$11,442.00	\$11,442.00
Student Services Fee	\$1,128.00	\$1,128.00
Associated Students Fee - ASUCI Fee	\$54.00	\$54.00
Associated Students Fee - ASUCI Student Resources & Services	\$60.00	\$60.00
UCI Student Center Fee	\$267.00	\$267.00
UCI Student Center Fee - Continuation Fee	\$156.62	\$156.62
Bren Events Center Fee	\$69.00	\$69.00
Recreation Center Fee	\$264.00	\$264.00
Campus Spirit Fee	\$99.00	\$99.00
Measure S Fee	\$24.00	\$24.00
TGIF Fee	\$10.50	\$10.50
Anteater Express Fee	\$131.89	\$131.89
Club Sports Fee	\$15.00	\$15.00
SOAR Fee	\$21.93	\$21.93
Food Pantry Fee	\$10.12	\$10.12
Document Fee	\$165	\$165
eTech Fee <sup>5</sup>	varies	varies
UG Student Health Insurance Plan Fee <sup>6</sup>	\$1,917.87	\$1,917.87
Nonresident Supplemental Tuition <sup>1</sup>	-----	\$29,754.00
TOTAL <sup>7</sup>	\$15,835.93	\$45,589.93

### Graduate Student Tuition and Fees for Academic Year 2020-21 <sup>1, 2, 3</sup>

Fee	Resident	Nonresident
Tuition	\$11,442.00	\$11,442.00
Student Services Fee	\$1,128.00	\$1,128.00
Associated Graduate Student Fee - AGS <sup>4</sup>	\$27.00	\$27.00
UCI Student Center Fee	\$267.00	\$267.00
UCI Student Center Fee - Continuation	\$156.62	\$156.62
Bren Events Center Fee	\$69.00	\$69.00
Recreation Center Fee	\$264.00	\$264.00
eTechFee <sup>5</sup>	varies	varies
Document Fee	\$80	\$80
Grad. Student Health Insurance Plan Fee <sup>6</sup>	\$4,576.53	\$4,576.53
Nonresident Supplemental Tuition	-----	\$15,102.00
TOTAL <sup>7</sup>	\$18,010.15	\$33,112.15

The 2020-21 UC mandatory systemwide undergraduate Nonresident Supplemental Tuition level has not been determined by the Regents at this time. The undergraduate NRST level shown is the 2019-20 approved level and may change for 2020-21. All figures shown may not be final; actual tuition, fees, and charges are subject to change by the Regents of the University of California or, as authorized, by the President of the University of California and/or delegated to the UCI Chancellor. Accordingly, final approved levels and charges may differ from the amounts shown.

Student fees shown are based on three quarters of attendance.

The exact cost of attending UCI varies by program. Students in state-supported professional programs including the Full-time M.B.A., J.D., M.D., Master of Public Health, Master of Public Policy, M.S. Biomedical and Translational Sciences, M.S. Biotechnology Management, M.S. Engineering Management, M.S. Genetic Counseling, Master's Entry Program in Nursing, Master of Urban and Regional Planning, and self-supporting professional programs including the Executive M.B.A. and Fully-Employed M.B.A. programs, Master of Professional Accounting., Master of Finance, M.S. Business Analytics, Master of Innovation and Entrepreneurship, M.A.S. in Criminology, Law and Society, Master of Legal and Forensic Psychology, Master of Embedded & Cyber Physical Systems, Master of Engineering, Master of English, Master of Computer Science, Master of Human-Computer Interaction and Design, Master of Software Engineering, Master of Data Science, Master of American Laws, M.S. Pharmacology, Master of Conservation and Restoration Science and Doctor of Nursing Practice should refer to the tuition and fee information posted on the University Registrar's website (<http://www.reg.uci.edu/>).

In addition to the AGS fee, M.B.A. and M.D. students pay annual supplement fees of \$15.00 and \$30.00 respectively that support their individual graduate students' association

The nonrefundable eTech fee is \$4.00 per undergraduate lecture course unit, up to a maximum of \$60.00 per quarter or \$180.00 per year.

The amounts shown on these tables for undergraduate and graduate student health insurance plans are the estimated 2020-21 fee amounts. The 2020-21 fee levels are currently under negotiation and the final 2020-21 approved fee levels may differ from the amounts shown.

The mandatory campus-based fees listed above (Associated Students Fee, Student Center Fee, Bren Events Center Fee, Recreation Center Fee, Campus Spirit Fee, Measure S Fee, TGIF Fee, Anteater Express Fee, Club Sports Fee, SOAR Fee and Food Pantry Fee) include all currently approved fees.

## Payment of Tuition and Fees

Tuition and fees for each quarter are due and payable in advance within deadlines published in the Quarterly Academic Calendar on the University Registrar's website (<http://www.reg.uci.edu/>). A student will not be officially registered in classes until tuition and fees are paid in full, with the exception of students who are participating in the PACE Plan.

Continuing and returning students are required to pay all outstanding fines and other debts in full before they pay their tuition and fees for an upcoming term.

Information about tuition and fee refunds appears later in this section.

**Tuition** is a mandatory UC systemwide charge and provides general support for the University's operating budget, including costs related to instruction, and funds student financial aid. Graduate students studying out of the State may be eligible to pay 15 percent of tuition. M.D. students are required to pay the full tuition for each quarter in which they enroll, including the summer quarter. The summer quarter tuition level for M.D. students will be the same as that of the previous spring quarter. A portion of Tuition is returned to support student financial aid.

The **Student Services Fee** is a mandatory UC systemwide fee required of all students regardless of the number of courses taken, unless otherwise noted. This fee is a charge to each student for co-curricular programs, activities, and services which benefit the student and which are complementary to, but not a part of, the instructional programs. A portion of the fee is returned to support student financial aid. No part of this fee is refundable to students who do not use all or any of these services. Graduate students studying out of the State may be eligible to pay 15 percent of the Student Services Fee. M.D. students are required to pay the full Student Services Fee for each fall, winter, and spring quarter, and a reduced Student Services Fee of \$80.00 for each summer quarter.

The **Associated Students Fees** are compulsory campus-based fees administered by the Associated Students of UCI, the Associated Graduate Students, The Merage Student Association, and the Associated Medical Students. These funds provide social activities, lectures, forums, concerts, and other activities at either a reduced charge, or no charge, to UCI students. The fees are required of all students. In spring 2017, the undergraduate students voted via referendum to increase the ASUCI fee to fund additional student resources and services.

The **UCI Student Center Fee** is a compulsory campus-based fee required of all students regardless of the number of courses taken. The fee is used to pay the debt service on revenue bonds sold to finance the construction costs, to fund operating costs, and to fund major repairs and maintenance expenses of the UCI Student Center. The Student Center Continuation Fee is the portion of the Student Center Fee originally set to expire in fall 2017. This portion of the fee was renewed via student referendum in spring 2016 and the purpose of the Continuation Fee is to maintain current service levels, support of daily operating expenses and continuous facility maintenance and improvements to the Student Center.

The **Bren Events Center Fee** is a compulsory campus-based fee required of all students regardless of the number of courses taken or units carried. The fee is used for operations, maintenance, including deferred maintenance, and repair and improvement projects for the Bren Events Center. The fee was also used to pay the debt service on revenue bonds sold to finance the construction costs of the Bren Events Center.

The **Recreation Center Fee** is a compulsory campus-based fee required of all students regardless of the number of courses taken or units carried. The fee is used to operate, maintain, and pay the debt service on revenue bonds sold to finance the construction costs of the Student Recreation Center and Athletics facilities improvements.

The **Campus Spirit Fee** is a compulsory campus-based fee required of all undergraduate students regardless of the number of courses taken or units carried. The fee is used to support Athletics and Campus Spirit Programs.

The **Measure S Fee** is a compulsory campus-based fee required of all undergraduate students regardless of the number of courses taken or units carried. The fee is used to support, upgrade, and expand the ASUCI Express Shuttle.

The **Green Initiative Fund (TGIF) Fee** is a compulsory campus-based fee required of all undergraduate students for the fall, winter, and spring quarters regardless of the number of courses taken or units carried. The fee is used to support undergraduate student efforts to reduce the campus's environmental footprint and to promote sustainable educational projects at UCI.

The **Anteater Express Fee** is a compulsory campus-based fee required of all undergraduate students regardless of the number of courses taken or units carried. The purpose of the fee is to support the Anteater Express campus shuttle service. The fee revenue is used to fund expenses including, but not limited to, fleet replacement, disability services, and route expansion. This initiative differs from the current Measure S Fee in that the funds may be spent more broadly and the funds are also overseen by a funding board.

The **Club Sports Fee** is a compulsory campus-based fee required of all undergraduate students for the fall, winter, and spring quarters regardless of the number of courses taken or units carried. The purpose of the fee is to provide a permanent source of operating and programming support for the Club Sports Program at UCI. The fee revenue will be used to fund expenses such as, but not limited to, coaching, cost of equipment and uniforms, tournament fees, travel expenses, events facility rentals and basic-level league dues for all clubs in the Club Sports Program.

The **SOAR Fee** is compulsory campus-based fee required of all undergraduate students for the fall, winter, spring, and summer quarters regardless of the number of courses taken or units carried. The purpose of the fee is to provide a permanent source of operating and programming support for the Student Outreach and Retention (SOAR) Center. The fee revenue is used for, but not limited to, funding student-initiated outreach and retention efforts, expanding current services and programs, and providing leadership and development opportunities for students.

The **Food Pantry Fee** is a compulsory campus-based fee required of all undergraduate students for the fall, winter, spring and summer quarters regardless of the number courses taken or units carried. The purpose of the fee is to cover the expenses of operating the current food pantry which provides non-perishable food to students who experience food insecurity.

