**C. Mathematics:** Three years of college-preparatory mathematics that include the topics covered in elementary and advanced algebra and two- and three-dimensional geometry. A geometry course or an integrated math course with a sufficient amount of geometry content must be completed. Approved integrated math courses may be used to fulfill part or all of this requirement, as may math courses taken in the seventh and eighth grades if the high school accepts them as equivalent to its own courses.

**D. Science:** Two years of college-preparatory science, including or integrating topics that provide fundamental knowledge in two of these three subjects: biology, chemistry, or physics. One year of approved interdisciplinary or earth and space sciences coursework can meet one year of the requirement. Computer Science, Engineering, Applied Science courses can be used in area D as an additional science (i.e., third year and beyond).

**E. Language Other Than English:** Two years, or equivalent to the second level of high school instruction, of the same language other than English are required. (Three years/third level of high school instruction recommended.) Courses should emphasize speaking and understanding, and include instruction in grammar, vocabulary, reading, composition, and culture. American Sign Language and classical languages, such as Latin and Greek, are acceptable. Courses taken in the seventh and eighth grades may be used to fulfill part or all of this requirement if the high school accepts them as equivalent to its own courses. (Students are strongly encouraged to complete three or four years of one language in preparation for the UCI Language Other Than English and/or the International/Global Issues general education requirements.)

**F. Visual and Performing Arts:** One yearlong course of visual and performing arts chosen from the following disciplines: dance, drama/theater, music, interdisciplinary arts or visual art -- or two one-semester courses from the same discipline is also acceptable.

**G. College Preparatory Elective:** One year (two semesters), in addition to those required in 'A-F' above, chosen from the following areas: visual and performing arts, history, social science, English, advanced mathematics, laboratory science and language other than English (a third year in the language used for the "E" requirement or two years of another language).

### Courses Satisfying the "G" Requirement

**History:** All history courses should require extensive reading and writing. Courses should enable students to establish a breadth of understanding of history (for example, world history, political history or economic history) and should provide an understanding of the human past, including its relation to the present. Courses should develop a student's critical thinking, ability to evaluate historical data, and ability to analyze and synthesize evidence.

**Social Science:** Courses should be in one of the social sciences: anthropology, economics, geography, political science, psychology, or sociology, or, alternatively, courses should be interdisciplinary, drawing knowledge from two or more of these fields. Course objectives should include as many of the following as are applicable to the field: (1) to understand the development and basic features of major societies and cultures; (2) to examine the historic

and contemporary ideas that have shaped the world; (3) to understand the fundamentals of how differing political and economic systems function; (4) to examine the nature and principles of individual and group behavior; and (5) to study social science methodologies.

In order to develop a student's critical thinking, ability to evaluate ideas and information, and ability to analyze and synthesize qualitative and quantitative evidence in the laboratory and in the field, a social science course must include a body of basic knowledge, extensive reading, and written and oral exposition.

Courses which are designed to meet state-mandated social studies graduation requirements are acceptable provided that they meet the above criteria. Courses of an applied, service, or vocational character are not acceptable social science electives.

**English:** All English courses should require substantial reading with frequent and extensive practice in writing which is carefully evaluated and criticized. A course in creative writing, journalism, speech or debate is acceptable if it meets the general requirements in reading and writing stated above. An advanced-level course in English as a Second Language (ESL) or English Language Development (ELD) may be acceptable provided it meets the standards outlined under the "B" requirement.

**Advanced Mathematics:** Acceptable electives are courses in mathematics with second-year algebra as a prerequisite such as trigonometry, linear algebra, precalculus (analytic geometry and mathematical analysis), calculus, and probability and statistics.

A computer science course is an acceptable mathematics elective if it fulfills the following objectives. The course should enable each student to express algorithms in a standard computer language such as C++, Pascal, Java, BASIC, FORTRAN, or COBOL. By the end of the course, each student should complete substantial programming projects in the language used. The course should also involve the study and mastery of various aspects of computer science: how computers deal with data and instructions, the internal components of a computer, and the underlying computer logic.

**Science:** Acceptable courses should cover topics from the biological or physical sciences in which students make their own observations and measurements and analyze these data to obtain further information.

An introductory science course normally offered in the ninth grade, (such as earth science or physical science) is an acceptable science elective provided it is designed to prepare students for laboratory science courses in the tenth grade and beyond. The course must provide an introduction to the fundamental principles of physical and/or biological science. Laboratory activities as defined above shall be included. (A terminal course designed only to meet graduation requirements is not an acceptable science elective.)

**Language Other Than English:** It is recommended that elective courses be in the same language used to satisfy the language other than English "E" subject requirement. Elective courses in this language must have at least two years of the language as a prerequisite. In order for a second language to qualify as an elective, at least two years of this language must be completed.

**Visual and Performing Arts:** Courses in this area consist of instruction in dance, drama/theater, music, interdisciplinary arts or visual art. Courses should enable students to understand and appreciate artistic expression and, where appropriate, to talk and write with discrimination about the artistic material studied.

Courses devoted to artistic performance and developing creative artistic ability should have prerequisites (either one year of introductory coursework or experience approved by the instructor) and should assume proficiency beyond the introductory level.

Courses must require on average the equivalent of a five-period class per week. Work outside of class must be required; for example, portfolio/performance preparation, reading, writing, research projects and/or critical listening/viewing.

Dance courses offered for physical education credit or under any other departmental arrangement are acceptable provided they include content satisfying the above criteria.

Courses which are primarily athletic or body conditioning are not acceptable visual and performing arts electives.

**College Preparatory Elective:** The general objectives of the "G" requirement are to improve students' analytical abilities, promote artistic development, and strengthen oral and written skills. The requirement is intended to encourage prospective University students to fill out their high school programs with courses that: (1) strengthen general study skills, particularly analytical reading, expository writing and oral communication; (2) provide an opportunity to begin work that could lead directly into a major program of study at the University; (3) experience, at some depth, new areas of academic disciplines that might form the basis for future major or minor studies at the University.

Courses that fulfill the "G" requirement should allow students to prepare for college-level work in the subject area, so that the level attained at the end of such courses would be well beyond the introductory or survey level. Courses that have narrow objectives aimed at meeting specific societal or personal lifestyle goals are not acceptable.

**California High School Students.** Courses taken to fulfill the subject requirement must be certified by the University as meeting the requirement and must be included on the UC-certified course list of the school the student attended. The high school counselor or principal will have a copy of this list. In addition, the lists are available at the A-G course list site (<https://hs-articulation.ucop.edu/guide/>).

**Out-of-State High School Students.** The UCI Office of Undergraduate Admissions will review and accept courses that meet the requirements for applicants graduating from out-of-state schools.

## Exam Requirement

**UC Regents has suspended the standardized test requirements for students applying for fall 2021 freshman admission. Due to COVID-19, be sure to visit [admissions.uci.edu/fall2020FAQ](https://admissions.uci.edu/fall2020FAQ/) (<https://admissions.uci.edu/fall2020FAQ/>) for the most up-to-date information regarding undergraduate admission requirements.**

All freshman applicants must submit exam scores as described below. *Students applying for admission for the fall term should be sure to take their admissions tests no later than December of their senior year/last year prior to high school graduation - preferably earlier.* All students applying for freshman admission must submit college admissions test scores from either the SAT with Essay or the ACT with Writing and be aware of the guidelines below:

- Report ACT and/or SAT scores on the admissions application, then request that an official copy of the scores be sent to UC Irvine from the testing agency. Applicants can have their official score report sent to one UC campus, and all UC campuses they apply to will receive it.
- In the College Board's Score Choice module, we encourage you to send all official scores to UC. We will use the highest scores from a single administration. There is no disadvantage to submitting all scores. A higher sub-score from another test date may be used to meet university or campus graduation requirements after admission.
- For the ACT with Writing test, UCI will focus on the highest combined score from the same test administration.
- For the SAT with Essay, UCI will focus on the highest total score from a single test date.
- UC does not require results of tests taken for the purpose of talent programs in middle or junior high school (e.g., Johns Hopkins Center for Talented Youth, Duke University's Talent Identification Program, UC Berkeley's Academic Talent and Development Program, etc.). Those test scores do not have to be sent to UC.
- UC does not accept test substitutions.
- SAT Subject Test scores are no longer required, however they are recommended for certain selective majors. Submission of SAT Subject Test scores may add positively to the review of a student's application.

More information about these examinations is available online. For the SAT with Essay and SAT Subject Tests, visit the College Board website (<https://www.collegeboard.org/>). For the ACT with Writing, visit the ACT website (<http://www.actstudent.org/>).

SAT Subject Tests are not required for admission. Students may submit scores if they wish to showcase academic mastery. Competitive majors may recommend particular SAT Subject Tests to demonstrate subject proficiency. Additionally, Subject Tests may be used to fulfill A-G requirements.

**IMPORTANT:** Please note the SAT Subject Test recommendations below.

- The Claire Trevor School of the Arts recommends that freshmen applicants take any SAT Subject Tests that will demonstrate the student's strengths.
- The Henry Samueli School of Engineering recommends that freshmen applicants in Engineering majors (including the joint Computer Science and Engineering major) take the SAT Subject Test in Math Level 2 and a science test (Biology E/M, Chemistry or Physics) closely related to the applicant's intended major.
- The School of Physical Sciences recommends that freshmen applicants in Chemistry, Earth System Science, Mathematics, Physics, and Applied Physics majors take the SAT Subject Test in Math Level 2 and a science test closely related to the applicant's intended major.
- The Program in Public Health recommends that freshmen applicants take the following SAT Subject Tests: for the major in Public Health Sciences: Biology E, Biology M, Chemistry, and/or Math Level 2; for the major in Public Health Policy: Biology E, Biology M, and/or World History.

## Scholarship Requirement

In order to be considered for admission, applicants must have earned a minimum GPA of 3.0 (3.4 for nonresidents) in all A-G courses completed in grades 10 and 11, with no grade lower than a C. We award extra grade points for grades received in approved honors-level courses to a maximum of eight semesters, including no more than four semesters taken in the 10th grade.

## California Students

State residents who qualify for admission requirements by one of the following paths and are not admitted to a campus they apply to will be offered admission at another campus if space is available.

- Statewide path: Students must rank in the top 9 percent of California students, according to the UC admissions index.
- Local path (ELC): Students must rank in the top 9 percent of their own high school graduating class.

## Eligibility in the Local Context (ELC)

To qualify for Eligibility in the Local Context, an applicant must be a California resident and attend a participating California high school.

To be considered for ELC, an applicant must have a minimum GPA of 3.0 and complete the following A-G courses prior to their senior year:

- History: 1 year
- English: 2 years

- Mathematics: 2 years
- Science: 1 year
- Language Other Than English: 1 year
- Other A-G courses (chosen from the subjects listed above or another course approved by the University): 4 years

## Admission By Exam

In general, this method of consideration is designed for students who have been unable to meet the regular subject requirements and/or earn a high school diploma because of unique circumstances, such as non-traditional education or long-term illness. To be considered, a student must take either the ACT with Writing or the SAT, as well as two SAT Subject Tests, and earn a minimum UC Score calculated from their exam scores.

Students may not use an SAT Subject Test to meet this requirement if they have completed a transferable college course with a grade of C or better in that subject.

Students who qualify by examination are not guaranteed admission. However, they are entitled to a full review of their application. For more information, visit UC Admission by Exam website (<http://admission.universityofcalifornia.edu/freshman/requirements/examination/>).

## Nonresident Freshman Admission Requirements

**Due to COVID-19, be sure to visit** [admissions.uci.edu/fall2020FAQ](https://admissions.uci.edu/fall2020FAQ/) (<https://admissions.uci.edu/fall2020FAQ/>) **for the most up-to-date information regarding undergraduate admission requirements.**

Nonresident freshman applicants must meet the same admission requirements as those for California-resident students, *except*, nonresident applicants must have a minimum 3.4 GPA in the 15 college preparatory courses (A-G), with no grade lower than a C. Refer to the Expenses, Tuition, and Fees section of this *Catalogue* for information regarding residence classification for tuition purposes and the Nonresident Supplemental Tuition.

## Admission as a Transfer Applicant

The University defines a transfer applicant as a student who enrolled in a regular session (fall, winter, or spring) at a college or university after high school. (Summer sessions do not count.) UCI considers a California Community College transfer applicant as a student who has completed at least 30 semester units/45 quarter UC transferable units at one or more California Community Colleges and the last college attended in a regular session (fall/spring or fall/winter/spring) before admission to UCI is a California Community College. A competitive UCI transfer applicant should have a UC transferable GPA of 3.0 or above. All majors at UCI are selective and applicants are encouraged to earn the highest possible GPA. A transfer applicant may not disregard the college record and apply for admission as a freshman. (Transfer applicants who are not residents of California should also refer to the section on Nonresident Transfer Admission Requirements.)

**Transfer Admission Guarantee:** UCI's Transfer Admission Guarantee (TAG) program offers provisional admission to well-qualified junior-level students from participating California Community Colleges. While all majors at UCI are selective, through TAG, admission to participating TAG majors can be guaranteed for transfer students who meet the TAG eligibility and major prerequisites requirements. (see TAG Requirements later in this section).

## Selection Criteria

**Due to COVID-19, be sure to visit** [admissions.uci.edu/fall2020FAQ](https://admissions.uci.edu/fall2020FAQ/) (<https://admissions.uci.edu/fall2020FAQ/>) **for the most-up-to-date information regarding undergraduate admission requirements.**

UCI attempts to accommodate as many qualified transfer applicants as possible. Priority consideration for admission of transfer applicants is given to junior-level applicants (with a minimum of 60 semester/90 quarter units of UC transferable credit) from California Community Colleges and is based upon:

1. GPA in transferable courses;
2. depth of preparation toward general education and major requirements; and
3. participation in the TAG (Transfer Admission Guarantee) program, which requires early completion of one transferable English composition course and one transferable course in mathematical concepts and quantitative reasoning.

*TAG Applicants for fall quarter 2021 admission must have completed the first English and one mathematics course by the end of summer 2020. The second English course must be completed by spring 2021.* Transfer applicants with the strongest academic performance will be the most competitive for admission. Junior transfers from four-year colleges, including other UC campuses, and lower-division transfers will be considered as space permits.

In the case that UCI is unable to accommodate all qualified applicants in their first-choice major, those students who indicate a valid alternate major may be offered admission in that major. Students who wish to change their major after enrolling at UCI must submit an Undergraduate Petition for Change of Major to the academic counseling office in the school or program of their prospective major. This is of particular importance to those who apply in majors which are subject to additional course prerequisites and/or have a limit placed on the number of applicants admitted into the major. (See the following list.)

UCI's transfer selection process is also based upon consideration of the academic criteria in conjunction with the following personal achievement criteria: an exceptionally challenging curriculum; outstanding accomplishments relevant to academic aims; hardships or unusual circumstances the applicant has faced, and the ways in which the student has responded to these challenges; a strong, thoughtful match between UCI's programs and the student's academic and career objectives, preparation, talents, and skills; and potential contributions to the campus. The level of performance needed to gain admission varies from year to year depending on the size and the academic quality of the applicant pool and the number of enrollment spaces.

Transfer applicants to the following majors must complete prerequisite courses for the major as specified.

**Biological Sciences:** Junior-level applicants with the highest grades overall and who satisfactorily complete course prerequisites will be given preference for admission to the Biological Sciences major. All applicants must complete one year of general chemistry with laboratory with grades of C or better; one year of organic chemistry with laboratory with grades of C or better; one year of biology courses equivalent to BIO SCI 93, BIO SCI 94 at UCI with a grade of C or better in each course; and have a cumulative GPA of 3.0 or higher.

**Biology/Education:** Junior-level applicants with the highest grades overall and who satisfactorily complete course prerequisites will be given preference for admission to the Biology/Education major. All applicants must complete one year of general chemistry with laboratory with grades of C or better; one year of organic chemistry with laboratory with grades of C or better; one year of biology courses equivalent to BIO SCI 93, BIO SCI 94 at UCI with a grade of C or better in each course; and have a cumulative GPA of 3.0 or higher.

**Business Administration:** Junior-level applicants with the highest grades overall (minimum cumulative GPA of 3.0) and who satisfactorily complete lower-division courses equivalent to UCI's calculus (MATH 2A - MATH 2B), economics (ECON 20A - ECON 20B or MGMT 4A - MGMT 4B), and statistics and accounting (MGMT 7, MGMT 30A - MGMT 30B) will be given preference for admission. MGMT 1 may be completed at UCI. Admission to the major will be competitive due to limited space availability.

**Business Information Management:** Junior-level applicants who satisfactorily complete the following requirements will be given preference for admission:

1. one year of approved college-level math, preferably courses in calculus equivalent to UCI's MATH 2A - MATH 2B; if not available, two semester courses equivalent to other major-related math courses are acceptable;
2. Completion of one year of transferable computer science courses involving concepts such as those found in Java, Python, C++, data structures, or other object-oriented or high-level programming language.
3. one year of introductory accounting theory and practice equivalent to UCI's MGMT 30A - MGMT 30B and
4. one year of micro- and macro-economics theory equivalent to UCI's ECON 20A - ECON 20B.

NOTE: The introductory sequence in Information and Computer Science (ICS) has moved to Python. The Bren School of ICS strongly encourages all participants to become familiar with this programming language prior to matriculation. Additional computer science courses beyond the two required are strongly recommended, particularly those that align with the major(s) of interest. Java is used extensively in the curriculum; therefore, transfer students should plan to learn it by studying on their own or by completing a Java-related programming course prior to their first quarter at UCI.

Additional courses beyond those required for admission must be taken to fulfill the lower-division degree requirements, as many are prerequisites for upper-division courses. For some transfer students, this may mean that it will take longer than two years to complete their degree.

The Business Information Management major is offered jointly by the Donald Bren School of Information and Computer Sciences and The Paul Merage School of Business. More information is available at the Bren School of ICS Student Affairs Office website (<http://www.ics.uci.edu/ugrad/>); telephone 949-824-5156; email: [ucounsel@uci.edu](mailto:ucounsel@uci.edu).

**Chemistry:** Preference will be given to junior-level applicants with the highest grades overall and who have satisfactorily completed the following required courses: one-year of general chemistry with laboratory and one year of approved calculus. Completion of one year of organic chemistry is strongly recommended.

**Computer Game Science:** Visit the *UCI Office of Admissions website* for information on transfer requirements for this major.

**Computer Science and Engineering** (offered jointly by the Donald Bren School of Information and Computer Sciences and The Henry Samueli School of Engineering): Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer, including one year of approved calculus; one year of calculus-based physics with laboratories (mechanics, electricity and magnetism); one year of transferable computer science courses<sup>1</sup> involving concepts such as those found in Java, Python, C++, or other object-oriented or high-level programming language; and one additional approved transferable course for the major (an approved math, science, or CSE course).

<sup>1</sup>Additional computer science courses beyond the two required are strongly recommended, particularly those that align with the major of interest. Java and C++ are used in the curriculum; therefore, transfer students should plan to learn these languages by studying on their own or by completing related programming courses prior to their first quarter at UCI.

Students who enroll at UCI in need of completing lower-division course work may find that it will take longer than two years to complete their degrees. For further information, contact the Donald Bren School of Information and Computer Sciences at 949-824-5156 or The Henry Samueli School of Engineering at 949-824-4334.

**Dance:** Applicants must audition in late January/early February in ballet, modern, and jazz, prior to the fall quarter when entrance is anticipated, and be selected by faculty.

**Education Sciences:** Preference will be given to junior-level applicants with the highest grades overall (minimum cumulative GPA of 3.0). It is suggested that prospective transfer students work toward completing coursework to fulfill the UCI general education requirements or IGETC.

**Earth System Science:** Preference will be given to junior-level applicants with the highest grades overall and who have satisfactorily completed the following required courses: one year of approved calculus and *either* one year of general chemistry with laboratory (preferred) or one year of calculus-based physics with laboratory.

**Ecology and Evolutionary Biology:** Junior-level applicants with the highest grades overall and who satisfactorily complete course prerequisites will be given preference for admission to the Ecology and Evolutionary Biology major. All applicants must complete one year of general chemistry with laboratory with grades of C or better; one year of organic chemistry with laboratory with grades of C or better; one year of biology courses equivalent to BIO SCI 93, BIO SCI 94 at UCI with a grade of C or better in each course; and have a cumulative GPA of 3.0 or higher.

**Economics:** Transfer applicants with the highest grades overall and who satisfactorily complete course prerequisites will be given preference for admission to the majors in Economics, Business Economics, and Quantitative Economics. All applicants must complete one course in microeconomics, one course in macroeconomics, and two quarters/two semesters of approved first-year calculus. Applicants interested in the major of Quantitative Economics must also complete one quarter/one semester of approved linear algebra.

**Engineering:** Applicants must select either Aerospace Engineering, Biomedical Engineering, Biomedical Engineering: Premedical, Chemical Engineering, Civil Engineering, Computer Engineering, Computer Science and Engineering, Electrical Engineering, Environmental Engineering, Materials Science and Engineering, Mechanical Engineering, or Engineering Undeclared (option for freshmen only) as their major on the application. Junior-level applicants with the highest grades overall and who satisfactorily complete course prerequisites will be given preference for admission. All applicants must complete the following required courses: two years of approved calculus, one year of calculus-based physics with laboratories (mechanics, electricity and magnetism), additional courses as specified by the major, and completion of lower-division writing. Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. See The Henry Samueli School of Engineering section of this *Catalogue* for information on courses required for each major.

See also the listing for **Computer Science and Engineering**, a major jointly administered by the Donald Bren School of Information and Computer Sciences and The Henry Samueli School of Engineering.

**Environmental Science:** Preference will be given to junior-level applicants with the highest grades overall and who have satisfactorily completed the following required courses: *either* one year of general chemistry with laboratory (preferred), or one year of biology with laboratory. One year of economics or sociology is recommended.

**Humanities:** Junior-level transfers for all majors within the School of Humanities must have completed the UC Entry Level Writing Requirement, and two semester or two quarter courses of approved lower-division English composition with grades of C or better.

**Information and Computer Science (ICS):** This major is not open for admission on the UC application. Students are strongly encouraged to follow the transfer preparation guidelines for any of the other Bren ICS majors. Applicants must select either Business Information Management<sup>1</sup>, Computer Game Science, Computer Science, Computer Science and Engineering<sup>2</sup>, Data Science, Informatics, or Software Engineering as their major on the application. Visit the *UCI Office of Admissions website* for information on transfer requirements for these majors.

<sup>1</sup> See also the listing for Business Information Management, a collaborative major between the Donald Bren School of ICS and The Paul Merage School of Business in the Interdisciplinary section of the *Catalogue*.

<sup>2</sup> Apply at the Interdisciplinary section of the UC Application. See also the listing for Computer Science and Engineering, a major jointly administered by the Donald Bren School of ICS and The Henry Samueli School of Engineering in the Interdisciplinary section of the *Catalogue*.

**Mathematics:** Preference will be given to junior-level applicants with the highest grades overall and who have satisfactorily completed the required coursework of one year of approved calculus. Additional coursework in multivariable calculus, linear algebra, and differential equations is strongly recommended.

**Music:** All Music applicants must apply to the B.A. program and audition in late January/early February with an instrument or voice, prior to the fall quarter when entrance is anticipated; admission to the B.Mus. program is by a second audition after matriculation.

**Nursing Science:** Admission to the major is limited and selective. Junior-level applicants with the highest grades overall and who satisfactorily complete course prerequisites will be given preference for admission to the Nursing Science major. The following list of prerequisites is required for transfer students applying for fall 2020 entry. All applicants must complete the following with grades of B or better: one year of general chemistry equivalent to UCI's CHEM 1A - CHEM 1B - CHEM 1C; one quarter/semester of organic chemistry equivalent to UCI's CHEM 51A; one quarter/semester of genetics equivalent to UCI's BIO SCI 97; one quarter/semester of biochemistry equivalent to UCI's BIO SCI 98; one quarter/semester of human physiology with laboratory equivalent to UCI's BIO SCI E109 and BIO SCI E112L; one quarter/semester of microbiology with laboratory equivalent to UCI's BIO SCI M122 and BIO SCI M118L; one quarter/semester of human anatomy with laboratory equivalent to UCI's BIO SCI D170; one quarter/semester of philosophy equivalent to UCI's PHILOS 4 or PHILOS 5; one quarter/semester of psychology equivalent to UCI's PSYCH 7A/PSCI 9; one

quarter/semester of public health equivalent to UCI's PUBHLTH 1; one quarter/semester of sociology equivalent to UCI's SOCIOL 1; and one quarter/semester of statistics equivalent to UCI's STATS 7 or STATS 8. Applicants must have a cumulative GPA of 3.0 or higher to be considered.

**Pharmaceutical Sciences:** Students may be admitted to the Pharmaceutical Sciences major upon entering the University as freshmen, via change of major, or as transfer students from other colleges and universities.

Information about change-of-major policies is available in the Department of Pharmaceutical Sciences office and at the UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu/>).

**Transfer Students:** All applicants must have completed the following required courses with a grade of B- or better in all courses: one year of general chemistry with laboratory equivalent to UCI's CHEM 1A-CHEM 1B-CHEM 1C and CHEM 1LC-CHEM 1LD **AND** one year of organic chemistry with laboratory equivalent to UCI's CHEM 51A-CHEM 51B-CHEM 51C and CHEM 51LB-CHEM 51LC-CHEM 51LD. Transfer students must also complete two years of biology courses equivalent to UCI's BIO SCI 93, BIO SCI 94, BIO SCI 97, BIO SCI 98, and BIO SCI 99. Moreover, all transfer applicants must have a cumulative GPA of 3.0 or better. Additional courses that are recommended, but not required: one year of calculus and one year of calculus-based physics.

**Physics:** Preference will be given to junior-level applicants with the highest grades overall and who have satisfactorily completed the following required courses: one year of approved calculus and one year of calculus-based physics with laboratory for engineering and physics majors.

**Public Health:** Junior-level applicants with the highest grades overall and who satisfactorily complete lower-division requirements will be given preference for admission to the Public Health majors. All applicants to the B.S. in Public Health Sciences must have a minimum overall GPA of 3.0 and a minimum GPA of 3.0 in required courses, one year of general chemistry with laboratory, and one year of courses equivalent to UCI's BIO SCI 93 and BIO SCI 94. All applicants to the B.A. in Public Health Policy must have a minimum overall GPA of 3.0 and a minimum GPA of 3.0 in required courses, and complete one year of social science courses in any combination of the following topics: anthropology, economics, sociology, and/or psychology.

## Transfer Student Admission Requirements

**Due to COVID-19, be sure to visit** [admissions.uci.edu/fall2020FAQ](https://admissions.uci.edu/fall2020FAQ) (<https://admissions.uci.edu/fall2020FAQ/>) **for the most up-to-date information regarding undergraduate admission requirements.**

The University of California requirements for admission as a transfer applicant vary according to the high school record. Transfer applicants who have completed a California Certificate of Proficiency or the equivalent must also meet regular University entrance requirements.

Transfer applicants should also refer to the section on Information for Transfer Students: Fulfilling Requirements for a Bachelor's Degree.

The transcript submitted from the last college attended must show, as a minimum, that the student was in good standing and had earned a GPA of 2.4 (2.8 for nonresidents) or better in all transferable coursework.

A transfer applicant must also meet **one** of the following conditions:

1. If a student was eligible for admission to the University when the student graduated from high school — meaning that the student satisfied the Subject, Scholarship, and Examination Requirements or was identified by the University as eligible under the Eligibility in the Local Context (ELC) program and completed the Subject and Examination Requirements in the senior year — the student is eligible to transfer provided the applicant maintained a grade-point average of at least 2.0 in all transferable college coursework.
2. If a student met the Scholarship Requirement in high school but did not satisfy the Subject Requirement, the student must take transferable college courses in the missing subjects, earn a grade of C or better in each of these required courses, and earn an overall C (2.0) average in all transferable college coursework to be eligible to transfer.
3. Students who were not eligible for admission to the University when they graduated from high school because they did not meet the Scholarship Requirement must:
  - a. Complete 60 semester (90 quarter) units of UC transferable college coursework with a grade point average of at least 2.4 (2.8 for nonresidents). A competitive UCI transfer applicant should have a UC transferable GPA of 3.0 or above. No more than 14 semester (21 quarter) units may be taken Pass/No Pass credit and Pass/No Pass credit may not be used for major requirements; **and**
  - b. Complete the following course pattern requirement, earning a grade of C or better in each course:
    - i. Two UC transferable college courses (3 semester or 4–5 quarter units each) in English composition; **and**
    - ii. One UC transferable college course (3 semester or 4–5 quarter units) in mathematical concepts and quantitative reasoning; **and**
    - iii. Four UC transferable college courses (3 semester or 4–5 quarter units each) chosen from at least two of the following subject areas: arts and humanities, social and behavioral sciences, or physical and biological sciences.

The above seven courses may be completed with a Pass/Credit/Satisfactory grade if such designations are equivalent to a letter grade of C (2.0) or better.

**NOTE: For UCI, in fulfilling items i and ii, applicants for fall should complete the courses in English and mathematics no later than the spring term.**

## Transfer Admission Guarantee (TAG) Requirements

**Due to COVID-19, be sure to visit** [admissions.uci.edu/fall2020FAQ](https://admissions.uci.edu/fall2020FAQ/) (<https://admissions.uci.edu/fall2020FAQ/>) **for the most up-to-date information regarding undergraduate admission requirements.**

UCI's Transfer Admission Guarantee (TAG) program guarantees admission to highly-qualified students from all California Community Colleges. Admission to most majors at UCI can be guaranteed through TAG for transfer students who meet the eligibility requirements, complete and submit the online TAG application September 1-30 at <http://uctap.universityofcalifornia.edu>, and submit the UC Application to UCI online (applying to the same major as on the TAG application) November 1-30 at <https://admission.universityofcalifornia.edu>. A California Community College applicant is defined as a student:

- who completed at least 30 semester or 45 quarter UC transferable units at one or more California Community Colleges; and
- for whom the last college attended in a regular session (fall/spring or fall/winter/spring) before admission to a UC campus is a California Community College.

California Community College students may be eligible for admission to UCI through TAG if they will have met all of the following requirements:

- complete 30 semester or 45 quarter UC transferable units including Advanced Placement (AP), International Baccalaureate (IB), and A level credit by the end of the summer 2020 term for fall 2021 admission;
- earn a minimum GPA of 3.4 in all UC transferable coursework by the end of the summer 2020 term for fall 2021 admission and will maintain a 3.4 GPA in all UC transferable coursework for all subsequent terms;
- complete one UC transferable math course with a grade of C or better by the end of the summer 2020 term;
- complete one UC transferable English composition course with a grade of C or better by the end of the summer 2020 term;
- complete a second UC transferable English composition course with a grade of C or better by the end of the spring 2021 term;
- complete 60 semester or 90 quarter UC transferable units by the end of the spring 2021 term for fall 2021 admission, with at least 30 semester or 45 quarter UC transferable units completed at a California Community College;
- complete all major coursework for chosen major, including course prerequisites and maintain minimum course GPA through the end of the spring 2021 term for fall 2021 admission (major course prerequisite information are available at <https://www.admissions.uci.edu/apply/transfer/requirements.php>);
- is in good standing for all colleges attended and satisfy all UC transfer eligibility requirements; and
- attend a California Community College during a regular session in your last term.

**NOTE: The majors in Business Administration, Business Information Management, Cognitive Sciences, Computer Game Science, Computer Science, Computer Science and Engineering, Dance, Data Science, Informatics, Language Science, Music, Nursing Science and Software Engineering do not participate in the TAG program. For the most current information, visit the Admissions website (<http://www.admissions.uci.edu/>).**

## Nonresident Transfer Admission Requirements

**Due to COVID-19, be sure to visit** [admissions.uci.edu/fall2020FAQ](https://admissions.uci.edu/fall2020FAQ/) (<https://admissions.uci.edu/fall2020FAQ/>) **for the most up-to-date information regarding undergraduate admission requirements.**

Nonresident transfer applicants must meet the same minimum admission requirements as those for California-resident students, *except*, nonresidents must have a grade point average of 2.8 or higher in all transferable college coursework. Refer to the Expenses, Tuition, and Fees section of this *Catalogue* for information regarding residence classification for tuition purposes and the Nonresident Supplemental Tuition.

## Admission of International Students

**Due to COVID-19, be sure to visit** [admissions.uci.edu/fall2020FAQ](https://admissions.uci.edu/fall2020FAQ/) (<https://admissions.uci.edu/fall2020FAQ/>) **for the most up-to-date information regarding undergraduate admission requirements.**

The credentials of an international undergraduate applicant — a student who is not a U.S. citizen or U.S. permanent resident and who wishes to attend school in the United States — are evaluated in accordance with the general regulations governing admission. The application should be submitted at University of California Admissions website (<http://admission.universityofcalifornia.edu/how-to-apply/apply-online/>) early in the appropriate application filing period. This will allow time for exchange of necessary correspondence and, if the applicant is admitted, will help the student in obtaining the necessary passport visa. Official certificates and detailed transcripts of records should be submitted directly to the UCI Office of Undergraduate Admissions only when requested.

International applicants who completed their secondary school/high school in a country where English is not the language of instruction, can demonstrate English proficiency in a number of ways. This is most often accomplished by achieving a paper-based test score of 550 or higher (completed prior to October 2017), revised paper-delivered test score of 60 or higher (completed October 2017 or later), or Internet-based test (iBT) score of 80 or higher on the Test of English as a Foreign Language (TOEFL); or with a 6.5 or higher band score (academic modules) on the International English Language Testing System (IELTS) examination. Information about these exams is available at most U.S. consulates and overseas U.S.

educational advising offices, the University of California Admissions website (<https://admission.universityofcalifornia.edu/admission-requirements/international-applicants/english-language-proficiency-toefl-ielts.html>), as well as by mail and online at:

## TOEFL

## IELTS

Students must ask TOEFL or IELTS to forward results of their tests to the UCI Office of Undergraduate Admissions. These scores must be received no later than January for students applying for the fall term. As an alternative to providing TOEFL or IELTS scores to clear the English proficiency requirement, international freshman applicants may complete one UC-E approved English composition course; transfer applicants must complete two UC-E approved English composition courses with a grade of C or better.

Students who wish to improve their English proficiency to meet the TOEFL or IELTS requirement may enroll in the intensive Program in English as a Second Language sponsored by UCI Division of Continuing Education. Information is available from:

International Programs  
UCI Division of Continuing Education  
Building CE-3 #234

Pereira at Brandywine  
Irvine, CA 92697

Web: <http://ip.ce.uci.edu>

Email: [ip@ce.uci.edu](mailto:ip@ce.uci.edu) (%20ip@ce.uci.edu)  
949-824-5991

In addition to achieving a minimum TOEFL or IELTS score, all international students whose native language is other than English must take an Academic English/English as a Second Language Placement Test upon arrival and prior to registration. Based upon the results of this test, students may be required to improve certain language skills by enrolling in Academic English/English as a Second Language courses during their first year, with other major coursework being adjusted accordingly.

Generally, financial assistance and scholarships from the University are not available to the non-immigrant-visa student. International students must provide proof that sufficient funds will be available to meet their educational commitments while studying in the United States. International undergraduate students are considered nonresidents of California and are required to pay Nonresident Supplemental Tuition in addition to fees paid by legal residents of California.

Please direct all inquiries regarding the undergraduate admission of international students to the Office of Undergraduate Admissions. See [admissions.uci.edu/contact](https://www.admissions.uci.edu/contact) (<https://www.admissions.uci.edu/contact/request.php>).

## English Language Proficiency of Permanent Resident, Refugee, and International (F-1 Visa) Students: Academic English/English as a Second Language

Any student (1) who completed their secondary school/high school in a country where English is not the language of instruction (2) whose verbal scores on the Writing section of the SAT fall below a set level, (3) who has not satisfied the UC Entry Level Writing requirement, and (4) who has received a letter from the AE/ESL Program requiring them to take the AE placement test, or any such student without a verbal SAT score, must take the AE placement test prior to the first quarter of enrollment, regardless of the student's TOEFL (Test of English as a Foreign Language) score, IELTS (International English Language Testing System) score, or TSWE (Test of Standard Written English) score. Also, any student who is identified as an ESL student through the UC Analytical Writing Placement Examination must take the AE placement test. The test is given prior to the beginning of each quarter, during Welcome Week prior to the beginning of fall quarter instruction, and on dates to be announced. Information is available from the Academic Testing Center, telephone 949-824-6207, and the Program in Academic English/English as a Second Language, telephone 949-824-6781.

Based upon the results of the test, students may be required to enroll in AE/ESL courses prior to enrolling in any other required writing courses. Students who do not sit for the placement exam before the start of their first quarter will enroll in AE 20A. Students required to enroll in AE/ESL courses must begin satisfying their AE/ESL requirements within their first or second quarter at UCI. They must take these courses in consecutive quarters. The AE/ESL requirements are to be completed within the first six quarters at UCI. Students who have not satisfied the AE/ESL requirements by the end of their sixth quarter will be ineligible to enroll for a seventh quarter at UCI. The UC Entry Level Writing requirement must be satisfied during the quarter following the completion of AE/ESL requirements. If the AE/ESL requirements are completed during the first quarter of enrollment, the UC Entry Level Writing requirement must be satisfied before the beginning of the fourth quarter of enrollment.

AE/ESL courses, offered by the School of Humanities and listed in the School's section of this *Catalogue*, include classes in writing, speaking and listening, and reading and vocabulary development.

## Credit for AE/ESL Coursework

Students whose first language is not English may receive up to 12 baccalaureate credits for AE/ESL coursework. Students may receive workload credit for courses taken beyond this 12-unit limit but will not receive additional credits applicable to the bachelor's degree.

## Credit for Native Language

Students whose first language is not English may receive credit for coursework in their native language and literature, provided such courses were completed at the college level in the country of the vernacular, or at the upper-division or graduate level at UCI or another accredited English-speaking institution. Some restrictions apply; see the School of Humanities section for information.

## Admission for a Second Bachelor's Degree

A student whose educational objective has changed substantially after receiving the bachelor's degree may be considered for admission to a program for a second degree. Admission as a candidate for a second bachelor's degree requires that the applicant be fully eligible for admission to the University and have strong promise of academic success in the new major. All such admissions are subject to the approval of the dean or director of the UCI school or program in which the second degree will be earned.

Students who have *not* attended UCI as undergraduates during a regular academic quarter should complete the undergraduate application for admission and scholarships, available at the University of California Admissions website (<http://admission.universityofcalifornia.edu/how-to-apply/apply-online/>). Students who have attended UCI as undergraduates during a regular academic quarter should contact the Academic Advising Office of the major of interest to initiate the electronic Second Baccalaureate/Readmission Process. For more information, visit the University Registrar's Readmission website (<http://www.reg.uci.edu/enrollment/readmission.html>).

## Advanced Placement and International Baccalaureate Credit

**Duplicate Credit.** Students should be aware that AP examinations, IB examinations, and college courses taken prior to or after enrolling at the university may be duplicative. In these cases, the university will award credit for only one of these. Students cannot earn units or grade points at UCI in courses from which they have been exempted on the basis of AP or IB credit. Students who elect to enroll in courses for which they have already received AP or IB credit will have those courses specially coded on their transcript without unit or grade credit. However, some examinations exempt the student from a greater number of UCI units than the number of AP or IB units earned. In such cases, the student may elect to take the final course in the series for credit.

**Advanced Placement (AP).** Students who earn scores of 3, 4, or 5 on the College Board AP examinations will receive credit toward graduation at UCI. The unit and subject credit allowed toward degree requirements assigned to each test are shown in the accompanying chart.

### College Board Advanced Placement

Advanced Placement Examination	AP Score	Unit Credit	Credit Allowed Toward Degree
<b>Art</b>			
- Art History	3	8	One course toward Art History major, minor, category IV of the UCI GE requirement as ART HIS 40A, and satisfaction of category VIII, plus 4 units of elective credit; may not replace School of Humanities requirements
	4 or 5	8	Two courses toward Art History major, minor, category IV of the UCI GE requirement as ART HIS 40A and ART HIS 40B, and satisfaction of category VIII; may not replace School of Humanities requirements
<b>- Studio Art<sup>1</sup></b>			
- - Drawing	3, 4, or 5	8	Elective credit only
- - 2-D Design Portfolio	3, 4, or 5	8	Elective credit only
- - 3-D Design Portfolio	3, 4, or 5	8	Elective credit only
<b>Biology</b>	3, 4, or 5	8	Non-Bio. Sci. majors earn one Biological Sciences course toward Category II of the UCI GE requirement. Bio. Sci. majors earn elective credit only

Capstone Research Pilot			Approved as area g college-prep elective only. No university credit awarded
Capstone Seminar Pilot			Approved as area g college-prep elective only. No university credit awarded
Chemistry	3	8	Elective credit only
	4 or 5	8	CHEM 1A or ENGR 1A, plus 4 units of elective credit. Students pursuing Chemistry or a related field, and all students with a score of 5, are encouraged to enroll in Honors General Chemistry: CHEM H2A-CHEM H2B-CHEM H2C
Chinese Language and Culture <sup>2</sup>	3	8	Elective credit only
	4 or 5	8	CHINESE 1A-CHINESE 1B-CHINESE 1C, CHINESE 2A. Satisfies categories VI and VIII of the UCI GE requirement. Additional course credit may be awarded following placement examination
Computer Science			
- A Exam	3, 4, or 5	8	Elective credit only
Computer Science Principles	3,4, or 5	8	I&C SCI 20
Economics			
- Macroeconomics	3	4	Elective credit only
	4 or 5	4	ECON 20B. May not replace School of Social Sciences requirements for the bachelor's degree
- Microeconomics	3	4	Elective credit only
	4 or 5	4	ECON 20A. May not replace School of Social Sciences requirements for the bachelor's degree
English <sup>1</sup>	3 (on either or both exams)	8	Elective credit only. Fulfills UC Entry Level Writing requirement
- Composition and Literature	4 or 5	8	WRITING 39B <sup>5</sup> and one course toward category IV of the UCI GE requirement for ENGLISH 10 or ENGLISH 12; may not replace Literary Journalism major or minor, English major or minor, or School of Humanities requirements
- Language and Composition	4 or 5	8	WRITING 39B <sup>5</sup> and one course toward category IV of the UCI GE requirement for ENGLISH 10 or ENGLISH 12; may not replace Literary Journalism major or minor, English major or minor, or School of Humanities requirements
	4 or 5 (on both exams)	8	WRITING 39B <sup>5</sup> and two courses toward category IV of the UCI GE requirement for ENGLISH 10 and ENGLISH 12; may not replace Literary Journalism major or minor, English major or minor, or School of Humanities requirements
Environmental Science	3	4	Elective credit only
	4 or 5	4	EARTHSS 1 or UPPP 8

## French

- French Language and Culture (French Language before 5/12)	3	8	FRENCH 1A-FRENCH 1B- FRENCH 1C. Satisfies category VI of the UCI GE requirement
	4 or 5	8	FRENCH 2A-FRENCH 2B- FRENCH 2C. Satisfies categories VI and VIII of the UCI GE requirement

## Geography

- Human Geography	3, 4, or 5	4	Elective credit only
German Language and Culture (German Language before 5/12)	3	8	GERMAN 1A-GERMAN 1B- GERMAN 1C. Satisfies category VI of the UCI GE requirement
	4 or 5	8	GERMAN 2A-GERMAN 2B- GERMAN 2C. Satisfies categories VI and VIII of the UCI GE requirement

## Government and Politics

- U.S. Government and Politics	3	4	Elective credit only
	4 or 5	4	American Institutions and POL SCI 21A credit. May not replace School of Social Sciences requirements for the bachelor's degree
- Comparative Government and Politics	3	4	Elective credit only
	4 or 5	4	POL SCI 51A credit. May not replace School of Social Sciences requirements for the bachelor's degree

## History

- European	3 or 4	8	Elective credit only
	5	8	One lower-division course toward the History major or minor (excluding HISTORY 70B), GE category IV, and satisfaction of category VIII; plus 4 units of elective credit; may not replace School of Humanities requirements
- United States	3 or 4	8	Satisfies American History and Institutions requirement
	5	8	One course toward HISTORY 40A- HISTORY 40B-HISTORY 40C, GE category IV; plus 4 units of elective credit; may not replace School of Humanities requirements. Satisfies American History and Institutions requirement
- World	3 or 4	8	Elective credit only
	5	8	One course toward HISTORY 21A- HISTORY 21B-HISTORY 21C, GE category IV, and satisfaction of category VIII; plus 4 units of elective credit; may not replace School of Humanities requirements

Italian Language and Culture (Italian  
Language before 5/12)

3	8	ITALIAN 1A-ITALIAN 1B- ITALIAN 1C. Satisfies category VI of the UCI GE requirement
---	---	--

	4 or 5	8	ITALIAN 2A-ITALIAN 2B- ITALIAN 2C. Satisfies categories VI and VIII of the UCI GE requirement
Japanese Language and Culture <sup>2</sup> (Japanese before 5/12)	3	8	JAPANESE 1A-JAPANESE 1B- JAPANESE 1C. Satisfies category VI of the UCI GE requirement
	4 or 5	8	JAPANESE 2A-JAPANESE 2B- JAPANESE 2C. Satisfies categories VI and VIII of the UCI GE requirement
Latin	3	4	Elective credit only
	4 or 5	4	Satisfies categories VI and VIII of the UCI GE requirement. Course credit toward the Classics major or School of Humanities language requirement awarded upon petition
Mathematics <sup>1</sup>			
- Calculus AB Exam	3	4	Elective credit only
	4 or 5	4	MATH 2A or MATH 5A
- Calculus BC Exam <sup>4</sup>	3	8	MATH 2A or MATH 5A
	4 or 5	8	MATH 2A-MATH 2B or MATH 5A- MATH 5B
Music Theory	3, 4 or 5	8	Elective credit only
Physics <sup>1</sup>			
- Physics 1	3, 4, or 5	8	Elective credit only
- Physics 2	3, 4, or 5	8	Elective credit only
- Exam C, Part I or II	3	4	Elective credit only
	4	4	PHYSICS 2
- Exam C, Part I (Mechanics)	5	4	PHYSICS 3A
- Exam C, Part II (Electricity and Magnetism)	5	4	PHYSICS 3B
Psychology	3	4	Elective credit only
	4 or 5	4	PSCI 9 or PSYCH 7A
Research			Approved as area g college-prep elective only. No university credit awarded
Seminar			Approved as area g college-prep elective only. No university credit awarded
Spanish <sup>2</sup>			
- Spanish Language and Culture	3	8	SPANISH 1A-SPANISH 1B- SPANISH 1C. Satisfies category VI of the UCI GE requirement
	4 or 5	8	SPANISH 2A-SPANISH 2B- SPANISH 2C. Satisfies categories VI and VIII of the UCI GE requirement.
- Spanish Literature and Culture	3	8	SPANISH 1A-SPANISH 1B- SPANISH 1C. Satisfies category VI of the UCI GE requirement
	4 or 5	8	SPANISH 2A-SPANISH 2B- SPANISH 2C. Satisfies categories VI and VIII of the UCI GE requirement
Statistics	3, 4, or 5	4	STATS 7 or STATS 8 or MGMT 7 or SOCECOL 13 or EDUC 15

- <sup>1</sup> Maximum credit 8 units.
- <sup>2</sup> Students who wish to enroll in any Chinese, Japanese, or Spanish course at UCI are still required to take the placement examination (and oral interview, if necessary). Students, however, cannot earn units or grade points in courses from which they have been exempted on the basis of Advanced Placement credit, even if placement results require enrollment in such a level.
- <sup>3</sup> Maximum credit 4 units.
- <sup>4</sup> Students who take the Calculus BC examination and earn a subscore of 3 or higher on the Calculus AB portion will receive credit for the Calculus AB examination, even if they do not receive a score of 3 or higher on the BC examination.
- <sup>5</sup> Students who score a 4 or 5 on either exam receive credit for WRITING 39B and qualify to take only WRITING 39C to satisfy GE category Ia Lower-Division Writing. Students who qualify cannot take WRITING 30 or WRITING 31 to satisfy the Lower-Division Writing requirement.
- \* NOTE: All students should refer to the Duplicate Credit section that appears before the AP chart.

**International Baccalaureate (IB).** Students completing the IB diploma with a score of 30 or above will receive at minimum 6 quarter units (4 semester units) toward their UC undergraduate degree. In addition to the diploma units, the University will grant 8 quarter units credit for certified IB Higher Level examinations on which a student scores 5, 6, or 7. The University does not grant credit for Standard Level examinations. Some Higher Level examinations may be used to fulfill course requirements in lower-division major or general education requirements.

IB Exam	IB Score	Unit Credit	Credit Allowed Toward Degree
Anthropology	5, 6, or 7	8	ANTHRO 2A. Satisfies the School requirement for School of Social Sciences major; satisfies one Anthropology course toward category III, and one course toward category VIII of the UCI GE requirement.
Biology	5, 6, or 7	8	Satisfies one Biological Science course toward category II of the UCI GE requirement.
Business & Management	5, 6, or 7	8	Elective credit only.
Chemistry	5, 6, or 7	8	Elective credit only.
Classical Languages <sup>1</sup>			
- Classical Greek	5	8	GREEK 100
- Classical Greek	6 or 7	8	GREEK 100 and two courses of GREEK 103, or GREEK 100 and two courses of GREEK 104, or GREEK 100 and GREEK 103 and GREEK 104.
- Latin	5	8	LATIN 100
- Latin	6 or 7	8	LATIN 100 and two courses of LATIN 103, or LATIN 100 and two courses of LATIN 104, or LATIN 100 and LATIN 103 and LATIN 104.
Computer Science	5, 6, or 7	8	Satisfies category Vb of the UCI GE requirement.
Dance	5, 6, or 7	8	Elective credit only.
Economics	5, 6, or 7	8	ECON 20A-ECON 20B. Satisfies the major requirement for Economics and International Studies; satisfies category III of the UCI GE requirement.
Film	5, 6, or 7	8	Elective credit only.
Geography	5, 6, or 7	8	Satisfies two Geography courses toward category III of the UCI GE requirement.
Global Politics	5, 6, or 7	8	Elective credit only.
History <sup>2</sup>			
History of the Americas	5, 6, or 7	8	Satisfies two courses toward HISTORY 40A-HISTORY 40B-HISTORY 40C for category IV of the UCI GE requirement.

Non-U.S. exams	5, 6, or 7	8	Satisfies two courses toward HISTORY 21A-HISTORY 21B-HISTORY 21C for category IV; satisfies category VIII of the UCI GE requirement.
Language A: Language and Literature, or Language A: Literature <sup>3</sup>			
- (Native Language)			
- (Replaced Language A1 in May 2013)			
- Arabic	5, 6, or 7	8	ARABIC 2C
- Chinese*	5, 6, or 7	8	CHINESE 2C
- English (Higher Level)	5, 6, or 7	8	Satisfies the UC Entry Level Writing Requirement.
- English (Standard Level)	6 or 7	No unit credit	Satisfies UC ELWR ( <a href="http://www.ucop.edu/elwr/index.html">http://www.ucop.edu/elwr/index.html</a> ( <a href="http://www.ucop.edu/elwr/">http://www.ucop.edu/elwr/</a> ), v. 5/5/14)
- French*	5, 6, or 7	8	FRENCH 2C
- German	5, 6, or 7	8	GERMAN 2C
- Hebrew	5, 6, or 7	8	Satisfies School of Humanities language other than English requirement for School of Humanities majors.
- Italian	5, 6, or 7	8	ITALIAN 2C
- Japanese*	5, 6, or 7	8	JAPANESE 2C
- Korean*	5, 6, or 7	8	KOREAN 2C
- Persian	5, 6, or 7	8	PERSIAN 2C
- Portuguese	5, 6, or 7	8	Elective credit only.
- Russian	5, 6, or 7	8	RUSSIAN 2C
- Spanish*	5, 6, or 7	8	SPANISH 3
-Vietnamese	5, 6, or 7	8	VIETMSE 2C
- Albanian, Amharic, Bosnian, Bulgarian, Catalan, Croatian, Czech, Danish, Dutch, Estonian, Filipino, Finnish, Greek (Modern), Hindi, Hungarian, Icelandic, Indonesian, Latvian, Lithuanian, Macedonian, Malay, Nepali, Norwegian, Persian, Polish, Romanian, Serbian, Sesotho, Sinhalese, Slovak, Slovene, Swahili, Swedish, Thai, Turkish, Ukrainian, Urdu, Welsh	5, 6, or 7	8	Course credit for requirements may be awarded upon petition.
English Language A: Language & Literature (Standard Level)	6 or 7	No unit credit	Satisfies ELWR ( <a href="http://www.ucop.edu/elwr/index.html">http://www.ucop.edu/elwr/index.html</a> ( <a href="http://www.ucop.edu/elwr/">http://www.ucop.edu/elwr/</a> ), v. 5/5/14)
English Language A: Literature & Performance (Higher Level)	5, 6, or 7	8	Does NOT satisfy ELWR ( <a href="http://www.ucop.edu/elwr/index.html">http://www.ucop.edu/elwr/index.html</a> ( <a href="http://www.ucop.edu/elwr/">http://www.ucop.edu/elwr/</a> ), v. 5/5/14)
Language B <sup>3 4</sup> (Non-native Language)			
- Arabic	5, 6, or 7	8	ARABIC 2C
- Mandarin or Cantonese*	5, 6, or 7	8	CHINESE 2C
- English	5, 6, or 7	8	Elective credit (does not satisfy ELWR)
- French*	5, 6, or 7	8	FRENCH 2C <sup>4</sup>
- German	5, 6, or 7	8	GERMAN 2C <sup>4</sup>

- Italian	5, 6, or 7	8	ITALIAN 2C <sup>4</sup>
- Japanese*	5, 6, or 7	8	JAPANESE 2C <sup>4</sup>
- Portuguese	5, 6, or 7	8	Elective credit only.
- Russian	5, 6, or 7	8	RUSSIAN 2C <sup>4</sup>
- Spanish*	5 or 6	8	SPANISH 2C <sup>4</sup>
- Spanish	7	8	SPANISH 3
- Danish, Dutch, Finnish, Hindi, Indonesian, Swedish	5, 6, or 7	8	Elective credit only.
Mathematics	5, 6, or 7	8	MATH 2A
Mathematics, Further	5, 6, or 7	8	MATH 3A and MATH 13
Music	5, 6, or 7	8	Elective credit only.
Philosophy	5, 6, or 7	8	Elective credit only.
Physics	5, 6, or 7	8	Satisfies two Physics courses toward category II of the UCI GE requirement.
Psychology	5	8	Satisfies category III of the UCI GE requirement.
Psychology	6 or 7	8	PSYCH 9C or PSCI 11C. Satisfies category III of the UCI GE requirement.
Theater Arts	5, 6, or 7	8	Elective credit only.
Visual Arts	5, 6, or 7	8	Elective credit only.
Diploma Programme		6 or more	The Diploma Programme included six IB exams, with varying GE and/or course credit. Students are granted 6 quarter units if they earn 30 total Diploma Programme points.

<sup>1</sup> Course credit satisfies the School of Humanities language other than English requirement for School of Humanities majors; satisfies categories VI and VIII of the UCI GE requirement.

<sup>2</sup> History exam credit is only applicable toward GE, not School of Humanities major requirements.

<sup>3</sup> Course credit applies toward the School of Humanities language other than English requirement for School of Humanities majors and International Studies; satisfies both categories VI and VIII of the UCI GE requirement.

<sup>4</sup> Additional course credit may be awarded toward the major, upon petition. Course credit applies toward the School of Humanities language other than English requirement for School of Humanities majors and International Studies; satisfies both categories VI and VIII of the UCI GE requirement.

\* Students who wish to enroll in any Chinese, French, Japanese, Korean or Spanish course at UCI are still required to take the placement exam (and oral interview if necessary). Students, however, cannot earn units or grade points in courses from which they have been exempted on the basis of IB credit, even if placement results require enrollment in such a level.

The units granted for IB examinations are not counted toward the maximum number of credits required for formal declaration of an undergraduate major or the maximum number of units a student may accumulate prior to graduation from the University. Students who enter the University with IB credit do not have to declare a major earlier than other students nor are they required to graduate earlier.

## Application Procedures

Students may apply to UCI using the online application at the University of California Admissions website (<http://admission.universityofcalifornia.edu/how-to-apply/apply-online/>).

Applications must be submitted by the last day of the admission application filing period. The nonrefundable application fee is \$70 (\$80 for international students).

## When to Apply for Admission

**UC Regents has suspended the standardized test requirements for students applying for fall 2021 freshman admission. Due to COVID-19, be sure to visit [admissions.uci.edu/fall2020FAQ](https://admissions.uci.edu/fall2020FAQ/) (https://admissions.uci.edu/fall2020FAQ/) for the most up-to-date information regarding undergraduate admission requirements.**

To ensure that applications will be considered for admission to UCI and the student's choice of major or program of study, the completed application and the application fee should be submitted during the admission application filing period, November 1–30, 2020, for fall quarter 2021. UCI accepts

for consideration all applications it receives during this period. Additionally, students required to fulfill the exam requirements for freshman admission should make arrangements to take the standardized tests early. Completing the exam requirement (SAT with Essay or ACT with Writing) no later than the December testing date of the senior year of high school is required for students applying for the fall quarter.

After the admission application filing period has ended, UCI will accept applications only if openings remain for new students.

**Academic Record.** On the application, students must report all high schools and colleges attended, regardless of credit earned or courses completed. All courses taken must also be reported, regardless of grades earned. This includes reporting courses repeated with both the original and repeated grade.

Failure to submit an accurate academic record will result in any admissions offer being rescinded.

## Transcripts

**Due to COVID-19, be sure to visit** [admissions.uci.edu/fall2020FAQ](https://admissions.uci.edu/fall2020FAQ/) (<https://admissions.uci.edu/fall2020FAQ/>) **for the most up-to-date information regarding undergraduate admission requirements.**

The UCI Office of Undergraduate Admissions requires complete, accurate, and up-to-date information about a student's academic program and work in progress in order to process and respond to the application in a timely manner. Transcripts and other documents submitted as part of the application become the property of the University; they cannot be returned or forwarded in any form to another college or university.

**Freshman Applicants.** *Freshman applicants should not send transcripts unless requested to do so. Applicants will be notified if a preliminary high school transcript is required.* Applicants are also responsible for asking testing agencies to report exam scores for either the SAT with Essay or ACT with Writing to UC. Once students are admitted and decide to enroll at UCI, *an official final high school transcript showing an official graduation date must be forwarded to the Office of Undergraduate Admissions even if a student attends summer session.* Final official transcripts are due in the Office of Undergraduate Admissions by July 1 for those students admitted for fall quarter. [A California Certificate of Proficiency, the results from a proficiency test from any state, or a General Educational Development (GED) Certificate can be accepted in place of a high school diploma.] Delays in receiving official transcripts will disadvantage students in the academic advising process and can affect enrollment in appropriate courses.

**Transfer Applicants.** *Transfer applicants should not send transcripts unless requested to do so.* It is essential that applicants accurately complete the self-reported college credit information in the application because it will be used for initial admission screening. *Once students are admitted and decide to enroll at UCI, an official transcript from each college attended and the high school from which they graduated must be sent to the Office of Undergraduate Admissions even if a student attends summer session.* Final official transcripts are due in the Office of Undergraduate Admissions by July 1 for those students admitted for the fall quarter. Summer-session transcripts must be submitted by September 15. Delays in receiving official transcripts will disadvantage students in the academic advising process and can affect enrollment in appropriate courses.

## Exam Arrangements

**UC Regents has suspended the standardized test requirements for students applying for fall 2021 freshman admission. Due to COVID-19, be sure to visit** [admissions.uci.edu/fall2020FAQ](https://admissions.uci.edu/fall2020FAQ/) (<https://admissions.uci.edu/fall2020FAQ/>) **for the most up-to-date information regarding undergraduate admission requirements.**

Freshman applicants should make arrangements to take the SAT with Essay with the College Board (<http://www.collegeboard.org>). For the ACT with Writing, students should contact ACT (<http://www.actstudent.org>). Test fees should be paid to the testing services, not to the University.

Freshman applicants must also report ACT with Writing or SAT with Essay scores on their original UC Application, then request that the testing agency send an official score report to UC. Applicants can have their official score report sent to one UC campus, and all UC campuses they apply to will receive it. Ensure that all scores are sent to UC. UC will use the highest scores from a single administration.

To prevent confusion or unnecessary delay, it is important to use precisely the same form of the student's name on both the application for admission and the test reports.

The 2020-21 SAT with Essay and SAT Subject Tests schedule is available at the College Board website (<http://www.collegeboard.org>).

The 2020-21 ACT with Writing test schedule is available at the ACT website (<http://www.actstudent.org/regist/dates.html>).

Detailed information, including confirmation of test dates, is available from the College Board, ACT, and from most high school counseling offices.

## Notification of Admission

Most fall quarter freshman applicants are notified of their admission status between February 1 and March 31. Transfer applicants are usually notified by May 1. In some cases for transfer applicants, complete transcripts of coursework and/or a mid-term progress report are required before a final decision can be made; such records will be requested by the Office of Undergraduate Admissions. Note that these target dates apply only to those applicants who submitted their applications during the fall admission application filing period, November 1–30. Those students who apply after the admission application filing period will be notified as soon as possible after the other applicants.

## Statement of Intent to Register

Students who are offered admission and wish to attend UCI must return a Statement of Intent to Register (SIR). The SIR serves to notify UCI of the student's decision to accept or not accept its offer of admission. Before completing and returning their SIR, students who have applied to more than one campus are advised to take as much time as is appropriate in considering their response to each campus. However, it is essential that students allow enough time to meet the stipulated deadline. Once they have decided which UC campus to attend, students should submit their positive SIR and nonrefundable \$250 deposit (if applicable) either electronically or by mail. (This deposit, known as the Undergraduate Acceptance of Admission Fee, is applied to the Student Services Fee when the student enrolls.) Low-income students may have the deposit postponed (deferred) until financial aid is disbursed to cover tuition and fees.

Students must submit their SIR by the following deadline:

Freshmen entering fall 2021: May 1, 2021

Transfers entering fall 2021: June 1, 2021

**Electronic Filing:** Students are encouraged to return their SIR electronically. Log in to the UCI Applicant Portal (<http://www.admissions.uci.edu/portal/>). Students submitting an SIR electronically are required to pay their \$250 deposit (if requested) by credit card.

**Filing by Mail:** Students who are unable to submit their SIR online may download and print an SIR from the UCI Applicant Portal (<http://www.admissions.uci.edu/portal/>). Students must return the printed SIR along with the \$250 deposit (if requested), made payable to UC Regents and mailed to the following address:

Office of Undergraduate Admissions  
University of California, Irvine  
Irvine, CA 92697

Students who are not able to either submit their SIR electronically or download an SIR from the UCI Applicant Portal (<http://www.admissions.uci.edu/portal/>) should contact the Office of Undergraduate Admissions at 949-824-6703.

*Admission to UCI is not an assurance of receiving financial aid nor does it guarantee assignment to University housing. Separate applications are required of applicants desiring financial aid and/or University housing, and receipt of communications from the Office of Financial Aid and Scholarships, the Housing Office, or any office other than the Office of Undergraduate Admissions does not imply that eligibility for admission has been established.*

## Student Records Access and Disclosure

At UCI, an "applicant" becomes a "student" at the time of submission of a positive SIR. Information regarding access to student records and disclosure of student record information (both public and confidential) may be found in the Appendix.

## Undergraduate and Graduate Degrees

Degree Title	Degree <sup>1</sup>
Accountancy	M.P.Ac.
Aerospace Engineering	B.S.
African American Studies	B.A.
Anthropology	B.A., M.A. <sup>2</sup> , Ph.D.
Applied Physics	B.S.
Art	B.A., M.F.A.
Art History	B.A., M.A.
Asian American Studies	B.A., M.A.
Biochemistry and Molecular Biology	B.S.
Biological Sciences	B.S., M.S. <sup>4</sup> , Ph.D.
Biology/Education	B.S.
Biomedical and Translational Science	M.S.
Biomedical Engineering	B.S., M.S., Ph.D.
Biomedical Engineering: Premedical	B.S.
Biomedical Sciences	M.S. <sup>2</sup> , Ph.D.
Biotechnology Management	M.S.
Business Administration	B.A., M.B.A.
Business Analytics	M.S.
Business Economics	B.A.

Business Information Management	B.S.
Chemical and Biomolecular Engineering	M.S., Ph.D.
Chemical Engineering	B.S.
Chemistry	B.S., M.S. <sup>2,5</sup> , Ph.D.
Chicano/Latino Studies	B.A.
Chinese Studies	B.A.
Civil and Environmental Engineering	M.S., Ph.D.
Civil Engineering	B.S.
Classics	B.A., M.A. <sup>2</sup> , Ph.D. <sup>3,6</sup>
Cognitive Neuroscience	M.S. <sup>2</sup>
Cognitive Sciences	B.S., M.S. <sup>2</sup> , Ph.D.
Comparative Literature	B.A., M.A. <sup>2</sup> , Ph.D.
Computational Science	M.S. <sup>2</sup> , Ph.D.
Computer Engineering	B.S.
Computer Game Science	B.S.
Computer Science	B.S., M.C.S., M.S., Ph.D.
Computer Science and Engineering	B.S.
Conservation and Restoration Science	M.C.R.S.
Criminology, Law and Society	B.A., M.A.S., Ph.D.
Culture and Theory	M.A. <sup>2</sup> , Ph.D. <sup>3</sup>
Dance	B.A., B.F.A., M.F.A.
Data Science	B.S.
Developmental and Cell Biology	B.S.
Drama	B.A., M.F.A.
Drama and Theatre	Ph.D. <sup>7</sup>
Earth System Science	B.S., M.S. <sup>2</sup> , Ph.D.
East Asian Cultures	B.A.
East Asian Studies	M.A. <sup>2</sup> , Ph.D.
Ecology and Evolutionary Biology	B.S.
Economics	B.A., M.A. <sup>2</sup> , Ph.D.
Education	Credential Programs <sup>3</sup>
Education	M.A. <sup>2</sup> , Ph.D.
Education Sciences	B.A.
Electrical and Computer Engineering	M.S., Ph.D.
Electrical Engineering	B.S.
Elementary and Secondary Education	M.A.T.
Embedded and Cyber-Physical Systems	M.E.C.P.S.
Engineering	B.S., M.Eng., M.S., Ph.D.
Engineering Management	M.S.
English	B.A., M.E., M.F.A., Ph.D.
Environmental Engineering	B.S.
Environmental Health Sciences	M.S., Ph.D.
Environmental Science	B.A.
Environmental Science and Policy	B.A.
Epidemiology	M.S. <sup>2</sup> , Ph.D.
European Studies	B.A.
European Thought and Culture	M.A.
Exercise Sciences	B.S.
Film and Media Studies	B.A.
Finance	M.Fin.
French	B.A.
Gender and Sexuality Studies	B.A.

Genetic Counseling	M.S.
Genetics	B.S.
German	M.A. <sup>2</sup> , Ph.D.
German Studies	B.A.
Global Cultures	B.A.
Global Middle East Studies	B.A.
Global Studies	M.A. <sup>2</sup> , Ph.D.
History	B.A., M.A., Ph.D.
History and Theory of Music	M.A. <sup>2</sup> , Ph.D.
Human Biology	B.S.
Human Computer Interaction and Design	M.H.C.I.D.
Informatics	B.S., M.S., Ph.D.
Information and Computer Science	B.S., M.S.
Innovation and Entrepreneurship	M.I.E.
Integrated Composition, Improvisation, and Technology	M.A., Ph.D.
International Studies	B.A.
Japanese Language and Literature	B.A.
Korean Literature and Culture	B.A.
Language Science	B.A., M.A. <sup>2</sup> , Ph.D.
Law	J.D., LL.M.
Legal and Forensic Psychology	M.L.F.P
Literary Journalism	B.A.
Management	M.S. <sup>2</sup> , Ph.D.
Materials Science and Engineering	B.S., M.S., Ph.D.
Mathematical, Computational, and Systems Biology	M.S., Ph.D.
Mathematics	B.S., M.S. <sup>5</sup> , Ph.D.
Mechanical and Aerospace Engineering	M.S., Ph.D.
Mechanical Engineering	B.S.
Medical Science	M.S.
Medicine	M.D.
Microbiology and Immunology	B.S.
Music	B.A., B.Mus., M.F.A.
Music Theatre	B.F.A.
Networked Systems	M.S., Ph.D.
Neurobiology	B.S.
Nursing	D.N.P.
Nursing Science	B.S., M.S., Ph.D.
Pharmaceutical Sciences	B.S.
Pharmacological Sciences	M.S. <sup>2</sup> , Ph.D.
Pharmacology	M.S.
Philosophy	B.A., M.A. <sup>2</sup> , Ph.D.
Philosophy, Political Science, and Economics	M.A.
Physics	B.S., M.S. <sup>2</sup> , Ph.D.
Political Science	B.A., M.A. <sup>2</sup> , Ph.D.
Psychological Science	B.A., Ph.D.
Psychology	B.A., B.S.
Public Health	M.P.H., M.S., Ph.D.
Public Health Policy	B.A.
Public Health Sciences	B.S.
Public Policy	M.P.P.
Quantitative Economics	B.A.
Religious Studies	B.A.

Social Ecology	B.A., M.A., Ph.D.
Social Policy and Public Service	B.A.
Social Science	M.A. <sup>8</sup> , Ph.D.
Sociology	B.A., M.A. <sup>2</sup> , Ph.D.
Software Engineering	B.S., M.S., M.S.E., Ph.D.
Spanish	B.A., M.A. <sup>2</sup> , Ph.D.
Statistics	M.S., Ph.D.
Transportation Science	M.S., Ph.D.
Urban and Environmental Planning and Policy	Ph.D.
Urban and Regional Planning	M.U.R.P.
Urban Studies	B.A.
Visual Studies	M.A. <sup>2</sup> , Ph.D.

- <sup>1</sup> Degrees: B.A. = Bachelor of Arts; B.F.A. = Bachelor of Fine Arts; B.S. = Bachelor of Science; B.Mus. = Bachelor of Music; D.N.P. = Doctor of Nursing Practice; J.D. = Juris Doctor; LL.M. = Master of Laws; M.A. = Master of Arts; M.A.S. = Master of Advanced Study; M.A.T. = Master of Arts in Teaching; M.B.A. = Master of Business Administration; M.C.S. = Master of Computer Science; M.C.R.S. = Master of Conservation and Restoration Science; M.E. = Master of English; M.E.C.P.S. = Master of Embedded and Cyber-Physical Systems; M.Fin. = Master of Finance; M.F.A. = Master of Fine Arts; M.H.C.I.D. = Master of Human Computer Interaction and Design; M.I.E. = Master of Innovation and Entrepreneurship; M.L.F.P. = Master of Legal and Forensic Psychology; M.P.Ac. = Master of Professional Accountancy; M.P.H. = Master of Public Health; M.P.P. = Master of Public Policy; M.S. = Master of Science; M.S.E. = Master of Software Engineering; M.D. = Doctor of Medicine; M.U.R.P. = Master of Urban and Regional Planning; Ph.D. = Doctor of Philosophy. Titles of degrees may not correspond exactly with specific fields of study offered; see the Index and the academic unit sections for information.
- <sup>2</sup> Emphasis at the graduate level is on the Ph.D. degree; the master's degree may be awarded to Ph.D. students after fulfillment of the requirements.
- <sup>3</sup> Admission to this program is no longer available.
- <sup>4</sup> Emphasis at the graduate level is on the Ph.D. degree; the M.S. degree may be awarded to Ph.D. students after fulfillment of the requirements. However, students may apply directly to the M.S. concentration in Biotechnology and to the M.S. concentration in Ecology and Evolutionary Biology.
- <sup>5</sup> In addition to the regular M.S. degree program, a program coordinated with the School of Education leads to an M.S. degree and a Teaching Credential.
- <sup>6</sup> UCI, UCR, and UCSD joint program.
- <sup>7</sup> UCI and UCSD joint program.
- <sup>8</sup> Emphasis at the graduate level is on the Ph.D. degree; the M.A. degree may be awarded to Ph.D. students after fulfillment of the requirements. However, an M.A. in Social Science (concentration in Demographic and Social Analysis; Mathematical Behavioral Sciences; or Medicine, Science, and Technology Studies) is available.

# Interdisciplinary Studies

---

UCI offers a variety of interdisciplinary programs of study which span the boundaries of traditional academic scholarship and provide students with opportunities to pursue subject areas deriving from the interaction of different disciplines. Faculty participation is determined by research and teaching interests and, as such, faculty may be drawn from various departments and schools across the campus.

- Business Information Management, B.S.
- Civic and Community Engagement, Minor
- Computational Science, Ph.D.
- Computer Science and Engineering, B.S.
- Environmental Science and Policy, B.A.
- Global Middle East Studies, B.A.
- Global Middle East Studies, Minor
- Global Sustainability, Minor
- History and Philosophy of Science, Minor
- Master of Embedded and Cyber-Physical Systems
- Mathematical, Computational, and Systems Biology, M.S.
- Mathematical, Computational, and Systems Biology, Ph.D.
- Medical Humanities, Graduate Emphasis
- Medical Humanities, Minor
- Native American Studies, Minor
- Networked Systems, M.S.
- Networked Systems, Ph.D.
- Transportation Science, M.S.
- Transportation Science, Ph.D.

## Business Information Management, B.S.

As the business environment becomes increasingly global and information-centric, the need has increased for graduates who understand and can use technology that gathers and provides information, who are able to distill and recognize patterns in that information, and who can apply those analyses to achieve business objectives.

The undergraduate Business Information Management major administered by the Donald Bren School of Information and Computer Sciences is a collaborative, interdisciplinary degree program between the Bren School and The Paul Merage School of Business. The program seeks to educate students to understand and then apply the theories and concepts of a broad, integrated curriculum covering computing, informatics, business fundamentals, and analytical decision-making. The major prepares students for a wide variety of careers and life experiences. Business Information Management majors can pursue careers in the for-profit and not-for-profit sectors or can proceed to graduate school in several disciplines, including information systems, computing, economics, business, and law.

The curriculum is presented across three general academic areas: Computing (computer science, informatics, and software); Business Foundations (accounting, finance, marketing, strategy, and operations); and Analytical Methods (mathematics, statistics, economics, management science, and decision analysis). The fundamentals of information and computer science, including the rudiments of software design and construction with an emphasis on data management, provide the foundation for understanding, describing, and evaluating the technology through which most business information is gathered and presented. The business fundamentals, covering all the functional areas in the Merage School, provide a background and context in which information and its analysis will be applied.

Admission into this major is limited. If the number of Business Information Management applicants exceeds the number of positions available, applicants may be subject to screening beyond minimum University of California admissions requirements.

**Freshmen Applicants:** See the Undergraduate Admissions section.

**Transfer Applicants:** See the Undergraduate Admissions section.

**All students must meet the University Requirements.**

### Major Requirements

**A. Lower-Division: Complete one of the following course groups:**

#### Group 1

I&C SCI 31

Introduction to Programming

I&C SCI 32	Programming with Software Libraries
I&C SCI 33	Intermediate Programming
<b>Group 2</b>	
I&C SCI 32A	Python Programming and Libraries (Accelerated)
I&C SCI 33	Intermediate Programming
<b>B. Complete the following:</b>	
I&C SCI 45J	Programming in Java as a Second Language
IN4MATX 43	Introduction to Software Engineering
<b>C. Complete the following:</b>	
MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
I&C SCI 6D	Discrete Mathematics for Computer Science
I&C SCI 6N	Computational Linear Algebra
or MATH 3A	Introduction to Linear Algebra
STATS 7	Basic Statistics <sup>1</sup>
or STATS 8	Introduction to Biological Statistics
or STATS 67	Introduction to Probability and Statistics for Computer Science
<b>D. Complete the following:</b>	
ECON 20A- 20B	Basic Economics I and Basic Economics II
MGMT 30A- 30B	Principles of Accounting I and Principles of Accounting II
<b>E. Upper-Division Core:</b>	
MGMT 101	Management Science
MGMT 102	Managing Organizational Behavior
MGMT 105	Introduction to Marketing
MGMT 107	Introduction to Management Information Systems
MGMT 109	Introduction to Managerial Finance
MGMT 110	Strategic Management
MGMT 173	Business Intelligence for Analytical Decisions
MGMT 178	Management of Information Technology
MGMT 189	Operations Management
COMPSCI 121/IN4MATX 141	Information Retrieval
COMPSCI 122A/EECS 116	Introduction to Data Management
IN4MATX 113	Requirements Analysis and Engineering
IN4MATX 143	Information Visualization
STATS 110	Statistical Methods for Data Analysis I

**F. Electives:**

Select five upper-division courses, except independent study and internships, with at least three of the five courses to be taken within the Bren School. Upper-division courses completed via the UC Education Abroad Program may also be utilized toward this requirement upon prior approval by the Bren School of ICS Student Affairs Office.

1. MGMT 7 or any other Statistics course will not be accepted as a substitute for the STATS 7, STATS 8, or STATS 67 requirement. Please check with the ICS Student Affairs Office if considering a course outside of these three options.

NOTE: Students majoring in Business Information Management may not double major in Business Administration nor minor in Management, Innovation and Entrepreneurship, Informatics, or Information and Computer Science.

<b>Freshman</b>		
<b>Fall</b>	<b>Winter</b>	<b>Spring</b>
I&C SCI 31	I&C SCI 32	I&C SCI 33
MATH 2A	ECON 20A	I&C SCI 6B
WRITING 39A	MATH 2B	ECON 20B
	WRITING 39B	WRITING 39C

<b>Sophomore</b>		
<b>Fall</b>	<b>Winter</b>	<b>Spring</b>
I&C SCI 45J	COMPSCI 122A	IN4MATX 43
I&C SCI 6D	MGMT 30B	MGMT 102
MGMT 30A	I&C SCI 6N	STATS 7, 8, or 67
General Education IV	General Education IV	General Education IV
<b>Junior</b>		
<b>Fall</b>	<b>Winter</b>	<b>Spring</b>
STATS 110	IN4MATX 113	IN4MATX 143
MGMT 107	MGMT 101	MGMT 105
I&C SCI UD Elective	MGMT 178	General Education VI
General Education III	UD Writing	
<b>Senior</b>		
<b>Fall</b>	<b>Winter</b>	<b>Spring</b>
I&C SCI UD Elective	IN4MATX 141	I&C SCI UD Elective
MGMT 109	MGMT 110	UD Elective
MGMT 173	MGMT 189	General Education VIII
General Education VII	UD Elective	

**NOTES:**

1. Students are advised that this sample program lists the minimum requirements; it is possible that students may have to take additional courses to prepare for required courses.
2. The lower-division writing requirement must be completed by the end of the seventh quarter at UCI.
3. This is only a sample plan. Course offerings may be moved due to unforeseen circumstances. It is strongly recommended that students meet with an academic advisor to create an academic plan tailored to meet their specific areas of interest.
4. ICS upper-division electives may be satisfied by courses offered by the Donald Bren School of Information and Computer Sciences only.

## Civic and Community Engagement, Minor

<http://engage.due.uci.edu/>  
 CCEMinor@uci.edu

The minor in Civic and Community Engagement is an interdisciplinary program that provides students with the knowledge, skills, attitudes, and values to engage as citizens and active community members in the 21st century. It provides a theoretical and empirical framework to increase students' understanding of public problems (environmental, social, and other) from multiple disciplinary perspectives. Students learn about strategies to address public problems, including through public policy; through the involvement of community-based and nonprofit organizations; and through the cultivation of leadership. The minor helps students build on their major programs of study to make connections between public problems and issues of equity and social justice. The minor also empowers students through knowledge about meanings and roles of leadership in society, and provides students opportunities to cultivate leadership in public and private settings.

It is open to students of all majors and is distinguished both by what students learn, and by how they learn it: through a combination of coursework, research, and service.

Completion of seven courses (28 units total). A maximum of two courses for the minor may overlap with courses required for a student's major or for another minor.

**A. Complete:**

UNI STU 10	Introduction to Civic and Community Engagement and Community Research
------------	---

**B. For students choosing the Poverty track, complete:**

UPPP 115	Global Poverty and Inequality in the 21st Century
----------	---

**C. For students choosing the Leadership track, complete:**

UNI STU 85A	Leading from Within
UNI STU 85B	Leading Others

**D. For students in the Poverty track, select four of the following. For students in the Leadership track, select three elective courses from the Leadership and Public Policy theme. For all other students, select five elective courses related to public problems and civic and community engagement from the following:**

Environmental Stewardship:

BIO SCI E150	Conservation Biology
BIO SCI E189	Environmental Ethics
BIO SCI 191A- 191B	Senior Seminar on Global Sustainability I and Senior Seminar on Global Sustainability II
EARTHSS 176W	Marine Conservation, Policy, and Society
EARTHSS 190A- 190B	Senior Seminar on Global Sustainability I and Senior Seminar on Global Sustainability II
ECON 145E	Economics of the Environment
UPPP 139	Water Resource Policy
UPPP 142	Environmental Hazards in an Urbanizing World
SOCECOL 186A- 186B	Senior Seminar on Global Sustainability I and Senior Seminar on Global Sustainability II
SOCECOL 186CW	Writing/Senior Seminar on Global Sustainability III
UNI STU 13A- 13B- 13C	Introduction to Global Sustainability I and Introduction to Global Sustainability II and Introduction to Global Sustainability III
ANTHRO 20A	People, Cultures, and Environmental Sustainability
Educational Equity:	
ECON 158	Economics of Education
EDUC 104E	Multimedia and the Arts in the Multicultural Classroom
EDUC 124	Multicultural Education in K-12 Schools
EDUC 128	Exceptional Learners
EDUC 132	Reading and Writing Enrichment for After-School Programs
EDUC 150	Changing the High School Experience
EDUC 160	Foundations of Out-of-School Learning
Health and Communities:	
ANTHRO 128B	Race, Gender, and Science
ANTHRO 134G	HIV/AIDS in a Global Context
CHC/LAT 176	Race, Gender, and Science
IN4MATX 171	Introduction to Medical Informatics
INTL ST 122	Nuclear Environments
NUR SCI 170	Community-Based Health Care
PHILOS 131C	Medical Ethics
UPPP 112	Foundations of Community Health
UPPP 170	Health Policy
PUBHLTH 122	Health Policy
PUBHLTH 147	Drug Abuse and Its Prevention
PUBHLTH 167	Air Pollution, Climate, and Health
PUBHLTH 168	Nuclear Environments
PUBHLTH 173	Health and Global Environmental Change
SOCECOL E127	Nuclear Environments
PUBHLTH 60	Environmental Quality and Health
GEN&SEX 110D	The Politics of Health and Medicine
PUBHLTH 90	Natural Disasters
PUBHLTH 125	Foundations of Community Health
Public History and Public Art:	
AFAM 138	Topics in African American History
ART HIS 140A	History of Contemporary Art
ART HIS 140B	Topics in Contemporary Art
ART HIS 163	Asian American Art, Contemporary
ART HIS 164A	Modern African American Art
ART HIS 164B	Contemporary African American Art
ASIANAM 137	Asian American Labor

CHC/LAT 152A	Race, Ethnicity, and Social Control
INTL ST 152A	Non-Government Organization (NGO) Fundamentals
UPPP 109	Housing and Urban Development Policy
UPPP 110	Urban Economic Development Policy
UPPP 129	American Public Policy
UPPP 133	Environmental Law and Policy
UPPP 145	Environmental Governance
UPPP 166	Urban Politics and Policy
UPPP 167	Public Policy and Management
POL SCI 124A	The Politics of Protest
POL SCI 124C	Comparative Minority Politics
POL SCI 126D	Urban Politics and Policy
POL SCI 154G	Conflict Resolution in Cross-Cultural Perspective
POL SCI 121G	American Public Policy
PSCI 192B	The Science and Practice of Compassion
PUBHLTH 120	Nutrition and Global Health
PUBHLTH 132	American Public Policy
PUBHLTH 170	Introduction to Global Health
SOC SCI 152C	American Public Policy
SOC SCI 181A	Ethical Leadership
SOC SCI 184A	Sage Leader Research I
SOC SCI 184B	Sage Leader Research II
CRM/LAW C113	Gender and Social Control
CRM/LAW C116	Race, Ethnicity, and Social Control
CRM/LAW C128	Environmental Law and Policy
MGMT 129	Leadership
NUR SCI 160	Leadership and Management in Health Care
UNI STU 85A	Leading from Within
UNI STU 85B	Leading Others
UNI STU 85C	Leading Change
UNI STU 110	Philanthropy in the Community
Additional elective courses may be substituted by petition.	

E. Select four units of an approved internship related to civic and community engagement. Internships will typically be completed over one or more quarters.

The internship can be completed through the following courses (or by petition to the faculty director of the minor):

ANTHRO 197	Field Study
ARTS 199	Independent Study
BIO SCI 14	California Teach 1: Introduction to Science and Mathematics Teaching

BIO SCI 101	California Teach 2: Middle School Science and Mathematics Teaching
CHEM 191	Chemistry Outreach Program
EDUC 100	Educational Strategies for Tutoring and Teacher Aiding
HUMAN 195	Humanities Out There (H.O.T.) Practicum
IN4MATX 117	Project in Software System Design
IN4MATX 132	Project in Human-Computer Interaction Requirements and Evaluation
IN4MATX 163	Project in the Social and Organizational Impacts of Computing
IN4MATX 191A- 191B	Senior Design Project and Senior Design Project
MATH 192	Studies in the Learning and Teaching of Secondary Mathematics
PHY SCI 5	California Teach 1: Introduction to Science and Mathematics Teaching
PHY SCI 105	California Teach 2: Middle School Science and Mathematics Teaching
PHYSICS 191	Field Experience in Physics Education
PUBHLTH 195W	Public Health Practicum and Culminating Experience
SOCECOL 195	Field Study
SOC SCI 193B- 193C	Field Studies in Social Policy and Public Service and Field Studies in Social Policy and Public Service
SOC SCI 194A	Public Service Internship
SOC SCI 195A-195B-195C	
SOC SCI 196	Global Connect
SOC SCI 197	Professional Internship
UCDC 170	Washington DC Internship
UNI STU 196	Directed Studies in Undergraduate Education

**Residence Requirement for the Minor:** Students must complete at least four of the required courses for the minor in residence at UCI.

## Computational Science, Ph.D.

**Lee Swindlehurst, UCI Director**

949-824-2818

<http://www.computationalscience.uci.edu/>

### Joint Doctoral Program with UC Irvine and San Diego State University

A joint offering with San Diego State University (SDSU), the Ph.D. program in Computational Science trains professionals capable of developing novel computational approaches to solve complex problems in both fundamental sciences and applied sciences and engineering. A program of study combining applied mathematics, computing, and a solid training in basic science culminates in doctoral research focused on an unsolved scientific problem.

The Ph.D. in Computational Science produces broadly educated, research-capable scientists that are well prepared for diverse careers in academia, industry, business, and government research laboratories.

Students are admitted into the joint program via a Joint Admissions Committee. Applicants apply to UCI directly using the UCI graduate application.

Applicants are expected to hold a Bachelor's degree in one of the science, technology, engineering, and mathematics (STEM) fields.

Applicants are evaluated on the basis of their prior academic record and their potential for creative research and teaching, as demonstrated in submitted materials. These materials include official university transcripts, three letters of recommendation, GRE scores, a Statement of Purpose, and a Personal History statement.

### Program Requirements

The normative time to completion is five years. The maximum time to completion is seven years. A total minimum of 66 units of course work, independent study, and research must be completed. These units must be distributed as follows:

- Minimum of 18 units of graduate-level coursework as SDSU.
- Minimum of 24 units of graduate-level coursework at UCI.
- Minimum of 24 units of combined research, practicum, and dissertation research units at either institution.

**Summer Research Survey**

Students are required to attend the annual summer seminar series featuring participating faculty members describing their current research and possible projects.

**Course Requirements****Core Courses at SDSU**

MATH 636 - Mathematical Modeling OR MATH 638 - Continuous Dynamical Systems and Chaos

MATH 693B - Advanced Computational PDEs

COMP 605 - Scientific Computing

**Elective Courses at SDSU**

*Students select 9 units from the following list, or appropriate substitutions, with the approval of the program director and their research mentor*

AE 601 - Computational Fluid Mechanics  
 AE 641 - Structural Optimization  
 AE 670 - Optimal Control  
 BIOL 606 - Biological Data  
 BIOL 668 - Advanced Biological Data Analysis  
 BIOL 740 - Phylogenetic Systematics  
 BIOMI 608 - Programming Problems in Bioinformatics  
 CHEM 711 - Chemical Thermodynamics  
 CHEM 712 - Chemical Kinetics  
 CHEM 713 - Quantum Chemistry  
 CIVE 620 - Traffic Flow and Control  
 CIVE 697 - Traffic Signals Systems Operations and Control  
 COMP 526 - Computational Methods for Scientists  
 COMP 607 - Computational Database Fundamentals  
 COMP 670 - Seminar: Problems in Computational Science  
 CS 600 - Bioinformatics  
 CS 610 - Computational Genomics  
 CS 653 - Data Mining and Knowledge  
 CS 666 - Advanced Distributed Systems  
 CS 696 - Programming Problems in Bioinformatics  
 EE 645 - Antennas and Wave Propagation  
 EE 657 - Digital Signal Processing  
 EE 658 - Advanced Digital Signal Processing  
 EE 665 - Multimedia Wireless Networks  
 EE 740 - Advanced Topics in Physical Electronics Antenna Design  
 MATH 693A - Advanced Computational Optimization  
 MATH 693B - Advanced Computational PDEs  
 MB 610A-B - Advanced Topics in Molecular Biology  
 ME 610 - Finite Element Methods  
 PHYS 604 - Electricity and Magnetism  
 PHYS 606 - Statistical Mechanics  
 PHYS 608 - Classical Mechanics  
 PHYS 610 - Quantum Mechanics  
 STATS 676 - Bayesian Statistics  
 STATS 678 - Survival Analysis  
 STATS 700 - Data Analysis  
 STATS 701 - Monte Carlo Methods  
 STATS 702 - Data Mining

**Core Courses at UCI (16 units)**

COMPSCI 206	Principles of Scientific Computing
COMPSCI 271	Introduction to Artificial Intelligence
ENGRCEE 290	Merging Models and Data
STATS 201	Statistical Methods for Data Analysis I

**Elective Courses at UCI**

*Students select 8 units from the following list, or appropriate substitutions, with the approval of the program director and their research mentor*

BME 232	Introduction to Computational Biology
BME 233	Dynamic Systems in Biology and Medicine
BME 238	Spectroscopy and Imaging of Biological Systems
CHEM 230	Classical Mechanics and Electromagnetic Theory
CHEM 231A	Fundamentals of Quantum Mechanics
CHEM 231B	Applications of Quantum Mechanics
CHEM 232A	Thermodynamics and Introduction to Statistical Mechanics
CHEM 232B	Advanced Topics in Statistical Mechanics
CHEM 250	Computational Chemistry
CHEM 250L	Computational Chemistry Laboratory
COMPSCI 211A	Visual Computing
COMPSCI 221	Information Retrieval, Filtering, and Classification
COMPSCI 242	Parallel Computing
COMPSCI 261	Data Structures
COMPSCI 265	Graph Algorithms
COMPSCI 268	Introduction to Optimization
COMPSCI 273A	Machine Learning
COMPSCI 274A	Probabilistic Learning: Theory and Algorithms
COMPSCI 284A	Artificial Intelligence in Biology and Medicine
COMPSCI 284C	Computational Systems Biology
EECS 203A	Digital Image Processing
EECS 215	Design and Analysis of Algorithms
EECS 227	Cyber-Physical System Design
EECS 240	Random Processes
EECS 242	Information Theory
EECS 250	Digital Signal Processing I
EECS 282	Monolithic Microwave Integrated Circuit (MMIC) Analysis and Design II
ENGRCEE 250	Finite Element Method in Structural Engineering
ENGRCEE 270	Flood Risk and Modeling
ENGRCEE 273	Watershed Modeling
ENGRCEE 274	Climate Data Analysis
ENGRCEE 292	Wavelets in Hydrology, Engineering, and Geoscience
ENGRMAE 230A	Inviscid Incompressible Fluid Mechanics I
ENGRMAE 230B	Viscous Incompressible Fluid Mechanics II
ENGRMAE 270A	Linear Systems I
STATS 210B	Statistical Methods II: Categorical Data
STATS 230	Statistical Computing Methods

### Research Units at SDSU

COMP 897 - Doctoral Research  
 COMP 898 - Practicum  
 COMP 899 - Dissertation

### Research Units at UCI

COMPSCI 298	Thesis Supervision
COMPSCI 299	Individual Study
ENGR 297	Doctor of Philosophy Dissertation Research
ENGR 299	Individual Research

### Practicum and Doctoral Research

Dissertation research is carried out at either UCI or SDSU, or at an industry or national laboratory under the supervision of the Doctoral Advisor. While conducting dissertation research, students must enroll in the appropriate research units at the campus of the Doctoral Advisor. If research is done outside of UCI or SDSU, students should register in-absentia if appropriate.

## Research Report Exam

The student is expected to pass the research report within two years of admittance. This examination consists of a term research project supervised by a faculty mentor. The student is required to prepare a written account of research work performed and its results, and offer an oral presentation before the members of the Doctoral Committee. The student must submit a paper based on their research report before giving the oral presentation to the Doctoral Committee. Should a student fail the research report exam, one retake is allowed.

## Dissertation Proposal

Students must submit a dissertation proposal to the doctoral committee by the end of their third year in the program. This proposal should take the form of a scientific grant proposal to a major funding agency. It should describe the research project that the student intends to carry out and upon which their doctoral dissertation will be based. The student must also offer an oral presentation of the proposal before the Computational Science faculty. Upon successful completion of this presentation, the student will be recommended for advancement to candidacy for the doctoral degree.

## Advancement to Doctoral Candidacy

After successful completion of the dissertation proposal and certification that all other requirements are fulfilled, the student is advanced to candidacy at both campuses. Students not registered at UCI will need to formally advance to candidacy in the summer term. Advancement to candidacy for the Ph.D. must occur at least one term prior to dissertation defense.

## Dissertation and Final Oral Examination

On completion of the research, the student prepares the dissertation in accordance with UCI regulations. A final draft of the dissertation is presented to each member of the doctoral committee at least three weeks prior to the final oral examination. The oral defense is held on the campus of the primary faculty advisor. Students must follow UCI filing deadlines. Students are required to be registered for Dissertation Research (3 units) at SDSU and Dissertation Research (4 units) simultaneously at UCI during the semester in which they present their doctoral defense. Alternatively, students can request filing fee status at UCI in the quarter in which they present their doctoral defense.

## Requirements for the M.S.

Requirements for a Master's degree include a satisfactory completion of first- and second-year coursework plus submission of a satisfactory research report.

## University of California, Irvine Faculty

Jun F. Allard, Ph.D. University of British Columbia, *Assistant Professor of Mathematics; Physics and Astronomy* (Mathematical and computational biology)

Pierre F. Baldi, Ph.D. California Institute of Technology, *UCI Chancellor's Professor of Computer Science; Biological Chemistry; Biomedical Engineering; Developmental and Cell Biology* (Bioinformatics, computational biology)

Kieron Burke, Ph.D. University of California, Santa Barbara, *Professor of Chemistry; Physics and Astronomy* (Physical chemistry and chemical physics, polymer, materials, nanoscience, theoretical and computational)

Olivier Cinquin, Ph.D. University College London, *Assistant Professor of Developmental and Cell Biology* (Mathematical modeling of networks, systems biology)

Donald A. Dabdub, Ph.D. California Institute of Technology, *Professor of Mechanical and Aerospace Engineering; Civil and Environmental Engineering* (Mathematical modeling of urban and global air pollution, dynamics of atmospheric aerosols, secondary organic aerosols, impact of energy generation on air quality, chemical reactions at gas-liquid interfaces)

Kristen Davis, Ph.D. Stanford University, *Assistant Professor of Civil and Environmental Engineering; Earth System Science* (Coastal Dynamics)

Filipp Furche, Ph.D. University of Karlsruhe, *Professor of Chemistry* (Physical chemistry and chemical physics, theoretical and computational)

Wayne B. Hayes, Ph.D. University of Toronto, *Associate Professor of Computer Science* (Biomedical Informatics and Computational Biology, Computer Vision Scientific and Numerical Computing)

Frithjof Kruggel, M.D., Ph.D. Ludwig Maximilian University of Munich, *Professor of Biomedical Engineering; Electrical Engineering and Computer Science* (Biomedical signal and image processing, anatomical and functional neuroimaging in humans, structure-function relationship in the human brain)

Arthur D. Lander, Ph.D. University of California, San Francisco, *Donald Bren Professor and Professor of Developmental and Cell Biology; Biomedical Engineering; Logic and Philosophy of Science; Pharmacology* (Systems biology of development, pattern formation, growth control)

Feng Liu, Ph.D. Princeton University, *Professor of Mechanical and Aerospace Engineering* (Computational fluid dynamics and combustion, aerodynamics, aeroelasticity, propulsion, turbomachinery aerodynamics and aeromechanics)

John S. Lowengrub, Ph.D. Courant Institute of Mathematical Sciences, *UCI Chancellor's Professor of Mathematics; Biomedical Engineering; Chemical Engineering and Materials Science* (Applied and computational mathematics, mathematical and computational biology)

Ray Luo, Ph.D. University of Maryland, College Park, *Professor of Molecular Biology and Biochemistry; Biomedical Engineering; Chemical Engineering and Materials Science* (Protein structure, noncovalent associations involving proteins)

Eric D. Mjolsness, Ph.D. California Institute of Technology, *Professor of Computer Science; Mathematics* (Applied mathematics, mathematical biology, modeling languages)

David L. Mobley, Ph.D. University of California, Davis, *Associate Professor of Pharmaceutical Sciences; Chemistry* (Chemical biology, physical chemistry and chemical physics, theoretical and computational)

Seyed Ali Mortazavi, Ph.D. California Institute of Technology, *Assistant Professor of Developmental and Cell Biology* (Functional genomics to study transcriptional regulation in development)

Shaul Mukamel, Ph.D. Tel Aviv University, *UCI Distinguished Professor of Chemistry; Physics and Astronomy* (Physical chemistry and chemical physics, polymer, materials, nanoscience, theoretical and computational)

Hung Nguyen, Ph.D. North Carolina State University, *Assistant Professor of Chemical Engineering and Materials Science* (Computational Nanoscience of Functional Biomaterials & Complex Fluids)

Alexandru Nicolau, Ph.D. Yale University, *Department Chair and Professor of Computer Science; Electrical Engineering and Computer Science* (Architecture, parallel computation, programming languages and compilers)

Roger H. Rangel, Ph.D. University of California, Berkeley, *Professor of Mechanical and Aerospace Engineering* (Fluid dynamics and heat transfer of multiphase systems including spray combustion, atomization and metal spray solidification, applied mathematics and computational methods)

Elizabeth L. Read, Ph.D. University of California, Berkeley, *Assistant Professor of Chemical Engineering and Materials Science; Molecular Biology and Biochemistry* (Dynamics of complex biochemical systems, regulation of immune responses)

Eric Rignot, Ph.D. University of Southern California, *Donald Bren Professor of Earth System Science* (Glaciology, climate change, radar remote sensing, ice sheet modeling, interferometry, radio echo sounding, ice-ocean interactions)

Timothy Rupert, Ph.D. Massachusetts Institute of Technology, *Assistant Professor of Mechanical and Aerospace Engineering; Chemical Engineering and Materials Science* (Mechanical behavior, nanomaterials, structure property relationships, microstructural stability, grain boundaries and interfaces, materials characterization)

Hal S. Stern, Ph.D. Stanford University, *Professor of Statistics; Cognitive Sciences* (Bayesian methods, model diagnostics, forensic statistics, and statistical applications in biology/health, social sciences, and sports)

Lizhi Sun, Ph.D. University of California, Los Angeles, *Professor of Civil and Environmental Engineering; Chemical Engineering and Materials Science* (Micro- and nano-mechanics, composites and nanocomposites, smart materials and structures, multiscale modeling, elastography)

A. Lee Swindlehurst, Ph.D. Stanford University, *Professor of Electrical Engineering and Computer Science* (Signal processing, estimation and detection theory, applications in wireless communications, geo-positioning, radar, sonar, biomedicine)

Kevin Thornton, Ph.D. University of Chicago, *Associate Professor of Ecology and Evolutionary Biology School of Biological Sciences* (Genome evolution, gene duplication, population genetics, adaptation)

Douglas J. Tobias, Ph.D. Carnegie Mellon University, *Professor of Chemistry* (Atmospheric and environmental, chemical biology, physical chemistry and chemical physics, theoretical and computational)

Jasper A. Vrugt, Ph.D. University of Amsterdam, *Associate Professor of Civil and Environmental Engineering; Earth System Science* (Complex systems, modeling, statistics, hydrology, geophysics, ecology, data, optimization, hydropower, data assimilation)

Yun Wang, Ph.D. Pennsylvania State University, *Associate Professor of Mechanical and Aerospace Engineering* (Fuel cells, computational modeling, thermo-fluidics, two-phase flows, electrochemistry, Computational Fluid Dynamics (CFD), turbulent combustion)

Daniel Whiteson, Ph.D. University of California, Berkeley, *Associate Professor of Physics and Astronomy; Logic and Philosophy of Science* (Particle Physics)

## San Diego State University Faculty

Andy Cooksy, Ph.D. University of California, Berkeley, *Professor of Chemistry and Biochemistry* (Laser Spectroscopy, Reaction Dynamics, and Ab Initio Calculation of Free Radicals and Other Transient Molecule)

Chris Curtis, Ph.D., University of Washington, *Assistant Professor of Mathematics* (Fluid Mechanics, Modeling and Simulation, Computational Fluid Dynamics and Numerical Simulation)

Robert Edwards, Ph.D. University of Sussex, Brighton, England, *Professor of Computer Science* (Microbiology, Bioinformatics, and High Performance Computing)

Juanjuan Fan, Ph.D. University of Washington, *Professor of Statistics* (Multivariate Failure Time Data, Tree Based Methods, Genetic Epidemiology)

Jerome Gilles, Ph.D. Ecole Normale Supérieure, France, *Assistant Professor of Mathematics* (Applied Harmonic/Functional Analysis, Signal/Image Processing)

Ke Huang, Ph.D. University of Grenoble, France, *Assistant Professor of Electrical and Computer Engineering* (VLSI Testing, Fault Modeling and Diagnosis. Machine Learning, Data Mining. Trustworthy ICs. Computer-Aided Design)

Gustav Jacobs, Ph.D., University of Illinois at Chicago, *Professor of Aerospace Engineering* (Computational Physics, High-Order Methods, Fluid and Plasma Dynamics)

Calvin Johnson, Ph.D. University of Washington, *Professor of Physics* (Theoretical and Computational Nuclear Structure and Nuclear Astrophysics)

Parag Katira, Ph.D., University of Florida, *Assistant Professor of Mechanical Engineering* (Biomolecular Motors, Cell Mechanics, Mechanosensing, Tissue Dynamics, Soft Matter Interactions, Design of Active Materials)

David Kopriva, Ph.D. University of Arizona, *Research Professor, CSRC at SDSU* (Computational Mathematics, Numerical Analysis)

Sunil Kumar, Ph.D., Birla Institute of Technology and Science, India, *Professor of Electrical and Computer Engineering* (Multimedia Traffic, Compression Techniques, Image Processing Techniques)

Lyuba Kuznesova, Ph.D. Cornell University, *Assistant Professor of Physics* (Nanophotonics)

Richard Levine, Ph.D. Cornell University, *Professor of Statistics* (Markov Chain Monte Carlo Methods, Environmental Statistics, Biostatistics, Bayesian Decision Theory)

Xiaobai Liu, Ph.D. Huazhong University of Science and Technology, China, *Assistant Professor of Computer Science* (Computer Vision, Machine Learning, Computational Statistics and their applications to clinic diagnosis, sports, transportation, surveillance, video games and others)

Antonio Luque, Ph.D. University of Barcelona, *Assistant Professor of Mathematics* (Applied Mathematics, Biophysics, Physical Virology)

Duy Nguyen, Ph.D. McGill University, Canada, *Assistant Professor of Electrical and Computer Engineering* (Signal Processing, Communications, and Information Theories for Wireless Systems and Networks)

Kenneth Nollett, Ph.D. University of Chicago, *Assistant Professor of Physics* (Astrophysics and Nuclear Physics)

Christopher Paolini, Ph.D. San Diego State University, *Assistant Professor of Electrical and Computer Engineering* (Cyberinfrastructure, Computational Geochemistry)

Shangping Ren, Ph.D. University of Illinois at Urbana-Champaign, *Professor of Computer Science* (Cyber-Physical Systems, Real-Time Scheduling, and Cloud Computing)

Forest Rohwer, Ph.D. San Diego State University, *Professor of Biology* (Genomic Analysis of Phage, Diversity of Coral-associated Bacteria, Opportunistic Infections and Coral Disease)

Anca Segal, Ph.D. University of Utah, *Professor of Biology* (The Mechanism of Site-Specific Recombination; Structure/Function Analysis of Recombination Proteins)

Satish Sharma, Ph.D. Banaras Hindu University, India, *Professor of Electrical and Computer Engineering* (Electromagnetics Antennas)

Samuel Shen, Ph.D. University of Wisconsin, Madison, *Albert W. Johnson Distinguished Professor of Mathematics* (Statistical Climatology & Agroclimatology, Fluid Dynamics & Forced Nonlinear Waves)

Nicholas Shikuma, Ph.D. University of California, Santa Cruz, *Assistant Professor of Biology* (Molecular Mechanisms of Bacteria/Bacteriophage/Animal Interactions)

Patrick Shoemaker, Ph.D. University of California, San Diego, *Research Associate Professor CSRC at SDSU* (Analog Integrated Circuit Design, Neurobiology, Neural Computation)

Usha Sinha, Ph.D. Indian Institute of Science, Bangalore, India, *Professor of Physics* (Medical and Imaging Physics, Magnetic Resonance Imaging (MRI), and Informatics)

Mauro Tambasco, Ph.D. University of Western Ontario, *Associate Professor of Physics* (Medical Physics)

Naveen Vaidya, Ph.D. York University, Canada, *Assistant Professor of Mathematics* (Applied Mathematics, Mathematical Biology, Disease Modeling, Differential Equations)

Satchi Venkataraman, Ph.D. University of Florida, *Professor of Aerospace Engineering* (Structural Mechanics, Design Optimization, Composite Materials, Biomechanics)

Wei Wang, Ph.D. University of Nebraska, Lincoln, *Associate Professor of Computer Science* (Cyber-Physical Systems, Wireless Multimedia Networking, Breast Cancer Image Processing)

Fridolin Weber, Ph.D. University of Munich, Germany, *Albert W. Johnson Distinguished Professor of Physics* (Superdense Matter, Astrophysics, General Relativity)

Tao Xie, Ph.D. New Mexico Institute of Mining and Technology, *Professor of Computer Science* (High-Performance Computing, Energy-Efficient Storage Systems, Parallel/Distributed Systems, and Security-Aware Scheduling)

Robert W Zeller, Ph.D. California Institute of Technology, *Professor of Biology* (Cell and Molecular Biology)

## Computer Science and Engineering, B.S.

The undergraduate program in Computer Science and Engineering is administered by faculty from two academic units: the Department of Computer Science (CS) in the Donald Bren School of Information and Computer Sciences, and the Department of Electrical Engineering and Computer Sciences (EECS) in The Henry Samueli School of Engineering. Successful completion of the program leads to a B.S. in Computer Science and Engineering.

**Program Educational Objectives:** Graduates of the program will: (1) establish a productive Computer Science and Engineering career in industry, government, or academia; (2) engage in professional practice of computer systems engineering and software systems engineering; (3) promote the development of innovative systems and solutions using hardware and software integration; (4) promote design, research, and implementation of products and services in the field of Computer Science and Engineering through strong communication, leadership, and entrepreneurial skills.

(Program educational objectives are those aspects of computer science and engineering that help shape the curriculum; achievement of these objectives is a shared responsibility between the student and UCI.)

This program is designed to provide students with the fundamentals of computer science, both hardware and software, and the application of engineering concepts, techniques, and methods to both computer systems engineering and software system design. The program gives students access to multidisciplinary problems in engineering with a focus on total systems engineering. Students learn the computer science principles that are critical to development of software, hardware, and networking of computer systems. From that background, engineering concepts and methods are added to give students exposure to circuit design, network design, and digital signal processing. Elements of engineering practice include systems view, manufacturing and economic issues, and multidisciplinary engineering applications.

**Career Paths.** Most likely careers will involve building the computer-based infrastructure—computers, networks, embedded devices, as well as operating systems, compilers, and networking software. The focus is on cooperation between hardware and software to yield the highest performance. Examples of such problem areas would be in traffic management, flight control, earthquake monitoring, automotive control, and smart homes.

### Change of Major

Students interested in changing their major to Computer Science and Engineering should contact the Student Affairs Office in the Bren School of ICS or The Henry Samueli School of Engineering for information about change-of-major requirements. Information is also available at UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu/>).

**High School Students:** Students must have completed four years of mathematics through pre-calculus or math analysis and are advised to have completed one year each of chemistry and physics. One semester of programming coursework is also advised. That preparation, along with honors courses and advanced placement courses, is fundamental to success in the program.

The Henry Samueli School of Engineering recommends that freshmen applicants in Engineering majors take the SAT Subject Test, Math Level 2.

**Transfer Students.** Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer, including one year of approved calculus; one year of calculus-based physics with laboratories (mechanics, electricity and magnetism); one year of transferable computer science courses<sup>1</sup> involving concepts such as those found in Java, Python, C++, or other object-oriented, high-level programming language, and one additional approved transferable course for the major (an approved math, science, or CSE course).

- <sup>1</sup> Additional computer science courses beyond the two required are strongly recommended, particularly those that align with the major of interest. Java and C++ are used in the curriculum; therefore, transfer students should plan to learn these languages by studying on their own or by completing related programming courses prior to their first quarter at UCI.

Students who enroll at UCI in need of completing lower-division coursework may find that it will take longer than two years to complete their degrees. For further information, contact the Donald Bren School of Information and Computer Sciences at 949-824-5156 or The Henry Samueli School of Engineering at 949-824-4334.

**All students must meet the University Requirements.**

### Major Requirements

#### Mathematics and Basic Science Courses

Mathematics Courses: Students must complete a minimum of 32 units of mathematics including:

I&C SCI 6B	Boolean Logic and Discrete Structures
I&C SCI 6D	Discrete Mathematics for Computer Science
MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
MATH 2D	Multivariable Calculus
MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations
STATS 67	Introduction to Probability and Statistics for Computer Science

Basic Science Courses: Students must complete a minimum of 18 units of basic science courses including:

PHYSICS 7C- 7LC	Classical Physics and Classical Physics Laboratory
PHYSICS 7D- 7LD	Classical Physics and Classical Physics Laboratory

Students select, with the approval of a faculty advisor, two additional basic science courses needed to satisfy school and department requirements from two courses in General Education II, except those offered by Computer Science and Engineering, Economics, Engineering, Information and Computer Sciences, or Math.

#### Engineering and Computing Topics Courses

Students must complete a minimum of 72 units of engineering topics, 24 units of engineering design, and 63 units of computing topics. All courses below qualify as engineering topics; those marked with an asterisk (\*) qualify as computing topics also. The following courses must be completed:

A. Select one of the following course groups:

I&C SCI 31- 32- 33	Introduction to Programming and Programming with Software Libraries and Intermediate Programming
or	
I&C SCI 32A- 33	Python Programming and Libraries (Accelerated) and Intermediate Programming

B. Complete:

COMPSCI 132/EECS 148	Computer Networks *
COMPSCI 143A	Principles of Operating Systems *
or EECS 111	System Software
EECS 31	Introduction to Digital Systems *
EECS 31L	Introduction to Digital Logic Laboratory *
I&C SCI 45C	Programming in C/C++ as a Second Language *
I&C SCI 46	Data Structure Implementation and Analysis *
EECS 50	Discrete-Time Signals and Systems
EECS 70A	Network Analysis I
CSE 90	Systems Engineering and Technical Communications
CSE 112	Electronic Devices and Circuits
EECS 112	Organization of Digital Computers *
EECS 112L	Organization of Digital Computers Laboratory *
COMPSCI 141	Concepts in Programming Languages I *
COMPSCI 142A	Compilers and Interpreters *
COMPSCI 145	Embedded Software

COMPSCI 145L	Embedded Software Laboratory
COMPSCI 161	Design and Analysis of Algorithms *
EECS 159A- 159B	Senior Design Project I and Senior Design Project II
ENGR 190W	Communications in the Professional World
IN4MATX 43	Introduction to Software Engineering *

Students select, with the approval of a faculty advisor, any additional engineering and computer topics courses needed to satisfy school and department requirements.

#### Technical Elective Courses:

Students must complete a minimum of two courses (with 3 or more units each) of technical electives. A technical elective may be any upper-division course from the Departments of Computer Science, Electrical Engineering and Computer Science, or Informatics, not otherwise used for the CSE degree, chosen from the following ranges:

Computer Science: 100–189, except COMPSCI 121

Electrical Engineering and Computing Science: 100–189

Informatics: 100–139

(The nominal Computer Science and Engineering program will require 183 units of courses to satisfy all university and major requirements. Because each student comes to UCI with a different level of preparation, the actual number of units will vary).

NOTE: Students majoring in Computer Science and Engineering may not complete the major in Computer Engineering, the major in Computer Science, the major or minor in Information and Computer Science, or the minor in Informatics.

Freshman		
Fall	Winter	Spring
MATH 2A	MATH 2B	MATH 2D
I&C SCI 31	I&C SCI 32	I&C SCI 33
General Education	PHYSICS 7C- 7LC	PHYSICS 7D- 7LD
General Education	EECS 31	EECS 31L
Sophomore

## Courses

### CSE 90. Systems Engineering and Technical Communications . 2 Units.

Introduces systems engineering concepts, including specifications and requirements, hardware and software design, integration, testing, and documentation. Emphasizes organization and writing of reports and effective presentations.

Restriction: Computer Science Engineering Majors have first consideration for enrollment.

**CSE 112. Electronic Devices and Circuits. 4 Units.**

A first course in the design of Very Large Scale Integrated (VLSI) systems. Introduction to CMOS technology; MOS transistors and CMOS circuits. Analysis and synthesis of CMOS gates. Layout design techniques for building blocks and systems. Introduction to CAD tools.

(Design units: 4)

Prerequisite: PHYS 7D and (CSE 70A or EECS 70A)

Overlaps with EECS 119, EECS 170D.

Restriction: Computer Science Engineering Majors have first consideration for enrollment.

**CSE 199. Individual Study. 1-4 Units.**

Supervised independent reading, research, or design for undergraduate Engineering majors. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Repeatability: May be taken for credit for 8 units.

## Environmental Science and Policy, B.A.

The Gulf oil spill. Global climate change. Drought and water supply. Fukushima. Each of these topics illustrates the continuing need for environmental professionals with training in the natural sciences and social sciences. The Environmental Science and Policy B.A. prepares students interested in environmental problem solving by linking an understanding of natural science with socioeconomic factors and public policy.

The curriculum combines a quantitative understanding of environmental science, chemistry, and biology with law, policy, and economics to provide a foundation for careers in environmental policy, resource management, education, environmental law, urban and environmental design, and related fields.

Students may be admitted to the Environmental Science and Policy major upon entering the university as freshmen, via change of major, or as transfer students from other colleges and universities. Information about change of major policies is available from the Physical Sciences student affairs office and the UCI Change of Major Criteria website (<http://changeofmajor.uci.edu/>).

The Environmental Science and Policy major provides students with a solid foundation to recognize the impacts of human activities on the environment, and in turn, the impacts of environmental change on society. Students are taught the mechanisms by which key institutions, policies, and regulations impact ecosystems and the physical environment.

Once the core course work is complete, students are encouraged to focus on a particular area within Environmental Science and Policy, and to choose electives that build a coherent core of knowledge. Focus areas include, but are not limited to, urban planning, public policy, sociology, economics, climatology, water resources, water quality, agriculture, air pollution, resource management, and atmospheric sciences.

**All students must meet the University Requirements.**

A. Complete:

EARTHSS 40A	Earth System Chemistry
or CHEM 1A-CHEM 1B-CHEM 1C-CHEM 1LC-CHEM 1LD	
or CHEM H2A-CHEM H2B-CHEM H2C-CHEM H2LA-CHEM H2LB-CHEM H2LC	
EARTHSS 40B	Earth System Biology
or BIO SCI 93-BIO SCI 94	
EARTHSS 40C	Earth System Physics
or PHYSICS 3A-PHYSICS 3B-PHYSICS 3C-PHYSICS 3LB-PHYSICS 3LC	
or PHYSICS 7C-PHYSICS 7D-PHYSICS 7E-PHYSICS 7LC-PHYSICS 7LD	
UPPP 8	Introduction to Environmental Analysis and Design
UPPP 5	Introduction to Urban Planning and Policy
STATS 7	Basic Statistics <sup>1</sup>
or STATS 8	
or SOCECOL 13	
or SOC SCI 10A-SOC SCI 10B-SOC SCI 10C	
EARTHSS 70A	Sustainable Energy Systems
EARTHSS 70B	Sustainable Food and Water Systems
EARTHSS 116	Introduction to Environmental Data Science

EARTHSS 192	Careers in Earth System Science
SOCECOL 10	Research Design
B. Select one of the following:	
SOCECOL 195	Field Study (4 units)
SOCECOL 195W	Field Study Writing Seminar <sup>2</sup>
SOCECOL 195B	Advanced Field Study <sup>2</sup>
SOCECOL 195CW	Advanced Field Study <sup>2</sup>
UC Washington, D.C. (UCDC) Academic Internship Program <sup>3</sup>	
UC Center Sacramento Academic Internship Program <sup>3</sup>	
C. Select three of the following:	
UPPP 131	Environmental Sustainability I
UPPP 133	Environmental Law and Policy
UPPP 139	Water Resource Policy
UPPP 142	Environmental Hazards in an Urbanizing World
UPPP 145	Environmental Governance
UPPP 146	Principles of Economics for Planning and Policy
D. Seven 4-unit upper-division courses from the list below, with at least two courses from UPPP and two courses from EARTHSS:	
UPPP or EARTHSS courses (100-196)	
EARTHSS 199	Undergraduate Research
SOCECOL 199	Special Studies
SOCECOL H190A	Honors Research
or SOCECOL H190W	Honors Research
EARTHSS H199A	Honors Research in Earth System Science
or EARTHSS H199B	Honors Research in Earth System Science
or EARTHSS H199C	Honors Research in Earth System Science

Courses used to count toward degree requirements may not be used as electives. Up to two of the seven electives can be satisfied with 4-unit EARTHSS 199, EARTHSS H199A, EARTHSS H199B, EARTHSS H199C, and/or 4-unit SOCECOL 199 or SOCECOL H190W courses. For this requirement, SOCECOL 199 courses can be counted as UPPP electives.

- <sup>1</sup> Students who score a minimum of 3 on the AP Statistics exam do not have to take STATS 7 or its equivalents.
- <sup>2</sup> Site must be listed within one of the following sections of the Field Study Catalog (<https://fieldstudy.sococo.uci.edu/pages/field-study-catalog/>): Environment, Planning, or Public Policy. For more information, visit the Social Ecology Field Study website (<https://fieldstudy.sococo.uci.edu/>).
- <sup>3</sup> See Field Study website for more information. Specific course work is required - 12 units minimum.

NOTE: This major is open to all students. However, courses being applied to another major cannot also be counted as upper-division electives for the B.A. in Environmental Science and Policy.

Freshman		
Fall	Winter	Spring
EARTHSS 40A	EARTHSS 40B	EARTHSS 40C

Environmental Science and Policy students may complete either the Earth System Science Honors Program or the Social Ecology Honors Program.

In a year-long honors course sequence, Environmental Science and Policy students admitted into the Environmental Science and Policy honors program pursue research with faculty in the Earth Systems Science or Urban Planning and Public Policy Departments, and prepare a written thesis of their work. Visit the Earth System Science honors program website ([http://catalogue.uci.edu/interdisciplinarystudies/environmentalscienceandpolicy\\_ba/%20https://www.ess.uci.edu/undergrad/ess/honors/](http://catalogue.uci.edu/interdisciplinarystudies/environmentalscienceandpolicy_ba/%20https://www.ess.uci.edu/undergrad/ess/honors/)) and the Social Ecology Honors Program (<https://students.sococo.uci.edu/pages/social-ecology-honors-program/>) for more information.

The Environmental Science and Policy major provides a strong interdisciplinary foundation for students to pursue a range of public and private sector positions, including environmental management, resource management, environmental law, environmental consulting, work with nonprofit organizations and non-governmental agencies, and related areas. Students are poised to pursue graduate studies (professional Masters degree or Ph.D.) in the following fields: environmental science, environmental studies, public policy, public administration, urban and regional planning, geography and related fields.

## Global Middle East Studies, B.A.

### Mark LeVine, Director

400 Murray Krieger Hall

949-824-6735

[www.humanities.uci.edu/gmes](http://www.humanities.uci.edu/gmes) (<http://www.humanities.uci.edu/gmes/>)

[gmes@uci.edu](mailto:gmes@uci.edu) (%20gmes@uci.edu)

The Global Middle East Studies major offers students an in-depth, interdisciplinary grounding in the histories and present-day realities of the Middle East in a global context. The goal is to ensure students have a well-developed and competitive foundation to continue their studies at the graduate level in the U.S. and globally, and/or begin a career in law, business, consulting, foreign affairs, humanitarian affairs, medicine, science, or security studies, in which both theoretical and practical/first-hand knowledge of the regions we study are equally important.

Global Middle East Studies is both an attractive program and the perfect complement to numerous other programs on campus, particularly those with a disciplinary focus such as history, comparative literature, anthropology, political science, sociology, art history, international studies, global cultures, business, pre-law and criminology, pre-med, computer and information sciences, engineering, and other physical sciences.

## Requirements for the B.A. in Global Middle East Studies

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Requirements for the Major

A. Complete the following:

GLBL ME 60A- 60B- 60C

Humanities and Arts: Problems and Methods for Global Middle East Studies  
and Social Sciences: Problems and Methods for Global Middle East Studies  
and Social Ecology and Sciences: Problems and Methods for Global Middle East Studies

GLBL ME 100W

Research and Writing for Global Middle East Studies

B. Complete course work equivalent to UCI's sixth quarter of study (2C level) in one of the following single languages: Arabic, Persian, or Hebrew. Students may also petition to complete the requirement in other languages.

C. Complete four upper-division courses, selected from two of the following emphases (eight total): <sup>1</sup>

1. Environment, Economies, and Conflicts

2. Histories, Cultures, and Identities

3. Geographies, Migrations, and Politics

<sup>1</sup> Courses must be selected from the approved lists published on the Global Middle East Studies website (<http://www.humanities.uci.edu/gmes/>).

**Residence Requirement for the Major:** A minimum of five upper-division courses required for the major must be completed successfully at UCI.

## Global Middle East Studies, Minor

### Mark LeVine, Director

400 Murray Krieger Hall

949-824-6735

[www.humanities.uci.edu/gmes](http://www.humanities.uci.edu/gmes) (<http://www.humanities.uci.edu/gmes/>)

[gmes@uci.edu](mailto:gmes@uci.edu) (%20gmes@uci.edu)

The Global Middle East Studies minor offers students an in-depth, interdisciplinary grounding in the histories and present-day realities of the Middle East in a global context. The goal is to ensure students have a well-developed and competitive foundation to continue their studies at the graduate level in the U.S. and globally, and/or begin a career in law, business, consulting, foreign affairs, humanitarian affairs, medicine, science, or security studies, in which both theoretical and practical/first-hand knowledge of the regions we study are equally important.

Global Middle East Studies is both an attractive program and the perfect complement to numerous other programs on campus, particularly those with a disciplinary focus such as history, comparative literature, anthropology, political science, sociology, art history, international studies, global cultures, business, pre-law and criminology, pre-med, computer and information sciences, engineering, and other physical sciences. The Global Middle East Studies minor can be combined with any major.

### Requirements for the Minor in Global Middle East Studies

#### A. Complete:

GLBL ME 60A- 60B- 60C

Humanities and Arts: Problems and Methods for Global Middle East Studies

and Social Sciences: Problems and Methods for Global Middle East Studies

and Social Ecology and Sciences: Problems and Methods for Global Middle East Studies

#### B. Complete four upper-division courses selected from an approved list.<sup>1</sup>

<sup>1</sup> Courses must be selected from the approved lists published on the Global Middle East Studies website. (<http://www.humanities.uci.edu/gmes/>)

**Residence Requirement for the Minor:** Four upper-division courses required for the minor must be completed successfully at UCI. Two of the four may be taken through the UC Education Abroad Program, provided course content is approved in advance by the appropriate program director.

## Global Sustainability, Minor

**Peter A. Bowler**, Professor of Teaching in Ecology and Evolutionary Biology, Director of the Minor of Global Sustainability

**Jessica Pratt**, Coordinator of the Minor's Capstone Course Sequence

321 Steinhaus Hall

949-824-6006

Fax 949-824-2181

<http://environment.uci.edu/degree/minor-gs> (<https://sustainability.uci.edu/education/forstudents/>)

The interdisciplinary minor in Global Sustainability prepares students to consider the challenges of meeting the needs of the present without compromising the ability of future generations to meet their own needs, with emphasis upon addressing the extreme poverty that afflicts at least 20 percent of the world's current population. The Earth is a complex system comprised of interactions between its various physical, biological, social, and political components, and human populations have initiated many global trends that cannot be sustained indefinitely. Some of these trends are physiochemical or biological in nature (the depletion of fossil fuels, the accumulation of ozone-depleting chemicals, the destruction of wildlife habitat, and high rates of species extinction), while others are social and political (accelerating urbanization, population displacement, and regional economic imbalance).

As a result, the vitality of the Earth depends upon interdisciplinary and collaborative approaches that draw on the strengths of multiple fields. In this program, students will become aware of the main drivers of climate change, both natural and human-induced, the intrinsic as well as the resource values of species, ecosystems, and communities, and how the loss of cultural diversity and a growing income gap between nations leads to additional pressure for biological resource exploitation. Students will become familiar with foundational sustainability concepts in social practice, governance and allocation, the physical sciences, and the biological sciences to better understand and effectively deal with contemporary environmental and social equity crises.

The minor is open to all UCI students. Courses in addition to those already approved for the minor (below) may be petitioned to the Director, and the list of accepted courses is updated on an annual basis.

Students are required to complete three introductory courses (12 units), three electives (12 units), one methods course (4 units), and three quarters of a senior capstone sequence (8 units).

**A. Introductory Course**

Select one of the following:

EARTHSS 1	Introduction to Earth System Science
EARTHSS 3	Oceanography
EARTHSS 5	The Atmosphere
EARTHSS 15	Introduction to Global Climate Change
UNI STU 13A	Introduction to Global Sustainability I

**B. Introductory Course B**

Select one of the following:

BIO SCI 9K	Global Change Biology
BIO SCI 55	Introduction to Ecology
UNI STU 13B	Introduction to Global Sustainability II

**C. Introductory Course C**

Select one of the following:

ANTHRO 20A	People, Cultures, and Environmental Sustainability
ANTHRO 30A	Global Issues in Anthropological Perspective
ANTHRO 41A	Global Cultures and Society
POL SCI 41A	Introduction to International Relations
PUBHLTH 30	Introduction to Urban Environmental Health
PUBHLTH 60	Environmental Quality and Health
SOCECOL E8	
SOCIOL 44	Births, Deaths, and Migration
UNI STU 13C	Introduction to Global Sustainability III

**D. Electives**

Select three courses from among a list of quarterly approved courses, with each elective course drawn from a different category. Two of the three courses must be upper-division and none of the three courses may overlap with selected introductory courses. As per university policy, students may overlap a maximum of two courses between their major and minor.

Category 1 - Social Practice (Ethics, Identity, Culture, Wellness, Education Business):

AFAM 128	Topics in Gender/Sexuality
ANTHRO 20A	People, Cultures, and Environmental Sustainability
ANTHRO 30A	Global Issues in Anthropological Perspective
HISTORY 12	Introductory Topics in History
HISTORY 100W	Writing About History
HISTORY 190	Colloquium
PHILOS 131A	Applied Ethics
PUBHLTH 60	Environmental Quality and Health
PUBHLTH 90	Natural Disasters
PUBHLTH 125	Foundations of Community Health
PUBHLTH 167	Air Pollution, Climate, and Health
PUBHLTH 173	Health and Global Environmental Change

Category 2 - Governance and Allocation (Natural Resource Management, Economics, Development, Poverty Alleviation, Social Justice):

ANTHRO 125A	Economic Anthropology
ECON 145E	Economics of the Environment
ECON 145FW	Economics of the Environment II
ECON 152A	Economic Anthropology
ECON 164A	
UPPP 4	Introduction to Urban Studies
UPPP 40	Urban Sociology
UPPP 113	Poverty and Change in Developing Countries
UPPP 131	Environmental Sustainability I
UPPP 132	Environmental Sustainability II
UPPP 139	Water Resource Policy

UPPP 155	Urban Design Principles
SOC SCI 5D	US & World Geography
SOC SCI 119	Special Topics in Geography
SOCECOL E8	
SOCIOL 44	Births, Deaths, and Migration
UNI STU 13C	Introduction to Global Sustainability III
Category 3- Physical Sciences (Earth System Science, Engineering, Computing):	
EARTHSS 1	Introduction to Earth System Science
EARTHSS 3	Oceanography
EARTHSS 5	The Atmosphere
BIO SCI 9K	Global Change Biology
EARTHSS 15	Introduction to Global Climate Change
EARTHSS 17	Hurricanes, Tsunamis, and Other Catastrophes
EARTHSS 19	Introduction to Modeling the Earth System
EARTHSS 21	On Thin Ice: Climate Change and the Cryosphere
EARTHSS 23	Air Pollution: From Urban Smog to Global Change
EARTHSS 51	Land Interactions
EARTHSS 55	Earth's Atmosphere
EARTHSS 60B	
EARTHSS 60C	
EARTHSS 146	Consequences of Air Pollution
EARTHSS 164/BIO SCI E118	Ecosystem Ecology
EARTHSS 174	
UPPP 131	Environmental Sustainability I
UPPP 132	Environmental Sustainability II
ENGRCEE 60	Contemporary and Emerging Environmental Challenges
ENGRCEE 160	Environmental Processes
ENGRCEE 171	Water Resources Engineering
ENGRMAE 118	Sustainable Energy Systems
ENGRMAE 164	Air Pollution and Control
I&C SCI 5	Global Disruption and Information Technology
IN4MATX 161	Social Analysis of Computing
UNI STU 13A	Introduction to Global Sustainability I
Category 4 - Biological Sciences (Biology, Ecology, Evolutionary Sciences):	
BIO SCI 9E	Horticulture Science
BIO SCI 23	Sustainable Landscaping: Design and Practices
BIO SCI 55	Introduction to Ecology
BIO SCI 94	From Organisms to Ecosystems
BIO SCI E106	Processes in Ecology and Evolution
BIO SCI E118/EARTHSS 164	Ecosystem Ecology
BIO SCI E120	Marine Biology
BIO SCI E127/EARTHSS 168	Physiological Plant Ecology
BIO SCI E150	Conservation Biology
BIO SCI E172	Plant Diversity in a Changing World
BIO SCI E179	Limnology and Freshwater Biology
BIO SCI E182	Mediterranean Ecosystems: Biodiversity and Conservation
BIO SCI E186	Population and Community Ecology
BIO SCI E189	Environmental Ethics
UNI STU 13B	Introduction to Global Sustainability II
<b>E. Methods</b>	
Select one of the following:	
BIO SCI E166L	Field Biology

EARTHSS 19	Introduction to Modeling the Earth System
EARTHSS 114	Earth System Science Laboratory and Field Methods
EARTHSS 116	Introduction to Environmental Data Science
ENGRCEE 11	Methods II: Probability and Statistics
ENGRCEE 20	Introduction to Computational Problem Solving
UPPP 107	Urban and Regional Planning
SOCECOL E8	
SOCECOL 10	Research Design
SOCECOL 13	Statistical Analysis in Social Ecology
SOCIO 10A- 10B- 10C	Probability and Statistics and Probability and Statistics and Probability and Statistics
<b>F. Senior Capstone Sequence</b>	
BIO SCI 191A- 191B- 191CW	Senior Seminar on Global Sustainability I and Senior Seminar on Global Sustainability II and Writing/Senior Seminar on Global Sustainability III
or	
EARTHSS 190A- 190B- 190CW	Senior Seminar on Global Sustainability I and Senior Seminar on Global Sustainability II and Writing/Senior Seminar on Global Sustainability III
or	
SOCECOL 186A- 186B- 186CW	Senior Seminar on Global Sustainability I and Senior Seminar on Global Sustainability II and Writing/Senior Seminar on Global Sustainability III

## History and Philosophy of Science, Minor

**Brian Skyrms, Director**  
949-824-1520

The minor in the History and Philosophy of Science is intended for students who wish to study the history of science, the philosophical foundations of scientific inquiry, and the relationship between science and other fields. The history of science explores how science is actually done and how it has influenced history. This may involve tracking down an idea's source or its influences, evaluating the cultural forces at work in the generation of a scientific theory or the reaction of culture to science, or taking a detailed look at the work of a particular scientist or movement within science. The philosophy of science is concerned with determining what science and mathematics are, accounting for their apparent successes, and resolving problems of philosophical interest that arise in the sciences. Philosophy of science courses cover such topics as the role of logic and language in science and in mathematics, scientific explanation, evidence, and probability. These courses may also cover work that has been done on the philosophical problems in specific sciences—for example, the direction of time in physics, the model of mind in psychology, the structure of evolution theory in biology, and the implications of Gödel's incompleteness theorems for mathematics.

The minor is available to all UCI students.

A. Select two of the following:

LPS 31	Introduction to Inductive Logic
LPS 40	The Nature of Scientific Inquiry
HISTORY 60	The Making of Modern Science

B. Select two of the following:

HISTORY 135B	Crossing the World's Oceans: From Sail to Steam
HISTORY 135E	Topics in the History of Science and Technology
PHILOS 110–115 (when topic is science)	
PSYCH 120H	History of Psychology

C. Select three of the following:

LSCI 141	Topics in Philosophy of Language
LPS 106	Topics in Logic
LPS 108	Topics in Induction, Probability, and Decision Theory
LPS 140	Topics in Philosophy of Science
LPS 141A	Topics in Philosophy of Physics

LPS 141C	Philosophy of Quantum Mechanics
LPS 142W	Writing/Philosophy of Biology
LPS 143	Topics in Philosophy of Psychology
LPS 145	Topics in Philosophy of Language
LPS 146	Topics in Philosophy of Logic
LPS 147	Topics in Philosophy of Mathematics

## Master of Embedded and Cyber-Physical Systems

### Rainer Doemer, Interim Director

3211 Engineering Hall

949-824-9127

<http://www.mecps.uci.edu>

[mecps@uci.edu](mailto:mecps@uci.edu) (%20info@mecps.uci.edu)

The graduate program in Embedded and Cyber-Physical Systems is administered by faculty from two academic units: the Donald Bren School of Information and Computer Sciences, and the Henry Samueli School of Engineering. The program offers the Master of Embedded and Cyber-Physical Systems.

Embedded systems are now entrenched into almost every aspect of our daily life, rivaling in ubiquity anything that exists today. Currently, we have tools to help us design embedded systems, making good use of available technologies at a variety of levels and scales, from hardware to interface, operating system, middleware, and software. Cyber-Physical Systems (CPS) are systems-of-systems that tightly couple their cyber (i.e. computation, communication, and control), and physical components (sensing and actuation) in the context of applications such as (but not limited to): automotive and transportation, manufacturing, power distribution grid, medical and healthcare, robotics, civil infrastructure, avionics, etc.

Thus, these Cyber-Physical Systems marry knowledge from the fields of embedded systems, networking, sensors, real-time systems, and control, as well as domain-specific knowledge, to realize systems that are of untapped complexity and scale. The Master of Embedded and Cyber-Physical Systems (MECPS) program's goal is to train students in the foundation, skills, and practices of embedded and cyber-physical systems design, optimization, and evaluation. MECPS draws primarily from Computer Science and from Engineering.

Applicants for the MECPS Program apply through the Office of Graduate Division and indicate on their applications their interest in the program. Applicants are expected to hold a bachelor's degree in Computer Engineering, Computer Science, or Electrical Engineering.

Students from other disciplines may be considered for admission if they have sufficient background in the basics of embedded systems. Applicants are evaluated on the basis of their prior academic record and their potential for carrying out graduate-level work as demonstrated in submitted application materials. These materials include official university transcripts, letters of recommendation, GRE scores, and Statement of Purpose.

Of particular interest are students whose background is in one of the target application areas of CPS (e.g. mechanical engineering, civil, biomedical, etc.). Students with some industry experience will be considered favorably, especially if their experience is relevant to the areas emphasized by CPS. An admissions committee composed of senate faculty members evaluates the applicant files and makes admissions decisions based on the overall file presented by the student. Overall, students are admitted using criteria similar to those used in traditional M.S. degrees from relevant departments (Electrical Engineering and Computer Science and Computer Science).

48 units are required. The course requirements are as follows:

#### A. Complete the following:

ECPS 202	Cyber-Physical Systems Design
ECPS 203	Embedded Systems Modeling and Design
ECPS 204	Embedded System Software
ECPS 205	Sensors, Actuators and Sensor Networks
ECPS 206	Real-Time and Distributed Systems
ECPS 207	Security and Privacy in Cyber-Physical Systems
ECPS 208	Control Systems for Cyber-Physical Systems
ECPS 211	Machine Learning and Data Mining
ECPS 212	Entrepreneurship for Scientists and Engineers

#### B. Complete the following case studies courses:

ECPS 209	Cyber-Physical Systems Case Studies
----------	-------------------------------------

#### C. Complete the following project course:

ECPS 210	Cyber-Physical Systems Project
----------	--------------------------------

Normative time to degree is five quarters.

## Mathematical, Computational, and Systems Biology, M.S.

The graduate program in Mathematical, Computational, and Systems Biology (MCSB) is designed to meet the interdisciplinary training challenges of modern biology and function in concert with existing departmental programs (Departmental option) or as an individually tailored program (stand-alone option) leading to a M.S. degree.

The degree program provides students with both opportunity for rigorous training toward research careers in areas related to systems biology and flexibility through individualized faculty counseling on curricular needs, and access to a diverse group of affiliated faculty and research projects from member departments. Current member departments include Biomedical Engineering, Biological Chemistry, Computer Science, Developmental and Cell Biology, Ecology and Evolutionary Biology, Mathematics, Microbiology and Molecular Genetics, Molecular Biology and Biochemistry, Chemistry, and Physics.

Students interested in the MCSB Program apply to the Office of Graduate Studies (OGS). Applicants must specify that they wish to pursue the M.S. or Ph.D. Upon completion of the M.S., students who may wish to pursue a Ph.D. may request to be evaluated together with the pool of prospective Ph.D. candidates for admission to the Ph.D. program.

Applicants are expected to hold a Bachelor's degree in one of the Science, Technology, Engineering, and Mathematics (STEM) fields. Applicants are evaluated on the basis of their prior academic record and their potential for creative research and teaching, as demonstrated in submitted application materials (official university transcripts, letters of recommendation, GRE scores, and statement of purpose).

### Required Core Courses

DEV BIO 203A	Graduate Tutorial in Developmental and Cell Biology
PHYSICS 230A	Biophysics of Molecules and Molecular Machines
DEV BIO 232	Systems Cell and Developmental Biology
ECO EVO 251	Evolutionary and Ecological Principles in Medicine
or DEV BIO 203C	Graduate Tutorial in Developmental and Cell Biology
MATH 227A	Mathematical and Computational Biology <sup>1</sup>
or BME 233	Dynamic Systems in Biology and Medicine
MATH 227B	Mathematical and Computational Biology
COMPSCI 284C	Computational Systems Biology
or MATH 227C	Mathematical and Computational Biology

<sup>1</sup> BME 233 may be taken only if MATH 227A has been completed.

Students must complete the required core courses with at least a B+ average (3.3 GPA).

### Required Labs

Students are expected to complete a minimum of two rotations during the first year. In some cases, students may arrive during the summer months (July and August) to start a rotation early, or finish a rotation prior to the start of the classes. In general, students are expected to complete rotations by the end of the spring quarter of their first academic year.

Students must perform one laboratory rotation in an experimental (wet) lab, and one in a computational (dry) lab.

### Master of Science Program

Students pursuing the M.S. may choose either Plan I (Research Thesis Option) or Plan II (Literature Thesis Option). Students following Plan I must complete the seven required core courses (listed above), plus two electives. Students in Plan II must complete the seven required core courses, plus five elective courses selected from Breadth Categories I, II, and III. Students in Plan I and Plan II must attend first-year bootcamp.

In both plans, students must be supervised by a training faculty participating in the MCSB Ph.D. program and the student's choice of Plan I or Plan II must be approved by the MCSB Executive Committee in consultation with the Program Director and their faculty supervisor. The normative time to degree is two years.

## Mathematical, Computational, and Systems Biology, Ph.D.

The graduate program in Mathematical, Computational, and Systems Biology (MCSB) is designed to meet the interdisciplinary training challenges of modern biology and function in concert with existing departmental programs (Departmental option) or as an individually tailored program (stand-alone option) leading to a Ph.D. degree.

The degree program provides students with both opportunity for rigorous training toward research careers in areas related to systems biology and flexibility through individualized faculty counseling on curricular needs, and access to a diverse group of affiliated faculty and research projects from member departments. Current member departments include Biomedical Engineering, Biological Chemistry, Computer Science, Developmental and Cell Biology, Ecology and Evolutionary Biology, Mathematics, Microbiology and Molecular Genetics, Molecular Biology and Biochemistry, Chemistry, and Physics.

Students interested in the MCSB Program apply to the Office of Graduate Studies (OGS). Applicants must specify that they wish to pursue the M.S. or Ph.D. Upon completion of the M.S., students who may wish to pursue a Ph.D. may request to be evaluated together with the pool of prospective Ph.D. candidates for admission to the Ph.D. program.

Applicants are expected to hold a Bachelor's degree in one of the Science, Technology, Engineering, and Mathematics (STEM) fields. Applicants are evaluated on the basis of their prior academic record and their potential for creative research and teaching, as demonstrated in submitted application materials (official university transcripts, letters of recommendation, GRE scores, and statement of purpose).

## Required Core Courses

DEV BIO 203A	Graduate Tutorial in Developmental and Cell Biology
PHYSICS 230A	Biophysics of Molecules and Molecular Machines
DEV BIO 232	Systems Cell and Developmental Biology
ECO EVO 251	Evolutionary and Ecological Principles in Medicine
or DEV BIO 203C	Graduate Tutorial in Developmental and Cell Biology
MATH 227A	Mathematical and Computational Biology <sup>1</sup>
or BME 233	Dynamic Systems in Biology and Medicine
MATH 227B	Mathematical and Computational Biology
COMPSCI 284C	Computational Systems Biology
or MATH 227C	Mathematical and Computational Biology

Enrolled students participate in a common first-year "gateway" program and must complete the seven required core courses (listed above). Students are assigned an MCSB Advisory Committee consisting of two participating faculty members to oversee course and laboratory work. Subsequently, students select a thesis advisor and choose between the **Departmental** or **Interdisciplinary** (Stand-Alone) options for the remainder of their Ph.D. training.

### Departmental Option

For students who select the Departmental option, a faculty member in a participating department must agree to serve as the student's thesis advisor. Completion of the Ph.D. is subject to the degree requirements of the departmental Ph.D. program in which the student enrolls. Participating departments accept both the course work and research conducted during the "gateway" year in partial fulfillment of such requirements. Students are encouraged to consult with the department of choice for specific information on additional requirements. All department student advisory committees are established according to the rules of the participating department. In addition, the student's MCSB Advisory Committee meets annually to follow progress and provide additional guidance. The normative time to degree for students in the Departmental option is five years.

To complete the coursework requirements for the Departmental option, students must:

- Attend first-year bootcamp
- Perform at least two laboratory rotations; one in an experimental (wet) lab and one in a computational (dry) lab
- Complete the seven required core courses, in addition to any departmental requirements.

### Interdisciplinary (Stand-Alone) Option

For students who select the stand-alone option, the student's thesis advisor assumes the role of the Committee Chair when a participating MCSB faculty member agrees to accept that role. Adjustments to the MCSB Advisory Committee may be made based on the area of the student's research, or by request of the student, thesis advisor, or committee members. The student meets biannually with the Advisory Committee until an Advancement to Candidacy Committee has formed, which then assumes the duties until the M.S. or Ph.D. defense. The normative time to degree for students in the Stand-Alone option is five years.

To complete the coursework requirements for the Stand-Alone option, students must:

- Attend first-year bootcamp
- Perform at least two laboratory rotations; one in an experimental (wet) lab and one in a computational (dry) lab
- Complete the seven required core courses, plus five elective courses selected from Breadth Categories I and II.

## Native American Studies, Minor

The minor in Native American Studies is an interdisciplinary, interschool program, hemispheric in scope. Focusing on North America and Mesoamerica, the two core courses provide an overview respectively of: pre-Columbian history, worldviews, social organization, religion, and the centrality of place; American Indian diplomacy, law and history since 1776; and a critical assessment of colonialism, evolutionary theory, and ethnography. Upper division offerings, drawing upon research and teaching specializations of faculty from different departments, further enrich the minor with analysis of Native American literature and histories of native Latin America.

A. Select two from the following:

HISTORY 15A	Native American History
HISTORY 40A	Colonial America: New Worlds
ENGLISH 8	Multicultural American Literature

B. Complete:

ANTHRO 121D	Cross-Cultural Studies of Gender
ANTHRO 135A	Religion and Social Order
ANTHRO 162A	Peoples and Cultures of Latin America

ART HIS 175

EDUC 124

Multicultural Education in K-12 Schools

Students may also select from the following courses when the topics presented relate to Native American Studies:

ANTHRO 149	Special Topics in Archaeology
ANTHRO 169	Special Topics in Area Studies
COM LIT 105	Topics in Comparative Multiculturalism
ENGLISH 105	Multicultural Topics in Literatures in English
HISTORY 169	Topics in Latin American History
SOCIOL 149	Special Topics: Structures
SOCIOL 169	Special Topics in Age, Gender, Race, and Ethnicity

## Networked Systems, M.S.

The graduate program in Networked Systems is administered by faculty from two academic units: the Department of Computer Science (CS) in the Donald Bren School of Information and Computer Sciences and the Department of Electrical Engineering and Computer Science (EECS) in The Henry Samueli School of Engineering. The program offers an M.S. and a Ph.D. in Networked Systems.

The Networked Systems program provides education and research opportunities to graduate students in the areas of computer and telecommunication networks. Networked Systems include telephone, cable TV networks, wireless, mobile, ad hoc, and cellular phone networks, as well as the Internet. Networked Systems, as a field, is inherently interdisciplinary since it combines technology in software, hardware, and communications. As a result, it transcends traditional departmental boundaries. Networked Systems draws primarily from Computer Science, Computer Engineering, and Electrical Engineering. At UCI, these areas are housed in two departments: CS and EECS. The Networked Systems program unites the respective strengths of these two departments and provides integrated M.S. and Ph.D. programs in this area.

Program requirements include core, breadth, and concentration courses. **Core courses** are taken by all Networked Systems students and form a foundation for networking topics. **Breadth courses** may be selected from technical courses (including distributed systems, algorithms, data structures, operating systems, databases, random processes, and linear systems) and management and applications of technology (including educational technology, management of information technology, and social impact). **Concentration courses** may be selected from a long list including courses on networks, performance, middleware, communications, and operations research. Core, breadth, and concentration course lists are available on the Networked Systems website (<http://www.networkedsystems.uci.edu/>) or from the Networked Systems Program Office.

Prospective graduate students apply directly to the Networked Systems program, specifying if they are pursuing an M.S. or a Ph.D. Applicants who do not hold a bachelor's degree in Computer Science, Computer Engineering, or Electrical Engineering may be required to take supplementary course work to obtain and demonstrate sufficient background in the field.

Applicants are evaluated on the basis of prior academic record and potential for creative research and teaching, as demonstrated in their application materials including official university transcripts, letters of recommendation, GRE test scores, and statement of purpose.

Students pursuing the M.S. may choose either Plan I (Thesis Plan) or Plan II (Comprehensive Examination Plan).

### Requirements

Students following Plan I must complete the three core courses, two courses chosen from the breadth course list with at most one chosen from the Management and Applications of Technology list, three courses chosen from the concentration course lists with at least one course chosen from at least

two different concentrations, two additional courses chosen with the approval of the advisor, and a thesis. In addition, students pursuing Plan I must enroll in two courses of thesis-related research: COMPSCI 298 or EECS 296.

Students following Plan II must complete the three core courses, three courses chosen from the breadth course list with at most two chosen from the Management and Applications of Technology list, four courses chosen from the concentration course lists with at least one course chosen from at least three different concentrations, and two additional courses chosen with the approval of the advisor. Students pursuing this option must also pass a comprehensive examination which will be administered through NET SYS 295 and will consist of a term paper on a topic relevant to the student's educational program and that term's speakers.

## Networked Systems, Ph.D.

The graduate program in Networked Systems is administered by faculty from two academic units: the Department of Computer Science (CS) in the Donald Bren School of Information and Computer Sciences and the Department of Electrical Engineering and Computer Science (EECS) in The Henry Samueli School of Engineering. The program offers an M.S. and a Ph.D. in Networked Systems.

The Networked Systems program provides education and research opportunities to graduate students in the areas of computer and telecommunication networks. Networked Systems include telephone, cable TV networks, wireless, mobile, ad hoc, and cellular phone networks, as well as the Internet. Networked Systems, as a field, is inherently interdisciplinary since it combines technology in software, hardware, and communications. As a result, it transcends traditional departmental boundaries. Networked Systems draws primarily from Computer Science, Computer Engineering, and Electrical Engineering. At UCI, these areas are housed in two departments: CS and EECS. The Networked Systems program unites the respective strengths of these two departments and provides integrated M.S. and Ph.D. programs in this area.

Program requirements include core, breadth, and concentration courses. **Core courses** are taken by all Networked Systems students and form a foundation for networking topics. **Breadth courses** may be selected from technical courses (including distributed systems, algorithms, data structures, operating systems, databases, random processes, and linear systems) and management and applications of technology (including educational technology, management of information technology, and social impact). **Concentration courses** may be selected from a long list including courses on networks, performance, middleware, communications, and operations research. Core, breadth, and concentration course lists are available on the Networked Systems website (<http://www.networkedsystems.uci.edu/>) or from the Networked Systems Program Office.

Prospective graduate students apply directly to the Networked Systems program, specifying if they are pursuing an M.S. or a Ph.D. Applicants who do not hold a bachelor's degree in Computer Science, Computer Engineering, or Electrical Engineering may be required to take supplementary course work to obtain and demonstrate sufficient background in the field.

Applicants are evaluated on the basis of prior academic record and potential for creative research and teaching, as demonstrated in their application materials including official university transcripts, letters of recommendation, GRE test scores, and statement of purpose.

### Requirements

The Ph.D. requires the following 13 courses: three core courses; three courses chosen from the breadth course list, with at most two chosen from the Management and Applications of Technology list; four courses chosen from the concentration course lists, with at least one course chosen from at least three different concentrations; and three additional courses, chosen with the approval of the research advisor. Students must also complete two teaching practicum courses (I&C SCI 399) and a dissertation.

Courses applied to the M.S. can also be applied to the Ph.D. Students who have taken similar graduate-level courses at another university may petition to apply these courses to the Ph.D. requirements. Ph.D. students who have served as teaching assistants, readers, or tutors at another university may petition to apply this experience toward the teaching practicum requirement. Normative time for advancement to candidacy is three years (two for students who entered with a master's degree). Normative time for completion of the Ph.D. is six years (five for students who entered with a master's degree), and maximum time permitted is seven years.

## Transportation Science, M.S.

**Jean-Daniel Saphores, Director**

949-824-2611

[aregan@uci.edu](mailto:aregan@uci.edu) (%20aregan@uci.edu)

<http://www.transci.uci.edu/>

The graduate program in Transportation Science includes faculty from four academic units: the Department of Civil and Environmental Engineering in The Henry Samueli School of Engineering, the Department of Economics in the School of Social Sciences, the Department of Planning, Policy, and Design in the School of Social Ecology, and the Department of Computer Science in the Bren School of Information and Computer Sciences. The program is designed to educate students in a broad set of competencies and perspectives that mirror the actual practice of current transportation research. The M.S. and Ph.D. degrees in Transportation Science are offered.

Admission is limited to a small number of exceptionally talented, independent, and self-disciplined students. The deadline for application for admission is March 1 for fall quarter. A second window for application for admission for winter or spring quarters is open from April 15 through June 1 but funding

options for this second window may be very limited. All applicants must take the Graduate Record Exam (GRE) prior to the application deadline. Applicants whose first language is not English must also submit Test of English as a Foreign Language (TOEFL) scores.

The M.S. program is a 44-unit program with two options: (1) thesis; and (2) comprehensive examination. Students will choose one of these two options. For both options, no more than 12 credit hours of non-transportation courses can count toward the required number of course-work units. Exceptions must be approved by the student's advisor and the Director of the Transportation Science program. Opportunities are available for part-time study toward the M.S. degree. The normative time for completion of the M.S. is four quarters, with some students finishing in a single academic year, and others staying into a second year. Many students will choose to stay for five or six quarters, and the maximum time permitted is four years.

## Requirements

Core courses must be chosen from lists in each of the four program areas: *Area 1 (Transportation Systems Engineering)*, *Area 2 (Urban and Transportation Economics)* and *Area 3 (Transportation Planning)*, and *Area 4 (Computer Science)*.

Substitutions and exceptions must be requested ahead of time and must be approved by the Director of the Transportation Science program.

Each student must choose at least two graduate courses from Area 1, at least one graduate course from Areas 2 and 3, and at least four additional graduate courses from any of the four areas. At least five of the eight core courses must be transportation courses, which are indicated by an asterisk.

Specific courses in each of these areas are shown below:

### Area 1 (Transportation Systems Engineering)

ENGRCEE 220A	Travel Demand Analysis I *
ENGRCEE 220B	Travel Demand Analysis II
ENGRCEE 221A	Transportation Systems Analysis I *
ENGRCEE 222	Transit Systems Planning
ENGRCEE 223	Transportation Systems III: Planning and Forecasting
ENGRCEE 224A	Transportation Data Analysis I *
ENGRCEE 226A	Traffic Flow Theory I *
ENGRCEE 228A	Urban Transportation Networks I *
ENGRCEE 229A	Traffic Systems Operations and Control I

### Area 2 (Urban and Transportation Economics) <sup>1</sup>

ECON 210A- 210B	Microeconomic Theory I and Microeconomic Theory II
ECON 281A- 281B	Urban Economics I and Urban Economics II *
ECON 281B	Urban Economics II
ECON 282A- 282B	Transportation Economics I and Transportation Economics II *
ECON 282B	Transportation Economics II
Economics 289 A–Z*	

### Area 3 (Transportation Planning)

UPPP 202	History of Urban Planning
UPPP 207	Land-Use Law
UPPP 212	Transportation Planning and Policy
UPPP 231	Transportation and Environmental Health
UPPP 235	Geographic Information Systems (GIS) Problem Solving in Planning
UPPP 237	Introduction to Geographic Information Systems

Pre-approved upper-division undergraduate courses, independent study units, or seminars:

### Area 4 (Computer Science)

COMPSCI 206	Principles of Scientific Computing
COMPSCI 248A	Introduction to Ubiquitous Computing
COMPSCI 260	Fundamentals of the Design and Analysis of Algorithms
COMPSCI 268	Introduction to Optimization
COMPSCI 271	Introduction to Artificial Intelligence
COMPSCI 274A	Probabilistic Learning: Theory and Algorithms

A. Pre-approved upper-division undergraduate courses:

ECON 105A- 105B	Intermediate Quantitative Economics I and Intermediate Quantitative Economics II
ECON 123A- 123B	Econometrics I and Econometrics II
ECON 123B	Econometrics II
ECON 149	Special Topics in Economics of Public and Private Organizations
ENGRCEE 121	Transportation Systems I: Analysis and Design
ENGRCEE 122	Transportation Systems II: Operations and Control
ENGRCEE 123	Transportation Systems III: Planning and Forecasting
ENGRCEE 124	Transportation Systems IV: Freeway Operations and Control
I&C SCI 45C	Programming in C/C++ as a Second Language
I&C SCI 46	Data Structure Implementation and Analysis
COMPSCI 115	Computer Simulation
COMPSCI 121	Information Retrieval
COMPSCI 122A	Introduction to Data Management
B. Independent study units:	
ECON 299	Independent Study
ENGRCEE 296	Master of Science Thesis Research
ENGRCEE 298	Special Topics in Civil Engineering
ENGRCEE 299	Individual Research
UPPP 298	Directed Studies in Urban Planning
UPPP 299	Independent Study in Urban Planning
COMPSCI 298	Thesis Supervision
COMPSCI 299	Individual Study
C. Students who choose the thesis option may also select up to eight units of the following:	
ENGRCEE 296	Master of Science Thesis Research (4 to 12 units)
UPPP 298	Directed Studies in Urban Planning
COMPSCI 298	Thesis Supervision

<sup>1</sup> NOTE: ECON 281A-ECON 281B and ECON 282A-ECON 282B require ECON 210A or consent of the instructor. Students can only count one ECON 289 course toward the required number of units.

After approval from their advisor, students may petition the Director of the Transportation Science Program with requests for substitution of the required courses.

### Plan I: Thesis Option

Students who select the thesis option must complete at least 44 units of study, up to eight of which can be taken in conjunction with the thesis research topic (thesis units should be taken in the home department of the faculty advisor); they must also complete at least 36 units of course work with no more than four units of pre-approved upper-division undergraduate courses, independent study units, or seminars. The thesis should reflect an original research investigation and it must be approved by a thesis committee of at least three full-time faculty members, a majority of which must be Transportation Science faculty.

### Plan II: Comprehensive Examination Option

Students who select the comprehensive examination option must successfully complete 44 units of course work and pass a comprehensive examination. These units may include no more than 12 units of pre-approved upper-division undergraduate courses, independent study units, or seminars. The comprehensive examination requirements may be met with a publication-quality paper dealing with a transportation topic; this paper must be approved by the student's advisor and the Director of the Transportation Science program.

UCI is a major research university and has an excellent library collection, as well as special interlibrary loan arrangements with other University of California libraries including the Transportation Library at Berkeley. Research is coordinated with the Irvine branch of the Institute of Transportation Studies (ITS). Approximately 30 to 40 graduate students are employed as research assistants each year in ITS. Research covers a broad spectrum of transportation issues. Current funded research projects focus upon intelligent transportation systems (ITS), particularly advanced transportation management systems; planning and analysis of transportation systems; transportation systems operation and control; transportation engineering; transportation safety; road and congestion pricing; environmental and energy issues and demand for alternative fuel vehicles; public transit operations, transportation-land use interactions, demand for autos, and travel demand.

ITS is part of the University of California Transportation Center, one of ten federally designated centers of excellence for transportation research. The transportation research program at UCI is also supported by the Advanced Transportation Management Systems (ATMS) Laboratories. The Institute

maintains a regular publications series documenting research conducted within its programs and is the editorial headquarters of the *Journal of Regional Science*.

## Transportation Science, Ph.D.

### Jean-Daniel Saphores, Director

949-824-2611

aregan@uci.edu (%20aregan@uci.edu)

<http://www.transci.uci.edu/>

The graduate program in Transportation Science includes faculty from four academic units: the Department of Civil and Environmental Engineering in The Henry Samueli School of Engineering, the Department of Economics in the School of Social Sciences, the Department of Planning, Policy, and Design in the School of Social Ecology, and the Department of Computer Science in the Bren School of Information and Computer Sciences. The program is designed to educate students in a broad set of competencies and perspectives that mirror the actual practice of current transportation research. The M.S. and Ph.D. degrees in Transportation Science are offered.

Admission is limited to a small number of exceptionally talented, independent, and self-disciplined students. The deadline for application for admission is March 1 for fall quarter. A second window for application for admission for winter or spring quarters is open from April 15 through June 1 but funding options for this second window may be very limited. All applicants must take the Graduate Record Exam (GRE) prior to the application deadline. Applicants whose first language is not English must also submit Test of English as a Foreign Language (TOEFL) scores.

The Ph.D. program is a 48-unit program requiring a qualifying examination and dissertation defense.

Prior to the qualifying examination, students must have completed a minimum of 36 units of coursework, a replication project, or a publishable research paper as first author, and a dissertation proposal.

### Requirements

Courses are selected from one of the four areas listed below.

Substitutions and exceptions must be approved by the student's advisor and the Director of the Transportation Science program.

The normative time for completion of the Ph.D. is five years and the maximum time permitted is seven years. Core courses must be chosen from lists in each of the four program areas. Each student must choose at least two graduate courses from Area 1 (Transportation Systems Engineering), at least one graduate course from each of Area 2 Urban and Transportation Economics) and Area 3 (Transportation Planning, and at least four additional graduate courses from any of those areas, or the Area 4 (Computer Science). At least five of the eight core courses must be transportation courses (indicated by an asterisk).

Students must complete the following general theory core courses:

#### Area 1 (Transportation Systems Engineering)

ENGRCEE 220A	Travel Demand Analysis I
ENGRCEE 220B	Travel Demand Analysis II
ENGRCEE 221A	Transportation Systems Analysis I
ENGRCEE 222	Transit Systems Planning
ENGRCEE 223	Transportation Systems III: Planning and Forecasting
ENGRCEE 224A	Transportation Data Analysis I
ENGRCEE 226A	Traffic Flow Theory I
ENGRCEE 228A	Urban Transportation Networks I
ENGRCEE 228A	Urban Transportation Networks I
ENGRCEE 229A	Traffic Systems Operations and Control I

#### Area 2 (Urban and Transportation Economics)

ECON 210A	Microeconomic Theory I
ECON 281A	Urban Economics I
ECON 281B	Urban Economics II
ECON 282A	Transportation Economics I
ECON 282B	Transportation Economics II
ECON 289A-Z	

Students can only count on ECON 289 course toward the required number of units.

#### Area 3 (Transportation Planning)

UPPP 202	History of Urban Planning
----------	---------------------------

UPPP 207	Land-Use Law
UPPP 212	Transportation Planning and Policy
UPPP 231	Transportation and Environmental Health
UPPP 235	Geographic Information Systems (GIS) Problem Solving in Planning
UPPP 237	Introduction to Geographic Information Systems
Area 4 (Computer Science)	
COMPSCI 206	Principles of Scientific Computing
COMPSCI 248A	Introduction to Ubiquitous Computing
COMPSCI 260	Fundamentals of the Design and Analysis of Algorithms
COMPSCI 268	Introduction to Optimization
COMPSCI 271	Introduction to Artificial Intelligence
COMPSCI 274A	Probabilistic Learning: Theory and Algorithms
A. Pre-approved upper-division undergraduate courses:	
ENGRCEE 121	Transportation Systems I: Analysis and Design
ENGRCEE 122	Transportation Systems II: Operations and Control
ENGRCEE 123	Transportation Systems III: Planning and Forecasting
ENGRCEE 124	Transportation Systems IV: Freeway Operations and Control
ECON 105A	Intermediate Quantitative Economics I
ECON 105B	Intermediate Quantitative Economics II
ECON 123A	Econometrics I
ECON 123B	Econometrics II
ECON 149	Special Topics in Economics of Public and Private Organizations
I&C SCI 45C	Programming in C/C++ as a Second Language
I&C SCI 46	Data Structure Implementation and Analysis
COMPSCI 115	Computer Simulation
COMPSCI 121	Information Retrieval
COMPSCI 122A	Introduction to Data Management
B. Independent study units	
ENGRCEE 296	Master of Science Thesis Research
ENGRCEE 298	Special Topics in Civil Engineering
ENGRCEE 299	Individual Research
ECON 299	Independent Study
UPPP 298	Directed Studies in Urban Planning
UPPP 299	Independent Study in Urban Planning
COMPSCI 298	Thesis Supervision
COMPSCI 299	Individual Study
C. Students who choose the thesis option may also take up to eight units of the following:	
ENGRCEE 296	Master of Science Thesis Research
UPPP 298	Directed Studies in Urban Planning
COMPSCI 298	Thesis Supervision

After approval from their advisor, students may petition the Director of the Transportation Science Program with requests for substitution of the required courses.

### Replication Project or Publishable Paper

Students entering the program with an M.S. are encouraged to transform a course project or thesis from this program or an earlier one into a publishable paper. That paper could be sole-authored, or authored with a student's former or current faculty mentors. The dissertation supervisor and the Director of the Transportation Science Program must approve the replication project or paper prior to the date of the qualifying exam.

Prior to preparing a dissertation proposal, each student who has not completed a master's thesis (or otherwise independently published) must replicate the empirical work of a published paper from a major transportation journal, chosen by the student and approved by the advisor. This replication may involve the collection of new data, the use of better statistical techniques, additional simulations, or the identification and correction of theoretical errors. Through the replication project, students gain direct experience in reducing a general problem to a manageable research project, in using data, and in carrying out a research project.

A replication project involves choosing an empirical paper, obtaining the data necessary to replicate the project and then replicating the project and describing the replication and any related extensions in a research paper. Such projects are most common in economics, but could also be done based on any of the four transportation science research areas.

### **Dissertation Proposal**

Dissertation proposals differ across areas but a typical proposal would be 15-30 pages long and would include an introduction, a review of related literature, a plan for the dissertation research and an indication of the sorts of products that will emerge from the project (publishable papers, case studies, software, technologies, etc.). The proposal is not a binding contract, because research evolves, but it should provide the committee with sufficient information to judge the likelihood that the project will be sufficient to meet the requirements for a Ph.D.

### **Qualifying Examination**

The qualifying exam must include five faculty members of which at least three members must be selected from the Transportation Science core faculty, and at least one of whom must be outside of that group. The qualifying exam is primarily an oral presentation of the dissertation proposal but might also include a discussion of other major research efforts conducted by the candidate and can involve questions from courses taken at UCI, or general transportation related questions.

Upon completion of the coursework and the publication or replication paper requirement, each student must develop a dissertation proposal defining the research problem, related literature, research methods, and data resources. The Ph.D. qualifying examination consists of an oral defense of that proposal before a candidacy committee chosen according to normal campus regulations, upon the recommendation of the Graduate Director. Typically, this is a committee of at least three members of the Transportation Science faculty and at least one faculty member who is not associated with Transportation Science.

UCI is a major research university and has an excellent library collection, as well as special interlibrary loan arrangements with other University of California libraries including the Transportation Library at Berkeley. Research is coordinated with the Irvine branch of the Institute of Transportation Studies (ITS). Approximately 30 to 40 graduate students are employed as research assistants each year in ITS. Research covers a broad spectrum of transportation issues. Current funded research projects focus upon intelligent transportation systems (ITS), particularly advanced transportation management systems; planning and analysis of transportation systems; transportation systems operation and control; transportation engineering; transportation safety; road and congestion pricing; environmental and energy issues and demand for alternative fuel vehicles; public transit operations, transportation-land use interactions, demand for autos, and travel demand.

ITS is part of the University of California Transportation Center, one of ten federally designated centers of excellence for transportation research. The transportation research program at UCI is also supported by the Advanced Transportation Management Systems (ATMS) Laboratories. The Institute maintains a regular publications series documenting research conducted within its programs and is the editorial headquarters of the *Journal of Regional Science*.

# Office of Research

---

## Pramod Khargonekar, Vice Chancellor for Research

The mission of the Office of Research (<http://www.research.uci.edu>) (OR) is to support and enhance the creative and scholarly activities of UCI researchers.

OR provides central campus administrative support for UCI's research programs. It includes Research Administration, University Laboratory Animal Resources (ULAR), Federal Relations, Administrative Operations and Planning, and the Office of the Vice Chancellor. Each of these units contributes to the overall objective of facilitating campus research activities. Additionally, the Office of Research oversees the operation of many research centers and institutes. Learn more about the Office of Research, its mission, organizational structure and leadership here: <http://research.uci.edu/about/>

Below is a comprehensive list of centers and institutes that report (directly or indirectly) to the Vice Chancellor for Research.

## Special Research Programs

Special Research Programs (SRPs) exist at UC Irvine to provide a structure for collaborative research activities that do not fit the definition and purpose of an Organized Research Unit, a Campus Center, or a School Center.

### Beckman Laser Institute

The Beckman Laser Institute (BLI) was established in 1982 by Dr. Arnold O. Beckman and Dr. Michael W. Berns as an interdisciplinary center for the development and application of optical technologies in biology and medicine. Since the opening in 1986, Beckman Laser Institute has grown to include 18 faculty and their 130 affiliated students, postdoctoral fellows, technical staff, and administrative support. BLI is one of five national Beckman Institutes supported by the Arnold and Mabel Beckman Foundation. BLI is dedicated to cutting-edge interdisciplinary research and the interface of physical science, engineering, and biology. Because BLI also houses a medical clinic, it is unique in its capacity for conducting translational research that moves basic technologies rapidly from "benchtop to bedside." For more information visit the Beckman Laser Institute website (<http://www.bli.uci.edu>).

### California Institute for Telecommunications and Information Technology (Calit2)

Calit2 is a two-campus multidisciplinary research institute established by the State of California in 2000. One of four University of California Institutes for Science and Innovation, Calit2 is a partnership between academia and the business community. The Institute's unique research approach integrates academic intellectual capital across a wide range of disciplines with industry expertise. In collaboration with its sister division at UC San Diego, Calit2@UCI seeks innovative IT approaches that will benefit society and ignite economic development in the state and throughout the country.

More than 150 UCI faculty, 250 students, and 100 industry partners are actively engaged in Calit2 research areas that include the environment, transportation, emergency management, health care, education, and entertainment.

Calit2 also strives to prepare students for successful careers after graduation; the Institute's programs include SURF-IT, a summer undergraduate opportunity that immerses students in hands-on research, as well as a graduate fellows program that helps fund a select group of students doing multidisciplinary, IT-focused graduate work. For more information visit the Calit2 website (<http://www.calit2.net>).

### Facility for Imaging and Brain Research (FIBRE)

The Facility for Imaging and Brain Research (FIBRE), located on the ground floor of the Social and Behavioral Sciences Gateway, houses a 3T Siemens Prisma scanner, a mock scanner, and data analysis facilities. This research-dedicated MRI scanning facility, operated by Dr. Craig Stark, is designed to suit a wide range of basic and translational research programs by researchers across the UCI campus and beyond. For more information visit the FIBRE website. (<http://imaging.uci.edu/fibre/>)

### Institute for Clinical and Translational Science

The Institute for Clinical and Translational Science (ICTS) in the Office of Research is a uniquely transformative, novel, and integrative academic home for clinical and translational science with the resources to train and advance a cadre of well-trained multi- and interdisciplinary investigators and research teams. The Institute facilitates access to innovative research tools and information technologies to promote the application of new knowledge and techniques to patient care. ICTS assists basic, translational, and clinical investigators, community clinicians, clinical practices, networks, professional societies, and industry to develop new professional interactions, programs, and research projects. ICTS fosters a new discipline of clinical and translational science that is much broader and deeper than their separate components. The faculty members associated with ICTS are instrumental in supporting students in related advanced degree programs via their grants and other sources of financial support. ICTS consists of several units: Pilot and Collaborative Translational and Clinical Studies; Translational Technologies and Resources; Development of Novel Clinical and Translational Methodologies; Biomedical Informatics (including the Center for Medical Informatics); Design, Biostatistics, and Clinical Research Ethics; Regulatory Knowledge and Support; Participant and Clinical Interactions Resources; Community Engagement; and Research Education, Training, and Career Development. More information is available at the ICTS website (<http://www.icts.uci.edu/>).

## Thesaurus Linguae Graecae®

The Thesaurus Linguae Graecae (TLG)® is a research project that was established at UCI in 1972, thanks to a gift by UCI alumna Marianne McDonald. Its goals are to create a comprehensive digital library of Greek literature from antiquity to the present era; to conduct literary research using collected texts; and to apply technological innovation in these endeavors. The TLG® corpus currently contains more than 105 million words of Greek text from Homer (8 c. B.C) to the fall of Byzantium in A.D. 1453 and beyond.

TLG® research activities combine the traditional concerns and methodologies of philological and literary study with the most advanced features of computer technology. Included among current research foci are the identification of ancient Greek literary and documentary materials from various literary-historical periods; the conversion of these materials into digital form using modern methods of text encoding; the enhancement of automated text-correction routines; and the formulation of criteria for the lexical analysis and categorization of the texts in the corpus. The full corpus is available to more than 2,000 subscribing institutions and thousands of individuals in 58 countries worldwide.

TLG®'s library holdings enhance those of the UCI Langson Library, and TLG® conferences and scholarly visits afford faculty and students contact with eminent scholars in related fields. The Thesaurus Linguae Graecae® has made UCI a major source of Classics research activity. For more information visit the TLG website (<http://www.tlg.uci.edu/>).

## UCI-NATURE

UCI-NATURE offers UC Irvine's faculty and students opportunities to bring their research, scholarship, teaching, public service, and developing careers out into the natural environment in a wide diversity of settings characteristic of California. UC Irvine directly oversees four protected natural areas, two of which include lodging facilities and are about a three hour drive from Irvine, and two of which are within walking distance of campus. UCI-NATURE also maintains partnership agreements that facilitate access to additional natural areas and facilities not directly managed by the University. Together, these field-based assets span regional gradients across environments from the ocean to the desert, as well as a diversity of societal contexts, all within a few hours of campus. This system of assets available to UC Irvine's faculty and students is connected on yet a larger scale to the system-wide UC Natural Reserve System (<http://ucnrs.org/>). UCI-NATURE functions as a single umbrella structure for the management, operations, and leveraging of these natural assets, and includes faculty governance that allows for communication and optimal allocation of resources across the different programs. The place-based focus fosters excellence in research and scholarship, tangible interdisciplinary interactions, and community-based partnerships that engage our faculty and students in meaningful real-world problems. For further information contact UCI-NATURE Administrative Director Megan Lulow at [mlulow@uci.edu](mailto:mlulow@uci.edu), Director Kailen Mooney [mooneyk@uci.edu](mailto:mooneyk@uci.edu)

### UC Natural Reserve System

The University of California maintains a network of 39 Reserves (756,000 ac) that are representative of the State's habitat and geographic diversity. These serve as outdoor classrooms and laboratories for students, faculty, and staff, and are intended primarily for purposes of education and research. UCI oversees three of these Reserves: the Burns Piñon Ridge Reserve, the San Joaquin Marsh Reserve, and the Steele Burnand Anza-Borrego Desert Research Center. For further information visit the Natural Reserve System website (<http://www.ucnrs.org/>) at <https://ucnrs.org> (<https://ucnrs.org/>) or contact UCI-NATURE Administrative Director Megan Lulow at [mlulow@uci.edu](mailto:mlulow@uci.edu), Director Kailen Mooney [mooneyk@uci.edu](mailto:mooneyk@uci.edu), or Faculty Advisors Peter Bowler, [pabowler@uci.edu](mailto:pabowler@uci.edu) or Travis Huxman [thuxman@uci.edu](mailto:thuxman@uci.edu).

### Burns Piñon Ridge Reserve

The Burns Piñon Ridge Reserve is located near the town of Yucca Valley in San Bernardino County. It is a 306-acre parcel of high-desert habitat representing an ecotone between montane and desert biota, with mixtures of Joshua tree, piñon pine, and juniper woodland. The Reserve has a field station with dormitories and communal living and kitchen space, as well as primitive camping facilities, and is used primarily for overnight field trips and research. For further information, visit <http://burns.ucnrs.org> (<http://burns.ucnrs.org/>) or contact UCI-NATURE Administrative Director Megan Lulow at [mlulow@uci.edu](mailto:mlulow@uci.edu).

### San Joaquin Marsh Reserve

The San Joaquin Marsh Reserve, one of the last remaining coastal marshes in Southern California, is a 202-acre wetland adjacent to the UCI campus. The Marsh consists of a series of freshwater ponds and their attendant aquatic flora and fauna, and is especially known for its rich bird life, both resident and migratory. The Reserve also sustains one of the largest Pacific pond turtle populations in Southern California. The Marsh has about 150 acres of cattail wetlands in three large cells, and 11 experimental bulrush-dominated ponds whose water levels can be manipulated for teaching and research purposes. For further information, visit <http://sanjoaquin.ucnrs.org> (<http://sanjoaquin.ucnrs.org/>) or contact UCI-NATURE Administrative Director Megan Lulow at [mlulow@uci.edu](mailto:mlulow@uci.edu) or Faculty Advisor Peter Bowler at [pabowler@uci.edu](mailto:pabowler@uci.edu).

### Steele/Burnand Anza-Borrego Desert Research Center

The Steele/Burnand Anza-Borrego Desert Research Center, adjacent to the town of Borrego Springs, includes approximately 80 acres, with a large historic clubhouse that serves as home base for researchers and students. Through a cooperative agreement with California State Parks and the Anza-Borrego Foundation, the Research Center offers access to California's largest state park. The 615,000-acre Anza-Borrego Desert State Park encompasses native fan palm oases and piñon pine-juniper forests, and is home to the endangered desert bighorn sheep. The Research Center encourages the study of environmental and ecological problems in the region. For further information, visit <http://anzaborrego.ucnrs.org/>, or contact the Research Center on-site Manager Jim Dice at [dicej@uci.edu](mailto:dicej@uci.edu) or UCI-NATURE Administrative Director Megan Lulow at [mlulow@uci.edu](mailto:mlulow@uci.edu).

## UC Systemwide Natural Reserve System California Ecology and Conservation Course

The Natural Reserve System course, available to all undergraduate students in the UC system, allows students to experience a diversity of ecological experiences through the use of UC Natural Reserve System sites. It provides a tool for students to see first-hand how climate change and other environmental variations in California directly influence plant and animal ecology throughout the state. For further information, visit the Natural Reserve System website (<http://www.ucnrs.org/>) <https://ucnrs.org> (<https://ucnrs.org/>).

## UCI Ecological Preserve

The 62-acre UCI Ecological Preserve consists of several small hills and surrounding flatlands bearing remnants of coastal sage scrub flora and associated fauna, including the California gnatcatcher (Federally listed as Threatened) and the coastal cactus wren. The Preserve is located on the campus and is set aside for teaching, research, and passive recreational use by the campus community. The property is protected under the Natural Communities Conservation Plan and is part of the Nature Reserve of Orange County (<https://occonservation.org/>). For more information contact UCI-NATURE Administrative Director Megan Lulow at [mlulow@uci.edu](mailto:mlulow@uci.edu), or Faculty Advisors Travis Huxman [thuxman@uci.edu](mailto:thuxman@uci.edu) and Peter Bowler, [pabowler@uci.edu](mailto:pabowler@uci.edu).

## UCI Arboretum and Herbarium (IRVC)

The UCI Arboretum is a botanical garden developed and managed by the School of Biological Sciences. It contains areas planted with floras adapted to climates similar to those of Southern California and maintains a large collection of plants native to Southern California and Baja California, as well as South African monocots. The Arboretum provides materials and space for research and teaching needs and its collections are also used as an educational resource for the community at large. The UCI Herbarium (<http://arboretum.bio.uci.edu/plant-exhibits/herbarium/>) (IRVC) curates ca. 35,000 vascular plant specimens, especially from southern California and Baja California, Mexico, and is a part of the Arboretum. IRVC is a member of the Consortium of California Herbaria and is a participant in the Consortium's Digital Herbarium project. For further information call 949-824-5833 or contact Rebecca Crowe, Nursery Manager at [rcrowe@uci.edu](mailto:rcrowe@uci.edu) and Peter Bowler, Faculty Advisor at [pabowler@uci.edu](mailto:pabowler@uci.edu).

## Crystal Cove State Park Research Cottage

UCI-NATURE maintains a partnership with California State Parks and the Crystal Cove Alliance for use of their Research Cottage to promote scholarly work pertinent to the understanding and management of ecosystems at the Park. It has beach shore and coastal hill access within the Park, meeting and lecture space, and small wet and dry labs. For more information, contact UCI-Nature Administrative Director Megan Lulow at [mlulow@uci.edu](mailto:mlulow@uci.edu).

## University of California Humanities Research Institute

The University of California Humanities Research Institute (UCHRI) is a multicampus research program of the University of California, serving all 10 campuses in the UC system. Founded in 1987 and headquartered at the UC Irvine campus, the Institute promotes collaborative work representing different fields and institutions both within and beyond the University of California. UCHRI addresses topics in traditional humanities disciplines, as well as in new areas intersecting with social and natural sciences, technology, art, medicine, and the professions. Stressing interdisciplinary collaborative research, UCHRI bridges gaps between disciplines across the humanities and human sciences and seeks to overcome the intellectual and institutional barriers that can separate the humanities from other fields.

The Institute is also an integral part of the newly funded system-wide UC Humanities Networking Initiative. In this role, UCHRI provides support for the Society of Fellows in the Humanities and the Consortium of Humanities Centers. UCHRI is a founding member of HASTAC, the Humanities, Arts, Science and Technology Advanced Collaboratory, a consortium of humanists, artists, social scientists, scientists, and engineers committed to new forms of collaboration across communities and disciplines fostered by creative uses of technology.

UCHRI also administers the UC Consortium in California Studies; the Andrew Vincent White and Florence Wales White Graduate Student Scholarship supporting dissertation research in the humanities or theoretical social sciences and medicine; the UC-University Utrecht faculty collaborative research grants; and the annual summer Seminar in Experimental Critical Theory.

UCHRI, in partnership with Duke University, administers the Digital Media and Learning Competition, a \$2-million annual program funded by the MacArthur Foundation to award emerging leaders who use digital technologies to envision the future of learning.

For additional information, contact the University of California Humanities Research Institute, 4000 Humanities Gateway, Irvine, CA 92697-3350; 949-824-8180; [uchri@uci.edu](mailto:uchri@uci.edu); or visit the UCHRI website (<http://uchri.org/>).

## Organized Research Units

Organized Research Units (ORUs) normally consist of an interdisciplinary group of faculty, students, and other researchers engaged in a continuing program of multidisciplinary or interdisciplinary research, supported by both University and extramural funding. The work of some ORUs is directed toward the solution of complex contemporary problems, while others conduct basic research essential to the understanding of natural or social phenomena or of humanistic ideas and expressions. The following ORUs have been established on the Irvine campus.

## AirUCI

AirUCI is a research team based at UCI focused on probing a new type of chemistry that occurs in the atmosphere at the interface between air and water. Funded by the National Science Foundation (Divisions of Chemistry and Atmospheric Sciences), AirUCI began in August 2002 as a Collaborative Research in Chemistry (CRC) group and was accepted as an ORU in July 2008.

Chemical reactions that play key roles in the formation of smog, acid rain, and in global climate change are known to occur between gases, as well as inside liquid droplets that are present in the atmosphere in the form of airborne particles, fogs, and clouds. Only recently has it been apparent that chemical reactions also occur right at the interface between air and these atmospheric droplets. Both the speed with which these interface reactions occur and the manner in which they take place may be quite different from reactions in either the gas or liquid. AirUCI's scientific team combines theory, experiments, and computer modeling of air quality to provide new insights into how this chemistry at interfaces impacts the atmosphere. More information is available at the AirUCI website (<http://airuci.uci.edu/>).

## Cancer Research Institute

The UCI Cancer Research Institute (CRI) is an Organized Research Unit dedicated to basic cancer research. The CRI has 55 faculty affiliates from departments in the Schools of Biological Sciences, Engineering, Medicine, and Physical Sciences. The CRI supports faculty research, organizes cancer-related training, and functions as the basic sciences arm of the UCI Chao Family Comprehensive Cancer Center. The CRI offices are located in Sprague Hall on the UCI main campus; Sprague Hall is a facility dedicated to research in cancer and genetics. Additional information is available at the CRI website (<http://cri.bio.uci.edu/>).

## Center for Complex Biological Systems

The UCI Center for Complex Biological Systems (CCBS) promotes research and education in the area of systems biology broadly defined, which includes aspects of synthetic biology, genomics and functional genomics, computational biology, mathematical biology, biophysics, bioengineering, and molecular biology. The goal is to develop a more comprehensive and accurate understanding of complex biological systems and their behaviors. The basic approach is to facilitate the formation of multidisciplinary research teams to address the most critical questions. Additional information is available on the CCBS website (<http://ccbs.uci.edu/>).

## Center for Embedded and Cyber-physical Systems Systems

The purpose of the Center for Embedded and Cyber-physical Systems - also known as CECS - is to conduct leading-edge interdisciplinary research in embedded systems, emphasizing automotive, communications and medical applications, and promote technology and knowledge transfer for the benefit of the individual and society. Additional information is available on the CECS website (<http://www.cecs.uci.edu/>).

## Center for Virus Research

The Center for Virus Research (CVR) seeks to foster interdisciplinary scholarship, training, and research among virologists and other faculty. Research on viruses provides a biological and technological foundation from which much has been discovered concerning the basic molecular processes of organisms. Viruses supply some of the most useful experimental models for disease, cancer, immunity, and genetic systems of gene control. In addition, viral-based technology is being vigorously pursued and developed in the context of gene therapy and is teaching us much about the control of cellular processes. With the growing worldwide threat of emerging viral diseases, interest in virus research at all levels has intensified and has taken on a new global perspective. Previously separate disciplines such as molecular biology, pathogenesis, evolutionary biology, neurology, and radiological sciences can now be readily linked by virus research.

The CVR is also committed to advanced post-graduate training. In addition to shared facilities and the seminar and symposia series, the CVR oversees two training grants. Since graduate training in virology encompasses six departments in three schools, the CVR has also become the focus and administrative point for the organization of graduate virology courses and the virology track of the interdisciplinary graduate program in Cellular and Molecular Biosciences (CMB). For more information visit the Center for Virus Research website (<http://cvr.bio.uci.edu/>).

## Health Policy Research Institute

The Health Policy Research Institute (HPRI) is an interdisciplinary faculty research organization dedicated to improving the quality of care and reducing the disparities in health care. Through research, its faculty and associates translate scientific findings into practice by uniting clinical sciences with the social and behavioral science fields of economics, psychology, anthropology, sociology, and business. This unique platform provides the basis for HPRI's research results to directly effect health policy and the health of the local community and the public.

HPRI is committed to building the center into a nationally recognized focal point for health care research. HPRI has four principal functions: (1) to produce high-level health policy research in the areas of quality of chronic disease care (i.e., diabetes, cancer, nursing home care) and reduce health disparities and improve quality of care for ethnic minorities; (2) to disseminate research findings to UCI's faculty and students through seminar series, meetings, and publications; (3) to serve as the research center for UCI graduate and undergraduate students who have health interests; and (4) to support improvements in patient health and safety and organizational improvements in the UCI health care system.

HPRI's achievement of these goals begins with its faculty—an interdisciplinary group of national leaders representing health services research, health economics, clinical epidemiology, psychometrics, and behavioral sciences in medicine. The current research led by HPRI's members and its campuswide collaborators enhance UCI as one of the best research universities in the country. For more information visit the HPRI website (<http://www.healthpolicy.uci.edu/>).

## **Institute for Genomics and Bioinformatics**

The Institute for Genomics and Bioinformatics (IGB) provides an organizational structure for interdisciplinary research and training in genomics, proteomics, bioinformatics, chemoinformatics, and computational biology—emerging scientific disciplines that are revolutionizing biology, medicine, and society. IGB computational and life scientists are working together to pioneer fundamental processes for reverse engineering gene and protein networks to understand complex biological systems. Through these interdisciplinary collaborations, IGB scientists are creating new theoretical, algorithmic, and software advances in storing, retrieving, networking, processing, modeling, analyzing, navigating, and visualizing biological information. In turn, their computational and computer science accomplishments are providing methods, predictions, and new hypotheses that are driving biological research in previously unanticipated ways. This scientific cross-fertilization is enriching both fields and will continue to do so in the coming decades. More complete descriptions of the Institute's research and training programs are available at the IGB website (<http://www.igb.uci.edu/html>).

## **Institute for Immunology**

The UCI Institute for Immunology currently comprises of more than two-dozen faculty members from the School of Biological Sciences and the School of Medicine, whose research and instructional efforts are in immunology. It integrates the immunological research and educational activities of multiple departments, including Molecular Biology and Biochemistry, Microbiology and Molecular Genetics, Physiology and Biophysics, Pathology, Medicine, Neurology and Chemistry. The activities of the Institute extend to synergize with allied areas of research including biomedical engineering, public health, and physical rehabilitation. The major mandate of the Institute for Immunology is to consolidate and further the research and training/instructional efforts in immunology at UCI, thereby promoting the rapid development of world-class research and outstanding graduate and medical training programs in immunology. For more information visit the UCI Institute for Immunology website (<http://www.immunology.uci.edu/>).

## **Institute for Mathematical Behavioral Sciences**

The Institute for Mathematical Behavioral Sciences fosters research in the application of mathematical models and methods to describe and to better understand human behavior, both individual and social. Mimicking the successful interaction between mathematics and the physical sciences, a goal of the Institute is to generate successful interactions between mathematics and the behavioral and social sciences. The Institute sponsors specialized seminars and colloquia, a visiting scholars program, workshops, and focused research groups of faculty, students, and visitors, and it maintains a Technical Report Series. Participants include faculty from the Departments of Anthropology, Cognitive Sciences, Economics, Logic and Philosophy of Science, Political Science, and Sociology in the School of Social Sciences; the Department of Mathematics in the School of Physical Sciences; the Department of Electrical Engineering and Computer Science in The Henry Samueli School of Engineering; the Donald Bren School of Information and Computer Sciences; and The Paul Merage School of Business. Additional information is available at the Institute for Mathematical Behavioral Sciences website (<http://www.imbs.uci.edu/>).

## **Institute for Memory Impairments and Neurological Disorders (UCI MIND)**

The Institute is an Organized Research Unit dedicated to investigating the causes of Alzheimer's disease and related dementias and to improving the quality of life and promoting successful aging. The vision for The Institute for Memory Impairments and Neurological Disorders is to develop approaches for lessening the impact of memory-related disorders. Tackling these complex issues requires a multidisciplinary approach, which is reflected in the diversity of the Institute's faculty, who have primary appointments in the Schools of Biological Sciences, Information and Computer Sciences, Engineering, Medicine, Nursing, and Social Sciences.

The Institute is one of 31 Alzheimer's Disease Research Centers (<https://www.mind.uci.edu/adrc/about/>) (ADRCs) supported by the National Institute for Aging, a branch of the National Institutes of Health, and is also one of 10 California Alzheimer's Disease centers (ADC) funded by the California Department of Public Health. For more information visit the UCI MIND website (<http://www.mind.uci.edu/>).

## **Institute of Transportation Studies**

The Institute of Transportation Studies (ITS), a University of California Organized Research Unit with branches at Irvine, Davis, and Berkeley, was established to foster research, education, and training in the field of transportation.

ITS research at the University of California, Irvine (UCI) involves faculty and students from The Henry Samueli School of Engineering, the School of Social Sciences, the School of Social Ecology, The Paul Merage School of Business, and the Bren School of Information and Computer Sciences. The Institute also hosts visiting scholars from the U.S. and abroad to facilitate cooperative research and information exchange, and sponsors conferences and colloquia to disseminate research results. ITS has a long and rich history of providing both direct and indirect support to the UCI transportation graduate programs. It provides office and research space to virtually all of the students enrolled in UCI's four graduate transportation programs—the interdisciplinary Program in Transportation Science; the graduate concentration in Transportation Economics; the Transportation Planning option in the Department of Planning, Policy, and Design; and the Transportation Systems Engineering graduate focus in the Department of Civil and Environmental Engineering. ITS provides extensive computing resources to all of these students, together with state-of-the-art simulation and laboratory facilities. ITS subscribes to the major transportation research journals and offers a variety of computer-based information retrieval services. More information can be found at the ITS website (<http://www.its.uci.edu/>).

## **Institute for Virtual Environments and Computer Games**

The Institute for Virtual Environments and Computer Games (IVECG) seeks to advance UC Irvine's strengths as a national leader in research and education activities that are revolutionizing how we teach and learn, conduct business and commerce, provide health care, and interact and behave in society.

The power of virtual environments and computer games cannot be understated in its ability to inspire, attract and empower. Virtual environments and computer games comprise the primary manifestation of digital technology in the lives of millions of people: This is how many learn, communicate, understand, relax and even give meaning to their lives. Learn more about the cutting-edge research at the IVECG website (<http://ivecg.uci.edu/>).

### **Jack W. Peltason Center for the Study of Democracy**

The Jack W. Peltason Center for the Study of Democracy (CSD) fosters academic research and education to provide a better understanding of the democratic process, and the steps that may strengthen democracy at home and abroad. The faculty and students of the Center study both democratizing nations and the expansion of the democratic process in the United States and other Western democracies. The Center hosts research conferences, sponsors faculty research, publishes a research paper series, and facilitates research and teaching on democratic themes.

In 1995, the National Science Foundation selected UCI to establish a Graduate Research Traineeship on Democratization and Democratic Politics. University, foundation, and philanthropic support has continued this graduate education through the Democracy Fellows program. The formal course work and faculty mentorship of the training program draw upon faculty of the Center and build upon its present research and educational activities. In addition, graduate fellows in the training program participate in the research activities of the Center. For more information visit the CSD website (<http://www.democracy.uci.edu/>).

### **Reeve-Irvine Research Center**

The Reeve-Irvine Research Center is a world renowned basic science research center devoted to the study of repair, regeneration, and recovery of function after spinal cord injury. Based at the University of California, Irvine, RIRC labs are equipped and staffed to allow cutting edge research at multiple levels ranging from stem cells to robotic retraining to promote functional recovery. RIRC scientists were amongst the first to test the potential of stem cells for spinal cord injury therapy, and research by RIRC scientists formed the basis for the first two clinical trials testing stem cell therapies in people with spinal cord injuries.

The mission of the RIRC is to find new treatments for spinal cord injury through the collaborative research and educational efforts of prominent scientists and clinicians both at the University of California, Irvine and around the world. More information is available at the RIRC website (<http://www.reeve.uci.edu/>).

## **Campus Centers**

A Campus Center provides a group of researchers with use of the "Center" title and a structure for its collaborative activities. The rationale for establishing a Campus Center may include attracting greater recognition and extramural support for a research program at UCI and/or providing an infrastructure that promotes synergistic interactions between a group of researchers within a school or across schools. Directors of campus centers typically report to the Dean of their respective schools. More information about the following centers may be found at the Campus Centers website (<http://www.research.uci.edu/centers-institutes/CC-centers-and-institutes.html>).

Center for Asian Studies (<http://www.asian-studies.uci.edu/>)  
 Center for Global Peace and Conflict Studies (CGPACS) (<http://www.cgpac.uci.edu/>)  
 Center for Hearing Research (CHR) (<http://hearing.uci.edu/>)  
 Center for Organizational Research (COR) (<http://cor.web.uci.edu/>)  
 Center for the Study of Cannabis (<http://cannabis.uci.edu/>)  
 Center in Law, Society and Culture (CLSC) (<http://clsc.sococo.uci.edu/>)  
 Epilepsy Research Center (<http://www.epilepsyresearch.uci.edu/>)  
 Newkirk Center for Science and Society (<http://newkirkcenter.uci.edu/>)  
 Samuel M. Jordan Center for Persian Studies and Culture (<http://www.humanities.uci.edu/persianstudies/>)  
 UCI Interdisciplinary Center for the Scientific Study of Ethics and Morality (<http://www.ethicscenter.uci.edu/>)  
 UCI Long China-US Institute (<https://www.longinstitute.uci.edu/>)  
 UCI Water-Energy Nexus Center (<http://wex.uci.edu/>)

## **Other Research Centers and Institutes at UCI**

"Other" research units do not fit the definition of an Organized Research Unit (ORU), Special Research Program (SRP), or Campus Center, but are similarly interdisciplinary. These units may have been designated as Centers by a sponsoring agency such as the National Science Foundation (NSF) or the National Institutes of Health (NIH), or they may be part of an intercampus-consortium, such as Centers funded by the UC Multicampus Research Programs and Initiatives (MRPI) competition. More information about the following centers may be found at the Centers & Institutes website (<http://www.research.uci.edu/centers-institutes/>).

Chao Family Comprehensive Cancer Center (<http://www.cancer.uci.edu/>)  
 Chemistry at the Space-Time Limit (CaSTL) (<http://www.chem.uci.edu/CCI/>)  
 Conte Center for Brain Programming in Adolescent Vulnerabilities (<http://contecenter.uci.edu/>)  
 Digital Media and Learning Research Hub (<http://www.dmlcentral.net/>)  
 Gavin Herbert Eye Center (<https://www.ghei.uci.edu/>)  
 Institute for Complex Adaptive Matter (ICAM) (<http://icam-i2cam.org/>)  
 Institute for Interdisciplinary Salivary Bioscience Research (<https://iisbr.uci.edu/>)

Memory Prosthetics Multi-Campus Research Programs (<http://www.cnlm.uci.edu/2014/12/30/279/>)  
National Fuel Cell Research Center (<http://www.nfcrc.uci.edu/>)  
Neuroscience Imaging Center (<http://www.research.uci.edu/facilities-services/nic/>)  
NSF-Simons Center for Multiscale Cell Fate Research (<http://cellfate.uci.edu/>)  
Sue and Bill Gross Stem Cell Research Center (<http://stemcell.uci.edu/>)  
Susan Samueli Center for Integrative Medicine (<http://www.sscim.uci.edu/>)  
UC-Cuba Academic Initiative (<http://www.socsci.uci.edu/uc-cuba/>)  
UC Humanities Network (<http://uchumanitiesnetwork.org/>)  
UC Irvine Health Diabetes Center (<http://www.ucirvinehealth.org/medical-services/diabetes/>)

# Program in Public Health

---

Anteater Instruction & Research Building, Suite 2010

Undergraduate Advising: 949-824-2358

Graduate Advising: 949-824-7095

<http://publichealth.uci.edu/>

## Program in Public Health

**Bernadette Boden-Albala, MPH, DrPH**

### Director and Founding Dean, Program in Public Health

The Program in Public Health was established in 2003 to advance the collaborative interdisciplinary mission of public health research, education, and service with the end goal of enhancing health and wellbeing locally, nationally, and domestically.

The undergraduate degree programs in public health began enrolling students in 2006. The Program in Public Health offers a B.S. in Public Health Sciences, a B.A. in Public Health Policy, a minor in Public Health, a minor in Global Health, a Master of Public Health (M.P.H.) in four emphases: Biostatistics, Environmental Health, Epidemiology, and Sociocultural Diversity and Health.

The Department of Epidemiology and Biostatistics offers a Doctor in Philosophy in Epidemiology (Ph.D.) and an M.S. in Epidemiology. Faculty provide guidance on curricular and programmatic activities for the M.P.H. in Epidemiology.

The Department of Environmental and Occupational Health offers an M.S. and a Ph.D. in Environmental Health Sciences. There are two tracks offered in both degree programs: Environmental Toxicology, and Exposure Sciences and Environmental Epidemiology. Faculty provide guidance on curricular and programmatic activities for the M.P.H. in Environmental Health.

The Department of Health, Society, and Behavior Faculty provide guidance on curricular and programmatic activities for the M.P.H. in Sociocultural Diversity and Health, and jointly administers the Ph.D. in Public Health with the Department of Population Health and Disease Prevention.

The Department of Population Health and Disease Prevention offers a Doctor of Philosophy (Ph.D.) in Public Health in two concentrations: Disease Prevention and Global Health, which is jointly administered with the Department of Health, Society, and Behavior. The program also offers a dual-degree M.D./M.P.H., a concurrent J.D./M.P.H. with the School of Law, a concurrent J.D./Ph.D. with the School of Law, and a joint Doctor of Philosophy (Ph.D.) in Environmental Health Sciences with the School of Medicine.

The Program is fully accredited by the Council on Education for Public Health (<http://ceph.org/>). The Program is also a member of the Association of Schools and Programs of Public Health.

---

## Honors

### Honors Research Program in Public Health

The Public Health Honors Program provides an opportunity for selected outstanding students in the program to pursue advanced work in independent research and earn honors in Public Health upon graduation. Successful completion of the honors program requires three quarters of commitment, while enrolled in PUBHLTH H192A-PUBHLTH H192B-PUBHLTH H192C. Students are also expected to enroll in supervised Undergraduate Research (PUBHLTH 199) with their research mentor. The program concludes with a presentation and submission of an honors culminating thesis.

### Eligibility and Application Process

In order to be considered, a student must have satisfied the following requirements: completion of all lower-division Public Health courses required for the major; completion of at least five upper-division Public Health courses; an overall UCI grade point average of a minimum of 3.5; and a minimum 3.5 grade point average in all required and completed Public Health courses. Acceptance into the program is based upon evidence of the student's ability, interest in research, and proposed thesis project with a faculty member.

Admission to the program is based on formal invitation and/or an application to participate in the Public Health Honors Program submitted by the student in the spring quarter of the junior year.

### Requirements

Beyond fulfilling the regular courses required for either the Public Health Sciences or Public Health Policy major, honor students must take the following:

#### A. Fall Quarter

PUBHLTH H192A

Public Health Honors Seminar and Thesis I (4 units)

PUBHLTH 199

Undergraduate Research (4 units)

#### B. Winter Quarter

PUBHLTH H192B	Public Health Honors Seminar and Thesis II (4 units)
PUBHLTH 199	Undergraduate Research (4 units)
C. Spring Quarter	
PUBHLTH H192C	Public Health Honors Seminar and Thesis III (4 units)
PUBHLTH 199	Undergraduate Research (4 units)

### Graduation with Honors

Of the graduating seniors, no more than 16 percent will receive Latin honors: approximately 2 percent *summa cum laude*, 4 percent *magna cum laude*, and 10 percent *cum laude*. The selection for these awards is based on spring quarter rank-ordered grade point averages. To be eligible for honors at graduation, the student must, by the end of spring quarter of the senior year, be officially declared a Public Health major; submit an Application to Graduate by the end of winter quarter of the senior year; have completed at least 72 units in residence at a UC campus by the end of the spring quarter of the academic year in which they graduate; have all corrections to the academic record processed by the University Registrar's Office by the end of spring quarter; if completing the Language Other Than English general education requirement with a language exemption test, pass the test by the end of spring quarter; and be able to verify completion of all course work by the end of the spring quarter of the senior year. For information on other important factors that are considered, please visit at Honors Recognition.

### Campuswide Honors Collegium

The Campuswide Honors Collegium is available to selected high-achieving students from all academic majors from their freshman through senior years. For more information contact the Campuswide Honors Collegium, 1200 Student Services II; 949-824-5461; [honors@uci.edu](mailto:honors@uci.edu); <http://www.honors.uci.edu/>.

### Dean's Honor List

The quarterly Dean's Honor List is composed of students who have received a 3.5 grade point average while carrying a minimum of 12 graded units.

### Public Health Honors, Scholarships, Prizes, and Awards

The following honors, scholarships, prizes, and awards are presented at the annual Public Health Honors and Awards Ceremony held in June.

**Academic Excellence.** This award is given to any student within the Program in Public Health, who graduates with a cumulative 4.0 UCI GPA.

**Excellence in Public Health Practicum.** This award recognizes a student whose project in public health practice contributes to the improvement of health and makes a significant contribution to public health.

**Excellence in Public Health Research.** This award is for research conducted by a student that is exceptional in quality.

**Excellence in Undergraduate Leadership.** This award recognizes a student who has demonstrated exemplary leadership in their execution of student activities that furthers the mission of the Program in Public Health, or the University of California, Irvine. This student has taken key leadership roles, inspired others to contribute, developed new programs to support students, and built relations that enable and grow the broader public health community.

**Excellence in Writing.** This award honors students who best demonstrate an ability to communicate ideas clearly through writing.

**Outstanding Contribution to Public Health, Community and UCI Service.** This award is given to an undergraduate who has made a significant contribution to the Public Health community, including the intellectual growth of others. This award signifies any work/research done by a student that benefits the campus community or the community-at-large.

**Outstanding Contribution to the Program in Public Health.** This award is presented to an outstanding undergraduate who has impacted and contributed significantly to the Program in Public Health.

**Recognition of Preceptors.** This award goes to nominated Practicum Preceptor Sites who have shown an outstanding commitment to UCI students or have been nominated for the award by student recognition.

**Special Recognition.** This award is given to undergraduates who deserve special recognition.

- Department of Environmental and Occupational Health
- Department of Epidemiology and Biostatistics
- Department of Health, Society, and Behavior
- Department of Population Health and Disease Prevention

### Requirements for the Bachelor's Degree

All Program in Public Health students must complete the following requirements.

**All students must meet the University Requirements.**

**Program Requirements:**

**Grade Requirement:** A minimum grade point average of at least C (2.0) is required (1) overall, (2) in all courses required for the major program, (3) in the upper-division courses required for the major, and (4) in PUBHLTH 195W.

**Residence Requirement:** After matriculation, all Public Health courses required for the major must be successfully completed at UCI. The Program in Public Health strictly enforces the UCI residence requirement. At least 36 of the final 45 units completed by a student for the bachelor's degree must be earned in residence at the UCI campus. (The Program considers courses taken in the Education Abroad Program to be in-residence courses.)

**Normal Progress:** Students in the Public Health Program are expected to make progress toward their degree, and their progress will be monitored. If normal academic progress toward the degree in Public Health is not being met, students will be subject to probation.

**Double Majoring and Minor**

Second majors and/or minors will not be approved unless the student can complete both the degree and double major/minor(s) in their allotted time permitted at UCI. Students must be in good standing and not on academic probation for acceptance as a double major/minor(s).

Students may not enter as a double major, but Public Health students interested in other areas may apply for a double major after their first quarter, if the Public Health Program approves.

**Overlap Restrictions**

**Double Majoring in Public Health Sciences and Public Health Policy.** Students may double major in Public Health Sciences and Public Health Policy; however there are only seven courses that may overlap between the two majors. Students may overlap PUBHLTH 1, PUBHLTH 2, PUBHLTH 101, MATH 2A, MATH 2B, STATS 7 or STATS 8, and PUBHLTH 195W. There are no other courses that can count for both majors.

**Other Double Majors.** In fulfilling degree requirements for multiple majors, a maximum of two courses may overlap between any two majors.

**Major and Minor Requirements.** In fulfilling minor requirements, a maximum of two courses may overlap between a major and minor. No course overlap is permitted between minors.

Students may not double major in Public Health Sciences, Pharmaceutical Sciences, Nursing Science, Biomedical Engineering: Premedical, or with any of the School of Biological Sciences majors or minors.

- Environmental Health Sciences, M.S.
- Environmental Health Sciences, Ph.D.
- Epidemiology, M.S.
- Epidemiology, Ph.D.
- Global Health, Minor
- M.D./M.P.H. Dual Degree Program
- Master of Public Health
- Public Health Policy, B.A.
- Public Health Sciences, B.S.
- Public Health, M.S.
- Public Health, Minor
- Public Health, Ph.D.

## Faculty

Alpesh N. Amin, M.D. M.B.A. Northwestern University, *Department Chair and Thomas and Mary Cesario Endowed Chair in Medicine and Professor of Medicine; Biomedical Engineering; Paul Merage School of Business; Program in Public Health; Radiological Sciences*

Scott Bartell, Ph.D. University of California, Davis, *Associate Professor of Program in Public Health; Environmental Health Sciences; Statistics*

Hans-Ulrich Bernard, Ph.D. University of Goettingen, *Professor Emeritus of Molecular Biology and Biochemistry; Program in Public Health*

Zuzana Bic, Dr.P.H. Loma Linda University, *Associate Professor of Teaching of Program in Public Health*

Stephen C. Bondy, Ph.D. University of Birmingham, *Professor of Medicine; Environmental Health Sciences; Program in Public Health*

Tim-Allen Bruckner, Ph.D. University of California, Berkeley, *Associate Professor of Program in Public Health; Urban Planning and Public Policy*

Bharath Chakravarthy, M.D. Boston University, *Associate Clinical Professor of Emergency Medicine; Program in Public Health*

- Wayne Wei Chung Chang, M.D. Saint Louis University, *Health Sciences Clinical Professor of Medicine; Program in Public Health*
- Yunan Chen, Ph.D. Drexel University, *Associate Professor of Informatics; Program in Public Health* (medical informatics, human computer interaction)
- Robert C. Detrano, M.D. Sapienza University of Rome, *Health Sciences Clinical Professor of Radiological Sciences; Medicine; Program in Public Health*
- Karen L. Edwards, Ph.D. University of Washington, *Department Chair and Professor of Epidemiology; Program in Public Health*
- Rufus D. Edwards, Ph.D. Rutgers, The State University of New Jersey, *Professor of Program in Public Health; Environmental Health Sciences; Epidemiology*
- Daniel L. Gillen, Ph.D. University of Washington, *Department Chair and Professor of Statistics; Program in Public Health*
- Michele B. Goodwin, J.D. Boston College, *Director, Center for Biotechnology and Global Health Policy and UCI's Chancellor's Professor of School of Law; Criminology, Law and Society; Gender and Sexuality Studies; Program in Public Health*
- Lisa B. Grant Ludwig, Ph.D. California Institute of Technology, *Professor of Program in Public Health*
- Scott Hardy, M.D., M.P.H. Saint Louis University School of Medicine, *Clinical Professor of Environmental Health Sciences; Program in Public Health*
- Suellen Hopfer, Ph.D. Pennsylvania State University, *Assistant Professor of Program in Public Health; Asian American Studies*
- Michael A. Hoyt, Ph.D. Arizona State University, *Associate Professor of Program in Public Health; Epidemiology; Psychological Science*
- Kamyar Kalantar-Zadeh, M.D. University of Bonn, *Professor of Medicine; Program in Public Health*
- Alya Khan, M.D., M.S. Saba School of Medicine, *Assistant Clinical Professor of Environmental Health Sciences; Program in Public Health*
- Michael T. Kleinman, Ph.D. New York University, *Adjunct Professor of Environmental Health Sciences; Program in Public Health*
- Cynthia Lakon, Ph.D. University of North Carolina at Chapel Hill, *Associate Professor of Program in Public Health*
- Alana Lebron, Ph.D. University of Michigan, *Assistant Professor of Program in Public Health; Chicano/Latino Studies*
- Shahram Lotfipour, M.D. University of Iowa, *Professor of Emergency Medicine; Program in Public Health*
- Yunxia Lu, Ph.D. University Tongi Medical College, *Associate Professor of Program in Public Health*
- Ulrike Luderer, M.D., Ph.D. Northwestern University, *Director of the Environmental Health Sciences Graduate Program and Professor of Medicine; Developmental and Cell Biology; Environmental Health Sciences; Program in Public Health*
- Frank L. Meyskens, M.D. University of California, San Francisco, *Daniel G. Aldrich, Jr. Endowed Chair and Professor of Medicine; Biological Chemistry; Program in Public Health*
- Dana Mukamel, Ph.D. University of Rochester, *Professor of Medicine; Program in Public Health*
- Andrew Noymer, Ph.D. University of California, Berkeley, *Associate Professor of Program in Public Health; Sociology*
- Oladele A. Ogunseitan, Ph.D. University of Tennessee, *Department Chair and Professor of Program in Public Health; Environmental Health Sciences*
- Annie E. Ro, Ph.D. University of California, Los Angeles, *Assistant Professor of Program in Public Health; Asian American Studies*
- Miryha Gould Runnerstrom, Ph.D. University of California, Irvine, *Assistant Professor of Teaching of Program in Public Health*
- Roxane C. Silver, Ph.D. Northwestern University, *Professor of Psychological Science; Program in Public Health* (coping with traumatic life events (personal losses and collective traumas), stress, social psychology, health psychology)
- Dara H. Sorkin, Ph.D. University of California, Irvine, *Associate Professor in Residence of Medicine; Program in Public Health; Psychological Science*
- Sharon M. Stern, Ph.D. University of Utah, *Professor of Teaching Emerita of Program in Public Health*
- Bryan Sykes, Ph.D. University of California, Berkeley, *Associate Professor of Criminology, Law and Society; Program in Public Health; Sociology* (demography, criminology, research methods, health, social inequality, statistics)
- David Timberlake, Ph.D. University of California, San Diego, *Associate Professor of Program in Public Health*
- Veronica M. Vieira, D.Sc. Boston University, *Professor of Program in Public Health; Environmental Health Sciences*
- Lari B. Wenzel, Ph.D. Arizona State University, *Professor of Medicine; Program in Public Health*

Jun Wu, Ph.D. University of California, Los Angeles, *Associate Professor of Program in Public Health; Environmental Health Sciences*

Guiyun Yan, Ph.D. University of Vermont, *Professor of Program in Public Health; Ecology and Evolutionary Biology*

## Courses

### **PUBHLTH 1. Principles of Public Health. 4 Units.**

Introduces the major concepts and principles of public health and the determinants of health status in communities. Emphasizes the ecological model that focuses on the linkages and relationships among multiple natural and social determinants affecting health.

Restriction: Nursing Science Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

(III)

### **PUBHLTH 2. Case Studies in Public Health Practice. 4 Units.**

Presents case studies in various themes of public health practice to demonstrate how the principles of public health were established and continue to evolve.

Prerequisite: PUBHLTH 1

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

(II)

### **PUBHLTH 7A. Public Health Statistics I. 4 Units.**

Introduces the development and application of statistical reasoning and methods in addressing, analyzing, and solving problems in public health, health care, and biomedical, clinical, and population-based research and practice.

Overlaps with SOCECOL 13, STATS 7, STATS 8, MGMT 7.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

(Va)

### **PUBHLTH 7B. Public Health Statistics II. 4 Units.**

Introduces the development and application of statistical reasoning and methods in addressing, analyzing, and solving problems in public health, health care, and biomedical, clinical, and population-based research and practice.

Prerequisite: PUBHLTH 7A

Restriction: Public Health Majors only. Public Health Sciences Majors only. Public Health Policy Majors only.

(Va)

### **PUBHLTH 10. Special Topics in Public Health . 2-4 Units.**

Introduction to emerging topics in public health. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

### **PUBHLTH 30. Introduction to Urban Environmental Health. 4 Units.**

Study of natural and physical components of earth's environmental problems due to human activities. Topics include global air, water, soil, biodiversity, rainforests, energy, demographics, agriculture, and urbanization. Theme is sustainability. Integrated into the science are social, legal, and economic considerations.

(II)

### **PUBHLTH 60. Environmental Quality and Health. 4 Units.**

Overviews how pollution in the environment affects human health. Topics are toxicology, epidemiology, risk assessment, water, food, air, radiation, pesticides, solid and hazardous waste. Included are interdisciplinary elements of environmental regulations, education, and consumer protection.

(II)

**PUBHLTH 80. AIDS Fundamentals. 4 Units.**

Considers the biological and sociological bases of the AIDS epidemic. Topics include the history of AIDS, current medical knowledge, transmission, risk reduction, and how the community can respond.

Same as BIO SCI 45.

(II)

**PUBHLTH 90. Natural Disasters. 4 Units.**

Natural disasters are natural Earth processes that adversely affect humans. Topics include tectonics, earthquakes, tsunamis, volcanoes, landslides, severe weather, flooding, coastal processes, wildfire, related topics, and use of GIS for hazard and risk assessment.

Overlaps with EARTHSS 17.

(II)

**PUBHLTH 91. Disparities in Health Care. 2-8 Units.**

Student participatory course practicing initiation, planning, and coordination of various speakers on the subject of Disparities in Health Care.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 8 units.

**PUBHLTH 100. Special Topics in Public Health. 4 Units.**

Studies in selected areas of public health. Topics addressed vary each quarter. Course may be offered online when topic is Public Health in the Corporate World.

Prerequisite: PUBHLTH 1

Repeatability: Unlimited as topics vary.

**PUBHLTH 101. Introduction to Epidemiology. 4 Units.**

The distribution of disease and injury across time, space, and populations. Covers basic concepts and methods of descriptive epidemiology including the natural history of disease, data, and indices of health.

Prerequisite: STATS 7 or STATS 8 or PUBHLTH 7 or PUBHLTH 7A

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 102. Social Epidemiology. 4 Units.**

Overviews evidence linking environmental factors to mental and physical disorders including such variables as socioeconomic status, income inequality, work stress, job loss, social capital, location, and other demographic characteristics. Measurement and research design issues of both individual and aggregate levels.

Prerequisite: (PSCI 9 or PSCI 11C or PSYCH 7A or PSYCH 9C) and SOCECOL 10 and SOCECOL 13

Same as PSCI 183S.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PUBHLTH 105. Introduction to Medical Informatics. 4 Units.**

Broad overview of medical informatics for students with varied backgrounds. Electronic medical records, online resources, mobile technologies, patient safety, and computational design. Legal, ethical, and public policy issues. Health systems management. Evaluation and fieldwork for health systems.

Prerequisite: WRITING 39C or WRITING 30 or WRITING 31 or HUMAN 1C or HUMAN H1C. WRITING 39C with a grade of C or better. WRITING 30 with a grade of C or better. WRITING 31 with a grade of C or better. HUMAN 1C with a grade of C or better. HUMAN H1C with a grade of C or better

Same as IN4MATX 171.

Restriction: Upper-division students only. Satisfactory completion of the Lower-Division Writing requirement.

**PUBHLTH 106. Project in Health Informatics. 4 Units.**

Students undertake significant quarter-long projects related to health informatics. Topics may include field evaluations of health care technologies, prototypes, iterative design, and system implementations.

Prerequisite: PUBHLTH 105 or IN4MATX 171

Same as IN4MATX 172.

**PUBHLTH 107. Epidemiology of Drug Use and Misuse. 4 Units.**

Applies epidemiologic concepts to the use and misuse of licit/illicit substances. Emphasizes descriptive aspects of drug use and determinants of progressing from experimental use to misuse. Assesses subgroups of abusers, risk factors, trends, and surveillance techniques for estimating drug prevalence.

Prerequisite: PUBHLTH 101

Restriction: Upper-division students only. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 115. Community, Social Justice, and Health Equity Research for Action. 4 Units.**

Focuses on community as a unit of identity, community, well-being, and social justice perspectives and initiatives to promote community health. Addresses community change and improvements in community well-being, with a focus on health equity research for action.

Prerequisite: PUBHLTH 1 or PUBHLTH 2 or CHC/LAT 61 or CHC/LAT 62 or CHC/LAT 63

Same as CHC/LAT 152B.

**PUBHLTH 119. Special Topics in Epidemiology and Genetics. 4 Units.**

Studies in selected areas of epidemiology and genetics. Topics addressed vary each quarter.

Prerequisite: PUBHLTH 1

Repeatability: Unlimited as topics vary.

**PUBHLTH 120. Nutrition and Global Health. 4 Units.**

Global issues related to nutrition and public health. Evaluation of nutritional risk factors associated with the development of chronic diseases and the role of nutritional medicine in prevention. Topics include food safety, communicable diseases, supplements, and regulatory issues.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 121. Introduction to Complementary and Alternative Medicine. 4 Units.**

Examines health and disease in contemporary American culture/society with definitions, models, and practices of what has come to be known as 'orthodox' or 'conventional' medicine. Selected 'alternative' or 'complementary' modes of promoting health and well-being including homeopathy, herbology, and chiropractic.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 122. Health Policy. 4 Units.**

Considers social and economic aspects of health and disease in the United States. What are the proper roles of the individual, community, and government in improving health and health care? International comparisons will be made wherever possible.

Same as UPPP 170.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**PUBHLTH 125. Foundations of Community Health. 4 Units.**

A social ecological framework for understanding community health is presented. Measures of individual and community health are compared, and the influence of personal and environmental factors on individual, group, and population health is examined. Community health promotion strategies are discussed.

Same as UPPP 112.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**PUBHLTH 126. Public Health Law: Fundamentals in Action. 4 Units.**

Addresses the relationship of U.S. public health law to health systems at the individual and population levels. Examines legislative and judicial concepts and how they are applied to disease prevention strategies, health services, management, and policy.

**PUBHLTH 127. Public Health Programs for the Corporate World. 4 Units.**

International perspective on workplace health promotion. Strategies for developing programs to improve employee health and to decrease risks of chronic degenerative diseases. Case studies include assessment of employee health, program design, implementation, and evaluation. Emphasis on disease prevention.

**PUBHLTH 129. Public Health Administration. 4 Units.**

Examines historical aspects of public health administration including policies, procedures, trends, and development of organizations. Addresses information and skills necessary to succeed in public health leadership roles. Discusses strategic planning, collaborations, and ethical considerations for successful management in public health.

Prerequisite: PUBHLTH 1

Restriction: Upper-division students only. Public Health Policy Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment.

**PUBHLTH 132. American Public Policy. 4 Units.**

Focuses on the development and implementation of public policy in the United States. Lectures cover theoretical models of the policy process as well as significant problems facing contemporary American decision-makers.

Same as POL SCI 121G, SOC SCI 152C, UPPP 129.

**PUBHLTH 135. Medical Sociology. 4 Units.**

Current problems in U.S. health-care system and proposals for reform. Examines financial barriers to access; problem of patient dumping; underinsurance; prenatal and perinatal care; child services; preventative care and needs of the elderly; minorities; low-income people; undocumented.

Same as SOCIOL 154.

Restriction: Upper-division students only. Sociology Majors have first consideration for enrollment.

**PUBHLTH 138. Tobacco Control Policy. 4 Units.**

Examines the challenges that governments encounter in regulating the marketing, sales and acquisition, and use of tobacco products. Students assess the supply and demand for tobacco from the perspectives of the industry and consumer.

Restriction: Public Health Majors only. Public Health Sciences Majors only. Public Health Policy Majors only.

**PUBHLTH 139. Special Topics in Health Policy and Administration. 4 Units.**

Studies in selected areas of health policy and administration. Topics addressed vary each quarter.

Prerequisite: PUBHLTH 1

Repeatability: Unlimited as topics vary.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 141. Clinical Health Psychology. 4 Units.**

Behavioral role in etiology, treatment, and prevention of certain diseases. Behavioral intervention including biofeedback, stress-, pain-management, health habit counseling, and other skills to assist patients make cognitive, emotional, and behavioral changes needed to cope with disease or achieve better health.

Prerequisite: PSCI 9 or PSCI 11C or PSYCH 7A or PSYCH 9C

Same as PSCI 141H.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PUBHLTH 144. Health Behavior Theory. 4 Units.**

Introduces theoretical perspectives from the social sciences to understand health behavior from the vantage point of individuals, their interpersonal contacts, communities, and ecological contexts. Application of theory to public health problems is a central focus.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 146. Health Promotion Programs. 4 Units.**

Examines ecological perspectives of health promotion programs and risk factors related to mortality/morbidity. Analyzes effectiveness of health promotion strategies and issues in the existing healthcare systems in light of sociocultural beliefs and economical/political conditions.

Prerequisite: PUBHLTH 1

Restriction: Upper-division students only. Public Health Policy Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment.

**PUBHLTH 147. Drug Abuse and Its Prevention. 4 Units.**

Theoretical and practical underpinnings of drug abuse and its prevention at the individual and population levels. Students practice developing drug abuse prevention schemes for specific populations. Recent developments in pharmacological and biobehavioral theories of drug dependence are explored.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 148. Public Health Communication. 4 Units.**

Theoretical underpinnings and practical applications of communication sciences in public health practice. Techniques of effective communication, including fear appeal and deterrence; social marketing; public-private partnerships; health service delivery; and outreach in rural and urban settings, and for international health strategies.

Prerequisite: PUBHLTH 1 and PUBHLTH 2

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 150. Public Health and Wellness. 4 Units.**

Presents information about wellness from both science and policy perspectives in order to demonstrate the role of wellness in public health. Emphasizes the conditions that create wellness in the individual, the community, the nation, and the world.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 151. Environmental Psychology. 4 Units.**

Impact of the physical environment on individual and group behaviour. Three basic concerns examined: (a) environmental determinants of behaviour at the individual and interpersonal level; (b) social planning and urban design; (c) methodological approaches to the study of environmental issues.

Prerequisite: ENVIRON E8 and (SOCECOL 10 or PP&D 4)

**PUBHLTH 159. Special Topics in Social and Behavioral Health Science. 4 Units.**

Studies in selected areas of social and behavioral health sciences. Topics addressed vary each quarter.

Prerequisite: PUBHLTH 1

Repeatability: Unlimited as topics vary.

**PUBHLTH 161. Environmental Geology. 4 Units.**

Introduction to geologic principles and applications to environmental problems. Topics include: tectonic processes, earth materials, soils, river processes, groundwater, the coastal environment, slope failures, seismic hazards, mineral resources, and land-use evaluation based on geologic conditions. Examples from case studies.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 163. Introduction to Environmental Health Science. 4 Units.**

Focuses on processes of exposure to environmental toxins/agents and their impact to human health and the environment. Media transport, exposure assessment, susceptibility, behavior, and health effect of several toxins are discussed.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 167. Air Pollution, Climate, and Health. 4 Units.**

Introduction to how air pollutants are emitted into the atmosphere, how people are most exposed to air pollutants in developed and developing areas, physical and meteorological processes that affect transport, and the influence of air pollutants on global warming.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 168. Nuclear Environments. 4 Units.**

Understanding the impact of the nuclear age on the environment and human health through interrelated developments of nuclear power and nuclear weapons. The early years of weapon development, catastrophic environmental pollution, perils of nuclear power in the U.S. and Russia.

Same as INTL ST 122, SOCECOL E127.

(VIII)

**PUBHLTH 170. Introduction to Global Health. 4 Units.**

Provides a foundational interdisciplinary understanding of global health issues and their importance to various societal goals, including poverty reduction, economic productivity, and peace promotion. Covers major communicable and non-communicable diseases and demographic patterns of disease burden.

Prerequisite: PUBHLTH 1

(VIII)

**PUBHLTH 171. Human Exposure to Environmental Contaminants. 4 Units.**

Introduces origins of human's realization that chemicals in the environment may adversely affect health. Introduces the theory and principles of exposure assessment. Covers estimation of exposure, variability of measures, the way exposure assessment is incorporated into the risk-assessment paradigm.

**PUBHLTH 172. Climate Change and Disaster Management. 4 Units.**

Examines the social, economic, environmental, and health impacts of anthropogenic climate change through engaged learning that integrates practice and theory.

**PUBHLTH 173. Health and Global Environmental Change . 4 Units.**

Overview of scientific underpinnings of global environmental change and human health consequences. Provides an understanding of the fundamental dependency of human health on global environmental integrity. Encourages disciplinary cross-fertilization through interaction of students in environmental, health, and policy sciences.

Prerequisite: One upper-division course in environmental science, public health, environmental policy, and/or environmental management.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 174. Global Health Ethics. 4 Units.**

Provides a foundation for understanding and application of key issues.

(VIII)

**PUBHLTH 176. War and Public Health. 4 Units.**

Explores how war impacts public health both globally and domestically in the United States. Focus on the link between war and the burden that it ultimately places on physical, mental, environmental, and societal health as well as on health systems.

**PUBHLTH 179. Special Topics in Environmental and Global Health Science. 4 Units.**

Studies in selected areas of environmental and global health sciences. Topics addressed vary each quarter.

Prerequisite: PUBHLTH 1

Repeatability: Unlimited as topics vary.

**PUBHLTH 180. Epidemiology of Infectious Disease. 4 Units.**

Examines the distribution of infectious disease and the health and disease risk among human populations. Introduces basic methods for infectious disease epidemiology. Case studies of important diseases, including HIV and malaria, are conducted.

Prerequisite: PUBHLTH 1

**PUBHLTH 181. Infectious Disease Dynamics. 4 Units.**

Learn how the immune system interacts with infectious diseases, in particular with viral infections. An introduction to basic virology and immunology, it concentrates on the way in which the immune system is critical to the prevention of infections.

Same as BIO SCI E124.

**PUBHLTH 182. Evolutionary and Ecological Principles in Medicine. 4 Units.**

Explore the dynamics of populations on an ecological, epidemiological, and medical level. Considers the dynamics of competition, predation, and parasitism; the spread and control of infectious diseases; and the in vivo dynamics of viral infections and the immune system.

Prerequisite: BIO SCI 93

Same as BIO SCI E151.

Concurrent with ECO EVO 251.

**PUBHLTH 189. Special Topics in Infectious Diseases. 4 Units.**

Studies in selected areas of infectious diseases. Topics addressed vary each quarter.

Prerequisite: PUBHLTH 1

Repeatability: Unlimited as topics vary.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment.

**PUBHLTH 190. Geographic Information Systems for Public Health. 4 Units.**

Provides a broad introduction to the use of Geographic Information Systems software to carry out projects for visualizing and analyzing spatial data to address significant issues of health care and policy-planning.

Concurrent with PUBHLTH 283.

**PUBHLTH 191A. Seminar: Advances and Challenges in Public Health. 2 Units.**

Forum for exploring recent advances and challenges in all disciplines of public health research and practice. Features case studies exemplifying the integration of core competencies with cross-cutting interdisciplinary themes of public health.

Grading Option: Pass/no pass only.

Concurrent with PUBHLTH 291A.

**PUBHLTH 191B. Seminar: Advances and Challenges in Public Health. 2 Units.**

Forum for exploring recent advances and challenges in all disciplines of public health research and practice. Features case studies exemplifying the integration of core competencies with cross-cutting interdisciplinary themes of public health.

Grading Option: Pass/no pass only.

Concurrent with PUBHLTH 291B.

**PUBHLTH 191C. Seminar: Advances and Challenges in Public Health. 2 Units.**

Forum for exploring recent advances and challenges in all disciplines of public health research and practice. Features case studies exemplifying the integration of core competencies with cross-cutting interdisciplinary themes of public health.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

Concurrent with PUBHLTH 291C.

**PUBHLTH H192A. Public Health Honors Seminar and Thesis I. 4 Units.**

Provides an opportunity for selected students to pursue advanced work in research and earn Public Health Honors. Students will conduct their honors research project with faculty through lectures, guest speakers, creating timelines and assignments.

Corequisite: PUBHLTH 199

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Public Health Policy Majors only. Public Health Sciences Majors only.

**PUBHLTH H192B. Public Health Honors Seminar and Thesis II. 4 Units.**

Students initiate and complete data collection for the honors thesis. In addition, students begin data analysis and summarize results at a class symposium at the end of the quarter. A faculty mentor provides supervision and feedback on thesis chapters.

Corequisite: PUBHLTH 199

Prerequisite: PUBHLTH H192A

Grading Option: Pass/no pass only.

Restriction: Public Health Policy Majors only. Public Health Sciences Majors only.

**PUBHLTH H192C. Public Health Honors Seminar and Thesis III. 4 Units.**

Students write their honors research project (PUBHLTH H192A-PUBHLTH H192B) and prepare an oral report to be presented at a class symposium at the end of the quarter. A faculty mentor provides supervision and feedback on thesis chapters.

Corequisite: PUBHLTH 199

Prerequisite: PUBHLTH H192B

Restriction: Public Health Policy Majors only. Public Health Sciences Majors only.

**PUBHLTH 193. Ethics and Responsible Conduct of Research in Public Health. 4 Units.**

Issues of scientific integrity and satisfies the requirements for training in public health ethics. Includes guidelines for responsible conduct of research, federal and international codes, administrative review and approval, conflict of interest, and privacy and safety of research participants. Course may be offered online.

Restriction: Upper-division students only. Public Health Sciences Majors only. Public Health Policy Majors only.

**PUBHLTH 194A. Clinical and Translational Research Preparatory I. 4 Units.**

Provides training for students with an interest in clinical and translational research in the health care setting. Cultivates skills for study design, research literature review, ethics, responsible conduct of research, and cultural competence while emphasizing professionalism and personal responsibility.

Prerequisite: BIO SCI 99 and BIO SCI 194S and CHEM 1C and CHEM 1LC and CHEM 1LD. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only.

**PUBHLTH 194B. Clinical and Translational Research Preparatory II. 1-4 Units.**

Provides opportunities for students to participate in clinical and translational research through rotations in at least two health care settings. Builds on preparation through the first course (194A) in the sequence to support exploration of various research topics.

Prerequisite: PUBHLTH 194A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only.

**PUBHLTH 194C. Clinical and Translational Research Preparatory III. 4 Units.**

Provides opportunities for students to work closely in a particular clinical and translational research setting. Builds on preparation through the didactic instruction presented in first course of the sequence (194A) to support deeper engagement on a particular research topic.

Prerequisite: PUBHLTH 194B. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**PUBHLTH 194D. Clinical and Translational Research Preparatory IV. 4 Units.**

Provides opportunities for students to participate in clinical and translational research through placement in a research laboratory. This course is a continuation of 194C in which students have the opportunity to participate in a permanent research rotation.

Prerequisite: PUBHLTH 194C

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**PUBHLTH 195W. Public Health Practicum and Culminating Experience. 8 Units.**

Provides direct opportunities for Public Health majors to observe and participate in public health activities and/or research; and to cultivate skills for verbal and written communication of contemporary public health topics for an integrative culminating experience.

Prerequisite: PUBHLTH 1 and PUBHLTH 2. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Public Health Sciences Majors only. Public Health Policy Majors only.

(lb)

**PUBHLTH 196A. Clinical and Translational Research Preparatory I - Community-Based Research and Evaluation. 4 Units.**

Provides training for students with an interest in clinical and translational research in a community-based setting. Cultivates skills for study design, research literature review, ethics, responsible conduct of research, and cultural competence while emphasizing professionalism and personal responsibility.

Overlaps with PUBHLTH 194A.

**PUBHLTH 196B. Clinical and Translational Research Preparatory II - Community-Based Research and Evaluation. 4 Units.**

Provides the unique opportunity for students to participate in research in two or more community-based settings. Builds on preparation through PUBHLTH 196A to support exploration of various research topics.

Prerequisite: PUBHLTH 196A

**PUBHLTH 196C. Clinical and Translational Research Preparatory III - Community-Based Research and Evaluation III. 4 Units.**

Final course in the 196 series where students have the unique opportunity to participate in permanent research rotation. Instructs students how to design, perform, interpret, and discuss independent research in a collaborative atmosphere.

Prerequisite: PUBHLTH 196B

**PUBHLTH 197. Field Studies in Public Health. 2-12 Units.**

For students who may either accompany faculty members on field trips or engage in post-practicum work at a field agency.

Prerequisite: PUBHLTH 1 and PUBHLTH 2

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 12 units.

**PUBHLTH 198. Directed Studies. 1-4 Units.**

Student participation in a series of research-related activities performed in an individual or small-group setting under the guidance of a faculty advisor.

Prerequisite: PUBHLTH 1

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**PUBHLTH 199. Undergraduate Research. 1-4 Units.**

Original research with Public Health faculty. Attendance at regular research group meetings is also generally expected, and a quarterly written report is required. Strongly recommended for students considering research careers and/or graduate degree programs.

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**PUBHLTH 200. Foundations of Public Health. 4 Units.**

Presents the overarching framework, principles, and core responsibilities of public health research and practice from a multidisciplinary perspective. Provides necessary foundation for further studies toward advanced cross-cutting approaches essential for public health practice.

Restriction: College of Health Sciences students only. Program in Public Health students only. Master of Public Health Degree students only. Graduate students only. Public Health Majors only.

**PUBHLTH 204. Biostatistics I: Introduction to Statistical Methods. 4 Units.**

Designed to help students develop an appreciation for statistician's view of the research process, emphasizing biomedical research. Instills an understanding of how statistical models are used to yield insights about data that form evidence-based understanding of the world around us.

Same as EPIDEM 204A.

Restriction: Graduate students only.

**PUBHLTH 204B. Biostatistics II: Intermediate Statistical Methods. 4 Units.**

Intended for graduate students in epidemiology, public health, and clinical research fields. Covers common regression-modeling techniques frequently used in biologic and medical applications.

Prerequisite: EPIDEM 204. EPIDEM 204 with a grade of B or better

Repeatability: May be taken for credit 2 times.

Same as EPIDEM 204B.

Restriction: Graduate students only.

**PUBHLTH 204C. Biostatistics III: Advanced Statistical Methods. 4 Units.**

Intended for graduate students in epidemiology, public health, and related fields. Introduces statistical methods for analyzing survival and longitudinal/clustered data, and techniques to resolve missing data.

Prerequisite: EPIDEM 204B. EPIDEM 204B with a grade of B or better

Repeatability: May be taken for credit 2 times.

Same as EPIDEM 204C.

Restriction: Graduate students only.

**PUBHLTH 206A. Principles of Epidemiology. 4 Units.**

Fundamental principles of epidemiology, biostatistics, and epidemiological research. Topics include research methods of measuring health problems in populations, disease control and prevention in populations, how epidemiology contributes to knowledge of disease etiology, and biostatistical analysis and interpretation of epidemiologic data.

Same as EPIDEM 200A.

Restriction: Graduate students only.

**PUBHLTH 206B. Intermediate Epidemiology. 4 Units.**

Learn to design and conduct epidemiologic studies using common designs. Determine why bias and measurement error arise in observational studies, and how they influence effect estimates. Perform and interpret epidemiologic data analyses using statistical software.

Prerequisite: PUBHLTH 206A. PUBHLTH 206A with a grade of B or better

Same as EPIDEM 200B.

Restriction: College of Health Sciences students only. Program in Public Health students only. Master of Public Health Degree students only. Graduate students only. Epidemiology Majors only.

**PUBHLTH 206C. Advanced Epidemiologic Methods. 4 Units.**

Advanced topics in the design and statistical analysis of epidemiologic studies. Topics include simulation methods, counter-matching and multiphase study designs, missing data, and Bayesian analysis. Published simulation studies are discussed and replicated using the R software package.

Prerequisite: EPIDEM 200A and EPIDEM 200B. EPIDEM 200A with a grade of B or better. EPIDEM 200B with a grade of B or better

Same as EPIDEM 200C.

**PUBHLTH 207A. Probability and Statistics in Public Health. 4 Units.**

An introduction to probability and statistical methods, using examples in public health. Topics include descriptive statistics, laws of probability, discrete and continuous probability distributions, estimation, confidence intervals, hypothesis testing, and power calculations for one- and two-sample comparisons.

Prerequisite: PUBHLTH 206A. PUBHLTH 206A with a grade of B or better

Restriction: Program in Public Health students only. Master of Public Health Degree students only. Graduate students only. Public Health Majors only.

**PUBHLTH 207B. Analysis of Public Health Data Using Statistical Software. 4 Units.**

Overview of common statistical methods in public health and how to implement them in R. Topics include linear regression, ANOVA, the Kruskal-Wallis test, logistic regression, missing data and censoring, Kaplan-Meier survival curves, log-rank tests, and Cox regression.

Prerequisite: PUBHLTH 207A. PUBHLTH 207A with a grade of B or better

Restriction: Program in Public Health students only. Master of Public Health Degree students only. Graduate students only. Public Health Majors only.

**PUBHLTH 208. Advances in Social Epidemiology. 4 Units.**

Advances understanding of social distribution and social determinants of disease through multiple risk factor models and mechanisms that emphasize developmental and socio-environmental risk factors on mental and physical health across the life span.

Restriction: Graduate students only.

**PUBHLTH 209. Methods of Demographic Analysis. 4 Units.**

Introduces basic demographic methods used in social science and public health research. Topics include sources and limitations of demographic data; components of population growth; measures of nuptiality, fertility, mortality, and population mobility projection methods; and demographic models.

Same as SOCIOL 226A.

Restriction: Graduate students only.

**PUBHLTH 210. Theory-Driven Secondary Data Analysis. 4 Units.**

Learn how to develop and test theoretically-driven research questions in secondary data sources. Logic of theory building and testing, how to conduct statistical analyses on testable research questions, and interpret results. There is also a lab component.

Restriction: Graduate students only. Environmental Health Sciences Majors only. Epidemiology Majors only. Public Health Majors only.

**PUBHLTH 211A. Latinos/Latinas and Medical Care: Contemporary Issues. 2 Units.**

Introduction to medical anthropological and social science perspectives on Latinos/Latinas in relation to a number of health and medically-related issues, i.e., immigration, gender, reproduction, culture, social structure, political economy, sexuality, utilization of medical services, and health beliefs.

Same as CHC/LAT 211A.

**PUBHLTH 211B. Latinos/Latinas and Medical Care: Contemporary Issues. 2 Units.**

Introduction to medical anthropological and social science perspectives on Latinos/Latinas in relation to a number of health and medically-related issues, i.e., immigration, gender, reproduction, culture, social structure, political economy, sexuality, utilization of medical services, and health beliefs.

Prerequisite: CHC/LAT 211A

Same as CHC/LAT 211B.

**PUBHLTH 213. Epidemiology in Global Health. 4 Units.**

Examines major topics in epidemiology and global health. Research topics within these two disciplines are focused on resource-poor communities, with an application to the global world.

Restriction: Graduate students only. Environmental Health Sciences Majors only. Epidemiology Majors only. Public Health Majors only.

**PUBHLTH 214. Surveillance Systems. 4 Units.**

Surveillance as a fundamental element of the practice of public health is examined in terms of the application and evaluation of monitoring systems. Topics include surveillance of infectious and chronic diseases, environmental constituents, and other indicators of population health.

Prerequisite: PUBH 206

Restriction: Graduate students only.

**PUBHLTH 219. Special Topics in Biostatistics, Epidemiology, and Health Informatics. 4 Units.**

Current research in biostatistics, epidemiology, and health informatics. Topics vary from quarter to quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PUBHLTH 222. Health Policy and Management. 4 Units.**

Multidisciplinary inquiry into theory and practice concerned with delivery, quantity, costs of health care for individuals and populations. Explores managerial and policy concerns regarding structure, process, outcomes of health services including the costs, financing, organization, outcomes, and accessibility of care.

Same as UPPP 243.

Restriction: Master of Public Health Degree students have first consideration for enrollment. Master of Public Policy Degree students have first consideration for enrollment. Graduate students only. Public Health Majors have first consideration for enrollment. Urban and Regional Planning Majors have first consideration for enrollment.

**PUBHLTH 223. Risk Communication. 4 Units.**

Examines theory and research related to the communication of scientific information in risk communication contexts, risk perceptions, and behavior as related to decision-making under risk.

Restriction: Graduate students only.

**PUBHLTH 239. Special Topics in Health Policy and Management. 4 Units.**

Current research in health policy and management. Topics vary from quarter to quarter.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PUBHLTH 241. Environmental Policy and Global Sustainability. 4 Units.**

Organized around four transcendent questions: does the world value sustainability, what challenges must be met to move toward it, what are the roots of inequality, and is capitalism compatible with sustainability.

Restriction: Graduate students only.

**PUBHLTH 242. Theories of Health Communication. 4 Units.**

Explores the concepts, constructs, and theories of communication in health and risk contexts. Examines interpersonal, family, organizational, and mediated communicative processes about health care and conditions from a global perspective.

Restriction: Graduate students only.

**PUBHLTH 244. Health Behavior Theory. 4 Units.**

Introduces the field of Health Behavior and segues into major theoretical perspectives. Focus on health behavior change from the vantage point of individual health behavior and theoretical abstraction. Explores how to relate theory to behavior-change intervention programs.

Restriction: Master of Public Health Degree students only. Graduate students only. Public Health Majors only.

**PUBHLTH 245. Health Promotion Planning. 4 Units.**

Introduces strategic planning integral to intervention planning in public health practice and research, emphasizing the fundamental domains of social and behavioral health science and practices. Students develop an intervention plan for a specific health problem, health behavior, and target population.

Restriction: Graduate students only.

**PUBHLTH 246. Social Research Methods. 4 Units.**

An interactive graduate seminar covering topics related to the research process and study design. Begins with conceptualizing research questions, hypotheses, and then turns to topics in measurement and concludes with experimental, quasi-experimental, and observational study designs.

Restriction: Graduate students only.

**PUBHLTH 247. Program Evaluation. 4 Units.**

Introduces methods, tools, and procedures for systematic investigation of the effectiveness of programs in health and social services for disease intervention, prevention, and health promotion. Includes development of program evaluation plans, logic models, contextual frameworks, study designs, and data analyses.

Restriction: Graduate students only.

**PUBHLTH 248. Fundamentals of Maternal and Child Health - Programs, Problems, and Policy. 4 Units.**

Overview of issues facing women, children, and families from a public health perspective. Discusses role of socio-economic, political, biological, environmental factors on population health. Studies historical foundations and current factors impacting Maternal Child Health programs and legislation in the US.

Restriction: Graduate students only.

**PUBHLTH 250. Health Status and Care Disparities. 4 Units.**

Expert health care providers present viewpoints and interdisciplinary strategies for addressing sociocultural, economic, gender, age, and other disparities in population health status and care provision.

Restriction: Graduate students only.

**PUBHLTH 251. Models of Practice and Intervention at the Community Level. 4 Units.**

Examines and critiques current models, frameworks, theories for.

Prerequisite: CHC/LAT 200A or PUBHLTH 246

Same as CHC/LAT 251.

Restriction: Graduate students only.

**PUBHLTH 259. Special Topics in Social and Behavioral Health Sciences. 4 Units.**

Current research in Social and Behavioral Health Sciences. Topics vary from quarter to quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PUBHLTH 260. Human Exposure Modeling. 4 Units.**

Explores the basic principles and methods in estimating human exposure to environmental pollutants. Topics include source emissions, spatial/temporal aspects of human exposures, air pollution exposure modeling, time-activity patterns, micro-environmental exposure assessment, the uncertainty/variability analysis.

Restriction: Graduate students only.

**PUBHLTH 264. Introduction to Environmental Health Science. 4 Units.**

Convergence of agents (chemical, physical, biological, or psychosocial) in environment can emerge as diseases influenced by social, political, and economic factors, allowing them to become rooted in society. How these agents from various spheres come together and impact human health.

Same as EPIDEM 264, EHS 264.

Restriction: Graduate students only. Environmental Health Sciences Majors only. Epidemiology Majors only. Public Health Majors only. Environ Health Sci and Policy Majors only.

**PUBHLTH 265. Advanced Environmental Health Science. 4 Units.**

Explores the complex relationships among exposure processes and adverse health effects of environmental toxins focusing on specific chemicals, sources, transport media, exposure pathways, and human behaviors. Techniques of environmental sampling for exposure assessment are discussed.

Same as EPIDEM 265.

Restriction: Graduate students only.

**PUBHLTH 269. Air Pollution, Climate, and Health. 4 Units.**

Emission of air pollutants into the atmosphere, physical and meteorological processes that affect transport, and influence on global warming. Concepts of how and where people are most exposed, and how exposures and health effects differ in developed and developing regions.

Same as EPIDEM 269, EHS 269.

**PUBHLTH 270. Human Exposure to Environmental Contaminants. 4 Units.**

Introduces founders of conceptual thought that environmental contaminants can impact health. Theory and principles of exposure assessment, the continuum from emissions of a contaminant into the environment to evidence of health effects in a population.

Same as EPIDEM 270, EHS 270.

**PUBHLTH 272. Occupational Health Psychology. 4 Units.**

Introduction to psychological and social factors in the workplace that affect health and productivity. Goal is to support redesign of the workplace and social situations that can reduce stress-related illness risks, and increase humane forms of productivity and competence development.

Same as EHS 294.

Restriction: Graduate students only.

**PUBHLTH 275. Environmental Modeling and Risk Management. 4 Units.**

Surveys the general principles, basic mathematical methods, and practices of environmental modeling and human health risk assessment. Topics include advection-dispersion models, risk management, and risk perception. Students conduct an original risk assessment as a final group project.

Prerequisite: MATH 2A and STATS 7

Same as EHS 275.

Restriction: Graduate students only.

Concurrent with PUBHLTH 175.

**PUBHLTH 277A. Target Organ Toxicology I. 4 Units.**

Mechanistic analysis of responses occurring in various organ systems of experimental animals and humans exposed to environmental and occupational chemicals and radiation. Review distinctive cellular and tissue structure and physiological function of the various organ systems.

Same as EHS 206A.

Restriction: Graduate students only.

**PUBHLTH 277B. Target Organ Toxicology II . 4 Units.**

Mechanistic analysis of responses occurring in various organ systems of experimental animals and humans exposed to environmental and occupational chemicals and radiation. Review of distinctive cellular and tissue structure and physiological function of the various organ systems.

Prerequisite: PUBHLTH 277A or EHS 206A

Same as EHS 206B.

Restriction: Graduate students only.

**PUBHLTH 278. Industrial Toxicology. 4 Units.**

Analysis of responsibilities toxicologists have in industry, including product safety, generating material safety, data sheets, animal testing, ecotoxicological testing, risk/hazard communication, and assisting industrial hygienists and occupational physicians; emphasis on interdisciplinary nature of industrial toxicology and communication skills.

Prerequisite: PUBHLTH 277B or EHS 206B

Same as EHS 220.

**PUBHLTH 279. Special Topics in Environmental & Occupational Health. 4 Units.**

Current research in environmental and occupational health. Topics vary from quarter to quarter.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PUBHLTH 280. Global Burden of Disease. 4 Units.**

Introduces composite measures of disease burden, including Disability Adjusted Life Years and their use in prioritizing disease burden at local, regional, and global levels. Focuses on WHO's landmark assessments and introduces DISMOD software for specific analyses.

Restriction: Graduate students only.

**PUBHLTH 281. Infectious Disease Epidemiology. 4 Units.**

Geographical distribution of infectious diseases and the health and disease risk in diverse human populations. Introduces basic methods for infectious disease epidemiology and case studies of important diseases. Includes surveillance, outbreak investigation, emerging pathogens, traditional and molecular epidemiology.

Restriction: Graduate students only.

**PUBHLTH 282. Climate Change and Global Health. 4 Units.**

Designed for students to examine major topics in climate change and global health. Draws heavily on the literature in order to develop an understanding of micro- and macro-level impacts and drivers with regard to climate change and health.

Restriction: Graduate students only. Environmental Health Sciences Majors only. Epidemiology Majors only. Public Health Majors only.

**PUBHLTH 283. Geographic Information Systems for Public Health. 4 Units.**

Provides a broad introduction to the use of Geographic Information Systems software to carry out projects for visualizing and analyzing spatial data to address significant issues of health care and policy-planning.

Prerequisite: PUBH 206

Restriction: Graduate students only.

Concurrent with PUBHLTH 190.

**PUBHLTH 286. Advanced Geographic Information Systems and Spatial Epidemiology. 4 Units.**

Students expand their current knowledge of the ArcGIS software to develop advanced geographic-related research questions, learn how to apply spatial epidemiologic methods to public health data, and integrate their skills in a GIS project of their design.

Prerequisite: PUBHLTH 283

Restriction: Graduate students only.

**PUBHLTH 287. Qualitative Research Methods in Public Health. 4 Units.**

General introduction to qualitative research methods for investigating public health questions at various scales from community level to global populations. Emphasizes systematic approaches to the collection, analysis, interpretation of qualitative data.

Restriction: Graduate students only.

**PUBHLTH 288. Research Proposal Writing in Global Health. 4 Units.**

Overview of financial support for research in global health and disease prevention. Collaborative agreements, guidelines for proposal writing, team building, budgeting, peer-review process, and transitioning from proposal to research project implementation.

Restriction: Graduate students only.

**PUBHLTH 289. Special Topics in Global Health and Disease Prevention. 4 Units.**

Current research in global health and disease prevention. Topics vary from quarter to quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PUBHLTH 290. Special Topics in Public Health. 4 Units.**

Studies in selected areas of public health. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PUBHLTH 291A. Seminar: Advances and Challenges in Public Health. 2 Units.**

Forum for exploring recent advances and challenges in all disciplines of public health research and practice. Features case studies exemplifying the integration of core competencies with cross-cutting interdisciplinary themes of public health.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

Concurrent with PUBHLTH 191A.

**PUBHLTH 291B. Seminar: Advances and Challenges in Public Health. 2 Units.**

Forum for exploring recent advances and challenges in all disciplines of public health research and practice. Features case studies exemplifying the integration of core competencies with cross-cutting interdisciplinary themes of public health.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

Concurrent with PUBHLTH 191B.

**PUBHLTH 291C. Seminar: Advances and Challenges in Public Health. 2 Units.**

Forum for exploring recent advances and challenges in all disciplines of public health research and practice. Features case studies exemplifying the integration of core competencies with cross-cutting interdisciplinary themes of public health.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

Concurrent with PUBHLTH 191C.

**PUBHLTH 292. Ethics and Responsible Conduct of Research in Public Health. 4 Units.**

Issues of scientific integrity and satisfies the requirements for training in public health ethics. Includes guidelines for responsible conduct of research, federal and international codes, administrative review and approval, conflict of interest, and privacy and safety of research participants.

Restriction: Graduate students only.

Concurrent with PUBHLTH 193.

**PUBHLTH 293. Foundations of Clinical and Translational Science. 4 Units.**

Introduces rationale and imperative for clinical translational science and various approaches being developed to speed-up discoveries and their transformation into health care practices. Compares and contrasts current impediments to clinical research with the potential and transformative power of translational science.

Restriction: Graduate students only.

**PUBHLTH 294. Research Communication in Public Health. 4 Units.**

Strategies for effective writing and oral presentation of research characteristics and results to various audiences. Includes exercises in writing for the public, for scholarly journals, and at conferences.

Restriction: Graduate students only.

**PUBHLTH 295. Graduate Practicum and Culminating Experience in Public Health. 8 Units.**

Provides opportunities for hands-on experience for graduate students at agencies or organizations engaged in public health practice. Students are matched with placement sites based on academic preparation and students' career goals. The practicum report is integrated into the culminating experience.

Prerequisite: PUBHLTH 200 and PUBHLTH 244 and PUBHLTH 222 and PUBHLTH 264 and PUBHLTH 207A. PUBHLTH 200 with a grade of B or better. PUBHLTH 244 with a grade of B or better. PUBHLTH 222 with a grade of B or better. PUBHLTH 264 with a grade of B or better. PUBHLTH 207A with a grade of B or better

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Public Health Majors only.

**PUBHLTH 296. Doctoral Dissertation Research and Writing. 1-12 Units.**

Dissertation research with Public Health faculty.

Prerequisite: Advancement to candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit for 12 units.

Restriction: Graduate students only. Public Health Majors only.

**PUBHLTH 297. Research Design and Proposal Writing. 4 Units.**

Evaluate strengths of research findings based on methods used by researchers to develop research proposals. Components such as collaborative agreements, guidelines for proposal writing, budgeting, peer-review process, and transitioning from proposal to research project implementation are addressed.

Restriction: College of Health Sciences students only. Program in Public Health students only. Master of Public Health Degree students only. Graduate students only. Public Health Majors only.

**PUBHLTH 298. Directed Studies in Public Health. 2-8 Units.**

Directed study with Public Health faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PUBHLTH 299. Independent Study in Public Health . 2-8 Units.**

Independent research with Public Health faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PUBHLTH 399. University Teaching. 2-4 Units.**

Limited to teaching assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## Department of Environmental and Occupational Health

**Veronica Viera, Department Chair**

<http://www.publichealth.uci.edu>

The Department of Environmental and Occupational Health focuses on integrative and transdisciplinary health research using the three pillars of science: basic, clinical, and population science. Research with particular emphases on assessing exposures to and health risks from environmental and occupational factors include, but are not limited to contaminants in ambient air, water, food, and soil; green space and the built environment; radiation; noise; temperature; work organization; and community and workplace stressors. The multidisciplinary expertise of the faculty, students, and staff provides the department with the capability to address complex local, regional, and global environmental problems and to provide training in four critical areas, as described below.

- Exposure science research addresses questions such as: What concentrations of toxicants exposure science, toxicology, risk assessment, epidemiology, urban health, climate change, natural disasters, environmental health disparity, and related disciplines, are present in air, water, food, and soil, and what levels are present for other exposure sources such as noise and radiation? What sub-populations, activities, and circumstances are associated with exposures that can adversely impact health, or with exposures that can improve health? What are the relationships between exposure to one or multiple environmental agents (e.g., chemical toxicants, physical agents, biological agents), resulting organ and tissue concentrations, and the biologically-relevant dose a person receives?
- Toxicological research investigates molecular, cellular, and physiological endpoints, to reveal how exposures to toxic pollutants and other environmental factors affect the body, and investigates biological mechanisms for the development and exacerbation of diseases that might have an environmental etiology.
- Epidemiologic studies elucidate the connections between environmental and occupational exposures and resulting health outcomes, including disease and death among susceptible populations, sub-clinical health conditions, and health-related behaviors such as physical activity.
- Risk analyses integrate toxicological and epidemiologic findings to manage risks and contribute to sound environmental and occupational health policies that improve population health.

The Department offers an M.S. and Ph.D. in Environmental Health Sciences. The Ph.D. offers two tracks: Environmental Toxicology, and Exposure Sciences and Environmental Epidemiology. Faculty contribute directly to the M.P.H. emphasis in environmental health and the B.S. in Public Health Sciences.

- Environmental Health Sciences, M.S.
- Environmental Health Sciences, Ph.D.

## Environmental Health Sciences, M.S.

**Jun Wu, Graduate Program Director and Departmental Graduate Advisor**

100 Theory Drive, Suite 100, Irvine, CA 92617

<http://www.publichealthuci.edu>

The Department of Environmental and Occupational Health provides graduate training in environmental health sciences and offers the M.S. in Environmental Health Sciences. The program in Environmental Health Sciences provides students with the knowledge and skills necessary and appropriate to teach and/or conduct basic and applied research programs in inhalation/pulmonary toxicology, neurotoxicology, reproductive and

developmental toxicology, chemical pathology, toxicokinetics, radiation toxicology, exposure sciences, environmental epidemiology, and risk assessment.

Environmental Toxicology involves the scientific study of the entry, distribution, biotransformation, and mechanism of the action of chemical and physical agents that are harmful to the body. The graduate program interprets environmental toxicology as the study of the effects and mechanisms of action of hazardous chemical and physical agents in food, air, water, and soil in the home, the workplace, and the community. It considers experimentally and theoretically such diverse research problems as:

- new scientific approaches to toxicological evaluation of environmental chemicals (e.g. air and water pollutants, food additives, industrial wastes, and agricultural adjuvants) and physical agents (e.g. radiation) at the molecular, cellular, and organism levels
- mechanisms of action in the toxicity of chemical and physical environmental agents
- the molecular pathology of tissue injury in acute and chronic toxicity

Exposure Sciences involves the study of human exposures to chemical environmental contaminants in different media such as air, water, food, and soil and via multiple routes including inhalation, ingestion, and dermal absorption, as well as exposures to physical environmental agents such as radiation, temperature, noise, and other built environment factors. Environmental Epidemiology examines the effects of exposure to environmental agents and other factors on health outcomes. Research in the Exposure Sciences and Environmental Epidemiology Track includes:

- new approaches to the evaluation of human exposures to environmental chemicals, including exposure measurement, modeling, and biomonitoring
- assessing individual level exposures to chemical and physical environmental agents and examining associations of these exposures with health and disease outcomes
- exposure to chemical, physical, and psychosocial work environment hazards and health outcomes
- environmental health disparity issues

Students entering the program have varied backgrounds, including chemistry, biology, and physiology. The curriculum is based on a foundation of basic and health sciences with applications of scientific principles to environmental exposures and their potential health effects. Formal course work is enriched by a strong commitment to student-professor interaction throughout the program. An important and integral part of the learning process is an early and intensive involvement of the student in ongoing original research projects in environmental health sciences, especially inhalation/pulmonary toxicology, reproductive and developmental toxicology, biochemical toxicology, chemical pathology, neurotoxicology, exposure sciences, environmental epidemiology, and risk assessment.

In addition to meeting the general admission requirements set by the Graduate Division, applicants must be admitted by an Admissions Committee composed of faculty members of the graduate program. Candidates will be selected on the basis of a balanced evaluation of the following criteria, with no one factor having more influence (1) prior scholastic performance, including a consideration of grades, course load, nature of courses taken, and college attended; (2) recommendations by professors and others; (3) scores for the general Graduate Record Examination test (GRE); (4) an interview by members of the Admissions Committee and other faculty members, when feasible; and (5) experience in undergraduate and/or post-baccalaureate research.

Undergraduate preparation of applicants should include one year of biology (one quarter of molecular biology or biochemistry is strongly recommended) one year of mathematics (calculus and/or statistics), and one year of chemistry. Outstanding applicants who lack one or two of these prerequisites may be given an opportunity to take the required course(s) either before admission or during the first year in the graduate program; in such circumstances, none of these required undergraduate courses may be used to satisfy the program elective or core course requirements. Upper-division or graduate science courses may be considered as substitutes for the above prerequisites by the Admissions Committee.

## Master of Science in Environmental Health Sciences

All courses must be passed with an average grade of B or better.

A. Complete the following:

PUBHLTH 206A	Principles of Epidemiology
or EPIDEM 200A	Principles of Epidemiology
EPIDEM 204A	Biostatistics I: Introduction to Statistical Methods
or PUBHLTH 207A	Probability and Statistics in Public Health

B. Select two of the following:

EHS 202	Principles of Environmental Toxicology
EHS 206A	Target Organ Toxicology I
EHS 206B	Target Organ Toxicology II

C. Complete the following:

EHS 264	Introduction to Environmental Health Science
EHS 298	Seminar in Environmental Health Sciences <sup>1</sup>
EHS 299	Research Problems <sup>2</sup>

## EHS 290

Independent Study in Environmental Toxicology<sup>3</sup>

Eight units from the approved elective pool.

D. Complete one of the following plans:

Plan I:

Under the direction of a faculty advisor, prepare a thesis that is acceptable to the thesis committee

Plan II:

1. Under the supervision of a faculty member, prepare a scholarly paper based on individual study in an area of toxicology
2. Pass the written comprehensive examination.

- <sup>1</sup> All graduate students in the program will be required to take EHS 298 every academic quarter they are enrolled in the graduate program.
- <sup>2</sup> Applies to Plan I.
- <sup>3</sup> Applies to Plan II.

Opportunities for individual training and independent research experience exist in inhalation and pulmonary toxicology, atmospheric chemistry and aerosol science, neurochemistry and neurotoxicology, reproductive and developmental toxicology, toxicology of naturally occurring compounds, exposure modeling, risk assessment, chemical pathology, environmental microbiology, and environmental chemistry. Research grants and contracts are available to support qualified doctoral students as research assistants.

## Environmental Health Sciences, Ph.D.

**Jun Wu, Graduate Program Director and Departmental Graduate Advisor**

100 Theory Drive, Suite 100, Irvine, CA 92617

<http://www.publichealthuci.edu>

The Department of Environmental and Occupational Health provides graduate training in environmental health sciences and offers the Ph.D. in Environmental Health Sciences. The Ph.D. program offers tracks in Environmental Toxicology and in Exposure Sciences and Environmental Epidemiology. The program in Environmental Health Sciences provides students with the knowledge and skills necessary and appropriate to teach and/or conduct basic and applied research programs in inhalation/pulmonary toxicology, neurotoxicology, reproductive and developmental toxicology, chemical pathology, toxicokinetics, radiation toxicology, exposure sciences, environmental epidemiology, and risk assessment.

Environmental Toxicology involves the scientific study of the entry, distribution, biotransformation, and mechanism of the action of chemical and physical agents that are harmful to the body. The graduate program interprets environmental toxicology as the study of the effects and mechanisms of action of hazardous chemical and physical agents in food, air, water, and soil in the home, the workplace, and the community. It considers experimentally and theoretically such diverse research problems as:

- new scientific approaches to toxicological evaluation of environmental chemicals (e.g. air and water pollutants, food additives, industrial wastes, and agricultural adjuvants) and physical agents (e.g. radiation) at the molecular, cellular, and organism levels
- mechanisms of action in the toxicity of chemical and physical environmental agents
- the molecular pathology of tissue injury in acute and chronic toxicity

Exposure Sciences involves the study of human exposures to chemical environmental contaminants in different media such as air, water, food, and soil and via multiple routes including inhalation, ingestion, and dermal absorption, as well as exposures to physical environmental agents such as radiation, temperature, noise, and other built environment factors. Environmental Epidemiology examines the effects of exposure to environmental agents and other factors on health outcomes. Research in the Exposure Sciences and Environmental Epidemiology Track includes:

- new approaches to the evaluation of human exposures to environmental chemicals, including exposure measurement, modeling, and biomonitoring
- assessing individual level exposures to chemical and physical environmental agents and examining associations of these exposures with health and disease outcomes
- exposure to chemical, physical, and psychosocial work environment hazards and health outcomes
- environmental health disparity issues

Students entering the program have varied backgrounds, including chemistry, biology, and physiology. The curriculum is based on a foundation of basic and health sciences with applications of scientific principles to environmental exposures and their potential health effects. Formal course work is enriched by a strong commitment to student-professor interaction throughout the program. An important and integral part of the learning process is an early and intensive involvement of the student in ongoing original research projects in environmental health sciences, especially inhalation/pulmonary toxicology, reproductive and developmental toxicology, biochemical toxicology, chemical pathology, neurotoxicology, exposure sciences, environmental epidemiology, and risk assessment.

In addition to meeting the general admission requirements set by the Graduate Division, applicants must be admitted by an Admissions Committee composed of faculty members of the graduate program. Candidates will be selected on the basis of a balanced evaluation of the following criteria, with no one factor having more influence (1) prior scholastic performance, including a consideration of grades, course load, nature of courses taken, and

college attended; (2) recommendations by professors and others; (3) scores for the general Graduate Record Examination test (GRE); (4) an interview by members of the Admissions Committee and other faculty members, when feasible; and (5) experience in undergraduate and/or post-baccalaureate research.

Undergraduate preparation of applicants should include one year of biology (one quarter of molecular biology or biochemistry is strongly recommended) one year of mathematics (calculus and/or statistics), and one year of chemistry. Upper-division or graduate science courses may be considered as substitutes for the above prerequisites by the Admissions Committee.

## Doctor of Philosophy in Environmental Health Sciences

All courses must be passed with an average grade of B or better.

### Program-wide Core Curriculum

A. Select one of the following:

PUBHLTH 206A	Principles of Epidemiology
or EPIDEM 200A	Principles of Epidemiology

B. Select two of the following:

EHS 202	Principles of Environmental Toxicology
EHS 206A	Target Organ Toxicology I
EHS 206B	Target Organ Toxicology II

C. Complete the following:

EHS 264	Introduction to Environmental Health Science
EHS 298	Seminar in Environmental Health Sciences <sup>1</sup>
EHS 299	Research Problems <sup>2</sup>

### Select one track and complete track-specific requirements:

1. Environmental Toxicology Track

D. Select one of the following:

PUBHLTH 207A	Probability and Statistics in Public Health
or EPIDEM 204A	Biostatistics I: Introduction to Statistical Methods

E. Select one of the following (the one not taken to fulfill program-wide core course requirement):

EHS 202	Principles of Environmental Toxicology
EHS 206A	Target Organ Toxicology I
EHS 206B	Target Organ Toxicology II

F. Complete:

EHS 201	Case Studies in Environmental Toxicology
---------	--

G. Complete 16 units from the approved elective pool.

2. Exposure Sciences and Environmental Epidemiology Track:

H. Complete:

PUBHLTH 283	Geographic Information Systems for Public Health
PUBHLTH 207A- 207B	Probability and Statistics in Public Health and Analysis of Public Health Data Using Statistical Software
EPIDEM 205	Environmental Epidemiology

I. Select one of the following:

PUBHLTH 279	Special Topics in Environmental & Occupational Health (Human Exposure Modeling, course # pending)
EHS 275	Environmental Modeling and Risk Management

J. Complete 8 units from the approved elective pool.

### Approved elective pool for both tracks: <sup>3</sup>

EHS 203	Psychosocial Occupational Epidemiology
EHS 204	Neurotoxicology
EHS 212	Inhalation Toxicology
EHS 220	Industrial Toxicology
EHS 269	Air Pollution, Climate, and Health
EHS 270	Human Exposure to Environmental Contaminants

EHS 294	Occupational Health Psychology
EPIDEM 244	Toxic Chemicals in Environment
ANATOMY 203A	Human Microscopic Anatomy
ANATOMY 203B	Human Microscopic Anatomy
DEV BIO 231B	Cell Biology
MOL BIO 203	Nucleic Acid Structure and Function
MOL BIO 204	Protein Structure and Function
PHYSIO 206A	Introduction to Medical Physiology
PHYSIO 206B	Introduction to Medical Physiology
PUBHLTH 265	Advanced Environmental Health Science

K. Fulfill the following:

Comprehensive Exam

Qualifying Exam

Teaching Requirement

Research Dissertation

- 1 All graduate students in the program will be required to take EHS 298 every academic quarter they are enrolled in the graduate program.
- 2 Enroll during research rotations and dissertation research.
- 3 Track-specific core courses for one track may be taken as electives for other track.

The normative time for advancement to candidacy is three years. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

## Department of Epidemiology and Biostatistics

**Karen L. Edwards, Department Chair**

Anteater Instruction & Research Building, 3080-3090

949-824-0306

<https://www.publichealth.uci.edu> ([http://publichealth.uci.edu/ph/\\_home/](http://publichealth.uci.edu/ph/_home/))

[EpiGrad@uci.edu](mailto:EpiGrad@uci.edu) (%20EpiGrad@uci.edu)

Epidemiology is a quantitative, data-driven discipline that uses rigorous methods to collect, analyze, and interpret health-related data in human populations. Epidemiologists study the frequency, distribution, and determinants of disease in human populations and use this information to develop disease prevention strategies and improve population health. The faculty in the Department of Epidemiology and Biostatistics, Program in Public Health, at the University of California, Irvine has expertise in epidemiologic design and methods, biostatistics, and bioinformatics. Research in the Department largely focuses on, but is not limited to the interplay of genetic, other molecular, environmental, and nutritional factors on human health and disease, with an emphasis on diseases such as aging, cardiovascular disease, cancers, dementia, diabetes, liver and blood diseases, and obesity. Our active research programs provide our students with many outstanding opportunities to participate actively in cutting-edge research. See the Department website (<https://www.publichealth.uci.edu>) for specifics on the latest projects.

The Department provides rigorous training in the fundamentals and practice of epidemiology and biostatistics, and offers programs of study leading to the M.S. or Ph.D. in Epidemiology. Departmental faculty also provide guidance on curricular and programmatic activities for the M.P.H. in Epidemiology, the M.P.H. in Biostatistics and the B.S. in Public Health Sciences. The Department does offer undergraduate courses. In addition, undergraduates who would like additional experience in epidemiology and biostatistics may arrange to take directed-studies courses with Departmental faculty (EPIDEM 199). These undergraduate courses are primarily designed for upper-division undergraduates irrespective of their major. Diversity and inclusion are core values of the Department and reflects our mission to improve population health through research, education, community engagement and translation of discoveries to practice.

- Epidemiology, M.S.
- Epidemiology, Ph.D.

## Courses

### **EPIDEM 199. Undergraduate Research in Epidemiology. 2-4 Units.**

Provides disciplinary research participation. Original or existing research options provide undergraduates the opportunity for faculty/mentor interactions including access to appropriate facilities. Medical Epidemiology research areas: Cancer, Genetic/Molecular, Environmental, Occupational, Biostatistics, and Infectious Disease.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only.

### **EPIDEM 200A. Principles of Epidemiology. 4 Units.**

Fundamental principles of epidemiology, biostatistics, and epidemiological research. Topics include research methods of measuring health problems in populations, disease control and prevention in populations, how epidemiology contributes to knowledge of disease etiology, and biostatistical analysis and interpretation of epidemiologic data.

Same as PUBHLTH 206A.

Restriction: Graduate students only.

### **EPIDEM 200B. Intermediate Epidemiology. 4 Units.**

Learn to design and conduct epidemiologic studies using common designs. Determine why bias and measurement error arise in observational studies, and how they influence effect estimates. Perform and interpret epidemiologic data analyses using statistical software.

Prerequisite: PUBHLTH 206A. PUBHLTH 206A with a grade of B or better

Same as PUBHLTH 206B.

Restriction: College of Health Sciences students only. Program in Public Health students only. Master of Public Health Degree students only. Graduate students only. Epidemiology Majors only.

### **EPIDEM 200C. Advanced Epidemiologic Methods. 4 Units.**

Advanced topics in the design and statistical analysis of epidemiologic studies. Topics include simulation methods, counter-matching and multiphase study designs, missing data, and Bayesian analysis. Published simulation studies are discussed and replicated using the R software package.

Prerequisite: EPIDEM 200A and EPIDEM 200B. EPIDEM 200A with a grade of B or better. EPIDEM 200B with a grade of B or better

Same as PUBHLTH 206C.

### **EPIDEM 201. Cancer Epidemiology. 4 Units.**

Concentrates on understanding how epidemiology plays a role in the search for cancer etiology, prevention, control, and treatment; gives an overview of cancer research with an appreciation of the multidisciplinary nature of the field.

Prerequisite: EPIDEM 203 or PUBHLTH 203 or PUBH 206

Restriction: Graduate students only.

### **EPIDEM 202. Genetic Epidemiology. 4 Units.**

Concentrates on the role of genetic factors in the etiology of disease in human populations with an objective of disease control and prevention and the role of interactions of genetic factors and environmental exposures in the occurrence of disease.

Prerequisite: PUBHLTH 203 or EPIDEM 203 or PUBH 206

Restriction: Graduate students only.

### **EPIDEM 204A. Biostatistics I: Introduction to Statistical Methods. 4 Units.**

Designed to help students develop an appreciation for statistician's view of the research process, emphasizing biomedical research. Instills an understanding of how statistical models are used to yield insights about data that form evidence-based understanding of the world around us.

Same as PUBHLTH 204.

Restriction: Graduate students only.

**EPIDEM 204B. Biostatistics II: Intermediate Statistical Methods. 4 Units.**

Intended for graduate students in epidemiology, public health, and clinical research fields. Covers common regression-modeling techniques frequently used in biologic and medical applications.

Prerequisite: EPIDEM 204. EPIDEM 204 with a grade of B or better

Repeatability: May be taken for credit 2 times.

Same as PUBHLTH 204B.

Restriction: Graduate students only.

**EPIDEM 204C. Biostatistics III: Advanced Statistical Methods. 4 Units.**

Intended for graduate students in epidemiology, public health, and related fields. Introduces statistical methods for analyzing survival and longitudinal/clustered data, and techniques to resolve missing data.

Prerequisite: EPIDEM 204B. EPIDEM 204B with a grade of B or better

Repeatability: May be taken for credit 2 times.

Same as PUBHLTH 204C.

Restriction: Graduate students only.

**EPIDEM 205. Environmental Epidemiology. 4 Units.**

Concentrates on epidemiological approaches to the assessment of community environmental hazards; issues involved in environmental exposure estimation; interdisciplinary approaches to environmental epidemiology, including the use of biomarkers of exposures and susceptibility; epidemiological studies within the context of risk assessment.

Prerequisite: EPIDEM 200 and EPIDEM 204

Restriction: Graduate students only.

**EPIDEM 212. Methods for Design and Implementation of Epidemiologic Research. 2 Units.**

Intended for students in epidemiology, public health, and related fields, and covers topics in subject recruitment, data collection, quality assessment and control, and sample-size estimation.

Corequisite: PUBHLTH 206B

Prerequisite: EPIDEM 200A and EPIDEM 204A. EPIDEM 200A with a grade of B or better. EPIDEM 204A with a grade of B or better

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**EPIDEM 215. Introduction to Statistical Genetics. 4 Units.**

Provides students with knowledge of the basic principles, concepts, and methods used in statistical genetic research. Topics include principles of population genetics, and statistical methods for family- and population-based studies.

Prerequisite: Two quarters of upper-division or graduate training in statistical methods.

Same as STATS 257.

**EPIDEM 232. Chronic Disease Epidemiology & Prevention. 4 Units.**

Epidemiological aspects of chronic human diseases. Topics include methodologies for quantifying aspects of prevalent chronic diseases including risk factors, identification of susceptible groups, societal burdens, promising future research; and the intervention, prevention, and control of diseases in populations.

Restriction: Graduate students only.

**EPIDEM 244. Toxic Chemicals in Environment. 4 Units.**

Industrial ecology of toxicants and their impacts on environmental quality and human health. Explores theoretical basis of toxicity thresholds and regulatory issues. Uses classic and contemporary research articles to understand the legacy of traditional toxicants, and to identify emerging threats.

Restriction: Graduate students only.

**EPIDEM 264. Introduction to Environmental Health Science. 4 Units.**

Convergence of agents (chemical, physical, biological, or psychosocial) in environment can emerge as diseases influenced by social, political, and economic factors, allowing them to become rooted in society. How these agents from various spheres come together and impact human health.

Same as EHS 264, PUBHLTH 264.

Restriction: Graduate students only. Environmental Health Sciences Majors only. Epidemiology Majors only. Public Health Majors only. Environ Health Sci and Policy Majors only.

**EPIDEM 265. Advanced Environmental Health Science. 4 Units.**

Explores the complex relationships among exposure processes and adverse health effects of environmental toxins focusing on specific chemicals, sources, transport media, exposure pathways, and human behaviors. Techniques of environmental sampling for exposure assessment are discussed.

Same as PUBHLTH 265.

Restriction: Graduate students only.

**EPIDEM 269. Air Pollution, Climate, and Health. 4 Units.**

Emission of air pollutants into the atmosphere, physical and meteorological processes that affect transport, and influence on global warming. Concepts of how and where people are most exposed, and how exposures and health effects differ in developed and developing regions.

Same as EHS 269, PUBHLTH 269.

**EPIDEM 270. Human Exposure to Environmental Contaminants. 4 Units.**

Introduces founders of conceptual thought that environmental contaminants can impact health. Theory and principles of exposure assessment, the continuum from emissions of a contaminant into the environment to evidence of health effects in a population.

Same as EHS 270, PUBHLTH 270.

**EPIDEM 275. Special Topics in Epidemiology. 1-4 Units.**

Presents various topics and latest research in the broad field of epidemiology.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EPIDEM 280. Epidemiology Research Journal Club. 1 Unit.**

Research journal club is a group discussion of recent publications in epidemiology and related fields. Students rotate as lead discussants, guided by faculty. All attendees are expected to be familiar with the papers at the start of class.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EPIDEM 282. Epidemiology Department Seminar. 1 Unit.**

A forum for the presentation of recent research to epidemiology students, faculty, and other interested parties. The atmosphere is informal, yet rigorous. Speakers range from graduate students through distinguished visitors from other institutions.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EPIDEM 290. Introduction to Biostatistics and Epidemiology for Medical Fellows. 4 Units.**

Prepares medical fellows and other physicians for rotations in research programs. Understanding of basic biostatistics and study design, and interdependencies between the two. Application of principles in evaluation of medical literature for guidance on patient care and public health policy.

Prerequisite: Medical degree.

**EPIDEM 296. M.S. Thesis Research and Writing. 1-12 Units.**

Individual research and study necessary for a graduate student to prepare and complete the thesis required for the Master of Science (M.S.) degree.

Prerequisite: Advancement to candidacy.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EPIDEM 297. PhD Degree Dissertation Research & Writing. 1-12 Units.**

Individual research and study necessary for a graduate student to prepare and complete the dissertation required for the Doctor of Philosophy (Ph.D.) degree.

Prerequisite: Advancement to candidacy.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EPIDEM 298. Directed Study in Epidemiology. 2-4 Units.**

Directed study with Epidemiology faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EPIDEM 299. Independent Study in Epidemiology. 2-8 Units.**

Independent research with Epidemiology faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EPIDEM 399. University Supervised Teaching. 2-4 Units.**

Limited to students with active Teaching Assistant (T.A.) appointments.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Epidemiology, M.S.

**Karen L. Edwards, Department Chair and Departmental Graduate Advisor**

Anteater Instruction & Research Building, 3080-3090

949-824-0306

<http://www.epi.uci.edu/>

EpiGrad@uci.edu

Epidemiology is the study of the frequency, distribution, and determinants of disease in human populations. The faculty in the Department of Epidemiology at UCI has expertise in epidemiologic design and methods, biostatistics, and bioinformatics. Research in the Department largely focuses on the interplay of genetic, other molecular, environmental, and nutritional factors on human health and disease, with an emphasis on diseases such as aging, cardiovascular disease, cancers, dementia, diabetes, liver and blood diseases, and obesity. Our strength in social epidemiology and community outreach is growing through the addition of new faculty with national reputations. Our active research programs provide our students with many outstanding opportunities to participate actively in cutting-edge research. See the Department website for specifics on the latest projects.

The Department offers programs of study leading to the M.S. or Ph.D. in Epidemiology. The Department does not offer an undergraduate degree, but undergraduates who would like some experience in epidemiology may arrange to take directed-studies courses with epidemiology faculty (EPIDEM 199). These courses are available to all upper-division undergraduates irrespective of their major. Several of our graduate-level courses are open to selected, upper-division undergraduate students.

### Master of Science in Epidemiology

The M.S. in Epidemiology is thesis-based, and students are expected to finish in two years. The first year is largely devoted to required course work and, with guidance from faculty, developing an area of interest within which the M.S. thesis research will be conducted. The second year is chiefly devoted to completing the Master's thesis. The final step is an oral presentation, open to the public, of the thesis research. The M.S. in Epidemiology is an academic degree, and graduates typically go on to further education or careers in research.

Applications to graduate study in the Department of Epidemiology at UCI are through the UCI Graduate Division website (<http://www.grad.uci.edu/>). For further questions, contact EpiGrad@uci.edu. In addition to the general requirements of the UCI Graduate Division, the Department of Epidemiology requires current, official GRE scores as part of the application.

These courses are available to all upper-division undergraduates irrespective of their major. Several of our graduate-level courses are open to selected, upper-division undergraduate students.

### Doctor of Philosophy in Epidemiology

The Ph.D. program is intended to train well-qualified students to be independent contributors to epidemiology or related fields. Students are expected to finish in four to six years, and maximum time permitted is seven years. The first year is largely devoted to required course work and developing research interests, with the guidance of the faculty. There is a comprehensive exam at the end of the first year, to ensure the first-year content has been mastered. In the second and third years, students are expected to participate in faculty research, including manuscript preparation and presentation of results in public forums. The Ph.D. student is strongly encouraged to apply for fellowships and grants, as well as assist with teaching. Toward the end of the third year, the student is expected to defend a thesis proposal to the faculty. The remaining time with the program is largely devoted to completing the thesis. The formal defense of the thesis is a public event. Graduates typically go on to post-doctoral positions, faculty positions, or positions in government or industry.

## Department of Health, Society, and Behavior

The Department of Health, Society, and Behavior (DHSB) is comprised of a multifaceted collective of faculty with diverse backgrounds and training. The thread which unifies the faculty in this department is that their research, teaching, and practice address the explication of complex pathways linking social contextual factors and health, with an emphasis on health equity research. Specifically, the DHSB will be composed of faculty with expertise in health disparities, health equity, social contextual risk factors and health, health behavior, community-based research, biobehavioral health, health communication, and the creation of multi-level interventions. The topical areas of emphasis in DHSB are central to and map directly onto the core discipline of public health in the area of the social and behavioral sciences. Research and teaching in this department integrate perspectives on health through the lens of the social sciences, utilizing major theoretical perspectives across disciplines in the social sciences order to understand the multiple levels of influence shaping health behavior, health status, and health-relevant interventions.

Faculty provide guidance on curricular and programmatic activities for the M.P.H. emphasis in Sociocultural Diversity and Health. Faculty also engage in providing guidance for the Ph.D. in Public Health, with its two concentrations: 1) Global Health and 2) Disease Prevention. Both concentrations are administered jointly by the Department of Health, Society, and Behavior, and the Department of Population Health and Disease Prevention. The concentration in Disease Prevention maps most directly onto the expertise and focus of the faculty in the DHSB.

# Department of Population Health and Disease Prevention

## Lisa Grant Ludwig, Department Chair

The mission of the Department of Population Health and Disease Prevention is to create, integrate, and translate population-based knowledge into preventive strategies to reduce the societal burden of human disease and disability through excellence in interdisciplinary research, education, and service. This is a forward-thinking mission that acknowledges and complements traditional discipline-based research and training in public health. It is a specific mission that is consistent with the "Framing the Future" exercise of the Association of Schools and Programs of Public Health, and increasingly recognized by eminent organizations such as the Institute of Medicine's Board on Population Health and Public Health Practice, and by agencies that fund public health research and education.

New sources of funding for research and education are firmly established, including the NIH's National Center for Advancing Translational Sciences, to support this multidisciplinary framework of population health sciences and public health. The societal challenges facing health care and the burden of diseases at the community, national, and international levels have increased the demand for experts capable of researching, developing, and implementing strategies to prevent disease and to improve population health. The Department hosts activities that bridge disciplinary perspectives, methods, and practices to nurture new leaders in public health through research and training on risk factors that render people vulnerable to diseases in their communities and the development of intervention approaches for preventing disease by separating risk factors from specific vulnerable populations.

- Public Health, Ph.D.

## Global Health, Minor

The minor in Global Health, through a concentrated portfolio of courses that provide a solid foundation in the environmental, biological, socio-cultural, and ethical domains of global health scholarship, allows students to develop interdisciplinary and alternative world perspectives on health. Upon completion of the minor, students will be able to identify and define the landscape and importance of prevalent global health issues, analyze and evaluate complex texts relating to global health through close reading, critical interpretation, assignments, class-presentations and discussions. The minor concludes with each student conducting independent research and communicating independent arguments about global health in research through a hands-on capstone project.

The minor in Global Health consists of eight courses (four of them being required, the remainder being chosen from a select list), and a capstone research project (PUBHLTH 198). No more than two courses (eight units) can overlap between a student's major and the global health minor. No more than eight units can be from Pass/No Pass course work (four pass/no pass units will automatically come from PUBHLTH 198/equivalent independent study). At least half of the courses used to meet these requirements must be upper-division courses.

### Requirements for the Minor

#### A. Complete:

PUBHLTH 1	Principles of Public Health
PUBHLTH 170	Introduction to Global Health
PUBHLTH 172	Climate Change and Disaster Management
PUBHLTH 174	Global Health Ethics

#### B. Select two courses from the following:

ANTHRO 30A	Global Issues in Anthropological Perspective
ANTHRO 41A	Global Cultures and Society
ANTHRO 134A	Medical Anthropology
ANTHRO 20A	People, Cultures, and Environmental Sustainability
ANTHRO 134G	HIV/AIDS in a Global Context
ANTHRO 134N	Disease, Health, and Inequality
INTL ST 11	Global Cultures and Society
INTL ST 115	Global Poverty and Inequality in the 21st Century
INTL ST 147CW	International Humanitarianism
INTL ST 163	Global Inequalities
PUBHLTH 100	Special Topics in Public Health
PUBHLTH 197	Field Studies in Public Health
PUBHLTH 189	Special Topics in Infectious Diseases
UPPP 115	Global Poverty and Inequality in the 21st Century

#### C. Select two courses from the following:

BIO SCI 9K	Global Change Biology
BIO SCI 9D	Diseases of the Twenty-First Century

BIO SCI 10	The Biology of Human Diseases
BIO SCI 12	Molecular Basis of Human Disease
BIO SCI E124	Infectious Disease Dynamics
BIO SCI M124A	Virology
BIO SCI M124B	Viral Pathogenesis and Immunity
BIO SCI M125	Molecular Biology of Cancer
BIO SCI M131	Innate Immunity, Infection, and Pathogenesis
BIO SCI N131	Human Neurodegenerative Diseases
BIO SCI M143	Human Parasitology
CHEM 12	Chemistry Around Us
PUBHLTH 90	Natural Disasters
PUBHLTH 161	Environmental Geology
PUBHLTH 163	Introduction to Environmental Health Science
PUBHLTH 173	Health and Global Environmental Change
PUBHLTH 180	Epidemiology of Infectious Disease

D. Capstone Project: <sup>1</sup>

PUBHLTH 198 Directed Studies (4 units)

or equivalent course offered if faculty is in another department

<sup>1</sup> By each student's junior year, they must identify and secure an independent study advisor for their capstone project. Students will work with this advisor for the duration of their project (1 unit of PUBHLTH 198 or equivalent independent study per quarter). The results from the capstone project will be presented at a symposium at the end of the graduating year.

## M.D./M.P.H. Dual Degree Program

The M.D./M.P.H. is a five-year program designed for medical students who wish to acquire competencies in public health and understand the broader determinants of health, including the environment, health promotion, preventive medicine, and health policy. Students in this program pursue a combined curriculum for an M.D. from the UC Irvine School of Medicine and an M.P.H. from the Program in Public Health.

In order to apply, students must be currently enrolled in the M.D. program. The MCAT, along with the completion of three years of medical school training in good standing, serves as a waiver for the GRE entrance examination usually required for application to the M.P.H. program. During their second or third year of medical school, interested students submit both the Application for Graduate Admission and the School of Public Health Application Service (SOPHAS) application in order to be considered for admission. Final acceptance to the program is granted by the Program in Public Health.

The total number of units required to graduate from each program separately are satisfied in the M.D./M.P.H. program. Enrollment in the M.D. program does not guarantee acceptance into the M.P.H. program.

M.P.H. coursework begins after the student's third year of medical school, and ends during their fourth year of medical school. Students begin the accelerated M.P.H. degree track, which includes three full-time quarters (18 units during the fall and winter quarters, and 16 units during the spring quarter), and one full-time or part-time quarter the following year's winter quarter where Graduate Practicum is taken.

Once all core competencies are complete, students take the M.P.H. comprehensive exam to advance to candidacy. Students incorporate their M.D. projects into their practicum requirement, which they present and write a report on during the spring quarter. Courses taken as part of a student's medical school training cannot apply towards a student's M.P.H. degree.

The only emphases allowed in an accelerated M.P.H. degree program are Environmental Health, Epidemiology, or Sociocultural Diversity and Health. These are the only three emphases eligible for dual degree, joint, or concurrent programs.

Medical school students in the Prime LC program are allowed, by the School of Medicine, to complete the remaining units of their M.P.H. degree during the winter quarter of their last year in the School of Medicine.

For more information, please contact the M.P.H. Academic Advisor at 949-824-7095.

## Master of Public Health

The distinctive mission of the UCI M.P.H. program is to create a motivated cadre of public health professionals who are prepared to implement effective strategies for reducing the burden of disease and disability in culturally diverse communities, and who are primed to draw from their broad training in the

global dimensions of public health principles to lead and work collaboratively on precise assessments of health-risk factors and on the management of evidence-based prevention strategies.

In addition to meeting all the training requirements in the core competency subjects recommended by the Association of Schools and Programs in Public Health (ASPPH), students enrolled in the UCI M.P.H. program will have the opportunity for in-depth pursuit of one of four emphasis areas: Biostatistics, Environmental Health, Epidemiology, or Sociocultural Diversity and Health. The M.P.H. for the Environmental, Epidemiology, and Sociocultural Diversity and Health emphases is a 64-unit program. The M.P.H. in Biostatistics is a 63-unit program. A full-time student must enroll in at least 12 units per quarter. Part-time enrollment is also allowed upon approval from the department and UCI Graduate Division. To maintain residency, part-time students must enroll in four to eight units per quarter. All students are required to complete 240 hours of fieldwork at an approved public health practicum site after advancing to candidacy with UCI Graduate Division. The Program is fully accredited by the Council on Education for Public Health (<http://ceph.org/>).

Further information may be obtained from the Public Health website (<http://publichealth.uci.edu/>), by calling 949-824-7095, or by sending an email to [phgo@uci.edu](mailto:phgo@uci.edu).

The M.P.H. program accepts students for the fall quarter only. Students are encouraged to begin the application process early to facilitate the timely submission of the application. The deadline for receipt of all application materials for the M.P.H. program is December 15. There are no specific course prerequisites needed to enroll, and the program is open to students with bachelor's degrees in a variety of disciplines. Individuals from diverse cultural, geographic, and socioeconomic backgrounds are encouraged to apply.

To be eligible to apply for the M.P.H. program, applicants must meet certain minimum academic requirements. Applicants must hold a bachelor's degree from an accredited academic institution, have earned a minimum grade point average of 3.0 (B average) in undergraduate course work, and possess strong verbal and quantitative skills as reflected by Graduate Record Examination (GRE) General Test scores. Applicants may also submit standardized test scores from the MCAT, GMAT, or LSAT in lieu of the GRE. If the applicant has, from a UC-equivalent university, a Ph.D. in a health-related field, a medical degree, or is currently enrolled in medical school, a test score must be submitted, but the test score's date does not need to be within the validity period. Evaluations of applicant files for admission to the M.P.H. program will consist of an assessment of transcripts of previous academic work, standardized graduate admission test scores, statement of purpose, letters of recommendation, and other relevant qualifications. Applicants must choose one of the four available emphases at the time of application.

Applicants must submit both the UCI Application for Graduate Admission and the School of Public Health Application Service (SOPHAS) application in order to be considered for admission. For more information on admissions, visit the Public Health website (<http://publichealth.uci.edu/>) or contact [phgo@uci.edu](mailto:phgo@uci.edu).

## Program Requirements

### M.P.H. with Emphases in Environmental Health, Epidemiology, or Sociocultural Diversity and Health

The M.P.H. with emphases in Environmental Health, Epidemiology, or Sociocultural Diversity and Health, is a 64-unit degree program consisting of 16 courses taken over five to six quarters. Ten courses must be taken by all students. In addition, students take three courses in their emphasis and three elective courses. All courses required for the M.P.H. must be taken for a letter grade and if a minimum grade of a B is not achieved, they must be re-taken.

**Required Courses.** All students begin the program with the introductory course Foundations of Public Health (PUBHLTH 200). The six core competency courses are Probability and Statistics in Public Health (PUBHLTH 207A), Analysis of Public Health Data Using Statistical Software (PUBHLTH 207B), Introduction to Environmental Health Science (PUBHLTH 264), Principles of Epidemiology (PUBHLTH 206A), Health Policy and Management (PUBHLTH 222), and Health Behavior Theory (PUBHLTH 244). Students must also complete at least two quarters (2 units each quarter) of the PUBHLTH 291 series, and the capstone course Graduate Practicum and Culminating Experience in Public Health (PUBHLTH 295) (eight units).

**Emphasis Courses.** Upon applying, students choose an emphasis for their M.P.H. degree. Three emphasis courses (four units each, all within the same emphasis) are required:

#### Environmental Health Emphasis

Select three from the following:

PUBHLTH 241	Environmental Policy and Global Sustainability
PUBHLTH 260	Human Exposure Modeling
PUBHLTH 265	Advanced Environmental Health Science
PUBHLTH 269	Air Pollution, Climate, and Health
PUBHLTH 275	Environmental Modeling and Risk Management
PUBHLTH 277A	Target Organ Toxicology I
PUBHLTH 277B	Target Organ Toxicology II
PUBHLTH 278	Industrial Toxicology
PUBHLTH 279	Special Topics in Environmental & Occupational Health
PUBHLTH 283	Geographic Information Systems for Public Health

PUBHLTH 286	Advanced Geographic Information Systems and Spatial Epidemiology
<b>Epidemiology Emphasis</b>	
PUBHLTH 206B	Intermediate Epidemiology
PUBHLTH 206C	Advanced Epidemiologic Methods
PUBHLTH 213	Epidemiology in Global Health
<b>Sociocultural Diversity and Health Emphasis</b>	
PUBHLTH 245	Health Promotion Planning
PUBHLTH 246	Social Research Methods
PUBHLTH 247	Program Evaluation

**Elective Courses.** Three elective courses (four units each) are required. Students select electives in light of their educational and career goals.

### **M.P.H. with an Emphasis in Biostatistics**

The M.P.H. with an emphasis in Biostatistics, is a 63-unit degree program consisting of seventeen courses taken over five to six quarters. Fourteen core competency courses must be taken by all students. In addition, students choose three elective courses. All courses required for the M.P.H. with an emphasis in Biostatistics must be taken for a letter grade. Any core competency course in which a minimum grade of B is not achieved must be re-taken.

#### **Required Courses**

A. Complete the following:

PUBHLTH 200	Foundations of Public Health
PUBHLTH 264	Introduction to Environmental Health Science
PUBHLTH 206A	Principles of Epidemiology
PUBHLTH 222	Health Policy and Management
PUBHLTH 244	Health Behavior Theory
STATS 201	Statistical Methods for Data Analysis I
STATS 202	Statistical Methods for Data Analysis II
STATS 203	Statistical Methods for Data Analysis III
STATS 295	Special Topics in Statistics (two quarters)
STATS 280	Seminar in Statistics (at least two quarters - .5 units each quarter)
A course from the PUBHLTH 291 series (2 units)	
PUBHLTH 295	Graduate Practicum and Culminating Experience in Public Health (8 units)

B. Complete three elective courses (4 units each). <sup>1</sup>

<sup>1</sup> Students select electives in light of their educational and career goals.

### **Students in all M.P.H. Emphases**

**Comprehensive Examination** - All M.P.H. students are required to pass the comprehensive exam in order to advance to candidacy. The comprehensive exam is the 'Certified in Public Health' (CPH) examination which covers the core areas of knowledge offered in CEPH-accredited schools and programs, as well as cross-cutting areas relevant to contemporary public health. Students who complete all of their core courses are required to take the CPH examination at the beginning of the fall quarter of their second year. Students who do not complete all of their core courses during their first year will be allowed an alternative testing date. In addition, by special petition, students may be approved to take the CPH examination during the spring quarter of their first year. Students must pass the CPH examination before they can be advanced to candidacy for the M.P.H. degree.

**Practicum and Culminating Experience.** Students are required to complete a supervised internship of 240 hours while registered in the Graduate Practicum and Culminating Experience in Public Health (PUBHLTH 295 (<http://catalogue.uci.edu/search/?P=PUBHLTH%20295>)). The practicum experience follows the completion of all core competency courses, the comprehensive exam, and advancement to candidacy. A compendium of approved practicum sites is available online to enrolled M.P.H. students. The student's work at the practicum site culminates in a comprehensive written report, with a presentation at the departmental poster seminar at the end of the academic year.

For students enrolled full-time, the normative time for completion of the M.P.H. degree is six quarters, and the maximum time permitted is nine quarters. For students enrolled part-time, the normative time is nine quarters, and the maximum is 15 quarters. Upon special petition, students admitted with advanced standing due to prior graduate-level training may receive credit for up to one-fifth of the total units required toward the M.P.H. degree. Students must be able to demonstrate competency associated with those courses. Such credits are not applicable to the graduate practicum and graduate seminar.

## Program in Law and Graduate Studies (J.D./Ph.D./M.P.H.)

Highly-qualified students interested in combining the study of law with graduate qualifications in Public Health are invited to undertake concurrent degree study under the auspices of UC Irvine's Program in Law and Graduate Studies (PLGS). Students in this program pursue a coordinated curriculum leading to a J.D. from the School of Law in conjunction with a Master's or Ph.D. in Public Health.

Additional information is available from the PLGS Program Director's Office at 949-824-9217, or by email at [plgs@law.uci.edu](mailto:plgs@law.uci.edu) (%20plgs@law.uci.edu). A full description of the program, with links to all relevant application information, can be found in the Law School section of the *Catalogue*.

Graduates of the UCI M.P.H. program will find employment in both public and private agencies committed to preventing disease and promoting health and wellness in all aspects of society. Earning a graduate degree gives new professionals a competitive edge over students who complete their education at the bachelor's degree level. In particular, the curriculum of the M.P.H. degree at UCI is designed to create students who can combine knowledge of the core disciplines in public health with leadership, communication, and problem-solving inter-professional skills to meet the needs of culturally-diverse communities locally and globally. Earning an M.P.H. will allow graduates to pursue supervisory positions and career advancement opportunities that may be unattainable without an advanced degree. Students may also wish to combine an M.P.H. with a medical or law degree to increase opportunities for employment.

Coursework and practicum experiences in the M.P.H. program can also prepare a student to pursue doctoral programs in public health. The Ph.D. is a research-based degree that prepares the candidate for research and teaching positions in institutions of higher education. The Dr.P.H. is a professional degree that prepares candidates for careers as practitioners in high-level administration or teaching. The UCI Program in Public Health offers a Ph.D. in Public Health with concentrations in Disease Prevention and Global Health. More information about careers and graduate school in public health can be obtained through the ASPPH (<http://www.aspph.org/discover/>) and the Council on Education for Public Health (<http://ceph.org/>).

## Public Health Policy, B.A.

The B.S. in Public Health Sciences and the B.A. in Public Health Policy degree programs train students in multidisciplinary approaches to public health practice and research. The degrees explore both quantitative and qualitative aspects of public health at all levels of analysis. Graduates will advance, through selective employment or further education, to become the new generation of public health professionals prepared to face the emerging challenges to human health from a population perspective using cutting-edge approaches for preventing diseases.

Students who are interested in pursuing a premedical program should note that additional courses will be needed beyond the requirements of the public health degrees to fulfill requirements for medical school.

Students considering the public health degrees should carefully evaluate their academic preparation and career goals before enrolling in either the B.S. or B.A. degree program. Changing from one degree program to the other is possible, but will require completion of the required lower- and upper-division courses specified for each degree. It is also possible for a student to enroll in both the B.S. and B.A. degree programs (double major), provided the student completes all the requirements outlined under each degree.

The Department also offers two undergraduate minors; one in Public Health and a second in Global Health. Students seeking advising on either minor should visit the Public Health Student Affairs Office.

## Academic Advising: Academic, Career, Public Health

AIRB Suite 2010

Program in Public Health Student Affairs Office ([http://publichealth.uci.edu/ph/\\_undergraduate/student\\_services/](http://publichealth.uci.edu/ph/_undergraduate/student_services/))

### Academic Advising

The Public Health Student Affairs Office coordinates the advising program and provides academic counseling. Undergraduate Public Health students should consult the Public Health Student Affairs Office for information on academic requirements for their degree(s), career opportunities, the Public Health 198/199 Research Program, the Public Health Honors Research Program, and student organizations such as the Public Health Association (<https://phauci.wixsite.com/phauci/>), Health & Justice Advocates at UCI, and Global Health Research, Education, and Translation (G.H.R.E.A.T. (<http://ghreat.uci.edu/gh/#/>)). Students can also visit the Public Health Student Affairs Office to process change-of-major requests, apply for graduation, obtain information about public health alumni, professional development, or for any other help they might need related to their academic career at UCI.

**Peer Academic Advisors.** The Peer Academic Advisors are upper-division Public Health majors who bring with them valuable academic, social, and professional experiences. Their functions include counseling students in matters of major selection, program planning, petitioning, tutoring, learning skills problems, and participation in co-curricular and extracurricular activities. The Peer Advisors are located in the Public Health Student Affairs Office. Office hours are posted at the beginning of each quarter.

### Career Advising

Information on graduate and professional schools in public health can be obtained from the Public Health Student Affairs Office. The UCI Career Center provides services to students and alumni including career counseling, information about job opportunities, a career library, and workshops on resume preparation, job search, and interview techniques.

Areas of opportunity open to those with a Bachelor of Science in Public Health Sciences degree include public health agencies, clinical laboratories, biotechnology and health care companies, not-for-profit organizations specializing in health care, health management organizations, advanced public health training programs in county, state, and federal agencies, and graduate and professional education in public health and related health-care disciplines. The bachelor's degree is necessary to pursue studies leading to the M.S. and Ph.D. degrees. The B.S. degree, plus short training periods, may prepare students for employment in education, medical technology (usually one year), allied health positions, and various other areas.

Areas of opportunity open to those with a Bachelor of Arts in Public Health Policy degree include population health management organizations, health care administration and planning, health insurance companies, public health agencies, public health advocacy groups, corporate planning, health promotion, health education (in hospitals, clinics, government agencies, etc.), mental health, chemical dependency, case managing, insurance, health strategizing, fundraising, community organization, social and legislative work for health, and graduate and professional education in public health and related health-care disciplines. The B.A. degree, plus brief training periods, may prepare students for employment in education, administration, nonprofit corporations, and various other areas.

Education (community colleges, state colleges, or private schools), medical illustration, and public health (which includes hospital administration, biostatistics, epidemiology, environmental health sciences, social work, public health education, maternal and child health, and chronic, infectious, and tropical diseases) are fields in which opportunities are available upon completion of a master's program. Other areas where advanced degrees are necessary include medicine, dentistry, law, nursing, actuary, optometry, podiatry, osteopathy, physical therapy, and veterinary medicine.

### Health Sciences Advising

Students desiring to enter the health sciences should have their majors checked in the Public Health Student Affairs Office. Admissions tests for medical, dental, pharmacy, nursing, veterinary medicine, and graduate schools should be taken in the spring, a year and one-half before the student plans to enter.

Administrators and academic leaders in nearly all health professional schools recommend that students preparing to seek admission to their schools plan to obtain a bachelor's degree. Students who plan to enter a school of dentistry, medicine, or other areas of the health sciences may receive the required pre-professional training at UCI. This pre-professional training may be accomplished by (1) completing a major in Public Health Sciences or Public Health Policy *and* specializing the degree to complete specific course requirements of the dental, medical, or other professional school the student expects to attend or (2) majoring in any school or department *and* fulfilling concurrently the specific course requirements of the dental, medical, or other professional school the student expects to attend.

Public Health Practicum and Culminating Experience (PUBHLTH 195W) is an 8-unit required course for students majoring in Public Health Policy or Public Health Sciences. The course allows students to gain hands-on experience at an approved organization in the field of public health. Preparation for the Practicum course requires that each student interview at one of the approved Practicum sites. There is an online catalog of approved organizations that have agreed to accept, train, and supervise Public Health students in the ongoing activities of the organization. Students must choose a placement site listed in the Practicum catalog. Unlisted sites may be considered at an approved organization through an application process. All students are required to spend 100 hours (10 hours per week) at the public health organization during the quarter in which they are enrolled in PUBHLTH 195W.

Practicum is open only to upper-division Public Health students who are in good academic standing, have completed all prerequisite course work, and have submitted a graduation application. Practicum must be taken for a letter grade. PUBHLTH 195W must be completed with a minimum letter grade of C. Additional information, including Practicum enrollment procedures and prerequisites, can be found at the Public Health website (<http://publichealth.uci.edu>).

**All students must meet the University Requirements.**

**All students must meet the Program Requirements.**

### Major Requirements

#### A. Lower-Division Requirements

PUBHLTH 1	Principles of Public Health
PUBHLTH 2	Case Studies in Public Health Practice
Select three of the following:	
PUBHLTH 30	Introduction to Urban Environmental Health
PUBHLTH 60	Environmental Quality and Health
PUBHLTH 80	AIDS Fundamentals
PUBHLTH 90	Natural Disasters
Complete:	
PUBHLTH 7A	Public Health Statistics I
PUBHLTH 7B	Public Health Statistics II
Select three of the following:	
<b>Psychology:</b>	
PSCI 9	Introduction to Psychology
<b>Sociology:</b>	

SOCIOL 1	Introduction to Sociology
SOCIOL 2	Globalization and Transnational Sociology
SOCIOL 3	Social Problems
<b>Economics:</b>	
ECON 1	Introduction to Economics
ECON 13	Global Economy
ECON 20A	Basic Economics I
ECON 20B	Basic Economics II
<b>Anthropology:</b>	
ANTHRO 2A	Introduction to Sociocultural Anthropology
ANTHRO 2B	Introduction to Biological Anthropology
ANTHRO 2C	Introduction to Archaeology
ANTHRO 2D	Introduction to Language and Culture
ANTHRO 41A	Global Cultures and Society
<b>Political Science:</b>	
POL SCI 31A	Introduction to Political Theory
POL SCI 51A	Introduction to Politics Around the World
<b>Social Ecology:</b>	
SOCECOL E8	
<b>International Studies:</b>	
INTL ST 11	Global Cultures and Society
INTL ST 13	Global Economy
<b>B. Upper-Division Requirements</b>	
PUBHLTH 101	Introduction to Epidemiology
PUBHLTH 122	Health Policy
PUBHLTH 144	Health Behavior Theory
PUBHLTH 170	Introduction to Global Health
PUBHLTH 139	Special Topics in Health Policy and Administration
or PUBHLTH 159	Special Topics in Social and Behavioral Health Science
Eight additional upper-division courses with at least two courses in each topic area selected from the following courses: <sup>1</sup>	
<b>Health Policy and Management:</b>	
ECON 123A- 123B-ECON 123C	Econometrics I and Econometrics II and <sup>2</sup>
MGMT 101	Management Science <sup>2</sup>
MGMT 107	Introduction to Management Information Systems
MGMT 165	U.S. Healthcare Systems <sup>2</sup>
MGMT 166	Business of Medicine <sup>2</sup>
UPPP 102	Urban Inequality
UPPP 103	Comparative Approaches to Urban Regions
UPPP 112	Foundations of Community Health
UPPP 166	Urban Politics and Policy
UPPP 169	
POL SCI 171A	<sup>2</sup>
PUBHLTH 120–139 <sup>2</sup>	
PUBHLTH 172	Climate Change and Disaster Management
PUBHLTH 174	Global Health Ethics
PUBHLTH 190	Geographic Information Systems for Public Health
PUBHLTH 193	Ethics and Responsible Conduct of Research in Public Health
SOCIOL 154	Medical Sociology
<b>Social and Behavioral Health Sciences:</b>	
ANTHRO 134A	Medical Anthropology

ANTHRO 134C	Medicine, Food, and Health <sup>3</sup>
ANTHRO 134F	Anthropology of the Body
ANTHRO 134G	HIV/AIDS in a Global Context
PSCI 137H	Human Stress <sup>2</sup>
PSCI 138H	Child Health Psychology <sup>2</sup>
PSCI 183S	Social Epidemiology <sup>2</sup>
PUBHLTH 102	Social Epidemiology <sup>2</sup>
PUBHLTH 140–159 <sup>2</sup>	
PUBHLTH 176	War and Public Health
<b>C. Practicum Requirement</b>	
PUBHLTH 195W	Public Health Practicum and Culminating Experience (8 units) <sup>3</sup>

<sup>1</sup> Upon petition, PUBHLTH 100 may also be taken to fulfill upper-division course work in specific topic areas, depending on course content.

<sup>2</sup> Note additional prerequisites.

<sup>3</sup> Taken for upper-division writing credit.

## Public Health Sciences, B.S.

The B.S. in Public Health Sciences and the B.A. in Public Health Policy degree programs train students in multidisciplinary approaches to public health practice and research. The degrees explore both quantitative and qualitative aspects of public health at all levels of analysis. Graduates will advance, through selective employment or further education, to become the new generation of public health professionals prepared to face the emerging challenges to human health from a population perspective using cutting-edge approaches for preventing diseases.

Students who are interested in pursuing a premedical program should note that additional courses will be needed beyond the requirements of the public health degrees to fulfill requirements for medical school.

Students considering the public health degrees should carefully evaluate their academic preparation and career goals before enrolling in either the B.S. or B.A. degree program. Changing from a degree program to the other is possible, but will require completion of the required lower- and upper-division courses specified for each degree. It is also possible for a student to enroll in both the B.S. and B.A. degree programs (double major), provided the student completes all the requirements outlined under each degree.

The Department also offers two undergraduate minors; one in Public Health and a second in Global Health. Students seeking advising on either minor should visit the Public Health Student Affairs Office.

### Academic Advising: Academic, Career, Public Health

AIRB Suite 2010

Program in Public Health Student Affairs Office ([http://publichealth.uci.edu/ph/\\_undergraduate/student\\_services/](http://publichealth.uci.edu/ph/_undergraduate/student_services/))

#### Academic Advising

The Public Health Student Affairs Office coordinates the advising program and provides academic counseling. Undergraduate Public Health students should consult the Public Health Student Affairs Office for information on academic requirements for their degree(s), career opportunities, the Public Health 198/199 Research Program, the Public Health Honors Research Program, and student organizations such as the Public Health Association (<https://phauci.wixsite.com/phauci/>) and t (<http://ghreat.uci.edu/gh/#/>) the Global Health Research, Education, and Translation (G.H.R.E.A.T. (<http://ghreat.uci.edu/gh/#/>)). Students can also visit the Public Health Student Affairs Office to process change-of-major requests, apply for graduation, obtain information about public health alumni, professional development, or for any other help they might need related to their academic career at UCI.

**Peer Academic Advisors.** The Peer Academic Advisors are upper-division Public Health majors who bring with them valuable academic, social, and professional experiences. Their functions include counseling students in matters of major selection, program planning, petitioning, tutoring, learning skills problems, and participation in co-curricular and extracurricular activities. The Peer Advisors are located in the Public Health Student Affairs Office. Office hours are posted at the beginning of each quarter.

#### Career Advising

Information on graduate and professional schools in public health can be obtained from the Public Health Student Affairs Office. The UCI Career Center provides services to students and alumni including career counseling, information about job opportunities, a career library, and workshops on resume preparation, job search, and interview techniques. See the [Career Center section](#) for additional information.

Areas of opportunity open to those with a Bachelor of Science in Public Health Sciences degree include public health agencies, clinical laboratories, biotechnology and health care companies, not-for-profit organizations specializing in health care, health management organizations, advanced public health training programs in county, state, and federal agencies, and graduate and professional education in public health and related health-care

disciplines. The bachelor's degree is necessary to pursue studies leading to the M.S. and Ph.D. degrees. The B.S. degree, plus short training periods, may prepare students for employment in education, medical technology (usually one year), allied health positions, and various other areas.

Areas of opportunity open to those with a Bachelor of Arts in Public Health Policy degree include population health management organizations, health care administration and planning, health insurance companies, public health agencies, public health advocacy groups, corporate planning, health promotion, health education (in hospitals, clinics, government agencies, etc.), mental health, chemical dependency, case managing, insurance, health strategizing, fundraising, community organization, social and legislative work for health, and graduate and professional education in public health and related health-care disciplines. The B.A. degree, plus brief training periods, may prepare students for employment in education, administration, nonprofit corporations, and various other areas.

Education (community colleges, state colleges, or private schools), medical illustration, and public health (which includes hospital administration, biostatistics, epidemiology, environmental health sciences, social work, public health education, maternal and child health, and chronic, infectious, and tropical diseases) are fields in which opportunities are available upon completion of a master's program. Other areas where advanced degrees are necessary include medicine, dentistry, law, nursing, actuary, optometry, podiatry, osteopathy, physical therapy, and veterinary medicine.

### Health Sciences Advising

Students desiring to enter the health sciences should have their majors checked in the Public Health Student Affairs Office. Admissions tests for medical, dental, pharmacy, nursing, veterinary medicine, and graduate schools should be taken in the spring, a year and one-half before the student plans to enter.

Administrators and academic leaders in nearly all health professional schools recommend that students preparing to seek admission to their schools plan to obtain a bachelor's degree. Students who plan to enter a school of dentistry, medicine, or other areas of the health sciences may receive the required pre-professional training at UCI. This pre-professional training may be accomplished by (1) completing a major in Public Health Sciences or Public Health Policy *and* specializing the degree to complete specific course requirements of the dental, medical, or other professional school the student expects to attend or (2) majoring in any school or department *and* fulfilling concurrently the specific course requirements of the dental, medical, or other professional school the student expects to attend.

Public Health Practicum and Culminating Experience (PUBHLTH 195W) is an 8-unit required course for students majoring in Public Health Policy or Public Health Sciences. The course allows students to gain hands-on experience at an approved organization in the field of public health. Preparation for the Practicum course requires that each student interview at one of the approved Practicum sites. There is an online catalog of approved organizations that have agreed to accept, train, and supervise Public Health students in the ongoing activities of the organization. Students must choose a placement site listed in the Practicum catalog. Unlisted sites may be considered at an approved organization through an application process. All students are required to spend 100 hours (10 hours per week) at the public health organization during the quarter in which they are enrolled in PUBHLTH 195W.

Practicum is open only to upper-division Public Health students who are in good academic standing, have completed all prerequisite course work, and have submitted a graduation application. Practicum must be taken for a letter grade. PUBHLTH 195W must be completed with a minimum letter grade of C. Additional information, including Practicum enrollment procedures and prerequisites, can be found at the Public Health website (<http://publichealth.uci.edu>).

## Requirements for the B.S. in Public Health Sciences

**All students must meet the University Requirements.**

**All students must meet the Program Requirements.**

### Major Requirements

#### A. Lower-Division Requirements

PUBHLTH 1	Principles of Public Health
PUBHLTH 2	Case Studies in Public Health Practice
CHEM 1A- 1B- 1C- 1LC- 1LD	General Chemistry and General Chemistry and General Chemistry and General Chemistry Laboratory and General Chemistry Laboratory
CHEM 51A- 51B- 51C- 51LB- 51LC	Organic Chemistry and Organic Chemistry and Organic Chemistry and Organic Chemistry Laboratory and Organic Chemistry Laboratory
BIO SCI 93	From DNA to Organisms
BIO SCI 94	From Organisms to Ecosystems
BIO SCI 97	Genetics
BIO SCI 98	Biochemistry

BIO SCI 99	Molecular Biology
MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
or	
MATH 5A- 5B	Calculus for Life Sciences and Calculus for Life Sciences
PUBHLTH 7A	Public Health Statistics I
Select three of the following:	
<b>Psychology:</b>	
PSCI 9	Introduction to Psychology
<b>Sociology:</b>	
SOCIOL 1	Introduction to Sociology
SOCIOL 2	Globalization and Transnational Sociology
SOCIOL 3	Social Problems
<b>Economics:</b>	
ECON 1	Introduction to Economics
ECON 13	Global Economy
ECON 20A	Basic Economics I
ECON 20B	Basic Economics II
<b>Anthropology:</b>	
ANTHRO 2A	Introduction to Sociocultural Anthropology
ANTHRO 2B	Introduction to Biological Anthropology
ANTHRO 2C	Introduction to Archaeology
ANTHRO 2D	Introduction to Language and Culture
ANTHRO 41A	Global Cultures and Society
<b>Political Science:</b>	
POL SCI 31A	Introduction to Political Theory
POL SCI 51A	Introduction to Politics Around the World
<b>Social Ecology:</b>	
SOCECOL E8	
<b>International Studies:</b>	
INTL ST 11	Global Cultures and Society
INTL ST 13	Global Economy
<b>B. Upper-Division Requirements</b>	
PUBHLTH 101	Introduction to Epidemiology
Select two of the following:	
BIO SCI D103	Cell Biology
BIO SCI D104	Developmental Biology
BIO SCI E109	Human Physiology
BIO SCI N110	Neurobiology and Behavior
Five additional upper-division courses with at least one course chosen from each of the three topic areas: <sup>1</sup>	
<b>Epidemiology, Genetics, and Health Informatics:</b>	
BIO SCI D137	Eukaryotic and Human Genetics <sup>2</sup>
BIO SCI D148	Development and Disease <sup>2</sup>
BIO SCI E106	Processes in Ecology and Evolution <sup>2</sup>
BIO SCI M123	Introduction to Computational Biology <sup>2</sup>
BIO SCI M137	Microbial Genetics <sup>2</sup>
COMPSCI 183	Introduction to Computational Biology <sup>2</sup>
PSCI 183S	Social Epidemiology
PUBHLTH 102–119 <sup>2</sup>	
<b>Environmental and Global Health Sciences:</b>	
ANTHRO 125B	Ecological Anthropology <sup>2</sup>

ANTHRO 128B	Race, Gender, and Science
ANTHRO 134A	Medical Anthropology
ANTHRO 134C	Medicine, Food, and Health <sup>2</sup>
ANTHRO 134F	Anthropology of the Body
ANTHRO 134G	HIV/AIDS in a Global Context
BIO SCI D124	Biology of Integrative Medicine
BIO SCI E179	Limnology and Freshwater Biology <sup>2</sup>
BIO SCI E179L	Field Freshwater Ecology <sup>2</sup>
BIO SCI E189	Environmental Ethics <sup>2</sup>
CHEM 125	Advanced Organic Chemistry <sup>2</sup>
CHC/LAT 176	Race, Gender, and Science
PUBHLTH 126	Public Health Law: Fundamentals in Action
PUBHLTH 127	Public Health Programs for the Corporate World
PUBHLTH 160–179 <sup>2</sup>	
PUBHLTH 190	Geographic Information Systems for Public Health <sup>2</sup>
PUBHLTH 193	Ethics and Responsible Conduct of Research in Public Health
SOCECOL E127	Nuclear Environments
<b>Infectious and Chronic Diseases:</b>	
BIO SCI D111L	Developmental and Cell Biology Laboratory <sup>2</sup>
BIO SCI E112L	Physiology Laboratory <sup>2</sup>
BIO SCI E124	Infectious Disease Dynamics <sup>2</sup>
BIO SCI E136	The Physiology of Human Nutrition <sup>2</sup>
BIO SCI M114	Advanced Biochemistry
BIO SCI M114L	Biochemistry Laboratory <sup>2</sup>
BIO SCI M116	Advanced Molecular Biology <sup>2</sup>
BIO SCI M116L	Molecular Biology Laboratory <sup>2</sup>
BIO SCI M118L	Experimental Microbiology Laboratory <sup>2</sup>
BIO SCI M121	Immunology with Hematology <sup>2</sup>
BIO SCI M121L	Advanced Immunology Laboratory <sup>2</sup>
BIO SCI M122	General Microbiology
BIO SCI M125	Molecular Biology of Cancer <sup>2</sup>
BIO SCI M143	Human Parasitology <sup>2</sup>
PHRMSCI 170A	Molecular Pharmacology I <sup>2</sup>
PHRMSCI 170B	Molecular Pharmacology II <sup>2</sup>
PUBHLTH 150	Public Health and Wellness
PUBHLTH 180–189 <sup>2</sup>	
<b>C. Practicum Requirement</b>	
PUBHLTH 195W	Public Health Practicum and Culminating Experience (8 units) <sup>3</sup>

<sup>1</sup> Upon petition, PUBHLTH 100 may also be taken to fulfill upper-division course work in specific topic areas, depending on course content.

<sup>2</sup> Note additional prerequisites.

<sup>3</sup> Taken for upper-division writing credit.

## Public Health, M.S.

The distinctive mission of the Master of Science in Public Health is to prepare the next generation of researchers for global health and disease population around the world in order to advance global health research and reduce the burden of disease, especially in the world's most vulnerable and at-risk associated populations. Graduates of the M.S. program will be prepared to contribute to the improvement of global health and the solution of disease prevention. Students who enroll in the Ph.D. program can earn the M.S. in Public Health en route to completing their Ph.D., but students cannot apply or enroll for the M.S. degree only.

### Thesis

Students admitted to the Ph.D. in Public Health, have the option of also earning an M.S. in Public Health (should they not already have a Master's degree), by additionally completing a masters-level thesis. M.S. students will engage in thesis research with their faculty advisor. The students' final

thesis will be submitted to a M.S. thesis committee. Students must submit thesis committee members and thesis topic to their faculty mentor for approval, before advancement to candidacy will be approved. The thesis should reflect an original research investigation and must be approved by a thesis committee of at least three full-time faculty members, all of which must be public health faculty. The final examination is an oral presentation of the thesis to the committee.

### Program Requirements

All M.S. students are required to complete 64 quarter-units according to the following modules:

#### A. Complete the Preparatory Module:

PUBHLTH 200	Foundations of Public Health
PUBHLTH 206B	Intermediate Epidemiology
PUBHLTH 207A	Probability and Statistics in Public Health
PUBHLTH 207B	Analysis of Public Health Data Using Statistical Software
PUBHLTH 283	Geographic Information Systems for Public Health
PUBHLTH 287	Qualitative Research Methods in Public Health
PUBHLTH 292	Ethics and Responsible Conduct of Research in Public Health
PUBHLTH 294	Research Communication in Public Health
PUBHLTH 298	Directed Studies in Public Health

#### B. Students must complete one of the following Concentration modules:

Concentration Module: Disease Prevention

PUBHLTH 208	Advances in Social Epidemiology
PUBHLTH 244	Health Behavior Theory
PUBHLTH 245	Health Promotion Planning
PUBHLTH 246	Social Research Methods

or

Concentration Module: Global Health

PUBHLTH 213	Epidemiology in Global Health
PUBHLTH 280	Global Burden of Disease
PUBHLTH 286	Advanced Geographic Information Systems and Spatial Epidemiology

#### C. Complete the Elective Module: Risk Factors and Vulnerable Population

Select three courses from the following:

BATS 210A	Introduction to Clinical Epidemiology
BATS 253	Disparities in Health and Health Care
CHC/LAT 210A	Cultural and Historical Precedents for Latinos and Medical Care
CHC/LAT 210B	Cultural and Historical Precedents for Latinos and Medical Care
CHC/LAT 211A	Latinos/Latinas and Medical Care: Contemporary Issues
CHC/LAT 211B	Latinos/Latinas and Medical Care: Contemporary Issues
CRM/LAW C219	Hate Crime
EHS 203	Psychosocial Occupational Epidemiology
EHS 294	Occupational Health Psychology
EPIDEM 201	Cancer Epidemiology
EPIDEM 202	Genetic Epidemiology
EPIDEM 205	Environmental Epidemiology
EPIDEM 215	Introduction to Statistical Genetics
EPIDEM 232	Chronic Disease Epidemiology & Prevention
EPIDEM 244	Toxic Chemicals in Environment
EARTHSS 200	Global Physical Climatology
MOL BIO 205	Molecular Virology
MOL BIO 218	Clinical Cancer
PSCI P258	Health Psychology
PSCI P273	Biobehavioral Aspects of Health and Illness
PUBHLTH 208	Advances in Social Epidemiology <sup>2</sup>
PUBHLTH 209	Methods of Demographic Analysis
PUBHLTH 206C	Advanced Epidemiologic Methods

PUBHLTH 213	Epidemiology in Global Health <sup>1</sup>
PUBHLTH 214	Surveillance Systems
PUBHLTH 222	Health Policy and Management
PUBHLTH 223	Risk Communication
PUBHLTH 241	Environmental Policy and Global Sustainability
PUBHLTH 242	Theories of Health Communication
PUBHLTH 244	Health Behavior Theory <sup>2</sup>
PUBHLTH 245	Health Promotion Planning <sup>2</sup>
PUBHLTH 246	Social Research Methods <sup>2</sup>
PUBHLTH 247	Program Evaluation
PUBHLTH 248	Fundamentals of Maternal and Child Health - Programs, Problems, and Policy
PUBHLTH 250	Health Status and Care Disparities
PUBHLTH 259	Special Topics in Social and Behavioral Health Sciences
PUBHLTH 260	Human Exposure Modeling
PUBHLTH 264	Introduction to Environmental Health Science
PUBHLTH 269	Air Pollution, Climate, and Health
PUBHLTH 270	Human Exposure to Environmental Contaminants
PUBHLTH 277A	Target Organ Toxicology I
PUBHLTH 277B	Target Organ Toxicology II
PUBHLTH 279	Special Topics in Environmental & Occupational Health
PUBHLTH 280	Global Burden of Disease <sup>1</sup>
PUBHLTH 281	Infectious Disease Epidemiology
PUBHLTH 286	Advanced Geographic Information Systems and Spatial Epidemiology <sup>1</sup>
PUBHLTH 289	Special Topics in Global Health and Disease Prevention <sup>1</sup>
PUBHLTH 290	Special Topics in Public Health
SOCIOL 230A	Race and Ethnicity
SOCIOL 239	Special Topics: Social Inequality
SOCIOL 269	Special Topics: Social Demography
SOCIOL 289	Special Topics

The M.S. in Public Health prepares graduates to pursue careers in policy analysis, monitoring and evaluation of public health programs, and academic and programmatic research. They will engage and develop global health research at national and international government agencies, NGOs, the private sector and academic institutions.

## Public Health, Minor

The minor in Public Health provides students with the fundamental knowledge of principles, applications, and skills needed to develop a firm appreciation of health and disease prevention at the population level, and to use this special knowledge to transform the experience of their major education into innovative approaches for solving problems in health care and assessment.

**Teaching and learning.** Public Health education demands interdisciplinary engagement. The minor curriculum is intended to engage students from majors across the campus by introducing them to the main concepts and branches of public health, while also giving them the skills and values needed to translate their major education into meaningful projects in population health assessment and disease prevention. In concert with the major degrees in public health, the minor emphasizes learning through the ecological model of public health where the linkages and relationships among multiple determinants affecting health are examined to identify critical nodes of opportunities to improve the health of populations at various scales of analysis.

**Service.** Public Health education also demands community engagement. All students of Public Health are encouraged to incorporate public health impacts and benefit assessments into societal functions that ground their understanding of public problems. Experience in public health service may be acquired through participation in learning opportunities and by reflecting critically on those experiences under the auspices of vigorous campus organizations such as the Public Health Association (<https://phauci.wixsite.com/phauci/>).

## Requirements for the Minor

Nine courses are required (36 units), no more than two of which may be taken on a Pass/Not Pass basis, distributed as follows:

A. Complete:

PUBHLTH 1	Principles of Public Health
-----------	-----------------------------

## PUBHLTH 2

## Case Studies in Public Health Practice

B. Seven upper-division courses in Public Health with at least one course from four of the five areas:

**Epidemiology, Genetics, and Health Informatics**

PUBHLTH 101–119

**Health Policy and Management**

PUBHLTH 120–139

**Social and Behavioral Health Sciences**

PUBHLTH 140–159

**Environmental and Global Health Sciences**

PUBHLTH 160–179

**Infectious and Chronic Diseases**

PUBHLTH 180–189

No more than two courses may overlap between the student's major degree and the minor in Public Health.

**Residence Requirement:** A minimum of six courses required for the minor must be completed at UCI. Approved courses taken in the UC Education Abroad Program are considered to be in-residence courses.

## Public Health, Ph.D.

The distinctive mission of the Ph.D. in Public Health is to train graduate students to conduct original research on the determinants of health status of populations, and the translation of such knowledge to improve strategies for preventing disease and disability. Graduates of the Ph.D. program will be prepared for independent and collaborative research careers, and to teach at advanced levels of instruction. Students enrolled in the Ph.D. in Public Health must concentrate in either Global Health or Disease Prevention.

Students enroll in the Ph.D. in Public Health in the fall quarter of each year. Applicants are encouraged to start the application process early by consulting with faculty members whose research activities align with the applicant's interests and academic background. The deadline for receipt of all application materials is December 1. Applicants must choose one of the two available concentrations at the time of application. Master's level degrees in health-related disciplines are the preferred preparation for admission to the Ph.D. in Public Health. Applicants to the Ph.D. in Public Health who come with undergraduate degrees from other related majors might be required to take supplementary courses in addition to the preparatory module of the Ph.D. program.

All applicants must have an overall grade point average of B (3.0 on a 4.0 scale) or better and take the Graduate Record Examination (GRE) general test. Applicants must meet the general admission requirements of the UCI Graduate Division and submit both the Application for Graduate Admission and the School of Public Health Application Service (SOPHAS) application in order to be considered for admission.

Each Ph.D. student must serve as a teaching assistant for at least two quarters during the graduate program. If English is not the student's first language, the student must pass a campus-approved oral English proficiency exam prior to serving as a teaching assistant.

For more information on admissions, visit the Public Health website (<http://publichealth.uci.edu/>) or contact [phgo@uci.edu](mailto:phgo@uci.edu).

### Concentration in Global Health

The focus of the Ph.D. research concentration in Global Health is to train excellence in research through engagement in hypothesis-driven projects to investigate the global context of disease burden and the improvement of population health status. The program will attract candidates who seek to analyze problems at the intersection of risk, vulnerability, and disease. Activities may include investigation of strategies to make research results that have already produced benefits in one country or region effective in underprivileged regions. The program trains students in integrative expertise essential for global health research with hypotheses in the nexus of content (risk analysis), context (vulnerability assessments), and process (translation of knowledge to reduce the burden of disease).

The specific learning objectives of the Concentration in Global Health are for graduates of the degree to:

1. Demonstrate knowledge of the major theoretical underpinnings of advances in global health research.
2. Explain the relationship between theory and research methods focused on understanding the association of risk, vulnerability, and outcome in global health.
3. Compare and contrast the health status of different populations with respect to their burden of disease.
4. Formulate research hypotheses in the intersection of risk factors, vulnerable populations, and burden of disease.

5. Compose research proposals and conduct original research resulting in discoveries that contribute to improved understanding of risk factors and variations in disease burden in a population, and strategies to alleviate the burden at the global level.

### Concentration in Disease Prevention

The focus of the Ph.D. concentration in Disease Prevention is to train excellence in research to discover insights into how human behavior, social constraints, and other contextual factors influence strategies to prevent disease in populations that are vulnerable to risk factors. The program emphasizes the ecological model of disease prevention, with research hypotheses emerging through multi-layered analysis of determinants of health status, including individual, interpersonal, organizational, community, and overarching policy. Students generate the hypotheses for their research in the nexus of risk factors, health behavior, and vulnerable populations.

The specific learning objectives of the Concentration in Disease Prevention are:

1. Demonstrate knowledge of the major theoretical underpinnings of strategies for disease prevention.
2. Explain the relationship between theory and research methods focused on understanding the association of risk, behavior, and vulnerability with respect to disease pathways.
3. Analyze interrelationships among the determinants of illness and maladaptive health behaviors using theories of health behavior.
4. Formulate research hypotheses in the intersection of health risk factors, health behavior, and health promotion and policies toward disease prevention.
5. Compose research proposals and conduct original research resulting in discoveries that contribute to improved understanding of the role of behavior and health promotion strategies in mitigating the vulnerability to health risk factors in specific populations, with the goals of applying the knowledge to disease prevention.

### Career Information

The Ph.D. in Public Health prepares graduates to initiate independent and collaborative research careers in academic institutions, to teach at advanced levels of instruction, and to lead research efforts at agencies dedicated to public health at all levels of organization. Graduates of the Ph.D. in Public Health will gain employment at research universities, government agencies, or private sector organizations including research institutes, hospitals, and public health foundations.

### General Admission Requirements

Students enroll in the Ph.D. in Public Health in the fall quarter of each year. Applicants are encouraged to start the application process early by consulting with faculty members whose research activities align with the applicant's interests and academic background. The deadline for receipt of all application materials is December 1. Applicants must choose one of the two available concentrations at the time of application. Master's level degrees in health-related disciplines are the preferred preparation for admission to the Ph.D. in Public Health. Applicants to the Ph.D. in Public Health who come with undergraduate degrees from other related majors might be required to take supplementary courses in addition to the preparatory module of the Ph.D. program.

All applicants must have an overall grade point average of B (3.0 on a 4.0 scale) or better and take the Graduate Record Examination (GRE) general test. Applicants must meet the general admission requirements of the UCI Graduate Division and submit both the Application for Graduate Admission and the School of Public Health Application Service (SOPHAS) application in order to be considered for admission.

Each Ph.D. student must serve as a teaching assistant for at least two quarters during the graduate program. If English is not the student's first language, the student must pass a campus-approved oral English proficiency exam prior to serving as a teaching assistant.

For more information on admissions, visit the Public Health website (<http://publichealth.uci.edu/>) or contact [phgo@uci.edu](mailto:phgo@uci.edu).

### Program Requirements

A main feature of the Ph.D. in Public Health is the situation of dissertation research in an ecological framework that considers multi-level analysis of public health questions. We integrate this feature in the two concentrations, each with knowledge modules and creative activity that must be satisfied in partial fulfillment of the degree requirements. All Ph.D. students are required to complete a minimum of 84 quarter-units according to the following modules:

#### Preparatory Module

PUBHLTH 200	Foundations of Public Health
PUBHLTH 206B	Intermediate Epidemiology
PUBHLTH 207A	Probability and Statistics in Public Health
PUBHLTH 207B	Analysis of Public Health Data Using Statistical Software
PUBHLTH 283	Geographic Information Systems for Public Health
PUBHLTH 287	Qualitative Research Methods in Public Health

PUBHLTH 292	Ethics and Responsible Conduct of Research in Public Health
PUBHLTH 294	Research Communication in Public Health
PUBHLTH 297	Research Design and Proposal Writing
PUBHLTH 298	Directed Studies in Public Health
<b>Concentration Module: Disease Prevention</b>	
PUBHLTH 208	Advances in Social Epidemiology
PUBHLTH 244	Health Behavior Theory
PUBHLTH 245	Health Promotion Planning
PUBHLTH 246	Social Research Methods
<b>Concentration Module: Global Health</b>	
PUBHLTH 213	Epidemiology in Global Health
PUBHLTH 280	Global Burden of Disease
PUBHLTH 286	Advanced Geographic Information Systems and Spatial Epidemiology
PUBHLTH 289	Special Topics in Global Health and Disease Prevention
<b>Elective Module: Risk Factors and Vulnerable Populations</b>	
Select four courses from the following:	
BATS 210A	Introduction to Clinical Epidemiology
BATS 253	Disparities in Health and Health Care
CHC/LAT 210A	Cultural and Historical Precedents for Latinos and Medical Care
CHC/LAT 210B	Cultural and Historical Precedents for Latinos and Medical Care
CHC/LAT 211A	Latinos/Latinas and Medical Care: Contemporary Issues
CHC/LAT 211B	Latinos/Latinas and Medical Care: Contemporary Issues
CRM/LAW C219	Hate Crime
EHS 203	Psychosocial Occupational Epidemiology
EHS 294	Occupational Health Psychology
EPIDEM 201	Cancer Epidemiology
EPIDEM 202	Genetic Epidemiology
EPIDEM 205	Environmental Epidemiology
EPIDEM 215	Introduction to Statistical Genetics
EPIDEM 232	Chronic Disease Epidemiology & Prevention
EPIDEM 244	Toxic Chemicals in Environment
EARTHSS 200	Global Physical Climatology
MOL BIO 205	Molecular Virology
MOL BIO 215	Integrative Immunology
MOL BIO 218	Clinical Cancer
PSCI P258	Health Psychology
PSCI P273	Biobehavioral Aspects of Health and Illness
PUBHLTH 208	Advances in Social Epidemiology <sup>2</sup>
PUBHLTH 209	Methods of Demographic Analysis
PUBHLTH 213	Epidemiology in Global Health <sup>1</sup>
PUBHLTH 206C	Advanced Epidemiologic Methods
PUBHLTH 214	Surveillance Systems
PUBHLTH 222	Health Policy and Management
PUBHLTH 223	Risk Communication
PUBHLTH 241	Environmental Policy and Global Sustainability
PUBHLTH 242	Theories of Health Communication
PUBHLTH 244	Health Behavior Theory <sup>2</sup>
PUBHLTH 245	Health Promotion Planning <sup>2</sup>
PUBHLTH 246	Social Research Methods <sup>2</sup>
PUBHLTH 247	Program Evaluation
PUBHLTH 248	Fundamentals of Maternal and Child Health - Programs, Problems, and Policy

PUBHLTH 250	Health Status and Care Disparities
PUBHLTH 259	Special Topics in Social and Behavioral Health Sciences
PUBHLTH 260	Human Exposure Modeling
PUBHLTH 264	Introduction to Environmental Health Science
PUBHLTH 269	Air Pollution, Climate, and Health
PUBHLTH 270	Human Exposure to Environmental Contaminants
PUBHLTH 277A	Target Organ Toxicology I
PUBHLTH 277B	Target Organ Toxicology II
PUBHLTH 279	Special Topics in Environmental & Occupational Health
PUBHLTH 280	Global Burden of Disease <sup>1</sup>
PUBHLTH 281	Infectious Disease Epidemiology
PUBHLTH 286	Advanced Geographic Information Systems and Spatial Epidemiology <sup>1</sup>
PUBHLTH 289	Special Topics in Global Health and Disease Prevention <sup>1</sup>
PUBHLTH 290	Special Topics in Public Health ((Global Health Law and Policy, Obesity Epidemiology, Theory Driven Data Analysis))
SOCIOL 230A	Race and Ethnicity
SOCIOL 239	Special Topics: Social Inequality
SOCIOL 269	Special Topics: Social Demography
SOCIOL 289	Special Topics

#### Research Module

1. Establish a dissertation committee of faculty members.
2. Submit a research proposal and advance to Ph.D. candidacy by defending the proposal.
3. At least three quarters of PUBHLTH 296 under the supervision of the Chair of the dissertation committee.

<sup>1</sup> Counts as a cluster course for Disease Prevention students only.

<sup>2</sup> Counts as a cluster course for Global Health students only.

The qualifying examination consists of two parts. The first part is submission of a written research proposal to a Candidacy Committee of five faculty members consisting of four members with formal appointments in Public Health, and an external member. The second part is a public presentation and oral defense of the student's dissertation research proposal before the same committee. Advancement to doctoral candidacy is contingent on passing both parts of the qualifying examination, as judged by the Candidacy Committee. The dissertation proposal must be at a level of quality such that its execution will advance knowledge and have the potential to yield original peer-reviewed publications.