The **eTech Fee** is a nonrefundable per-unit fee, required of all students enrolled in undergraduate lecture courses during the fall, winter, and spring quarters. The fee is used to fund the UC Irvine Educational Technology Initiative maintaining and improving existing educational technology, and providing new educational technology services and capabilities supporting the educational goals of UCI students. The fee is \$4.00 per unit of undergraduate lecture course, up to a maximum amount of \$60.00 (or 15 units) per quarter. It will be assessed after the third week of instruction. Further information is available at the eTech website (<http://etech.uci.edu/>).

The **Document Fee** provides lifetime access to official transcripts and academic verifications without a fee for in-person pickup or delivery by USPS. In addition, there is no fee for mailing the initial diploma. Effective Fall 2018, new undergraduate, professional, and graduate students are assessed the one-time document fee. Eligible students are able to use financial aid to cover the Document Fee. Alumni and continuing students receive the benefits but do not pay the new fee, as they have been subject to various fees previously for their degree programs. Students in self-supporting fee programs are not charged the fee; they will pay the per-single document fee for transcripts and verifications, as well as the diploma mailing fee. Summer-only and visiting students are not charged the fee; they will pay the per-single document fee for transcripts and verifications. Services not covered by the document fee are still subject to transaction fees. These include, but are not limited to, express shipping, special handling, replacement diplomas, and notary services.

The **Undergraduate Student Health Insurance Plan Fee** is a mandatory fee charged over three quarters (fall, winter, and spring) to provide 12-month coverage from September through August. The fee is required of all undergraduate students regardless of the number of courses taken or units carried. The fee is used to provide undergraduate students with health insurance. If students provide evidence of comparable coverage from another source, participation in the mandatory plan may be waived. This fee is subject to change pending the outcome of negotiations with insurance carriers.

The **Graduate Student Health Insurance Plan Fee** is a mandatory fee charged over three quarters (fall, winter, and spring) to provide 12-month coverage from September through August. First-year law and medical students who matriculate prior to September, any returning students not enrolled in the previous spring quarter, and transfer students must also pay a prorated GSHIP premium in addition to the fall premium. The fee is required of all graduate and medical students regardless of the number of courses taken or units carried. The fee is used to provide graduate and medical students with health insurance. If students provide evidence of comparable coverage from another source, participation in the mandatory plan may be waived. This fee is subject to change pending the outcome of negotiations with insurance carriers.

The **Medical Student Disability Insurance Fee** is required of all medical students. The entire annual fee is charged for the fall quarter.

The **Professional Degree Supplemental Tuition (PDST)** is mandatory supplemental tuition required of all graduate professional students in specific state-supported graduate professional programs regardless of the number of units taken. The UCI graduate professional programs charging a PDST include the M.B.A., J.D., M.D., Master of Public Health, Master of Public Policy, Master of Urban and Regional Planning, Master of Science in

Biotechnology Management, Master of Science in Engineering Management, Master of Science in Genetic Counseling and Master's Entry Program in Nursing programs.

A \$1,500.00 advance deposit on the Professional Degree Supplemental Tuition is required of all new M.B.A. students upon their acceptance of admission. This deposit is nonrefundable.

### Service Charges (subject to change without notice)

Item	Charge
Changes in Class Enrollment after Announced Dates (each transaction)	\$3.00
Credit by Examination (each petition)	\$5.00
Late Payment of Tuition and Fees	\$50.00
Late Enrollment in Classes	\$50.00
Returned Payment Fee	\$25.00
Student Parking Permits <sup>1</sup>	
- Zone Commuter, monthly	\$75.00
- Zone Commuter, Preferred, Monthly	\$94.00
- Resident, monthly	\$125.00

In addition, students may be assessed a course materials fee. Consult the online *Schedule of Classes* for courses requiring the fee and the fee level.

<sup>1</sup> In accordance with Regents policy, UC parking systems are self-supporting auxiliary enterprises receiving no State appropriations. Visit the Transportation and Distribution Services website (<https://www.parking.uci.edu/permits/studentpermits.cfm>) for fee levels of other types of parking permits. Prices shown are for 2019-20 and are subject to change for 2020-21.

### Miscellaneous Fees (subject to change without notice)<sup>7</sup>

Item	Fee
Application Fee (nonrefundable in all cases) <sup>1,2</sup>	
-Domestic Undergraduate	\$70.00
- International Undergraduate	\$80.00
- Domestic Graduate <sup>3</sup>	\$120.00
- International Graduate <sup>3</sup>	\$140.00
- Secondary Application Fee (Medical)	\$120.00
Application Fee for Readmission <sup>1</sup>	
- Domestic Undergraduate	\$70.00
- International Undergraduate	\$70.00
- Domestic Graduate <sup>4</sup>	\$120.00
- International Graduate <sup>4</sup>	\$120.00
Advancement to Candidacy for Ph.D.	\$90.00
Duplicate Diploma	\$22.00
Duplicate Diploma, School of Medicine	\$125.00
Filing Fee (graduate programs; one-half quarterly Student Services Fee) <sup>5</sup>	\$188.00
Graduate Special Library Borrowing Privileges (per year, nonrefundable, renewable) <sup>6</sup>	\$50.00
Master's Thesis Electronic Submission Fee	\$55.00
M.B.A. Acceptance of Admissions Deposit <sup>1</sup>	\$1,500.00
Transcript of Record (per copy)	\$17.00
Undergraduate Acceptance of Admission deposit (nonrefundable; applied toward Student Services Fee) <sup>1</sup>	\$250.00
Verification of Student Status (per copy)	\$17.00

<sup>1</sup> Nonrefundable in all cases.

<sup>2</sup> The fee entitles an applicant to apply to one UC campus. Applicants who are applying to more than one campus must pay the fee for each campus selected.

<sup>3</sup> The Application Fee for The Paul Merage School of Business is \$150.00.

- 4 The Graduate Readmission Fee is only applicable to students whose status has lapsed during an academic quarter and are trying to be readmitted for the same quarter. Students whose status has lapsed and wish to return in a subsequent quarter must go through the entire application and admission process again and pay the applicable application fee.
- 5 The Filing Fee is one half of the quarterly Student Services Fee.
- 6 This fee entitles graduate students on Official Leave of Absence or Filing Fee Status to keep their library privileges.
- 7 Fees shown are currently approved miscellaneous fees and do not reflect all 2020-21 proposed fees. Fees are subject to change without notice. The university may impose additional fees when approved.

## Special Tuition and Fee Programs, Waivers, and Exemptions

### PACE Plan

The PACE Installment Plan allows students to spread the quarterly costs of tuition and fee payment over a three-month period. A fee is charged for this privilege. Information about PACE is available at the Campus Billing Services website (<http://www.fs.uci.edu/pace/>).

### Reduced-Fee Part-Time Study Program

Part-time study for credit leading to an undergraduate or graduate degree is available in some academic units. To take advantage of reduced tuition and fees for part-time status, quarterly course enrollment is limited to 10 units or fewer for undergraduate students and to eight units or fewer for graduate students. Students enrolled in excess units after Friday of the third week of instruction are liable for full tuition and fees.

The same admissions standards that apply to full-time students apply to part-time students. Under University policy, academic deans (the Dean of the Division of Undergraduate Education, for Undecided/Undeclared students; the Dean of Graduate Studies, for graduate students) may approve Petitions for Part-Time Status *only* for reasons of occupation, family responsibilities, or health.

Undergraduate and graduate students on approved part-time status pay the full Student Services Fee and one-half of Tuition. Those part-time students who have been determined to be nonresidents of the State of California are assessed one-half the Nonresident Supplemental Tuition, in addition to the full Student Services Fee and one-half of Tuition. Part-time students pursuing a professional degree are assessed one-half the Professional Degree Supplemental Tuition, the full Student Services Fee, and one-half of Tuition.

Part-time status lapses at the end of each academic year; therefore, a student must reapply each year that part-time status is desired. See the University Registrar's website (<http://www.reg.uci.edu/>) for more information.

Undergraduate petitions are available from academic counselors or the University Registrar's Office; graduate students may obtain further information and petitions from the Graduate Division. All students are encouraged to consult with the Office of Financial Aid and Scholarships regarding minimum unit requirements.

### Tuition and Fee Reduction for Staff and Academic Employees

Students who are career employees at UCI or the University of California, Irvine Medical Center are eligible for a two-thirds reduction of the Student Services Fee, Tuition, and campus-based fees. This applies for up to nine units or three regular session University courses per quarter, whichever is greater. For staff employees, additional information and the Employee Application for Reduced Fees is available from Human Resources. Academic employees should contact the Office of Academic Personnel.

## California Residency for Tuition Purposes

Information regarding University of California residence regulations for tuition purposes can be found on the University Registrar's website (<https://www.reg.uci.edu/residency/classification.html>).

Please note that changes may be made in the residence requirements between the publication of this statement and the relevant residence determination date. Inquiries regarding residence requirements, determination, and/or recognized exceptions should be directed to the campus Residence Deputy ([regres@uci.edu](mailto:regres@uci.edu)).

## Tuition and Fee Refunds

### Student Tuition and Fee Refunds

Students who pay tuition and fees for a regular academic term and then decide to withdraw from the University must submit a Withdrawal form, complete with the signature of their academic dean. Undergraduate students must submit the form to the University Registrar; graduate students to the Graduate Division; medical students to the School of Medicine's Registrar's Office; law students to the Law School Registrar's Office. This form serves two purposes:

1. A refund of tuition and fees, if applicable; and
2. Withdrawal from classes.

The effective date of withdrawal is used in determining the percentage of tuition and fees to be refunded. This date is normally the date that the student submits the form to the appropriate dean for approval. It is presumed that no University services will be provided to the student after that date. Tuition and fees are refunded as follows.

Prior to and including the first day of instruction, tuition and fees are refunded in full, except for

1. A \$10 service charge for continuing and readmitted students, or the \$100 Acceptance of Admission Fee for new undergraduate students, or the applicable deposit fee for new health sciences and M.B.A. students, and
2. The Student Health Insurance Fee. (The Student Health Insurance Fee is refunded only if the Withdrawal form is submitted *prior to the first day of the quarter*.) Students should bear in mind that the "first day of the quarter" often is several days prior to the "first day of instruction." Refer to the Academic Calendar (<http://www.reg.uci.edu/navigation/calendars.html>) for exact dates.