Advancement to doctoral candidacy is contingent on passing the qualifying examination. We expect students to sit for the qualifying examination by the beginning of their third year in the program. Ph.D. completion requires submission of an acceptable dissertation and oral defense. The normative time to degree is six years, and the maximum time permitted is eight years.

#### Teaching Requirement

Students enrolled in the Ph.D. in Public Health are required to serve as Teaching Assistants in public health courses for two quarters during their graduate study. Teaching is an important component of graduate training, as it helps graduate students learn how to communicate effectively about their field of knowledge. In addition, teaching experience is valuable to those planning for a career in academia. Graduate students with comparable prior teaching experience (e.g., through postgraduate degrees earned at UC Irvine or other comparable institution) may request a waiver of the teaching requirement.

#### Program in Law and Graduate Studies (J.D./Ph.D./M.P.H.)

Highly-qualified students interested in combining the study of law with graduate qualifications in Public Health are invited to undertake concurrent degree study under the auspices of UC Irvine's Program in Law and Graduate Studies (PLGS). Students in this program pursue a coordinated curriculum leading to a J.D. from the School of Law in conjunction with a Master's or Ph.D. in Public Health.

Additional information is available from the PLGS Program Director's Office at 949-824-9217, or by email at [plgs@law.uci.edu](mailto:plgs@law.uci.edu) (%20plgs@law.uci.edu). A full description of the program, with links to all relevant application information, can be found in the Law School section of the (<http://catalogue.uci.edu/schooloflaw/#lawandgraduatestudies>) *Catalogue*.

The Ph.D. in Public Health prepares graduates to initiate independent and collaborative research careers in academic institutions, to teach at advanced levels of instruction, and to lead research efforts at agencies dedicated to public health at all levels of organization. Graduates of the Ph.D. in Public Health will gain employment at research universities, government agencies, or private sector organizations including research institutes, hospitals, and public health foundations.

### Frank M. LaFerla, Dean

5120 Natural Sciences II

<http://www.bio.uci.edu/>

This is the ideal time to be studying biology. We are solving problems today whose solutions were unimaginable even a few years ago, and implications for our society, our health, and our environment are profound. The School of Biological Sciences is dedicated to providing students with a unique course of study that fosters a deep appreciation for the exciting facts and concepts in the field, an education that allows graduates to excel in their chosen careers.

The School has recently redesigned the curriculum to remain on the cutting edge of biological education. All first-year students are introduced to basic concepts in ecology and evolutionary biology, as well as cellular and molecular biology. The core set of courses in biology continues into the second year, featuring genetics, biochemistry, and molecular biology, followed in the third and fourth year by a choice of advanced courses in biology. Since biology is a laboratory discipline, students complete a series of laboratory courses in which they learn both the techniques and approaches needed to solve problems in biology.

Finally, the faculty expect that most students will engage in cutting-edge research in one of more than 250 laboratories and medical clinics in the School of Biological Sciences and the UCI School of Medicine. It is in these situations that faculty train students to think in a sophisticated way about real-world problems. There is also no feeling of excitement greater than finding out something about the world that no one has ever known before, a feeling afforded in biology only by participation in research. The Excellence in Research Program allows students to present their work and be recognized for their performance with a series of awards and publication of their reports in the School's online *Journal of Undergraduate Research*. The set of core classes that instructs students in the concepts of biology, the advanced classes that allow a deep understanding of specialized aspects of biology, the laboratory courses that convey the practical aspects of problem-solving in biology, and the research experiences that engage students in the real excitement in revealing new information about biology, come together to provide an extraordinary experience for students. The Honors Program in the School of Biological Sciences further enhances the educational experience for the best students.

Biology students with a broad interest in the area can opt to complete a major in Biological Sciences. Additionally, they have the option of specializing in areas of biology that best fit their interests, completing courses for degree programs in Biochemistry and Molecular Biology, Biology/Education, Developmental and Cell Biology, Ecology and Evolutionary Biology, Exercise Sciences, Genetics, Human Biology, Microbiology and Immunology, or Neurobiology.

Completion of any of these majors forms an excellent basis for application to either graduate or professional studies such as medical school, and graduates of the School of Biological Sciences are routinely accepted to the most prestigious programs in the country.

The quality of the faculty in the School of Biological Sciences has remained high while increasing steadily in number over the past few years, giving students a remarkable range of expertise in biology and with it, a large number of different advanced courses and research opportunities. In addition, their efforts have brought several high-impact research units to the campus, such as the Center for the Neurobiology of Learning and Memory, the Center for Virus Research, the Beckman Laser Institute, the Cancer Research Institute, the Developmental Biology Center, the Center for Immunology, the Institute for Memory Impairments and Neurological Disorders, the Macromolecular Structure Research Unit, the Organized Research Unit in Molecular and Mitochondrial Medicine and Genetics, the Institute for Genomics and Bioinformatics, the Center for Complex Biological Systems, and the Reeve-Irvine Research Center, all of which are accessible to undergraduates. The School of Biological Sciences also has close research and teaching collaborations with faculty in the Schools of Medicine, Physical Sciences, Social Ecology, and Social Sciences; the Donald Bren School of Information and Computer Sciences; and The Henry Samueli School of Engineering.

In addition to the regular University requirements for admission, students interested in the biological sciences should include in their high school curriculum, in addition to a course in biology, four years of mathematics, as well as courses in chemistry and physics, which are now an integral part of most contemporary biological work.

The School's professional counseling staff is always available for consultation to students regarding the many decisions in their academic program. They also are trained to provide guidance in the application process to both professional and graduate schools, a real advantage to the high proportion of students in the School of Biological Sciences who go on to pursue advanced degrees.

Opportunities are available at the graduate level to specialize in Developmental and Cell Biology, Ecology and Evolutionary Biology, Molecular Biology and Biochemistry, and Neurobiology and Behavior.

## Change of Major

Students who wish to declare any major within the School of Biological Sciences should contact the Biological Sciences Student Affairs Office in 1011 Biological Sciences III for information about change-of-major requirements, procedures, and policies. Information can also be found at UC Irvine Change of Major Criteria website (<http://www.changeofmajor.uci.edu/>). Change of Major requests are accepted and reviewed by the School throughout the year.

## Honors Programs

### Honors Program in the School of Biological Sciences

The Honors Program in the School of Biological Sciences provides an opportunity for outstanding majors in the School to pursue advanced work in independent research via participation in the Excellence in Biological Sciences Research Program and earn Honors in Biological Sciences upon graduation. Admission to the program is based on an application to participate in the Excellence in Biological Sciences Research program filed during the middle part of the fall quarter of the year of the student's participation. Additionally, students must have a minimum overall 3.5 grade point average and a minimum 3.5 grade point average in all required Biological Sciences courses. The Program requires enrollment in research (BIO SCI 199) including successful completion of BIO SCI H195 and the Excellence in Biological Sciences Research program.

### Graduation with Honors

Of the graduating seniors, no more than 16 percent will receive Latin honors: approximately 2 percent *summa cum laude*, 4 percent *magna cum laude*, and 10 percent *cum laude*. The selection for these awards is based on spring quarter rank-ordered grade point averages. To be eligible for honors at graduation, the student must, by the end of spring quarter of the senior year, be officially declared a Biological Sciences major; submit an Application to Graduate by the end of winter quarter of the senior year; have completed at least 72 units in residence at a UC campus by the end of the spring quarter of the academic year in which they graduate; have all corrections to the academic record processed by the University Registrar's Office by the end of spring quarter; if completing the Language Other Than English general education requirement with a language exemption test, pass the test by the end of spring quarter; and be able to verify completion of all course work by the end of the spring quarter of the senior year. Other important factors are considered visit at Honors Recognition.

### Campuswide Honors Collegium

The Campuswide Honors Collegium is available to selected high-achieving students from all academic majors from their freshman through senior years. For more information contact the Campuswide Honors Collegium, 1200 Student Services II; 949-824-5461; [honors@uci.edu](mailto:honors@uci.edu); or visit the Campuswide Honors Collegium website (<http://honors.uci.edu/>).

**Dean's Honor List.** The quarterly Dean's Honor List is composed of students who have received a 3.5 grade point average while carrying a minimum of 12 graded units.

## Excellence in Research Program

The School of Biological Sciences believes that successful participation in creative research is one of the highest academic goals its undergraduates can attain. Students enrolled in Undergraduate Research (BIO SCI 199) and who meet the eligibility requirements have an opportunity to present the results of their research endeavors to peers and faculty. Those students awarded with "Excellence in Research" will then have their papers published in the School's online *Journal of Undergraduate Research in the Biological Sciences*.

The program begins each fall with a mandatory instructional workshop and continues through spring with students completing a scientific paper, poster presentation, and scientific talk. Contact the Biological Sciences Student Affairs Office, room 1011 Biological Sciences III, or visit the Excellence in Research website (<https://www.bio.uci.edu/undergraduates/research/excellence-in-research/>) for additional information.

## Biological Sciences Honors, Scholarships, Prizes, and Awards

The following honors, scholarships, prizes, and awards are presented at the annual Biological Sciences Honors Convocation held in June.

**Excellence in Research Award.** Undergraduates who have successfully completed the requirements for this program are presented with Excellence in Research certificates.

**Brian Atwood Scholarship.** The Brian Atwood Scholarship is awarded to junior Biological Sciences majors who demonstrate outstanding achievement in both scholarship and service to the UCI community.

**Robert H. Avnet Memorial Scholarship.** The Robert H. Avnet Memorial Scholarship has been established to assist a student interested in becoming a physician. The student must be a Biological Sciences major and demonstrate financial need.

**Carol Becker McGaugh Award.** This award is given to a junior with outstanding research in the area of neurobiology of learning and memory.

**Carol and James Becker McGaugh Award.** This award is given to a junior with strong moral character, integrity, and demonstrated potential for making a difference in neuroscience.

**Robert Ernst Prize for Excellence in Research in the Biological Sciences.** This prize is awarded to a student for meritorious research conducted in the field of biology.

**Robert Ernst Prize for Excellence in Student Research in Plant Biology.** This prize is awarded to a student for meritorious research conducted in plant biology.

**Kyle Farol Memorial Award.** The Kyle Farol Memorial Award is presented to an outstanding undergraduate Biological Sciences major who has dedicated their time as a volunteer in a clinical setting.

**M. Marlene Godoy Award.** This award is given to support a graduating senior in the Biological Sciences who is pre-medical or pre-dental. The recipient is one who is *actively* involved with philanthropic community service, University service, and in undergraduate research.

**James Tait Goodrich Award for Excellence in Neurobiology.** In honor of James McGaugh, the award recognizes an undergraduate student completing his/her junior year, for outstanding achievement in neurobiology.

**Dr. William F. Holcomb Scholarship.** The intent of the Dr. William F. Holcomb Scholarship is to support biomedical or marine biological studies. The Scholarship is to be used to support continuing academic work over a specific period.

**Laurence J. Mehlman Prize.** The Laurence J. Mehlman Prize is awarded to an undergraduate student in the School of Biological Sciences who has demonstrated outstanding achievement in both scholarship and service to the School.

**Edward Mittelman Memorial Fund Scholarship.** The Edward Mittelman Memorial Fund Scholarship is presented to an outstanding Biological Sciences student who will pursue a career in the medical field.

**Edward A. Steinhaus Memorial Award.** The Edward A. Steinhaus Memorial Award is given to outstanding Biological Sciences graduate student teaching assistants who demonstrate promise as future educators.

**Joseph H. Stephens Award for Outstanding Research in Ecology and Conservation.** This award is granted to a graduate student who has demonstrated outstanding research in ecology and conservation.

**Joseph H. Stephens Award for Outstanding Research in Biochemistry and Molecular Biology.** This award is granted to a graduate student who has demonstrated outstanding research in biochemistry and molecular biology.

**Krishna and Sujata Tewari Scholar Award.** This award will be comprised of two distinct scholarships given annually to one graduate recipient from the School of Biological Sciences and one from the School of Medicine. The recipients have demonstrated proclivity and aspirations in science and medicine.

**Jayne Unzelman Scholarship.** The Jayne Unzelman Scholarship is presented to an undergraduate student who has shown academic excellence and been of service to the School of Biological Sciences and/or the University, and to the community.

## Special Programs and Courses

### Biological Sciences 199

The (BIO SCI 199) Undergraduate Research Training Program provides students the opportunity to pursue independent research. Students conduct experimental laboratory, field, or clinical research as an apprentice scientist under the supervision of a professor in the School of Biological Sciences or the School of Medicine. BIO SCI 199 research students experience the challenge and excitement of the world of science. Students develop new scientific skills and knowledge while training with professors who are on the cutting edge of research and discovery in the biological and medical sciences. The research training may commence as early as the sophomore year.

To participate in this unique research training program, students must be in good academic standing, and completion of BIO SCI 94 From Organisms to Ecosystems is mandatory prior to enrollment. Students are encouraged to investigate the possibilities for research early to assure that all requirements and deadlines are met. It is recommended that students contact a faculty sponsor at least one quarter in advance for (BIO SCI 199) enrollment. Once a faculty sponsor is acquired, the student must submit the proposal form and enrollment packet to the Biological Sciences Student Affairs Office, 1011 Biological Sciences III. At the end of each quarter a Summary Report is required.

Students cannot participate in research involving human blood, body fluids, or tissue, unless special approval is granted. The faculty sponsor must submit a request for exception to the Biological Sciences Student Affairs Office.

Students conducting research directly with patients or other human subjects must comply with special enrollment procedures and the additional safety training required at the clinical site. The (BIO SCI 199) Undergraduate Research Training Program standards, procedures, enrollment packets, and announcements are available at the Biological Sciences Undergraduate Research website (<https://www.bio.uci.edu/undergraduates/research/>).

The (BIO SCI 199) Undergraduate Research Training Program can provide experience that is beneficial for the future pursuit of graduate school. Information regarding research careers in the biological sciences is best obtained from a faculty research mentor.

Students should be aware that for any one quarter, a maximum of five units of independent study courses (BIO SCI 197, BIO SCI 198 or BIO SCI 199) may be taken within the School of Biological Sciences.

### **Minority Sciences Programs in Biological Sciences**

The Minority Sciences Programs (MSP) in Biological Sciences is a UCI umbrella program that provides infrastructure and orchestration for the operation of minority research training grants supported by the National Institutes of Health (NIH) and other agencies. MSP seeks to increase the number of U.S. underrepresented groups in biomedical research careers. MSP participants benefit from early exposure, continuous research training, and faculty mentoring. Support is also provided through paid summer and year-round research internships, early research exposure, tutoring, academic advising, scientific writing, and participation at national conferences. Furthermore, MSP has established a campuswide, regional, national, and international network of committed faculty and resource programs to facilitate the transition from high school through community college, baccalaureate, and master's degrees to Ph.D. careers in biomedical research and related fields. Additional information is available from the MSP office, 1104 Biological Sciences III; 949-824-2589; or visit the Minority Sciences website (<http://port.bio.uci.edu/>).

### **Biological Sciences Tutoring Program**

The Tutoring Program provides free tutoring for most Biological Sciences courses and is available to all students in any major. Weekly small group tutoring sessions, reviews for midterms and finals, and a growing online database of worksheets and review materials are provided. In the Tutoring Program, UCI students tutor other UCI students. For the student tutor, this program provides opportunities to develop their teaching abilities, to meet and interact with faculty, and to perform a worthwhile and necessary service. Tutors also receive academic credit. For more information, contact the Biological Sciences Student Affairs Office in 1011 Biological Sciences III or visit the Bio Sci Peer Tutoring website (<https://sites.google.com/a/uci.edu/biotutor/>).

### **UC Education Abroad Program**

Upper-division students have the opportunity to experience a different culture while making progress toward degree objectives through the University's Education Abroad Program (UCEAP). UCEAP is an overseas study program which operates in cooperation with host universities and colleges throughout the world. Specifically, Biology majors should consider the UCEAP programs in the United Kingdom, Canada, Sweden, Australia, Denmark, and Costa Rica. Visit the Study Abroad Center website (<http://www.studyabroad.uci.edu/>) for additional information.

Students may wish to participate in the UCEAP Tropical Biology Quarter which is for undergraduates with at least one year of introductory biology, one quarter of upper-division biology, and a serious interest in biological studies. The program includes lectures, field laboratories, and independent research, with an emphasis on direct field experience. Students also take a course in Spanish language and Latin American culture.

### **Special Research Resources**

Special research resources include the Beckman Laser Institute and Medical Clinic, a research, training, and service facility in the area of laser microbeam technology; the School of Biological Sciences Biohazard (P-3) Facility, which provides laboratory facilities for working with biological agents or biological molecules such as recombinant DNA which would be hazardous when used in open laboratories; the Developmental Biology Center, devoted to analyzing the cellular and genetic mechanisms underlying growth, development, and regeneration; the Center for the Neurobiology of Learning and Memory, a research center for studies of the brain mechanisms underlying learning and memory; the Institute for Memory Impairments and Neurological Disorders; the Center for Virus Research, which includes the Viral Vector Design research group; the Conservation Biology Project; the Cancer Research Institute; the Center for Immunology; the Macromolecular Structure Research Unit; the UCI Arboretum, a botanical garden facility; the San Joaquin Marsh Reserve, which supports controlled marsh biota; the Burns Piñon Ridge Reserve, a high-desert habitat in San Bernardino County; and the UCI Ecological Preserve, which includes coastal hills on the campus, once under heavy grazing, but now returning to a more natural state. It is important to note that the School of Biological Sciences collaborates with the School of Medicine, thereby providing an opportunity for the sharing of both teaching and research activities. These collaborative efforts include the Institute for Genomics and Bioinformatics; the Reeve-Irvine Research Center; and the Bio-Imaging Interest Group.

### **Advising: Academic, Career, Health Sciences**

1011 Biological Sciences III  
<https://www.bio.uci.edu/undergraduates/>

#### **Academic Advising**

The Biological Sciences Student Affairs Office coordinates the advising program and provides academic counseling as well as special services particularly in the area of pre-professional career counseling. Undergraduate Biological Sciences students should consult the Biological Sciences Student Affairs Office for information on academic requirements for the degree, career opportunities, the BIO SCI 199 Research Program, available tutoring for Biological Sciences courses, Biological Sciences student organizations, and scholarship information. Students can also come to the Biological Sciences Student Affairs Office for questions regarding changing their major, applying for graduation, or for any other help they might need related to their academic career at UCI.

**Peer Academic Advisors.** The Peer Academic Advisors are upper-division Biological Sciences majors who bring with them valuable academic and social experiences. Their functions include counseling students in matters of major selection, program planning, petitioning, tutoring, learning skills problems, and participation in co-curricular and extracurricular activities.

The Peer Advisors are located in the Biological Sciences Student Affairs Office. Office hours are posted at the beginning of each quarter.

### **Career Advising**

Information on graduate and professional schools in the health sciences can be obtained from the Biological Sciences Student Affairs Office. The UCI Career Center provides services to students and alumni including career counseling, information about job opportunities, a career library, and workshops on resume preparation, job search, and interview techniques. See the Division of Career Pathways section (<http://career.uci.edu/>) for additional information.

Areas of opportunity open to those with a Bachelor of Science degree include laboratory technology, publishing, technical editing, pharmaceutical sales, and training programs in county, state, and federal agencies. The bachelor's degree is necessary to pursue studies leading to the M.S. and Ph.D. degrees.

The B.S. degree, plus short training periods, may prepare students for employment in education, medical technology (usually one year), allied health positions, and various other areas.

Education (community colleges, state colleges, or private schools), medical illustration, and public health (which includes hospital administration, biostatistics, epidemiology, environmental health sciences, social work, public health education, maternal and child health, and infectious and tropical diseases) are fields in which opportunities are available upon completion of a master's program.

The Ph.D. may lead to research in many areas, among them biochemistry, biometeorology, botany, cytology, ecology, evolutionary biology, fishery biology, genetics, microbiology, molecular biology, pathology, physiology, psychobiology, public health, range management, soil conservation, and zoology.

Other areas where advanced degrees are necessary include medicine, dentistry, law, optometry, podiatry, osteopathy, physical therapy, and veterinary medicine.

### **Health Sciences Advising**

Advising for careers in the health sciences is a specialty of the Biological Sciences Student Affairs Office. Students desiring to enter the health sciences should have their programs checked in the Office and should plan to enroll in BIO SCI 3A. Admissions tests for medical, dental, pharmacy, and other allied health programs should be taken in the spring, one and a half years before the student plans to enter.

Leaders in nearly all health professional schools recommend that students preparing to seek admission to their schools plan to obtain a bachelor's degree. Students who plan to enter a school of dentistry, medicine, or other areas of the health sciences may receive the required pre-professional training at UCI. This pre-professional training may be accomplished by (1) completing the major in Biological Sciences or (2) majoring in any school or department *and* fulfilling concurrently the specific course requirements of the dental, medical, or other professional school the student expects to attend.

Students interested in the health sciences should choose electives in the social sciences, possibly a foreign language, physical chemistry, or other specific courses required or recommended by graduate schools. See the Pre-Health Professional Advising website (<https://www.bio.uci.edu/undergraduates/careers/>) for additional information

### **Student Participation**

A wide variety of student associations, clubs, and groups provide opportunities for School of Biological Sciences students to participate in different types of activities and events. The groups are wide ranging and include nationally recognized honors societies such as Alpha Epsilon Delta, volunteer service organizations such as the Flying Sams, specialized groups such as the UCI Sports Medicine Club, and more. Detailed information about the numerous options is available at Biological Sciences Student Involvement Opportunities (<https://www.bio.uci.edu/undergraduates/events-deadlines/>).

## **Interdisciplinary Graduate Programs**

The School is structured in a manner that encourages an interdisciplinary approach to scientific problems. Interaction and cooperative efforts across traditional institutional boundaries are especially evident in the School's participation in various organized research units (described in the Office of Research section) and in the interdepartmental/interschool graduate programs described below.

### **Graduate Program in Cellular and Molecular Biosciences**

**Peter J. Donovan, Director**

Administrative Contact Information: Gary Roman  
4145 Natural Sciences II  
949-824-6226  
<http://cmb.uci.edu>

The combined graduate program in Cellular and Molecular Biosciences (CMB) provides the first year of instruction for graduate students entering Ph.D. programs in six departments within the School of Biological Sciences and the School of Medicine. Applicants should have significant laboratory

experience and be well prepared in biochemistry, molecular biology, cell biology, and genetics with appropriate course work in organic chemistry, calculus, and physics.

## Requirements

During the first year, students will select one of five focus areas: "Immunology and Microbiology," "Cancer and Cell Biology," "Structural Biology, Biochemistry, and Biophysics," "Developmental and Stem Cell Biology," or "Genetics, Epigenetics and Genomics." Students will select three didactic courses, one each quarter, from a menu of course options recommended for their focus area. Students with more general interests will be allowed to substitute courses to gain knowledge in different areas of biomedical science. Furthermore, any student may switch focus areas during the first year. Changes to course work or Focus Area can be achieved by simple petition to the CMB director. During the first year the students also complete three required 2-unit S/U courses (Ph.D. Fundamentals, Biomedical Research Methods, and Responsible Conduct of Research) that develop knowledge and skills not necessarily covered in the didactic courses. Students may take additional elective courses relevant to their area of specialization although this is not encouraged. Each Focus Area recommends elective courses for students in years two or later, to be taken after transfer to a departmental Ph.D. program.

The students also undertake introductory research in at least two laboratories during their first year. Students can select a laboratory rotation from over 100 faculty laboratories in the departments of Biological Chemistry, Developmental and Cell Biology, Microbiology and Molecular Genetics, Molecular Biology and Biochemistry, Pathology and Laboratory Medicine, and Physiology and Biophysics. Each faculty member's area of research is described on the department websites. Faculty also are associated with research areas that span departments, as shown on the CMB website (<http://cmb.uci.edu>). The year culminates in a comprehensive preliminary examination and evaluation.

At the end of the first academic year, students will select a thesis advisor in one of the departments. Students who select a thesis advisor in the School of Biological Sciences (Department of Developmental and Cell Biology or Molecular Biology and Biochemistry) will complete the doctoral degree in Biological Sciences. Students who select a thesis advisor in the School of Medicine (Departments of Biological Chemistry, Microbiology and Molecular Genetics, Pathology and Laboratory Medicine, and Physiology and Biophysics) will complete the doctoral degree in Biomedical Sciences.

During the second year and beyond, students participate in the departmental doctoral program. Students are required to meet all doctoral degree requirements associated with the thesis advisor's department or program, and may be required to take additional course work, and participate in journal club and seminar series. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years. Further information is available in the *Catalogue* sections of the participating departments and through the CMB program office.

## Graduate Program in Mathematical, Computational, and Systems Biology

The graduate program in Mathematical, Computational, and Systems Biology (MCSB) is designed to meet the interdisciplinary training challenges of modern biology and to function in concert with existing departmental programs or as an individually tailored program leading to an M.S. or Ph.D. Detailed information is available at the Mathematical, Computational, and Systems Biology website (<http://mcsb.uci.edu/>) and in the Interdisciplinary Studies section of the *Catalogue*.

## Interdepartmental Neuroscience Program

**Karina S. Cramer, Director**

4145 Natural Sciences II

949-824-6226

<http://www.inp.uci.edu>;

[gary.roman@uci.edu](mailto:gary.roman@uci.edu) (%20gary.roman@uci.edu)

The Interdepartmental Neuroscience Program (INP) is a first-year graduate program that brings together more than 90 faculty from the School of Biological Sciences and the School of Medicine, including participation from the Departments of Anatomy and Neurobiology, Developmental and Cell Biology, Molecular Biology and Biochemistry, Neurobiology and Behavior, Pharmacology, and Physiology and Biophysics. INP faculty have broad research interests in behavioral neuroscience, brain aging, developmental neurobiology, genetics, learning and memory, molecular neurobiology, cellular neurobiology, neural injury/disorders/repair, neuropharmacology, plasticity, and sensory neuroscience. Neuroscience as a discipline requires scientists to have a detailed understanding of at least one field, and a broad understanding of many other fields. INP provides breadth early on, followed by specialization in years two through five of predoctoral training.

INP organizes and coordinates a core curriculum that provides a foundation in neuroscience and forms the basis of future specialized instruction in a participating departmental degree-granting program. This curriculum includes course work and laboratory rotations. Each trainee is individually mentored in tailoring an appropriate course of study based on academic background, interests, and research foci. After successfully completing the academic requirements of the program, students identify a thesis advisor who is willing to accept them into their laboratory, and the student will transfer to the doctoral program in their advisor's home department. In this way, INP serves not as a degree-granting program, but as a gateway to further graduate training. Students are required to meet all doctoral degree requirements associated with the thesis advisor's department or program.

In particular, the program provides trainees with an opportunity: (1) to begin training in neuroscience with a broad academic introduction, (2) to receive individualized attention to curricular needs, (3) to conduct initial research projects with a large and diverse group of faculty in a wide variety of departments, and (4) to conduct dissertation research in any of a large and diverse group of laboratories in a wide variety of departments.

## Requirements

In the first year of study, students must successfully complete one course from each of the molecular, systems, and cellular neuroscience categories. All trainees also participate in a two-unit course called Foundations of Neuroscience (NEURBIO 202A-NEURBIO 202B). This mandatory course is intended to expose students to research in neuroscience and critical reading and analysis of the primary literature. Students are encouraged to carry out three laboratory rotations of 10 weeks each. With permission from the director and the dean, students may carry out fewer rotations. Rotations are graded on a Satisfactory/Unsatisfactory Only scale. Trainees are judged as having successfully completed the program provided that they have: (1) achieved at least a B+ (3.3) average in the core courses, (2) achieved a satisfactory grade in each quarter of Foundations of Neuroscience, (3) achieved satisfactory grades in all rotations, and (4) identified a participating faculty member who has agreed to serve as their thesis advisor.

The ideal INP candidate will have had a substantial subset of the following courses: biology, chemistry, physics, calculus, neuroscience, psychology, biochemistry, and genetics. Preference will be given to applicants who have had laboratory research experience.

Following completion of the INP and selection of a thesis mentor, students will become members of the faculty member's participating department. In addition to the INP course work requirements, each department has specific requirements to be fulfilled, indicated below. Students who select a thesis advisor in the School of Biological Sciences (Department of Developmental and Cell Biology, Molecular Biology and Biochemistry, or Neurobiology and Behavior) will complete the doctoral degree in Biological Sciences. Students who select an advisor in the School of Medicine (Department of Anatomy and Neurobiology, Pharmacology, or Physiology and Biophysics) will complete the doctoral degree in Biomedical Sciences.

**Developmental and Cell Biology (School of Biological Sciences):** Students entering the Developmental and Cell Biology program are required to enroll in and attend the weekly Department seminar series (DEV BIO 290A-DEV BIO 290B-DEV BIO 290C) and Developmental and Cell Biology journal club (DEV BIO 206A-DEV BIO 206B-DEV BIO 206C). Two quarters of teaching under the supervision of Departmental faculty are required. Student training will also be individually assessed for possible courses with an emphasis in molecular, developmental biology, or genetics as deemed necessary for successful completion of the thesis research project.

**Molecular Biology and Biochemistry (School of Biological Sciences):** Students entering the Molecular Biology and Biochemistry program are required to enroll in and attend the weekly Department seminar series (MOL BIO 201A-MOL BIO 201B-MOL BIO 201C) and the Research in Progress Seminar (MOL BIO 229), where they will present their own work annually. Students will enroll in University Teaching (DEV BIO 399) and teach (TA) beginning in their second year for at least two quarters. Student training will also be individually assessed to include at least one formal graduate course in each of the second through fifth years with an emphasis in molecular biology or biochemistry as deemed necessary for successful completion of the thesis research project. Necessary courses will include two core classes (MOL BIO 203-MOL BIO 204).

**Neurobiology and Behavior (School of Biological Sciences):** Neurobiology and Behavior accepts any of the INP core courses toward the requirement of one each from Cellular, Molecular, Systems, and Behavioral categories. INP students who enter Neurobiology and Behavior in their second year must complete the fourth category if they only fulfilled three as INP students. In addition, they will fulfill the requirements met by all continuing students, including teaching (TA) beginning in their second year for at least two quarters, advancing to candidacy in their third year, annual meetings with an advisory committee, and completing four advanced courses prior to defending their dissertation in their fifth year. They also participate in the regular Department colloquia. Students also present their research annually in the graduate student NeuroBlitz colloquium series.

**Anatomy and Neurobiology (School of Medicine):** Students entering the Anatomy and Neurobiology program are required to participate in the Current Topics in Neuroscience journal club (ANATOMY 227A-ANATOMY 227B-ANATOMY 227C) and attend all Department-sponsored seminars. They are also required to meet once each year with an advisory committee to monitor their progress and present their research at the annual "Grad Day" meeting. Individual advisors may require students to take other courses depending on their interests and research program.

**Pathology and Laboratory Medicine:** Students entering the Ph.D. program in Experimental Pathology through the INP must take one didactic graduate course each year; senior graduate students (year 4 and beyond) may waive this requirement with approval from the graduate advisor. To satisfy this requirement, students may take PATH 221, other approved courses offered by other departments, or any other relevant coursework with approval from the graduate advisor. In addition, students must attend weekly seminars and are encouraged to participate in the Experimental Pathology Journal Club. Graduate students in the program are also required to present in the seminar series, usually during the spring quarter; these oral presentations are an important part of the graduate training. Second year students are required to give a 30-minute 'research in progress' talk. In the third year and beyond, students are required to present research as formal one-hour seminars.

**Pharmacology (School of Medicine):** Students entering the Pharmacological Sciences program through the INP are required to complete Statistics (PHARM 256) and Ethics (PHARM 257) during the summer. They will also fulfill the requirements met by all continuing students including the seminar series (PHARM 298) and graduate research (PHARM 299). The seminar series includes a journal club and research presentation component. Students will also have the opportunity to present their research at an annual Departmental Research Symposium. Students are expected to advance to candidacy by year three and to meet with their thesis committee annually.

**Physiology and Biophysics (School of Medicine):** Students entering the Physiology program through the INP are required to enroll each quarter in Topics in Physiology (PHYSIO 290), which is graded by attendance and participation, and to attend all meetings of the Physiology and Biophysics journal club, all Physiology and Biophysics Departmental seminars and lunch meetings with the seminar speaker, and the Research in Progress seminars. All students are required to present their research once a year at the Research in Progress program. Students are encouraged, but not required, to enroll in Physiology of Ion Channels (PHYSIO 232) and Proteomics (PHYSIO 252). All students are required to hold meetings with their thesis committee annually, beginning in their second year. The Department has no formal teaching requirements, but students who wish to gain

experience as Teaching Assistants (TA) can make arrangements to do so in coordination with the director of Graduate Studies for the Department of Physiology and Biophysics.

- Department of Developmental and Cell Biology
- Department of Ecology and Evolutionary Biology
- Department of Molecular Biology and Biochemistry
- Department of Neurobiology and Behavior

## Requirements for the Bachelor's Degree

All School of Biological Sciences students must complete the following requirements.

**All students must meet the University Requirements.**

**All students must meet the School Requirements, as shown below:**

Complete:

BIO SCI 2A	Freshman Seminar
or BIO SCI 190	Transfer Student Seminar

Biological Sciences Core:

BIO SCI 93	From DNA to Organisms
or BIO SCI H93	Honors From DNA to Organisms
BIO SCI 94	From Organisms to Ecosystems
BIO SCI 97	Genetics
or BIO SCI H97	Honors Genetics
BIO SCI 98	Biochemistry
BIO SCI 99	Molecular Biology
BIO SCI 100	Scientific Writing

Select one of the following General Chemistry sequences:

CHEM 1A- 1B- 1C	General Chemistry and General Chemistry and General Chemistry
-----------------	---

and accompanying labs:

CHEM 1LC- 1LD	General Chemistry Laboratory and General Chemistry Laboratory
---------------	--

or

CHEM H2A- H2B- H2C	Honors General Chemistry and Honors General Chemistry and Honors General Chemistry
--------------------	--

and accompanying labs:

CHEM H2LA- H2LB	Honors General Chemistry Laboratory and Honors General Chemistry Laboratory
-----------------	--

Select one of the following Organic Chemistry sequences:

CHEM 51A- 51B- 51C	Organic Chemistry and Organic Chemistry and Organic Chemistry
--------------------	---

and accompanying labs:

CHEM 51LB- 51LC	Organic Chemistry Laboratory and Organic Chemistry Laboratory
-----------------	--

CHEM H52LA- H52LB	Honors Organic Chemistry Laboratory and Honors Organic Chemistry Laboratory
-------------------	--

Complete:

MATH 5A	Calculus for Life Sciences
MATH 5B	Calculus for Life Sciences

Select one of the following:

STATS 7	Basic Statistics
STATS 8	Introduction to Biological Statistics
MATH 2D	Multivariable Calculus

MATH 3A	Introduction to Linear Algebra
Select one of the following Physics Series:	
<b>Series A</b>	
PHYSICS 3A- 3B- 3C	Basic Physics I and Basic Physics II and Basic Physics III
PHYSICS 3LB- 3LC	Basic Physics Laboratory and Basic Physics Laboratory
<b>Series B</b>	
PHYSICS 7C- 7D- 7E	Classical Physics and Classical Physics and Classical Physics
PHYSICS 7LC- 7LD	Classical Physics Laboratory and Classical Physics Laboratory

Prerequisites for all Biological Sciences Core courses are rigorously enforced. Students must have a 2.0 cumulative grade point average in the Biological Sciences Core Curriculum, four upper-division elective courses, and three upper-division laboratories.

#### Upper-Division Writing Requirement

Students in the School of Biological Sciences have the option to satisfy the upper-division writing requirement by completing BIO SCI 100 with a minimum grade of C, followed by the completion of three upper-division laboratories selected from the following:

BIO SCI D111L	Developmental and Cell Biology Laboratory
BIO SCI E106L	Habitats and Organisms
BIO SCI E112L	Physiology Laboratory
BIO SCI E115L	Evolution Laboratory
BIO SCI E131L	Image Analysis in Biological Research
BIO SCI E140L	Evolution and the Environment Laboratory
BIO SCI E160L	Biology of Birds Lab
BIO SCI E166L	Field Biology
BIO SCI E179L	Field Freshwater Ecology
BIO SCI E186L	Population and Community Ecology Lab
BIO SCI M114L	Biochemistry Laboratory
BIO SCI M116L	Molecular Biology Laboratory
BIO SCI M118L	Experimental Microbiology Laboratory
BIO SCI M121L	Advanced Immunology Laboratory
BIO SCI N123L	Human Neuroimaging Lab
BIO SCI M130L	Advanced Molecular Lab Techniques
BIO SCI N113L	Neurobiology Laboratory

Students must earn a grade of C or better in each of the three laboratories selected. Completion of the Excellence in Research in Biological Sciences program may count as one of the three-upper division labs.

#### School Residence Requirement

After matriculation, all courses required for the major must be successfully completed at UCI. Students must be a major in the School of Biological Sciences for the 3 academic quarters (excluding summer session) immediately preceding degree certification. The School of Biological Sciences strictly enforces the UCI residence requirement. At least 36 of the final 45 units completed by a student for the bachelor's degree must be earned in residence at the UCI campus. (The School considers courses taken in the UC Education Abroad Program to be in-residence courses.)

- Biochemistry and Molecular Biology, B.S.
- Biological Sciences, B.S.
- Biological Sciences, M.S.
- Biological Sciences, Minor
- Biological Sciences, Ph.D.
- Biology/Education, B.S.
- Biotechnology Management, M.S.
- Developmental and Cell Biology, B.S.
- Ecology and Evolutionary Biology, B.S.
- Ecology and Evolutionary Biology, Graduate Program

- Exercise Sciences, B.S.
- Genetics, B.S.
- Human Biology, B.S.
- Master of Conservation and Restoration Science
- Microbiology and Immunology, B.S.
- Neurobiology and Behavior, Graduate Program
- Neurobiology, B.S.

## Faculty

Nancy M. Aguilar-Roca, Ph.D. University of California, San Diego, *Associate Professor of Teaching of Ecology and Evolutionary Biology*

Steven D. Allison, Ph.D. Stanford University, *Professor of Ecology and Evolutionary Biology; Earth System Science*

Joseph Arditti, Ph.D. University of Southern California, *Professor Emeritus of Developmental and Cell Biology* (developmental physiology of orchids)

Kavita Arora, Ph.D. University of Bombay, *Professor of Developmental and Cell Biology* (Drosophila development; TGF- $\beta$  signal transduction; cell signaling)

Dana W. Aswad, Ph.D. University of California, Berkeley, *Professor Emeritus of Molecular Biology and Biochemistry*

Peter R. Atsatt, Ph.D. University of California, Los Angeles, *Professor Emeritus of Ecology and Evolutionary Biology*

Scott Atwood, Ph.D. University of Oregon, *Assistant Professor of Developmental and Cell Biology; Dermatology*

John C. Avise, Ph.D. University of California, Davis, *UCI Distinguished Professor of Ecology and Evolutionary Biology*

Manny Azizi, Ph.D. University of Massachusetts, *Associate Professor of Ecology and Evolutionary Biology*

Pierre F. Baldi, Ph.D. California Institute of Technology, *Director of the Institute for Genomics and Bioinformatics and Distinguished Professor of Computer Science; Biological Chemistry; Biomedical Engineering; Developmental and Cell Biology; Mathematics* (artificial intelligence and machine learning, biomedical informatics, databases and data mining, environmental informatics, statistics and statistical theory)

Alan G. Barbour, M.D. Tufts University, *Distinguished Professor of Microbiology and Molecular Genetics; Ecology and Evolutionary Biology; Medicine*

Lee Bardwell, Ph.D. Stanford University, *Professor of Developmental and Cell Biology* (intracellular signaling in development and disease)

Claudia Benavente, Ph.D. University of Arizona, *Assistant Professor of Pharmaceutical Sciences; Developmental and Cell Biology* (genetics, epigenetics, cancer, pediatric cancer, retinoblastoma, osteosarcoma)

Ruth M. Benca, M.D. Ph.D. University of Chicago, *Department Chair and Professor of Psychiatry and Human Behavior; Neurobiology and Behavior*

Albert F. Bennett, Ph.D. University of Michigan, *Professor Emeritus of Ecology and Evolutionary Biology*

Rudi C. Berkelhamer, Ph.D. University of California, Berkeley, *Professor of Teaching Emerita of Ecology and Evolutionary Biology*

Hans-Ulrich Bernard, Ph.D. University of Goettingen, *Professor Emeritus of Molecular Biology and Biochemistry; Program in Public Health*

Michael W. Berns, Ph.D. Cornell University, *Arnold and Mabel Beckman Chair in Laser Biomedicine and Professor of Surgery; Biomedical Engineering; Developmental and Cell Biology*

Bruce Blumberg, Ph.D. University of California, Los Angeles, *Professor of Developmental and Cell Biology; Biomedical Engineering; Environmental Health Sciences; Pharmaceutical Sciences* (gene regulation by nuclear hormone receptors in vertebrate development physiology, endocrine disruption)

Mathew M. Blurton-Jones, Ph.D. University of California, San Diego, *Associate Professor of Neurobiology and Behavior*

Hans R. Bode, Ph.D. Yale University, *Professor Emeritus of Developmental and Cell Biology* (molecular basis of pattern formation in Hydra)

Alexander D. Boiko, Ph.D. University of Illinois at Urbana–Champaign, *Assistant Professor of Molecular Biology and Biochemistry*

Peter A. Bowler, Ph.D. University of California, Irvine, *Professor of Teaching of Ecology and Evolutionary Biology*

Matthew E. Bracken, Ph.D. Oregon State University, *Professor of Ecology and Evolutionary Biology*

Timothy J. Bradley, Ph.D. University of British Columbia, *Professor Emeritus of Ecology and Evolutionary Biology*

Adriana D. Briscoe, Ph.D. Harvard University, *Professor of Ecology and Evolutionary Biology*

Peter J. Bryant, Ph.D. University of Sussex, *Research Professor and Professor Emeritus of Developmental and Cell Biology* (tumor-suppressor genes of *Drosophila* and humans)

Susan V. Bryant, Ph.D. University of London, *Professor Emerita of Developmental and Cell Biology* (molecular basis of limb development and regeneration)

Michael J. Buchmeier, Ph.D. McMaster University, *Professor of Medicine; Microbiology and Molecular Genetics; Molecular Biology and Biochemistry*

Nancy T. Burley, Ph.D. University of Texas at Austin, *Professor of Ecology and Evolutionary Biology*

Jorge A. Busciglio, Ph.D. Universidad Nacional de Córdoba, *Professor of Neurobiology and Behavior*

Robin M. Bush, Ph.D. University of Michigan, *Professor Emeritus of Ecology and Evolutionary Biology*

Lawrence F. Cahill, Ph.D. University of California, Irvine, *Professor of Neurobiology and Behavior; Psychological Science*

Anne L. Calof, Ph.D. University of California, San Francisco, *Professor of Anatomy and Neurobiology; Developmental and Cell Biology*

Diane R. Campbell, Ph.D. Duke University, *Professor of Ecology and Evolutionary Biology*

Richard D. Campbell, Ph.D. The Rockefeller University, *Professor Emeritus of Developmental and Cell Biology* (Morphogenesis; biology of *Hydra*; fractal geometry of biological forms)

F. Lynn Carpenter, Ph.D. University of California, Berkeley, *Professor Emerita of Ecology and Evolutionary Biology*

John Charles Chaput, Ph.D. University of California, Riverside, *Professor of Pharmaceutical Sciences; Chemistry; Molecular Biology and Biochemistry* (chemical and synthetic biology)

Ken W. Cho, Ph.D. University of Pennsylvania, *Professor of Developmental and Cell Biology* (TGF- $\beta$  signaling, gene regulatory networks in development)

Olivier Cinquin, Ph.D. University College London, *Associate Professor of Developmental and Cell Biology* (mathematical modeling of networks, systems biology)

Olivier Civelli, Ph.D. Swiss Federal Institute of Technology in Zurich, *Professor of Pharmaceutical Sciences; Developmental and Cell Biology* (novel neuroactive molecules, molecular neuropharmacology)

Michael T. Clegg, Ph.D. University of California, Davis, *Donald Bren Professor and Professor Emeritus of Ecology and Evolutionary Biology*

Melanie Cocco, Ph.D. Pennsylvania State University, *Associate Professor of Molecular Biology and Biochemistry; Pharmaceutical Sciences*

Susana Cohen-Cory, Ph.D. The Rockefeller University, *Professor of Neurobiology and Behavior*

Kwasi M. Connor, Ph.D. University of Southern California, *Assistant Professor of Ecology and Evolutionary Biology*

Carl W. Cotman, Ph.D. Indiana University, *Professor of Neurology; Neurobiology and Behavior*

Karina S. Cramer, Ph.D. California Institute of Technology, *Professor of Neurobiology and Behavior*

Michael G. Cumsy, Ph.D. University of California, Berkeley, *Professor of Teaching of Molecular Biology and Biochemistry*

Michelle Digman, Ph.D. University of Illinois at Chicago, *Associate Professor of Biomedical Engineering; Developmental and Cell Biology* (biophotonics, fluorescence Spectroscopy and microscopy, nano-scale imaging, mechanotransduction, cancer cell migration, fluorescence lifetime and metabolic mapping)

Peter J. Donovan, Ph.D. University College London, *Professor of Biological Chemistry; Developmental and Cell Biology*

Aimee Lara Edinger, Ph.D. University of Pennsylvania, *Associate Professor of Developmental and Cell Biology* (cancer biology and metabolism, growth control, protein trafficking)

James J. Emerson, Ph.D. University of Chicago, *Assistant Professor of Ecology and Evolutionary Biology*

German A. Enciso Ruiz, Ph.D. Rutgers, the State University of New Jersey, *Professor of Mathematics; Developmental and Cell Biology* (applied and computational mathematics, mathematical and computational biology)

Dae Seok Eom, Ph.D. The University of Texas at Austin, *Assistant Professor of Developmental and Cell Biology* (cellular projection mediated long-range cell-to-cell communication)

Celia Faiola, Ph.D. Washington State University, *Assistant Professor of Ecology and Evolutionary Biology; Chemistry*

- Hung Y. Fan, Ph.D. Massachusetts Institute of Technology, *Professor Emeritus of Molecular Biology and Biochemistry*
- Howard J. Federoff, M.D. Ph.D. Albert Einstein College of Medicine, *Professor of Neurobiology and Behavior; Neurology*
- Donald N. Forthal, M.D. University of California, Irvine, *Professor of Medicine; Molecular Biology and Biochemistry*
- Norbert Fortin, Ph.D. Boston University, *Associate Professor of Neurobiology and Behavior*
- Donald E. Fosket, Ph.D. University of Idaho, *Professor Emeritus of Developmental and Cell Biology* (regulation of cytoskeleton formation and function)
- Christie Fowler, Ph.D. Florida State University, *Assistant Professor of Neurobiology and Behavior*
- Steven A. Frank, Ph.D. University of Michigan, *Distinguished Professor and Donald Bren Professor of Ecology and Evolutionary Biology; Logic and Philosophy of Science*
- Ron D. Frostig, Ph.D. University of California, Los Angeles, *Professor of Neurobiology and Behavior; Biomedical Engineering*
- David A. Fruman, Ph.D. Harvard University, *Professor of Molecular Biology and Biochemistry*
- Christine M. Gall, Ph.D. University of California, Irvine, *Department Chair and Distinguished Professor of Anatomy and Neurobiology; Neurobiology and Behavior*
- Sunil P. Gandhi, Ph.D. University of California, San Diego, *Associate Professor of Neurobiology and Behavior*
- David M. Gardiner, Ph.D. University of California, San Diego, *Professor of Developmental and Cell Biology* (limb development and regeneration)
- Brandon S. Gaut, Ph.D. University of California, Riverside, *Biological Sciences Associate Dean for Research and Innovation and Professor of Ecology and Evolutionary Biology*
- Donovan German, Ph.D. University of Florida, *Associate Professor of Ecology and Evolutionary Biology*
- Paul David Gershon, Ph.D. University of Liverpool, *Professor of Molecular Biology and Biochemistry*
- Charles Glabe, Ph.D. University of California, Davis, *Professor of Molecular Biology and Biochemistry*
- Michael L. Goulden, Ph.D. Stanford University, *Professor of Earth System Science; Ecology and Evolutionary Biology*
- Celia Goulding, Ph.D. King's College London, *Professor of Molecular Biology and Biochemistry; Pharmaceutical Sciences*
- Enrico Gratton, Ph.D. University of Rome, *Distinguished Professor of Biomedical Engineering; Developmental and Cell Biology; Physics and Astronomy* (design of new fluorescence instruments, protein dynamics, single molecule, fluorescence microscopy, photon migration in tissues)
- Kim Green, Ph.D. University of Leeds, *Associate Professor of Neurobiology and Behavior*
- Michael T. Green, Ph.D. University of Chicago, *Professor of Molecular Biology and Biochemistry; Chemistry* (chemical, biology, inorganic and organometallic, physical chemistry and chemical physics, theoretical and computational)
- Joshua Grill, Ph.D. Wake Forest University School of Medicine, *Associate Professor of Neurobiology and Behavior; Neurobiology and Behavior*
- Steven P. Gross, Ph.D. University of Texas at Austin, *Professor of Developmental and Cell Biology; Physics and Astronomy* (force generation by molecular motors in living cells)
- John F. Guzowski, Ph.D. University of California, Irvine, *Associate Professor of Neurobiology and Behavior*
- Barbara A. Hamkalo, Ph.D. University of Massachusetts, *Professor Emerita of Molecular Biology and Biochemistry*
- Bradford A. Hawkins, Ph.D. University of California, Riverside, *Professor Emeritus of Ecology and Evolutionary Biology*
- Patrick L. Healey, Ph.D. University of California, Berkeley, *Professor Emeritus of Developmental and Cell Biology* (plant cellular differentiation and morphogenesis, ultrastructure and histochemistry of secretory systems, early reproductive development)
- L. R. Herman, B.S. University of California, Irvine, *Academic Coordinator of Biological Sciences*
- James W. Hicks, Ph.D. University of New Mexico, *Department Chair and Professor of Ecology and Evolutionary Biology*
- Franz J. Hoffmann, Ph.D. University of Hohenheim, *Professor of Teaching Emeritus of Developmental and Cell Biology* (regeneration of cultured plant cells, somatic cell genetics)
- Yilin Hu, Ph.D. Loma Linda University, *Assistant Professor of Molecular Biology and Biochemistry*

Bradley S. Hughes, Ph.D. University of California, Irvine, *Associate Professor of Teaching of Ecology and Evolutionary Biology; Education*

Christopher C. Hughes, Ph.D. University of London, *Director of Edwards Lifesciences Center for Advanced Cardiovascular Technology and Professor of Molecular Biology and Biochemistry; Biomedical Engineering* (tissue engineering, growth and patterning of blood vessels)

George L. Hunt, Jr., Ph.D. Harvard University, *Professor Emeritus of Ecology and Evolutionary Biology*

Travis E. Huxman, Ph.D. University of Nevada, *Professor of Ecology and Evolutionary Biology*

Matthew Inlay, Ph.D. University of California, San Diego, *Assistant Professor of Molecular Biology and Biochemistry*

Mahtab F. Jafari, Pharm.D. University of California, San Francisco, *Director of the Center for Healthspan Pharmacology and Professor of Pharmaceutical Sciences; Ecology and Evolutionary Biology* (anti-aging pharmacology and preventive medicine)

Anthony A. James, Ph.D. University of California, Irvine, *Distinguished Professor and Donald Bren Professor of Microbiology and Molecular Genetics; Molecular Biology and Biochemistry*

C. Sunny Jiang, Ph.D. University of South Florida, *Department Chair and Professor of Civil and Environmental Engineering; Ecology and Evolutionary Biology; Environmental Health Sciences* (water pollution microbiology, environmental biotechnology, aquatic microbial ecology)

Pavan Kadandale, Ph.D. Rutgers, The State University of New Jersey, *Assistant Professor of Teaching of Molecular Biology and Biochemistry*

Claudia H. Kawas, M.D. University of Louisville, *Nichols Term Chair in Neuroscience and Professor of Neurology; Neurobiology and Behavior*

Herbert P. Killackey, Ph.D. Duke University, *Professor Emeritus of Neurobiology and Behavior*

Daniel J. Knauer, Ph.D. University of Nebraska, *Professor Emeritus of Developmental and Cell Biology* (human antithrombins and related serine protease inhibitors)

Natalia Komarova, Ph.D. University of Arizona, *UCI Chancellor's Professor of Mathematics; Ecology and Evolutionary Biology* (applied and computational mathematics, mathematical and computational biology, mathematics of complex and social phenomena)

Mei Kong, Ph.D. McGill University, *Associate Professor of Molecular Biology and Biochemistry*

Harold Koopowitz, Ph.D. University of California, Los Angeles, *Professor Emeritus of Ecology and Evolutionary Biology*

Stuart M. Krassner, SCE Johns Hopkins University, *Professor Emeritus of Developmental and Cell Biology* (developmental transitions of hemoflagellates)

Young Jik Kwon, Ph.D. University of Southern California, *Professor of Pharmaceutical Sciences; Biomedical Engineering; Chemical and Biomolecular Engineering; Molecular Biology and Biochemistry* (gene therapy, drug delivery, cancer-targeted therapeutics, artificially-induced cellular vesicles, multi-modal therapies)

Frank M. LaFerla, Ph.D. University of Minnesota, *Dean of the School of Biological Sciences and Professor of Neurobiology and Behavior; Neurology*

Joleah B. Lamb, Ph.D. James Cook University, *Assistant Professor of Ecology and Evolutionary Biology*

Arthur D. Lander, Ph.D. University of California, San Francisco, *Donald Bren Professor and Professor of Developmental and Cell Biology; Biomedical Engineering; Logic and Philosophy of Science* (systems biology of development, pattern formation, growth control)

Michael Leon, Ph.D. University of Chicago, *Professor Emeritus of Neurobiology and Behavior*

Audrey Chen Lew, Ph.D. University of California, Los Angeles, *Assistant Professor of Teaching of Neurobiology and Behavior*

Shin Lin, Ph.D. University of California, Los Angeles, *Professor of Developmental and Cell Biology* (combined use of biochemistry, cell biology, molecular biology, molecular biophysics to study the structure and function of proteins involved in cytoskeletal/contractile functions and signal transduction in muscle and nonmuscle cells)

Chang C. Liu, Ph.D. Scripps Research Institute, *Assistant Professor of Biomedical Engineering; Chemistry; Molecular Biology and Biochemistry* (genetic engineering, directed evolution, synthetic biology, chemical biology)

Melissa Lodoen, Ph.D. University of California, San Francisco, *Associate Professor of Molecular Biology and Biochemistry*

Anthony D. Long, Ph.D. McMaster University, *Professor of Ecology and Evolutionary Biology; Pharmaceutical Sciences*

Catherine Loudon, Ph.D. Duke University, *Professor of Teaching of Ecology and Evolutionary Biology*

Ulrike Luderer, M.D., Ph.D. Northwestern University, *Director of the Environmental Health Sciences Graduate Program and Professor of Medicine; Developmental and Cell Biology; Environmental Health Sciences; Program in Public Health*

Ray Luo, Ph.D. University of Maryland, College Park, *Professor of Molecular Biology and Biochemistry; Biomedical Engineering; Chemical and Biomolecular Engineering; Materials Science and Engineering* (protein structure, noncovalent associations involving proteins)

Andrej Luptak, Ph.D. Yale University, *Professor of Pharmaceutical Sciences; Chemistry; Molecular Biology and Biochemistry* (chemical biology)

Gyorgy Lur, Ph.D. University of Liverpool, *Assistant Professor of Neurobiology and Behavior*

Grant R. MacGregor, Ph.D. University of Sussex, *Professor of Developmental and Cell Biology* (mouse reproduction, development, homeostasis)

Richard E. MacMillen, Ph.D. University of California, Los Angeles, *Professor Emeritus of Ecology and Evolutionary Biology*

Stephen V. Mahler, Ph.D. University of Michigan, *Assistant Professor of Neurobiology and Behavior*

Jerry E. Manning, Ph.D. University of Utah, *Professor Emeritus of Molecular Biology and Biochemistry*

J. Lawrence Marsh, Ph.D. University of Washington, *Professor Emeritus of Developmental and Cell Biology* (mechanisms of neurodegeneration and molecular genetics of development)

John F. Marshall, Ph.D. University of Pennsylvania, *Professor Emeritus of Neurobiology and Behavior*

Rachel Martin, Ph.D. Yale University, *Department Vice Chair and Professor of Chemistry; Molecular Biology and Biochemistry* (analytical, chemical biology, physical chemistry and chemical physics)

Adam Martiny, Ph.D. Technical University of Denmark, *Professor of Earth System Science; Ecology and Evolutionary Biology*

Jennifer Martiny, Ph.D. Stanford University, *UCI Chancellors' Fellow and Professor of Ecology and Evolutionary Biology*

Debra K. Mauzy-Melitz, Ph.D. Marquette University, *Assistant Professor of Teaching of Developmental and Cell Biology* (role of writing in scientific teaching)

James L. McGaugh, Ph.D. University of California, Berkeley, *Research Professor and Professor Emeritus of Neurobiology and Behavior; Logic and Philosophy of Science*

Matthew J. McHenry, Ph.D. University of California, Berkeley, *Professor of Ecology and Evolutionary Biology*

Bruce L. McNaughton, Ph.D. Carleton University, *UCI Distinguished Professor of Neurobiology and Behavior*

Alexander McPherson, Ph.D. Purdue University, *Professor Emeritus of Molecular Biology and Biochemistry*

Raju Metherate, Ph.D. McGill University, *Professor of Neurobiology and Behavior*

Ronald L. Meyer, Ph.D. California Institute of Technology, *Professor Emeritus of Developmental and Cell Biology* (development of nerve connections, nerve injury, and regeneration)

John Middlebrooks, Ph.D. University of California, San Francisco, *Professor of Otolaryngology; Biomedical Engineering; Cognitive Sciences; Neurobiology and Behavior*

Edwin S. Monuki, M.D., Ph.D. University of California, San Diego, *Department Chair and Warren L. Bostick Chair in Pathology and Professor of Pathology and Laboratory Medicine; Developmental and Cell Biology*

Kailen Mooney, Ph.D. University of Colorado Boulder, *Professor of Ecology and Evolutionary Biology*

Naomi Morrisette, Ph.D. University of Pennsylvania, *Associate Professor of Molecular Biology and Biochemistry*

Seyed Ali Mortazavi, Ph.D. California Institute of Technology, *Professor of Developmental and Cell Biology; Biological Chemistry* (functional genomics to study transcriptional regulation in development)

Laurence D. Mueller, Ph.D. University of California, Davis, *Professor of Ecology and Evolutionary Biology*

R. Michael Mulligan, Ph.D. Michigan State University, *Biological Sciences Associate Dean of Graduate Studies and Professor of Developmental and Cell Biology; Ecology and Evolutionary Biology* (RNA editing in plant mitochondria and chloroplasts)

Edward L. Nelson, M.D. University of Oregon, *Associate Professor of Medicine; Molecular Biology and Biochemistry*

Andrea C. Nicholas, Ph.D. University of Chicago, *Associate Professor of Teaching of Neurobiology and Behavior*

Diane K. O'Dowd, Ph.D. University of California, San Diego, *Professor of Developmental and Cell Biology; Anatomy and Neurobiology* (regulation of activity in developing and adult nervous systems)

Ian Parker, Ph.D. University College London, *Professor of Neurobiology and Behavior; Physiology and Biophysics*

Michael J. Parsons, Ph.D. University of London, *Associate Professor of Developmental and Cell Biology* (development and regeneration of the endocrine pancreas)

Maksim Plikus, Ph.D. University of Southern California, *Associate Professor of Developmental and Cell Biology* (mechanisms of regeneration, stem cell control)

Thomas L. Poulos, Ph.D. University of California, San Diego, *Distinguished Professor of Molecular Biology and Biochemistry; Chemistry; Pharmaceutical Sciences* (chemical biology)

Ilhem Messaoudi Powers, Ph.D. Weill Cornell Graduate School of Medical Sciences, *Associate Professor of Molecular Biology and Biochemistry; Microbiology and Molecular Genetics*

Jessica Pratt, Ph.D. University of California, Irvine, *Associate Professor of Teaching of Ecology and Evolutionary Biology*

Jennifer A. Prescher, Ph.D. University of California, Berkeley, *Professor of Chemistry; Molecular Biology and Biochemistry; Pharmaceutical Sciences* (chemical biology, organic and synthetic)

James T. Randerson, Ph.D. Stanford University, *UCI Chancellor's Professor of Earth System Science; Civil and Environmental Engineering; Ecology and Evolutionary Biology*

Jose Mari Ranz Navaltro, Ph.D. Universidad Autónoma de Madrid, *Associate Professor of Ecology and Evolutionary Biology*

Olga Razorenova, Ph.D. Institute of Molecular Genetics, *Assistant Professor of Molecular Biology and Biochemistry*

Elizabeth L. Read, Ph.D. University of California, Berkeley, *Assistant Professor of Chemical and Biomolecular Engineering; Molecular Biology and Biochemistry* (dynamics of complex biochemical systems, regulation of immune responses)

Markus W. Ribbe, Ph.D. University of Bayreuth, *UCI Chancellor's Professor of Molecular Biology and Biochemistry; Chemistry* (chemical biology, inorganic and organometallic)

Alejandra Rodriguez-Verdugo, Ph.D. University of California, Irvine, *Assistant Professor of Ecology and Evolutionary Biology*

Michael R. Rose, Ph.D. University of Sussex, *Professor of Ecology and Evolutionary Biology*

Ann K. Sakai, Ph.D. University of Michigan, *Professor of Ecology and Evolutionary Biology*

Brian Sato, Ph.D. University of California, San Diego, *Associate Professor of Teaching of Molecular Biology and Biochemistry; Education*

Thomas F. Schilling, Ph.D. University of Oregon, *Department Chair and Professor of Developmental and Cell Biology* (zebrafish development, vertebrate genetics, craniofacial development)

Donald F. Senear, Ph.D. University of Washington, *Professor of Molecular Biology and Biochemistry*

Albert Siryaporn, Ph.D. University of Pennsylvania, *Assistant Professor of Physics and Astronomy; Molecular Biology and Biochemistry*

Cascade J. Sorte, Ph.D. University of California, Davis, *Associate Professor of Ecology and Evolutionary Biology*

Robert Spitale, Ph.D. University of Rochester, *Director of the UCI Transcriptomics Core and Associate Professor of Pharmaceutical Sciences; Chemistry; Molecular Biology and Biochemistry* (chemistry, chemical biology, RNA biology)

Craig Stark, Ph.D. Carnegie Mellon University, *James L. McGaugh Chair in the Neurobiology of Learning and Memory and Professor of Neurobiology and Behavior*

Arnold Starr, M.D. New York University, *Research Professor of Neurobiology and Behavior*

Oswald Steward, Ph.D. University of California, Irvine, *Director, Reeve-Irvine Research Center and Reeve-Irvine Chair in Spinal Cord Injury Research and Distinguished Professor of Anatomy and Neurobiology; Neurobiology and Behavior*

Georg F. Striedter, Ph.D. University of California, San Diego, *Professor of Neurobiology and Behavior*

Christine Suetterlin, Ph.D. University of Basel, *Associate Professor of Developmental and Cell Biology* (centrosome and cilia regulation, Golgi, host-pathogen interaction)

Katumi Sumikawa, Ph.D. Imperial College London, *Professor of Neurobiology and Behavior*

Sha Sun, Ph.D. University of Chicago, *Assistant Professor of Developmental and Cell Biology* (long noncoding RNAs in epigenetic programming)

Vivek Swarup, Ph.D. University of Laval, *Assistant Professor of Neurobiology and Behavior*

Richard Symanski, Ph.D. Syracuse University, *Professor of Teaching of Ecology and Evolutionary Biology*

Celia Symons, Ph.D. University of California, San Diego, *Assistant Professor of Ecology and Evolutionary Biology*

Andrea Tenner, Ph.D. University of California, San Diego, *Professor of Molecular Biology and Biochemistry; Neurobiology and Behavior*

Leslie M. Thompson, Ph.D. University of California, Irvine, *Chancellor's Professor and Donald Bren Professor of Psychiatry and Human Behavior; Biological Chemistry; Neurobiology and Behavior*

Katherine L. Thompson-Peer, Ph.D. Harvard Medical School, *Assistant Professor of Developmental and Cell Biology* (investigating how neurons respond and recover after injury)

Kevin Thornton, Ph.D. University of Chicago, *Associate Professor of Ecology and Evolutionary Biology*

Roberto Tinoco, Ph.D. University of California, San Diego, *Assistant Professor of Molecular Biology and Biochemistry*

Kathleen K. Treseder, Ph.D. Stanford University, *UCI Chancellor's Fellow and Professor of Ecology and Evolutionary Biology*

Shiou-Chuan (Sheryl) Tsai, Ph.D. University of California, Berkeley, *Professor of Molecular Biology and Biochemistry; Chemistry; Pharmaceutical Sciences*

Luis P. Villarreal, Ph.D. University of California, San Diego, *Professor Emeritus of Molecular Biology and Biochemistry*

Craig Walsh, Ph.D. University of California, Los Angeles, *Professor of Molecular Biology and Biochemistry*

Wenqi Wang, Ph.D. Shanghai Institutes for Biological Sciences, *Assistant Professor of Developmental and Cell Biology* (the signaling networks underlying tissue homeostasis and organ size control)

Rahul Warrior, Ph.D. Yale University, *Associate Professor of Developmental and Cell Biology* (developmental genetics of transcription and proteoglycan synthesis)

Arthur Weis, Ph.D. University of Illinois at Urbana-Champaign, *Professor Emeritus of Ecology and Evolutionary Biology*

Gregory A. Weiss, Ph.D. Harvard University, *Professor of Chemistry; Molecular Biology and Biochemistry; Pharmaceutical Sciences* (analytical, chemical biology, organic and synthetic, polymer, materials, nanoscience)

Stephen G. Weller, Ph.D. University of California, Berkeley, *Professor Emeritus of Ecology and Evolutionary Biology*

Katrine Whiteson, Ph.D. University of Chicago, *Assistant Professor of Molecular Biology and Biochemistry*

Dominik Franz X. Wodarz, Ph.D. Oxford University, *Professor of Ecology and Evolutionary Biology; Mathematics*

Marcelo A. Wood, Ph.D. Princeton University, *UCI Chancellor's Fellow and Department Chair and Professor of Neurobiology and Behavior*

Clifford A. Woolfolk, Ph.D. University of Washington, *Professor Emeritus of Molecular Biology and Biochemistry*

Zeba Wunderlich, Ph.D. Harvard University, *Assistant Professor of Developmental and Cell Biology* (understanding the organization of regulatory information in the genome)

Xaiohui Xie, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Computer Science; Developmental and Cell Biology* (computational biology, bioinformatics, genomics, neural computation, machine learning)

Guiyun Yan, Ph.D. University of Vermont, *Professor of Program in Public Health; Ecology and Evolutionary Biology*

Michael Yassa, Ph.D. University of California, Irvine, *UCI Chancellor's Fellow and Director of the Center for the Neurobiology of Learning and Memory and Associate Professor of Neurobiology and Behavior*

## Biological Sciences Courses

### BIO SCI 1A. Life Sciences. 4 Units.

Designed to introduce nonmajors to the basic concepts of modern biology. Discussion of evolutionary biology, ecology, molecular biology, and genetics.

(II)

**BIO SCI 2A. Freshman Seminar. 2 Units.**

Weekly meetings consisting of presentations by faculty, professional staff, and Peer Academic Advisors provide information about the School of Biological Sciences, campus resources, learning skills, and special programs/opportunities.

Grading Option: Pass/no pass only.

Restriction: Freshmen only. School of Biological Sciences students only.

**BIO SCI 2B. Freshman Seminar . 1 Unit.**

Faculty presentations and readings focused on the structure, function, opportunities, and current issues in the biological sciences.

Grading Option: Pass/no pass only.

Restriction: Freshmen only. School of Biological Sciences students only.

**BIO SCI 2C. Solutions in Science. 1 Unit.**

Students will be introduced to approaches that can be used to solve scientific problems. These methods can be utilized in introductory to advanced classes and will allow students to become independent thinkers.

**BIO SCI 2D. EASE Seminar. 1 Workload Unit.**

Seminars designed to help students achieve success in STEM courses. Provides collaborative learning environment facilitated by undergraduate mentor. Students develop critical thinking and study skills. Also receive guidance to campus resources that assist acclimation to University.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**BIO SCI 3A. Career Decision Making. 1 Workload Unit.**

An introductory course designed to facilitate the career decision-making process. Decision-making processes, values, and standardized tests of aptitudes, interests, and values are utilized with non-test data in appraising biological sciences career options.

Grading Option: Workload Credit P/NP Only.

**BIO SCI 3B. Non-Health Sciences Career Exploration. 1 Workload Unit.**

A survey course designed to assist students in exploring non-health science career options. Lectures by professionals in various fields.

Grading Option: Workload Credit P/NP Only.

**BIO SCI 6. Tropical Biology: Race to Save the Tropics. 4 Units.**

Population growth combines with tropical resource consumption by industrialized nations to cause high rates of deforestation, pollution, habitat fragmentation, and extinction of species. Discusses tropical biomes, their population, community, ecosystem processes, and possible means of conservation of biodiversity.

(II)

**BIO SCI 9A. Nutrition Science. 4 Units.**

An introduction to nutrition science, integrating concepts from biology, biochemistry, microbiology, physiology, and psychology to explain the interaction between nutrients and the human body. Biological basis of nutrient standards is analyzed. Effects of nutrition, behavior, exercises on health/disease.

(II)

**BIO SCI 9B. Biology and Chemistry of Food and Cooking . 4 Units.**

The kitchen is used as a laboratory to introduce fundamental principles of biology, chemistry, and physics. A molecular/cellular analysis of cooking, including concepts such as protein structure, browning reactions, colloids, emulsions, carbohydrate metabolism, and development of flavor/texture through biochemical transformations.

(II)

**BIO SCI 9D. Diseases of the Twenty-First Century . 4 Units.**

Why do we get sick? An introduction to the biological basis of human disease, including diseases of the cardiovascular, respiratory, nervous, and reproductive systems. Case studies present diagnosis, treatment, and prevention protocols. Inheritable and infectious diseases also discussed.

Overlaps with BIO SCI 10, BIO SCI 12D.

(II)

**BIO SCI 9E. Horticulture Science . 4 Units.**

Scientific principles of horticulture at the UCI Arboretum. Taxonomy, plant life history strategies; experiments with seed dormancy; morphological adaptations for specialized sexual and clonal reproduction; basics of plant propagation and ecological restoration. Materials fee.

(II)

**BIO SCI 9G. Physiology of Fitness. 4 Units.**

An introduction to the organ systems of the human body, including muscle, cardiovascular, immune, and reproductive systems, with an emphasis on how the body responds to exercise, diet, and disease.

(II)

**BIO SCI 9J. Biology of Oriental Medicine. 4 Units.**

With lectures, demonstrations, and hands-on learning, the theory and practice of herbal medicine, acupuncture, qigong, and manipulative therapies are explained in Western biomedical terms. The latest basic and clinical research advances in each area are also described.

Overlaps with BIO SCI 9N, BIO SCI D124.

(II)

**BIO SCI 9K. Global Change Biology. 4 Units.**

Field trips and lectures that address ways in which humans are altering the global environment, with consequences for the ecology of animals, plants, and microbes.

(II)

**BIO SCI 10. The Biology of Human Diseases. 4 Units.**

Introduction to concepts of diagnosis, treatment, and prevention of major human infectious diseases. Covers some aspects of epidemiology. Scope and impact of infectious diseases in the present and past experiences in controlling infectious disease. Reviews biology of human organ systems.

Overlaps with BIO SCI 9D, BIO SCI 12D.

(II)

**BIO SCI 11. Topics in Biological Sciences. 4 Units.**

Studies in selected areas of biological sciences.

Repeatability: May be taken for credit 3 times.

**BIO SCI 12. Molecular Basis of Human Disease. 4 Units.**

Describes the cause and treatment of human diseases at the cutting edge of modern molecular understanding for non-science majors, including history, interviews, and stories.

(II)

**BIO SCI 14. California Teach 1: Introduction to Science and Mathematics Teaching. 3 Units.**

First in a series for students interested in becoming middle or high school teachers of mathematics or science. Students gain an understanding of effective, research-based teaching strategies. Includes supervised field experience in a K-12 classroom.

Same as PHY SCI 5.

Restriction: School of Physical Sciences students have first consideration for enrollment. School of Biological Sciences students have first consideration for enrollment. School of Info & Computer Sci students have first consideration for enrollment. School of Engineering students have first consideration for enrollment.

**BIO SCI 17. Evolutionary Psychology. 4 Units.**

Introductory overview of the field of evolutionary psychology. Surveys topics operating at the interface of social sciences, i.e. behavioral psychology and evolutionary biology, while developing select aspects of the history of this developing field.

(II)

**BIO SCI 23. Sustainable Landscaping: Design and Practices. 4 Units.**

Through lectures and hands-on work, students learn how to design habitats around dwellings, within cities, and in rural environments. These include traditional/sustainable landscaping, restoration, stormwater/wastewater treatment, xeriscaping, and low impact development design. Sustainable landscape plant materials emphasized.

(II)

**BIO SCI 25. Biology of Cancer. 4 Units.**

Biological, clinical, and psychosocial nature of cancer through the perspectives of medical researchers, biologists, physicians, and health educators. For students of all majors, designed so that each can increase personal awareness of the biology of cancer.

Restriction: BIO SCI 25 may not be taken for credit if taken after BIO SCI M125.

**BIO SCI 35. The Brain and Behavior. 4 Units.**

Introduction to how the brain works. Biological processes underlying perception, movement, sleep-wake cycles, motivation, language, learning, and memory. Changes in the brain associated with sex differences, drug use, aging, seasons, and time of day. Fundamental properties of the nervous system.

(II)

**BIO SCI 36. Drugs and the Brain. 4 Units.**

Introduction to the actions of drugs on the brain. How studying drug action helps reveal normal functions of neurons. How drugs can correct neural disorders or disrupt neural function. Biological issues related to drug abuse, drug addiction, and drug seeking.

(II)

**BIO SCI 37. Brain Dysfunction and Repair . 4 Units.**

Introduction to the disruptions in brain function that underlie disorders such as Alzheimer's disease, Parkinsonism, schizophrenia, and depression, and the basis for drug therapies. The brain's ability to repair itself after damage and the pros and cons of that repair.

(II)

**BIO SCI 38. Mind, Memory, Amnesia, and the Brain. 4 Units.**

Introduction to neural mechanisms underlying learning and memory. Emphasis on molecular changes that mediate memory as well as structures involved in different forms of memory. Additionally, examines the biology of memory phenomena, from extraordinary memory to false memory to amnesia.

(II)

**BIO SCI 41. Aspects of Mood Disorder. 4 Units.**

There are significant differences in response to psychiatric illness across cultures. Delves into the neuroscience underlying mood disorder, investigating current pharmacological treatments and sociocultural influences on treatment outcomes.

(II)

**BIO SCI 43. Media on the Mind. 4 Units.**

Surveys an ever-increasing collection of research, suggesting modern technology and social media are changing in the way our brains function.

(II)

**BIO SCI 44. Stem Cells and Brain Repair. 4 Units.**

Students introduced to the field of regenerative neurobiology. Both basic stem cell discoveries and their potential clinical application to brain disorders examined. Discussion of opportunities, challenges, and implications of this research.

Overlaps with BIO SCI N172.

(II)

**BIO SCI 45. AIDS Fundamentals. 4 Units.**

Considers the biological and sociological bases of the AIDS epidemic. Topics include the history of AIDS, current medical knowledge, transmission, risk reduction, and how the community can respond.

Same as PUBHLTH 80.

(II)

**BIO SCI 46. Discussion and Literature Research in AIDS. 2-4 Units.**

Students carry out two activities: (1) leading discussions about HIV/AIDS (predominantly regarding sociological and personal reactions) among students taking the AIDS Fundamentals course and (2) literature research about biomedical aspects of AIDS.

Prerequisite: BIO SCI 45 or PUBHLTH 80

**BIO SCI 47. Stress. 4 Units.**

Investigates stress at a psychological, physiological, and molecular level, and provides a current overview of the field of stress research.

(II)

**BIO SCI 55. Introduction to Ecology. 4 Units.**

Principles of ecology; application to populations, communities, ecosystems, and humans.

Restriction: No Biological Sciences Majors. BIO SCI 55 may not be taken for credit if taken after BIO SCI 96 or BIO SCI E106.

(II)

**BIO SCI 56. Life Sciencing from Aristotle to Venter. 4 Units.**

History of biology from Aristotle through to the scientific revolutions precipitated by Darwin, geneticists, molecular biologists, and now genomics. Introduces the practices and achievements of biological research to both beginning biology students and non-majors.

Overlaps with BIO SCI H90, BIO SCI H90B.

(II)

**BIO SCI 75. Human Development: Conception to Birth. 4 Units.**

Processes leading to the birth of a healthy child and the avoidance of birth defects. Male and female reproductive systems, hormonal control of egg-sperm formations, sexual intercourse, contraception, venereal diseases, fertilization, cell division, embryonic development, fetal physiology.

(II)

**BIO SCI H90. The Idiom and Practice of Science. 4 Units.**

The importance of biological sciences in our world is discussed. Topics may include brain and behavior, health and disease, genetics and society, and conservation biology. Primary goal is to encourage students to understand better the world in which they live.

Restriction: Campuswide Honors Collegium students only.

(II)

**BIO SCI 92. Curriculum. 1-4 Units.**

Initiation, planning, and coordination of student-run courses.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 12 times.

Restriction: School of Biological Sciences students only.

**BIO SCI 93. From DNA to Organisms. 4 Units.**

Cell biology, biochemistry, genetics, and the biology of organ systems. Covers concepts of building blocks (nucleotides, amino acids, and cells) and of information flow (DNA to proteins, receptors to nuclei, the blood to distant organs, and DNA to offspring).

Restriction: BIO SCI 93 may not be taken for credit if taken after BIO SCI 97 or BIO SCI 98.

(II)

**BIO SCI H93. Honors From DNA to Organisms. 4 Units.**

Cell biology, biochemistry, genetics, and the biology of organ systems. Covers concepts of building blocks (nucleotides, amino acids, and cells) and of information flow (DNA to proteins, receptors to nuclei, the blood to distant organs, and DNA to offspring).

Restriction: BIO SCI H93 may not be taken for credit if taken after BIO SCI 97 or BIO SCI 98.

(II)

**BIO SCI 94. From Organisms to Ecosystems. 4 Units.**

Patterns of diversity, ecology, and evolutionary biology. Emphasis is on the Tree of Life and how its members are distributed and interact.

Prerequisite: BIO SCI 93 or BIO SCI H93

Restriction: BIO SCI 1A may not be taken for credit if taken after BIO SCI 94.

(II)

**BIO SCI 97. Genetics. 4 Units.**

Introduction to genetics. Basic features of replication and expression of DNA, cell division, and gene transmission. Recombination and mutation in diploid organisms.

Prerequisite: BIO SCI 94

Restriction: Pharmaceutical Sciences Majors have first consideration for enrollment. Public Health Majors have first consideration for enrollment. Nursing Science Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment. School of Biological Sciences students have first consideration for enrollment.

**BIO SCI H97. Honors Genetics. 4 Units.**

Introduction to genetics. Basic features of replication and expression of DNA, cell division, and gene transmission. Recombination and mutation in diploid organisms.

Restriction: Campuswide Honors Collegium students only. BIO SCI H97 may not be taken for credit if taken after BIO SCI 97.

**BIO SCI 98. Biochemistry. 4 Units.**

Structure and properties of proteins; major biochemical pathways and mechanisms for their control.

Prerequisite or corequisite: BIO SCI 97 or BIO SCI H97 and CHEM 51B

Restriction: School of Biological Sciences students have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment. Nursing Science Majors have first consideration for enrollment. Pharmaceutical Sciences Majors have first consideration for enrollment. Public Health Majors have first consideration for enrollment.

**BIO SCI 99. Molecular Biology. 4 Units.**

Biochemistry and replication of nucleic acids; molecular genetics; protein biosynthesis; genetic code; regulation of expression of genetic information; biochemical evolution.

Prerequisite: BIO SCI 98

Restriction: Pharmaceutical Sciences Majors have first consideration for enrollment. Public Health Majors have first consideration for enrollment. Nursing Science Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment. School of Biological Sciences students have first consideration for enrollment.

**BIO SCI 100. Scientific Writing. 3 Units.**

Designed to give an overview of the basic aspects of scientific writing relevant to reporting research in the Biological Sciences.

Prerequisite: BIO SCI 99. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: School of Biological Sciences students have first consideration for enrollment. Bio Sci and Educ Media Design Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment. Pharmaceutical Sciences Majors have first consideration for enrollment.

**BIO SCI 101. California Teach 2: Middle School Science and Mathematics Teaching. 3 Units.**

Second in a series for students interested in becoming middle or high school teachers of mathematics or science. Students gain an understanding of effective, research-based teaching strategies for grades 6-8. Includes supervised field experience in a middle school classroom.

Prerequisite: PHY SCI 5

Same as PHY SCI 105.

Restriction: School of Physical Sciences students have first consideration for enrollment. School of Biological Sciences students have first consideration for enrollment. School of Info & Computer Sci students have first consideration for enrollment. School of Engineering students have first consideration for enrollment.

**BIO SCI D103. Cell Biology. 4 Units.**

Analysis of the basic structure and function of animal cells, with an emphasis on the regulation of cellular processes. The basic features of membranes, cellular compartmentalization, protein trafficking, vesicular transport, cytoskeleton, adhesion, signal transduction, and cell cycle are covered.

Prerequisite: BIO SCI 99

Restriction: Students who require this class for completion of their degree have first consideration for enrollment.

**BIO SCI D104. Developmental Biology. 4 Units.**

Cellular and molecular analysis of how a fertilized egg develops into an organism consisting of complex structures such as the eye, arms, and brain. Emphasis is on the key concepts of developmental processes underlying pattern formation, growth, and regeneration.

Prerequisite: BIO SCI 99

Restriction: Students who require this class for completion of their degree have first consideration for enrollment.

**BIO SCI D105. Cell, Developmental, and Molecular Biology of Plants . 4 Units.**

Emphasizes the special features of plant cells and plant development as compared to animals. Two central topics: plants' ability to fuel our planet through photosynthesis, and the interactions of plants with microorganisms in making nitrogen available to other life forms.

Prerequisite: BIO SCI 97 or BIO SCI H97

Restriction: Students who require this class for completion of their degree have first consideration for enrollment.

**BIO SCI E106. Processes in Ecology and Evolution. 4 Units.**

An in-depth study of the mechanisms that drive evolution and ecology including: natural selection, mutation, genetic drift, speciation, extinction, life history patterns, population dynamics, ecosystem and community structure, predator-prey and host pathogen interactions, and social behavior.

Prerequisite: BIO SCI 94

Restriction: Students who require this class for completion of their degree have first consideration for enrollment.

**BIO SCI E106L. Habitats and Organisms. 4 Units.**

Introduces students to local habitats and organisms through required field trips and applies ecological and evolutionary principles from BIO SCI E106. Students also explore related literature.

Prerequisite: (BIO SCI 100 or BIO SCI 108) and BIO SCI E106. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Seniors only. BIO SCI E106L may not be taken for credit concurrently with or after taking BIO SCI E166. Students who require this lab for completion of their degree have first consideration for enrollment.

**(Ib)****BIO SCI E107. Seminar in Ecology and Evolutionary Biology. 2 Units.**

Invited speakers, graduate students, and faculty present current research in ecology and evolutionary biology.

Grading Option: Pass/no pass only.

Restriction: Upper-division students only. Ecology and Evolutionary Biol Majors only.

**BIO SCI 108. Research Methods. 4 Units.**

Explores tools of inquiry for developing and implementing science research projects. Students undertake independent projects requiring data collection, analysis, and modeling, and the organization and presentation of results. Additional topics include ethical issues and role of scientific literature.

Prerequisite: BIO SCI 14 or PHY SCI 5

Same as PHYSICS 193, CHEM 193.

**BIO SCI E109. Human Physiology. 4 Units.**

Functional features of the major organ systems in the human body. Emphasis on homeostasis and the interactions of organ systems in health and disease. (Discussion of behavior and brain function deferred to BIO SCI N110.).

Prerequisite: (BIO SCI 93 or BIO SCI H93) and CHEM 1C

Overlaps with PHRMSCI 120.

Restriction: Students who require this class for completion of their degree have first consideration for enrollment.

**BIO SCI N110. Neurobiology and Behavior. 4 Units.**

Consideration of the evolution of behavior, including ethological and psychological aspects and analysis of neuroanatomical, neurochemical, neurophysiological, and neuroendocrine systems underlying basic behavioral processes.

Prerequisite or corequisite: BIO SCI 99

Restriction: Students who require this class for completion of their degree have first consideration for enrollment.

**BIO SCI D111L. Developmental and Cell Biology Laboratory. 4 Units.**

Covers the division of cells, isolate cellular organelles (chloroplasts, mitochondria, nuclei), and follows changes in cells undergoing programmed cell death. Development is demonstrated in experiments showing cooperation of individual cells in forming a multicellular organism. Materials fee.

Prerequisite or corequisite: (BIO SCI 100 or BIO SCI 108) and (BIO SCI D103 or BIO SCI D104 or BIO SCI D105)

Restriction: Seniors only. Students who require this lab for completion of their degree have first consideration for enrollment.

**(Ib)**

**BIO SCI E112L. Physiology Laboratory. 4 Units.**

Laboratory with a focus on the whole organism and its organ systems. Examples of structure-function relationships are drawn from both animal and human physiology. Cellular and molecular aspects are introduced as required. Materials fee.

Prerequisite: (BIO SCI 100 or BIO SCI 108) and (BIO SCI E109 or BME 120) and BME 121.

Overlaps with PHRMSCI 120L.

Restriction: Seniors only. Students who require this lab for completion of their degree have first consideration for enrollment.

**(Ib)**

**BIO SCI D113. Genetics Majors Seminar. 1 Unit.**

Genetics majors attend a weekly seminar to discuss current research techniques and career opportunities in the field. Students have the opportunity to present their own independent research.

Repeatability: May be taken for credit 2 times.

Restriction: Genetics Majors only.

**BIO SCI N113L. Neurobiology Laboratory. 3 Units.**

An in-depth exploration into biology and physiology of the nervous system. Labs include neuroanatomy, electrophysiology, pharmacology, behavior, experimental design, EEG, and scientific writing. Materials fee.

Prerequisite or corequisite: (BIO SCI 100 or BIO SCI 108) and (BIO SCI N110 or BIO SCI N115A)

Restriction: Seniors only. Students who require this lab for completion of their degree have first consideration for enrollment.

**(Ib)**

**BIO SCI D114. Developmental and Cell Biology Majors Seminar. 1 Unit.**

Developmental and Cell Biology majors attend a weekly seminar to discuss current research techniques and career opportunities in the field. Students have the opportunity to present their own independent research.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

Restriction: Developmental and Cell Biology Majors only.

**BIO SCI M114. Advanced Biochemistry. 4 Units.**

Physical-chemical properties of macromolecules. Structure-function relationships in nucleic acids, protein, carbohydrates, and lipids. Integration and regulation of metabolism. Biochemistry of organs and biochemistry of diseases.

Prerequisite: BIO SCI 99

**BIO SCI M114L. Biochemistry Laboratory. 5 Units.**

Properties of enzymes and the culture and isolation of mutants of microorganisms. Materials fee.

Prerequisite: BIO SCI 99 and (BIO SCI 100 or BIO SCI 108)

Restriction: Seniors only. Students who require this lab for completion of their degree have first consideration for enrollment.

**(Ib)**

**BIO SCI E115L. Evolution Laboratory. 4 Units.**

Students perform experiments which illustrate important concepts in evolutionary biology such as natural selection, random genetic drift, inbreeding, age-specific selection, sexual selection, and phylogenetic reconstruction. Materials fee.

Prerequisite: (BIO SCI 100 or BIO SCI 108) and BIO SCI E106. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Seniors only. Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

**BIO SCI N115A. Advanced Neurobiology I. 4 Units.**

In-depth coverage of neurobiology, ranging from molecular neurobiology to functional brain imaging. Discussion of molecular, cellular, and developmental neurobiology.

Prerequisite: BIO SCI 99

Restriction: Neurobiology Majors only.

**BIO SCI N115B. Advanced Neurobiology II. 4 Units.**

In-depth coverage of neurobiology, ranging from molecular neurobiology to functional brain imaging.

Prerequisite: BIO SCI N115A

Restriction: Neurobiology Majors only.

**BIO SCI M116. Advanced Molecular Biology. 4 Units.**

Mechanisms of gene expression; special emphasis on regulatory events that occur in Eukaryotic organisms other than initiation of transcription. Chromatin structure and rearrangement, RNA polymerases, cis- and trans-acting elements, RNA processing, transport and stability, protein synthesis, trafficking, and turnover.

Prerequisite: BIO SCI 99 and (BIO SCI M114L or BIO SCI M116L)

**BIO SCI M116L. Molecular Biology Laboratory. 5 Units.**

Students perform experiments which illustrate the chemical and biological properties of nucleic acids. Emphasis is placed on recent techniques in recombinant DNA technology including gene isolation and characterization. Materials fee.

Prerequisite: BIO SCI 99 and (BIO SCI 100 or BIO SCI 108)

Restriction: Seniors only. Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

**BIO SCI E117A. Exercise Sciences Seminar. 3 Units.**

Students are introduced to fundamental concepts and topics in exercise science with an emphasis on developing innovative approaches for exploring the biological response to physical activity/inactivity. Interactive course with robust discussion amongst faculty and students.

Prerequisite: BIO SCI E109 and BIO SCI E112L and BIO SCI E183

**BIO SCI E117B. Exercise Sciences Seminar. 3 Units.**

Students are introduced to fundamental concepts and topics in exercise science with an emphasis on developing innovative approaches for exploring the biological response to physical activity/inactivity. Interactive course with robust discussion amongst faculty and students.

Prerequisite: BIO SCI E109 and BIO SCI E112L and BIO SCI E183

**BIO SCI E117C. Exercise Sciences Seminar. 3 Units.**

Students are introduced to fundamental concepts and topics in exercise science with an emphasis on developing innovative approaches for exploring the biological response to physical activity/inactivity. Interactive course with robust discussion amongst faculty and students.

Prerequisite: BIO SCI E109 and BIO SCI E112L and BIO SCI E183

**BIO SCI N117. Introduction to Neuroscience Clinical Trials. 4 Units.**

Provides an overview of the science of clinical development of treatments for neurological disease and injury.

Prerequisite: BIO SCI 99

**BIO SCI E118. Ecosystem Ecology. 4 Units.**

A mechanistic perspective on ecosystem processes. Covers ecosystem development, element cycling, and interactions with plants and microbes. The role of ecosystems in environmental change is also addressed.

Prerequisite: BIO SCI E106 or EARTHSS 51 or EARTHSS 60A or CHEM 51C

Same as EARTHSS 164.

Restriction: Earth System Science Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Ecology and Evolutionary Biol Majors have first consideration for enrollment.

Concurrent with EARTHSS 264.

**BIO SCI M118L. Experimental Microbiology Laboratory. 5 Units.**

Introductory general microbiology designed for preprofessional biology majors. Includes microscopy, cultivation of bacteria, morphological and biochemical characterization of bacteria, microbial metabolism, growth and genetics, microorganisms and human disease, and interactions of microorganisms with the environment. Materials fee.

Prerequisite: BIO SCI 99 and (BIO SCI 100 or BIO SCI 108)

Restriction: Seniors only. Students who require this lab for completion of their degree have first consideration for enrollment.

**(Ib)**

**BIO SCI N118. Clinical Psychophysiology. 4 Units.**

Psychophysiology investigates the relationships between physiological processes and psychological phenomena. Technologies examined include reaction times, heart rate variability, EEGs, ERPs, magnetoencephalography, and eye tracking. Applications include diagnosis, the longitudinal assessment, and the identification of individuals at risk of disease onset.

Prerequisite: BIO SCI N110 or BIO SCI N115A or PSYCH 9A or PSCI 11A

Same as PSYCH 122P.

**(II).**

**BIO SCI E119. Selfish DNA. 3 Units.**

Focuses on the genetics and evolution of selfish DNA, and introduces necessary background knowledge from molecular biology, cytogenetics, and bioinformatics.

Prerequisite: BIO SCI 94 and BIO SCI 97

**BIO SCI M119. Advanced Topics in Immunology. 4 Units.**

Literature-based, interactive discussions focused on review of seminal historic and recent immunology literature. Student responsibilities include reading, critical evaluation, and discussion of manuscripts.

Prerequisite: BIO SCI M121

Restriction: Microbiology and Immunology Majors have first consideration for enrollment.

**BIO SCI N119. History of Neuroscience. 4 Units.**

An overview of the conceptual and technical foundations of contemporary neuroscience from ancient times to the present. The subjects include synapses, neurons, brain organization, sensory, motor and regulatory systems, learning and memory, human brain function and dysfunction.

Prerequisite: BIO SCI 35 or BIO SCI N110 or BIO SCI N115A or PSY BEH 115D or (PSYCH 9A and PSYCH 9B and PSYCH 9C)

Restriction: Upper-division students only.

Concurrent with NEURBIO 255.

**BIO SCI E120. Marine Biology . 4 Units.**

Examines the biotic and abiotic factors influencing the physiology, distribution, abundances, interactions, and evolution of marine organisms and the roles of those organisms in mediating ecosystem services and functions. A field trip is required. Materials fee.

Prerequisite: BIO SCI 94

**BIO SCI M120. Signal Transduction in Mammalian Cells. 4 Units.**

Introduction to major biochemical pathways that transmit information from extracellular cues into changes in cell behavior. Focuses on kinases, phosphatases, G proteins, second messengers, and protein-protein interactions. Includes discussion of primary research articles and experimental techniques.

Prerequisite: BIO SCI D103

**BIO SCI N120A. Human Biology I. 4 Units.**

Provides an in-depth look at cutting-edge topics in physiology and epidemiology as they relate to global issues of ethics, anthropology, and socioeconomics, providing the student with an understanding of human health beyond basic biological function.

Prerequisite: BIO SCI 99

Restriction: Human Biology Majors only.

**BIO SCI N120B. Human Biology II. 4 Units.**

Provides an in-depth look at cutting-edge topics in physiology and epidemiology as they relate to global issues of ethics, anthropology, and socioeconomics, providing the student with an understanding of human health beyond basic biological function.

Prerequisite: BIO SCI 99

Restriction: Human Biology Majors only.

**BIO SCI N120C. Human Biology III. 4 Units.**

Provides an in-depth look at cutting-edge topics in physiology and epidemiology as they relate to global issues of ethics, anthropology, and socioeconomics, providing the student with an understanding of human health beyond basic biological function.

Prerequisite: BIO SCI 99

Restriction: Human Biology Majors only.

**BIO SCI M121. Immunology with Hematology. 4 Units.**

Antibodies, antigens, antigen-antibody reactions, cells and tissues of lymphoreticular and hematopoietic systems, and individual and collective components of cell-mediated and humoral immune response.

Prerequisite: BIO SCI 98

**BIO SCI M121L. Advanced Immunology Laboratory. 4 Units.**

Emphasis is placed on learning modern techniques in immunology such as ELISAs, western blotting, and immunofluorescent staining assays. Materials fee.

Prerequisite: (BIO SCI 100 or BIO SCI 108) and BIO SCI M116L and BIO SCI M121

Restriction: Seniors only. Students who require this lab for completion of their degree have first consideration for enrollment.

Concurrent with MOL BIO 221L.

**(Ib)****BIO SCI N121. Drug Addiction. 4 Units.**

Provides a comprehensive overview of topics in the addiction field, including drug pharmacology, models/approaches to investigate addiction, brain circuits, genetics, epigenetics, and the cellular and molecular biology of drug addiction.

Prerequisite: BIO SCI 99

Concurrent with NEURBIO 233.

**BIO SCI E122. Physiology and Pathology of the Kidney. 4 Units.**

Examines the structure, function, and pathology of the kidney. Topics include anatomy of the kidney, cellular function, urine formation, and disease states of the kidney.

Prerequisite: BIO SCI E109

**BIO SCI M122. General Microbiology. 4 Units.**

Comparative metabolism of small molecules and cell structure and relationship to microbial classification. Macromolecule synthesis and regulation, sporulation, cell division, growth, and effect of antibiotics.

Prerequisite: BIO SCI 98

**BIO SCI M123. Introduction to Computational Biology. 4 Units.**

The use of theories and methods based on computer science, mathematics, and physics in molecular biology and biochemistry. Basics in biomolecular modeling. Analysis of sequence and structural data of biomolecules. Analysis of biomolecular functions.

Prerequisite: MATH 2D or MATH 3A or STATS 7 or STATS 8

Same as BME 132, COMPSCI 183.

Concurrent with MOL BIO 223 and BME 232.

**BIO SCI N123L. Human Neuroimaging Lab. 3 Units.**

Hands-on laboratory course in human neuroimaging, with particular emphasis on using MRI to understand brain function and how it changes over the course of the lifespan and with disease.

Prerequisite: BIO SCI 93 and (BIO SCI 100 or BIO SCI 108). Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Seniors only. Students who require this lab for completion of their degree have first consideration for enrollment.

**(Ib)**

**BIO SCI D124. Biology of Integrative Medicine. 4 Units.**

Presentation of biological principles and the latest clinical and basic research on complementary and alternative therapies (e.g., mind-body medicine, energy medicine, herbal medicine, acupuncture, manipulative therapies) and their integration with Western medicine. Lectures supplemented by demonstrations and hands-on learning sessions.

Overlaps with BIO SCI 9J, BIO SCI 9N.

**BIO SCI E124. Infectious Disease Dynamics. 4 Units.**

Learn how the immune system interacts with infectious diseases, in particular with viral infections. An introduction to basic virology and immunology, it concentrates on the way in which the immune system is critical to the prevention of infections.

Same as PUBHLTH 181.

**BIO SCI M124A. Virology. 4 Units.**

Replication of viruses in populations, animals, and the host cell. The effects of viral infection on populations, individuals, and specific molecular effects on the target cell. Role of viral infections in cancer and degenerative diseases.

Prerequisite: BIO SCI 99

Restriction: School of Biological Sciences students only.

**BIO SCI M124B. Viral Pathogenesis and Immunity. 4 Units.**

The mechanisms of viral pathogenesis and of host resistance to viruses are explored in detail. HIV-1 and Influenza-A are used as examples. In each case, viral replication, cytopathic effects, immune response, and viral evasion are discussed.

Prerequisite: BIO SCI M121 or BIO SCI M124A. Recommended: BIO SCI M122.

**BIO SCI M125. Molecular Biology of Cancer. 4 Units.**

Molecular mechanisms of carcinogenesis. Consideration of transformation by DNA tumor viruses, RNA tumor viruses, and chemical carcinogens.

Prerequisite: BIO SCI 99

**BIO SCI M126. Learning to Read Primary Literature in Biochemistry and Molecular Biology. 4 Units.**

An introduction to primary literature focusing on methods to approach, understand, and analyze scientific papers.

Prerequisite: BIO SCI 99

**BIO SCI E127. Physiological Plant Ecology. 4 Units.**

An examination of the interactions between plants and their environment. Emphasis on the underlying physiological mechanisms of plant function, adaptations and responses to stress, and the basis of the distribution of plants and plant assemblages across the landscape.

Prerequisite: EARTHSS 51 or BIO SCI 94 or (EARTHSS 60A and EARTHSS 60C)

Same as EARTHSS 168.

Restriction: Biological Sciences Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**BIO SCI E128. Chemical Ecology. 4 Units.**

An introduction to the unspoken chemical language of nature. Emphasis on interactions between insects, plants, and microbes including plant defense, pollination, and microbial warfare.

Prerequisite or corequisite: BIO SCI 94 and CHEM 1C. CHEM 1C with a grade of C- or better

**BIO SCI N129. The Transparent Brain. 5 Units.**

Teaches students how to perform new 3-D histology techniques that reveal the complex circuitry of the brain in unprecedented detail. Students work with real brain samples as part of ongoing neuroscience research projects. Materials fee.

Prerequisite: BIO SCI 93 or BIO SCI H93

Restriction: Students who require this course for completion of their degree have first consideration for enrollment.

**BIO SCI D130. Photomedicine. 4 Units.**

Studies the use of optical and engineering-based systems (laser-based) for diagnosis, treating diseases, manipulation of cells and cell function. Physical, optical, and electro-optical principles are explored regarding molecular, cellular, organ, and organism applications.

Prerequisite: PHYSICS 3C or PHYSICS 7D

Same as BME 135.

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

**BIO SCI E130. Forensic Genetics. 4 Units.**

Covers techniques currently used for forensic identification and paternity testing. Topics include STR, Y-STR and mitochondrial DNA tests, database searches, mixtures, allelic drop out, likelihood ratios, laboratory errors and the interaction of science and the legal system.

Prerequisite: BIO SCI 93 and BIO SCI 94

**BIO SCI M130L. Advanced Molecular Lab Techniques. 6 Units.**

Discovery-driven experimentation in the fields of molecular biology, biochemistry, and cell biology. Also involves other aspects of the lab experience including group discussion of results, scientific paper analysis, and student presentations. Materials fee.

Prerequisite: BIO SCI 100 and (BIO SCI D111L or BIO SCI M114L or BIO SCI M116L or BIO SCI M118L)

Repeatability: May be taken for credit 3 times.

Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

**BIO SCI E131L. Image Analysis in Biological Research. 4 Units.**

Introduction to scientific image analysis including techniques such as high-speed, time-lapse, thermal imaging, and flow visualization. Students make movies using cameras, edit and analyze images using computers, and do a writing project.

Prerequisite: (BIO SCI E106 or BIO SCI E109) and (BIO SCI 100 or BIO SCI 108)

Restriction: Seniors only.

(Ib)

**BIO SCI M131. Innate Immunity, Infection, and Pathogenesis. 4 Units.**

Role of the innate immune system in health and disease. Molecular pathways of innate immune recognition, expression, and regulation of immune receptors, signal transduction, pathogen sensors, and detection of microbial ligands. Lecture and discussion of primary research articles.

Prerequisite: BIO SCI M121 or BIO SCI M122 or BIO SCI M124A or BIO SCI M124B or BIO SCI M143

**BIO SCI N131. Human Neurodegenerative Diseases. 4 Units.**

Clinical and epidemiological aspects of neurodegenerative diseases causing dementia are reviewed, including Alzheimer's disease, Parkinson's disease, Huntington's disease, and Frontotemporal Dementia. Seminar format includes student presentation and group discussion.

Prerequisite: BIO SCI 99

**BIO SCI D132. Introduction to Precision Medicine. 4 Units.**

Introduction to the use of genomic techniques for the study of individual genomes and transcriptomes in healthy and diseased samples. Covers GWAS, current sequencing techniques, cancer genomics, and biomarker discovery.

Prerequisite: BIO SCI 99

**BIO SCI D133. Advances in Regenerative Medicine. 4 Units.**

Introduces the rapidly growing field of regenerative medicine. New developments in stem cell research are discussed. Cellular, molecular, and engineering aspects of stem cell-based organ replacement strategies are examined, with emphasis on specific regenerative therapies.

Prerequisite: BIO SCI D103 or BIO SCI D104

Overlaps with BIO SCI N172.

**BIO SCI M133. High-Resolution Structures: NMR and X-ray. 4 Units.**

Basic principles of magnetic resonance and X-ray crystallography toward the determination of high-resolution biomolecular structures.

Prerequisite: MATH 2B or MATH 5B

Restriction: Upper-division students only.

Concurrent with MOL BIO 211.

**BIO SCI E134. Microbiomes. 4 Units.**

Students develop an understanding of microbiomes in the context of both their environment and their impact on host physiology. Discussions on how microbiomes interact with the human body.

Prerequisite: BIO SCI M122

**BIO SCI N134. Cognitive Neuroepigenetics. 4 Units.**

Current topics in the emerging field of cognitive neuroepigenetics focusing on understanding the underlying epigenetic mechanisms of memory formation and persistence. Primary literature is used to explore these processes.

Prerequisite: BIO SCI N110 or BIO SCI N115A

**BIO SCI D135. Cell Biology of Human Disease. 4 Units.**

Builds on prior biology courses about the underlying cell biological mechanisms and recent treatment advances of several model diseases. Emphasizes literature searches, reading primary literature, and student group work.

Prerequisite: BIO SCI D103

**BIO SCI D136. Human Anatomy. 4 Units.**

Presents a systems approach to the analysis of human structure. Molecular, cellular, tissue, organ, and organ system levels of structure and organization are integrated throughout.

Prerequisite: BIO SCI 99

Overlaps with BIO SCI D170.

**BIO SCI E136. The Physiology of Human Nutrition . 4 Units.**

Examines the biochemical basis of energy metabolism, physiological processes in digestion and uptake, and the biochemical transformation of carbohydrates, fats, and proteins in the human body. The emphasis is on expanding the students' understanding of physiology.

Prerequisite: BIO SCI 98 and BIO SCI E109

Overlaps with BIO SCI M150.

**BIO SCI D137. Eukaryotic and Human Genetics. 4 Units.**

Structure and function of genes in eukaryotes with emphasis on special problems of genetic studies in humans. Molecular methods of genetic analysis and gene transfer are discussed. Practical applications and ethical and social issues raised by genetic studies are addressed.

Prerequisite: BIO SCI 97 or BIO SCI H97

**BIO SCI M137. Microbial Genetics. 4 Units.**

Basic principles of microbial genetics are presented as lectures for the first half of the course. The second half is devoted to applications of these principles and requires reading review and original research papers and interactions with guest lecturers.

Prerequisite: BIO SCI 98

**BIO SCI D138. Critical Thinking in Cell Biology . 4 Units.**

Builds on prior biology courses about cell biology, and works to develop a deeper understanding of experimental techniques and interpretation of experiments. A key focus will be the question of how one moves from specific examples to general.

Prerequisite: BIO SCI 99

**BIO SCI E138. Comparative Animal Physiology. 4 Units.**

Maintenance aspects of physiology: water balance; feeding and digestion; metabolism; respiration and circulation.

Prerequisite: BIO SCI E109

**BIO SCI N138. Sex Differences in the Brain. 4 Units.**

Explores the neural bases of sex influences on brain function.

Prerequisite: BIO SCI 99

**BIO SCI E139. Animal Locomotion. 4 Units.**

The physiology, biomechanics, and neuroscience that determines how animals propel themselves and navigate through the world. Considers the principles that govern the walking, running, flying, and swimming of animals, including exercising humans.

Prerequisite: BIO SCI E109

**BIO SCI E140L. Evolution and the Environment Laboratory. 4 Units.**

Explores basic topics in ecology and evolutionary biology and applications to agriculture, conservation, environmental issues, and public health. Format involves lab activities and discussion of scientific journal articles, with focus on learning to evaluate scientific evidence.

Prerequisite or corequisite: (BIO SCI 100 or BIO SCI 108) and BIO SCI E106

Restriction: Seniors only. Students who require this lab for completion of their degree have first consideration for enrollment.

**(Ib)**

**BIO SCI E142W. Writing/Philosophy of Biology. 4 Units.**

Philosophy of biology, e.g., scientific method in biology, the structure of evolutionary theory, teleology, ethics, and evolution. Course work includes one 4,000-word and four 1,000-word papers.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as LPS 142W, PHILOS 142W.

Restriction: Juniors only.

**(Ib)**

**BIO SCI M143. Human Parasitology. 4 Units.**

Introduction to human animal-parasitic diseases including worms and protozoan infections.

Prerequisite: BIO SCI 99

**BIO SCI M144. Cell Organelles and Membranes. 4 Units.**

Structure, function, and biogenesis of biological membranes and membrane-bound organelles.

Prerequisite: CHEM 51A

**BIO SCI D145. Genomics, Development, and Medicine. 4 Units.**

Focuses on the applications of genomics and proteomics to problems in genetics, cell, and developmental biology. Students will gain a comprehensive understanding of the techniques currently used for genomics analysis and how best to apply these tools to solve problems.

Prerequisite: BIO SCI 99

**BIO SCI E145. Animal Coloration and Vision. 4 Units.**

Physiological and behavioral mechanisms of color production and vision including crypsis, mimicry, aposematism, masquerade, sexual dimorphism, and predator-prey interactions through the lens of signals, receivers, and receptors; color and polarization vision in mate choice and visual adaptations to aquatic environments.

Prerequisite or corequisite: BIO SCI E106

**BIO SCI E146. Ecosystem Services. 4 Units.**

Covers what ecosystem services are, how to classify them, what the impacts of land degradation are on ecosystem services, how to quantify and value them, and the importance of mainstreaming ecosystem services in decision-making.

Prerequisite: (EARTHSS 70A and EARTHSS 70B) or (EARTHSS 51 and EARTHSS 53 and EARTHSS 55)

Same as EARTHSS 154.

**BIO SCI N147. Hearing and the Brain. 4 Units.**

An overview of brain mechanisms of hearing, including perception of simple sounds, speech, and music. Begins with sound itself, and looks at processing by the ear, auditory pathways, auditory cortex, and beyond. Also auditory development, learning, and clinical issues.

Prerequisite: PSYCH 160A or BIO SCI 93 or BIO SCI H93

Same as PSYCH 161H.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Biological Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**BIO SCI D148. Development and Disease. 4 Units.**

Development of animal embryos from a fertilized egg to a functioning organism. Topics include reproduction, body-axis formation, growth and differentiation of embryonic cells, and organogenesis, with an emphasis on congenital birth defects and diseases that disrupt these processes.

Prerequisite: BIO SCI D103 or BIO SCI D104

**BIO SCI E150. Conservation Biology. 4 Units.**

Genetic and ecological issues in conservation biology, including effects of human population growth, the value of biodiversity, conservation genetics, demography, metapopulation dynamics, community and ecosystem processes, species invasions, global climate change, and reserve design and management.

Prerequisite: BIO SCI E106

**BIO SCI N150. Brain Dysfunction and Repair. 4 Units.**

Introduction to the disruptions in brain function that underlie disorders such as Alzheimer's disease, Parkinsonism, schizophrenia, and depression, and the basis for drug therapies. The brain's ability to repair itself after damage and the pros and cons of that repair.

Prerequisite: BIO SCI N110 or BIO SCI N115A

Restriction: Neurobiology Majors only.

**BIO SCI E151. Evolutionary and Ecological Principles in Medicine. 4 Units.**

Explore the dynamics of populations on an ecological, epidemiological, and medical level. Considers the dynamics of competition, predation, and parasitism; the spread and control of infectious diseases; and the in vivo dynamics of viral infections and the immune system.

Prerequisite: BIO SCI 93

Same as PUBHLTH 182.

Concurrent with ECO EVO 251.

**BIO SCI N151. Neurobiology of Aging. 4 Units.**

Multidisciplinary overview of the functional capacity of the aging brain, its structural changes and the mechanisms underlying function and structure. Emphasis is on successful brain aging and those mechanisms which lead to the development of Alzheimer's disease.

Prerequisite: BIO SCI N110 or BIO SCI N115A

**BIO SCI N152. Developmental Neurobiology. 4 Units.**

The development of the nervous system is discussed with emphasis on the processes that underlie the appearance of complex and highly ordered neural circuits. Topics include neural induction, specification, migration and death; axon growth, and neural circuit formation.

Prerequisite: BIO SCI 93 or BIO SCI H93

**BIO SCI E153. Functional and Structural Evolutionary Genomics. 4 Units.**

Function and organization of genomes analyzed from an evolutionary perspective. Review of some of the most recent experimental approaches in genome analysis and comparative genomics. Relevant software to analyze DNA and expression data is used.

Prerequisite: BIO SCI 97 or BIO SCI H97

Concurrent with ECO EVO 253.

**BIO SCI N153. Neuropharmacology. 4 Units.**

Survey of neurotransmitter systems, focusing on how transmitters are made, how they interact with their receptors, and how drugs can influence these processes to alter neural function and behavior.

Prerequisite: BIO SCI N110 or BIO SCI N115A

**BIO SCI E154. Genetics and Human History. 4 Units.**

Explores topics in human health/history from an evolutionary perspective, with emphasis on genetics. Topics include the relationship between genetics and human disease as an evolutionary question, and how modern genetic techniques are used to study the history of human populations.

Prerequisite or corequisite: BIO SCI E106

**BIO SCI N154. Molecular Neurobiology. 4 Units.**

Nature and actions of genes/gene products that regulate the functioning of the nervous system and its interaction with muscles. Topics include neural control of gene expression; genetics and molecular biology of neural and neuromuscular diseases; gene therapies for neural disorders.

Prerequisite: BIO SCI 99

**BIO SCI E155. Physiology in Extreme Environments. 4 Units.**

An in-depth look at the physiological mechanisms that allow animals, including humans, to be physically active and survive in extreme environments. Physiological responses to high altitude, diving, microgravity, deserts, and extreme cold are examined.

Prerequisite: BIO SCI 94

**BIO SCI N155. Wiring the Developing Brain . 4 Units.**

The development of the nervous system is discussed with particular emphasis on the processes that underlie the appearance of complex and highly ordered neural circuits. Basic neurodevelopmental processes are discussed and correlated with normal brain function/dysfunction.

Prerequisite: BIO SCI N110 or BIO SCI N115A or BIO SCI N152

**BIO SCI N156. Molecular Mechanisms of Memory. 4 Units.**

Current topics focused on understanding the molecular mechanisms that contribute to synaptic plasticity, learning, and memory. Primary literature is used to explore the variety of molecular mechanisms underlying these processes.

Prerequisite: BIO SCI 99

**BIO SCI N158. Neurobiology of Learning and Memory. 4 Units.**

How the brain and behavior change as a result of experience, with an emphasis on identifying the neurochemical processes through which memory is stored and the parts of the brain that are involved.

Prerequisite: BIO SCI 35 or BIO SCI N110 or BIO SCI N115A

**BIO SCI N159. Animal Behavior. 4 Units.**

Explores why animals behave the way they do from evolutionary/mechanistic perspectives. Considers selective pressures and evolutionary constraints that shape animal behavior and the underlying neural and hormonal mechanisms by using examples such as why dogs bark, why some birds migrate.

Prerequisite: BIO SCI N110 or BIO SCI N115A

**BIO SCI E160. Biology of Birds. 4 Units.**

A thorough introduction to the biology of birds, covering topics ranging from avian anatomy and physiology to behavior, natural history, ecology, genetics, evolution, systematics, and conservation. Examples from both local and global avifauna.

Corequisite: BIO SCI E160L

Prerequisite: BIO SCI 94

**BIO SCI E160L. Biology of Birds Lab. 4 Units.**

The companion to Biology of Birds (E160). Consists primarily of field trips to identify local birds and study avian natural history. Students must provide their own transportation to field sites, some with entrance fees. Students must have field binoculars.

Corequisite: BIO SCI E160

Prerequisite: (BIO SCI 100 or BIO SCI 108)

Restriction: Seniors only. Students who require this lab for completion of their degree have first consideration for enrollment.

**(Ib)**

**BIO SCI M160. Structure-Function Relationships of Integral Membrane Proteins. 4 Units.**

Integral membrane proteins such as voltage and ligand-gated ion channels, water channels, pumps, cotransporters, and receptors (e.g., GPCRs). The emphasis is on the relationship between atomic structure and the functional properties of these proteins.

Prerequisite: BIO SCI 98 and BIO SCI 99. BIO SCI 98 with a grade of B or better. BIO SCI 99 with a grade of B or better

Concurrent with MOL BIO 255.

**BIO SCI N160. Language and the Brain . 4 Units.**

Research analysis on biological bases of human linguistic capacity. Development, focusing on hemispheric specialization, plasticity; localization of specific linguistic functions in adults, with emphasis on study of aphasias; relation of linguistic capacity to general cognitive capacity, considering research on retardation.

Prerequisite: (PSYCH 7A or PSY BEH 9 or PSYCH 9A or PSY BEH 11A) and (PSYCH 9B or PSY BEH 11B or BIO SCI 35 or BIO SCI N110 or BIO SCI N115A)

Same as LSCI 158, PSYCH 161.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Biological Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**BIO SCI N165. Brain Disorders and Behavior. 4 Units.**

Examines the localization of human brain functions and the effects of neurological disorders on psychological functions such as perception, motor control, language, memory, and decision-making.

Prerequisite: (PSYCH 7A or PSY BEH 9) and (PSYCH 9A or PSY BEH 11A) and (PSYCH 9B or PSY BEH 11B) or BIO SCI 35 or BIO SCI N110

Same as PSYCH 160D.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Biological Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**BIO SCI E166L. Field Biology. 4 Units.**

Conducting group and independent studies in Southern California ecosystems, this course covers the fundamentals of experimental design, statistical analysis, communicating scientific findings (orally, visually, in writing), and other skills necessary for the scientific investigation of biological processes in the field. Materials fee.

Prerequisite: (BIO SCI 100 or BIO SCI 108) and BIO SCI E106. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Seniors only.

**(Ib)**

**BIO SCI N166. Introduction to Cognitive Neuroscience. 4 Units.**

Introduction to the neural basis of human perceptual, motor, and cognitive abilities. Topics include sensory perception, motor control, memory, language, attention, emotion, frontal lobe function, functional brain imaging, and neuropsychological disorders.

Prerequisite: PSYCH 7A or (PSYCH 9A and PSYCH 9B) or PSY BEH 9 or (PSY BEH 11A and PSY BEH 11B) or BIO SCI 35 or BIO SCI N110 or BIO SCI N115A

**BIO SCI E168. Evolution. 4 Units.**

An integrative treatment of evolutionary biology that covers evolutionary processes, basic research methods, and the history of life.

Prerequisite: BIO SCI E106

**BIO SCI D170. Applied Human Anatomy. 6 Units.**

Systems approach to analyze the form and function of the human body with an emphasis on applying anatomical concepts to evaluate clinical cases. The laboratory will use human models and a simulated cadaver dissection for structure. Materials fee.

Prerequisite: BIO SCI E109 or PHRMSCI 120. BIO SCI E109 with a grade of C or better. PHRMSCI 120 with a grade of C or better

Overlaps with BIO SCI D136.

**BIO SCI N170. Clinical Neuroscience. 4 Units.**

An introduction to the neuroclinical bases of human behavior, including neuropsychological approaches to mental disorders. Also includes case formulations, research articles, therapeutic approaches, and other discussions related to select psychopathology and other neurobehavioral topics.

Prerequisite: PSCI 9 or PSYCH 7A or PSCI 11A or PSYCH 9A or BIO SCI 99

Same as PSCI 160C.

Restriction: Psychological Science Majors have first consideration for enrollment. Biological Sciences Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**BIO SCI E172. Plant Diversity in a Changing World. 4 Units.**

Investigation of planet diversity in California and throughout the world, including basic systematic concepts, an introduction to major groups of flowering plants, and the effects of global biological change on plant diversity.

Prerequisite: BIO SCI E106

Concurrent with ECO EVO 272.

**BIO SCI N172. Regenerative Neurobiology. 4 Units.**

Explores the field of regenerative neurobiology. Both basic stem cell discoveries and their potential clinical application to brain disorders examined. Opportunities, challenges, and implications of this research also discussed.

Prerequisite: BIO SCI N110 or BIO SCI N115A

Overlaps with BIO SCI 44, BIO SCI D133.

**BIO SCI N173. Human Neuropsychology. 4 Units.**

A survey of human brain disorders using a clinical case study approach to illustrate fundamental issues in studying brain and behavior. Topics include sensory deficits, attentional neglect, amnesia, cortical organization, clinical psychopathology, and more.

Prerequisite: BIO SCI N110 or BIO SCI N115A or PSYCH 9A or PSCI 11A

Same as PSCI 163C, PSYCH 162N.

Restriction: School of Biological Sciences students have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**BIO SCI N174. Principles of Neural Computation. 4 Units.**

Introduction to the theoretical principles and biological mechanisms underlying how brains acquire, assimilate, store, and retrieve information, and how they compute adaptive responses to external inputs.

Prerequisite: BIO SCI N110 or BIO SCI N115A

Concurrent with NEURBIO 220.

**BIO SCI N176. Cerebral Cortex: Structure, Function, and Plasticity. 4 Units.**

The cerebral cortex is highly developed in mammals and is responsible for higher perceptual and cognitive functions. Explores some amazing aspects of cortical structure, function, and plasticity emphasizing primary literature.

Prerequisite: BIO SCI N110 or BIO SCI N115A

**BIO SCI E179. Limnology and Freshwater Biology. 4 Units.**

Biology of freshwater environments: lakes, ponds, rivers, their biota, and the factors which influence distribution of organisms.

Corequisite: BIO SCI E179L

Prerequisite: BIO SCI 94

**BIO SCI E179L. Field Freshwater Ecology. 4 Units.**

Analytical techniques for common water-quality variables of lakes, streams, and rivers. Benthic fauna, vertebrates and invertebrates, algae, and aquatic plants. Emphasis on field methods with an experimental approach; laboratory exercises. Field trips to marshes, vernal pools, rivers, and streams. Materials fee.

Corequisite: BIO SCI E179

Prerequisite or corequisite: (BIO SCI 100 or BIO SCI 108) and BIO SCI E179

Restriction: Seniors only. Students who require this lab for completion of their degree have first consideration for enrollment.

**(Ib)**

**BIO SCI M180. Biotechnological Applications of Energy and Environmental Research. 4 Units.**

Covers microbiological and biochemical background related to current biotechnological applications, case studies of biotech-companies, and basic information related to patents and start-up companies. Topics include biofuel, bioremediation, agricultural, and environmental applications.

Prerequisite: BIO SCI 98

**BIO SCI E182. Mediterranean Ecosystems: Biodiversity and Conservation. 4 Units.**

Biodiversity, history of human impacts, and conservation efforts are examined in the five Mediterranean-type ecosystems. Remaining natural habitat, approaches to ecological habitat restoration, control of exotic species, and predicted consequences of global climate change are described. Field trip required.

Prerequisite: BIO SCI 94

**BIO SCI N182. Vision. 4 Units.**

Visual perception and the anatomy and physiology of the visual system. Topics include the retina and the visual pathway; visual sensitivity; color vision; spatial vision; motion perception; and the development of the visual system.

Same as PSYCH 131A.

Overlaps with PSYCH 130A.

Restriction: Upper-division students only. Psychology Majors have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment. School of Biological Sciences students have first consideration for enrollment.

**BIO SCI E183. Exercise Physiology. 4 Units.**

Focus upon critical topics in the area of exercise biology using the comparative physiological approach. Specifically examine the physiological factors that limit the capacity of an organism to sustain high levels of aerobic metabolism.

Prerequisite: BIO SCI 98 and BIO SCI E109

**BIO SCI E184. Ecology and Diversity of Insects. 4 Units.**

Insects—representing two-thirds of all species—play fundamental roles in human health, agriculture, and natural ecosystems. Topics include insect morphology, development, physiology, taxonomy, ecology, and insects in human affairs. Lecture includes interactive demonstrations and an optional weekend trip. Materials fee.

Prerequisite: BIO SCI E106

**BIO SCI E186. Population and Community Ecology. 4 Units.**

Population structure, function, development, and evolution. Topics include population structure, population growth and regulation, metapopulations, predation, competition, species diversity, ecosystem function, macroecology, and island biogeography. Offered every other Winter.

Prerequisite: BIO SCI E106

**BIO SCI E186L. Population and Community Ecology Lab. 4 Units.**

Covers processes specific to groups of the same species (populations) and multiple species (communities). Includes growth, regulation, dynamics, and persistence of populations and community interactions, development, diversity, and macroecology. Lab activities focus on application of population prediction and biodiversity assessment.

Prerequisite: BIO SCI E106 and (BIO SCI 100 or BIO SCI 108). Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Seniors only.

**(Ib)**

**BIO SCI E187. Exercise as Medicine. 4 Units.**

Explores the link between regular physical activity and health, focusing on mechanistic insights into how regular exercise improves overall health and alters disease trajectories of cancer, type-II diabetes, depression, and other chronic illnesses.

Prerequisite: BIO SCI E109

**BIO SCI E188. Introduction to Insect Physiology. 4 Units.**

Physiology of insects. Insect respiration, digestion, excretion, and neurobiology, including sensory systems and effectors.

Prerequisite: BIO SCI E109

**BIO SCI E189. Environmental Ethics. 4 Units.**

History of evolution of environmental ethics in America. Management problems in national parks, wilderness areas, wild and scenic rivers, national forests. Contemporary and historical aspects/contributors to the field. Mitigation, endangered species, habitat restoration, biodiversity, and environmental activism. Field trips required.

Restriction: Upper-division students only.

**BIO SCI 190. Transfer Student Seminar. 1 Unit.**

Weekly meetings consisting of presentations by faculty, professional staff, and New Student Peer Academic Advisors provide information about the School of Biological Sciences, campus resources, and special programs/opportunities.

Grading Option: Pass/no pass only.

Restriction: New transfer students only.

**BIO SCI D190. Topics in Developmental and Cell Biology. 2-4 Units.**

Studies in selected areas of developmental and cell biology.

Prerequisite: BIO SCI D103

Repeatability: May be taken for credit 3 times as topics vary.

Restriction: Upper-division students only. School of Biological Sciences students only.

**BIO SCI E190. Topics in Ecology and Evolutionary Biology. 2-4 Units.**

Studies in selected areas of ecology and evolutionary biology.

Prerequisite: BIO SCI E106

Repeatability: May be taken for credit 3 times as topics vary.

**BIO SCI M190. Topics in Molecular Biology and Biochemistry. 2-4 Units.**

Studies in selected areas of Molecular Biology and Biochemistry.

Prerequisite: BIO SCI 98

Repeatability: May be taken for credit 3 times as topics vary.

**BIO SCI N190. Topics in Neurobiology and Behavior. 2-4 Units.**

Studies in selected areas of neurobiology and behavior.

Prerequisite: BIO SCI N110 or BIO SCI N115A

Repeatability: May be taken for credit 3 times as topics vary.

**BIO SCI 191A. Senior Seminar on Global Sustainability I. 2 Units.**

Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum is also required. Seminar utilized to analyze forum presentations. Prepare bibliography.

Same as SOCECOL 186A, EARTHSS 190A.

Restriction: Seniors only. Global Sustainability Minors have first consideration for enrollment.

**BIO SCI 191B. Senior Seminar on Global Sustainability II. 2 Units.**

Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum is also required. Seminar utilized to analyze forum presentations. Prepare research proposal.

Prerequisite: BIO SCI 191A or SOCECOL 186A or EARTHSS 190A

Same as SOCECOL 186B, EARTHSS 190B.

Restriction: Seniors only.

**BIO SCI 191CW. Writing/Senior Seminar on Global Sustainability III. 4 Units.**

Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum also is required. Seminar utilized to analyze Forum presentations and to prepare senior research paper. Prepare/write research paper under direction of faculty member.

Prerequisite: BIO SCI 191B or EARTHSS 190B or SOCECOL 186B. BIO SCI 191B or EARTHSS 190B or SOCECOL 186B. Satisfactory completion of the Lower-Division Writing requirement.

Same as EARTHSS 190CW, SOCECOL 186CW.

Restriction: Seniors only.

**(Ib)****BIO SCI 192. Tutoring in Biology. 2 Units.**

Tutoring program with Biological Sciences student peers.

Repeatability: May be taken for credit 6 times.

Restriction: Biological Sciences Peer Tutoring Program students only.

**BIO SCI 193A. Campus as a Living Lab I. 2-4 Units.**

Students study sustainability concepts and theories and how they apply to our most pressing environmental, social, and economic challenges. Concurrently, they work on hands-on projects to improve the sustainability of campus operations and systems.

Grading Option: In Progress (Letter Grade with P/NP).

Restriction: Upper-division students only.

**BIO SCI 193B. Campus as a Living Lab II. 2-4 Units.**

Students study sustainability concepts and theories and how they apply to our most pressing environmental, social, and economic challenges. Concurrently, they work on hands-on projects to improve the sustainability of campus operations and systems.

Prerequisite: BIO SCI 193A

Restriction: Upper-division students only.

**BIO SCI 193C. Campus as a Living Lab III. 2-4 Units.**

Students study sustainability concepts and theories and how they apply to our most pressing environmental, social, and economic challenges. Concurrently, they work on hands-on projects to improve the sustainability of campus operations and systems.

Prerequisite: BIO SCI 193B

Restriction: Upper-division students only.

**BIO SCI 194. Current Topics in Biology. 1 Unit.**

A seminar designed to discuss recent research findings and experimental issues in biology.

Corequisite: BIO SCI 199

Grading Option: Pass/no pass only.

Repeatability: Unlimited as topics vary.

**BIO SCI 194S. Safety and Ethics for Research. 1 Unit.**

Introduces students to the concepts, techniques, and ethics involved in biological sciences laboratory work.

Grading Option: Pass/no pass only.

**BIO SCI H195. Honors Topics in Biological Sciences. 4 Units.**

Varied course topics in Biological Sciences designed for students in Honors in Biological Sciences.

Repeatability: May be taken for credit 2 times.

Restriction: Biological Sciences Honors students only.

**BIO SCI 197. Special Study in Biological Sciences. 1-5 Units.**

Individualized instruction dealing with conceptual or theoretical problems in the biological sciences, rather than technical problems.

Prerequisite: BIO SCI 94

Repeatability: May be repeated for credit unlimited times.

Restriction: Maximum of 5 units (per quarter) between BIO SCI 197, BIO SCI 198, and BIO SCI 199.

**BIO SCI 198. Directed Group Studies. 1-5 Units.**

Small group experimental laboratory or field work performed under the direction of a faculty member.

Prerequisite: BIO SCI 94

Repeatability: May be repeated for credit unlimited times.

**BIO SCI 199. Independent Study in Biological Sciences Research. 1-5 Units.**

Individual experimental laboratory or field research under a professor's direction. Required for participation in the Excellence in Research Program.

Prerequisite: BIO SCI 94

Repeatability: Unlimited as topics vary.

**BIO SCI 285. Topics in Allied Health Microbiology. 4 Units.**

Basic microbiology with emphasis for allied health professions such as nursing. Emphasis is on micro-organisms involved in human health, disease and food safety.

Prerequisite: BIO SCI 98

Repeatability: May be taken for credit for 4 units as topics vary.

Overlaps with BIO SCI M122, BIO SCI M118L.

Restriction: Program in Nursing Science students only. Master of Nursing Degree students only.

## Developmental and Cell Biology Courses

**DEV BIO 200A. Research in Developmental and Cell Biology. 2-12 Units.**

Independent research with Developmental and Cell Biology faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**DEV BIO 200B. Research in Developmental and Cell Biology. 2-12 Units.**

Independent research with Developmental and Cell Biology faculty.

Prerequisite: DEV BIO 200A

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**DEV BIO 200C. Research in Developmental and Cell Biology . 2-12 Units.**

Independent research with Developmental and Cell Biology faculty.

Prerequisite: DEV BIO 200B

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**DEV BIO 200R. Research in Developmental & Cell Biology for First-year Students. 2-12 Units.**

Independent research within the laboratories of graduate training faculty in the Department of Developmental and Cell Biology for first-year Ph.D. students.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

**DEV BIO 203A. Graduate Tutorial in Developmental and Cell Biology. 4 Units.**

Advanced study in areas not represented by formal courses. May involve individual or small group study through discussion, reading, and composition. Time and subject matter arranged individually.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**DEV BIO 203B. Graduate Tutorial in Developmental and Cell Biology. 4 Units.**

Advanced study in areas not represented by formal courses. May involve individual or small group study through discussion, reading, and composition. Time and subject matter arranged individually.

Prerequisite: DEV BIO 203A

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**DEV BIO 203C. Graduate Tutorial in Developmental and Cell Biology. 4 Units.**

Advanced study in areas not represented by formal courses. May involve individual or small group study through discussion, reading, and composition. Time and subject matter arranged individually.

Prerequisite: DEV BIO 203B

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**DEV BIO 206A. Developmental and Cell Biology Journal Club. 2 Units.**

Advanced study of various topics in cell biology.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**DEV BIO 206B. Developmental and Cell Biology Journal Club. 2 Units.**

Advanced study of various topics in cell biology.

Prerequisite: DEV BIO 206A

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**DEV BIO 206C. Developmental and Cell Biology Journal Club. 2 Units.**

Advanced study of various topics in cell biology.

Prerequisite: DEV BIO 206B

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**DEV BIO 207. Mouse Developmental Genetics. 4 Units.**

Introduction to using the mouse in contemporary biomedical research. The biology and development of the laboratory mouse, methods for manipulation of the mouse genome and embryos, and examples of application of these methods to understand mammalian development and homeostasis.

Same as BIOCHEM 215.

Restriction: Graduate students only.

**DEV BIO 212. Topics in Systems Biology. 2 Units.**

Studies in selected areas of Systems Biology.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**DEV BIO 214. Principles of Genomics. 4 Units.**

A survey course of the principal subfields of genomics and their applications to biological and health sciences that will cover genome assembly and annotation, genome structure, comparative genomics, population genomics, functional genomics, and medical genomics.

Same as MOL BIO 244.

Restriction: Graduate students only.

**DEV BIO 231B. Cell Biology. 4 Units.**

A broadly based course including topics in extracellular matrix, cytoskeleton, organelle biogenesis, receptor-mediated endocytosis, signal transduction, cell cycle, and developmental biology.

Concurrent with BIO SCI D154.

**DEV BIO 232. Systems Cell and Developmental Biology. 4 Units.**

Introduces concepts needed to understand cell and developmental biology at the systems level, i.e., how the parts (molecules) work together to create a complex output. Emphasis on using mathematical/computational modeling to expand/modify insights provided by intuition.

Same as BME 213.

Restriction: Graduate students only.

**DEV BIO 245. Stem Cell Biology. 4 Units.**

The basic characteristics and development roles of embryonic, adult, and cancer stem cells in the human body and in model systems and the use of experimental and genetic methods to analyze and manipulate their properties.

Restriction: Graduate students only.

**DEV BIO 290A. Colloquium in Developmental and Cell Biology. 2 Units.**

Contemporary research problems. Research students, faculty, and other invited speakers introduce research and review topics.

Restriction: Graduate students only.

**DEV BIO 290B. Colloquium in Developmental and Cell Biology. 2 Units.**

Contemporary research problems. Research students, faculty, and other invited speakers introduce research and review topics.

Prerequisite: DEV BIO 290A

Restriction: Graduate students only.

**DEV BIO 290C. Colloquium in Developmental and Cell Biology. 2 Units.**

Contemporary research problems. Research students, faculty, and other invited speakers introduce research and review topics.

Prerequisite: DEV BIO 290B

Restriction: Graduate students only.

**DEV BIO 292A. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**DEV BIO 292B. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Prerequisite: DEV BIO 292A

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**DEV BIO 292C. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Prerequisite: DEV BIO 292B

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**DEV BIO 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## **Ecology and Evolutionary Bio Courses**

**ECO EVO 200A. Research in Ecology and Evolutionary Biology. 2-12 Units.**

Individual research with Ecology and Evolutionary Biological faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ECO EVO 200B. Research in Ecology and Evolutionary Biology. 2-12 Units.**

Individual research with Ecology and Evolutionary Biological faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ECO EVO 200C. Research in Ecology and Evolutionary Biology. 2-12 Units.**

Individual research with Ecology and Evolutionary Biological faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ECO EVO 201. Seminar in Ecology and Evolutionary Biology. 2 Units.**

Invited speakers, graduate students, and faculty present current research in ecology and evolutionary biology.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

Concurrent with BIO SCI E107.

**ECO EVO 203A. Graduate Tutorial in Ecology and Evolutionary Biology. 2-12 Units.**

Advanced study in areas not represented by formal courses. May involve individual or small group study through reading, discussion, and composition.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ECO EVO 203B. Graduate Tutorial in Ecology and Evolutionary Biology. 2-12 Units.**

Advanced study in areas not represented by formal courses. May involve individual or small group study through reading, discussion, and composition.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ECO EVO 203C. Graduate Tutorial in Ecology and Evolutionary Biology. 2-12 Units.**

Advanced study in areas not represented by formal courses. May involve individual or small group study through reading, discussion, and composition.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ECO EVO 204. Writing Grant Proposals. 4 Units.**

Provides students with hands-on experience writing proposals in the research areas of ecology, evolution, or physiology.

Restriction: Graduate students only.

**ECO EVO 205. Special Topics in Ecology. 4 Units.**

Survey of special topics in Ecology.

Restriction: Graduate students only.

**ECO EVO 206. Special Topics in Evolution. 4 Units.**

Extensive introduction to the primary literature of evolutionary biology. Topics include population genetics, quantitative genetics, neutralism, molecular evolution, evolution of genetic systems, genetic architecture of fitness, speciation, and macroevolution.

Restriction: Graduate students only.

**ECO EVO 207. Quantitative Methods in Ecology and Evolutionary Biology. 4 Units.**

Statistics for ecologists and evolutionary biologists. Emphasis on specific applications and underlying assumptions rather than on methods of calculation. Topics include experimental design, parametric and nonparametric methods, analysis of variance and covariance, and multiple regression.

Prerequisite: Completion of at least one quarter of statistics including regression and analysis of variance.

Restriction: Graduate students only.

**ECO EVO 208. Ecological and Evolutionary Physiology. 4 Units.**

A summary of information in organismal biology, comparative and ecological physiology, and the biophysical basis of organismal function. Course offered every other fall.

Restriction: Graduate students only.

**ECO EVO 210. Foundations of Physiology. 4 Units.**

Physical and functional principles common to many living forms. Course forms a basis for subsequent specialization in any of the subdisciplines of physiology. Course offered in even years.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ECO EVO 219. Advanced Topics in Ecological Genetics. 4 Units.**

Content and instructor will vary from year to year. Possible topics include coevolution, sex-ratio evolution, evolution senescence, plant population biology, and density-dependent selection.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ECO EVO 221. Advanced Topics in Ecology. 2-4 Units.**

Weekly discussion of current topics in ecology at the graduate level.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

**ECO EVO 222. Statistical Learning in Ecology and Evolution. 4 Units.**

Reviews basic principals of variance/bias trade-offs. Topics include models for prediction and classification, variable selection methods, cross-validation, tree based methods, unsupervised learning. Applications in ecology and evolution using R.

Prerequisite: ECO EVO 207. ECO EVO 207 with a grade of B or better

Restriction: Graduate students only.

**ECO EVO 227. Plant Physiological Ecology. 4 Units.**

Provides a summary of information on plant organismal biology, comparative and ecological physiology, and functional ecology. Offered every other fall.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ECO EVO 228. Seminar in Conservation Biology. 2 Units.**

Devoted to the application of basic ecological principles to the understanding and resolution of environmental problems of both local and global natures. Current problems approached through a combination of readings, group discussions, and visiting speakers.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ECO EVO 230. Topics in Microbial Ecology. 2-4 Units.**

Weekly discussion of current topics in ecology, biogeochemistry, evolution, and physiology of microbial organisms.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**ECO EVO 235. Experimental Evolution. 2 Units.**

Explores experimental evolution, which is now a well-established part of evolutionary biology. With the advent of genomics, it is now one of the most powerful tools for studying the genetic foundations of biology.

Prerequisite: BIO SCI E106

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Biological Sciences students only.

**ECO EVO 246. Seminar in Ecology and Evolution Education. 2 Units.**

Weekly discussion of teaching techniques and challenges that are specific to courses in ecology and evolutionary biology. Emphasis will be on using evidence-based pedagogy techniques. There will be a combination of readings, group discussions and speakers.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ECO EVO 251. Evolutionary and Ecological Principles in Medicine. 4 Units.**

Explore the dynamics of populations on an ecological, epidemiological, and medical level. Considers the dynamics of competition, predation, and parasitism; the spread and control of infectious diseases; and the in vivo dynamics of viral infections and the immune system.

Restriction: Graduate students only.

Concurrent with BIO SCI E151.

**ECO EVO 253. Functional and Structural Evolutionary Genomics. 4 Units.**

Function and organization of genomes analyzed from an evolutionary perspective. Review of some of the most recent experimental approaches in genome analysis and comparative genomics. Relevant software to analyze DNA and expression data is used.

Concurrent with BIO SCI E153.

**ECO EVO 262. Professional Workshop. 2 Units.**

Identify and attend professional or technical skill workshops to gain professional knowledge and certifications related to conservation and restoration science.

Repeatability: May be taken for credit 4 times.

Restriction: Graduate students only.

**ECO EVO 264. Conservation Biology. 4 Units.**

Explores concepts in ecology with potential for conserving biological diversity. Identifies creative applications of ecological research that mitigate impacts of rapid human population growth and habitat destruction on biodiversity.

Restriction: Graduate students only.

**ECO EVO 265. Restoration Ecology. 4 Units.**

Study of principles and practices that help recover degraded ecosystems including restoration in different ecological systems, restoration motives and intensities, implementation and monitoring, and scope and success of case studies.

Restriction: Graduate students only.

**ECO EVO 266L. Field Methods in Restoration. 4 Units.**

Laboratory experience performing field methods that help recover degraded ecosystems in different ecological systems. Emphasis on the plant community composition, soil, irrigation, maintenance, and monitoring of a project.

**ECO EVO 267. Science Communication. 2 Units.**

Develops students' abilities to convey information related to conservation and restoration in a way that has broad appeal and/or effective messaging for non-scientific audiences by assessing the audience, developing effective storytelling, and deploying a persuasive information campaign.

Repeatability: May be taken for credit 2 times.

**ECO EVO 268. Technical Writing. 2 Units.**

Practice developing key documents for restoration projects including a response to a request for proposal (RFP), a restoration project plan, and a monitoring and maintenance plan.

**ECO EVO 269. Project Management. 2 Units.**

Discover the planning, design, implementation, and aftercare phases of managing a conservation or restoration project. Students will project cost, manage risk, analyze sites, evaluate and review projects, and become familiar with common permitting and consultation requirements.

**ECO EVO 270. GIS for Environmental Science. 4 Units.**

Introduction to the fundamental principles of GIS. Topics include cartography, creating/editing GIS data, georeferencing, map projections, geospatial analysis, spatial statistics, and development of GIS models. Focuses on theory and practice.

Restriction: Graduate students only.

**ECO EVO 271. Marine Research and Conservation Methods. 4 Units.**

Field-based introduction to marine ecology and conservation management through the study of the ecology, resource management, and conservation of marine habitats and species, and the use of a variety of marine field research methods.

Restriction: Graduate students only.

**ECO EVO 272. Plant Diversity in a Changing World. 4 Units.**

Investigation of plant diversity in California and throughout the world, including basic systematic concepts, introduction to major groups of flowering plants, and the effects of global biological change on plant diversity. Students carry out a phylogenetic analysis using appropriate software.

Concurrent with BIO SCI E172.

**ECO EVO 275. Wildlife Ecology and Sampling. 4 Units.**

Field-based introduction to wildlife management through the study of the ecology, physiology, population biology management, and conservation of vertebrate wildlife species, and the use of a variety of different wildlife sampling techniques.

Restriction: Graduate students only.

**ECO EVO 282. Fundamentals of Informatics for Biologists. 4 Units.**

Students learn the fundamentals of bioinformatics and the unix operating system (including the shell and Sun Grid Engine) in order to assemble a eukaryotic genome.

Restriction: Graduate students only.

**ECO EVO 283. Advanced Informatics for Biologists. 4 Units.**

Students learn advanced informatics including the analysis of: Poolseq, RNAseq, ATACseq, and ChIPseq datasets using programs such as bwa, tophat, cufflinks, DEseq, Trinity, Augustus, etc., in a unix high-performance computing environment. Statistical tests carried out and publication quality.

Prerequisite: ECO EVO 282

Restriction: Graduate students only.

**ECO EVO 285. Topics in Evolutionary Genetics. 2 Units.**

Weekly discussion of recent research on evolutionary genetics.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ECO EVO 286. MCRS Capstone. 2-12 Units.**

Apply knowledge and skills in a practical professional setting, working with practitioners to identify a conservation or management problem and then to plan, implement, and evaluate a solution.

Repeatability: May be taken for credit for 12 units.

Restriction: Graduate students only.

**ECO EVO 287. Communicating Research Through Video. 4 Units.**

Students explore videography to develop basic production skills through practice with high interest special topics, such as laboratory experimental evolution and educational interdisciplinary field events, and then develop media to communicate their own research or other topics of interest.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ECO EVO 288. Documenting Research Through Cinematic Production. 4 Units.**

Students gain advanced media expertise by conceptualizing investigative research into publicly engaging video projects. Popularly accessible research topics will be adapted into documentary, television, or cinematic pieces that provide opportunities for developing professionally marketable skills in educationally effective media production.

Prerequisite: ECO EVO 287

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ECO EVO 341. Teaching Science in Secondary School. 4 Units.**

Prospective secondary science teachers learn how to teach science in grades 7-12. Covers State science requirements, a variety of teaching methods, criteria for selecting science curricular materials, and how to plan science lessons, units, experiments, projects, and demonstrations.

Same as EDUC 341.

Restriction: Master of Arts in Teaching Degree students only.

**ECO EVO 398. Teaching Assistant Seminar. 2 Units.**

Readings, lectures, workshops, and student presentations designed to help develop teaching skills of graduate students teaching university-level biology classes. Topics vary and may include: course organization, presentation styles, exam design, grading, motivating students, and commonly encountered problems.

Repeatability: May be repeated for credit unlimited times.

**ECO EVO 399. University Teaching. 4 Units.**

Mandatory course for Ecology and Evolutionary Biology Teaching Assistants, required in each quarter in which student has a Teaching Assistant position. Limited to Teaching Assistants.

Repeatability: May be repeated for credit unlimited times.

## Molecular Biology and Biochem Courses

### **MOL BIO 200A. Research in Molecular Biology and Biochemistry. 2-12 Units.**

Individual research with Molecular Biology and Biochemistry faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

### **MOL BIO 200B. Research in Molecular Biology and Biochemistry. 2-12 Units.**

Individual research with Molecular Biology and Biochemistry faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

### **MOL BIO 200C. Research in Molecular Biology and Biochemistry. 2-12 Units.**

Individual research with Molecular Biology and Biochemistry faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

### **MOL BIO 200R. Research in Developmental & Cell Biology for First-year Students. 2-12 Units.**

Independent research within the laboratories of graduate training faculty in the Department of Molecular Biology and Biochemistry for first-year Ph.D. students.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

### **MOL BIO 201A. Seminars in Molecular Biology & Biochemistry. 2 Units.**

Presentation of research from department laboratories or, when pertinent, of other recent developments.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

### **MOL BIO 201B. Seminars in Molecular Biology & Biochemistry. 2 Units.**

Presentation of research from department laboratories or, when pertinent, of other recent developments.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

### **MOL BIO 201C. Seminars in Molecular Biology & Biochemistry. 2 Units.**

Presentation of research from department laboratories or, when pertinent, of other recent developments.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

### **MOL BIO 202A. Tutorial in Molecular Biology and Biochemistry. 2 Units.**

Tutorials in the area of research of a particular professor which relate current research to the literature. May be conducted as journal clubs.

Repeatability: Unlimited as topics vary.

### **MOL BIO 202B. Tutorial in Molecular Biology and Biochemistry. 2 Units.**

Tutorials in the area of research of a particular professor which relate current research to the literature. May be conducted as journal clubs.

Repeatability: Unlimited as topics vary.

### **MOL BIO 202C. Tutorial in Molecular Biology and Biochemistry. 2 Units.**

Tutorials in the area of research of a particular professor which relate current research to the literature. May be conducted as journal clubs.

Repeatability: Unlimited as topics vary.

**MOL BIO 203. Nucleic Acid Structure and Function. 4 Units.**

Structure and chemistry of nucleic acids. Relationship between these properties and the mechanisms of fundamental processes such as replication and repair, RNA-mediated catalysis, formation and regulation of higher order chromatin structure and recombination.

Prerequisite: BIO SCI 98 and BIO SCI 99 and CHEM 51A and CHEM 51B and CHEM 51C

**MOL BIO 204. Protein Structure and Function. 4 Units.**

The structure and properties of proteins, enzymes, and their kinetic properties.

Prerequisite: BIO SCI 98 and BIO SCI 99 and CHEM 51C

**MOL BIO 205. Molecular Virology. 4 Units.**

Primary research data on the major DNA and RNA viruses emphasizing strategies of regulation of gene expression. Utilization of viruses as molecular biological tools. Graduate-level knowledge of the biochemistry and molecular biology of macromolecules is required.

Prerequisite: MOL BIO 203 and MOL BIO 204

Restriction: Graduate students only.

**MOL BIO 211. High-Resolution Structures: NMR and X-ray. 4 Units.**

Basic principles of magnetic resonance and x-ray crystallography toward the determination of high-resolution biomolecular structures.

Prerequisite: MATH 2B

Restriction: Graduate students only.

Concurrent with BIO SCI M133.

**MOL BIO 213. Literature in Nucleic Acid Structure and Function. 2 Units.**

Exploration and critical analysis of recent primary scientific literature in structure, properties, and biological mechanisms involving nucleic acids.

Corequisite: MOL BIO 203

Grading Option: Satisfactory/unsatisfactory only.

**MOL BIO 214. Literature in Protein Structure and Function. 2 Units.**

Exploration and critical analysis of recent primary scientific literature in structure and properties of proteins, enzymes, and their kinetic properties.

Corequisite: MOL BIO 204

Grading Option: Satisfactory/unsatisfactory only.

**MOL BIO 215. Integrative Immunology. 4 Units.**

Lectures and student presentations of primary literature. The main goal is to achieve a basic understanding of the cellular and molecular basis of innate and adaptive immunity, and how immune function is coordinated at a systems level.

Same as M&MG 215.

**MOL BIO 217A. Principles of Cancer Biology I. 4 Units.**

Oncogenes and tumor suppressor genes are studied from molecular viewpoints. Also studies their role in cancer; viral carcinogenesis. Designed for graduate students interested in cancer research. Format includes lectures and student-led discussions.

Prerequisite: MOL BIO 203 and MOL BIO 204

Restriction: Graduate students only.

**MOL BIO 217B. Principles of Cancer Biology II. 4 Units.**

Topics include cancer cell growth and metastasis, chemical carcinogenesis, and cancer genetics and epidemiology. Designed for graduate students interested in cancer research. Format includes lectures and student-led discussions.

Prerequisite: MOL BIO 203 and MOL BIO 204

Restriction: Graduate students only.

**MOL BIO 218. Clinical Cancer. 3 Units.**

Designed to acquaint students in basic life science with clinical cancer.

Restriction: Graduate students only.

**MOL BIO 220. Structure & Synthesis of Biological Macromolecules Journal Club. 2 Units.**

Advanced topics in macromolecular structure and synthesis as related to biological problems.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**MOL BIO 221. Advanced Topics in Immunology. 4 Units.**

Literature-based, interactive discussions focused on review of seminal historic and recent immunology literature. Student responsibilities include reading, critical evaluation, and discussion of manuscripts.

Prerequisite: M&MG 215

Restriction: Graduate students only.

**MOL BIO 221L. Advanced Immunology Laboratory. 4 Units.**

An advanced course in immunology for graduate students enrolled in the Biotechnology master's program. Emphasis is placed on learning modern techniques in immunology such as ELISAs, western blotting, immunofluorescent staining assays.

Restriction: Graduate students only.

Concurrent with BIO SCI M121L.

**MOL BIO 223. Introduction to Computational Biology. 4 Units.**

The use of theories and methods based on computer science, mathematics, and physics in molecular biology and biochemistry. Basics in biomolecular modeling. Analysis of sequence and structural data of biomolecules. Analysis of biomolecular functions.

Same as BME 232.

Restriction: Graduate students only.

Concurrent with BIO SCI M123 and COMPSCI 183 and BME 132.

**MOL BIO 227. Immunology Journal Club. 2 Units.**

Advanced topics in immunology as related to an understanding of human disease.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 15 times.

Restriction: Graduate students only.

**MOL BIO 229. Research-in-Progress Seminars. 1 Unit.**

Two half-hour presentations by graduate students and postdoctorals to the department on their current research projects.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 15 times.

Restriction: Graduate students only.

**MOL BIO 235. Literature in Chemical and Structural Biology. 1 Unit.**

Exploration and critical analysis of recent primary scientific literature in chemical and structural biology.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**MOL BIO 243. Topics in Stem Cells. 2-4 Units.**

Presentation by participating faculty or guest lecturer that is open to the science community, followed by discussion of the lecture topic or a related topic. Students are responsible for presentations and readings.

**MOL BIO 244. Principles of Genomics. 4 Units.**

A survey course of the principal subfields of genomics and their applications to biological and health sciences that will cover genome assembly and annotation, genome structure, comparative genomics, population genomics, functional genomics, and medical genomics.

Same as DEV BIO 214.

Restriction: Graduate students only.

**MOL BIO 248. Metallobiochemistry . 4 Units.**

A review of the biochemistry of metallic elements emphasizing: methods for studying metals in biological systems; the chemical basis for nature's exploitation of specific elements; structures of active sites; mechanisms; solid-state structures and devices; metals in medicine.

Prerequisite or corequisite: CHEM 131C or CHEM 132C

Same as CHEM 218.

**MOL BIO 250. Advanced Topics in Biotechnology - Nucleic Acids. 2 Units.**

Supplements laboratory curriculum with scientific background behind experimental methods. Format consists of lectures and the presentation and analysis of relevant papers from the scientific literature.

Corequisite: MOL BIO 250L

Restriction: Graduate students only. Biotechnology Majors only.

**MOL BIO 250L. Biotechnology Laboratory - Nucleic Acids. 8 Units.**

Nucleic acid techniques and recombinant DNA technology. Extraction and purification of nucleic acids, cloning and subcloning, PCR, site-directed mutagenesis, nucleic acid hybridization, additional associated procedures. Students must demonstrate accurate documentation of data (laboratory notebook) detailing experience and results.

Corequisite: MOL BIO 250

Restriction: Graduate students only. Biotechnology Majors only.

**MOL BIO 251. Advanced Topics in Biotechnology - Protein Purification and Characterization. 2 Units.**

Supplements laboratory curriculum with scientific background behind experimental methods. Format consists of lectures and the presentation and analysis of relevant papers from the scientific literature.

Corequisite: MOL BIO 251L

Prerequisite: MOL BIO 250L and MOL BIO 250

Restriction: Graduate students only. Biotechnology Majors only.

**MOL BIO 251L. Biotechnology Laboratory - Protein Purification and Characterization. 8 Units.**

Major techniques of handling proteins and antibodies. Protein engineering, expression and large-scale purification of recombinant proteins from bacteria, HPLC, antibody purification, western blotting, additional associated procedures. Students must demonstrate accurate documentation of data (laboratory notebook) detailing experience and results.

Corequisite: MOL BIO 251

Prerequisite: MOL BIO 250L and MOL BIO 250

Restriction: Graduate students only. Biotechnology Majors only.

**MOL BIO 252L. Biotechnology Management Laboratory. 8 Units.**

Overview of current methods in biotechnology, designed specifically for biotechnology graduate students. Organized into four distinct sections (nucleic acids, proteins, virology, and immunology). Students must demonstrate accurate documentation of data (laboratory notebooks) detailing experience and results.

Restriction: Graduate students only. Biotechnology Majors only.

**MOL BIO 253. Biotech Management . 5 Units.**

Taught jointly by Bio Sci and Merage School faculty, the course addresses fundamental aspects within, and associated with, the biotechnology industry. Curriculum is focused largely on management issues, including finance, product development, pharmaceuticals, project management, regulatory affairs, and ethics.

Same as MGMTMBA 293.

Restriction: Graduate students only. Biotechnology Majors only.

**MOL BIO 253L. Stem Cell Laboratory. 4 Units.**

Designed to prepare M.S. Biotechnology program students for a career in stem cell research. Laboratory training utilizes tissue culture, mouse and human embryonic stem cells, and is enhanced with didactic material and discussion.

Prerequisite: MOL BIO 250L and MOL BIO 251L

Restriction: Graduate students only. Biotechnology Majors only.

**MOL BIO 268. Seminar in Systems Microbiology Research. 1 Unit.**

A research and journal club seminar that covers topics on bacteria and phage using approaches and principles from biology, engineering, and physics.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Same as PHYSICS 268, ENGRMSE 267.

Restriction: Upper-division students only. Graduate students only.

**MOL BIO 270. Science Communication Skills. 2 Units.**

Development of effective communication skills, oral and written presentations. Topics range from the art of creating keynote slides to strategically crafting a personal story, culminating in a live presentation to an invited audience.

**MOL BIO 291. Graduate School Fundamentals. 2 Units.**

Lectures and discussions providing basic skills needed for success in Ph.D. graduate studies. Topics include formulating a hypothesis, experimental design, literature review, grant writing, oral communication, biostatistics, time management, and professional development.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Cellular and Molecular Biosci Majors only.

**MOL BIO 292A. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**MOL BIO 292B. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**MOL BIO 292C. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**MOL BIO 293A. Cancer Biology Journal Club. 1 Unit.**

Focuses on molecular mechanisms that underlie the development and progression of cancers. Covers a variety of cancer-related research areas, such as cell cycle control, apoptosis, DNA repair, metastasis, angiogenesis, and others.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**MOL BIO 293B. Cancer Biology Journal Club. 1 Unit.**

Focuses on molecular mechanisms that underlie the development and progression of cancers. Covers a variety of cancer-related research areas, such as cell cycle control, apoptosis, DNA repair, metastasis, angiogenesis, and others.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**MOL BIO 293C. Cancer Biology Journal Club. 1 Unit.**

Focuses on molecular mechanisms that underlie the development and progression of cancers. Covers a variety of cancer-related research areas, such as cell cycle control, apoptosis, DNA repair, metastasis, angiogenesis, and others.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**MOL BIO 295. Biomedical Research Methods. 2 Units.**

Lectures and interactive discussions of research methods in modern biomedical science. Each week will focus on a different class of techniques, including molecular, biochemical, immunological, genomic, bioinformatics, microscopy, cancer biology, genome editing. One hour per week, grading based on attendance.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Cellular and Molecular Biosci Majors only.

**MOL BIO 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Restriction: Graduate students only.

## **Neurobiology and Behavior Courses**

**NEURBIO 200A. Research in Neurobiology and Behavior. 2-12 Units.**

Individual research with Neurobiology and Behavior faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 200B. Research in Neurobiology and Behavior. 2-12 Units.**

Individual research with Neurobiology and Behavior faculty.

Prerequisite: NEURBIO 200A

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 200C. Research in Neurobiology and Behavior. 2-12 Units.**

Individual research with Neurobiology and Behavior faculty.

Prerequisite: NEURBIO 200B

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 201A. Research in Neurobiology and Behavior. 2-12 Units.**

Individual research with Neurobiology and Behavior faculty.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 201B. Research in Neurobiology and Behavior. 2-12 Units.**

Individual research with Neurobiology and Behavior faculty.

Prerequisite: NEURBIO 201A

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 201C. Research in Neurobiology and Behavior. 2-12 Units.**

Individual research with Neurobiology and Behavior faculty.

Prerequisite: NEURBIO 201B

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 202A. Foundations of Neuroscience. 2 Units.**

Intended to expose students to critical reading and analysis of the primary neuroscience literature. Instructors from departments associated with the Interdepartmental Neuroscience Program participate and discuss topics of current interest.

Grading Option: Satisfactory/unsatisfactory only.

**NEURBIO 202B. Foundations of Neuroscience. 2 Units.**

Intended to expose students to critical reading and analysis of the primary neuroscience literature. Instructors from departments associated with the Interdepartmental Neuroscience Program participate and discuss topics of current interest.

Prerequisite: NEURBIO 202A

Grading Option: Satisfactory/unsatisfactory only.

**NEURBIO 206. Molecular Neuroscience. 5 Units.**

Surveys molecular and cellular mechanisms involved in neuronal function, including control of gene expression, post-transcriptional and post-translational processing, RNA and protein targeting, cell death mechanisms, and molecular genetic basis of neurological disorders. Overview of the molecular aspects of developmental neurobiology.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 207. Cellular Neuroscience. 5 Units.**

Neurophysiological and neurochemical mechanisms of electrical and chemical signaling in neurons. Topics include generation of resting- and action-potentials, voltage- and ligand-gated ion channels, second messenger systems, and synaptic transmission and integration.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 207L. Cellular Neuroscience Laboratory. 2 Units.**

Intensive hands-on laboratory experience of contemporary techniques for studying ion channels and synaptic function. Experiments include microelectrode recording, patch clamp, quantal analysis of synaptic transmission, heterologous expression of genes for channels and receptors, brain slice, and fluorescence calcium imaging.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 208. Systems Neuroscience. 5 Units.**

Study of the mammalian nervous system at the systems level. Anatomy and physiology of sensory, motor, and integrative functions.

Repeatability: May be taken for credit 2 times.

Same as ANATOMY 210A.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 209. Behavioral Neuroscience. 5 Units.**

Overview of fundamental conceptual and experimental issues in the neurobiology of learning and memory. The approach is a cross-level integration of research in molecular-genetic, cellular, circuit, systems, and behavioral analyses.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 220. Neural Coding, Computation, and Dynamics. 4 Units.**

Theoretical principles and biological mechanisms underlying how brains acquire, assimilate, store, and retrieve information, compute adaptive responses to external inputs, and how knowledge is extracted from experience to generate an internal model of the world.

Prerequisite: At least one upper-division course in the field of Neuroscience or one upper-division course in Cognitive Science or Machine Learning.

Concurrent with BIO SCI N174.

**NEURBIO 221. Scientific Presentation Skills. 1 Unit.**

A tutorial seminar on developing skills for presenting research to scientific audiences.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**NEURBIO 225. Rigor, Reproducibility, and Research Methods. 1 Unit.**

Understanding key concepts in experimental design, execution, and analysis that enhance or detract from scientific rigor.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**NEURBIO 227. Bioinformatics and Systems Biology. 4 Units.**

Students learn the fundamentals of bioinformatics, genomic approaches, and Linux and R program in order to analyze RNA-sequencing data.

Overlaps with ECO EVO 282, ECO EVO 283.

Restriction: Graduate students only.

**NEURBIO 228. Psychophysiological Methods in Clinical Research . 4 Units.**

Introduces the principal signals of psychophysiology and outlines how measures calculated from these signals can be applied in clinical research and practice.

Prerequisite: One graduate or undergraduate course in statistics.

Restriction: Graduate students only.

**NEURBIO 230. Epigenetics in Health and Disease . 4 Units.**

Focuses on the role of chromatin/nuclear structure organization (histone and DNA modification, chromatin remodeling, higher order chromatin structure and nuclear organization) on gene regulation, DNA replication and repair, relevant to development, metabolism, learning and memory, and human disease.

Prerequisite: MOL BIO 203 or MOL BIO 204 or NEURBIO 206

Same as BIOCHEM 225.

Restriction: Graduate students only.

**NEURBIO 231. Clinical and Epidemiological Aspects of Neurodegenerative Diseases. 4 Units.**

Clinical and epidemiological aspects of neurodegenerative disorders causing dementia will be reviewed, including AD, PD, FTD, HD and cerebrovascular disease. Seminar format will include student presentations and group discussion.

Restriction: Graduate students only.

**NEURBIO 232. Regenerative Neurobiology. 4 Units.**

Surveys the latest research on regenerative neurobiology. Both basic stem cell discoveries and their potential clinical application to brain disorders will be examined.

**NEURBIO 233. Neurobiology of Drug Addiction. 4 Units.**

Provides a comprehensive overview of topics in the addiction field, including drug pharmacology, models/approaches to investigate addiction, brain circuits, genetics, epigenetics, and the cellular and molecular biology of drug addiction.

Restriction: Graduate students only.

Concurrent with BIO SCI N121.

**NEURBIO 236. Cortex: Structure, Function, and Plasticity. 4 Units.**

Structured to include lectures and presentation of papers about cortex with emphasis on sensory-motor cortex. Both historical and current perspectives on cortical structure-function relationship will be critically evaluated.

**NEURBIO 237. Neurobiology of Brain Aging. 4 Units.**

Outlines some of the significant changes that occur in the aging brain, with a special emphasis on risk factors and protective strategies that promote successful brain aging. Topics include changes in synaptic plasticity, neurotrophic factors, and molecular mechanisms in aging.

Prerequisite: NEURBIO 209

**NEURBIO 239. Functional Imaging of the Nervous System. 4 Units.**

Overview of technical and applied aspects of imaging techniques available for studying the nervous system. The areas emphasized are cellular and subcellular imaging of neural function, systems-level imaging of brain function, and imaging of the human brain.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 240. Advanced Analysis of Learning and Memory. 4 Units.**

Advanced analysis of contemporary research concerning the nature and neurobiological bases of learning and memory. Special emphasis is given to time-dependent processes involved in memory storage.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 247. Programming for Neuroscience Research . 4 Units.**

A neuroscience-specific introduction to programming and data analysis using either MATLAB or Scientific PYTHON. Students will learn general programming skills and effective use of programming for data management, statistical analysis, and image analysis.

Overlaps with PSYCH 205A.

**NEURBIO 248. Topics in Neurobiology and Behavior. 4 Units.**

Studies in selected areas of Neurobiology and Behavior. Topics addressed vary each quarter.

Repeatability: May be taken for credit 3 times.

**NEURBIO 249. Electronics for Biologists. 4 Units.**

Basic principles of electricity; properties and use of discrete components and integrated circuits; circuit analysis and design. Intended for advanced students in the life sciences.

Same as PHYSIO 205.

**NEURBIO 254. Molecular Neurobiology. 4 Units.**

The application of genetic and recombinant DNA technology to neurobiology. Topics include the study of neuronal proteins which play important roles in the formation of synapses and synaptic transmission.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 255. Perspectives in Neuroscience: Past, Present, and Future. 4 Units.**

An overview of the conceptual and technical foundations of contemporary neuroscience from ancient times to the present. The subjects include synapses, neurons, brain organization, sensory, motor and regulatory systems, learning and memory, human brain function and dysfunction.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

Concurrent with BIO SCI N119.

**NEURBIO 257. Statistics for Neurobiologists. 4 Units.**

Introduction to common methods for statistical analysis used in neurobiology. Topics covered include t-tests, ANOVAs, correlations and regressions, general linear model, power analysis, and non-parametric tests.

Restriction: Graduate students only.

**NEURBIO 260. Auditory Neuroscience. 4 Units.**

Multidisciplinary overview of brain mechanisms of hearing. Emphasizes breadth of auditory function and research: single neurons to psychoacoustics, the cochlea to the cortex, and basic science to clinic.

Concurrent with BIO SCI N147.

**NEURBIO 290. Colloquium in Neurobiology and Behavior. 1.3 Unit.**

Presentation of contemporary research problems in neurobiology and behavior and related areas by invited speakers.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 292. Scientific Proposals for Neuroscience Trainees. 4 Units.**

Students learn how to effectively communicate scientific ideas and results. Activities include learning how to effectively write a scientific proposal, how to perform a coherent, persuasive slide presentation, and how to give meaningful, constructive review critiques.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 399. University Teaching. 1-4 Units.**

Limited to Teaching Assistants.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Biological Sciences, B.S.

The Biological Sciences major presents a unified, in-depth study of modern biology. The Biological Sciences Core is a five-quarter series of courses ranging from ecology and evolutionary biology, to genetics, biochemistry, and molecular biology. Important laboratory techniques and methodology are presented in upper-division laboratories. Advanced elective courses provide an opportunity to continue to diversify students' exposure to the biological sciences or to gain a much more in-depth study of a particular area of the biological sciences.

**NOTE:** Biological Sciences majors who successfully complete their second year of study may elect to apply for a change of major to one of the following: Biochemistry and Molecular Biology, Developmental and Cell Biology, Exercise Sciences, Genetics, Human Biology, Microbiology and Immunology, or Neurobiology. Students may apply directly to the Biology/Education major or the Ecology and Evolutionary Biology major when they apply for admission to UCI. Contact the Biological Sciences Student Affairs Office for more information.

In the event that the number of students who elect Biological Sciences as a major exceeds the number of positions available, applicants may be subject to screening beyond minimum University of California admissions requirements.

**Freshmen:** Preference will be given to those who rank the highest using the selection criteria as stated in the Undergraduate Admissions section of this *Catalogue*.

**Transfer students:** Junior-level applicants with the highest grades overall and who satisfactorily complete course prerequisites will be given preference for admission. All applicants must complete one year of general chemistry with laboratory with grades of C or better; one year of organic chemistry with laboratory with grades of C or better; one year of biology courses equivalent to BIO SCI 93, BIO SCI 94 at UCI with a grade of C or better in each course; and have a cumulative GPA of 3.0 or higher.

No student may enter as a double major, but Biological Sciences students interested in other areas may apply to become double majors after the first quarter, if the second school or program approves. A strong academic performance in the second area is requisite for acceptance as a double major.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Major Requirements

A. Required Major Courses:

Select three of the following:

BIO SCI D103	Cell Biology
BIO SCI D104	Developmental Biology
BIO SCI D105	Cell, Developmental, and Molecular Biology of Plants
BIO SCI E106	Processes in Ecology and Evolution
BIO SCI E109	Human Physiology
BIO SCI N110	Neurobiology and Behavior

B. Upper-Division Laboratories:

Select three of the following:

BIO SCI D111L	Developmental and Cell Biology Laboratory
---------------	---

## Planning a Program of Study

Since biological sciences courses are built upon a base of the physical sciences, it is very important for students to take their required physical sciences early, particularly general and organic chemistry. Students who have not completed high school chemistry are well advised to complete a preparatory chemistry course before entering UCI. The academic program shown below is only a suggested program. Students should consult the Biological Sciences Student Affairs Office for individual academic planning.

Freshmen will normally take HUMAN 1A and HUMAN 1AS or lower-division writing courses, CHEM 1A, BIO SCI 93, and a freshman seminar (BIO SCI 2A) during the fall quarter. Students will then continue with BIO SCI 94, complete their general chemistry requirement, and continue with Humanities or lower-division writing during the remaining winter and spring quarters.