A refund of the Medical Student Disability Insurance Fee (if applicable) may be requested.

After the first day of instruction, the tuition and fee refund is prorated as shown (with the exception of the Health Insurance Fee).

## Standard Refund Schedule

Calendar days (beginning with the first day of instruction)	Refund
1	100 percent
2-7	90 percent
8-18	50 percent
19-35	25 percent
over 35	no refund

New students receiving Federal Financial Aid follow the refund schedule outlined below.

## Refund Schedule for New Students Receiving Federal Financial Aid

Calendar days (beginning with the first day of instruction)	Refund
1	100 percent
2-7	90 percent
8-14	80 percent
15-21	70 percent
22-28	60 percent
29-35	50 percent
36-42	40 percent
over 42	no refund

Financial aid recipients should see the UCI Office of Financial Aid and Scholarships Student Withdrawal Policy, or consult their Policies and Conditions website (<http://www.ofas.uci.edu/content/PoliciesAndConditions.aspx>).

Claims for a refund of tuition and fees must be presented during the fiscal year (July 1 to June 30) in which the claim is applicable. Refund checks are issued by the Accounting Office approximately three weeks after the official notice of withdrawal is initiated.

Law students follow refund schedules set by the School of Law. Refer to the School of Law website (<http://www.law.uci.edu/>) for further information.

## Housing Refunds

Housing refunds are subject to the terms of the applicable housing agreement.

# Financial Aid

### On This Page:

- Financial Aid
  - Eligibility Requirements for Federal Student Aid
  - UCI Policies on Satisfactory Academic Progress for Financial Aid
  - UCI Office of Financial Aid and Scholarships Student Withdrawal Policy
- Additional Aid for Graduate and Medical Students
- Aid for Students with Disabilities
- Student Employment

Lack of funds need not be a barrier to attending UCI; about 75 percent of UCI's enrolled students are offered some form of financial aid. Students who demonstrate that they need financial assistance in order to attend may be eligible for scholarships, grants, loans, and/or work-study awards through the Office of Financial Aid and Scholarships. In addition to awarding aid on the basis of financial need, some scholarships are awarded on the basis of academic excellence. Information regarding the application process, deadlines, and financial aid programs for undergraduate and graduate students as well as students in the Business, Law, and Medical Schools may be found at the Office of Financial Aid and Scholarships website (<http://www.ofas.uci.edu/content/>).

**Free Application for Federal Student Aid (FAFSA/Renewal Application).** To obtain financial aid, new and continuing students must file the FAFSA and submit the necessary supporting documents each year. FAFSA on the Web is available at [studentaid.gov](http://studentaid.gov) (<https://studentaid.ed.gov/sa/>), and paper forms are available either by completing a PDF FAFSA (<https://studentaid.gov/sites/default/files/2020-21-fafsa.pdf>) or by calling 800-FED-AID / 800-433-3243. Renewal notifications are mailed to current financial aid recipients starting in mid-October. Students are encouraged to apply as early as possible after October 1. The priority deadline to file the FAFSA/FOTW for loans, work-study, and most grants is March 2. For priority consideration of these funds, all other supporting documentation must be submitted to the Office of Financial Aid and Scholarships by May 1 or the specified due date.

The University expects the student and the parent (or spouse) to contribute toward the educational costs to the extent possible. For dependent students, an analysis of the FAFSA and supporting documents determines the amount a student and the student's parents can be expected to contribute toward the cost of the student's education. For independent students, the analysis determines the amount a student and, if applicable, a spouse, can contribute to the cost of the student's education. Income, assets, size of family, and the number of family members in college (excluding parents) are the major factors considered in the analysis. Assets include, but are not limited to, equity in real estate other than family residence; stocks, bonds and other securities; business equity; and cash, savings and checking accounts. Income includes wages, salaries, interest, dividends, and nontaxable income such as Social Security, Veterans' benefits, and foreign income.

**Special Expenditures.** Financial aid recipients who are in need of money for special expenditures (beyond the cost of books and basic supplies associated with certain courses of study) may make an appointment to see a financial aid counselor to explore the possibility of a budget add-on, based on the availability of funds. Examples of such special expenditures include special equipment for students with disabilities and computer purchases.

## Eligibility Requirements for Federal Student Aid

Federal financial aid programs are subject to regulations that define the criteria students must meet to qualify and maintain eligibility for those programs. The regulations state that a student must:

1. Be a U.S. citizen or an eligible noncitizen of the U.S.;
2. Be accepted for admission to the University;
3. Be enrolled in good standing at the University; units taken through the UCI Division of Continuing Education program are not counted toward half- or full-time enrollment;
4. Demonstrate financial need (except for William D. Ford Federal Direct Unsubsidized Loans and Federal PLUS loans); financial need is the difference between the reasonable, approved expenses of attending UCI and all available resources, including the expected contribution from parents, the student, and any outside aid;
5. Maintain satisfactory academic progress for financial aid, as outlined below;
6. Be registered with the Selective Service if the student is a male at least 18 years old, born after December 31, 1960, and not on active duty with the armed forces;
7. Not owe a refund on a federal grant or be in default on a federal educational loan.

Once a student meets the above criteria, disbursement of financial aid funds is made only if the student does not have outstanding debts owed to UCI.

**California Dream Act Application.** Students who qualify for the AB 540 fee exemption and are not able to file a FAFSA can apply for certain types of financial aid by completing the California Dream Act Application.

The California Dream Acts – AB 130 and AB 131 – extend eligibility for privately funded UC scholarships, other UC scholarships and grants, Cal Grants, Middle Class Scholarships and Dream Loans to students, including undocumented students, who qualify for benefits under another California law – AB 540 – which exempts students from paying nonresident supplemental tuition.

Students who think they might be eligible for an AB 540 nonresident tuition exemption should:

1. Submit a California Dream Act Application as soon as possible after it becomes available on October 1, but no later than March 2.
2. Students who are admitted to the University and intend to enroll should submit a Statement of Legal Residence. Those who receive a nonresident classification from the campus residence deputy should submit a California Nonresident Tuition Exemption Request or a University of California Nonresident Tuition Exemption Application and Affidavit, available at the University Registrar's office or website. Official high school transcripts and proof of high school graduation may be requested.

Once applicants have completed these steps, the University will notify them of any financial aid eligibility.

## UCI Policies on Satisfactory Academic Progress for Financial Aid

### Undergraduate and Graduate Students

In defining student eligibility for financial aid, the Higher Education Act Amendments state that a student must maintain “satisfactory progress in the course of study the student is pursuing, according to the standards and practices of the institution at which the student is in attendance.” Federal regulations state that each institution shall establish, publish and apply “reasonable standards” for assuring that every student receiving need-based financial aid should maintain “satisfactory progress in his/her course of study.” Final Federal regulations state that “in order to receive student financial aid under the programs authorized by Title IV of the Higher Education Act, a student must be maintaining satisfactory progress in the course of study he or she is pursuing according to the standards and practices of the institution in which he or she is enrolled.”

The following disclosures on the UCI website provide detailed information about satisfactory academic progress requirements for receiving financial aid at UCI. The Office of Financial and Scholarships will provide a paper copy of this information upon request.

#### Undergraduate and Teaching Credential Students:

[www.ofas.uci.edu/content/pdf/SAPDisclosureForUndergraduates.pdf](http://www.ofas.uci.edu/content/pdf/SAPDisclosureForUndergraduates.pdf) (<http://www.ofas.uci.edu/content/pdf/SAPDisclosureForUndergraduates.pdf>)

#### Graduate Students:

[www.ofas.uci.edu/content/pdf/SAPDisclosureForGraduates.pdf](http://www.ofas.uci.edu/content/pdf/SAPDisclosureForGraduates.pdf) (<http://www.ofas.uci.edu/content/pdf/SAPDisclosureForGraduates.pdf>)

#### Graduate Business Students:

[applicant.merage.uci.edu/FinancialAid/AcademicRequirements.aspx](http://applicant.merage.uci.edu/FinancialAid/AcademicRequirements.aspx) (<http://applicant.merage.uci.edu/FinancialAid/AcademicRequirements.aspx>)

#### Medical Students:

[www.ofas.uci.edu/content/pdf/SAPDisclosureForMedicalStudents.pdf](http://www.ofas.uci.edu/content/pdf/SAPDisclosureForMedicalStudents.pdf) (<http://www.ofas.uci.edu/content/pdf/SAPDisclosureForMedicalStudents.pdf>)

#### Law Students:

[www.law.uci.edu/admission/tuition-aid/pdfs/SAP\\_Disclosure\\_LawStudents.pdf](http://www.law.uci.edu/admission/tuition-aid/pdfs/SAP_Disclosure_LawStudents.pdf) ([http://www.law.uci.edu/admission/tuition-aid/pdfs/SAP\\_Disclosure\\_LawStudents.pdf](http://www.law.uci.edu/admission/tuition-aid/pdfs/SAP_Disclosure_LawStudents.pdf))

## UCI Office of Financial Aid and Scholarships Student Withdrawal Policy

Students who withdraw from UCI prior to completing 60 percent of the period for which they received federal financial aid will be subject to both the UC Fee Refund Policy and the Federal Return of Title IV Funds policy. Title IV Funds are federal funds awarded to a student to meet educational expenses. Examples of Title IV Funds include Federal Pell Grants, Federal Supplemental Educational Opportunity Grants (SEOG) and Federal Direct Loans.

**Cancellation of Enrollment.** Students who cancel their registration or have their registration cancelled by the University prior to the first day of classes will be billed for all financial aid disbursed on their behalf.

The full text of this official policy is available on the Office of Financial Aid and Scholarships Policies and Conditions website (<http://www.ofas.uci.edu/content/PoliciesAndConditions.aspx>).