Sophomores begin organic chemistry (CHEM 51A) and continue the Biological Sciences Core with BIO SCI 97, BIO SCI 98, BIO SCI 99. Sophomores often begin taking courses in other disciplines to meet the UCI general education requirement and fulfill their mathematics requirement if they have not done so as freshmen.

During their junior year, most majors continue with the Biological Sciences electives and take physics. Students who intend to double major in Chemistry will be required to take PHYSICS 7C-PHYSICS 7D-PHYSICS 7E in place of PHYSICS 3A-PHYSICS 3B-PHYSICS 3C. Juniors may complete their general education requirements and usually start their research and their upper-division biology laboratory courses.

Finally, during their senior year, students continue their research and complete their remaining major requirements.

Students in the Biological Sciences major are required to make progress toward their degree, and their progress will be monitored. If normal academic progress toward the degree in Biological Sciences is not being met, students will be subject to probation.

## Sample Program — Biological Sciences

Freshman		
Fall	Winter	Spring
BIO SCI 93	BIO SCI 94	MATH 5A
CHEM 1A	CHEM 1B	CHEM 1C- 1LC
Lower-Division Writing <sup>1</sup>	Lower-Division Writing <sup>1</sup>	Lower-Division Writing <sup>1</sup>
BIO SCI 2A	General Education	
Sophomore		
Fall	Winter	Spring
BIO SCI 97	BIO SCI 98	BIO SCI 99
CHEM 51A	CHEM 51B- 51LB	CHEM 51C- 51LC
CHEM 1LD	General Education	STATS 7, 8, MATH 2D, or MATH 3A
MATH 5B		
BIO SCI 194S		
Junior		
Fall	Winter	Spring
Required Major course	Required Major course	Required Major course
PHYSICS 3A	PHYSICS 3B- 3LB	PHYSICS 3C- 3LC
Elective/Research	Elective/Research	Bio. Sci. elective
BIO SCI 100		Elective/Research
Senior

Bio. Sci. elective	Bio. Sci. elective	Bio. Sci. elective
Bio. Sci. U-D Lab	Bio. Sci. U-D Lab	Bio. Sci. U-D Lab
Elective	Research	Research
	Electives	Electives

<sup>1</sup> Students have the option of taking HUMAN 1AS, HUMAN 1BS, HUMAN 1CS or WRITING 39A, WRITING 39B, WRITING 39C in order to fulfill the lower-division writing requirement.

## Biological Sciences, M.S.

The School of Biological Sciences offers both the Master of Science and Doctor of Philosophy, although emphasis at the graduate level is placed on the Ph.D. programs. Most training takes place within one of the departments, although full facilities and curricular offerings are available to all graduate students in all departments of the Biological Sciences. Interdisciplinary study and research are encouraged.

Students are expected to maintain a B average at all times. The normative time to degree is two years for the master's degree and five years for the doctoral degree. A master's degree is not a prerequisite for the Ph.D.

Students plan their academic program in consultation with the graduate advisor or a faculty committee. Faculty advisors may be changed to meet the needs and interests of the student. In addition, it is possible for students to transfer to another program in the School, subject to the approval of the dean of Graduate Studies, and acceptance into that program. Students are encouraged to consult with faculty members with regard to their research and academic interests.

During their graduate training, all doctoral students are required to serve at least two quarters as a 50-percent teaching assistant under the direction of laboratory coordinators or faculty. Advanced graduate students may work closely with faculty in the planning and execution of the teaching program. The amount and nature of the teaching experience varies with the department.

The Master of Science may be completed by submission of a research thesis (plan I) or by course work and a comprehensive examination (plan II).

### **Plan I: Thesis Plan**

The student is required to complete at least four didactic graduate courses (16 units) offered by the department, and elective course work with an additional eight units of graduate or upper-division undergraduate course work. In addition, the student will typically take additional seminar courses during the graduate study. Students in the M.S. program may be employed as teaching assistants, but units earned through enrollment in University Teaching (399) may not be counted toward degree completion. The student engages in thesis research with a faculty thesis advisor, and will prepare and submit a thesis to the thesis committee. The final examination is an oral presentation of the thesis to the committee. The normative time to degree is two years for the thesis M.S.

### **Plan II: Comprehensive Examination Plan**

The plan II M.S. is awarded based on completion of at least 36 units of course work and satisfactory completion of a comprehensive examination. The student is required to complete at least 16 units (four courses) of didactic graduate course work offered by the department. In addition, the student will take up to 12 units of research. An additional eight units or more of elective course work will be completed from other graduate courses offered by the department. A maximum of four units of upper-division undergraduate courses may be included in the program with the approval of the associate dean for Graduate Studies. Students in the M.S. program may be employed as teaching assistants, but units earned through enrollment in University Teaching (399) may not be counted toward degree completion. The comprehensive exam will be administered by a committee of at least three departmental faculty, and may include written and oral sections. The comprehensive examination format will include presentation of research or a capstone project and may include additional sections such as a research proposal, presentation of a project, critical analysis, or other components. The normative time to degree is two years for the M.S. by comprehensive examination.

## **Master of Science with a Concentration in Biotechnology**

Department of Molecular Biology and Biochemistry

### **Craig M. Walsh, Director**

3205 McGaugh Hall

949-824-6034

<http://www.bio.uci.edu/>

[morgano@uci.edu](mailto:morgano@uci.edu)

The field of biotechnology has developed explosively since the discovery of gene cloning and sequencing methods in the mid-1970s. The field is now represented by many active and successful companies who share an intense demand for well-trained people with up-to-date research skills in the manipulation of nucleic acids, proteins, immunological reagents, and pathogenic organisms. The program in Biotechnology is research based, and features two tracks leading to an M.S. in Biological Sciences. The first is the traditional program, and the second, which takes advantage of a defined area of campus research strength, provides an emphasis in stem cell biology. Both tracks incorporate extensive training from both teaching laboratories and actual research settings (individual faculty laboratories). Focus is placed on techniques relevant to industry and seminar exposure to the nature of industry. It is designed to train students to enter the field of biotechnology as skilled laboratory practitioners. Emphasis is placed on learning state-of-the-art technology in genomics, protein isolation and characterization, animal and microbial cell culture, virology, immunology, and/or stem cell biology. Students are trained in experimental rationales for solving actual research problems and are encouraged to take summer internships in industry between the first and second year of their studies.

### **Admissions**

The Department of Molecular Biology and Biochemistry evaluates applicants to the program on the basis of grades, letters of recommendation, GRE scores, and other relevant qualifications. Applicants should have successfully completed a B.S. or equivalent. Courses should include general chemistry with laboratory, calculus, physics, organic chemistry, genetics, biochemistry, molecular biology, microbiology, immunology, and virology, as well as laboratory courses in biochemistry, molecular biology, microbiology, and either animal virology or immunology. Enrollment in the stem cell biology emphasis is limited to eight continuing students per year. Biotechnology graduate students interested in this track apply for admission during the winter quarter of their first year in the program.

### **Requirements**

The traditional program emphasizes training in laboratory and research environments. First-year students are required to enroll in a series of laboratory courses:

MOL BIO 250L	Biotechnology Laboratory - Nucleic Acids
MOL BIO 251L	Biotechnology Laboratory - Protein Purification and Characterization
MOL BIO 221L or MOL BIO 227L	Advanced Immunology Laboratory

In the spring quarter of year one, students enroll in either MOL BIO 221L or, if offered, MOL BIO 227L. These courses are designed to teach techniques in recombinant DNA methodology, protein isolation and characterization, proteomics, animal and microbial cell culture, immunology, and virology. In addition, students are trained rigorously in data recording and presentation as the laboratory notebooks are reviewed and graded by laboratory course instructors. Students are taught formal coursework in nucleic acids, proteins, genetic engineering, and molecular/cellular biology. Emphasis during the second year is devoted exclusively to research projects in faculty laboratories, with the exception of one elective course each quarter from an approved list or by consent of the Director. The program concludes with a formal presentation of the student's research at the end of the second year.

Students enrolled in the stem cell biology emphasis take the same number of laboratory and lecture courses as those in the traditional track. However, in the spring quarter of their first year they must enroll in the stem cell laboratory (taught at the Stem Cell Research Core Facility), and their electives must include the following courses, if offered: Stem Cell Policy (M&MG 230), Stem Cell Biology (DEV BIO 245), and one other elective focused on stem cells. In addition, their individual research must be conducted in the laboratory of a faculty member utilizing stem cells.

While the Biotechnology program is designed to produce skilled laboratory practitioners for industrial positions, some students may wish to continue in a Ph.D. program. The Department of Molecular Biology and Biochemistry is a member of the interdisciplinary graduate program in Cellular and Molecular Biosciences, a program which offers the Ph.D. in Biological Sciences. Biotechnology program students who wish to enter the interdisciplinary graduate program upon completion of the M.S. should apply for admission during their second year.

### Program in Law and Graduate Studies (J.D./Ph.D.; J.D./M.S.)

Highly-qualified students interested in combining the study of law with graduate qualifications in Biotechnology are invited to undertake concurrent degree study under the auspices of UC Irvine's Program in Law and Graduate Studies (PLGS). Students in this program pursue a coordinated curriculum leading to a J.D. from the School of Law in conjunction with a Master's degree in Biological Sciences, Concentration in Biotechnology. Additional information is available from the PLGS Program Director's Office at 949-824-4158 or by email at [plgs@law.uci.edu](mailto:plgs@law.uci.edu) (%20plgs@law.uci.edu). A full description of the program, with links to all relevant application information, can be found at <http://www.plgs.uci.edu>.

## Biological Sciences, Minor

The Biological Sciences minor presents a unified, in-depth study of modern biology. The courses range from ecology and evolutionary biology to genetics, biochemistry and molecular biology.

Nine courses are required, no more than two of which may be taken on a Pass/Not Pass basis:

A. Select three of the following: <sup>1</sup>

BIO SCI 93	From DNA to Organisms
BIO SCI 94	From Organisms to Ecosystems
BIO SCI 97	Genetics
BIO SCI 98	Biochemistry
BIO SCI 99	Molecular Biology

B. Select six of the following: <sup>2</sup>

Three- or four-unit courses selected from BIO SCI 5–H90 (excluding 14 and 46), 93–99, and D103–D190, E106–E190, M114–M190, N110–N190.
---

<sup>1</sup> Prerequisites are strictly enforced. Exceptions may be made for some majors that accept the above courses for degree requirements. Consult with the Biological Sciences Student Affairs Office or the academic counseling office of the major.

<sup>2</sup> Three courses must be upper-division. Prerequisites are strictly enforced. (Courses used to satisfy group A may not also be used to satisfy group B.)

**Residence requirement for the minor:** A minimum of six courses required for the minor must be completed at UCI. Approved courses taken in the Education Abroad Program are considered to be in-residence courses.

**NOTE:** Students in any of the majors within the School of Biological Sciences or students majoring in Public Health Sciences, Biomedical Engineering: Premedical, Nursing Science, or Pharmaceutical Sciences may not minor in Biological Sciences.

## Biological Sciences, Ph.D.

The School of Biological Sciences offers both the Master of Science and Doctor of Philosophy, although emphasis at the graduate level is placed on the Ph.D. programs. Most training takes place within one of the departments, although full facilities and curricular offerings are available to all graduate students in all departments of the Biological Sciences. Interdisciplinary study and research are encouraged.

Students are expected to maintain a B average at all times. The normative time to degree is two years for the master's degree and five years for the doctoral degree. A master's degree is not a prerequisite for the Ph.D.

Students plan their academic program in consultation with the graduate advisor or a faculty committee. Faculty advisors may be changed to meet the needs and interests of the student. In addition, it is possible for students to transfer to another program in the School, subject to the approval of the dean of Graduate Studies, and acceptance into that program. Students are encouraged to consult with faculty members with regard to their research and academic interests.

During their graduate training, all doctoral students are required to serve at least two quarters as a 50-percent teaching assistant under the direction of laboratory coordinators or faculty. Advanced graduate students may work closely with faculty in the planning and execution of the teaching program. The amount and nature of the teaching experience varies with the department.

### Master of Science

The Master of Science may be completed by submission of a research thesis (plan I) or by course work and a comprehensive examination (plan II).

#### Plan I: Thesis Plan

The student is required to complete at least four didactic graduate courses (16 units) offered by the department, and elective course work with an additional eight units of graduate or upper-division undergraduate course work. In addition, the student will typically take additional seminar courses during the graduate study. Students in the M.S. program may be employed as teaching assistants, but units earned through enrollment in University Teaching (399) may not be counted toward degree completion. The student engages in thesis research with a faculty thesis advisor, and will prepare and submit a thesis to the thesis committee. The final examination is an oral presentation of the thesis to the committee. The normative time to degree is two years for the thesis M.S.

#### Plan II: Comprehensive Examination Plan

The plan II M.S. is awarded based on completion of at least 36 units of course work and satisfactory completion of a comprehensive examination. The student is required to complete at least 16 units (four courses) of didactic graduate course work offered by the department. In addition, the student will take up to 12 units of research. An additional eight units or more of elective course work will be completed from other graduate courses offered by the department. A maximum of four units of upper-division undergraduate courses may be included in the program with the approval of the associate dean for Graduate Studies. Students in the M.S. program may be employed as teaching assistants, but units earned through enrollment in University Teaching (399) may not be counted toward degree completion. The comprehensive exam will be administered by a committee of at least three departmental faculty, and may include written and oral sections. The comprehensive examination format will include presentation of research or a capstone project and may include additional sections such as a research proposal, presentation of a project, critical analysis, or other components. The normative time to degree is two years for the M.S. by comprehensive examination.

### Doctor of Philosophy

#### Comprehensive Examination-First Year

Some departments and graduate programs require a comprehensive examination that is generally taken at the end of the first year of graduate study.

#### Advancement to Candidacy Exam

The advancement to candidacy examination is taken in the third year of graduate study. The student will prepare a written research proposal based on a federal granting agency format, and the proposal will be submitted to the advancement committee. The student will present the research proposal to a committee of five faculty members. At the time of advancement to candidacy, the student is expected to have identified an important and tractable dissertation topic, and to have demonstrated the technical and intellectual skills to complete doctoral thesis research.

Once the advancement to candidacy examination is completed, the student is expected to complete the doctoral degree within three years. The student must submit a dissertation on their research and defend the thesis in an oral examination during the final year of graduate study. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

Graduate student status or consent of instructor is a prerequisite for all 200–299 courses.

## Biology/Education, B.S.

Majors in Biology/Education earn their bachelor's degree concurrently with a California Preliminary Single Subject Teaching Credential. Individuals who hold this credential are authorized to teach biology and general science in a middle school or high school.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

School requirement variation: BIO SCI 100, CHEM 51C, and CHEM 51LC are not required of Biology/Education majors.

### Major Requirements for the B.S. in Biology/Education

#### A. Required Major Courses:

Select three of the following:

BIO SCI D103	Cell Biology
BIO SCI D104	Developmental Biology
BIO SCI D105	Cell, Developmental, and Molecular Biology of Plants
BIO SCI E106	Processes in Ecology and Evolution
BIO SCI E109	Human Physiology
BIO SCI N110	Neurobiology and Behavior

#### B. Upper-Division Laboratories:

Select two of the following:

BIO SCI D111L	Developmental and Cell Biology Laboratory
BIO SCI E106L	Habitats and Organisms
BIO SCI E112L	Physiology Laboratory
BIO SCI E115L	Evolution Laboratory
BIO SCI E131L	Image Analysis in Biological Research
BIO SCI E140L	Evolution and the Environment Laboratory
BIO SCI E160L	Biology of Birds Lab
BIO SCI E166L	Field Biology
BIO SCI E179L	Field Freshwater Ecology
BIO SCI M114L	Biochemistry Laboratory
BIO SCI M116L	Molecular Biology Laboratory
BIO SCI M118L	Experimental Microbiology Laboratory
BIO SCI M121L	Advanced Immunology Laboratory
BIO SCI M130L	Advanced Molecular Lab Techniques
BIO SCI N113L	Neurobiology Laboratory

One laboratory can be satisfied with completion of Excellence in Research in the Biological Sciences.

#### C. Upper-Division Biology Electives:

Select two, four-unit courses from the following:

BIO SCI D103–D190, E106–E190, M114–M190, N110–N190 <sup>1</sup>	
PHRMSCI 170A	Molecular Pharmacology I
PHRMSCI 170B	Molecular Pharmacology II
PHRMSCI 171	Physical Biochemistry
PHRMSCI 173	Pharmacotherapy
PHRMSCI 174	Biopharmaceutics and Nanomedicine
CHEM 177	Medicinal Chemistry

The following courses can be used to partially satisfy the Upper-Division Biology Elective Requirement:

PHYSICS 147B	Techniques in Medical Imaging I: X-ray, Nuclear, and NMR Imaging
--------------	--

Additionally, Psychology/Biological Sciences double majors may also use PSYCH 112A-PSYCH 112C to partially satisfy the Upper-Division Biology Elective Requirement.

#### D. Science Teaching Courses:

BIO SCI 14	California Teach 1: Introduction to Science and Mathematics Teaching
BIO SCI 101	California Teach 2: Middle School Science and Mathematics Teaching
BIO SCI 108	Research Methods
EDUC 55	Knowing and Learning in Mathematics and Science
EDUC 109	Reading and Writing in Mathematics and Science
EDUC 143AW	Classroom Interactions I
EDUC 143BW	Classroom Interactions II
EDUC 148	Complex Pedagogical Design

EDUC 158	Student Teaching Mathematics and Science in Middle/High School (two quarters)
LPS/HISTORY 60	The Making of Modern Science

- <sup>1</sup> BIO SCI D103, BIO SCI D104, BIO SCI D105, BIO SCI E106, BIO SCI E109, BIO SCI N110 may not be used to satisfy more than one requirement.

NOTE: Double majors within the School of Biological Sciences or with Public Health Sciences, Biomedical Engineering: Premedical, Nursing Science, or Pharmaceutical Sciences are not permitted.

### Requirements for the Teaching Credential

BIO SCI 14	California Teach 1: Introduction to Science and Mathematics Teaching
BIO SCI 101	California Teach 2: Middle School Science and Mathematics Teaching
BIO SCI 108	Research Methods
EDUC 55	Knowing and Learning in Mathematics and Science
EDUC 109	Reading and Writing in Mathematics and Science
EDUC 143AW	Classroom Interactions I
EDUC 143BW	Classroom Interactions II
EDUC 148	Complex Pedagogical Design
EDUC 158	Student Teaching Mathematics and Science in Middle/High School (two quarters)
LPS 60	The Making of Modern Science

Beyond course work, some additional requirements for teacher certification are described below. With careful, early planning, it is possible for students to complete their bachelor's degree and teacher certification in four years. This is a more time-efficient and cost-effective route than the traditional five-year teacher preparation model, which usually involves a full academic year of teacher education courses and clinical teaching experience after completion of a bachelor's degree.

After the School of Biological Sciences verifies the completion of all requirements for the bachelor's degree, students are awarded their degree from UC Irvine. By contrast, the Preliminary Single Subject Teaching Credential is awarded by the California Commission on Teacher Credentialing (CTC) upon completion of a bachelor's degree and the state-approved UCI teacher education program, which combines course work, student teaching, and a teaching performance assessment. The UCI School of Education must verify completion of all requirements for the teaching credential and then recommend that the credential be awarded to a candidate by the CTC.

**Additional Requirements for Teacher Certification.** In addition to the required course work for a California Preliminary Single Subject Teaching Credential, some additional requirements must be satisfied:

- The School of Biological Sciences requires a *cumulative* GPA of 2.0 (C) to graduate with the bachelor's degree.
 

BIO SCI 101	California Teach 2: Middle School Science and Mathematics Teaching
EDUC 55	Knowing and Learning in Mathematics and Science
EDUC 109	Reading and Writing in Mathematics and Science
EDUC 143AW	Classroom Interactions I
EDUC 143BW	Classroom Interactions II
EDUC 148	Complex Pedagogical Design
EDUC 158	Student Teaching Mathematics and Science in Middle/High School

  - However, students must earn a grade of *C or better* in the following courses in order to be recommended for the Preliminary Single Subject Credential:
  - In the final phase of teaching preparation, students enrolled in EDUC 158 gain teaching experience as a "student teacher" at a local middle school or high school, while also attending a weekly student teaching seminar at UCI. Each student teacher is paired with a highly qualified science teacher who acts as a mentor while the student teacher gradually takes on full responsibility for daily lesson planning, instruction, and assessment. Cal Teach program instructors select the mentor teachers and match them with student teachers. During the winter and spring quarters when students are enrolled in EDUC 158, they should expect to spend a minimum of four hours per day (typically mornings), five days per week, in their student teaching assignment at a middle school or high school.
- The following must be completed and verified prior to the start of student teaching in EDUC 158:
  - Pass the California Basic Education Skills Test (CBEST), a basic mathematics and literacy skills test. For more information, see [http://www.ctcexams.nesinc.com/PageView.aspx?f=GEN\\_Tests.html](http://www.ctcexams.nesinc.com/PageView.aspx?f=GEN_Tests.html).
  - Pass the California Subject Exam for Teachers (CSET) in science: biology/life science. Although secondary teachers are only required to pass the CSET exam in one discipline, those who pass the CSET exam in more than one disciplinary field (e.g. biology/life science

and chemistry) can be authorized to teach classes in each of those disciplines. For more information about the CSET exam, see [http://www.ctcexams.nesinc.com/PageView.aspx?f=GEN\\_Tests.html](http://www.ctcexams.nesinc.com/PageView.aspx?f=GEN_Tests.html).

- c. Secondary school science teachers in California are expected to have a broad range of general science knowledge in addition to their discipline of specialization, because their Single Subject Teaching Credential in one of the sciences also authorizes them to teach classes in general or integrated science. The general science subtests of the CSET exam cover foundational topics in astronomy, geodynamics, Earth resources, ecology, genetics and evolution, molecular biology and biochemistry, cellular and organismal biology, waves, forces and motion, electricity and magnetism, heat transfer and thermodynamics, and structure and properties of matter. Although students can prepare for the CSET exam's general science subtests through independent study, Biological Sciences students can also prepare by taking lower-division courses that cover the content. Here are some suggested courses for Biology/Education majors:

EARTHSS 1	Introduction to Earth System Science
EARTHSS 7	Physical Geology
PHYSICS 20A	Introduction to Astronomy

- d. Obtain a Certificate of Clearance from the State of California.
- e. Obtain a TB test with negative results.
- f. Demonstrate readiness for student teaching responsibilities as evidenced in course work and satisfactory observations of a candidate during the following required courses:

BIO SCI 101	California Teach 2: Middle School Science and Mathematics Teaching
EDUC 143AW	Classroom Interactions I
EDUC 148	Complex Pedagogical Design

3. The following must be completed and verified before the School of Education is able to recommend an individual for the Preliminary Single Subject Credential:

- a. Pass a state-approved teacher performance assessment, which is completed concurrently with student teaching in EDUC 158.
- b. Complete a college-level course or pass an examination on the U.S. Constitution. POL SCI 21A satisfies this requirement. Contact the UCI School of Education Student Affairs Office for information about the exam.
- c. Obtain a CPR certificate in adult, child, or infant training.

**Declaring Intention to Complete the Biology/Education Major and Teacher Certification.** Prospective teachers who want to complete their degree and a teaching credential in four years are encouraged to start planning early by reviewing the sample program for the Biology/Education major, and consulting with an academic counselor. Interested students are encouraged to get started on the suggested first- and second-year credentialing course work, including BIO SCI 14 and BIO SCI 101, and can do so without officially declaring their intention to complete the credential. However, students must declare their intention to complete requirements for the Biology/Education major and requirements for the Preliminary Single Subject Teaching Credential prior to enrolling in EDUC 55, which they would typically take in fall of their third year. Forms for declaring an intention to complete the teaching credential are available in the Biological Sciences Student Affairs Office or in the Cal Teach Science and Mathematics Resource and Advising Center (137 Biological Sciences Administration).

## Biotechnology Management, M.S.

### Michael G. Cumsky, Director

Department of Molecular Biology and Biochemistry  
3205 McGaugh Hall  
949 824-6034  
<http://www.bio.uci.edu/>  
[morgano@uci.edu](mailto:morgano@uci.edu);

The M.S. in Biotechnology Management is a joint graduate degree that will prepare scientists for leadership roles in biotechnology, science, and engineering-based companies through a curriculum comprised of courses from the Department of Molecular Biology and Biochemistry (MB&B) in the School of Biological Sciences, the Department of Biomedical Engineering in The Henry Samueli School of Engineering, and The Paul Merage School of Business. Students will receive advanced training in biotechnology through course work, a teaching laboratory, and two quarters of independent research in a faculty laboratory of their choosing. They will also learn to think as a business manager by solving product development challenges through consulting projects, creating business plans, and by exposure to current issues within the biotechnology sector. Students will develop quantitative and qualitative skills along with business communication skills. Students will learn about business from the biotechnology perspective and biotechnology from the business perspective and will be taught to think about their work through the lens of innovation, a crucial view for their careers. Importantly, the MSBTM program is fully interdisciplinary, as students are immersed in the campus cultures of both science and business. They take their science courses with M.S. and Ph.D. students from several campus graduate programs, and they take their business/management courses with students in the full-time M.B.A. or FEMBA programs.

### Program Details

Some of the distinctive features of the MSBTM program include the following:

- Advanced training in biotechnology through course work and an eight-unit teaching laboratory;
- A research component whereby students will engage in research with a faculty member in either the School of Biological Sciences or the Department of Biomedical Engineering (requests to perform research in labs outside of Biological Sciences or Biomedical Engineering will be considered on a case-by-case basis). This research component is considered to be important for careers in the biotechnology industry and makes this program unique worldwide;
- An intensive course, Thinking Strategically in the Digital Age (MGMTMBA 200), which presents fundamental concepts, tools, and solutions from management to initiate students into the concrete challenges that managers in high-performing organizations typically confront. Students will be introduced to the pedagogical methods of case analysis, group problem solving, and group presentations as a means of developing the skills and strategies associated with effective managerial action. The course is structured as a full-time, in-residence intensive;
- An experiential learning component wherein student teams, under the guidance of The Paul Merage School of Business and Department of Molecular Biology and Biochemistry professors, act as a consulting team which works with managers of biotechnology or biological science-based companies on innovative solutions to current problems faced by the companies;
- A business plan component wherein students from biosciences and management prepare a formal business plan for an Entrepreneurship or New Venture Management course;
- A capstone course taught in the spring quarter of the second year by faculty in both Biological Sciences and The Paul Merage School of Business. The cross-listed course, Biotech Management (MOL BIO 253)/Biotech Management (MGMTMBA 293), will integrate the program's two-year curriculum and provide a format for the required comprehensive exam. The curriculum will address a number of management issues in the biotech industry, including finance, product development, pharmaceuticals, project management, regulatory affairs, and ethics. Guest lecturers from the biotech industry will also be invited to talk about both the scientific and management sides of their companies;
- "Proseminar" courses provide students with information and practical skills for success in the program and career planning.

Applicants will apply directly to the Graduate Division for the MSBTM program beginning each fall. The program uses rolling admission deadlines. The priority deadline is January 15; applications received by this date are read first, and we begin filling next fall's class from this group. March 15 is the normal deadline; the remainder of the class is filled by these applicants. If the class is not full after a review of the March 15 applicants, we will accept additional applications until June 1. Prerequisite requirements will be the same as those for the Graduate Program in Biotechnology, which include a B.A. or B.S. in Biological Sciences or related discipline and several specific elective and laboratory courses. Admission to graduate standing in MB&B is generally accorded to those possessing a B.S. in Biological Sciences or an allied field obtained with an acceptable level of scholarship from an institution of recognized standing. Those seeking admission without the prerequisite scholarship record may, in some cases, undertake remedial work; if such work is completed at the stipulated academic level, the applicant will be considered for admission. Those admitted from an allied field may be required

to take supplementary upper-division courses in basic engineering subjects. The Graduate Record Examination (GRE) General Test is required of all applicants, except for candidates whose undergraduate GPA is at, or above, 3.2.

Applicants will be evaluated on their prior academic record and their potential for management and leadership as demonstrated in the submitted application materials (university's transcripts, GRE test scores, letters of recommendation, applicable work experience, a Statement of Purpose, and an essay). In addition, there will be an interview by admissions counselors from The Paul Merage School of Business.

### Course Work and Examination Requirements

**M.S. Plan II:** Seventeen required courses, a minimum of 77 units, plus a zero-unit Proseminar sequence (defined below), and a comprehensive examination which will be administered during the jointly taught capstone course in the spring quarter of the second year.

**Required and Recommended Courses, Business:** A total of nine courses adding up to 36 units.

#### A. Complete

MGMTMBA 200	Thinking Strategically in the Digital Age
MGMTMBA 298	Merage Consulting Projects
MGMTMBA 214 or MGMTMBA 213	Entrepreneurship: Planning the New Venture New Venture Management

#### B. Select three of the following MBA core courses:

MGMTMBA 201A	Business Analytics: Decision-Making
MGMTMBA 202	Organizational Leadership for Management
MGMTMBA 203A	Financial Reporting
MGMTMBA 204A	Microeconomics for Management in the Digital Age
MGMTMBA 205	Marketing Principles
MGMTMBA 207	Competing with Digital: Technology, Analytics, and Platforms
MGMTMBA 208	Operational Excellence: Processes, Models, and Analytics
MGMTMBA 209A	Managerial Finance
MGMTMBA 210	Strategy: Foundations and Dynamics

#### C. Complete any three MBA elective courses

**Required and Recommended Courses, Biotechnology:** A total of seven courses adding up to 36 units. These include:

Two core biological science courses, Nucleic Acid Structure and Function (MOL BIO 203) and Protein Structure and Function (MOL BIO 204);

Two additional graduate-level elective courses in biological sciences or biomedical engineering;

One teaching laboratory course focusing on essential methods in biotechnology, Biotechnology Management Laboratory (MOL BIO 252L); and

Two quarters of research (four units in winter quarter of the second year and eight units in spring quarter of the second year) whereby students will engage in independent research with a faculty member of their choosing in the School of Biological Sciences or Department of Biomedical Engineering (requests to perform research in labs outside of Biological Sciences or Biomedical Engineering will be considered on a case by case basis).

### Proseminar Course

This six-quarter course, MBA Proseminar (MGMTMBA 211), provides students with information and practical skills for success in the program and career planning. The goal is to help clarify goals and develop skills and techniques to successfully manage the job search process for employment upon graduation and throughout one's career. This will be accomplished through workshops, presentations, webinars, and meetings with career counselors. Topics include resume writing, job interview coaching, company hiring practices, and career advice and counseling.

### Capstone Course (Year Two)

Biotech Management (Biotech Management (MOL BIO 253)/Biotech Management (MGMTMBA 293), five units), jointly taught by Biological Sciences and Business School faculty, is designed to integrate the program's two-year curriculum and provide a format for the required comprehensive exam. The curriculum will address a number of management issues in the biotech industry including finance, product development, pharmaceuticals, project management, regulatory affairs, and ethics. Guest lecturers from the biotech industry will also be invited to talk about both the scientific and management sides of their companies.

## Department of Developmental and Cell Biology

**Thomas Schilling, Department Chair**

**Kavita Arora, Department Vice Chair**

2212 Biological Sciences III

949-824-2458

<http://devcell.bio.uci.edu/>

Research programs of the Department of Developmental and Cell Biology focus on molecular aspects of the development of eukaryotic organisms, on the molecular interaction of cells in tissue differentiation, and expression and function of genes related to the biogenesis of organelles and cellular constituents. The main emphasis of research training is in the molecular aspects of cells and development, and the utilization of biotechnology. The Department maintains facilities for research that include genetic, molecular, and biochemical techniques and also has facilities in advanced electron optics, microsurgery, microinjection, and neurophysiology.

- Developmental and Cell Biology, B.S.
- Genetics, B.S.

## Graduate Program

The Department offers graduate study in conjunction with the program in Cellular and Molecular Biosciences (CMB), the Interdepartmental Neuroscience Program (INP), and the program in Mathematical and Computational Biology (MCB).

Students admitted into the combined program who select a research advisor in the Department begin following the Departmental requirements for the Ph.D. at the beginning of their second year. Students participate in the Developmental and Cell Biology Journal Club and the Departmental seminar series, which meet weekly during the academic year.

Students must complete the advancement-to-candidacy examination by the end of the third year of graduate study by presenting and defending a proposal for specific dissertation research. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

## Faculty

Joseph Arditti, Ph.D. University of Southern California, *Professor Emeritus of Developmental and Cell Biology* (developmental physiology of orchids)

Kavita Arora, Ph.D. University of Bombay, *Professor of Developmental and Cell Biology* (*Drosophila* development; TGF- $\beta$  signal transduction; cell signaling)

Scott Atwood, Ph.D. University of Oregon, *Assistant Professor of Developmental and Cell Biology; Dermatology*

Pierre F. Baldi, Ph.D. California Institute of Technology, *Director of the Institute for Genomics and Bioinformatics and Distinguished Professor of Computer Science; Biological Chemistry; Biomedical Engineering; Developmental and Cell Biology; Mathematics* (artificial intelligence and machine learning, biomedical informatics, databases and data mining, environmental informatics, statistics and statistical theory)

Lee Bardwell, Ph.D. Stanford University, *Professor of Developmental and Cell Biology* (intracellular signaling in development and disease)

Claudia Benavente, Ph.D. University of Arizona, *Assistant Professor of Pharmaceutical Sciences; Developmental and Cell Biology* (genetics, epigenetics, cancer, pediatric cancer, retinoblastoma, osteosarcoma)

Michael W. Berns, Ph.D. Cornell University, *Arnold and Mabel Beckman Chair in Laser Biomedicine and Professor of Surgery; Biomedical Engineering; Developmental and Cell Biology*

Bruce Blumberg, Ph.D. University of California, Los Angeles, *Professor of Developmental and Cell Biology; Biomedical Engineering; Environmental Health Sciences; Pharmaceutical Sciences* (gene regulation by nuclear hormone receptors in vertebrate development physiology, endocrine disruption)

Hans R. Bode, Ph.D. Yale University, *Professor Emeritus of Developmental and Cell Biology* (molecular basis of pattern formation in *Hydra*)

Peter J. Bryant, Ph.D. University of Sussex, *Research Professor and Professor Emeritus of Developmental and Cell Biology* (tumor-suppressor genes of *Drosophila* and humans)

Susan V. Bryant, Ph.D. University of London, *Professor Emerita of Developmental and Cell Biology* (molecular basis of limb development and regeneration)

Anne L. Calof, Ph.D. University of California, San Francisco, *Professor of Anatomy and Neurobiology; Developmental and Cell Biology*

Richard D. Campbell, Ph.D. The Rockefeller University, *Professor Emeritus of Developmental and Cell Biology* (Morphogenesis; biology of *Hydra*; fractal geometry of biological forms)

Ken W. Cho, Ph.D. University of Pennsylvania, *Professor of Developmental and Cell Biology* (TGF- $\beta$  signaling, gene regulatory networks in development)

Olivier Cinquin, Ph.D. University College London, *Associate Professor of Developmental and Cell Biology* (mathematical modeling of networks, systems biology)

Olivier Civelli, Ph.D. Swiss Federal Institute of Technology in Zurich, *Professor of Pharmaceutical Sciences; Developmental and Cell Biology* (novel neuroactive molecules, molecular neuropharmacology)

Michelle Digman, Ph.D. University of Illinois at Chicago, *Associate Professor of Biomedical Engineering; Developmental and Cell Biology* (biophotonics, fluorescence Spectroscopy and microscopy, nano-scale imaging, mechanotransduction, cancer cell migration, fluorescence lifetime and metabolic mapping)

Peter J. Donovan, Ph.D. University College London, *Professor of Biological Chemistry; Developmental and Cell Biology*

Aimee Lara Edinger, Ph.D. University of Pennsylvania, *Associate Professor of Developmental and Cell Biology* (cancer biology and metabolism, growth control, protein trafficking)

German A. Enciso Ruiz, Ph.D. Rutgers, the State University of New Jersey, *Professor of Mathematics; Developmental and Cell Biology* (applied and computational mathematics, mathematical and computational biology)

Dae Seok Eom, Ph.D. The University of Texas at Austin, *Assistant Professor of Developmental and Cell Biology* (cellular projection mediated long-range cell-to-cell communication)

Donald E. Fosket, Ph.D. University of Idaho, *Professor Emeritus of Developmental and Cell Biology* (regulation of cytoskeleton formation and function)

David M. Gardiner, Ph.D. University of California, San Diego, *Professor of Developmental and Cell Biology* (limb development and regeneration)

Enrico Gratton, Ph.D. University of Rome, *Distinguished Professor of Biomedical Engineering; Developmental and Cell Biology; Physics and Astronomy* (design of new fluorescence instruments, protein dynamics, single molecule, fluorescence microscopy, photon migration in tissues)

Steven P. Gross, Ph.D. University of Texas at Austin, *Professor of Developmental and Cell Biology; Physics and Astronomy* (force generation by molecular motors in living cells)

Patrick L. Healey, Ph.D. University of California, Berkeley, *Professor Emeritus of Developmental and Cell Biology* (plant cellular differentiation and morphogenesis, ultrastructure and histochemistry of secretory systems, early reproductive development)

Franz J. Hoffmann, Ph.D. University of Hohenheim, *Professor of Teaching Emeritus of Developmental and Cell Biology* (regeneration of cultured plant cells, somatic cell genetics)

Daniel J. Knauer, Ph.D. University of Nebraska, *Professor Emeritus of Developmental and Cell Biology* (human antithrombins and related serine protease inhibitors)

Stuart M. Krassner, SCE Johns Hopkins University, *Professor Emeritus of Developmental and Cell Biology* (developmental transitions of hemoflagellates)

Arthur D. Lander, Ph.D. University of California, San Francisco, *Donald Bren Professor and Professor of Developmental and Cell Biology; Biomedical Engineering; Logic and Philosophy of Science* (systems biology of development, pattern formation, growth control)

Shin Lin, Ph.D. University of California, Los Angeles, *Professor of Developmental and Cell Biology* (combined use of biochemistry, cell biology, molecular biology, molecular biophysics to study the structure and function of proteins involved in cytoskeletal/contractile functions and signal transduction in muscle and nonmuscle cells)

Ulrike Luderer, M.D., Ph.D. Northwestern University, *Director of the Environmental Health Sciences Graduate Program and Professor of Medicine; Developmental and Cell Biology; Environmental Health Sciences; Program in Public Health*

Grant R. MacGregor, Ph.D. University of Sussex, *Professor of Developmental and Cell Biology* (mouse reproduction, development, homeostasis)

J. Lawrence Marsh, Ph.D. University of Washington, *Professor Emeritus of Developmental and Cell Biology* (mechanisms of neurodegeneration and molecular genetics of development)

Debra K. Mauzy-Melitz, Ph.D. Marquette University, *Assistant Professor of Teaching of Developmental and Cell Biology* (role of writing in scientific teaching)

Ronald L. Meyer, Ph.D. California Institute of Technology, *Professor Emeritus of Developmental and Cell Biology* (development of nerve connections, nerve injury, and regeneration)

Edwin S. Monuki, M.D., Ph.D. University of California, San Diego, *Department Chair and Warren L. Bostick Chair in Pathology and Professor of Pathology and Laboratory Medicine; Developmental and Cell Biology*

Seyed Ali Mortazavi, Ph.D. California Institute of Technology, *Professor of Developmental and Cell Biology; Biological Chemistry* (functional genomics to study transcriptional regulation in development)

R. Michael Mulligan, Ph.D. Michigan State University, *Biological Sciences Associate Dean of Graduate Studies and Professor of Developmental and Cell Biology; Ecology and Evolutionary Biology* (RNA editing in plant mitochondria and chloroplasts)

Diane K. O'Dowd, Ph.D. University of California, San Diego, *Professor of Developmental and Cell Biology; Anatomy and Neurobiology* (regulation of activity in developing and adult nervous systems)

Michael J. Parsons, Ph.D. University of London, *Associate Professor of Developmental and Cell Biology* (development and regeneration of the endocrine pancreas)

Maksim Plikus, Ph.D. University of Southern California, *Associate Professor of Developmental and Cell Biology* (mechanisms of regeneration, stem cell control)

Thomas F. Schilling, Ph.D. University of Oregon, *Department Chair and Professor of Developmental and Cell Biology* (zebrafish development, vertebrate genetics, craniofacial development)

Christine Suetterlin, Ph.D. University of Basel, *Associate Professor of Developmental and Cell Biology* (centrosome and cilia regulation, Golgi, host-pathogen interaction)

Sha Sun, Ph.D. University of Chicago, *Assistant Professor of Developmental and Cell Biology* (long noncoding RNAs in epigenetic programming)

Katherine L. Thompson-Peer, Ph.D. Harvard Medical School, *Assistant Professor of Developmental and Cell Biology* (investigating how neurons respond and recover after injury)

Wenqi Wang, Ph.D. Shanghai Institutes for Biological Sciences, *Assistant Professor of Developmental and Cell Biology* (the signaling networks underlying tissue homeostasis and organ size control)

Rahul Warrior, Ph.D. Yale University, *Associate Professor of Developmental and Cell Biology* (developmental genetics of transcription and proteoglycan synthesis)

Zeba Wunderlich, Ph.D. Harvard University, *Assistant Professor of Developmental and Cell Biology* (understanding the organization of regulatory information in the genome)

Xiaohui Xie, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Computer Science; Developmental and Cell Biology* (computational biology, bioinformatics, genomics, neural computation, machine learning)

## Courses

### **DEV BIO 200A. Research in Developmental and Cell Biology. 2-12 Units.**

Independent research with Developmental and Cell Biology faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

### **DEV BIO 200B. Research in Developmental and Cell Biology. 2-12 Units.**

Independent research with Developmental and Cell Biology faculty.

Prerequisite: DEV BIO 200A

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

### **DEV BIO 200C. Research in Developmental and Cell Biology . 2-12 Units.**

Independent research with Developmental and Cell Biology faculty.

Prerequisite: DEV BIO 200B

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**DEV BIO 200R. Research in Developmental & Cell Biology for First-year Students. 2-12 Units.**

Independent research within the laboratories of graduate training faculty in the Department of Developmental and Cell Biology for first-year Ph.D. students.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

**DEV BIO 203A. Graduate Tutorial in Developmental and Cell Biology. 4 Units.**

Advanced study in areas not represented by formal courses. May involve individual or small group study through discussion, reading, and composition. Time and subject matter arranged individually.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**DEV BIO 203B. Graduate Tutorial in Developmental and Cell Biology. 4 Units.**

Advanced study in areas not represented by formal courses. May involve individual or small group study through discussion, reading, and composition. Time and subject matter arranged individually.

Prerequisite: DEV BIO 203A

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**DEV BIO 203C. Graduate Tutorial in Developmental and Cell Biology. 4 Units.**

Advanced study in areas not represented by formal courses. May involve individual or small group study through discussion, reading, and composition. Time and subject matter arranged individually.

Prerequisite: DEV BIO 203B

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**DEV BIO 206A. Developmental and Cell Biology Journal Club. 2 Units.**

Advanced study of various topics in cell biology.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**DEV BIO 206B. Developmental and Cell Biology Journal Club. 2 Units.**

Advanced study of various topics in cell biology.

Prerequisite: DEV BIO 206A

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**DEV BIO 206C. Developmental and Cell Biology Journal Club. 2 Units.**

Advanced study of various topics in cell biology.

Prerequisite: DEV BIO 206B

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**DEV BIO 207. Mouse Developmental Genetics. 4 Units.**

Introduction to using the mouse in contemporary biomedical research. The biology and development of the laboratory mouse, methods for manipulation of the mouse genome and embryos, and examples of application of these methods to understand mammalian development and homeostasis.

Same as BIOCHEM 215.

Restriction: Graduate students only.

**DEV BIO 212. Topics in Systems Biology. 2 Units.**

Studies in selected areas of Systems Biology.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**DEV BIO 214. Principles of Genomics. 4 Units.**

A survey course of the principal subfields of genomics and their applications to biological and health sciences that will cover genome assembly and annotation, genome structure, comparative genomics, population genomics, functional genomics, and medical genomics.

Same as MOL BIO 244.

Restriction: Graduate students only.

**DEV BIO 231B. Cell Biology. 4 Units.**

A broadly based course including topics in extracellular matrix, cytoskeleton, organelle biogenesis, receptor-mediated endocytosis, signal transduction, cell cycle, and developmental biology.

Concurrent with BIO SCI D154.

**DEV BIO 232. Systems Cell and Developmental Biology. 4 Units.**

Introduces concepts needed to understand cell and developmental biology at the systems level, i.e., how the parts (molecules) work together to create a complex output. Emphasis on using mathematical/computational modeling to expand/modify insights provided by intuition.

Same as BME 213.

Restriction: Graduate students only.

**DEV BIO 245. Stem Cell Biology. 4 Units.**

The basic characteristics and development roles of embryonic, adult, and cancer stem cells in the human body and in model systems and the use of experimental and genetic methods to analyze and manipulate their properties.

Restriction: Graduate students only.

**DEV BIO 290A. Colloquium in Developmental and Cell Biology. 2 Units.**

Contemporary research problems. Research students, faculty, and other invited speakers introduce research and review topics.

Restriction: Graduate students only.

**DEV BIO 290B. Colloquium in Developmental and Cell Biology. 2 Units.**

Contemporary research problems. Research students, faculty, and other invited speakers introduce research and review topics.

Prerequisite: DEV BIO 290A

Restriction: Graduate students only.

**DEV BIO 290C. Colloquium in Developmental and Cell Biology. 2 Units.**

Contemporary research problems. Research students, faculty, and other invited speakers introduce research and review topics.

Prerequisite: DEV BIO 290B

Restriction: Graduate students only.

**DEV BIO 292A. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**DEV BIO 292B. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Prerequisite: DEV BIO 292A

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**DEV BIO 292C. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Prerequisite: DEV BIO 292B

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**DEV BIO 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Developmental and Cell Biology, B.S.

The Developmental and Cell Biology major is intended to provide students with intensive training in cutting edge approaches to understanding the structure and function of cells and how they interact to produce a complex organism, starting with a fertilized egg. The focus of the B.S. in Developmental and Cell Biology is to provide students with intensive training aimed at preparing them for graduate programs in modern Developmental and Cell Biology or other biomedical sciences. In-depth training in the molecular basis of cell and developmental biology will be coupled with integrating knowledge obtained from the recent explosive advances in genomic technology to provide a strong working understanding of how to approach problems in basic research.

The major has distinctive features. The first is a reduction in the number of required courses, allowing students the opportunity to focus more deeply on training in Developmental and Cell Biology. The second is the implementation of a new course in Genomic and Proteomic analysis that is closely tied to problems in genetics, developmental, and cell biology. Understanding the connections among these disciplines and how to apply the appropriate tools for defining and answering fundamental questions in biomedical research is a critical tool for success in research. Another distinctive feature of the major is the opportunity to replace two upper-division laboratory courses with mentored BIO SCI 199 individual research in faculty laboratories. This offers students the opportunity to apply the tools they have acquired during formal course work to current problems at the frontiers of research. Lastly, students majoring in Developmental and Cell Biology have faculty advisors with whom they meet at least quarterly. The faculty advisors help students plan their curriculum, select appropriate 199 projects and sponsoring labs, and as a group grant petitions and certify the degree. The combination of new upper-division courses, more flexibility in the curriculum, the option for mentored research, and close interaction with faculty advisors will help the Developmental and Cell Biology majors to develop an appreciation of the nature of research and establish a strong foundation for future success in graduate or professional schools.

**Application Process to Declare the Major:** The major in Developmental and Cell Biology is open to junior- and senior-level students only. Applications to declare the major can be made at any time. Information can also be found at the UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu/>). Double majors within the School of Biological Sciences or with Public Health Sciences, Biomedical Engineering: Premedical, Nursing Science, or Pharmaceutical Sciences are not permitted.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Major Requirements

A. Required Major Courses:

BIO SCI D103	Cell Biology
BIO SCI D104	Developmental Biology
BIO SCI D114	Developmental and Cell Biology Majors Seminar
BIO SCI D145	Genomics, Development, and Medicine

B. Upper-Division Laboratories:

BIO SCI D111L	Developmental and Cell Biology Laboratory
---------------	---

and select two of the following: <sup>1</sup>

BIO SCI E106L	Habitats and Organisms
BIO SCI E112L	Physiology Laboratory
BIO SCI E115L	Evolution Laboratory
BIO SCI E131L	Image Analysis in Biological Research
BIO SCI E140L	Evolution and the Environment Laboratory
BIO SCI E160L	Biology of Birds Lab
BIO SCI E166L	Field Biology
BIO SCI E179L	Field Freshwater Ecology
BIO SCI M114L	Biochemistry Laboratory
BIO SCI M116L	Molecular Biology Laboratory
BIO SCI M118L	Experimental Microbiology Laboratory
BIO SCI M121L	Advanced Immunology Laboratory
BIO SCI M130L	Advanced Molecular Lab Techniques
BIO SCI N113L	Neurobiology Laboratory

C. Upper-Division Biology Electives:

Select one of the following:

BIO SCI D136	Human Anatomy
BIO SCI D137	Eukaryotic and Human Genetics
BIO SCI D148	Development and Disease
BIO SCI D170	Applied Human Anatomy

and select one of the following:

BIO SCI D133	Advances in Regenerative Medicine
BIO SCI D135	Cell Biology of Human Disease
BIO SCI D190	Topics in Developmental and Cell Biology
BIO SCI M120	Signal Transduction in Mammalian Cells
BIO SCI M144	Cell Organelles and Membranes

and select three of the following:

BIO SCI D105	Cell, Developmental, and Molecular Biology of Plants
BIO SCI D130	Photomedicine
BIO SCI D132	Introduction to Precision Medicine
BIO SCI D133	Advances in Regenerative Medicine
BIO SCI D136	Human Anatomy
BIO SCI D137	Eukaryotic and Human Genetics
BIO SCI D138	Critical Thinking in Cell Biology
BIO SCI D148	Development and Disease
BIO SCI D170	Applied Human Anatomy
BIO SCI E109	Human Physiology
BIO SCI M114	Advanced Biochemistry
BIO SCI M116	Advanced Molecular Biology
BIO SCI M125	Molecular Biology of Cancer
BIO SCI M137	Microbial Genetics
BIO SCI M143	Human Parasitology
BIO SCI M144	Cell Organelles and Membranes
BIO SCI N110	Neurobiology and Behavior
BIO SCI N151	Neurobiology of Aging
BIO SCI N153	Neuropharmacology
BIO SCI N154	Molecular Neurobiology

NOTE: No course may be used to satisfy more than one requirement.

- <sup>1</sup> Students may petition to substitute Excellence in Research (BIO SCI 199) for two upper-division laboratories (other than BIO SCI D111L); 199 research is strongly encouraged. The 199 laboratory must be approved by the Department, and Excellence in Research must be successfully completed. Final approval is given by the Department.

**Application Process to Declare the Major:** The major in Developmental and Cell Biology is open to junior- and senior-level students only. Applications to declare the major can be made at any time. Information can also be found at the UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu/>). Double majors within the School of Biological Sciences or with Public Health Sciences, Biomedical Engineering: Premedical, Nursing Science, or Pharmaceutical Sciences are not permitted.

- <sup>1</sup> Students have the option of taking HUMAN 1AS, HUMAN 1BS, HUMAN 1CS or WRITING 39A, WRITING 39B, WRITING 39C in order to fulfill the lower-division writing requirement.

## Genetics, B.S.

Genetics pervades every aspect of modern society, from newspaper articles to talk shows, from discussions on health care to discussions on cloning. With the sequencing of the human genome, it is more important than ever for biology students to have a broad background in the study of heredity and evolution. The Genetics major is designed to benefit motivated undergraduates who have a particular interest in learning about developmental genetics, evolutionary genetics, and molecular genetics and to allow them to explore how our knowledge of genetic mechanisms contributes to our understanding of human development and disease. The Genetics major will accommodate students interested in the study of inheritance either as a basic discipline or in terms of its applied aspects in biotechnology, medicine, and agriculture, but will be especially attractive to those students desiring focused study and preparation for graduate training.

Genetics majors begin their study in the junior year with three required major courses (BIO SCI D103, BIO SCI D104) and (BIO SCI D113). In addition to these required major courses, students will choose six additional upper-division Biology Elective courses. Certain courses are designed to give students an understanding of genetic mechanisms and teach them how to define and answer fundamental questions in biomedical research. Additionally, students choose at least two electives that deal with topics such as the molecular biology of cancer, human genetic diseases, developmental genetics, and the genetics of aging. Finally, Genetics majors are encouraged to explore laboratory research by enrolling in BIO SCI 199. Laboratory research not only expands a student's technical skills, but is also designed to allow faculty members to mentor Genetics majors. All students majoring in Genetics have a faculty advisor with whom they meet at least quarterly. The faculty advisor helps students plan their curriculum and select appropriate Biological Sciences 199 research projects. Genetics majors also have an opportunity to meet with other Genetics majors on a regular basis and participate in research talks.

The Genetics major provides graduates with advanced training in the skills necessary to pursue graduate degrees in biomedical research. These include Ph.D. graduate programs, teacher-training programs, medical school, and veterinary school. Genetics graduates may also use their backgrounds effectively in planning careers in law, business, education, and public affairs.

**Application Process to Declare the Major:** The major in Genetics is open to junior- and senior-level students only. Applications to declare the major can be made at any time. Information can also be found at the UCI Change of Major Criteria (<http://www.changeofmajor.uci.edu/>). Double majors within

the School of Biological Sciences or with Public Health Sciences, Biomedical Engineering: Premedical, Nursing Science, or Pharmaceutical Sciences are not permitted.

**All students must meet the University Requirements.**

## Department of Ecology and Evolutionary Biology

### James Hicks, Department Chair

321 Steinhaus Hall  
949-824-6006  
<http://ecoevo.bio.uci.edu/>

### Catherine Loudon, Department Vice Chair

321 Steinhaus Hall  
<http://ecoevo.bio.uci.edu/>

Ecology and evolutionary biology deals with the establishment of adaptations over evolutionary time and with the organismal function in ecological time. Faculty in the Department of Ecology and Evolutionary Biology study questions pertinent at a variety of levels of biological organization, from molecular aspects of evolution, to organismal structure and performance, to the ecology of ocean ecosystems. Research is conducted in both the laboratory and field and includes work on a variety of organisms from phages and bacteria, to higher plants and animals. Primary attention is given to evolutionary, ecological, and functional questions rather than to particular habitats or taxa. Faculty and graduate student research is often collaborative and interdisciplinary in approach. Departmental research activities include physiological ecology energetics, plant-herbivore and plant-pollinator

interactions, microbial ecology and coevolution, quantitative genetics, life history evolution, population and reproductive ecology, community ecology and biogeography. These research endeavors provide a balance between empirical and theoretical approaches to evolutionary, organismal, and ecological problems.

- Ecology and Evolutionary Biology, B.S.
- Ecology and Evolutionary Biology, Graduate Program
- Master of Conservation and Restoration Science

## Faculty

Nancy M. Aguilar-Roca, Ph.D. University of California, San Diego, *Associate Professor of Teaching of Ecology and Evolutionary Biology*

Steven D. Allison, Ph.D. Stanford University, *Professor of Ecology and Evolutionary Biology; Earth System Science*

Peter R. Atsatt, Ph.D. University of California, Los Angeles, *Professor Emeritus of Ecology and Evolutionary Biology*

John C. Avise, Ph.D. University of California, Davis, *UCI Distinguished Professor of Ecology and Evolutionary Biology*

Manny Azizi, Ph.D. University of Massachusetts, *Associate Professor of Ecology and Evolutionary Biology*

Alan G. Barbour, M.D. Tufts University, *Distinguished Professor of Microbiology and Molecular Genetics; Ecology and Evolutionary Biology; Medicine*

Albert F. Bennett, Ph.D. University of Michigan, *Professor Emeritus of Ecology and Evolutionary Biology*

Rudi C. Berkelhamer, Ph.D. University of California, Berkeley, *Professor of Teaching Emerita of Ecology and Evolutionary Biology*

Peter A. Bowler, Ph.D. University of California, Irvine, *Professor of Teaching of Ecology and Evolutionary Biology*

Matthew E. Bracken, Ph.D. Oregon State University, *Professor of Ecology and Evolutionary Biology*

Timothy J. Bradley, Ph.D. University of British Columbia, *Professor Emeritus of Ecology and Evolutionary Biology*

Adriana D. Briscoe, Ph.D. Harvard University, *Professor of Ecology and Evolutionary Biology*

Nancy T. Burley, Ph.D. University of Texas at Austin, *Professor of Ecology and Evolutionary Biology*

Robin M. Bush, Ph.D. University of Michigan, *Professor Emeritus of Ecology and Evolutionary Biology*

Diane R. Campbell, Ph.D. Duke University, *Professor of Ecology and Evolutionary Biology*

F. Lynn Carpenter, Ph.D. University of California, Berkeley, *Professor Emerita of Ecology and Evolutionary Biology*

Michael T. Clegg, Ph.D. University of California, Davis, *Donald Bren Professor and Professor Emeritus of Ecology and Evolutionary Biology*

Kwasi M. Connor, Ph.D. University of Southern California, *Assistant Professor of Ecology and Evolutionary Biology*

James J. Emerson, Ph.D. University of Chicago, *Assistant Professor of Ecology and Evolutionary Biology*

Celia Faiola, Ph.D. Washington State University, *Assistant Professor of Ecology and Evolutionary Biology; Chemistry*

Steven A. Frank, Ph.D. University of Michigan, *Distinguished Professor and Donald Bren Professor of Ecology and Evolutionary Biology; Logic and Philosophy of Science*

Brandon S. Gaut, Ph.D. University of California, Riverside, *Biological Sciences Associate Dean for Research and Innovation and Professor of Ecology and Evolutionary Biology*

Donovan German, Ph.D. University of Florida, *Associate Professor of Ecology and Evolutionary Biology*

Michael L. Goulden, Ph.D. Stanford University, *Professor of Earth System Science; Ecology and Evolutionary Biology*

Bradford A. Hawkins, Ph.D. University of California, Riverside, *Professor Emeritus of Ecology and Evolutionary Biology*

James W. Hicks, Ph.D. University of New Mexico, *Department Chair and Professor of Ecology and Evolutionary Biology*

Bradley S. Hughes, Ph.D. University of California, Irvine, *Associate Professor of Teaching of Ecology and Evolutionary Biology; Education*

George L. Hunt, Jr., Ph.D. Harvard University, *Professor Emeritus of Ecology and Evolutionary Biology*

Travis E. Huxman, Ph.D. University of Nevada, *Professor of Ecology and Evolutionary Biology*

Mahtab F. Jafari, Pharm.D. University of California, San Francisco, *Director of the Center for Healthspan Pharmacology and Professor of Pharmaceutical Sciences; Ecology and Evolutionary Biology* (anti-aging pharmacology and preventive medicine)

C. Sunny Jiang, Ph.D. University of South Florida, *Department Chair and Professor of Civil and Environmental Engineering; Ecology and Evolutionary Biology; Environmental Health Sciences* (water pollution microbiology, environmental biotechnology, aquatic microbial ecology)

Natalia Komarova, Ph.D. University of Arizona, *UCI Chancellor's Professor of Mathematics; Ecology and Evolutionary Biology* (applied and computational mathematics, mathematical and computational biology, mathematics of complex and social phenomena)

Harold Koopowitz, Ph.D. University of California, Los Angeles, *Professor Emeritus of Ecology and Evolutionary Biology*

Joleah B. Lamb, Ph.D. James Cook University, *Assistant Professor of Ecology and Evolutionary Biology*

Anthony D. Long, Ph.D. McMaster University, *Professor of Ecology and Evolutionary Biology; Pharmaceutical Sciences*

Catherine Loudon, Ph.D. Duke University, *Professor of Teaching of Ecology and Evolutionary Biology*

Richard E. MacMillen, Ph.D. University of California, Los Angeles, *Professor Emeritus of Ecology and Evolutionary Biology*

Adam Martiny, Ph.D. Technical University of Denmark, *Professor of Earth System Science; Ecology and Evolutionary Biology*

Jennifer Martiny, Ph.D. Stanford University, *UCI Chancellors' Fellow and Professor of Ecology and Evolutionary Biology*

Matthew J. McHenry, Ph.D. University of California, Berkeley, *Professor of Ecology and Evolutionary Biology*

Kailen Mooney, Ph.D. University of Colorado Boulder, *Professor of Ecology and Evolutionary Biology*

Laurence D. Mueller, Ph.D. University of California, Davis, *Professor of Ecology and Evolutionary Biology*

R. Michael Mulligan, Ph.D. Michigan State University, *Biological Sciences Associate Dean of Graduate Studies and Professor of Developmental and Cell Biology; Ecology and Evolutionary Biology* (RNA editing in plant mitochondria and chloroplasts)

Jessica Pratt, Ph.D. University of California, Irvine, *Associate Professor of Teaching of Ecology and Evolutionary Biology*

James T. Randerson, Ph.D. Stanford University, *UCI Chancellor's Professor of Earth System Science; Civil and Environmental Engineering; Ecology and Evolutionary Biology*

Jose Mari Ranz Navaltro, Ph.D. Universidad Autónoma de Madrid, *Associate Professor of Ecology and Evolutionary Biology*

Alejandra Rodriguez-Verdugo, Ph.D. University of California, Irvine, *Assistant Professor of Ecology and Evolutionary Biology*

Michael R. Rose, Ph.D. University of Sussex, *Professor of Ecology and Evolutionary Biology*

Ann K. Sakai, Ph.D. University of Michigan, *Professor of Ecology and Evolutionary Biology*

Cascade J. Sorte, Ph.D. University of California, Davis, *Associate Professor of Ecology and Evolutionary Biology*

Richard Symanski, Ph.D. Syracuse University, *Professor of Teaching of Ecology and Evolutionary Biology*

Celia Symons, Ph.D. University of California, San Diego, *Assistant Professor of Ecology and Evolutionary Biology*

Kevin Thornton, Ph.D. University of Chicago, *Associate Professor of Ecology and Evolutionary Biology*

Kathleen K. Treseder, Ph.D. Stanford University, *UCI Chancellor's Fellow and Professor of Ecology and Evolutionary Biology*

Arthur Weis, Ph.D. University of Illinois at Urbana-Champaign, *Professor Emeritus of Ecology and Evolutionary Biology*

Stephen G. Weller, Ph.D. University of California, Berkeley, *Professor Emeritus of Ecology and Evolutionary Biology*

Dominik Franz X. Wodarz, Ph.D. Oxford University, *Professor of Ecology and Evolutionary Biology; Mathematics*

Guiyun Yan, Ph.D. University of Vermont, *Professor of Program in Public Health; Ecology and Evolutionary Biology*

## Courses

### **ECO EVO 200A. Research in Ecology and Evolutionary Biology. 2-12 Units.**

Individual research with Ecology and Evolutionary Biological faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

### **ECO EVO 200B. Research in Ecology and Evolutionary Biology. 2-12 Units.**

Individual research with Ecology and Evolutionary Biological faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

### **ECO EVO 200C. Research in Ecology and Evolutionary Biology. 2-12 Units.**

Individual research with Ecology and Evolutionary Biological faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

### **ECO EVO 201. Seminar in Ecology and Evolutionary Biology. 2 Units.**

Invited speakers, graduate students, and faculty present current research in ecology and evolutionary biology.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

Concurrent with BIO SCI E107.

### **ECO EVO 203A. Graduate Tutorial in Ecology and Evolutionary Biology. 2-12 Units.**

Advanced study in areas not represented by formal courses. May involve individual or small group study through reading, discussion, and composition.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

### **ECO EVO 203B. Graduate Tutorial in Ecology and Evolutionary Biology. 2-12 Units.**

Advanced study in areas not represented by formal courses. May involve individual or small group study through reading, discussion, and composition.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

### **ECO EVO 203C. Graduate Tutorial in Ecology and Evolutionary Biology. 2-12 Units.**

Advanced study in areas not represented by formal courses. May involve individual or small group study through reading, discussion, and composition.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

### **ECO EVO 204. Writing Grant Proposals. 4 Units.**

Provides students with hands-on experience writing proposals in the research areas of ecology, evolution, or physiology.

Restriction: Graduate students only.

### **ECO EVO 205. Special Topics in Ecology. 4 Units.**

Survey of special topics in Ecology.

Restriction: Graduate students only.

**ECO EVO 206. Special Topics in Evolution. 4 Units.**

Extensive introduction to the primary literature of evolutionary biology. Topics include population genetics, quantitative genetics, neutralism, molecular evolution, evolution of genetic systems, genetic architecture of fitness, speciation, and macroevolution.

Restriction: Graduate students only.

**ECO EVO 207. Quantitative Methods in Ecology and Evolutionary Biology. 4 Units.**

Statistics for ecologists and evolutionary biologists. Emphasis on specific applications and underlying assumptions rather than on methods of calculation. Topics include experimental design, parametric and nonparametric methods, analysis of variance and covariance, and multiple regression.

Prerequisite: Completion of at least one quarter of statistics including regression and analysis of variance.

Restriction: Graduate students only.

**ECO EVO 208. Ecological and Evolutionary Physiology. 4 Units.**

A summary of information in organismal biology, comparative and ecological physiology, and the biophysical basis of organismal function. Course offered every other fall.

Restriction: Graduate students only.

**ECO EVO 210. Foundations of Physiology. 4 Units.**

Physical and functional principles common to many living forms. Course forms a basis for subsequent specialization in any of the subdisciplines of physiology. Course offered in even years.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ECO EVO 219. Advanced Topics in Ecological Genetics. 4 Units.**

Content and instructor will vary from year to year. Possible topics include coevolution, sex-ratio evolution, evolution senescence, plant population biology, and density-dependent selection.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ECO EVO 221. Advanced Topics in Ecology. 2-4 Units.**

Weekly discussion of current topics in ecology at the graduate level.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

**ECO EVO 222. Statistical Learning in Ecology and Evolution. 4 Units.**

Reviews basic principals of variance/bias trade-offs. Topics include models for prediction and classification, variable selection methods, cross-validation, tree based methods, unsupervised learning. Applications in ecology and evolution using R.

Prerequisite: ECO EVO 207. ECO EVO 207 with a grade of B or better

Restriction: Graduate students only.

**ECO EVO 227. Plant Physiological Ecology. 4 Units.**

Provides a summary of information on plant organismal biology, comparative and ecological physiology, and functional ecology. Offered every other fall.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ECO EVO 228. Seminar in Conservation Biology. 2 Units.**

Devoted to the application of basic ecological principles to the understanding and resolution of environmental problems of both local and global natures. Current problems approached through a combination of readings, group discussions, and visiting speakers.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ECO EVO 230. Topics in Microbial Ecology. 2-4 Units.**

Weekly discussion of current topics in ecology, biogeochemistry, evolution, and physiology of microbial organisms.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**ECO EVO 235. Experimental Evolution. 2 Units.**

Explores experimental evolution, which is now a well-established part of evolutionary biology. With the advent of genomics, it is now one of the most powerful tools for studying the genetic foundations of biology.

Prerequisite: BIO SCI E106

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Biological Sciences students only.

**ECO EVO 246. Seminar in Ecology and Evolution Education. 2 Units.**

Weekly discussion of teaching techniques and challenges that are specific to courses in ecology and evolutionary biology. Emphasis will be on using evidence-based pedagogy techniques. There will be a combination of readings, group discussions and speakers.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ECO EVO 251. Evolutionary and Ecological Principles in Medicine. 4 Units.**

Explore the dynamics of populations on an ecological, epidemiological, and medical level. Considers the dynamics of competition, predation, and parasitism; the spread and control of infectious diseases; and the in vivo dynamics of viral infections and the immune system.

Restriction: Graduate students only.

Concurrent with BIO SCI E151.

**ECO EVO 253. Functional and Structural Evolutionary Genomics. 4 Units.**

Function and organization of genomes analyzed from an evolutionary perspective. Review of some of the most recent experimental approaches in genome analysis and comparative genomics. Relevant software to analyze DNA and expression data is used.

Concurrent with BIO SCI E153.

**ECO EVO 262. Professional Workshop. 2 Units.**

Identify and attend professional or technical skill workshops to gain professional knowledge and certifications related to conservation and restoration science.

Repeatability: May be taken for credit 4 times.

Restriction: Graduate students only.

**ECO EVO 264. Conservation Biology. 4 Units.**

Explores concepts in ecology with potential for conserving biological diversity. Identifies creative applications of ecological research that mitigate impacts of rapid human population growth and habitat destruction on biodiversity.

Restriction: Graduate students only.

**ECO EVO 265. Restoration Ecology. 4 Units.**

Study of principles and practices that help recover degraded ecosystems including restoration in different ecological systems, restoration motives and intensities, implementation and monitoring, and scope and success of case studies.

Restriction: Graduate students only.

**ECO EVO 266L. Field Methods in Restoration. 4 Units.**

Laboratory experience performing field methods that help recover degraded ecosystems in different ecological systems. Emphasis on the plant community composition, soil, irrigation, maintenance, and monitoring of a project.

**ECO EVO 267. Science Communication. 2 Units.**

Develops students' abilities to convey information related to conservation and restoration in a way that has broad appeal and/or effective messaging for non-scientific audiences by assessing the audience, developing effective storytelling, and deploying a persuasive information campaign.

Repeatability: May be taken for credit 2 times.

**ECO EVO 268. Technical Writing. 2 Units.**

Practice developing key documents for restoration projects including a response to a request for proposal (RFP), a restoration project plan, and a monitoring and maintenance plan.

**ECO EVO 269. Project Management. 2 Units.**

Discover the planning, design, implementation, and aftercare phases of managing a conservation or restoration project. Students will project cost, manage risk, analyze sites, evaluate and review projects, and become familiar with common permitting and consultation requirements.

**ECO EVO 270. GIS for Environmental Science. 4 Units.**

Introduction to the fundamental principles of GIS. Topics include cartography, creating/editing GIS data, georeferencing, map projections, geospatial analysis, spatial statistics, and development of GIS models. Focuses on theory and practice.

Restriction: Graduate students only.

**ECO EVO 271. Marine Research and Conservation Methods. 4 Units.**

Field-based introduction to marine ecology and conservation management through the study of the ecology, resource management, and conservation of marine habitats and species, and the use of a variety of marine field research methods.

Restriction: Graduate students only.

**ECO EVO 272. Plant Diversity in a Changing World. 4 Units.**

Investigation of plant diversity in California and throughout the world, including basic systematic concepts, introduction to major groups of flowering plants, and the effects of global biological change on plant diversity. Students carry out a phylogenetic analysis using appropriate software.

Concurrent with BIO SCI E172.

**ECO EVO 275. Wildlife Ecology and Sampling. 4 Units.**

Field-based introduction to wildlife management through the study of the ecology, physiology, population biology management, and conservation of vertebrate wildlife species, and the use of a variety of different wildlife sampling techniques.

Restriction: Graduate students only.

**ECO EVO 282. Fundamentals of Informatics for Biologists. 4 Units.**

Students learn the fundamentals of bioinformatics and the unix operating system (including the shell and Sun Grid Engine) in order to assemble a eukaryotic genome.

Restriction: Graduate students only.

**ECO EVO 283. Advanced Informatics for Biologists. 4 Units.**

Students learn advanced informatics including the analysis of: Poolseq, RNAseq, ATACseq, and ChIPseq datasets using programs such as bwa, tophat, cufflinks, DEseq, Trinity, Agustus, etc., in a unix high-performance computing environment. Statistical tests carried out and publication quality.

Prerequisite: ECO EVO 282

Restriction: Graduate students only.

**ECO EVO 285. Topics in Evolutionary Genetics. 2 Units.**

Weekly discussion of recent research on evolutionary genetics.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ECO EVO 286. MCRS Capstone. 2-12 Units.**

Apply knowledge and skills in a practical professional setting, working with practitioners to identify a conservation or management problem and then to plan, implement, and evaluate a solution.

Repeatability: May be taken for credit for 12 units.

Restriction: Graduate students only.

**ECO EVO 287. Communicating Research Through Video. 4 Units.**

Students explore videography to develop basic production skills through practice with high interest special topics, such as laboratory experimental evolution and educational interdisciplinary field events, and then develop media to communicate their own research or other topics of interest.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ECO EVO 288. Documenting Research Through Cinematic Production. 4 Units.**

Students gain advanced media expertise by conceptualizing investigative research into publicly engaging video projects. Popularly accessible research topics will be adapted into documentary, television, or cinematic pieces that provide opportunities for developing professionally marketable skills in educationally effective media production.

Prerequisite: ECO EVO 287

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ECO EVO 341. Teaching Science in Secondary School. 4 Units.**

Prospective secondary science teachers learn how to teach science in grades 7-12. Covers State science requirements, a variety of teaching methods, criteria for selecting science curricular materials, and how to plan science lessons, units, experiments, projects, and demonstrations.

Same as EDUC 341.

Restriction: Master of Arts in Teaching Degree students only.

**ECO EVO 398. Teaching Assistant Seminar. 2 Units.**

Readings, lectures, workshops, and student presentations designed to help develop teaching skills of graduate students teaching university-level biology classes. Topics vary and may include: course organization, presentation styles, exam design, grading, motivating students, and commonly encountered problems.

Repeatability: May be repeated for credit unlimited times.

**ECO EVO 399. University Teaching. 4 Units.**

Mandatory course for Ecology and Evolutionary Biology Teaching Assistants, required in each quarter in which student has a Teaching Assistant position. Limited to Teaching Assistants.

Repeatability: May be repeated for credit unlimited times.

## Ecology and Evolutionary Biology, B.S.

In the 21st century, biologists in fields ranging from medicine to global change biology increasingly incorporate ecological and evolutionary ideas in their research. The major in Ecology and Evolutionary Biology encourages students to understand and appreciate important linkages between biological disciplines. The major is very broad, including components of evolutionary biology, ecology, and physiology. Faculty interests are also broad and include the evolution of aging, conservation biology, restoration ecology, biogeography, plant and animal population and community ecology, the evolution of infectious disease, evolutionary physiology, behavioral ecology, host-disease interactions, evolutionary genetics, genetics of invasive species, and plant population biology. Following graduation, students will be especially well prepared to enter graduate programs in either ecology or evolution for advanced study. The major also provides the foundation to pursue careers in governmental and non-governmental environmental organizations, as well as professional schools. The Department considers undergraduate experience in research an integral component of a scientific education, and majors are encouraged to participate in BIO SCI 199, in which they will be mentored by an individual faculty member within the Department.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

**Major Requirements**

A. Required Major Courses:

BIO SCI E106	Processes in Ecology and Evolution
BIO SCI E107	Seminar in Ecology and Evolutionary Biology
STATS 8	Introduction to Biological Statistics

B. Upper-Division Laboratories:

BIO SCI E115L	Evolution Laboratory
BIO SCI E166L	Field Biology

and select one of the following:

BIO SCI D111L	Developmental and Cell Biology Laboratory
BIO SCI E106L	Habitats and Organisms
BIO SCI E112L	Physiology Laboratory
BIO SCI E131L	Image Analysis in Biological Research
BIO SCI E140L	Evolution and the Environment Laboratory
BIO SCI E160L	Biology of Birds Lab
BIO SCI E179L	Field Freshwater Ecology
BIO SCI M114L	Biochemistry Laboratory
BIO SCI M116L	Molecular Biology Laboratory
BIO SCI M118L	Experimental Microbiology Laboratory
BIO SCI M121L	Advanced Immunology Laboratory
BIO SCI M130L	Advanced Molecular Lab Techniques
BIO SCI N113L	Neurobiology Laboratory
One laboratory can be satisfied with completion of Excellence in Research in the Biological Sciences.	

## C. Upper-Division Biology Electives:

Select one of the following:

BIO SCI D103	Cell Biology
BIO SCI D104	Developmental Biology
BIO SCI D105	Cell, Developmental, and Molecular Biology of Plants
BIO SCI E109	Human Physiology
BIO SCI N110	Neurobiology and Behavior

and select three four-unit courses from the following:

BIO SCI E118–E190. BIO SCI 199 Research is strongly encouraged.

Double majors within the School of Biological Sciences or with Public Health Sciences, Biomedical Engineering: Premedical, Nursing Science, or Pharmaceutical Sciences are not permitted.

Freshman		
Fall	Winter	Spring
BIO SCI 93	BIO SCI 94	BIO SCI E106 <sup>2</sup>
CHEM 1A	CHEM 1B	CHEM 1C- 1LC
Lower-Division Writing <sup>1</sup>	Lower-Division Writing <sup>1</sup>	Lower-Division Writing <sup>1</sup>
BIO SCI 2A		
Sophomore		
Fall	Winter	Spring
BIO SCI 97	BIO SCI 98	BIO SCI 99
CHEM 51A	CHEM 51B- 51LB	CHEM 51C- 51LC
MATH 5A	MATH 5B	STATS 8
CHEM 1LD		
BIO SCI 194S		
Junior		
Fall	Winter	Spring
BIO SCI E107	U-D Bio. Sci. elective	BIO SCI E115L
PHYSICS 3A	PHYSICS 3B- 3LB	PHYSICS 3C- 3LC
Bio. Sci. research	Bio. Sci. research	U-D Bio. Sci. elective
BIO SCI 100	General Education	Bio. Sci. research
Senior		
Fall	Winter	Spring
BIO SCI E166L	U-D Bio. Sci. elective	U-D Bio. Sci. elective
U-D Lab	Bio. Sci. research	General Education
Bio.Sci. research	General Education	Bio. Sci. research
Elective		

<sup>1</sup> Students have the option of taking HUMAN 1AS, HUMAN 1BS, HUMAN 1CS or WRITING 39A, WRITING 39B, WRITING 39C in order to fulfill the lower-division writing requirement.

<sup>2</sup> BIO SCI E106 is offered in all three quarters, is a prerequisite for many upper-division courses and may be taken at any time after completion of BIO SCI 94.

## Ecology and Evolutionary Biology, Graduate Program

Graduate training provides students with unparalleled opportunities for scientific research and career development. Historically, most students have enrolled in the Ph.D. program, but a thesis-based M.S. program is also available. Graduate students conduct research under the supervision of a faculty advisory committee. The Ph.D. curriculum includes five graduate courses, an advancement examination with written and oral components, and an original dissertation with an oral defense typically completed within five years of enrollment. The M.S. program requires 28 units of coursework along with a research proposal, original thesis, and oral defense typically completed within two or three years.

Applicants for this program should have a solid undergraduate program in biology and ecology, emphasizing both research and fieldwork. In addition, course work in statistics, mathematics, and physical and chemical sciences is expected. The deadline for application is December 1.

The graduate program offers both the Plan I M.S. and the Ph.D. in Biological Sciences.

### Requirements

Students are required to complete a minimum of five core courses during their first six academic quarters. Two of those courses are required graduate-level courses that all students must take:

ECO EVO 204	Writing Grant Proposals (typically in the second year)
ECO EVO 207	Quantitative Methods in Ecology and Evolutionary Biology (typically in the first year)

In addition students must take one course each in the areas of Physiology (P), Ecology (EC), and Evolution (EV). Although all three courses can be taken at the graduate level (G), one of the three courses may be taken as an upper-division undergraduate course (U). The list of acceptable courses is currently limited to:

ECO EVO 208	Ecological and Evolutionary Physiology (GP)
ECO EVO 227	Plant Physiological Ecology (GP)
PHYSIO 206A	Introduction to Medical Physiology (GP)
PHYSIO 206B	Introduction to Medical Physiology (GP)
ANATOMY 201	Human Gross Anatomy (GP)
BIO SCI E109	Human Physiology (UP)
BIO SCI E127	Physiological Plant Ecology (UP)
BIO SCI E138	Comparative Animal Physiology (UP)
BIO SCI E139	Animal Locomotion (UP)
BIO SCI E145	Animal Coloration and Vision (UP)
BIO SCI E183	Exercise Physiology (UP)
BIO SCI E188	Introduction to Insect Physiology (UP)
ECO EVO 205	Special Topics in Ecology (GEC)
ECO EVO 251	Evolutionary and Ecological Principles in Medicine (GEC)
BIO SCI E118	Ecosystem Ecology (UEC)
BIO SCI E151	Evolutionary and Ecological Principles in Medicine (UEC)
BIO SCI E166L	Field Biology (UEC)
BIO SCI E186	Population and Community Ecology (UEC)
ECO EVO 206	Special Topics in Evolution (GEV)
BIO SCI E153	Functional and Structural Evolutionary Genomics (UEV)
BIO SCI E154	Genetics and Human History (UEV)
BIO SCI E168	Evolution (UEV)

If a student wishes to request an exception (an exemption or a substitution), the student must submit a written request justifying the reason to the Graduate Advisor. The Graduate Advisor and the student's Advisory Committee (or prior to the formation of the Advisory Committee, the Prescription Committee) will decide whether to grant the request.

Students who enter the program through the Gateway Program are required to take ECO EVO 204 and one additional course at either the undergraduate or graduate level in the dissertation topic area. The student and his/her thesis advisor should decide which particular course would be most appropriate.

Students are required to maintain a grade point average of B or greater in the five core courses required for that student. The grade of B- is not considered a passing grade for a graduate student. Students must pass the five core courses by the end of their second academic year. Students failing

to meet this requirement may be asked to leave the program. In the event a student receives an Incomplete in any of the core courses, the deficiency must be cleared by the deadline specified by the Graduate Advisor. Any extensions of this deadline require approval by the Graduate Advisor.

### Teaching Requirement

To ensure that all students gain teaching experience, all students are required to serve as Teaching Assistants for a minimum of one quarter for M.S. students and three quarters for Ph.D. students. These are minima, and students may teach additional quarters during their program.

### Research

Each entering graduate student chooses a faculty advisor and a three-person advisory committee for guidance, with whom the student meets at least twice each year. All students are encouraged to submit a research proposal to their advisory committee during their first year of residency. A comprehensive proposal is required before the end of the first year for M.S. students and before advancement to candidacy for Ph.D. students. The progress of each student is reviewed by the student's advisory committee, together with the Graduate Advisor, twice each academic year.

### Advancement to Candidacy and Normative Time for Completion

Doctoral students who Advance to Candidacy meet the M.S. degree requirements, and can receive the M.S. degree by submitting the M.S. degree advancement to candidacy paperwork, and then submitting the M.S. degree completion paperwork in a subsequent quarter.

The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years. All requirements for the M.S. degree should be completed within two years, with a maximum of three years allowed for completion of the program. Advancement to doctoral candidacy by an oral examination is expected during the third year for students entering with a B.A. or B.S. or during the second year for those entering with an M.A. or M.S.

## Master of Conservation and Restoration Science

The Master of Conservation and Restoration Science (MCRS) is designed for professionals or recent graduates who wish to further their education and gain skills that will help them obtain or advance in careers related to environmental management. The MCRS program integrates academic scholarship in ecology and evolutionary biology, training in natural resource management and stewardship, professional development (leadership training in agency, non-profit and for-profit conservation), and community engagement (translational partnerships in research and education).

### Program Objectives

Upon completion of the program, graduates are able to lead and collaborate in the planning, design, implementation, and management of complex, large-scale environmental conservation and restoration activities, in agency, non-profit, and for-profit settings. MCRS graduates have the broad knowledge in applied ecosystem and community ecology, in addition to training in the use of Geographical Information Systems (GIS), remote sensing, and informatics (data analysis and management). Professional development training (e.g., project and personnel management) will position our graduates for leadership positions in environmental non-profits, agencies, and private consulting firms where managing teams of employees, volunteers, and stewards to conduct long-term and large-scale projects is often required.

A B.A. or B.S., preferably in Biology, Conservation Biology, Ecology, or Environmental Science (or comparable degree title) from a fully accredited academic institution, is required for admission. Applicants with undergraduate degrees in areas such as Social Ecology, Public Health, Environmental Policy, or other similar degree titles are considered, but must demonstrate proficiency in the natural sciences and/or practical experience working in the professional field as documented below:

- Undergraduate preparation should include a minimum of:
- One full year of biological sciences
- One full year of chemistry
- One semester or quarter of calculus or statistics

Experience from professional activities will be evaluated by faculty and staff in the program, but extended practical experience in ecology, conservation, restoration, or environmental engineering may be an acceptable substitute for one or more of the requirements above, depending on the nature of the experience. The GRE is not required.

Applicants must demonstrate that they possess academic potential for graduate study and meet the general requirements of the UCI Graduate Division. In addition to the requirements above, selection for admission is based on the following criteria:

1. A minimum overall grade point average of 3.0 in undergraduate academic course work
2. Two confidential letters of recommendation
3. A statement of purpose (describing the applicant's goals in seeking the Master's degree)
4. A resume (noting relevant work/academic experience)

Applicants apply directly to the Graduate Division for the MCRS program beginning each fall. The program uses rolling admission deadlines. The priority deadline is February 1; applications received by this date are read first, and next fall's class begins to fill from this group. April 1 is the normal deadline;

the remainder of the class is filled from these applicants. If the class is not full after each review of the April 1 applicants, additional applications will be accepted until July 1.

### Curriculum

This two-year program of study consists of a four-part curriculum: a first-year sequence of core topic and professional development courses, a summer research/policy internship, a second-year of elective courses, and a team-based capstone experience (that serves as the thesis project). The summer internship and capstone experience are focused on stakeholder-engaged scholarship with community partners, where students are embedded in real-world conservation and restoration settings.

The MCRS program provides curriculum that includes:

1. Experience in core ecological and evolutionary principles underlying conservation and restoration;
2. interdisciplinary training in the earth and environmental sciences vital for a modern perspective on system-based conservation and restoration;
3. training in professional skills required for effective practice and success in leadership positions in non-profit, institute, for-profit and agency settings;
4. research experiences in community-engaged research projects to build bridges between communities of research capacity (universities, institutes, agencies) and need (non-profits, land management agencies, private land-holders, and governments); and
5. exposure to social, political, and economic principles that guide the application of science to conservation and restoration.

### Required and Elective Course Work

This program consists of 11 required classes, four required workshops, four electives (selected across three categories), a recommended summer internship, and a group capstone project. There is no teaching requirement for the MCRS.

A. Complete the following:

ECO EVO 203B	Graduate Tutorial in Ecology and Evolutionary Biology ((Intro to Conservation and Restoration Science - 2 units))
ECO EVO 205	Special Topics in Ecology
ECO EVO 264	Conservation Biology
ECO EVO 265	Restoration Ecology
EARTHSS 264	Ecosystem Ecology
ECO EVO 207	Quantitative Methods in Ecology and Evolutionary Biology
EARTHSS 134	Fundamentals of GIS for Environmental Science
ECO EVO 266L	Field Methods in Restoration
ECO EVO 268	Technical Writing
ECO EVO 267	Science Communication
ECO EVO 269	Project Management

B. Select four courses from the following categories: <sup>1</sup>

Environmental Regulation and Policy
Organismal Biology and Diversity
Earth and Environmental Science

<sup>1</sup> View courses eligible for the elective requirements here (<http://mcrs.bio.uci.edu/elective-courses/>). Courses offered in each category may change each year. Two electives may be taken at the undergraduate level.

### Capstone Project for Degree Completion

In lieu of qualifying exams or a thesis requirement, students are required to complete 12 units of capstone course during their second year in the program. In the MCRS capstone course, groups of three to six students complete a project involving community-engaged scholarship in collaboration with a local partner/stakeholder to address a current management need and/or solve a real environmental problem.

Students demonstrate how the knowledge and skills learned in this program can be applied in a practical professional setting while gaining skills necessary to succeed in the professional arena upon degree completion.

Capstone projects require a written product. The format of this product is not specified, but it must demonstrate that the student can effectively integrate the skills that they have learned in the MCRS program. Programs may include habitat conservation, restoration, or species management plans; detailed reports to partners or stakeholders; or scholarly research papers. All written products must show originality and thoroughness in the conception and implementation of the project and effective integration of their project with the broader field of conservation and restoration science.

## Department of Molecular Biology and Biochemistry

Celia Goulding, Department Chair

**Michael Green, Department Vice Chair**  
**Melissa Lodoen, Department Vice Chair**  
 3205 McGaugh Hall  
 949-824-4915  
<http://mbb.bio.uci.edu/>

The core discipline of Molecular Biology and Biochemistry is the understanding of the molecular mechanisms that underlie all fundamental biological processes. To that end the faculty of the Department of Molecular Biology and Biochemistry represent diverse research interests that include structure and synthesis of proteins and nucleic acids, gene organization and regulation, cell signaling, immunology and host pathogen interactions, biochemical genetics, cell and developmental biology, microbiology and virology.

- Biochemistry and Molecular Biology, B.S.
- Microbiology and Immunology, B.S.

## Graduate Program

The Department offers graduate study in conjunction with the program in Cellular and Molecular Biosciences (CMB) and the Interdepartmental Neuroscience Program (INP). Students admitted into a combined program who select a research advisor in the Department begin following the departmental requirements for the Ph.D. at the beginning of their second year. Participation in an advanced topics seminar series and completion of at least one course per year for three years are expected of all students. Students must advance to candidacy in their third year. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

**Graduate Gateway Program in Medicinal Chemistry and Pharmacology (MCP).** The one-year MCP graduate gateway program is designed to function in concert with selected graduate programs, including the Ph.D. in Biological Sciences. Detailed information is available on the Pharmaceutical Sciences website (<http://pharmsci.uci.edu/current-students/graduate-students/>).

## Faculty

Dana W. Aswad, Ph.D. University of California, Berkeley, *Professor Emeritus of Molecular Biology and Biochemistry*

Hans-Ulrich Bernard, Ph.D. University of Goettingen, *Professor Emeritus of Molecular Biology and Biochemistry; Program in Public Health*

Alexander D. Boiko, Ph.D. University of Illinois at Urbana–Champaign, *Assistant Professor of Molecular Biology and Biochemistry*

Michael J. Buchmeier, Ph.D. McMaster University, *Professor of Medicine; Microbiology and Molecular Genetics; Molecular Biology and Biochemistry*

John Charles Chaput, Ph.D. University of California, Riverside, *Professor of Pharmaceutical Sciences; Chemistry; Molecular Biology and Biochemistry* (chemical and synthetic biology)

Melanie Cocco, Ph.D. Pennsylvania State University, *Associate Professor of Molecular Biology and Biochemistry; Pharmaceutical Sciences*

Michael G. Cumsy, Ph.D. University of California, Berkeley, *Professor of Teaching of Molecular Biology and Biochemistry*

Hung Y. Fan, Ph.D. Massachusetts Institute of Technology, *Professor Emeritus of Molecular Biology and Biochemistry*

Donald N. Forthal, M.D. University of California, Irvine, *Professor of Medicine; Molecular Biology and Biochemistry*

David A. Fruman, Ph.D. Harvard University, *Professor of Molecular Biology and Biochemistry*

Paul David Gershon, Ph.D. University of Liverpool, *Professor of Molecular Biology and Biochemistry*

Charles Glabe, Ph.D. University of California, Davis, *Professor of Molecular Biology and Biochemistry*

Celia Goulding, Ph.D. King's College London, *Professor of Molecular Biology and Biochemistry; Pharmaceutical Sciences*

Michael T. Green, Ph.D. University of Chicago, *Professor of Molecular Biology and Biochemistry; Chemistry* (chemical, biology, inorganic and organometallic, physical chemistry and chemical physics, theoretical and computational)

Barbara A. Hamkalo, Ph.D. University of Massachusetts, *Professor Emerita of Molecular Biology and Biochemistry*

Yilin Hu, Ph.D. Loma Linda University, *Assistant Professor of Molecular Biology and Biochemistry*

Christopher C. Hughes, Ph.D. University of London, *Director of Edwards Lifesciences Center for Advanced Cardiovascular Technology and Professor of Molecular Biology and Biochemistry; Biomedical Engineering* (tissue engineering, growth and patterning of blood vessels)

Matthew Inlay, Ph.D. University of California, San Diego, *Assistant Professor of Molecular Biology and Biochemistry*

- Anthony A. James, Ph.D. University of California, Irvine, *Distinguished Professor and Donald Bren Professor of Microbiology and Molecular Genetics; Molecular Biology and Biochemistry*
- Pavan Kadandale, Ph.D. Rutgers, The State University of New Jersey, *Assistant Professor of Teaching of Molecular Biology and Biochemistry*
- Mei Kong, Ph.D. McGill University, *Associate Professor of Molecular Biology and Biochemistry*
- Young Jik Kwon, Ph.D. University of Southern California, *Professor of Pharmaceutical Sciences; Biomedical Engineering; Chemical and Biomolecular Engineering; Molecular Biology and Biochemistry* (gene therapy, drug delivery, cancer-targeted therapeutics, artificially-induced cellular vesicles, multi-modal therapies)
- Chang C. Liu, Ph.D. Scripps Research Institute, *Assistant Professor of Biomedical Engineering; Chemistry; Molecular Biology and Biochemistry* (genetic engineering, directed evolution, synthetic biology, chemical biology)
- Melissa Lodoen, Ph.D. University of California, San Francisco, *Associate Professor of Molecular Biology and Biochemistry*
- Ray Luo, Ph.D. University of Maryland, College Park, *Professor of Molecular Biology and Biochemistry; Biomedical Engineering; Chemical and Biomolecular Engineering; Materials Science and Engineering* (protein structure, noncovalent associations involving proteins)
- Andrej Luptak, Ph.D. Yale University, *Professor of Pharmaceutical Sciences; Chemistry; Molecular Biology and Biochemistry* (chemical biology)
- Jerry E. Manning, Ph.D. University of Utah, *Professor Emeritus of Molecular Biology and Biochemistry*
- Rachel Martin, Ph.D. Yale University, *Department Vice Chair and Professor of Chemistry; Molecular Biology and Biochemistry* (analytical, chemical biology, physical chemistry and chemical physics)
- Alexander McPherson, Ph.D. Purdue University, *Professor Emeritus of Molecular Biology and Biochemistry*
- Naomi Morrisette, Ph.D. University of Pennsylvania, *Associate Professor of Molecular Biology and Biochemistry*
- Edward L. Nelson, M.D. University of Oregon, *Associate Professor of Medicine; Molecular Biology and Biochemistry*
- Thomas L. Poulos, Ph.D. University of California, San Diego, *Distinguished Professor of Molecular Biology and Biochemistry; Chemistry; Pharmaceutical Sciences* (chemical biology)
- Ilhem Messaoudi Powers, Ph.D. Weill Cornell Graduate School of Medical Sciences, *Associate Professor of Molecular Biology and Biochemistry; Microbiology and Molecular Genetics*
- Jennifer A. Prescher, Ph.D. University of California, Berkeley, *Professor of Chemistry; Molecular Biology and Biochemistry; Pharmaceutical Sciences* (chemical biology, organic and synthetic)
- Olga Razorenova, Ph.D. Institute of Molecular Genetics, *Assistant Professor of Molecular Biology and Biochemistry*
- Elizabeth L. Read, Ph.D. University of California, Berkeley, *Assistant Professor of Chemical and Biomolecular Engineering; Molecular Biology and Biochemistry* (dynamics of complex biochemical systems, regulation of immune responses)
- Markus W. Ribbe, Ph.D. University of Bayreuth, *UCI Chancellor's Professor of Molecular Biology and Biochemistry; Chemistry* (chemical biology, inorganic and organometallic)
- Brian Sato, Ph.D. University of California, San Diego, *Associate Professor of Teaching of Molecular Biology and Biochemistry; Education*
- Donald F. Senear, Ph.D. University of Washington, *Professor of Molecular Biology and Biochemistry*
- Albert Siryaporn, Ph.D. University of Pennsylvania, *Assistant Professor of Physics and Astronomy; Molecular Biology and Biochemistry*
- Robert Spitale, Ph.D. University of Rochester, *Director of the UCI Transcriptomics Core and Associate Professor of Pharmaceutical Sciences; Chemistry; Molecular Biology and Biochemistry* (chemistry, chemical biology, RNA biology)
- Andrea Tenner, Ph.D. University of California, San Diego, *Professor of Molecular Biology and Biochemistry; Neurobiology and Behavior*
- Roberto Tinoco, Ph.D. University of California, San Diego, *Assistant Professor of Molecular Biology and Biochemistry*
- Shiou-Chuan (Sheryl) Tsai, Ph.D. University of California, Berkeley, *Professor of Molecular Biology and Biochemistry; Chemistry; Pharmaceutical Sciences*
- Luis P. Villarreal, Ph.D. University of California, San Diego, *Professor Emeritus of Molecular Biology and Biochemistry*
- Craig Walsh, Ph.D. University of California, Los Angeles, *Professor of Molecular Biology and Biochemistry*

Gregory A. Weiss, Ph.D. Harvard University, *Professor of Chemistry; Molecular Biology and Biochemistry; Pharmaceutical Sciences* (analytical, chemical biology, organic and synthetic, polymer, materials, nanoscience)

Katrine Whiteson, Ph.D. University of Chicago, *Assistant Professor of Molecular Biology and Biochemistry*

Clifford A. Woolfolk, Ph.D. University of Washington, *Professor Emeritus of Molecular Biology and Biochemistry*

## Courses

### **MOL BIO 200A. Research in Molecular Biology and Biochemistry. 2-12 Units.**

Individual research with Molecular Biology and Biochemistry faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

### **MOL BIO 200B. Research in Molecular Biology and Biochemistry. 2-12 Units.**

Individual research with Molecular Biology and Biochemistry faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

### **MOL BIO 200C. Research in Molecular Biology and Biochemistry. 2-12 Units.**

Individual research with Molecular Biology and Biochemistry faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

### **MOL BIO 200R. Research in Developmental & Cell Biology for First-year Students. 2-12 Units.**

Independent research within the laboratories of graduate training faculty in the Department of Molecular Biology and Biochemistry for first-year Ph.D. students.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

### **MOL BIO 201A. Seminars in Molecular Biology & Biochemistry. 2 Units.**

Presentation of research from department laboratories or, when pertinent, of other recent developments.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

### **MOL BIO 201B. Seminars in Molecular Biology & Biochemistry. 2 Units.**

Presentation of research from department laboratories or, when pertinent, of other recent developments.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

### **MOL BIO 201C. Seminars in Molecular Biology & Biochemistry. 2 Units.**

Presentation of research from department laboratories or, when pertinent, of other recent developments.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

### **MOL BIO 202A. Tutorial in Molecular Biology and Biochemistry. 2 Units.**

Tutorials in the area of research of a particular professor which relate current research to the literature. May be conducted as journal clubs.

Repeatability: Unlimited as topics vary.

### **MOL BIO 202B. Tutorial in Molecular Biology and Biochemistry. 2 Units.**

Tutorials in the area of research of a particular professor which relate current research to the literature. May be conducted as journal clubs.

Repeatability: Unlimited as topics vary.

**MOL BIO 202C. Tutorial in Molecular Biology and Biochemistry. 2 Units.**

Tutorials in the area of research of a particular professor which relate current research to the literature. May be conducted as journal clubs.

Repeatability: Unlimited as topics vary.

**MOL BIO 203. Nucleic Acid Structure and Function. 4 Units.**

Structure and chemistry of nucleic acids. Relationship between these properties and the mechanisms of fundamental processes such as replication and repair, RNA-mediated catalysis, formation and regulation of higher order chromatin structure and recombination.

Prerequisite: BIO SCI 98 and BIO SCI 99 and CHEM 51A and CHEM 51B and CHEM 51C

**MOL BIO 204. Protein Structure and Function. 4 Units.**

The structure and properties of proteins, enzymes, and their kinetic properties.

Prerequisite: BIO SCI 98 and BIO SCI 99 and CHEM 51C

**MOL BIO 205. Molecular Virology. 4 Units.**

Primary research data on the major DNA and RNA viruses emphasizing strategies of regulation of gene expression. Utilization of viruses as molecular biological tools. Graduate-level knowledge of the biochemistry and molecular biology of macromolecules is required.

Prerequisite: MOL BIO 203 and MOL BIO 204

Restriction: Graduate students only.

**MOL BIO 211. High-Resolution Structures: NMR and X-ray. 4 Units.**

Basic principles of magnetic resonance and x-ray crystallography toward the determination of high-resolution biomolecular structures.

Prerequisite: MATH 2B

Restriction: Graduate students only.

Concurrent with BIO SCI M133.

**MOL BIO 213. Literature in Nucleic Acid Structure and Function. 2 Units.**

Exploration and critical analysis of recent primary scientific literature in structure, properties, and biological mechanisms involving nucleic acids.

Corequisite: MOL BIO 203

Grading Option: Satisfactory/unsatisfactory only.

**MOL BIO 214. Literature in Protein Structure and Function. 2 Units.**

Exploration and critical analysis of recent primary scientific literature in structure and properties of proteins, enzymes, and their kinetic properties.

Corequisite: MOL BIO 204

Grading Option: Satisfactory/unsatisfactory only.

**MOL BIO 215. Integrative Immunology. 4 Units.**

Lectures and student presentations of primary literature. The main goal is to achieve a basic understanding of the cellular and molecular basis of innate and adaptive immunity, and how immune function is coordinated at a systems level.

Same as M&MG 215.

**MOL BIO 217A. Principles of Cancer Biology I. 4 Units.**

Oncogenes and tumor suppressor genes are studied from molecular viewpoints. Also studies their role in cancer; viral carcinogenesis. Designed for graduate students interested in cancer research. Format includes lectures and student-led discussions.

Prerequisite: MOL BIO 203 and MOL BIO 204

Restriction: Graduate students only.

**MOL BIO 217B. Principles of Cancer Biology II. 4 Units.**

Topics include cancer cell growth and metastasis, chemical carcinogenesis, and cancer genetics and epidemiology. Designed for graduate students interested in cancer research. Format includes lectures and student-led discussions.

Prerequisite: MOL BIO 203 and MOL BIO 204

Restriction: Graduate students only.

**MOL BIO 218. Clinical Cancer. 3 Units.**

Designed to acquaint students in basic life science with clinical cancer.

Restriction: Graduate students only.

**MOL BIO 220. Structure & Synthesis of Biological Macromolecules Journal Club. 2 Units.**

Advanced topics in macromolecular structure and synthesis as related to biological problems.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**MOL BIO 221. Advanced Topics in Immunology. 4 Units.**

Literature-based, interactive discussions focused on review of seminal historic and recent immunology literature. Student responsibilities include reading, critical evaluation, and discussion of manuscripts.

Prerequisite: M&MG 215

Restriction: Graduate students only.

**MOL BIO 221L. Advanced Immunology Laboratory. 4 Units.**

An advanced course in immunology for graduate students enrolled in the Biotechnology master's program. Emphasis is placed on learning modern techniques in immunology such as ELISAs, western blotting, immunofluorescent staining assays.

Restriction: Graduate students only.

Concurrent with BIO SCI M121L.

**MOL BIO 223. Introduction to Computational Biology. 4 Units.**

The use of theories and methods based on computer science, mathematics, and physics in molecular biology and biochemistry. Basics in biomolecular modeling. Analysis of sequence and structural data of biomolecules. Analysis of biomolecular functions.

Same as BME 232.

Restriction: Graduate students only.

Concurrent with BIO SCI M123 and COMPSCI 183 and BME 132.

**MOL BIO 227. Immunology Journal Club. 2 Units.**

Advanced topics in immunology as related to an understanding of human disease.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 15 times.

Restriction: Graduate students only.

**MOL BIO 229. Research-in-Progress Seminars. 1 Unit.**

Two half-hour presentations by graduate students and postdoctorals to the department on their current research projects.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 15 times.

Restriction: Graduate students only.

**MOL BIO 235. Literature in Chemical and Structural Biology. 1 Unit.**

Exploration and critical analysis of recent primary scientific literature in chemical and structural biology.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**MOL BIO 243. Topics in Stem Cells. 2-4 Units.**

Presentation by participating faculty or guest lecturer that is open to the science community, followed by discussion of the lecture topic or a related topic. Students are responsible for presentations and readings.

**MOL BIO 244. Principles of Genomics. 4 Units.**

A survey course of the principal subfields of genomics and their applications to biological and health sciences that will cover genome assembly and annotation, genome structure, comparative genomics, population genomics, functional genomics, and medical genomics.

Same as DEV BIO 214.

Restriction: Graduate students only.

**MOL BIO 248. Metallobiochemistry . 4 Units.**

A review of the biochemistry of metallic elements emphasizing: methods for studying metals in biological systems; the chemical basis for nature's exploitation of specific elements; structures of active sites; mechanisms; solid-state structures and devices; metals in medicine.

Prerequisite or corequisite: CHEM 131C or CHEM 132C

Same as CHEM 218.

**MOL BIO 250. Advanced Topics in Biotechnology - Nucleic Acids. 2 Units.**

Supplements laboratory curriculum with scientific background behind experimental methods. Format consists of lectures and the presentation and analysis of relevant papers from the scientific literature.

Corequisite: MOL BIO 250L

Restriction: Graduate students only. Biotechnology Majors only.

**MOL BIO 250L. Biotechnology Laboratory - Nucleic Acids. 8 Units.**

Nucleic acid techniques and recombinant DNA technology. Extraction and purification of nucleic acids, cloning and subcloning, PCR, site-directed mutagenesis, nucleic acid hybridization, additional associated procedures. Students must demonstrate accurate documentation of data (laboratory notebook) detailing experience and results.

Corequisite: MOL BIO 250

Restriction: Graduate students only. Biotechnology Majors only.

**MOL BIO 251. Advanced Topics in Biotechnology - Protein Purification and Characterization. 2 Units.**

Supplements laboratory curriculum with scientific background behind experimental methods. Format consists of lectures and the presentation and analysis of relevant papers from the scientific literature.

Corequisite: MOL BIO 251L

Prerequisite: MOL BIO 250L and MOL BIO 250

Restriction: Graduate students only. Biotechnology Majors only.

**MOL BIO 251L. Biotechnology Laboratory - Protein Purification and Characterization. 8 Units.**

Major techniques of handling proteins and antibodies. Protein engineering, expression and large-scale purification of recombinant proteins from bacteria, HPLC, antibody purification, western blotting, additional associated procedures. Students must demonstrate accurate documentation of data (laboratory notebook) detailing experience and results.

Corequisite: MOL BIO 251

Prerequisite: MOL BIO 250L and MOL BIO 250

Restriction: Graduate students only. Biotechnology Majors only.

**MOL BIO 252L. Biotechnology Management Laboratory. 8 Units.**

Overview of current methods in biotechnology, designed specifically for biotechnology graduate students. Organized into four distinct sections (nucleic acids, proteins, virology, and immunology). Students must demonstrate accurate documentation of data (laboratory notebooks) detailing experience and results.

Restriction: Graduate students only. Biotechnology Majors only.

**MOL BIO 253. Biotech Management . 5 Units.**

Taught jointly by Bio Sci and Merage School faculty, the course addresses fundamental aspects within, and associated with, the biotechnology industry. Curriculum is focused largely on management issues, including finance, product development, pharmaceuticals, project management, regulatory affairs, and ethics.

Same as MGMTMBA 293.

Restriction: Graduate students only. Biotechnology Majors only.

**MOL BIO 253L. Stem Cell Laboratory. 4 Units.**

Designed to prepare M.S. Biotechnology program students for a career in stem cell research. Laboratory training utilizes tissue culture, mouse and human embryonic stem cells, and is enhanced with didactic material and discussion.

Prerequisite: MOL BIO 250L and MOL BIO 251L

Restriction: Graduate students only. Biotechnology Majors only.

**MOL BIO 268. Seminar in Systems Microbiology Research. 1 Unit.**

A research and journal club seminar that covers topics on bacteria and phage using approaches and principles from biology, engineering, and physics.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Same as PHYSICS 268, ENGRMSE 267.

Restriction: Upper-division students only. Graduate students only.

**MOL BIO 270. Science Communication Skills. 2 Units.**

Development of effective communication skills, oral and written presentations. Topics range from the art of creating keynote slides to strategically crafting a personal story, culminating in a live presentation to an invited audience.

**MOL BIO 291. Graduate School Fundamentals. 2 Units.**

Lectures and discussions providing basic skills needed for success in Ph.D. graduate studies. Topics include formulating a hypothesis, experimental design, literature review, grant writing, oral communication, biostatistics, time management, and professional development.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Cellular and Molecular Biosci Majors only.

**MOL BIO 292A. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**MOL BIO 292B. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**MOL BIO 292C. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**MOL BIO 293A. Cancer Biology Journal Club. 1 Unit.**

Focuses on molecular mechanisms that underlie the development and progression of cancers. Covers a variety of cancer-related research areas, such as cell cycle control, apoptosis, DNA repair, metastasis, angiogenesis, and others.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**MOL BIO 293B. Cancer Biology Journal Club. 1 Unit.**

Focuses on molecular mechanisms that underlie the development and progression of cancers. Covers a variety of cancer-related research areas, such as cell cycle control, apoptosis, DNA repair, metastasis, angiogenesis, and others.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**MOL BIO 293C. Cancer Biology Journal Club. 1 Unit.**

Focuses on molecular mechanisms that underlie the development and progression of cancers. Covers a variety of cancer-related research areas, such as cell cycle control, apoptosis, DNA repair, metastasis, angiogenesis, and others.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**MOL BIO 295. Biomedical Research Methods. 2 Units.**

Lectures and interactive discussions of research methods in modern biomedical science. Each week will focus on a different class of techniques, including molecular, biochemical, immunological, genomic, bioinformatics, microscopy, cancer biology, genome editing. One hour per week, grading based on attendance.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Cellular and Molecular Biosci Majors only.

**MOL BIO 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Restriction: Graduate students only.

## Biochemistry and Molecular Biology, B.S.

Few areas of Biological Sciences remain that are not impacted by studies at the chemical and molecular level. The major in Biochemistry and Molecular Biology is designed to provide a comprehensive background in this modern, conceptual understanding of biology. Students who wish to begin in-depth study of the molecular basis in any of a variety of fields, including development, gene expression, immunology, pathogenesis, disease, virology, and evolution, can do so through this major. This program will be especially attractive to those students who intend to pursue an advanced degree in biological or medical sciences.

The Biochemistry and Molecular Biology major is based upon required courses in Advanced Biochemistry and Advanced Molecular Biology (BIO SCI M114 and BIO SCI M116 ). These courses, together with a wide variety of elective course offerings, provide majors the choice to either explore the breadth of the field or follow a more in-depth study of any of its subdisciplines. For students interested in the interface between biology and chemistry, this program articulates well with a second major in Chemistry.

The program of study emphasizes laboratory experience and its integration with basic theory. This is accomplished in three ways: first, through coordination between the advanced courses in Biochemistry (BIO SCI M114 ) and Molecular Biology (BIO SCI M116 ), and laboratory courses in Biochemistry (BIO SCI M114L ) and Molecular Biology (BIO SCI M116L ) which provide students with the basic laboratory skills and an appreciation for the experimental foundations of the field; second, through advanced laboratories in Immunology (BIO SCI M121L ) and Virology which provide students with the opportunity to develop cutting edge research skills; and third, by emphasizing independent research sponsored by a participating faculty member. The program encourages the research interests of students in subdisciplines other than immunology or virology by offering the opportunity to substitute one year of independent research for the advanced laboratory.

The major in Biochemistry and Molecular Biology is designed to provide students with the appropriate tools and training to successfully pursue graduate degrees that emphasize basic scientific research, including Ph.D. and M.S. training as well as combined M.D./Ph.D. programs. In addition, and particularly with the explosive growth in biotechnology and its significant influence in everyday life, graduates could use their backgrounds very effectively to pursue careers in business, education, law, and public affairs.

**Application Process to Declare the Major:** The major in Biochemistry and Molecular Biology is open to junior- and senior-level students only. Applications to declare the major can be made at any time, but typically in the spring of the sophomore year. Review of applications submitted at that time and selection to the major by the Biochemistry and Molecular Biology Faculty Board is completed during the summer. Information can also be found at the UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu/>). Double majors within the School of Biological Sciences or with Public Health Sciences, Biomedical Engineering: Premedical, Nursing Science, or Pharmaceutical Sciences are not permitted.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Major Requirements

#### A. Required Major Courses:

BIO SCI M114	Advanced Biochemistry
BIO SCI M116	Advanced Molecular Biology

#### B. Upper-Division Laboratories:

BIO SCI M114L	Biochemistry Laboratory
BIO SCI M116L	Molecular Biology Laboratory

Select one of the following:

BIO SCI M121L	Advanced Immunology Laboratory
BIO SCI M130L	Advanced Molecular Lab Techniques
BIO SCI 199 Study in Biological Science Research (Approved by the Biochemistry and Molecular Biology Faculty Board.)	

C. Upper-Division Biology Electives:

Select three of the following:

BIO SCI M119–M189

Select one of the following:

BIO SCI D137	Eukaryotic and Human Genetics
BIO SCI D145	Genomics, Development, and Medicine
BIO SCI M119–M190	
CHEM 128	Introduction to Chemical Biology
PHRMSCI 170A	Molecular Pharmacology I
PHRMSCI 171	Physical Biochemistry

Select two four-unit courses from the following:

BIO SCI D103–D189, E106–E189, M119–M190, N110–N189	
CHEM 128	Introduction to Chemical Biology
PHRMSCI 170A	Molecular Pharmacology I
PHRMSCI 171	Physical Biochemistry

No course may be used to satisfy more than one requirement.

**Application Process to Declare the Major:** The major in Biochemistry and Molecular Biology is open to junior- and senior-level students only. Applications to declare the major can be made at any time, but typically in the spring of the sophomore year. Review of applications submitted at that time and selection to the major by the Biochemistry and Molecular Biology Faculty Board is completed during the summer. Information can also be found at the UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu/>). Double majors within the School of Biological Sciences or with Public Health Sciences, Biomedical Engineering: Premedical, Nursing Science, or Pharmaceutical Sciences are not permitted.

Freshman

<sup>1</sup> Students have the option of taking HUMAN 1AS, HUMAN 1BS, HUMAN 1CS or WRITING 39A, WRITING 39B, WRITING 39C in order to fulfill the lower-division writing requirement.

## Microbiology and Immunology, B.S.

Microbiology and immunology are well-established disciplines within the life sciences. Microbiology addresses the biology of bacteria, viruses, and unicellular eukaryotes such as fungi and protozoa. Studies of microorganisms reveal basic information about processes in evolution, genetics, biochemistry, molecular biology, cell biology, structural biology, and ecology. Many bacteria, viruses, and protozoa cause disease in plants and animals. Hence, major areas of medicine and public health focus on these microorganisms.

Immunology encompasses efforts to understand how multicellular organisms have evolved to survive a variety of challenges to health and survival, including threats by pathogens and cancer cells. Basic questions of how immunity functions are entwined with a fundamental understanding of the consequences of microbial infection. Immunology also refers to the study of autoimmunity, the attack of the host by its own immune system.

The study of viruses (virology) is an important branch of microbiology that has contributed to our understanding of most of the fundamental processes in eukaryotic molecular biology, including the discovery of oncogenes. Viruses provide an excellent tool for the study of disease, cancer, and mechanisms of gene control. With the growing threat of emerging diseases and the potential for viral-based biological weapons, the study of virology was recently intensified and gained new perspectives.

The major is designed primarily for students who are serious about pursuing careers in microbiology and immunology and is intended to provide its graduates with the appropriate tools and training to successfully pursue professional and graduate degrees emphasizing these disciplines. These include Ph.D., M.D., and combined M.D./Ph.D. programs. Majoring in Microbiology and Immunology will also provide resources for serious students wishing to use a solid background in these disciplines for career goals in business, law, public and environmental policy, education, and other pursuits.

**Application Process to Declare the Major:** The major in Microbiology and Immunology is open to junior- and senior-level students only. Applications to declare the major can be made at any time, but typically in the spring of the sophomore year. Review of applications submitted at that time and selection to the major by the Microbiology and Immunology Faculty Board is completed during the summer. Information can also be found at the UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu/>). Double majors within the School of Biological Sciences or with Public Health Sciences, Biomedical Engineering: Premedical, Nursing Science, or Pharmaceutical Sciences are not permitted.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Major Requirements for Microbiology and Immunology

#### A. Required Major Courses:

BIO SCI M121	Immunology with Hematology
BIO SCI M122	General Microbiology
BIO SCI M124A	Virology

#### B. Upper-Division Laboratories:

BIO SCI M116L	Molecular Biology Laboratory
and either	
BIO SCI M118L	Experimental Microbiology Laboratory
or BIO SCI M121L	Advanced Immunology Laboratory

#### C. Upper-Division Biology Electives:

Select at least four from the following:

BIO SCI E124	Infectious Disease Dynamics
BIO SCI M119	Advanced Topics in Immunology
BIO SCI M120	Signal Transduction in Mammalian Cells
BIO SCI M124B	Viral Pathogenesis and Immunity
BIO SCI M125	Molecular Biology of Cancer
BIO SCI M131	Innate Immunity, Infection, and Pathogenesis
BIO SCI M137	Microbial Genetics
BIO SCI M143	Human Parasitology
BIO SCI M180	Biotechnological Applications of Energy and Environmental Research
MOL BIO 205	Molecular Virology

and two can be selected from the following:

BIO SCI D103	Cell Biology
BIO SCI D137	Eukaryotic and Human Genetics
BIO SCI M114	Advanced Biochemistry

BIO SCI M116

Advanced Molecular Biology

BIO SCI M144

Cell Organelles and Membranes

**Application Process to Declare the Major:** The major in Microbiology and Immunology is open to junior- and senior-level students only. Applications to declare the major can be made at any time, but typically in the spring of the sophomore year. Review of applications submitted at that time and selection to the major by the Microbiology and Immunology Faculty Board is completed during the summer. Information can also be found at the UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu/>). ## Department of Neurobiology and Behavior

**Marcelo Wood, Department Chair**

**Kim Green, Department Vice Chair**

2205 McGaugh Hall

949-824-8519

<http://neurobiology.uci.edu/>

The Department of Neurobiology and Behavior programs provide a broad foundation in neuroscience combined with proficiency in a specific area of research. Faculty members in the Department address questions in neuroscience at the molecular, cellular, systems, and behavioral levels. Research focuses on a range of topics including learning and memory, neurodegenerative disorders, addiction, sensory neurobiology, developmental neurobiology, and neural plasticity.

- Neurobiology and Behavior, Graduate Program
- Neurobiology, B.S.

## Faculty

Ruth M. Benca, M.D. Ph.D. University of Chicago , *Department Chair and Professor of Psychiatry and Human Behavior; Neurobiology and Behavior*

Mathew M. Blurton-Jones, Ph.D. University of California, San Diego, *Associate Professor of Neurobiology and Behavior*

Jorge A. Busciglio, Ph.D. Universidad Nacional de Córdoba, *Professor of Neurobiology and Behavior*

Lawrence F. Cahill, Ph.D. University of California, Irvine, *Professor of Neurobiology and Behavior; Psychological Science*

Susana Cohen-Cory, Ph.D. The Rockefeller University, *Professor of Neurobiology and Behavior*

Carl W. Cotman, Ph.D. Indiana University, *Professor of Neurology; Neurobiology and Behavior*

Karina S. Cramer, Ph.D. California Institute of Technology, *Professor of Neurobiology and Behavior*

Howard J. Federoff, M.D. Ph.D. Albert Einstein College of Medicine, *Professor of Neurobiology and Behavior; Neurology*

Norbert Fortin, Ph.D. Boston University, *Associate Professor of Neurobiology and Behavior*

Christie Fowler, Ph.D. Florida State University, *Assistant Professor of Neurobiology and Behavior*

Ron D. Frostig, Ph.D. University of California, Los Angeles, *Professor of Neurobiology and Behavior; Biomedical Engineering*

Christine M. Gall, Ph.D. University of California, Irvine, *Department Chair and Distinguished Professor of Anatomy and Neurobiology; Neurobiology and Behavior*

Sunil P. Gandhi, Ph.D. University of California, San Diego, *Associate Professor of Neurobiology and Behavior*

Kim Green, Ph.D. University of Leeds, *Associate Professor of Neurobiology and Behavior*

Joshua Grill, Ph.D. Wake Forest University School of Medicine, *Associate Professor of Neurobiology and Behavior; Neurobiology and Behavior*

John F. Guzowski, Ph.D. University of California, Irvine, *Associate Professor of Neurobiology and Behavior*

Claudia H. Kawas, M.D. University of Louisville, *Nichols Term Chair in Neuroscience and Professor of Neurology; Neurobiology and Behavior*

Herbert P. Killackey, Ph.D. Duke University, *Professor Emeritus of Neurobiology and Behavior*

Frank M. LaFerla, Ph.D. University of Minnesota, *Dean of the School of Biological Sciences and Professor of Neurobiology and Behavior; Neurology*

Michael Leon, Ph.D. University of Chicago, *Professor Emeritus of Neurobiology and Behavior*

Audrey Chen Lew, Ph.D. University of California, Los Angeles, *Assistant Professor of Teaching of Neurobiology and Behavior*

Gyorgy Lur, Ph.D. University of Liverpool, *Assistant Professor of Neurobiology and Behavior*

Stephen V. Mahler, Ph.D. University of Michigan, *Assistant Professor of Neurobiology and Behavior*

John F. Marshall, Ph.D. University of Pennsylvania, *Professor Emeritus of Neurobiology and Behavior*

James L. McGaugh, Ph.D. University of California, Berkeley, *Research Professor and Professor Emeritus of Neurobiology and Behavior; Logic and Philosophy of Science*

Bruce L. McNaughton, Ph.D. Carleton University, *UCI Distinguished Professor of Neurobiology and Behavior*

Raju Metherate, Ph.D. McGill University, *Professor of Neurobiology and Behavior*

John Middlebrooks, Ph.D. University of California, San Francisco, *Professor of Otolaryngology; Biomedical Engineering; Cognitive Sciences; Neurobiology and Behavior*

Andrea C. Nicholas, Ph.D. University of Chicago, *Associate Professor of Teaching of Neurobiology and Behavior*

Ian Parker, Ph.D. University College London, *Professor of Neurobiology and Behavior; Physiology and Biophysics*

Craig Stark, Ph.D. Carnegie Mellon University, *James L. McGaugh Chair in the Neurobiology of Learning and Memory and Professor of Neurobiology and Behavior*

Arnold Starr, M.D. New York University, *Research Professor of Neurobiology and Behavior*

Oswald Steward, Ph.D. University of California, Irvine, *Director, Reeve-Irvine Research Center and Reeve-Irvine Chair in Spinal Cord Injury Research and Distinguished Professor of Anatomy and Neurobiology; Neurobiology and Behavior*

Georg F. Striedter, Ph.D. University of California, San Diego, *Professor of Neurobiology and Behavior*

Katumi Sumikawa, Ph.D. Imperial College London, *Professor of Neurobiology and Behavior*

Vivek Swarup, Ph.D. University of Laval, *Assistant Professor of Neurobiology and Behavior*

Andrea Tenner, Ph.D. University of California, San Diego, *Professor of Molecular Biology and Biochemistry; Neurobiology and Behavior*

Leslie M. Thompson, Ph.D. University of California, Irvine, *Chancellor's Professor and Donald Bren Professor of Psychiatry and Human Behavior; Biological Chemistry; Neurobiology and Behavior*

Marcelo A. Wood, Ph.D. Princeton University, *UCI Chancellor's Fellow and Department Chair and Professor of Neurobiology and Behavior*

Michael Yassa, Ph.D. University of California, Irvine, *UCI Chancellor's Fellow and Director of the Center for the Neurobiology of Learning and Memory and Associate Professor of Neurobiology and Behavior*

## Courses

### **NEURBIO 200A. Research in Neurobiology and Behavior. 2-12 Units.**

Individual research with Neurobiology and Behavior faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

### **NEURBIO 200B. Research in Neurobiology and Behavior. 2-12 Units.**

Individual research with Neurobiology and Behavior faculty.

Prerequisite: NEURBIO 200A

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

### **NEURBIO 200C. Research in Neurobiology and Behavior. 2-12 Units.**

Individual research with Neurobiology and Behavior faculty.

Prerequisite: NEURBIO 200B

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

### **NEURBIO 201A. Research in Neurobiology and Behavior. 2-12 Units.**

Individual research with Neurobiology and Behavior faculty.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

### **NEURBIO 201B. Research in Neurobiology and Behavior. 2-12 Units.**

Individual research with Neurobiology and Behavior faculty.

Prerequisite: NEURBIO 201A

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

### **NEURBIO 201C. Research in Neurobiology and Behavior. 2-12 Units.**

Individual research with Neurobiology and Behavior faculty.

Prerequisite: NEURBIO 201B

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 202A. Foundations of Neuroscience. 2 Units.**

Intended to expose students to critical reading and analysis of the primary neuroscience literature. Instructors from departments associated with the Interdepartmental Neuroscience Program participate and discuss topics of current interest.

Grading Option: Satisfactory/unsatisfactory only.

**NEURBIO 202B. Foundations of Neuroscience. 2 Units.**

Intended to expose students to critical reading and analysis of the primary neuroscience literature. Instructors from departments associated with the Interdepartmental Neuroscience Program participate and discuss topics of current interest.

Prerequisite: NEURBIO 202A

Grading Option: Satisfactory/unsatisfactory only.

**NEURBIO 206. Molecular Neuroscience. 5 Units.**

Surveys molecular and cellular mechanisms involved in neuronal function, including control of gene expression, post-transcriptional and post-translational processing, RNA and protein targeting, cell death mechanisms, and molecular genetic basis of neurological disorders. Overview of the molecular aspects of developmental neurobiology.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 207. Cellular Neuroscience. 5 Units.**

Neurophysiological and neurochemical mechanisms of electrical and chemical signaling in neurons. Topics include generation of resting- and action-potentials, voltage- and ligand-gated ion channels, second messenger systems, and synaptic transmission and integration.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 207L. Cellular Neuroscience Laboratory. 2 Units.**

Intensive hands-on laboratory experience of contemporary techniques for studying ion channels and synaptic function. Experiments include microelectrode recording, patch clamp, quantal analysis of synaptic transmission, heterologous expression of genes for channels and receptors, brain slice, and fluorescence calcium imaging.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 208. Systems Neuroscience. 5 Units.**

Study of the mammalian nervous system at the systems level. Anatomy and physiology of sensory, motor, and integrative functions.

Repeatability: May be taken for credit 2 times.

Same as ANATOMY 210A.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 209. Behavioral Neuroscience. 5 Units.**

Overview of fundamental conceptual and experimental issues in the neurobiology of learning and memory. The approach is a cross-level integration of research in molecular-genetic, cellular, circuit, systems, and behavioral analyses.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 220. Neural Coding, Computation, and Dynamics. 4 Units.**

Theoretical principles and biological mechanisms underlying how brains acquire, assimilate, store, and retrieve information, compute adaptive responses to external inputs, and how knowledge is extracted from experience to generate an internal model of the world.

Prerequisite: At least one upper-division course in the field of Neuroscience or one upper-division course in Cognitive Science or Machine Learning.

Concurrent with BIO SCI N174.

**NEURBIO 221. Scientific Presentation Skills. 1 Unit.**

A tutorial seminar on developing skills for presenting research to scientific audiences.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**NEURBIO 225. Rigor, Reproducibility, and Research Methods. 1 Unit.**

Understanding key concepts in experimental design, execution, and analysis that enhance or detract from scientific rigor.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**NEURBIO 227. Bioinformatics and Systems Biology. 4 Units.**

Students learn the fundamentals of bioinformatics, genomic approaches, and Linux and R program in order to analyze RNA-sequencing data.

Overlaps with ECO EVO 282, ECO EVO 283.

Restriction: Graduate students only.

**NEURBIO 228. Psychophysiological Methods in Clinical Research . 4 Units.**

Introduces the principal signals of psychophysiology and outlines how measures calculated from these signals can be applied in clinical research and practice.

Prerequisite: One graduate or undergraduate course in statistics.

Restriction: Graduate students only.

**NEURBIO 230. Epigenetics in Health and Disease . 4 Units.**

Focuses on the role of chromatin/nuclear structure organization (histone and DNA modification, chromatin remodeling, higher order chromatin structure and nuclear organization) on gene regulation, DNA replication and repair, relevant to development, metabolism, learning and memory, and human disease.

Prerequisite: MOL BIO 203 or MOL BIO 204 or NEURBIO 206

Same as BIOCHEM 225.

Restriction: Graduate students only.

**NEURBIO 231. Clinical and Epidemiological Aspects of Neurodegenerative Diseases. 4 Units.**

Clinical and epidemiological aspects of neurodegenerative disorders causing dementia will be reviewed, including AD, PD, FTD, HD and cerebrovascular disease. Seminar format will include student presentations and group discussion.

Restriction: Graduate students only.

**NEURBIO 232. Regenerative Neurobiology. 4 Units.**

Surveys the latest research on regenerative neurobiology. Both basic stem cell discoveries and their potential clinical application to brain disorders will be examined.

**NEURBIO 233. Neurobiology of Drug Addiction. 4 Units.**

Provides a comprehensive overview of topics in the addiction field, including drug pharmacology, models/approaches to investigate addiction, brain circuits, genetics, epigenetics, and the cellular and molecular biology of drug addiction.

Restriction: Graduate students only.

Concurrent with BIO SCI N121.

**NEURBIO 236. Cortex: Structure, Function, and Plasticity. 4 Units.**

Structured to include lectures and presentation of papers about cortex with emphasis on sensory-motor cortex. Both historical and current perspectives on cortical structure-function relationship will be critically evaluated.

**NEURBIO 237. Neurobiology of Brain Aging. 4 Units.**

Outlines some of the significant changes that occur in the aging brain, with a special emphasis on risk factors and protective strategies that promote successful brain aging. Topics include changes in synaptic plasticity, neurotrophic factors, and molecular mechanisms in aging.

Prerequisite: NEURBIO 209

**NEURBIO 239. Functional Imaging of the Nervous System. 4 Units.**

Overview of technical and applied aspects of imaging techniques available for studying the nervous system. The areas emphasized are cellular and subcellular imaging of neural function, systems-level imaging of brain function, and imaging of the human brain.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 240. Advanced Analysis of Learning and Memory. 4 Units.**

Advanced analysis of contemporary research concerning the nature and neurobiological bases of learning and memory. Special emphasis is given to time-dependent processes involved in memory storage.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 247. Programming for Neuroscience Research . 4 Units.**

A neuroscience-specific introduction to programming and data analysis using either MATLAB or Scientific PYTHON. Students will learn general programming skills and effective use of programming for data management, statistical analysis, and image analysis.

Overlaps with PSYCH 205A.

**NEURBIO 248. Topics in Neurobiology and Behavior. 4 Units.**

Studies in selected areas of Neurobiology and Behavior. Topics addressed vary each quarter.

Repeatability: May be taken for credit 3 times.

**NEURBIO 249. Electronics for Biologists. 4 Units.**

Basic principles of electricity; properties and use of discrete components and integrated circuits; circuit analysis and design. Intended for advanced students in the life sciences.

Same as PHYSIO 205.

**NEURBIO 254. Molecular Neurobiology. 4 Units.**

The application of genetic and recombinant DNA technology to neurobiology. Topics include the study of neuronal proteins which play important roles in the formation of synapses and synaptic transmission.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 255. Perspectives in Neuroscience: Past, Present, and Future. 4 Units.**

An overview of the conceptual and technical foundations of contemporary neuroscience from ancient times to the present. The subjects include synapses, neurons, brain organization, sensory, motor and regulatory systems, learning and memory, human brain function and dysfunction.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

Concurrent with BIO SCI N119.

**NEURBIO 257. Statistics for Neurobiologists. 4 Units.**

Introduction to common methods for statistical analysis used in neurobiology. Topics covered include t-tests, ANOVAs, correlations and regressions, general linear model, power analysis, and non-parametric tests.

Restriction: Graduate students only.

**NEURBIO 260. Auditory Neuroscience. 4 Units.**

Multidisciplinary overview of brain mechanisms of hearing. Emphasizes breadth of auditory function and research: single neurons to psychoacoustics, the cochlea to the cortex, and basic science to clinic.

Concurrent with BIO SCI N147.

**NEURBIO 290. Colloquium in Neurobiology and Behavior. 1.3 Unit.**

Presentation of contemporary research problems in neurobiology and behavior and related areas by invited speakers.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 292. Scientific Proposals for Neuroscience Trainees. 4 Units.**

Students learn how to effectively communicate scientific ideas and results. Activities include learning how to effectively write a scientific proposal, how to perform a coherent, persuasive slide presentation, and how to give meaningful, constructive review critiques.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**NEURBIO 399. University Teaching. 1-4 Units.**

Limited to Teaching Assistants.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Neurobiology and Behavior, Graduate Program

The Department of Neurobiology and Behavior offers the Ph.D. in Biological Sciences. Graduate students must complete a sequence of core courses (lectures and laboratories) during their first year, and maintain an overall GPA of 3.3 or better.

Ideally, applicants for this program should have taken undergraduate courses in biology (one introductory year plus some advanced work), and/or psychology (experimental, physiological), chemistry through biochemistry, introductory physics, calculus, and statistics. Because graduate training emphasizes research, preference is given to applicants having laboratory research experience. Applicants with substantial outside commitments that would curtail laboratory research or prolong the time to degree are not accepted. The deadline for application is December 2.

### Graduate Program

The Department of Neurobiology and Behavior offers the Ph.D. in Biological Sciences. Graduate students must complete a sequence of core courses (lectures and laboratories) during their first year, and maintain an overall GPA of 3.3 or better.

Ideally, applicants for this program should have taken undergraduate courses in biology (one introductory year plus some advanced work), and/or psychology (experimental, physiological), chemistry through biochemistry, introductory physics, calculus, and statistics. They also must submit GRE Aptitude test scores. Because graduate training emphasizes research, preference is given to applicants having laboratory research experience. Applicants with substantial outside commitments that would curtail laboratory research or prolong the time to degree are not accepted. The deadline for application is December 2.

### Course Work

Most students will spend their first year at UCI in the INP gateway program, and transfer to the Neurobiology and Behavior graduate program at the end of that year. Entry into the Neurobiology and Behavior program requires satisfactory completion of each part of the core curriculum, performing at a higher standard than satisfactory level in at least some courses.

#### Core Curriculum

A. Complete:

NEURBIO 206	Molecular Neuroscience
NEURBIO 207	Cellular Neuroscience
NEURBIO 207L	Cellular Neuroscience Laboratory
NEURBIO 208	Systems Neuroscience
NEURBIO 209	Behavioral Neuroscience

Students in the INP gateway program who envisage transferring to the Neurobiology and Behavior graduate program are thus strongly advised to take the above courses in fulfilling the Molecular, Cellular, and Systems requirements of the INP program. If NEURBIO 209 is not taken during the first year, it must be taken during the second year, after entering the program.

In their second year, students are required to take NEURBIO 257. For those students who already have a strong grounding in statistics this may be substituted by a more advanced class offered by another department with the approval of the graduate advisor.

Students who enter through other gateway programs are similarly required to satisfy all requirements of that program and will generally be required to take all of the core courses during their second year; although an exception may be granted by the graduate advisor to substitute one or more core courses taken in that program.

Students are encouraged to satisfactorily complete at least two advanced graduate courses, of which NEURBIO 257 (or a substituted class in statistics and experimental design) counts as one, before advancing to candidacy and are required to complete at least four before the dissertation defense. These courses must be taken for a letter grade, not on an S/U basis, to count toward the required minimum of four advanced classes. With the consent of the graduate advisor, graduate courses from other departments may satisfy part of this requirement if they are not primarily introductory or technically-oriented.

### Advancement to Candidacy

Students will advance to candidacy for the Ph.D. at the end of their third year by means of a written critical review of the literature in the area in which they plan to do their dissertation, a research proposal, and an oral examination. Graduation depends on successful preparation and oral defense of a

dissertation based on the student's research. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

## Neurobiology, B.S.

The Neurobiology major is designed to teach students how neurobiologists apply cellular, molecular, systems, and behavioral analyses in understanding how the nervous system works. The hallmark of the major is a year-long, in-depth exploration of the intellectual tools used to create, advance, and disseminate knowledge about the nervous system. Through neurobiology satellite courses, students acquire advanced factual knowledge about neurobiology. In addition, Neurobiology majors may choose to participate in research through BIO SCI 199, where they will learn technical skills and receive mentoring from faculty members.

Students completing the Neurobiology major will be well qualified for admission to graduate or professional schools in preparation for careers in biological research, medicine, dentistry, veterinary medicine, nursing, and other related fields. Even without additional education, they will be competitive for positions in the pharmaceutical industry, the health care delivery industry, or in medically or biologically related technologies. The major also provides valuable preparation for students interested in entering other disciplines that increasingly interface with biology and biotechnology, such as law, business administration, and government policy. Additionally, the major provides excellent preparation for students who wish to become high school science teachers.

**Application Process to Declare the Major:** The major in Neurobiology is open to junior- and senior-level students only. Applications to declare the major can be made at any time, but typically in the spring of the sophomore year. Review of applications submitted at that time and selection to the major by the Neurobiology Faculty Board is completed during the summer. Information can also be found at the <http://www.changeofmajor.uci.edu>. Double majors within the School of Biological Sciences or with Public Health Sciences, Biomedical Engineering: Premedical, Nursing Science, or Pharmaceutical Sciences are not permitted.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Major Requirements

#### A. Upper-Division Core:

Select one of the following:

BIO SCI D103	Cell Biology
BIO SCI D104	Developmental Biology
BIO SCI E109	Human Physiology

#### B. Required Major Courses:

BIO SCI N115A- N115B	Advanced Neurobiology I and Advanced Neurobiology II
----------------------	---

#### C. Upper-Division Laboratories:

BIO SCI N113L	Neurobiology Laboratory
---------------	-------------------------

and select two of the following:

BIO SCI D111L	Developmental and Cell Biology Laboratory
BIO SCI E106L	Habitats and Organisms
BIO SCI E112L	Physiology Laboratory
BIO SCI E115L	Evolution Laboratory
BIO SCI E131L	Image Analysis in Biological Research
BIO SCI E140L	Evolution and the Environment Laboratory
BIO SCI E160L	Biology of Birds Lab
BIO SCI E166L	Field Biology
BIO SCI E179L	Field Freshwater Ecology
BIO SCI M114L	Biochemistry Laboratory
BIO SCI M116L	Molecular Biology Laboratory
BIO SCI M118L	Experimental Microbiology Laboratory
BIO SCI M121L	Advanced Immunology Laboratory
BIO SCI M130L	Advanced Molecular Lab Techniques

One of these two laboratories can be satisfied by completion of Excellence in Research in the Biological Sciences.

#### D. Upper-Division Biology Electives:

Select three of the following:

BIO SCI N119–N190
-------------------

and select one four-unit course from the following:

BIO SCI D103–D190, E106–E190, M114–M190, N110–N190

No course may be used to satisfy more than one requirement.

E. Honors Track of the Neurobiology Major: BIO SCI H195 in the area of neurobiology and Excellence in Research in the Biological Sciences - presenting neurobiology related research.<sup>1</sup>

- <sup>1</sup> Requirements to enter the Honors Track: A 3.3 or better average GPA in BIO SCI N115A-BIO SCI N115B and a 3.0 or better average GPA in all required biology courses.  
If the number of eligible students who apply for the Honors Track exceeds the number that can be accommodated in the neurobiology related H195, the department will try to open an additional section. If this is not feasible, the Neurobiology Major Faculty Advisory Committee will select the top applicants, based mainly on the students' BIO SCI N115A-BIO SCI N115B grades and biology GPA.

**Application Process to Declare the Major:** The major in Neurobiology is open to junior- and senior-level students only. Applications to declare the major can be made at any time, but typically in the spring of the sophomore year. Review of applications submitted at that time and selection to the major by the Neurobiology Faculty Board is completed during the summer. Information can also be found at the <http://www.changeofmajor.uci.edu>. Double majors within the School of Biological Sciences or with Public Health Sciences, Biomedical Engineering: Premedical, Nursing Science, or Pharmaceutical Sciences are not permitted.

## Exercise Sciences, B.S.

Virtually every organism is dependent on movement (both intracellular and extracellular) in one form or another. With respect to humans, physical activity imposes unique stresses on a broad spectrum of cell types, tissues, and organ systems. In so doing, physical activity plays a key role in shaping fundamental biological processes necessary for maintaining health and preventing disease. While both human and nonhuman species exhibit many common biological phenomenon, there are also many unique aspects of their physiology. This major will also highlight some of the unique physiological traits of nonhuman species and how such unique phenomenon may provide important insights into human health. Upper-division courses in this major are designed to integrate fundamental principles of biology, chemistry, and physics into a coherent understanding of how physical activity/inactivity impacts human health under healthy and diseased states.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Major Requirements for the B.S. in Exercise Sciences

A. Required Major Courses:

BIO SCI D103	Cell Biology
--------------	--------------

BIO SCI E109	Human Physiology
BIO SCI E117A- E117B- E117C	Exercise Sciences Seminar and Exercise Sciences Seminar and Exercise Sciences Seminar
BIO SCI E136	The Physiology of Human Nutrition
BIO SCI E139	Animal Locomotion
BIO SCI E155	Physiology in Extreme Environments
or BIO SCI D170	Applied Human Anatomy
BIO SCI E183	Exercise Physiology
BIO SCI N110	Neurobiology and Behavior
B. Upper-Division Laboratories:	
BIO SCI E112L	Physiology Laboratory
BIO SCI M116L	Molecular Biology Laboratory
and either	
BIO SCI N113L	Neurobiology Laboratory
or BIO SCI M114L	Biochemistry Laboratory

**Application Process to Declare the Major:** The major in Exercise Sciences is open to junior- and senior-level students only. Applications to declare the major can be submitted during the spring of the sophomore year. Review of applications submitted at that time and selection to the major by the Exercise Science Faculty Board is completed at the end of the sophomore year. Information can also be found at UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu/>). Double majors within the School of Biological Sciences or with Public Health Sciences, Biomedical Engineering: Premedical, Nursing Science, or Pharmaceutical Sciences are not permitted.

<sup>1</sup> Students have the option of taking HUMAN 1AS, HUMAN 1BS, HUMAN 1CS or WRITING 39A, WRITING 39B, WRITING 39C in order to fulfill the lower-division writing requirement.

## Human Biology, B.S.

Understanding normal and disordered human function both require a broad integration of human physiology, behavior, and culture that is provided in this major. Students in this major will receive a unified, in-depth study of modern biology that includes ecology, evolutionary biology, genetics, biochemistry, molecular biology, cell biology, human physiology, neurobiology, and behavior. In addition, the skills and concepts needed to pursue this field are presented in upper-division laboratories. Advanced elective courses provide an opportunity to diversify exposure to the biological sciences. Additional

courses in the humanities and social sciences focus on the relevance of these areas to the human condition. Given the focus on human biology, this major will serve as an ideal preparation for the health science professions.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### **Major Requirements for the B.S. in Human Biology**

#### **A. Required Major Courses:**

BIO SCI D103	Cell Biology
BIO SCI E109	Human Physiology
BIO SCI N110	Neurobiology and Behavior
BIO SCI N120A- N120B- N120C	Human Biology I and Human Biology II and Human Biology III

#### **B. Upper-Division Laboratories:**

Select three of the following:

BIO SCI D111L	Developmental and Cell Biology Laboratory
BIO SCI E106L	Habitats and Organisms
BIO SCI E112L	Physiology Laboratory
BIO SCI E115L	Evolution Laboratory
BIO SCI E131L	Image Analysis in Biological Research
BIO SCI E140L	Evolution and the Environment Laboratory
BIO SCI E160L	Biology of Birds Lab
BIO SCI E166L	Field Biology
BIO SCI E179L	Field Freshwater Ecology
BIO SCI M114L	Biochemistry Laboratory
BIO SCI M116L	Molecular Biology Laboratory
BIO SCI M118L	Experimental Microbiology Laboratory
BIO SCI M121L	Advanced Immunology Laboratory
BIO SCI M130L	Advanced Molecular Lab Techniques
BIO SCI N113L	Neurobiology Laboratory

One laboratory can be satisfied with completion of Excellence in Research in the Biological Sciences.

#### **C. Upper-Division Biology Electives:**

Select two upper-division, four-unit courses from the following:

BIO SCI D103-D190, E106-E190, M114-M190, N110-N190 <sup>2</sup>	
PHRMSCI 170A	Molecular Pharmacology I
PHRMSCI 170B	Molecular Pharmacology II
PHRMSCI 171	Physical Biochemistry
PHRMSCI 173	Pharmacotherapy
PHRMSCI 174	Biopharmaceutics and Nanomedicine
PHRMSCI 177	Medicinal Chemistry

The following course can be used to partially satisfy the Upper-Division Biology Elective Requirement:

PHYSICS 147B	Techniques in Medical Imaging I: X-ray, Nuclear, and NMR Imaging
--------------	--

Additionally, Psychology/Biological Sciences double majors may also use PSYCH 112A-PSYCH 112C to partially satisfy the Upper-Division Biology Elective Requirement.

#### **D. Behavioral Science Courses (choose 1 option):**

##### **Option 1**

ANTHRO 2A	Introduction to Sociocultural Anthropology
PSYCH 7A	Introduction to Psychology
SOCIOL 1	Introduction to Sociology

##### **Option 2**

SOC SCI H1E- H1F- H1G	Honors: Critical Issues on the Social Sciences and Honors: Critical Issues on the Social Sciences and Honors: Critical Issues on the Social Sciences
-----------------------	--

E. HUMAN 1A-HUMAN 1AS-HUMAN 1B-HUMAN 1BS-HUMAN 1C-HUMAN 1CS.

or Humanities Core Alternative (including MED HUM 1 and MED HUM 3)

- <sup>1</sup> One laboratory can be satisfied with completion of Excellence in Research in the Biological Sciences.
- <sup>2</sup> BIO SCI D103, BIO SCI D104, BIO SCI D105, BIO SCI E106, BIO SCI E109, BIO SCI N110 may not be used to satisfy more than one requirement.

**Application Process to Declare the Major:** The major in Human Biology is open to junior- and senior-level students only. Applications to declare the major can be made at any time, but typically in the spring of the sophomore year. Review of applications submitted at that time and selection to the major by the Human Biology Faculty Board is completed during the summer. Information can also be found at the UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu/>). Double majors within the School of Biological Sciences or with Public Health Sciences, Biomedical Engineering: Premedical, Nursing Science, or Pharmaceutical Sciences are not permitted.

## Richard Arum, Dean

3200 Education Building  
 General Information: 949-824-5118  
 Fax: 949-824-9103  
<http://education.uci.edu>  
[educadvising@uci.edu](mailto:educadvising@uci.edu)

The School of Education is a unique interdisciplinary academic unit committed to promoting educational success in and out of school for ethnically and economically diverse learners from preschool through college through collective research, teaching, and service activities. The multidisciplinary faculty includes scholars in psychology, sociology, economics, linguistics, language and literacy, policy, race and ethnicity, and the achievement gap. Their research addresses core issues in contemporary education: (1) equity of opportunity for ethnically, linguistically, and economically diverse learners; (2) teaching and learning in science and math; (3) language and literacy development; (4) early childhood education and development; (5) out-of-school learning; and (6) effective interfaces between technology and education.

The School integrates the themes of Learning, Cognition, and Development; Educational Policy and Social Context; and Language, Literacy, and Technology across its programs, including the minor in Education, the B.A. in Education Sciences, the Ph.D. in Education, and the Master of Arts in Teaching/Credential program. Scholarly work arises from the common belief that education environments, both in and out of school, are the sites of change in the quality of life and the availability of productive life choices for learners of all ages.

## Honors

**Graduation with Honors.** Honors at graduation, e.g., *cum laude*, *magna cum laude*, *summa cum laude*, are awarded to approximately the top 16 percent of the graduating seniors. To be eligible for honors, a general criterion is that students must have completed at least 72 units in residence at the University of California. The student's cumulative record at the end of the final quarter is the basis for consideration for awarding Latin honors. Other important factors are considered visit at Honors Recognition.

- Education Sciences, B.A.
- Education, Minor
- Education, Ph.D.
- Elementary and Secondary Education, M.A.T.

## Requirements for the Undergraduate CalTeach Science and Mathematics Single Subject Credential Program

The CalTeach Science and Mathematics Single Subject Credential Program is jointly sponsored by the Schools of Biological Sciences, Physical Sciences and Education.

The following academic units offer undergraduates an option to earn a bachelor's degree while concurrently satisfying requirements for a Single Subject Teaching Credential in Biological Sciences, Chemistry, Earth System Sciences, Mathematics, and Physics. Interested students should consult degree program options described in this *Catalogue* or talk with a counselor in the CalTeach Resource and Advising Center (137 Bison Modular). With careful, early planning, it is possible for students to complete their bachelor's degree and teaching credential in four years. More information is also available at the UCI CalTeach website (<https://calteach.uci.edu/>).

### Prior to Entry in the CalTeach Single Subject Credential Program:

- Declare one of the following majors: Biology/Education, Physics, Chemistry, Mathematics or Earth System Science with a Concentration in Education and Secondary Teaching Certification;
- Complete a CalTeach Program enrollment form, indicating intent to complete requirements for the Single Subject Teaching Credential for mathematics or one of the science disciplines. This must be done by the end of an undergraduate's second year at the latest, and prior to enrolling in EDUC 55, which would typically be completed in fall of the third year. Enrollment forms are available in the CalTeach Science and Mathematics Resource and Advising Center (137 Bison Modular).

### Prior to the Start of Student Teaching:

- Pass the California Basic Education Skills Test (CBEST);
- Pass the California Subject Exam for Teachers (CSET) or complete a subject-matter preparation program (available for Mathematics only);
- Hold a current Certificate of Clearance from the State of California;
- Hold a current TB test with negative results.

## Courses and Fieldwork

Candidates who enroll in the undergraduate CalTeach Single Subject Teacher Credential program at UCI are generally required to take the following courses.

PHY SCI 5/BIO SCI 14	California Teach 1: Introduction to Science and Mathematics Teaching
PHY SCI 105/BIO SCI 101	California Teach 2: Middle School Science and Mathematics Teaching <sup>1</sup>
CHEM/PHYSICS 193/BIO SCI 108	Research Methods
MATH 8	Explorations in Functions and Modeling (Mathematics candidates)
LPS 60	The Making of Modern Science (Science candidates)
or	
MATH 184- 184L	History of Mathematics and History of Mathematics Lesson Lab (Mathematics candidates)
EDUC 55	Knowing and Learning in Mathematics and Science <sup>1</sup>
EDUC 109	Reading and Writing in Mathematics and Science <sup>1</sup>
EDUC 143AW	Classroom Interactions I
EDUC 143BW	Classroom Interactions II
EDUC 148	Complex Pedagogical Design <sup>1</sup>
EDUC 158	Student Teaching Mathematics and Science in Middle/High School <sup>1</sup>

<sup>1</sup> In order to be recommended for the Preliminary Single Subject Credential, a grade of C or better is required in the following CalTeach teacher credential program courses: PHY SCI 105/BIO SCI 101; EDUC 55, EDUC 109, EDUC 143AW, EDUC 143BW, and EDUC 148. A grade of C or better is required for all sections of EDUC 158 (a repeatable course) that students complete, including all EDUC 158 sections with a student teaching requirement.

Student teaching for Single Subject candidates in the undergraduate CalTeach program is defined as a minimum of four hours per day, five days per week for at least one full public school semester in an appropriate classroom setting in middle or high school.

Readiness for student teaching shall be determined by, but not be limited to, the candidate's academic work, professional conduct, and potential for success in teaching. Failure to be advanced to student teaching will be considered good cause for removal and/or a leave of absence from the program.

## Applying for a California Credential

In addition to fulfilling all of the above requirements, an applicant must:

- Show evidence of a college-level course, or pass an approved examination on the U.S. Constitution;
- Obtain a CPR certificate in Adult, Child, and Infant resuscitation training;
- Pass the Teacher Performance Assessment
- Official UCI transcript must show that bachelor's degree has been awarded.

If competence has been demonstrated by the conclusion of the student teaching program, and all other CTC and Departmental requirements are met, the undergraduate candidate is eligible for a preliminary credential through UCI.

**Supplementary and Additional Teaching Authorizations.** After acquiring a basic credential, it is possible to add further teaching authorizations. Consult an academic counselor in the School of Education for details.

### On This Page:

- Multiple Subject Teaching Credential
- Single Subject Teaching Credential
- Administrative Services Credential

## Teaching and Service Credential Programs

The School of Education is authorized by the Commission on Teacher Credentialing to offer teacher and school administrator professional preparation programs for California teaching and service credentials. The School offers programs for multiple and single subject credentials through the Master of Arts in Teaching Program. Also, in partnership with the School of Biological Sciences and the School of Physical Sciences, the School of Education offers the Cal Teach Science and Mathematics Program, an undergraduate Student Teacher Credential program for aspiring science or mathematics teachers. Additionally, in cooperation with UCI Division of Continuing Education, the School offers Administrative Services Credential programs and a Reading Certificate program.

## Multiple Subject Teaching Credential

The Multiple Subject Teacher Credential pathway is embedded in the UCI Master of Arts in Teaching/Credential Program.

## Single Subject Teaching Credential

The Single Subject Teacher Credential pathway is embedded in the UCI Master of Arts in Teaching/Credential Program. The program supports preparation to teach secondary art, English, mathematics, social science, science(s), and world languages.

## Undergraduate CalTeach Science and Mathematics Single Subject Credential Program

The CalTeach Science and Mathematics Single Subject Credential Program is jointly sponsored by the Schools of Biological Sciences, Physical Sciences, and Education. The following academic disciplines: Biological Sciences, Chemistry, Earth System Sciences, Mathematics, and Physics offer undergraduates an option to earn a bachelor's degree while concurrently satisfying requirements for a Single Subject Teaching Credential. Interested students should consult degree program options described in this Catalogue or talk with a counselor in the CalTeach Resource and Advising Center (137 Bison Modular). With careful, early planning, it is possible for students to complete their bachelor's degree and teaching credential in four years. More information is also available in the CalTeach section of the Catalogue.

## Administrative Services Credential

The School of Education sponsors a program through UCI Division of Continuing Education leading to the Administrative Services Credential. The Preliminary Administrative Services Credential is obtained by completing the approved program of 36 quarter units and the California Administrator Performance Assessment (CalAPA). This credential also requires a valid basic credential, five years of full-time teaching or services experience, and passage of the basic skills requirement.

The Clear Administrative Services Credential begins when an administrative position is obtained. The UCI Clear Administrative Services program requires the successful completion of two years of full-time school administrative experience, the Preliminary Administrative Services Credential, and 10 quarter units (Education X399A-Induction and Education X399B-Final Evaluation) which provide structured mentoring, self-assessment, and formative/summative evaluation of the candidate. Those interested in these credentials should visit the UCI Division of Continuing Education website (<https://ce.uci.edu>) or email [education@ce.uci.edu](mailto:education@ce.uci.edu) (%20education@ce.uci.edu).

## Faculty

June Ahn, Ph.D. University of Southern California, *Associate Professor of Education*

Jonathan Alexander, Ph.D. Louisiana State University, *Associate Dean, Division of Undergraduate Education and Campus Writing Coordinator and Chancellor's Professor of English; Culture and Theory; Education; Gender and Sexuality Studies; Informatics* (writing studies, sexuality studies, queer theory, new media studies)

Richard Arum, Ph.D. University of California, Berkeley, *Dean of the School of Education and Professor of Education; Criminology, Law and Society; Sociology*

Drew Bailey, Ph.D. University of Missouri, *Associate Professor of Education; Cognitive Sciences; Psychological Science*

Rachel Baker, Ph.D. Stanford University, *Assistant Professor of Education*

Frank D. Bean, Ph.D. Duke University, *UCI Distinguished Professor of Sociology; Economics; Education* (international migration, demography, Mexican immigration, racial and ethnic relations, economic sociology, family)

Robert J. Beck, Ph.D. University of Chicago, *Senate Emeritus of Education*

Henry J. Becker, Ph.D. Johns Hopkins University, *Professor Emeritus of Education*

Rebecca W. Black, Ph.D. University of Wisconsin-Madison, *Associate Professor of Informatics; Education* (digital media and learning, fan studies)

Liane R. Brouillette, Ph.D. University of Colorado Boulder, *Professor of Education* (educational policy, arts-based learning)

Andres Bustamante, Ph.D. University of Miami, *Assistant Professor of Education*

Shanyce L. Campbell, Ph.D. University of North Carolina at Chapel Hill, *Assistant Professor of Education*

Elizabeth E. Cauffman, Ph.D. Temple University, *Professor of Psychological Science; Criminology, Law and Society; Education; School of Law* (adolescent development, mental health, juvenile justice, legal and social policy)

Vanitha Chandrasekhar, Ed.D. University of California, Irvine, *Lecturer of Education* (education technology)

Chuansheng Chen, Ph.D. University of Michigan, *UCI Chancellor's Professor of Psychological Science; Education* (cross-cultural psychology, adolescent development, cognitive neuroscience, genes and behavior)

Penelope R. Collins, Ph.D. University of Toronto, *Associate Professor of Education*

Gilberto Q. Conchas, Ph.D. University of Michigan, *Professor of Education; Asian American Studies; Sociology* (urban education, sociology of education, comparative race and ethnicity)

AnneMarie M. Conley, Ph.D. University of Michigan, *Associate Professor of Education*

Helen De La Maza, M.A. Oregon State University, *Lecturer of Education*

Shayan Doroudi, Ph.D. Carnegie Mellon University, *Assistant Professor of Education; Informatics* (learning analytics, learning sciences, educational technology)

Nia Dowell, Ph.D. The University of Memphis and Institute for Intellect Systems, *Assistant Professor of Education* (learning analytics, online group interaction, computational linguistics, technology, STEM)

Greg Duncan, Ph.D. University of Michigan, *UCI Distinguished Professor of Education; Economics; Psychological Science* (economics of education, program evaluation, child development)

Jacquelynne S. Eccles, Ph.D. University of California, Los Angeles, *UCI Distinguished Professor of Education; Psychological Science* (academic motivation and achievement, school and family influences on adolescent development, gender and ethnicity in STEM fields)

Dennis Evans, Ed.D. University of Southern California, *Non-Senate Academic Emeritus of Education*

George Farkas, Ph.D. Cornell University, *UCI Distinguished Professor of Education; Sociology* (educational achievement gaps, interventions, educational policy)

David John Frank, Ph.D. Stanford University, *Professor of Sociology; Education; Political Science* (globalization, sexuality, the natural environment, higher education)

Brandy Gatlin-Nash, Ph.D. Florida State University, *Assistant Professor of Education; Language Science*

Wendy A. Goldberg, Ph.D. University of Michigan, *Professor Emerita of Psychological Science; Education* (developmental psychology, work and family, infant sleep, transition to parenthood, autism)

Shane Goodridge, Ph.D. University of Victoria, *Assistant Professor of Teaching of Education*

Elizabeth Greeban, M.A. University of California, Irvine, *Lecturer of Education*

Jody Guarino, Ed.D. Azusa Pacific University, *Lecturer and Supervisor of Teacher of Education*

Susan Guilfoyle, M.S. University of Southern California, *Lecturer of Education* (reading, language and literacy)

Janice L. Hansen, Ph.D. University of California, Irvine, *Lecturer of Education*

Gillian Hayes, Ph.D. Georgia Institute of Technology, *Robert A. and Barbara L. Kleist Professor of Informatics; Education* (interactive and collaborative technology, human-computer interaction, computer-supported cooperative work, educational technology, ubiquitous computing)

Jutta Heckhausen, Ph.D. University of Strathclyde, *Professor of Psychological Science; Education* (life-span developmental psychology, motivation, individual agency and social context)

Alan R. Hoffer, Ph.D. University of Michigan, *Professor Emeritus of Education*

Kristine Houston, M.S. National University, *Lecturer of Education*

Jeffrey J. Hruby, M.A. California State University, Fullerton, *Lecturer of Education*

Bradley S. Hughes, Ph.D. University of California, Irvine, *Associate Professor of Teaching of Ecology and Evolutionary Biology; Education*

Karajeane Hyde, M.A. Vanguard University, *Lecturer of Education* (mathematics education)

Constance Iloh, Ph.D. University of Southern California, *Assistant Professor of Education*

Susanne M. Jaeggi, Ph.D. University of Bern, *Associate Professor of Education; Cognitive Sciences* (working memory, executive functions, cognitive training, lifespan development aging, individual differences)

Susan C. Jarratt, Ph.D. University of Texas at Austin, *Professor Emerita of Comparative Literature; Education* (histories and theories of rhetoric, ancient Greek rhetoric, writing studies)

Jade Marcus Jenkins, Ph.D. University of North Carolina at Chapel Hill, *Assistant Professor of Education*

Jeffrey M. Johnston, M.A. University of Southern California, *Lecturer of Education*

Hosun Kang, Ph.D. Michigan State University, *Associate Professor of Education*

Young-Suk Kim, Ed.D. Harvard University, *Professor of Education; Asian American Studies*

Kimberly Lakes, Ph.D. University of Wisconsin-Madison, *Associate Professor in Residence of Pediatrics; Education*

Jenel Lao, Ed.D. University of California, Irvine and Los Angeles, *Lecturer of Education*

Glenn S. Levine, Ph.D. University of Texas at Austin, *German Language Program Director and Professor of German; Education; Language Science* (applied linguistics, foreign language pedagogy, German-Jewish culture and history, Yiddish language and culture, European culinary history)

Julia R. Lupton, Ph.D. Yale University, *Associate Dean for Research and Professor of English; Comparative Literature; Education; Religious Studies* (Renaissance literature, literature and psychology)

Virginia Mann, Ph.D. Massachusetts Institute of Technology, *Professor of Language Science; Education* (reading ability: phoneme awareness, developmental dyslexia, phonological skills, early intervention, precocious readers; speech perception: context effects, cross-linguistic comparisons)

Jack R. McCullough, Ph.D. United States International University, *Associate Professor of Teaching Emeritus of Education*

Carol Booth Olson, Ph.D. University of California, Los Angeles, *Professor Emerita of Education*

Elizabeth Pena, Ph.D. Temple University, *Professor of Education; Language Science*

Emily K. Penner, Ph.D. University of California, Irvine, *Assistant Professor of Education*

Kylie Peppler, Ph.D. University of California, Los Angeles, *Associate Professor of Informatics; Education* (learning sciences, design, maker culture, arts, game design, computer programming, wearables)

Stephanie Reich, Ph.D. Vanderbilt University, *Associate Professor of Education; Informatics; Psychological Science* (child development, parenting, peer interactions, media, program evaluation)

Katherine Rhodes, Ph.D. Georgia State University, *Assistant Professor of Education* (mathematical cognition and achievement, linguistic minority equity and inclusion, child development, psychometrics, latent trait modeling)

Lindsey Richland, Ph.D. University of California, Los Angeles, *Associate Professor of Education*

Fernando Rodriguez, Ph.D. University of Michigan, *Assistant Professor of Teaching of Education*

Ruben G. Rumbaut, Ph.D. Brandeis University, *Distinguished Professor of Sociology; Chicano/Latino Studies; Criminology, Law and Society; Education* (international migration, immigration laws, criminalization, incarceration, social inequality and mobility, race and ethnicity)

Judith Haymore Sandholtz, Ph.D. Stanford University, *Professor of Education*

Rossella Santagata, Ph.D. University of California, Los Angeles, *Professor of Education* (teacher preparation and professional development, teaching and learning in STEM fields, video technologies, teaching and learning as cultural practices, equity and education)

Brian Sato, Ph.D. University of California, San Diego, *Associate Professor of Teaching of Molecular Biology and Biochemistry; Education*

Robin C. Scarcella, Ph.D. University of Southern California, *Professor of Academic English/English as a Second Language; Education*

Sabrina E. Schuck, Ph.D. University of California, Riverside, *Health Sciences Assistant Clinical Professor of Pediatrics; Education; Psychological Science*

Sandra Simpkins, Ph.D. University of California, Riverside, *Professor of Education* (organized after-school activities, motivation, family influences, diversity and equity, immigration and culture, STEM)

Padhraic J. Smyth, Ph.D. California Institute of Technology, *Professor of Computer Science; Education; Statistics* (artificial intelligence and machine learning, pattern recognition, applied statistics, data mining, information theory)

Kurt Squire, Ph.D. Indiana University, *Professor of Informatics; Education* (video game design, games for learning, mobile technologies, civic engagement, place-based learning)

Constance Steinkuehler, Ph.D. University of Wisconsin-Madison, *Professor of Informatics; Education* (video games for impact, game-mediated cognition and learning, online social interaction, video games and policy)

Jeanne M. Stone, M.A. California State University, Long Beach, *Lecturer of Education*

Timothy M. Tift, M.A. Pepperdine University, *Associate Professor of Teaching Emeritus of Education*

William M. Tomlinson, Ph.D. Massachusetts Institute of Technology, *Professor of Informatics; Education* (environmental informatics, educational technology, computer graphics/visualization/digital arts)

Deborah Lowe Vandell, Ph.D. Boston University, *Chancellor's Professor Emerita of Education; Psychological Science* (longitudinal studies of development, early childhood education, after-school programs, summer learning, child development, adolescent development)

Adriana Villavicencio, Ph.D. New York University, *Assistant Professor of Education*

Mark J. Warschauer, Ph.D. University of Hawaii at Manoa, *Professor of Education; Informatics* (language, literacy, technology, STEM)

Dolores Wirth, M.A. California State University, Fullerton, *Lecturer of Education*

Di Xu, Ph.D. Columbia University, *Associate Professor of Education*

Elizabeth van Es, Ph.D. Northwestern University, *Associate Professor of Education* (teacher cognition, pre-service teacher education, in-service teacher professional development, teacher learning communities, uses of video in teacher learning)

## Courses

### **EDUC 10. Educational Research Design. 4 Units.**

Designed to help students become intelligent consumers of research and independent researchers, and provides an introduction to the basic principles of educational research. Topics include research questions, literature reviews, and qualitative and quantitative research designs.

Overlaps with SE 10.

Restriction: Education Sciences Majors have first consideration for enrollment.

(III)

### **EDUC 15. Statistics for Education Research . 4 Units.**

Provides an introduction to the use of statistics in educational research. Focuses on testing and measurement, and provides basic tools to read, interpret, and draw conclusions from quantitative educational research.

Prerequisite: EDUC 10

Overlaps with SE 13.

Restriction: Education Sciences Majors have first consideration for enrollment.

(Va)

### **EDUC 25. Introduction to Education: Disciplinary Perspectives. 4 Units.**

Provides insights into educational organizations and processes by developing understanding of concepts used by four different disciplines (economics, history, psychology, and sociology) to analyze key issues and phenomenon in the field of education that profoundly influence individual life course outcomes.

Restriction: Education Sciences Majors have first consideration for enrollment.

(III)

### **EDUC 30. 21st Century Literacies. 4 Units.**

Provides an overview of literacies required for academic and career success in the 21st century. Issues addressed include reading, writing, academic language, research skills, media and technology skills, scientific literacy, critical thinking, communication, collaboration, and creativity.

Restriction: Education Sciences Majors have first consideration for enrollment.

(III)

### **EDUC 40. Theories of Development and Learning Applied to Education. 4 Units.**

Provides an introductory examination of central theories of human development and learning in their application to contemporary educational settings.

Restriction: Education Sciences Majors have first consideration for enrollment.

(III)

**EDUC 50. Origins, Purposes, and Central Issues in K-12 Education. 4 Units.**

An introduction to the role of education in U.S. society and to central issues in K–12 education. Education is studied from four different perspectives: social, historical, philosophical, and political.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 52. Foundations of Bilingual Education and Bilingualism. 4 Units.**

Provides a comprehensive overview of current issues in bilingual education and bilingualism. Topics include dimensions of bilingualism, the effects of bilingualism on children's linguistic and cognitive development, bilingual education programs, literacy, special needs, and assessment.

Same as LSCI 51B, HUM 52.

**EDUC 55. Knowing and Learning in Mathematics and Science. 5 Units.**

Multidisciplinary study of knowing and learning in secondary school mathematics and science. Topics include standards for knowing, scientific epistemologies, mental representations, problem solving, expert-novice studies, assessment, and domain-specific thinking, learning, and teaching. Applied analysis of learning through clinical interviews.

Prerequisite: PS 5 or BIOL 14

**(III)**

**EDUC 100. Educational Strategies for Tutoring and Teacher Aiding. 4 Units.**

Placement in a public elementary or secondary school to gain experience as a tutor or teacher aide. Emphasis on cognitive learning and the development of instructional strategies and resources which can be used in effective cross-age and cross-cultural experiences.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 101. Strategies for Tutoring and Teacher Aiding in a Bilingual Classroom. 4 Units.**

Placement in a dual immersion school setting to gain experience as a bilingual (Spanish) tutor or teacher aide. Emphasis on cognitive learning and the development of instructional strategies and resources which can be used in effective cross-age and cross-cultural experiences.

Prerequisite: Must be able to communicate in Spanish.

Grading Option: Pass/no pass only.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 104D. The Arts and Human Development. 4 Units.**

Students use various arts disciplines (e.g. studio art, music, dance, drama, and media arts) to investigate how visual and performing arts support individual human development. Introduction to pedagogy for integrating the arts in K-12 settings. Materials fee.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 104E. Multimedia and the Arts in the Multicultural Classroom. 4 Units.**

Multiculturalism and under-represented U.S. minorities and the visual and performing arts: perspectives in artistic perception, creative expression, historical and cultural context, aesthetic valuing, and media literacy in the interpretation and production of multimedia arts products and applications for K-12 classrooms.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 106. Early Childhood Education Curriculum and Instruction. 4 Units.**

Designed to provide an introductory survey of the nature, needs, and education of young children. Explores questions such as 'What should we teach young children?' and 'How should we teach?'.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 107. Child Development in Education. 4 Units.**

Explores the pathways of normally developing children's growth and change over time. In particular, focuses on how cognitive and social development impact and are driven by educational contexts.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 108. Adolescent Development and Education. 4 Units.**

Explores the physical, cognitive, emotional, and social development of adolescents, with an emphasis on the practical implications of developmental theory and research findings for teachers and other professionals who work with adolescents in middle or high school contexts.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 109. Reading and Writing in Mathematics and Science. 4 Units.**

Emphasis is placed on understanding the literacy processes (listening, speaking, viewing, thinking, reading, and writing) as they relate to middle and high school mathematics and science. Students integrate literacy-related strategies with curriculum-based goals supported in the California State Frameworks.