Any student contemplating withdrawing from the University should contact the Office of Financial Aid and Scholarships to speak with a financial aid counselor concerning the financial ramifications of withdrawing.

Students who are receiving a Cal Grant or Middle Class Scholarship (MCS) should also contact the Office of Financial Aid and Scholarships to discuss the ramifications of withdrawing on their Cal Grant or MCS status.

## Additional Aid for Graduate and Medical Students

Most graduate fellowship programs are administered by the Graduate Division, 120 Aldrich Hall, telephone 949-824-4611. Medical students should contact the School of Medicine Financial Aid Office, 836 Medical Education Building, telephone 949-824-6476.

## Aid for Students with Disabilities

All forms of student financial aid are available to eligible students with disabilities. Interested students should follow the regular financial aid application procedures and should notify the Office of Financial Aid and Scholarships of any additional expenses they may incur because of a disability. Supporting documentation must be provided.

## Student Employment

The UCI Division of Career Pathways, located in the Student Services I building, assists UCI students in obtaining part- or full-time, on- and off-campus jobs and internships during the academic year as well as summer. Students may easily access all job and internship listings, including work-study positions, using their student ID number via Handshake on the UCI Division of Career Pathways website. (<http://www.career.uci.edu/>)

## Scholarships for Entering Freshmen or Transfer Students

UCI scholarships are awarded based on the basis of academic ability and promise; and do not require repayment. There are five scholarship categories to meet the needs of a diverse student body such as Community Leadership, Innovation, Academic Excellence, Anteater, and Distinguished scholarship categories. The scholarships in these categories are awarded on the basis of academic merit, financial need, leadership experience, community service, and overcoming adversity. UCI offers entering freshmen and transfer students with proven high academic achievement and leadership potential five top honors awards from the Distinguished Scholarship Category: The Regents' Scholarship, the Chancellor's Excellence Scholarship, the Deans' Scholarship, the Directors' Scholarship, and the Promise Scholarship.

UCI Distinguished Scholarships are intended for entering freshmen and transfer students and are based on the information gathered on the UC Application for Undergraduate Admission. Additional materials, such as the scholarship application, are neither required nor considered in the selection process. Entering freshmen and transfer students who submit the UCI-specific scholarship application are also considered for scholarships in the other four categories based on available funds. In addition, the UCI Alumni Association offers Alumni Scholarships by invitation only. Admitted students who have submitted a Statement of Intent to Register and meet the criteria for qualifications will be invited to apply for an Alumni Scholarship. Information about the UCI Alumni Association Endowed Scholarship is available on the UC Application for Undergraduate Admission and Scholarships, and a separate application is required.

## Scholarships for Entering Graduate Students Enrolled in Master-Degree Programs

Entering graduate students enrolled in Master Degree programs can apply to several available scholarships. Scholarship applications are forwarded to the schools for selection of recipients.

## Scholarships for Continuing Students

Continuing students may apply to campus-wide scholarships and school-specific scholarships during the application period of January-February for the following academic year. The Office of Financial Aid and Scholarships reviews these applications and considers all applicants for all available scholarships. The campus-wide scholarships are both merit-based and need-based. Students will be notified about their potential scholarships during the June-July timeframe.

## Grants

Grants are awarded on the basis of financial need. There is no repayment requirement. A student's financial aid award includes grant funds whenever regulations, UCI policies and funding levels permit.

**Federal Pell Grant** is the largest federally funded grant program and provides up to a maximum of \$6,345 for the 2020-21 academic year. To be eligible, applicants must be U.S. citizens or eligible noncitizens, be enrolled as undergraduates, have not previously received a bachelor's degree, and demonstrate financial need. Students must use the FAFSA to apply for this grant. Students must be enrolled full time (12 units) to receive the full grant, and enrolled at least half time (6 or more units) to receive a prorated amount. The amount of Pell Grant funds students may receive over their lifetime is limited to the equivalent of six years of Pell Grant funding.

**Cal Grant A** is a state-funded grant program which currently provides awards to be applied to the payment of University tuition and fees. In 2019-20, Cal Grant A awards paid up to \$12,570. To be eligible, applicants must be California residents and demonstrate financial need. Students must use the FAFSA and GPA Verification Form to apply for Cal Grant A. The filing deadline for new applicants is March 2 for the following year. Students must be enrolled full time (12 units) to receive the full grant, and enrolled at least half time (6 or more units) to receive a prorated amount.

**Cal Grant B** is a state-funded grant program which provided access awards in the 2019-20 year up to a maximum of \$1,672 for living expenses during the student's first year. In subsequent years, students qualify for this access award plus an award for tuition and fees. In 2019-20, Cal Grant B tuition/fee awards paid up to \$12,570. To be eligible, applicants must be California residents, demonstrate financial need, and be entering college or not have completed more than one quarter of college work. Students must use the FAFSA and GPA Verification Form to apply for Cal Grant B. The filing deadline for new applicants is March 2 for the following year. Students must be enrolled full time (12 units) to receive the full grant, and enrolled at least half time (6 or more units) to receive a prorated amount. *NOTE: Students may not receive both Cal Grant A and Cal Grant B.*

**Middle Class Scholarship (MCS)** is a state-funded scholarship program which currently provides awards to be applied to the payment of University tuition and fees. To be eligible, applicants must be undergraduate students who are California residents or AB-540 eligible and have a household income no greater than \$184,000 and household assets of no more than \$184,000. Students must use the FAFSA/California Dream Application to apply for this award. The filing deadline for new applicants is March 2 for the following year. Students must be enrolled at least half time (6 units) to receive the scholarship. In 2019-20, Middle Class Scholarship awards paid up to \$5,028. Award amounts are determined after a student is awarded any federal and state grants as well as any portion of UC aid which is specifically designated for system-wide tuition and fees. A student will be awarded a scholarship only if these awards, taken together, do not already exceed the amount that the student is entitled to under the MCS program.

**Federal Supplemental Educational Opportunity Grant (FSEOG)** provides grant aid for U.S. citizens and eligible noncitizens who are undergraduate students and have demonstrated financial need. The amount awarded depends upon financial need and funding levels.

**UCI Grant** is funded by The Regents of the University of California and by the State of California and provides grant aid for full-time students who demonstrate financial need. The amount awarded depends upon financial need and funding levels.

## Loans

Loans are often part of a financial aid award. They provide recipients with an opportunity to defer the cost of their education by borrowing when needed and paying later. However, loan recipients must pay interest on the amount borrowed. The deferment and cancellation provisions for the loans listed below are contained on the promissory note each recipient must sign and may be obtained from the Office of Financial Aid and Scholarships.

A student's loan responsibility, prior to acceptance of the loan, is to understand the terms of the loan. After accepting the loan, the recipient must repay the loan in accordance with the repayment schedule; advise the Office of Financial Aid and Scholarships upon leaving UCI; participate in an exit interview; and provide the Financial Services Office with a current address after leaving UCI. In case of death or total disability, outstanding loan obligations may be cancelled upon presentation of official confirming documents.

**University Loan**, funded by The Regents of the University of California, provides long-term loans to undergraduates who are full-time students who demonstrate financial need. The maximum amount for an academic year is typically \$1,000. Interest of five percent a year begins six months after the student ceases to be enrolled at least half time, and repayment must be completed within ten years. Two cosigners are required.

**DREAM Loan**, funded by The Regents of the University of California and the State of California, provides long-term subsidized loans to DREAMER students who demonstrate financial aid eligibility. The maximum amount for an academic year is \$4,000. The interest rate matches the subsidized Direct Loan rate for that same academic year (Interest rates are available at the Federal Student Aid Interest Rates and Fees website (<https://studentaid.ed.gov/sa/types/loans/interest-rates/>)). Interest begins six months after the student ceases to be enrolled at least half time, and repayment must be completed within ten years.

### William D. Ford Direct Loan Program

**Subsidized William D. Ford Federal Direct Loan**, processed through the U.S. Department of Education and UCI, is available to undergraduates who are U.S. citizens or eligible noncitizens, and who demonstrate financial need. During an academic year, the maximum a student may borrow is \$3,500, freshmen; \$4,500, sophomores; \$5,500, juniors and seniors. A loan fee will be deducted from the amount of the loan prior to issuing the check.

Interest rate: If a student receives a loan that is first disbursed between July 1, 2012, and July 1, 2016, the student will be responsible for paying any interest that accrues during the grace period. If a student chooses not to pay the interest that accrues during the grace period, the interest will be added to the principal balance.

If a student received a loan prior to July 1, 2012, the federal government pays the interest during the deferment period.

Interest rate: Visit the Federal Student Aid Interest Rates and Fees website (<https://studentaid.ed.gov/sa/types/loans/interest-rates/>) for current as well as historic loan rates and fees.

For first-time borrowers borrowing on or after July 1, 2013, there is a limit on the maximum period of time (measured in academic years) that you can receive Direct Subsidized Loans. In general, you may not receive Direct Subsidized Loans for more than 150 percent of the published length of your program. For more information, visit: <https://studentaid.ed.gov/types/loans/subsidized-unsubsidized#eligibility-time-limit> (<https://studentaid.ed.gov/types/loans/subsidized-unsubsidized/#eligibility-time-limit>)

**Unsubsidized Federal Direct Loans** have the same terms and conditions as the Federal Direct Loan, including the aggregate loan limits, interest rate and repayment. During an academic year the maximum a dependent student may borrow is \$5,500, freshmen; \$6,500, sophomores; \$7,500, juniors and seniors. Independent students may borrow an annual maximum of: \$9,500, freshmen; \$10,500, sophomores; \$12,500, juniors and seniors; \$20,500, graduate/professional; and \$32,000, medical students. These maximum amounts include any amount borrowed under the Subsidized William D. Ford Federal Direct Loan program. However, the loan is not based on need. Students may borrow an amount equal to the cost of attendance, less any estimated financial assistance up to the annual loan limits in effect at the time the loan is disbursed. Students must first apply for the Federal Direct Loan prior to consideration for the Unsubsidized Federal Direct Loan. There is no interest subsidy for this loan; students pay the interest charged while enrolled at UCI. Students may receive both subsidized and unsubsidized Federal Direct Loans, but the total may not exceed the loan limits. Borrowers with both types of loans may have a single repayment schedule.