Corequisite: EDUC 158

**EDUC 122A. Foundations of Elementary Mathematics Learning I. 4 Units.**

Provides understanding of fundamental mathematics necessary to teach for conceptual understanding and higher-level reasoning and problem solving. Conceptual understanding of place value, fractions, proportionality, geometry, algebra, functions, probability, statistics, and measurement. Instructional applications of these concepts in grades K-8 teaching.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 122B. Foundations of Elementary Mathematics Learning II. 4 Units.**

Provides understanding of fundamental mathematics necessary to teach for conceptual understanding and higher-level reasoning and problem solving. Conceptual understanding of place value, fractions, proportionality, geometry, algebra, functions, probability, statistics, and measurement. Instructional applications of these concepts in grades K-8 teaching.

Prerequisite: EDUC 122A

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 122C. Foundations of Elementary Mathematics Learning III. 4 Units.**

Provides understanding of fundamental mathematics necessary to teach for conceptual understanding and higher-level reasoning and problem solving. Conceptual understanding of place value, fractions, proportionality, geometry, algebra, functions, probability, statistics, and measurement. Instructional applications of these concepts in grades K-8 teaching.

Prerequisite: EDUC 122B

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 124. Multicultural Education in K-12 Schools. 4 Units.**

Provides a theoretical and empirical overview of educational issues affecting low-income immigrant and U.S. born minority student populations in an increasingly diverse and changing society.

Same as CHLT 183.

**(VII)****EDUC 125. Children, Schools, and Cinema. 4 Units.**

Through popular films, analyzes aspects of school dynamics and interaction of schools with students, teachers, and public. Melding educational studies and film studies provides deeper understanding of methods used to transmit information and attitudes about schools to the lay public.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 126. Ethics and Education. 4 Units.**

Ethics in education and how ethicists frame moral problems. Presents major ethical themes that affect education. Analysis of models for dealing with ethical goals and developing morality for K–12 students. Models for solving ethical dilemmas within an educational context.

Prerequisite: EDUC 50

**EDUC 127A. Moral Education for Youth Development I. 2 Units.**

The first of a two-course series that examines research-based theories for how school settings and adult mentors contribute to the moral development of adolescents. Students examine theory in the context of real-world application in four program observations.

Prerequisite: EDUC 126

Restriction: Education Sciences Majors only.

**EDUC 127B. Moral Education for Youth Development II. 2 Units.**

Continuation of EDUC 127A. Allows students from 127A to experience the role of adults in the moral development of youth. Students receive training to deliver curriculum and apply research-based theories and methods in real-world youth settings.

Prerequisite: EDUC 126 and EDUC 127A

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 128. Exceptional Learners. 4 Units.**

An introductory survey of the nature, needs, and education of K–12 children with exceptionalities. Covers the categories and characteristics of exceptionalities, relevant state and federal legislation, and the role of general education teachers in special education.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 130. Children's Learning and Media. 4 Units.**

Examines how popular media may impact how young people learn, develop, and communicate by looking at research related to the impacts of a wide range of popular media including television, video games, digital environments, mobile devices, and other multimedia.

Same as INF 164.

Restriction: Education Sciences Majors only. Informatics Majors only. Informatics Minors only.

**EDUC 131. Educational Technology. 4 Units.**

Presents an overview of the types and uses of educational technology to support and enhance the K–12 learning experience. Familiarizes students with lesson planning, instructional design, learning theory, and integrating technology into the curriculum.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 132. Reading and Writing Enrichment for After-School Programs. 4 Units.**

Examines literacy development and the implementation of research-based practices to enrich learners' reading and writing skills in after-school programs. A minimum of 20 hours of after-school program fieldwork is required in order to design and implement literacy enrichment activities.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 134. Teaching English Internationally. 4 Units.**

Covers methods of teaching English as a foreign language, basic language knowledge for English teachers, the social context of English language teaching around the world, and essential information about securing international employment as an English teacher.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 137. Arts for Elementary Learners. 4 Units.**

Theory and practice in art education for the elementary school classroom. Includes content and pedagogy for future teachers and others interested in the relationship between child development and the production of visual art. Materials fee.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 138. Children's Literature in the Elementary Classroom. 4 Units.**

Explores the wealth of children's literature that can be integrated into the elementary classroom. Surveys traditional literature, fiction, nonfiction, and poetry that make curriculum accessible to all students. Focuses on literary elements for both reading and creating text.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 140. Courts, Classrooms, and Controversies in Education Policy . 4 Units.**

Examines policies and laws defining the K-12 U.S. education system and the politics and controversies surrounding the political decision-making process at the federal, state, and local levels. Discusses original intent versus effects on organization of schools and educational equity.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 142. American History and Education Policy: An Intimate Relationship. 4 Units.**

Examines the interplay between history, politics, and policy. Students examine the interactions between sociopolitical development and environmental contexts (e.g. familial, social, school, cultural) and contemplate the power of normative values in the formulation of education policy.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 143. Controversies in College. 4 Units.**

Explores the fascinating world of postsecondary education. Every week students dive deeper into controversies that make college more than just where students attend class, but rather, one of the most important social institutions shaping our world.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 143AW. Classroom Interactions I. 4 Units.**

Focuses on research-based instructional strategies for enhancing the learning of secondary mathematics and science. Students learn about adolescent and second-language development to assist them in developing analyzing, teaching, and critiquing lessons for secondary classrooms.

Prerequisite: (PS 105 or BIOL 101) and EDUC 55. Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

**EDUC 143BW. Classroom Interactions II. 4 Units.**

Focuses on equity and multicultural education research, special education, and research-based instructional and assessment strategies to assist students in designing, teaching, and assessing lessons that meet the needs of all secondary mathematics and science students.

Prerequisite: (PS 105 or BIOL 101) and EDUC 55 and EDUC 143AW and EDUC 148. Satisfactory completion of the Lower-Division Writing requirement.

(IB AND VII ).

**EDUC 144. The American Charter School. 4 Units.**

Explores the legitimacy of the charter school as a viable educational reform movement. Critical themes include the role of choice and privatization in public education and charter schools as a vehicle for fulfilling the promise of educational equality.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 145. Theories and Pedagogies of Race in Education. 4 Units.**

Introduces theoretical frameworks to examine the role of race in American education. Emphasis is placed on introducing students to different race and ethnicity paradigms.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 146. Education, Learning, and Culture. 4 Units.**

Exploration of learning and development through a cultural lens, drawing from a range of research traditions and disciplines to broaden understandings of theories that inform teaching and learning in formal and informal settings.

Restriction: Education Sciences Majors only.

**EDUC 147. Poverty, Education, and Social Change. 4 Units.**

Explores how institutional and demographic changes in the U.S. have shaped disparities in education, the mechanisms through which poverty and social class influence families, and students, and promising programs and interventions to address inequity. Includes community service.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 148. Complex Pedagogical Design. 6 Units.**

In this Cal Teach capstone course, students design lesson plans and complex instructional units, using approaches such as mathematics and science integration, problem-based instruction, project-based learning, technology, representations, scientific and mathematical analysis/modeling, authentic assessment, contextualization, and designing equitable learning environments.

Prerequisite: (PS 105 or BIOL 101) and EDUC 55 and EDUC 143AW

**EDUC 149. Family, School, and Community in Early Childhood. 4 Units.**

Focuses on the many socializing aspects of young children's social worlds. Through the use of ecological perspectives, explores the role of families, schools, and communities on children's social development, especially in early childhood.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 150. Changing the High School Experience. 4 Units.**

Analysis of problems in high school education (e.g., student disengagement and underachievement of disadvantaged) and proposals for changing curriculum, instruction, and school organization. Students suggest own reforms and analyze effective/ineffective school practices.

Prerequisite: Recommended: 1 unit of EDUC 199.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 151. Language and Literacy. 4 Units.**

Addresses the linguistic principles and processes that underlie oral and written language proficiency. Emphasis is on how to use phonology, morphology, orthography, semantics, syntax, and pragmatics to support literacy and oral language development for K-12 students.

Same as PSCI 192V, LSCI 182V.

Restriction: Language Science Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Education Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**EDUC 152. Theory and Practice of Reading Interventions for Students At-Risk for Reading Failure. 4 Units.**

Examines the research concerning reading failure in young children and interventions used to support them. Topics include reading development and reading intervention. Students critically evaluate the relation between their fieldwork experience and the research and evaluation literature.

Repeatability: May be taken for credit 2 times.

Restriction: Education Sciences Majors only.

**EDUC 156. Introduction to Field Methods in Education. 4 Units.**

Introduces students to methods for studying human behavior in context. It prepares students for conducting applied educational research, including designing needs assessments; conducting observations, interviews and focus groups; organizing and analyzing data; and synthesizing and presenting research findings.

Prerequisite: EDUC 10

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 157. Educational Research and Evaluation. 4 Units.**

Covers qualitative and quantitative research methods relevant for the evaluation of educational programs. Students have the opportunity to plan, execute, and write-up a small evaluation project.

Prerequisite: EDUC 10 and EDUC 15

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 158. Student Teaching Mathematics and Science in Middle/High School. 6 Units.**

Student teaching includes orientation, seminars, preparation, and assumption of secondary school classroom instructional responsibilities in accordance with State credentialing requirements and in conjunction with the public school calendar. Five days/week and a minimum four hours/day over two quarters.

Corequisite: EDUC 109

Prerequisite: (PS 105 or BIOL 101) and EDUC 55 and EDUC 143AW and EDUC 143BW and EDUC 148

Repeatability: May be taken for credit 2 times.

**EDUC 158F. Advanced Fieldwork in Middle/High School Math and Science. 3 Units.**

Advanced fieldwork for math and science teacher credential candidates over two quarters, prior to starting a fall student teaching assignment. Requires a minimum of 40 hours per quarter of fieldwork in a K-12 classroom and attendance at weekly seminars.

Prerequisite: (PS 105 or BIOL 101) and EDUC 55 and EDUC 143AW and EDUC 143BW and EDUC 148

Repeatability: May be taken for credit for 6 units.

**EDUC 159. Experimental Research Methods. 4 Units.**

Designed to help students to develop the ability to think critically about research, and to develop an understanding of how to design and conduct experiments. The overall goal is to prepare students to independently plan and implement a research study.

Prerequisite: EDUC 10 and EDUC 15

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 160. Foundations of Out-of-School Learning. 4 Units.**

Provides an overview of child and adolescent learning through participation in out-of-school activities and settings. Recognizes the importance of matching out-of-school experiences with the interests, needs, and development level of students. Observation-based fieldwork included.

Repeatability: May be taken for credit 2 times.

Restriction: Education Sciences Majors have first consideration for enrollment. May be taken a second time if student is a candidate for Certificate in After-School Education, and the first time was prior to Fall 2008.

**EDUC 161. Discovering Science in Out-of-School Hours. 4 Units.**

Examines the design principles and teaching techniques that science museums and other out-of-school science programs use to motivate children and youth to learn science through discovery. Includes field experience at a science learning center or after-school program. Materials fee.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 173. Cognition and Learning in Educational Settings. 4 Units.**

Foundational concepts in cognition and development as applied to student learning. Primary topics include historical behaviorism, basic cognitive structure and processes, complex cognition, cognitive development, and motivation.

Same as PSCI 192T.

Restriction: Psychological Science Majors have first consideration for enrollment. Education Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**EDUC 174. Education and the American Dream: Historical Perspectives on Democracy and Education. 4 Units.**

Examines the relationship between public schooling and the promotion of democratic ideals in American society over the past two centuries.

Same as HIST 147.

**EDUC 175. Foundations of Education. 4 Units.**

Foundational questions of education are viewed from newly emerging developmental perspectives which treat cognition as embodied action and learning as cultural recapitulation. Historical, sociological, psychological, and philosophical implications of views toward aspects of teaching, learning, curriculum, and pedagogy are considered.

Restriction: Education Sciences Majors only.

**EDUC 176. Psychology of Learning, Abilities, and Intelligence. 4 Units.**

Overview of classic positions on the mind, human abilities, and intelligence, especially as related to academic achievement. Contrasting views: psychometric versus information processing; experimental versus correlational research.

Prerequisite: PSYC 7A or PSCI 9 or PSCI 11A or PSCI 11B or PSCI 11C

Same as PSCI 192U.

Restriction: Psychological Science Majors have first consideration for enrollment. Education Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**EDUC 179W. Advanced Writing for Education Sciences. 4 Units.**

Writing for multiple audiences and purposes about central concepts in education sciences, such as schools as organizations; social structures in education and stratification; individual decision making, government regulation and markets; human development and learning.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Seniors only. Education Sciences Majors have first consideration for enrollment.

**(Ib)****EDUC 180. Interdisciplinary Topics in Education. 4 Units.**

Analysis of issues in education from interdisciplinary perspectives. Topics covered vary with interests of instructor.

Repeatability: Unlimited as topics vary.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 181A. Principles and Practices of Coaching Sports I. 4 Units.**

Focuses on foundational theories and instructional practices in coaching sports from fourth grade to the collegiate level. Prepares students for the coach's mandatory state certification examination for high school sports in California.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 185. Social Development in Education. 4 Units.**

Examination of contextual, psychosocial, and biological factors contributing to the social development of children and adolescents. Theoretical perspectives, empirical findings, and methodological issues are emphasized. Implications of the scientific evidence for practical and policy decision-making surrounding development are discussed.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 190. Principles and Practices of K–6 After School Sports and Fitness. 4 Units.**

Focuses on foundational theories and instructional practices in after-school sports and fitness for K–6 students. Includes a 20-hour field experience in an after-school setting.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 191. Advanced Fieldwork in After-School Education. 4 Units.**

Capstone fieldwork experience for students seeking to earn the Department of Education-sponsored Certificate in After-School Education. Students are required to complete 50 or more hours of fieldwork and related assignments at an instructor-approved after-school program.

Prerequisite: EDUC 160

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 193. Directed Studies in Early Childhood Education. 2-4 Units.**

Advanced study of early childhood education under the direction of a faculty member, coupled with a community-based practicum.

Repeatability: May be repeated for credit unlimited times.

Restriction: Education Sciences Majors have first consideration for enrollment.

**EDUC 198. Directed Research in Education. 2-8 Units.**

Individually or in small groups, students are exposed to or participate in work related to a faculty member's research. Students also attend a weekly seminar and complete a research paper or comparable project.

Repeatability: May be taken for credit for 12 units.

Restriction: Sophomores only. Upper-division students only.

**EDUC 199. Individual Study. 1-4 Units.**

Intensified advanced study in areas in which a student has considerable background, under the direction of a faculty member who will guide and evaluate the study.

**EDUC 202. Outcomes of Schooling/Student Assessment. 4 Units.**

Focuses on establishment of learning goals and assessment tools that are valid for all students, inform educational decisions, and promote educational success. Provides critical examination of different forms of assessment used in K–12 schools, including developmental assessments and appropriate interventions.

Restriction: Graduate students only. Education-MA/PhD Majors only.

**EDUC 203. Advanced Concepts in Learning and Cognition. 4 Units.**

Theories of cognition and their application to thinking and learning in school settings. Topics include memory, information processing, knowledge representation, problem solving, meta-cognition, and intelligence.

Prerequisite: EDUC 173

Restriction: Graduate students only. Education-MA/PhD Majors only.

**EDUC 205. Critical Assessment of Teaching Practice and Learning. 4 Units.**

Student articulates a problem in instructional practice and uses research on cognition, assessment, and other tools to understand the problem. Capstone course emphasizes practices of teacher inquiry, reflection, and professional collaboration. Student's written analyses are evaluated as program's Comprehensive Examination.

Restriction: Graduate students only. Education-MA/PhD Majors only.

**EDUC 206. Design of Learning Environments for Teachers in Secondary School Subjects. 4 Units.**

Research on comprehension, conceptual understanding, reasoning, critical thinking, and problem solving with applications to pedagogy in secondary school subjects. Required for M.A.T. single subject students, unless substitution of Education 207 is authorized.

**EDUC 207. Cognition and Pedagogy in Quantitative Literacy. 4 Units.**

Reviews research on cognition in elementary mathematics, including numeracy, fractions, probability, proportionality, measurement, geometry, algebra. Emphasizes instructional approaches consistent with this research knowledge. Required for M.A.T. multiple subjects students, unless substitution of Education 206 is authorized by the Department.

**EDUC 208. Reading and Writing Development . 4 Units.**

Covers major theories and evidence about mechanisms and factors that contribute to development and difficulties with reading and writing skills. These include language, cognition, biological and environmental factors, bilingual and second language acquisition, and educational implications.

Restriction: Graduate students only.

**EDUC 210. Language, Literacy, and Discourse. 4 Units.**

Introduces students to the interdisciplinary study of language, literacy, and discourse across historical and educational contexts. Addresses theories of how people learn, interact, and make meaning through a variety of semiotic resources, including oral communication, print, and digital media.

Restriction: Graduate students only.

**EDUC 211. Writing Theory and Practice. 4 Units.**

Offers an overview of histories, theories, and research in the field of composition studies from 1950 to the present. Addresses the influences of theory and research on teaching practice at K–12 and college levels.

Restriction: Graduate students only.

**EDUC 212. Literacy and Technology. 4 Units.**

Examines theoretical, historical, and contemporary relationships of technology and literacy. Topics include online communication, multimodality, video games, the use of technology for literacy instruction in schools, and research approaches for investigating literacy development with technology.

Restriction: Graduate students only.

**EDUC 217. Foundations of Digital Learning. 4 Units.**

Students are introduced to historical, constructionist, instructionist, and new literacies perspectives through reading major works in educational technology and discussing how they apply to both teaching and research.

Restriction: Graduate students only.

**EDUC 218. Special Topics in Teaching, Learning, and Educational Improvement. 4 Units.**

Advanced seminar designed to engage students in highly interactive examination of current issues in teaching and learning. Topics and content vary by quarter, depending upon research interests of the faculty and students.

Repeatability: May be taken for credit 10 times as topics vary.

Restriction: Graduate students only.

**EDUC 220. Developing Adolescent Literacy. 4 Units.**

Examines how adolescents leverage vocabulary knowledge, word-reading skills, background understanding, and knowledge of content-specific text features to master an increasing range of texts both independently and for subject-area learning.

Restriction: Graduate students only.

**EDUC 221. Longitudinal and Advanced Structural Equation Modeling. 4 Units.**

Covers advanced and longitudinal structural equation models. Topics include measurement invariance, growth curve models, measurement models, mixture models, and missing data.

Prerequisite: Recommended: EDUC 288B.

Restriction: Graduate students only.

**EDUC 222. Research Epistemologies and Methodologies. 4 Units.**

Introduction to epistemological underpinnings of educational research and to a range of research methodologies in education. Includes examination of quantitative and qualitative studies through reading and analyzing contemporary research. Critique of selected research studies pertinent to educational practice and policy.

Restriction: Ed.D. Program students only.

**EDUC 223. Oral Language Acquisition and Education. 4 Units.**

Learn about research on domains of development in oral language (phonology, vocabulary, grammar, and extended discourse), bilingual development, and second language acquisition with attention to cognitive, biological, and environmental factors. Focus on learning in school settings and educational implications.

Restriction: Graduate students only.

**EDUC 224A. Learning Analytics Fundamentals. 4 Units.**

Provides students with a survey of learning analytics (LA), emphasizing its application across educational contexts, rather than its underlying algorithmic details. A comprehensive overview orients students to this nascent field and prepares them for advanced research in LA.

Restriction: Graduate students only.

**EDUC 224B. Learning Analytics Practicum. 4 Units.**

Helps students gain hands-on experience working as educational data scientists, while simultaneously learning some of the key guiding principles behind effectively using data to make predictions and decisions. Culminates in an interdisciplinary group research project.

Prerequisite: EDUC 288A

Restriction: Graduate students only.

**EDUC 225. Learning, Development, and Culture. 4 Units.**

Explores issues of learning and development through a cultural lens. The interplay between culture and learning and culture and development is analyzed through the discussion of relevant readings from both psychological and anthropological research traditions.

Restriction: Graduate students only.

**EDUC 226. University Teaching: Concepts and Practices. 4 Units.**

Prepares doctoral students for course design and instruction at the university level. Addresses topics including the university teaching context, preparing a syllabus, and inclusive teaching and learning.

Restriction: Graduate students only.

**EDUC 228. Science Education for the 21st-Century Classroom. 4 Units.**

Aims to develop foundational understanding about science education research. Contemporary research from early childhood through high school is introduced. Issues of equity, social justice, pedagogy, professional development, and innovation in and out of school settings are addressed.

Restriction: Graduate students only.

**EDUC 229. Theories of Human Development. 4 Units.**

Examines developmental theory as a guide for research and practice in education. The evolution of classical development theories and the emergence of new theoretical models are considered. Theoretical perspectives include ecological systems, life course, psychobiology, attachment, and social-cognitive theories.

Restriction: Graduate students only.

**EDUC 229A. Theories and Issues in Human Development - Part I. 4 Units.**

Examines seminal concepts, issues, and theories that underlie contemporary developmental science. Students develop an understanding of these concepts, and develop their skills in using theory as a guide in their own research and practice.

Restriction: Graduate students only.

**EDUC 230. The History and Culture of Schooling in the United States. 4 Units.**

Considers the historical, cultural, and structural processes that contextualize American schooling. In particular, examines the roles of race, class, and gender in the context of public education in the United States.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 231. Interrogating Race and Education. 4 Units.**

Critically explores how race is a socially constructed concept and how it manifests itself in American society. Attention is given to African American, Asian, and Mexican communities throughout U.S. history, with particular emphasis on educational inequality.

Restriction: Graduate students only.

**EDUC 232. Mathematics Cognition and Learning. 4 Units.**

Study of mathematical cognition, learning, and development. Combines readings from cognitive and developmental psychology, education, and learning sciences with the purpose of identifying the most useful applications of cognitive theory and methods for educational research and practice.

Restriction: Graduate students only.

**EDUC 233A. Special Topics in Atypical Development. 4 Units.**

Includes advanced examination of current issues in theories of atypical development, assessment, and intervention as applied to special needs. Understanding physical and/or cognitive mechanisms of child development and disorders. Knowledge and skills for areas of disability.

Repeatability: May be taken for credit 5 times as topics vary.

Restriction: Graduate students only.

**EDUC 234. Measurement and Psychometrics. 4 Units.**

Focuses on appraisal and development of measures, measurement theory, and its application using a classical test theory approach. Topics include scaling, construction, reliability and validity assessment, and item analysis; as well as cross-cultural and cross-linguistic considerations in test development.

Restriction: Graduate students only.

**EDUC 235. Psychology of Reading Acquisition. 4 Units.**

Surveys theory and empirical evidence concerning acquisition, cognitive processes, and consequences of skilled reading. Explores psychological models of skilled reading, how children acquire reading and writing skills in their home and second languages, cognitive consequences of acquiring literacy skills.

Restriction: Graduate students only.

**EDUC 236. Applied Linguistics and Literacy. 4 Units.**

Examines research in applied linguistics as related to teaching literacy. Overview of language knowledge required to understand development and instruction of literacy. Topics include English language structures, psychological processing of these structures, and methodologies to study language and literacy.

Restriction: Graduate students only.

**EDUC 237. Foundations of Teaching and Learning. 4 Units.**

Situates learning in relation to teaching, content, and context. Locates the work of teaching and learning as a cultural practice and considers the limitations of existing theories for advancing learning opportunities for historically under-served and under-resourced communities.

Restriction: Graduate students only.

**EDUC 238. Special Topics in Human Development in Context. 4 Units.**

An advanced seminar designed to engage students in highly interactive examination of current issues in human development. Topics and content vary by quarter, depending upon the research interests of the faculty and students.

Repeatability: May be taken for credit 10 times as topics vary.

Restriction: Graduate students only.

**EDUC 239. Cognitive Neuroscience and Human Development. 4 Units.**

Focuses on the latest empirical work at the intersection of neuroscience, cognitive psychology, developmental science, and educational practice; explores how educational neuroscience fits within those fields; and discusses the main conceptual and practical challenges facing the field.

Restriction: Graduate students only.

**EDUC 241. Children's Sense Making in Science. 2 Units.**

Investigates elementary students as individuals who construct understanding of concepts through their interactions with others and the world around them. Observations of children in informal settings to analyze learning in context.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 243. The Policy Environment of Teaching. 2 Units.**

Examines research and public perceptions about school-based educational processes, the influence of institutional structures and educational policy on the lives of teachers, and the challenges of school reform at the local and classroom levels.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 245. Learning Inside and Outside of School. 2 Units.**

A field-based course focused on observing adolescents in out-of-school contexts to examine adolescent learning and development in a range of contexts, how out-of-school contexts motivate learning and development, and consider the implications for teaching.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 246. Teaching Investigations: Identifying Dilemmas of Practice. 4 Units.**

Focuses on identifying problems of teaching practice that arise in student teaching, examining the theoretical foundations that underlie problems of practice, and developing approaches for inquiring into strategies to systematically address instructional challenges.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 247. Teaching Investigations: Exploring Dilemmas of Practice. 4 Units.**

Focuses on exploring problems of teaching practice that arise in student teaching, drawing on research to examine the theoretical foundations that underlie problems of practice, and to propose courses of action to address and study educational interventions.

Prerequisite: EDUC 246

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 248. Understanding Teacher Agency. 4 Units.**

Considers how teachers can become agents of change within their school contexts, through their participation in professional organizations and via social media. Candidates experiment with using different avenues for sharing images of practice and action research.

Prerequisite: EDUC 246

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 250. Research Practice Partnerships. 4 Units.**

An introduction to research-practice partnerships (RPPs). It examines the distinctive characteristics of this approach to education improvement by discussing examples of established partnerships and inviting students to become familiar with methods and tools to advance RPP work.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**EDUC 251. Educational Policy and Politics. 4 Units.**

An in-depth study of topics relevant to educational reform and policy-making. Topics include: the policy-making process, the role of values and interest groups, policy analysis, equality of educational opportunity, systemic reform, implementation, and politics at the school site.

Restriction: Graduate students only.

**EDUC 252. Social Organization of Schools and Classrooms. 4 Units.**

Examines how schools are organizations with ambiguous goals, faced with challenges around effective leadership and cooperation, part of loosely coupled systems, and subject to coercive, normative, and mimetic pressures from organizational environments, shaping institutional practices and structures.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EDUC 253. Foundations of Educational Policy. 4 Units.**

Reviews disciplinary models that economists and sociologists employ in approaching education-related policy issues, including markets as emergent systems, human capital, social and cultural capital, and rational choice and institutional models of administrators and teachers.

Restriction: Graduate students only.

**EDUC 254. College Access and Persistence. 4 Units.**

Introduction to how social, political, and economic forces impact college access and persistence in the U.S. higher education system. Investigates historical perspectives and theoretical underpinnings of college access and retention research and the link between K–12 schooling and postsecondary stratification.

Restriction: Graduate students only.

**EDUC 255. Immigration and the New Second Generation. 4 Units.**

Focuses on Asian, Latino, and Black children of immigrants. Investigates how today's second generation adapts, incorporates into the U.S. social structure, transforms the social and economic landscape. Explores assimilation, immigrant families/communities, language, racial/ethnic identities, gender, education, changing U.S. racial structure.

Restriction: Graduate students only.

**EDUC 258. Special Topics in Educational Policy and Social Context. 4 Units.**

An advanced seminar designed to engage students in highly interactive examination of current issues in educational policy and social context. Topics and content will vary by quarter, depending upon the research interests of the faculty and students.

Repeatability: May be taken for credit 10 times.

Restriction: Graduate students only.

**EDUC 259. Community Research and Action. 4 Units.**

Introduces the theoretical underpinnings and research approaches of the field of Community Psychology. Project-based course focused on research and action in communities, organizations, and other extra-individual units (e.g., schools).

Restriction: Graduate students only.

**EDUC 260. The Arts, Human Development, and Social Context. 4 Units.**

Examines the state of empirical knowledge on the impact of visual and performing arts education on the development of academic, communication, and social-emotional skills. The role of the arts in forming personal and cultural identity is discussed.

Restriction: Graduate students only.

**EDUC 261. Social and Cultural Foundations of Education. 4 Units.**

Provides a critical understanding of the social and cultural foundations of education through reproduction theory. Explores the unique ways in which culture and power intersect within schools and schooling systems to reproduce and resist educational inequality.

Restriction: Graduate students only.

**EDUC 264. Economic Foundations of Education and Social Policy. 4 Units.**

Beginning/intermediate microeconomics course provides students with an introduction to how economists think about household decision-making, markets, benefit-cost analysis, social policy issues in general and education policy in particular.

Restriction: Graduate students only.

**EDUC 265. Applied Regression Analysis for Education and Social Research. 4 Units.**

Provides students with a working knowledge of multiple regression and the statistical analysis of longitudinal data. Topics include a review of the OLS regression model, event-history methods, and various other techniques for analyzing longitudinal data.

Prerequisite: EDUC 288B

Restriction: Graduate students only.

**EDUC 266. Design-Based Implementation Research. 4 Units.**

Explores design-based implementation research (DBIR) to organize research and improvement efforts in education. Delves deeper into different techniques of partnership development, design, implementation, and improvement science to build a repertoire of practices for students' studies.

Restriction: Graduate students only.

**EDUC 267. Classroom Research Methods. 4 Units.**

Uses students' research problems as the basis for exploring methods—teacher and student observation, interview, case studies, think alouds. Intended for doctoral students with a specific research question and very good grounding in the literature related to their question.

Restriction: Graduate students only.

**EDUC 268. Out-of-School Learning and Development. 4 Units.**

Examines theory, research, and policy concerning out-of-school time and youth development. Several out-of-school contexts are considered (e.g., unsupervised care, informal leisure activities, and organized activities). A range of developmental outcomes are considered (e.g., achievement, social-emotional competence, and physical health).

Restriction: Graduate students only.

**EDUC 274. Studies of Professional and Staff Development. 2-4 Units.**

Research and theory of effective strategies for professional and staff development. Topics include: adult learning as related to professional growth of teachers, staff development as vehicle for systemic reform, reforms to enhance teacher professionalization and empowerment.

Restriction: Doctoral students only.

**EDUC 276. Early Childhood Education Policy. 4 Units.**

Covers core topics in the field of early education policy. Integrates research from the various perspectives relevant to child policy in a practical way to understand the mechanisms of intervention and to develop policy solutions.

Restriction: Graduate students only.

**EDUC 278. Experimental Designs in Educational Research. 4 Units.**

Designed to enable students to think critically about experimental research, and to develop an understanding of how to design and conduct experiments. The overall goal is to prepare students to independently plan and implement an experimental research study.

Prerequisite: EDUC 222

Restriction: Graduate students only.

**EDUC 279. Advanced Qualitative Methods. 4 Units.**

Further developing qualitative inquiry skills for examining human interaction and studying lived experiences of individuals and communities. Practices and techniques for collecting, working with, and analyzing qualitative data to develop and justify claims.

Prerequisite: EDUC 283A or EDUC 283B

Restriction: Graduate students only.

**EDUC 280. Research Methods: Hierarchical Linear Modeling. 4 Units.**

Research data often have a hierarchical structure, which require multi-level models. Students learn to use HLM; conduct appropriate analyses; and write the methods and results section for a peer-reviewed journal article. Previous coursework in regression is required.

Restriction: Doctor of Philosophy Degree students only. Graduate students only.

**EDUC 283A. Qualitative Research Methods in Education I. 4 Units.**

Introduces students to qualitative research methodologies and methods and explores strengths and challenges of this research tradition. Topics include logistical and ethical issues, reliability, validity and generalizability, and the role of reflexivity. Students will also engage in fieldwork.

Prerequisite: EDUC 222

Restriction: Graduate students only.

**EDUC 283B. Qualitative Research Methods in Education II. 4 Units.**

Provides methods for conducting and analyzing qualitative research in educational settings. Topics include data collection, coding, representing qualitative data, and using software for qualitative data analysis.

Prerequisite: EDUC 283A

Restriction: Graduate students only.

**EDUC 284. Mixed Methods in Educational Research . 4 Units.**

Provides an overview of mixed methods research for students familiar with both quantitative and qualitative research. Consists of defining mixed methods research, describing its history and foundations, and examining various types of mixed methods designs.

Restriction: Graduate students only.

**EDUC 285. Theories of Learning Cognition. 4 Units.**

Overview of theories applicable to learning in schools and extracurricular contexts. Cognitive, psychometric, behavioral, and neuroscience perspectives are applied to such topics as memory, knowledge structures, problem solving, motivation, self-referent beliefs, expertise, assessment, and cognitive abilities, including intelligence.

Restriction: Graduate students only.

**EDUC 287A. Quantitative Data Analysis in Education Research and Evaluation. 4 Units.**

Statistical aspects of survey-based evaluations and quantitative research in education. Includes sampling, coding open-ended information, data management, scale construction, statistical analysis, and presentation of findings. Students analyze data sets - a district-based evaluation and a national survey - using SPSS.

Prerequisite: EDUC 281

Restriction: Graduate students only.

**EDUC 287B. Causal Inference: Methods for Program Evaluation and Policy Research. 4 Units.**

Provides students with a comprehensive overview of how to perform some more advanced statistical methods useful in answering policy questions using observational or experimental data.

Restriction: Graduate students only.

**EDUC 288A. Educational, Social, and Behavioral Statistics. 4 Units.**

Designed for graduate students with previous course work in statistics, including experience with statistical software such as SPSS. The emphasis is on regression analysis and the general linear model. Students learn to analyze real data using Stata software.

Prerequisite: Prior coursework in statistics, and experience with statistical software such as SPSS.

Restriction: Graduate students only.

**EDUC 288B. Structural Equation Modeling for Educ, Soc & Behavioral Analysis. 4 Units.**

Rigorous introduction to structural equation modeling for students with strong prior course work in statistics. Topics include path diagrams, SEM with observed variables, factor analysis, SEM with latent variables. Maximum likelihood estimating, goodness-of-fit measures, nested models, related topics.

Prerequisite: EDUC 288A

Restriction: Graduate students only.

**EDUC 289. Use of Video in Educational Research. 4 Units.**

Provides students with conceptual and methodological tools for using video in educational research. Students work with their own video data or with publicly accessible databases.

Restriction: Graduate students only.

**EDUC 295. Pre-Dissertation Research. 1-12 Units.**

Independent study course taken under the direction of a faculty member who guides the student's research. May include guidance on data collection, methodology, human subjects protocol, conference presentation, scholarly publication, program benchmark activities.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**EDUC 296A. Professional Writing in Educational Research I. 2 Units.**

First of a two-course series designed to extend students' knowledge of conducting and publishing educational research. Topics include the logic of research and how to effectively communicate research findings, with particular emphasis on proficient scientific writing.

**EDUC 296B. Professional Writing in Educational Research II. 2 Units.**

Second of a two-course series designed to extend students' knowledge of conducting and publishing educational research. Topics include the logic of research and how to effectively communicate research findings, with particular emphasis on proficient scientific writing.

**EDUC 298. Independent Study. 1-8 Units.**

Independent research on topics related to education.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EDUC 299. Dissertation Research. 1-12 Units.**

Specifically designed for students researching and writing their dissertations.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Doctoral students only.

**EDUC 301. Directed Elementary Field Experiences in Diverse Schools. 2 Units.**

Fieldwork experiences and seminars to provide introduction to the California Teaching Performance Expectations, including guidelines for professional expectations, observation and participation in classrooms, instructional planning, classroom management, and formative experiences and preparation for the state-mandated Teaching Performance Assessment.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 302. Directed Secondary Field Experiences. 2 Units.**

Field work experiences and seminars to provide introduction to the California Teaching Performance Expectations, including guidelines for professional expectations, observation and participation in classrooms, instructional planning, classroom management, and formative experiences and preparation for the State-mandated Teaching Performance Assessment.

Restriction: Master of Arts Degree students only.

**EDUC 304. Student Teaching in the Elementary Schools. 8-12 Units.**

Student teaching seminars prepare candidates for assumption of classroom instructional responsibilities in accordance with State credentialing requirements. Four full days a week of student teaching in public school elementary classrooms in winter quarter and five full days in spring quarter.

Repeatability: May be repeated for credit unlimited times.

Restriction: Master of Arts Degree students only.

**EDUC 305. Learning to Learn from Teaching in Secondary Schools. 4 Units.**

Analytic tools for (1) observing and reflecting on observed instruction; (2) examining student thinking and the relationship between teaching and learning; (3) understanding particular components of the teaching/learning process; and (4) planning effective instruction including innovative teaching practices.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 306. Supervised Teaching in Bilingual Education, Elementary. 8-12 Units.**

Student teaching experiences in bilingual public school classrooms to include orientation, regular seminars, and preparation for bilingual classroom instructional responsibilities in accordance with State credentialing requirements and in conjunction with the public school calendar.

Repeatability: May be repeated for credit unlimited times.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 307. Student Teaching in Intermediate/Secondary School. 8-12 Units.**

Student teaching includes orientation, seminars, and preparation for and assumption of secondary school classroom instructional responsibilities in accordance with State credentialing requirements and in conjunction with public school calendar. Five full days a week in both winter and spring quarters.

Repeatability: May be repeated for credit unlimited times.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 320. Teaching Physical and Health Education in Elementary School. 4 Units.**

Methods of teaching physical education for the elementary classroom teacher. Through an interactive environment, students experience the California Physical Education and Health content standards with appropriate pedagogy. Concepts address motor skills, physical fitness, and personal responsibility for lifelong health.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 322A. Curriculum and Methods for Elementary School Mathematics I. 4 Units.**

Scope, sequence, and methods of teaching mathematics at all levels of elementary school. Presented through lectures, discussions, demonstrations, and exploration of a variety of materials. Covers how to plan lessons, motivate students, diagnose difficulties, and evaluate learning in mathematics.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 322B. Curriculum and Methods for Elementary School Mathematics II. 4 Units.**

Part two of a course addressing pedagogical methods for elementary mathematics. Lectures, discussions, and exploration of instructional strategies and materials support preservice teacher development in the critical areas of planning, instruction, and assessment for conceptual understanding in mathematics.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 323A. Curriculum Methods in Elementary Science. 2 Units.**

Prospective elementary teachers learn how to teach science in grades K-8. Covers state science requirements, a variety of teaching methods, and criteria for selecting science curriculum materials.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 323B. Curriculum Methods in Elementary Science. 2 Units.**

Prospective elementary teachers learn how to teach science in grades K-8. Covers state science requirements, a variety of teaching methods, criteria for selecting science curriculum materials, and how to plan science lessons, units, experiments, projects, and demonstrations.

Prerequisite: EDUC 323A

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 325. Teaching the Visual and Performing Arts in Elementary School. 2 Units.**

Introduction to the issues and practices — including student diversity, academic literacy, and interdisciplinary content — involved in integrating the California visual and performing arts curriculum framework and academic content standards with developmentally appropriate teaching strategies for the elementary classroom. Materials fee.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 326. Curriculum and Methods for Elementary School Reading. 4 Units.**

Teaching an integrated reading/language arts program in the elementary classroom. Implementing theories, principles, and methods which are research and reality-based. Creating a child-centered, language-rich program to meet needs of children in multicultural/multilingual settings.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 336. Methods of Teaching Languages other than English in Secondary Schools. 4 Units.**

Prepares future teachers of foreign language or primary/home language. Emphasizes hands-on, practical strategies for communication-based instruction and authentic assessment in reading, writing, listening, speaking, and culture.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 337. Methods of Teaching Social Science in the Secondary School. 4 Units.**

Theories, strategies, and methodologies related to the teaching of history and social science in the secondary school. Emphasis on the planning, delivery, and assessment of lessons reflecting an understanding of the History-Social Science Framework for California.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 338. Methods of Teaching English in the Secondary School. 2-4 Units.**

Introduction to teaching reading, writing, and speaking skills in secondary school. Emphasis upon integrative approach to teaching literature, composition, and grammar consistent with the California State Framework. Practice in the design of lesson plans that are both integrated and cumulative.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 339. Methods of Teaching Visual Arts in Secondary Schools. 4 Units.**

Theory, curriculum, and strategies for teaching visual arts in the secondary school. Emphasis on the planning, delivery, and assessment of lessons consistent with California State Framework and content standards.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 340. Methods of Teaching Mathematics in Secondary School. 2-4 Units.**

Theories, strategies, and methodologies related to the teaching of mathematics in the secondary school. Emphasis on the planning, delivery, and assessment of lessons reflecting an understanding of the Mathematics Framework for California and the recommendations of professional organizations.

Repeatability: May be taken for credit for 4 units.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 341. Teaching Science in Secondary School. 4 Units.**

Prospective secondary science teachers learn how to teach science in grades 7-12. Covers State science requirements, a variety of teaching methods, criteria for selecting science curricular materials, and how to plan science lessons, units, experiments, projects, and demonstrations.

Same as EEB 341.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 342A. Applied Instructional Strategies in Secondary Schools. 2 Units.**

Application of pedagogy and research to practice teaching experiences in the secondary schools. A continuation of the methodology course series with an emphasis on the needs of students with culturally diverse backgrounds. Conducted in a five-week format.

Repeatability: May be taken for credit 2 times.

Overlaps with EDUC 342.

Restriction: Master of Arts in Teaching Degree students only. EDUC 342 and EDUC 342A may not both be taken for credit.

**EDUC 342B. Applied Instructional Strategies in Secondary Schools. 2 Units.**

Application of pedagogy and research to practice teaching experiences in the secondary schools. A continuation of the methodology course series with an emphasis on the needs of students with culturally diverse backgrounds. Conducted in a five-week format.

Repeatability: May be taken for credit 2 times.

Overlaps with EDUC 342.

Restriction: Master of Arts in Teaching Degree students only. EDUC 342 and EDUC 342B may not both be taken for credit.

**EDUC 346. Reading and Writing in Middle School and High School Classrooms. 4 Units.**

Emphasis is placed upon understanding the literacy processes (listening, speaking, viewing, reading, and writing) as they relate to all Single Subject areas. Teachers are guided to integrate literacy-related strategies with curriculum-based goals supported in the California State Frameworks.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 347. Culture, Diversity, and Educational Equity . 4 Units.**

Survey of the history of and social theories about the origins and consequences of U.S. racial, gender, and social inequality, and the effects of poverty and racism on the educational opportunities and outcomes of minority groups in the United States.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 348. Educational Equity and the Exceptional Learner. 2 Units.**

Knowledge, skills, and strategies to teach exceptional learners in the general education classroom. Legislation pertaining to the education of exceptional learners. Role of general education teacher in the special education process. Inclusive curriculum to provide equal access to content.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 348A. Educational Equity and the Exceptional Learner I. 2 Units.**

Focuses on knowledge, skills, and strategies needed to teach special populations in general education secondary classrooms. Covers categories and characteristics of disability and exceptionality, state and federal legislation, and the role of general education teachers in the special education process.

Restriction: Graduate students only. Education-MA/PhD Majors only.

**EDUC 348B. Educational Equity and the Exceptional Learner II. 2 Units.**

Emphasizes the use of differentiated instruction to meet special needs and the creation of a positive, inclusive learning environment that provides access to the core curriculum for special needs students.

Restriction: Graduate students only. Education-MA/PhD Majors only.

**EDUC 349. Theories and Methods of English Language Development Applied to Secondary Students. 4 Units.**

Theories and methods of English language development and instruction of English language learners, with focus on secondary students. Includes language acquisition theory, language and content, assessment strategies, and preparation of curricula and instruction for grades 7–12 English language learners.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 358. Media and Information Literacy in the Secondary Classroom. 2 Units.**

Focuses on how teachers can help their students to become critical, ethical, and effective users of technological resources in the secondary classroom. Students learn tools for evaluating, selecting, and incorporating appropriate learning technologies into the secondary classroom.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 359. Curriculum and Methods for Elementary Social Science and Information Literacy. 4 Units.**

Methods of instruction for Social Science at the K–6 level. Includes integration of the use of technology, development of content literacy, and use of evidence to construct arguments.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 361. The Adolescent Learner . 4 Units.**

Issues of adolescent development and learning in family, school, and community contexts from biological, psychological, cognitive, and social perspectives. Focuses on how adolescents learn, what motivates them to learn, and how schools and teachers contribute to adolescents' growth.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 362. Curriculum and Methods for Elementary Language Arts and English Language Development. 4 Units.**

Methods, instructional practices, and assessment strategies for teaching English-Language Arts, with a focus on instructional practices for supporting English Language Learners. Focuses on core language arts topics, including composition of persuasive, expository, and narrative texts; speaking; and listening.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 364. Instructional Design and Education Technology for the Elementary Classroom. 2 Units.**

Focuses on how teachers can effectively integrate educational technologies for teaching and learning in the elementary school classroom. Students learn tools for evaluating, selecting, and incorporating appropriate technologies into their classroom activities.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 374. Learning and Child Development . 4 Units.**

Issues of child development and learning in family, school, and community contexts from biological, psychological, cognitive, and social perspectives. Focuses on how young children learn and develop, how schools and teachers contribute to children's growth, and implications for instruction.

Restriction: Master of Arts in Teaching Degree students only.

**EDUC 399. University Teaching. 1-4 Units.**

Limited to teaching assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## Education Sciences, B.A.

The major in Education Sciences provides a foundation for the interdisciplinary nature of education, focused on five domains. These include (a) human development, (b) learning, (c) social structures and stratification, (d) policymaking in education and (e) schools as organizations.

The B.A. in Education Sciences includes content from applied linguistics, cognitive science, developmental psychology, economics, informatics, media studies, policy analytics, social neuroscience, and sociology. Graduates can choose from a variety of career opportunities including public education, government, community-based non-profits, research institutions, higher education, and education software development. Many graduates will pursue advanced degrees leading to K-12 teaching, public policy, social work, education research and school leadership.

The B.A. in Education Sciences is not a professional degree. However, graduates are well prepared to pursue teacher training (see UC Irvine School of Education M.A.T. program). Students interested in teaching middle or high school are encouraged to meet with an Academic Advisor to combine the major with a minor or second major, aiming for proficiency in the content area in which they plan to teach (e.g. History). All students in the Education Sciences major are required to complete a minimum of 40 fieldwork hours in an educational setting.

**Freshmen:** Preference will be given to those who rank the highest using the selection criteria as stated in the Undergraduate Admissions section of the *Catalogue*.

**Transfer students:** Preference will be given to Junior-level applicants with the highest grades overall (minimum cumulative GPA of 3.0). It is suggested that prospective transfer students work toward completing coursework to fulfill the UCI general education requirements or IGETC.

**Change of Major.** Students who wish to change their major to Education Sciences should contact the Education Student Affairs Office for information about change-of-major requirements, procedures, and policies. Information is also available at the UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu/>).

**All students must meet the University Requirements.**

**Grade Requirement.** A minimum grade average of at least C (2.0) is required (1) overall, (2) in all of the courses required for the major program, and (3) in the upper-division courses required for the major program. All courses for the major must be taken for a letter grade unless the grade option for the course is pass/no pass only.

### Overlap Restrictions

**Double Majors.** In fulfilling degree requirements for multiple majors, a maximum of two upper-division courses may overlap between two majors.

**Major and Minor Requirements.** Students may not receive both the major in Education Sciences and the minor in Education. In fulfilling requirements for a minor, a maximum of two courses may overlap between a major in Education Sciences and a minor from another department.

### Major Requirements

Students must complete 16 courses (64 units) and a 40-hour practicum as specified below:

Lower-Division Requirements (24 units):

A. Complete the following Research Methods and Data Literacy Requirement (8 units)

EDUC 10 Educational Research Design <sup>1</sup>

EDUC 15 Statistics for Education Research <sup>2</sup>

B. Complete the following Introduction to Education Science Requirement (16 units)

EDUC 25 Introduction to Education: Disciplinary Perspectives

EDUC 30 21st Century Literacies

EDUC 40 Theories of Development and Learning Applied to Education

EDUC 50 Origins, Purposes, and Central Issues in K-12 Education

Upper-Division Requirements (20 units):

C. Select one Human Development course (4 units):

EDUC 107 Child Development in Education

EDUC 108 Adolescent Development and Education

D. Select one Learning course (4 units):

EDUC 146 Education, Learning, and Culture

EDUC 173 Cognition and Learning in Educational Settings

E. Select one Social Structures and Stratification course (4 units):

EDUC 124 Multicultural Education in K-12 Schools

EDUC 147 Poverty, Education, and Social Change

F. Select one Policymaking in Education course (4 units):

EDUC 142 American History and Education Policy: An Intimate Relationship

EDUC 140 Courts, Classrooms, and Controversies in Education Policy

G. Select one Schools as Organizations course (4 units):

EDUC 144 The American Charter School

EDUC 150 Changing the High School Experience

H. Five additional elective Education courses (20 units). At least 12 units must be upper-division (numbered 100-199). <sup>3</sup>

The additional electives do not include the following professional education courses: EDUC 109, EDUC 143AW, EDUC 143BW, EDUC 148, EDUC 158. A maximum of 8 units for any repeatable Education course (e.g., EDUC 198, EDUC 199) may be used to satisfy this elective requirement.

I. Practicum Requirement (40 hours total):

A minimum of 40 hours of field experience or research in an education setting, satisfied in the following manner:

Complete 40 hours of field experience or research completed in conjunction with one or more approved UCI courses that include a practicum. Consult the Education Student Affairs Office or School of Education website for Undergraduate Academic Programs for a current list of approved practicum courses.

<sup>1</sup> The following course is an approved alternative for EDUC 10: SOCECOL 10

<sup>2</sup> The following statistics courses are approved alternatives for EDUC 15: SOCECOL 13, STATS 7, ANTHRO 10B, POL SCI 10B, PSYCH 10B, SOC SCI 10B, or SOCIOL 10B.

NOTE: This is only a sample plan. Course offerings may be moved due to unforeseen circumstances. It is strongly recommended that students meet with an academic advisor to create an academic plan tailored to meet their specific areas of interest.

## Education, Minor

The minor in Education is designed to facilitate exploration of a broad range of issues in the field of education. Graduates with the Education minor may be employed in schools, government, private industry, and non-profit organizations. Many graduates will pursue advanced training leading to teaching careers or administrative leadership.

### Requirements for the Minor in Education

The minor requires completion of a minimum of seven courses (four core courses and three electives) totaling 28 units. At least four courses must be upper-division. Students must also complete a minimum of 40 hours of verifiable field experience or research in an educational setting. No more than two non-Education courses (up to 8 units) from the student's major area of study may be used to satisfy the minor requirements. A maximum of 8 units may be used to satisfy minor requirements with any repeatable course.

A. Select four core courses (16 units) from the following:

EDUC 10	Educational Research Design <sup>1</sup>
EDUC 15	Statistics for Education Research
EDUC 30	21st Century Literacies <sup>1</sup>
EDUC 40	Theories of Development and Learning Applied to Education <sup>1</sup>
EDUC 50	Origins, Purposes, and Central Issues in K-12 Education
EDUC 107	Child Development in Education
EDUC 108	Adolescent Development and Education
EDUC 124	Multicultural Education in K-12 Schools
EDUC 160	Foundations of Out-of-School Learning
EDUC 173	Cognition and Learning in Educational Settings
EDUC 175	Foundations of Education
EDUC 176	Psychology of Learning, Abilities, and Intelligence

B. Select three elective courses (12 units) from the following:

1. Education courses numbered 1–199. A course selected to satisfy the minor core requirement cannot also be used to satisfy the elective requirement. A maximum of 4 elective units may be taken as research or independent study in EDUC 198.

C. Practicum. A minimum of 40 hours of field experience in an educational setting. Students may complete 40 hours of field experience from a list of approved practicum courses offered by the School of Education, which can include EDUC 198. Students may also petition to receive credit for practicum from other UCI courses.

<sup>1</sup> Course also satisfies university General Education requirements.

**Residence Requirement.** At least four upper-division courses must be successfully completed at UCI.

**GPA Requirement.** For certification in the minor, a student must obtain a minimum overall grade point average of at least C (2.0) in all courses required for the minor program. A maximum of 8 units of Pass/No Pass courses may be taken for the minor.

**Minor and Major.** Students may not receive both the minor in Education and the major in Education Sciences.

**Undergraduate Programs for Future Teachers Offered by Other Departments.** Undergraduates who are completing a minor in Education and who are considering a teaching career may also be interested in the following programs offered by other departments.

- The School of Physical Sciences, School of Biological Sciences, and School of Education jointly sponsor an undergraduate teacher credential program for math and science majors called CALTEACH. Learn more about CALTEACH here. (<http://calteach.uci.edu/>)
- School of Humanities: English Major with a Specialization in English for Future Teachers; History Major with a Specialization in History for Future Teachers; Spanish Major with an Emphasis in Spanish for Future Teachers
- School of Biological Sciences: Major in Biological Sciences with Concentration in Biological Sciences Education
- School of Physical Sciences: Chemistry Major with a Concentration in Chemistry Education; Math Major with a Specialization in Mathematics for Education; Physics Major with a Concentration in Physics Education.

## Education, Ph.D.

The School of Education offers a Ph.D. in Education. The program seeks applicants from varied backgrounds and experiences who have the potential to become outstanding scholars and researchers in the field of education. The program currently offers three areas: (1) Human Development in Context; (2) Educational Policy and Social Context; and (3) Teaching, Learning, and Educational Improvement. Students enrolling in the program choose among these areas based on their research interests.

Course work for the program ordinarily takes two to three years to complete and involves a number of core courses, methodology courses, elective courses, and a directed research sequence. Before advancing, students are required to have successfully completed their first-year research poster project, second year research paper, and 12 courses as specified by the area requirements. Students should advance to candidacy in the fall quarter of their fourth year. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

Students are admitted to the program once per year to begin each fall quarter. Applicants must have completed a bachelor's degree with a grade point average of at least 3.0 and have prior course work or background related to the area for which they express interest. Applicants are required to submit a UCI application, transcripts, a statement of purpose, a personal statement, CV or resume, a writing sample, three letters of reference, and general GRE scores completed within the past five years. Applicants who are not citizens of countries where English is the primary or dominant language as approved by the UCI Graduate Division are also required to submit scores from either the TOEFL examination or the Academic Modules of the International English Language Testing System (IELTS).

Financial support will be offered in the form of teaching or research assistantships.

Students take a minimum of 12 4-unit courses, including five required research methods courses, five area courses, and one core course from each of the other two areas.

### Required Methods Courses

A. Complete the following:

EDUC 222	Research Epistemologies and Methodologies
EDUC 265	Applied Regression Analysis for Education and Social Research
EDUC 283A	Qualitative Research Methods in Education I
EDUC 283B	Qualitative Research Methods in Education II
EDUC 288A	Educational, Social, and Behavioral Statistics

### Additional Research Methods Courses (not required but strongly encouraged)

EDUC 210	Language, Literacy, and Discourse
EDUC 221	Longitudinal and Advanced Structural Equation Modeling
EDUC 234	Measurement and Psychometrics
EDUC 259	Community Research and Action

EDUC 266	Design-Based Implementation Research
EDUC 267	Classroom Research Methods
EDUC 279	Advanced Qualitative Methods
EDUC 280	Research Methods: Hierarchical Linear Modeling
EDUC 284	Mixed Methods in Educational Research
EDUC 287A	Quantitative Data Analysis in Education Research and Evaluation
EDUC 287B	Causal Inference: Methods for Program Evaluation and Policy Research
EDUC 288B	Structural Equation Modeling for Educ, Soc & Behavioral Analysis
EDUC 289	Use of Video in Educational Research

Other courses in statistics or research methodology offered in the Department of Statistics, the School of Social Ecology, the School of Social Sciences, or elsewhere on campus, with the permission of the instructor.

### Area Courses

The area core courses are marked with an asterisk. Students must take these courses in their own area, and one of these courses in each of the other two areas.

#### Human Development in Context (HDIC)

HDIC students are required to complete EDUC 229A, EDUC 237, EDUC 253, and four courses within the HDIC area.

EDUC 208	Reading and Writing Development
EDUC 220	Developing Adolescent Literacy
EDUC 223	Oral Language Acquisition and Education
EDUC 225	Learning, Development, and Culture
EDUC 229A	Theories and Issues in Human Development - Part I *
EDUC 229B	
EDUC 232	Mathematics Cognition and Learning
EDUC 235	Psychology of Reading Acquisition
EDUC 236	Applied Linguistics and Literacy
EDUC 238	Special Topics in Human Development in Context
EDUC 239	Cognitive Neuroscience and Human Development
EDUC 268	Out-of-School Learning and Development
EDUC 274	Studies of Professional and Staff Development
EDUC 285	Theories of Learning Cognition

#### Educational Policy and Social Context (EPSC)

EPSC students are required to complete EDUC 253, EDUC 229A, EDUC 237, one course in the Economics of Education content area, one course in the Education Policy content area, one course in the Structure and Social Context of Schools content area, and one course within the EPSC area.

EDUC 253	Foundations of Educational Policy *
Economics of Education	
ECON 249	Special Topics in Microeconomics
EDUC 264	Economic Foundations of Education and Social Policy
Education Policy	
EDUC 251	Educational Policy and Politics
EDUC 254	College Access and Persistence
EDUC 276	Early Childhood Education Policy
Structure and Social Context of Schools	
EDUC 261	Social and Cultural Foundations of Education
EDUC 252	Social Organization of Schools and Classrooms
SOCIOL 237	Educational Inequality
SOCIOL 279	Special Topics: Social Organizations and Institutions

#### Other Educational Policy and Social Context courses

EDUC 258	Special Topics in Educational Policy and Social Context
----------	---

Educational Policy and Social Context does not require its students to take more than the set of quantitative courses required, but it does strongly encourage students to take additional methods courses within or outside the School of Education:

EDUC 284	Mixed Methods in Educational Research
EDUC 287A	Quantitative Data Analysis in Education Research and Evaluation

## EDUC 287B

## Causal Inference: Methods for Program Evaluation and Policy Research

**Teaching, Learning, and Educational Improvement (TLEI)**

TLEI students are required to complete EDUC 237, EDUC 229A, EDUC 253, two courses in a single TLEI specialization, two additional TLEI courses (which can be in the same specialization or in a different TLEI specialization).

Specialization courses within TLEI:

## Digital Learning and Media

EDUC 217	Foundations of Digital Learning
EDUC 212	Literacy and Technology

## Language and Literacy

EDUC 208	Reading and Writing Development
EDUC 210	Language, Literacy, and Discourse
EDUC 211	Writing Theory and Practice
EDUC 212	Literacy and Technology
EDUC 220	Developing Adolescent Literacy
EDUC 223	Oral Language Acquisition and Education
EDUC 235	Psychology of Reading Acquisition
EDUC 236	Applied Linguistics and Literacy

## Sociocultural Perspectives on Learning and Educational Improvement

EDUC 225	Learning, Development, and Culture
EDUC 231	Interrogating Race and Education
EDUC 250	Research Practice Partnerships
EDUC 255	Immigration and the New Second Generation
EDUC 266	Design-Based Implementation Research
EDUC 289	Use of Video in Educational Research

## STEM Teaching and Learning

EDUC 217	Foundations of Digital Learning
EDUC 228	Science Education for the 21st-Century Classroom
EDUC 232	Mathematics Cognition and Learning

## Teacher Learning and Professional Development

EDUC 226	University Teaching: Concepts and Practices
EDUC 237	Foundations of Teaching and Learning *
EDUC 274	Studies of Professional and Staff Development

## Other TLEI courses

EDUC 218	Special Topics in Teaching, Learning, and Educational Improvement
----------	---

**S/U Research Courses**

Students who wish to engage in pre-dissertation or research for credit but not for a letter grade, may enroll in EDUC 295 for 2-4 units (pre-dissertation research) or EDUC 299 for 2-8 units (dissertation research). Both courses may be repeated for credit and both are graded on a Satisfactory/Unsatisfactory basis. As with other S/U courses, EDUC 295 and EDUC 299 may not be used to fulfill course of elective requirements.

**Elective Courses**

Students are expected and strongly encouraged to take courses beyond the 12 courses required that provide training essential to the student's research interests and professional development throughout their five years of doctoral study. These courses may come from their own area, from the other two areas, from other appropriate classes in the School of Education, from other departments on campus, or from other campuses within the University of California. Elective courses must be graduate-level courses taken for a letter grade. Independent study courses (e.g., EDUC 298) are also acceptable when taken for a letter grade, pending approval and syllabus is provided.

Further information regarding the Ph.D. program, courses, and application requirements is available at the School of Education website (<http://www.education.uci.edu/>).

## Elementary and Secondary Education, M.A.T.

The School of Education offers a 14-month Master of Arts program in Elementary and Secondary Education. The M.A.T. with Single Subject Credential prepares candidates to teach mathematics, social science, English language arts, sciences, art, or world languages at the middle or high school level. The M.A.T. with Multiple Subject Credential prepares students to teach all grade levels and content areas within the elementary school curriculum. The

M.A.T. program provides a rich theoretical and practical framework with a focus on *Learning to Learn from Teaching*, or continuously studying the impact of one's teaching on student learning.

Selection is based on the graduate admission requirements of the UCI Graduate Division, which include the strength of the undergraduate academic record, statement of purpose, and letters of recommendation.

**Submit an application** through the Graduate Division (<http://www.grad.uci.edu/admissions/>).

**Evidence of Academic Achievement—Transcripts from all post-secondary institutions.** Completion of a baccalaureate degree from an accredited institution and a minimum grade point average of 3.0 will support admission to the program.

**Written Recommendations.** Three letters of recommendation, including at least one from an academic source, from individuals who are familiar with the applicant's (1) ability to pursue graduate study, (2) capacity to work with children, and/or (3) demonstrated fitness for the professional environment of teaching.

### Prior to the Start of the Program

- Pass the California Basic Educational Skills Test;
- Pass the required California Subject Matter Tests or complete an approved subject-matter preparation program in the content area;
- Hold a current Certificate of Clearance or Substitute Teaching Permit from the State of California;
- Hold a current TB test with negative results.

### Program of Study

#### Multiple Subject Credential

##### Summer One – First Session

EDUC 374	Learning and Child Development
EDUC 241	Children's Sense Making in Science
EDUC 230	The History and Culture of Schooling in the United States

##### Summer One – Second Session

EDUC 202	Outcomes of Schooling/Student Assessment
EDUC 364	Instructional Design and Education Technology for the Elementary Classroom
EDUC 323A	Curriculum Methods in Elementary Science
EDUC 347	Culture, Diversity, and Educational Equity

##### Fall Quarter

EDUC 301	Directed Elementary Field Experiences in Diverse Schools
EDUC 320	Teaching Physical and Health Education in Elementary School
EDUC 322A	Curriculum and Methods for Elementary School Mathematics I
EDUC 323B	Curriculum Methods in Elementary Science
EDUC 326	Curriculum and Methods for Elementary School Reading
EDUC 362	Curriculum and Methods for Elementary Language Arts and English Language Development

##### Winter Quarter

EDUC 304	Student Teaching in the Elementary Schools
EDUC 306	Supervised Teaching in Bilingual Education, Elementary
EDUC 348A	Educational Equity and the Exceptional Learner I
EDUC 322B	Curriculum and Methods for Elementary School Mathematics II
EDUC 325	Teaching the Visual and Performing Arts in Elementary School
EDUC 246	Teaching Investigations: Identifying Dilemmas of Practice

##### Spring Quarter

EDUC 304	Student Teaching in the Elementary Schools
EDUC 306	Supervised Teaching in Bilingual Education, Elementary

EDUC 359	Curriculum and Methods for Elementary Social Science and Information Literacy
EDUC 348B	Educational Equity and the Exceptional Learner II
EDUC 247	Teaching Investigations: Exploring Dilemmas of Practice

**Summer Two**

EDUC 248	Understanding Teacher Agency
EDUC 243	The Policy Environment of Teaching

**Single Subject Credential****Summer One - First Session**

EDUC 245	Learning Inside and Outside of School
EDUC 361	The Adolescent Learner
EDUC 230	The History and Culture of Schooling in the United States

**Summer One - Second Session**

EDUC 243	The Policy Environment of Teaching
EDUC 202	Outcomes of Schooling/Student Assessment
EDUC 358	Media and Information Literacy in the Secondary Classroom

**Fall Quarter**

EDUC 302	Directed Secondary Field Experiences
EDUC 305	Learning to Learn from Teaching in Secondary Schools
EDUC 336	Methods of Teaching Languages other than English in Secondary Schools
EDUC 337	Methods of Teaching Social Science in the Secondary School
EDUC 338	Methods of Teaching English in the Secondary School
EDUC 339	Methods of Teaching Visual Arts in Secondary Schools
EDUC 340	Methods of Teaching Mathematics in Secondary School
EDUC 341	Teaching Science in Secondary School
EDUC 346	Reading and Writing in Middle School and High School Classrooms
EDUC 347	Culture, Diversity, and Educational Equity
EDUC 348A	Educational Equity and the Exceptional Learner I

**Winter Quarter**

EDUC 307	Student Teaching in Intermediate/Secondary School
EDUC 342A	Applied Instructional Strategies in Secondary Schools
EDUC 349	Theories and Methods of English Language Development Applied to Secondary Students
EDUC 246	Teaching Investigations: Identifying Dilemmas of Practice

**Spring Quarter**

EDUC 307	Student Teaching in Intermediate/Secondary School
EDUC 342B	Applied Instructional Strategies in Secondary Schools
EDUC 247	Teaching Investigations: Exploring Dilemmas of Practice
EDUC 348B	Educational Equity and the Exceptional Learner II

**Summer Two**

EDUC 248	Understanding Teacher Agency
EDUC 206	Design of Learning Environments for Teachers in Secondary School Subjects

A comprehensive examination is completed by M.A.T. candidates during the second summer. The examination is an action research project embedded in EDUC 248 Understanding Teacher Agency.

A grade of B or better is required in all courses and in student teaching for successful completion of the program.

Student teaching for Multiple Subject candidates (grades K–6) is defined as a full day, four days per week during the first quarter of student teaching and a full day, five days per week during the second quarter of student teaching. Assignments will include two grade levels within the K–6 range in elementary schools.

Student teaching for Single Subject candidates (grades 7–12) in the post-baccalaureate program is defined as a full day, five days per week for one public school semester in an appropriate classroom setting in a middle or high school.

Readiness for student teaching shall be determined by, but not be limited to, academic work, professional conduct, and potential for success in teaching. Failure to be advanced to student teaching will be considered good cause for removal and/or a leave of absence from the program.

### **Applying for a California Credential**

In addition to fulfilling all of the above requirements:

- Show evidence a college-level course, or pass an approved examination on the U.S. Constitution;
- Obtain a CPR certificate in Adult, Child, and Infant resuscitation training.
- Pass the Teaching Performance Assessment

**Adding Teaching Authorizations.** After acquiring a basic credential, it is possible to add further teaching authorizations. Consult an academic counselor in the School of Education Student Affairs office (<http://advise.education.uci.edu/contact-us.html>) for details.

# School of Humanities

---

## **Tyrus Miller, Dean**

143 Humanities Instructional Building  
Undergraduate Counseling: 949-824-5132  
Graduate Counseling: 949-824-4303  
[www.humanities.uci.edu](http://www.humanities.uci.edu) (<http://www.humanities.uci.edu/>)

The UCI School of Humanities is where future leaders, communicators, scholars, CEOs, storytellers, creatives, directors, writers, and entrepreneurs come to get their start.

The School is internationally recognized for its outstanding programs in the main areas of humanistic inquiry: history; languages; philosophy; and literature, film, and the arts. With a faculty whose distinctions include three Pulitzer Prizes and numerous other national and international awards, the School offers 22 majors and 39 minors that include those in traditional disciplines, languages other than English, and interdisciplinary areas of study.

The core educational mission of the humanities is imparting to students tools of analysis that will allow them to understand, describe, and explain the world around them in a critical context. A liberal arts education in the humanities prepares students to examine a variety of written and visual forms and to communicate effectively. All Humanities students are introduced to writing, philosophy, history, visual culture, literature, and a language other than English. Students in Humanities majors are given the opportunity to conduct an intensive conversation with the traditions, both past and present; and as a result, develop the ability to understand and make sense of other people and their cultures. Humanistic inquiry equips students to enter the world as globally thinking citizens.

Because language is the humanist's essential tool and the traditional medium of historical record, philosophical deliberation, and literary creation and criticism, the School of Humanities places special emphasis on language and training in composition. The School offers programs in more than a dozen languages other than English. The serious study of language other than English is crucial to fostering critical thinking, objective self-reflection, and international awareness. The distinguished programs in creative writing, literary journalism, and the Program in Academic English are housed in Humanities. Humanities Core integrates the multi-disciplinary study of the humanities along with lower-division writing for majors who enter as freshmen.

Interdisciplinary study is an essential feature of the Humanities Honors Program as well as of many of the School's undergraduate degree programs. Examples of undergraduate programs located in Humanities that cut across disciplinary boundaries are the majors in Global Cultures, Global Middle East Studies, and Religious Studies, and the interdisciplinary minors in Archaeology, Latin American Studies, and Medical Humanities.

Students majoring in the humanities are particularly well-prepared for careers in all fields that rely on analysis, judgment, argument, and communication. Humanities students have moved into business, medicine, the law, education, politics, public policy, academia, new media and journalism. Employers in all sectors increasingly request college graduates who can communicate effectively across cultures, think critically, and have the ability to learn and adapt on the job. Employers can provide a specific form of technical training, but the School of Humanities provides the thinking and writing skills, as well as the social and emotional intelligence that allow graduates to excel in a wide range of professions.

## **Humanities Undergraduate Study**

### **Yong Chen, Associate Dean for Curriculum and Student Services**

143 Humanities Instructional Building  
949-824-5132  
<http://www.humanities.uci.edu/undergrad/>

The Office of Undergraduate Study provides academic counseling to students pursuing majors within the School of Humanities, as well as students interested in changing to, or adding a double major in School of Humanities disciplines. Students should consult an academic counselor with questions about University policies and regulations, degree requirements, course content, options for majors and minors, study abroad, honors opportunities, or when facing academic difficulties.

## **Humanities Office of Graduate Study**

### **Yong Chen, Associate Dean for Curriculum and Student Services**

157 Humanities Instructional Building  
949-824-5557

The School of Humanities offers graduate degrees in a wide range of disciplines, as well as in interdisciplinary programs. The School's graduate programs are generally aimed at those pursuing a Ph.D., with the Master's degree awarded along the way. Exceptions are the standalone M.A. programs offered in the Department of English, the Department of European Languages and Literatures, and the Department of History. For current UCI undergraduate students, the School offers three 4+1 M.A. programs (B.A. and M.A. in five years) in Art History, Asian American Studies, and European Thought and Culture. In addition, the Department of English administers the M.F.A. Program in Writing (Fiction/Poetry).

The School of Humanities houses six graduate emphases that may be pursued in conjunction with study toward the doctorate: Asian American Studies, Critical Theory, Feminist Studies, Latin American Studies, Medical Humanities, and Visual Studies.

Graduate students participate in the affairs of the School of Humanities by serving as representatives on various departmental, schoolwide, and campuswide committees.

## Honors at Graduation

Campus criteria for honors at graduation are described in the section Honors Recognition. In addition to campus criteria, the School of Humanities uses cumulative GPA as the criterion for the awarding of Honors at Graduation. The official designation of Honors on the diploma and transcript will be based upon the candidate's cumulative GPA and total units completed at the end of the final quarter.

## Humanities Honors Program

### Nancy McLoughlin, Director

143 Humanities Instructional Building

949-824-5132; [www.humanities.uci.edu/undergrad/opportunities/honors.php](http://www.humanities.uci.edu/undergrad/opportunities/honors.php) (<http://www.humanities.uci.edu/undergrad/opportunities/honors.php>)

The Honors Program within the School of Humanities is a two-year, upper-division program designed to challenge exceptional students from all majors by providing special opportunities for intellectual growth in an interdisciplinary setting. Honors students benefit from small seminars, individual faculty attention, peer support, and the chance to pursue independent research. They think deeply about the meaning and value of humanistic inquiry and thus actively shape its future while honing their skills as thinkers, writers, and citizens of the world.

Humanities Honors students complete a two-part course of study. In their junior year, students take three quarters of an interdisciplinary Proseminar (HUMAN H120) organized around a single topic or problem, such as the borders of human life, crime and punishment, state and civil society, or vision, visions, visibility. The sequence is designed to compare and contrast modes of analysis and critical thinking in several disciplines in the Humanities, such as history, literary studies, and philosophy. In a small seminar setting, students are encouraged to become reflective about their own chosen disciplines.

In their senior year, students take a sequence of courses beginning in the fall with a Senior Honors Seminar (HUMAN H140), and continuing in the winter and spring with the Senior Honors Thesis (HUMAN H141) and the Senior Honors Colloquium (HUMAN H142W), in which they complete an independent research project under the direction of a faculty member on a topic chosen by the student. A prize is awarded for the year's outstanding thesis.

In both sequences, the Honors students benefit from their close association with exceptional scholars and the challenge and support of their intellectual peers.

Students interested in learning how the Humanities Honors Program will fit into their regular courses of study are encouraged to contact the Humanities Undergraduate Study Director; telephone 949-824-5132.

## Campuswide Honors Collegium

The Campuswide Honors Collegium is available to selected high-achieving students from all academic majors from their freshman through senior years. For more information contact the Campuswide Honors Collegium, 1200 Student Services II; 949-824-5461; [honors@uci.edu](mailto:honors@uci.edu); or visit the Campuswide Honors Collegium website (<http://honors.uci.edu/>).

## Humanities Out There (H.O.T.) Program

Humanities Center, Humanities Gateway 1st Floor  
949-824-1662

Humanities Out There is a community-based education collaboration between UCI's School of Humanities and local cultural institutions. In addition to working three hours a week in a museum-based setting where they provide afterschool learning assistance and instruction to local K-8 students from surrounding area schools, undergraduate students attend weekly seminars to learn about diverse theories and methodologies relating to teaching and learning. The H.O.T. Practicum is a wonderful opportunity to learn about community-based cultural programming and develop practical skills for future tutors, teachers, and other educators.

Requirements for undergraduates include attending weekly on-campus seminars and interning three hours each week at the Bowers Kidseum. All UCI students are eligible to enroll for 2 Units, P/NP in HUMAN 195.

## Dr. Samuel M. Jordan Center for Persian Studies and Culture

### Touraj Daryaei, Director

1118 Humanities Gateway

949-824-3638

<http://www.humanities.uci.edu/persianstudies/>

[sjalalip@uci.edu](mailto:sjalalip@uci.edu) (%20sjcps@uci.edu)

The Samuel Jordan Center for Persian Studies and Culture is devoted to the study of Iran and the Persianate world. Drawing on the strengths of the entire campus, the Center focuses on interdisciplinary research projects that bridge the arts, humanities, engineering, medicine, and the sciences. The Center sponsors events such as lectures, performances, and film screenings that draw a campus and community audience throughout the year.

Courses, including language, literature, history, art history, music, and culture at the undergraduate and graduate levels, are the backbone of the Center's academic and pedagogical mission. These academic courses are offered by affiliated faculty and administered by different units. The Humanities Language Learning Program offers courses on Persian language. Courses in ancient, medieval, and modern Persian history are administered by the Department of History. Courses on modern Persian literature and the literature of Iranian diaspora are offered through the Department of Comparative Literature. And courses on Persian music are housed within the Department of Music. A list of courses and information on the Persian Studies minor is available on the minor's website (<http://www.humanities.uci.edu/persianstudiesminor/>).

## Humanities Peer Mentor Program

The Humanities Peer Mentor Program is designed to address some of the academic, cultural, and social needs of freshmen in the School of Humanities. While all new Humanities freshmen will benefit from participation in the program, it is particularly useful for new first generation college students. It has a goal of developing leadership skills in both the mentors and the proteges/mentees. The program features two-tiered mentoring, with successful upper-division students mentoring small groups of new students, and the student mentors in turn working with faculty and staff. Another focus of the program is to encourage the student mentors to go on to graduate school.

Participants attend workshops on topics such as communication styles, study skills, procrastination and time management, and studying abroad, as well as take part in a variety of more social events. They also produce weekly journals in which they express their ideas and raise issues for their mentors. Call 949-824-5132 for additional information.

## Language Other than English Placement and Progression

The following policies apply to all UCI students taking language other than English courses.

**Language Other Than English Progression.** Within the beginning and intermediate language instructional sequences (1A-B-C and 2A-B-C, and for Latin and Greek, 1A-B-C and 100) students must earn a grade of at least C (or Pass) in order to advance to the next level of instruction, unless an exception is permitted by the appropriate course director and the Associate Dean of Humanities for Curriculum and Student Services. A student may not go back and take a lower-level course for credit once a more advanced level has been completed with a passing grade. Nor may a student be enrolled in more than one level of the same language at the same time (for example, a student may not enroll in language 2B and 2C concurrently).

**Language Other Than English Placement.** Placement tests are required for the following languages: Arabic, Armenian, Chinese, Hebrew, Japanese, Korean, Persian, Russian, Spanish, and Vietnamese. Contact the UCI Academic Testing Center for information; telephone 949-824-6207; email: [testcenter@uci.edu](mailto:testcenter@uci.edu) ([testoff@uci.edu](mailto:testoff@uci.edu)); or visit the Testing Center website (<http://www.testingcenter.uci.edu/>). Placement tests are recommended but not required for French and German language courses. The purpose of placement testing is to ensure success in UCI language courses.

For languages other than English which are not listed above (and for French and German if the placement test is not taken), students entering UCI with previous high school language training only are placed as follows: in general, one year of high school work is equated with one quarter of UCI work. Thus, students with one, two, three, or four years of high school language other than English will normally enroll in 1B-, 1C-, 2A-, or 2B-level language courses, respectively. Students who opt to "go back" one quarter will earn credit (i.e., a student with three years of high school language other than English may opt to take 1C instead of 2A). If it has been five or more years since the last high school course, the student may begin at 1A for credit. Exceptions must have the approval of the appropriate course director and the Associate Dean of Humanities for Curriculum and Student Services.

Students will not receive credit for repeating at UCI language other than English courses for which they received transfer credit from another institution, even if they are placed by testing into the equivalent of a previously taken course.

**Language Other Than English Advanced Placement Credit.** Students cannot earn units or grade points at UCI in courses from which they have been exempted on the basis of Advanced Placement credit. However, since Advanced Placement awards a maximum of 8 units for scores of 4 and 5, students may elect to take 2C or the equivalent for credit.

**Native Speakers of Languages Other Than English.** A native speaker of a language other than English is defined by the University as someone who attended the equivalent of secondary school in another country where the language of instruction was other than English. Students with prior background in a language other than English should consult the UCI Academic Testing Center to see if a placement test is available to demonstrate competence in that language. If an appropriate means of evaluating competence in a non-English language of instruction does not exist, satisfactory completion, with a C average or better, or equivalent, of one year of formal schooling at the 10th-grade level or higher in an institution where the language of instruction is not English will meet the School of Humanities Language Other Than English requirement equal to second-year language. Appropriate documentation and translation, when necessary, must be presented to substantiate that the course work was completed. For some majors offered by the School of Humanities, students may be exempted from taking third-year language study in that language. In this case, the student must *substitute* appropriate upper-division courses in the major to replace the number of exempted courses. For example, if a native speaker of Spanish is exempted from SPANISH 3 and/or SPANISH 3H, that student must replace the course with an upper-division Spanish course offered by the Department of Spanish and Portuguese.

**Repeating Deficient Foreign Language Other Than English Grades.** First- and second-year language other than English courses are sequential and each is prerequisite to the next. This is also true for third-year Chinese and Japanese courses. Students wishing to repeat a deficient grade in one of

these courses must repeat it *prior* to continuing on to the next level of the language. A student may not go back and retake a lower-level course for credit once a more advanced level has been completed with a passing grade.

## Study Abroad Center

The Study Abroad Center assists students in taking advantage of the many worldwide opportunities that exist for study, work, internship, volunteering, and research. School of Humanities majors and minors can benefit from a broader perspective of their fields by studying for one year at a university in such countries as China, France, Germany, Italy, Japan, Russia, Spain, or the United Kingdom. Visit the Study Abroad Program website (<http://www.studyabroad.uci.edu/>) or an academic counselor for additional information.

## Requirements for the Bachelor's Degree

**All students must meet the** University Requirements.

### School Requirements

1. Satisfactory completion of HUMAN 1A-HUMAN 1AS-HUMAN 1B-HUMAN 1BS-HUMAN 1C-HUMAN 1CS taken for letter grades in the freshman year.  
Transfer students in all majors in the School of Humanities may substitute for the Humanities Core appropriate course work as described on the School of Humanities website (<http://www.humanities.uci.edu/undergrad/academics/core.php>). No overlap is permitted between the Humanities Core substitution and a student's departmental/major requirements.
2. College-level course work equivalent to UCI's sixth quarter of study (2C level, or for Latin or Greek, one 103 and one 104, or two 103s or 104s) in a language other than English or equivalent competence. The final course must be taken for a letter grade and passed with a grade of C or better.  
NOTE: Please refer to the course listings in the *Catalogue* (<http://catalogue.uci.edu/allcourses/>) for information regarding required prerequisites for the 2C level language courses, or Latin or Greek 103 or 104.

Unless otherwise specified, courses taken to satisfy major, minor, and school requirements must be a minimum of 4 units each. Unless otherwise specified, no more than one independent or directed group study course may be petitioned toward major or minor requirements. Unless otherwise specified, all courses taken to satisfy major and school requirements must be taken for a letter grade.

Quarterly consultation with a faculty advisor is recommended.

**Maximum Overlap Between Major Requirements:** In fulfilling degree requirements for multiple majors, a maximum of two courses may overlap between any two majors.

**Maximum Overlap Between Major and Minor Requirements:** In fulfilling minor requirements, a maximum of two courses may overlap between a major and a minor. No course overlap is permitted between minors.

**Normal Progress in the Major:** School of Humanities majors are expected to take at least one course required for their major program each quarter as well as make progress toward the completion of the School's language other than English requirement.

**School Residence Requirement:** At least five upper-division courses required for each major must be completed successfully at UCI. Completion of a minor program is optional; however, for certification in a minor, at least four upper-division courses required for the minor must be completed successfully at UCI. See individual major and minor requirements for specific courses and how participation in the Education Abroad Program (EAP) can affect the residence requirement. Exceptions are considered on a case-by-case basis and decided in consultation between the appropriate department or faculty member and the Associate Dean of Humanities for Curriculum and Student Affairs.

**Internship Policy.** In most cases, Humanities students are not allowed to earn credit for off-campus internships. However, if a department or program determines that the internship is academically appropriate and promotes the student's academic goals, the student may take the internship as Independent Study and unit credit will be given. The sponsoring department or program and the instructor will in all cases require a substantial academic product, such as a paper, growing out of the internship.

A student who wishes to seek approval for an off-campus internship and earn course credit must file an Independent Study form with the department/program of the sponsoring faculty. A student who wishes to apply approved credit toward degree requirements, other than elective units, must also petition for approval from the Humanities Undergraduate Study Office, prior to beginning the internship.

UCI approved internship courses are applied to major requirements as specified by individual major requirements.

**Change of Major.** Students who wish to change their major to one offered by the School of Humanities should contact the Humanities Undergraduate Counseling Office for information about change-of-major requirements, procedures, and policies. Information is also available at the UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu/>).

## Academic English Courses

### **AC ENG 20A. Academic Writing. 5 Units.**

Grammar, sentence structure, paragraph and essay organization of formal written English.

Prerequisite: Placement into AC ENG 20A.

Grading Option: Pass/no pass only.

### **AC ENG 20B. Academic Writing. 5 Units.**

Grammar, sentence structure, paragraph and essay organization of formal written English.

Prerequisite: AC ENG 20A. Placement into AC ENG 20B is also accepted.

Grading Option: Pass/no pass only.

### **AC ENG 20C. Essentials of Academic Writing. 5 Units.**

Grammar, sentence structure, paragraph and essay organization of formal written English.

Prerequisite: AC ENG 20B. Placement into AC ENG 20C is also accepted.

Grading Option: Pass/no pass only.

### **AC ENG 20D. Academic Writing. 5 Units.**

Grammar, sentence structure, paragraph and essay organization of formal written English.

Prerequisite: AC ENG 20C

Grading Option: Pass/no pass only.

### **AC ENG 22A. Academic English Reading and Vocabulary. 2 Units.**

Intensive reading exercises with occasional practice in extensive reading, focusing on comprehension, development of vocabulary, syntax, rhetorical features, reading strategies, and study skills.

Prerequisite: Placement into AC ENG 22A is required.

### **AC ENG 22B. ESL Reading and Vocabulary. 2 Units.**

Extensive reading and discussion with emphasis on journal articles, textbook chapters, notetaking, and the interpretation of charts, diagrams, tables, and figures.

Grading Option: Pass/no pass only.

### **AC ENG 23A. ESL Pronunciation I. 2 Units.**

Designed for international graduate students. Provides an emphasis on pronunciation. Development of listening and speaking skills in five fundamental areas: pronunciation, intonation, word stress, listening comprehension, and informal campus communication. Presentations of personal experiences and reports on graphs.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

### **AC ENG 23B. ESL Conversation II. 2 Units.**

Designed for international graduate students. Provides an emphasis on conversational fluency. Further development of listening and speaking skills: review of English sounds, sentence stress, and rhythm. Oral reports, debates, and reports on graphs and surveys.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**AC ENG 23C. ESL Advanced Communication III. 2 Units.**

Designed for international graduate students with advanced communication skills. Further development of listening and speaking skills: review of minimal pairs, consonant blends, intonation, stress and rhythm. Oral presentations emphasized utilizing graphs, syllabi, academic terms, and video presentations on academic work.

Prerequisite: AC ENG 23A or AC ENG 23B

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**AC ENG 24. ESL International TA Workshop. 2 Units.**

Designed for advanced-level international students preparing to be teaching assistants. Provides extensive practice in oral and written communication skills associated with teaching introductory-level college courses and participating in academic presentations and discussions. Review and analysis of language problems.

Prerequisite: AC ENG 23A or AC ENG 23B or AC ENG 23C

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**AC ENG 28. Grammar. 2-4 Units.**

A full review of English grammar covering the following areas: grammar terms, verb tenses, verb forms, conditionals, passive and word forms, punctuation, sentence structure. The concepts are applied in targeted sentence and paragraph writing practice.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**AC ENG 29. Special Topics in ESL. 2 Units.**

Directed and individualized work in English as a second language not covered in the AC ENG 20, 21, 22 sequence.

Grading Option: Pass/no pass only.

Repeatability: Unlimited as topics vary.

**AC ENG 139W. Advanced Academic Writing Across the Curriculum. 4 Units.**

Designed for transfer students who speak English as a second language. Focuses on developing academic reading and writing skills including essay content, organization, vocabulary, and grammar. Academic content also covered.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Restricted to students whose first language is not English.

(Ib)

## African American Studies Courses

**AFAM 40A. African American Studies I. 4 Units.**

Discusses main contours of African American experience from the forced importation of Africans into the Americas in the late fifteenth century to the development of social movements in post-emancipation societies of the late nineteenth and twentieth centuries.

((III or IV) and VII ).

**AFAM 40B. African American Studies II. 4 Units.**

Introduction to the history of modern racial thinking in Western society and its relationship to the material contexts of racial oppression, with emphasis on its development in British colonies and U.S.

((III or IV) and VII ).

**AFAM 40C. African American Studies III. 4 Units.**

Introduction to theories of racial blackness in the modern world, with emphasis on developments in British colonies and U.S. Traces emergence of blackness as term of collective identity, social organization, and political mobilization.

((III or IV) and VII ).

**AFAM 50. Introductory Topics in African American Studies. 4 Units.**

Introduction to a broad range of topics in African American studies, exploring history, literature, art, culture, politics, and contemporary social issues. Topical organization of courses addresses issues that have been of importance historically and are reshaping the African diaspora today.

Repeatability: Unlimited as topics vary.

**AFAM 111A. Modern African American Art. 4 Units.**

Investigates the history of modern African American art; emphasis on the politics of representation. Examines art in a variety of media from material culture and textiles to painting and photography. Issues of migration, nationalism, gender, sexuality, and hybridity are discussed.

Same as AHIS 164A.

**AFAM 111B. Contemporary African American Art. 4 Units.**

Investigates the history of contemporary African American art; emphasis on the politics of representation. Explores art in a variety of media: painting, sculpture, photography, installation, and new media. Cultural politics, appropriation, identity, gender, sexuality, hybridity and civil rights issues discussed.

Same as AHIS 164B.

**AFAM 112A. Early African American Literature. 4 Units.**

Examines the earliest forms of black literary practices, including the jeremiad, the slave narrative, the pamphlet, poetry, the short story, and how these literary forms are related to the historical experiences of enslavement and emancipation.

Repeatability: Unlimited as topics vary.

**AFAM 112B. African American Literature 1900-Present. 4 Units.**

Examines individual literary forms and/or authors, as well as movements such as the Harlem Renaissance and the Black Arts Movement. Explores how black literary practices represent the conditions of modern subjectivities and environments.

Repeatability: Unlimited as topics vary.

**AFAM 113. African American Cinema and Media. 4 Units.**

Explores the diversity of Black creative production and the historical, social, and economic forces that shaped their emergence. May include Black film, hip-hop culture, fine art, photography, and others.

Repeatability: Unlimited as topics vary.

**AFAM 114. International Cultures. 4 Units.**

Explores the various cultures of the African diaspora and their impacts on a global scale. Examines a diverse range of media, including music (reggae, hip-hop), literature, film, and others and the links between culture and social movements throughout the diaspora.

Repeatability: Unlimited as topics vary.

**AFAM 115. Race and Visual Representation. 4 Units.**

Examines film, documentary, fine art, photography, and other visual media to explore the multiple ways in which ideas about race are projected and woven through the visual landscape and the impacts this has on perpetuating social inequalities.

Repeatability: Unlimited as topics vary.

**AFAM 117. Asian American and African American Relations. 4 Units.**

Addresses relationships of Asian American and African American communities in the United States. Topics include race, class, gender, labor, economic systems, political mobilization, community, civil rights, activism, cultural expression.

Same as HIST 152B, ASAM 167.

**AFAM 118. Topics in African American Humanities. 4 Units.**

Provides students with an opportunity to pursue advanced work in African American studies from one or more humanities approaches (literature, film and media studies, art history, and others).

Repeatability: Unlimited as topics vary.

**AFAM 125. African American Women in Art. 4 Units.**

Examines depictions of and by African American women in art and popular culture through a variety of media including textiles, painting, sculpture, photography, and installation. Focuses on African American women's experiences, perspectives, and strategies for contemporary representation.

Same as AHIS 164D.

**AFAM 128. Topics in Gender/Sexuality. 4 Units.**

Expressions of genders and sexualities across the spectrum of African American experience and creativity.

Repeatability: Unlimited as topics vary.

**AFAM 134A. Caribbean History: Colonization to Emancipation. 4 Units.**

Exploration of the history of the archipelago from pre-Columbian times to the end of slavery; examining the impact of European colonization, decimation of the indigenous populations, African slavery, resistance, and emancipation; the unity and diversity of experience in region.

Same as HIST 164A.

**AFAM 134B. Caribbean History: Emancipation to Independence. 4 Units.**

Post-emancipation and anti-colonial struggles ending with political independence for most of the region. Examines social, political, economic, cultural dimensions of post-emancipation period, including large-scale migration to Central America, the U.S., and Britain; the region's global cultural and political contribution.

Same as HIST 164B.

**AFAM 137. History of the African Diaspora. 4 Units.**

Examines the causes and consequences of the multiple diasporas of African peoples since the sixteenth century in the Atlantic world, especially the Americas and Europe.

Same as HIST 134E.

**AFAM 138. Topics in African American History. 4 Units.**

Studies in selected areas of African American history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as HIST 150.

**AFAM 143. Topics in African American Music. 4 Units.**

Examines African American musical forms and traditions, such as blues, jazz, and reggae, in performance and/or critical and theoretical contexts.

Repeatability: Unlimited as topics vary.

**AFAM 144. Topics in Expressive Forms. 4 Units.**

Examines various forms of aesthetic expression in the African diaspora, including dance, music, and the plastic arts, as well as artistic visions of black cyberspace, digital activism, film, video, and aesthetic conceptions of the future.

Repeatability: Unlimited as topics vary.

**AFAM 145. African Americans and Photography. 4 Units.**

Explores depictions of and by African Americans through photography. Examines the history of photography in relationship to African American culture through a variety of media from early daguerreotype processes to digital imagery.

Same as AHIS 164E.

**AFAM 151. Comparative Minority Politics. 4 Units.**

Examines the political experiences of Blacks, Latinos, and Asian Americans in the United States from roughly 1950 to the present. Focuses on how each group has pursued political empowerment via both conventional political channels and social movements.

Same as ASAM 132, CHLT 147, PLSC 124C.

**AFAM 152. African American Politics. 4 Units.**

Examines politics of African Americans in order to gain a broader perspective of the American political process. Major developments in African American politics (including the civil rights movement, Black presidential bids), continuing problem of racism, responsiveness of key governing institutions.

Same as PLSC 124E.

**AFAM 153. African American Psychology. 4 Units.**

Historical overview of the development of black psychology and the African American frame of reference. Topics include personality development, psychological assessment, issues in education, black mental health, and the role of the African American psychologist in the community.

Same as PSYC 174E.

**AFAM 154. African American Social Formations. 4 Units.**

Topics which promote critical investigation into the historical, political, and social formations associated with the Black Diaspora.

Repeatability: Unlimited as topics vary.

**AFAM 155. Intercultural Studies. 4 Units.**

Studies relationships between various cultural formations within the Black Diaspora and the exchange, amalgamations, and tensions between Black Diasporic formations and non-Black formations. Examines expressions of racialization as representation, adaption, and resistance.

Repeatability: Unlimited as topics vary.

**AFAM 156. African Societies and Politics. 4 Units.**

Examines the violent incorporation of Africa within European modernity. Places the discourse of Pan-Africanism, African Nationalisms, Negritude, African Marxism, and/or African Socialism in juxtaposition to the forces of capitalism, colonialism, and imperialism that restructure African history.

Repeatability: Unlimited as topics vary.

**AFAM 157. Critical Race Theory. 4 Units.**

Introduction to Critical Race Theory and key American cases on racial inequality. Using this literature, examines the possibilities and pitfalls of legal claims of race, gender, and sexuality discrimination in the age of colorblindness.

Same as CLS C178.

Restriction: Upper-division students only.

**AFAM 158. Topics in African American Social Sciences. 4 Units.**

Provides students with an opportunity to pursue advanced work in African American studies from one or more social science approaches (psychology, sociology, anthropology, economics, and others).

Repeatability: Unlimited as topics vary.

**AFAM 159. Prisons and Public Education. 4 Units.**

Looks at the connections between schools and prisons in the United States. Students learn about ideas that push beyond common trope of the "school to prison pipeline."

Same as ANTH 138.

**AFAM 162W. The Black Protest Tradition. 4 Units.**

History and discourses of the black protest tradition. Traces emergence of black protest against racial slavery and white supremacy from the early colonial period to present and the complex elaboration of identity politics within black communities in the twentieth century.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only.

**(Ib)**

**AFAM 163. Seminar in African American Studies. 4 Units.**

Explores theoretical and methodological issues in Black Studies via concentrated work on a specific ensemble of questions. Emphasis is on generating student responses to the material covered through oral and written reports.

Repeatability: Unlimited as topics vary.

**AFAM 198. Directed Group Study. 1-4 Units.**

Special topics through directed reading. Paper required.

Repeatability: May be taken for credit for 24 units.

**AFAM 199. Independent Study. 1-4 Units.**

Investigation of special topics through directed reading. Paper required.

Repeatability: May be repeated for credit unlimited times.

**AFAM 399. University Teaching. 4 Units.**

Limited to teaching assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Arabic Courses

**ARABIC 1A. Fundamentals of Arabic. 5 Units.**

Designed for students with little or no exposure to Arabic. Using real world texts, provides a firm foundation in the orthography, grammar, syntax, and vocabulary of Modern Standard Arabic. Introduces students to Arab world cultures.

Prerequisite: Placement into ARABIC 1A.

Overlaps with ARABIC S1AB.

Restriction: ARABIC 1A and ARABIC S1AB may not be taken for full credit.

**ARABIC 1B. Fundamentals of Arabic. 5 Units.**

Designed for students with little or no exposure to Arabic. Using real world texts, provides a firm foundation in the orthography, grammar, syntax, and vocabulary of Modern Standard Arabic. Introduces students to Arab world cultures.

Prerequisite: ARABIC 1A. ARABIC 1A with a grade of C or better. Placement into ARABIC 1B is also accepted.

Overlaps with ARABIC S1AB, ARABIC S1BC.

Restriction: ARABIC 1B and ARABIC S1AB and ARABIC S1BC may not be taken for full credit.

**ARABIC 1C. Fundamentals of Arabic. 5 Units.**

Designed for students with little or no exposure to Arabic. Using real world texts, provides a firm foundation in the orthography, grammar, syntax, and vocabulary of Modern Standard Arabic. Introduces students to Arab world cultures.

Prerequisite: ARABIC 1B or ARABIC S1AB. ARABIC 1B with a grade of C or better. ARABIC S1AB with a grade of C or better. Placement is also accepted.

Overlaps with ARABIC S1BC.

### (VI)

**ARABIC 2A. Intermediate Arabic Language and Culture. 4 Units.**

Designed for students to advance their Arabic language skills to intermediate level. Students will develop their understanding of grammar and syntax to a more sophisticated level. Facilitates intermediate-level reading, writing, and speaking skills. Fosters college-level cultural literacy.

Prerequisite: ARABIC 1C or ARABIC S1BC. ARABIC 1C with a grade of C or better. ARABIC S1BC with a grade of C or better. Placement into ARABIC 2A is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

### (VIII)

**ARABIC 2B. Intermediate Arabic Language and Culture. 4 Units.**

Designed for students to advance their Arabic language skills to intermediate level. Students will develop their understanding of grammar and syntax to a more sophisticated level. Facilitates intermediate-level reading, writing, and speaking skills. Fosters college-level cultural literacy.

Prerequisite: ARABIC 2A. ARABIC 2A with a grade of C or better. Placement into ARABIC 2B is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

### (VIII)

**ARABIC 2C. Intermediate Arabic Language and Culture. 4 Units.**

Designed for students to advance their Arabic language skills to intermediate level. Students will develop their understanding of grammar and syntax to a more sophisticated level. Facilitates intermediate-level reading, writing, and speaking skills. Fosters college-level cultural literacy.

Prerequisite: ARABIC 2B. ARABIC 2B with a grade of C or better. Placement into ARABIC 2C is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)**

**ARABIC 10A. Arabic Peer-to-Peer Language Mentor Program. 1 Unit.**

Peer-to-Peer Language Mentor Program in which student mentors work with student mentees to increase the language skills of both participants. One hour weekly meetings. ARABIC 10A is for language mentors.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**ARABIC 10B. Arabic Peer-to-Peer Language Mentor Program. 1 Unit.**

Peer-to-Peer Language Mentor Program in which student mentors work with student mentees to increase the language skills of both participants. One hour weekly meetings. ARABIC 10B is for language mentees.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**ARABIC 51. Introduction to the Koran. 4 Units.**

An introduction to understanding the Koran and its significance to Muslim life, culture, and history. An overview of scholarly traditions related to the Koran, and its critics. Close readings of the Koran in English translation.

**(IV, VIII)**

**ARABIC 199. Independent Study. 4 Units.**

Research paper required.

Repeatability: May be repeated for credit unlimited times.

## Armenian Courses

**ARMN 1A. Elementary Armenian. 5 Units.**

Written and conversational Armenian for students with no knowledge of the language. Students learn the Armenian alphabet, read and comprehend simple texts, and carry basic conversation. Emphasis on reading and comprehension, grammar rules, and basic composition.

Prerequisite: Placement into ARMN 1A.

**ARMN 1B. Elementary Armenian. 5 Units.**

Continues development of the fundamentals of Armenian, including comprehension, reading of simple texts, basic conversation, and writing with a fair degree of grammatical correctness. Students learn basic reading, writing, and sentence structure through lectures, games, and assignments.

Prerequisite: ARMN 1A. ARMN 1A with a grade of C or better. Placement into ARMN 1B is also accepted.

**ARMN 1C. Elementary Armenian. 5 Units.**

Focus on building grammatical knowledge of the Armenian language and developing skills in reading, writing, listening, and speaking. Includes a strong emphasis on expanding vocabulary and developing oral proficiency in higher/formal registers.

Prerequisite: ARMN 1B. ARMN 1B with a grade of C or better. Placement into ARMN 1C is also accepted.

**(VI)**

**ARMN 2A. Intermediate Armenian. 4 Units.**

Designed to develop students' ability to communicate further orally and in writing in Armenian (Western or Eastern) by consolidating knowledge of grammar, increasing vocabulary, and developing reading, comprehension, and writing.

Prerequisite: ARMN 1C. ARMN 1C with a grade of C or better. Placement into ARMN 2A is also accepted.

**(VIII)**

**ARMN 2B. Intermediate Armenian. 4 Units.**

Designed to develop students' ability to communicate further orally and in writing in Armenian (Western or Eastern) by consolidating knowledge of grammar, increasing vocabulary, and developing reading, comprehension, and writing.

Prerequisite: ARMN 2A. ARMN 2A with a grade of C or better. Placement into ARMN 2B is also accepted.

(VIII)

**ARMN 2C. Intermediate Armenian. 4 Units.**

Designed to develop students' ability to communicate further orally and in writing in Armenian (Western or Eastern) by consolidating knowledge of grammar, increasing vocabulary, and developing reading, comprehension, and writing.

Prerequisite: ARMN 2B. ARMN 2B with a grade of C or better. Placement into ARMN 2C is also accepted.

(VIII)

## Art History Courses

**ART HIS 40A. Ancient Greek and Roman Art, and Architecture. 4 Units.**

An overview of Greek and Roman art, and related ancient visual cultures. Considers how and why the peoples of antiquity created art and architecture, as well as the significance of these works within their social, religious, and historical contexts.

(IV and VIII ).

**ART HIS 40B. Arts of Europe: Medieval and Renaissance. 4 Units.**

Focuses on the art of the Mediterranean area and Europe between ca. A.D. 350 and 1600. By means of movements and artists, examines the cultural identities of the Christian, Islamic, and Early Modern worlds.

(IV, VIII)

**ART HIS 40C. Early Modern and Modern Art in Europe and America. 4 Units.**

The visual arts from the seventeenth to the twenty-first centuries. Explores the purposes and meaning of painting, sculpture, and architecture in relation to artists, viewers, and historical events.

(IV, VIII)

**ART HIS 42A. History of Asian Art: Arts of India. 4 Units.**

Emphasizing Hindu, Buddhist, and Islamic art of greater India (Pakistan, Bangladesh, Sri Lanka) from proto-historic to modern times. Themes include art as a source of history, commercial and religious pan-Asian connections, nationalism, and modern versus historical identities.

(IV, VIII)

**ART HIS 42B. History of Asian Art: Arts of China. 4 Units.**

An introduction to the arts and visual culture of China from Neolithic to modern times. Themes includes the representation of power, death and the afterlife, popular culture and elite arts, landscape and women's painting, and concludes with contemporary China.

(IV, VIII)

**ART HIS 42C. History of Asian Art: Arts of Japan. 4 Units.**

Examines compelling images and objects of spirit and power created in Japan over many centuries. Themes include Buddhist icons, narrative illustration, popular prints, architecture, manga, and the avant-garde. Japanese interactions with Korean, Chinese, and European culture are emphasized.

(IV, VIII)

**ART HIS 42D. History of Asian Art: Arts of Islam. 4 Units.**

Examines past and present Islamic art, spanning 1,500 years and extending from the Americas through Indonesia. Themes include Islam as a globalizing force, the definition of 'Islamic,' and the competing roles of religion and politics in making art.

(IV, VIII)

**ART HIS 42E. Art and Archaeology of Ancient Persia, Egypt, and Mesopotamia. 4 Units.**

An introduction to the art and archaeology of ancient Egypt, Mesopotamia, Anatolia, Persia, and the wider Iranian world from the Neolithic to the coming of Islam. Considers wider impact on the ancient and early medieval worlds and their present legacy.

(IV and VIII ).

**ART HIS 44. Image Collision: A Multicultural Approach to Images and Their Users. 4 Units.**

Comparisons between present-day visual culture and pre-modern art to re-evaluate the ways in which one understands the contemporary histories of underrepresented groups in the United States.

(IV and VII ).

**ART HIS 55. Disneyland. 5 Units.**

From Dole Whips to roller coasters, the focus is on the innovations in industrial automation and manufacturing that made Disneyland's attractions possible. Discusses fandom, guest experiences, operating procedures, technical and design patents, and how rides work.

(II and IV ).

**ART HIS 100. Studies in Ancient Art . 4 Units.**

Topics in Egyptian, Prehistoric, and Etruscan art of the Mediterranean area treated with specific reference to relevant cultural and historical settings. Specialized courses in Greek and Roman art are also taught.

Repeatability: Unlimited as topics vary.

**ART HIS 103. Studies in Greek Art. 4 Units.**

Topics in Greek art, architecture, and topography from the Prehistoric period through the end of the fourth century B.C.E.

Repeatability: Unlimited as topics vary.

**ART HIS 107. Studies in Roman Art. 4 Units.**

Topics in Hellenistic and Roman art and architecture; stresses historical and political background.

Repeatability: Unlimited as topics vary.

**ART HIS 110. Studies in Medieval Art. 4 Units.**

Specialized topics in Medieval art and architecture in Europe, the Mediterranean area, and the Near East between the fourth and fifteenth centuries. Examples: the Art of the Migration Period, Medieval City.

Repeatability: Unlimited as topics vary.

**ART HIS 111B. Byzantine Art: 650-1450. 4 Units.**

Studies in the development of the art and architecture of the Byzantine Empire between ca. 650 and 1450.

**ART HIS 112. Studies in Early Christian and Byzantine Art. 4 Units.**

Selected topics on the development of the art and architecture of the Later Roman and Byzantine Empires between ca. 300 and 1453. Examples: Early Christian architecture, Byzantine painting.

Repeatability: Unlimited as topics vary.

**ART HIS 114. Studies in Western Medieval Art. 4 Units.**

Selected topics on the development of art and architecture in Western Europe between ca. 700 and 1400. Examples: Romanesque painting, Gothic architecture.

Repeatability: Unlimited as topics vary.

**ART HIS 120. Studies in Renaissance and Baroque Art. 4 Units.**

Selected topics on the art and architecture of Europe between the fifteenth and eighteenth centuries. Examples: Renaissance and Baroque prints, Bruegel to Rubens.

Repeatability: Unlimited as topics vary.

**ART HIS 121. Studies in Southern Renaissance Art. 4 Units.**

Selected topics determined by individual faculty members exploring historical developments and individual artists of the fifteenth and sixteenth centuries in Italy and Spain. Examples: Renaissance Venice, Age of Michelangelo.

Repeatability: Unlimited as topics vary.

**ART HIS 123. Studies in Northern Renaissance Art. 4 Units.**

Selected topics determined by individual faculty members exploring historical developments and individual artists of the fifteenth and sixteenth centuries in Northern Europe. Examples: Late Medieval art, painting from Van Eyck to Bosch.

Repeatability: Unlimited as topics vary.

**ART HIS 125. Studies in Southern Baroque Art. 4 Units.**

Selected topics determined by individual faculty members exploring historical developments and individual artists of the seventeenth and eighteenth centuries in Italy and Spain. Example: Rome in the seventeenth century.

Repeatability: Unlimited as topics vary.

**ART HIS 128. Studies in Northern Baroque Art. 4 Units.**

Selected topics determined by individual faculty members exploring historical developments and individual artists of the seventeenth and eighteenth centuries in Northern Europe. Example: the Age of Rembrandt.

Repeatability: Unlimited as topics vary.

**ART HIS 134C. Modern European Art: From Impressionism to the Fauves. 4 Units.**

History of European painting and urban transformation from 1851 to 1907, when Paris stood strong as the unquestioned cultural capital of the nineteenth century.

**ART HIS 134D. Modern European Art: From Cubism to Surrealism. 4 Units.**

History of European painting, sculpture, and design from 1907 to 1940, when Paris and painting lost their dominance as other cultural centers and other media claimed renewed importance.

**ART HIS 134E. Topics in Modern European Art. 4 Units.**

Selected topics within the period 1643 to 1940.

Repeatability: Unlimited as topics vary.

**ART HIS 140A. History of Contemporary Art. 4 Units.**

Selected topics exploring historical developments of contemporary art from 1945 to the present. Examples: American Art 1945-1989, European Art 1945-1989, Art After 1989. Works of art are studied as cultural, social, and political practices.

Repeatability: Unlimited as topics vary.

**ART HIS 140B. Topics in Contemporary Art. 4 Units.**

Selected topics exploring artistic movements, artists, and/or issues in contemporary art from 1945 to the present. Examples include Junk Art, Countercultures, Art and Politics Now. Works of art are studied as cultural, social, and political practices.

Repeatability: Unlimited as topics vary.

**ART HIS 145A. Studies in Modern Architecture. 4 Units.**

Architecture and related design practices from the late eighteenth century through 1945 are studied in relation to social, aesthetic, technological, and political questions.

Repeatability: Unlimited as topics vary.

**ART HIS 145B. Studies in Architecture after 1945. 4 Units.**

Architecture and related design practices from 1945 through present are studied in relation to social, aesthetic, technological, and political questions.

Repeatability: Unlimited as topics vary.

**ART HIS 145C. Topics in the History of Modern and Contemporary Architecture. 4 Units.**

Varying topics from the late eighteenth century to the present. Architecture and related design practices are studied in relation to social, aesthetic, technological, and political questions.

Repeatability: Unlimited as topics vary.

**ART HIS 150. Studies in Asian Art. 4 Units.**

Topics include visual studies in China, Japan, Korea and India.

Repeatability: Unlimited as topics vary.

**ART HIS 151B. Later Imperial China. 4 Units.**

Investigates the uses, subjects, styles, and social contexts of art made in the later Imperial dynasties, whether court art, religious art, women's painting, scholar painting, or art for the market.

**ART HIS 151C. Modern China. 4 Units.**

Examines the evolution and media of Chinese art and visual culture in the context of modern China's sweeping historical, social, and political changes.

**ART HIS 155A. Ancient India. 4 Units.**

Examines the visual and religious history of the region defined as 'India' today, but necessarily encompassing modern Bangladesh and Pakistan. Culminates with the supposed Golden Age of the Gupta empire and its far-reaching legacies.

Same as HISTORY 170A, REL STD 122.

Concurrent with ART HIS 255A.

**ART HIS 155B. Medieval India. 4 Units.**

Begins with the Gupta period's aesthetic legacies in South Asia's architecture, sculpture, and painting. Explores the dispersal of Islam throughout South Asia, including the Muslim communities of southern India.

Same as HISTORY 170B, REL STD 123.

Concurrent with ART HIS 255B.

**ART HIS 155C. Modern India. 4 Units.**

Examines the imperial patronage of the Mughal emperors, covering their territorial holdings extending from Afghanistan through western Bangladesh. Continues with the 'aftermath' of the Mughal empire and the rise of British commercialism and colonialism.

**ART HIS 155D. Topics in the Art and Architecture of India. 4 Units.**

Studies in selected areas of Art and Architecture of India. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**ART HIS 156. Art and Globalization, Modern. 4 Units.**

Study of modern art as a cause and expression of increasing contacts between cultures. Focusing on regions in Asia and the Americas, adoption of European oil painting, indigenous art movements, and national capital architecture are explored.

**ART HIS 162C. Contemporary Japan. 4 Units.**

Study of various media of Japanese art from the time of war defeat in 1945 until the present. Topics include artists' responses to the nuclear bomb, the aesthetics of the 'economic miracle,' avant-garde groups, manga, and innovations in architecture.

**ART HIS 163. Asian American Art, Contemporary. 4 Units.**

Study of the Asian American experience in contemporary art and visual culture. Art by Asian Americans of diverse backgrounds as well as the history of visualization of Asian identities in American art/visual culture.

**ART HIS 164A. Modern African American Art. 4 Units.**

Investigates the history of modern African American art; emphasis on the politics of representation. Examines art in a variety of media from material culture and textiles to painting and photography. Issues of migration, nationalism, gender, sexuality, and hybridity are discussed.

Same as AFAM 111A.

**ART HIS 164B. Contemporary African American Art. 4 Units.**

Investigates the history of contemporary African American art; emphasis on the politics of representation. Explores art in a variety of media: painting, sculpture, photography, installation, and new media. Cultural politics, appropriation, identity, gender, sexuality, hybridity and civil rights issues discussed.

Same as AFAM 111B.

**ART HIS 164D. African American Women in Art. 4 Units.**

Examines depictions of and by African American women in art and popular culture through a variety of media including textiles, painting, sculpture, photography, and installation. Focuses on African American women's experiences, perspectives, and strategies for contemporary representation.

Same as AFAM 125.

**ART HIS 164E. African Americans and Photography. 4 Units.**

Explores depictions of and by African Americans through photography. Examines the history of photography in relationship to African American culture through a variety of media from early daguerreotype processes to digital imagery.

Same as AFAM 145.

**ART HIS 165A. Early American Art. 4 Units.**

An examination of American visual culture from 1620 to 1860 from the era of European exploration and colonization of the New World to the beginning of the Civil War.

**ART HIS 165B. Nineteenth Century American Art. 4 Units.**

An exploration of American visual culture from 1860 to 1900, including paintings, sculpture, and photographs produced during the Civil War and during the decades of prosperity that followed.

**ART HIS 165C. Modern American Art. 4 Units.**

Focusing on the period from 1900 until 1965, this course considers the emergence and institutionalization of modern art in the United States.

**ART HIS 165D. Topics in American Art. 4 Units.**

Varying topics within the period 1620 to 1970. Works of art are studied in their cultural, social, and political contexts.

Repeatability: Unlimited as topics vary.

**ART HIS 180. Topics in the Criticism of Art. 4 Units.**

Selected topics discussed on the theoretical and/or practical dimensions of art historical criticism.

Repeatability: Unlimited as topics vary.

**ART HIS 181. Topics in Museum Studies. 4 Units.**

Addresses the historical and contemporary function of the museum as an instructional device. The function of exhibitions in the public sphere, and the roles of curators, educators, and the public are analyzed.

Repeatability: Unlimited as topics vary.

**ART HIS 183B. 20th Century Photographic History. 4 Units.**

Varying topics within the history of photography in the 20th century. Photographic practice studied in relation to art history, cultural history, and social history.

Repeatability: Unlimited as topics vary.

**ART HIS 183C. Selected Topics in Photographic History. 4 Units.**

Varying topics within the history of photography from the early 19th century to the present. Photographic practice studied in relation to art history, cultural history, and social history. Examples include documentary; pictorialism and art photography; photomontage, photographic books.

Repeatability: Unlimited as topics vary.

**ART HIS 185. Topics in Visual Studies. 4 Units.**

Interdisciplinary topics on the cultural analysis of visual artifacts and practices.

Repeatability: Unlimited as topics vary.

**ART HIS 190W. Art History Methods. 4 Units.**

Theory and practice of art history, with an emphasis on formal and social models of analyzing and writing about art.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Art History Majors only.

(Ib)

**ART HIS 196. Ethics, Law, and Art. 4 Units.**

Addresses a broad range of ethical and legal issues pertaining to art, ownership, looting and theft, museum policies, and cultural heritage.

Concurrent with ART HIS 296.

**ART HIS 198. Advanced Seminar: Topics in Art History. 4 Units.**

Discussion and report-oriented seminar with emphasis on reading, writing, and thinking about problems in art history. Examples: Gothic Cathedral, Portraiture East and West.

Prerequisite: Recommended: ART HIS 190W.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only. Art History Majors have first consideration for enrollment.

Concurrent with ART HIS 298.

**ART HIS 199. Independent Study in Art History. 1-4 Units.**

Supervised, but independent reading or research on art historical topics.

Repeatability: May be taken for credit 4 times.

Restriction: Art History Majors only.

**ART HIS 255A. Ancient India. 4 Units.**

Examines the visual and religious history of the region defined as 'India' today, but necessarily encompassing modern Bangladesh and Pakistan. Culminates with the supposed Golden Age of the Gupta empire and its far-reaching legacies.

Same as IRAN 255A.

Restriction: Graduate students only.

Concurrent with ART HIS 155A.

**ART HIS 255B. Medieval India. 4 Units.**

Begins with the Gupta period's aesthetic legacies in South Asia's architecture, sculpture, and painting. Explores the dispersal of Islam throughout South Asia, including the Muslim communities of southern India.

Same as IRAN 255B.

Restriction: Graduate students only.

Concurrent with ART HIS 155B.

**ART HIS 296. Ethics, Law, and Art. 4 Units.**

Addresses a broad range of ethical and legal issues pertaining to art, ownership, looting and theft, museum policies, and cultural heritage.

Prerequisite: Background in Art History or Legal Studies.

Same as IRAN 296.

Concurrent with ART HIS 196.

**ART HIS 298. Master's Seminar: Topics in Art History. 4 Units.**

Studies in selected areas of Art History. Examples include Gothic Cathedral, Portraiture East and West.

Repeatability: Unlimited as topics vary.

Concurrent with ART HIS 198.

**ART HIS 299. Master's Thesis Research. 4 Units.**

Research and writing of the Master's thesis.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ART HIS 399. University Teaching. 4 Units.**

Limited to teaching assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Asian American Studies Courses

### **ASIANAM 50. Asian American Histories. 4 Units.**

Examines and compares diverse experiences of major Asian American groups since the mid-nineteenth century. Topics include origins of emigration; the formation and transformation of community; gender and family life; changing roles of Asian Americans in American society. Formerly ASIANAM 60A.

Same as HISTORY 15C, SOC SCI 78A.

((III or IV) and VII ).

### **ASIANAM 51. The U.S. and Asia. 4 Units.**

Explores the historical and contemporary transnational linkages between the U.S. and regions in Asia and their resultant flows of people, goods, and ideas. Attention given to the role of militarism and processes of globalization, and the histories of cultural contact/conflict.

((III or IV) and VIII ).

### **ASIANAM 52. Asian American Communities. 4 Units.**

Examines the renewal of Asian immigration following World War II. Explores contemporary Asian American populations and communities in the U.S., and the impact of contemporary Asian immigration on the U.S. political economy and social order.

Same as SOC SCI 78B.

(III, VII)

### **ASIANAM 53. Asian Americans and Race . 4 Units.**

Analyzes the Asian American experience in comparative perspective, which includes comparisons of different ethnic and racial groups, and across gender and class. Possible topics include labor, economy, politics, migration, nation, popular culture, gender, family, sexuality, and multiraciality.

Same as SOC SCI 78C.

(III, VII)

### **ASIANAM 54. Asian American Stories. 4 Units.**

Examines stories from Asian American communities through literary texts and other media. Selected themes may include the following: dislocation/relocation, finding/inventing a usable past, poetics/politics in language, identities/ethnicities.

(IV, VII)

### **ASIANAM 55. Asian Americans and the Media. 4 Units.**

Investigates popular representations of and cultural productions by Asian Pacific Americans and Asians in the Americas from the late-nineteenth century to the present. Cultural media may include political cartoons, film/television, popular music, visual art, blogs/Web sites, and performance.

(IV, VII)

### **ASIANAM 100W. Research Methodologies for Asian American Studies. 4 Units.**

Explores various research methodologies for Asian American Studies combining theoretical knowledge with field research. Goals: conduct field research about immigrants and refugees from Asia. Topics vary: migration and labor, assimilation and cultural preservation, cultural expressions in the diaspora.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

### **ASIANAM 110. Asian American Writers. 4 Units.**

Literary analysis of Asian American writers' representations of issues of identity, class, history among others. Variety of literary forms—novel, poem, drama, essay—included in a study of a variety of Asian American ethnic groups.

Repeatability: Unlimited as topics vary.

### **ASIANAM 111. Asian American History. 4 Units.**

Introduction to important themes in the history of people of Asian ancestry in the United States from the nineteenth century to the present.

Repeatability: Unlimited as topics vary.

### **ASIANAM 112. Asian American Art History. 4 Units.**

Investigation of Asian American experience expressed by art and visual culture throughout the twentieth century. Art by Asian Americans of diverse backgrounds as well as the history of cultural visualization of Asian identities in American art/visual culture.

Repeatability: Unlimited as topics vary.

**ASIANAM 114. Asian American Film and Video. 4 Units.**

Topics include histories of Asian American film and video, including documentaries, experimental, short subjects, feature-length independent film, and other forms of cinematic expression. Explores issues of identity (national, racial, gendered, among others).

Repeatability: Unlimited as topics vary.

**ASIANAM 116. Asian Americans and Popular Culture. 4 Units.**

Focuses on Asian Americans' relationship to popular culture as both producers and consumers. Topics include consumer cultures and subcultures, cyberspace and public space, popular music, indie comics and other print media.

Repeatability: Unlimited as topics vary.

**ASIANAM 130. Undocumented Immigrant Experiences. 4 Units.**

Examines the experiences of undocumented immigrants and the policies that structure their educational, economic, social, and political participation.

Same as CHC/LAT 164A, CRM/LAW C187, SOCIOL 177C.

(III and VII ).

**ASIANAM 132. Comparative Minority Politics. 4 Units.**

Examines the political experiences of Blacks, Latinos, and Asian Americans in the United States from roughly 1950 to the present. Focuses on how each group has pursued political empowerment via both conventional political channels and social movements.

Same as AFAM 151, CHC/LAT 147, POL SCI 124C.

**ASIANAM 137. Asian American Labor. 4 Units.**

Explores history of Asian Americans and work from the nineteenth century to the present. Areas of study include migration, colonialism, family, social organization, and work culture.

Same as HISTORY 152A.

**ASIANAM 138. Race and Urban Space. 4 Units.**

Examines how ethnic and racial processes shape and structure interactions in urban settings, such as schools, housing, employment, and public spaces, with attention to the international impact of globalization and postcolonial forces.

**ASIANAM 142. Islam in America. 4 Units.**

Offers a critical academic study of Islam in America, focusing on the core tenets of belief, the diversity of practices, and historical transformations that have taken place since the arrival of Muslims in the United States.

Same as ANTHRO 125Z.

**ASIANAM 143. Religious Traditions of Asian Americans. 4 Units.**

Studies the religious traditions of Asian Americans, focusing on the transplantation of religious institutions, establishment of sacred spaces, celebration of religious holidays, socialization of children, as well as birth, marriage, gender relations, death, family.

Same as SOCIOL 136.

**ASIANAM 144. The Politics of Protest. 4 Units.**

Examines the Civil Rights, Black Power, and women's movements in relationship to the Asian American movement. Uses social movement theories to illuminate the cases, and the cases to critique and revise the theories.

Same as POL SCI 124A.

(VII)

**ASIANAM 150. Special Topics in Asian American Studies. 4 Units.**

Analyzes a variety of themes in Asian American Studies—identity, history, culture—from various interdisciplinary perspectives in humanities, arts, social sciences.

Repeatability: Unlimited as topics vary.

**ASIANAM 151C. Korean American Studies. 4 Units.**

Explores the factors that have distinctly shaped the Korean American experience, including patterns of racial domination, the profile of immigrant flow, immigrant roles in the urban political economy, politics in Korea, and the role of the church.

Same as SOC SCI 178C.

**ASIANAM 151D. Vietnamese American Studies. 4 Units.**

Studies the resettlement of Vietnamese in the United States following their exodus from Southeast Asia. Topics include the Vietnam War, the 1975 evacuation, boat and land refugees, the shaping of Vietnamese communities, and Vietnamese American literature.

Same as SOC SCI 178D.

**ASIANAM 151E. Japanese American Studies. 4 Units.**

Studies the settlement of Japanese in Hawaii and the continental United States since the late 19th century. Topics include sugar plantations, development of rural Japanese America, World War II internment, post-War community development, and persistence of Japanese American identity.

Same as SOC SCI 178E.

**ASIANAM 151F. South Asian American Studies. 4 Units.**

Examines and compares the experiences of South Asian immigrants in the U.S. over time. Looks at the economic, political, and social positions of the immigrants, with special emphasis on religious changes and the changes in the second and later generations.

Same as SOC SCI 178F.

Restriction: Asian American Studies Majors have first consideration for enrollment. Social Policy/Public Service Majors have first consideration for enrollment.

**ASIANAM 151H. Southeast Asian American Studies. 4 Units.**

Analyzes experiences of refugees and immigrants from Southeast Asia, which may include those from Cambodia, Laos, Vietnam, and the Philippines. Examines political and economic factors for their exodus and how they reconstruct their identities, histories, and communities.

Same as SOC SCI 178H.

**ASIANAM 151J. Chinese American Studies. 4 Units.**

Analyzes the experiences of Chinese in the United States. Immigration, Chinese exclusion, racial and gender identity. Historical overview and contemporary issues covered.

Same as SOC SCI 178J.

**ASIANAM 151K. Filipina/Filipino American Studies. 4 Units.**

Explores the experience of Filipina/Filipino Americans from the era of Spanish colonization of the Philippines to present-day community formations in the United States, with special emphasis on the 20th century. Topics include colonialism, nation, migration, gender, and culture.

Same as SOC SCI 178K.

**ASIANAM 162. Asian American Women. 4 Units.**

Examines the representations and experiences of Asian American women from diverse perspectives. Explores the commonalities and differences among various groups of Asian American women, with particular focus on history, culture, values, and family roles.

Same as SOC SCI 177B.

**ASIANAM 164. Topics in Intersectionality. 4 Units.**

Topics include intersectional analysis of various themes related to ethnicity, gender, sexuality, and race within Asian American communities.

Repeatability: Unlimited as topics vary.

**ASIANAM 166. Race and Citizenship. 4 Units.**

Explores historical and contemporary patterns of racialization in relation to citizenship. Topics may include racial categorization, immigration, and comparative racialization.

**ASIANAM 167. Asian American and African American Relations. 4 Units.**

Addresses relationships of Asian American and African American communities in the United States. Topics include race, class, gender, labor, economic systems, political mobilization, community, civil rights, activism, cultural expression.

Same as AFAM 117, HISTORY 152B.

**ASIANAM 168. Politics of Animal Rights. 4 Units.**

Examines animal rights/welfare movement's efforts to transform moral, practical, and legal standing of nonhuman animals in contemporary U.S. Explores intersection of racism, sexism, and speciesism informed by theories of race and ethnicity, including Asian American Studies.

Same as POL SCI 126F.

Restriction: Political Science Majors have first consideration for enrollment. Asian American Studies Majors have first consideration for enrollment.

**ASIANAM 199. Independent Study. 1-4 Units.**

Directed reading and research in consultation with a faculty member. Substantial written work required.

Repeatability: May be repeated for credit unlimited times.

**ASIANAM 200A. Theory and Methods in Asian American Studies. 4 Units.**

Introduction to the intersection of the social sciences, humanities, and other fields that constitute the theory and methodology of Asian American Studies. Focuses on the interventions and contestations within Asian American Studies that have transformed the discipline in recent years.

Restriction: Graduate students only.

**ASIANAM 200B. Contemporary Issues in Asian American Studies. 4 Units.**

Examines the interrelations between history, theory, and race in the aftermath of the twentieth-century decolonial movements, offering an account of race through postcolonial and postnationalist approaches in comparative contexts. Considers the interventions made by transnational feminist and racialized queer critiques.

Restriction: Graduate students only.

**ASIANAM 200C. Leadership and Social Change in Asian American Communities. 4 Units.**

Introduces students to models of community-engaged learning and leadership that are central to the field of Asian American studies. Designed to expose students to histories and models of organizing in Asian American communities and forms of community-based research.

Restriction: Graduate students only.

**ASIANAM 200D. Introduction to Asian American Studies Research. 4 Units.**

Introduces students to research topics and methods within the field of Asian American studies. Aims to expose students to core and affiliated faculty to help them identify possible advisors for master's research projects or members of doctoral committees.

Restriction: Graduate students only.

**ASIANAM 201. Graduate Topics in Asian American Studies. 4 Units.**

Seminars on various topics in Asian American Studies.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ASIANAM 250. Advanced Topics in Asian American Studies. 4 Units.**

Seminar covering various areas of research within Asian American Studies as an interdisciplinary field. Recommended for advanced graduate students.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ASIANAM 290. Directed Research. 4-12 Units.**

Directed graduate study/research in Asian American Studies.

Repeatability: May be taken for credit for 24 units.

Restriction: Graduate students only.

**ASIANAM 291. Directed Reading. 4 Units.**

Readings focused on specialized topics in consultation with, and with the consent of, a faculty member.

Repeatability: May be taken for credit for 12 units.

Restriction: Graduate students only.

**ASIANAM 399. University Teaching. 4 Units.**

Limited to teaching assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Emphasis in Asian American Studies graduate students only.

## Chinese Courses

### **CHINESE 1A. Fundamental Mandarin Chinese. 5 Units.**

Natural approach emphasizing four fundamental skills: listening, speaking, reading and writing. Specifically designed for students with no previous experience in any dialect of Chinese. Conducted in Mandarin Chinese using the Pinyin system of Romanization, traditional and simplified Chinese characters.

Prerequisite: Placement into CHINESE 1A is also accepted.

Overlaps with CHINESE S1AB, CHINESE 1MA, CHINESE 1DA.

Restriction: CHINESE 1A and CHINESE 1DA and CHINESE 1MA and CHINESE S1AB may not be taken for full credit.

### **CHINESE 1B. Fundamental Mandarin Chinese. 5 Units.**

Natural approach emphasizing four fundamental skills: listening, speaking, reading and writing. Specifically designed for students with no previous experience in any dialect of Chinese. Conducted in Mandarin Chinese using the Pinyin system of Romanization, traditional and simplified Chinese characters.

Prerequisite: CHINESE 1A. CHINESE 1A with a grade of C or better. Placement into CHINESE 1B is also accepted.

Overlaps with CHINESE S1AB, CHINESE S1BC, CHINESE 1MB, CHINESE 1DB.

Restriction: CHINESE 1B and CHINESE 1DB and CHINESE 1MB and CHINESE S1AB and CHINESE S1BC may not be taken for full credit.

### **CHINESE 1C. Fundamental Mandarin Chinese. 5 Units.**

Natural approach emphasizing four fundamental skills: listening, speaking, reading and writing. Specifically designed for students with no previous experience in any dialect of Chinese. Conducted in Mandarin Chinese using the Pinyin system of Romanization, traditional and simplified Chinese characters.

Prerequisite: CHINESE 1B or CHINESE S1AB. CHINESE 1B with a grade of C or better. CHINESE S1AB with a grade of C or better. Placement into CHINESE 1C is also accepted.

Overlaps with CHINESE 1DC, CHINESE 1MC, CHINESE S1BC.

Restriction: CHINESE 1C and CHINESE 1DC and CHINESE 1MC and CHINESE S1BC may not be taken for full credit.

## **(VI)**

### **CHINESE 1MA. Fundamentals of Mandarin Chinese - Mandarin Background Track. 5 Units.**

Natural approach emphasizing four fundamental skills: listening, speaking, reading and writing. Specifically designed for students with previous background in Mandarin Chinese. Conducted in Mandarin Chinese using the Pinyin system of Romanization, traditional and simplified Chinese characters.

Prerequisite: Placement into CHINESE 1MA.

Overlaps with CHINESE 1DA, CHINESE 1A, CHINESE S1AB.

Restriction: CHINESE 1MA and CHINESE 1DA and CHINESE 1A and CHINESE S1AB may not be taken for full credit.

### **CHINESE 1MB. Fundamentals of Mandarin Chinese - Mandarin Background Track. 5 Units.**

Natural approach emphasizing four fundamental skills: listening, speaking, reading and writing. Specifically designed for students with previous background in Mandarin Chinese. Conducted in Mandarin Chinese using the Pinyin system of Romanization, traditional and simplified Chinese characters.

Prerequisite: CHINESE 1MA. CHINESE 1MA with a grade of C or better. Placement into CHINESE 1MB is also accepted.

Overlaps with CHINESE 1B, CHINESE 1DB, CHINESE S1AB, CHINESE S1BC.

Restriction: CHINESE 1MB and CHINESE 1DB and CHINESE 1B and CHINESE S1AB and CHINESE S1BC may not be taken for full credit.

**CHINESE 1MC. Fundamentals of Mandarin Chinese - Mandarin Background Track. 5 Units.**

Natural approach emphasizing four fundamental skills: listening, speaking, reading and writing. Specifically designed for students with previous background in Mandarin Chinese. Conducted in Mandarin Chinese using the Pinyin system of Romanization, traditional and simplified Chinese characters.

Prerequisite: CHINESE 1MB. CHINESE 1MB with a grade of C or better. Placement into CHINESE 1MC is also accepted.

Overlaps with CHINESE 1C, CHINESE 1DC, CHINESE S1BC.

Restriction: CHINESE 1MC and CHINESE 1DC and CHINESE 1C and CHINESE S1BC may not be taken for full credit.

**(VI)**

**CHINESE S1AB. Fundamentals of Mandarin Chinese. 7.5 Units.**

First half of first-year Mandarin Chinese in an intensive setting using natural approach with emphasis on listening, speaking, reading, and writing.

Prerequisite: Placement into CHINESE 1A or CHINESE 1B or CHINESE 1MA or CHINESE 1MB.

Overlaps with CHINESE 1A, CHINESE 1B, CHINESE 1MA, CHINESE 1MB.

**CHINESE S1BC. Fundamentals of Mandarin Chinese. 7.5 Units.**

Second half of first-year Mandarin Chinese in an intensive setting using natural approach with emphasis on listening, speaking, reading, and writing.

Prerequisite: CHINESE S1AB or CHINESE 1B or CHINESE 1DB or CHINESE 1MB. CHINESE S1AB with a grade of C or better. CHINESE 1B with a grade of C or better. CHINESE 1DB with a grade of C or better. CHINESE 1MB with a grade of C or better. Placement into CHINESE 1C or CHINESE 1DC or CHINESE 1MC is also accepted.

Overlaps with CHINESE 1C, CHINESE 1B, CHINESE 1DB, CHINESE 1DC, CHINESE 1MB, CHINESE 1MC.

Restriction: CHINESE S1BC, CHINESE 1B, CHINESE 1C, CHINESE 1DB or CHINESE 1DC, CHINESE 1MB or CHINESE 1MC and may not be taken for full credit.

**(VI)**

**CHINESE 2A. Intermediate Mandarin Chinese. 5 Units.**

Both authentic and pedagogically-prepared materials are used to further develop students' ability to communicate in culturally, socially, and linguistically appropriate manners. Taught in Chinese using Pinyin romanization system and both traditional and simplified forms of Chinese.

Prerequisite: CHINESE 1C or CHINESE S1BC or CHINESE 1MC. CHINESE 1C with a grade of C or better. CHINESE S1BC with a grade of C or better. CHINESE 1MC with a grade of C or better. Placement into CHINESE 2A is also accepted.

Overlaps with CHINESE 2DA, CHINESE 2MA.

**(VIII)**

**CHINESE 2B. Intermediate Mandarin Chinese. 5 Units.**

Both authentic and pedagogically-prepared materials are used to further develop students' ability to communicate in culturally, socially, and linguistically appropriate manners. Taught in Chinese using Pinyin romanization system and both traditional and simplified forms of Chinese.

Prerequisite: CHINESE 2A. CHINESE 2A with a grade of C or better. Placement into CHINESE 2B is also accepted.

Overlaps with CHINESE 2DB, CHINESE 2MB.

Restriction: CHINESE 2B and CHINESE 2DB and CHINESE 2MB may not be taken for full credit.

**(VIII)**

**CHINESE 2C. Intermediate Mandarin Chinese. 5 Units.**

Both authentic and pedagogically-prepared materials are used to further develop students' ability to communicate in culturally, socially, and linguistically appropriate manners. Taught in Chinese using Pinyin romanization system and both traditional and simplified forms of Chinese.

Prerequisite: CHINESE 2B. CHINESE 2B with a grade of C or better. Placement into CHINESE 2C is also accepted.

Overlaps with CHINESE 2DC, CHINESE 2MC.

Restriction: CHINESE 2C and CHINESE 2DC and CHINESE 2MC may not be taken for full credit.

**(VIII)**

**CHINESE 2MA. Intermediate Mandarin Chinese - Mandarin Background Track. 5 Units.**

Authentic and pedagogically prepared materials are used to further develop communication in culturally, socially, and linguistically appropriate manners for students with initial experience in Mandarin Chinese. Conducted in Mandarin using the Pinyin Romanization system, traditional and simplified Chinese characters.

Prerequisite: CHINESE 1MC or CHINESE S1BC. CHINESE 1MC with a grade of C or better. CHINESE S1BC with a grade of C or better. Placement into CHINESE 2MA is also accepted.

Overlaps with CHINESE 2A, CHINESE 2DA.

Restriction: CHINESE 2MA and CHINESE 2DA and CHINESE 2A may not be taken for full credit.

**(VIII)****CHINESE 2MB. Intermediate Mandarin Chinese - Mandarin Background Track . 5 Units.**

Authentic and pedagogically prepared materials are used to further develop communication in culturally, socially, and linguistically appropriate manners for students with initial experience in Mandarin Chinese. Conducted in Mandarin using the Pinyin Romanization system, traditional and simplified Chinese characters.

Prerequisite: CHINESE 2MA. CHINESE 2MA with a grade of C or better. Placement into CHINESE 2MB is also accepted.

Overlaps with CHINESE 2B, CHINESE 2DB.

Restriction: CHINESE 2MB and CHINESE 2DB and CHINESE 2B may not be taken for full credit.

**(VIII)****CHINESE 2MC. Intermediate Mandarin Chinese - Mandarin Background Track . 5 Units.**

Authentic and pedagogically prepared materials are used to further develop communication in culturally, socially, and linguistically appropriate manners for students with initial experience in Mandarin Chinese. Conducted in Mandarin using the Pinyin Romanization system, traditional and simplified Chinese characters.

Prerequisite: CHINESE 2MB. CHINESE 2MB with a grade of C or better. Placement into CHINESE 2MC is also accepted.

Overlaps with CHINESE 2C, CHINESE 2DC.

Restriction: CHINESE 2MC and CHINESE 2DC and CHINESE 2C may not be taken for full credit.

**(VIII)****CHINESE 3A. Advanced Mandarin Chinese. 4 Units.**

A continuation of CHINESE 2A-CHINESE 2B-CHINESE 2C emphasizing conceptualization, self-expression and academic skills in Chinese. Authentic texts from modern Chinese prose and newspapers are used. Taught in Mandarin Chinese using both traditional and simplified forms of Chinese characters.

Prerequisite: CHINESE 2C or CHINESE 2DC or CHINESE 2MC. CHINESE 2C with a grade of C or better. CHINESE 2DC with a grade of C or better. CHINESE 2MC with a grade of C or better. Placement into CHINESE 3A is also accepted.

**(VIII)****CHINESE 3B. Advanced Mandarin Chinese. 4 Units.**

A continuation of CHINESE 2A-CHINESE 2B-CHINESE 2C emphasizing conceptualization, self-expression, and academic skills in Chinese. Authentic texts from modern Chinese prose and newspapers are used. Taught in Mandarin Chinese using both traditional and simplified forms of Chinese characters.

Prerequisite: CHINESE 3A. CHINESE 3A with a grade of C or better

**(VIII)****CHINESE 3C. Advanced Mandarin Chinese. 4 Units.**

A continuation of CHINESE 2A-CHINESE 2B-CHINESE 2C emphasizing conceptualization, self-expression, and academic skills in Chinese. Authentic texts from modern Chinese prose and newspapers are used. Taught in Mandarin Chinese using both traditional and simplified forms of Chinese characters.

Prerequisite: CHINESE 3B. CHINESE 3B with a grade of C or better

**(VIII)**

**CHINESE 10. Peer Tutoring Program . 1 Workload Unit.**

Tutoring Program in which advanced Chinese students provide assistance to students at a lower level. One hour of tutoring per week.

Grading Option: Workload Credit P/NP Only.

Repeatability: May be taken for credit 4 times.

**CHINESE 40. Topics in Professional Chinese. 4 Units.**

Designed for students with native or near native fluency in Chinese. Develops students' language learning to professional levels with cultural and contextual knowledge and with formal communication and presentation skills.

Prerequisite: CHINESE 3C. CHINESE 3C with a grade of C or better. Native speakers also accepted.

Repeatability: May be taken for credit 3 times as topics vary.

**(VIII)**

**CHINESE 100A. Classical Chinese. 4 Units.**

Introduction to classical Chinese grammar and vocabulary with emphasis on reading basic texts.

Prerequisite: CHINESE 3C or JAPANESE 3C or KOREAN 3C

**CHINESE 100B. Classical Chinese. 4 Units.**

Introduction to classical Chinese grammar and vocabulary with emphasis on reading basic texts.

Prerequisite: CHINESE 3C or JAPANESE 3C or KOREAN 3C

**CHINESE 100C. Classical Chinese. 4 Units.**

Introduction to classical Chinese grammar and vocabulary with emphasis on reading basic texts.

Prerequisite: CHINESE 3C or JAPANESE 3C or KOREAN 3C

**CHINESE 101A. Fourth-Year Mandarin Chinese. 4 Units.**

Continued emphasis on comprehension, grammar, and proficiency in reading, composition, and conversation through intensive study and analysis of specific literary texts.

Prerequisite: CHINESE 3C

**CHINESE 101B. Fourth-Year Mandarin Chinese. 4 Units.**

Continued emphasis on comprehension, grammar, and proficiency in reading, composition, and conversation through intensive study and analysis of specific literary texts.

Prerequisite: CHINESE 3C

**CHINESE 101C. Fourth-Year Mandarin Chinese. 4 Units.**

Continued emphasis on comprehension, grammar, and proficiency in reading, composition, and conversation through intensive study and analysis of specific literary texts.

Prerequisite: CHINESE 3C

**CHINESE 115. Topics in Chinese Literature: Advanced Texts. 4 Units.**

Designed for students with near-fluency in reading Chinese. Readings may include both literary and philosophical work by important writers, but the emphasis is on literary texts and writings that interpret those texts.

Prerequisite: Consent of instructor required to enroll.

Repeatability: Unlimited as topics vary.

**CHINESE 199. Independent Study. 1-4 Units.**

Investigation of special topics through directed reading in Chinese. Paper required.

Repeatability: May be taken for credit for 12 units.

**CHINESE 201. Readings in Traditional Chinese Narrative and Prose. 4 Units.**

Close reading of selected premodern prose texts such as historical narratives, novels, short stories, and essays.

Prerequisite: CHINESE 101C

Repeatability: Unlimited as topics vary.

**CHINESE 202. Readings in Traditional Chinese Poetry. 4 Units.**

Close readings of selected premodern poetic texts.

Prerequisite: CHINESE 100C

Repeatability: Unlimited as topics vary.

**CHINESE 203. Readings in Modern Chinese Literature. 4 Units.**

Close readings of selected modern literary texts.

Prerequisite: CHINESE 101C

Repeatability: Unlimited as topics vary.

**CHINESE 204. Readings in Chinese Literary and Cultural Theory. 4 Units.**

Close readings of selected texts in premodern criticism and theory.

Prerequisite: CHINESE 100C

Repeatability: Unlimited as topics vary.

**CHINESE 211A. Studies in Traditional Chinese Narrative and Prose. 4 Units.**

Two-quarter seminar in traditional Chinese narrative and prose, with topics varying from year to year.

Prerequisite: CHINESE 100C

Repeatability: Unlimited as topics vary.

**CHINESE 211B. Studies in Traditional Chinese Narrative and Prose. 4 Units.**

Two-quarter seminar in traditional Chinese narrative and prose, with topics varying from year to year.

Prerequisite: CHINESE 211A

Repeatability: Unlimited as topics vary.

**CHINESE 212A. Studies in Traditional Chinese Poetry. 4 Units.**

Two-quarter seminar in traditional Chinese poetry, with topics varying from year to year.

Prerequisite: CHINESE 100C

Repeatability: Unlimited as topics vary.

**CHINESE 212B. Studies in Traditional Chinese Poetry. 4 Units.**

Two-quarter seminar in traditional Chinese poetry, with topics varying from year to year.

Prerequisite: CHINESE 212A

Repeatability: Unlimited as topics vary.

**CHINESE 213A. Studies in Modern Chinese Literature. 4 Units.**

Two-quarter seminar in modern Chinese literature, with topics varying from year to year. Research paper required.

Prerequisite: CHINESE 100C

Repeatability: Unlimited as topics vary.

**CHINESE 213B. Studies in Modern Chinese Literature. 4 Units.**

Two-quarter seminar in modern Chinese literature, with topics varying from year to year. Research paper required.

Prerequisite: CHINESE 213A

Repeatability: Unlimited as topics vary.

**CHINESE 214. Studies in Chinese Literature and Cultural Theory. 4 Units.**

Seminar in Chinese literature and cultural theory, with topics varying from year to year. Research paper required.

Prerequisite: CHINESE 100C or CHINESE 101C

Repeatability: Unlimited as topics vary.

**CHINESE 230. Topics in Chinese Literature and Culture. 4 Units.**

Seminar in Chinese literature and culture, with topics varying from year to year. Research paper required.

Prerequisite: CHINESE 100C or CHINESE 101A

Repeatability: Unlimited as topics vary.

**CHINESE 290. Independent Study. 4 Units.**

Directed research on topic determined in consultation with faculty member. A term paper or project is required.

Repeatability: May be repeated for credit unlimited times.

**CHINESE 299. Dissertation Research. 4-12 Units.**

Dissertation research with Chinese faculty.

Prerequisite: Advancement to Ph.D. candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## **Classics Courses**

**CLASSIC 10. Scientific and Specialized Terminology. 4 Units.**

A study of English terms derived from Greek and Latin and important to contemporary medicine, science, and other professions, with emphasis on development of word-building skills. No prior knowledge of Greek or Latin required.

**CLASSIC 36A. The Formation of Ancient Greek Society: Early Greece. 4 Units.**

A survey of ancient Greek civilization from its origins in the Bronze Age to the mid-Archaic period. Examines political and social history, as well as literature, art, religion, and archaeological remains.

Same as HISTORY 36A.

(IV)

**CLASSIC 36B. The Formation of Ancient Greek Society: Late Archaic and Classical Greece. 4 Units.**

A survey of ancient Greek civilization from the Late Archaic period to the Classical period. Focuses on major institutions and cultural phenomena as seen through the study of ancient Greek literature, history, archaeology, and religion.

Same as HISTORY 36B.

(IV)

**CLASSIC 36C. The Formation of Ancient Greek Society: Fourth-Century and Hellenistic Greece. 4 Units.**

A survey of ancient Greek civilization from the fourth century BCE through to the Hellenistic period. Focuses on major institutions and cultural phenomena as seen through the study of ancient Greek literature, history, archaeology, and religion.

Same as HISTORY 36C.

(IV)

**CLASSIC 37A. The Formation of Ancient Roman Society: Origins to Roman Republic. 4 Units.**

A survey of the development of Roman civilization from its eighth century BCE beginnings to the civil wars of the first century BCE. Examines political and social history, as well as literature, art, architecture, and religion.

Same as HISTORY 37A.

(IV)

**CLASSIC 37B. The Formation of Ancient Roman Society: Roman Empire. 4 Units.**

A survey of Roman civilization from Augustus's consolidation of power following the civil wars of the first century BCE to the crisis of the third century CE. Includes social history, literature, art, architecture, and religion.

Same as HISTORY 37B.

(IV)

**CLASSIC 37C. The Formation of Ancient Roman Society: The Fall of Rome. 4 Units.**

A survey of Roman civilization from the crisis of the third century CE to the so-called "fall of Rome" in 476 CE. Examines political and social history, as well as literature, art, architecture, and religion.

Same as HISTORY 37C.

(IV)

**CLASSIC 45A. Classical Mythology: The Gods. 4 Units.**

An overview of the main myths of the gods of the ancient Greeks and Romans and their influence in contemporary and later literature and art. Includes readings from both ancient and modern sources.

(IV)

**CLASSIC 45B. Classical Mythology: The Heroes. 4 Units.**

An overview of the main myths of the heroes of the ancient Greeks and Romans and their influence in contemporary and later literature and art. Includes readings from both ancient and modern sources.

(IV)

**CLASSIC 45C. Classical Mythology: Ancient and Modern Perspectives of Classical Mythology. 4 Units.**

Detailed examination of key Greek and Roman myths, their interpretations, and the influence they have exerted on literature, art, and popular culture in subsequent periods.

(IV)

**CLASSIC 99. Special Studies in Classics. 1-4 Units.**

Lower-division level independent research with Classics faculty.

Repeatability: May be repeated for credit unlimited times.

**CLASSIC 140. Classics and History: The Ancient World. 4 Units.**

Selected topics in society and culture of the Graeco-Roman world. Readings in translation.

Repeatability: Unlimited as topics vary.

**CLASSIC 150. Classical Mythology. 4 Units.**

Selected myths and legends as used in Classical literature, and their modern interpretations.

**CLASSIC 160. Topics in Classical Literature in English Translation. 4 Units.**

Studies in selected areas of Classical literature. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**CLASSIC 160W. Topics in Classical Literature in English Translation. 4 Units.**

Studies in selected areas of Classical literature. Topics addressed vary each quarter.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

(Ib)

**CLASSIC 166. Topics in Classical Reception. 4 Units.**

Studies in selected areas of Classical reception. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**CLASSIC 170. Topics in Classical Civilization. 4 Units.**

Studies in selected areas of Classical civilization. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**CLASSIC 176. International Studies and the Classics. 4 Units.**

Develops a broader understanding of the formation of different cultures and countries of Classical times and their impact on the modern world.

Repeatability: Unlimited as topics vary.

**CLASSIC 192A. Senior Capstone. 2 Units.**

Under the guidance of a faculty mentor, majors design and execute a senior project. This project may be a research paper, dramatic production, school curriculum, etc. All projects must be approved by the faculty mentor.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Grading Option: In Progress (Letter Grade with P/NP).

**CLASSIC 192B. Senior Capstone. 4 Units.**

Under the guidance of a faculty mentor, majors design and execute a senior project. This project may be a research paper, dramatic production, school curriculum, etc. All projects must be approved by the faculty mentor.

Prerequisite: CLASSIC 192A. Satisfactory completion of the Lower-Division Writing requirement.

**CLASSIC 198. Directed Group Study. 4 Units.**

Special topics in Classical studies through directed reading and research.

Repeatability: May be repeated for credit unlimited times.

**CLASSIC 199. Independent Study in Classics. 1-4 Units.**

Independent research with Classics faculty.

Repeatability: May be repeated for credit unlimited times.

**CLASSIC 280. Independent Study. 4-12 Units.**

Supervised independent research. Subject varies.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CLASSIC 290. Research in Classics. 4-12 Units.**

Research under Classics faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CLASSIC 299. Dissertation Research. 4-12 Units.**

Dissertation research with Classics faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CLASSIC 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Comparative Literature Courses

### **COM LIT 3. Just Reading: Developing the Reading Experience . 4 Units.**

Develops the reading experience apart from writing. Develops tools for sustained attention in reading practice across a wide range of genres and media from across the globe. Students learn to appreciate elements of reading experience such as attention and perplexity.

(IV and VIII ).

### **COM LIT 8. Travels in Comparative Literature. 4 Units.**

Readings in English and in English translation on such topics as love, war, cities, travel writing, politics, fantasy and science fiction, violence.

Repeatability: Unlimited as topics vary.

(IV)

### **COM LIT 9. Introduction to Multiculturalism. 4 Units.**

Various themes and forms of literary and cultural production within a multicultural framework, including African American, Asian American, Chicano/Latino, and Native American literatures and cultures.

Repeatability: Unlimited as topics vary.

(IV, VII)

### **COM LIT 10. Topics in World Literature. 4 Units.**

Introduction to texts from across the globe and from different historical periods. Readings in English and English translation.

Repeatability: Unlimited as topics vary.

(IV and VIII ).

### **COM LIT 60A. World Literature. 4 Units.**

An introduction to the comparative study of literatures and cultures in a global context. Studies literary texts and other media across the borders of various cultures, historical periods, and traditions. All texts are read in English translation.

(IV and VIII ).

### **COM LIT 60B. Reading with Theory. 4 Units.**

Introduction to theory and methods of literary and cultural criticism in a global context. Students read theoretical approaches to literature, culture, and ideas. Marx and Freud, e.g., may be studied alongside readings in narrative poetry, film, song lyrics, novel.

(IV, VIII)

### **COM LIT 60C. Cultural Studies. 4 Units.**

Introduces students to a variety of cultural practices (literature, blogs, films, radio, comics) from across the globe. Focuses on the ways that context, genre, and medium (e.g., written, visual, oral) affect how these practices are produced, circulated, and received.

(IV, VIII)

### **COM LIT 100A. Nations, Regions, and Beyond. 4 Units.**

Intensive study of national and regional cultural and literary traditions from across the globe, among them the literary and cultural production of the Middle East, Africa, Europe, the Americas, and Asia.

Repeatability: Unlimited as topics vary.

### **COM LIT 101W. An Introduction to Translation Studies. 4 Units.**

Focuses on theories of translation and on how these theories help students understand the role of translation in the world. Students develop a critical vocabulary for discussing translation in multiple linguistic traditions and complete a final translation project.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

### **COM LIT 102. Comparative Studies in Literature and Theory. 4 Units.**

In-depth discussion of special topics.

Repeatability: Unlimited as topics vary.

**COM LIT 102W. Comparative Studies in Literature and Theory. 4 Units.**

In-depth discussion of special topics.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**(Ib)**

**COM LIT 105. Topics in Comparative Multiculturalism. 4 Units.**

Treats the literatures and cultures of one or more minority groups in California and the United States, including African Americans, Asian Americans, Chicano/Latinos, and Native Americans, and their relations to other national literatures.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: May be repeated for credit unlimited times.

**COM LIT 107. Colonialisms and Postcolonialisms. 4 Units.**

Explores topics such as colonialism and race, decolonization, pre- and postcoloniality, globalization, and the cultural dynamics of colonization and subjectivity.

Repeatability: Unlimited as topics vary.

**COM LIT 108. Diasporic Literatures and Cultures. 4 Units.**

Literatures, cultures, and histories of diasporic groups, e.g., literature of the Persian diaspora; cinema of the African diaspora.

Repeatability: Unlimited as topics vary.

**COM LIT 120. Philosophy, Culture, and Literature. 4 Units.**

Discusses contemporary and historical philosophical questions and figures--for example, existentialism or debates about artificial intelligence--in interaction with culture and literature.

Repeatability: Unlimited as topics vary.

**COM LIT 121. Narrative, Pattern, and Text. 4 Units.**

Explores textual patterns, structures, and effects. May include topics such as novel, hypertext, genre, reader responses, intertextuality.

Repeatability: Unlimited as topics vary.

**COM LIT 122. Rhetorical Approaches to Literature. 4 Units.**

Studies the art and politics of rhetoric and persuasion in connection with cultural works from various times and places, for example, classical political speeches, Internet journalism.

Repeatability: Unlimited as topics vary.

**COM LIT 123. Literatures in Dialogue. 4 Units.**

Studies how texts interact across time and space in a global context. Uses concepts of influence, imitation, and parody, to ask, for example, how the Homeric epics can help us understand Caribbean novels and U.S. movies such as *Troy*.

Repeatability: Unlimited as topics vary.

**COM LIT 130. Gender, Sexuality, Race, Class. 4 Units.**

Discusses the roles of differences such as race, class, gender, and sexuality in society, culture, and literature across the globe, covering topics such as theoretical and literary representations of queer sexuality, gender performance, critical race theory.

Repeatability: Unlimited as topics vary.

**COM LIT 131. Psychoanalysis and Culture. 4 Units.**

Discusses major psychoanalytic writings of Freud and others in connection with questions of culture.

Repeatability: Unlimited as topics vary.

**COM LIT 132. Discourse, Ideologies, and Politics. 4 Units.**

Compares ideologies and systems, e.g., nationalism and fundamentalism, as they affect literature and culture in a global context.

Repeatability: Unlimited as topics vary.

**COM LIT 140. Critical Cultural Studies. 4 Units.**

Introduces a variety of ways of understanding cultural phenomena in relation to different power structures. These cultural phenomena may include comics, film, literature, sports, music, festivals, telling stories, or eating out.

Repeatability: Unlimited as topics vary.

**COM LIT 141. Topics in Popular Culture . 4 Units.**

Critical analyses of popular culture such as comics, oral narratives, films, TV, and music in an international framework.

Repeatability: Unlimited as topics vary.

**COM LIT 142. The Metropolis and Other Cultural Geographies. 4 Units.**

Examines the relationship between space and culture; cultural production in the city, suburb, and/or countryside; spaces in texts and artifacts (film, literature, comics, photographs) in a global context.

Repeatability: Unlimited as topics vary.

**COM LIT 143. Literature, Arts, and Media. 4 Units.**

Explores literature and other arts and media in a global context. May include film and electronic media, fine arts, oral cultures, architecture, in an international framework.

Repeatability: Unlimited as topics vary.

**COM LIT 144. Literature, History, and Society. 4 Units.**

Explores the relationship between literary texts and their historical and social contexts in an international framework. Courses may address, for example, literary and cultural expressions in social revolutions or the way literary texts talk back to medicine, religion, and anthropology.

Repeatability: Unlimited as topics vary.

**COM LIT 150. Literature in Translation. 4 Units.**

The study of literary works in one or more genres in English translation. May be a comparative study of works from several different original languages or a concentration on works from a single cultural/linguistic tradition.

Repeatability: Unlimited as topics vary.

**COM LIT 160. World Cinema . 4 Units.**

Comparative analysis of contemporary film in languages other than English.

Repeatability: May be taken for credit 2 times as topics vary.

**COM LIT 190W. Advanced Seminar in Comparative Literature and Theory. 4 Units.**

Capstone seminar for the Comparative Literature major. Deepens understanding of the field through investigation of a special topic and a substantial research and writing project.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: School of Humanities students only.

**(Ib)****COM LIT 199. Independent Study in Comparative Literature. 1-4 Units.**

To be taken only when the materials to be studied lie outside the normal run of departmental offerings.

Repeatability: May be repeated for credit unlimited times.

**COM LIT 200A. History of Comparative Literature and Introduction to Methods and Theories of CL. 4 Units.**

Seminar designed to introduce graduate students in Comparative Literature to the discipline of Comparative Literature. Issues and theories of comparative literary and cultural study are covered. Strongly recommended for first and second year students before the M.A. exam and review.

Restriction: Graduate students only.

**COM LIT 200B. Theories of Translation. 4 Units.**

The reproduction, translation, and transfer of literary and cultural, ideological and political, and symbolic codes and texts have long been the object of study in Comparative Literature. Addresses the diverse ways in which expressive systems interact and intersect.

Repeatability: Unlimited as topics vary.

**COM LIT 200C. Theories of Globalization, Inter-Nationalism, and Postcolonialism. 4 Units.**

Addresses both theories and the complex history of literary and cultural expression in a national, trans-, inter-, and post-national, global frame. Topics may include: globalism and nationhood, theories of citizenship and political subjecthood, postcolonial literature and theory.

Repeatability: Unlimited as topics vary.

**COM LIT 210. Comparative Studies . 4 Units.**

Studies in selected areas of Comparative Literature. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**COM LIT 220. Translation Workshop. 2-4 Units.**

Trains students in the methodologies and practice of translation. Students focus on the translating process in a series of case studies and individual projects.

Repeatability: May be taken for credit for 8 units.

**COM LIT 280A. Professionalization Seminar. 2 Units.**

The first of two required professionalization seminars in Comparative Literature. Intended for second and third year students and covers preparation for the M.A. and Ph.D. exams, conference presentations, teaching and classroom management, and publishing journals.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**COM LIT 280B. Professionalization Seminar. 2 Units.**

The second of two required professionalization seminars in Comparative Literature. Intended for fourth and fifth year students and covers course design, applying for grants, dissertation prospectus and support, and the job application process.

Prerequisite: COM LIT 280A. COM LIT 280A with a grade of B or better

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**COM LIT 290. Reading and Conference. 4-12 Units.**

Studies in selected areas. Topics addressed vary each quarter.

Repeatability: May be repeated for credit unlimited times.

**COM LIT 291. Guided Reading Course. 4 Units.**

Studies in selected areas. Topics addressed vary each quarter.

Repeatability: May be repeated for credit unlimited times.

**COM LIT 292. Teaching Practicum . 2 Units.**

Graduate students develop their pedagogical practices by accompanying a professor teaching a UCI undergraduate class. Meets individually with the professor to discuss relevant pedagogical practices, syllabus design, lecturing, assessment, classroom management, etc. Actively participates in one teaching component.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**COM LIT 299. Dissertation Research. 4-12 Units.**

A units-only course for students in the dissertation phase.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**COM LIT 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**Criticism/English Courses****CRITISM 200A. Political Economy: Methods and Critique. 4 Units.**

Introduction to canonical texts in Marxism coupled with an examination of the questions of race, gender, ethnicity, and sexuality that distend the calculus of the canon's assumptive logic. May be taken after CLT&THY 200B.

Same as CLT&THY 200A.

Restriction: Graduate students only.

**CRITISM 220B. Studies in Literary Theory and Its History. 4 Units.**

Introduction to criticism and aesthetics for beginning graduate students. Readings from continental, English, and American theorists.

Same as HUMAN 220B.

Restriction: Graduate students only.

**CRITISM 240. Advanced Theory Seminar. 4 Units.**

Studies in selected areas of Criticism Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**Culture and Theory Courses****CLT&THY 200A. Political Economy: Methods and Critique. 4 Units.**

Introduction to canonical texts in Marxism coupled with an examination of the questions of race, gender, ethnicity, and sexuality that distend the calculus of the canon's assumptive logic. May be taken after CLT&THY 200B.

Same as CRITISM 200A.

Restriction: Graduate students only.

**CLT&THY 200B. Libidinal Economy: Methods and Critique. 4 Units.**

Introduction to canonical texts in psychoanalysis coupled with an examination of the questions of race, gender, ethnicity, and sexuality that distend the calculus of the canon's assumptive logic. May be taken before CLT&THY 200A.

Restriction: Graduate students only.

**CLT&THY 200C. Theory from Below. 4 Units.**

Introduction to systems of thought understudied or undervalued in academic canons--for instance, systems constituted in communities' practices or theories that do not seek permanence or generality.

Prerequisite: CLT&THY 200A and CLT&THY 200B

Restriction: Graduate students only.

**CLT&THY 241. Ethics, Erotics, and Will: Gendered Black Politics, Sexualized Racisms, and the Humanities. 4 Units.**

Introduces doctoral students to an interdisciplinary conversation about black queer sexuality and black heteropatriarchy. Uses disciplinary formations as a tool for understanding knowledge formations about the shifting relations that constitute sexuality, gender, and racial blackness.

Restriction: Graduate students only.

**CLT&THY 242. Afro-Pessimism and the Status of the Subject. 4 Units.**

Afro-Pessimism theorizes the Black as a being against which all other beings become legible as human subjects. Focuses on either the subject of psychoanalysis or the subject of capital accumulation in their explorations of the antagonism between Blackness.

Restriction: Graduate students only.

**CLT&THY 280. Independent Study. 4 Units.**

Limited to students who have not yet received the M.A. degree.

Repeatability: May be repeated for credit unlimited times.

**CLT&THY 289. Topics in Culture and Theory. 4 Units.**

Seminars on various topics in Culture and Theory.

Repeatability: Unlimited as topics vary.

**CLT&THY 298. Directed Reading. 4-12 Units.**

Directed readings on a specific topic agreed upon by students and their instructors. Limited to students who have completed their M.A. degree and are preparing for their qualifying exam.

Prerequisite: Completion of the M.A. degree.

Repeatability: May be repeated for credit unlimited times.

**CLT&THY 299. Dissertation Research. 4-12 Units.**

Dissertation research in Culture and Theory.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## **East Asian Studies Courses**

**EAS 15C. Introductory Topics in Chinese Literature. 4 Units.**

Introduces students to major themes in Chinese literature and culture through the close reading, discussion, and analysis of selected texts in English translation.

Repeatability: Unlimited as topics vary.

Restriction: Korean Literature and Culture Majors only. Chinese Studies Majors only. Japanese Language Literature Majors only. East Asian Cultures Majors only.

**EAS 15J. Introductory Topics in Japanese Literature. 4 Units.**

Introduces students to major themes in Japanese literature and culture through the close reading, discussion, and analysis of selected texts in English translation.

Repeatability: Unlimited as topics vary.

Restriction: Korean Literature and Culture Majors only. Chinese Studies Majors only. Japanese Language Literature Majors only. East Asian Cultures Majors only.

**EAS 15K. Introductory Topics in Korean Literature. 4 Units.**

Introduces students to major themes in Korean literature and culture through the close reading, discussion, and analysis of selected texts in English translation.

Repeatability: Unlimited as topics vary.

Restriction: Korean Literature and Culture Majors only. Chinese Studies Majors only. Japanese Language Literature Majors only. East Asian Cultures Majors only.

**EAS 20. Topics in Asian Religions . 4 Units.**

An introduction to Asian religions (Hinduism, Buddhism, Confucianism, Taoism, Shamanism) including both elite doctrinal aspects and forms of more popular religiosity.

Repeatability: May be taken for credit 3 times as topics vary.

**(IV and VIII ).**

**EAS 40. Topics in East Asian Popular Culture. 4 Units.**

Selected topics in the popular cultural traditions of East Asia designed to introduce students both to problems in situating culture in a specific time and place and to contemporary theories of popular culture and their application to East Asian contexts.

Repeatability: Unlimited as topics vary.

(IV and VIII ).

**EAS 55. Introduction to East Asian Cultures . 4 Units.**

Interdisciplinary courses organized each year around a broad theme designed to introduce students to the cultures of East Asia. Topical organization of courses addresses issues that have been of importance historically and are reshaping East Asia today.

Repeatability: May be taken for credit 3 times as topics vary.

(IV and VIII ).

**EAS H84. Traveling East/West. 4 Units.**

Traveling East/West presents a wide range of travel writings by Chinese, Indian, and Euro-American authors in which they contemplate the complexities of cross-cultural encounters and how knowledge about others and knowledge of ourselves are closely intertwined.

Same as HUM H84.

Restriction: Campuswide Honors Collegium students only.

(IV)

**EAS 110. Topics in Chinese Literature and Society. 4 Units.**

Studies in Chinese texts in their social and cultural context(s). Conducted in English.

Repeatability: May be taken for credit 3 times as topics vary.

**EAS 116. Topics in East Asian Religions. 4 Units.**

Selected topics in the religions of East Asia, e.g., Buddhism, Daoism, Shintô, Christianity, popular religions.

Repeatability: May be taken for credit 3 times as topics vary.

**EAS 117. Topics in East Asian Philosophy. 4 Units.**

Selected topics in the philosophies of East Asia, e.g., Yoga, Buddhism, Vedanta, Confucianism, Taoism, and Shinto.

Repeatability: Unlimited as topics vary.

**EAS 120. Topics in Japanese Literature and Society. 4 Units.**

Studies in Japanese texts in their social and cultural context(s). Conducted in English.

Repeatability: May be taken for credit 3 times as topics vary.

**EAS 123. Structure of Japanese. 4 Units.**

An overview of the linguistic features of modern Japanese. Provides students with a systematic introduction to the nature and characteristics of the language.

Same as LSCI 165B.

**EAS 126. Topics in East Asian Linguistics. 4 Units.**

In-depth examination of selected topics in the linguistics of East Asian languages, including Chinese, Japanese, Korean, and Vietnamese.

Repeatability: May be taken for credit 3 times as topics vary.

**EAS 130. Topics in Korean Society and Culture. 4 Units.**

Studies of the social and cultural forces that affect the lives of the Koreans, including those in the United States. Considers traditional values and contemporary issues within a historical framework.

Repeatability: May be taken for credit 3 times as topics vary.

**EAS 140. Topics in Korean Literature and Society. 4 Units.**

Studies in Korean texts in their social and cultural context(s). Conducted in English.

Repeatability: May be taken for credit 3 times as topics vary.

**EAS 150. Topics in East Asian Literature in Translation. 4 Units.**

East Asian literary works in translation. Taught in English.

Repeatability: Unlimited as topics vary.

**EAS 155. Topics in Cultural Studies in East Asia. 4 Units.**

Interdisciplinary and theoretical introduction to issues in cultural studies that are pertinent to the study of East Asia. All readings in English.

Repeatability: Unlimited as topics vary.

**EAS 160. Topics in East Asian Cinema. 4 Units.**

Study of East Asian cinema from historical, theoretical, and comparative perspectives. Taught in English.

Repeatability: Unlimited as topics vary.

**EAS 170. Topics in Gender in East Asia . 4 Units.**

Explores the construction of gender in East Asian cultures and literatures. Pays close attention to the specificity of historical, cultural, and literary contexts of East Asia as it investigates various theoretical and critical perspectives on gender and sexuality.

Repeatability: Unlimited as topics vary.

**EAS 190. Junior-Senior Colloquium. 4 Units.**

Specialized courses dealing with primary sources; required reports and papers. Each colloquium reflects the instructor's intellectual interest and is conducted as a discussion group. Limited to 15 students.

Repeatability: May be taken for credit 3 times as topics vary.

Restriction: Upper-division students only. Korean Literature and Culture Majors only. Chinese Studies Majors only. Japanese Language Literature Majors only. East Asian Cultures Majors only.

**EAS 192W. Junior-Senior Seminar. 4 Units.**

Analysis of a literary or cultural topic or problem through research and writing of two short and one long research paper for a minimum of 4,000 total words. Seminar follows EAS 190; related to the colloquium's subject.

Prerequisite: EAS 190. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 3 times as topics vary.

**(Ib)**

**EAS 199. Independent Study. 1-4 Units.**

Investigation of special topics through directed reading in translation. Paper required.

Repeatability: May be taken for credit for 12 units.

**EAS 216. Topics in East Asian Religions . 4 Units.**

Selected topics in the religions of East Asia, e.g., Buddhism, Daoism, Shintô, Islam, shamanism.

Repeatability: May be taken for credit 3 times as topics vary.

**EAS 220. Topics in East Asian Cultural Studies. 4 Units.**

Seminar, with topics varying from year to year. Research paper required.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EAS 225. Topics in East Asian Applied Linguistics. 4 Units.**

In-depth examination of selected topics in applied linguistics, with a particular emphasis on language acquisition and language pedagogy.

Repeatability: May be taken for credit 3 times as topics vary.

Concurrent with EALL 125.