Interest rate: Visit the Federal Student Aid Interest Rates and Fees website (<https://studentaid.ed.gov/types/loans/interest-rates/>) for current as well as historic loan rates and fees.

Cumulative maximum: Dependent, undergraduate, \$23,000; independent, undergraduate, \$57,500; graduate and professional students, \$138,500 (includes undergraduate loans); medical students, \$224,000 (includes undergraduate loans). Deferment period before repayment: six months after ceasing to be enrolled at least half time. Interest accrues immediately and may be paid monthly or quarterly. Students also may request that the lender add the interest to the principal balance. Repayment of principal begins six months after ceasing to be enrolled at least half-time. Full repayment: Up to 10 years. Minimum payment: \$50 per month.

**Graduate PLUS Loans** are available to graduate and professional-level students. Students may borrow up to the cost of education for the academic year, less any estimated financial aid. The loan is limited to students who do not have adverse credit histories as defined by regulation.

Interest rate: Visit the Federal Student Aid Interest Rates and Fees website (<https://studentaid.ed.gov/sa/types/loans/interest-rates/>) for current as well as historic loan rates and fees.

**Federal Direct Parent Loans for Undergraduate Students (PLUS)** are designed to assist parents of dependent undergraduate students who are unable to demonstrate financial need for campus-based funds. Parents are eligible to borrow up to the cost of education for the academic year, less any estimated financial aid each academic year, on a student's behalf. The loan is limited to parents who do not have adverse credit histories as defined by regulation.

Interest rate: Visit the Federal Student Aid Interest Rates and Fees website (<https://studentaid.ed.gov/sa/types/loans/interest-rates/>) for current as well as historic loan rates and fees.

Cumulative maximum: None. Deferment period before repayment: 60 days from day of final check disbursement for loan period. Full repayment: Up to 10 years.

**Loans for Disadvantaged Students and Primary Care Loans** are available to medical students. For information, call the School of Medicine Financial Aid Office at 949-824-6476 or visit the School of Medicine Financial Aid Office website. (<http://www.ofas.uci.edu/content/medical.aspx>)

**Emergency loans** are made from an emergency student loan fund made possible through various philanthropic individuals and organizations.

Undergraduate, graduate, and medical students who have experienced unanticipated financial problems of a temporary nature may borrow up to \$300 without interest or service charge. Emergency loans must be repaid within 30 days after disbursement or by the end of the academic quarter, whichever occurs first. Applications are available in the Office of Financial Aid and Scholarships or at the School of Medicine Financial Aid Office. This loan is not based on demonstrated financial need.

## Federal Work-Study

The Federal Work-Study Program offers eligible students who demonstrate need an opportunity to pay for their living and educational expenses as they occur. By participating in the Federal Work-Study Program, students can reduce the amount of the loan to be repaid after leaving school. Students awarded work-study have the choice of obtaining a work-study job either on campus or off campus at an approved nonprofit agency. A variety of work opportunities are available, and such part-time work experience can be a valuable asset when seeking employment after graduation. Students eligible for work-study will be notified as such via their UCI Financial Aid award notification. Specific information regarding the terms and conditions of work-study employment will be available with the award notification.

**The U.S. Department of Veterans Affairs (VA) Work-Study Program** is managed by the Veteran Services Center (VSC) at UC Irvine and available to active duty, reservists, National Guard, veterans and dependents (adult children and spouses) who are receiving VA education benefits, including Chapters 30, 31, 32, 33, 35, and 1606. For more information about this program, please follow this link: <https://www.benefits.va.gov/gibill/workstudy.asp>. Please contact the VSC to complete the application for a VA Work-Study position at [veteran@uci.edu](mailto:veteran@uci.edu) or (949) 824-3500. For applications and detailed information, call the **Veteran Services Center** at 949-824-3500 or visit the Veteran Services website. (<http://veteran.uci.edu/>)

## Majors and Careers

### On This Page:

- [Choosing a Major](#)
  - [Undecided/Undeclared Students](#)

---

## Choosing a Major

Many students select their University major, the field of study which represents their principal academic interest, at the time they fill out their *University of California Undergraduate Application for Admission and Scholarship*. Some students, however, are not ready to choose a major at the time they apply and that's OK, and still others may wish to change to a different major after they have enrolled.

In preparation for choosing a major, students need to familiarize themselves as much as possible with UCI and its academic programs. Entering students are exposed to a wide range of areas of study, and it is not unusual for students to become enthusiastic about academic disciplines previously unfamiliar to them. At UCI, a number of traditionally separate academic disciplines have strong interrelationships, so that the academic environment is influenced by broad interactions among disciplines. As a complement to classroom study, UCI encourages its students to become involved in a variety of educational experiences such as independent study, laboratory research, field study, writing workshops, computing, and arts productions. Such experiences can help students identify additional areas of interest.

The *UCI General Catalogue* is a good place to find specific information about programs available and requirements. Students are encouraged to talk to academic advisers and faculty advisers and to go to any department to learn more about its programs of study, its requirements for graduation, and possible enrollment limitations. While advisers may not be familiar with all fields, they can suggest ways to investigate other areas of study and be

helpful in planning a lower-division program which will keep several options open. Courses and workshops designed to assist students in choosing a major are offered by the UCI Career Center, the Division of Undergraduate Education, and some of the academic units.

All students are required to choose a major by the time they reach junior status. It is important to look well ahead to this decision and to think about it carefully during the freshman and sophomore years. When considering possible majors, students should keep in mind that some major programs require quite specific preliminary study. At the same time, excessive early concentration could reduce a student's options and could cause the student to need more than four years to obtain the baccalaureate degree. Furthermore, courses required for graduation need to be considered. For these reasons, it is desirable for students to plan their programs carefully and thoughtfully, seeking a balance between exposure to a variety of academic areas and completion of courses which are prerequisite to a major under consideration. A qualified student interested in two areas of study may graduate with a double major by fulfilling the degree requirements of any two programs. Certain restrictions may apply; students should check with their academic adviser.

Each school or program has its own standards for change of major. Once a student selects a major, or decides to change majors, the student should visit the academic advising office for their prospective major to obtain current information about prerequisites, program planning, and policies and procedures. For most majors, students may request a change of major by submitting an online application through StudentAccess. Further information and a list of excluded majors is available on the University Registrar's website (<http://www.reg.uci.edu/request/changemajor/>).

All schools with exceptional requirements have major-change criteria approved by the Academic Senate and published on the Division of Undergraduate Education's Change of Major Criteria website (<http://www.changeofmajor.uci.edu>). Students changing majors may meet the approved major-change criteria of the unit they wish to enter that are in place at the time of their change of major or those in effect up to one year before.

## **Division of Undergraduate Education - Undergraduate/Undeclared**

Students who enter the University as freshmen or sophomores, who are uncertain about their major, and who wish to explore their options, experiment, and then decide, may participate in the Division of Undergraduate Education - Undergraduate/Undeclared Advising Office administered by the Division of Undergraduate Education. The Division is devoted to enriching the learning environment for lower-division students, especially those in the freshman year. Detailed information about the Undergraduate/Undeclared Advising Program is available in the Division of Undergraduate Education section.

## **Preparation for Graduate or Professional Study**

Undergraduate students should keep the possibility of future graduate or professional study in mind as they plan their academic programs, and they should discuss their career goals with their advisors. Students who have an idea of the direction in which they would like to go should familiarize themselves with the basic requirements for postbaccalaureate study and keep those requirements in mind when selecting courses. Furthermore, students should supplement their undergraduate programs by anticipating foreign language or other special requirements at major graduate schools and by related research, or intensive work in areas outside their major that are of special relevance to their intended graduate work. Students should consult the graduate advisor or academic counselor in the academic unit corresponding to their area of interest and visit the UCI Career Center which offers a number of services useful to those considering graduate or professional study.

General information for prospective graduate students is available on the Graduate Division website (<http://www.grad.uci.edu/>), while information about UCI's graduate education policies and procedures is available at the Irvine Division of the Academic Senate website (<http://www.senate.uci.edu>).

## **Preprofessional Preparation**

### **Law**

Law schools educate lawyers to serve the entire spectrum of legal issues (e.g., tax, criminal, entertainment, or immigration law), and across a wide variety of careers in private, public, and nonprofit sectors. As a result, a wide range of academic backgrounds can serve as good preparation for a career in law. Law schools look less for specific areas of study than they do for evidence of academic excellence. A good record in physics or classics, for example, will be preferred over a mediocre record in history or political science. Most law schools give equal preference to students from all academic disciplines. Courses that demand strong writing and analytical work (e.g., logic, writing, mathematics, research methods, and statistics) build skills that are the key to doing well on the Law School Admissions Test (LSAT) and succeeding in law school and the legal profession.

UCI offers a number of law-related courses that students in any major may take. The School of Humanities offers a Humanities and Law minor, emphasizing courses that require critical reading and analysis, and courses that focus on theoretical and applied analytical perspectives on ethical, political, and social issues relevant to the law. Further, the globalization and increased diversity of our world puts a premium on strong language skills and an understanding of multiple cultures. The School of Social Sciences offers courses in the study of law, international relations, and economics of law and recommends that students take some political science courses as well. The School of Social Ecology offers many law-related courses in both substantive law (such as environmental and criminal law) and in law and society and criminal justice. Social Ecology majors are provided the opportunity to apply theories learned in the classroom to actual problems through its field study program. Students may pursue fieldwork in both public and private law practices, law enforcement, and corrections agencies. Through these placements, students gain direct experience and have the opportunity to shadow professionals in these areas.