**EAS 260. Topics in East Asian Cinema. 4 Units.**

An examination of the possibilities of East Asian cinematic narrative. Possible topics: cinematic history; cinema in popular culture; comparisons with literary texts; major auteurs. Emphasis on technical as well as on thematic aspects. Includes readings in film theory.

Prerequisite: EAS 160

Repeatability: Unlimited as topics vary.

**EAS 290. Independent Study. 2-4 Units.**

Directed research on topic determined in consultation with faculty member. A term paper or project is required.

Repeatability: May be repeated for credit unlimited times.

**EAS 299. Dissertation Research. 4-12 Units.**

Dissertation research for students who are advanced to doctoral candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**EAS 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## English Courses

**ENGLISH 8. Multicultural American Literature. 4 Units.**

Writings from at least two historically underrepresented groups in California and the United States with particular attention to historical conditions of literary production. Considers in-depth how literary works relate to racial constructions, economic conditions, and/or social movements.

(IV and VII ).

**ENGLISH 9. Shakespeare. 4 Units.**

Plays by William Shakespeare are used to explore the playwright's poetic gifts, theatrical imagination, and inquiry into human relationships and the human condition.

(IV)

**ENGLISH 10. Topics in English and American Literature. 4 Units.**

Explores the diversity of human expression manifested in selected works of literature. By engaging with substantial literary texts, students will think critically about how meaning is created and how experience is interpreted in literary language.

Repeatability: May be taken for credit 3 times as topics vary.

(IV)

**ENGLISH 10B. Topics in English and American Literature. 4 Units.**

Linked with Writing 39B. Explores the diversity of human expression manifested in selected works of literature. By engaging with substantial literary texts, students think critically about how meaning is created and how experience is interpreted in literary language.

Corequisite: WRITING 39B

Repeatability: May be taken for credit 3 times as topics vary.

Overlaps with ENGLISH 10.

(IV)

**ENGLISH 11. Society, Law, and Literature. 4 Units.**

Examines how works of literature represent and influence the relation between law and society. The primary readings will be works of literature, but selections of works of law, politics, and sociology may also be assigned.

(III or IV ).

**ENGLISH 11C. Society, Law, and Literature. 4 Units.**

Linked with Writing 39C. Explores how works of literature represent and influence the relation between law and society. The primary readings are works of literature, but selections of works of law, politics, and sociology may also be assigned.

Corequisite: WRITING 39C

Overlaps with ENGLISH 11.

(III or IV ).

**ENGLISH 12. Young Adult Fiction . 4 Units.**

Young adult fiction studied in historical context, including the publishing industry and mass marketing, as well as education and literacy. Primary readings will focus on young adult fiction, but works of history, advertising, and film will also be included.

(IV)

**ENGLISH 15. Introductory Seminar in English: Topics in Literary Studies. 4 Units.**

Discussion-based seminar on a faculty-chosen topic that introduces majors and those considering a major in English to interpretive methodologies and critical frameworks that characterize the field of English studies.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: English Majors have first consideration for enrollment.

**ENGLISH 16. The Craft of Poetry. 4 Units.**

Reading of selected texts to explore the ways in which these modes formulate experience. Students write several short analytic papers. Requires creative writing.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(IV)

**ENGLISH 17. The Craft of Fiction. 4 Units.**

Reading of selected texts to explore the ways in which these modes formulate experience. Students write several short analytic papers. Requires creative writing.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(IV)

**ENGLISH H80. Sanctuary: Medieval and Modern. 4 Units.**

Principles and significance of the practice of legal sanctuary in medieval English history, literature, and religion. Development of modern use of churches and other safe spaces in the American Civil Rights movement, immigrant sanctuary movements, and international asylum.

Restriction: Campuswide Honors Collegium students only.

(III or IV ).

**ENGLISH H81. What is a Person?. 4 Units.**

Contemporary debates about personhood in law, culture, and society. Beginning with the emergence of ideas of personhood in philosophy and theology, and culminating in the study of highly contested cases: slavery, abortion law, animal rights, corporate personhood, and artificial intelligence.

Restriction: Campuswide Honors Collegium students only.

(III)

**ENGLISH 100. Introduction to Literary Theory. 4 Units.**

Using Plato and Aristotle as points of departure, addresses a range of perspectives and problems in literary theory. To be taken by English majors in the junior year.

Prerequisite: Three courses selected from ENGLISH 8, ENGLISH 9, ENGLISH 10, ENGLISH 11, ENGLISH 12, ENGLISH 15, ENGLISH 16, ENGLISH 17, LIT JRN 20, LIT JRN 21.

**ENGLISH 101W. Undergraduate Seminar in Critical Writing: Topics in Literary History. 4 Units.**

Each instructor identifies a topic within literary history; special attention is given to mastering the conventions of academic argument and expression. To be taken as early as possible in the junior year.

Prerequisite: Three courses selected from ENGLISH 8, ENGLISH 9, ENGLISH 10, ENGLISH 11, ENGLISH 12, ENGLISH 15, ENGLISH 16, ENGLISH 17; or LIT JRN 20 and LIT JRN 21 and one course selected from the above list. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only. English Majors have first consideration for enrollment.

**(Ib)****ENGLISH 102A. Topics in Medieval and Renaissance Literature. 4 Units.**

Studies of works representative of Medieval and Renaissance literature in English, with attention to literary history, treating at a minimum more than one author and more than one genre.

Prerequisite: Three courses selected from ENGLISH 8, ENGLISH 9, ENGLISH 10, ENGLISH 11, ENGLISH 12, ENGLISH 15, ENGLISH 16, ENGLISH 17. Or LIT JRN 20 and LIT JRN 21 and one course selected from the above list.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only. English Majors have first consideration for enrollment.

**ENGLISH 102B. Topics in Restoration and 18th-Century Literature . 4 Units.**

Studies of works representative of Restoration and 18th-century literature in English, with attention to literary history, treating at a minimum more than one author and more than one genre.

Prerequisite: Three courses selected from ENGLISH 8, ENGLISH 9, ENGLISH 10, ENGLISH 11, ENGLISH 12, ENGLISH 15, ENGLISH 16, ENGLISH 17. Or LIT JRN 20 and LIT JRN 21 and one course selected from the above list.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only. English Majors have first consideration for enrollment.

**ENGLISH 102C. Topics in Romantic and 19th-Century Literature. 4 Units.**

Studies of works representative of Romantic and 19th-century literature in English, with attention to literary history, treating at a minimum more than one author and more than one genre.

Prerequisite: Three courses selected from ENGLISH 8, ENGLISH 9, ENGLISH 10, ENGLISH 11, ENGLISH 12, ENGLISH 15, ENGLISH 16, ENGLISH 17. Or LIT JRN 20 and LIT JRN 21 and one course selected from the above list.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only. English Majors have first consideration for enrollment.

**ENGLISH 102D. Topics in 20th-Century Literature. 4 Units.**

Studies of works representative of 20th-century literature in English, with attention to literary history, treating at a minimum more than one author and more than one genre.

Prerequisite: Three courses selected from ENGLISH 8, ENGLISH 9, ENGLISH 10, ENGLISH 11, ENGLISH 12, ENGLISH 15, ENGLISH 16, ENGLISH 17. Or LIT JRN 20 and LIT JRN 21 and one course selected from the above list.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only. English Majors have first consideration for enrollment.

**ENGLISH 103. Topics in Literature, Theory, and Criticism. 4 Units.**

A series of lectures on and discussions of announced topics in literary criticism, theory, history, genres, modes, major authors.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Recommended: Upper-division students only.

**ENGLISH 105. Multicultural Topics in Literatures in English. 4 Units.**

Focuses on ethnic or minority literatures, or treats issues related to race and cultural identity.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Recommended: Upper-division students only.

**ENGLISH 106. Advanced Seminar: Topics in English Literature . 4 Units.**

Capstone course. Provides intensive work on a topic within the area of literatures in English with particular attention to the theoretical, critical, or conceptual issues it raises, with the goal of producing a substantive research paper.

Prerequisite: (ENGLISH 101W or WRITING 101W) and (ENGLISH 100 and 102A) or (ENGLISH 100 and 102B) or (ENGLISH 100 and 102C) or (ENGLISH 100 and 102D) or (ENGLISH 102A and 102B) or (ENGLISH 102A and 102C) or (ENGLISH 102A and 102D) or (ENGLISH 102B and 102C) or (ENGLISH 102C and 102D) or (ENGLISH 103 and 102A) or (ENGLISH 103 and 102B) or (ENGLISH 103 and 102C) or (ENGLISH 103 and 102D) or (ENGLISH 105 and 102A) or (ENGLISH 105 and 102B) or (ENGLISH 105 and 102C) or (ENGLISH 105 and 102D) or (ENGLISH 100 and 103) or (ENGLISH 103 and 105) or (ENGLISH 100 and 105).

Repeatability: Unlimited as topics vary.

Restriction: Seniors only. English Majors have first consideration for enrollment.

**ENGLISH 150. Topics in Literature for Nonmajors . 4 Units.**

Major texts in English, American, and Comparative Literature explored for basic humanistic issues and themes, on announced topics. Primarily for upper-division students, but not requiring previous training in literature.

Repeatability: Unlimited as topics vary.

Restriction: Recommended: Upper-division students only.

**ENGLISH 160. Topics in English Language Film and TV. 4 Units.**

Focuses on the analysis of film and/or television traditions in the English-speaking world, from a historical, theoretical, or comparative perspective.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Upper-division students only.

**ENGLISH 198. Special Topics. 4 Units.**

Directed group study of selected topics as arranged by instructor.

Repeatability: May be repeated for credit unlimited times.

**ENGLISH 199. Independent Study. 1-4 Units.**

To be taken only when the materials to be studied lie outside the normal run of departmental offerings, and when the student will have no formal chance to pursue the subject. Research paper required.

Repeatability: May be repeated for credit unlimited times.

**ENGLISH 210. Studies in Literary History. 4 Units.**

Studies in selected areas of literary history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**ENGLISH 225. Studies in Literary Genres. 4 Units.**

Studies in selected areas of literary genres. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**ENGLISH 230. Studies in Major Writers. 4 Units.**

Studies in selected areas of major writers. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**ENGLISH 255. Graduate Workshop in Academic Publishing. 4 Units.**

Reading and critique of student-authored essays with the goal of producing a publishable essay. Instructor leads discussion, meets with students individually, and provides an introduction to appropriate venues for publication and the process of submission, peer review, and revision.

Grading Option: Satisfactory/unsatisfactory only.

**ENGLISH 290. Reading and Conference. 4-12 Units.**

Studies in selected areas. Topics addressed vary each quarter.

Repeatability: May be repeated for credit unlimited times.

**ENGLISH 291. Guided Reading Course. 4 Units.**

Studies in selected areas. Topics addressed vary each quarter.

**ENGLISH 299. Dissertation Research. 4-12 Units.**

A units-only course for students in the dissertation phase.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**ENGLISH 398. Rhetoric/Teaching of Composition. 4 Units.**

Readings, lectures, and internship designed to prepare graduate students to teach composition. Formal instruction in rhetoric and practical work in teaching methods and grading.

**ENGLISH 399. University Teaching. 4 Units.**

A units-only course for students appointed as teaching assistants or associates.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## European Languages and Studies Courses

**EURO ST 9. Topics in Europe in the Middle Ages. 4 Units.**

Explores the literature, history, and thought of the European Middle Ages. Topics may include understandings of self and community, aristocratic power and courtly life, colonialism, crusading, religious beliefs and persecution, monasticism and reform, university culture, epic literature, and Arthurian romance.

Repeatability: Unlimited as topics vary.

(IV and VIII ).

**EURO ST 10. Topics in Historical Foundations (1500-1800). 4 Units.**

Offers an overview of the European experience from its social, political, and cultural foundations to modern European issues and institutions in a globalized world. Topics include social, political, and cultural history up to the French Revolution.

Repeatability: Unlimited as topics vary.

Overlaps with EURO ST S10.

((III or IV) and VIII ).

**EURO ST S10. Historical Foundations: Europe and the Foundations of the Modern World. 4 Units.**

Encompasses a variety of perspectives in the social sciences and the humanities involving crucial developments coming out of Europe from roughly 1500 to 1800, (the Protestant Reformation through the French Revolution), that helped shape the modern (western) world.

Overlaps with EURO ST 10.

((III or IV) and VIII ).

**EURO ST 11. Issues and Institutions in Modern Europe (1789-1945). 4 Units.**

Offers an overview of modern European societies in social, political, and cultural terms. Topics include shifting geopolitical borders, social movements, and various forms of cultural expression (film, art, literature) as they intersect with and shape issues and events after 1800.

Repeatability: Unlimited as topics vary.

((III or IV) and VIII ).

**EURO ST S11. Europe's Futures: 1755-Present. 4 Units.**

Introduces students to competing approaches from humanities and social sciences to conceptualizing the future in politics, art, and literature. From the enlightenment to today, investigates the cultural and political context of moments when new ideas emerged to secure Europe's futures.

Overlaps with EURO ST 11.

((III or IV) and VIII ).

**EURO ST 12. What is the Origin of Language?. 4 Units.**

Teaches symbol-based logic and universal grammar in human language as tools to investigate the origin of language. Does language originate with reason? Is language inherently universal or diverse? Does it begin as something literal or figurative.

((III or IV) and Vb ).

**EURO ST 13. Topics in Contemporary Europe (1945 – Today). 4 Units.**

Offers a perspective on contemporary politics and social and cultural life of today's Europe. Introduces students to literature, film, and social theory crises of the contemporary world as they emanated from World War II, such as nationalism and populism.

Repeatability: Unlimited as topics vary.

(IV and VIII ).

**EURO ST 101A. European Studies Core I - Early Europe (Pre-1789). 4 Units.**

Introduction to multidisciplinary approaches to important themes in European society, culture, art, literature, and politics; encourages students to explore intersections among disciplines. Possible themes: Concept of Europe in Renaissance, Self and Other: Europe and Islam, Hybrid Cultures in Medieval Europe.

Repeatability: Unlimited as topics vary.

**EURO ST 101B. European Studies Core II: Modern Europe (Post-1789). 4 Units.**

Multidisciplinary approaches to important themes in modern European society, culture, art, literature, and politics, encouraging students to see points of intersection among disciplines. Possible themes: Subjects, Citizens, and Representation; Europe in the World; European Revolutions in Art and Society.

Repeatability: Unlimited as topics vary.

**EURO ST 102. Topics in Early European History and Culture: Pre-1789. 4 Units.**

Addresses historical and cultural events, issues, and texts (art, literature, music, political theory) from the pre-1789 period in more than one European country.

Repeatability: Unlimited as topics vary.

**EURO ST 103. Topics in Modern European History and Culture: Post-1789. 4 Units.**

Addresses historical and cultural events, issues, and texts (art, literature, music, political theory) from 1789 to present in more than one European country.

Repeatability: Unlimited as topics vary.

**EURO ST 190W. Senior Seminar in European Studies. 4 Units.**

Capstone research seminar. Students engage in rigorous, in-depth, interdisciplinary exploration of specific topics, periods, or themes, investigating and analyzing the intersection of material and discursive culture in different historical periods and geographical locations.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: School of Humanities students only.

(Ib)

**EURO ST 199. Independent Study. 1-4 Units.**

Directed reading and research in consultation with a faculty advisor. Substantial written work required.

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**EURO ST 200A. Core Seminar I: Foundations of European Thought and Culture. 4 Units.**

Provides a historical, geographical, and methodological overview of foundational texts and issues in European thought and culture. Covering several historical periods between the Middle Ages and the present, students will see how ideas and institutions change over time.

**EURO ST 200B. Core Seminar II: Theorizing Periods and Movements in European Thought and Culture. 4 Units.**

Periods and movements still form basic units for organizing European thought and theory, even as such categories are problematized. This course will allow for greater focus on a specific time period or constellation of issues around a period or movement.

**EURO ST 200C. Core Seminar III: European Thought and Culture Beyond Europe. 4 Units.**

Studies the intersection and afterlives of European thought and culture with and in non-European contexts, the way European thought and culture has been translated and transformed, taken up and challenged, in colonial, postcolonial, and other global situations.

**EURO ST 201. Topics in European Studies. 4 Units.**

Seminars on various topics related to European Studies.

Repeatability: Unlimited as topics vary.

**EURO ST 299. Independent Research. 4 Units.**

For students to do independent research with advisors on their master's thesis or master's examination reading lists.

Restriction: Graduate students only. School of Humanities students only.

## Film and Media Studies Courses

**FLM&MDA H80. Honors Seminar: Race Sport Media. 4 Units.**

Honors seminar examining the intersection of race, sports, and media in everyday U.S. popular culture (film, TV, advertising, gaming, social media) and political culture. Materials fee.

Restriction: Campuswide Honors Collegium students only.

(IV and VII ).

**FLM&MDA 85A. Introduction to Film and Visual Analysis. 4 Units.**

Introduces the language and techniques of visual and film analysis. Teaches students to analyze the moving image; emphasize framing, camera movement, and sound; and conveys how editing produces meaning, reproduces historical ideologies, fosters or disrupts narrative, and cues spectators.

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

(IV)

**FLM&MDA 85B. Broadcast Media History and Analysis. 4 Units.**

History of broadcast media from the radio era to the present day, including social, political, institutional, and audience analysis as well as methods of visual and aural analysis of these media.

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

(IV)

**FLM&MDA 85C. New Media and Digital Technologies. 4 Units.**

The study of digital media, computer-mediated communication, and Internet cultures, from historical and theoretical perspectives.

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

(IV)

**FLM&MDA 101A. History of Film I: The Silent Era. 4 Units.**

The aesthetic, industrial, and socio-historical developments of cinema in the U.S. and internationally from its invention to the adoption of synchronous sound. Includes early exhibition, developments in narrative and editing, the formation of the studio system, and avant-garde film movements. Materials fee.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 101B. History of Film II: The Studio Era. 4 Units.**

The aesthetic, industrial, and socio-historical developments of cinema in the U.S. and internationally from the 1930s through the 1960s. Includes the Hollywood studio system, propaganda films, Italian neorealism, post-war Japanese cinema, and the French New Wave. Materials fee.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 101C. History of Film III: The Contemporary Era. 4 Units.**

The aesthetic, industrial, and socio-historical developments of cinema in the U.S. and internationally from the late 1960s to the present. Includes New Hollywood and independent U.S. films, ethnic cinemas, postcolonial cinemas, East-Asian new waves, and digital filmmaking. Materials fee.

Prerequisite: FLM&MDA 85A and FLM&MDA 101B. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 110. Film and Media Theory. 4 Units.**

Survey of major directions in film and media theory. Various theories of mass culture, realism, auteurism, semiotics, feminism, cultural studies, and theories of other media, with an emphasis on developing the student's ability to analyze and articulate a theoretical argument. Materials fee.

Prerequisite: FLM&MDA 85A and FLM&MDA 85B and FLM&MDA 85C and (FLM&MDA 101A or FLM&MDA 101B or FLM&MDA 101C). Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 111. Film and Media Theory and Practice. 4 Units.**

Seminar focusing on issues in film and media production and editing. Reading and exercises to understand aspects of film and media production (montage, sound, film movement, directing, and mise en scène), and how ideology works in tandem with style.

Prerequisite: FLM&MDA 85A and FLM&MDA 85B and FLM&MDA 85C and FLM&MDA 120A and (FLM&MDA 101A or FLM&MDA 101B or FLM&MDA 101C). Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 112. Genre Study . 4 Units.**

Critical approaches to the serial productions we call 'genre' films such as westerns, weepies, musicals, horror films, and others; televisual genres, such as sitcoms, drama, comedy, news, docudrama, police; Internet categories, such as chat-rooms, listservs, Web pages.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 113. Narrative/Image . 4 Units.**

What relations do sound, image, and story assume in film, television, video, and Internet narratives? In what ways do these media interact with and borrow from each other and traditional story-telling media? How have the new media explored non-narrative strategies.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 114. Film, Media, and the Arts. 4 Units.**

A synthetic entity, film draws on both established and popular arts. Looks at visual media's exchanges with 'high' and 'low' culture, exploring its relation to areas such as photography, music, painting, and architecture.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 115. Authorship . 4 Units.**

Theoretical and analytical discussions of visual media authorship, focusing on case studies of directors, producers, scriptwriters, and film, video, and digital artists.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 117A. Introduction to Screenwriting. 4 Units.**

Introduction to the technique and format of the screenplay, with a particular focus on its three act structural elements: coverage, treatment, and 60 beat outline. Materials fee.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 117B. Intermediate Screenwriting. 4 Units.**

Exercises in the development of screenplays, with emphasis on formal and structural considerations of character development. Students work with the hero structure and other character development methodologies, such as method acting. Materials fee.

Prerequisite: FLM&MDA 117A. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 117C. Screenwriting Workshop. 4 Units.**

Continuation and intensification of work initiated in 117B. Students complete a full-length screenplay. Concentrates on both practical and technical concerns, addressing pragmatic and aesthetic questions in intensive small-group discussions. Materials fee.

Prerequisite: FLM&MDA 117B. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 118A. Writing Television I. 4 Units.**

Introduction to the technique and format of the television screenplay. Focuses on character, storytelling, structure, and scene development; culminating in a one-hour drama series treatment and first act of the pilot.

Prerequisite: FLM&MDA 85B. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 118B. Writing Television II. 4 Units.**

Intermediate-level screenwriting class exploring the one-hour television drama format. Students write and workshop an original pilot, continuing work started in 118A, and finish a complete draft of the pilot script.

Prerequisite: FLM&MDA 118A. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 120A. Basic Production. 4 Units.**

Introduction to the basic apparatus of video/film production. The elementary essentials of production, including the use of camera and lenses, lighting, editing, and sound. Materials fee.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 120B. Intermediate Production. 4 Units.**

Students work on individual and group projects, utilizing skills and insights introduced in Film and Media Studies 120A. Materials fee.

Prerequisite: FLM&MDA 120A. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 120C. Production Workshop. 4 Units.**

As film and video are collaborative media, students form production groups and ultimately produce final 10-15-minute film/video projects. Materials fee.

Prerequisite: FLM&MDA 120B. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 130. Multicultural Topics in the Media. 4 Units.**

Investigation of media representations of gender, race, and sexuality in the United States. Topics include media images of and by one or more minority groups in the United States, including African Americans, Asian Americans, Chicano/Latinos, Native Americans, gays, and lesbians.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 139W. Writing on Film and Media. 4 Units.**

Writing on cinema, television, and/or digital culture, emphasizing identification of reliable sources, close readings, addressing academic, professional, and/or popular audiences. Requires at least 4,000 words of assigned composition.

Prerequisite: FLM&MDA 85A or FLM&MDA 85B or FLM&MDA 85C. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Film and Media Studies Majors only.

(Ib)

**FLM&MDA 143. Critical Theory of Television. 4 Units.**

Introduction to critical, theoretical, and scholarly understandings and analyses of television, which offer in-depth analyses of television programming, audience reception practices, and industry strategies of address.

Prerequisite: FLM&MDA 85B. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 144. Studies in New Media. 4 Units.**

Advanced analysis of the technologies, texts, theories, and cultures of computers, video games, networks, or platforms.

Prerequisite: FLM&MDA 85C. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 145. Popular Culture and Media. 4 Units.**

Considers the forms, ideologies, consumption, and marketing of popular entertainment and technologies. May focus on cultural studies methods, transnational approaches, and synergy between media.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 146. Sound Studies. 4 Units.**

Focuses on the production, theories, and meanings of sound recordings, music, and/or audio technologies. Topics may include the cultures of popular music and audio devices, music television, and theories of film sound.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 150. Audiences and Reception. 4 Units.**

Explores the dynamics of address, interpretation, and appropriation between film and media texts and their viewers. Topics may include reception studies, fandom, audience-defined modes of production, demographics, spectatorial pleasure, and historical approaches to audiences.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 151. Documentary and Experimental Film and Media. 4 Units.**

Examines nonfiction and/or experimental cinemas and media, such as documentary, the historical avant-garde, video art, and activist media. Students consider the specific aesthetics and ideologies of forms distinct from narrative feature films.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 160. National/Regional Cinemas and Media. 4 Units.**

National schools, period styles, or cultural movements beyond U.S. cinema, as defined by national borders or by geographic regions, such as Latin America. May be approached from a comparative perspective.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 161. Global/Transnational Cinemas and Media. 4 Units.**

Analyzes the multinational production, circulation, and reception of film and media texts beyond singular national borders or specific geographic regions. Topics may include transnational co-productions, exports, and diasporic reception.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 162. US Cinema . 4 Units.**

Explores the modes of production and distribution, aesthetics, and contexts that have shaped cinema in the United States. Topics may include classical Hollywood, American independent cinema, or periods such as 1970s cinema.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 185. Television and New Media. 4 Units.**

Advanced seminar focusing on special topics in television and new media. Past examples have included courses on media marketing and brand identity; television and sound; game theory; and other issues related to popular culture, broadcast media, and new media technologies.

Prerequisite: FLM&MDA 85B or FLM&MDA 85C. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 190. Special Topics in Film and Modern Media. 4 Units.**

Special issues concerned with film and media history, theory, and criticism.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 191. Special Topics in Critical Practice. 4 Units.**

Integrates critical analysis, historical, and theoretical methods with creative projects to illuminate film and media production and industries. May include courses in adaptation, writing television, media activism, writing the short film, performance studies, and movie title sequences.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 192. Special Topics in Advanced Film Production. 4 Units.**

Focuses on special topics in production. Culminates in final 6-10-minute group film projects. Topics include producing, acting, and/or directing in short films, experimental films, documentaries, television, and other media.

Prerequisite: FLM&MDA 120A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 193. Special Topics in Advanced Screenwriting. 4 Units.**

Focuses on special topics in screenwriting. Topics include adaptation, alternative screenwriting, writing the first feature, act two construction, and rewriting.

Prerequisite: FLM&MDA 117A or FLM&MDA 118A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 197. Professional Internship. 2-4 Units.**

Professional internship in the film, broadcast, and/or digital media industries designed to provide students with closely supervised professional experience to enhance their understanding of media from industrial, historical, and critical perspectives. Journal and final report required.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

Restriction: Upper-division students only.

**FLM&MDA 198. Creative Project. 2-4 Units.**

Creative project in screenwriting, filmmaking, videomaking, or Web or internet design intended to provide advanced production and creative writing training beyond the Film and Media Studies 117A-B-C or 120A-B-C series. Final project required.

Prerequisite: (FLM&MDA 85A and FLM&MDA 117A and FLM&MDA 117B and FLM&MDA 117C) or (FLM&MDA 120A and FLM&MDA 120B and FLM&MDA 120C). Satisfactory completion of the Lower-Division Writing requirement. Recommended: FLM&MDA 101A.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Upper-division students only.

**FLM&MDA 199. Directed Research. 4 Units.**

Directed reading and research under supervision of a faculty member in topic areas not covered by regular course offerings. Final research paper required.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only.

**FLM&MDA 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## French Courses

**FRENCH 1A. Fundamentals of French. 5 Units.**

First quarter of first-year French in a hybrid format. Students are taught to conceptualize in French as they learn to understand, read, write, and speak. Classes are conducted entirely in French.

Overlaps with FRENCH S1AB, FRENCH 1AB, FRENCH 1ABSP.

**FRENCH 1AB. Intensive Fundamentals of French. 7.5 Units.**

Intensive first half of first-year French. Students are taught to conceptualize in French as they learn to read, write, and speak. Students develop an awareness of and sensibility to French and Francophone life and culture through reading, viewing, and discussion.

Overlaps with FRENCH 1A, FRENCH 1B, FRENCH S1AB.

**FRENCH 1ABSP. Accelerated Fundamentals of French for Spanish Speakers. 5 Units.**

Accelerated first half of first-year French for Hispanophone students. Teaches conceptualizing in French while learning to read, write, and speak using knowledge of Spanish. Develops awareness of and sensibility to French and Francophone life and culture through reading, viewing, discussing.

Prerequisite: Two years of high school Spanish, one semester of college Spanish, or heritage speaker of Spanish.

Overlaps with FRENCH 1A, FRENCH 1AB, FRENCH S1AB, FRENCH 1B.

**FRENCH 1B. Fundamentals of French. 5 Units.**

First quarter of first-year French in a hybrid format. Students are taught to conceptualize in French as they learn to understand, read, write, and speak. Classes are conducted entirely in French.

Prerequisite: FRENCH 1A. FRENCH 1A with a grade of C or better

Overlaps with FRENCH S1AB, FRENCH S1BC, FRENCH 1AB, FRENCH 1BC, FRENCH 1ABSP, FRENCH 1BCSP.

**FRENCH 1BC. Intensive Fundamentals of French. 7.5 Units.**

Intensive second half of first-year French. Students are taught to conceptualize in French as they learn to read, write, and speak. Students develop an awareness of and sensibility to French and Francophone life and culture through reading, viewing, and discussion.

Prerequisite: FRENCH 1AB or FRENCH 1B or FRENCH S1AB. FRENCH 1AB with a grade of C or better. FRENCH 1B with a grade of C or better. FRENCH S1AB with a grade of C or better. Placement into FRENCH 1BC is also accepted.

Overlaps with FRENCH 1B, FRENCH 1C, FRENCH S1BC.

### (VI)

**FRENCH 1BCSP. Accelerated Fundamentals of French for Spanish Speakers. 5 Units.**

Accelerated second half of first-year French for Hispanophone students. Teaches conceptualizing in French while learning to read, write, and speak using knowledge of Spanish. Develops awareness of and sensibility to French and Francophone life and culture through reading, viewing, discussing.

Prerequisite: FRENCH 1ABSP or FRENCH 1AB or FRENCH S1AB or FRENCH 1B. FRENCH 1ABSP with a grade of C or better. FRENCH 1AB with a grade of C or better. FRENCH S1AB with a grade of C or better. FRENCH 1B with a grade of C or better. Two years of high school Spanish, one semester of college Spanish, or heritage speaker of Spanish.

Overlaps with FRENCH 1B, FRENCH 1BC, FRENCH S1BC, FRENCH 1C.

### (VI)

**FRENCH 1C. Fundamentals of French. 5 Units.**

First quarter of first-year French in a hybrid format. Students are taught to conceptualize in French as they learn to understand, read, write, and speak. Classes are conducted entirely in French.

Prerequisite: FRENCH 1B. FRENCH 1B with a grade of C or better

Overlaps with FRENCH S1BC, FRENCH 1BC, FRENCH 1BCSP.

**(VI)****FRENCH S1AB. Intensive Fundamentals of French. 7.5 Units.**

First half of first-year French in an intensified form and hybrid format. Students are taught to conceptualize in French as they learn to understand, read, write, and speak. Classes are conducted entirely in French.

Overlaps with FRENCH 1A, FRENCH 1B, FRENCH 1AB, FRENCH 1ABSP.

**FRENCH S1BC. Intensive Fundamentals of French. 7.5 Units.**

Second half of first-year French in an intensified form and hybrid format. Students are taught to conceptualize in French as they learn to understand, read, write, and speak. Classes are conducted entirely in French.

Prerequisite: FRENCH S1AB or FRENCH 1B or FRENCH 1AB or FRENCH 1ABSP. FRENCH S1AB with a grade of C or better. FRENCH 1B with a grade of C or better. FRENCH 1AB with a grade of C or better. FRENCH 1ABSP with a grade of C or better

Overlaps with FRENCH 1B, FRENCH 1C, FRENCH 1BC, FRENCH 1BCSP.

**(VI)****FRENCH 2A. Intermediate French. 4 Units.**

Texts of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in French.

Prerequisite: FRENCH 1C or FRENCH 1BC or FRENCH S1BC or FRENCH 1BCSP. FRENCH 1C with a grade of C or better. FRENCH 1BC with a grade of C or better. FRENCH S1BC with a grade of C or better. FRENCH 1BCSP with a grade of C or better. Placement into FRENCH 2A is also accepted.

Overlaps with FRENCH S2AB.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)****FRENCH 2AB. Intensive Intermediate French . 6 Units.**

Intensive first half of second-year French. Texts and films of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in French.

Prerequisite: FRENCH 1C or FRENCH 1BC or FRENCH S1BC. FRENCH 1C with a grade of C or better. FRENCH 1BC with a grade of C or better. FRENCH S1BC with a grade of C or better. Prior high school or college French is recommended. Placement into French 2AB is also accepted.

Overlaps with FRENCH 2A, FRENCH 2B, FRENCH S2AB.

**(VIII)****FRENCH 2B. Intermediate French. 4 Units.**

Texts of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in French.

Prerequisite: FRENCH 2A. FRENCH 2A with a grade of C or better

Overlaps with FRENCH S2AB, FRENCH S2BC.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment. FRENCH 2B and FRENCH S2AB and FRENCH S2BC may not be taken for full credit.

**(VIII)**

**FRENCH 2BC. Intensive Intermediate French . 6 Units.**

Intensive second half of second-year French. Texts and films of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in French.

Prerequisite: FRENCH S2AB or FRENCH 2AB. FRENCH S2AB with a grade of C or better. FRENCH 2AB with a grade of C or better. Prior high school or college French is recommended. Placement into French 2BC is also accepted.

Overlaps with FRENCH S2BC, FRENCH 2B, FRENCH 2C.

**(VIII)**

**FRENCH 2C. Intermediate French. 4 Units.**

Texts of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in French.

Prerequisite: FRENCH 2B or FRENCH S2AB. FRENCH 2B with a grade of C or better. FRENCH S2AB with a grade of C or better

Overlaps with FRENCH S2BC.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment. FRENCH 2C and FRENCH S2BC may not be taken for full credit.

**(VIII)**

**FRENCH S2AB. Intermediate French. 6 Units.**

First half of second-year French in an intensified form. Texts of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in French. Prior high school or college French recommended.

Prerequisite: FRENCH 1C or FRENCH 1BC or FRENCH S1BC. FRENCH 1C with a grade of C or better. FRENCH 1BC with a grade of C or better. FRENCH S1BC with a grade of C or better. Placement into FRENCH S2AB is also accepted.

Overlaps with FRENCH 2A, FRENCH 2B.

Restriction: FRENCH S2AB and FRENCH 2A and FRENCH 2B may not be taken for full credit.

**(VIII)**

**FRENCH S2BC. Intermediate French. 6 Units.**

Second half of second-year French in an intensified form. Texts of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in French. Prior high school or college French recommended.

Prerequisite: FRENCH S2AB or FRENCH 2B. FRENCH S2AB with a grade of C or better. FRENCH 2B with a grade of C or better

Overlaps with FRENCH 2C, FRENCH 2B.

Restriction: FRENCH S2BC and FRENCH 2B and FRENCH 2C may not be taken for full credit.

**(VIII)**

**FRENCH 10. French Peer Tutoring. 1 Unit.**

Tutoring Program in which advanced French students provide assistance to students at a lower level. One hour of tutoring per week.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**FRENCH 50. Topics in French Culture and the Modern World. 4 Units.**

Introductory course for non-majors. Focuses on France's role in the modern world and its cultural connections to Asia, the Middle East, Africa, Europe, and the Americas. Taught in English.

Repeatability: May be taken for credit 3 times as topics vary.

**(IV and VIII ).**

**FRENCH 97. Fundamentals of French (with Emphasis on Reading). 4 Units.**

Designed primarily for students interested in acquiring a solid reading knowledge of French, and to facilitate the understanding and translating of French texts dealing with a variety of disciplines.

Restriction: No French Majors.

**FRENCH 101A. Introduction to 19th-Century French Literature. 4 Units.**

Fiction, nonfiction, drama, and poetry of the 19th century studied in relationship to a specific literary or historical problem.

Prerequisite: FRENCH 2C or FRENCH S2BC

**FRENCH 101B. Introduction to 18th-Century French Literature. 4 Units.**

Literature and philosophy of the 18th century studied in relationship to a specific literary or historical problem.

Prerequisite: FRENCH 2C or FRENCH S2BC

**FRENCH 101C. Introduction to 20th-Century French Literature. 4 Units.**

Literatures of the French-speaking world studied in relationship to a specific literary or historical problem.

Prerequisite: FRENCH 2C or FRENCH S2BC

**FRENCH 102A. Grammar and Composition. 4 Units.**

Review of grammar taught in FRENCH 2A-B-C. Students gain facility in writing French and increase reading comprehension. Short texts and films are introduced to generate substantive discussion, and multiple short writing exercises are assigned to solidify skills. Formerly FRENCH 60.

Prerequisite or corequisite: FRENCH 2C or FRENCH 2BC or FRENCH S2BC. FRENCH 2C with a grade of C or better. FRENCH 2BC with a grade of C or better. FRENCH S2BC with a grade of C or better

**FRENCH 102B. Topics in Issues in French and Francophone Culture. 4 Units.**

Investigation of an issue of cultural significance in the francophone world through historical documents, literary works, and newspaper articles. Supplemented with films and/or other elements of popular culture. Multiple short writing assignments to solidify writing skills. Formerly FRENCH 61.

Prerequisite or corequisite: FRENCH 2C or FRENCH 2BC or FRENCH S2BC. FRENCH 2C with a grade of C or better. FRENCH 2BC with a grade of C or better. FRENCH S2BC with a grade of C or better

Repeatability: Unlimited as topics vary.

**FRENCH 102C. Translation. 4 Units.**

Introduction to the theory and practice of translation from French to English and English to French. Many opportunities provided to improve skills in writing and comprehension. Formerly FRENCH 62.

Prerequisite or corequisite: FRENCH 2C or FRENCH 2BC or FRENCH S2BC. FRENCH 2C with a grade of C or better. FRENCH 2BC with a grade of C or better. FRENCH S2BC with a grade of C or better

**FRENCH 102D. Topics in the Work World in French. 4 Units.**

A view into the world of work in French. Areas of study include international relations; French administration; and tensions between management and workers. Attention given to vocabulary and grammar of professional interactions in French. Formerly FRENCH 63.

Prerequisite or corequisite: FRENCH 2C or FRENCH 2BC or FRENCH S2BC. FRENCH 2C with a grade of C or better. FRENCH 2BC with a grade of C or better. FRENCH S2BC with a grade of C or better

Repeatability: Unlimited as topics vary.

**FRENCH 102E. Advanced French Language and Style. 4 Units.**

Intended for advanced students who wish to improve their expressive capabilities in French. Review of more nuanced grammar points. Emphasis placed on rhetoric, syntax, and precision. Advanced readings increase comprehension. Formerly FRENCH 64.

Prerequisite or corequisite: FRENCH 2C or FRENCH 2BC or FRENCH S2BC. FRENCH 2C with a grade of C or better. FRENCH 2BC with a grade of C or better. FRENCH S2BC with a grade of C or better

**FRENCH 116. Topics in 16th-Century French Literature. 4 Units.**

Examines the diverse literature of the Renaissance and the Age of Exploration.

Repeatability: Unlimited as topics vary.

**FRENCH 117. Topics in 17th-Century French Literature. 4 Units.**

Examines the age of drama and other vibrant forms in French literature of the period.

Prerequisite or corequisite: FRENCH 2C or FRENCH 2BC or FRENCH S2BC or FRENCH 60. FRENCH 2C with a grade of C or better. FRENCH 2BC with a grade of C or better. FRENCH S2BC with a grade of C or better. FRENCH 60 with a grade of C or better

Repeatability: Unlimited as topics vary.

**FRENCH 118. Topics in 18th-Century French Literature. 4 Units.**

Examines the literature and philosophy of the Enlightenment, the Ancient Régime, Classicism, and/or Revolution.

Prerequisite or corequisite: FRENCH 2C or FRENCH 2BC or FRENCH S2BC or FRENCH 60. FRENCH 2C with a grade of C or better. FRENCH 2BC with a grade of C or better. FRENCH S2BC with a grade of C or better. FRENCH 60 with a grade of C or better

Repeatability: Unlimited as topics vary.

**FRENCH 119. Topics in 19th-Century French Literature. 4 Units.**

Focuses on the literature of an era that experienced many modernist transformations.

Prerequisite or corequisite: FRENCH 2C or FRENCH 2BC or FRENCH S2BC or FRENCH 60. FRENCH 2C with a grade of C or better. FRENCH 2BC with a grade of C or better. FRENCH S2BC with a grade of C or better. FRENCH 60 with a grade of C or better

Repeatability: Unlimited as topics vary.

**FRENCH 120. Topics in 20th-Century French and Francophone Literature. 4 Units.**

A study of modern and contemporary literature and culture.

Prerequisite or corequisite: FRENCH 2C or FRENCH 2BC or FRENCH S2BC or FRENCH 60. FRENCH 2C with a grade of C or better. FRENCH 2BC with a grade of C or better. FRENCH S2BC with a grade of C or better. FRENCH 60 with a grade of C or better

Repeatability: Unlimited as topics vary.

**FRENCH 125. Topics in African Literature of French Expression. 4 Units.**

Introduction to the principal African and Caribbean works written in French. Offers opportunity to study literature and culture in French in a non-European context. Lectures and papers in French.

Prerequisite or corequisite: FRENCH 2C or FRENCH 2BC or FRENCH S2BC or FRENCH 60. FRENCH 2C with a grade of C or better. FRENCH 2BC with a grade of C or better. FRENCH S2BC with a grade of C or better. FRENCH 60 with a grade of C or better

Repeatability: Unlimited as topics vary.

**FRENCH 127. Topics in Francophone Literature and Culture. 4 Units.**

Literature and cultures of the francophone world.

Repeatability: Unlimited as topics vary.

**FRENCH 139W. Literature and Society. 4 Units.**

In English. Readings of masterpieces of French literature in their social, political, and historical contexts. Requires at least 4,000 words of assigned composition based on French works. Several essays required.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. French Majors have first consideration for enrollment.

**(Ib)**

**FRENCH 140. Topics in French Literary Genre. 4 Units.**

Examines the development and transformation of a single genre, such as the poem or the novel.

Prerequisite or corequisite: FRENCH 2C or FRENCH 2BC or FRENCH S2BC or FRENCH 60. FRENCH 2C with a grade of C or better. FRENCH 2BC with a grade of C or better. FRENCH S2BC with a grade of C or better. FRENCH 60 with a grade of C or better

Repeatability: Unlimited as topics vary.

**FRENCH 150. Topics in French Literature and Culture. 4 Units.**

Study of a theme, movement, or problem crucial to understanding French Literature and Culture.

Repeatability: Unlimited as topics vary.

**FRENCH 160. French Cinema. 4 Units.**

Study of a period, movement, or theme in French or Francophone cinema.

Repeatability: May be taken for credit 2 times as topics vary.

**FRENCH 170. Topics in History and Literature. 4 Units.**

Examines the dialogue between historical events and literary texts.

Repeatability: Unlimited as topics vary.

**FRENCH 171. Politics and Literature. 4 Units.**

Examines the role played by politics and ethics in French literature, film, and culture.

Repeatability: Unlimited as topics vary.

**FRENCH 180. Topics in Theory and Criticism. 4 Units.**

Advanced study of theoretical and critical texts.

Repeatability: Unlimited as topics vary.

**FRENCH 185. Junior/Senior Seminar in French Literature and Culture. 4 Units.**

Required intensive writing course for French majors to explore in depth selected topic in French literature and culture. Students complete major independent research project on topic studied, making use of literary and critical materials in their capstone essay. In French.

Prerequisite: FRENCH 100A and FRENCH 100B and FRENCH 101A and FRENCH 101B and FRENCH 101C. One course from FRENCH 101A, FRENCH 101B, or FRENCH 101C may be taken as a corequisite.

**FRENCH 199. Special Studies in French. 1-4 Units.**

A project proposal is prepared by the student and approved by the faculty member who directs the project. Procedure must be completed by the end of the first week of classes.

Repeatability: Unlimited as topics vary.

Restriction: Repeatability: once for M.A. candidates; twice for Ph.D. candidates.

**FRENCH 216. Studies in Renaissance Literature. 4 Units.**

Advanced study of a topic in the Renaissance period.

Repeatability: Unlimited as topics vary.

**FRENCH 217. Studies in Seventeenth-Century Literature. 4 Units.**

Advanced study of a topic in the 17th century.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**FRENCH 218. Studies in Eighteenth-Century Literature. 4 Units.**

Advanced study of a topic in the 18th century.

Repeatability: Unlimited as topics vary.

**FRENCH 219. Studies in Nineteenth-Century Literature. 4 Units.**

Advanced study of a topic in the 19th century.

Repeatability: Unlimited as topics vary.

**FRENCH 220. Studies in Twentieth-Century Literature. 4 Units.**

Advanced study of a topic in the 20th and 21st century.

Repeatability: May be taken for credit 9 times as topics vary.

Restriction: Graduate students only.

**FRENCH 225. Francophone Literature and Culture. 4 Units.**

Studies in different francophone literatures and cultures (of Canada, the Caribbean, West and North Africa, and Southeast Asia).

Repeatability: Unlimited as topics vary.

**FRENCH 231. Studies in Fiction . 4 Units.**

Examines the art of fiction.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**FRENCH 232. Studies in Nonfictional Prose. 4 Units.**

Examines non-fictional genres such as the essay and the memoir.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**FRENCH 233. Studies in Poetry and Poetics. 4 Units.**

Examines the genre of poetry and theories of poetry.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**FRENCH 240. Studies on a Major Writer. 4 Units.**

Focused study of one author.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**FRENCH 250. Studies in Theory and Criticism. 4 Units.**

Advanced study of a topic in theory and/or criticism.

Repeatability: Unlimited as topics vary.

**FRENCH 254. History and Literature. 4 Units.**

Advanced study of literary works in their historical context.

Repeatability: Unlimited as topics vary.

**FRENCH 272. Cultural Studies . 4 Units.**

Examines the theoretical paradigm of cultural studies.

Repeatability: Unlimited as topics vary.

**FRENCH 290. Research in French Language and Literature. 4 Units.**

A project proposal is prepared by the student and approved by the faculty member who directs the project. Procedure must be completed by the end of the first week of classes. Limit: Once for M.A. candidates; twice for Ph.D. candidates.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only. French Majors only.

**FRENCH 299. Dissertation Research. 4-12 Units.**

For graduate students writing a dissertation with a faculty member in French.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Humanities students only.

**FRENCH 399. University Teaching. 4 Units.**

For graduate students completing a course on foreign language pedagogy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Humanities students only.

## Gender and Sexuality Studies Courses

### **GEN&SEX 20. Introduction to Queer Studies. 4 Units.**

Study of sexuality from the perspective of lesbian, gay, queer, transgender scholarship spanning humanities, social sciences, and arts.

(IV and VII ).

### **GEN&SEX 50A. Gender and Feminism in Everyday Life. 4 Units.**

What is gender? Why does studying it matter? Explores how feminism has understood not only gender as a category of social analysis, but how gender structures personal identities, family, citizenship, work and leisure, social policy, sexuality, and language.

(IV, VII)

### **GEN&SEX 50B. Gender and Power. 4 Units.**

From workplace to home to schools to prisons, how are societal institutions and politics “gendered”? Examines power and inequalities around gender, race, class, and sexuality in national and transnational contexts.

(IV, VII)

### **GEN&SEX 50C. Gender and Popular Culture. 4 Units.**

An investigation of gender, race, and sexuality in film, TV, video, music, and advertising, with attention to the ways that popular culture shapes understandings of technology, national identities, leisure and work, historical memory, international communication, and multicultural representation.

(IV, VII)

### **GEN&SEX 60A. Gender and Science. 4 Units.**

Examines science from a variety of feminist viewpoints in order to explore how science influences everyday life. Special attention is given to the ways science shapes our understanding of gender, race, and sexuality.

(III)

### **GEN&SEX 60B. Gender and Law. 4 Units.**

Introduction to the relationship between gender, race, sexuality, and the law. Critical thinking about how law defines citizenship, political representation, and democracy, focusing on the history of legal reform undertaken in the name of women as a social group.

(III)

### **GEN&SEX 60C. Gender and Religion. 4 Units.**

Introduces the topic of religion in a feminist context by performing cross-cultural exploration of gender, authority, and faith in various traditions. Study includes (but is not limited to) writings of contemporary Jewish, Christian, and Muslim feminists.

Same as REL STD 61.

(III and VIII ).

### **GEN&SEX 100A. Feminism and Social Change. 4 Units.**

Explores feminist modes of knowledge production in relation to histories and activist practices of various social movements. Examines the kinds of information, research, ideas, theories, and concepts that underlie feminist cultural analysis and social movement organizing.

### **GEN&SEX 100B. Feminist Theory. 4 Units.**

Introduction to historical traditions in theory and various conceptual frameworks informing scholarship in gender studies, sexuality studies, and women's studies as a field of critical inquiry.

### **GEN&SEX 100C. Feminist Cultural Studies. 4 Units.**

Investigation of the theories and methods that inform the feminist study of culture. Focuses on the interpretation of the visual arts and literature created by, and predominately for, women.

### **GEN&SEX 100D. Queer Knowledges. 4 Units.**

Explores the emergence of historical elaboration of non-normative sexual identities, practices, and communities; focuses on medical, legal, literary, aesthetic, scientific, and religious notions about homosexuality and appropriations and subversions of these notions by queer people.

### **GEN&SEX 110A. Gender, State, and Nation. 4 Units.**

Examination of gender and sexuality in relation to the production of identities created through participation in state and nation. Examines complexity of relationship between feminism and nationalism, feminism and the state.

**GEN&SEX 110B. Money, Sex, and Power. 4 Units.**

Examination of gender and sexuality in relation to the emergence of the modern world, modernity, and capitalism; commodification, circulation, and transnational exchanges relating to race, gender, class, sexuality, religion, and nationality.

**GEN&SEX 110D. The Politics of Health and Medicine. 4 Units.**

Focuses on cultural and political-economic analysis and representations of disease both within the U.S. and globally.

**GEN&SEX 120A. Histories of Sexuality. 4 Units.**

Examines the historical production of non-normative sexual and gender identities, bodies, practices, and communities. Explores how past formations inform and shape the present and future.

**GEN&SEX 120B. Image Problems. 4 Units.**

Examination of scholarly approaches to gender stereotypes and politics of representation as they present possibilities for critical analysis and produce problems and limitations; how powerful ideas of gender intersect with other forms of social differentiation such as race and class.

**GEN&SEX 120C. Practices of Embodiment. 4 Units.**

Explores how science, medicine, and law have shaped the understanding of differentiated bodies; examines shifting norms and ideals about producing, shaping, adorning, and dressing gendered bodies across diverse historical, cultural, social, economic, and spatial contexts.

**GEN&SEX 139. Topics in Gender Studies. 4 Units.**

Various topics in gender studies. Encompasses issues of gender, culture, race and class, including issues of sexualities and social justice.

Repeatability: Unlimited as topics vary.

**GEN&SEX 155. Topics in Gender and Sexuality Studies. 4 Units.**

Designed to provide students with an opportunity to conduct advanced work in Gender and Sexuality Studies.

Repeatability: Unlimited as topics vary.

**GEN&SEX 157. Topics in Queer Studies. 4 Units.**

Explores issues in queer studies from one or more of the following perspectives: theoretical, historical, legal, economic, political, sociological, and representation in the arts.

Repeatability: Unlimited as topics vary.

**GEN&SEX 165F. Gender and Technology. 4 Units.**

Using a variety of disciplinary methods, examines how various technological processes and products produce culturally complex meanings associated with gender and technology.

**GEN&SEX 167A. Militarism and Gender. 4 Units.**

Examination of feminist approaches to militarism, war, and political violence; drawing on representations of women as both victims of and participants in military violence; effects of militarism on formations of gender; effects of military industrial complex on nationalism and identity.

Same as INTL ST 153F.

**GEN&SEX 170. Topics in Gender, Feminism, Literature, and Language. 4 Units.**

Topics cover issues in language and literature which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 171. Topics in Gender, Feminism, and History. 4 Units.**

Topics cover issues in history which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 171A. Sex and Conquest in Latin America. 4 Units.**

Competing ideas of masculinity and femininity, sexual violence, sexual identities, and gendered hierarchies informed how the Spanish engaged in military and religious domination of Mexican and Andean communities, as well as the forms of native resistance throughout colonial Latin America.

Same as ANTHRO 140, CHC/LAT 150A, HISTORY 160.

**GEN&SEX 174. Topics in Gender, Feminism, and the Arts. 4 Units.**

Topics cover issues in the arts which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 175. Topics in Gender, Feminism, and the Media. 4 Units.**

Topics cover issues in the media which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 180. Topics in Gender, Feminism, and Anthropology. 4 Units.**

Topics cover issues in Anthropology which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 181. Topics in Gender, Feminism, and Cognitive Psychology. 4 Units.**

Topics cover issues in cognitive psychology which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 182. Topics in Gender, Feminism and Economics. 4 Units.**

Topics cover issues in economics which relate to women and gender or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 183. Topics in Gender, Feminism, and Sociology. 4 Units.**

Topics cover issues in sociology which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 184. Topics in Gender, Feminism, and Political Science. 4 Units.**

Topics cover issues in political science which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 185. Topics in Gender, Feminism, and Social Sciences. 4 Units.**

Topics cover issues in social sciences which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 187. Topics in Gender, Feminism, and Social Ecology. 4 Units.**

Topics cover issues in social ecology which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 188. Topics in Gender, Feminism, and Science. 4 Units.**

Topics cover issues in science which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 189. Topics in Gender, Feminism, and Interdisciplinary Studies. 4 Units.**

Topics cover issues in interdisciplinary studies which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 190. Topics in Sexualities Studies. 4 Units.**

Topics cover issues in the humanities, social sciences, sciences, and arts that relate to critical inquiry of sexualities.

Repeatability: Unlimited as topics vary.

**GEN&SEX 197. Senior Seminar in Gender and Sexuality Studies. 4 Units.**

Students read advanced scholarship in Gender and Sexuality Studies and complete a major seminar paper.

Prerequisite: Satisfactory completion of the Upper-Division Writing requirement.

Restriction: Gender and Sexuality Studies Majors only.

**GEN&SEX 199. Independent Study . 1-4 Units.**

Directed reading and research in consultation with a faculty member. Substantial written work required. Includes independent study, involving 3-12 hours a week.

Repeatability: May be repeated for credit unlimited times.

**GEN&SEX 200A. Feminist Knowledge and Social Change. 4 Units.**

Provides a broad and introductory overview of Women's Studies and feminist knowledge, including key concepts, theoretical frameworks, disciplinary approaches and methods, and critical debates that have shaped the field.

Repeatability: May be taken for credit 2 times.

**GEN&SEX 200B. Problems in Feminist Research. 4 Units.**

Colloquium on analytic approaches to interdisciplinary feminist research in Women's Studies and exploration of how feminist knowledges are produced in different academic disciplines.

Repeatability: May be taken for credit 2 times.

**GEN&SEX 201. Special Topics in Feminist Studies. 4 Units.**

Seminars on various topics in feminist studies.

Repeatability: Unlimited as topics vary.

**GEN&SEX 210A. Topics in Graduate Feminist Theory. 4 Units.**

In-depth introduction to various theoretical frameworks that have and continue to inform scholarship in Women's Studies including (but not limited to) identity, representation, and political economy.

Repeatability: Unlimited as topics vary.

**GEN&SEX 290. Directed Research. 2-12 Units.**

Directed graduate study/research in Gender and Sexuality Studies.

Repeatability: May be taken for credit for 24 units.

Restriction: Graduate students only.

**GEN&SEX 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

## German Courses

**GERMAN 1A. Fundamentals of German. 5 Units.**

Emphasizes the development of meaningful communicative skills in German for the purposes of interaction with German speakers and beginning study of German. With a learner-centered approach, the courses help students develop speaking, listening, reading, writing, and cultural skills and knowledge.

Overlaps with GERMAN S1AB, GERMAN 1AB.

**GERMAN 1AB. Intensive German Fundamentals . 7.5 Units.**

First half of first-year German in a time-intensive form. Development of meaningful communicative skills for the purposes of interaction with German speakers and beginning study of German. Learner-centered approach develops speaking, listening, reading, writing, and cultural skills and knowledge. Materials fee.

Prerequisite: Placement into GERMAN 1AB.

Overlaps with GERMAN S1AB, GERMAN 1A, GERMAN 1B.

Restriction: GERMAN 1AB and GERMAN 1A and GERMAN 1B and GERMAN S1AB may not be taken for full credit.

**GERMAN 1B. Fundamentals of German. 5 Units.**

Emphasizes the development of meaningful communicative skills in German for the purposes of interaction with German speakers and beginning study of German. With a learner-centered approach, students develop speaking, listening, reading, writing, and cultural skills and knowledge.

Prerequisite: GERMAN 1A. GERMAN 1A with a grade of C or better. Placement into GERMAN 1B is also accepted.

Overlaps with GERMAN S1AB, GERMAN S1BC, GERMAN 1AB, GERMAN 1BC.

**GERMAN 1BC. Intensive German Fundamentals. 7.5 Units.**

Second half of first-year German in a time-intensive form. Development of meaningful communicative skills for the purposes of interaction with German speakers and beginning study of German. Learner-centered approach develops speaking, listening, reading, writing, and cultural skills and knowledge. Materials fee.

Prerequisite: GERMAN 1AB or GERMAN 1B or GERMAN S1AB. GERMAN 1AB with a grade of C or better. GERMAN 1B with a grade of C or better. GERMAN S1AB with a grade of C or better. Placement into GERMAN 1BC is also accepted.

Overlaps with GERMAN 1B, GERMAN 1C, GERMAN S1BC.

Restriction: GERMAN 1BC and GERMAN 1B and GERMAN 1C and GERMAN S1AB may not be taken for full credit.

**(VI)****GERMAN 1C. Fundamentals of German. 5 Units.**

Emphasizes the development of meaningful communicative skills in German for the purposes of interaction with German speakers and beginning study of German. With a learner-centered approach, students develop speaking, listening, reading, writing, and cultural skills and knowledge.

Prerequisite: GERMAN 1B. GERMAN 1B with a grade of C or better. Placement into GERMAN 1C is also accepted.

Overlaps with GERMAN 1BC, GERMAN S1BC.

**(VI)****GERMAN S1AB. Fundamentals of German. 7.5 Units.**

First half of first-year German in a time-intensive form. Development of meaningful communicative skills for the purposes of interaction with German speakers and beginning study of German. Learner-centered approach develops speaking, listening, reading, writing, and cultural skills and knowledge.

Overlaps with GERMAN 1A, GERMAN 1B, GERMAN 1AB.

Restriction: GERMAN S1AB and GERMAN 1A and GERMAN 1B and GERMAN 1AB may not be taken for full credit.

**GERMAN S1BC. Fundamentals of German. 7.5 Units.**

Second half of first-year German in a time-intensive form. Development of meaningful communicative skills for the purposes of interaction with German speakers and beginning study of German. Learner-centered approach develops speaking, listening, reading, writing, and cultural skills and knowledge.

Prerequisite: GERMAN 1AB or GERMAN 1B or GERMAN S1AB. GERMAN 1AB with a grade of C or better. GERMAN 1B with a grade of C or better. GERMAN S1AB with a grade of C or better. Placement into GERMAN S1BC is also accepted.

Overlaps with GERMAN 1B, GERMAN 1C, GERMAN 1BC.

Restriction: GERMAN 1BC and GERMAN S1BC and GERMAN 1B and GERMAN 1C may not be taken for full credit.

**(VI)****GERMAN 2A. Intermediate German. 4 Units.**

Emphasizes communicative skills for the purposes of interaction with German speakers and intermediate study of German. With a learner-centered approach, helps students develop reading, writing, speaking, listening, grammatical, and cultural skills and knowledge. First-year grammar is reviewed and expanded.

Prerequisite: GERMAN 1BC or GERMAN 1C or GERMAN S1BC. GERMAN 1BC with a grade of C or better. GERMAN 1C with a grade of C or better. GERMAN S1BC with a grade of C or better. Placement into GERMAN 2A is also accepted.

Overlaps with GERMAN S2AB.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)**

**GERMAN 2B. Intermediate German. 4 Units.**

Emphasizes communicative skills for the purposes of interaction with German speakers and intermediate study of German. With a learner-centered approach, helps students develop reading, writing, speaking, listening, grammatical, and cultural skills and knowledge. First-year grammar is reviewed and expanded.

Prerequisite: GERMAN 2A. GERMAN 2A with a grade of C or better. Placement into GERMAN 2B is also accepted.

Overlaps with GERMAN S2AB, GERMAN S2BC.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)**

**GERMAN 2C. Intermediate German. 4 Units.**

Emphasizes communicative skills for the purposes of interaction with German speakers and intermediate study of German. With a learner-centered approach, helps students develop reading, writing, speaking, listening, grammatical, and cultural skills and knowledge. First-year grammar is reviewed and expanded.

Prerequisite: GERMAN 2B. GERMAN 2B with a grade of C or better. Placement into GERMAN 2C is also accepted.

Overlaps with GERMAN S2BC.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)**

**GERMAN S2AB. Intermediate German. 6 Units.**

First half of second-year German in a time-intensive form. Emphasizes communicative skills for the purposes of interaction with German speakers and intermediate study of German. Learner-centered approach develops reading, writing, speaking, listening, grammatical, and cultural skills and knowledge.

Prerequisite: GERMAN 1C or GERMAN S1BC

Overlaps with GERMAN 2A, GERMAN 2B.

Restriction: GERMAN S2AB and GERMAN 2A and GERMAN 2B may not be taken for full credit.

**(VIII)**

**GERMAN S2BC. Intermediate German. 6 Units.**

Second half of second-year German in a time-intensive form. Emphasizes communicative skills for the purposes of interaction with German speakers and intermediate study of German. Learner-centered approach develops reading, writing, speaking, listening, grammatical, and cultural skills and knowledge.

Prerequisite: GERMAN 2B or GERMAN S2AB. GERMAN 2B with a grade of C or better. GERMAN S2AB with a grade of C or better

Overlaps with GERMAN 2B, GERMAN 2C.

Restriction: GERMAN S2BC and GERMAN 2B and GERMAN 2C may not be taken for full credit.

**(VIII)**

**GERMAN 53. Advanced Conversation. 2 Units.**

Includes reading of political and cultural material. Conducted in German.

Prerequisite or corequisite: GERMAN 2C

Repeatability: May be repeated for credit unlimited times.

**GERMAN 97. Fundamentals of German (with Emphasis on Reading). 4 Units.**

Primarily for students interested in acquiring a solid reading knowledge of German. Facilitates comprehension and translation of texts in various disciplines. Does not serve as prerequisite for any higher-level German courses or fulfill any undergraduate foreign language requirement.

Repeatability: May be taken for credit 3 times.

Restriction: No German Studies Majors.

**GERMAN 101. Topics in Introduction to German Literature and Culture. 4 Units.**

Sample interpretations of texts in their cultural and historical contexts. Introduction to critical language in German.

Prerequisite or corequisite: GERMAN 2C. GERMAN 2C with a grade of C or better

Repeatability: Unlimited as topics vary.

**GERMAN 102. Topics in German Culture and Society. 4 Units.**

Interdisciplinary introduction to German culture from the perspective of its aesthetic, social, and political aspects. Methodological problems arising from an analysis of culture in its historical context.

Prerequisite or corequisite: GERMAN 2C. GERMAN 2C with a grade of C or better

Repeatability: Unlimited as topics vary.

**GERMAN 103. Topics in German Film. 4 Units.**

Introduction to the history and interpretation of German film within its cultural and social contexts. Enhances German grammar knowledge and vocabulary and develops sophisticated speaking, writing, and reading skills.

Prerequisite or corequisite: GERMAN 2C. GERMAN 2C with a grade of C or better

Repeatability: Unlimited as topics vary.

**GERMAN 104. Topics in German Linguistics. 4 Units.**

Introduces German or other Germanic-language linguistic, sociolinguistic, or ethnography-of-communication topics. Taught in German.

Prerequisite or corequisite: GERMAN 2C. GERMAN 2C with a grade of C or better

Repeatability: Unlimited as topics vary.

**GERMAN 105. German for Professions . 4 Units.**

Explores the structure of German business practices, including in scientific fields and engineering, while developing verbal and written skills important for professional life in Germany. Taught in German.

Prerequisite or corequisite: GERMAN 2C. GERMAN 2C with a grade of C or better

**GERMAN 115. Topics in Advanced German for Business and Economics. 4 Units.**

Explores the structure of the German economy and business practices while developing advanced verbal and written skills important for professional life in Germany. Taught in German.

Prerequisite or corequisite: GERMAN 101 or GERMAN 102 or GERMAN 103 or GERMAN 104 or GERMAN 105

Repeatability: Unlimited as topics vary.

**GERMAN 118. Topics in Studies in the Age of Goethe. 4 Units.**

Individual authors such as Lessing, Goethe, Schiller, Kleist, and Hölderlin, or the drama of the 'angry young men' of the German 1770s.

Prerequisite or corequisite: GERMAN 101 or GERMAN 102 or GERMAN 103 or GERMAN 104 or GERMAN 105

Repeatability: Unlimited as topics vary.

**GERMAN 119. Topics in 19th Century German Literature and Culture. 4 Units.**

Individual authors such as Büchner, Grillparzer, Keller, and Nietzsche, or broader social-literary phenomena.

Prerequisite or corequisite: GERMAN 101 or GERMAN 102 or GERMAN 103 or GERMAN 104 or GERMAN 105

Repeatability: Unlimited as topics vary.

**GERMAN 120. Topics in 20th Century German Literature and Culture. 4 Units.**

Individual authors such as Thomas Mann, Brecht, and Kafka, or topics addressing questions of genre and/or social-literary problems.

Prerequisite or corequisite: GERMAN 101 or GERMAN 102 or GERMAN 103 or GERMAN 104 or GERMAN 105

Repeatability: Unlimited as topics vary.

**GERMAN 130. Topics in German Literature and Culture. 4 Units.**

Literary and cultural topics not fully contained within the periods listed above, such as 'German Comedy' and 'Turn-of-the-Century Vienna.'

Prerequisite or corequisite: GERMAN 101 or GERMAN 102 or GERMAN 103 or GERMAN 104 or GERMAN 105

Repeatability: Unlimited as topics vary.

**GERMAN 140. Topics in Literary Theory and Criticism. 4 Units.**

In English. Theoretical dimensions of literary criticism and the German philosophical tradition. Topics have included Marxism, Freudian thought, German Idealist aesthetics, Historicism, twentieth-century hermeneutics, Frankfurt School, and Rezeptionsästhetik.

Repeatability: Unlimited as topics vary.

**GERMAN 140W. Topics in Literary Theory and Criticism. 4 Units.**

In English. Theoretical dimensions of literary criticism and the German philosophical tradition. Topics have included Marxism, Freudian thought, German Idealist aesthetics, Historicism, twentieth-century hermeneutics, Frankfurt School, and Rezeptionsästhetik.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only.

**(Ib)**

**GERMAN 150. German Literature and Culture in Translation. 4 Units.**

In English. Major works in Germanic literature and culture in context.

Repeatability: Unlimited as topics vary.

**GERMAN 150W. German Literature and Culture in Translation. 4 Units.**

In English. Major works in Germanic literature and culture in context.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only.

**(Ib)**

**GERMAN 160. German Cinema.**

Historical, theoretical, and comparative perspectives on German cinema.

Repeatability: Unlimited as topics vary.

**GERMAN 160W. German Cinema. 4 Units.**

Historical, theoretical, and comparative perspectives on German cinema.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only.

**(Ib)**

**GERMAN 170. Topics in German Linguistics. 4 Units.**

Explores linguistic, sociolinguistic, or ethnography-of-communication topics of German or other Germanic languages (Swedish, Icelandic, Yiddish, and others). Taught in English.

Repeatability: Unlimited as topics vary.

**GERMAN 170W. Topics in German Linguistics. 4 Units.**

Explores linguistic, sociolinguistic, or ethnography-of-communication topics of German or other Germanic languages (Swedish, Icelandic, Yiddish, and others). Taught in English.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only.

**(Ib)****GERMAN 197. German Internship . 4 Units.**

In this internship course, students will engage in professional practice (e.g., Engineering, Business Administration, government) in a German setting and thereby increase their knowledge of German language and culture in a setting beyond the academic classroom.

Prerequisite: GERMAN 2C

Grading Option: Pass/no pass only.

**GERMAN 199. Independent Study. 1-4 Units.**

Independent research with German faculty.

Repeatability: May be repeated for credit unlimited times.

**GERMAN 200. Literary Criticism . 4 Units.**

Topics in literary criticism.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**GERMAN 210. Literary Theory . 4 Units.**

Topics in literary theory.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**GERMAN 220. Selected Topics in German Linguistics . 4 Units.**

Topics in German linguistics.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**GERMAN 230. Literary and Cultural History. 4 Units.**

Topics in literary and cultural history.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**GERMAN 290. Independent Study. 4 Units.**

Counted toward course requirements for the M.A. or Ph.D. A term paper or project is required.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Humanities students only.

**GERMAN 298. Independent Directed Reading. 4-12 Units.**

For students preparing for doctoral examination.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**GERMAN 299. Dissertation Research. 4-12 Units.**

For students who have been admitted to doctoral candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Humanities students only.

**GERMAN 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Global Cultures Courses

**GLBLCLT 103A. Global Cultures I . 4 Units.**

Introduction to the processes by which economies, cultural practices, national entities, groups, individuals, and personal identities have undergone globalization. General background and methodological tools for understanding problems and processes of globalization.

Repeatability: Unlimited as topics vary.

**GLBLCLT 103B. Global Cultures II . 4 Units.**

Introduction to the processes by which economies, cultural practices, national entities, groups, individuals, and personal identities have undergone globalization. Explores how globalization has manifested itself in specific topics, periods, or societies.

Repeatability: Unlimited as topics vary.

**GLBLCLT 105. Language Origins: Evolution, Genetics, and the Brain. 4 Units.**

Examines how human language(s) may have originated. Studies pertinent techniques (reconstruction) and addresses related questions, including is our language faculty inborn (i.e., genetically encoded)? Can brain imaging and population genetics research help to unlock this mystery of human evolution?.

Same as ANTHRO 152A, LSCI 175, HISTORY 135G.

**GLBLCLT 191. Senior Seminar:Topics in Global Cultures. 4 Units.**

Students explore a topic(s) concerning processes and/or problems of globalization from an interdisciplinary perspective and build on their critical and analytical skills when investigating cultural and other phenomena that cut across national borders. Research assignments, class presentations, final seminar paper.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only.

**GLBLCLT 199. Independent Study. 1-4 Units.**

Directed reading and research in consultation with a faculty advisor. Substantial written work required.

Repeatability: May be repeated for credit unlimited times.

## Global Middle East Studies Courses

**GLBL ME 60A. Humanities and Arts: Problems and Methods for Global Middle East Studies. 4 Units.**

Introduces students to the broad set of humanities and arts approaches to studying the Middle East as a global zone of cultural, political, and economic interaction.

(IV and VIII ).

**GLBL ME 60B. Social Sciences: Problems and Methods for Global Middle East Studies. 4 Units.**

Introduces students to the broad set of social sciences approaches to studying the Middle East as a global zone of cultural, political, and economic interaction.

(III and VIII ).

**GLBL ME 60C. Social Ecology and Sciences: Problems and Methods for Global Middle East Studies. 4 Units.**

Introduces students to the broad set of approaches to studying the Middle East as a global zone of cultural, political, and economic interaction, focusing on the disciplines related to Social Ecology.

(III and VIII ).

**GLBL ME 100W. Research and Writing for Global Middle East Studies. 4 Units.**

Research and writing course for Global Middle East Studies majors. The primary focus is to refine the skills necessary for students to engage in independent research and writing in Global Middle East Studies.

Prerequisite or corequisite: GLBL ME 60A or GLBL ME 60B or GLBL ME 60C. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Global Middle East Studies Majors have first consideration for enrollment.

(Ib)

## Greek Courses

**GREEK 1A. Fundamentals of Greek. 5 Units.**

Elements of Classical Greek grammar, syntax, and vocabulary.

Overlaps with GREEK S1AB.

Restriction: GREEK 1A and GREEK S1AB may not be taken for full credit.

**GREEK 1B. Fundamentals of Greek. 5 Units.**

Elements of Classical Greek grammar, syntax, and vocabulary.

Prerequisite: GREEK 1A. GREEK 1A with a grade of C or better

Overlaps with GREEK S1AB, GREEK S1BC.

Restriction: GREEK 1B and GREEK S1AB and GREEK S1BC may not be taken for full credit.

**GREEK 1C. Fundamentals of Greek. 5 Units.**

Introduction to reading texts.

Prerequisite: GREEK 1B. GREEK 1B with a grade of C or better

Overlaps with GREEK S1BC.

Restriction: GREEK 1C and GREEK S1BC may not be taken for full credit.

(VI)

**GREEK 99. Special Studies in Greek. 1-4 Units.**

Lower-division level independent research with Greek faculty.

Repeatability: May be repeated for credit unlimited times.

**GREEK 100. Topics in Attic Greek. 4 Units.**

Selected readings in Attic Greek prose and poetry. Authors may include Xenophon, Lysias, Antiphon, Euripides, and others. Selections from prose and poetry will be read each quarter. Grammar and syntax review included.

Prerequisite: GREEK 1C. GREEK 1C with a grade of C or better. Placement into GREEK 100 is also accepted.

Repeatability: Unlimited as topics vary.

**GREEK 103. Seminar in Greek Prose. 4 Units.**

Specialized and focused study of a particular Greek prose author or topic.

Prerequisite: GREEK 100

Repeatability: Unlimited as topics vary.

**GREEK 104. Seminar in Greek Poetry. 4 Units.**

Specialized and focused study of a particular topic or author of Greek poetry.

Prerequisite: GREEK 100

Repeatability: Unlimited as topics vary.

**GREEK 198. Directed Group Study. 4 Units.**

Special topics in Greek culture and civilization through directed reading and research.

Repeatability: May be repeated for credit unlimited times.

**GREEK 199. Independent Studies in Greek. 1-4 Units.**

Independent research with Greek faculty.

Repeatability: May be repeated for credit unlimited times.

## Hebrew Courses

**HEBREW 1A. Fundamentals of Hebrew. 5 Units.**

Designed for students with little or no exposure to Hebrew. May focus on Biblical Hebrew and/or modern Hebrew. Students learn the writing system and basics of grammar via latest pedagogical materials. Topics in Jewish culture are also included.

Prerequisite: Placement into HEBREW 1A is also accepted.

**HEBREW 1C. Fundamentals of Hebrew. 5 Units.**

Designed for students with little or no exposure to Hebrew. May focus on Biblical Hebrew and/or modern Hebrew. Students learn the writing system and basics of grammar via latest pedagogical materials. Topics in Jewish culture are also included.

Prerequisite: HEBREW 1B. HEBREW 1B with a grade of C or better. Placement into HEBREW 1C is also accepted.

**(VI)**

**HEBREW 10A. Hebrew Peer-to-Peer Language Mentor Program. 1 Unit.**

Peer-to-Peer Language Mentor Program in which student mentors work with student mentees to increase the language skills of both participants. One hour weekly meetings. HEBREW 10A is for language mentors.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**HEBREW 10B. Hebrew Peer-to-Peer Language Mentor Program. 1 Unit.**

Peer-to-Peer Language Mentor Program in which student mentors work with student mentees to increase the language skills of both participants. One hour weekly meetings. HEBREW 10B is for language mentors.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**HEBREW 50. Jewish and Israeli Culture. 4 Units.**

Examination of subjects relevant to the culture of Israel and Judaism in their historical and modern day contexts through the study of film, literature, religious texts, artistic representations, etc.

**(IV, VIII)**

**HEBREW 199. Independent Study. 4 Units.**

Research paper required.

Repeatability: May be repeated for credit unlimited times.

## Humanities Courses

### **HUMAN 1A. Humanities Core Lecture. 4 Units.**

Through a range of cultural traditions and an interdisciplinary approach to works of literature, history, philosophy, and contemporary media, students are introduced to the humanities.

Restriction: Lower-division students only.

#### **(IV)**

### **HUMAN 1AES. Humanities Core Writing: Entry Level Writing. 4 Units. 2 Workload Units.**

A small writing course for Entry Level Writing students exploring the ideas presented in the companion lecture course and illustrated in the literary, historical, philosophical, and media works assigned.

Corequisite: HUMAN 1A

Grading Option: Workload Credit Letter Grade with P/NP.

Overlaps with HUMAN 1AS, HUMAN H1AS.

Restriction: Lower-division students only.

### **HUMAN 1AS. Humanities Core Writing. 4 Units.**

A small writing course in which students explore the ideas presented in the companion lecture course and illustrated in the literary, historical, philosophical, and media works assigned.

Corequisite: HUMAN 1A

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

Overlaps with HUMAN 1AES, HUMAN H1AS.

Restriction: Lower-division students only.

#### **(Ia)**

### **HUMAN 1B. Humanities Core Lecture. 4 Units.**

Through a range of cultural traditions and an interdisciplinary approach to works of literature, history, philosophy, and contemporary media, students are introduced to the humanities.

Restriction: Lower-division students only.

#### **(IV)**

### **HUMAN 1BES. Humanities Core Writing: Entry Level Writing. 4 Units. 2 Workload Units.**

A small writing course for Entry Level Writing students exploring the ideas presented in the companion lecture course and illustrated in the literary, historical, philosophical, and media works assigned.

Corequisite: HUMAN 1B

Prerequisite: HUMAN 1AES. HUMAN 1AES with a grade of C- or better

Grading Option: Workload Credit Letter Grade with P/NP.

Overlaps with HUMAN 1BS, HUMAN H1BS.

Restriction: Lower-division students only.

#### **(Ia)**

**HUMAN 1BS. Humanities Core Writing. 4 Units.**

A small writing course in which students explore the ideas presented in the companion lecture course and illustrated in the literary, historical, philosophical, and media works assigned.

Corequisite: HUMAN 1B

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

Overlaps with HUMAN H1BS, HUMAN 1BES.

Restriction: Lower-division students only.

**(Ia)**

**HUMAN 1C. Humanities Core Lecture. 4 Units.**

Through a range of cultural traditions and an interdisciplinary approach to works of literature, history, philosophy, and contemporary media, students are introduced to the humanities.

Prerequisite: HUMAN 1A or HUMAN 1B

Restriction: Lower-division students only.

**(IV and VII and VIII ).**

**HUMAN 1CS. Humanities Core Writing. 4 Units.**

A small writing course in which students explore the ideas presented in the companion lecture course and illustrated in the literary, historical, philosophical, and media works assigned.

Corequisite: HUMAN 1C

Prerequisite: HUMAN 1AS or HUMAN H1AS or HUMAN 1AES or HUMAN 1BS or HUMAN H1BS or HUMAN 1BES. HUMAN 1AS with a grade of C or better. HUMAN H1AS with a grade of C or better. HUMAN 1AES with a grade of C or better. HUMAN 1BS with a grade of C or better. HUMAN H1BS with a grade of C or better. HUMAN 1BES with a grade of C or better

Overlaps with HUMAN H1CS, HUMAN 1CES.

Restriction: Lower-division students only.

**(Ia)**

**HUMAN B1A. Humanities Core Biological Sciences Lecture. 4 Units.**

Through a range of cultural traditions and an interdisciplinary approach to works of literature, history, philosophy, and contemporary media, students are introduced to the humanities.

Overlaps with HUMAN 1A.

Restriction: Lower-division students only. Biological Sciences Majors only.

**(IV)**

**HUMAN H1AS. Humanities Core Writing: Honors. 4 Units.**

For Campuswide Honors students exploring the ideas presented in the companion lecture course and illustrated in the literary, historical, philosophical, and media works assigned.

Corequisite: HUMAN 1A

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

Overlaps with HUMAN 1AS, HUMAN 1AES.

Restriction: Campuswide Honors Collegium students only. Lower-division students only.

**(Ia)**

**HUMAN H1BS. Humanities Core Writing: Honors. 4 Units.**

For Campuswide Honors students exploring the ideas presented in the companion lecture course and illustrated in the literary, historical, philosophical, and media works assigned.

Corequisite: HUMAN 1B

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

Overlaps with HUMAN 1BS, HUMAN 1BES.

Restriction: Campuswide Honors Collegium students only. Lower-division students only.

**(Ia)**

**HUMAN H1CS. Humanities Core Writing: Honors. 4 Units.**

For Campuswide Honors students exploring the ideas presented in the companion lecture course and illustrated in the literary, historical, philosophical, and media works assigned.

Corequisite: HUMAN 1C

Prerequisite: HUMAN 1AS or HUMAN H1AS or HUMAN 1AES or HUMAN 1BS or HUMAN H1BS or HUMAN 1BES with a grade of C or better.

Overlaps with HUMAN 1CS, HUMAN 1CES.

Restriction: Lower-division students only. Campuswide Honors Program students only.

**(Ia)**

**HUMAN 10. Masterpieces of Literature. 4 Units.**

Students closely read major works of world literature that are significant (1) in their own right, (2) for a specific literary tradition, and (3) because of their reception in other cultural contexts. Literature written in English and English translation.

Repeatability: Unlimited as topics vary.

**(IV and VIII ).**

**HUMAN 52. Foundations of Bilingual Education and Bilingualism. 4 Units.**

Provides a comprehensive overview of current issues in bilingual education and bilingualism. Topics include dimensions of bilingualism, the effects of bilingualism on children's linguistic and cognitive development, bilingual education programs, literacy, special needs, and assessment.

Same as EDUC 52, LSCI 51B.

**HUMAN H80. Exploring Memory. 4 Units.**

Questions about human memory are central to a wide range of disciplines. Students will explore how historians, sociologists, social psychologists, legal experts, and neuroscientists understand human memory and apply their findings to understand and shape their own societies.

Restriction: Campuswide Honors Collegium students only.

**(IV)**

**HUMAN H81. The Vietnam War . 4 Units.**

Examines the origins, evolution, opposition against, conclusion, and legacy of the United States in the Vietnam War.

Restriction: Campuswide Honors Collegium students only.

**(GE III or IV ).**

**HUMAN H83. How Nations Remember. 4 Units.**

Just like people, nations select and organize what and how they want to remember. Compares how specific historical events (such as slavery and the Holocaust) are memorialized in various countries and represented in public art works, museums, literature, and film.

Restriction: Campuswide Honors Collegium students only.

**(III)**

**HUMAN H84. Traveling East/West. 4 Units.**

Traveling East/West presents a wide range of travel writings by Chinese, Indian, and Euro-American authors in which they contemplate the complexities of cross-cultural encounters and how knowledge about others and knowledge of ourselves are closely intertwined.

Same as EAS H84.

Restriction: Campuswide Honors Collegium students only.

**(IV)**

**HUMAN H120. Honors Proseminar . 4 Units.**

Interdisciplinary Honors courses organized each year around a single topic problem designed to compare and contrast modes of analysis in history, literary studies, and philosophy.

Repeatability: May be taken for credit 3 times as topics vary.

Restriction: Humanities Honors students only.

**HUMAN H140. Senior Honors Seminar. 4 Units.**

Directed by Humanities Honors Thesis Advisor and required of students in Humanities Honors program and Humanities majors in Campuswide Honors Program. Designed to facilitate exchange of ideas and research strategies among students and begin process of writing senior honors thesis.

Restriction: Humanities Honors students only. Seniors only.

**HUMAN H141. Senior Honors Thesis. 4 Units.**

Directed independent research required of participants in the Humanities Honors Program and Humanities majors in the Campuswide Honors Program.

Prerequisite: HUMAN H140

Restriction: Campuswide Honors Collegium students only. Humanities Honors students only.

**HUMAN H142W. Senior Honors Colloquium. 4 Units.**

Completion, presentation, and discussion of Senior Honors Theses.

Prerequisite: HUMAN H141

Restriction: Campuswide Honors Collegium students only. Humanities Honors students only.

**(Ib)**

**HUMAN H145. Arts of Contemporary Communication. 4 Units.**

A workshop seminar exploring the theory and practice of visual design, data visualization, and oral presentation. Designed to get students to think about, and hone their skills in, effective presentation of information in multiple media.

Restriction: Campuswide Honors Collegium students only. Humanities Honors Program students can enroll as space allows.

**HUMAN 175. Topics in Humanities and Science . 4 Units.**

Interdisciplinary topics exploring the relationship between the humanities and the physical and biological sciences.

Repeatability: May be taken for credit 3 times as topics vary.

**HUMAN 195. Humanities Out There (H.O.T.) Practicum. 0 - 2 Units.**

H.O.T. sponsors tutoring opportunities in local schools and after-school sites for UCI students. Requirements include weekly one-hour training sessions at UCI; at least eight off-site tutoring sessions; and short writing assignments.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 8 units.

**HUMAN 198. Directed Group Study. 1-4 Units.**

Directed group study on special topics.

Grading Option: Pass/no pass only.

Repeatability: Unlimited as topics vary.

**HUMAN 199. Directed Research. 1-4 Units.**

Directed research for senior Humanities students.

Repeatability: Unlimited as topics vary.

Restriction: Seniors only.

**HUMAN 220B. Studies in Literary Theory and Its History. 4 Units.**

Introduction to criticism and aesthetics for beginning graduate students. Readings from continental, English, and American theorists.

Same as CRITISM 220B.

Restriction: Graduate students only.

**HUMAN 260A. Critical Theory Workshop.**

A year-long Critical Theory Workshop, conducted by a team of instructors, conceived as a reading group, and developed with the input of all participants, where significant texts are discussed and analyzed in class.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**HUMAN 260B. Critical Theory Workshop.**

A year-long Critical Theory Workshop, conducted by a team of instructors, conceived as a reading group, and developed with the input of all participants, where significant texts are discussed and analyzed in class.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**HUMAN 260C. Critical Theory Workshop. 4 Units.**

A year-long Critical Theory Workshop, conducted by a team of instructors, conceived as a reading group, and developed with the input of all participants, where significant texts are discussed and analyzed in class.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**HUMAN 261. Race and Justice Studies Writing Seminar . 4 Units.**

A required writing-intensive seminar conducted by an instructor affiliated with the Race and Justice Studies emphasis. Students with manuscripts on relevant topics will read and critique peer manuscripts, and revise manuscripts toward completion of articles, dissertation chapters, and other publications.

Prerequisite: CRM/LAW C260C

Same as CRM/LAW C261, SOC SCI 253K.

Restriction: Graduate students only.

**HUMAN 265A. Issues In Latin American Studies I.**

Students discuss significant texts on Latin America from a range of disciplines in the humanities, social sciences, and the arts. This course will meet 3-4 times per quarter throughout the academic year.

Grading Option: Satisfactory/unsatisfactory only.

**HUMAN 265B. Issues In Latin American Studies II.**

Students discuss significant texts on Latin America from a range of disciplines in the humanities, social sciences, and the arts. This course will meet 3-4 times per quarter throughout the academic year.

Prerequisite: HUMAN 265A

Grading Option: Satisfactory/unsatisfactory only.

**HUMAN 265C. Issues In Latin American Studies III . 4 Units.**

Students discuss significant texts on Latin America from a range of disciplines in the humanities, social sciences, and the arts. This course will meet 3-4 times per quarter throughout the academic year.

Prerequisite: HUMAN 265B

Grading Option: Satisfactory/unsatisfactory only.

**HUMAN 270. Advanced Critical Theory. 4 Units.**

Seminars on various topics in critical theory.

Prerequisite: Students should have taken introductory courses before enrolling in these seminars.

Repeatability: Unlimited as topics vary.

**HUMAN 298. Humanities Out There (H.O.T.) Practicum. 4 Units.**

Individual study with H.O.T. faculty supervisor.

Repeatability: May be repeated for credit unlimited times.

**HUMAN 398A. Foreign Language Teaching: Approaches and Methods. 2 Units.**

Introduces approaches and methods of foreign language learning and teaching, and the theoretical models of second-language acquisition and teaching. Focus areas include lesson planning, teaching vocabulary, grammar, speaking, reading, writing, listening, culture, task-based teaching, uses of digital media.

Restriction: Graduate students only.

**HUMAN 398B. Foreign Language Teaching: Approaches and Methods. 2 Units.**

Introduces approaches and methods of foreign language learning and teaching, and the theoretical models of second-language acquisition and teaching. Focus areas include lesson planning, teaching vocabulary, grammar, speaking, reading, writing, listening, culture, task-based teaching, uses of digital media.

Restriction: Graduate students only.

**HUMAN 399. University Teaching. 4 Units.**

Limited to Teaching Associates in Humanities Core course.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## **Iranian Studies Courses**

**IRAN 231A. History of Zoroastrianism. 4 Units.**

Reviews major trends in the history of Zoroastrianism.

Restriction: Graduate students only.

Concurrent with HIST 131A.

**IRAN 231B. Ancient Persia. 4 Units.**

Survey of the history of Persia in antiquity.

Restriction: Graduate students only.

Concurrent with HIST 131B.

**IRAN 231C. Medieval Persia. 4 Units.**

A survey of Persian history in the context of Late Antique and Medieval Islamic history.

Restriction: Graduate students only.

Concurrent with HIST 131C.

**IRAN 255A. Ancient India. 4 Units.**

Examines the visual and religious history of the region defined as 'India' today, but necessarily encompassing modern Bangladesh and Pakistan. Culminates with the supposed Golden Age of the Gupta empire and its far-reaching legacies.

Same as AHIS 255A.

Restriction: Graduate students only.

Concurrent with AHIS 155A.

**IRAN 255B. Medieval India. 4 Units.**

Begins with the Gupta period's aesthetic legacies in South Asia's architecture, sculpture, and painting. Explores the dispersal of Islam throughout South Asia, including the Muslim communities of southern India.

Same as AHIS 255B.

Restriction: Graduate students only.

Concurrent with AHIS 155B.

**IRAN 280. Studies in Old Iranian. 4 Units.**

Studies in grammars and texts of Old Persian and Avestan.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**IRAN 281. Studies in Middle Iranian. 4 Units.**

Studies in grammars and texts of Middle Iranian languages (e.g., Middle Persian, Parthian, Sogdian, Bactrian).

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**IRAN 282. Studies in Classical Persian. 4 Units.**

Studies in the premodern literatures and historical texts of medieval and early modern Persian.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**IRAN 290. Special Topics in Premodern Iranian Studies. 4 Units.**

Studies in selected areas of premodern Iranian Studies. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**IRAN 292. Seminar in Premodern Iranian Studies. 4 Units.**

Seminar in selected areas of premodern Iranian Studies. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**IRAN 293. Directed Readings in Premodern Iranian Studies. 4 Units.**

Directed reading on a specific topic agreed upon by student and instructor.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**IRAN 294. Curatorial Methods. 4 Units.**

Development of curatorial methodologies with an instructor in conjunction with curatorial internship or practicum.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**IRAN 295. Special Methods. 4 Units.**

Reading course focused on the development of particular research skills (e.g. archaeological field methods, numismatics, digital humanities) often in conjunction with a practicum.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**IRAN 296. Ethics, Law, and Art. 4 Units.**

Addresses a broad range of ethical and legal issues pertaining to art, ownership, looting and theft, museum policies, and cultural heritage.

Prerequisite: Background in Art History or Legal Studies.

Same as AHIS 296.

Concurrent with AHIS 196.

## Italian Courses

**ITALIAN 1A. Fundamentals of Italian. 5 Units.**

First quarter of first-year Italian in a hybrid format. Students are taught to conceptualize in Italian as they learn to understand, read, write, and speak. Classes are conducted entirely in Italian.

Overlaps with ITALIAN S1AB, ITALIAN 1AB.

**ITALIAN 1AB. Intensive Italian Fundamentals. 7.5 Units.**

First half of first-year Italian in a time-intensive form. Development of meaningful communicative skills for the purposes of interaction with Italian speakers and beginning study of Italian. Learner-centered approach develops speaking, listening, reading, writing, and cultural skills and knowledge.

Overlaps with ITALIAN 1A, ITALIAN 1B, ITALIAN S1AB.

Restriction: ITALIAN 1AB and ITALIAN 1A and ITALIAN 1B and ITALIAN S1AB may not be taken for full credit.

**ITALIAN 1B. Fundamentals of Italian. 5 Units.**

Second quarter of first-year Italian in a hybrid format. Students are taught to conceptualize in Italian as they learn to understand, read, write, and speak. Classes are conducted entirely in Italian.

Prerequisite: ITALIAN 1A. ITALIAN 1A with a grade of C or better. Placement into ITALIAN 1B is also accepted.

Overlaps with ITALIAN S1AB, ITALIAN S1BC, ITALIAN 1AB, ITALIAN 1BC.

**ITALIAN 1BC. Intensive Italian Fundamentals. 7.5 Units.**

Second half of first-year Italian in a time-intensive form. Development of meaningful communicative skills for the purposes of interaction with Italian speakers and beginning study of Italian. Learner-centered approach develops speaking, listening, reading, writing, and cultural skills and knowledge.

Prerequisite: ITALIAN 1AB or ITALIAN S1AB or ITALIAN 1B. ITALIAN 1AB with a grade of C or better. ITALIAN S1AB with a grade of C or better. ITALIAN 1B with a grade of C or better. Placement into ITALIAN 1BC is also accepted.

Overlaps with ITALIAN 1B, ITALIAN 1C, ITALIAN S1BC.

Restriction: ITALIAN 1AB and ITALIAN 1A and ITALIAN 1B and ITALIAN S1AB may not be taken for full credit.

**(VI)**

**ITALIAN 1C. Fundamentals of Italian. 5 Units.**

Third quarter of first-year Italian in a hybrid format. Students are taught to conceptualize in Italian as they learn to understand, read, write, and speak. Classes are conducted entirely in Italian.

Prerequisite: ITALIAN 1B or ITALIAN 1AB or ITALIAN S1AB. ITALIAN 1B with a grade of C or better. ITALIAN 1AB with a grade of C or better. ITALIAN S1AB with a grade of C or better. Placement into ITALIAN 1C is also accepted.

Overlaps with ITALIAN S1BC, ITALIAN 1BC.

**(VI)**

**ITALIAN S1AB. Italian Fundamentals. 7.5 Units.**

First-year Italian in an intensified form. Students are taught to conceptualize in Italian as they learn to understand, read, write, and speak. Classes are conducted entirely in Italian and meet daily three hours for five weeks each session.

Overlaps with ITALIAN 1A, ITALIAN 1B, ITALIAN 1AB.

Restriction: ITALIAN S1AB and ITALIAN 1A and ITALIAN 1B and ITALIAN 1AB may not be taken for full credit.

**ITALIAN S1BC. Italian Fundamentals. 7.5 Units.**

First-year Italian in an intensified form. Students are taught to conceptualize in Italian as they learn to understand, read, write, and speak. Classes are conducted entirely in Italian and meet daily three hours for five weeks each session.

Prerequisite: ITALIAN S1AB or ITALIAN 1B or ITALIAN 1AB. ITALIAN S1AB with a grade of C or better. ITALIAN 1B with a grade of C or better. ITALIAN 1AB with a grade of C or better

Overlaps with ITALIAN 1B, ITALIAN 1C, ITALIAN 1BC.

Restriction: ITALIAN S1BC and ITALIAN 1B and ITALIAN 1C and ITALIAN 1BC may not be taken for full credit.

**(VI)****ITALIAN 2A. Intermediate Italian. 4 Units.**

Texts of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in Italian.

Prerequisite: ITALIAN 1C or ITALIAN 1BC or ITALIAN S1BC. ITALIAN 1C with a grade of C or better. ITALIAN 1BC with a grade of C or better. ITALIAN S1BC with a grade of C or better. Placement into ITALIAN 2A is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)****ITALIAN 2B. Intermediate Italian. 4 Units.**

Texts of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in Italian.

Prerequisite: ITALIAN 2A. ITALIAN 2A with a grade of C or better. Placement into ITALIAN 2B is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)****ITALIAN 2C. Intermediate Italian. 4 Units.**

Texts of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in Italian.

Prerequisite: ITALIAN 2B. ITALIAN 2B with a grade of C or better. Placement into 2C is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)****ITALIAN 50. Topics in Italian Culture. 4 Units.**

Examines Italian culture at home and from abroad, in cinema, literature, and popular culture.

Repeatability: Unlimited as topics vary.

**(IV and VIII ).****ITALIAN 99. Special Studies in Italian. 4 Units.**

Both student and instructor arrive at the theme of the course and the critical approach to be followed in consultation. Intended to offer courses in Italian otherwise unavailable.

Repeatability: May be repeated for credit unlimited times.

**ITALIAN 150. Topics in Italian Literature and Culture. 4 Units.**

Major themes, periods, and/or movements in Italian literature and culture. Taught in English.

Repeatability: Unlimited as topics vary.

**ITALIAN 199. Tutorial in Italian Literature and Culture. 4 Units.**

The student must submit a written description of the proposed course to the instructor and the Chair prior to the beginning of the course.

Repeatability: Unlimited as topics vary.

## **Japanese Courses**

**JAPANESE 1A. Fundamental Japanese. 5 Units.**

Students develop listening, speaking, reading, and writing abilities in Japanese for meaningful communication. Content deals with daily life, society, and culture in Japan. Approximately 180 kanji (Chinese characters) are introduced in addition to the hiragana and katakana orthography.

Prerequisite: Placement into JAPANESE 1A is accepted.

Overlaps with JAPANESE S1AB.

Restriction: JAPANESE 1A and JAPANESE S1AB may not be taken for full credit.

**JAPANESE 1B. Fundamental Japanese. 5 Units.**

Students develop listening, speaking, reading, and writing abilities in Japanese for meaningful communication. Content deals with daily life, society, and culture in Japan. Approximately 180 kanji (Chinese characters) are introduced in addition to the hiragana and katakana orthography.

Prerequisite: JAPANESE 1A or JAPANESE S1AB. JAPANESE 1A with a grade of C or better. JAPANESE S1AB with a grade of C or better. Placement into JAPANESE 1B is also accepted.

Overlaps with JAPANESE S1AB, JAPANESE S1BC.

Restriction: JAPANESE 1B and JAPANESE S1AB and JAPANESE S1BC may not be taken for full credit.

**JAPANESE 1C. Fundamental Japanese. 5 Units.**

Students develop listening, speaking, reading, and writing abilities in Japanese for meaningful communication. Content deals with daily life, society, and culture in Japan. Approximately 180 kanji (Chinese characters) are introduced in addition to the hiragana and katakana orthography.

Prerequisite: JAPANESE 1B or JAPANESE S1AB. JAPANESE 1B with a grade of C or better. JAPANESE S1AB with a grade of C or better. Placement into JAPANESE 1C is also accepted.

Overlaps with JAPANESE S1BC.

Restriction: JAPANESE 1C and JAPANESE S1BC may not be taken for full credit.

## **(VI)**

**JAPANESE S1AB. Fundamentals of Japanese. 7.5 Units.**

First half of first-year Japanese in an intensified form.

Prerequisite: Placement into JAPANESE 1A.

Overlaps with JAPANESE 1A, JAPANESE 1B.

Restriction: JAPANESE S1AB and JAPANESE 1A and JAPANESE 1B may not be taken for full credit.

**JAPANESE S1BC. Fundamentals of Japanese. 7.5 Units.**

Second half of first-year Japanese in an intensified form.

Prerequisite: JAPANESE S1AB or JAPANESE 1B. JAPANESE S1AB with a grade of C or better. JAPANESE 1B with a grade of C or better. Placement into JAPANESE 1C is also accepted.

Overlaps with JAPANESE 1C, JAPANESE 1B.

Restriction: JAPANESE S1BC and JAPANESE 1B and JAPANESE 1C may not be taken for full credit.

## **(VI)**

**JAPANESE 2A. Intermediate Japanese. 5 Units.**

Japanese listening, speaking, reading, and writing abilities developed for meaningful communication. Content deals with daily life, society, and culture, including social issues in Japan. Approximately 180 kanji (Chinese characters) are introduced in addition to the 180 characters learned in 1A-B-C.

Prerequisite: JAPANESE 1C or JAPANESE S1BC. JAPANESE 1C with a grade of C or better. JAPANESE S1BC with a grade of C or better. Placement into JAPANESE 2A is also accepted.

Overlaps with JAPANESE S2AB.

Restriction: JAPANESE 2A and JAPANESE S2AB may not be taken for full credit.

(VIII)

**JAPANESE 2B. Intermediate Japanese. 5 Units.**

Japanese listening, speaking, reading, and writing abilities developed for meaningful communication. Content deals with daily life, society, and culture, including social issues in Japan. Approximately 180 kanji (Chinese characters) are introduced in addition to the 180 characters learned in 1A-B-C.

Prerequisite: JAPANESE 2A. JAPANESE 2A with a grade of C or better. Placement into JAPANESE 2B is also accepted.

Overlaps with JAPANESE S2AB.

Restriction: JAPANESE 2B and JAPANESE S2AB and JAPANESE S2BC may not be taken for full credit.

(VIII)

**JAPANESE 2C. Intermediate Japanese. 5 Units.**

Japanese listening, speaking, reading, and writing abilities developed for meaningful communication. Content deals with daily life, society, and culture, including social issues in Japan. Approximately 180 kanji (Chinese characters) are introduced in addition to the 180 characters learned in 1A-B-C.

Prerequisite: JAPANESE 2B or JAPANESE S2AB. JAPANESE 2B with a grade of C or better. JAPANESE S2AB with a grade of C or better. Placement into JAPANESE 2C is also accepted.

Overlaps with JAPANESE S2BC.

Restriction: JAPANESE 2C and JAPANESE S2BC may not be taken for full credit.

(VIII)

**JAPANESE S2AB. Intermediate Japanese. 7.5 Units.**

First half of second-year Japanese in an intensified form.

Prerequisite: JAPANESE 1C or JAPANESE S1BC. JAPANESE 1C with a grade of C or better. JAPANESE S1BC with a grade of C or better. Placement into JAPANESE 2A is also accepted.

Overlaps with JAPANESE 2A, JAPANESE 2B.

Restriction: JAPANESE S2AB and JAPANESE 2A and JAPANESE 2B may not be taken for full credit.

(VIII)

**JAPANESE S2BC. Intermediate Japanese. 7.5 Units.**

Second half of second-year Japanese in an intensified form.

Prerequisite: JAPANESE S2AB or JAPANESE 2B. JAPANESE S2AB with a grade of C or better. JAPANESE 2B with a grade of C or better. Placement into JAPANESE 2C is also accepted.

Overlaps with JAPANESE 2C, JAPANESE 2B.

Restriction: JAPANESE S2BC and JAPANESE 2B and JAPANESE 2C may not be taken for full credit.

(VIII)

**JAPANESE 3A. Advanced Japanese. 4 Units.**

Students are taught to conceptualize in Japanese as they learn to understand, read, write, and speak. Authentic Japanese texts are used. Approximately 360 kanji (Chinese characters) in addition to the 270 characters learned in 1A-B-C and 2A-B-C are introduced.

Prerequisite: JAPANESE 2C or JAPANESE S2BC or placement into JAPANESE 3A. JAPANESE 2C with a grade of C or better. JAPANESE S2BC with a grade of C or better.

(VIII)

**JAPANESE 3B. Advanced Japanese. 4 Units.**

Students are taught to conceptualize in Japanese as they learn to understand, read, write, and speak. Authentic Japanese texts are used. Approximately 360 kanji (Chinese characters) in addition to the 270 characters learned in 1A-B-C and 2A-B-C are introduced.

Prerequisite: JAPANESE 3A. JAPANESE 3A with a grade of C or better. Placement into JAPANESE 3B is also accepted.

(VIII)

**JAPANESE 3C. Advanced Japanese. 4 Units.**

Students are taught to conceptualize in Japanese as they learn to understand, read, write, and speak. Authentic Japanese texts are used. Approximately 360 kanji (Chinese characters) in addition to the 270 characters learned in first and second year are introduced.

Prerequisite: JAPANESE 3B. JAPANESE 3B with a grade of C or better. Placement into JAPANESE 3C is also accepted.

Restriction: Japanese Language Literature Majors have first consideration for enrollment.

(VIII)

**JAPANESE 100A. Classical Japanese. 4 Units.**

Introduction to classical Japanese grammar and vocabulary with emphasis on reading and analysis of basic texts.

Prerequisite: JAPANESE 3C. JAPANESE 3C with a grade of C or better

**JAPANESE 100B. Classical Japanese. 4 Units.**

Introduction to classical Japanese grammar and vocabulary with emphasis on reading and analysis of basic texts.

Prerequisite: JAPANESE 100A. JAPANESE 100A with a grade of C or better

**JAPANESE 101A. Fourth Year Japanese. 4 Units.**

Continued emphasis on comprehension, grammar, and proficiency in reading, composition, and conversation through intensive study and analysis of a variety of texts.

Prerequisite: JAPANESE 3C

**JAPANESE 101B. Fourth Year Japanese. 4 Units.**

Continued emphasis on comprehension, grammar, and proficiency in reading, composition, and conversation through intensive study and analysis of a variety of texts.

Prerequisite: JAPANESE 3C

**JAPANESE 115. Japanese Literature: Advanced Texts. 4 Units.**

Designed for students with near-fluency in reading Japanese. Texts include both fiction and nonfiction by important writers, and may be supplemented and contextualized where needed by literary criticism and cultural-studies texts in English.

Prerequisite: JAPANESE 101A or JAPANESE 101B or JAPANESE 101C

Repeatability: Unlimited as topics vary.

**JAPANESE 180. Topics in Japanese Literature. 4 Units.**

Special topics through directed reading in Japanese. Paper required.

Prerequisite: JAPANESE 3C. JAPANESE 3C with a grade of C or better

Repeatability: May be taken for credit 3 times as topics vary.

**JAPANESE 199. Independent Study. 1-4 Units.**

Investigation of special topics through directed reading in Japanese. Paper required.

Repeatability: May be taken for credit for 12 units.

**JAPANESE 201. Readings in Traditional Japanese Prose. 4 Units.**

Close reading of selected premodern prose texts, including tales, journals, travel journals, essays.

Prerequisite: JAPANESE 100B

Repeatability: Unlimited as topics vary.

**JAPANESE 202. Readings in Traditional Japanese Poetry or Drama. 4 Units.**

Close reading of selected premodern poetic or dramatic texts.

Prerequisite: JAPANESE 100B

Repeatability: Unlimited as topics vary.

**JAPANESE 203. Readings in Modern Japanese Literature. 4 Units.**

Texts include both fiction and nonfiction by important writers, and may be supplemented where needed by literary criticism and cultural-studies texts in English.

Prerequisite: JAPANESE 101C

Repeatability: Unlimited as topics vary.

**JAPANESE 204. Readings in Traditional Japanese Literary and Cultural Theory . 4 Units.**

Close reading of selected texts involving literary criticism and/or aesthetics.

Prerequisite: JAPANESE 100B

Repeatability: Unlimited as topics vary.

**JAPANESE 205. Readings in Japanese Religion. 4 Units.**

Close readings of selected Japanese religious texts.

Prerequisite: JAPANESE 101C

Repeatability: Unlimited as topics vary.

**JAPANESE 211A. Studies in Traditional Japanese Prose. 4 Units.**

Studies in selected areas of traditional Japanese prose. Topics addressed vary each quarter. Research paper required.

Prerequisite: JAPANESE 100B

Repeatability: Unlimited as topics vary.

**JAPANESE 211B. Studies in Traditional Japanese Prose. 4 Units.**

Studies in selected areas of traditional Japanese prose. Topics addressed vary each quarter. Research paper required.

Prerequisite: JAPANESE 100B and JAPANESE 211A

Repeatability: Unlimited as topics vary.

**JAPANESE 212A. Studies in Traditional Japanese Poetry or Drama. 4 Units.**

Studies in selected areas of traditional Japanese poetry or drama. Topics addressed vary each quarter. Research paper required.

Prerequisite: JAPANESE 100B

Repeatability: Unlimited as topics vary.

**JAPANESE 212B. Studies in Traditional Japanese Poetry or Drama. 4 Units.**

Studies in selected areas of traditional Japanese poetry or drama. Topics addressed vary each quarter. Research paper required.

Prerequisite: JAPANESE 212A

Repeatability: Unlimited as topics vary.

**JAPANESE 213A. Studies in Modern Japanese Literature. 4 Units.**

A two-quarter, in-depth look at a major author and/or issue in modern Japanese literature. Seminar format. The first quarter is devoted to reading of the requisite texts; the second quarter, to the writing of a research paper.

Prerequisite: JAPANESE 203

Repeatability: Unlimited as topics vary.

**JAPANESE 213B. Studies in Modern Japanese Literature. 4 Units.**

A two-quarter, in-depth look at a major author and/or issue in modern Japanese literature. Seminar format. The first quarter is devoted to reading of the requisite texts; the second quarter, to the writing of a research paper.

Prerequisite: JAPANESE 203 and JAPANESE 213A

Repeatability: May be repeated for credit unlimited times.

**JAPANESE 214. Studies in Japanese Literary and Cultural Theory. 4 Units.**

Studies in selected areas of Japanese literary and cultural theory. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**JAPANESE 215. Studies in Japanese Religion. 4 Units.**

Studies in selected areas of Japanese religion. Topics addressed vary each quarter. Research paper required.

Prerequisite: JAPANESE 101C

Repeatability: Unlimited as topics vary.

**JAPANESE 230. Topics in Japanese Literature and Culture. 4 Units.**

A topical study that addresses important issues in Japanese literature and culture. May focus on a specific writer or writers, or on a specific issue or set of related issues.

Prerequisite: JAPANESE 203

Repeatability: Unlimited as topics vary.

**JAPANESE 290. Independent Study. 4 Units.**

Directed research on topic determined in consultation with faculty member. A term paper or project is required.

Repeatability: May be repeated for credit unlimited times.

**JAPANESE 299. Dissertation Research. 4-12 Units.**

For Students who have been admitted to doctoral candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## **Korean Courses**

**KOREAN 1A. Fundamental Korean. 5 Units.**

Natural approach with emphasis on the four fundamental skills of listening, speaking, reading, and writing for students with no previous background in Korean. Conducted in both English and Korean.

Prerequisite: Placement into KOREAN 1A.

Overlaps with KOREAN 1KA, KOREAN S1AB.

Restriction: KOREAN 1A and KOREAN 1KA and KOREAN S1AB may not be taken for full credit.

**KOREAN 1B. Fundamental Korean. 5 Units.**

Natural approach with emphasis on the four fundamental skills of listening, speaking, reading, and writing for students with no previous background in Korean. Conducted in both English and Korean.

Prerequisite: KOREAN 1A. KOREAN 1A with a grade of C or better. Placement into KOREAN 1B is also accepted.

Overlaps with KOREAN S1BC, KOREAN 1KB, KOREAN S1AB.

Restriction: KOREAN 1B and KOREAN 1KB and KOREAN S1AB and KOREAN S1BC may not be taken for full credit.

**KOREAN 1C. Fundamental Korean. 5 Units.**

Natural approach with emphasis on the four fundamental skills of listening, speaking, reading, and writing for students with no previous background in Korean. Conducted in both English and Korean.

Prerequisite: KOREAN 1B or KOREAN S1AB. KOREAN 1B with a grade of C or better. KOREAN S1AB with a grade of C or better. Placement into KOREAN 1C is also accepted.

Overlaps with KOREAN 1KC, KOREAN S1BC.

Restriction: KOREAN 1C and KOREAN 1KC and KOREAN S1BC may not be taken for full credit.

**(VI)****KOREAN 1KA. Fundamental Korean for Students with a Previous Background in Korean. 5 Units.**

Natural approach with emphasis on the four fundamental skills of listening, speaking, reading, and writing for students with a previous background in Korean. Conducted in both English and Korean.

Prerequisite: Placement into KOREAN 1KA.

Overlaps with KOREAN 1A, KOREAN S1AB.

Restriction: KOREAN 1KA and KOREAN 1A and KOREAN S1AB may not be taken for full credit.

**KOREAN 1KB. Fundamental Korean for Students with a Previous Background in Korean . 5 Units.**

Natural approach with emphasis on the four fundamental skills of listening, speaking, reading, and writing for students with a previous background in Korean. Conducted in both English and Korean.

Prerequisite: KOREAN 1KA. KOREAN 1KA with a grade of C or better. Placement into KOREAN 1KB is also accepted.

Overlaps with KOREAN 1B, KOREAN S1AB, KOREAN S1BC.

Restriction: KOREAN 1KB and KOREAN 1B and KOREAN S1AB and KOREAN S1BC may not be taken for full credit.

**KOREAN 1KC. Fundamental Korean for Students with a Previous Background in Korean. 5 Units.**

Natural approach with emphasis on the four fundamental skills of listening, speaking, reading, and writing for students with a previous background in Korean. Conducted in both English and Korean.

Prerequisite: KOREAN 1KB. KOREAN 1KB with a grade of C or better. Placement into KOREAN 1KC is also accepted.

Overlaps with KOREAN 1C, KOREAN S1BC.

Restriction: KOREAN 1KC and KOREAN 1C and KOREAN S1BC may not be taken for full credit.

**(VI)****KOREAN S1AB. Fundamentals of Korean. 7.5 Units.**

First half of first-year Korean in an intensified form.

Prerequisite: Placement into KOREAN 1A or KOREAN 1KA or KOREAN 1B or KOREAN 1KB.

Overlaps with KOREAN 1A, KOREAN 1B, KOREAN 1KA, KOREAN 1KB.

Restriction: KOREAN S1AB and KOREAN 1A and KOREAN 1KA and KOREAN 1B and KOREAN 1KB may not be taken for full credit.

**KOREAN S1BC. Fundamentals of Korean. 7.5 Units.**

Second half of first-year Korean in an intensified form.

Prerequisite: KOREAN S1AB or KOREAN 1B or KOREAN 1KB. KOREAN S1AB with a grade of C or better. KOREAN 1B with a grade of C or better. KOREAN 1KB with a grade of C or better. Placement into KOREAN 1C or KOREAN 1KC is also accepted.

Overlaps with KOREAN 1C, KOREAN 1KB, KOREAN 1KC, KOREAN 1B.

Restriction: KOREAN S1BC and KOREAN 1B and KOREAN 1KB and KOREAN 1C and KOREAN 1KC may not be taken for full credit.

**(VI)**

**KOREAN 2A. Intermediate Korean. 5 Units.**

Designed to develop writing and reading skills as well as communicative skills in authentic situations for students without previous initial background in Korean. Students also introduced to aspects of Korean culture as related to lesson topics and basic Chinese characters.

Prerequisite: KOREAN 1C or KOREAN S1BC. KOREAN 1C with a grade of C or better. KOREAN S1BC with a grade of C or better. Placement into KOREAN 2A is also accepted.

Overlaps with KOREAN 2KA.

**(VIII)**

**KOREAN 2B. Intermediate Korean. 5 Units.**

Designed to develop writing and reading skills as well as communicative skills in authentic situations for students without previous initial background in Korean. Students also introduced to aspects of Korean culture as related to lesson topics and basic Chinese characters.

Prerequisite: KOREAN 2A. KOREAN 2A with a grade of C or better. Placement into KOREAN 2B is also accepted.

Overlaps with KOREAN 2KB.

**(VIII)**

**KOREAN 2C. Intermediate Korean. 5 Units.**

Designed to develop writing and reading skills as well as communicative skills in authentic situations for students without previous initial background in Korean. Students also introduced to aspects of Korean culture as related to lesson topics and basic Chinese characters.

Prerequisite: KOREAN 2B. KOREAN 2B with a grade of C or better. Placement into KOREAN 2C is also accepted.

Overlaps with KOREAN 2KC.

**(VIII)**

**KOREAN 2KA. Intermediate Korean for Students with a Previous Background in Korean . 5 Units.**

Designed to develop writing and reading skills as well as communicative skills in authentic situations for students with previous background in Korean. Students also introduced to aspects of Korean culture as related to lesson topics and basic Chinese characters.

Prerequisite: KOREAN 1KC or KOREAN S1BC. KOREAN 1KC with a grade of C or better. KOREAN S1BC with a grade of C or better. Placement into KOREAN 2KA is also accepted.

Overlaps with KOREAN 2A.

**(VIII)**

**KOREAN 2KB. Intermediate Korean for Students with a Previous Background in Korean . 5 Units.**

Designed to develop writing and reading skills as well as communicative skills in authentic situations for students with previous background in Korean. Students also introduced to aspects of Korean culture as related to lesson topics and basic Chinese characters.

Prerequisite: KOREAN 2KA. KOREAN 2KA with a grade of C or better. Placement into KOREAN 2KB is also accepted.

Overlaps with KOREAN 2B.

**(VIII)**

**KOREAN 2KC. Intermediate Korean for Students with a Previous Background in Korean. 5 Units.**

Designed to develop writing and reading skills as well as communicative skills in authentic situations for students with previous background in Korean. Students also introduced to aspects of Korean culture as related to lesson topics and basic Chinese characters.

Prerequisite: KOREAN 2KB. KOREAN 2KB with a grade of C or better. Placement into KOREAN 2KC is also accepted.

Overlaps with KOREAN 2C.

(VIII)

**KOREAN 3A. Advanced Korean. 4 Units.**

Focuses on developing advanced reading/writing and translation skills with additional instruction in Chinese characters.

Prerequisite: KOREAN 2C or KOREAN 2KC or KOREAN S2BC. KOREAN 2C with a grade of C or better. KOREAN 2KC with a grade of C or better. KOREAN S2BC with a grade of C or better. Placement into KOREAN 3A is also accepted.

(VIII)

**KOREAN 3B. Advanced Korean. 4 Units.**

Focuses on developing advanced reading, writing, and translation skills.

Prerequisite: KOREAN 3A or KOREAN 2C or KOREAN 2KC or KOREAN S2BC. KOREAN 3A with a grade of C or better. KOREAN 2C with a grade of C or better. KOREAN 2KC with a grade of C or better. KOREAN S2BC with a grade of C or better. Placement into KOREAN 3B is also accepted.

(VIII)

**KOREAN 3C. Advanced Korean. 4 Units.**

Focuses on developing advanced reading, writing, and translation skills.

Prerequisite: KOREAN 2C or KOREAN 2KC or KOREAN S2BC or KOREAN 3A or KOREAN 3B. KOREAN 2C with a grade of C or better. KOREAN 2KC with a grade of C or better. KOREAN S2BC with a grade of C or better. KOREAN 3A with a grade of C or better. KOREAN 3B with a grade of C or better. Placement into KOREAN 3C is also accepted.

(VIII)

**KOREAN 101A. Fourth-Year Korean. 4 Units.**

Continued emphasis on comprehension, grammar, and proficiency in reading, composition, and conversation through intensive study and analysis of a variety of modern texts.

Prerequisite: KOREAN 3A or KOREAN 3B or KOREAN 3C. KOREAN 3A with a grade of C or better. KOREAN 3B with a grade of C or better. KOREAN 3C with a grade of C or better.

**KOREAN 115. Korean Literature: Advanced Texts. 4 Units.**

Designed for students with near-fluency in reading Korean. Readings include modern Korean literary works (poetry, prose, and drama) by important writers. Emphasis is on the interpretation of the texts and writings that interpret those texts in the original language.

Prerequisite: KOREAN 101A or KOREAN 101B or KOREAN 101C

Repeatability: Unlimited as topics vary.

**KOREAN 199. Independent Study. 1-4 Units.**

Investigation of special topics through directed reading in Korean. Paper required.

Repeatability: May be taken for credit for 12 units.

## Latin Courses

**LATIN 1A. Fundamentals of Latin. 5 Units.**

Elements of Latin grammar, syntax, and vocabulary.

Overlaps with LATIN S1AB.

Restriction: LATIN 1A and LATIN S1AB may not be taken for full credit.

**LATIN 1B. Fundamentals of Latin. 5 Units.**

Elements of Latin grammar, syntax, and vocabulary.

Prerequisite: LATIN 1A. LATIN 1A with a grade of C or better

Overlaps with LATIN S1AB, LATIN S1BC.

Restriction: LATIN 1B and LATIN S1AB and LATIN S1BC may not be taken for full credit.

**LATIN 1C. Fundamentals of Latin. 5 Units.**

Introduction to reading texts, including study of the poetry of Catullus and selected readings.

Prerequisite: LATIN 1B. LATIN 1B with a grade of C or better

Overlaps with LATIN S1BC.

Restriction: LATIN 1C and LATIN S1BC may not be taken for full credit.

**(VI)**

**LATIN 99. Special Studies in Latin. 1-4 Units.**

Lower-division level independent research with Latin faculty.

Repeatability: May be repeated for credit unlimited times.

**LATIN 100. Topics in Classical Latin. 4 Units.**

Selected readings in Classical Latin prose and poetry. Authors may include Cicero, Caesar, Ovid, Catullus, and others. Selections from prose and poetry will be read each quarter. Grammar and syntax review included.

Prerequisite: LATIN 1C. LATIN 1C with a grade of C or better. Placement into Latin 100 is also accepted.

Repeatability: Unlimited as topics vary.

**LATIN 103. Seminar in Latin Prose. 4 Units.**

Specialized and focused study of a particular Latin prose author or topic.

Prerequisite: LATIN 100

Repeatability: Unlimited as topics vary.

**LATIN 104. Seminar in Latin Poetry. 4 Units.**

Specialized and focused study of a particular topic or author in Latin poetry.

Prerequisite: LATIN 100

Repeatability: Unlimited as topics vary.

**LATIN 198. Directed Group Study. 1-4 Units.**

Special topics in Roman culture and civilization through directed reading and research.

Repeatability: May be repeated for credit unlimited times.

**LATIN 199. Independent Studies in Latin. 1-4 Units.**

Independent research with Latin faculty.

Repeatability: May be repeated for credit unlimited times.

## **Literary Journalism Courses**

**LIT JRN 20. Introduction to Literary Journalism. 4 Units.**

Reading of selected texts to explore the ways in which literary journalism and related nonfiction modes formulate experience. Students complete a range of writing projects.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Literary Journalism Majors have first consideration for enrollment.

**(IV)**

**LIT JRN 21. Reporting for Literary Journalism. 4 Units.**

Instruction and hands-on training in how to interview, report, research, and collect the types of information needed to write literary journalism.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Literary Journalism Majors have first consideration for enrollment.

**LIT JRN 100. Advanced Reporting. 4 Units.**

Practical engagement with advanced reporting techniques of Literary Journalism, emphasizing the importance of thorough and effective research in the production of high-quality journalistic writing. Prepares students to make good decisions about where and how to publish their writing.

Prerequisite: LIT JRN 21

**LIT JRN 101A. Studies in the History, Theory, and Ethics of Literary Journalism. 4 Units.**

Lectures and discussion on topics that explore the historical and theoretical dimensions of literary journalism, with particular emphasis on the evolution of ethics in the field.

Prerequisite: LIT JRN 21 and LIT JRN 20 and (ENGLISH 28A or ENGLISH 28B or ENGLISH 28C or ENGLISH 28D or ENGLISH 28E or COM LIT 60A or COM LIT 60B or COM LIT 60C or ENGLISH 8 or ENGLISH 10 or ENGLISH 11 or ENGLISH 12 or ENGLISH 15 or ENGLISH 16 or ENGLISH 17)

**LIT JRN 101BW. Literary Journalism Core Writing Workshop. 4 Units.**

Writing workshops in announced specialized genres that students will both study and practice. Examples include 'The Memoir,' 'Review Writing,' 'The Editorial,' 'Writing Biography,' 'The Profile,' and 'Political Writing.'

Prerequisite: LIT JRN 101A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 3 times as topics vary.

Restriction: Upper-division students only. Students may enroll in one LITJ 101BW course per quarter.

(Ib)

**LIT JRN 103. Lectures on Topics in Literary Journalism. 4 Units.**

A series of lectures on, and discussions of, announced topics in literary journalism and the literature of fact. Examples include 'Travel Literary Journalism'; 'Literature of True Crime'; 'Narratives in the Digital Age'; 'Journalism on the Edge'.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Recommended: Upper-division students only.

**LIT JRN 197. Community Reporting . 4 Units.**

Directed group study in which students work with an instructor to report and write about community news in a newsroom-style format. Students will partner with local publications to pitch, market, and publish their stories.

Prerequisite: Satisfactory completion of lower-division writing requirement.

Repeatability: May be repeated for credit unlimited times.

**LIT JRN 198. Special Topics. 4 Units.**

Directed group study of selected topics.

Repeatability: Unlimited as topics vary.

**LIT JRN 199. Reading and Conference. 1-4 Units.**

To be taken only when the materials to be studied lie outside the normal run of departmental offerings.

Repeatability: May be repeated for credit unlimited times.

**Medical Humanities Initiative Courses****MED HUM 1. Health, Wellness, and Conception of the Body. 4 Units.**

Asks what is health and who gets to have it? What is considered a "healthy" or "sick" body? We analyze historical and contemporary experiences of illness, medicine, and caregiving, including how patients represent their bodies and healing.

(GE III or IV ).

**MED HUM 3. Art and Medicine . 4 Units.**

Analyzes the relationship between medicine and the visual arts from the late medieval to modern periods, covering topics such as anatomy, optical medical technologies, gender and race in medicine, and popular representations of disease and doctors.

(GE II or IV ).

**MED HUM 195. Capstone Seminar: The Clinical Moral Laboratory. 4 Units.**

Interdisciplinary exploration of the clinical encounter, and the importance of meaning making in these “moral laboratories.” Students enter the clinical space as participant observers, and reflect on how the clinical site informs and challenges reading practices.

Prerequisite: MED HUM 1 or MED HUM 3 or GEN&SEX 60A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only.

**MED HUM 200. Critical Perspectives in Medical Humanities. 4 Units.**

Analyzes social and cultural understandings of the body, health, illness, medicine, and disease. Themes include critical histories of the body; non-compliant subjects interacting with medicine; racial-sexual hierarchies of health; and theories and expressions of pain and suffering.

Restriction: Graduate students only.

## Persian Courses

**PERSIAN 1A. Fundamentals in Persian. 5 Units.**

Designed for students with little or no exposure to Persian. Students learn the modern writing system and grammar of Persian. Facilitates basic reading, writing, and speaking skills and fosters college-level literacy in Persian culture.

Prerequisite: Placement into PERSIAN 1A.

Overlaps with PERSIAN S1AB.

Restriction: PERSIAN 1A and PERSIAN S1AB may not be taken for full credit.

**PERSIAN 1B. Fundamentals in Persian. 5 Units.**

Designed for students with little or no exposure to Persian. Students learn the modern writing system and grammar of Persian. Facilitates basic reading, writing, and speaking skills and fosters college-level literacy in Persian culture.

Prerequisite: PERSIAN 1A. PERSIAN 1A with a grade of C or better. Placement into PERSIAN 1B is also accepted.

Overlaps with PERSIAN S1AB, PERSIAN S1BC.

Restriction: PERSIAN 1B and PERSIAN S1AB and PERSIAN S1BC may not be taken for full credit.

**PERSIAN 1C. Fundamentals in Persian. 5 Units.**

Designed for students with little or no exposure to Persian. Students learn the modern writing system and grammar of Persian. Facilitates basic reading, writing, and speaking skills and fosters college-level literacy in Persian culture.

Prerequisite: PERSIAN 1B or PERSIAN S1AB. PERSIAN 1B with a grade of C or better. PERSIAN S1AB with a grade of C or better. Placement into PERSIAN 1C is also accepted.

Overlaps with PERSIAN S1BC.

Restriction: PERSIAN 1C and PERSIAN S1BC may not be taken for full credit.

(VI)

**PERSIAN 2A. Intermediate Persian. 4 Units.**

Designed for students to advance their Persian language skills from introductory to intermediate level. Student will advance their understanding of grammar and syntax. Facilitates intermediate-level reading, writing, and speaking skills. Fosters college-level cultural literacy.

Prerequisite: PERSIAN 1C or PERSIAN S1BC. PERSIAN 1C with a grade of C or better. PERSIAN S1BC with a grade of C or better. Placement into PERSIAN 2A is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

(VIII)

**PERSIAN 2B. Intermediate Persian. 4 Units.**

Designed for students to advance their Persian language skills from introductory to intermediate level. Students will advance their understanding of grammar and syntax. Facilitates intermediate-level reading, writing, and speaking skills. Fosters college-level cultural literacy.

Prerequisite: PERSIAN 2A. PERSIAN 2A with a grade of C or better. Placement into PERSIAN 2B is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

(VIII)

**PERSIAN 2C. Intermediate Persian. 4 Units.**

Designed for students to advance their Persian language skills from introductory to intermediate level. Students will advance their understanding of grammar and syntax. Facilitates intermediate-level reading, writing, and speaking skills. Fosters college-level cultural literacy.

Prerequisite: PERSIAN 2B. PERSIAN 2B with a grade of C or better. Placement into PERSIAN 2C is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

(VIII)

**PERSIAN 10A. Persian Peer-to-Peer Language Mentor Program. 1 Unit.**

Peer-to-Peer Language Mentor Program in which student mentors work with student mentees to increase the language skills of both participants. One hour weekly meetings. PERSIAN 10A is for language mentors.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**PERSIAN 10B. Persian Peer-to-Peer Language Mentor Program. 1 Unit.**

Peer-to-Peer Language Mentor Program in which student mentors work with student mentees to increase the language skills of both participants. One hour weekly meetings. PERSIAN 10B is for language mentees.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**PERSIAN 50. Persian Culture. 4 Units.**

Study of varied topics in Persian culture, area studies, and society, both in the present and in historical perspective. Topics are not normally repeated for a two-year period.

Repeatability: Unlimited as topics vary.

(IV, VIII)

**PERSIAN 150. Topics in Advanced Persian Culture. 4 Units.**

In-depth examination of major works in premodern and modern Persian literature and/or the arts, with specific emphasis upon historical and cultural context and relevant societal issues and trends. Course is conducted in English.

Repeatability: May be taken for credit for 4 units as topics vary.

**PERSIAN 165A. Modern Iran: Cinema and the City. 4 Units.**

Exploring modern Iran through film, literature, photography, travel writing, and philosophy and social science texts that introduce students to important concepts in post-colonial studies, social thought, war culture, religion, and media as experienced through the paradigm of a non-Western modernity.

Same as ANTHRO 165A.

**PERSIAN 199. Independent Study. 4 Units.**

Independent research with Persian faculty.

Repeatability: May be repeated for credit unlimited times.

## Philosophy Courses

**PHILOS 1. Introduction to Philosophy. 4 Units.**

A selection of philosophical problems, concepts, and methods, e.g., free will, cause and substance, personal identity, the nature of philosophy itself. Materials fee.

(IV)

**PHILOS 2. Puzzles and Paradoxes. 4 Units.**

Introduction to the formal tools needed to comprehend and evaluate philosophical arguments and theoretical reasoning in general.

(IV and VB ).

**PHILOS 3. Technology and Society. 4 Units.**

A study of the nature of technology, its relation to human values, the philosophical assumptions in its development, and the philosophical implications of technology.

(II)

**PHILOS 4. Introduction to Ethics. 4 Units.**

Selected topics from the history of ethics, e.g., the nature of the good life and the moral justification of conduct.

(IV)

**PHILOS 5. Contemporary Moral Problems. 4 Units.**

Selected moral issues of current interest, e.g., abortion, sexual morality, euthanasia, capital punishment, reverse discrimination, civil disobedience, or violence.

(IV)

**PHILOS 7. Introduction to Existentialism. 4 Units.**

An analysis of themes in phenomenology and existentialism and their philosophical origins, e.g., consciousness, self and other, freedom and individuality.

(IV)

**PHILOS 10. History of Ancient Philosophy. 4 Units.**

Examination of the central philosophical themes developed by the pre-Socratics, Socrates, Plato, Aristotle, the Stoics, the Epicureans, and the Skeptics.

(IV)

**PHILOS 11. History of Medieval Philosophy. 4 Units.**

A study of some of the major theological and philosophical texts from the Medieval period.

Prerequisite: Recommended: PHILOS 10.

(IV)

**PHILOS 12. History of Modern Philosophy. 4 Units.**

A study of major developments in western philosophy from Descartes to Kant with readings from Descartes, Leibniz, Locke, Berkeley, Hume, and Kant.

Prerequisite: Recommended: PHILOS 10 or PHILOS 11.

(IV)

**PHILOS 13. History of Contemporary Philosophy. 4 Units.**

A study of recent philosophical developments in Anglo-American and Continental philosophy with readings from such figures as Russell, Moore, Wittgenstein, Quine, Heidegger, and Sartre.

Prerequisite: Recommended: PHILOS 12.

(IV)

**PHILOS 21. Philosophy and Religion. 4 Units.**

Examines the intersection of religion and philosophy from a standpoint that does not presuppose previous academic study of either. Both Western and Eastern traditions and perspectives may be explored.

Repeatability: Unlimited as topics vary.

Same as REL STD 21.

(IV)

**PHILOS 22. Introduction to Law and Society. 4 Units.**

What constitutes a legal system? What does it mean for a society to have a system as a part of the social fabric. Examines the social status of law and its use as a tool for fashioning society.

(III)

**PHILOS 29. Critical Reasoning. 4 Units.**

Introduction to analysis and reasoning. The concepts of argument, premise, and conclusion, validity and invalidity, consistency and inconsistency. Identifying and assessing premises and inferences. Deductive versus inductive reasoning, and introduction to the probability calculus. Evaluating definitions. Informal fallacies.

Same as LPS 29.

(II and Vb ).

**PHILOS 30. Introduction to Symbolic Logic. 4 Units.**

An introduction to the symbolism and methods of the logic of statements, including evaluation of arguments by truth tables, the techniques of natural deduction, and semantic tableaux.

Same as LPS 30, LSCI 43.

(Vb)

**PHILOS 31. Introduction to Inductive Logic. 4 Units.**

Philosophical questions concerning the foundations of scientific inference, e.g., the traditional problem of induction, the Goodman paradox, the concept of cause, Mill's method of inductive reasoning, probability calculus, different interpretations of probability, and their interaction in inductive reasoning.

Same as LPS 31.

(II, Va)

**PHILOS 40. Special Topics in Philosophy. 4 Units.**

Lectures on selected topics at the lower-division level.

Repeatability: Unlimited as topics vary.

**PHILOS 91. The Philosophy of Sex. 4 Units.**

Discusses the origins of biological sex, dynamics of sexual selection, sex differences in humans, and the construction of gender in human societies. Seeks to understand the role social values play in the creation of science.

Same as LPS 91.

Overlaps with LPS H91.

(III)

**PHILOS 100W. Writing Philosophy. 4 Units.**

Discussion of those aspects of writing of special importance in philosophy, e.g., philosophical terminology, techniques for evaluating arguments, philosophical definitions and theories. At least 4,000 words of assigned composition based on philosophical readings.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as LPS 100W.

Restriction: Upper-division students only.

(Ib)

**PHILOS 101. Introduction to Metaphysics. 4 Units.**

A study of one or more of the problems of 'first philosophy,' e.g., substance, free will, causation, abstract entities, identity.

**PHILOS 102. Introduction to the Theory of Knowledge. 4 Units.**

A study of one or more of the basic issues in epistemology, e.g., the role of perception in the acquisition of knowledge, the nature of evidence, the distinction between belief and knowledge, and the nature of truth and certainty.

Same as LPS 102.

**PHILOS 102W. Introduction to the Theory of Knowledge. 4 Units.**

A study of one or more of the basic issues in epistemology, e.g., the role of perception in the acquisition of knowledge, the nature of evidence, the distinction between belief and knowledge, and the nature of truth and certainty.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Overlaps with PHILOS 102, LPS 102.

**(Ib)**

**PHILOS 103. Introduction to Moral Philosophy. 4 Units.**

A study of one or more of the problems of contemporary moral philosophy, e.g., the nature of justice, liberalism versus conservatism, happiness and its relation to virtue and right conduct, the objectivity of moral standards.

**PHILOS 104. Introduction to Logic. 4 Units.**

Introduction to sentence logic, including truth tables and natural deduction; and to predicate logic, including semantics and natural deduction.

Same as LPS 104, LSCI 142.

**PHILOS 105A. Elementary Set Theory. 4 Units.**

An introduction to the basic working vocabulary of mathematical reasoning. Topics include sets, Boolean operations, ordered n-tuples, relations, functions, ordinal and cardinal numbers.

Same as LPS 105A, LSCI 145A.

**PHILOS 105B. Metalogic. 4 Units.**

Introduction to formal syntax (proof theory) and semantics (model theory) for first-order logic, including the deduction, completeness, compactness, and Löwenheim-Skolem theorems.

Prerequisite: PHILOS 105A

Same as LPS 105B, LSCI 145B.

Overlaps with MATH 150.

**PHILOS 105C. Undecidability and Incompleteness. 4 Units.**

Introduction to the formal theory of effective processes, including recursive functions, Turing machines, Church's thesis, and proofs of Gödel's incompleteness theorem for arithmetic, and Church's undecidability theorem for first-order logic.

Prerequisite: PHILOS 105B

Same as LPS 105C, LSCI 145C.

Overlaps with MATH 152.

Concurrent with LPS 205C.

**PHILOS 106. Topics in Logic . 4 Units.**

Selected topics in mathematical or philosophical logic.

Prerequisite: PHILOS 105B or LPS 105B

Repeatability: Unlimited as topics vary.

Same as LPS 106.

**PHILOS 108. Topics in Induction, Probability, and Decision Theory. 4 Units.**

Selected topics in induction, probability, and decision theory.

Repeatability: Unlimited as topics vary.

Same as LPS 108.

**PHILOS 110. Topics in Ancient Philosophy. 4 Units.**

Selected topics from the writings of Plato and Aristotle, e.g., Aristotle's criticisms of Plato's metaphysics, ethics, or politics.

Repeatability: May be taken for credit 2 times as topics vary.

**PHILOS 111. Topics in Medieval Philosophy. 4 Units.**

Studies of some of the major issues of concern to Medieval philosophers, e.g., universals, the nature and existence of God, faith, and reason.

Repeatability: May be taken for credit 2 times as topics vary.

**PHILOS 113. Topics in Modern Philosophy. 4 Units.**

Focuses on the works of central philosophical figures of modern Philosophy (e.g., Descartes, Leibniz, Hobbes, Locke, Hume, Kant) or on the treatment of one or more central philosophical problems by a number of these figures.

Repeatability: Unlimited as topics vary.

Same as LPS 113.

**PHILOS 114. Topics in Nineteenth-Century Philosophy. 4 Units.**

Studies of some of the major figures after Kant (e.g., Hegel, Nietzsche, Marx, Kierkegaard), especially in German idealism and social thought.

Repeatability: Unlimited as topics vary.

**PHILOS 115. Topics in History of Analytic Philosophy. 4 Units.**

Review of central theories or figures in the history of analytic philosophy. Emphasis on writings of Frege, Russell, Schlick, Carnap, and Quine. Topics include the nature of meaning and truth, the synthetic/analytic distinction, and scientific knowledge.

Repeatability: Unlimited as topics vary.

Same as LPS 115.

**PHILOS 116. Topics in Continental Philosophy. 4 Units.**

Studies of some of the major figures (e.g., Husserl), movements (e.g., phenomenology, existentialism) in early twentieth-century continental European thought.

Repeatability: Unlimited as topics vary.

**PHILOS 117. Topics in Asian Philosophy. 4 Units.**

Selected topics in the philosophies of Asia, e.g. Jainism, Buddhism, Yoga, Vedanta, Confucianism, Taoism, and Shinto.

Repeatability: Unlimited as topics vary.

**PHILOS 120. Topics in Metaphysics. 4 Units.**

Examines central philosophical questions concerning our own fundamental nature and that of the world around us (e.g., causation and necessity, determination, free will, personal identity, the mind-body problem).

Repeatability: Unlimited as topics vary.

Same as LPS 120.

**PHILOS 121. Topics in the Theory of Knowledge . 4 Units.**

One or more topics in the theory of knowledge, e.g., the nature of rational justification, of perceptual knowledge, of a priori knowledge.

Repeatability: Unlimited as topics vary.

Same as LPS 121.

**PHILOS 121A. Medical Epistemology. 4 Units.**

Analysis of epistemological issues concerning medical research and health care. Topics may include medical evidence, transmission of medical knowledge, medical expertise, the epistemology of medical disagreement, classification of illnesses, well-being, philosophy of pain, and medical decision making.

**PHILOS 122. Topics in Philosophy of Mind. 4 Units.**

Selected topics involving the concept of mind, e.g., the relation between mind and body, the self, personal identity, consciousness, the unconscious.

Repeatability: Unlimited as topics vary.

**PHILOS 123. Topics in Philosophy of Religion. 4 Units.**

Critical examination of concepts involved in the theological literature, e.g., the nature and existence of God, miracles, the problem of evil, divine command theories in ethics.

Repeatability: Unlimited as topics vary.

**PHILOS 130. Topics in Moral Philosophy. 4 Units.**

Selected topics in ethics.

Repeatability: Unlimited as topics vary.

**PHILOS 131A. Applied Ethics. 4 Units.**

Topics may include capital punishment, world hunger, obligations to future generations, environmental ethics, animal rights, economic justice, sexual morality, affirmative action, racism and sexism, or legalization of drugs.

**PHILOS 131C. Medical Ethics. 4 Units.**

Analysis of moral issues concerning health care. Topics may include just allocation of scarce medical resources, the doctor/patient relationship, genetic engineering, surrogate motherhood, abortion, euthanasia, or social policy concerning AIDS.

**PHILOS 132. Topics in Political and Social Philosophy. 4 Units.**

Selected topics in social and political philosophy, e.g., the functions of government, the justification of political authority, the nature of democracy, the varieties of liberty, and social justice. Readings from classical and contemporary sources.

Repeatability: Unlimited as topics vary.

**PHILOS 133. Topics in Philosophy of Law. 4 Units.**

Selected topics concerning legal systems and the concept of law, e.g., the nature and purpose of law, the nature of authority, the relationship between law and morality, law and political-economic systems.

Repeatability: Unlimited as topics vary.

**PHILOS 140. Topics in Philosophy of Science. 4 Units.**

Selected topics in contemporary philosophy of science, e.g., the status of theoretical entities, the confirmation of theories, the nature of scientific explanation.

Repeatability: Unlimited as topics vary.

Same as LPS 140.

**PHILOS 141A. Topics in Philosophy of Physics. 4 Units.**

Selected topics in the philosophy of physics, e.g., the interpretation of quantum mechanics, the nature of spacetime, the problem of quantum field theories.

Repeatability: Unlimited as topics vary.

Same as LPS 141A.

**PHILOS 141B. Geometry and Spacetime. 4 Units.**

An examination of the foundations of the special theory of relativity, with emphasis on the geometry of Minkowski spacetime, and its relation to both Euclidean and non-Euclidean (hyperbolic) plane geometries.

Prerequisite: MATH 2D and (MATH 3A or MATH 6G)

Same as LPS 141B.

**PHILOS 141C. Philosophy of Quantum Mechanics. 4 Units.**

An examination of the standard von Neumann-Dirac formulation of quantum mechanics. The quantum measurement problem is discussed along with several proposed solutions, including GRW, many-worlds, man-minds, and Bohm's theory.

Same as LPS 141C.

**PHILOS 141D. Probability and Determinism. 4 Units.**

An examination of a cluster of interrelated issues concerning probability, determinism, logic, and the foundations of quantum mechanics.

Prerequisite: MATH 2D and (MATH 3A or MATH 6G)

Same as LPS 141D.

**PHILOS 142W. Writing/Philosophy of Biology. 4 Units.**

Philosophy of biology, e.g., scientific method in biology, the structure of evolutionary theory, teleology, ethics, and evolution. Course work includes one 4,000-word and four 1,000-word papers.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as LPS 142W, BIO SCI E142W.

Restriction: Juniors only.

**(Ib)****PHILOS 143. Topics in Philosophy of Psychology. 4 Units.**

Selected topics in the philosophy of psychology, e.g., the nature of psychological explanation, reductionism, issues in cognitive, behavioral, and neuroscience.

Repeatability: Unlimited as topics vary.

Same as LPS 143, PSYCH 123P.

Restriction: Psychology Majors have first consideration for enrollment. Philosophy Majors have first consideration for enrollment.

**PHILOS 144. Topics in Philosophy of Social Science. 4 Units.**

Selected topics in the philosophy of the social sciences, e.g., Is their goal to understand behavior or to predict and control it?; Are they normative and the natural sciences not?; Do they incorporate philosophical doctrines about language and mind?.

Repeatability: May be taken for credit for 4 units as topics vary.

Same as LPS 144.

**PHILOS 145. Topics in Philosophy of Language. 4 Units.**

Selected topics in the philosophy of language, e.g., the nature of meaning, mechanisms of reference, speech acts.

Repeatability: Unlimited as topics vary.

Same as LPS 145, LSCI 141.

**PHILOS 146. Topics in Philosophy of Logic. 4 Units.**

Selected topics in the philosophy of logic, e.g., the nature of logical truth and our knowledge of it, the status of propositions, definite descriptions, and existential presuppositions.

Repeatability: Unlimited as topics vary.

Same as LPS 146.

**PHILOS 147. Topics in Philosophy of Mathematics. 4 Units.**

Selected historical and contemporary topics in the philosophy of mathematics, e.g., mathematical truth and ontology, mathematical knowledge, the nature and role of proof, the workings of mathematics in application.

Repeatability: Unlimited as topics vary.

Same as LPS 147.

**PHILOS 150. Phenomenology . 4 Units.**

A study of the foundations of phenomenology in Husserl and its background in Bolzano, Frege, Brentano, Meinong, Kant, and Descartes.

**PHILOS 151. Existentialism. 4 Units.**

A study of such central existentialist thinkers as Heidegger and Sartre.

Prerequisite: Recommended: PHILOS 7 or PHILOS 150.

**PHILOS 162. Social Ontology. 4 Units.**

Examines how things in one's social environment exist. Such things are compared and contrasted to others in what might be regarded as the given, natural environment. Topics discussed include natural kinds; artifacts; essentialism; constructivism; intentionality; agency.

**PHILOS 163. Social Epistemology. 4 Units.**

Social epistemology is specifically concerned with questions concerning knowledge and justification that arise in a social context. Topics discussed include testimony, experts, disagreement, group knowledge, feminist epistemology, legal epistemology, and epistemology of education.

**PHILOS 164. Well-Being. 4 Units.**

Examines what it is that makes a life good (or bad) for the person who lives it. Topics include hedonism, desire-satisfaction theories of well-being (as well as other such theories), the notion of harm, the possibility of posthumous harm.

**PHILOS 165. Philosophy of Action. 4 Units.**

Philosophy of action is specifically concerned with questions concerning the nature of acting, and related phenomena such as intending, willing, trying, and trusting. It deals both with individual and group action and their moral and epistemological underpinnings.

**PHILOS 190. Special Topics in Philosophy. 4 Units.**

Lectures on selected topics to be given by regular faculty and visiting faculty.

Repeatability: Unlimited as topics vary.

**PHILOS 199. Directed Special Studies. 2-4 Units.**

Independent study on a research topic supervised by a faculty member.

Repeatability: May be repeated for credit unlimited times.

**PHILOS 199H. Honors Directed Special Studies. 2 Units.**

Independent study on a research topic supervised by a faculty member, with the objective of preparing the Department of Philosophy honors paper.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**PHILOS 200. Special Topics in Philosophy. 4 Units.**

Seminars on selected topics to be given by regular faculty and visiting faculty.

Repeatability: Unlimited as topics vary.

**PHILOS 201. First-Year Seminar. 4 Units.**

An examination of some standard works in the history of philosophy, value theory, metaphysics, or epistemology; required of all first-year Philosophy graduate students in the School of Humanities.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only. Philosophy Majors only. Logic and Philosophy of Sci Majors only.

**PHILOS 205A. Set Theory. 4 Units.**

The basic working vocabulary of mathematical reasoning. Topics include: sets, Boolean operations, ordered n-tuples, relations, functions, ordinal and cardinal numbers.

Same as LPS 205A.

**PHILOS 205B. Metalogic. 4 Units.**

Formal syntax (proof theory) and semantics (model theory) for first-order logic, including the deduction, completeness, compactness, and Loewenheim-Skolem theorems.

Prerequisite: PHILOS 205A or LPS 205A

Same as LPS 205B.

**PHILOS 205C. Undecidability and Incompleteness. 4 Units.**

Formal theory of effective processes, including recursive function, Turing machines, Church's thesis, proofs of Goedel's incompleteness theorem for arithmetics, and Church's undecidability for first-order logic.

Prerequisite: PHILOS 205B or LPS 205B

Same as LPS 205C.

Restriction: Graduate students only.

Concurrent with LPS 105C.

**PHILOS 206. Topics in Logic . 4 Units.**

Studies in selected areas of logic. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 206.

**PHILOS 210. Topics in Ancient Philosophy. 4 Units.**

Studies in selected areas of ancient philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 211. Topics in Medieval Philosophy. 4 Units.**

Studies in selected areas of medieval philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 212. Topics in Renaissance Philosophy. 4 Units.**

Studies in selected areas of renaissance philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 213. Topics in Modern Philosophy. 4 Units.**

Studies in selected areas of modern philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 213.

**PHILOS 214. Topics in Nineteenth-Century Philosophy. 4 Units.**

Studies in selected areas of nineteenth-century philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 215. Topics in Analytic Philosophy. 4 Units.**

Studies in selected areas of analytic philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 215.

**PHILOS 216. Topics in Continental Philosophy. 4 Units.**

Studies in selected areas of continental philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 218. Topics in Contemporary Philosophy. 4 Units.**

Studies in selected areas of contemporary philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 220. Topics in Metaphysics. 4 Units.**

Studies in selected areas of metaphysics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 220.

**PHILOS 221. Topics in Epistemology. 4 Units.**

Studies in selected areas of epistemology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 221.

**PHILOS 221A. Medical Epistemology. 4 Units.**

Analysis of epistemological issues concerning medical research and healthcare. Topics may include medical evidence, transmission of medical knowledge in the doctor-patient interaction, medical expertise, epistemology of medical disagreement, classification of illness, well-being, philosophy of pain, or medical decision making.

Same as LPS 221A.

Restriction: Graduate students only.

**PHILOS 222. Topics in Mind and Action. 4 Units.**

Studies in selected areas of mind and action. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 230. Topics in Ethics . 4 Units.**

Studies in selected areas of ethics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 232. Topics in Political and Social Philosophy. 4 Units.**

Studies in selected areas of political and social philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 232.

**PHILOS 234. Topics in Aesthetics . 4 Units.**

Studies in selected areas of aesthetics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 240. Topics in Philosophy of Science. 4 Units.**

Studies in selected areas of philosophy of science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 240.

**PHILOS 241. Topics in Philosophy of Physics. 4 Units.**

Studies in selected areas of philosophy of physics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 241.

**PHILOS 242. Topics in Philosophy of Biology. 4 Units.**

Studies in selected areas of philosophy of biology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 242.

**PHILOS 243. Topics in Philosophy of Psychology. 4 Units.**

Selected topics in the philosophy of psychology, e.g., the nature of psychological explanation, reductionism, issues in cognitive, behavioral, and neuroscience.

Repeatability: Unlimited as topics vary.

Same as LPS 243, PSYCH 231P.

**PHILOS 244. Topics in Philosophy of Social Science. 4 Units.**

Studies in selected areas of philosophy and social science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 244.

**PHILOS 245. Topics in Philosophy of Language. 4 Units.**

Studies in selected areas of philosophy of language. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 245.

**PHILOS 246. Topics in Philosophy of Logic. 4 Units.**

Studies in selected areas of philosophy of logic. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 246.

**PHILOS 247. Topics in Philosophy of Mathematics. 4 Units.**

Studies in selected areas of philosophy of mathematics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 247.

**PHILOS 250. Topics in Existentialism and Phenomenology. 4 Units.**

Studies in selected areas of existentialism and phenomenology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 298. Independent Study. 4-12 Units.**

Independent research with Philosophy faculty.

Repeatability: May be repeated for credit unlimited times.

**PHILOS 299. Directed Research. 4-12 Units.**

Directed research with Philosophy faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHILOS 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Portuguese Courses

**PORTUG 121. Topics in Luso-Brazilian Literature. 4 Units.**

In English. Contextualized study of a major author, current, or genre in Brazilian, Portuguese, and/or Lusophone African literature. Examples: Gender, Race, and Sexualities in Postcolonial Lusophone Literatures; Women and Writing in Brazil and Portugal; The Short Story.

Repeatability: Unlimited as topics vary.

**PORTUG 243. Studies in Luso-Brazilian Literature and Culture. 4 Units.**

Critical analysis of selected literary works from Portugal and/or Brazil. Contextualizes the works within their historical and literary specificity, and discusses pertinent theoretical issues raised by them. Taught in Portuguese.

Prerequisite: Reading knowledge of Portuguese.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

## Religious Studies Courses

### **REL STD 5A. World Religions I. 4 Units.**

An introduction to the history, doctrine, culture, and writing of Judaism, Christianity, and Islam.

Same as HISTORY 16A.

**(IV and VIII ).**

### **REL STD 5B. World Religions II. 4 Units.**

An introduction to various religious traditions in selected areas of the world—including India and South Asia, East Asia, Africa, and the Americas.

Same as HISTORY 16B.

**(IV and VIII ).**

### **REL STD 5C. Religious Dialogue. 4 Units.**

Lectures and discussion on controversial topics in religion: sexual morality; religious violence; science; treatment of women and girls; religious truth, American Constitutional matters; secularization; the future of religion, and other topics.

Same as HISTORY 16C.

**(IV, VIII)**

### **REL STD 17. An Economic Approach to Religion. 4 Units.**

Introduction to how basic economic concepts such as demand, supply, consumption, production, competition, free-riding, innovation, regulation, and rent-seeking can be applied to understand observed religious behavior.

Same as ECON 17.

**(III)**

### **REL STD 21. Philosophy and Religion. 4 Units.**

Examines the intersection of religion and philosophy from a standpoint that does not presuppose previous academic study of either. Both Western and Eastern traditions and perspectives may be explored.

Repeatability: Unlimited as topics vary.

Same as PHILOS 21.

**(IV)**

### **REL STD 61. Gender and Religion. 4 Units.**

Introduces the topic of religion in a feminist context by performing cross-cultural exploration of gender, authority, and faith in various traditions. Study includes (but is not limited to) writings of contemporary Jewish, Christian, and Muslim feminists.

Same as GEN&SEX 60C.

**(III and VIII ).**

### **REL STD 90. Aspects of Religion. 4 Units.**

A presentation of selected issues in the study of religion.

Repeatability: May be taken for credit 3 times as topics vary.

### **REL STD 91. Topics in Aspects of Asian Religions. 4 Units.**

A survey course of a specific Asian religious tradition such as Hinduism, Buddhism, Jainism, Sikhism, Daoism, Confucianism, or Shinto in its manifestation in Asia or in its transmission to the Americas.

Repeatability: May be taken for credit 3 times as topics vary.

### **REL STD 100. Topics in the Study of Religion. 4 Units.**

The intersection of religious belief and practices with selected subjects of continuing interest.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 103. Topics in the Philosophy of Religion. 4 Units.**

Critical examination of philosophical concepts in religious scripture and theology, e.g., the nature and existence of God, miracles, the problem of evil, and divine command theories in ethics. May include any religious tradition.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 106. Topics in Gender and Religion. 4 Units.**

Critical examination of how religious beliefs and practices have shaped (and been shaped by) attitudes toward gender and sexuality in modern and/or premodern society.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 110. Thinking about Religion: Theories and Methodologies. 4 Units.**

A survey and investigation of the major thinkers, theories, and methodologies in the study of religions. Designed to develop the student's ability to analyze and articulate theoretical arguments; includes a paper on relevant Religious Studies topics.

Prerequisite: (REL STD 5A or HISTORY 16A) and (REL STD 5B or HISTORY 16B) and (REL STD 5C or HISTORY 16C)

Overlaps with REL STD 110W.

Restriction: Religious Studies Majors have first consideration for enrollment.

**REL STD 110W. Thinking about Religion: Theories and Methodologies. 4 Units.**

A survey and investigation of the major thinkers, theories, and methodologies in the study of religions. Designed to develop the student's ability to analyze and articulate theoretical arguments in writing; includes a paper on relevant Religious Studies topics.

Prerequisite: (REL STD 5A or HISTORY 16A) and (REL STD 5B or HISTORY 16B) and (REL STD 5C or HISTORY 16C). Satisfactory completion of the Lower-Division Writing requirement.

Overlaps with REL STD 110.

Restriction: Religious Studies Majors have first consideration for enrollment.

**(Ib)****REL STD 115. Religion and World Politics. 4 Units.**

Examines the relationship between religion and world politics historically and today, focusing on connections with peace/war, democracy, human rights, secularism(s), and globalization. Covers major debates, scholarship, concepts, and theories through class exercises, exams, and essays.

Prerequisite: POL SCI 41A or INTL ST 11 or INTL ST 12 or REL STD 5A or REL STD 5B or REL STD 5C

Same as POL SCI 146B, INTL ST 151B.

**REL STD 120. Topics in Asian Religious Traditions. 4 Units.**

Studies involving (but not limited to) Hinduism, Buddhism, Confucianism, Jainism, Sikhism, Daoism, Shinto or Shamanism, including both elite and doctrinal aspects and forms of more popular religiosity.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 122. Ancient India. 4 Units.**

Examines the visual and religious history of the region defined as 'India' today, but necessarily encompassing modern Bangladesh and Pakistan. Culminates with the supposed Golden Age of the Gupta empire and its far-reaching legacies.

Same as HISTORY 170A, ART HIS 155A.

Concurrent with ART HIS 255A.

**REL STD 123. Medieval India. 4 Units.**

Begins with the Gupta period's aesthetic legacies in South Asia's architecture, sculpture, and painting. Explores the dispersal of Islam throughout South Asia, including the Muslim communities of southern India.

Same as HISTORY 170B, ART HIS 155B.

Concurrent with ART HIS 255B.

**REL STD 124. Topics in Modern Indian Religion. 4 Units.**

Topics in religions of the Indian subcontinent including, but not confined to, Hinduism, Jainism, Sikhism, Islam, and Buddhism from the founding of the Mughal Empire in 1526 to the creation of the several modern states of the Indian subcontinent.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 130. Jewish, Islamic, and Middle Eastern Religious Traditions. 4 Units.**

Character and evolution of Egyptian, Jewish, Zoroastrian, Muslim, and other religious communities of the region from their formative periods to the present era.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 130F. Jews and Power. 4 Units.**

Examines the relationship between the Jewish people and political power over a 3500 year period. How have Jews preserved their communal interests and personal safety? How have they defined the proper relationship of the people to political authority.

Same as HISTORY 130F, POL SCI 154J.

**REL STD 131A. History of Zoroastrianism. 4 Units.**

Reviews major trends in the history of Zoroastrianism.

Same as HISTORY 131A.

**REL STD 140. Early Western Religious Traditions. 4 Units.**

Religious perspectives of the Mediterranean and European regions from the earliest times to approximately 1500 C.E.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 141. Recent Western Religious Traditions. 4 Units.**

Studies related to Catholic, Protestant, and Orthodox Christianity as well as alternative belief systems in Europe of the early modern and modern eras.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 150. Religion in the Americas. 4 Units.**

Religious belief and social context in North and South America from the earliest human societies to the present.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 160. Diaspora Religions. 4 Units.**

Examination of what happens to belief and practice as religious communities are scattered geographically.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 170. Topics in Comparative Studies in Religion. 4 Units.**

Literary, historical, or philosophical comparison of selected religious and quasi-religious traditions, their beliefs and practices.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 199. Independent Study. 1-4 Units.**

Directed reading and research in consultation with a faculty member. Substantial written work required.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only.

**REL STD 399. University Teaching . 4 Units.**

Limited to teaching assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Russian Courses

### **RUSSIAN 1A. Fundamentals of Russian. 5 Units.**

Focuses on reading, comprehension, basic composition, and conversation skills, and gives the student an initial exposure to the Russian cultural scene.

Prerequisite: Placement into RUSSIAN 1A.

### **RUSSIAN 1B. Fundamentals of Russian. 5 Units.**

Focuses on reading, comprehension, basic composition, and conversation skills, and gives the student an initial exposure to the Russian cultural scene.

Prerequisite: RUSSIAN 1A. RUSSIAN 1A with a grade of C or better. Placement into RUSSIAN 1B is also accepted.

### **RUSSIAN 1C. Fundamentals of Russian. 5 Units.**

Focuses on reading, comprehension, basic composition, and conversation skills, and gives the student an initial exposure to the Russian cultural scene.

Prerequisite: RUSSIAN 1AB or RUSSIAN 1B. RUSSIAN 1AB with a grade of C or better. RUSSIAN 1B with a grade of C or better. Placement into RUSSIAN 1C is also accepted.

### **(VI)**

### **RUSSIAN 2A. Intermediate Russian. 4 Units.**

Students read simple passages from contemporary Russian literary texts and newspapers. Development of oral skills and exposure to Russian culture continue.

Prerequisite: RUSSIAN 1BC or RUSSIAN 1C. RUSSIAN 1BC with a grade of C or better. RUSSIAN 1C with a grade of C or better. Placement into RUSSIAN 2A is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

### **(VIII)**

### **RUSSIAN 2B. Intermediate Russian. 4 Units.**

Students read simple passages from contemporary Russian literary texts and newspapers. Development of oral skills and exposure to Russian culture continue.

Prerequisite: RUSSIAN 2A. RUSSIAN 2A with a grade of C or better. Placement into RUSSIAN 2B is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

### **(VIII)**

### **RUSSIAN 2C. Intermediate Russian. 4 Units.**

Students read simple passages from contemporary Russian literary texts and newspapers. Development of oral skills and exposure to Russian culture continue.

Prerequisite: RUSSIAN 2B. RUSSIAN 2B with a grade of C or better. Placement into RUSSIAN 2C is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

### **(VIII)**

### **RUSSIAN 50. Russian Culture . 4 Units.**

Study of varied topics in Russian culture, area studies, and society, both in the present and in historical perspective.

Repeatability: May be taken for credit 4 times as topics vary.

### **(IV, VIII)**

### **RUSSIAN 99. Special Studies Russian. 1-5 Units.**

Special studies under faculty supervision.

Repeatability: May be taken for credit 2 times.

### **RUSSIAN 150. Topics in Russian Literature. 4 Units.**

Examines major themes in Russian literature, film, and other media from the eighteenth to twenty-first centuries. Taught in English.

Repeatability: Unlimited as topics vary.

**RUSSIAN 190. Topics in Russian Language Through Film. 4 Units.**

Uses Russian films of the late 20th century to enhance students' language skills and deepen their cultural knowledge. Work involves intensive conversation, reading and listening comprehension, and the acquisition of written skills and grammatical accuracy. Conducted primarily in Russian.

Prerequisite or corequisite: RUSSIAN 2C

Repeatability: Unlimited as topics vary.

**RUSSIAN 199. Independent Study. 1-4 Units.**

Independent study under direct faculty supervision.

Repeatability: May be taken for credit 2 times.

## Spanish Courses

**SPANISH 1A. Fundamentals of Spanish. 5 Units.**

Communicative approach with emphasis on conversational skills: the students and their environment, their experiences, and their opinions about issues. Reading and writing skills also introduced.

Prerequisite: Placement into SPANISH 1A.

Overlaps with SPANISH 1AB, SPANISH S1AB.

Restriction: SPANISH 1A and SPANISH 1AB and SPANISH S1AB may not be taken for full credit.

**SPANISH 1AB. Fundamentals Intensive Spanish. 10 Units.**

An intensive, proficiency-oriented, and task-based approach, designed to develop basic oral communicative abilities in Spanish. Reading and writing skills, along with an introduction to Hispanic cultures.

Prerequisite: Placement into SPANISH 1A.

Overlaps with SPANISH 1A, SPANISH 1B, SPANISH S1AB.

Restriction: SPANISH 1AB and SPANISH 1A and SPANISH 1B and SPANISH S1AB may not be taken for full credit.

**SPANISH 1B. Fundamentals of Spanish. 5 Units.**

Communicative approach with emphasis on conversational skills: the students and their environment, their experiences, and their opinions about issues. Reading and writing skills also introduced.

Prerequisite: SPANISH 1A. SPANISH 1A with a grade of C or better. Placement into SPANISH 1B is also accepted.

Overlaps with SPANISH 1AB, SPANISH S1AB.

Restriction: SPANISH 1B and SPANISH 1AB and SPANISH S1AB may not be taken for full credit.

**SPANISH 1C. Fundamentals of Spanish. 5 Units.**

Communicative approach with emphasis on conversational skills: the students and their environment, their experiences, and their opinions about issues. Reading and writing skills also introduced.

Prerequisite: SPANISH 1AB or SPANISH 1B or SPANISH S1AB. SPANISH 1AB with a grade of C or better. SPANISH 1B with a grade of C or better. SPANISH S1AB with a grade of B or better. Placement into SPANISH 1C is also accepted.

Overlaps with SPANISH S1BC.

Restriction: SPANISH 1C and SPANISH S1BC may not be taken for full credit.

## (VI)

**SPANISH S1AB. Fundamentals of Spanish. 7.5 Units.**

First half of first-year Spanish in an intensified form. Communicative approach with emphasis on conversational skills.

Prerequisite: Placement into SPANISH 1A.

Overlaps with SPANISH 1A, SPANISH 1B, SPANISH 1AB.

Restriction: SPANISH S1AB and SPANISH 1A and SPANISH 1B and SPANISH 1AB may not be taken for full credit.

**SPANISH S1BC. Fundamentals of Spanish. 7.5 Units.**

Second half of first-year Spanish in an intensified form. Communicative approach with emphasis on conversational skills.

Prerequisite: SPANISH S1AB or SPANISH 1A or SPANISH 1B. SPANISH S1AB with a grade of C or better. SPANISH 1A with a grade of C or better. SPANISH 1B with a grade of C or better. Placement into SPANISH 1B or SPANISH 1C is also accepted.

Overlaps with SPANISH 1B, SPANISH 1C, SPANISH 1AB.

Restriction: SPANISH S1BC and SPANISH 1B and SPANISH 1C and SPANISH 1AB may not be taken for full credit.

**(VI)****SPANISH 2A. Intermediate Spanish. 4 Units.**

Conversation, reading, and composition skills are developed using texts of literary and social interest. Emphasis on grammar review.

Prerequisite: SPANISH 1C or SPANISH S1BC. SPANISH 1C with a grade of C or better. SPANISH S1BC with a grade of C or better. Placement into SPANISH 2A is also accepted.

Overlaps with SPANISH 2AB, SPANISH S2AB.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)****SPANISH 2AB. Intermediate Intensive Spanish. 8 Units.**

Intensive intermediate course designed to improve student's abilities in reading, writing, speaking, and comprehension, including a thorough introduction to Hispanic cultures. Grammatical component of the language is gradually reviewed and tested.

Prerequisite: SPANISH 1C or SPANISH S1BC. SPANISH 1C with a grade of C or better. SPANISH S1BC with a grade of C or better. Placement into SPANISH 2A is also accepted.

Overlaps with SPANISH 2A, SPANISH 2B, SPANISH S2AB.

**(VIII)****SPANISH 2B. Intermediate Spanish. 4 Units.**

Conversation, reading, and composition skills are developed using texts of literary and social interest. Emphasis on grammar review.

Prerequisite: SPANISH 2A. SPANISH 2A with a grade of C or better. Placement into SPANISH 2B is also accepted.

Overlaps with SPANISH 2AB, SPANISH S2AB.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)****SPANISH 2C. Intermediate Spanish. 4 Units.**

Conversation, reading, and composition skills are developed using texts of literary and social interest. Emphasis on grammar review.

Prerequisite: SPANISH 2AB or SPANISH 2B or SPANISH S2AB. SPANISH 2AB with a grade of C or better. SPANISH 2B with a grade of C or better. SPANISH S2AB with a grade of B or better. Placement into SPANISH 2C is also accepted.

Overlaps with SPANISH S2BC.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)****SPANISH S2AB. Intermediate Spanish. 6 Units.**

First half of second-year Spanish in an intensified form. Conversation, reading, and composition skills are developed using texts of literary and social interest. Emphasis on grammar review.

Prerequisite: SPANISH 1C or SPANISH S1BC. SPANISH 1C with a grade of C or better. SPANISH S1BC with a grade of C or better. Placement into SPANISH 2A is also accepted.

Overlaps with SPANISH 2A, SPANISH 2B, SPANISH 2AB.

**(VIII)**

**SPANISH S2BC. Intermediate Spanish. 6 Units.**

Second half of second-year Spanish in an intensified form. Conversation, reading, and composition skills are developed using texts of literary and social interest. Emphasis on grammar review.

Prerequisite: SPANISH 2B or SPANISH S2AB or SPANISH 2A. SPANISH 2B with a grade of C or better. SPANISH S2AB with a grade of C or better. SPANISH 2A with a grade of B or better. Placement into SPANISH 2B or SPANISH 2C is also accepted.

Overlaps with SPANISH 2B, SPANISH 2C, SPANISH 2AB, SPANISH 2.

Restriction: SPANISH S2BC and SPANISH 2B and SPANISH 2C and SPANISH 2AB and SPANISH 2 may not be taken for full credit.

**(VIII)**

**SPANISH 3. US Latino Communities. 4 Units.**

Focuses on intermediate to advanced grammar and composition. Emphasis is placed on key elements of grammar, which constitutes about 70 percent of the curriculum, and composition writing, which constitutes the remaining 30 percent.

Prerequisite: SPANISH 2C or SPANISH S2BC. SPANISH 2C with a grade of C or better. SPANISH S2BC with a grade of C or better. Placement into SPANISH 3 is also accepted.

Overlaps with SPANISH 3H.

**(VIII)**

**SPANISH 3H. Heritage Spanish: Latinidad. 4 Units.**

Designed for students who grew up speaking Spanish in their homes/communities, whose schooling has been primarily in English, and need additional practice writing in Spanish.

Prerequisite: Placement into SPANISH 3H.

Overlaps with SPANISH 3.

**(VII)**

**SPANISH 44. Hispanic Literatures for Nonmajors. 4 Units.**

Focuses on major Spanish and Latin American literary texts within a historical and theoretical perspective. Taught in English with literary texts read in the original language.

Prerequisite: SPANISH 2 or SPANISH 2C or SPANISH S2BC

Restriction: No Spanish Majors.

**(VIII)**

**SPANISH 50. Latin America, U.S. Latino, and Iberian Cultures. 4 Units.**

Introduction (for non-majors) to the culture of the Spanish- and Portuguese-speaking worlds (Europe, Latin America, U.S., Africa). May focus on any time period. Taught in English.

Repeatability: May be taken for credit 3 times as topics vary.

**(IV and VIII ).**

**SPANISH 60E. Mexico and Central America: A Survey . 4 Units.**

Panoramic view of Mexico and Central America examining key texts throughout history. Shows the richness of the culture, and an appraisal of various forms of representation, including images, chronicles, novels, essays, poems, and a film. Taught in English.