Students should know that law schools look closely at five aspects of a student's application: grades, LSAT results, the applicant's statement of purpose, in-depth letters of recommendation, extracurricular activities, and law-related work experience. Students should be aware that not everyone who applies is admitted to law school. One consideration in selecting an undergraduate major is alternative careers should one's goals change.

## Medicine and Other Health-Related Sciences

Although health science educators strongly recommend that students obtain a bachelor's degree prior to admission to the health sciences, there is no preferred major. Many UCI students, who plan to enter the health professions, major in Biological Sciences because much of the basic course work for that major is also required for medical school admission; however, students may major in any academic field as long as they also take the prerequisite courses required by professional health science schools. In general, the minimum amount of undergraduate preparation required includes one year each of English writing/composition, physics, biology with laboratory, chemistry (to include inorganic, organic, and biochemistry), and mathematics (especially calculus and statistics). Courses in cell biology, developmental biology, genetics, molecular biology, physiology, and computer science are recommended. In addition, some health sciences schools have additional course requirements or recommendations, for example, English and/or a foreign language, in particular, Spanish.

Although many factors ultimately are considered when reviewing applicants for admission, admission committees look carefully at the undergraduate grade point average; academic performance in biology, chemistry, physics, and math coursework; the results of the Medical College Admission Test (MCAT); the student's personal essay and/or interview; letters of recommendation; clinical exposure; research experience, especially in a biological, medical, or behavioral science; and extracurricular activities which demonstrate the applicant's ability to interact successfully with a diverse population of individuals.

Since medical programs cannot accommodate all qualified applicants and competition for entrance is keen, it is important to keep in mind alternative career opportunities should one not be accepted to a health science school, or should one decide to pursue instead, one of the expanding number of health-related programs now available.

## Business/Management

The contemporary executive or manager must be a creative thinker, make complex decisions, and have the ability to perceive and participate in the full scope of an enterprise while understanding its role in the economy. Effective management requires leadership ability, strong problem-solving skills, the ability to successfully deploy and manage information technologies, effective oral and written communication skills, analytical skills, an understanding of global economic trends, and a basic knowledge of behavioral processes in organizations.

Although not required for preprofessional school preparation, The Paul Merage School of Business offers a major in Business Administration and a major in Business Information Management with the Donald Bren School of Information and Computer Sciences. The Merage School also offers minors in Management, Accounting, and Innovation and Entrepreneurship as a supplement to any undergraduate major. The Management minor can provide students with a broad understanding of management theory and practice and may be helpful to students in determining whether they wish to pursue a career in business or management or undertake graduate-level study in management. The Accounting minor prepares students for careers in the accounting field or for graduate-level study. The minor in Innovation and Entrepreneurship provides extensive academic and practical training for students to embark on careers as entrepreneurs (innovating to form new companies) and intrapreneurs (innovating within existing companies).

Students can also supplement their major course work to develop the skills needed for business and management by taking electives such as calculus, statistics, economics, psychology, sociology, computer science, and political science. Also, students are encouraged to take intensive course work in the culture, history, geography, economy, politics, and language of specific foreign countries.

For admission purposes, the majority of graduate schools of business look at five areas: grades, scores on the Graduate Management Admission Test (GMAT), the applicant's statement of purpose, in-depth letters of recommendation, evidence of leadership in school and community activities, and work experience. Substantive work experience is becoming an increasingly important prerequisite for many programs.

Students from a variety of undergraduate disciplines including liberal arts, social sciences, physical or biological sciences, computer science, and engineering are encouraged to apply to UCI's Paul Merage School of Business.

## Career Opportunities

UCI's academic units which offer undergraduate education leading to the bachelor's degree provide students with opportunities to explore a wide range of interests leading to a career choice or to further education at the graduate or professional level. The lists which follow show the varied career areas pursued by UCI graduates. Any major can lead to a number of careers. Additional discussions of careers are presented in individual academic unit sections.

### Arts Career Areas

*Acting, Advertising, Animation, Arts Administration, Art Therapy, Broadcasting, Choreography, Community Development, Composition, Conducting, Conservation/Restoration, Consulting, Criticism, Curating, Digital Arts Production, Direction, Environmental Design, Graphic Design, Illustration, Instrument Repair/Tuning, Interior/Industrial Design, Journalism, Law, Librarianship, Lighting, Marketing, Medical Illustration, Music Therapy, Performance, Photography, Photo Journalism, Physical Fitness, Printing, Production, Publicity, Public Relations, Publishing, Set/Stage/Costume Design, Stage Management, Talent Management, Teaching, Tourism, Visual Resources Management, Writing*

The exceptionally talented graduates of the Claire Trevor School of the Arts may choose to become professional actors, art historians, artists, dancers, or musicians. However, there are many other careers to explore in numerous arts-related areas, or the graduate may wish to combine part-time professional performance with supplemental work. The field of arts administration is an increasingly important career area, offering opportunities to work with opera and dance companies, repertory theatre companies, museums, state and local arts councils, community arts organizations, and arts festivals.

## Biological Sciences Career Areas

*Bioanalysis, Biochemistry, Biomedical Engineering, Cell Biology, Chiropractic Medicine, Dentistry, Developmental Biology, Dietetics, Environmental Management, Forestry, Genetic Engineering, Health Administration, Industrial Hygiene, Marine Biology, Medical Technology, Medicine, Microbiology, Nurse Practitioner, Occupational Therapy, Oceanography, Optometry, Osteopathy, Plant Biology, Pharmacology, Pharmacy, Physicians' Assistant, Physical Therapy, Podiatry, Public Health, Quality Control, Research, Sales, Speech Pathology, Teaching, Technical Writing and Editing, Veterinary Medicine*

The health field is one of the fastest-growing career areas in the country. Work sites may include private corporations, educational institutions, hospitals, health care complexes, private foundations, city and county governments, state agencies, the federal government, and many others.

## Education Sciences Career Areas

*Administration and Leadership, Adult and Family Services, After School Learning and Development, Child and Adolescent Learning and Development, Curriculum Design, Digital Media, Education Publishing, K-12 Education, Language Learning, Learning Technologies, Policy Analytics, Research and Evaluation, School and Vocational Counseling, Student Affairs*

Graduates of Education Sciences are prepared for careers in the global knowledge economy, with opportunities to apply learning modalities and technologies in multicultural contexts. Graduates may choose from diverse career opportunities in public education, informatics, higher education, and education software development. Employers include government, private industry, and non-profit organizations. Many graduates will pursue advanced degrees leading to instructional certification, academic research, or administrative leadership.

## Engineering Career Areas

*Aerospace, Biochemical, Biomedical Devices and Instrumentation, Biomedical Imaging, Biotechnology, Chemical Engineering, Communications, Computer Architecture, Computer Engineering, Computer Software, Control Systems, Digital Signal Processing, Earthquake Safety, Electric Power, Electronics, Electro-optics, Environmental Control, Environmental Engineering, Flood Control, Geotechnical, High-Speed Image Processing, Hydraulics, High-Frequency Devices and Systems, Land Development and Urban Planning, Manufacturing Engineering, Materials, Process Control, Propulsion and Power, Public Works, Reliability, Robotics, Structures, Traffic, Transportation, Water Resources, Water Supply*

These are some areas for employment available to UCI engineering graduates. Career paths typically involve one or more of the following: design, research and development, manufacturing or construction, operations, consulting, applications and sales, management, or teaching. At UCI they will have had the choice of Aerospace, Biomedical, Biomedical: Premedical, Chemical, Civil, Computer, Computer Science and Engineering, Electrical, Environmental, Materials Science and Engineering, or Mechanical Engineering, as well as a general program in Engineering. However, they will frequently find challenging positions in related areas such as industrial engineering, for which their general and specialty course work at UCI, followed by formal or informal, on-the-job training will qualify them. Approximately half of UCI's Engineering graduates obtain advanced degrees from UCI or other universities, and almost all engage in continuing education to keep abreast of advances in technology. Many Engineering graduates build on their engineering background and enter graduate programs to obtain degrees in the fields of administration, law, medicine, physics, or mathematics.

## Humanities Career Areas

*Advertising, Banking, Broadcasting, Business, Counseling, Communications, Diplomacy, Education, Film and Television, Foreign Service, Government Service, Human Resources, Insurance, International Relations, Journalism, Law, Library Science, Management/Administration, Marketing, Medicine, Personnel, Politics, Public Administration, Public Relations, Publicity, Publishing, Research, Retail Sales, Screenwriting, Social Service, Social Welfare, Teaching, Technical Writing, Tourism, Translating/Interpreting, Writing*

The School of Humanities prepares students to be global citizens and leaders in today's world. Students not only master a body of knowledge, but they also develop a set of portable skills needed for a lifetime. Humanities majors are well-suited for widely-varied careers because they are taught to read closely, to observe critically, to think logically and analytically, to research methodically, and to communicate effectively across cultures. They can develop varied, long, and successful careers because of their heightened social and emotional intelligence and ability to learn and adapt on the job. Diverse career fields available to Humanities graduates include entry-level positions in both the public and private sectors or professional-level opportunities combining the degree with further specialization. Humanities graduates may also elect to enter into professional graduate programs such as education, law, library science, medicine (with proper prerequisites), or public administration. Business and industry utilize Humanities graduates for various management training programs including areas in banking, retail sales, and insurance. Graduates with special skills in oral and written communications may look to positions with newspapers, advertising agencies, public relations firms, radio and television stations, and publishing houses. Technical writers are in demand, particularly those who have had some preparation in engineering, computer science, and/or the sciences. Opportunities for graduates fluent in languages other than English can be found in areas like government, business, social service, counseling, foreign service, and international trade.