Overlaps with SPANISH 60S.

**(IV and VIII ).**

**SPANISH 60S. Mexico and Central America: A Survey . 4 Units.**

Panoramic view of Mexico and Central America examining key texts throughout history. Shows the richness of the culture, and an appraisal of various forms of representation, including images, chronicles, novels, essays, poems, and a film. Taught in Spanish.

Prerequisite: Placement into SPANISH 2A or higher via Spanish Placement Test B is required.

Overlaps with SPANISH 60E.

(IV and VIII ).

**SPANISH 61. The Culture of the Visual Image in Latin America . 4 Units.**

A survey of visual forms of expression which have endured through more than five centuries of pre-colonial, colonial, and independent Latin America. Forms to be treated in the class include painting, monuments, sculpture, urban planning, graffiti, comics, and photography.

(IV and VIII ).

**SPANISH 62. Latinx, Multilingualism, and Social Justice . 4 Units.**

Explores the role of multilingualism (Spanish, indigenous languages, Latino English) in Latinx social justice movements in the United States with an emphasis on California. Course is taught in English.

(VII)

**SPANISH 97. Fundamentals of Spanish (with Emphasis on Reading). 4 Units.**

Designed for students interested in acquiring a solid reading knowledge of Spanish, and to facilitate the understanding and translating of Spanish texts covering a variety of disciplines. Does not fulfill any undergraduate foreign language requirement. Taught in English.

Prerequisite: Does not serve as prerequisite for any higher-level Spanish courses.

Restriction: No Spanish Majors.

**SPANISH 101A. Introduction to Iberian Literature and Culture. 4 Units.**

Introduction to the major authors and movements of Iberian literature and culture from the Middle Ages to the present.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

**SPANISH 101B. Introductory Studies to Latin American Literature and Culture. 4 Units.**

A historical overview of Latin American literature and culture mainly focused on canonical texts. Topics include colonialism and postcolonialism, the nation, indigenismo, gender, and literary movements. Also introduces literary analysis, research methods, and cultural critique.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

**SPANISH 104. Writing in Spanish. 4 Units.**

Focuses on the use of writing as a medium to encourage critical thinking and the practical analysis of literary texts, as well as the study of historical and social issues in the Spanish-speaking world.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

**SPANISH 105. Spanish Communication. 4 Units.**

Designed to help students develop Spanish oral skills by exposing them to different verbal Spanish language registers. Special emphasis placed on abilities essential to professional or academic careers. Intended for Spanish majors as an important component of their overall education.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

**SPANISH 107. Advanced Spanish Grammar. 4 Units.**

Designed for students who have demonstrated a substantial level of proficiency in their studies of the Spanish language. Takes thorough approach to advanced grammatical problems, in order to assist students in their mastery of the elements of the Spanish language.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

**SPANISH 110A. Topics in Peninsular Literature and Cultures. 4 Units.**

Topics in Peninsular literature and cultures.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: Unlimited as topics vary.

**SPANISH 110B. Topics in Latin American Literature and Cultures. 4 Units.**

Topics in Latin American literature and cultures.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: Unlimited as topics vary.

**SPANISH 110C. U.S. Latino Literature and Cultures. 4 Units.**

Focuses on aspects of literature, art, cultural production, and history of the multifaceted Latino cultures that have developed within the United States. Focuses on one group, such as Caribbean Americans, Chicanos, Central Americans, or a comparative perspective of several groups.

Same as CHC/LAT 134.

**SPANISH 113A. Spanish Phonetics. 4 Units.**

Introduction to fundamental notions of Spanish phonetics. Particular attention paid to problems of pronunciation that arise in native and non-native speakers of Spanish due to interference between Spanish and English. Phonology (the system that underlies phonetics) and Spanish dialectology included.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

**SPANISH 113B. Introduction to Spanish Linguistics. 4 Units.**

Application of basic notions of linguistics to Spanish, Spanish phonology, morphology, syntax, and semantics. Special attention to the application of linguistics to the teaching of Spanish.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

**SPANISH 119. Textual Analysis and Interpretation. 4 Units.**

Focus on analysis and interpretation of literary texts. Emphasis on narrative, poetry, theater/performance, and visual media. Introduces students to major currents in theoretical thought, such as cultural studies, postmodernism, and others. Oral presentations and short essays required. Taught in Spanish.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

**SPANISH 121. Topics in Golden Age Literature and Culture. 4 Units.**

Golden Age Literature in Spain, including the Renaissance and Baroque periods. Works of poetry, narrative, and theater. Historical and cultural background.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: May be taken for credit 3 times as topics vary.

**SPANISH 122. Topics in 18th and 19th Century Spanish Literature and Culture. 4 Units.**

The main literary and ideological trends in 18th and 19th century Spain, including the enlightenment, romanticism, realism, and naturalism.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: May be taken for credit 3 times as topics vary.

**SPANISH 123. Topics in 20th and 21st Century Spanish Literature and Culture. 4 Units.**

20th century Spanish authors. Works of poetry, narrative, or theater. Historical context of the period and principles of literary theory.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: May be taken for credit 3 times as topics vary.

**SPANISH 130A. Topics in Latin American Colonial Literature and Culture. 4 Units.**

Topics in Latin American colonial literature and culture.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: Unlimited as topics vary.

**SPANISH 130B. Topics in Latin American Literature and Culture of the 19th Century. 4 Units.**

Topics in Latin American literature and culture of the 19th century.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: Unlimited as topics vary.

**SPANISH 130C. Topics in Latin American Literature and Culture of the 20th Century. 4 Units.**

Topics in Latin American literature and culture of the 20th century.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: Unlimited as topics vary.

**SPANISH 140. Topics in Chicano Literature and Culture. 4 Units.**

Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter. Taught in English.

Repeatability: May be taken for credit 4 times as topics vary.

Same as CHC/LAT 110.

**SPANISH 150. Topics in Literature in Translation. 4 Units.**

Study of texts by modern and contemporary Peninsular, Latin American, and/or U.S. Latino writers in translation. Taught in English. Not applicable toward Spanish major or minor requirements.

Repeatability: Unlimited as topics vary.

**SPANISH 160. Topics in Luso-Hispanic Film Studies. 4 Units.**

Study of Peninsular, Latin-American, and/or U.S. Latino film. Taught in English or Spanish.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: Unlimited as topics vary.

**SPANISH 185. Selected Topics in Peninsular Literature and Culture. 4 Units.**

Selection of representative topics in Spanish and/or Portuguese literature and culture.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: Unlimited as topics vary.

**SPANISH 186. Selected Topics in Latin American Literature and Culture. 4 Units.**

Selection of representative topics in the history of Latin American literature and culture.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: Unlimited as topics vary.

**SPANISH 187. Selected Topics in Spanish Linguistics. 4 Units.**

Major topics in Spanish linguistics.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: Unlimited as topics vary.

**SPANISH 190. Colloquium. 4 Units.**

Specialized, discussion-based course dealing primarily with a research topic that reflects the instructor's current intellectual interests. Required oral presentation(s) and final research paper. Limited to 15 students.

Prerequisite: SPANISH 107 or SPANISH 113A

Restriction: Upper-division students only. Spanish Majors only.

**SPANISH 199. Independent Study. 1-4 Units.**

Research paper required.

Repeatability: May be repeated for credit unlimited times.

**SPANISH 201. History of the Spanish Language. 4 Units.**

Diachronic survey of phonological changes from Latin to Old Spanish to Modern Spanish. Focuses in Castilian including Romance languages and other peninsula dialects for comparative purposes. Morphological changes.

**SPANISH 204. Spanish in Contact. 4 Units.**

Sociohistorical and linguistic overview of Spanish in contact with Basque, Catalan, English, German, American Indian, and African languages in Spain, Latin America, and the United States. Examines theories about language contact, and linguistic changes in Spanish phonology and grammar.

**SPANISH 205. Spanish Dialectology. 4 Units.**

Phonological, morphological, and syntactic variations in Spanish as spoken in the Hispanic world, from synchronic and diachronic points of view. The study of Spanish as spoken in the United States.

Restriction: Graduate students only.

**SPANISH 214. Topics in Golden Age Literature and Culture. 4 Units.**

Topics in Golden Age literature and culture.

Repeatability: Unlimited as topics vary.

**SPANISH 218. Topics in Enlightenment and Romanticism. 4 Units.**

Topics in Enlightenment and Romanticism.

Repeatability: Unlimited as topics vary.

**SPANISH 219. Topics in Nineteenth Century. 4 Units.**

Topics in nineteenth-century Spanish literature and culture.

Repeatability: Unlimited as topics vary.

**SPANISH 220. Topics in Twentieth Century. 4 Units.**

Topics in twentieth-century Spanish literature and culture.

Repeatability: Unlimited as topics vary.

**SPANISH 221. Topics in Iberian Studies. 4 Units.**

Cross-cultural connections and interactions between different ethnicities in the Iberian Peninsula.

Repeatability: Unlimited as topics vary.

**SPANISH 231. Topics in Colonial Latin America. 4 Units.**

Topics in Colonial Latin America.

Repeatability: Unlimited as topics vary.

**SPANISH 232. Topics in Nineteenth-Century Latin America. 4 Units.**

Topics in nineteenth-century Latin America.

Repeatability: Unlimited as topics vary.

**SPANISH 233. Topics in Twentieth-Century Latin America. 4 Units.**

Topics in twentieth-century Latin America.

Repeatability: Unlimited as topics vary.

**SPANISH 234. Topics in Latin America. 4 Units.**

Topics in Latin America.

Repeatability: Unlimited as topics vary.

**SPANISH 235. Topics in Trans-Oceanic Studies. 4 Units.**

Focuses on meaningful connections between different geographical and cultural areas.

Repeatability: Unlimited as topics vary.

**SPANISH 239A. Topics in Literary Theory I. 4 Units.**

Traces the development of Western literary critical principles from Aristotle to the twentieth century through selected readings of key figures in intellectual history (Aristotle, St. Augustine, Descartes, Kant, Hegel, Marx, Nietzsche, William James, Freud).

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SPANISH 239B. Topics in Literary Theory II. 4 Units.**

Study of major critical movements of the twentieth century, from Modernism's varied trends to those of the Postmodern/Postcolonial period. Emphasis on the development of prior critical discourses as well as revisionary theories.

Prerequisite: SPANISH 239A

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SPANISH 239C. Special Topics in Theory. 4 Units.**

Focus on issues related to critical theory, theory of literature, cultural criticism and visual arts as they pertain specifically to Latin America, Spain, Portugal, and Brazil. Topics vary. Examples: Latin American cultural studies; theory, film, and media in post-war Spain.

Repeatability: Unlimited as topics vary.

**SPANISH 245. Topics in Luso-Hispanic Film. 4 Units.**

Topics in Luso-Hispanic Film.

Repeatability: Unlimited as topics vary.

**SPANISH 251. Topics in Chicano Literature and Culture. 4 Units.**

Topics in Chicano Literature and Culture.

Repeatability: Unlimited as topics vary.

**SPANISH 252. Topics in U.S. Latino Literature and Culture. 4 Units.**

Topics in U.S. Latino Literature and Culture.

Repeatability: Unlimited as topics vary.

**SPANISH 260. Seminar in Spanish . 4 Units.**

Topics in Spanish.

Repeatability: Unlimited as topics vary.

**SPANISH 270. Creative Writing Workshop in Spanish/English. 4 Units.**

Discussion of theory and practice of creative writing. Focus on critical analysis of participant's work in progress. Texts may be written in Spanish and/or English and may be written in poetry or prose format.

Repeatability: Unlimited as topics vary.

**SPANISH 290. Individual Study. 4 Units.**

Individual Study.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SPANISH 291. Directed Reading. 4 Units.**

Directed Reading in Spanish.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SPANISH 292. Teaching Practicum. 4 Units.**

Teaching Practicum.

Grading Option: Satisfactory/unsatisfactory only.

**SPANISH 299. Dissertation Research. 4-12 Units.**

Dissertation Research.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Humanities students only.

**SPANISH 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Vietnamese Courses

**VIETMSE 1A. Fundamentals of Vietnamese. 5 Units.**

Designed for students with little or no exposure to Vietnamese. Natural approach with emphasis on four fundamental skills of listening, speaking, reading, and writing. Conducted in Vietnamese.

Prerequisite: Placement into VIETMSE 1A is required.

**VIETMSE 1B. Fundamentals of Vietnamese. 5 Units.**

Designed for students with little or no exposure to Vietnamese. Natural approach with emphasis on four fundamental skills of listening, speaking, reading, and writing. Conducted in Vietnamese.

Prerequisite: VIETMSE 1A. VIETMSE 1A with a grade of C or better. Placement into VIETMSE 1B is also accepted.

**VIETMSE 1C. Fundamentals of Vietnamese. 5 Units.**

Designed for students with little or no exposure to Vietnamese. Natural approach with emphasis on four fundamental skills of listening, speaking, reading, and writing. Conducted in Vietnamese.

Prerequisite: VIETMSE 1B or VIETMSE S1AB. VIETMSE 1B with a grade of C or better. VIETMSE S1AB with a grade of C or better. Placement into VIETMSE 1C is also accepted.

**(VI)****VIETMSE 2A. Intermediate Vietnamese. 4 Units.**

Designed for students to advance their Vietnamese language skills from introductory to intermediate level. Designed to develop writing and reading skills and communicative skills in authentic situations. Students are introduced to aspects of Vietnamese culture relating to lesson topics.

Prerequisite: VIETMSE 1C and VIETMSE S1BC. VIETMSE 1C with a grade of C or better. VIETMSE S1BC with a grade of C or better. Placement into VIETMSE 2A is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)****VIETMSE 2B. Intermediate Vietnamese. 4 Units.**

Designed for students to advance their Vietnamese language skills from introductory to intermediate level. Designed to develop writing and reading skills and communicative skills in authentic situations. Students are introduced to aspects of Vietnamese culture relating to lesson topics.

Prerequisite: VIETMSE 2A. VIETMSE 2A with a grade of C or better. Placement into VIETMSE 2B is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)**

**VIETMSE 2C. Intermediate Vietnamese. 4 Units.**

Designed for students to advance their Vietnamese language skills from introductory to intermediate level. Designed to develop writing and reading skills and communicative skills in authentic situations. Students are introduced to aspects of Vietnamese culture relating to lesson topics.

Prerequisite: VIETMSE 2B. VIETMSE 2B with a grade of C or better. Placement into VIETMSE 2C is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)****VIETMSE 10A. Vietnamese Peer-to-Peer Language Mentor Program. 1 Unit.**

Peer-to-Peer Language Mentor Program in which student mentors work with student mentees to increase the language skills of both participants. One hour weekly meetings. VIETMSE 10A is for language mentors.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**VIETMSE 10B. Vietnamese Peer-to-Peer Language Mentor Program. 1 Unit.**

Peer-to-Peer Language Mentor Program in which student mentors work with student mentees to increase the language skills of both participants. One hour weekly meetings. VIETMSE 10B is for language mentees.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**VIETMSE 50. Vietnamese Culture . 4 Units.**

Vietnamese culture and society in modern and historical contexts through the study of literary works, film, and other media. Philosophy and religious practices may also be examined. Course is taught in English.

**(IV)****VIETMSE 150. Vietnamese Literature and Culture in Translation. 4 Units.**

Major works in Vietnamese literature and culture in context.

Repeatability: Unlimited as topics vary.

**Writing Courses****WRITING 30. The Art of Writing: Poetry. 4 Units.**

Beginners' workshop in the writing of poetry, evaluation of student manuscripts, and parallel readings.

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

Repeatability: May be taken for credit 2 times.

**(Ia)****WRITING 31. The Art of Writing: Prose Fiction. 4 Units.**

Beginners' workshop in fiction writing, evaluation of student manuscripts, and parallel readings.

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

Repeatability: May be taken for credit 2 times.

**(Ia)****WRITING 37. Intensive Writing. 6 Units.**

Critical reading and analysis conducted through literary, academic, journalistic, and fictional genres with additional instruction in paragraph development and sentence-level mechanics. Students analyze and apply rhetorical principles in a range of writing assignments.

Prerequisite: Students must have taken the UC Analytical Writing Placement Examination.

Grading Option: Letter Grade only.

Overlaps with WRITING 39A, WRITING 39B.

**(Ia)**

**WRITING 39A. Introduction to Writing and Rhetoric. 4 Units.**

Introduction to the principles of rhetoric through readings and writing assignments across a range of genres, including fiction, non-fiction, journalism and academic essays. Rigorous instruction in composition and style, including organization, paragraph development, and sentence-level mechanics.

Prerequisite: Placement via the UC Analytical Writing Placement Examination is required.

Grading Option: Letter Grade only.

Overlaps with WRITING 37, WRITING 39AP.

**WRITING 39AP. Introduction to Writing and Rhetoric with Lab. 6 Units.**

Introduces the principles of rhetoric through readings and writing assignments across a range of genres. Rigorous instruction in composition and style. Designed for students seeking additional English language support.

Prerequisite: Students must have taken the UC Analytical Writing Placement Examination and the Academic English Placement Test.

Grading Option: Letter Grade only.

Overlaps with WRITING 39A, WRITING 37.

**WRITING 39B. Critical Reading and Rhetoric. 4 Units.**

Critical reading and analysis conducted through literary, academic, journalistic, and fictional genres. Students analyze and apply rhetorical principles in a range of writing assignments.

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

Overlaps with WRITING 37.

**(Ia)**

**WRITING 39C. Argument and Research. 4 Units.**

Intensive instruction in research methods, argumentation, and rhetorical invention. Readings selected from current nonfiction and materials located by students from the University library's holdings, to include databases across a range of disciplines.

Prerequisite: WRITING 37 or WRITING 39B or AP36 or AP37. WRITING 37 with a grade of C or better. WRITING 39B with a grade of C or better. AP36 with a minimum score of 4. AP37 with a minimum score of 4

**(Ia)**

**WRITING 90. Intermediate Poetry Writing. 4 Units.**

Intermediate workshop in the writing of poetry, evaluation of student manuscripts, and parallel readings.

Prerequisite: WRITING 30

Repeatability: May be taken for credit 2 times.

**WRITING 91. Intermediate Fiction Writing. 4 Units.**

Intermediate workshop in the writing of fiction, evaluation of student manuscripts, and parallel readings.

Prerequisite: WRITING 31

Repeatability: May be taken for credit 2 times.

**WRITING 101W. Undergraduate Seminar: Applications in Literary Theory and Criticism for Creative Writing. 4 Units.**

Readings in literature, with discussions and written rhetorical responses on their making.

Prerequisite: (WRITING 30 or WRITING 31) and (WRITING 90 or WRITING 91) and (WRITING 30 or WRITING 31 or WRITING 90 or WRITING 91 or ENGLISH 16 or ENGLISH 17). Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: English Majors only. Literary Journalism Majors only.

**(Ib)**

**WRITING 110. Short Story Writing. 4 Units.**

Three-hour workshop in short fiction; discussion of student writing and of relevant literary texts.

Repeatability: May be taken for credit 2 times.

**WRITING 111. Poetry Writing. 4 Units.**

Three-hour advanced poetry writing workshop; discussion of student writing and of relevant literary texts.

Repeatability: May be taken for credit 2 times.

**WRITING 113. Novel Writing. 4 Units.**

Three-hour advanced workshop in fiction writing; discussion of student writing and of relevant literary texts.

**WRITING 139W. Advanced Expository Writing. 4 Units.**

Study of rhetoric, disciplinary genres, and modes of knowledge production; practice in writing effective prose. Essays of varying lengths, totaling at least 4,000 words.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only.

**(Ib)****WRITING 197. Writing Internship . 2-4 Units.**

Internships focused on writing. In consultation with a faculty advisor, students create a course from response essays, research essays, and assessment project data. Internships may include editing and publication projects, supervised teaching and tutoring assignments, community literacy projects.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**WRITING 250A. Graduate Writers' Workshop (Fiction). 4 Units.**

Graduate fiction workshop open to students enrolled in the MFA program in Writing.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

**WRITING 250B. Graduate Writers' Workshop (Fiction). 4 Units.**

Graduate fiction workshop open to students enrolled in the MFA program in Writing.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

**WRITING 250C. Graduate Writers' Workshop (Poetry). 8 Units.**

Graduate poetry workshop open to students enrolled in the M.F.A. Programs in Writing.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

**WRITING 251A. Writing in Conference (Fiction). 4 Units.**

Graduate fiction workshop open to students enrolled in the MFA program in Writing.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

**WRITING 251B. Writing in Conference (Fiction). 4 Units.**

Graduate fiction workshop open to students enrolled in the MFA program in Writing.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

**WRITING 251C. Writing in Conference (Poetry). 8 Units.**

Graduate poetry workshop open to students enrolled in the M.F.A. Programs in Writing.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

## Ancient Iran and the Premodern Persianate World, Graduate Specialization

**Matthew P. Canepa, Director**

2000 Humanities Gateway

949-824-3532

matthew.canepa@uci.edu (%20matthew.canepa@uci.edu)

The graduate specialization in Ancient Iran and the Premodern Persianate World is University of California, Irvine's interdisciplinary platform for graduate study in premodern Iranian studies. It is designed to provide Ph.D. students with the interdisciplinary training they need to conduct advanced research in the art, archaeology, architecture, history, literatures, and religions of Iran, as well as those peoples, regions, and empires whose destinies were intertwined with Iran, or impacted by its cultures (e.g. ancient Greece and Rome, Armenia, or Islamic Western or South Asia).

UCI boasts unparalleled faculty and programmatic resources for the study of ancient Iran and the wider premodern Persianate world, including the highest concentration of endowed chairs in ancient Iranian studies of any North American institution. With especial faculty strengths in ancient Iran, the specialization's broader historical scope encompasses the Bronze Age cultures of the Iranian Plateau, Mesopotamia, and Central Asia up to the early modern empires of the Mughals, Safavids, and Ottomans (ca. 3500 BCE – ca. 1740 CE). The specialization's broad conception of premodern Iranian Studies is paralleled in, and supported by, the extensive programming of UCI's Samuel Jordan Center for Persian Studies and Culture (<https://www.humanities.uci.edu/persianstudies/>), which provides the primary focus of the specialization's graduate workshop.

Prospective students who wish to pursue a Ph.D. in Iranian Studies at UCI must first apply ([https://www.humanities.uci.edu/persianstudies/program/grad\\_admit.php](https://www.humanities.uci.edu/persianstudies/program/grad_admit.php)) and be admitted to the doctoral program through which their potential advisor accepts students, for example, the Ph.D. program in History, or the Ph.D. program in Visual Studies. Students are encouraged to contact their potential advisors and the Director of the specialization before they apply. Once they have accepted UCI's offer of admission and are enrolled, students join the interdisciplinary graduate specialization by submitting a summary of degrees earned and prior undergraduate and graduate coursework taken related to Iranian Studies, together with a brief statement of purpose that details their degree program, interest in the field, current or potential advisor, and potential dissertation research. This should be submitted via email to the Director of the specialization at the start of their first quarter at UCI.

In addition to Ph.D. students whose doctoral work focuses on premodern Iran, the specialization is open to any student currently enrolled in a Ph.D. or M.A. program at UCI whose career goals would benefit from a deeper historical perspective and whose program provides sufficient flexibility to fulfill the requirements of the specialization. Students should follow the same procedure detailed above. Lack of previous degrees or coursework does not preclude admission. Applications to the specialization are reviewed on a rolling basis, although students are encouraged to apply as soon as they decide they wish to pursue it. All students accepted into the specialization are eligible to be affiliates of the Samuel Jordan Center for Persian Studies and Culture.

The program structure of the specialization consists of four required components: coursework and workshop; languages and specialized training; examinations; and the dissertation or thesis.

### Coursework and Workshop

Students must take four courses (seminar, lecture, or independent study) that deal with the art and archaeology, history, or religions of ancient Iran and the premodern Persianate world, its legacy, or methodological or theoretical issues related to its study (e.g. field methods, historical linguistics, critical theory, art law, ethics, museology). These can also include language courses that provide the training necessary to conduct advanced research in the study of premodern Iran (e.g. Avestan, Old Persian, Bactrian, Pahlavi, Aramaic, ancient Greek, Arabic, New Persian, etc.). Topics vary courses are provided through their normal departmental designators and are approved by the program director. A selection of courses for the specialization is listed below. All approved courses are listed on the program's webpage ([https://www.humanities.uci.edu/persianstudies/program/grad\\_program.php](https://www.humanities.uci.edu/persianstudies/program/grad_program.php)).

IRAN 290	Special Topics in Premodern Iranian Studies
IRAN 292	Seminar in Premodern Iranian Studies
IRAN 280	Studies in Old Iranian
IRAN 281	Studies in Middle Iranian
IRAN 282	Studies in Classical Persian
IRAN 294	Curatorial Methods
IRAN 295	Special Methods
IRAN 293	Directed Readings in Premodern Iranian Studies
IRAN 231A	History of Zoroastrianism
IRAN 231B	Ancient Persia
IRAN 231C	Medieval Persia

When a student counts a theoretically focused seminar toward the specialization, the topic of the seminar paper is expected to involve some aspect of the premodern Iranian or Persianate world. In order to encourage interdisciplinarity, students are expected to take at least one course from a program other than their own offered under or cross-listed with the specialization's course designator. In addition, students are expected to participate in the Premodern Iranian Studies workshop, conference, and speaker series. This is a collaborative faculty-student initiative whose content and discussions are focused, in part, on the lectures, conferences, and symposia ([https://www.humanities.uci.edu/persianstudies/calendar/events\\_more.php](https://www.humanities.uci.edu/persianstudies/calendar/events_more.php)) organized by the Jordan Center that year. Faculty and students may also present papers or works in progress. All graduate students in the specialization are expected to participate when in residency.

## Languages and Specialized Training

In addition to the modern languages required by students' home program, all students must prove competence in at least one premodern language relevant for conducting research in the Iranian world. Doctoral students will be expected to gain competency in at least two premodern research languages. This can take the form of a reading exam administered by the Director of the specialization or the completion of coursework at UCI or another institution equivalent to that needed to gain intermediate competency, including summer intensives. Depending on a student's objectives and needs, languages may include any Old or Middle Iranian language (e.g. Avestan, Old Persian, Middle Persian, Bactrian, Sogdian, etc.), relevant Mesopotamian, Mediterranean or Caucasian languages (e.g. Akkadian, Aramaic, Syriac, Old Armenian, ancient Greek and Latin, etc.), and any language with a substantial corpus of texts relevant to the study of the medieval or early modern Persianate world (e.g. Classical New Persian, Arabic, Urdu, Ottoman Turkish, etc.). According to their focus, students may be advised to pursue a course or practicum in numismatics, curatorial studies, archaeological fieldwork, or related digital methods in lieu of or in addition to language study.

## Examinations

For doctoral students, the director must approve that at least one area of the qualifying examination incorporates premodern Iran or the Persianate world as a central concern. One member of the candidate's qualifying examination committee is normally core or affiliated faculty of the specialization.

Plan II M.A. students must have significant premodern Iranian Studies content in their examination. There are no requirements concerning qualifying examinations for Plan I M.A. students.

## Dissertation or Thesis

Doctoral students must complete a dissertation that engages the study of the premodern Iranian world as part of their broader project. This can either be the sole focus of the project, the most common scenario, or an important subcomponent informing earlier, later, or coeval developments (e.g. a study of ancient or medieval Iranian art and architecture informing the study of modern or contemporary visual arts or literature).

After advising and before advancement to candidacy, the program director will confirm their approval of the proposed topic through email. Ph.D. students writing an in-process M.A. thesis en route to the Ph.D. and Plan I M.A. students will similarly gain approval of their M.A. thesis topic. Alternatively, a research or seminar paper written under the guidance of one or more of the specialization faculty will be submitted to the director. There are no requirements concerning theses for Plan II M.A. students (see examinations).

## Courses

### IRAN 231A. History of Zoroastrianism. 4 Units.

Reviews major trends in the history of Zoroastrianism.

Restriction: Graduate students only.

Concurrent with HIST 131A.

**IRAN 231B. Ancient Persia. 4 Units.**

Survey of the history of Persia in antiquity.

Restriction: Graduate students only.

Concurrent with HIST 131B.

**IRAN 231C. Medieval Persia. 4 Units.**

A survey of Persian history in the context of Late Antique and Medieval Islamic history.

Restriction: Graduate students only.

Concurrent with HIST 131C.

**IRAN 255A. Ancient India. 4 Units.**

Examines the visual and religious history of the region defined as 'India' today, but necessarily encompassing modern Bangladesh and Pakistan. Culminates with the supposed Golden Age of the Gupta empire and its far-reaching legacies.

Same as AHIS 255A.

Restriction: Graduate students only.

Concurrent with AHIS 155A.

**IRAN 255B. Medieval India. 4 Units.**

Begins with the Gupta period's aesthetic legacies in South Asia's architecture, sculpture, and painting. Explores the dispersal of Islam throughout South Asia, including the Muslim communities of southern India.

Same as AHIS 255B.

Restriction: Graduate students only.

Concurrent with AHIS 155B.

**IRAN 280. Studies in Old Iranian. 4 Units.**

Studies in grammars and texts of Old Persian and Avestan.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**IRAN 281. Studies in Middle Iranian. 4 Units.**

Studies in grammars and texts of Middle Iranian languages (e.g., Middle Persian, Parthian, Sogdian, Bactrian).

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**IRAN 282. Studies in Classical Persian. 4 Units.**

Studies in the premodern literatures and historical texts of medieval and early modern Persian.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**IRAN 290. Special Topics in Premodern Iranian Studies. 4 Units.**

Studies in selected areas of premodern Iranian Studies. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**IRAN 292. Seminar in Premodern Iranian Studies. 4 Units.**

Seminar in selected areas of premodern Iranian Studies. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**IRAN 293. Directed Readings in Premodern Iranian Studies. 4 Units.**

Directed reading on a specific topic agreed upon by student and instructor.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**IRAN 294. Curatorial Methods. 4 Units.**

Development of curatorial methodologies with an instructor in conjunction with curatorial internship or practicum.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**IRAN 295. Special Methods. 4 Units.**

Reading course focused on the development of particular research skills (e.g. archaeological field methods, numismatics, digital humanities) often in conjunction with a practicum.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**IRAN 296. Ethics, Law, and Art. 4 Units.**

Addresses a broad range of ethical and legal issues pertaining to art, ownership, looting and theft, museum policies, and cultural heritage.

Prerequisite: Background in Art History or Legal Studies.

Same as AHIS 296.

Concurrent with AHIS 196.

## Critical Theory, Graduate Emphasis

**James Steintrager, Director**

4100 Humanities Gateway

949-824-6117

<http://www.humanities.uci.edu/critical/>

An emphasis in Critical Theory, under the supervision of the Committee on Critical Theory, is available for doctoral students in all departments at UCI upon approval of the student's faculty advisor or associate dean in accordance with departmental policy. Ph.D. students may, with Committee approval, complete the emphasis in addition to the degree requirements of their graduate program. Although there is no change in the existing Ph.D. program requirements or procedures, if the student wishes to have a letter (signed by the Dean and by the Director of Critical Theory) testifying that the student has satisfactorily added this theoretical dimension to the graduate program, then additional requirements must be met. Critical theory at UCI is understood in the broad sense as the study of the shared assumptions, problems, and commitments of the various discourses in the humanities. The faculty regards critical theory not as an adjunct to the study of one of the traditional humanistic disciplines but as a necessary context for the study of any humanistic discipline.

Admission to the emphasis may be granted by the Critical Theory Committee in response to the student's petition. The petition normally is submitted by the middle of the second year of graduate study, after completion of one HUMAN 270 seminar, and upon the recommendation of the Workshop's instructor or a faculty representative of the student's department.

### Requirements

(1) a three-quarter Critical Theory Workshop, conducted preferably by a team of instructors, conceived as a reading group, and developed with the input of all participants, where significant texts are discussed and analyzed in class. No term papers are required, and the course is graded Satisfactory/Unsatisfactory only. Students receive credit for this course only in the spring quarter. For the first two quarters, the course is 0 units with IP grading; (2) three HUMAN 270 courses offered under the supervision of the Committee. At least three such courses will be offered each quarter; (3) participation in two mini-seminars (six–eight hours) offered by visiting scholars (and sponsored by the Committee) on the visiting scholar's ongoing research; and (4) a dissertation that reflects the students' preparation in critical theory; alternatively, a research paper written under the guidance of one or more of the Emphasis faculty and submitted to the Director.

## Culture and Theory, Ph.D.

**Sora Han, Director**

<https://www.humanities.uci.edu/cultureandtheory/>

The Ph.D. program in Culture and Theory provides a strong theoretical and critical approach to race, gender, and sexuality studies. It is the Ph.D. graduate program that is constituted by several interdisciplinary units including African American Studies and Asian American Studies, and works integrally with the Critical Theory Emphasis. Interdisciplinary in nature and buttressed by the established strengths in critical theory at UCI, the program uses a problem-oriented approach to issues of race, gender, and sexuality in diasporic, transnational, and postcolonial contexts, as they are engaged broadly in the humanities, social sciences, and arts.

The Ph.D. program in Culture and Theory is designed to take full advantage of the combined expertise of the nationally and internationally prominent faculty at UCI whose work exemplifies the best in contemporary, critical, interdisciplinary studies in the humanities, social sciences, and the arts.

Applicants must have earned a bachelor's, master's, or equivalent degree in any discipline in the humanities, arts, or social sciences.

Applicants submit unofficial transcripts, statement of purpose, personal history, three letters of recommendation, and a sample of written work. In addition, an interview may be required. Incoming students are admitted for fall quarter only.

To be admitted formally into the doctoral program, students must satisfactorily pass an evaluation at the end of their first year of study; this includes students who entered with an M.A. from another institution.

**NOTE:** Ph.D. students will receive the M.A. after the satisfactory completion of specified requirements, as a step toward the Ph.D. Those students who complete the M.A., but whose committees assess their work as not meeting the standard for the Ph.D., will receive a terminal M.A. Students who enter the program with an M.A. from another institution may receive full or partial credit for the M.A., depending on the assessment of the Executive Committee at the time the student is admitted or on the assessment of the student's faculty advisor and committee during the student's first year. Students who receive full credit for the M.A. will be exempt from writing the master's paper.

1. CLT&THY 200A, CLT&THY 200B, CLT&THY 200C. Basic to the curriculum, this three-quarter core sequence provides a solid foundation in critical and cultural theories, their philosophical genealogies and institutional histories, and interdisciplinary methodologies. The core sequence also provides the space for an intellectual coherence and cohort building for Culture and Theory graduate students who will be taking most of their other courses in supporting departments and programs.
2. Seven additional theoretical courses selected, in consultation with the student's faculty advisor, from CLT&THY 240-CLT&THY 260, sets of offerings in the core supporting interdisciplinary units, the Critical Theory Emphasis, and other course offerings by core and affiliated faculty, which may include HUMAN 260A-HUMAN 260B-HUMAN 260C and HUMAN 270. One of these courses must be focused on research methods. Typically the seven courses will revolve around a set of theoretical problems, e.g., feminist theory and practice, critical race studies, sexualities, postcolonialism, transnational circuits, globalization, theorizing the political, philosophical debates on ethics, the intersections of visibility and textuality, to name a few. The theoretical problem courses are centered on the philosophical and theoretical approaches that form the basis of much work in critical, cultural, and social theory regarding race, gender, and sexuality studies.
3. Six courses on a focused area of study selected, in consultation with the student's faculty advisor, from CLT&THY 215-CLT&THY 235, concentrations within and across a department, within the Critical Theory emphasis, or in one of the core supporting interdisciplinary units. The courses in a focused area of study address a particular field in which various forms of critical theory have been applied, as well as a focus on groups, nations, and regions: examples include globalization, racism and the welfare state, diasporas of particular kinds, human rights, anti-colonial resistance movements in particular regions, modernity, and race.
4. CLT&THY 280. In this independent study course taken during their second year, students expand and develop a seminar paper into the master's paper, with the guidance of their faculty advisor.
5. Students must TA in a Humanities or Social Sciences department or program for a minimum of three quarters. They are also required to take the teaching seminar and workshops associated with the course in which they teach.
6. Additionally, students are expected to participate regularly in the Culture and Theory Colloquium, a series of events comprised of lectures, conferences, and performances sponsored by the program and allied units, particularly in the social sciences and the arts. Each year, the Colloquium will also include academic workshops (e.g., faculty and student works-in-progress, as well as on grant writing and on framing the dissertation project) and professionalization workshops (e.g., preparation for conferences and, later, for the job market). In addition to exposure to diverse ideas and development of practical techniques, participation in the Colloquium is intended to strengthen relations among students, and between students and faculty who are otherwise stretched across several units and schools.

**Master's Paper and M.A.:** During their second year, students work with their faculty advisor to expand and develop a seminar paper into a master's paper. A master's paper expands a seminar paper to a version that is of near-publishable quality. Upon completion of the paper, the faculty advisor and two other core faculty members will participate in an assessment of student's work to date.

Ph.D. students will receive the M.A. after the satisfactory completion of the three core courses, seven theoretical problem courses, six courses on a focused area of study, and the master's paper. Those students who complete the M.A. requirements, but whose committees assess their work as not meeting the standards for the Ph.D., will receive a terminal M.A.

**Qualifying Examination:** Students work with a committee comprised of five faculty members, including one outside member, to draw up reading lists and head notes on four topics, as well as a dissertation prospectus. Three of these topics should relate to the major areas of study outlined in the 200A, B, C core course sequence, and one should relate to the student's area of disciplinary or focused study. The examination itself will be comprised

of a written and oral exam. A student shall advance to candidacy upon successful passing of the Qualifying Exam and fulfillment of the language requirement, normally by the end of the third year.

**Language Requirement:** By the time they qualify for candidacy, students must demonstrate through course work or examination the ability to do research in one ancient or modern language (other than English).

**Dissertation:** The dissertation topic should be drawn from a focused area of study, chosen in consultation with the dissertation advisor and other committee members. Students will draw up their dissertation committee, which must consist of at least three members, at least two of whom must be drawn from the core faculty in the program whose interests match the topic chosen for the thesis. Dissertations must be approved by the student's dissertation committee and submitted to the executive committee.

**Time to Degree:** The normative time for advancement to candidacy is four years. The normative time for completion of the Ph.D. is seven years, and the maximum time permitted is eight years.

## Faculty

Jonathan Alexander, Ph.D. Louisiana State University, *Associate Dean, Division of Undergraduate Education and Campus Writing Coordinator and Chancellor's Professor of English; Culture and Theory; Education; Gender and Sexuality Studies; Informatics* (writing studies, sexuality studies, queer theory, new media studies)

Bridget R. Cooks Cumbo, Ph.D. University of Rochester, *Associate Professor of African American Studies; Art History; Culture and Theory; Visual Studies* (African American art, museum studies, feminist and post-colonial theory)

Sora Han, Ph.D. University of California, Santa Cruz, *Director of the Graduate Program in Culture and Theory and Associate Professor of Criminology, Law and Society; African American Studies; Culture and Theory; School of Law* (law and popular culture, critical race theory, philosophies of punishment, feminism and psychoanalysis)

Sandra Harvey, Ph.D. University of California, Santa Cruz, *Assistant Professor of African American Studies; Culture and Theory* (black diasporas, sovereignty, indigeneity, visual art and culture, Enlightenment philosophy, feminist and queer theories)

Rodrigo Lazo, Ph.D. University of Maryland, College Park, *Associate Professor of English; Culture and Theory* (hemispheric American studies, nineteenth century, Latino studies and the Americas, Cuba, immigrant literature)

James K. Lee, Ph.D. University of California, Los Angeles, *Associate Professor of Asian American Studies; Culture and Theory; English; Religious Studies* (Asian American literature and culture, contemporary U.S. literature, race and ethnic studies, urban studies, religious studies)

Jerry Won Lee, Ph.D. University of Arizona, *Associate Professor of English; Anthropology; Asian American Studies; Comparative Literature; Culture and Theory*

Julia Hyoun Joo Lee, Ph.D. University of California, Los Angeles, *Department Chair and Associate Professor of Asian American Studies; Culture and Theory; English* (Asian American literature and culture, African American literature and culture, ethnic literature, twentieth-century American literature.)

Kevin E. Olson, Ph.D. Northwestern University, *Professor of Political Science; Culture and Theory; European Languages and Studies* (political theory, history of political thought, legal theory, philosophy of the social sciences)

Rajagopalan Radhakrishnan, Ph.D. Binghamton University, State University of New York, *Distinguished Professor of English; African American Studies; Comparative Literature; Culture and Theory* (critical theory, postcoloniality, nationalisms and diasporas, poststructuralism, postmodernism, democracy and minority discourse, cultural studies, globalization and transnationalism)

Jared Charles Sexton, Ph.D. University of California, Berkeley, *Professor of African American Studies; Culture and Theory; Film and Media Studies; Visual Studies* (race and sexuality, policing and imprisonment, contemporary U.S. cinema and political culture, multiracial coalition, critical theory)

John H. Smith, Ph.D. Princeton University, *Professor of Comparative Literature; Culture and Theory; German; Religious Studies* (18th- and 19th-century literature and intellectual history, literary theory)

Rei Terada, Ph.D. Boston University, *Professor of Comparative Literature; Culture and Theory* (theory, poststructuralism, nineteenth- and twentieth-century poetry)

Keith Topper, Ph.D. University of California, Los Angeles, *Associate Professor of Political Science; Culture and Theory* (political theory, critical theory, poststructuralism, theories of power, language and politics, theory and politics of interpretation, politics of culture, philosophy of the social sciences)

Frank B. Wilderson III, Ph.D. University of California, Berkeley, *Department Chair and Professor of African American Studies; Culture and Theory* (Afro-Pessimism, film theory, Marxism, narratology)

Tiffany Willoughby-Herard, Ph.D. University of California, Santa Barbara, *Associate Professor of African American Studies; Comparative Literature; Culture and Theory; Political Science* (South Africa, poor whites, race in foreign policy, diaspora, comparative racial politics, third world feminisms, feminist pedagogy, black political thought)

Judy Tzu-Chun Wu, Ph.D. Stanford University, *Director of Humanities Center and Chancellor's Professor of Asian American Studies; Culture and Theory* (Asian American history; comparative racialization and immigration; empire and decolonization; gender and sexuality)

## Affiliate Faculty

Catherine Benamou, Ph.D. New York University, *Associate Professor of Film and Media Studies; Culture and Theory; Visual Studies* (Hispanophone and Lusophone cinema and television, U.S. Latino media, Orson Welles and maverick cinema, transnational flows, spectatorship, cinematic memory and cultures of preservation)

Victoria Bernal, Ph.D. Northwestern University, *Professor of Anthropology; Culture and Theory; Gender and Sexuality Studies; Religious Studies* (gender, war, cyberspace, Islam, transnationalism, Africa)

Vinayak Chaturvedi, Ph.D. University of Cambridge, *Associate Professor of History; Culture and Theory; European Languages and Studies; Religious Studies* (modern South Asia, social and intellectual history)

Dorothy B. Fujita-Rony, Ph.D. Yale University, *Associate Professor of Asian American Studies; Culture and Theory; History* (U.S. history, Asian American studies)

Joseph Jonghyun Jeon, Ph.D. University of California, Berkeley, *Professor of English; Asian American Studies; Culture and Theory* (Asian-American literature, film modernism)

Victoria E. Johnson, Ph.D. University of Southern California, *Professor of Film and Media Studies; African American Studies; Culture and Theory; Visual Studies* (U.S. television, history, media industry studies, critical race theory, cultural geography, sound and music in popular media, media law and policy)

Horacio Legras, Ph.D. Duke University, *Professor of Spanish and Portuguese; Comparative Literature; Culture and Theory; European Languages and Studies* (Latin American literature and culture, Latin American film, visual arts in Latin America, psychoanalysis, and photography)

Theodore Martin, Ph.D. University of California, Berkeley, *Associate Professor of English; Culture and Theory* (Contemporary literature, genre fiction, literary history, crime, and the novel)

Annie McClanahan, Ph.D. University of California, Berkeley, *Associate Professor of English; Culture and Theory* (U.S. culture, the novel, political and economic theory)

Jessica Millward, Ph.D. University of California, Los Angeles, *Associate Professor of History; African American Studies; Culture and Theory* (U.S., slavery, African diaspora, African American gender and women)

Gabriele M. Schwab, Ph.D. University of Konstanz, *UCI Chancellor's Professor of Comparative Literature; Anthropology; Culture and Theory; English; European Languages and Studies; German* (modern literature, critical theory, psychoanalysis, comparative literature)

Damien Sojoyner, Ph.D. University of Texas at Austin, *Associate Professor of Anthropology; Culture and Theory* (prisons; public education; urban anthropology; race; African diaspora theory; public policy and law; gender; United States)

Roxanne Varzi, Ph.D. Columbia University, *Professor of Anthropology; Culture and Theory; Film and Media Studies; Religious Studies; Visual Studies* (Iran, media, war, visual anthropology, film studies, ethnographic and fiction writing)

Linda T. Vö, Ph.D. University of California, San Diego, *Professor of Asian American Studies; Culture and Theory; Sociology; Urban Planning and Public Policy* (race and ethnic relations, immigrants and refugees, gender relations, community and urban studies)

## Courses

### CLT&THY 200A. Political Economy: Methods and Critique. 4 Units.

Introduction to canonical texts in Marxism coupled with an examination of the questions of race, gender, ethnicity, and sexuality that distend the calculus of the canon's assumptive logic. May be taken after CLT&THY 200B.

Same as CRITISM 200A.

Restriction: Graduate students only.

**CLT&THY 200B. Libidinal Economy: Methods and Critique. 4 Units.**

Introduction to canonical texts in psychoanalysis coupled with an examination of the questions of race, gender, ethnicity, and sexuality that distend the calculus of the canon's assumptive logic. May be taken before CLT&THY 200A.

Restriction: Graduate students only.

**CLT&THY 200C. Theory from Below. 4 Units.**

Introduction to systems of thought understudied or undervalued in academic canons—for instance, systems constituted in communities' practices or theories that do not seek permanence or generality.

Prerequisite: CLT&THY 200A and CLT&THY 200B

Restriction: Graduate students only.

**CLT&THY 241. Ethics, Erotics, and Will: Gendered Black Politics, Sexualized Racisms, and the Humanities. 4 Units.**

Introduces doctoral students to an interdisciplinary conversation about black queer sexuality and black heteropatriarchy. Uses disciplinary formations as a tool for understanding knowledge formations about the shifting relations that constitute sexuality, gender, and racial blackness.

Restriction: Graduate students only.

**CLT&THY 242. Afro-Pessimism and the Status of the Subject. 4 Units.**

Afro-Pessimism theorizes the Black as a being against which all other beings become legible as human subjects. Focuses on either the subject of psychoanalysis or the subject of capital accumulation in their explorations of the antagonism between Blackness.

Restriction: Graduate students only.

**CLT&THY 280. Independent Study. 4 Units.**

Limited to students who have not yet received the M.A. degree.

Repeatability: May be repeated for credit unlimited times.

**CLT&THY 289. Topics in Culture and Theory. 4 Units.**

Seminars on various topics in Culture and Theory.

Repeatability: Unlimited as topics vary.

**CLT&THY 298. Directed Reading. 4-12 Units.**

Directed readings on a specific topic agreed upon by students and their instructors. Limited to students who have completed their M.A. degree and are preparing for their qualifying exam.

Prerequisite: Completion of the M.A. degree.

Repeatability: May be repeated for credit unlimited times.

**CLT&THY 299. Dissertation Research. 4-12 Units.**

Dissertation research in Culture and Theory.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## Department of African American Studies

**Frank Wilderson, Department Chair**

3000 Humanities Gateway

949-824-2376

<http://www.humanities.uci.edu/afam/>

African American Studies is an interdisciplinary program which offers undergraduate students an opportunity to study those societies and cultures established by the people of the African diaspora. The Department's curriculum encourages students to investigate the African American experience from a variety of disciplinary perspectives and theoretical approaches. Among the topics explored in the course offerings are the process of colonization and the forced migration of African people, the positionality of African people in the racialized symbolic and social orders of the western hemisphere, the rhetoric produced by and about African people, and the cultural and aesthetic values associated with "blackness" and "Africanness." The Department offers a B.A. program in African American Studies and a minor.

## Career Opportunities

UCI graduates with a B.A. in African American Studies enhance their chances of success in the job market and in the highly competitive arena of graduate and professional school admissions, especially in the fields of medicine and other health professions, law, and business. Employers and admissions officers understand that many of their employees and graduates will one day work in communities with significant African American populations, and for this reason they give due consideration to applicants who have in-depth knowledge of African American culture.

- African American Studies, B.A.
- African American Studies, Minor

## Faculty

Nahum D. Chandler, Ph.D. University of Chicago, *Professor of African American Studies; Asian American Studies; Comparative Literature; English; European Languages and Studies* (modern philosophy, intellectual history, history of the human sciences)

Bridget R. Cooks Cumbo, Ph.D. University of Rochester, *Associate Professor of African American Studies; Art History; Culture and Theory; Visual Studies* (African American art, museum studies, feminist and post-colonial theory)

Sora Han, Ph.D. University of California, Santa Cruz, *Director of the Graduate Program in Culture and Theory and Associate Professor of Criminology, Law and Society; African American Studies; Culture and Theory; School of Law* (law and popular culture, critical race theory, philosophies of punishment, feminism and psychoanalysis)

Sandra Harvey, Ph.D. University of California, Santa Cruz, *Assistant Professor of African American Studies; Culture and Theory* (black diasporas, sovereignty, indigeneity, visual art and culture, Enlightenment philosophy, feminist and queer theories)

Douglas M. Haynes, Ph.D. University of California, Berkeley, *Vice Chancellor for Equity, Diversity, and Inclusion and Professor of History; African American Studies* (social and cultural history of modern Britain, social history of modern medicine)

Ulysses S. Jenkins, M.F.A. Otis Art Institute, *Professor of Art; African American Studies* (video, performance art)

Victoria E. Johnson, Ph.D. University of Southern California, *Professor of Film and Media Studies; African American Studies; Culture and Theory; Visual Studies* (U.S. television, history, media industry studies, critical race theory, cultural geography, sound and music in popular media, media law and policy)

Jessica Millward, Ph.D. University of California, Los Angeles, *Associate Professor of History; African American Studies; Culture and Theory* (U.S., slavery, African diaspora, African American gender and women)

John Murillo III, Ph.D. Brown University, *Assistant Professor of African American Studies* (Afro-pessimism, theoretical physics, radical black feminism, literary theory, 20th/21st century black literature, black speculative fiction)

Rajagopalan Radhakrishnan, Ph.D. Binghamton University, State University of New York, *Distinguished Professor of English; African American Studies; Comparative Literature; Culture and Theory* (critical theory, postcoloniality, nationalisms and diasporas, poststructuralism, postmodernism, democracy and minority discourse, cultural studies, globalization and transnationalism)

Jared Charles Sexton, Ph.D. University of California, Berkeley, *Professor of African American Studies; Culture and Theory; Film and Media Studies; Visual Studies* (race and sexuality, policing and imprisonment, contemporary U.S. cinema and political culture, multiracial coalition, critical theory)

Darryl Taylor, D.M.A. University of Michigan, *Professor of Music; African American Studies*

Frank B. Wilderson III, Ph.D. University of California, Berkeley, *Department Chair and Professor of African American Studies; Culture and Theory* (Afro-Pessimism, film theory, Marxism, narratology)

Tiffany Willoughby-Herard, Ph.D. University of California, Santa Barbara, *Associate Professor of African American Studies; Comparative Literature; Culture and Theory; Political Science* (South Africa, poor whites, race in foreign policy, diaspora, comparative racial politics, third world feminisms, feminist pedagogy, black political thought)

## Affiliate Faculty

Alex Borucki, Ph.D. Emory University, *Associate Professor of History; African American Studies* (African diaspora, early modern Atlantic world, slave trade, colonial Latin America)

Sohail Daulatzai, Ph.D. University of Southern California, *Associate Professor of Film and Media Studies; African American Studies; Visual Studies* (decolonization, empire, race, Muslim studies, Black studies)

Bambi Haggins, Ph.D. University of California, Los Angeles, *Associate Professor of Film and Media Studies; African American Studies; Visual Studies* (Black [African American] comedy in film, television, digital media and performance, television history, comedy as social and political discourse, African-American studies, American studies)

S. Ama Wray, Ph.D. University of Surrey, *Associate Professor of Dance; African American Studies* (jazz, choreography, improvisation, teaching of dance, jazz ensemble)

## Courses

### **AFAM 40A. African American Studies I. 4 Units.**

Discusses main contours of African American experience from the forced importation of Africans into the Americas in the late fifteenth century to the development of social movements in post-emancipation societies of the late nineteenth and twentieth centuries.

((III or IV) and VII ).

### **AFAM 40B. African American Studies II. 4 Units.**

Introduction to the history of modern racial thinking in Western society and its relationship to the material contexts of racial oppression, with emphasis on its development in British colonies and U.S.

((III or IV) and VII ).

### **AFAM 40C. African American Studies III. 4 Units.**

Introduction to theories of racial blackness in the modern world, with emphasis on developments in British colonies and U.S. Traces emergence of blackness as term of collective identity, social organization, and political mobilization.

((III or IV) and VII ).

### **AFAM 50. Introductory Topics in African American Studies. 4 Units.**

Introduction to a broad range of topics in African American studies, exploring history, literature, art, culture, politics, and contemporary social issues. Topical organization of courses addresses issues that have been of importance historically and are reshaping the African diaspora today.

Repeatability: Unlimited as topics vary.

### **AFAM 111A. Modern African American Art. 4 Units.**

Investigates the history of modern African American art; emphasis on the politics of representation. Examines art in a variety of media from material culture and textiles to painting and photography. Issues of migration, nationalism, gender, sexuality, and hybridity are discussed.

Same as AHIS 164A.

### **AFAM 111B. Contemporary African American Art. 4 Units.**

Investigates the history of contemporary African American art; emphasis on the politics of representation. Explores art in a variety of media: painting, sculpture, photography, installation, and new media. Cultural politics, appropriation, identity, gender, sexuality, hybridity and civil rights issues discussed.

Same as AHIS 164B.

### **AFAM 112A. Early African American Literature. 4 Units.**

Examines the earliest forms of black literary practices, including the jeremiad, the slave narrative, the pamphlet, poetry, the short story, and how these literary forms are related to the historical experiences of enslavement and emancipation.

Repeatability: Unlimited as topics vary.

### **AFAM 112B. African American Literature 1900-Present. 4 Units.**

Examines individual literary forms and/or authors, as well as movements such as the Harlem Renaissance and the Black Arts Movement. Explores how black literary practices represent the conditions of modern subjectivities and environments.

Repeatability: Unlimited as topics vary.

### **AFAM 113. African American Cinema and Media. 4 Units.**

Explores the diversity of Black creative production and the historical, social, and economic forces that shaped their emergence. May include Black film, hip-hop culture, fine art, photography, and others.

Repeatability: Unlimited as topics vary.

**AFAM 114. International Cultures. 4 Units.**

Explores the various cultures of the African diaspora and their impacts on a global scale. Examines a diverse range of media, including music (reggae, hip-hop), literature, film, and others and the links between culture and social movements throughout the diaspora.

Repeatability: Unlimited as topics vary.

**AFAM 115. Race and Visual Representation. 4 Units.**

Examines film, documentary, fine art, photography, and other visual media to explore the multiple ways in which ideas about race are projected and woven through the visual landscape and the impacts this has on perpetuating social inequalities.

Repeatability: Unlimited as topics vary.

**AFAM 117. Asian American and African American Relations. 4 Units.**

Addresses relationships of Asian American and African American communities in the United States. Topics include race, class, gender, labor, economic systems, political mobilization, community, civil rights, activism, cultural expression.

Same as HIST 152B, ASAM 167.

**AFAM 118. Topics in African American Humanities. 4 Units.**

Provides students with an opportunity to pursue advanced work in African American studies from one or more humanities approaches (literature, film and media studies, art history, and others).

Repeatability: Unlimited as topics vary.

**AFAM 125. African American Women in Art. 4 Units.**

Examines depictions of and by African American women in art and popular culture through a variety of media including textiles, painting, sculpture, photography, and installation. Focuses on African American women's experiences, perspectives, and strategies for contemporary representation.

Same as AHIS 164D.

**AFAM 128. Topics in Gender/Sexuality. 4 Units.**

Expressions of genders and sexualities across the spectrum of African American experience and creativity.

Repeatability: Unlimited as topics vary.

**AFAM 134A. Caribbean History: Colonization to Emancipation. 4 Units.**

Exploration of the history of the archipelago from pre-Columbian times to the end of slavery; examining the impact of European colonization, decimation of the indigenous populations, African slavery, resistance, and emancipation; the unity and diversity of experience in region.

Same as HIST 164A.

**AFAM 134B. Caribbean History: Emancipation to Independence. 4 Units.**

Post-emancipation and anti-colonial struggles ending with political independence for most of the region. Examines social, political, economic, cultural dimensions of post-emancipation period, including large-scale migration to Central America, the U.S., and Britain; the region's global cultural and political contribution.

Same as HIST 164B.

**AFAM 137. History of the African Diaspora. 4 Units.**

Examines the causes and consequences of the multiple diasporas of African peoples since the sixteenth century in the Atlantic world, especially the Americas and Europe.

Same as HIST 134E.

**AFAM 138. Topics in African American History. 4 Units.**

Studies in selected areas of African American history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as HIST 150.

**AFAM 143. Topics in African American Music. 4 Units.**

Examines African American musical forms and traditions, such as blues, jazz, and reggae, in performance and/or critical and theoretical contexts.

Repeatability: Unlimited as topics vary.

**AFAM 144. Topics in Expressive Forms. 4 Units.**

Examines various forms of aesthetic expression in the African diaspora, including dance, music, and the plastic arts, as well as artistic visions of black cyberspace, digital activism, film, video, and aesthetic conceptions of the future.

Repeatability: Unlimited as topics vary.

**AFAM 145. African Americans and Photography. 4 Units.**

Explores depictions of and by African Americans through photography. Examines the history of photography in relationship to African American culture through a variety of media from early daguerreotype processes to digital imagery.

Same as AHIS 164E.

**AFAM 151. Comparative Minority Politics. 4 Units.**

Examines the political experiences of Blacks, Latinos, and Asian Americans in the United States from roughly 1950 to the present. Focuses on how each group has pursued political empowerment via both conventional political channels and social movements.

Same as ASAM 132, CHLT 147, PLSC 124C.

**AFAM 152. African American Politics. 4 Units.**

Examines politics of African Americans in order to gain a broader perspective of the American political process. Major developments in African American politics (including the civil rights movement, Black presidential bids), continuing problem of racism, responsiveness of key governing institutions.

Same as PLSC 124E.

**AFAM 153. African American Psychology. 4 Units.**

Historical overview of the development of black psychology and the African American frame of reference. Topics include personality development, psychological assessment, issues in education, black mental health, and the role of the African American psychologist in the community.

Same as PSYC 174E.

**AFAM 154. African American Social Formations. 4 Units.**

Topics which promote critical investigation into the historical, political, and social formations associated with the Black Diaspora.

Repeatability: Unlimited as topics vary.

**AFAM 155. Intercultural Studies. 4 Units.**

Studies relationships between various cultural formations within the Black Diaspora and the exchange, amalgamations, and tensions between Black Diasporic formations and non-Black formations. Examines expressions of racialization as representation, adaption, and resistance.

Repeatability: Unlimited as topics vary.

**AFAM 156. African Societies and Politics. 4 Units.**

Examines the violent incorporation of Africa within European modernity. Places the discourse of Pan-Africanism, African Nationalisms, Negritude, African Marxism, and/or African Socialism in juxtaposition to the forces of capitalism, colonialism, and imperialism that restructure African history.

Repeatability: Unlimited as topics vary.

**AFAM 157. Critical Race Theory. 4 Units.**

Introduction to Critical Race Theory and key American cases on racial inequality. Using this literature, examines the possibilities and pitfalls of legal claims of race, gender, and sexuality discrimination in the age of colorblindness.

Same as CLS C178.

Restriction: Upper-division students only.

**AFAM 158. Topics in African American Social Sciences. 4 Units.**

Provides students with an opportunity to pursue advanced work in African American studies from one or more social science approaches (psychology, sociology, anthropology, economics, and others).

Repeatability: Unlimited as topics vary.

**AFAM 159. Prisons and Public Education. 4 Units.**

Looks at the connections between schools and prisons in the United States. Students learn about ideas that push beyond common trope of the "school to prison pipeline."

Same as ANTH 138.

**AFAM 162W. The Black Protest Tradition. 4 Units.**

History and discourses of the black protest tradition. Traces emergence of black protest against racial slavery and white supremacy from the early colonial period to present and the complex elaboration of identity politics within black communities in the twentieth century.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only.

**(Ib)**

**AFAM 163. Seminar in African American Studies. 4 Units.**

Explores theoretical and methodological issues in Black Studies via concentrated work on a specific ensemble of questions. Emphasis is on generating student responses to the material covered through oral and written reports.

Repeatability: Unlimited as topics vary.

**AFAM 198. Directed Group Study. 1-4 Units.**

Special topics through directed reading. Paper required.

Repeatability: May be taken for credit for 24 units.

**AFAM 199. Independent Study. 1-4 Units.**

Investigation of special topics through directed reading. Paper required.

Repeatability: May be repeated for credit unlimited times.

**AFAM 399. University Teaching. 4 Units.**

Limited to teaching assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## African American Studies, B.A.

African American Studies is an interdisciplinary program which offers undergraduate students an opportunity to study those societies and cultures established by the people of the African diaspora. The Department's curriculum encourages students to investigate the African American experience from a variety of disciplinary perspectives and theoretical approaches. Among the topics explored in the course offerings are the process of colonization and the forced migration of African people, the positionality of African people in the racialized symbolic and social orders of the western hemisphere, the rhetoric produced by and about African people, and the cultural and aesthetic values associated with "blackness" and "Africanness."

### Requirements for the B.A. in African American Studies

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

#### Requirements for the Major

A. Complete the following African American Studies introductory series:

AFAM 40A	African American Studies I
AFAM 40B	African American Studies II
AFAM 40C	African American Studies III

B. Select three courses, with one from three of the following five rubrics:

Humanities (AFAM 110–119)
Gender/Sexuality (AFAM 120–129)
History (AFAM 130–139)
Fine Arts (AFAM 140–149)
Social Sciences (AFAM 150–159)

C. Select five additional upper-division electives from AFAM 110–159, 163.

D. Complete:

AFAM 162W	The Black Protest Tradition
-----------	-----------------------------

**Residence Requirement for the Major:** A minimum of five upper-division courses required for the major must be completed successfully at UCI.

UCI graduates with a B.A. in African American Studies enhance their chances of success in the job market and in the highly competitive arena of graduate and professional school admissions, especially in the fields of medicine and other health professions, law, and business. Employers and admissions officers understand that many of their employees and graduates will one day work in communities with significant African American populations, and for this reason they give due consideration to applicants who have in-depth knowledge of African American culture.

## African American Studies, Minor

African American Studies is an interdisciplinary program which offers undergraduate students an opportunity to study those societies and cultures established by the people of the African diaspora. The Department's curriculum encourages students to investigate the African American experience from a variety of disciplinary perspectives and theoretical approaches. Among the topics explored in the course offerings are the process of colonization and the forced migration of African people, the positionality of African people in the racialized symbolic and social orders of the western hemisphere, the rhetoric produced by and about African people, and the cultural and aesthetic values associated with "blackness" and "Africanness."

### Requirements for the Minor in African American Studies

#### Requirements for the Minor

A. Complete the following African American Studies introductory series:

AFAM 40A	African American Studies I
AFAM 40B	African American Studies II
AFAM 40C	African American Studies III

B. Select three courses, with one from three of the following five rubrics:

Humanities (AFAM 110–119)
Gender/Sexuality (AFAM 120–129)
History (AFAM 130–139)
Fine Arts (AFAM 140–149)
Social Sciences (AFAM 150–159)

C. Select one additional upper-division elective from AFAM 110–159, 163.

**Residence Requirement for the Minor:** Four upper-division courses required for the minor must be completed successfully at UCI. Two of the four may be taken through the UC Education Abroad Program, provided course content is approved in advance by the appropriate department chair.

## Department of Art History

### Bert Winther-Tamaki, Department Chair

2000 Humanities Gateway

949-824-8596

<http://www.humanities.uci.edu/arhistory/>

The Department of Art History offers a major and minor in Art History. Art History is the study of works of art and other visual artifacts from all regions of the world and all periods of history. Consequently, the undergraduate curriculum in Art History, with its global perspective, is one of the most diverse disciplines in the humanities. Through Art History, students learn how to describe and interpret a range of objects including sculpture, painting, photography, architecture, and "new media" such as video and performance art. These skills, along with the program's intense focus on writing and verbal expression, prepare students to think critically and to express themselves clearly at a time when visual communication is becoming ever more important.

Because works of art are always created within a larger cultural context, Art History courses are a good way to understand what other places or times were like. Students may explore, for example, ancient Greece, 19th century Japan, or even the 21st century United States. Majors in Art History are encouraged to take related courses in other fields in the humanities and to pursue the study of language beyond the minimum requirements. Because of its international perspective, Art History is a particularly good major for students interested in studying abroad. There are many study centers throughout the world associated with the University's Education Abroad Program that offer widely varied selections of Art History courses.

Art History offers a unique one-year Master's Program in which all current UCI undergraduate students can build upon their undergraduate work to complete an M.A. in Art History in one additional year beyond the completion of the Bachelor's degree. The M.A. program in Art History is designed to provide students with advanced skills and broad knowledge in the discipline of art history. See the M.A. in Art History page for detailed information.

### Career Opportunities

Following their graduation, students with a B.A. in Art History have found employment in art galleries, auction houses, and museums, and they have entered graduate programs with a view to careers in university teaching, curatorial work, and art conservation. Moreover, with its strong emphasis on developing critical skills in writing, speaking, and analysis, Art History also provides an excellent preparation for many other careers. UCI graduates have

pursued professional paths ranging from medicine and law, to business and education, to information technologies and architecture. As in the case of arts administration or intellectual property law, some of these professional pursuits have depended on and continue to make use of training in the arts.

- Archaeology, Minor
- Art History, B.A.
- Art History, M.A. (4+1)
- Art History, Minor
- Graduate Program in Visual Studies

## Faculty

Roland Betancourt, Ph.D. Yale University, *Director of the Graduate Program in Visual Studies and Chancellor's Fellow and Associate Professor of Art History; Religious Studies; Visual Studies* (Byzantine and Medieval art, critical and queer theory; histories of race, gender, and sexuality)

Matthew P. Canepa, Ph.D. University of Chicago, *Elahe Omidyar Mir-Djali Presidential Chair and Professor of Art History; Religious Studies; Visual Studies* (Achaemenid, Seleucid, Parthian, and Sasanian art and archaeology; Iranian visual cultures and Afro-Eurasian exchange; critical approaches to space, place, landscape, urbanism, and memory)

Bridget R. Cooks Cumbo, Ph.D. University of Rochester, *Associate Professor of African American Studies; Art History; Culture and Theory; Visual Studies* (African American art, museum studies, feminist and post-colonial theory)

James D. Herbert, Ph.D. Yale University, *Professor of Art History; Visual Studies* (modern European art)

Lyle Massey, Ph.D. University of California, Los Angeles, *Associate Professor of Art History; Visual Studies* (Italian Renaissance and early modern European art, gender theory, science studies)

Tyrus Miller, Ph.D. Stanford University, *Dean of the School of Humanities and Professor of English; Art History; Comparative Literature; Visual Studies* (modernist and avant-garde studies in literature and visual arts; critical theory and aesthetics; modern architecture and urbanism; East-Central European studies; culture of socialism and post-socialism; Frankfurt School theory)

James P. Nisbet, Ph.D. Stanford University, *Associate Professor of Art History; Visual Studies* (modern and contemporary art)

Alka Patel, Ph.D. Harvard University, *Associate Professor of Art History; History; Religious Studies; Visual Studies* (South Asian and Islamic art and architecture, historiographies, Islamic diasporas in Cuba)

Cécile Marie Whiting, Ph.D. Stanford University, *Chancellor's Professor of Art History; Visual Studies* (American art, 20th century visual culture)

Bert Winther-Tamaki, Ph.D. New York University, *Department Chair and Professor of Art History; Asian American Studies; Visual Studies* (modern Japanese art and visual culture, Asian American art, art and globalization)

Roberta Wue, Ph.D. New York University, *Associate Professor of Art History; Visual Studies* (modern Chinese art, photography, print culture)

## Courses

### **ART HIS 40A. Ancient Greek and Roman Art, and Architecture. 4 Units.**

An overview of Greek and Roman art, and related ancient visual cultures. Considers how and why the peoples of antiquity created art and architecture, as well as the significance of these works within their social, religious, and historical contexts.

(IV and VIII ).

### **ART HIS 40B. Arts of Europe: Medieval and Renaissance. 4 Units.**

Focuses on the art of the Mediterranean area and Europe between ca. A.D. 350 and 1600. By means of movements and artists, examines the cultural identities of the Christian, Islamic, and Early Modern worlds.

(IV, VIII)

### **ART HIS 40C. Early Modern and Modern Art in Europe and America. 4 Units.**

The visual arts from the seventeenth to the twenty-first centuries. Explores the purposes and meaning of painting, sculpture, and architecture in relation to artists, viewers, and historical events.

(IV, VIII)

**ART HIS 42A. History of Asian Art: Arts of India. 4 Units.**

Emphasizing Hindu, Buddhist, and Islamic art of greater India (Pakistan, Bangladesh, Sri Lanka) from proto-historic to modern times. Themes include art as a source of history, commercial and religious pan-Asian connections, nationalism, and modern versus historical identities.

(IV, VIII)

**ART HIS 42B. History of Asian Art: Arts of China. 4 Units.**

An introduction to the arts and visual culture of China from Neolithic to modern times. Themes includes the representation of power, death and the afterlife, popular culture and elite arts, landscape and women's painting, and concludes with contemporary China.

(IV, VIII)

**ART HIS 42C. History of Asian Art: Arts of Japan. 4 Units.**

Examines compelling images and objects of spirit and power created in Japan over many centuries. Themes include Buddhist icons, narrative illustration, popular prints, architecture, manga, and the avant-garde. Japanese interactions with Korean, Chinese, and European culture are emphasized.

(IV, VIII)

**ART HIS 42D. History of Asian Art: Arts of Islam. 4 Units.**

Examines past and present Islamic art, spanning 1,500 years and extending from the Americas through Indonesia. Themes include Islam as a globalizing force, the definition of 'Islamic,' and the competing roles of religion and politics in making art.

(IV, VIII)

**ART HIS 42E. Art and Archaeology of Ancient Persia, Egypt, and Mesopotamia. 4 Units.**

An introduction to the art and archaeology of ancient Egypt, Mesopotamia, Anatolia, Persia, and the wider Iranian world from the Neolithic to the coming of Islam. Considers wider impact on the ancient and early medieval worlds and their present legacy.

(IV and VIII ).

**ART HIS 44. Image Collision: A Multicultural Approach to Images and Their Users. 4 Units.**

Comparisons between present-day visual culture and pre-modern art to re-evaluate the ways in which one understands the contemporary histories of underrepresented groups in the United States.

(IV and VII ).

**ART HIS 55. Disneyland. 5 Units.**

From Dole Whips to roller coasters, the focus is on the innovations in industrial automation and manufacturing that made Disneyland's attractions possible. Discusses fandom, guest experiences, operating procedures, technical and design patents, and how rides work.

(II and IV ).

**ART HIS 100. Studies in Ancient Art . 4 Units.**

Topics in Egyptian, Prehistoric, and Etruscan art of the Mediterranean area treated with specific reference to relevant cultural and historical settings. Specialized courses in Greek and Roman art are also taught.

Repeatability: Unlimited as topics vary.

**ART HIS 103. Studies in Greek Art. 4 Units.**

Topics in Greek art, architecture, and topography from the Prehistoric period through the end of the fourth century B.C.E.

Repeatability: Unlimited as topics vary.

**ART HIS 107. Studies in Roman Art. 4 Units.**

Topics in Hellenistic and Roman art and architecture; stresses historical and political background.

Repeatability: Unlimited as topics vary.

**ART HIS 110. Studies in Medieval Art. 4 Units.**

Specialized topics in Medieval art and architecture in Europe, the Mediterranean area, and the Near East between the fourth and fifteenth centuries. Examples: the Art of the Migration Period, Medieval City.

Repeatability: Unlimited as topics vary.

**ART HIS 111B. Byzantine Art: 650-1450. 4 Units.**

Studies in the development of the art and architecture of the Byzantine Empire between ca. 650 and 1450.

**ART HIS 112. Studies in Early Christian and Byzantine Art. 4 Units.**

Selected topics on the development of the art and architecture of the Later Roman and Byzantine Empires between ca. 300 and 1453. Examples: Early Christian architecture, Byzantine painting.

Repeatability: Unlimited as topics vary.

**ART HIS 114. Studies in Western Medieval Art. 4 Units.**

Selected topics on the development of art and architecture in Western Europe between ca. 700 and 1400. Examples: Romanesque painting, Gothic architecture.

Repeatability: Unlimited as topics vary.

**ART HIS 120. Studies in Renaissance and Baroque Art. 4 Units.**

Selected topics on the art and architecture of Europe between the fifteenth and eighteenth centuries. Examples: Renaissance and Baroque prints, Bruegel to Rubens.

Repeatability: Unlimited as topics vary.

**ART HIS 121. Studies in Southern Renaissance Art. 4 Units.**

Selected topics determined by individual faculty members exploring historical developments and individual artists of the fifteenth and sixteenth centuries in Italy and Spain. Examples: Renaissance Venice, Age of Michelangelo.

Repeatability: Unlimited as topics vary.

**ART HIS 123. Studies in Northern Renaissance Art. 4 Units.**

Selected topics determined by individual faculty members exploring historical developments and individual artists of the fifteenth and sixteenth centuries in Northern Europe. Examples: Late Medieval art, painting from Van Eyck to Bosch.

Repeatability: Unlimited as topics vary.

**ART HIS 125. Studies in Southern Baroque Art. 4 Units.**

Selected topics determined by individual faculty members exploring historical developments and individual artists of the seventeenth and eighteenth centuries in Italy and Spain. Example: Rome in the seventeenth century.

Repeatability: Unlimited as topics vary.

**ART HIS 128. Studies in Northern Baroque Art. 4 Units.**

Selected topics determined by individual faculty members exploring historical developments and individual artists of the seventeenth and eighteenth centuries in Northern Europe. Example: the Age of Rembrandt.

Repeatability: Unlimited as topics vary.

**ART HIS 134C. Modern European Art: From Impressionism to the Fauves. 4 Units.**

History of European painting and urban transformation from 1851 to 1907, when Paris stood strong as the unquestioned cultural capital of the nineteenth century.

**ART HIS 134D. Modern European Art: From Cubism to Surrealism. 4 Units.**

History of European painting, sculpture, and design from 1907 to 1940, when Paris and painting lost their dominance as other cultural centers and other media claimed renewed importance.

**ART HIS 134E. Topics in Modern European Art. 4 Units.**

Selected topics within the period 1643 to 1940.

Repeatability: Unlimited as topics vary.

**ART HIS 140A. History of Contemporary Art. 4 Units.**

Selected topics exploring historical developments of contemporary art from 1945 to the present. Examples: American Art 1945-1989, European Art 1945-1989, Art After 1989. Works of art are studied as cultural, social, and political practices.

Repeatability: Unlimited as topics vary.

**ART HIS 140B. Topics in Contemporary Art. 4 Units.**

Selected topics exploring artistic movements, artists, and/or issues in contemporary art from 1945 to the present. Examples include Junk Art, Countercultures, Art and Politics Now. Works of art are studied as cultural, social, and political practices.

Repeatability: Unlimited as topics vary.

**ART HIS 145A. Studies in Modern Architecture. 4 Units.**

Architecture and related design practices from the late eighteenth century through 1945 are studied in relation to social, aesthetic, technological, and political questions.

Repeatability: Unlimited as topics vary.

**ART HIS 145B. Studies in Architecture after 1945. 4 Units.**

Architecture and related design practices from 1945 through present are studied in relation to social, aesthetic, technological, and political questions.

Repeatability: Unlimited as topics vary.

**ART HIS 145C. Topics in the History of Modern and Contemporary Architecture. 4 Units.**

Varying topics from the late eighteenth century to the present. Architecture and related design practices are studied in relation to social, aesthetic, technological, and political questions.

Repeatability: Unlimited as topics vary.

**ART HIS 150. Studies in Asian Art. 4 Units.**

Topics include visual studies in China, Japan, Korea and India.

Repeatability: Unlimited as topics vary.

**ART HIS 151B. Later Imperial China. 4 Units.**

Investigates the uses, subjects, styles, and social contexts of art made in the later Imperial dynasties, whether court art, religious art, women's painting, scholar painting, or art for the market.

**ART HIS 151C. Modern China. 4 Units.**

Examines the evolution and media of Chinese art and visual culture in the context of modern China's sweeping historical, social, and political changes.

**ART HIS 155A. Ancient India. 4 Units.**

Examines the visual and religious history of the region defined as 'India' today, but necessarily encompassing modern Bangladesh and Pakistan. Culminates with the supposed Golden Age of the Gupta empire and its far-reaching legacies.

Same as HISTORY 170A, REL STD 122.

Concurrent with ART HIS 255A.

**ART HIS 155B. Medieval India. 4 Units.**

Begins with the Gupta period's aesthetic legacies in South Asia's architecture, sculpture, and painting. Explores the dispersal of Islam throughout South Asia, including the Muslim communities of southern India.

Same as HISTORY 170B, REL STD 123.

Concurrent with ART HIS 255B.

**ART HIS 155C. Modern India. 4 Units.**

Examines the imperial patronage of the Mughal emperors, covering their territorial holdings extending from Afghanistan through western Bangladesh. Continues with the 'aftermath' of the Mughal empire and the rise of British commercialism and colonialism.

**ART HIS 155D. Topics in the Art and Architecture of India. 4 Units.**

Studies in selected areas of Art and Architecture of India. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**ART HIS 156. Art and Globalization, Modern. 4 Units.**

Study of modern art as a cause and expression of increasing contacts between cultures. Focusing on regions in Asia and the Americas, adoption of European oil painting, indigenous art movements, and national capital architecture are explored.

**ART HIS 162C. Contemporary Japan. 4 Units.**

Study of various media of Japanese art from the time of war defeat in 1945 until the present. Topics include artists' responses to the nuclear bomb, the aesthetics of the 'economic miracle,' avant-garde groups, manga, and innovations in architecture.

**ART HIS 163. Asian American Art, Contemporary. 4 Units.**

Study of the Asian American experience in contemporary art and visual culture. Art by Asian Americans of diverse backgrounds as well as the history of visualization of Asian identities in American art/visual culture.

**ART HIS 164A. Modern African American Art. 4 Units.**

Investigates the history of modern African American art; emphasis on the politics of representation. Examines art in a variety of media from material culture and textiles to painting and photography. Issues of migration, nationalism, gender, sexuality, and hybridity are discussed.

Same as AFAM 111A.

**ART HIS 164B. Contemporary African American Art. 4 Units.**

Investigates the history of contemporary African American art; emphasis on the politics of representation. Explores art in a variety of media: painting, sculpture, photography, installation, and new media. Cultural politics, appropriation, identity, gender, sexuality, hybridity and civil rights issues discussed.

Same as AFAM 111B.

**ART HIS 164D. African American Women in Art. 4 Units.**

Examines depictions of and by African American women in art and popular culture through a variety of media including textiles, painting, sculpture, photography, and installation. Focuses on African American women's experiences, perspectives, and strategies for contemporary representation.

Same as AFAM 125.

**ART HIS 164E. African Americans and Photography. 4 Units.**

Explores depictions of and by African Americans through photography. Examines the history of photography in relationship to African American culture through a variety of media from early daguerreotype processes to digital imagery.

Same as AFAM 145.

**ART HIS 165A. Early American Art. 4 Units.**

An examination of American visual culture from 1620 to 1860 from the era of European exploration and colonization of the New World to the beginning of the Civil War.

**ART HIS 165B. Nineteenth Century American Art. 4 Units.**

An exploration of American visual culture from 1860 to 1900, including paintings, sculpture, and photographs produced during the Civil War and during the decades of prosperity that followed.

**ART HIS 165C. Modern American Art. 4 Units.**

Focusing on the period from 1900 until 1965, this course considers the emergence and institutionalization of modern art in the United States.

**ART HIS 165D. Topics in American Art. 4 Units.**

Varying topics within the period 1620 to 1970. Works of art are studied in their cultural, social, and political contexts.

Repeatability: Unlimited as topics vary.

**ART HIS 180. Topics in the Criticism of Art. 4 Units.**

Selected topics discussed on the theoretical and/or practical dimensions of art historical criticism.

Repeatability: Unlimited as topics vary.

**ART HIS 181. Topics in Museum Studies. 4 Units.**

Addresses the historical and contemporary function of the museum as an instructional device. The function of exhibitions in the public sphere, and the roles of curators, educators, and the public are analyzed.

Repeatability: Unlimited as topics vary.

**ART HIS 183B. 20th Century Photographic History. 4 Units.**

Varying topics within the history of photography in the 20th century. Photographic practice studied in relation to art history, cultural history, and social history.

Repeatability: Unlimited as topics vary.

**ART HIS 183C. Selected Topics in Photographic History. 4 Units.**

Varying topics within the history of photography from the early 19th century to the present. Photographic practice studied in relation to art history, cultural history, and social history. Examples include documentary; pictorialism and art photography; photomontage, photographic books.

Repeatability: Unlimited as topics vary.

**ART HIS 185. Topics in Visual Studies. 4 Units.**

Interdisciplinary topics on the cultural analysis of visual artifacts and practices.

Repeatability: Unlimited as topics vary.

**ART HIS 190W. Art History Methods. 4 Units.**

Theory and practice of art history, with an emphasis on formal and social models of analyzing and writing about art.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Art History Majors only.

(Ib)

**ART HIS 196. Ethics, Law, and Art. 4 Units.**

Addresses a broad range of ethical and legal issues pertaining to art, ownership, looting and theft, museum policies, and cultural heritage.

Concurrent with ART HIS 296.

**ART HIS 198. Advanced Seminar: Topics in Art History. 4 Units.**

Discussion and report-oriented seminar with emphasis on reading, writing, and thinking about problems in art history. Examples: Gothic Cathedral, Portraiture East and West.

Prerequisite: Recommended: ART HIS 190W.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only. Art History Majors have first consideration for enrollment.

Concurrent with ART HIS 298.

**ART HIS 199. Independent Study in Art History. 1-4 Units.**

Supervised, but independent reading or research on art historical topics.

Repeatability: May be taken for credit 4 times.

Restriction: Art History Majors only.

**ART HIS 255A. Ancient India. 4 Units.**

Examines the visual and religious history of the region defined as 'India' today, but necessarily encompassing modern Bangladesh and Pakistan. Culminates with the supposed Golden Age of the Gupta empire and its far-reaching legacies.

Same as IRAN 255A.

Restriction: Graduate students only.

Concurrent with ART HIS 155A.

**ART HIS 255B. Medieval India. 4 Units.**

Begins with the Gupta period's aesthetic legacies in South Asia's architecture, sculpture, and painting. Explores the dispersal of Islam throughout South Asia, including the Muslim communities of southern India.

Same as IRAN 255B.

Restriction: Graduate students only.

Concurrent with ART HIS 155B.

**ART HIS 296. Ethics, Law, and Art. 4 Units.**

Addresses a broad range of ethical and legal issues pertaining to art, ownership, looting and theft, museum policies, and cultural heritage.

Prerequisite: Background in Art History or Legal Studies.

Same as IRAN 296.

Concurrent with ART HIS 196.

**ART HIS 298. Master's Seminar: Topics in Art History. 4 Units.**

Studies in selected areas of Art History. Examples include Gothic Cathedral, Portraiture East and West.

Repeatability: Unlimited as topics vary.

Concurrent with ART HIS 198.

**ART HIS 299. Master's Thesis Research. 4 Units.**

Research and writing of the Master's thesis.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ART HIS 399. University Teaching. 4 Units.**

Limited to teaching assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Archaeology, Minor

The interdisciplinary minor in Archaeology offers rigorous academic study of the archaeological record and its interpretation from cultures of great antiquity through the modern period. The curriculum engages students with methodological training in archaeological recovery and analysis, as well as the theoretical underpinnings of how we know what we know about past societies through the material traces of human activity.

Students also grapple with the ways in which archaeology is experienced and shaped through the heritage industry, popular culture, museums, as well as political, social, and cultural movements. As they prepare for careers or graduate study, Archaeology minors are encouraged to explore these problems while gaining foundational knowledge in the archaeology of a wide variety of cultures throughout the Old and New worlds, including ancient Anatolia, Mesopotamia, and Iran, the ancient and medieval Mediterranean, the Islamic world, South Asia, Pre-Columbian North and South America, as well as archaeology in and of the contemporary world.

Upon completion of the minor, students are equipped to think critically about the archaeological record and as educators, museum professionals, researchers, lawyers, as well as policy makers and employees of cultural institutions and heritage sites in various roles across multiple government agencies (forestry, BLM, state parks, etc.) who manage our shared cultural resources. The minor's curricular structure consists of an introduction to archaeology (category A), one or more geographically- or historically-focused surveys to gain foundational knowledge in the archaeology of a specific region, time period, or culture (category B), and upper-division lectures or seminars that explore specific archaeological problems in greater depth (category C). To ensure interdisciplinarity, students are allowed to take no more than five courses from any single academic unit.

### Requirements for the Minor in Archaeology

Completion of seven courses (28 units) as specified below. At least four courses must be upper-division.

**A. Complete:**

ANTHRO 2C	Introduction to Archaeology
-----------	-----------------------------

**B. Select one of the following:**

ART HIS 40A	Ancient Greek and Roman Art, and Architecture
ART HIS 42A	History of Asian Art: Arts of India
ART HIS 42D	History of Asian Art: Arts of Islam
ART HIS 42E	Art and Archaeology of Ancient Persia, Egypt, and Mesopotamia
ANTHRO 141A	Ancient Civilization of Mexico and the Southwest

**C. Select five additional elective courses chosen from Areas B or C <sup>1,2</sup>**

ANTHRO 148	I Dig UCI
ANTHRO 149	Special Topics in Archaeology <sup>3</sup>
ANTHRO 169	Special Topics in Area Studies <sup>3</sup>
ART HIS 100	Studies in Ancient Art
ART HIS 103	Studies in Greek Art
ART HIS 107	Studies in Roman Art
ART HIS 111B	Byzantine Art: 650-1450
ART HIS 155A	Ancient India
ART HIS 181	Topics in Museum Studies <sup>3</sup>
ART HIS 196	Ethics, Law, and Art
ART HIS 198	Advanced Seminar: Topics in Art History <sup>3</sup>

### Residence Requirement for the Minor

Four upper-division courses required for the minor must be completed successfully at UCI. Two of the four may be taken through the UC Education Abroad Program provided course content is approved in advance by the Humanities Undergraduate Study Office.

- <sup>1</sup> No more than three of the five electives can be taken from a single department.
- <sup>2</sup> With the approval of the director of the minor, other relevant courses may satisfy the requirements for the minor. Possibilities include a course with archaeological content not already listed, credit earned from the completion of an accredited field school, or courses imparting training relevant to digital archaeology, geology, remote sensing, CAD, GIS, etc. (e.g. from COMPSI, EARTHSS, EECS, ENGRCEE, I&C SCI, IN4MATX, etc.). In such cases, students must fulfill any prerequisites required by the program offering the course.
- <sup>3</sup> Course must be on an approved topic. A list of approved topics can be viewed on the Archaeology Minor webpage on the Department of Art History website (<https://www.humanities.uci.edu/archaeology/>).

## Art History, B.A.

Art History is the study of works of art and other visual artifacts from all regions of the world and all periods of history. Consequently, the undergraduate curriculum in Art History, with its global perspective, is one of the most diverse disciplines in the humanities. Through Art History, students learn how to describe and interpret a range of objects including sculpture, painting, photography, architecture, and “new media” such as video and performance art. These skills, along with the program’s intense focus on writing and verbal expression, prepare students to think critically and to express themselves clearly at a time when visual communication is becoming ever more important.

Because works of art are always created within a larger cultural context, Art History courses are a good way to understand what other places or times were like. Students may explore, for example, ancient Greece, 19th century Japan, or even the 21st century United States. Majors in Art History are encouraged to take related courses in other fields in the humanities and to pursue the study of language beyond the minimum requirements. Because of its international perspective, Art History is a particularly good major for students interested in studying abroad. There are many study centers throughout the world associated with the University’s Education Abroad Program that offer widely varied selections of Art History courses.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Departmental Requirements for the Major

A. Select three of the following:

ART HIS 40A	Ancient Greek and Roman Art, and Architecture
ART HIS 40B	Arts of Europe: Medieval and Renaissance
ART HIS 40C	Early Modern and Modern Art in Europe and America
ART HIS 42A	History of Asian Art: Arts of India
ART HIS 42B	History of Asian Art: Arts of China
ART HIS 42C	History of Asian Art: Arts of Japan
ART HIS 42D	History of Asian Art: Arts of Islam
ART HIS 42E	Art and Archaeology of Ancient Persia, Egypt, and Mesopotamia
ART HIS 44	Image Collision: A Multicultural Approach to Images and Their Users
ART HIS 55	Disneyland

B. Select eight upper-division Art History courses, with at least one course in each of the following geographical regions: <sup>1</sup>

Americas: Art History 140, 156, 163–167

Europe: Art History 100–140

Asia: Art History 150–163

and at least one course in each of the following five historical periods: <sup>1</sup>

Ancient:

Art History 100–107

ART HIS 155A Ancient India

Medieval:

ART HIS 110 Studies in Medieval Art

ART HIS 111B Byzantine Art: 650-1450

ART HIS 112 Studies in Early Christian and Byzantine Art

ART HIS 114 Studies in Western Medieval Art

ART HIS 155B Medieval India

Early Modern:

## Art History 120–128

ART HIS 151B	Later Imperial China
ART HIS 165A	Early American Art
Modern:	
ART HIS 134C	Modern European Art: From Impressionism to the Fauves
ART HIS 134D	Modern European Art: From Cubism to Surrealism
ART HIS 134E	Topics in Modern European Art
ART HIS 145A	Studies in Modern Architecture
ART HIS 151C	Modern China
ART HIS 155C	Modern India
ART HIS 156	Art and Globalization, Modern
ART HIS 162B	
ART HIS 164A	Modern African American Art
ART HIS 164E	African Americans and Photography
ART HIS 165B	Nineteenth Century American Art
ART HIS 165C	Modern American Art
ART HIS 183B	20th Century Photographic History
ART HIS 183C	Selected Topics in Photographic History
Contemporary:	
ART HIS 140A	History of Contemporary Art
ART HIS 140B	Topics in Contemporary Art
ART HIS 145B	Studies in Architecture after 1945
ART HIS 162C	Contemporary Japan
ART HIS 163	Asian American Art, Contemporary
ART HIS 164B	Contemporary African American Art
ART HIS 164D	African American Women in Art
ART HIS 183B	20th Century Photographic History
ART HIS 183C	Selected Topics in Photographic History
C. Complete:	
ART HIS 190W	Art History Methods
D. Select one of the following options:	
1. Two quarters of:	
ART HIS 198	Advanced Seminar: Topics in Art History
2. or one quarter of:	
ART HIS 196	Ethics, Law, and Art
and	
ART HIS 198	Advanced Seminar: Topics in Art History

<sup>1</sup> NOTE: A course may apply as both one Geographical Region *and* one Historical Period, but no course may be used to satisfy more than one Geographical Region or more than one Historical Period.

Students should enroll in ART HIS 190W (for upper-division writing) as early as possible in their junior year, after successfully completing UCI's lower-division writing requirement. It is strongly recommended that students complete ART HIS 190W before taking ART HIS 198.

**Residence Requirement for the Major:** Five upper-division courses required for the major must be completed successfully at UCI.

Following their graduation, students with a B.A. in Art History have found employment in art galleries, auction houses, and museums, and they have entered graduate programs with a view to careers in university teaching, curatorial work, and art conservation. Moreover, with its strong emphasis on developing critical skills in writing, speaking, and analysis, Art History also provides an excellent preparation for many other careers. UCI graduates have pursued professional paths ranging from medicine and law, to business and education, to information technologies and architecture. As in the case of arts administration or intellectual property law, some of these professional pursuits have depended on and continue to make use of training in the arts.

## Art History, M.A. (4+1)

The 4+1 program allows students to earn a bachelor's degree while simultaneously completing courses that can be applied toward a master's degree in Art History. This unique structure permits students to complete coursework for their master's degree during the undergraduate term and one additional year. This is a 4+1 M.A. Program for UCI undergraduates majoring in Art History or other majors.

The M.A. program in Art History is designed to provide students with advanced skills and broad knowledge in the discipline of art history. The faculty is particularly well equipped to guide students with special interests in American, Asian, and European art history.

Students can begin coursework during the last year of the B.A. and are required to take a total of nine courses, equivalent to 36 units, toward the M.A. Nine courses are required for the degree:

A. Complete:

ART HIS 298	Master's Seminar: Topics in Art History (two quarters)
VIS STD 290A	Art History: Theories and Methods
VIS STD 295	Graduate Seminar in Visual Studies (three quarters, with Art History faculty only)
ART HIS 299	Master's Thesis Research (two quarters)
One additional elective graduate seminar	

The Master's Thesis is an approximately 20-page work of independent research supervised by a member of the faculty. Students wishing to participate in the program should apply in their final undergraduate year, which would allow them to begin course work toward the M.A. in their last undergraduate year.

For more information, please visit: <http://www.humanities.uci.edu/arhistory/graduate/51.php>

## Art History, Minor

Art History is the study of works of art and other visual artifacts from all regions of the world and all periods of history. Consequently, the undergraduate curriculum in Art History, with its global perspective, is one of the most diverse disciplines in the humanities. Through Art History, students learn how to describe and interpret a range of objects including sculpture, painting, photography, architecture, and "new media" such as video and performance art. These skills, along with the program's intense focus on writing and verbal expression, prepare students to think critically and to express themselves clearly at a time when visual communication is becoming ever more important.

### Requirements for the Minor in Art History

#### Departmental Requirements

A. Select three of the following:

ART HIS 40A	Ancient Greek and Roman Art, and Architecture
ART HIS 40B	Arts of Europe: Medieval and Renaissance
ART HIS 40C	Early Modern and Modern Art in Europe and America
ART HIS 42A	History of Asian Art: Arts of India
ART HIS 42B	History of Asian Art: Arts of China
ART HIS 42C	History of Asian Art: Arts of Japan
ART HIS 42D	History of Asian Art: Arts of Islam
ART HIS 42E	Art and Archaeology of Ancient Persia, Egypt, and Mesopotamia
ART HIS 44	Image Collision: A Multicultural Approach to Images and Their Users
ART HIS 55	Disneyland

B. Select four upper-division Art History courses from 100–198, excluding ART HIS 190W.

**Residence Requirement for the Minor:** Four upper-division courses required for the minor must be completed successfully at UCI. By petition, two of the four may be taken through the UC Education Abroad Program, providing course content is approved in advance by the department chair.

## Department of Asian American Studies

**Julia H. Lee, Chair**

3000 Humanities Gateway

949-824-2376

<http://www.humanities.uci.edu/aas/>

The Department of Asian American Studies examines the historical and contemporary experiences of Asians in the United States and in a global context. The curriculum seeks to provide an analysis of the cultural, political, and economical organization of Asian American communities. Students are invited to participate and partake in broadening their understanding of multicultural perspectives within U.S. society. The Department offers a B.A. program in Asian American Studies, a 4+1 B.A./M.A. program, a minor, and a graduate emphasis.

The Department also contributes to the Culture and Theory Ph.D. program, which uses the strengths of interdisciplinary programs and departments, particularly African American Studies, Chicano/Latino Studies, Asian American Studies, Critical Theory, and Gender and Sexuality Studies. This degree uses a problem-oriented rather than a disciplinary approach to issues of race, gender, and sexuality in relation to diasporas, transnational, and postcolonial contexts, all of which are broadly based in the humanities, social sciences, and arts.

## Scholarship Opportunities

The Ching-Suei Su Endowed Memorial Scholarship is awarded annually to sophomores or juniors who are majoring in Asian American Studies, East Asian Languages and Literatures, or Linguistics (with an emphasis on an East Asian language) and who demonstrate academic excellence and campus or community service.

- Asian American Studies, B.A.
- Asian American Studies, Graduate Emphasis
- Asian American Studies, M.A. (4+1)
- Asian American Studies, Minor

## Faculty

Dorothy B. Fujita-Rony, Ph.D. Yale University, *Associate Professor of Asian American Studies; Culture and Theory; History* (U.S. history, Asian American studies)

Claire J. Kim, Ph.D. Yale University, *Professor of Asian American Studies; Political Science*

James K. Lee, Ph.D. University of California, Los Angeles, *Associate Professor of Asian American Studies; Culture and Theory; English; Religious Studies* (Asian American literature and culture, contemporary U.S. literature, race and ethnic studies, urban studies, religious studies)

Julia Hyoun Joo Lee, Ph.D. University of California, Los Angeles, *Department Chair and Associate Professor of Asian American Studies; Culture and Theory; English* (Asian American literature and culture, African American literature and culture, ethnic literature, twentieth-century American literature.)

Isabela Seong Leong Quintana, Ph.D. University of Michigan, *Assistant Professor of Asian American Studies* (comparative and relational ethnic studies; Asian American history; Chicano/Latinx history; race and gender; borderlands, diasporas, and empire)

Linda T. Võ, Ph.D. University of California, San Diego, *Professor of Asian American Studies; Culture and Theory; Sociology; Urban Planning and Public Policy* (race and ethnic relations, immigrants and refugees, gender relations, community and urban studies)

Judy Tzu-Chun Wu, Ph.D. Stanford University, *Director of Humanities Center and Chancellor's Professor of Asian American Studies; Culture and Theory* (Asian American history; comparative racialization and immigration; empire and decolonization; gender and sexuality)

## Affiliate Faculty

Kei Akagi, B.A. International Christian University, *Professor of Music; Asian American Studies*

Anita Casavantes Bradford, Ph.D. University of California, San Diego, *Associate Professor of Chicano/Latino Studies; Asian American Studies; History* (20th century U.S., U.S. in the world, Cuba and the Caribbean; history of childhood; history of immigration, race and ethnicity; transnational and comparative Latina/o history; religion, politics and social movements)

Nahum D. Chandler, Ph.D. University of Chicago, *Professor of African American Studies; Asian American Studies; Comparative Literature; English; European Languages and Studies* (modern philosophy, intellectual history, history of the human sciences)

Yong Chen, Ph.D. Cornell University, *Associate Dean of Curriculum and Student Services and Professor of History; Asian American Studies; Religious Studies* (Asian American history and immigration, food and culture, U.S./China economic and cultural interactions)

Gilberto Q. Conchas, Ph.D. University of Michigan, *Professor of Education; Asian American Studies; Sociology* (urban education, sociology of education, comparative race and ethnicity)

Laura Enriquez, Ph.D. University of California, Los Angeles, *Assistant Professor of Chicano/Latino Studies; Asian American Studies; Sociology* (undocumented 1.5 generation young adults, immigration, citizenship, Latino families)

Christopher Fan, Ph.D. University of California, Berkeley, *Assistant Professor of English; Asian American Studies* (transnational Asia American, 20th, and 21st century literature, speculative fiction, political economy)

Ann Hironaka, Ph.D. Stanford University, *Professor of Sociology; Asian American Studies* (political sociology, war and peace, environmental sociology, ethnic and racial conflict)

Suellen Hopfer, Ph.D. Pennsylvania State University, *Assistant Professor of Program in Public Health; Asian American Studies*

Joseph Jonghyun Jeon, Ph.D. University of California, Berkeley, *Professor of English; Asian American Studies; Culture and Theory* (Asian-American literature, film modernism)

Eleana Kim, Ph.D. New York University, *Associate Professor of Anthropology; Asian American Studies* (kinship, transnationalism, environment, Korea)

Kyung Hyun Kim, Ph.D. University of Southern California, *Professor of Korean Culture; Asian American Studies; Film and Media Studies; Visual Studies* (East Asian cinema, modern Korea, critical theory)

Young-Suk Kim, Ed.D. Harvard University, *Professor of Education; Asian American Studies*

Jerry Won Lee, Ph.D. University of Arizona, *Associate Professor of English; Anthropology; Asian American Studies; Comparative Literature; Culture and Theory*

Stephen Lee, J.D. University of California, Berkeley, *Professor of School of Law; Asian American Studies*

Daphne Pi-Wei Lei, Ph.D. Tufts University, *Head of Doctoral Studies and Professor of Drama; Asian American Studies* (Asian theatre, Asian American theatre, intercultural theatre, gender theory, performance theory)

Simon Leung, B.A. University of California, Los Angeles, *Professor of Art; Asian American Studies* (new genres, critical theory, contemporary art history, performance)

Sylvia Nam, Ph.D. University of California, Berkeley, *Assistant Professor of Anthropology; Biological Chemistry; Urban Planning and Public Policy* (urban studies, property, transnational expertise, Southeast Asia)

L. Song Richardson, J.D. Yale Law School, *Dean of the School of Law and Professor of School of Law; Asian American Studies*

Annie E. Ro, Ph.D. University of California, Los Angeles, *Assistant Professor of Program in Public Health; Asian American Studies*

Tara Rodman, Ph.D. Northwestern University, *Assistant Professor of Drama; Asian American Studies* (modernist performance, Japanese theatre and dance, transnationalism, racial formation, global Asias)

Bert Winther-Tamaki, Ph.D. New York University, *Department Chair and Professor of Art History; Asian American Studies; Visual Studies* (modern Japanese art and visual culture, Asian American art, art and globalization)

Karna Wong, Ph.D. University of California, Los Angeles, ; *Asian American Studies*

Bruce N. Yonemoto, M.F.A. Otis Art Institute, *Professor of Art; Asian American Studies* (video, experimental media, film theory)

## Courses

### **ASIANAM 50. Asian American Histories. 4 Units.**

Examines and compares diverse experiences of major Asian American groups since the mid-nineteenth century. Topics include origins of emigration; the formation and transformation of community; gender and family life; changing roles of Asian Americans in American society. Formerly ASIANAM 60A.

Same as HISTORY 15C, SOC SCI 78A.

((III or IV) and VII ).

### **ASIANAM 51. The U.S. and Asia. 4 Units.**

Explores the historical and contemporary transnational linkages between the U.S. and regions in Asia and their resultant flows of people, goods, and ideas. Attention given to the role of militarism and processes of globalization, and the histories of cultural contact/conflict.

((III or IV) and VIII ).

### **ASIANAM 52. Asian American Communities. 4 Units.**

Examines the renewal of Asian immigration following World War II. Explores contemporary Asian American populations and communities in the U.S., and the impact of contemporary Asian immigration on the U.S. political economy and social order.

Same as SOC SCI 78B.

(III, VII)

**ASIANAM 53. Asian Americans and Race . 4 Units.**

Analyzes the Asian American experience in comparative perspective, which includes comparisons of different ethnic and racial groups, and across gender and class. Possible topics include labor, economy, politics, migration, nation, popular culture, gender, family, sexuality, and multiraciality.

Same as SOC SCI 78C.

(III, VII)

**ASIANAM 54. Asian American Stories. 4 Units.**

Examines stories from Asian American communities through literary texts and other media. Selected themes may include the following: dislocation/relocation, finding/inventing a usable past, poetics/politics in language, identities/ethnicities.

(IV, VII)

**ASIANAM 55. Asian Americans and the Media. 4 Units.**

Investigates popular representations of and cultural productions by Asian Pacific Americans and Asians in the Americas from the late-nineteenth century to the present. Cultural media may include political cartoons, film/television, popular music, visual art, blogs/Web sites, and performance.

(IV, VII)

**ASIANAM 100W. Research Methodologies for Asian American Studies. 4 Units.**

Explores various research methodologies for Asian American Studies combining theoretical knowledge with field research. Goals: conduct field research about immigrants and refugees from Asia. Topics vary: migration and labor, assimilation and cultural preservation, cultural expressions in the diaspora.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

**ASIANAM 110. Asian American Writers. 4 Units.**

Literary analysis of Asian American writers' representations of issues of identity, class, history among others. Variety of literary forms—novel, poem, drama, essay—included in a study of a variety of Asian American ethnic groups.

Repeatability: Unlimited as topics vary.

**ASIANAM 111. Asian American History. 4 Units.**

Introduction to important themes in the history of people of Asian ancestry in the United States from the nineteenth century to the present.

Repeatability: Unlimited as topics vary.

**ASIANAM 112. Asian American Art History. 4 Units.**

Investigation of Asian American experience expressed by art and visual culture throughout the twentieth century. Art by Asian Americans of diverse backgrounds as well as the history of cultural visualization of Asian identities in American art/visual culture.

Repeatability: Unlimited as topics vary.

**ASIANAM 114. Asian American Film and Video. 4 Units.**

Topics include histories of Asian American film and video, including documentaries, experimental, short subjects, feature-length independent film, and other forms of cinematic expression. Explores issues of identity (national, racial, gendered, among others).

Repeatability: Unlimited as topics vary.

**ASIANAM 116. Asian Americans and Popular Culture. 4 Units.**

Focuses on Asian Americans' relationship to popular culture as both producers and consumers. Topics include consumer cultures and subcultures, cyberspace and public space, popular music, indy comics and other print media.

Repeatability: Unlimited as topics vary.

**ASIANAM 130. Undocumented Immigrant Experiences. 4 Units.**

Examines the experiences of undocumented immigrants and the policies that structure their educational, economic, social, and political participation.

Same as CHC/LAT 164A, CRM/LAW C187, SOCIOL 177C.

(III and VII ).

**ASIANAM 132. Comparative Minority Politics. 4 Units.**

Examines the political experiences of Blacks, Latinos, and Asian Americans in the United States from roughly 1950 to the present. Focuses on how each group has pursued political empowerment via both conventional political channels and social movements.

Same as AFAM 151, CHC/LAT 147, POL SCI 124C.

**ASIANAM 137. Asian American Labor. 4 Units.**

Explores history of Asian Americans and work from the nineteenth century to the present. Areas of study include migration, colonialism, family, social organization, and work culture.

Same as HISTORY 152A.

**ASIANAM 138. Race and Urban Space. 4 Units.**

Examines how ethnic and racial processes shape and structure interactions in urban settings, such as schools, housing, employment, and public spaces, with attention to the international impact of globalization and postcolonial forces.

**ASIANAM 142. Islam in America. 4 Units.**

Offers a critical academic study of Islam in America, focusing on the core tenets of belief, the diversity of practices, and historical transformations that have taken place since the arrival of Muslims in the United States.

Same as ANTHRO 125Z.

**ASIANAM 143. Religious Traditions of Asian Americans. 4 Units.**

Studies the religious traditions of Asian Americans, focusing on the transplantation of religious institutions, establishment of sacred spaces, celebration of religious holidays, socialization of children, as well as birth, marriage, gender relations, death, family.

Same as SOCIOL 136.

**ASIANAM 144. The Politics of Protest. 4 Units.**

Examines the Civil Rights, Black Power, and women's movements in relationship to the Asian American movement. Uses social movement theories to illuminate the cases, and the cases to critique and revise the theories.

Same as POL SCI 124A.

**(VII)****ASIANAM 150. Special Topics in Asian American Studies. 4 Units.**

Analyzes a variety of themes in Asian American Studies—identity, history, culture—from various interdisciplinary perspectives in humanities, arts, social sciences.

Repeatability: Unlimited as topics vary.

**ASIANAM 151C. Korean American Studies. 4 Units.**

Explores the factors that have distinctly shaped the Korean American experience, including patterns of racial domination, the profile of immigrant flow, immigrant roles in the urban political economy, politics in Korea, and the role of the church.

Same as SOC SCI 178C.

**ASIANAM 151D. Vietnamese American Studies. 4 Units.**

Studies the resettlement of Vietnamese in the United States following their exodus from Southeast Asia. Topics include the Vietnam War, the 1975 evacuation, boat and land refugees, the shaping of Vietnamese communities, and Vietnamese American literature.

Same as SOC SCI 178D.

**ASIANAM 151E. Japanese American Studies. 4 Units.**

Studies the settlement of Japanese in Hawaii and the continental United States since the late 19th century. Topics include sugar plantations, development of rural Japanese America, World War II internment, post-War community development, and persistence of Japanese American identity.

Same as SOC SCI 178E.

**ASIANAM 151F. South Asian American Studies. 4 Units.**

Examines and compares the experiences of South Asian immigrants in the U.S. over time. Looks at the economic, political, and social positions of the immigrants, with special emphasis on religious changes and the changes in the second and later generations.

Same as SOC SCI 178F.

Restriction: Asian American Studies Majors have first consideration for enrollment. Social Policy/Public Service Majors have first consideration for enrollment.

**ASIANAM 151H. Southeast Asian American Studies. 4 Units.**

Analyzes experiences of refugees and immigrants from Southeast Asia, which may include those from Cambodia, Laos, Vietnam, and the Philippines. Examines political and economic factors for their exodus and how they reconstruct their identities, histories, and communities.

Same as SOC SCI 178H.

**ASIANAM 151J. Chinese American Studies. 4 Units.**

Analyzes the experiences of Chinese in the United States. Immigration, Chinese exclusion, racial and gender identity. Historical overview and contemporary issues covered.

Same as SOC SCI 178J.

**ASIANAM 151K. Filipina/Filipino American Studies. 4 Units.**

Explores the experience of Filipina/Filipino Americans from the era of Spanish colonization of the Philippines to present-day community formations in the United States, with special emphasis on the 20th century. Topics include colonialism, nation, migration, gender, and culture.

Same as SOC SCI 178K.

**ASIANAM 162. Asian American Women. 4 Units.**

Examines the representations and experiences of Asian American women from diverse perspectives. Explores the commonalities and differences among various groups of Asian American women, with particular focus on history, culture, values, and family roles.

Same as SOC SCI 177B.

**ASIANAM 164. Topics in Intersectionality. 4 Units.**

Topics include intersectional analysis of various themes related to ethnicity, gender, sexuality, and race within Asian American communities.

Repeatability: Unlimited as topics vary.

**ASIANAM 166. Race and Citizenship. 4 Units.**

Explores historical and contemporary patterns of racialization in relation to citizenship. Topics may include racial categorization, immigration, and comparative racialization.

**ASIANAM 167. Asian American and African American Relations. 4 Units.**

Addresses relationships of Asian American and African American communities in the United States. Topics include race, class, gender, labor, economic systems, political mobilization, community, civil rights, activism, cultural expression.

Same as AFAM 117, HISTORY 152B.

**ASIANAM 168. Politics of Animal Rights. 4 Units.**

Examines animal rights/welfare movement's efforts to transform moral, practical, and legal standing of nonhuman animals in contemporary U.S. Explores intersection of racism, sexism, and speciesism informed by theories of race and ethnicity, including Asian American Studies.

Same as POL SCI 126F.

Restriction: Political Science Majors have first consideration for enrollment. Asian American Studies Majors have first consideration for enrollment.

**ASIANAM 199. Independent Study. 1-4 Units.**

Directed reading and research in consultation with a faculty member. Substantial written work required.

Repeatability: May be repeated for credit unlimited times.

**ASIANAM 200A. Theory and Methods in Asian American Studies. 4 Units.**

Introduction to the intersection of the social sciences, humanities, and other fields that constitute the theory and methodology of Asian American Studies. Focuses on the interventions and contestations within Asian American Studies that have transformed the discipline in recent years.

Restriction: Graduate students only.

**ASIANAM 200B. Contemporary Issues in Asian American Studies. 4 Units.**

Examines the interrelations between history, theory, and race in the aftermath of the twentieth-century decolonial movements, offering an account of race through postcolonial and postnationalist approaches in comparative contexts. Considers the interventions made by transnational feminist and racialized queer critiques.

Restriction: Graduate students only.

**ASIANAM 200C. Leadership and Social Change in Asian American Communities. 4 Units.**

Introduces students to models of community-engaged learning and leadership that are central to the field of Asian American studies. Designed to expose students to histories and models of organizing in Asian American communities and forms of community-based research.

Restriction: Graduate students only.

**ASIANAM 200D. Introduction to Asian American Studies Research. 4 Units.**

Introduces students to research topics and methods within the field of Asian American studies. Aims to expose students to core and affiliated faculty to help them identify possible advisors for master's research projects or members of doctoral committees.

Restriction: Graduate students only.

**ASIANAM 201. Graduate Topics in Asian American Studies. 4 Units.**

Seminars on various topics in Asian American Studies.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ASIANAM 250. Advanced Topics in Asian American Studies. 4 Units.**

Seminar covering various areas of research within Asian American Studies as an interdisciplinary field. Recommended for advanced graduate students.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ASIANAM 290. Directed Research. 4-12 Units.**

Directed graduate study/research in Asian American Studies.

Repeatability: May be taken for credit for 24 units.

Restriction: Graduate students only.

**ASIANAM 291. Directed Reading. 4 Units.**

Readings focused on specialized topics in consultation with, and with the consent of, a faculty member.

Repeatability: May be taken for credit for 12 units.

Restriction: Graduate students only.

**ASIANAM 399. University Teaching. 4 Units.**

Limited to teaching assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Emphasis in Asian American Studies graduate students only.

## Asian American Studies, B.A.

The Department of Asian American Studies examines the historical and contemporary experiences of Asians in the United States and in a global context. The curriculum seeks to provide an analysis of the cultural, political, and economical organization of Asian American communities. Students are invited to participate and partake in broadening their understanding of multicultural perspectives within U.S. society.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

**Department Requirements for the Major in Asian American Studies**

A. Three introductory Asian American Studies core courses:

ASIANAM 50 or ASIANAM 51 and	Asian American Histories The U.S. and Asia
ASIANAM 52 or ASIANAM 53 and	Asian American Communities Asian Americans and Race
ASIANAM 54 or ASIANAM 55	Asian American Stories Asian Americans and the Media

B. Complete the following:

ASIANAM 100W	Research Methodologies for Asian American Studies
--------------	---

C. Select one course from each of the following areas:

Humanities/Arts: Asian American Studies 110–129
Social Science/Social Ecology: Asian American Studies 130–149
Asian American Sub-groups: Asian American Studies 151–160
Ethnic/Race/Gender Relations: Asian American Studies 161–170

D. Select four additional upper-division elective Asian American Studies courses. Students may request, by petition, one lower-division course to count as an elective. This course must be primarily focused on issues relevant to Asian American Studies.

**Residence Requirement for the Major:** A minimum of five upper-division courses required for the major must be completed successfully at UCI.

Many career opportunities exist for students who graduate with a B.A. in Asian American Studies, such as service with national and international organizations which seek knowledge of American multicultural society in general, and of Asian American peoples and cultures in particular; positions as area specialists with state and federal government agencies; careers in the private sector with corporations or private organizations which have a significant portion of their activities in the U.S. and the Pacific Rim; and positions of service and leadership within Asian American communities. Students may also continue their education and pursue professional or graduate degrees.

## Asian American Studies, Graduate Emphasis

The Department of Asian American Studies offers a graduate emphasis in Asian American Studies, which is available in conjunction with selected departmental graduate programs.

Students in the graduate emphasis complete a minimum of four courses, including ASIANAM 200A and ASIANAM 200B and two electives in Asian American Studies. Eligible courses include ASIANAM 200C; ASIANAM 200D; ASIANAM 201; ASIANAM 250; graduate seminar courses taught by Asian American Studies core or affiliate faculty; or directed reading courses with an Asian American Studies core or affiliate faculty.

Subject to the requirements of participating academic units, Ph.D. students in the emphasis should have at least one Asian American Studies core faculty member on their qualifying examination and dissertation committees. In consultation with the Asian American Studies Graduate Committee, the Director of Graduate Study may approve affiliated faculty members to sit in place of the core faculty. (There are no requirements concerning qualifying examinations or theses for master's students.)

Applicants to the emphasis must be admitted to a participating UCI graduate program. For complete information about application policies and procedures, as well as the requirements of the emphasis, please see the Director of Graduate Study.

## Asian American Studies, M.A. (4+1)

The combined Bachelor of Arts and Master of Arts in Asian American Studies is designed for students looking to engage in the most critical issues at the forefront of the field. At the conclusion of the program, graduates are trained in interdisciplinary theories and methods for social justice-driven research as well as have developed an understanding of issues facing local, national, and global Asian American communities through first-hand interaction and engagement.

All students wishing to participate in the program should first meet with the Director of Graduate Study to discuss eligibility and coursework opportunities. In order to be considered admissible, at minimum, students must meet the following criteria:

- Current UCI undergraduate student status
- Cumulative 3.0 GPA

- Cumulative 3.3 GPA in all Asian American Studies coursework
- Two Asian American Studies courses: one selected from ASIANAM 50, 51, 52, 53, or 54, and one other lower- or upper-division course in Asian American Studies

Applications are accepted on a rolling basis during the final year of undergraduate study. The process to apply is as follows:

- Set up an advising appointment with the Humanities Assistant Director of Graduate Study.
- Complete an online graduate application through UCI Graduate Division.
- Submit the following supplemental application materials: unofficial transcripts of all post-secondary work, one letter of recommendation from an Asian American Studies core or affiliate faculty member, and a writing sample (10 pages in length).

### Course Requirements

All students at the graduate level of the B.A./M.A. program must complete a total of nine courses (36 units) for the degree.

A. Complete the following:

ASIANAM 200A	Theory and Methods in Asian American Studies
ASIANAM 200B	Contemporary Issues in Asian American Studies
ASIANAM 200C	Leadership and Social Change in Asian American Communities
ASIANAM 200D	Introduction to Asian American Studies Research
ASIANAM 201	Graduate Topics in Asian American Studies
or ASIANAM 250	Advanced Topics in Asian American Studies

B. Complete three of the following:

ASIANAM 290	Directed Research
-------------	-------------------

C. Select one graduate level elective

### Language Requirement

Students must complete college-level coursework equivalent to UCI's sixth quarter of study (2C level, or for Latin or Greek, one 103 and one 104, or two 103s or 104s) in a language other than English or equivalent competence. The final course must be taken for a letter grade and passed with a grade of C or better.

### Degree Conferral

M.A. students may complete one of the following options as their degree capstone. Regardless of capstone track, all students must have a minimum GPA of 3.5 and complete a defense open to the public to earn the degree.

**Plan I – Thesis:** The thesis, approximately 25 to 35 pages in length, is a piece of independent research reviewed and approved by the faculty advisor and the thesis committee.

**Plan II – Comprehensive Exam:** At the end of the final quarter, the M.A. candidate must pass a comprehensive exam that illustrates mastery of key concepts and methods of inquiry in Asian American Studies. The final format of the exam is determined in consultation with the faculty advisor, but can take various forms, including a full-length creative work or a policy report. A written evaluation of said work, approximately 10 to 15 pages in length, is also to be submitted for review. The exam is administered by the faculty advisor and an exam committee comprised of at least two additional Asian American Studies faculty members.

### Time to Degree

Students complete all degree requirements and the Master's thesis/comprehensive exam within one year (three quarters) once they have transitioned to graduate student status. Maximum time to degree is two years after the Bachelor's degree.

## Asian American Studies, Minor

The Department of Asian American Studies examines the historical and contemporary experiences of Asians in the United States and in a global context. The curriculum seeks to provide an analysis of the cultural, political, and economical organization of Asian American communities. Students are invited to participate and partake in broadening their understanding of multicultural perspectives within U.S. society.

### Requirements for the Minor in Asian American Studies

#### Requirements for the Minor

A. Three introductory Asian American Studies core courses:

ASIANAM 50	Asian American Histories
or ASIANAM 51	The U.S. and Asia
and	

ASIANAM 52 or ASIANAM 53 and	Asian American Communities Asian Americans and Race
ASIANAM 54 or ASIANAM 55	Asian American Stories Asian Americans and the Media

B. Four upper-division courses selected from ASIANAM 100W–169, ASIANAM 199.

**Residence Requirement for the Minor:** Four upper-division courses required for the minor must be completed successfully at UCI. Two of the four may be taken through the UC Education Abroad Program, provided course content is approved in advance by the Department.

## Department of Classics

### Andromache Karanika, Department Chair

400 Murray Krieger Hall

949-824-6735

<http://www.humanities.uci.edu/classics/>

The Department of Classics aims to provide the undergraduate student with a working knowledge of the origins and heritage of Graeco-Roman civilization. The Department is committed to a twofold purpose: (1) disseminating interest in and knowledge of Classical Civilization through the teaching of Greek and Latin language and literature; and (2) helping students, through courses in Classical literature, history, civilization, mythology, and religion taught through English translations, to appreciate the achievements of Greek and Roman culture and their pervasive influence on our own civilization.

### Study Abroad

The Department of Classics encourages students to take advantage of educational opportunities abroad while making progress toward their UCI degree. Classics majors and minors can benefit from a broader perspective of the field by studying for periods ranging from one quarter to one year at any number of universities all over the world through the UC Education Abroad Program. Students can also augment their exposure to Greek, Latin, and Classical civilizations by studying for a summer or during the academic year in Greece or Italy at programs sponsored by other academic institutions. To determine how study abroad can fit into a Classics major, visit the UCI Study Abroad Center's website (<https://studyabroad.uci.edu/>). See the Department of Classics Undergraduate Program Advisor for additional information.

### Career Opportunities

The study of the ancient world is a valuable possession for modern life. The discipline of Classics is an important part of a well-rounded education. Greek and Latin language and literature, history, philosophy, mythology and religion make an excellent basis for exploring all periods of Western culture up to the present day. Classics is an interdisciplinary study, exploring human culture through a variety of methods and points of view. For this reason, the student who chooses to major in Classics may find many professional opportunities.

Graduate and professional schools in medicine, law, management, and other fields welcome students with training in Classics. So do many business corporations. Business, industry, and technology are well acquainted with the value of an education in Classics. They are aware that students with a strong background in a respected and challenging major such as Classics are disciplined thinkers who can express themselves in clear, coherent, and cogent language, capabilities that are considered valuable in future physicians, lawyers, and managers.

There are also specific vocational opportunities open to the graduate in Classics. A major in this field may lead to a career in high school teaching, or (after appropriate further study) in college or university teaching. It is also an excellent preparation for advanced study in other academic disciplines such as archaeology, history, comparative literature, philosophy, and linguistics, as well as for theological studies and for work in a wide range of the humanities and social sciences.

The UCI Division of Career Pathways (<http://career.uci.edu/>) provides services to students and alumni including career counseling, information about job opportunities, a career library, and workshops on résumé preparation, job search, and interview techniques.

### Faculty

Zina Giannopoulou, Ph.D. University of Illinois at Urbana-Champaign, *Associate Professor of Classics; European Languages and Studies* (Plato, philosophy and literature, Greek tragedy and epic, film, and reception of classics)

Aleah Hernandez, Ph.D. University of California, Irvine, *Assistant Professor of Teaching of Classics* (Greek epic and tragedy, classical reception, gender studies in Classics)

Andromache Karanika, Ph.D. Princeton University, *Department Chair and Associate Professor of Classics; European Languages and Studies; Religious Studies* (Greek epic poetry, Greek lyric, ritual, gender and performance, reception of antiquity in Byzantium)

Maria C. Pantelia, Ph.D. Ohio State University, *Director, Thesaurus Linguae Graecae® and Professor of Classics; Religious Studies* (Greek epic, Hellenistic poetry, digital technologies in the humanities)

Richard Snyder, Ph.D. University of Southern California, *Undergraduate Advisor and Assistant Professor of Teaching of Classics* (philosophy and literature, epic tradition, Latin poetry)

Paul Andrew Zissos, Ph.D. Princeton University, *Humanities Language Learning Program Director and Professor of Classics; European Languages and Studies* (Latin epic, medieval Latin, Roman history and culture, Classical reception)

## Classics Courses

### **CLASSIC 10. Scientific and Specialized Terminology. 4 Units.**

A study of English terms derived from Greek and Latin and important to contemporary medicine, science, and other professions, with emphasis on development of word-building skills. No prior knowledge of Greek or Latin required.

### **CLASSIC 36A. The Formation of Ancient Greek Society: Early Greece. 4 Units.**

A survey of ancient Greek civilization from its origins in the Bronze Age to the mid-Archaic period. Examines political and social history, as well as literature, art, religion, and archaeological remains.

Same as HISTORY 36A.

(IV)

### **CLASSIC 36B. The Formation of Ancient Greek Society: Late Archaic and Classical Greece. 4 Units.**

A survey of ancient Greek civilization from the Late Archaic period to the Classical period. Focuses on major institutions and cultural phenomena as seen through the study of ancient Greek literature, history, archaeology, and religion.

Same as HISTORY 36B.

(IV)

### **CLASSIC 36C. The Formation of Ancient Greek Society: Fourth-Century and Hellenistic Greece. 4 Units.**

A survey of ancient Greek civilization from the fourth century BCE through to the Hellenistic period. Focuses on major institutions and cultural phenomena as seen through the study of ancient Greek literature, history, archaeology, and religion.

Same as HISTORY 36C.

(IV)

### **CLASSIC 37A. The Formation of Ancient Roman Society: Origins to Roman Republic. 4 Units.**

A survey of the development of Roman civilization from its eighth century BCE beginnings to the civil wars of the first century BCE. Examines political and social history, as well as literature, art, architecture, and religion.

Same as HISTORY 37A.

(IV)

### **CLASSIC 37B. The Formation of Ancient Roman Society: Roman Empire. 4 Units.**

A survey of Roman civilization from Augustus's consolidation of power following the civil wars of the first century BCE to the crisis of the third century CE. Includes social history, literature, art, architecture, and religion.

Same as HISTORY 37B.

(IV)

### **CLASSIC 37C. The Formation of Ancient Roman Society: The Fall of Rome. 4 Units.**

A survey of Roman civilization from the crisis of the third century CE to the so-called "fall of Rome" in 476 CE. Examines political and social history, as well as literature, art, architecture, and religion.

Same as HISTORY 37C.

(IV)

**CLASSIC 45A. Classical Mythology: The Gods. 4 Units.**

An overview of the main myths of the gods of the ancient Greeks and Romans and their influence in contemporary and later literature and art. Includes readings from both ancient and modern sources.

(IV)

**CLASSIC 45B. Classical Mythology: The Heroes. 4 Units.**

An overview of the main myths of the heroes of the ancient Greeks and Romans and their influence in contemporary and later literature and art. Includes readings from both ancient and modern sources.

(IV)

**CLASSIC 45C. Classical Mythology: Ancient and Modern Perspectives of Classical Mythology. 4 Units.**

Detailed examination of key Greek and Roman myths, their interpretations, and the influence they have exerted on literature, art, and popular culture in subsequent periods.

(IV)

**CLASSIC 99. Special Studies in Classics. 1-4 Units.**

Lower-division level independent research with Classics faculty.

Repeatability: May be repeated for credit unlimited times.

**CLASSIC 140. Classics and History: The Ancient World. 4 Units.**

Selected topics in society and culture of the Graeco-Roman world. Readings in translation.

Repeatability: Unlimited as topics vary.

**CLASSIC 150. Classical Mythology. 4 Units.**

Selected myths and legends as used in Classical literature, and their modern interpretations.

**CLASSIC 160. Topics in Classical Literature in English Translation. 4 Units.**

Studies in selected areas of Classical literature. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**CLASSIC 160W. Topics in Classical Literature in English Translation. 4 Units.**

Studies in selected areas of Classical literature. Topics addressed vary each quarter.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

(Ib)

**CLASSIC 166. Topics in Classical Reception. 4 Units.**

Studies in selected areas of Classical reception. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**CLASSIC 170. Topics in Classical Civilization. 4 Units.**

Studies in selected areas of Classical civilization. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**CLASSIC 176. International Studies and the Classics. 4 Units.**

Develops a broader understanding of the formation of different cultures and countries of Classical times and their impact on the modern world.

Repeatability: Unlimited as topics vary.

**CLASSIC 192A. Senior Capstone. 2 Units.**

Under the guidance of a faculty mentor, majors design and execute a senior project. This project may be a research paper, dramatic production, school curriculum, etc. All projects must be approved by the faculty mentor.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Grading Option: In Progress (Letter Grade with P/NP).

**CLASSIC 192B. Senior Capstone. 4 Units.**

Under the guidance of a faculty mentor, majors design and execute a senior project. This project may be a research paper, dramatic production, school curriculum, etc. All projects must be approved by the faculty mentor.

Prerequisite: CLASSIC 192A. Satisfactory completion of the Lower-Division Writing requirement.

**CLASSIC 198. Directed Group Study. 4 Units.**

Special topics in Classical studies through directed reading and research.

Repeatability: May be repeated for credit unlimited times.

**CLASSIC 199. Independent Study in Classics. 1-4 Units.**

Independent research with Classics faculty.

Repeatability: May be repeated for credit unlimited times.

**CLASSIC 280. Independent Study. 4-12 Units.**

Supervised independent research. Subject varies.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CLASSIC 290. Research in Classics. 4-12 Units.**

Research under Classics faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CLASSIC 299. Dissertation Research. 4-12 Units.**

Dissertation research with Classics faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CLASSIC 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Greek Courses

**GREEK 1A. Fundamentals of Greek. 5 Units.**

Elements of Classical Greek grammar, syntax, and vocabulary.

Overlaps with GREEK S1AB.

Restriction: GREEK 1A and GREEK S1AB may not be taken for full credit.

**GREEK 1B. Fundamentals of Greek. 5 Units.**

Elements of Classical Greek grammar, syntax, and vocabulary.

Prerequisite: GREEK 1A. GREEK 1A with a grade of C or better

Overlaps with GREEK S1AB, GREEK S1BC.

Restriction: GREEK 1B and GREEK S1AB and GREEK S1BC may not be taken for full credit.

**GREEK 1C. Fundamentals of Greek. 5 Units.**

Introduction to reading texts.

Prerequisite: GREEK 1B. GREEK 1B with a grade of C or better

Overlaps with GREEK S1BC.

Restriction: GREEK 1C and GREEK S1BC may not be taken for full credit.

**(VI)****GREEK 99. Special Studies in Greek. 1-4 Units.**

Lower-division level independent research with Greek faculty.

Repeatability: May be repeated for credit unlimited times.

**GREEK 100. Topics in Attic Greek. 4 Units.**

Selected readings in Attic Greek prose and poetry. Authors may include Xenophon, Lysias, Antiphon, Euripides, and others. Selections from prose and poetry will be read each quarter. Grammar and syntax review included.

Prerequisite: GREEK 1C. GREEK 1C with a grade of C or better. Placement into GREEK 100 is also accepted.

Repeatability: Unlimited as topics vary.

**GREEK 103. Seminar in Greek Prose. 4 Units.**

Specialized and focused study of a particular Greek prose author or topic.

Prerequisite: GREEK 100

Repeatability: Unlimited as topics vary.

**GREEK 104. Seminar in Greek Poetry. 4 Units.**

Specialized and focused study of a particular topic or author of Greek poetry.

Prerequisite: GREEK 100

Repeatability: Unlimited as topics vary.

**GREEK 198. Directed Group Study. 4 Units.**

Special topics in Greek culture and civilization through directed reading and research.

Repeatability: May be repeated for credit unlimited times.

**GREEK 199. Independent Studies in Greek. 1-4 Units.**

Independent research with Greek faculty.

Repeatability: May be repeated for credit unlimited times.

**Latin Courses****LATIN 1A. Fundamentals of Latin. 5 Units.**

Elements of Latin grammar, syntax, and vocabulary.

Overlaps with LATIN S1AB.

Restriction: LATIN 1A and LATIN S1AB may not be taken for full credit.

**LATIN 1B. Fundamentals of Latin. 5 Units.**

Elements of Latin grammar, syntax, and vocabulary.

Prerequisite: LATIN 1A. LATIN 1A with a grade of C or better

Overlaps with LATIN S1AB, LATIN S1BC.

Restriction: LATIN 1B and LATIN S1AB and LATIN S1BC may not be taken for full credit.

**LATIN 1C. Fundamentals of Latin. 5 Units.**

Introduction to reading texts, including study of the poetry of Catullus and selected readings.

Prerequisite: LATIN 1B. LATIN 1B with a grade of C or better

Overlaps with LATIN S1BC.

Restriction: LATIN 1C and LATIN S1BC may not be taken for full credit.

**(VI)****LATIN 99. Special Studies in Latin. 1-4 Units.**

Lower-division level independent research with Latin faculty.

Repeatability: May be repeated for credit unlimited times.

**LATIN 100. Topics in Classical Latin. 4 Units.**

Selected readings in Classical Latin prose and poetry. Authors may include Cicero, Caesar, Ovid, Catullus, and others. Selections from prose and poetry will be read each quarter. Grammar and syntax review included.

Prerequisite: LATIN 1C. LATIN 1C with a grade of C or better. Placement into Latin 100 is also accepted.

Repeatability: Unlimited as topics vary.

**LATIN 103. Seminar in Latin Prose. 4 Units.**

Specialized and focused study of a particular Latin prose author or topic.

Prerequisite: LATIN 100

Repeatability: Unlimited as topics vary.

**LATIN 104. Seminar in Latin Poetry. 4 Units.**

Specialized and focused study of a particular topic or author in Latin poetry.

Prerequisite: LATIN 100

Repeatability: Unlimited as topics vary.

**LATIN 198. Directed Group Study. 1-4 Units.**

Special topics in Roman culture and civilization through directed reading and research.

Repeatability: May be repeated for credit unlimited times.

**LATIN 199. Independent Studies in Latin. 1-4 Units.**

Independent research with Latin faculty.

Repeatability: May be repeated for credit unlimited times.

## Classical Civilization, Minor

The Department offers Minors in Classical Civilization, Greek, and Latin for students who plan to follow a shorter but formally recognized program of study in the field of Classics. The Minor program in Classical Civilization approaches the ancient world from a broad interdisciplinary perspective with the goal to gain a deeper understanding and appreciation for the diverse cultures of the ancient Mediterranean. Students who minor in Classical Civilization have many of the same advantages as our majors, and benefit from being part of our inclusive community as they develop their study on civilizations that have had profound influence on our current socio-cultural, intellectual, and civic lives. Students further benefit from enhancing their critical thinking, creative and historically-informed problem-solving which can successfully complement their majors and studies in other areas, including Humanities, Social Sciences, STEM or professional fields.

A. Select one of the following:

CLASSIC 36A- 36B- 36C

The Formation of Ancient Greek Society: Early Greece  
and The Formation of Ancient Greek Society: Late Archaic and Classical  
Greece  
and The Formation of Ancient Greek Society: Fourth-Century and  
Hellenistic Greece

CLASSIC 37A- 37B- 37C

The Formation of Ancient Roman Society: Origins to Roman Republic  
 and The Formation of Ancient Roman Society: Roman Empire  
 and The Formation of Ancient Roman Society: The Fall of Rome

CLASSIC 45A- 45B- 45C

Classical Mythology: The Gods  
 and Classical Mythology: The Heroes  
 and Classical Mythology: Ancient and Modern Perspectives of Classical  
 Mythology

B. Select five upper-division Classics courses, one of which may be in a related field such as history, art history, or philosophy.

## Classics, B.A.

The Department offers a major in Classics with three possible emphases. Students may choose an emphasis in Greek and Latin Language and Literature, Latin Language and Literature, or Classical Civilization. Students are encouraged to consult with the Classics faculty regarding the appropriate choice of major and design of their programs.

For the emphasis in Greek and Latin Language and Literature, study of the Classics must be based on competence in both Greek and Latin. This emphasis is designed to provide the student with language competence as rapidly as possible, so that by the end of first-year Greek or Latin the student has already been introduced to some of the major Classical authors in the original language. From then on, courses are devoted to reading and interpreting the literature of ancient Greece and Rome. In addition to their training in the languages, students increase their knowledge of the literature, history, and thought of the ancient world through the close study of some of its finest writers.

The Latin Language and Literature emphasis is designed for those students who want to focus on Rome and the Latin language as their area of study. By the end of first-year Latin, students will be reading and analyzing some of the most influential works in Latin literature. In addition to gaining an expertise in Latin, students also devote a portion of their study to an examination of the history and culture of ancient Rome by taking upper-division Classical Civilization courses with Rome as their focus and/or additional Latin courses. Courses from other departments in the School of Humanities with a focus on later historical periods heavily influenced by Roman culture (such as the medieval period) may be used to satisfy some of the degree requirements, with prior approval of the Department of Classics.

The emphasis in Classical Civilization is designed for students who do not plan to concentrate on the Classical languages or pursue graduate study in the Classics, yet wish to obtain an undergraduate degree based on a sound knowledge of the Classical world. This major requires one year of study (or its equivalent) of either Greek or Latin and courses taught in English translation concerning such topics as Classical literature, civilization, history, archaeology, art, drama, and philosophy.

Students entering UCI with previous Greek or Latin training may be given advanced standing. Usually, one year of high school work is equated with one quarter of UCI work. For example, students with one, two, or three years of high school Latin (or Greek) will enroll in Latin (or Greek) 1B, 1C, and 100, respectively. Placement may vary (depending on the extent of the student's preparation) and a placement test may be required. Students with transfer credit for Greek and/or Latin may *not* repeat those courses for credit. Students with high school training in the Classical languages are required to consult with the Classics undergraduate advisor before enrolling in Greek or Latin courses.

The Department adheres to the policy of giving its students an opportunity to participate in the departmental decision-making process. Student representatives, elected from and by the undergraduate majors, participate in all open departmental meetings. Representatives are responsible for maintaining close liaison with their constituency, for representing the students' interest in curriculum and personnel matters.

Inquiries regarding language placement, prerequisites, planning a program of study, or other matters related to the Department's offerings should be directed to the Office of the Chair, 400 Murray Krieger Hall, telephone 949-824-6735.

### Planning a Program of Study

The Department believes in close consultation with students on academic advising and program planning. Students planning to major in Classics or minor in Greek, Latin, or Classical Civilization are strongly urged to consult with the departmental faculty at the earliest moment to learn about the various programs.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

**All students are subject to the Language Other Than English Placement and Progression policies.**

### Departmental Requirements for the Major

The B.A. program in Classics is devoted to the study of languages, literature, and culture of ancient Greece and Rome. Students select one of three emphases: (1) Greek and Latin Language and Literature; (2) Latin Language and Literature; or (3) Classical Civilization.

#### Emphasis in Greek and Latin Language and Literature

A. Choose either Greek Focus or Latin Focus:

1. Greek Focus:

## CLASSIC 36A- 36B- 36C

The Formation of Ancient Greek Society: Early Greece  
and The Formation of Ancient Greek Society: Late Archaic and Classical Greece  
and The Formation of Ancient Greek Society: Fourth-Century and Hellenistic Greece

and select six upper-division courses in GREEK 100–104, GREEK 120

and select three upper-division courses in LATIN 100–104

or

## 2. Latin Focus:

## CLASSIC 37A- 37B- 37C

The Formation of Ancient Roman Society: Origins to Roman Republic  
and The Formation of Ancient Roman Society: Roman Empire  
and The Formation of Ancient Roman Society: The Fall of Rome

and select six upper-division courses in LATIN 100–104

and select three upper-division courses in GREEK 100–104

B. One additional upper-division course in Greek or Latin. One upper-division Classics class (CLASSIC 140, CLASSIC 150, CLASSIC 160, CLASSIC 170, CLASSIC 176) may be substituted for the upper-division Greek or Latin course with prior approval of the departmental undergraduate advisor.

## C. Senior Capstone Requirement:

CLASSIC 192A-CLASSIC 192B (or equivalent) taken during the senior year. Under the guidance of a faculty mentor, students design and execute a senior project. Students may plan a project centering on an area of strong interest and may write a research paper, design a creative project, a primary or secondary school curriculum, or other similar projects. All project proposals must be approved by the end of CLASSIC 192A. Six units of CLASSIC 198, CLASSIC 199, or GREEK 199 may be substituted for CLASSIC 192A-CLASSIC 192B with prior approval of the departmental undergraduate advisor.

**Emphasis in Latin Language and Literature**

## A. Complete:

## CLASSIC 37A- 37B- 37C

The Formation of Ancient Roman Society: Origins to Roman Republic  
and The Formation of Ancient Roman Society: Roman Empire  
and The Formation of Ancient Roman Society: The Fall of Rome

B. Select six upper-division courses in LATIN 100–104.

C. Select four upper-division courses from the following:

## LATIN 103

Seminar in Latin Prose

## LATIN 104

Seminar in Latin Poetry

## CLASSIC 140

Classics and History: The Ancient World

## CLASSIC 150

Classical Mythology

## CLASSIC 160

Topics in Classical Literature in English Translation

## CLASSIC 170

Topics in Classical Civilization

## CLASSIC 176

International Studies and the Classics

Courses taken in another UCI department may be substituted with prior approval of the departmental undergraduate advisor; three of these courses must be Roman in topic (the fourth course may have a Greek topic).

## D. Senior Capstone Requirement:

CLASSIC 192A-CLASSIC 192B (or equivalent) taken during the senior year. Under the guidance of a faculty mentor, students design and execute a senior project. Students may plan a project centering on an area of strong interest and may write a research paper, design a creative project, a primary or secondary school curriculum, or other similar projects. All project proposals must be approved by the end of CLASSIC 192A. Six units of CLASSIC 198, CLASSIC 199, LATIN 198, or LATIN 199 may be substituted for CLASSIC 192A- CLASSIC 192B with prior approval of the departmental undergraduate advisor.

**Emphasis in Classical Civilization**

## A. Select one of the following:

## LATIN 1A- 1B- 1C

Fundamentals of Latin  
and Fundamentals of Latin  
and Fundamentals of Latin

## GREEK 1A- 1B- 1C

Fundamentals of Greek  
and Fundamentals of Greek  
and Fundamentals of Greek

or equivalent

and select one of the following:

CLASSIC 36A- 36B- 36C	The Formation of Ancient Greek Society: Early Greece and The Formation of Ancient Greek Society: Late Archaic and Classical Greece and The Formation of Ancient Greek Society: Fourth-Century and Hellenistic Greece
CLASSIC 37A- 37B- 37C	The Formation of Ancient Roman Society: Origins to Roman Republic and The Formation of Ancient Roman Society: Roman Empire and The Formation of Ancient Roman Society: The Fall of Rome
CLASSIC 45A- 45B- 45C	Classical Mythology: The Gods and Classical Mythology: The Heroes and Classical Mythology: Ancient and Modern Perspectives of Classical Mythology

B. Select five upper-division Classics courses.

C. Select two additional upper-division Classics courses. These courses may be in Classics, Greek, Latin, History, Art History, Philosophy, or other related field. Courses must focus on the ancient Mediterranean and if taken in another UCI department, must have the prior approval of the departmental undergraduate advisor.

D. Senior Capstone Requirement:

CLASSIC 192A-CLASSIC 192B (or equivalent) taken during the senior year. Under the guidance of a faculty mentor, students design and execute a senior project. Students may plan a project centering on an area of strong interest and may write a research paper, design a creative project, a primary or secondary school curriculum, or other similar projects. All project proposals must be approved by the end of CLASSIC 192A. Six units of CLASSIC 198 or CLASSIC 199 may be substituted for CLASSIC 192A-CLASSIC 192B with prior approval of the departmental undergraduate advisor.

**Residence Requirement for the Major:** At least five upper-division courses required for the major must be completed successfully at UCI.

## Classics, M.A.

### The University of California Tri-Campus Graduate Program in Classics

UC Irvine, UC Riverside, and UC San Diego

Michele Salzman, **Chair, Joint Executive Committee**

The UC Tri-Campus Graduate Program in Classics is a joint venture that combines faculty in Classics and related disciplines from the three southernmost University of California campuses—UC Irvine, UC Riverside, and UC San Diego.

The goal of the program is to provide a graduate education that unites the main currents of modern literary, cultural, and social theory with the traditional skills and methodologies of classical philology. Candidates for degrees are expected to exhibit facility in Greek and Latin, competence in research, including theoretical approaches to texts and objects, digital skills for research and teaching, and experience in teaching. These goals are realized through the four core courses (CLASSIC 200A, CLASSIC 200B, CLASSIC 200C and CLASSIC 201) and seminars (CLASSIC 220).

**NOTE: Admission to the program is not available at this time. Contact the Department for information.**

All entering students are admitted into the Ph.D. program. With the exception of those granted advanced standing because they hold the M.A. in Classics from another institution, entering students may be awarded an M.A. along the way.

The requirements for the M.A. are two years (six quarters) of course work, followed by a comprehensive examination or completion of a Master's thesis. A reading knowledge of either German, French, Italian, or an equivalent language, demonstrated by examination or appropriate course work, is also required. M.A. students must successfully complete a minimum of 12 approved, seminar-level courses. The normal course load is three 200-level courses each quarter distributed as follows: nine quarters of CLASSIC 220; three quarters of CLASSIC 200A, CLASSIC 200B, CLASSIC 200C; a fourth quarter may be substituted for a CLASSIC 220. Up to one quarter of CLASSIC 290 for research and writing of the Master's thesis may be substituted for a CLASSIC 220. If remedial work is required in Greek or Latin, with the Graduate Advisor's approval, one enhanced upper-division Greek or Latin course (enrolled as a CLASSIC 280) may be substituted for a CLASSIC 220. With the Graduate Advisor's approval, M.A. students may substitute one external graduate seminar in a relevant area outside of Classics (at any of the three participating campuses) for a CLASSIC 220. At the end of a student's M.A. studies, a positive vote of the program faculty is necessary for continuation in the Ph.D. program. The expected time for completion of the M.A. is two years.

Luci Berkowitz, Ph.D. Ohio State University, *Professor Emerita of Classics*, UCI (Greek literary history, computer application to literature)

Cynthia L. Claxton, Ph.D. University of Washington, *Senior Lecturer in Classics*, Undergraduate Program Director, and Humanities Language Learning Director, UCI (Greek prose, historiography)

Anthony Edwards, Ph.D. Cornell University, *Professor of Classics and Comparative Literature*, UCSD (epic, Greek comedy, critical theory)

Richard I. Frank, Ph.D. University of California, Berkeley, *Professor Emeritus of History and Classics*, UCI (Roman history, Latin elegy and satire, classical tradition)

Zina Giannopoulou, Ph.D. University of Illinois, *Associate Professor of Classics and Graduate Advisor*, UCI (literary theory and Platonic hermeneutics, Classical and Hellenistic philosophy, Greek tragedy and epic)

David Glidden, Ph.D. Princeton University, *Professor Emeritus of Philosophy*, UCR (Greek and Roman philosophy)

Denver Graninger, Ph.D. Cornell University, *Assistant Professor of History*, UCR (social and political implications of Greek religion)

Monte Johnson, Ph.D. University of Toronto, *Associate Professor of Philosophy*, UCSD (ancient philosophy)

Dayna Kalleres, Ph.D. Brown University, *Associate Professor of Literature and the Study of Religion*, UCSD (early to late antique Christian literature and culture)

Andromache Karanika, Ph.D. Princeton University, *Associate Professor of Classics*, UCI (Greek epic poetry, Greek lyric, folklore)

Marianne McDonald, Ph.D. University of California, Irvine, *Professor of Theatre and Classics*, UCSD (Greek and Roman theatre, ancient drama in modern plays, film, and opera)

Margaret M. Miles, Ph.D. Princeton University, *Professor of Art History and Classics*, UCI (Greek and Roman art and archaeology, ancient Sicily, Greek religion)

Jozef Müller, Ph.D. Princeton University, *Assistant Professor of Philosophy*, UCR (Aristotle, Plato, Hellenistic Philosophy, and Neoplatonism)

Sheldon Nodelman, Ph.D. Yale University, *Associate Professor of Visual Arts*, UCSD (Classical art and architecture, Roman portraiture, critical theory)

Maria C. Pantelia, Ph.D. Ohio State University, *Department Chair and Professor of Classics, Director, Thesaurus Linguae Graecae®*, UCI (Greek epic, Hellenistic poetry, digital technologies in the humanities)

Lisa Raphals, Ph.D. University of Chicago, *Professor of Chinese/Comparative Literature*, UCR (comparative philosophy, religion, history of science, and gender, with other interests in poetics and science fiction and media studies)

Wendy Raschke, Ph.D. State University of New York, Buffalo, *Lecturer in Classics*, UCR (Roman satire, Greek art and archaeology)

Michele Salzman, Ph.D. Bryn Mawr College, *Chair, Joint Executive Committee, UC Tri-Campus Graduate Program in Classics and Professor of History*, UCR (Late antiquity; Roman history and literature, religion, women's studies)

Thomas F. Scanlon, Ph.D. Ohio State University, *Professor of Classics*, UCR (Greek and Roman historiography, ancient athletics)

Dana F. Sutton, Ph.D. University of Wisconsin, *Professor Emeritus of Classics*, UCI (Greek and Latin drama, Greek poetry, Anglo-Latin literature)

Edward Watts, Ph.D. Yale University, *Professor of History*, UCSD (intellectual and religious history of the Early Byzantine Empire)

Andrew Zissos, Ph.D. Princeton University, *Associate Professor of Classics*, UCI (Latin epic, medieval Latin, Roman culture)

## Classics, Ph.D.

### The University of California Tri-Campus Graduate Program in Classics

#### UC Irvine, UC Riverside, and UC San Diego

Michele Salzman, **Chair, Joint Executive Committee**

The UC Tri-Campus Graduate Program in Classics is a joint venture that combines faculty in Classics and related disciplines from the three southernmost University of California campuses—UC Irvine, UC Riverside, and UC San Diego.

Students accepted into the program may enroll at any of the three campuses, but normally apply for admission through UCI, which is the main location for instruction and administration. Applications are reviewed by an admissions committee composed of faculty members from all three campuses.

The goal of the program is to provide a graduate education that unites the main currents of modern literary, cultural, and social theory with the traditional skills and methodologies of classical philology. Candidates for degrees are expected to exhibit facility in Greek and Latin, competence in research, including theoretical approaches to texts and objects, digital skills for research and teaching, and experience in teaching. These goals are realized through the four core courses (CLASSIC 200A, CLASSIC 200B, CLASSIC 200C and CLASSIC 201) and seminars (CLASSIC 220).

**NOTE: Admission to the program is not available at this time. Contact the Department for information.**

All entering students are admitted into the Ph.D. program. With the exception of those granted advanced standing because they hold the M.A. in Classics from another institution, entering students may be awarded an M.A. along the way.

The requirements for the Ph.D. are three years (nine quarters) of course work. Minimum course requirements are four quarters of CLASSIC 200A, CLASSIC 200B, CLASSIC 200C; 12 quarters of CLASSIC 220; two external graduate seminars, from departments or programs outside of Classics. These may be taken from the offerings of any of the three campuses. Students may take up to two quarters of enhanced upper-division Greek or Latin courses (enrolled as 280s) in place of CLASSIC 220s with permission of the Graduate Advisor if remedial work is required in Greek or Latin. Where appropriate, in the third year of course work, a second CLASSIC 200A, CLASSIC 200B, or CLASSIC 200C, may be substituted for a CLASSIC 220. CLASSIC 280, Independent Study (supervised research), may be substituted for CLASSIC 220s *only* with the permission of the Graduate Advisor.

Up to 12 equivalent graduate-level courses completed elsewhere may be substituted for Tri-Campus Program courses with approval of the Joint Executive Committee. CLASSIC 280 may be used, normally in the fourth year, to provide time to work on the Greek and Latin reading lists and to prepare for Qualifying Examinations, but these courses do not count toward the required 18 courses.

Students are encouraged to take courses and seminars in relevant areas outside the program at any of the three campuses. At this stage, and during the fourth year of study, students are expected to have read extensively in the primary texts, in literary history and theory, and in ancient history. In addition, experience in supervised teaching and/or research activity is normally required. In order to qualify as a candidate for the Ph.D. and enter the dissertation stage, a student must pass a set of five written qualifying examinations, including Greek translation and Latin translation; Greek history and Roman history; history of Greek and Roman literature. Once these examinations have been passed, a student must submit a substantial dissertation prospectus, comparable to a research paper in scope and detail, and pass an oral examination administered by the candidacy committee.

Ph.D. students must also demonstrate reading proficiency in one modern research language (normally German and French or Italian) by the end of their second year either through appropriate course work or by examination. Proficiency in a second modern research language is expected by the end of the third year. The normative time for advancement to candidacy is four years. The normative time for completion of the Ph.D. is six years, and the maximum time permitted is eight years.

Luci Berkowitz, Ph.D. Ohio State University, *Professor Emerita of Classics*, UCI (Greek literary history, computer application to literature)

Cynthia L. Claxton, Ph.D. University of Washington, *Senior Lecturer in Classics*, Undergraduate Program Director, and Humanities Language Learning Director, UCI (Greek prose, historiography)

Anthony Edwards, Ph.D. Cornell University, *Professor of Classics and Comparative Literature*, UCSD (epic, Greek comedy, critical theory)

Richard I. Frank, Ph.D. University of California, Berkeley, *Professor Emeritus of History and Classics*, UCI (Roman history, Latin elegy and satire, classical tradition)

Zina Giannopoulou, Ph.D. University of Illinois, *Associate Professor of Classics and Graduate Advisor*, UCI (literary theory and Platonic hermeneutics, Classical and Hellenistic philosophy, Greek tragedy and epic)

David Glidden, Ph.D. Princeton University, *Professor Emeritus of Philosophy*, UCR (Greek and Roman philosophy)

Denver Graninger, Ph.D. Cornell University, *Assistant Professor of History*, UCR (social and political implications of Greek religion)

Monte Johnson, Ph.D. University of Toronto, *Associate Professor of Philosophy*, UCSD (ancient philosophy)

Dayna Kalleres, Ph.D. Brown University, *Associate Professor of Literature and the Study of Religion*, UCSD (early to late antique Christian literature and culture)

Andromache Karanika, Ph.D. Princeton University, *Associate Professor of Classics*, UCI (Greek epic poetry, Greek lyric, folklore)

Marianne McDonald, Ph.D. University of California, Irvine, *Professor of Theatre and Classics*, UCSD (Greek and Roman theatre, ancient drama in modern plays, film, and opera)

Margaret M. Miles, Ph.D. Princeton University, *Professor of Art History and Classics*, UCI (Greek and Roman art and archaeology, ancient Sicily, Greek religion)

Jozef Müller, Ph.D. Princeton University, *Assistant Professor of Philosophy*, UCR (Aristotle, Plato, Hellenistic Philosophy, and Neoplatonism)

Sheldon Nodelman, Ph.D. Yale University, *Associate Professor of Visual Arts*, UCSD (Classical art and architecture, Roman portraiture, critical theory)

Maria C. Pantelia, Ph.D. Ohio State University, *Department Chair and Professor of Classics, Director, Thesaurus Linguae Graecae®*, UCI (Greek epic, Hellenistic poetry, digital technologies in the humanities)

Lisa Raphals, Ph.D. University of Chicago, *Professor of Chinese/Comparative Literature*, UCR (comparative philosophy, religion, history of science, and gender, with other interests in poetics and science fiction and media studies)

Wendy Raschke, Ph.D. State University of New York, Buffalo, *Lecturer in Classics*, UCR (Roman satire, Greek art and archaeology)

Michele Salzman, Ph.D. Bryn Mawr College, *Chair, Joint Executive Committee, UC Tri-Campus Graduate Program in Classics and Professor of History*, UCR (Late antiquity; Roman history and literature, religion, women's studies)

Thomas F. Scanlon, Ph.D. Ohio State University, *Professor of Classics*, UCR (Greek and Roman historiography, ancient athletics)

Dana F. Sutton, Ph.D. University of Wisconsin, *Professor Emeritus of Classics*, UCI (Greek and Latin drama, Greek poetry, Anglo-Latin literature)

Edward Watts, Ph.D. Yale University, *Professor of History*, UCSD (intellectual and religious history of the Early Byzantine Empire)

Andrew Zissos, Ph.D. Princeton University, *Associate Professor of Classics*, UCI (Latin epic, medieval Latin, Roman culture)

## Greek, Minor

The Department offers Minors in Classical Civilization, Greek, and Latin for students who plan to follow a shorter but formally recognized program of study in Classics. The Minor program in Greek enables the students to gain an in-depth knowledge of the ancient Greek language, literature and culture. Students who minor in Greek have many of the same advantages as our majors, and benefit from being part of our inclusive community as they develop their study of classical civilization with emphasis on the Greek language and culture. Students further benefit from enhancing their critical thinking, creative and historically-informed problem-solving, which can successfully complement their majors and studies in other areas, including Humanities, Social Sciences, STEM or professional fields.

A. Complete:

GREEK 1C	Fundamentals of Greek <sup>1</sup>
----------	------------------------------------

B. Select six upper-division courses from GREEK 100-104. GREEK 120 may be substituted for one course at the 100 level.

<sup>1</sup> Students who are exempted from GREEK 1C must instead complete an additional upper-division Classics or Greek course offered by the Department.

## Latin, Minor

The Department offers Minors in Classical Civilization, Greek, and Latin for students who plan to follow a shorter but formally recognized program of study in Classics. The Minor program in Latin enables the students to gain an in-depth knowledge of the Latin language and literature and the ancient Roman culture. Students who minor in Latin have many of the same advantages as our majors, and benefit from being part of our inclusive community as they develop their study of classical civilization with emphasis on the Latin language and Roman culture. Students further benefit from enhancing their critical thinking, creative and historically-informed problem-solving, which can effectively complement their majors and studies in other areas, including Humanities, Social Sciences, STEM or professional fields.

A. Complete:

LATIN 1C	Fundamentals of Latin <sup>1</sup>
----------	------------------------------------

B. Select six upper-division courses from LATIN 100-104.

<sup>1</sup> Students who are exempted from LATIN 1C must instead complete an additional upper-division Classics or Latin course offered by the Department.

## Department of Comparative Literature

**Jane O. Newman, Department Chair**

243 Humanities Instructional Building

<http://www.humanities.uci.edu/complit/>

[complit@uci.edu](mailto:complit@uci.edu)

Comparative Literature is the study of the world through its literatures and cultures. Critical theory and translation provide frameworks for making moves: across languages, media, geographic borders, and political visions. In the Department of Comparative Literature, graduate and undergraduate students immerse themselves in national and regional literatures—of Asia, Africa, Latin America, North America, and Europe—while simultaneously placing those cultural practices within dynamic global exchanges, both historical and contemporary. Through courses, conferences, collaborative projects, and digital media, Comparative Literature at UCI advances critical cosmopolitanism—a kind of worldliness cultivated by creative engagements with power, peoples, and their symbolic practices. From novel to poetry, drama to film, monuments to political protest, comics to audio, urban space to visual culture—Comparative Literature introduces students to global cultures in the widest sense, and to the theoretical lenses essential for putting them in perspective. Writing, speaking, visualizing, blogging, social networking: through multiple media Comparative Literature students at every level interpret and engage with other academics and publics outside the academy. Together, students of Comparative Literature strive for a continually evolving practice of critical awareness and political action: a global literacy and citizenship through which to face the challenges of life and work in the 21st century.

The Department seeks to foster and maintain a lively community that includes undergraduates, graduates, and faculty, and to that end holds a variety of meetings and activities so that majors can get to know one another and other members of the Department.

- Comparative Literature, B.A.
- Comparative Literature, M.A.
- Comparative Literature, Minor
- Comparative Literature, Ph.D.

## Faculty

M. Ackbar Abbas, M.Phil. University of Hong Kong, *Professor of Comparative Literature* (Hong Kong culture and postcolonialism, visual culture, architecture and cinema, cultural theory, globalization)

Aijaz Ahmad, *Distinguished Professor of Comparative Literature* (critical theory, world literature, marxism, tricontinental social thought)

Eyal Amiran, Ph.D. University of Virginia, *Professor of Comparative Literature* (digital media theory, twentieth-century literature, narrative and textual theory, psychoanalysis, modern and postmodern intellectual history)

Alicia Cox, Ph.D. University of California, Riverside, *Assistant Professor of Comparative Literature; English* (19th-century American literature; Native American and Indigenous literature and cultural studies; gender and sexuality studies; queer Indigenous studies; Indigenous feminisms; autobiography; American Indian boarding school studies; settler colonialism)

Herschel Farbman, Ph.D. Yale University, *Department Chair and Associate Professor of Comparative Literature; French* (modernism, critical theory)

Alexander Gelley, Ph.D. Yale University, *Professor Emeritus of Comparative Literature* (eighteenth- and nineteenth-century European novel, critical theory)

David Theo Goldberg, Ph.D. The Graduate Center, City University of New York, *Director of the UC Humanities Research Institute and Professor of Comparative Literature; Anthropology; Criminology, Law and Society* (race, racism, race and the law, political theory, South Africa, digital humanities)

Susan C. Jarratt, Ph.D. University of Texas at Austin, *Professor Emerita of Comparative Literature; Education* (histories and theories of rhetoric, ancient Greek rhetoric, writing studies)

Adriana M. Johnson, Ph.D. Duke University, *Associate Professor of Comparative Literature* (Latin American literature and film, subaltern studies, postcolonial studies, politics and culture)

Steven J. Mailloux, Ph.D. University of Southern California, *Professor Emeritus of English; Comparative Literature* (rhetoric, critical theory, American literature, law and literature)

Catherine Malabou, Ph.D. Ecole des Hautes Etudes en Sciences Sociales, *UCI Distinguished Professor of Comparative Literature; French; German* (German idealism, contemporary French philosophy, cultural theory, neurobiology, epigenetics)

J. Hillis Miller, Ph.D. Harvard University, *UCI Endowed Chair and Distinguished Professor Emeritus of Comparative Literature; English* (Victorian literature, critical theory)

Liron Mor, Ph.D. Cornell University, *Assistant Professor of Comparative Literature* (literary and critical theory, contemporary Israeli and Palestinian literature and film, postcolonial theories, conflict, sympathy, questions of translation and literary adaptation)

Jane O. Newman, Ph.D. Princeton University, *Professor of Comparative Literature; English; European Languages and Studies; Religious Studies* (comparative Renaissance and early modern literature and culture [English, French, German, Italian, neo-Latin], Mediterranean Renaissance studies, Baroque, afterlives of antiquity, Walter Benjamin, Erich Auerbach, pre-modern lessons for the modern and post-modern)

Margot Norris, Ph.D. State University of New York College at Buffalo, *Professor Emerita of English; Comparative Literature* (modern Irish, British, American and continental modernism, literature and war)

Nasrin Rahimieh, Ph.D. University of Alberta, *Director of the Humanities Core Program and Howard Baskerville Professor of Comparative Literature; European Languages and Studies; Gender and Sexuality Studies* (Modern Persian literature and culture, diaspora studies, women's writing.)

John C. Rowe, Ph.D. State University of New York College at Buffalo, *Professor Emeritus of English; Comparative Literature*

Annette M. Schlichter, Ph.D. Humboldt University of Berlin, *Associate Professor Emerita of Comparative Literature* (feminist theory and criticism, queer theory, critiques of heterosexuality, contemporary American literature, gender and literature, voice studies)

Beryl F. Schlossman, Doctorate University of Paris 7, Ph.D. Johns Hopkins University, *Professor of Comparative Literature* (Modern literature, critical theory, film studies, psychoanalysis, the arts in society.)

Gabriele M. Schwab, Ph.D. University of Konstanz, *UCI Chancellor's Professor of Comparative Literature; Anthropology; Culture and Theory; English; European Languages and Studies; German* (modern literature, critical theory, psychoanalysis, comparative literature)

John H. Smith, Ph.D. Princeton University, *Professor of Comparative Literature; Culture and Theory; German; Religious Studies* (18th- and 19th-century literature and intellectual history, literary theory)

Rei Terada, Ph.D. Boston University, *Professor of Comparative Literature; Culture and Theory* (theory, poststructuralism, nineteenth- and twentieth-century poetry)

Ngugi Wa Thiong'O, B.A. Makerere University, *UCI Distinguished Professor of Comparative Literature; English* (African and Caribbean literatures, theater and film, performance studies, cultural and political theory)

Georges Y. Van Den Abbeele, Ph.D. Cornell University, *Professor of Comparative Literature; English; European Languages and Studies* (French and European philosophical literature, travel narrative and tourism/migration studies, critical theory and aesthetics, francophone literature, history of cartography, media history and theory)

## Affiliate Faculty

Elizabeth G. Allen, Ph.D. University of Michigan, *Associate Professor of English; Comparative Literature; European Languages and Studies; Religious Studies* (Chaucer, Gower, 15th century poetry; exemplary literature, romance, chronicle, episodic form; intersections between ethics and politics, politics and religion; hospitality, sovereignty, legal and constitutional history of England)

Nahum D. Chandler, Ph.D. University of Chicago, *Professor of African American Studies; Asian American Studies; Comparative Literature; English; European Languages and Studies* (modern philosophy, intellectual history, history of the human sciences)

Hu Ying, Ph.D. Princeton University, *Department Chair and Professor of Chinese; Comparative Literature* (narrative literature, translation theory, feminist theory)

Virginia W. Jackson, Ph.D. Princeton University, *Chair in Rhetoric and Communication and Associate Professor of English; Comparative Literature* (poetics, 19th, 20th and 21st century American poetry, 19th century American literature and culture, the history of literary theory)

Ketu H. Katrak, Ph.D. Bryn Mawr College, *Professor of Drama; Comparative Literature; English* (drama and performance, African drama and Ancient Sanskrit drama [from India], postcolonial literature and theory, women writers and feminist theory)

Jerry Won Lee, Ph.D. University of Arizona, *Associate Professor of English; Anthropology; Asian American Studies; Comparative Literature; Culture and Theory*

Horacio Legras, Ph.D. Duke University, *Professor of Spanish and Portuguese; Comparative Literature; Culture and Theory; European Languages and Studies* (Latin American literature and culture, Latin American film, visual arts in Latin America, psychoanalysis, and photography)

Margherita Long, Ph.D. Princeton University, *Associate Professor of Japanese; Comparative Literature* (modern Japanese literature and film, environmental humanities, feminism, eco-documentary)

Julia R. Lupton, Ph.D. Yale University, *Associate Dean for Research and Professor of English; Comparative Literature; Education; Religious Studies* (Renaissance literature, literature and psychology)

Tyrus Miller, Ph.D. Stanford University, *Dean of the School of Humanities and Professor of English; Art History; Comparative Literature; Visual Studies* (modernist and avant-garde studies in literature and visual arts; critical theory and aesthetics; modern architecture and urbanism; East-Central European studies; culture of socialism and post-socialism; Frankfurt School theory)

Carrie J. Noland, Ph.D. Harvard University, *Director of the International Center for Writing and Translation and Director of French and Professor of French; Comparative Literature* (20th-century poetry and poetics, avant-garde movements in art and literature, critical theory, performance studies)

Laura B. O'Connor, Ph.D. Columbia University, *Associate Professor of English; Comparative Literature* (Irish literature, twentieth-century poetry, Anglo-American modernism)

Rajagopalan Radhakrishnan, Ph.D. Binghamton University, State University of New York, *Distinguished Professor of English; African American Studies; Comparative Literature; Culture and Theory* (critical theory, postcoloniality, nationalisms and diasporas, poststructuralism, postmodernism, democracy and minority discourse, cultural studies, globalization and transnationalism)

Jennifer Terry, Ph.D. University of California, Santa Cruz, *Professor of Gender and Sexuality Studies; Comparative Literature* (cultural studies, social theory; science and technology studies, formations of gender and sexuality, critical approaches to modernity, American studies in transnational perspective, processes of militarization)

Tiffany Willoughby-Herard, Ph.D. University of California, Santa Barbara, *Associate Professor of African American Studies; Comparative Literature; Culture and Theory; Political Science* (South Africa, poor whites, race in foreign policy, diaspora, comparative racial politics, third world feminisms, feminist pedagogy, black political thought)

## Courses

### **COM LIT 3. Just Reading: Developing the Reading Experience . 4 Units.**

Develops the reading experience apart from writing. Develops tools for sustained attention in reading practice across a wide range of genres and media from across the globe. Students learn to appreciate elements of reading experience such as attention and perplexity.

(IV and VIII ).

### **COM LIT 8. Travels in Comparative Literature. 4 Units.**

Readings in English and in English translation on such topics as love, war, cities, travel writing, politics, fantasy and science fiction, violence.

Repeatability: Unlimited as topics vary.

(IV)

### **COM LIT 9. Introduction to Multiculturalism. 4 Units.**

Various themes and forms of literary and cultural production within a multicultural framework, including African American, Asian American, Chicano/Latino, and Native American literatures and cultures.

Repeatability: Unlimited as topics vary.

(IV, VII)

### **COM LIT 10. Topics in World Literature. 4 Units.**

Introduction to texts from across the globe and from different historical periods. Readings in English and English translation.

Repeatability: Unlimited as topics vary.

(IV and VIII ).

### **COM LIT 60A. World Literature. 4 Units.**

An introduction to the comparative study of literatures and cultures in a global context. Studies literary texts and other media across the borders of various cultures, historical periods, and traditions. All texts are read in English translation.

(IV and VIII ).

### **COM LIT 60B. Reading with Theory. 4 Units.**

Introduction to theory and methods of literary and cultural criticism in a global context. Students read theoretical approaches to literature, culture, and ideas. Marx and Freud, e.g., may be studied alongside readings in narrative poetry, film, song lyrics, novel.

(IV, VIII)

### **COM LIT 60C. Cultural Studies. 4 Units.**

Introduces students to a variety of cultural practices (literature, blogs, films, radio, comics) from across the globe. Focuses on the ways that context, genre, and medium (e.g., written, visual, oral) affect how these practices are produced, circulated, and received.

(IV, VIII)

### **COM LIT 100A. Nations, Regions, and Beyond. 4 Units.**

Intensive study of national and regional cultural and literary traditions from across the globe, among them the literary and cultural production of the Middle East, Africa, Europe, the Americas, and Asia.

Repeatability: Unlimited as topics vary.

### **COM LIT 101W. An Introduction to Translation Studies. 4 Units.**

Focuses on theories of translation and on how these theories help students understand the role of translation in the world. Students develop a critical vocabulary for discussing translation in multiple linguistic traditions and complete a final translation project.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

**COM LIT 102. Comparative Studies in Literature and Theory. 4 Units.**

In-depth discussion of special topics.