## Information and Computer Science Career Areas

*Applications Programming, Bioinformatics, Computer-Aided Design, Computer Animation, Computer Architecture, Computer Networks, Computer Simulation, Computer Systems Design, Cybersecurity, Databases, Digital Media and Learning, Information Systems Design and Consulting, Embedded Systems, Machine Learning, Management Information Systems, Multimedia Applications, Parallel and Distributed Systems, Software Engineering, Human-Computer Interface Design, Supercomputing, Systems Administration, Systems Analysis and Design, Systems Programming, Business Information Management*

Graduates of the Donald Bren School of Information and Computer Sciences pursue a variety of careers. Many graduates specify, design, and develop a variety of computer-based systems comprised of software and hardware in virtually every application domain, such as aerospace, automotive, biomedical, consumer products, engineering, entertainment, environmental, finance, gaming, investment, law, management, manufacturing, and pharmacology. Bren School graduates also find jobs as members of research and development teams, developing advanced technologies, designing software and hardware systems, and specifying, designing, and maintaining computing infrastructures for a variety of institutions. Some work for established or start-up companies while others work as independent consultants. After a few years in industry, many move into management or advanced technical positions. Some Bren School students also use the undergraduate major as preparation for graduate study in computer science or another field (e.g., medicine, law, engineering, management).

## **Nursing Science Career Areas**

*Direct Patient Care in Hospitals, Clinics, Communities, and Homes, Advance Primary Care Practice (e.g., Nurse Practitioner), Higher Education (e.g., Nursing Professor), Health-related Research, Health Care Administration, Provider Relations, Policy Analysis, Policy Development, Risk Assessment, Global Health, Consulting, Program Evaluation, Incident/Disease Investigation, Research Methodology, Data Analysis, Clinical Trials, Social and Economic Development, Health Policy and Law, Women's Health, Children's Health, Health and Behavior, Design of Health Care Systems, Pharmaceutical Production and Development, Biotechnology, Medicinal Chemistry, Medicine, Pharmacy, Health Promotion, Health Care Delivery Systems, Physical Restoration and Rehabilitation, Program Management and Design, Disease Prevention and Control, Community Health and Outreach, Health Forensics, Health Insurance and Management, Information Technology, Marketing, Public Relations*

Graduates of Nursing Science are prepared for a wide range of unparalleled career opportunities at the frontiers of many emerging and established fields in health care, industry, government, and research and education. Opportunities include working with private corporations, hospitals, medical clinics, health care agencies, pharmaceutical industry, biotechnology industry, local and state government agencies, the federal government, educational providers, court and probation systems, and many others. Graduates can use their education and training to enter a rich variety of graduate programs and to earn professional degrees in related fields.

## **Pharmaceutical Sciences Career Areas**

*Pharmaceutical Production and Development, Biotechnology, Medicinal Chemistry, Medicine, Pharmacy, Health Promotion, Health Care Delivery Systems, Physical Restoration and Rehabilitation, Program Management and Design, Disease Prevention and Control, Community Health and Outreach, Health Forensics, Health Insurance and Management*

Graduates of Pharmaceutical Sciences are prepared for an unparalleled range of career opportunities in emerging and established biomedical fields in industry, government, research institutes, and education. Opportunities include working in private corporations, hospitals, medical clinics, health care agencies, pharmaceutical industry, biotechnology industry, local and state government agencies, the federal government, educational providers, court and probation systems, and many others. Graduates have a rich variety of choices in filling professional positions in any of these settings or first pursuing additional training at the graduate level in pharmaceuticals, chemistry, pharmacology, or biological sciences. Earning an advanced professional degree in pharmacy, medicine, dentistry, physician assistant, nursing, or public health is yet another popular option.

## **Physical Sciences Career Areas**

*Actuarial Science, Aerospace, Analytical Chemistry, Applied Physics and Chemistry, Astrophysics/Astronomy, Bioscience, Computers, Data Science, Energy Science, Electronics, Engineering Applications, Environmental Science, Food Chemistry, Forensic Chemistry, Geoscience, Inorganic Chemistry, Instrumentation, Laboratory Science, Lasers, Materials Science, Medicine, Nuclear Science, Optical Devices, Organic Chemistry, Pharmacology, Physical Chemistry, Plasma Physics, Quality Control, Radiation Science, Radiology, Solid State Devices, Space Science, Statistics, Teaching*

Graduates of the School of Physical Sciences have backgrounds appropriate to a variety of areas in research, teaching, and management. Career opportunities for physical scientists are found in federal, state, and local government as well as in private industry. Chemists may work in research and development and in jobs dealing with health, pollution, energy, fuel, drugs, and plastics. Water districts, crime labs, and major chemical and oil companies are also good resources for employment. Earth System Science and Environmental Science majors will find employment in areas such as hazardous waste treatment, resource extraction, pollution remediation, and as consultants to government and high-technology fields. Mathematics graduates find employment in both government and the private sector in such technical fields as operations research, computer programming, marketing research, actuarial work, banking, retail management, and scientific research. Physics and Applied Physics graduates find professional positions in education, research and development, and in the electronic and aerospace industries. Possible careers include science teaching and writing, computer and electrical engineering, device and instrumentation development, nuclear and reactor physics, environmental and radiological science, laser and microchip development, astronomy, and geophysics.

## **Public Health Career Areas**

*Global and International Health, Disease Prevention, Surveillance, Natural Disasters, Emergency Preparedness and Response, Environmental Health Science, Epidemiology, Health Behavior, Health Psychology, Health Economics, Engineering and Health, Health Policy Analysis, Health Care Management, Health Services Administration, Biostatistics, Health Communication, Health Informatics, Complementary and Alternative Medicine, Health Promotion, Health Demography, Health Insurance, Community Health, Health Risk Assessment, Forensics, Biotechnology, Vaccinology, Genetic Engineering, Health Geography, Health Education, Infectious Disease Prevention, Chronic Disease Prevention, Wellness, Clinical Trials, Urban Health, Rural Health, Water Quality, Nutrition and Food Protection, Air Quality and Health, Health Geology, Vulnerable Populations, Burden of Disease Assessment*

The increase in human population, widening diversity of socioeconomic and cultural attributes, rapid mobility, and internet-enabled broadening of social networks are compelling reasons to pursue careers in public health. Government policies that affect access to health care resources may also influence our ability to prevent disease and promote health in populations. Graduates of the UC Irvine Program in Public Health are prepared for careers in research, teaching, and public health practice in private and public sectors. Challenges in public health require acquisition and ready deployment of fundamental knowledge and practical skills. Employment opportunities exist at city and county health care agencies, state departments of public health, national institutions such as the Centers for Disease Control and Prevention, and international agencies such as the World Health Organization. Private foundations and corporations employ public health graduates, including, for example, the Bill and Melinda Gates Foundation and various health insurance providers. Nonprofit organizations and community service groups also employ public health degree holders. Graduates who are interested in academic career tracks focusing on research and/or teaching will find employment at various units within public and private universities and think-tanks.

## Social Ecology Career Areas

*Administration, Architecture, Biostatistics, Clinical Psychology, Corrections/Probation, Counseling, Education, Educational Support Services, Environmental Design, Environmental Planning and Consulting, Epidemiology, Government Service, Health Service, Hospital Administration, Housing Development, Human Resources, Law, Management/Administration, Mental Health, Program Coordination, Psychology, Public Health Research, Public Relations, Real Estate/Development, Research and Research Design, Social Service, Teaching, Urban Planning, Water Quality Control*

Graduates of the School of Social Ecology may hold positions as urban planners, environmental consultants, juvenile probation officers, counselors, elementary and secondary school teachers, legal aides, coordinators of juvenile diversion programs, social workers, mental health workers, special education teachers, architectural consultants, and elected officials, just to cite some examples of career choices. Many School of Social Ecology graduates have used their training to enter graduate programs and obtain advanced degrees in the fields of law; clinical, community, social, developmental, and environmental psychology; public health; public and business administration; environmental studies; urban planning; social welfare; criminology; and the administration of justice.

## Social Sciences Career Areas

*Banking, Correction/Probation, Counseling, Environmental Analysis, Finance, Foreign Service, Government Service, Health Services, Human Services, Industrial Relations, International Affairs, Labor Relations, Law, Library Science, Management/Administration, Marketing, Personnel, Psychology, Public Relations, Publishing, Real Estate, Research, Sales, Statistical Analysis, Teaching, Writing*

Business and industry often look to social science graduates to fill positions in management, finance, marketing and advertising, personnel, production supervision, and general administration. In the public sector, a wide variety of opportunities are available in city, county, state, and federal government. Teaching is a frequently chosen career at all levels from elementary school teacher to university professor. In addition, many graduates enter professional practice, becoming lawyers, psychologists, researchers, or consultants in various fields.

## Special Programs

---

### Concurrent Enrollment and Summer Session

Exceptional high school students can enroll in UCI classes without formal admission to the University year-round.

During the academic year, concurrent enrollment is ideal for well-prepared high school seniors who have exhausted the curriculum available in high school and who are looking for advanced-level course work, or for students who are seeking an enrichment course or course work not available at their high school. For information, call 949-824-5414, email [dce-services@uci.edu](mailto:dce-services@uci.edu), or visit the Concurrent Enrollment website (<https://ce.uci.edu/courses/concurrent/>).

During the summer, high school students who will be a junior or senior in the upcoming fall and have an unweighted GPA of 3.0 or higher in college preparatory classes can enroll in UCI Summer Session courses numbered 1-99 without special prerequisites through open enrollment. Complete an enrollment form and submit it along with your transcript to the Summer Session Office. For more information, contact the UCI Summer Session Office at 949-824-6494, email [summer-session@uci.edu](mailto:summer-session@uci.edu), or visit the Summer Session website (<http://summer.uci.edu>).

Admission and enrollment in courses either through Concurrent Enrollment or UCI Summer Session does not constitute admission to UCI as an entering freshman student. See the Undergraduate Admissions section of this *Catalogue* for information about applying to UCI and the formal admission process.

### UCI Center for Educational Partnerships

The mission of the UCI Center for Educational Partnerships (CFEP) (<http://www.cfep.uci.edu/>) is to create collaborations that support preparation for and success in higher education. CFEP's focus is on equity and access for all students in order to achieve the University of California's goal of academic excellence. CFEP has three guiding principles: (1) diversity among students and faculty enhances the educational experience the University provides and the scholarship it produces; (2) collaboration promotes the exchange of ideas, leverages resources and drives collective action; and (3) research guides practice, promotes accountability and advances knowledge.

In order to achieve its mission, CFEP builds lasting partnerships with individuals and institutions committed to improving education; facilitates faculty involvement; engages in K-12 academic preparation; provides teacher professional development; promotes college-going culture; supports

undergraduate retention; enhances graduate school preparation; conducts research and evaluation; participates in the national dialogue about educational reform and collaboration; and fosters learning communities to support ongoing professional and intellectual development.

For additional information, call 949-824-7482 or visit the Center for Educational Partnerships website (<http://www.cfep.uci.edu>).

## Student Success Initiatives

**Student Success Initiatives**, housed in the **Division of Undergraduate Education**, provides students with the personal, academic, and professional support and development to thrive and succeed at UCI and beyond. SSI is dedicated to serving and assisting with the transitions of low-income students, first-generation students, international students, undocumented students, former foster youth, transfer students, adult-learners, students in transition, students with dependents, and students with disabilities. SSI also provides a learning community that empowers students to be productive and engaged in their academic careers and personal endeavors. Drop-in counseling, scholarships for tutoring, peer mentoring, and weekly workshops are offered throughout the year. Summer academic programs are also available for incoming students. See the Division of Undergraduate Education section of the *Catalogue* for additional information.

## Graduate Diversity Programs

The University of California believes that a diverse student and faculty population is integral to academic excellence. It is critical to promoting the lively intellectual exchange and the variety of ideas and perspectives that are essential to advanced scholarly research. The university remains committed to expanding outreach, recruitment, and retention efforts. Through the Graduate Division's diversity programs, steps are taken to increase the participation of diverse groups of U.S. citizens and permanent residents who have been disadvantaged in obtaining graduate education in the United States. See the Graduate Division section of the *Catalogue* for additional information.

## Medical Student Support Programs

The School of Medicine's Office of Student Support is designed to meet the challenges of California's changing demographics and to contribute to the School's goal of achieving a broad spectrum of diversity in the student population, and ultimately, in the medical profession. The office plays a major role in the recruitment and retention of targeted socioeconomically disadvantaged students who have the potential of service to the medically underserved communities in California. The Office of Student Support also serves as a resource for students by providing a supportive learning environment through advising and counseling prospective students and mentoring students following their admission to medical school. See the School of Medicine section for additional information.

## Undergraduate Admissions

The UCI Office of Undergraduate Admissions is responsible for the admission of new undergraduate freshman and transfer students. Inquiries may be addressed to:

Office of Undergraduate Admissions

University of California, Irvine  
Irvine, CA 92697  
<http://www.admissions.uci.edu>

The Office of Undergraduate Admissions is open from 8 a.m. to 5 p.m., Monday through Friday; telephone 949-824-6703.

## Categories of Application

An **undergraduate** applicant is a student who wishes to complete a program of study leading to a Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Music, or Bachelor of Science degree.

A **freshman** applicant is a student who is currently in high school or has graduated from high school but has not enrolled in a regular session (fall, winter, spring) at a college or university.

A **transfer** applicant is a student who has enrolled in a regular session (fall, winter, or spring) at a college or university after high school. (Students who meet this definition cannot disregard their college records and apply as freshmen. A student who attends a college summer program immediately after graduating from high school or who has completed college work while in high school is still considered a freshman applicant.)

A **California Community College** applicant is one who completed at least 30 semester (45 quarter) UC-transferable units at one or more California Community Colleges. The last college the student attended in a regular session (fall/spring or fall/winter/spring) before admission to a UC campus must be a California Community College.

A **nonresident** applicant is a student whose legal permanent residence (as determined by the University) is outside of the State of California. Nonresident applicants are generally required to pay Nonresident Supplemental Tuition and must also present a higher grade point average than is required of California residents.

An applicant for **readmission** is a student who was formerly registered and enrolled at UCI and who has interrupted the completion of one or more quarters of enrollment. See Readmission: Undergraduate and Graduate Students.

A **second baccalaureate** applicant is a college graduate who wishes to obtain a second bachelor's degree in a major different from that of the first degree.

An **international** applicant is a student who is not a U.S. citizen or U.S. permanent resident.

A **limited status** applicant - frequently known as a non-degree-seeking student - is held to the same restrictions as applicants pursuing a second B.A. or B.S. degree.

## Admission as a Freshman Applicant

The undergraduate admissions policy of the University of California is guided by the University's commitment to serve the people of California and the world, from every culture and ethnicity and across the economic spectrum.

The University's admission requirements, described in detail in the Minimum Admission Requirements for Freshmen section, are designed to ensure that students are adequately prepared for University-level work. Meeting admission requirements entitles an applicant to be considered for admission but does not constitute an offer of admission.

In recent years, the number of freshman applicants to UCI has exceeded the number of spaces available. Since the campus cannot admit all eligible applicants, it must use standards that are more demanding than the minimum UC requirements to select students. These standards, which the University calls selection criteria, are used to identify applicants who have demonstrated the highest academic achievement and who have a variety of other qualities that can contribute to the strength and diversity of the campus community.

In the case that UCI is unable to accommodate all qualified applicants in their first-choice major, those students who indicate a valid alternate major may be offered admission in that major. Students who wish to change their major after enrolling at UCI must submit an Undergraduate Petition for Change of Major to the academic counseling office in the school or program of their prospective major.

## Admissions Selection

**Due to COVID-19, be sure to visit [admissions.uci.edu/fall2020FAQ](https://admissions.uci.edu/fall2020FAQ) (<https://admissions.uci.edu/fall2020FAQ/>) for the most up-to-date information regarding undergraduate admission requirements.**

UCI seeks to select students who have a demonstrated record of academic and personal achievement. Academic achievement includes the number of college preparatory courses completed; the level of achievement in these courses, including honors, Advanced Placement, International Baccalaureate, and college courses completed; and the quality of the senior-year program as measured by the type and number of academic courses in progress or planned. Also considered are the high school grade point average (GPA) calculated on UC-specified subjects (UCI uses a maximum of eight honors grade points in determining the UC GPA) and the required standardized national examinations.

The level of performance needed to gain admission varies from year to year depending on the size and the academic quality of the applicant pool and the number of enrollment spaces.

Personal achievement outside of the classroom is also considered in UCI's selection process. A range of pursuits is considered, including academic activities, the creative and performing arts, community service and leadership, athletics, participation in pre-collegiate programs that develop academic ability, and other extracurricular activities. Persistence counts more than scattered involvement, while initiative and curiosity are also important.

The admissions process at UCI is also sensitive to individual circumstances and the effect these may have had on the resources available to and the experiences of applicants. While all applications receive careful consideration, reviewers take note of any extenuating circumstances and/or a variety of cultural and economic situations, including students who are the first in their families to attend college, who have a low family income, or who have worked in support of their family during high school. The emphasis, however, is less on the personal circumstances of the applicant and instead is more focused on how the applicant has responded to challenges while achieving academic success.

Every attempt is made to become familiar with the unique accomplishments of each applicant.

Students interested in the majors below should be aware of the following provisions.

### Dance and Music:

Dance applicants must audition in late January/early February in ballet, modern, and jazz, prior to the fall quarter when entrance is anticipated, and be selected by faculty.

All Music applicants must apply to the B.A. program and audition in late January/early February with an instrument or voice, prior to the fall quarter when entrance is anticipated; admission to the B.Mus. program is by a second audition after matriculation.

**Computer Science and Engineering** (offered jointly by the Donald Bren School of Information and Computer Sciences and The Henry Samueli School of Engineering): Applicants must complete four years of high school mathematics through pre-calculus or math analysis and are advised to have completed one year each of chemistry and physics. One semester of programming coursework is also advised. (This requirement does not apply to

other majors offered by the Donald Bren School of Information and Computer Sciences.) That preparation, along with honors courses and advanced placement courses, is fundamental to success in the program. The Henry Samueli School of Engineering recommends that freshman applicants in Engineering majors take the Math Level 2 SAT Subject Test.

**Nursing Science:** Admission to the Nursing Science major is limited and selective. Applicants must complete two years of basic science providing fundamental knowledge in the core disciplines of biology and chemistry. Advanced laboratory science classes that have biology or chemistry as prerequisites and offer substantial additional material may be used to fulfill this requirement. Students must earn grades of C or higher in order to fulfill their subject requirements. Students with the highest combination of overall grade point average, grade point average in science courses, and scores on the SAT or ACT examinations will be given priority.

## Admission Requirements for Freshmen

**Due to COVID-19, be sure to visit** [admissions.uci.edu/fall2020FAQ](https://admissions.uci.edu/fall2020FAQ/) (<https://admissions.uci.edu/fall2020FAQ/>) **for the most up-to-date information regarding undergraduate admission requirements.**

The requirements described below represent the minimum academic standards students must attain to be considered for admission to the University. Meeting minimum admission requirements does not guarantee admission. Admission to UCI and the program of choice often requires students meet more demanding standards.

Freshman applicants who are not residents of California should also refer to the Nonresident Admission Requirements section.

### Subject Requirement

To satisfy the subject requirement, students must complete a minimum of 15 yearlong (or 30 semester) UC-approved college preparatory courses with a letter grade of C or better, with at least 11 (22 semester) of the courses finished prior to the beginning of their last year of high school. These courses are also known as the A-G courses. A grade point average (GPA) of 3.0 or better must be earned (3.4 if the student is a nonresident) in these courses with no grade lower than a C.

#### The 15 required A-G courses are:

**A. History:** Two years of history, including one year of world or European history, cultures and geography (may be a single yearlong course or two one-semester courses); and one year of U.S. history or one-half year of U.S. history and one-half year of civics or American government.

**B. English:** Four years of college-preparatory English that include frequent writing, from brainstorming to final paper, as well as reading of classic and modern literature. No more than one year of ESL-type courses can be used to meet this requirement.