Repeatability: Unlimited as topics vary.

**COM LIT 102W. Comparative Studies in Literature and Theory. 4 Units.**

In-depth discussion of special topics.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**(Ib)**

**COM LIT 105. Topics in Comparative Multiculturalism. 4 Units.**

Treats the literatures and cultures of one or more minority groups in California and the United States, including African Americans, Asian Americans, Chicano/Latinos, and Native Americans, and their relations to other national literatures.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: May be repeated for credit unlimited times.

**COM LIT 107. Colonialisms and Postcolonialisms. 4 Units.**

Explores topics such as colonialism and race, decolonization, pre- and postcoloniality, globalization, and the cultural dynamics of colonization and subjectivity.

Repeatability: Unlimited as topics vary.

**COM LIT 108. Diasporic Literatures and Cultures. 4 Units.**

Literatures, cultures, and histories of diasporic groups, e.g., literature of the Persian diaspora; cinema of the African diaspora.

Repeatability: Unlimited as topics vary.

**COM LIT 120. Philosophy, Culture, and Literature. 4 Units.**

Discusses contemporary and historical philosophical questions and figures--for example, existentialism or debates about artificial intelligence--in interaction with culture and literature.

Repeatability: Unlimited as topics vary.

**COM LIT 121. Narrative, Pattern, and Text. 4 Units.**

Explores textual patterns, structures, and effects. May include topics such as novel, hypertext, genre, reader responses, intertextuality.

Repeatability: Unlimited as topics vary.

**COM LIT 122. Rhetorical Approaches to Literature. 4 Units.**

Studies the art and politics of rhetoric and persuasion in connection with cultural works from various times and places, for example, classical political speeches, Internet journalism.

Repeatability: Unlimited as topics vary.

**COM LIT 123. Literatures in Dialogue. 4 Units.**

Studies how texts interact across time and space in a global context. Uses concepts of influence, imitation, and parody, to ask, for example, how the Homeric epics can help us understand Caribbean novels and U.S. movies such as *Troy*.

Repeatability: Unlimited as topics vary.

**COM LIT 130. Gender, Sexuality, Race, Class. 4 Units.**

Discusses the roles of differences such as race, class, gender, and sexuality in society, culture, and literature across the globe, covering topics such as theoretical and literary representations of queer sexuality, gender performance, critical race theory.

Repeatability: Unlimited as topics vary.

**COM LIT 131. Psychoanalysis and Culture. 4 Units.**

Discusses major psychoanalytic writings of Freud and others in connection with questions of culture.

Repeatability: Unlimited as topics vary.

**COM LIT 132. Discourse, Ideologies, and Politics. 4 Units.**

Compares ideologies and systems, e.g., nationalism and fundamentalism, as they affect literature and culture in a global context.

Repeatability: Unlimited as topics vary.

**COM LIT 140. Critical Cultural Studies. 4 Units.**

Introduces a variety of ways of understanding cultural phenomena in relation to different power structures. These cultural phenomena may include comics, film, literature, sports, music, festivals, telling stories, or eating out.

Repeatability: Unlimited as topics vary.

**COM LIT 141. Topics in Popular Culture . 4 Units.**

Critical analyses of popular culture such as comics, oral narratives, films, TV, and music in an international framework.

Repeatability: Unlimited as topics vary.

**COM LIT 142. The Metropolis and Other Cultural Geographies. 4 Units.**

Examines the relationship between space and culture; cultural production in the city, suburb, and/or countryside; spaces in texts and artifacts (film, literature, comics, photographs) in a global context.

Repeatability: Unlimited as topics vary.

**COM LIT 143. Literature, Arts, and Media. 4 Units.**

Explores literature and other arts and media in a global context. May include film and electronic media, fine arts, oral cultures, architecture, in an international framework.

Repeatability: Unlimited as topics vary.

**COM LIT 144. Literature, History, and Society. 4 Units.**

Explores the relationship between literary texts and their historical and social contexts in an international framework. Courses may address, for example, literary and cultural expressions in social revolutions or the way literary texts talk back to medicine, religion, and anthropology.

Repeatability: Unlimited as topics vary.

**COM LIT 150. Literature in Translation. 4 Units.**

The study of literary works in one or more genres in English translation. May be a comparative study of works from several different original languages or a concentration on works from a single cultural/linguistic tradition.

Repeatability: Unlimited as topics vary.

**COM LIT 160. World Cinema . 4 Units.**

Comparative analysis of contemporary film in languages other than English.

Repeatability: May be taken for credit 2 times as topics vary.

**COM LIT 190W. Advanced Seminar in Comparative Literature and Theory. 4 Units.**

Capstone seminar for the Comparative Literature major. Deepens understanding of the field through investigation of a special topic and a substantial research and writing project.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: School of Humanities students only.

**(Ib)****COM LIT 199. Independent Study in Comparative Literature. 1-4 Units.**

To be taken only when the materials to be studied lie outside the normal run of departmental offerings.

Repeatability: May be repeated for credit unlimited times.

**COM LIT 200A. History of Comparative Literature and Introduction to Methods and Theories of CL. 4 Units.**

Seminar designed to introduce graduate students in Comparative Literature to the discipline of Comparative Literature. Issues and theories of comparative literary and cultural study are covered. Strongly recommended for first and second year students before the M.A. exam and review.

Restriction: Graduate students only.

**COM LIT 200B. Theories of Translation. 4 Units.**

The reproduction, translation, and transfer of literary and cultural, ideological and political, and symbolic codes and texts have long been the object of study in Comparative Literature. Addresses the diverse ways in which expressive systems interact and intersect.

Repeatability: Unlimited as topics vary.

**COM LIT 200C. Theories of Globalization, Inter-Nationalism, and Postcolonialism. 4 Units.**

Addresses both theories and the complex history of literary and cultural expression in a national, trans-, inter-, and post-national, global frame. Topics may include: globalism and nationhood, theories of citizenship and political subjecthood, postcolonial literature and theory.

Repeatability: Unlimited as topics vary.

**COM LIT 210. Comparative Studies . 4 Units.**

Studies in selected areas of Comparative Literature. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**COM LIT 220. Translation Workshop. 2-4 Units.**

Trains students in the methodologies and practice of translation. Students focus on the translating process in a series of case studies and individual projects.

Repeatability: May be taken for credit for 8 units.

**COM LIT 280A. Professionalization Seminar. 2 Units.**

The first of two required professionalization seminars in Comparative Literature. Intended for second and third year students and covers preparation for the M.A. and Ph.D. exams, conference presentations, teaching and classroom management, and publishing journals.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**COM LIT 280B. Professionalization Seminar. 2 Units.**

The second of two required professionalization seminars in Comparative Literature. Intended for fourth and fifth year students and covers course design, applying for grants, dissertation prospectus and support, and the job application process.

Prerequisite: COM LIT 280A. COM LIT 280A with a grade of B or better

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**COM LIT 290. Reading and Conference. 4-12 Units.**

Studies in selected areas. Topics addressed vary each quarter.

Repeatability: May be repeated for credit unlimited times.

**COM LIT 291. Guided Reading Course. 4 Units.**

Studies in selected areas. Topics addressed vary each quarter.

Repeatability: May be repeated for credit unlimited times.

**COM LIT 292. Teaching Practicum . 2 Units.**

Graduate students develop their pedagogical practices by accompanying a professor teaching a UCI undergraduate class. Meets individually with the professor to discuss relevant pedagogical practices, syllabus design, lecturing, assessment, classroom management, etc. Actively participates in one teaching component.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**COM LIT 299. Dissertation Research. 4-12 Units.**

A units-only course for students in the dissertation phase.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**COM LIT 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Comparative Literature, B.A.

Comparative Literature is the study of the world through its literatures and cultures. Critical theory and translation provide frameworks for making moves: across languages, media, geographic borders, and political visions.

In the Department of Comparative Literature, graduate and undergraduate students immerse themselves in national and regional literatures—of Asia, Africa, Latin America, North America, and Europe—while simultaneously placing those cultural practices within dynamic global exchanges, both historical and contemporary. Through courses, conferences, collaborative projects, and digital media, Comparative Literature at UCI advances critical cosmopolitanism—a kind of worldliness cultivated by creative engagements with power, peoples, and their symbolic practices. From novel to poetry, drama to film, monuments to political protest, comics to audio, urban space to visual culture—Comparative Literature introduces students to global cultures in the widest sense, and to the theoretical lenses essential for putting them in perspective. Writing, speaking, visualizing, blogging, social networking: through multiple media Comparative Literature students at every level interpret and engage with other academics and publics outside the academy. Together, students of Comparative Literature strive for a continually evolving practice of critical awareness and political action: a global literacy and citizenship through which to face the challenges of life and work in the 21st century.

The Department seeks to foster and maintain a lively community that includes undergraduates, graduates, and faculty, and to that end holds a variety of meetings and activities so that majors can get to know one another and other members of the Department.

### Planning a Program of Study

The Department offers close consultation for academic planning. All students should plan courses of study with faculty advisors. Students who wish to pursue double majors, special programs, or study abroad are urged to seek advising as early as possible.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

#### Department Requirements for the Major

A. Complete:

COM LIT 60A	World Literature
COM LIT 60B	Reading with Theory
COM LIT 60C	Cultural Studies

B. Complete:

COM LIT 190W	Advanced Seminar in Comparative Literature and Theory (capstone seminar)
--------------	--

C. Two additional courses selected from upper- or lower-division Comparative Literature courses or other upper-division courses offered in the School of Humanities.

D. Completion of one of the three emphases:

#### 1. Emphasis in Comparative Literature and Critical Theory

(a) Select five upper-division courses in Comparative Literature.

(b) Competence in a foreign language sufficient for reading and understanding literature and culture in that language may be demonstrated through course work in one of the following ways:

(1) Two upper-division courses in a foreign literature or culture in which texts are read in the original, or

(2) One upper-division course in a foreign literature or culture in which texts are read in the original, plus one upper-division course in a literature or culture in translation, or

(3) Students of Chinese, Japanese, and Korean take three years of language training plus one approved upper-division course in a foreign literature or culture in which texts are read in the original language or in translation, or

(4) Students of languages for which no language training is offered past 2C may take any two upper-division courses in a foreign literature or culture in translation.

(5) Students who study Greek and Latin fulfill the entire requirement by successfully completing two years of college-level language training and one upper-division course in a foreign literature or culture in translation.

An Independent Study course may substitute for any part (i.e., either a language or literature course) of the foreign language requirement upon petition to the undergraduate studies director in Comparative Literature.

## 2. Emphasis in Cultural Studies

(a) Select six upper-division courses in Comparative Literature (three of which must be from the following list):

COM LIT 105	Topics in Comparative Multiculturalism
COM LIT 130	Gender, Sexuality, Race, Class
COM LIT 132	Discourse, Ideologies, and Politics
COM LIT 140	Critical Cultural Studies
COM LIT 141	Topics in Popular Culture
COM LIT 142	The Metropolis and Other Cultural Geographies
COM LIT 143	Literature, Arts, and Media
COM LIT 144	Literature, History, and Society

## 3. Emphasis in World Literature

Select six upper-division courses in Comparative Literature (three of which must be from the following list):

COM LIT 100A	Nations, Regions, and Beyond
COM LIT 105	Topics in Comparative Multiculturalism
COM LIT 107	Colonialisms and Postcolonialisms
COM LIT 108	Diasporic Literatures and Cultures
COM LIT 123	Literatures in Dialogue
COM LIT 150	Literature in Translation <sup>1</sup>

<sup>1</sup> COM LIT 150 may be replaced with other approved foreign literature-in-translation courses offered in the Humanities.

**Residence Requirement for the Comparative Literature Major:** COM LIT 190W and four additional upper-division courses in Comparative Literature or other upper-division courses offered in the School of Humanities must be completed successfully at UCI. By petition, two of the four may be taken through the UC Education Abroad Program, providing course content is approved by the appropriate program advisor or chair.

Courses in Comparative Literature train students to read critically, to think and write analytically in a variety of genres and media, to learn languages, and to do independent research, always in a global context. This course of study helps qualify majors for careers in education, international relations, law, government, technology, communications and media, nonprofit organizations, and publishing. In recent years graduates from the Department of Comparative Literature have won Fulbrights, gone on to law school, nursing school, and master's programs in social work or psychology, and found jobs in public relations firms, done editorial work, and conducted clinical research in pharmaceutical firms. The Comparative Literature major is also excellent preparation for an academic career. Graduates have gone on to Ph.D. programs at Michigan, Cambridge, Harvard, Princeton, UCLA, UC Berkeley, and other schools. Many also teach English, world literature, and modern foreign languages at the high-school level.

# Comparative Literature, M.A.

Two features give Comparative Literature at UC Irvine its distinctive character. First, the department is committed to a conception of transnational comparatism in which the Euro-American zone is not accorded any privileged position while literatures and cultures of the Americas, Asia, Africa, and Latin America - the literatures of the colonized more generally - are accorded their rightful place. Second, the department trains its students in a range of theoretical perspectives that have been transforming scholarship over the past few decades. Ph.D. students in Comparative Literature pursue research that values lines of inquiry over pre-set national and genre categories.

The program views literary texts as one among many contexts of cultural production, such as environmental practices, rural and urban space production, and film images and visual representation. The interdisciplinary nature of the program involves reciprocal and mutually transformative relations with critical theory, informed by such well-established modes of thought as Marxism and psychoanalysis. Intensive, sustained work in critical theory is as important a part of the Ph.D. program as the study of literatures and literary pedagogies.

The M.A. is considered to be a step toward the Ph.D.; only students intending to complete the doctorate are admitted to the program. Applicants must hold a B.A. or equivalent degree and should normally have majored in Comparative Literature or another major involving cultural study. Majors in other disciplines (e.g., philosophy or history) will be considered seriously, provided that a sufficient background in literary and cultural studies and in at least one foreign language is demonstrated.

The M.A. is considered to be a step toward the Ph.D.; only students intending to complete the doctorate are admitted to the program. Applicants must hold a B.A. or equivalent degree and should normally have majored in Comparative Literature or another major involving cultural study. Majors in other disciplines (e.g., philosophy or history) will be considered seriously, provided that a sufficient background in literary and cultural studies and in at least one foreign language is demonstrated.

## Requirements

Entering students are assigned a faculty advisor who usually serves as the chair of the student's M.A. examination committee (which consists of at least two other members of the faculty). Nine courses and an examination are required to complete the degree. The normal academic load for both

M.A. and Ph.D. candidates is three courses a quarter; teaching assistants take two courses in addition to earning credit for University teaching. Only in exceptional circumstances will students be permitted to undertake programs of less than six full courses during the academic year.

### Examination

The M.A. examination is normally taken during the fifth quarter. For the examination, the candidate submits an M.A. paper and a statement of purpose outlining past and future course work and preliminary plans for the Ph.D. qualifying examination. The M.A. examination consists of a discussion of the student's paper and the statement of purpose. In practice, it resembles an extended advising session, but with particularly close attention to the student's paper.

## Comparative Literature, Minor

Comparative Literature is the study of the world through its literatures and cultures. Critical theory and translation provide frameworks for making moves: across languages, media, geographic borders, and political visions.

In the Department of Comparative Literature, graduate and undergraduate students immerse themselves in national and regional literatures—of Asia, Africa, Latin America, North America, and Europe—while simultaneously placing those cultural practices within dynamic global exchanges, both historical and contemporary. Through courses, conferences, collaborative projects, and digital media, Comparative Literature at UCI advances critical cosmopolitanism—a kind of worldliness cultivated by creative engagements with power, peoples, and their symbolic practices. From novel to poetry, drama to film, monuments to political protest, comics to audio, urban space to visual culture—Comparative Literature introduces students to global cultures in the widest sense, and to the theoretical lenses essential for putting them in perspective. Writing, speaking, visualizing, blogging, social networking: through multiple media Comparative Literature students at every level interpret and engage with other academics and publics outside the academy. Together, students of Comparative Literature strive for a continually evolving practice of critical awareness and political action: a global literacy and citizenship through which to face the challenges of life and work in the 21st century.

The Department seeks to foster and maintain a lively community that includes undergraduates, graduates, and faculty, and to that end holds a variety of meetings and activities so that majors can get to know one another and other members of the Department.

### Minor in Comparative Literature

#### Departmental Requirements for the Comparative Literature Minor

A. Complete:

COM LIT 60A	World Literature
COM LIT 60B	Reading with Theory
COM LIT 60C	Cultural Studies

B. Select three upper-division courses in Comparative Literature.

C. Select one additional upper-division course in Comparative Literature or another upper-division course offered in the School of Humanities.

**Residence Requirement for the Comparative Literature Minor:** Four upper-division courses must be completed successfully at UCI. By petition, two of the four may be taken through the UC Education Abroad Program, providing course content is approved by the appropriate program advisor or chair.

## Comparative Literature, Ph.D.

Two features give Comparative Literature at UC Irvine its distinctive character. First, the department is committed to a conception of transnational comparatism in which the Euro-American zone is not accorded any privileged position while literatures and cultures of the Americas, Asia, Africa, and Latin America - the literatures of the colonized more generally - are accorded their rightful place. Second, the department trains its students in a range of theoretical perspectives that have been transforming scholarship over the past few decades. Ph.D. students in Comparative Literature pursue research that values lines of inquiry over pre-set national and genre categories.

The program views literary texts as one among many contexts of cultural production, such as environmental practices, rural and urban space production, and film images and visual representation. The interdisciplinary nature of the program involves reciprocal and mutually transformative relations with critical theory, informed by such well-established modes of thought as Marxism and psychoanalysis. Intensive, sustained work in critical theory is as important a part of the Ph.D. program as the study of literatures and literary pedagogies.

The M.A. is considered to be a step toward the Ph.D.; only students intending to complete the doctorate are admitted to the program. Applicants must hold a B.A. or equivalent degree and should normally have majored in Comparative Literature or another major involving cultural study. Majors in other disciplines (e.g., philosophy or history) will be considered seriously, provided that a sufficient background in literary and cultural studies and in at least one foreign language is demonstrated.

The doctoral program in Comparative Literature prepares the student for a professional career in the research and teaching of comparative literary and cultural studies. Some students also choose to enter professions (e.g., specialized research, nonprofit organizations, international cultural exchange) in which the specialized work in a specific field indicated by an advanced degree is highly desirable.

Applicants must hold a B.A. or equivalent degree and should normally have majored in Comparative Literature or another major involving cultural study. Majors in other disciplines (e.g., philosophy or history) will be considered seriously, provided that a sufficient background in literary and cultural studies and in at least one foreign language is demonstrated.

## Program Details

Rather than demanding that Ph.D. students compare two national literatures, graduate students in the program may explore the internal differences of a cultural and political phenomenon or pursue a problem that exists transverse to various categories. Graduate students plan individualized course work with their advisors to prepare them for research on their chosen questions. In addition, the Department offers an emphasis in Translation Studies (see the departmental graduate student handbook for a description of this emphasis). Graduate students in Comparative Literature may also complete collaborative Ph.D.s with other selected Humanities Ph.D. programs within UCI. They may also complete campus-wide interdisciplinary emphases such as the Critical Theory Emphasis, Graduate Feminist Emphasis, Visual Studies Emphasis, and the Graduate Emphasis in Race and Justice Studies.

A minor field specialization is recommended. This optional component promotes engagement with a field or methodology outside the student's specialization. It may be of a national, historical, disciplinary, or methodological nature, with the student of western postmodern literary theory and forms engaging in a focused study of ancient Greek or Roman philosophy and culture, for example, or the student of East Asian languages and diasporic literatures may work in anthropology or ethnography. This optional component of the student's program may be fulfilled through course work, independent studies, or a Qualifying Examination topic.

Graduate students in Comparative Literature must demonstrate a command of two foreign languages consistent with their particular focus of study within the program. Competence in two foreign languages is required for the Ph.D. and is verified through examination, a longer translation project, and/or course work.

## Teaching

The Department recognizes that most of its graduate students intend to become teachers, and believes that graduate departments should be training college teachers as well as scholars—indeed, that teaching and scholarship complement one another. Thus candidates for the Ph.D. are expected to acquire experience in teaching, and all Ph.D. candidates gain supervised training as part of the seminar work required for the degree.

## Fellowships

A range of fellowships offered by UC Irvine are available to students in the Department (<https://grad.uci.edu/funding/fellowships-awards/>).

## Requirements

Normally, students who have not done graduate work at another university must complete at least 18 courses. Upon completion of the course work, the student takes a qualifying examination on four areas formulated by the student in consultation with the four faculty members who make up the examination committee. The four areas are to cover a major field, a secondary field, a special topic, and theory. All four areas are to be related to each other and to work toward the dissertation. The examination is part written, part oral, according to a formula decided by the student and the committee. The examination as a whole should reflect the student's ability to work in at least two languages.

After passing the qualifying examination, the student forms a dissertation committee of three faculty members, formulates a dissertation topic in consultation with them, and submits a prospectus for the dissertation along with a preliminary bibliography. Study toward the Ph.D. culminates in the dissertation. The normative time for advancement to candidacy is four years. The normative time for completion of the Ph.D. is seven years, and the maximum time permitted is nine years. Program advising and timelines encourage completion in six years.

# Department of East Asian Studies

### Hu Ying, Department Chair

443 Humanities Instructional Building

<http://www.humanities.uci.edu/eastasian/>

Contemporary East Asian societies are vibrant and complex, and they are heirs to rich cultural traditions that continue to inform the present. The four majors offered by the Department of East Asian Studies provide students the opportunity to explore these societies and cultures in all their diversity, and to pursue their study of East Asia across national and regional boundaries. The Department houses both undergraduate and graduate (Ph.D.) programs.

- Chinese Language and Literature, Minor
- Chinese Studies, B.A.
- Chinese Studies, Minor
- East Asian Cultures, B.A.
- East Asian Studies, Ph.D.
- Japanese Language and Literature, B.A.
- Japanese Language and Literature, Minor
- Japanese Studies, Minor

- Korean Literature and Culture, B.A.
- Korean Literature and Culture, Minor

## Faculty

Jessica Chen, M.A. California State University, Long Beach, *Lecturer of Chinese*

Hyunju Choe, M.A. University of Utah, *Lecturer of Korean*

Chungmoo Choi, Ph.D. Indiana University, *Associate Professor of Korean Culture; Religious Studies* (women's literature and film, Christianity and ethics, popular culture, anthropology)

Ryuko Flores, M.A. University of California, Los Angeles, *Lecturer of Japanese*

Edward B. Fowler, Ph.D. University of California, Berkeley, *Professor Emeritus of Japanese* (modern Japanese literature, cultural studies, film)

James A. Fujii, Ph.D. University of Chicago, *Associate Professor Emeritus of Japanese* (modern Japanese literature, human-animal relations, cultural studies)

Michael A. Fuller, Ph.D. Yale University, *Professor of East Asian Studies; Chinese; Religious Studies* (Chinese poetry and poetics, the cultural and intellectual contexts for poetry, aesthetic theory, linguistic issues in classical Chinese)

Ruohmei Hsieh, M.A. State University of New York at Stony Brook, *Academic Coordinator and Lecturer of Chinese*

Hu Ying, Ph.D. Princeton University, *Department Chair and Professor of Chinese; Comparative Literature* (narrative literature, translation theory, feminist theory)

Martin W. Huang, Ph.D. Washington University, St. Louis, *Professor of Chinese* (late imperial Chinese literature, culture, gender)

Hyunyoung Hyun, M.A. Yonsei University, *Academic Coordinator and Lecturer of Korean*

Kyung Hyun Kim, Ph.D. University of Southern California, *Professor of Korean Culture; Asian American Studies; Film and Media Studies; Visual Studies* (East Asian cinema, modern Korea, critical theory)

Susan B. Klein, Ph.D. Cornell University, *Professor of Japanese; Religious Studies* (premodern and modern theater and dance, Japanese religions, feminist critical theory)

Margherita Long, Ph.D. Princeton University, *Associate Professor of Japanese; Comparative Literature* (modern Japanese literature and film, environmental humanities, feminism, eco-documentary)

Ayako Nagai, Ph.D. University of Illinois at Urbana-Champaign, *Lecturer of Japanese*

Jon Platt, Ph.D. University of California, Berkeley, *Assistant Professor of Japanese* (Japanese literature, cinema, and sound media, environmental philosophy, ecocriticism, affect theory, new materialism, speculative realism/object oriented ontology)

Ying Y. Petersen, Ph.D. University of California, Berkeley, *Lecturer of Chinese*

Hidemi Riggs, Ph.D. University of California, Los Angeles, *Academic Coordinator and Lecturer of Japanese*

Bert Scruggs, Ph.D. University of Pennsylvania, *Associate Professor of Chinese* (Taiwanese literature, postcolonial discourse)

Eiko Sithi-Amnuai, M.A. University of Sydney, *Lecturer of Japanese*

Serk Bae Suh, Ph.D. University of California, Los Angeles, *Associate Professor of Korean* (modern Korean literature)

Elizabeth Tinsley, Ph.D. Otani University, *Assistant Professor of Religious Studies; Chinese* (Buddhism in East Asia, Japanese Buddhism, East Asian religions, Buddhist visual and textual cultures, visual theory)

## Chinese Courses

### **CHINESE 1A. Fundamental Mandarin Chinese. 5 Units.**

Natural approach emphasizing four fundamental skills: listening, speaking, reading and writing. Specifically designed for students with no previous experience in any dialect of Chinese. Conducted in Mandarin Chinese using the Pinyin system of Romanization, traditional and simplified Chinese characters.

Prerequisite: Placement into CHINESE 1A is also accepted.

Overlaps with CHINESE S1AB, CHINESE 1MA, CHINESE 1DA.

Restriction: CHINESE 1A and CHINESE 1DA and CHINESE 1MA and CHINESE S1AB may not be taken for full credit.

### **CHINESE 1B. Fundamental Mandarin Chinese. 5 Units.**

Natural approach emphasizing four fundamental skills: listening, speaking, reading and writing. Specifically designed for students with no previous experience in any dialect of Chinese. Conducted in Mandarin Chinese using the Pinyin system of Romanization, traditional and simplified Chinese characters.

Prerequisite: CHINESE 1A. CHINESE 1A with a grade of C or better. Placement into CHINESE 1B is also accepted.

Overlaps with CHINESE S1AB, CHINESE S1BC, CHINESE 1MB, CHINESE 1DB.

Restriction: CHINESE 1B and CHINESE 1DB and CHINESE 1MB and CHINESE S1AB and CHINESE S1BC may not be taken for full credit.

### **CHINESE 1C. Fundamental Mandarin Chinese. 5 Units.**

Natural approach emphasizing four fundamental skills: listening, speaking, reading and writing. Specifically designed for students with no previous experience in any dialect of Chinese. Conducted in Mandarin Chinese using the Pinyin system of Romanization, traditional and simplified Chinese characters.

Prerequisite: CHINESE 1B or CHINESE S1AB. CHINESE 1B with a grade of C or better. CHINESE S1AB with a grade of C or better. Placement into CHINESE 1C is also accepted.

Overlaps with CHINESE 1DC, CHINESE 1MC, CHINESE S1BC.

Restriction: CHINESE 1C and CHINESE 1DC and CHINESE 1MC and CHINESE S1BC may not be taken for full credit.

## **(VI)**

### **CHINESE 1MA. Fundamentals of Mandarin Chinese - Mandarin Background Track. 5 Units.**

Natural approach emphasizing four fundamental skills: listening, speaking, reading and writing. Specifically designed for students with previous background in Mandarin Chinese. Conducted in Mandarin Chinese using the Pinyin system of Romanization, traditional and simplified Chinese characters.

Prerequisite: Placement into CHINESE 1MA.

Overlaps with CHINESE 1DA, CHINESE 1A, CHINESE S1AB.

Restriction: CHINESE 1MA and CHINESE 1DA and CHINESE 1A and CHINESE S1AB may not be taken for full credit.

### **CHINESE 1MB. Fundamentals of Mandarin Chinese - Mandarin Background Track. 5 Units.**

Natural approach emphasizing four fundamental skills: listening, speaking, reading and writing. Specifically designed for students with previous background in Mandarin Chinese. Conducted in Mandarin Chinese using the Pinyin system of Romanization, traditional and simplified Chinese characters.

Prerequisite: CHINESE 1MA. CHINESE 1MA with a grade of C or better. Placement into CHINESE 1MB is also accepted.

Overlaps with CHINESE 1B, CHINESE 1DB, CHINESE S1AB, CHINESE S1BC.

Restriction: CHINESE 1MB and CHINESE 1DB and CHINESE 1B and CHINESE S1AB and CHINESE S1BC may not be taken for full credit.

**CHINESE 1MC. Fundamentals of Mandarin Chinese - Mandarin Background Track. 5 Units.**

Natural approach emphasizing four fundamental skills: listening, speaking, reading and writing. Specifically designed for students with previous background in Mandarin Chinese. Conducted in Mandarin Chinese using the Pinyin system of Romanization, traditional and simplified Chinese characters.

Prerequisite: CHINESE 1MB. CHINESE 1MB with a grade of C or better. Placement into CHINESE 1MC is also accepted.

Overlaps with CHINESE 1C, CHINESE 1DC, CHINESE S1BC.

Restriction: CHINESE 1MC and CHINESE 1DC and CHINESE 1C and CHINESE S1BC may not be taken for full credit.

**(VI)****CHINESE S1AB. Fundamentals of Mandarin Chinese. 7.5 Units.**

First half of first-year Mandarin Chinese in an intensive setting using natural approach with emphasis on listening, speaking, reading, and writing.

Prerequisite: Placement into CHINESE 1A or CHINESE 1B or CHINESE 1MA or CHINESE 1MB.

Overlaps with CHINESE 1A, CHINESE 1B, CHINESE 1MA, CHINESE 1MB.

**CHINESE S1BC. Fundamentals of Mandarin Chinese. 7.5 Units.**

Second half of first-year Mandarin Chinese in an intensive setting using natural approach with emphasis on listening, speaking, reading, and writing.

Prerequisite: CHINESE S1AB or CHINESE 1B or CHINESE 1DB or CHINESE 1MB. CHINESE S1AB with a grade of C or better. CHINESE 1B with a grade of C or better. CHINESE 1DB with a grade of C or better. CHINESE 1MB with a grade of C or better. Placement into CHINESE 1C or CHINESE 1DC or CHINESE 1MC is also accepted.

Overlaps with CHINESE 1C, CHINESE 1B, CHINESE 1DB, CHINESE 1DC, CHINESE 1MB, CHINESE 1MC.

Restriction: CHINESE S1BC, CHINESE 1B, CHINESE 1C, CHINESE 1DB or CHINESE 1DC, CHINESE 1MB or CHINESE 1MC and may not be taken for full credit.

**(VI)****CHINESE 2A. Intermediate Mandarin Chinese. 5 Units.**

Both authentic and pedagogically-prepared materials are used to further develop students' ability to communicate in culturally, socially, and linguistically appropriate manners. Taught in Chinese using Pinyin romanization system and both traditional and simplified forms of Chinese.

Prerequisite: CHINESE 1C or CHINESE S1BC or CHINESE 1MC. CHINESE 1C with a grade of C or better. CHINESE S1BC with a grade of C or better. CHINESE 1MC with a grade of C or better. Placement into CHINESE 2A is also accepted.

Overlaps with CHINESE 2DA, CHINESE 2MA.

**(VIII)****CHINESE 2B. Intermediate Mandarin Chinese. 5 Units.**

Both authentic and pedagogically-prepared materials are used to further develop students' ability to communicate in culturally, socially, and linguistically appropriate manners. Taught in Chinese using Pinyin romanization system and both traditional and simplified forms of Chinese.

Prerequisite: CHINESE 2A. CHINESE 2A with a grade of C or better. Placement into CHINESE 2B is also accepted.

Overlaps with CHINESE 2DB, CHINESE 2MB.

Restriction: CHINESE 2B and CHINESE 2DB and CHINESE 2MB may not be taken for full credit.

**(VIII)****CHINESE 2C. Intermediate Mandarin Chinese. 5 Units.**

Both authentic and pedagogically-prepared materials are used to further develop students' ability to communicate in culturally, socially, and linguistically appropriate manners. Taught in Chinese using Pinyin romanization system and both traditional and simplified forms of Chinese.

Prerequisite: CHINESE 2B. CHINESE 2B with a grade of C or better. Placement into CHINESE 2C is also accepted.

Overlaps with CHINESE 2DC, CHINESE 2MC.

Restriction: CHINESE 2C and CHINESE 2DC and CHINESE 2MC may not be taken for full credit.

**(VIII)**

**CHINESE 2MA. Intermediate Mandarin Chinese - Mandarin Background Track. 5 Units.**

Authentic and pedagogically prepared materials are used to further develop communication in culturally, socially, and linguistically appropriate manners for students with initial experience in Mandarin Chinese. Conducted in Mandarin using the Pinyin Romanization system, traditional and simplified Chinese characters.

Prerequisite: CHINESE 1MC or CHINESE S1BC. CHINESE 1MC with a grade of C or better. CHINESE S1BC with a grade of C or better. Placement into CHINESE 2MA is also accepted.

Overlaps with CHINESE 2A, CHINESE 2DA.

Restriction: CHINESE 2MA and CHINESE 2DA and CHINESE 2A may not be taken for full credit.

**(VIII)****CHINESE 2MB. Intermediate Mandarin Chinese - Mandarin Background Track . 5 Units.**

Authentic and pedagogically prepared materials are used to further develop communication in culturally, socially, and linguistically appropriate manners for students with initial experience in Mandarin Chinese. Conducted in Mandarin using the Pinyin Romanization system, traditional and simplified Chinese characters.

Prerequisite: CHINESE 2MA. CHINESE 2MA with a grade of C or better. Placement into CHINESE 2MB is also accepted.

Overlaps with CHINESE 2B, CHINESE 2DB.

Restriction: CHINESE 2MB and CHINESE 2DB and CHINESE 2B may not be taken for full credit.

**(VIII)****CHINESE 2MC. Intermediate Mandarin Chinese - Mandarin Background Track . 5 Units.**

Authentic and pedagogically prepared materials are used to further develop communication in culturally, socially, and linguistically appropriate manners for students with initial experience in Mandarin Chinese. Conducted in Mandarin using the Pinyin Romanization system, traditional and simplified Chinese characters.

Prerequisite: CHINESE 2MB. CHINESE 2MB with a grade of C or better. Placement into CHINESE 2MC is also accepted.

Overlaps with CHINESE 2C, CHINESE 2DC.

Restriction: CHINESE 2MC and CHINESE 2DC and CHINESE 2C may not be taken for full credit.

**(VIII)****CHINESE 3A. Advanced Mandarin Chinese. 4 Units.**

A continuation of CHINESE 2A-CHINESE 2B-CHINESE 2C emphasizing conceptualization, self-expression and academic skills in Chinese. Authentic texts from modern Chinese prose and newspapers are used. Taught in Mandarin Chinese using both traditional and simplified forms of Chinese characters.

Prerequisite: CHINESE 2C or CHINESE 2DC or CHINESE 2MC. CHINESE 2C with a grade of C or better. CHINESE 2DC with a grade of C or better. CHINESE 2MC with a grade of C or better. Placement into CHINESE 3A is also accepted.

**(VIII)****CHINESE 3B. Advanced Mandarin Chinese. 4 Units.**

A continuation of CHINESE 2A-CHINESE 2B-CHINESE 2C emphasizing conceptualization, self-expression, and academic skills in Chinese. Authentic texts from modern Chinese prose and newspapers are used. Taught in Mandarin Chinese using both traditional and simplified forms of Chinese characters.

Prerequisite: CHINESE 3A. CHINESE 3A with a grade of C or better

**(VIII)****CHINESE 3C. Advanced Mandarin Chinese. 4 Units.**

A continuation of CHINESE 2A-CHINESE 2B-CHINESE 2C emphasizing conceptualization, self-expression, and academic skills in Chinese. Authentic texts from modern Chinese prose and newspapers are used. Taught in Mandarin Chinese using both traditional and simplified forms of Chinese characters.

Prerequisite: CHINESE 3B. CHINESE 3B with a grade of C or better

**(VIII)**

**CHINESE 10. Peer Tutoring Program . 1 Workload Unit.**

Tutoring Program in which advanced Chinese students provide assistance to students at a lower level. One hour of tutoring per week.

Grading Option: Workload Credit P/NP Only.

Repeatability: May be taken for credit 4 times.

**CHINESE 40. Topics in Professional Chinese. 4 Units.**

Designed for students with native or near native fluency in Chinese. Develops students' language learning to professional levels with cultural and contextual knowledge and with formal communication and presentation skills.

Prerequisite: CHINESE 3C. CHINESE 3C with a grade of C or better. Native speakers also accepted.

Repeatability: May be taken for credit 3 times as topics vary.

**(VIII)**

**CHINESE 100A. Classical Chinese. 4 Units.**

Introduction to classical Chinese grammar and vocabulary with emphasis on reading basic texts.

Prerequisite: CHINESE 3C or JAPANESE 3C or KOREAN 3C

**CHINESE 100B. Classical Chinese. 4 Units.**

Introduction to classical Chinese grammar and vocabulary with emphasis on reading basic texts.

Prerequisite: CHINESE 3C or JAPANESE 3C or KOREAN 3C

**CHINESE 100C. Classical Chinese. 4 Units.**

Introduction to classical Chinese grammar and vocabulary with emphasis on reading basic texts.

Prerequisite: CHINESE 3C or JAPANESE 3C or KOREAN 3C

**CHINESE 101A. Fourth-Year Mandarin Chinese. 4 Units.**

Continued emphasis on comprehension, grammar, and proficiency in reading, composition, and conversation through intensive study and analysis of specific literary texts.

Prerequisite: CHINESE 3C

**CHINESE 101B. Fourth-Year Mandarin Chinese. 4 Units.**

Continued emphasis on comprehension, grammar, and proficiency in reading, composition, and conversation through intensive study and analysis of specific literary texts.

Prerequisite: CHINESE 3C

**CHINESE 101C. Fourth-Year Mandarin Chinese. 4 Units.**

Continued emphasis on comprehension, grammar, and proficiency in reading, composition, and conversation through intensive study and analysis of specific literary texts.

Prerequisite: CHINESE 3C

**CHINESE 115. Topics in Chinese Literature: Advanced Texts. 4 Units.**

Designed for students with near-fluency in reading Chinese. Readings may include both literary and philosophical work by important writers, but the emphasis is on literary texts and writings that interpret those texts.

Prerequisite: Consent of instructor required to enroll.

Repeatability: Unlimited as topics vary.

**CHINESE 199. Independent Study. 1-4 Units.**

Investigation of special topics through directed reading in Chinese. Paper required.

Repeatability: May be taken for credit for 12 units.

**CHINESE 201. Readings in Traditional Chinese Narrative and Prose. 4 Units.**

Close reading of selected premodern prose texts such as historical narratives, novels, short stories, and essays.

Prerequisite: CHINESE 101C

Repeatability: Unlimited as topics vary.

**CHINESE 202. Readings in Traditional Chinese Poetry. 4 Units.**

Close readings of selected premodern poetic texts.

Prerequisite: CHINESE 100C

Repeatability: Unlimited as topics vary.

**CHINESE 203. Readings in Modern Chinese Literature. 4 Units.**

Close readings of selected modern literary texts.

Prerequisite: CHINESE 101C

Repeatability: Unlimited as topics vary.

**CHINESE 204. Readings in Chinese Literary and Cultural Theory. 4 Units.**

Close readings of selected texts in premodern criticism and theory.

Prerequisite: CHINESE 100C

Repeatability: Unlimited as topics vary.

**CHINESE 211A. Studies in Traditional Chinese Narrative and Prose. 4 Units.**

Two-quarter seminar in traditional Chinese narrative and prose, with topics varying from year to year.

Prerequisite: CHINESE 100C

Repeatability: Unlimited as topics vary.

**CHINESE 211B. Studies in Traditional Chinese Narrative and Prose. 4 Units.**

Two-quarter seminar in traditional Chinese narrative and prose, with topics varying from year to year.

Prerequisite: CHINESE 211A

Repeatability: Unlimited as topics vary.

**CHINESE 212A. Studies in Traditional Chinese Poetry. 4 Units.**

Two-quarter seminar in traditional Chinese poetry, with topics varying from year to year.

Prerequisite: CHINESE 100C

Repeatability: Unlimited as topics vary.

**CHINESE 212B. Studies in Traditional Chinese Poetry. 4 Units.**

Two-quarter seminar in traditional Chinese poetry, with topics varying from year to year.

Prerequisite: CHINESE 212A

Repeatability: Unlimited as topics vary.

**CHINESE 213A. Studies in Modern Chinese Literature. 4 Units.**

Two-quarter seminar in modern Chinese literature, with topics varying from year to year. Research paper required.

Prerequisite: CHINESE 100C

Repeatability: Unlimited as topics vary.

**CHINESE 213B. Studies in Modern Chinese Literature. 4 Units.**

Two-quarter seminar in modern Chinese literature, with topics varying from year to year. Research paper required.

Prerequisite: CHINESE 213A

Repeatability: Unlimited as topics vary.

**CHINESE 214. Studies in Chinese Literature and Cultural Theory. 4 Units.**

Seminar in Chinese literature and cultural theory, with topics varying from year to year. Research paper required.

Prerequisite: CHINESE 100C or CHINESE 101C

Repeatability: Unlimited as topics vary.

**CHINESE 230. Topics in Chinese Literature and Culture. 4 Units.**

Seminar in Chinese literature and culture, with topics varying from year to year. Research paper required.

Prerequisite: CHINESE 100C or CHINESE 101A

Repeatability: Unlimited as topics vary.

**CHINESE 290. Independent Study. 4 Units.**

Directed research on topic determined in consultation with faculty member. A term paper or project is required.

Repeatability: May be repeated for credit unlimited times.

**CHINESE 299. Dissertation Research. 4-12 Units.**

Dissertation research with Chinese faculty.

Prerequisite: Advancement to Ph.D. candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## **East Asian Studies Courses**

**EAS 15C. Introductory Topics in Chinese Literature. 4 Units.**

Introduces students to major themes in Chinese literature and culture through the close reading, discussion, and analysis of selected texts in English translation.

Repeatability: Unlimited as topics vary.

Restriction: Korean Literature and Culture Majors only. Chinese Studies Majors only. Japanese Language Literature Majors only. East Asian Cultures Majors only.

**EAS 15J. Introductory Topics in Japanese Literature. 4 Units.**

Introduces students to major themes in Japanese literature and culture through the close reading, discussion, and analysis of selected texts in English translation.

Repeatability: Unlimited as topics vary.

Restriction: Korean Literature and Culture Majors only. Chinese Studies Majors only. Japanese Language Literature Majors only. East Asian Cultures Majors only.

**EAS 15K. Introductory Topics in Korean Literature. 4 Units.**

Introduces students to major themes in Korean literature and culture through the close reading, discussion, and analysis of selected texts in English translation.

Repeatability: Unlimited as topics vary.

Restriction: Korean Literature and Culture Majors only. Chinese Studies Majors only. Japanese Language Literature Majors only. East Asian Cultures Majors only.

**EAS 20. Topics in Asian Religions . 4 Units.**

An introduction to Asian religions (Hinduism, Buddhism, Confucianism, Taoism, Shamanism) including both elite doctrinal aspects and forms of more popular religiosity.

Repeatability: May be taken for credit 3 times as topics vary.

**(IV and VIII ).**

**EAS 40. Topics in East Asian Popular Culture. 4 Units.**

Selected topics in the popular cultural traditions of East Asia designed to introduce students both to problems in situating culture in a specific time and place and to contemporary theories of popular culture and their application to East Asian contexts.

Repeatability: Unlimited as topics vary.

(IV and VIII ).

**EAS 55. Introduction to East Asian Cultures . 4 Units.**

Interdisciplinary courses organized each year around a broad theme designed to introduce students to the cultures of East Asia. Topical organization of courses addresses issues that have been of importance historically and are reshaping East Asia today.

Repeatability: May be taken for credit 3 times as topics vary.

(IV and VIII ).

**EAS H84. Traveling East/West. 4 Units.**

Traveling East/West presents a wide range of travel writings by Chinese, Indian, and Euro-American authors in which they contemplate the complexities of cross-cultural encounters and how knowledge about others and knowledge of ourselves are closely intertwined.

Same as HUM H84.

Restriction: Campuswide Honors Collegium students only.

(IV)

**EAS 110. Topics in Chinese Literature and Society. 4 Units.**

Studies in Chinese texts in their social and cultural context(s). Conducted in English.

Repeatability: May be taken for credit 3 times as topics vary.

**EAS 116. Topics in East Asian Religions. 4 Units.**

Selected topics in the religions of East Asia, e.g., Buddhism, Daoism, Shintô, Christianity, popular religions.

Repeatability: May be taken for credit 3 times as topics vary.

**EAS 117. Topics in East Asian Philosophy. 4 Units.**

Selected topics in the philosophies of East Asia, e.g., Yoga, Buddhism, Vedanta, Confucianism, Taoism, and Shinto.

Repeatability: Unlimited as topics vary.

**EAS 120. Topics in Japanese Literature and Society. 4 Units.**

Studies in Japanese texts in their social and cultural context(s). Conducted in English.

Repeatability: May be taken for credit 3 times as topics vary.

**EAS 123. Structure of Japanese. 4 Units.**

An overview of the linguistic features of modern Japanese. Provides students with a systematic introduction to the nature and characteristics of the language.

Same as LSCI 165B.

**EAS 126. Topics in East Asian Linguistics. 4 Units.**

In-depth examination of selected topics in the linguistics of East Asian languages, including Chinese, Japanese, Korean, and Vietnamese.

Repeatability: May be taken for credit 3 times as topics vary.

**EAS 130. Topics in Korean Society and Culture. 4 Units.**

Studies of the social and cultural forces that affect the lives of the Koreans, including those in the United States. Considers traditional values and contemporary issues within a historical framework.

Repeatability: May be taken for credit 3 times as topics vary.

**EAS 140. Topics in Korean Literature and Society. 4 Units.**

Studies in Korean texts in their social and cultural context(s). Conducted in English.

Repeatability: May be taken for credit 3 times as topics vary.

**EAS 150. Topics in East Asian Literature in Translation. 4 Units.**

East Asian literary works in translation. Taught in English.

Repeatability: Unlimited as topics vary.

**EAS 155. Topics in Cultural Studies in East Asia. 4 Units.**

Interdisciplinary and theoretical introduction to issues in cultural studies that are pertinent to the study of East Asia. All readings in English.

Repeatability: Unlimited as topics vary.

**EAS 160. Topics in East Asian Cinema. 4 Units.**

Study of East Asian cinema from historical, theoretical, and comparative perspectives. Taught in English.

Repeatability: Unlimited as topics vary.

**EAS 170. Topics in Gender in East Asia . 4 Units.**

Explores the construction of gender in East Asian cultures and literatures. Pays close attention to the specificity of historical, cultural, and literary contexts of East Asia as it investigates various theoretical and critical perspectives on gender and sexuality.

Repeatability: Unlimited as topics vary.

**EAS 190. Junior-Senior Colloquium. 4 Units.**

Specialized courses dealing with primary sources; required reports and papers. Each colloquium reflects the instructor's intellectual interest and is conducted as a discussion group. Limited to 15 students.

Repeatability: May be taken for credit 3 times as topics vary.

Restriction: Upper-division students only. Korean Literature and Culture Majors only. Chinese Studies Majors only. Japanese Language Literature Majors only. East Asian Cultures Majors only.

**EAS 192W. Junior-Senior Seminar. 4 Units.**

Analysis of a literary or cultural topic or problem through research and writing of two short and one long research paper for a minimum of 4,000 total words. Seminar follows EAS 190; related to the colloquium's subject.

Prerequisite: EAS 190. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 3 times as topics vary.

**(Ib)****EAS 199. Independent Study. 1-4 Units.**

Investigation of special topics through directed reading in translation. Paper required.

Repeatability: May be taken for credit for 12 units.

**EAS 216. Topics in East Asian Religions . 4 Units.**

Selected topics in the religions of East Asia, e.g., Buddhism, Daoism, Shintô, Islam, shamanism.

Repeatability: May be taken for credit 3 times as topics vary.

**EAS 220. Topics in East Asian Cultural Studies. 4 Units.**

Seminar, with topics varying from year to year. Research paper required.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EAS 225. Topics in East Asian Applied Linguistics. 4 Units.**

In-depth examination of selected topics in applied linguistics, with a particular emphasis on language acquisition and language pedagogy.

Repeatability: May be taken for credit 3 times as topics vary.

Concurrent with EALL 125.

**EAS 260. Topics in East Asian Cinema. 4 Units.**

An examination of the possibilities of East Asian cinematic narrative. Possible topics: cinematic history; cinema in popular culture; comparisons with literary texts; major auteurs. Emphasis on technical as well as on thematic aspects. Includes readings in film theory.

Prerequisite: EAS 160

Repeatability: Unlimited as topics vary.

**EAS 290. Independent Study. 2-4 Units.**

Directed research on topic determined in consultation with faculty member. A term paper or project is required.

Repeatability: May be repeated for credit unlimited times.

**EAS 299. Dissertation Research. 4-12 Units.**

Dissertation research for students who are advanced to doctoral candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**EAS 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Japanese Courses

**JAPANESE 1A. Fundamental Japanese. 5 Units.**

Students develop listening, speaking, reading, and writing abilities in Japanese for meaningful communication. Content deals with daily life, society, and culture in Japan. Approximately 180 kanji (Chinese characters) are introduced in addition to the hiragana and katakana orthography.

Prerequisite: Placement into JAPANESE 1A is accepted.

Overlaps with JAPANESE S1AB.

Restriction: JAPANESE 1A and JAPANESE S1AB may not be taken for full credit.

**JAPANESE 1B. Fundamental Japanese. 5 Units.**

Students develop listening, speaking, reading, and writing abilities in Japanese for meaningful communication. Content deals with daily life, society, and culture in Japan. Approximately 180 kanji (Chinese characters) are introduced in addition to the hiragana and katakana orthography.

Prerequisite: JAPANESE 1A or JAPANESE S1AB. JAPANESE 1A with a grade of C or better. JAPANESE S1AB with a grade of C or better. Placement into JAPANESE 1B is also accepted.

Overlaps with JAPANESE S1AB, JAPANESE S1BC.

Restriction: JAPANESE 1B and JAPANESE S1AB and JAPANESE S1BC may not be taken for full credit.

**JAPANESE 1C. Fundamental Japanese. 5 Units.**

Students develop listening, speaking, reading, and writing abilities in Japanese for meaningful communication. Content deals with daily life, society, and culture in Japan. Approximately 180 kanji (Chinese characters) are introduced in addition to the hiragana and katakana orthography.

Prerequisite: JAPANESE 1B or JAPANESE S1AB. JAPANESE 1B with a grade of C or better. JAPANESE S1AB with a grade of C or better. Placement into JAPANESE 1C is also accepted.

Overlaps with JAPANESE S1BC.

Restriction: JAPANESE 1C and JAPANESE S1BC may not be taken for full credit.

(VI)

**JAPANESE S1AB. Fundamentals of Japanese. 7.5 Units.**

First half of first-year Japanese in an intensified form.

Prerequisite: Placement into JAPANESE 1A.

Overlaps with JAPANESE 1A, JAPANESE 1B.

Restriction: JAPANESE S1AB and JAPANESE 1A and JAPANESE 1B may not be taken for full credit.

**JAPANESE S1BC. Fundamentals of Japanese. 7.5 Units.**

Second half of first-year Japanese in an intensified form.

Prerequisite: JAPANESE S1AB or JAPANESE 1B. JAPANESE S1AB with a grade of C or better. JAPANESE 1B with a grade of C or better. Placement into JAPANESE 1C is also accepted.

Overlaps with JAPANESE 1C, JAPANESE 1B.

Restriction: JAPANESE S1BC and JAPANESE 1B and JAPANESE 1C may not be taken for full credit.

**(VI)**

**JAPANESE 2A. Intermediate Japanese. 5 Units.**

Japanese listening, speaking, reading, and writing abilities developed for meaningful communication. Content deals with daily life, society, and culture, including social issues in Japan. Approximately 180 kanji (Chinese characters) are introduced in addition to the 180 characters learned in 1A-B-C.

Prerequisite: JAPANESE 1C or JAPANESE S1BC. JAPANESE 1C with a grade of C or better. JAPANESE S1BC with a grade of C or better. Placement into JAPANESE 2A is also accepted.

Overlaps with JAPANESE S2AB.

Restriction: JAPANESE 2A and JAPANESE S2AB may not be taken for full credit.

**(VIII)**

**JAPANESE 2B. Intermediate Japanese. 5 Units.**

Japanese listening, speaking, reading, and writing abilities developed for meaningful communication. Content deals with daily life, society, and culture, including social issues in Japan. Approximately 180 kanji (Chinese characters) are introduced in addition to the 180 characters learned in 1A-B-C.

Prerequisite: JAPANESE 2A. JAPANESE 2A with a grade of C or better. Placement into JAPANESE 2B is also accepted.

Overlaps with JAPANESE S2AB.

Restriction: JAPANESE 2B and JAPANESE S2AB and JAPANESE S2BC may not be taken for full credit.

**(VIII)**

**JAPANESE 2C. Intermediate Japanese. 5 Units.**

Japanese listening, speaking, reading, and writing abilities developed for meaningful communication. Content deals with daily life, society, and culture, including social issues in Japan. Approximately 180 kanji (Chinese characters) are introduced in addition to the 180 characters learned in 1A-B-C.

Prerequisite: JAPANESE 2B or JAPANESE S2AB. JAPANESE 2B with a grade of C or better. JAPANESE S2AB with a grade of C or better. Placement into JAPANESE 2C is also accepted.

Overlaps with JAPANESE S2BC.

Restriction: JAPANESE 2C and JAPANESE S2BC may not be taken for full credit.

**(VIII)**

**JAPANESE S2AB. Intermediate Japanese. 7.5 Units.**

First half of second-year Japanese in an intensified form.

Prerequisite: JAPANESE 1C or JAPANESE S1BC. JAPANESE 1C with a grade of C or better. JAPANESE S1BC with a grade of C or better. Placement into JAPANESE 2A is also accepted.

Overlaps with JAPANESE 2A, JAPANESE 2B.

Restriction: JAPANESE S2AB and JAPANESE 2A and JAPANESE 2B may not be taken for full credit.

(VIII)

**JAPANESE S2BC. Intermediate Japanese. 7.5 Units.**

Second half of second-year Japanese in an intensified form.

Prerequisite: JAPANESE S2AB or JAPANESE 2B. JAPANESE S2AB with a grade of C or better. JAPANESE 2B with a grade of C or better. Placement into JAPANESE 2C is also accepted.

Overlaps with JAPANESE 2C, JAPANESE 2B.

Restriction: JAPANESE S2BC and JAPANESE 2B and JAPANESE 2C may not be taken for full credit.

(VIII)

**JAPANESE 3A. Advanced Japanese. 4 Units.**

Students are taught to conceptualize in Japanese as they learn to understand, read, write, and speak. Authentic Japanese texts are used. Approximately 360 kanji (Chinese characters) in addition to the 270 characters learned in 1A-B-C and 2A-B-C are introduced.

Prerequisite: JAPANESE 2C or JAPANESE S2BC or placement into JAPANESE 3A. JAPANESE 2C with a grade of C or better. JAPANESE S2BC with a grade of C or better.

(VIII)

**JAPANESE 3B. Advanced Japanese. 4 Units.**

Students are taught to conceptualize in Japanese as they learn to understand, read, write, and speak. Authentic Japanese texts are used. Approximately 360 kanji (Chinese characters) in addition to the 270 characters learned in 1A-B-C and 2A-B-C are introduced.

Prerequisite: JAPANESE 3A. JAPANESE 3A with a grade of C or better. Placement into JAPANESE 3B is also accepted.

(VIII)

**JAPANESE 3C. Advanced Japanese. 4 Units.**

Students are taught to conceptualize in Japanese as they learn to understand, read, write, and speak. Authentic Japanese texts are used. Approximately 360 kanji (Chinese characters) in addition to the 270 characters learned in first and second year are introduced.

Prerequisite: JAPANESE 3B. JAPANESE 3B with a grade of C or better. Placement into JAPANESE 3C is also accepted.

Restriction: Japanese Language Literature Majors have first consideration for enrollment.

(VIII)

**JAPANESE 100A. Classical Japanese. 4 Units.**

Introduction to classical Japanese grammar and vocabulary with emphasis on reading and analysis of basic texts.

Prerequisite: JAPANESE 3C. JAPANESE 3C with a grade of C or better

**JAPANESE 100B. Classical Japanese. 4 Units.**

Introduction to classical Japanese grammar and vocabulary with emphasis on reading and analysis of basic texts.

Prerequisite: JAPANESE 100A. JAPANESE 100A with a grade of C or better

**JAPANESE 101A. Fourth Year Japanese. 4 Units.**

Continued emphasis on comprehension, grammar, and proficiency in reading, composition, and conversation through intensive study and analysis of a variety of texts.

Prerequisite: JAPANESE 3C

**JAPANESE 101B. Fourth Year Japanese. 4 Units.**

Continued emphasis on comprehension, grammar, and proficiency in reading, composition, and conversation through intensive study and analysis of a variety of texts.

Prerequisite: JAPANESE 3C

**JAPANESE 115. Japanese Literature: Advanced Texts. 4 Units.**

Designed for students with near-fluency in reading Japanese. Texts include both fiction and nonfiction by important writers, and may be supplemented and contextualized where needed by literary criticism and cultural-studies texts in English.

Prerequisite: JAPANESE 101A or JAPANESE 101B or JAPANESE 101C

Repeatability: Unlimited as topics vary.

**JAPANESE 180. Topics in Japanese Literature. 4 Units.**

Special topics through directed reading in Japanese. Paper required.

Prerequisite: JAPANESE 3C. JAPANESE 3C with a grade of C or better

Repeatability: May be taken for credit 3 times as topics vary.

**JAPANESE 199. Independent Study. 1-4 Units.**

Investigation of special topics through directed reading in Japanese. Paper required.

Repeatability: May be taken for credit for 12 units.

**JAPANESE 201. Readings in Traditional Japanese Prose. 4 Units.**

Close reading of selected premodern prose texts, including tales, journals, travel journals, essays.

Prerequisite: JAPANESE 100B

Repeatability: Unlimited as topics vary.

**JAPANESE 202. Readings in Traditional Japanese Poetry or Drama. 4 Units.**

Close reading of selected premodern poetic or dramatic texts.

Prerequisite: JAPANESE 100B

Repeatability: Unlimited as topics vary.

**JAPANESE 203. Readings in Modern Japanese Literature. 4 Units.**

Texts include both fiction and nonfiction by important writers, and may be supplemented where needed by literary criticism and cultural-studies texts in English.

Prerequisite: JAPANESE 101C

Repeatability: Unlimited as topics vary.

**JAPANESE 204. Readings in Traditional Japanese Literary and Cultural Theory . 4 Units.**

Close reading of selected texts involving literary criticism and/or aesthetics.

Prerequisite: JAPANESE 100B

Repeatability: Unlimited as topics vary.

**JAPANESE 205. Readings in Japanese Religion. 4 Units.**

Close readings of selected Japanese religious texts.

Prerequisite: JAPANESE 101C

Repeatability: Unlimited as topics vary.

**JAPANESE 211A. Studies in Traditional Japanese Prose. 4 Units.**

Studies in selected areas of traditional Japanese prose. Topics addressed vary each quarter. Research paper required.

Prerequisite: JAPANESE 100B

Repeatability: Unlimited as topics vary.

**JAPANESE 211B. Studies in Traditional Japanese Prose. 4 Units.**

Studies in selected areas of traditional Japanese prose. Topics addressed vary each quarter. Research paper required.

Prerequisite: JAPANESE 100B and JAPANESE 211A

Repeatability: Unlimited as topics vary.

**JAPANESE 212A. Studies in Traditional Japanese Poetry or Drama. 4 Units.**

Studies in selected areas of traditional Japanese poetry or drama. Topics addressed vary each quarter. Research paper required.

Prerequisite: JAPANESE 100B

Repeatability: Unlimited as topics vary.

**JAPANESE 212B. Studies in Traditional Japanese Poetry or Drama. 4 Units.**

Studies in selected areas of traditional Japanese poetry or drama. Topics addressed vary each quarter. Research paper required.

Prerequisite: JAPANESE 212A

Repeatability: Unlimited as topics vary.

**JAPANESE 213A. Studies in Modern Japanese Literature. 4 Units.**

A two-quarter, in-depth look at a major author and/or issue in modern Japanese literature. Seminar format. The first quarter is devoted to reading of the requisite texts; the second quarter, to the writing of a research paper.

Prerequisite: JAPANESE 203

Repeatability: Unlimited as topics vary.

**JAPANESE 213B. Studies in Modern Japanese Literature. 4 Units.**

A two-quarter, in-depth look at a major author and/or issue in modern Japanese literature. Seminar format. The first quarter is devoted to reading of the requisite texts; the second quarter, to the writing of a research paper.

Prerequisite: JAPANESE 203 and JAPANESE 213A

Repeatability: May be repeated for credit unlimited times.

**JAPANESE 214. Studies in Japanese Literary and Cultural Theory. 4 Units.**

Studies in selected areas of Japanese literary and cultural theory. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**JAPANESE 215. Studies in Japanese Religion. 4 Units.**

Studies in selected areas of Japanese religion. Topics addressed vary each quarter. Research paper required.

Prerequisite: JAPANESE 101C

Repeatability: Unlimited as topics vary.

**JAPANESE 230. Topics in Japanese Literature and Culture. 4 Units.**

A topical study that addresses important issues in Japanese literature and culture. May focus on a specific writer or writers, or on a specific issue or set of related issues.

Prerequisite: JAPANESE 203

Repeatability: Unlimited as topics vary.

**JAPANESE 290. Independent Study. 4 Units.**

Directed research on topic determined in consultation with faculty member. A term paper or project is required.

Repeatability: May be repeated for credit unlimited times.

**JAPANESE 299. Dissertation Research. 4-12 Units.**

For Students who have been admitted to doctoral candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## Korean Courses

### **KOREAN 1A. Fundamental Korean. 5 Units.**

Natural approach with emphasis on the four fundamental skills of listening, speaking, reading, and writing for students with no previous background in Korean. Conducted in both English and Korean.

Prerequisite: Placement into KOREAN 1A.

Overlaps with KOREAN 1KA, KOREAN S1AB.

Restriction: KOREAN 1A and KOREAN 1KA and KOREAN S1AB may not be taken for full credit.

### **KOREAN 1B. Fundamental Korean. 5 Units.**

Natural approach with emphasis on the four fundamental skills of listening, speaking, reading, and writing for students with no previous background in Korean. Conducted in both English and Korean.

Prerequisite: KOREAN 1A. KOREAN 1A with a grade of C or better. Placement into KOREAN 1B is also accepted.

Overlaps with KOREAN S1BC, KOREAN 1KB, KOREAN S1AB.

Restriction: KOREAN 1B and KOREAN 1KB and KOREAN S1AB and KOREAN S1BC may not be taken for full credit.

### **KOREAN 1C. Fundamental Korean. 5 Units.**

Natural approach with emphasis on the four fundamental skills of listening, speaking, reading, and writing for students with no previous background in Korean. Conducted in both English and Korean.

Prerequisite: KOREAN 1B or KOREAN S1AB. KOREAN 1B with a grade of C or better. KOREAN S1AB with a grade of C or better. Placement into KOREAN 1C is also accepted.

Overlaps with KOREAN 1KC, KOREAN S1BC.

Restriction: KOREAN 1C and KOREAN 1KC and KOREAN S1BC may not be taken for full credit.

## **(VI)**

### **KOREAN 1KA. Fundamental Korean for Students with a Previous Background in Korean. 5 Units.**

Natural approach with emphasis on the four fundamental skills of listening, speaking, reading, and writing for students with a previous background in Korean. Conducted in both English and Korean.

Prerequisite: Placement into KOREAN 1KA.

Overlaps with KOREAN 1A, KOREAN S1AB.

Restriction: KOREAN 1KA and KOREAN 1A and KOREAN S1AB may not be taken for full credit.

### **KOREAN 1KB. Fundamental Korean for Students with a Previous Background in Korean . 5 Units.**

Natural approach with emphasis on the four fundamental skills of listening, speaking, reading, and writing for students with a previous background in Korean. Conducted in both English and Korean.

Prerequisite: KOREAN 1KA. KOREAN 1KA with a grade of C or better. Placement into KOREAN 1KB is also accepted.

Overlaps with KOREAN 1B, KOREAN S1AB, KOREAN S1BC.

Restriction: KOREAN 1KB and KOREAN 1B and KOREAN S1AB and KOREAN S1BC may not be taken for full credit.

### **KOREAN 1KC. Fundamental Korean for Students with a Previous Background in Korean. 5 Units.**

Natural approach with emphasis on the four fundamental skills of listening, speaking, reading, and writing for students with a previous background in Korean. Conducted in both English and Korean.

Prerequisite: KOREAN 1KB. KOREAN 1KB with a grade of C or better. Placement into KOREAN 1KC is also accepted.

Overlaps with KOREAN 1C, KOREAN S1BC.

Restriction: KOREAN 1KC and KOREAN 1C and KOREAN S1BC may not be taken for full credit.

## **(VI)**

**KOREAN S1AB. Fundamentals of Korean. 7.5 Units.**

First half of first-year Korean in an intensified form.

Prerequisite: Placement into KOREAN 1A or KOREAN 1KA or KOREAN 1B or KOREAN 1KB.

Overlaps with KOREAN 1A, KOREAN 1B, KOREAN 1KA, KOREAN 1KB.

Restriction: KOREAN S1AB and KOREAN 1A and KOREAN 1KA and KOREAN 1B and KOREAN 1KB may not be taken for full credit.

**KOREAN S1BC. Fundamentals of Korean. 7.5 Units.**

Second half of first-year Korean in an intensified form.

Prerequisite: KOREAN S1AB or KOREAN 1B or KOREAN 1KB. KOREAN S1AB with a grade of C or better. KOREAN 1B with a grade of C or better. KOREAN 1KB with a grade of C or better. Placement into KOREAN 1C or KOREAN 1KC is also accepted.

Overlaps with KOREAN 1C, KOREAN 1KB, KOREAN 1KC, KOREAN 1B.

Restriction: KOREAN S1BC and KOREAN 1B and KOREAN 1KB and KOREAN 1C and KOREAN 1KC may not be taken for full credit.

**(VI)****KOREAN 2A. Intermediate Korean. 5 Units.**

Designed to develop writing and reading skills as well as communicative skills in authentic situations for students without previous initial background in Korean. Students also introduced to aspects of Korean culture as related to lesson topics and basic Chinese characters.

Prerequisite: KOREAN 1C or KOREAN S1BC. KOREAN 1C with a grade of C or better. KOREAN S1BC with a grade of C or better. Placement into KOREAN 2A is also accepted.

Overlaps with KOREAN 2KA.

**(VIII)****KOREAN 2B. Intermediate Korean. 5 Units.**

Designed to develop writing and reading skills as well as communicative skills in authentic situations for students without previous initial background in Korean. Students also introduced to aspects of Korean culture as related to lesson topics and basic Chinese characters.

Prerequisite: KOREAN 2A. KOREAN 2A with a grade of C or better. Placement into KOREAN 2B is also accepted.

Overlaps with KOREAN 2KB.

**(VIII)****KOREAN 2C. Intermediate Korean. 5 Units.**

Designed to develop writing and reading skills as well as communicative skills in authentic situations for students without previous initial background in Korean. Students also introduced to aspects of Korean culture as related to lesson topics and basic Chinese characters.

Prerequisite: KOREAN 2B. KOREAN 2B with a grade of C or better. Placement into KOREAN 2C is also accepted.

Overlaps with KOREAN 2KC.

**(VIII)****KOREAN 2KA. Intermediate Korean for Students with a Previous Background in Korean . 5 Units.**

Designed to develop writing and reading skills as well as communicative skills in authentic situations for students with previous background in Korean. Students also introduced to aspects of Korean culture as related to lesson topics and basic Chinese characters.

Prerequisite: KOREAN 1KC or KOREAN S1BC. KOREAN 1KC with a grade of C or better. KOREAN S1BC with a grade of C or better. Placement into KOREAN 2KA is also accepted.

Overlaps with KOREAN 2A.

**(VIII)**

**KOREAN 2KB. Intermediate Korean for Students with a Previous Background in Korean . 5 Units.**

Designed to develop writing and reading skills as well as communicative skills in authentic situations for students with previous background in Korean. Students also introduced to aspects of Korean culture as related to lesson topics and basic Chinese characters.

Prerequisite: KOREAN 2KA. KOREAN 2KA with a grade of C or better. Placement into KOREAN 2KB is also accepted.

Overlaps with KOREAN 2B.

(VIII)

**KOREAN 2KC. Intermediate Korean for Students with a Previous Background in Korean. 5 Units.**

Designed to develop writing and reading skills as well as communicative skills in authentic situations for students with previous background in Korean. Students also introduced to aspects of Korean culture as related to lesson topics and basic Chinese characters.

Prerequisite: KOREAN 2KB. KOREAN 2KB with a grade of C or better. Placement into KOREAN 2KC is also accepted.

Overlaps with KOREAN 2C.

(VIII)

**KOREAN 3A. Advanced Korean. 4 Units.**

Focuses on developing advanced reading/writing and translation skills with additional instruction in Chinese characters.

Prerequisite: KOREAN 2C or KOREAN 2KC or KOREAN S2BC. KOREAN 2C with a grade of C or better. KOREAN 2KC with a grade of C or better. KOREAN S2BC with a grade of C or better. Placement into KOREAN 3A is also accepted.

(VIII)

**KOREAN 3B. Advanced Korean. 4 Units.**

Focuses on developing advanced reading, writing, and translation skills.

Prerequisite: KOREAN 3A or KOREAN 2C or KOREAN 2KC or KOREAN S2BC. KOREAN 3A with a grade of C or better. KOREAN 2C with a grade of C or better. KOREAN 2KC with a grade of C or better. KOREAN S2BC with a grade of C or better. Placement into KOREAN 3B is also accepted.

(VIII)

**KOREAN 3C. Advanced Korean. 4 Units.**

Focuses on developing advanced reading, writing, and translation skills.

Prerequisite: KOREAN 2C or KOREAN 2KC or KOREAN S2BC or KOREAN 3A or KOREAN 3B. KOREAN 2C with a grade of C or better. KOREAN 2KC with a grade of C or better. KOREAN S2BC with a grade of C or better. KOREAN 3A with a grade of C or better. KOREAN 3B with a grade of C or better. Placement into KOREAN 3C is also accepted.

(VIII)

**KOREAN 101A. Fourth-Year Korean. 4 Units.**

Continued emphasis on comprehension, grammar, and proficiency in reading, composition, and conversation through intensive study and analysis of a variety of modern texts.

Prerequisite: KOREAN 3A or KOREAN 3B or KOREAN 3C. KOREAN 3A with a grade of C or better. KOREAN 3B with a grade of C or better. KOREAN 3C with a grade of C or better

**KOREAN 115. Korean Literature: Advanced Texts. 4 Units.**

Designed for students with near-fluency in reading Korean. Readings include modern Korean literary works (poetry, prose, and drama) by important writers. Emphasis is on the interpretation of the texts and writings that interpret those texts in the original language.

Prerequisite: KOREAN 101A or KOREAN 101B or KOREAN 101C

Repeatability: Unlimited as topics vary.

**KOREAN 199. Independent Study. 1-4 Units.**

Investigation of special topics through directed reading in Korean. Paper required.

Repeatability: May be taken for credit for 12 units.

## Chinese Language and Literature, Minor

Minor in the Chinese program will give students foundational knowledge needed to pursue a career involving this important Pacific Rim nation. Students will be equipped with linguistic and cultural skills and be prepared in a variety of endeavors, such as international business, law, government service, journalism, teaching, and other careers involved with public affairs.

A. Three quarters of advanced Chinese language instruction, selected from the following:

CHINESE 3A	Advanced Mandarin Chinese
CHINESE 3B	Advanced Mandarin Chinese
CHINESE 3C	Advanced Mandarin Chinese
CHINESE 40	Topics in Professional Chinese
CHINESE 100A	Classical Chinese
CHINESE 100B	Classical Chinese
CHINESE 100C	Classical Chinese
CHINESE 101A	Fourth-Year Mandarin Chinese
CHINESE 101B	Fourth-Year Mandarin Chinese
CHINESE 101C	Fourth-Year Mandarin Chinese
CHINESE 115	Topics in Chinese Literature: Advanced Texts

B. Select four upper-division courses from the East Asian Studies offerings on Chinese topics.

**Residence Requirement for the Minor:** A minimum of four upper-division courses required for the minor must be completed successfully at UCI. By petition, two of the four may be taken through the UC Education Abroad Program, providing course content is approved in advance by the appropriate department chair.

## Chinese Studies, B.A.

The major in Chinese Studies offers two emphases: Chinese Language and Literature, and Chinese Culture and Society. The Language and Literature emphasis enables students to understand the extensive and rich literary, historical, social, and aesthetic achievements of China by studying its language, literature, film, religion, and other cultural accomplishments in depth. The Culture and Society emphasis stresses a multidisciplinary examination of modern Chinese culture and society that includes the perspectives of both the humanities and the social sciences. The major emphasizes the complementarity of these approaches in understanding the complexity of the forces that have shaped contemporary China.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

**All students are subject to the Language Other Than English Placement and Progression policies.**

### Departmental Requirements for the Major in Chinese Studies

#### Emphasis in Chinese Language and Literature

A. Complete:

CHINESE 3C	Advanced Mandarin Chinese <sup>1</sup>
------------	--

B. Complete:

CHINESE 100A- 100B- 100C	Classical Chinese and Classical Chinese and Classical Chinese
--------------------------	---

C. Complete:

EAS 15C	Introductory Topics in Chinese Literature
EAS 190	Junior-Senior Colloquium

D. Select one upper-division course dealing with the literature or culture of another East Asian country.

E. Select five additional courses in Chinese literature, history, art history, linguistics, professional Chinese, comparative literature, film and media, religion, gender studies, or philosophy, of which two may be lower-division courses offered by the East Asian Studies department.

<sup>1</sup> If a student is exempted from CHINESE 3C based on examination or equivalent, a course on a Chinese topic offered by the Department is required.

#### Emphasis in Chinese Culture and Society

A. Complete one of the following:

CHINESE 2C	Intermediate Mandarin Chinese
------------	-------------------------------

CHINESE 2MC or equivalent.	Intermediate Mandarin Chinese - Mandarin Background Track
B. Complete:	
HISTORY 171D- 171E	Chinese History to 1800 and Chinese History: 1800-1949
C. Complete:	
EAS 15C	Introductory Topics in Chinese Literature
EAS 190	Junior-Senior Colloquium
D. Select three upper-division courses on China offered by the Department.	
E. Select two approved upper-division courses dealing with the literature, religion, culture, history, or society of another East Asian country. <sup>1</sup>	
F. Select two approved upper-division courses in the School of Social Sciences dealing with China.	
G. Select two additional courses in Chinese language, literature, history, art history, linguistics, professional Chinese, comparative literature, film and media, religion, gender studies, or philosophy, of which one or both may be lower-division courses offered by the East Asian Studies Department. (Courses from the School of Social Sciences may be substituted with departmental approval by petition.) <sup>1</sup>	

<sup>1</sup> For a list of approved courses, please consult <http://www.humanities.uci.edu/eastasian/chinese/course/acourses2.php>

**Residence Requirement for the Major:** At least five upper-division courses required for the major must be completed successfully at UCI. Students are encouraged, however, to complete up to a year of their language study in approved programs of study abroad.

## Chinese Studies, Minor

Minoring in the Chinese program will give students foundational knowledge needed to pursue a career involving this important Pacific Rim nation. Students will be equipped with linguistic and cultural skills and be prepared in a variety of endeavors, such as international business, law, government service, journalism, teaching, and other careers involved with public affairs.

A. Complete:	
CHINESE 2C or CHINESE 2MC or equivalent	Intermediate Mandarin Chinese Intermediate Mandarin Chinese - Mandarin Background Track
B. Complete:	
EAS 55	Introduction to East Asian Cultures
C. One upper-division course in Chinese history	
D. One upper-division course on China, offered by the School of Social Sciences <sup>1</sup>	
E. One upper-division course on China, offered by the School of Humanities <sup>1</sup>	
F. Select three courses from the East Asian Studies offerings on Chinese topics, one of which may be lower-division.	

<sup>1</sup> A list of approved courses can be viewed on the East Asian Studies website (<https://www.humanities.uci.edu/eastasian/chinese/course/acourses.php>).

**Residence Requirement for the Minor:** A minimum of four upper-division courses required for the minor must be completed successfully at UCI. By petition, two of the four may be taken through the UC Education Abroad Program, providing course content is approved in advance by the appropriate department chair.

## East Asian Cultures, B.A.

The curriculum for the major in East Asian Cultures focuses on the regional dynamics of cultural and social transformations in East Asia. Students benefit from a multidisciplinary approach to the study of intra-regional relationships between East Asian countries in order to situate them in their broader global contexts. By integrating the study of East Asia with theoretical issues that shape the study of world culture in general, students gain the dual perspectives derived from examining East Asian cultures on their own terms and from recognizing the affinities these civilizations share, and the conflicts they encounter in their interactions with the rest of the world.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

**All students are subject to the Language Other Than English Placement and Progression policies.**

### **Departmental Requirements for the Major in East Asian Cultures**

A. Complete one of the following:

CHINESE 2C	Intermediate Mandarin Chinese
CHINESE 2MC	Intermediate Mandarin Chinese - Mandarin Background Track
JAPANESE 2C	Intermediate Japanese
KOREAN 2C	Intermediate Korean
KOREAN 2KC	Intermediate Korean for Students with a Previous Background in Korean

B. Select two quarters of:

EAS 155	Topics in Cultural Studies in East Asia
---------	---

C. Complete:

EAS 190	Junior-Senior Colloquium
---------	--------------------------

D. Select one of the following, corresponding to language of specialization:

EAS 15C	Introductory Topics in Chinese Literature
EAS 15J	Introductory Topics in Japanese Literature
EAS 15K	Introductory Topics in Korean Literature

E. Select eight additional courses in the areas of East Asian literature, culture, history, art history, linguistics, professional language, film and media, religion, philosophy, gender studies, or comparative literature, at least three of which must pertain to a country other than the one of language specialization, and up to two of which can be lower-division courses offered by the East Asian Studies Department. Up to four of these courses (or more by petition) may be taken outside the Department, with the approval of the undergraduate advisor.

**Residence Requirement for the Major:** At least five upper-division courses required for the major must be completed successfully at UCI. Students are encouraged, however, to complete up to a year of their language study in approved programs of study abroad.

## **East Asian Studies, Ph.D.**

The Department offers a Ph.D. program in East Asian Studies, with specializations in Chinese, Japanese, and East Asian Cultural Studies. The M.A. may be awarded to Ph.D. students in progress toward the doctoral degree.

The graduate program emphasizes rigorous training in language and textual analysis, with equal attention given to the historical, social, and cultural dimensions of literary study. In addition to more traditional vocabularies of criticism and theory, the curriculum encourages exploration of recent challenges to established conceptual and methodological frameworks. The program builds on the foundation of a faculty whose research interests engage major issues in Chinese, Japanese, and Korean literature and culture, while developing connections with the larger community of scholarship at UCI.

Because the graduate program is designed to prepare students for both college-level teaching and advanced research, each student will be required to serve, under direct faculty supervision, as a teaching assistant in an appropriate undergraduate course offered through the Department.

Assuming that a student is enrolled full-time and enters the program with no major deficiencies in background or training, the normative time needed to complete the Ph.D. is seven years from matriculation. The maximum time permitted is eight years. For students admitted with an M.A. or its equivalent from another institution, certain course requirements may be waived upon the approval of a faculty advisory committee, with a consequent reduction in normative time for completion of the Ph.D.

The following graduate emphases are available: Asian American (see the Humanities Special Programs section); Critical Theory (see the Emphasis in Critical Theory section); Feminist Studies (see the Gender and Sexuality Studies section); Latin American Studies (see the Humanities Special Programs section); Medical Humanities (see the Humanities Special Programs section); and Visual Studies (see the Visual Studies section).

### **Master of Arts in East Asian Studies**

Students are not admitted to an M.A.-only program but may be granted an M.A. in recognition of progress toward the Ph.D., normally after six quarters of course work and submission of two approved seminar papers, which will serve as the M.A. examination.

In addition to meeting the general requirements for admission to graduate study at UCI, specified by the Graduate Division, all students must present the following for review by an admissions committee composed of members of the faculty in East Asian Studies: records of prior scholastic performance, including all college transcripts; three letters of recommendation; and samples of written work. Although the Department does not require entering students to have received an undergraduate degree comparable to its own, it recommends as much preparation in an East Asian language as possible.

It also welcomes applications from students whose language training may not be as extensive but who have shown promise in the study of related disciplines. The study of appropriate European languages is encouraged as well.

Upon admission to the program, the student is assigned a graduate advisor, in consultation with whom an advisory committee consisting of two additional faculty members is constituted. The student and committee plan a program of study consisting of 15 graduate courses.

Before advancement to candidacy (normally after three years of graduate study), the student must have (1) completed required course work as detailed below; (2) prepared one paper of publishable quality; (3) completed language requirements as listed below; (4) prepared five research reports on current scholarly articles to be decided upon in consultation with the faculty advisor; and (5) passed the qualifying examinations on four topics to be selected in consultation with the faculty advisory committee no more than two quarters before the examinations are to be taken. At least one of the topics should be related directly to the student's projected area of specialization in dissertation research.

Students who complete the qualifying examinations successfully are advanced to candidacy for the Ph.D. The normative time for advancement to candidacy is four years. They then write their doctoral dissertation on a topic developed in consultation with the faculty advisory committee. Some period of study abroad, for enhancement of language proficiency and/or dissertation research, is strongly encouraged.

### Specialization in Chinese Course Requirements

Select three courses from Chinese 201-204.

Select either:

CHINESE 211A- 211B	Studies in Traditional Chinese Narrative and Prose and Studies in Traditional Chinese Narrative and Prose
or	
CHINESE 212A- 212B	Studies in Traditional Chinese Poetry and Studies in Traditional Chinese Poetry
CHINESE 213A- 213B	Studies in Modern Chinese Literature and Studies in Modern Chinese Literature
CHINESE 214	Studies in Chinese Literature and Cultural Theory

and select seven additional courses (of which one may be HUMAN 398A or HUMAN 398B) as determined upon consultation with faculty advisors. At least three of these additional courses must be taken outside the Department on a relevant topic in literary or cultural theory. Courses taken to fulfill language requirements may not be counted toward the course work requirement.

**Language Requirements.** Before advancement to candidacy, all students must have completed four years of modern Chinese, two years of classical Chinese, and three years of modern Japanese, and have demonstrated reading proficiency in another appropriate language. Much of this work may, of course, have been completed prior to admission. In addition, the requirement for a second year of classical Chinese may be fulfilled by taking three reading courses in classical literature.

### Specialization in Japanese Course Requirements

Select three courses from Japanese 201-205.

Select either:

JAPANESE 211A- 211B	Studies in Traditional Japanese Prose and Studies in Traditional Japanese Prose
or	
JAPANESE 212A- 212B	Studies in Traditional Japanese Poetry or Drama and Studies in Traditional Japanese Poetry or Drama
JAPANESE 213A- 213B	Studies in Modern Japanese Literature and Studies in Modern Japanese Literature
JAPANESE 214	Studies in Japanese Literary and Cultural Theory

and select seven additional courses (of which one may be HUMAN 398A or HUMAN 398B) as determined upon consultation with faculty advisors. At least three of these additional courses must be taken outside the Department on relevant topics in literary or cultural theory. Courses taken to fulfill language requirements may not be counted toward the course work requirement.

**Language Requirements.** Before advancement to candidacy, all students must have completed four years of modern Japanese and one year of classical Japanese, and have demonstrated reading proficiency in another appropriate language. In addition, students emphasizing classical Japanese are required to take one year of classical Chinese. Much of this work may, of course, have been completed prior to admission.

### Specialization in East Asian Cultural Studies Course Requirements

Select four Theory and Cultural Studies graduate courses

Select four graduate courses in Chinese, Japanese, or Korean

and select seven additional courses (of which one may be HUMAN 398A or HUMAN 398B) as determined upon consultation with faculty advisors. At least three of these additional courses must be taken outside the Department on relevant topics. Courses taken to fulfill language requirements may not be counted toward the course work requirement.

**Other Requirements.** Before advancement to candidacy, all students must have completed examinations in four areas as determined upon consultation with faculty advisors. These areas will vary according to the interests of the student; examples might be Colonial and Postcolonial Theories; Modernity and East Asia; Critique of Asian Studies as a field; Gender, Class and East Asia; Visual Culture and Japan; and Theorizing Minority Status in East Asia. All students must have completed four years of Chinese, Japanese, or Korean, or the equivalent. Three years or the equivalent in a second East Asian language is recommended. Much of this work may, of course, have been completed prior to admission.

## Japanese Language and Literature, B.A.

The curriculum for Japanese Language and Literature enables students to understand the extensive and rich literary, historical, social, and aesthetic achievements of Japan by studying its language, literature, film, religion, and other cultural accomplishments in depth.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

**All students are subject to the Language Other Than English Placement and Progression policies.**

### Departmental Requirements for the Major in Japanese Language and Literature

A. Complete:

JAPANESE 3C	Advanced Japanese
-------------	-------------------

B. Complete:

EAS 15J	Introductory Topics in Japanese Literature
EAS 190	Junior-Senior Colloquium

C. Select one of the following:

Two upper-division courses dealing with premodern Japanese literature or culture or

JAPANESE 100A- 100B	Classical Japanese and Classical Japanese
---------------------	---

D. Select one of the following: <sup>1</sup>

JAPANESE 101A	Fourth Year Japanese
JAPANESE 101B	Fourth Year Japanese

E. Select one upper-division course dealing with modern Japanese literature and culture

F. Select one upper-division course dealing with the literature or culture of another East Asian country

G. Select five additional courses in Japanese literature, culture, history, art history, linguistics, film and media, religion, philosophy, gender studies, or comparative literature, of which two may be lower-division courses offered by the East Asian Studies Department.

<sup>1</sup> If a student is exempted from 101, an upper-division course on a Japanese topic offered by the Department is required. JAPANESE 100A may be selected to fulfill this requirement only if the student has not selected JAPANESE 100A-JAPANESE 100B to satisfy requirement C.

**Residence Requirement for the Major:** At least five upper-division courses required for the major must be completed successfully at UCI. Students are encouraged, however, to complete up to a year of their language study in approved programs of study abroad.

## Japanese Language and Literature, Minor

Minoring in the Japanese program will give students foundational knowledge needed to pursue a career involving this important Pacific Rim nation. Students will be equipped with linguistic and cultural skills and be prepared in a variety of endeavors, such as international business, law, government service, journalism, teaching, and other careers involved with public affairs.

A. Three quarters of advanced Japanese language instruction, selected from the following:

JAPANESE 3A	Advanced Japanese
JAPANESE 3B	Advanced Japanese
JAPANESE 3C	Advanced Japanese
JAPANESE 100A	Classical Japanese
JAPANESE 100B	Classical Japanese
JAPANESE 101A	Fourth Year Japanese
JAPANESE 101B	Fourth Year Japanese
JAPANESE 115	Japanese Literature: Advanced Texts

B. Select four upper-division courses (or, if the 100A-B sequence or the 101A-B sequence has been chosen, up to two lower-division courses) from the East Asian Studies offerings on Japanese topics.

**Residence Requirement for the Minor:** A minimum of four upper-division courses required for the minor must be completed successfully at UCI. By petition, two of the four may be taken through the UC Education Abroad Program, providing course content is approved in advance by the appropriate department chair.

## Japanese Studies, Minor

Minor in the Japanese program will give students foundational knowledge needed to pursue a career involving this important Pacific Rim nation. Students will be equipped with linguistic and cultural skills and be prepared in a variety of endeavors, such as international business, law, government service, journalism, teaching, and other careers involved with public affairs.

A. Complete:

JAPANESE 2C	Intermediate Japanese (or equivalent)
-------------	---------------------------------------

B. Complete:

EAS 55	Introduction to East Asian Cultures
--------	-------------------------------------

C. One upper-division course in Japanese history

D. One upper-division course on Japan, offered by the School of Social Sciences <sup>1</sup>

E. One upper-division course on Japan, offered by the School of Humanities <sup>1</sup>

F. Select three courses from the East Asian Studies offerings on Japanese topics, one of which may be lower-division.

<sup>1</sup> A list of approved courses can be viewed on the East Asian Studies website (<http://www.humanities.uci.edu/eastasian/japanese/course/acourses.php>).

**Residence Requirement for the Minor:** A minimum of four upper-division courses required for the minor must be completed successfully at UCI. By petition, two of the four may be taken through the UC Education Abroad Program, providing course content is approved in advance by the appropriate department chair.

## Korean Literature and Culture, B.A.

The curriculum for Korean Literature and Culture enables students to understand the extensive and rich literary, historical, social, and aesthetic achievements of Korea by studying its language, literature, film, religion, and other cultural accomplishments in depth.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

**All students are subject to the Language Other Than English Placement and Progression policies.**

### Departmental Requirements for the Major in Korean Literature and Culture

A. Select one of the following:

KOREAN 3A	Advanced Korean
KOREAN 3B	Advanced Korean
KOREAN 3C	Advanced Korean

B. Complete:

EAS 15K	Introductory Topics in Korean Literature
EAS 130	Topics in Korean Society and Culture
EAS 140	Topics in Korean Literature and Society
EAS 190	Junior-Senior Colloquium

C. Select four courses in Korean literature, culture, history, art history, linguistics, film and media, religion, philosophy, gender studies, or comparative literature, of which two may be lower-division courses offered by the East Asian Studies Department.

D. Select two upper-division courses dealing with the literature or culture of another East Asian country.

E. One upper-division course dealing with Korea either in Anthropology or History.

F. Select one course from either E ASIAN 155 or any upper-division course in translated literature and culture of foreign languages offered in Comparative Literature, European Languages and Studies, or Spanish and Portuguese, or courses in literature and culture offered by the English or Asian American Studies Departments.

**Residence Requirement for the Major:** At least five upper-division courses required for the major must be completed successfully at UCI. Students are encouraged, however, to complete up to a year of their language study in approved programs of study abroad.

## Korean Literature and Culture, Minor

Minor in the Korean program will give students foundational knowledge needed to pursue a career involving this important Pacific Rim nation. Students will be equipped with linguistic and cultural skills and be prepared in a variety of endeavors, such as international business, law, government service, journalism, teaching, and other careers involved with public affairs.

A. Complete:

KOREAN 2C	Intermediate Korean
or KOREAN 2KC	Intermediate Korean for Students with a Previous Background in Korean
or equivalent	

B. Complete:

EAS 130	Topics in Korean Society and Culture
EAS 140	Topics in Korean Literature and Society

C. Select one course dealing with Korean visual culture (examples: Korean cinema, visual art)

D. Select four courses from the East Asian Studies offerings on Korean topics, one of which may be lower-division.

**Residence Requirement for the Minor:** A minimum of four upper-division courses required for the minor must be completed successfully at UCI. By petition, two of the four may be taken through the UC Education Abroad Program, providing course content is approved in advance by the appropriate department chair.

## Department of English

**Michael F. Szalay, Department Chair**

435 Humanities Instructional Building

949-824-6712

<http://www.humanities.uci.edu/english/>

The Department of English comprises undergraduate and graduate programs in literature in English; the M.F.A. Program in Writing; Literary Journalism; and Composition. Among our faculty members are theorists and literary historians, scholars of rhetoric and experts in composition, journalists, writers of fiction, and poets.

Students in the Department explore a variety of models for literary analysis. They write stories and poems. They produce journalism. In every case, our students think about writing: its history, its changing functions, and its place in today's culture. The major prepares students for a world in which informed analysis of language and forceful writing continue to be crucial.

- Creative Writing, Minor
- English, B.A.
- English, M.F.A.
- English, Minor
- English, Ph.D.
- Literary Journalism, B.A.
- Literary Journalism, Minor
- Master of English

## Faculty

Jonathan Alexander, Ph.D. Louisiana State University, *Associate Dean, Division of Undergraduate Education and Campus Writing Coordinator and Chancellor's Professor of English; Culture and Theory; Education; Gender and Sexuality Studies; Informatics* (writing studies, sexuality studies, queer theory, new media studies)

Bobbie J. Allen, Ph.D. University of Washington, *Lecturer of English*

Elizabeth G. Allen, Ph.D. University of Michigan, *Associate Professor of English; Comparative Literature; European Languages and Studies; Religious Studies* (Chaucer, Gower, 15th century poetry; exemplary literature, romance, chronicle, episodic form; intersections between ethics and politics, politics and religion; hospitality, sovereignty, legal and constitutional history of England)

Michael Andreasen, M.F.A. University of California, Irvine, *Lecturer of English*

Stephen A. Barney, Ph.D. Harvard University, *Professor Emeritus of English*

Jami Bartlett, Ph.D. University of California, Berkeley, *Associate Professor of English* (The 19th-Century Novel, literature and philosophy, narrative theory)

Alice C. Berghof, Ph.D. University of California, Irvine, *Lecturer of Humanities; English*

Emily M. Brauer, M.A. University of Southern California, *Lecturer of English*

Carol M. Burke, Ph.D. University of Maryland, College Park, *Professor Emerita of English; Religious Studies* (literary and cultural theory, literary journalism, new media studies)

Ellen S. Burt, Ph.D. Yale University, *Professor Emerita of English* (eighteenth-century French literature and nineteenth-century poetry)

James L. Calderwood, Ph.D. University of Washington, *Professor Emeritus of English*

Ronald Carlson, M.A. University of Utah, *Professor Emeritus of English* (creative writing, fiction, contemporary literature, short stories)

Nahum D. Chandler, Ph.D. University of Chicago, *Professor of African American Studies; Asian American Studies; Comparative Literature; English; European Languages and Studies* (modern philosophy, intellectual history, history of the human sciences)

Chieh L. Chieng, M.F.A. University of California, Irvine, *Lecturer of English*

Jerome C. Christensen, Ph.D. Cornell University, *Professor Emeritus of English* (Hollywood motion pictures, corporate authorship, romantic literature)

Michael P. Clark, Ph.D. University of California, Irvine, *Professor Emeritus of English*

Rachael L. Collins, Ph.D. University of California, Irvine, *Lecturer of English*

Miles Corwin, M.A. University of Missouri-Columbia, *Professor of English* (law enforcement, the criminal justice system, homicide, inner-city education, affirmative action)

Alicia Cox, Ph.D. University of California, Riverside, *Assistant Professor of Comparative Literature; English* (19th-century American literature; Native American and Indigenous literature and cultural studies; gender and sexuality studies; queer Indigenous studies; Indigenous feminisms; autobiography; American Indian boarding school studies; settler colonialism)

Keith Danner, Ph.D. University of California, Riverside, *Lecturer of English*

Rebecca Davis, Ph.D. University of Notre Dame, *Associate Professor of English; Religious Studies* (Old and Middle English literature, Piers Plowman, medieval religious culture, women's writing, medieval philosophy)

Lorene D. Delany-Ullman, M.F.A. University of California, Irvine, *Lecturer of English*

Amy Depaul, B.A. Boston University, *Lecturer of English*

Jaya Dubey, M.A. University of California, Irvine, *Lecturer of English*

Kathryn Eason, M.A. University of Colorado Boulder, *Lecturer of English*

Loren P. Eason, Ph.D. University of California, Irvine, *Lecturer of English*

Christopher Fan, Ph.D. University of California, Berkeley, *Assistant Professor of English; Asian American Studies* (transnational Asia American, 20th, and 21st century literature, speculative fiction, political economy)

Anita W. Fischer, M.A. Loyola Marymount University, *Lecturer of English*

Linda M. Georgianna, Ph.D. Columbia University, *Professor Emerita of English*

Amy Gerstler, M.F.A. Bennington College, *Professor Emerita of English* (poetry, creative writing, fiction, creative nonfiction, hybrid literature, visual art, lyric essay, art and science, women writers)

Richard Godden, Ph.D. University of Kent, *Professor of English* (20th century and contemporary American literature, Faulkner)

Kyle Grady, Ph.D. University of Michigan, *Assistant Professor of English* (early modern literature and culture, African American literature and culture, critical race theory)

Daniel Gross, Ph.D. University of California, Berkeley, *Professor of English* (emotion studies, history and theory of rhetoric, early modern literature and culture, Heidegger and rhetoric)

Alberto D. Gullaba, M.F.A. University of California, Irvine, *Lecturer of English*

Linda G. Haas, Ph.D. University of South Florida, *Lecturer of English*

Martin Harries, Ph.D. Yale University, *Professor of English* (20th century theater, critical theory)

Erika Hayasaki, B.A. University of Illinois at Urbana–Champaign, *Associate Professor of English* (literary journalism in the digital age, narrative nonfiction, immersion journalism, youth, culture, crime, poverty, health, science, education, urban affairs, death)

Rebeca Louise Helfer, Ph.D. Columbia University, *Associate Professor of English; European Languages and Studies* (Renaissance literature and culture, memory, Spenser)

Andrea K. Henderson, Ph.D. University of Pennsylvania, *Professor of English* (19th century literature, literature and visual arts, literature and science)

John W. Hollowell, Ph.D. University of Michigan, *Professor of Teaching Emeritus of English*

Oren J. Izenberg, Ph.D. Johns Hopkins University, *Associate Professor of English* (poetics, modern and contemporary poetry, 20th century literature and culture, philosophy and literature)

Virginia W. Jackson, Ph.D. Princeton University, *Chair in Rhetoric and Communication and Associate Professor of English; Comparative Literature* (poetics, 19th, 20th and 21st century American poetry, 19th century American literature and culture, the history of literary theory)

Joseph Jonghyun Jeon, Ph.D. University of California, Berkeley, *Professor of English; Asian American Studies; Culture and Theory* (Asian-American literature, film modernism)

Ketu H. Katrak, Ph.D. Bryn Mawr College, *Professor of Drama; Comparative Literature; English* (drama and performance, African drama and Ancient Sanskrit drama [from India], postcolonial literature and theory, women writers and feminist theory)

Charlene J. Keeler, M.A. California State University, Fullerton, *Lecturer of English*

Jonathan I. Keeperman, M.F.A. University of California, Irvine, *Lecturer of English*

Tarah M. Keeperman, M.A. University of California, Irvine, *Lecturer of English*

Douglas V. Kiklowicz, M.F.A. University of California, Irvine, *Lecturer of English*

Peter O. Krapp, Ph.D. University of California, Santa Barbara, *Professor of Film and Media Studies; English; European Languages and Studies; Informatics; Music; Visual Studies* (digital culture, media history, cultural memory)

P. Michelle Latiolais, M.F.A. University of California, Irvine, *Professor of English* (creative writing, fiction, contemporary literature)

Karen R. Lawrence, Ph.D. Columbia University, *Professor Emerita of English*

Rodrigo Lazo, Ph.D. University of Maryland, College Park, *Associate Professor of English; Culture and Theory* (hemispheric American studies, nineteenth century, Latino studies and the Americas, Cuba, immigrant literature)

James K. Lee, Ph.D. University of California, Los Angeles, *Associate Professor of Asian American Studies; Culture and Theory; English; Religious Studies* (Asian American literature and culture, contemporary U.S. literature, race and ethnic studies, urban studies, religious studies)

Jerry Won Lee, Ph.D. University of Arizona, *Associate Professor of English; Anthropology; Asian American Studies; Comparative Literature; Culture and Theory*

Julia Hyoun Joo Lee, Ph.D. University of California, Los Angeles, *Department Chair and Associate Professor of Asian American Studies; Culture and Theory; English* (Asian American literature and culture, African American literature and culture, ethnic literature, twentieth-century American literature.)

Jayne Elizabeth Lewis, Ph.D. Princeton University, *Director of Humanities Honors Program and Professor of English; European Languages and Studies; Religious Studies* (literature and medicine, restoration and 18th century British literature, literature of the supernatural and gothic fiction, history and/of fiction, atmosphere as literary concept and construct within natural philosophy)

Julia R. Lupton, Ph.D. Yale University, *Associate Dean for Research and Professor of English; Comparative Literature; Education; Religious Studies* (Renaissance literature, literature and psychology)

Juliet F. MacCannell, Ph.D. Cornell University, *Professor Emerita of English*

Steven J. Mailloux, Ph.D. University of Southern California, *Professor Emeritus of English; Comparative Literature* (rhetoric, critical theory, American literature, law and literature)

Theodore Martin, Ph.D. University of California, Berkeley, *Associate Professor of English; Culture and Theory* (Contemporary literature, genre fiction, literary history, crime, and the novel)

Annie McClanahan, Ph.D. University of California, Berkely, *Associate Professor of English; Culture and Theory* (U.S. culture, the novel, political and economic theory)

Gregory J. McClure, M.F.A. University of California, Irvine, *Lecturer of English*

Lowell B. McKay, M.F.A. University of California, Irvine, *Lecturer of English*

James L. McMichael, Ph.D. Stanford University, *Professor Emeritus of English*

John Miles, Ph.D. Harvard University, *Professor Emeritus of English; Religious Studies* (religion, literature, international relations, western scriptures [Jewish, Christian, Muslim] as literature; religious poetry and music, religion, science, and the environment)

J. Hillis Miller, Ph.D. Harvard University, *UCI Endowed Chair and Distinguished Professor Emeritus of Comparative Literature; English* (Victorian literature, critical theory)

Tyrus Miller, Ph.D. Stanford University, *Dean of the School of Humanities and Professor of English; Art History; Comparative Literature; Visual Studies* (modernist and avant-garde studies in literature and visual arts; critical theory and aesthetics; modern architecture and urbanism; East-Central European studies; culture of socialism and post-socialism; Frankfurt School theory)

Ian Andrew Munro, Ph.D. Harvard University, *Associate Professor of Drama; English* (European drama and performance, early modern popular culture, theatrical performance of wit)

Jane O. Newman, Ph.D. Princeton University, *Professor of Comparative Literature; English; European Languages and Studies; Religious Studies* (comparative Renaissance and early modern literature and culture [English, French, German, Italian, neo-Latin], Mediterranean Renaissance studies, Baroque, afterlives of antiquity, Walter Benjamin, Erich Auerbach, pre-modern lessons for the modern and post-modern)

Robert W. Newsom, Ph.D. Columbia University, *Professor Emeritus of English*

Margot Norris, Ph.D. State University of New York College at Buffalo, *Professor Emerita of English; Comparative Literature* (modern Irish, British, American and continental modernism, literature and war)

Laura B. O'Connor, Ph.D. Columbia University, *Associate Professor of English; Comparative Literature* (Irish literature, twentieth-century poetry, Anglo-American modernism)

Robert L. Peters, Ph.D. University of Wisconsin-Madison, *Professor Emeritus of English*

Bradley A. Queen, Ph.D. Boston University, *Associate Professor of Teaching of English*

Rajagopalan Radhakrishnan, Ph.D. Binghamton University, State University of New York, *Distinguished Professor of English; African American Studies; Comparative Literature; Culture and Theory* (critical theory, postcoloniality, nationalisms and diasporas, poststructuralism, postmodernism, democracy and minority discourse, cultural studies, globalization and transnationalism)

Barbara L. Reed, Ph.D. Indiana University, *Associate Professor of Teaching Emerita of English*

Hugh J. Roberts, Ph.D. McGill University, *Associate Professor of English* (romantic literature, Shelley, literature and science, chaos theory and literature, politics and literature)

John C. Rowe, Ph.D. State University of New York College at Buffalo, *Professor Emeritus of English; Comparative Literature*

Michael Ryan, Ph.D. University of Iowa, *Professor of English; Religious Studies* (American literature, creative writing, poetry, poetics, autobiography)

Edgar T. Schell, Ph.D. University of California, Berkeley, *Professor Emeritus of English*

Gabriele M. Schwab, Ph.D. University of Konstanz, *UCI Chancellor's Professor of Comparative Literature; Anthropology; Culture and Theory; English; European Languages and Studies; German* (modern literature, critical theory, psychoanalysis, comparative literature)

Gretchen K. Short, Ph.D. University of California, Irvine, *Lecturer of Humanities; English*

Barry E. Siegel, M.S. Columbia University, *Professor of English* (literary journalism, English)

Victoria A. Silver, Ph.D. University of California, Los Angeles, *Professor of English; Religious Studies* (early modern literature and culture, religious studies, history and theory of rhetoric, literature and philosophy)

Richard A. Sims, M.F.A. University of California, Irvine, *Lecturer of English*

James Steintrager, Ph.D. Columbia University, *Director of the Emphasis in Critical Theory and Professor of English; European Languages and Studies* (eighteenth-century comparative literature, ethical philosophy and literature, systems theory, amatory and erotic fiction)

Michael F. Szalay, Ph.D. Johns Hopkins University, *Department Chair and Professor of English; Film and Media Studies; Visual Studies* (contemporary television and literature)

Ngugi Wa Thiong'O, B.A. Makerere University, *UCI Distinguished Professor of Comparative Literature; English* (African and Caribbean literatures, theater and film, performance studies, cultural and political theory)

Brook Thomas, Ph.D. University of California, Santa Barbara, *UCI Chancellor's Professor Emeritus of English* (U.S. literature and culture, law and literature, literature and history)

Introduction to criticism and aesthetics for beginning graduate students. Readings from continental, English, and American theorists.

Same as HUMAN 220B.

Restriction: Graduate students only.

### **CRITISM 240. Advanced Theory Seminar. 4 Units.**

Studies in selected areas of Criticism Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

## English Courses

### **ENGLISH 8. Multicultural American Literature. 4 Units.**

Writings from at least two historically underrepresented groups in California and the United States with particular attention to historical conditions of literary production. Considers in-depth how literary works relate to racial constructions, economic conditions, and/or social movements.

(IV and VII ).

**ENGLISH 9. Shakespeare. 4 Units.**

Plays by William Shakespeare are used to explore the playwright's poetic gifts, theatrical imagination, and inquiry into human relationships and the human condition.

(IV)

**ENGLISH 10. Topics in English and American Literature. 4 Units.**

Explores the diversity of human expression manifested in selected works of literature. By engaging with substantial literary texts, students will think critically about how meaning is created and how experience is interpreted in literary language.

Repeatability: May be taken for credit 3 times as topics vary.

(IV)

**ENGLISH 10B. Topics in English and American Literature. 4 Units.**

Linked with Writing 39B. Explores the diversity of human expression manifested in selected works of literature. By engaging with substantial literary texts, students think critically about how meaning is created and how experience is interpreted in literary language.

Corequisite: WRITING 39B

Repeatability: May be taken for credit 3 times as topics vary.

Overlaps with ENGLISH 10.

(IV)

**ENGLISH 11. Society, Law, and Literature. 4 Units.**

Examines how works of literature represent and influence the relation between law and society. The primary readings will be works of literature, but selections of works of law, politics, and sociology may also be assigned.

(III or IV ).

**ENGLISH 11C. Society, Law, and Literature. 4 Units.**

Linked with Writing 39C. Explores how works of literature represent and influence the relation between law and society. The primary readings are works of literature, but selections of works of law, politics, and sociology may also be assigned.

Corequisite: WRITING 39C

Overlaps with ENGLISH 11.

(III or IV ).

**ENGLISH 12. Young Adult Fiction . 4 Units.**

Young adult fiction studied in historical context, including the publishing industry and mass marketing, as well as education and literacy. Primary readings will focus on young adult fiction, but works of history, advertising, and film will also be included.

(IV)

**ENGLISH 15. Introductory Seminar in English: Topics in Literary Studies. 4 Units.**

Discussion-based seminar on a faculty-chosen topic that introduces majors and those considering a major in English to interpretive methodologies and critical frameworks that characterize the field of English studies.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: English Majors have first consideration for enrollment.

**ENGLISH 16. The Craft of Poetry. 4 Units.**

Reading of selected texts to explore the ways in which these modes formulate experience. Students write several short analytic papers. Requires creative writing.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(IV)

**ENGLISH 17. The Craft of Fiction. 4 Units.**

Reading of selected texts to explore the ways in which these modes formulate experience. Students write several short analytic papers. Requires creative writing.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(IV)

**ENGLISH H80. Sanctuary: Medieval and Modern. 4 Units.**

Principles and significance of the practice of legal sanctuary in medieval English history, literature, and religion. Development of modern use of churches and other safe spaces in the American Civil Rights movement, immigrant sanctuary movements, and international asylum.

Restriction: Campuswide Honors Collegium students only.

(III or IV ).

**ENGLISH H81. What is a Person?. 4 Units.**

Contemporary debates about personhood in law, culture, and society. Beginning with the emergence of ideas of personhood in philosophy and theology, and culminating in the study of highly contested cases: slavery, abortion law, animal rights, corporate personhood, and artificial intelligence.

Restriction: Campuswide Honors Collegium students only.

(III)

**ENGLISH 100. Introduction to Literary Theory. 4 Units.**

Using Plato and Aristotle as points of departure, addresses a range of perspectives and problems in literary theory. To be taken by English majors in the junior year.

Prerequisite: Three courses selected from ENGLISH 8, ENGLISH 9, ENGLISH 10, ENGLISH 11, ENGLISH 12, ENGLISH 15, ENGLISH 16, ENGLISH 17, LIT JRN 20, LIT JRN 21.

**ENGLISH 101W. Undergraduate Seminar in Critical Writing: Topics in Literary History. 4 Units.**

Each instructor identifies a topic within literary history; special attention is given to mastering the conventions of academic argument and expression. To be taken as early as possible in the junior year.

Prerequisite: Three courses selected from ENGLISH 8, ENGLISH 9, ENGLISH 10, ENGLISH 11, ENGLISH 12, ENGLISH 15, ENGLISH 16, ENGLISH 17; or LIT JRN 20 and LIT JRN 21 and one course selected from the above list. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only. English Majors have first consideration for enrollment.

(Ib)

**ENGLISH 102A. Topics in Medieval and Renaissance Literature. 4 Units.**

Studies of works representative of Medieval and Renaissance literature in English, with attention to literary history, treating at a minimum more than one author and more than one genre.

Prerequisite: Three courses selected from ENGLISH 8, ENGLISH 9, ENGLISH 10, ENGLISH 11, ENGLISH 12, ENGLISH 15, ENGLISH 16, ENGLISH 17. Or LIT JRN 20 and LIT JRN 21 and one course selected from the above list.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only. English Majors have first consideration for enrollment.

**ENGLISH 102B. Topics in Restoration and 18th-Century Literature . 4 Units.**

Studies of works representative of Restoration and 18th-century literature in English, with attention to literary history, treating at a minimum more than one author and more than one genre.

Prerequisite: Three courses selected from ENGLISH 8, ENGLISH 9, ENGLISH 10, ENGLISH 11, ENGLISH 12, ENGLISH 15, ENGLISH 16, ENGLISH 17. Or LIT JRN 20 and LIT JRN 21 and one course selected from the above list.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only. English Majors have first consideration for enrollment.

**ENGLISH 102C. Topics in Romantic and 19th-Century Literature. 4 Units.**

Studies of works representative of Romantic and 19th-century literature in English, with attention to literary history, treating at a minimum more than one author and more than one genre.

Prerequisite: Three courses selected from ENGLISH 8, ENGLISH 9, ENGLISH 10, ENGLISH 11, ENGLISH 12, ENGLISH 15, ENGLISH 16, ENGLISH 17. Or LIT JRN 20 and LIT JRN 21 and one course selected from the above list.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only. English Majors have first consideration for enrollment.

**ENGLISH 102D. Topics in 20th-Century Literature. 4 Units.**

Studies of works representative of 20th-century literature in English, with attention to literary history, treating at a minimum more than one author and more than one genre.

Prerequisite: Three courses selected from ENGLISH 8, ENGLISH 9, ENGLISH 10, ENGLISH 11, ENGLISH 12, ENGLISH 15, ENGLISH 16, ENGLISH 17. Or LIT JRN 20 and LIT JRN 21 and one course selected from the above list.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only. English Majors have first consideration for enrollment.

**ENGLISH 103. Topics in Literature, Theory, and Criticism. 4 Units.**

A series of lectures on and discussions of announced topics in literary criticism, theory, history, genres, modes, major authors.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Recommended: Upper-division students only.

**ENGLISH 105. Multicultural Topics in Literatures in English. 4 Units.**

Focuses on ethnic or minority literatures, or treats issues related to race and cultural identity.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Recommended: Upper-division students only.

**ENGLISH 106. Advanced Seminar: Topics in English Literature . 4 Units.**

Capstone course. Provides intensive work on a topic within the area of literatures in English with particular attention to the theoretical, critical, or conceptual issues it raises, with the goal of producing a substantive research paper.

Prerequisite: (ENGLISH 101W or WRITING 101W) and (ENGLISH 100 and 102A) or (ENGLISH 100 and 102B) or (ENGLISH 100 and 102C) or (ENGLISH 100 and 102D) or (ENGLISH 102A and 102B) or (ENGLISH 102A and 102C) or (ENGLISH 102A and 102D) or (ENGLISH 102B and 102C) or (ENGLISH 102C and 102D) or (ENGLISH 103 and 102A) or (ENGLISH 103 and 102B) or (ENGLISH 103 and 102C) or (ENGLISH 103 and 102D) or (ENGLISH 105 and 102A) or (ENGLISH 105 and 102B) or (ENGLISH 105 and 102C) or (ENGLISH 105 and 102D) or (ENGLISH 100 and 103) or (ENGLISH 103 and 105) or (ENGLISH 100 and 105).

Repeatability: Unlimited as topics vary.

Restriction: Seniors only. English Majors have first consideration for enrollment.

**ENGLISH 150. Topics in Literature for Nonmajors . 4 Units.**

Major texts in English, American, and Comparative Literature explored for basic humanistic issues and themes, on announced topics. Primarily for upper-division students, but not requiring previous training in literature.

Repeatability: Unlimited as topics vary.

Restriction: Recommended: Upper-division students only.

**ENGLISH 160. Topics in English Language Film and TV. 4 Units.**

Focuses on the analysis of film and/or television traditions in the English-speaking world, from a historical, theoretical, or comparative perspective.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Upper-division students only.

**ENGLISH 198. Special Topics. 4 Units.**

Directed group study of selected topics as arranged by instructor.

Repeatability: May be repeated for credit unlimited times.

**ENGLISH 199. Independent Study. 1-4 Units.**

To be taken only when the materials to be studied lie outside the normal run of departmental offerings, and when the student will have no formal chance to pursue the subject. Research paper required.

Repeatability: May be repeated for credit unlimited times.

**ENGLISH 210. Studies in Literary History. 4 Units.**

Studies in selected areas of literary history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**ENGLISH 225. Studies in Literary Genres. 4 Units.**

Studies in selected areas of literary genres. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**ENGLISH 230. Studies in Major Writers. 4 Units.**

Studies in selected areas of major writers. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**ENGLISH 255. Graduate Workshop in Academic Publishing. 4 Units.**

Reading and critique of student-authored essays with the goal of producing a publishable essay. Instructor leads discussion, meets with students individually, and provides an introduction to appropriate venues for publication and the process of submission, peer review, and revision.

Grading Option: Satisfactory/unsatisfactory only.

**ENGLISH 290. Reading and Conference. 4-12 Units.**

Studies in selected areas. Topics addressed vary each quarter.

Repeatability: May be repeated for credit unlimited times.

**ENGLISH 291. Guided Reading Course. 4 Units.**

Studies in selected areas. Topics addressed vary each quarter.

**ENGLISH 299. Dissertation Research. 4-12 Units.**

A units-only course for students in the dissertation phase.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**ENGLISH 398. Rhetoric/Teaching of Composition. 4 Units.**

Readings, lectures, and internship designed to prepare graduate students to teach composition. Formal instruction in rhetoric and practical work in teaching methods and grading.

**ENGLISH 399. University Teaching. 4 Units.**

A units-only course for students appointed as teaching assistants or associates.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Literary Journalism Courses

### **LIT JRN 20. Introduction to Literary Journalism. 4 Units.**

Reading of selected texts to explore the ways in which literary journalism and related nonfiction modes formulate experience. Students complete a range of writing projects.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Literary Journalism Majors have first consideration for enrollment.

#### **(IV)**

### **LIT JRN 21. Reporting for Literary Journalism. 4 Units.**

Instruction and hands-on training in how to interview, report, research, and collect the types of information needed to write literary journalism.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Literary Journalism Majors have first consideration for enrollment.

### **LIT JRN 100. Advanced Reporting. 4 Units.**

Practical engagement with advanced reporting techniques of Literary Journalism, emphasizing the importance of thorough and effective research in the production of high-quality journalistic writing. Prepares students to make good decisions about where and how to publish their writing.

Prerequisite: LIT JRN 21

### **LIT JRN 101A. Studies in the History, Theory, and Ethics of Literary Journalism. 4 Units.**

Lectures and discussion on topics that explore the historical and theoretical dimensions of literary journalism, with particular emphasis on the evolution of ethics in the field.

Prerequisite: LIT JRN 21 and LIT JRN 20 and (ENGLISH 28A or ENGLISH 28B or ENGLISH 28C or ENGLISH 28D or ENGLISH 28E or COM LIT 60A or COM LIT 60B or COM LIT 60C or ENGLISH 8 or ENGLISH 10 or ENGLISH 11 or ENGLISH 12 or ENGLISH 15 or ENGLISH 16 or ENGLISH 17)

### **LIT JRN 101BW. Literary Journalism Core Writing Workshop. 4 Units.**

Writing workshops in announced specialized genres that students will both study and practice. Examples include 'The Memoir,' 'Review Writing,' 'The Editorial,' 'Writing Biography,' 'The Profile,' and 'Political Writing.'

Prerequisite: LIT JRN 101A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 3 times as topics vary.

Restriction: Upper-division students only. Students may enroll in one LITJ 101BW course per quarter.

#### **(Ib)**

### **LIT JRN 103. Lectures on Topics in Literary Journalism. 4 Units.**

A series of lectures on, and discussions of, announced topics in literary journalism and the literature of fact. Examples include 'Travel Literary Journalism'; 'Literature of True Crime'; 'Narratives in the Digital Age'; 'Journalism on the Edge'.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Recommended: Upper-division students only.

### **LIT JRN 197. Community Reporting . 4 Units.**

Directed group study in which students work with an instructor to report and write about community news in a newsroom-style format. Students will partner with local publications to pitch, market, and publish their stories.

Prerequisite: Satisfactory completion of lower-division writing requirement.

Repeatability: May be repeated for credit unlimited times.

### **LIT JRN 198. Special Topics. 4 Units.**

Directed group study of selected topics.

Repeatability: Unlimited as topics vary.

**LIT JRN 199. Reading and Conference. 1-4 Units.**

To be taken only when the materials to be studied lie outside the normal run of departmental offerings.

Repeatability: May be repeated for credit unlimited times.

## Writing Courses

**WRITING 30. The Art of Writing: Poetry. 4 Units.**

Beginners' workshop in the writing of poetry, evaluation of student manuscripts, and parallel readings.

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

Repeatability: May be taken for credit 2 times.

(Ia)

**WRITING 31. The Art of Writing: Prose Fiction. 4 Units.**

Beginners' workshop in fiction writing, evaluation of student manuscripts, and parallel readings.

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

Repeatability: May be taken for credit 2 times.

(Ia)

**WRITING 37. Intensive Writing. 6 Units.**

Critical reading and analysis conducted through literary, academic, journalistic, and fictional genres with additional instruction in paragraph development and sentence-level mechanics. Students analyze and apply rhetorical principles in a range of writing assignments.

Prerequisite: Students must have taken the UC Analytical Writing Placement Examination.

Grading Option: Letter Grade only.

Overlaps with WRITING 39A, WRITING 39B.

(Ia)

**WRITING 39A. Introduction to Writing and Rhetoric. 4 Units.**

Introduction to the principles of rhetoric through readings and writing assignments across a range of genres, including fiction, non-fiction, journalism and academic essays. Rigorous instruction in composition and style, including organization, paragraph development, and sentence-level mechanics.

Prerequisite: Placement via the UC Analytical Writing Placement Examination is required.

Grading Option: Letter Grade only.

Overlaps with WRITING 37, WRITING 39AP.

**WRITING 39AP. Introduction to Writing and Rhetoric with Lab. 6 Units.**

Introduces the principles of rhetoric through readings and writing assignments across a range of genres. Rigorous instruction in composition and style. Designed for students seeking additional English language support.

Prerequisite: Students must have taken the UC Analytical Writing Placement Examination and the Academic English Placement Test.

Grading Option: Letter Grade only.

Overlaps with WRITING 39A, WRITING 37.

**WRITING 39B. Critical Reading and Rhetoric. 4 Units.**

Critical reading and analysis conducted through literary, academic, journalistic, and fictional genres. Students analyze and apply rhetorical principles in a range of writing assignments.

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

Overlaps with WRITING 37.

(Ia)

**WRITING 39C. Argument and Research. 4 Units.**

Intensive instruction in research methods, argumentation, and rhetorical invention. Readings selected from current nonfiction and materials located by students from the University library's holdings, to include databases across a range of disciplines.

Prerequisite: WRITING 37 or WRITING 39B or AP36 or AP37. WRITING 37 with a grade of C or better. WRITING 39B with a grade of C or better. AP36 with a minimum score of 4. AP37 with a minimum score of 4

**(Ia)**

**WRITING 90. Intermediate Poetry Writing. 4 Units.**

Intermediate workshop in the writing of poetry, evaluation of student manuscripts, and parallel readings.

Prerequisite: WRITING 30

Repeatability: May be taken for credit 2 times.

**WRITING 91. Intermediate Fiction Writing. 4 Units.**

Intermediate workshop in the writing of fiction, evaluation of student manuscripts, and parallel readings.

Prerequisite: WRITING 31

Repeatability: May be taken for credit 2 times.

**WRITING 101W. Undergraduate Seminar: Applications in Literary Theory and Criticism for Creative Writing. 4 Units.**

Readings in literature, with discussions and written rhetorical responses on their making.

Prerequisite: (WRITING 30 or WRITING 31) and (WRITING 90 or WRITING 91) and (WRITING 30 or WRITING 31 or WRITING 90 or WRITING 91 or ENGLISH 16 or ENGLISH 17). Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: English Majors only. Literary Journalism Majors only.

**(Ib)**

**WRITING 110. Short Story Writing. 4 Units.**

Three-hour workshop in short fiction; discussion of student writing and of relevant literary texts.

Repeatability: May be taken for credit 2 times.

**WRITING 111. Poetry Writing. 4 Units.**

Three-hour advanced poetry writing workshop; discussion of student writing and of relevant literary texts.

Repeatability: May be taken for credit 2 times.

**WRITING 113. Novel Writing. 4 Units.**

Three-hour advanced workshop in fiction writing; discussion of student writing and of relevant literary texts.

**WRITING 139W. Advanced Expository Writing. 4 Units.**

Study of rhetoric, disciplinary genres, and modes of knowledge production; practice in writing effective prose. Essays of varying lengths, totaling at least 4,000 words.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only.

**(Ib)**

**WRITING 197. Writing Internship . 2-4 Units.**

Internships focused on writing. In consultation with a faculty advisor, students create a course from response essays, research essays, and assessment project data. Internships may include editing and publication projects, supervised teaching and tutoring assignments, community literacy projects.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**WRITING 250A. Graduate Writers' Workshop (Fiction). 4 Units.**

Graduate fiction workshop open to students enrolled in the MFA program in Writing.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

**WRITING 250B. Graduate Writers' Workshop (Fiction). 4 Units.**

Graduate fiction workshop open to students enrolled in the MFA program in Writing.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

**WRITING 250C. Graduate Writers' Workshop (Poetry). 8 Units.**

Graduate poetry workshop open to students enrolled in the M.F.A. Programs in Writing.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

**WRITING 251A. Writing in Conference (Fiction). 4 Units.**

Graduate fiction workshop open to students enrolled in the MFA program in Writing.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

**WRITING 251B. Writing in Conference (Fiction). 4 Units.**

Graduate fiction workshop open to students enrolled in the MFA program in Writing.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

**WRITING 251C. Writing in Conference (Poetry). 8 Units.**

Graduate poetry workshop open to students enrolled in the M.F.A. Programs in Writing.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

## Creative Writing, Minor

The Department of English offers a minor in Creative Writing open to undergraduates across the UCI campus, giving them the opportunity to receive instruction and practice in the craft of prose fiction and poetry, and to learn the literary tradition of these art forms in English. The minor consists of workshop courses, writing courses, and literature courses, which serve to provide a foundation for students who wish to pursue creative writing professionally, as well as for those who have an amateur interest in the art.

Students who wish to minor in Creative Writing must submit an online form, available on the English Department website, in order to register for the minor, so that their coursework can be tracked for credit. Both majors and non-majors should contact the Department in order to receive further information about its requirements and schedules.

A. Select three of the following: <sup>1</sup>

WRITING 30

The Art of Writing: Poetry

WRITING 31

The Art of Writing: Prose Fiction

WRITING 90	Intermediate Poetry Writing
WRITING 91	Intermediate Fiction Writing
B. Complete two WRITING 101W courses with different topics	
C. Select two of the following:	
ENGLISH 102A	Topics in Medieval and Renaissance Literature
ENGLISH 102B	Topics in Restoration and 18th-Century Literature
ENGLISH 102C	Topics in Romantic and 19th-Century Literature
ENGLISH 102D	Topics in 20th-Century Literature
ENGLISH 103	Topics in Literature, Theory, and Criticism
ENGLISH 105	Multicultural Topics in Literatures in English
LIT JRN 103	Lectures on Topics in Literary Journalism

<sup>1</sup> Students can substitute one from ENGLISH 16 or ENGLISH 17 for the lower-division requirement.

**Residence Requirement for the Minor:** Four upper-division courses must be completed successfully at UCI. By petition, two of the four may be taken through the UC Education Abroad Program, providing course content is approved in advance by the department undergraduate chair.

## English, B.A.

This major seeks to introduce students to the entire range of literatures written in English, from British and American to African, Asian, and Australasian literatures. The major emphasizes the differences among historical periods and various genres, and encourages exploration of a broad range of literary theories. It also offers students the opportunity to do significant work in Creative Writing.

### B.A. in English

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

A. Select three of the following, at least one of which must be ENGLISH 15 <sup>1</sup>

ENGLISH 8	Multicultural American Literature
ENGLISH 9	Shakespeare
ENGLISH 10	Topics in English and American Literature
ENGLISH 11	Society, Law, and Literature
ENGLISH 12	Young Adult Fiction
ENGLISH 15	Introductory Seminar in English: Topics in Literary Studies
ENGLISH 16	The Craft of Poetry
ENGLISH 17	The Craft of Fiction

B. Complete the following:

ENGLISH 100	Introduction to Literary Theory
ENGLISH 101W	Undergraduate Seminar in Critical Writing: Topics in Literary History

C. Complete the following:

ENGLISH 102A	Topics in Medieval and Renaissance Literature
ENGLISH 102B	Topics in Restoration and 18th-Century Literature
ENGLISH 102C	Topics in Romantic and 19th-Century Literature
ENGLISH 102D	Topics in 20th-Century Literature
ENGLISH 105	Multicultural Topics in Literatures in English
ENGLISH 106	Advanced Seminar: Topics in English Literature

D. Select at least three more Departmental (English, Literary Journalism, Writing) courses numbered 102 or above, excluding ENGLISH 150, LIT JRN 197, LIT JRN 198, LIT JRN 199, WRITING 139W, and WRITING 197. An upper-division course in a foreign literature in the original language or in translation may be substituted for one of the three courses.

<sup>1</sup> ENGLISH 10 and ENGLISH 15 may be taken more than once as topics vary.

**Residence Requirement for the English Major:** ENGLISH 100, ENGLISH 101W, two ENGLISH 102s, and ENGLISH 106 must be completed successfully at UCI.

## B.A. in English with a Specialization in English for Future Teachers

All students must meet the University Requirements.

All students must meet the School Requirements.

A. Select three of the following, at least one of which must be ENGLISH 15 <sup>2</sup>

ENGLISH 8	Multicultural American Literature
ENGLISH 9	Shakespeare
ENGLISH 10	Topics in English and American Literature
ENGLISH 11	Society, Law, and Literature
ENGLISH 12	Young Adult Fiction
ENGLISH 15	Introductory Seminar in English: Topics in Literary Studies
ENGLISH 16	The Craft of Poetry
ENGLISH 17	The Craft of Fiction

B. Complete the following:

ENGLISH 100	Introduction to Literary Theory
ENGLISH 101W	Undergraduate Seminar in Critical Writing: Topics in Literary History

C. Complete the following:

ENGLISH 102A	Topics in Medieval and Renaissance Literature
ENGLISH 102B	Topics in Restoration and 18th-Century Literature
ENGLISH 102C	Topics in Romantic and 19th-Century Literature
ENGLISH 102D	Topics in 20th-Century Literature
ENGLISH 106	Advanced Seminar: Topics in English Literature

D. Complete two ENGLISH 105 courses with different topics.

E. Select at least two more Departmental (English, Literary Journalism, Writing) courses numbered 102 or above, excluding ENGLISH 150, LIT JRN 197, LIT JRN 198, LIT JRN 199, WRITING 139W, and WRITING 197. An upper-division course in a foreign literature in the original language or in translation may be substituted for one of the two courses. <sup>1</sup>

F. Select one from following:

EDUC 108	Adolescent Development and Education
EDUC 124	Multicultural Education in K-12 Schools
EDUC 128	Exceptional Learners
EDUC 131	Educational Technology
EDUC 173	Cognition and Learning in Educational Settings
EDUC 176	Psychology of Learning, Abilities, and Intelligence

G. Complete at least two units of field work from EDUC 100, WRITING 197, or other relevant experience with prior departmental approval.

<sup>1</sup> Foreign literature-in-translation courses are offered in Classics, Comparative Literature, East Asian Studies, French and Italian, German, and Spanish and Portuguese. COM LIT 150 and COM LIT 160, EAS 160, FLM&MDA 160, FRENCH 160, GERMAN 160, JAPANESE 180, KOREAN 180, and SPANISH 160 when appropriate, also qualify as foreign language literature-in-translation courses.

<sup>2</sup> ENGLISH 10 and ENGLISH 15 may be taken more than once as topics vary.

**Residence Requirement for the English Major:** ENGLISH 100, ENGLISH 101W, two ENGLISH 102s, and ENGLISH 106 must be completed successfully at UCI.

Students should plan coherent programs of study with their faculty advisors, including undergraduate seminars, workshops and seminars in writing (for students choosing a Literary Journalism major or Creative Writing minor), and courses in allied areas outside the Department. It is possible to combine a cluster of courses in literature with other majors in the sciences and social sciences, and to use an English or Literary Journalism major as preprofessional training in government, law, or medicine. Students who wish advice in planning such programs should consult both the Department and people in their prospective professional areas.

A student who intends to continue with graduate work is urged to study a second foreign language before graduation.

Students are also encouraged to take advantage of the opportunity to study abroad through the UC Education Abroad Program. Visit the Study Abroad Center website (<http://www.studyabroad.uci.edu/>) or an academic counselor for additional information.

The study of literature helps students express their ideas clearly, do independent research, and think analytically and imaginatively. These capabilities will help qualify majors for careers in education, law, technical writing, communications, journalism, public relations, business, marketing, and management. Departmental advisors encourage their students to investigate various career options before completing their undergraduate educations.

The Division of Career Pathways provides services to students and alumni including career counseling, information about job opportunities, a career library, and workshops on resume preparation, job search, and interview techniques. See the Division of Career Pathways website (<http://career.uci.edu/>) for additional information.

English, M.F.A.

The aim of the MFA Programs in Writing at the University of California, Irvine is the training of accomplished writers who intend to make writing their life. What the program expects of its students is passionate precision, character, and stamina. What the program wants most for its students is that each will sooner or later write something that lasts. To facilitate such writing, the faculty keeps the program small in order to ensure the high quality of the students, as well as to permit teaching on a one-to-one basis and to allow students to consult frequently with the faculty and staff for assistance with their work. Workshops in fiction and poetry are at the core of this two-to-three-year program. From over five hundred applicants, a maximum of twelve new students are enrolled each year. Graduates of the Programs in Writing receive a Master of Fine Arts (MFA) degree in English.

Each quarter the candidate will be enrolled in either the poetry or fiction section of the Graduate Writers' Workshop, which will constitute two-thirds of a course load, the other course to be selected in consultation with the student's advisor. It is expected that M.F.A. candidates will complete at least one supervised teaching seminar.

In addition to course work, the candidate is required to present as a thesis an acceptable book-length manuscript of poetry or short stories or a novel. The normative time for completion of the M.F.A. is three years, and the maximum time permitted is four years.

English, Minor

The English minor offers students in other majors an opportunity to study the global literatures written in English—British and American, African, Asian and Australasian—from historical, cultural, and theoretical perspectives. It attends to literary forms, their evolution and traditions, while emphasizing the diversity of literature's motives, occasions, influences and effects. Along with the considerable pleasure of reading the myriad expressions of literary art in English, what humanity has to say about itself over centuries and continents, the minor provides a substantial education in critical analysis and argument.

A. Select three of the following:

ENGLISH 8	Multicultural American Literature
ENGLISH 9	Shakespeare
ENGLISH 10	Topics in English and American Literature
ENGLISH 11	Society, Law, and Literature
ENGLISH 12	Young Adult Fiction
ENGLISH 15	Introductory Seminar in English: Topics in Literary Studies
ENGLISH 16	The Craft of Poetry
ENGLISH 17	The Craft of Fiction

B. Select at least five Departmental (English, Literary Journalism, Writing) courses numbered 102 or above, excluding ENGLISH 150, LIT JRN 197, LIT JRN 198, LIT JRN 199, WRITING 139W, and WRITING 197. Two courses from the following may be substituted:

ENGLISH 100	Introduction to Literary Theory
ENGLISH 101W	Undergraduate Seminar in Critical Writing: Topics in Literary History
WRITING 101W	Undergraduate Seminar: Applications in Literary Theory and Criticism for Creative Writing

**Residence Requirement for the English Minor:** Four upper-division courses must be completed successfully at UCI. By petition, two of the four may be taken through the UC Education Abroad Program, providing course content is approved in advance by the department undergraduate chair.

English, Ph.D.

The Ph.D. program in English at UCI is the #1 department for literary and critical theory nationally (US News and World Report). The research and teaching of department faculty represents and cuts across a range of fields, historical periods, and methodological approaches. Our graduates have gone on (<https://www.humanities.uci.edu/english/graduate/placement.php>) to faculty positions at a range of nationally ranked colleges and universities, including, in recent years, the University of Michigan, Tulane, Rice, Clemson, BYU, and Connecticut College.

Many of our Ph.D. faculty and students participate jointly in collaborative, interdisciplinary research clusters and reading groups. Some groups currently active include The Center for Early Cultures (<https://www.humanities.uci.edu/earlycultures/>), the Culture and Capital Center, Medieval Devysings (<https://sites.uci.edu/medievaldevysings/>), Poetics | History | Theory (<https://www.humanities.uci.edu/poeticshistorytheory/>), the Queer Theory Reading Group, and the Rhetoric Reading Group. Our Ph.D. program allows students to customize their study and research around their own intellectual interests. Students can also take seminars in other programs and departments, and can receive interdisciplinary certificates in Asian American studies (<https://www.humanities.uci.edu/aas/graduate/emphasis.php>), Chicano/Latino Studies (<https://www.humanities.uci.edu/aas/graduate/emphasis.php>),

[www.chicanolatinostudies.uci.edu/grad/emphasis.php](http://www.chicanolatinostudies.uci.edu/grad/emphasis.php)), Critical Theory (<https://www.humanities.uci.edu/critical/programs/cte.php>), Gender and Sexuality Studies (<https://www.humanities.uci.edu/genderandsexualitystudies/graduate/>), Latin American Studies (<https://www.humanities.uci.edu/las/graduate/>), Medical Humanities (<https://www.humanities.uci.edu/centermedicalhumanities/curriculum/emphasis.php>), Rhetoric and Composition (<https://www.humanities.uci.edu/english/graduate/rhetoric.php>), and Visual Studies (<https://www.humanities.uci.edu/visualstudies/program/emphasis.php>)

All admitted students receive a multi-year funding package, including a range of teaching opportunities. Students may enter the graduate program in English with either a B.A. or an M.A. In either case, the first two years are spent taking courses, completing the language requirement, and writing the M.A. paper. In the third year, students select two or three fields of study for their qualifying exams - exam lists are developed by the student in consultation with their advisor and are intended to help the student build expertise and confidence toward a future dissertation. After successfully completing the qualifying examination, students write a dissertation under the supervision of a three-person dissertation committee, which they select.

Applicants for graduate degrees in English must submit scores for the Graduate Record Examination (GRE). Ordinarily, students are not admitted to the English program unless they plan to continue, and are qualified to continue, to the Ph.D. Students are admitted to the M.F.A. program chiefly on the basis of submitted creative work.

Specific requirements for the graduate degrees will be established by consultation between members of the faculty and the candidate. First-year graduate students or candidates for the Master of Fine Arts in English (fiction/poetry) plan a program with an assigned advisor; candidates for the Ph.D. plan with an advisor and three-person committee. At the time of the M.A. examination, the Graduate Committee evaluates the student's graduate career up to that point and offers advice about future prospects. Candidates for literary degrees are also encouraged to study philosophy, history, foreign languages and literatures, and the fine arts.

Only in exceptional circumstances will students be permitted to undertake programs of less than six full courses during the academic year. The normal expectation is enrollment in three courses each quarter; Teaching Assistants take two courses in addition to earning credit for University Teaching. Students who are not teaching should be able to complete course work in two years. The Ph.D. qualifying examination should be taken within a couple of quarters after courses are finished. The normative time for completion of the Ph.D. in English is seven years.

The program for the Ph.D. in English requires about two years of full-time enrollment in regular courses beyond the B.A.; proficiency in the reading of one acceptable foreign language, modern or classical; satisfactory performance on designated examinations; and the dissertation.

The languages acceptable depends upon the nature of the student's program as determined by the student's advisors. Reading competence in this language must be established in the first year of residence. Competence in the language required for the Ph.D. is verified through examination.

Upon completion of course work the student is examined in three areas: (1) a primary field; (2) a secondary field; and (3) theory and/or criticism.

Upon satisfactorily completing this Qualifying Examination, the student is admitted to candidacy for the degree. As soon after completion of the Qualifying Examination as is practical, the student presents a dissertation prospectus for the approval of the doctoral committee. After submitting a full dissertation to their committee members, students will be required to pass an oral dissertation defense with their doctoral committee prior to filing the dissertation and graduating. All work for the Ph.D. degree must be in courses limited to graduate students. The normative time for advancement to candidacy is four years. The normative time for completion of the Ph.D. is seven years, and the maximum time permitted is nine years.

The Murray Krieger Fellowship in Literary Theory is intended for an outstanding entering graduate student who is pursuing the Ph.D. in English or Comparative Literature and who demonstrates a primary interest in theory as theory relates to literary texts. A range of other fellowships is also available to students in the Department.

### **Emphasis in Creative Nonfiction**

Students admitted to the emphasis in Creative Nonfiction must meet all course, language, and examination requirements for the Ph.D. in English. Their course work must include: 1) three writing workshops in nonfiction; 2) three courses in nonfictional literature or rhetoric; and 3) if needed for the projected dissertation, one course outside the Department.

Students must also conduct a dissertation defense.

## **Literary Journalism, B.A.**

This major was created to meet the needs of a growing number of students who wish to read, study, and write nonfiction prose that has transcended the limits of daily journalism. This is prose that has evolved into a distinct branch of literature, prose that adopts the aims and techniques of the finest fiction. The program provides majors with a solid foundation in nonfiction writing and an equally solid background in areas such as literary history, which together will help make students more informed writers. A Literary Journalism minor is also offered.

Literary Journalism majors take three intensive writing seminars, and are expected to develop a portfolio of work by graduation which they can present as evidence of their skill for purposes of employment or future education. At the same time, majors are asked to take a comprehensive look at the theory, history, and context of literary journalism. Among other forms, they study and write narratives, memoirs, profiles, histories, and personal essays, in subject areas as varied as science, politics, justice, travel, sports, food, and popular culture.

While it differs from an applied journalism major that focuses primarily on newspaper writing, the major in Literary Journalism is excellent preparation for students planning to enter graduate programs in journalism, as well as for those interested in the many careers requiring sophisticated writing and communication skills.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

A. Complete:

LIT JRN 20	Introduction to Literary Journalism
LIT JRN 21	Reporting for Literary Journalism
LIT JRN 100	Advanced Reporting

B. Select one course from the following: <sup>1</sup>

ENGLISH 8	Multicultural American Literature
ENGLISH 9	Shakespeare
ENGLISH 10	Topics in English and American Literature
ENGLISH 11	Society, Law, and Literature
ENGLISH 12	Young Adult Fiction
ENGLISH 15	Introductory Seminar in English: Topics in Literary Studies
ENGLISH 16	The Craft of Poetry
ENGLISH 17	The Craft of Fiction

C. Complete:

ENGLISH 105	Multicultural Topics in Literatures in English
-------------	--

D. Complete:

LIT JRN 101A	Studies in the History, Theory, and Ethics of Literary Journalism
LIT JRN 101BW	Literary Journalism Core Writing Workshop (three times, on various topics)

E. Select at least three more Departmental (English, Literary Journalism, Writing) courses numbered 102 or above (excluding ENGLISH 150, LIT JRN 197, LIT JRN 198, LIT JRN 199, WRITING 139W, and WRITING 197). An upper-division course in a foreign literature in the original language or in translation may be substituted for one of the three courses.

F. Two upper-division History courses in a single regional or thematic focus area.

<sup>1</sup> Students can substitute COM LIT 60A or COM LIT 60C for the lower-division English course requirement.

**Residence Requirement for the Literary Journalism Major:** LIT JRN 20, LIT JRN 21, LIT JRN 100, LIT JRN 101A, and three LIT JRN 101BW courses must be completed successfully at UCI.

Students should plan coherent programs of study with their faculty advisors, including undergraduate seminars, workshops and seminars in writing (for students choosing a Literary Journalism major or Creative Writing minor), and courses in allied areas outside the Department. It is possible to combine a cluster of courses in literature with other majors in the sciences and social sciences, and to use an English or Literary Journalism major as preprofessional training in government, law, or medicine. Students who wish advice in planning such programs should consult both the Department and people in their prospective professional areas.

A student who intends to continue with graduate work is urged to study a second foreign language before graduation.

Students are also encouraged to take advantage of the opportunity to study abroad through the UC Education Abroad Program. Visit the Study Abroad Center website (<http://www.studyabroad.uci.edu/>) or an academic counselor for additional information.

The study of literature helps students express their ideas clearly, do independent research, and think analytically and imaginatively. These capabilities will help qualify majors for careers in education, law, technical writing, communications, journalism, public relations, business, marketing, and management. Departmental advisors encourage their students to investigate various career options before completing their undergraduate educations.

The Division of Career Pathways provides services to students and alumni including career counseling, information about job opportunities, a career library, and workshops on resume preparation, job search, and interview techniques. See the Division of Career Pathways website (<http://career.uci.edu/>) for additional information.

## Literary Journalism, Minor

The Literary Journalism minor was created for students who wish to study literary journalism as a complement to another major within or outside of the Humanities. Literary Journalism minors are asked to take a comprehensive look at the theory, history, and context of literary journalism. Among other forms, they study narratives, memoirs, profiles, histories, and personal essays, in subject areas as varied as science, politics, justice, travel, sports, food,

and popular culture. The minor is excellent preparation for students interested in the many careers requiring sophisticated writing and communication skills.

A. Complete:

LIT JRN 20	Introduction to Literary Journalism
LIT JRN 21	Reporting for Literary Journalism

B. Select one of the following: <sup>1</sup>

ENGLISH 8	Multicultural American Literature
ENGLISH 9	Shakespeare
ENGLISH 10	Topics in English and American Literature
ENGLISH 11	Society, Law, and Literature
ENGLISH 12	Young Adult Fiction
ENGLISH 15	Introductory Seminar in English: Topics in Literary Studies
ENGLISH 16	The Craft of Poetry
ENGLISH 17	The Craft of Fiction

C. Complete:

LIT JRN 100	Advanced Reporting
LIT JRN 101A	Studies in the History, Theory, and Ethics of Literary Journalism

D. Complete:

LIT JRN 103	Lectures on Topics in Literary Journalism (three times, on various topics.)
-------------	---

<sup>1</sup> Students can substitute COM LIT 60A or COM LIT 60C for the lower-division English course requirement.

**Residence Requirement for the Literary Journalism Minor:** LIT JRN 20, LIT JRN 21, LIT JRN 100, and LIT JRN 101A must be completed successfully at UCI. By petition, two of the three LIT JRN 103 courses may be taken through the UC Education Abroad Program, providing course content is approved in advance by the Literary Journalism program.

## Master of English

The Department of English sponsors a Master of English program designed for teachers, returning students, and other who would benefit from advanced training in literary history and criticism, studies in related media, and in rhetoric and composition. The Master of English is awarded to candidates who complete 36 units of graduate course work and submit an acceptable master's essay.

The Master of English plan of study comprises:

1. 32 units of primary course work, usually completed over the course of two academic calendar years or six quarters (with part-time enrollment assumed as one course per quarter) and one intervening summer session (with enrollment in three courses taught during a six-week session).
2. The completion of 4 units of thesis research course work in the sixth quarter of instruction.
3. The completion of the master's thesis essay by the end of the sixth quarter.

## Department of European Languages and Studies

**David T. Pan, Department Chair**

243 Humanities Instructional Building  
949-824-6406  
<http://www.humanities.uci.edu/els/>

The Department of European Languages and Studies provides undergraduates with the opportunity to study Europe in its geographical, linguistic, historical, literary, artistic, and cultural diversity. The literatures, histories, and cultures of European nation-states have always been closely interconnected, even before the individual regions became nation-states. It is nearly impossible to study any era—the Renaissance, the Early Modern period, the Enlightenment, the Romantic period, or the Modern period—without taking into account the influence of one European nation on other European nations. Almost all significant European literary and artistic movements have been cross-cultural and transnational. The current configuration of Europe—the European Union—is merely the most recent socio-political and economic realization of the intense cross-pollination of ideas and institutions that defines—and has always defined—the continent. Immigration and the displacement of populations throughout the continent are constants of European history and have long inflected literary and artistic production in ways scholars continually explore. The history of European colonial enterprises and their afterlives have had a profound impact on the shape of the world in which we live; the Department is committed to a critical engagement with these legacies.

The Department offers majors in European Studies, French, and German Studies; minors in European Studies, French, German Studies, Italian Studies, and Russian Studies; as well as a graduate program (M.A., Ph.D.) in German. The Department also offers language training in French, German, Italian, and Russian with emphasis on the communicative and interpretive aspects of language learning. The goal is the achievement of translingual and transcultural competency. University language study is the critical investigation of a foreign linguistic system and the cultures defined by it. It is also an investigation of one's own native language(s): it is nearly impossible for us to scrutinize and analyze something we know as intimately as our native language and yet this is the order by which we formulate our thoughts and the order which may sometimes formulate our thoughts for us. The "foreignness" of a foreign language allows us to objectify an entire linguistic system, to observe its structure and its usage, and then to make comparisons with our own linguistic situation. This kind of knowledge of one's own languages is the foundation of critical reflection on texts of any nature—historical, philosophical, literary, political, legal, journalistic, and others. Thus serious study of a language other than English is crucial to a university education. The Department teaches its language courses with this principle in mind and seeks to provide its students with a framework for critical linguistic and cultural learning.

## UCI Division of Career Pathways

The UCI (<http://career.uci.edu/>) Division of Career Pathways Center provides services to students and alumni including career counseling, information about job opportunities, a career library, and workshops on résumé preparation, job search, and interview techniques.

- European Studies, B.A.
- European Studies, Minor
- European Thought and Culture, M.A. (4+1)
- French, B.A.
- French, Minor
- German Studies, B.A.

- German, Ph.D.
- Italian Studies, Minor
- Russian Studies, Minor

## Faculty

Etienne Balibar, Ph.D. Catholic University of Nijmegen, *Professor Emeritus of French* (political philosophy, critical theory, epistemology of the social sciences, ethics)

Anke Biendarra, Ph.D. University of Washington, *Associate Professor of German* (20th- and 21st-century German literature, culture, and film, cultural studies)

David Carroll, Ph.D. Johns Hopkins University, *Professor Emeritus of French* (critical theory and twentieth-century French literature)

James T. Chiampi, Ph.D. Yale University, *Professor Emeritus of Italian; Religious Studies* (Dante and Italian Renaissance)

Fabrizio Di Maio, Ph.D. University of Rome II Tor Vergata, *Director of Italian Language Program and Lecturer of Italian* (didactics of Italian as a foreign language, Italian historical novels, politically engaged literature)

Kai Evers, Ph.D. Duke University, *Associate Professor of German* (20th-century German literature and film, modernism and Holocaust literature, theories of violence and catastrophic imagination)

Suzanne Gearhart, Ph.D. Johns Hopkins University, *Professor Emerita of French* (seventeenth- and eighteenth-century French literature, philosophy and literature)

Elizabeth Guthrie, Ph.D. University of Illinois at Urbana-Champaign, *Professor of Teaching Emerita of French* (second-language acquisition and teaching)

Gail K. Hart, Ph.D. University of Virginia, *Professor Emerita of German* (18th- and early-19th-century German drama and fiction, Schiller, history of punishment)

Laura Klein, Ph.D. University of California, Irvine, *Lecturer of French*

Ruth Klüger, Ph.D. University of California, Berkeley, *Professor Emerita of German* (Kleist, nineteenth-century literature, Stifter, Holocaust literature)

Meredith A. Lee, Ph.D. Yale University, *Professor Emerita of German* (lyric poetry, eighteenth-century literature, Goethe, music and literature)

Herbert H. Lehnert, Ph.D. University of Kiel, *Professor Emeritus of German* (Thomas Mann)

Glenn S. Levine, Ph.D. University of Texas at Austin, *German Language Program Director and Professor of German; Education; Language Science* (applied linguistics, foreign language pedagogy, German-Jewish culture and history, Yiddish language and culture, European culinary history)

William J. Lillyman, Ph.D. Stanford University, *Professor Emeritus of German* (Romanticism, Goethe, Tieck)

Christophe Litwin, Ph.D. New York University, *Program Director and Assistant Professor of French; German* (early modern French literature, early modern European moral and political philosophy)

Catherine Malabou, Ph.D. Ecole des Hautes Etudes en Sciences Sociales, *UCI Distinguished Professor of Comparative Literature; French; German* (German idealism, contemporary French philosophy, cultural theory, neurobiology, epigenetics)

Maryse J. Mijalski, Ed.D. University of Southern California, *Director of the French Language Program and Lecturer of French* (Second-language pedagogy and teaching.)

Lora D. Mjolsness, Ph.D. University of Southern California, *Lecturer of Russian* (Soviet and Russian Animation; 19th century, 20th century and Contemporary Children's Literature; Russian Folklore.)

Carrie J. Noland, Ph.D. Harvard University, *Director of the International Center for Writing and Translation and Director of French and Professor of French; Comparative Literature* (20th-century poetry and poetics, avant-garde movements in art and literature, critical theory, performance studies)

David T. Pan, Ph.D. Columbia University, *Professor of German* (18th-, 19th-, and early 20th-century German literature and intellectual history)

Zlatina Sandalska, Ph.D. University of Southern California, *Lecturer of Russian*

Gabriele M. Schwab, Ph.D. University of Konstanz, *UCI Chancellor's Professor of Comparative Literature; Anthropology; Culture and Theory; English; European Languages and Studies; German* (modern literature, critical theory, psychoanalysis, comparative literature)

Deanna Shemek, Ph.D. Johns Hopkins University, *Professor of Italian* (Italian literature and cultural history; Renaissance studies; early modern popular culture; early modern to contemporary narrative; women's and gender studies; literary theory; digital humanities; textual scholarship)

John H. Smith, Ph.D. Princeton University, *Professor of Comparative Literature; Culture and Theory; German; Religious Studies* (18th- and 19th-century literature and intellectual history, literary theory)

Georges Y. Van Den Abbeele, Ph.D. Cornell University, *Professor of Comparative Literature; English; European Languages and Studies* (French and European philosophical literature, travel narrative and tourism/migration studies, critical theory and aesthetics, francophone literature, history of cartography, media history and theory)

## Affiliate Faculty

Elizabeth G. Allen, Ph.D. University of Michigan, *Associate Professor of English; Comparative Literature; European Languages and Studies; Religious Studies* (Chaucer, Gower, 15th century poetry; exemplary literature, romance, chronicle, episodic form; intersections between ethics and politics, politics and religion; hospitality, sovereignty, legal and constitutional history of England)

David Brodbeck, Ph.D. University of Pennsylvania, *Professor of Music; European Languages and Studies*

Daniel R. Brunstetter, Ph.D. University of California, Davis, *Associate Professor of Political Science; European Languages and Studies* (political theory, international relations, French political thought)

Nahum D. Chandler, Ph.D. University of Chicago, *Professor of African American Studies; Asian American Studies; Comparative Literature; English; European Languages and Studies* (modern philosophy, intellectual history, history of the human sciences)

Vinayak Chaturvedi, Ph.D. University of Cambridge, *Associate Professor of History; Culture and Theory; European Languages and Studies; Religious Studies* (modern South Asia, social and intellectual history)

Ian Collier, Ph.D. University of Melbourne, *Professor of History; European Languages and Studies* (Europe and the Muslim world, the French Revolution and the global history of the Revolutionary age)

Herschel Farbman, Ph.D. Yale University, *Department Chair and Associate Professor of Comparative Literature; French* (modernism, critical theory)

Zina Giannopoulou, Ph.D. University of Illinois at Urbana-Champaign, *Associate Professor of Classics; European Languages and Studies* (Plato, philosophy and literature, Greek tragedy and epic, film, and reception of classics)

Sara Goodman, Ph.D. Georgetown University, *Associate Professor of Political Science; European Languages and Studies* (citizenship policy, immigration, immigrant integration, ethnic diversity in democracies, diaspora)

Sean Greenberg, Ph.D. Harvard University, *Associate Professor of Philosophy; European Languages and Studies; Religious Studies*

Rebeca Louise Helfer, Ph.D. Columbia University, *Associate Professor of English; European Languages and Studies* (Renaissance literature and culture, memory, Spenser)

Andromache Karanika, Ph.D. Princeton University, *Department Chair and Associate Professor of Classics; European Languages and Studies; Religious Studies* (Greek epic poetry, Greek lyric, ritual, gender and performance, reception of antiquity in Byzantium)

Peter O. Krapp, Ph.D. University of California, Santa Barbara, *Professor of Film and Media Studies; English; European Languages and Studies; Informatics; Music; Visual Studies* (digital culture, media history, cultural memory)

Horacio Legras, Ph.D. Duke University, *Professor of Spanish and Portuguese; Comparative Literature; Culture and Theory; European Languages and Studies* (Latin American literature and culture, Latin American film, visual arts in Latin America, psychoanalysis, and photography)

Jayne Elizabeth Lewis, Ph.D. Princeton University, *Director of Humanities Honors Program and Professor of English; European Languages and Studies; Religious Studies* (literature and medicine, restoration and 18th century British literature, literature of the supernatural and gothic fiction, history and/of fiction, atmosphere as literary concept and construct within natural philosophy)

Nancy Ann McLoughlin, Ph.D. University of California, Santa Barbara, *Associate Professor of History; European Languages and Studies; Religious Studies* (late Medieval Europe, intellectual history, gender)

Santiago Morales-Rivera, Ph.D. Harvard University, *Associate Professor of Spanish and Portuguese; European Languages and Studies* (Modern Peninsular literature and culture, critical theory, literary history, narrative, music)

Susan Katharine Morrissey, Ph.D. University of California, Berkeley, *Professor of History; European Languages and Studies* (Russia, terrorism and political violence, suicide)

Jane O. Newman, Ph.D. Princeton University, *Professor of Comparative Literature; English; European Languages and Studies; Religious Studies* (comparative Renaissance and early modern literature and culture [English, French, German, Italian, neo-Latin], Mediterranean Renaissance studies, Baroque, afterlives of antiquity, Walter Benjamin, Erich Auerbach, pre-modern lessons for the modern and post-modern)

Kevin E. Olson, Ph.D. Northwestern University, *Professor of Political Science; Culture and Theory; European Languages and Studies* (political theory, history of political thought, legal theory, philosophy of the social sciences)

Nasrin Rahimieh, Ph.D. University of Alberta, *Director of the Humanities Core Program and Howard Baskerville Professor of Comparative Literature; European Languages and Studies; Gender and Sexuality Studies* (Modern Persian literature and culture, diaspora studies, women's writing.)

Renee J. Raphael, Ph.D. Princeton University, *Associate Professor of History; European Languages and Studies; Religious Studies* (early modern Europe, history of science, intellectual history)

Gabriele M. Schwab, Ph.D. University of Konstanz, *UCI Chancellor's Professor of Comparative Literature; Anthropology; Culture and Theory; English; European Languages and Studies; German* (modern literature, critical theory, psychoanalysis, comparative literature)

James Steintrager, Ph.D. Columbia University, *Director of the Emphasis in Critical Theory and Professor of English; European Languages and Studies* (eighteenth-century comparative literature, ethical philosophy and literature, systems theory, amatory and erotic fiction)

Paul Andrew Zissos, Ph.D. Princeton University, *Humanities Language Learning Program Director and Professor of Classics; European Languages and Studies* (Latin epic, medieval Latin, Roman history and culture, Classical reception)

## European Languages and Studies Courses

### **EURO ST 9. Topics in Europe in the Middle Ages. 4 Units.**

Explores the literature, history, and thought of the European Middle Ages. Topics may include understandings of self and community, aristocratic power and courtly life, colonialism, crusading, religious beliefs and persecution, monasticism and reform, university culture, epic literature, and Arthurian romance.

Repeatability: Unlimited as topics vary.

**(IV and VIII ).**

### **EURO ST 10. Topics in Historical Foundations (1500-1800). 4 Units.**

Offers an overview of the European experience from its social, political, and cultural foundations to modern European issues and institutions in a globalized world. Topics include social, political, and cultural history up to the French Revolution.

Repeatability: Unlimited as topics vary.

Overlaps with EURO ST S10.

**((III or IV) and VIII ).**

**EURO ST S10. Historical Foundations: Europe and the Foundations of the Modern World. 4 Units.**

Encompasses a variety of perspectives in the social sciences and the humanities involving crucial developments coming out of Europe from roughly 1500 to 1800, (the Protestant Reformation through the French Revolution), that helped shape the modern (western) world.

Overlaps with EURO ST 10.

((III or IV) and VIII ).

**EURO ST 11. Issues and Institutions in Modern Europe (1789-1945). 4 Units.**

Offers an overview of modern European societies in social, political, and cultural terms. Topics include shifting geopolitical borders, social movements, and various forms of cultural expression (film, art, literature) as they intersect with and shape issues and events after 1800.

Repeatability: Unlimited as topics vary.

((III or IV) and VIII ).

**EURO ST S11. Europe's Futures: 1755-Present. 4 Units.**

Introduces students to competing approaches from humanities and social sciences to conceptualizing the future in politics, art, and literature. From the enlightenment to today, investigates the cultural and political context of moments when new ideas emerged to secure Europe's futures.

Overlaps with EURO ST 11.

((III or IV) and VIII ).

**EURO ST 12. What is the Origin of Language?. 4 Units.**

Teaches symbol-based logic and universal grammar in human language as tools to investigate the origin of language. Does language originate with reason? Is language inherently universal or diverse? Does it begin as something literal or figurative.

((III or IV) and Vb ).

**EURO ST 13. Topics in Contemporary Europe (1945 – Today). 4 Units.**

Offers a perspective on contemporary politics and social and cultural life of today's Europe. Introduces students to literature, film, and social theory crises of the contemporary world as they emanated from World War II, such as nationalism and populism.

Repeatability: Unlimited as topics vary.

(IV and VIII ).

**EURO ST 101A. European Studies Core I - Early Europe (Pre-1789). 4 Units.**

Introduction to multidisciplinary approaches to important themes in European society, culture, art, literature, and politics; encourages students to explore intersections among disciplines. Possible themes: Concept of Europe in Renaissance, Self and Other: Europe and Islam, Hybrid Cultures in Medieval Europe.

Repeatability: Unlimited as topics vary.

**EURO ST 101B. European Studies Core II: Modern Europe (Post-1789). 4 Units.**

Multidisciplinary approaches to important themes in modern European society, culture, art, literature, and politics, encouraging students to see points of intersection among disciplines. Possible themes: Subjects, Citizens, and Representation; Europe in the World; European Revolutions in Art and Society.

Repeatability: Unlimited as topics vary.

**EURO ST 102. Topics in Early European History and Culture: Pre-1789. 4 Units.**

Addresses historical and cultural events, issues, and texts (art, literature, music, political theory) from the pre-1789 period in more than one European country.

Repeatability: Unlimited as topics vary.

**EURO ST 103. Topics in Modern European History and Culture: Post-1789. 4 Units.**

Addresses historical and cultural events, issues, and texts (art, literature, music, political theory) from 1789 to present in more than one European country.

Repeatability: Unlimited as topics vary.

**EURO ST 190W. Senior Seminar in European Studies. 4 Units.**

Capstone research seminar. Students engage in rigorous, in-depth, interdisciplinary exploration of specific topics, periods, or themes, investigating and analyzing the intersection of material and discursive culture in different historical periods and geographical locations.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: School of Humanities students only.

(Ib)

**EURO ST 199. Independent Study. 1-4 Units.**

Directed reading and research in consultation with a faculty advisor. Substantial written work required.

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**EURO ST 200A. Core Seminar I: Foundations of European Thought and Culture. 4 Units.**

Provides a historical, geographical, and methodological overview of foundational texts and issues in European thought and culture. Covering several historical periods between the Middle Ages and the present, students will see how ideas and institutions change over time.

**EURO ST 200B. Core Seminar II: Theorizing Periods and Movements in European Thought and Culture. 4 Units.**

Periods and movements still form basic units for organizing European thought and theory, even as such categories are problematized. This course will allow for greater focus on a specific time period or constellation of issues around a period or movement.

**EURO ST 200C. Core Seminar III: European Thought and Culture Beyond Europe. 4 Units.**

Studies the intersection and afterlives of European thought and culture with and in non-European contexts, the way European thought and culture has been translated and transformed, taken up and challenged, in colonial, postcolonial, and other global situations.

**EURO ST 201. Topics in European Studies. 4 Units.**

Seminars on various topics related to European Studies.

Repeatability: Unlimited as topics vary.

**EURO ST 299. Independent Research. 4 Units.**

For students to do independent research with advisors on their master's thesis or master's examination reading lists.

Restriction: Graduate students only. School of Humanities students only.

## French Courses

**FRENCH 1A. Fundamentals of French. 5 Units.**

First quarter of first-year French in a hybrid format. Students are taught to conceptualize in French as they learn to understand, read, write, and speak. Classes are conducted entirely in French.

Overlaps with FRENCH S1AB, FRENCH 1AB, FRENCH 1ABSP.

Accelerated first half of first-year French for Hispanophone students. Teaches conceptualizing in French while learning to read, write, and speak using knowledge of Spanish. Develops awareness of and sensibility to French and Francophone life and culture through reading, viewing, discussing.

Prerequisite: Two years of high school Spanish, one semester of college Spanish, or heritage speaker of Spanish.

Overlaps with FRENCH 1A, FRENCH 1AB, FRENCH S1AB, FRENCH 1B.

**FRENCH 1B. Fundamentals of French. 5 Units.**

First quarter of first-year French in a hybrid format. Students are taught to conceptualize in French as they learn to understand, read, write, and speak. Classes are conducted entirely in French.

Prerequisite: FRENCH 1A. FRENCH 1A with a grade of C or better

Overlaps with FRENCH S1AB, FRENCH S1BC, FRENCH 1AB, FRENCH 1BC, FRENCH 1ABSP, FRENCH 1BCSP.

**FRENCH 1BC. Intensive Fundamentals of French. 7.5 Units.**

Intensive second half of first-year French. Students are taught to conceptualize in French as they learn to read, write, and speak. Students develop an awareness of and sensibility to French and Francophone life and culture through reading, viewing, and discussion.

Prerequisite: FRENCH 1AB or FRENCH 1B or FRENCH S1AB. FRENCH 1AB with a grade of C or better. FRENCH 1B with a grade of C or better. FRENCH S1AB with a grade of C or better. Placement into FRENCH 1BC is also accepted.

Overlaps with FRENCH 1B, FRENCH 1C, FRENCH S1BC.

(VI)

**FRENCH 1BCSP. Accelerated Fundamentals of French for Spanish Speakers. 5 Units.**

Accelerated second half of first-year French for Hispanophone students. Teaches conceptualizing in French while learning to read, write, and speak using knowledge of Spanish. Develops awareness of and sensibility to French and Francophone life and culture through reading, viewing, discussing.

Prerequisite: FRENCH 1ABSP or FRENCH 1AB or FRENCH S1AB or FRENCH 1B. FRENCH 1ABSP with a grade of C or better. FRENCH 1AB with a grade of C or better. FRENCH S1AB with a grade of C or better. FRENCH 1B with a grade of C or better. Two years of high school Spanish, one semester of college Spanish, or heritage speaker of Spanish.

Overlaps with FRENCH 1B, FRENCH 1BC, FRENCH S1BC, FRENCH 1C.

(VI)

**FRENCH 1C. Fundamentals of French. 5 Units.**

First quarter of first-year French in a hybrid format. Students are taught to conceptualize in French as they learn to understand, read, write, and speak. Classes are conducted entirely in French.

Prerequisite: FRENCH 1B. FRENCH 1B with a grade of C or better

Overlaps with FRENCH S1BC, FRENCH 1BC, FRENCH 1BCSP.

(VI)

**FRENCH S1AB. Intensive Fundamentals of French. 7.5 Units.**

First half of first-year French in an intensified form and hybrid format. Students are taught to conceptualize in French as they learn to understand, read, write, and speak. Classes are conducted entirely in French.

Overlaps with FRENCH 1A, FRENCH 1B, FRENCH 1AB, FRENCH 1ABSP.

**FRENCH S1BC. Intensive Fundamentals of French. 7.5 Units.**

Second half of first-year French in an intensified form and hybrid format. Students are taught to conceptualize in French as they learn to understand, read, write, and speak. Classes are conducted entirely in French.

Prerequisite: FRENCH S1AB or FRENCH 1B or FRENCH 1AB or FRENCH 1ABSP. FRENCH S1AB with a grade of C or better. FRENCH 1B with a grade of C or better. FRENCH 1AB with a grade of C or better. FRENCH 1ABSP with a grade of C or better

Overlaps with FRENCH 1B, FRENCH 1C, FRENCH 1BC, FRENCH 1BCSP.

(VI)

**FRENCH 2A. Intermediate French. 4 Units.**

Texts of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in French.

Prerequisite: FRENCH 1C or FRENCH 1BC or FRENCH S1BC or FRENCH 1BCSP. FRENCH 1C with a grade of C or better. FRENCH 1BC with a grade of C or better. FRENCH S1BC with a grade of C or better. FRENCH 1BCSP with a grade of C or better. Placement into FRENCH 2A is also accepted.

Overlaps with FRENCH S2AB.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

(VIII)

**FRENCH 2AB. Intensive Intermediate French . 6 Units.**

Intensive first half of second-year French. Texts and films of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in French.

Prerequisite: FRENCH 1C or FRENCH 1BC or FRENCH S1BC. FRENCH 1C with a grade of C or better. FRENCH 1BC with a grade of C or better. FRENCH S1BC with a grade of C or better. Prior high school or college French is recommended. Placement into French 2AB is also accepted.

Overlaps with FRENCH 2A, FRENCH 2B, FRENCH S2AB.

**(VIII)**

**FRENCH 2B. Intermediate French. 4 Units.**

Texts of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in French.

Prerequisite: FRENCH 2A. FRENCH 2A with a grade of C or better

Overlaps with FRENCH S2AB, FRENCH S2BC.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment. FRENCH 2B and FRENCH S2AB and FRENCH S2BC may not be taken for full credit.

**(VIII)**

**FRENCH 2BC. Intensive Intermediate French . 6 Units.**

Intensive second half of second-year French. Texts and films of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in French.

Prerequisite: FRENCH S2AB or FRENCH 2AB. FRENCH S2AB with a grade of C or better. FRENCH 2AB with a grade of C or better. Prior high school or college French is recommended. Placement into French 2BC is also accepted.

Overlaps with FRENCH S2BC, FRENCH 2B, FRENCH 2C.

**(VIII)**

**FRENCH 2C. Intermediate French. 4 Units.**

Texts of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in French.

Prerequisite: FRENCH 2B or FRENCH S2AB. FRENCH 2B with a grade of C or better. FRENCH S2AB with a grade of C or better

Overlaps with FRENCH S2BC.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment. FRENCH 2C and FRENCH S2BC may not be taken for full credit.

**(VIII)**

**FRENCH S2AB. Intermediate French. 6 Units.**

First half of second-year French in an intensified form. Texts of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in French. Prior high school or college French recommended.

Prerequisite: FRENCH 1C or FRENCH 1BC or FRENCH S1BC. FRENCH 1C with a grade of C or better. FRENCH 1BC with a grade of C or better. FRENCH S1BC with a grade of C or better. Placement into FRENCH S2AB is also accepted.

Overlaps with FRENCH 2A, FRENCH 2B.

Restriction: FRENCH S2AB and FRENCH 2A and FRENCH 2B may not be taken for full credit.

**(VIII)**

**FRENCH S2BC. Intermediate French. 6 Units.**

Second half of second-year French in an intensified form. Texts of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in French. Prior high school or college French recommended.

Prerequisite: FRENCH S2AB or FRENCH 2B. FRENCH S2AB with a grade of C or better. FRENCH 2B with a grade of C or better

Overlaps with FRENCH 2C, FRENCH 2B.

Restriction: FRENCH S2BC and FRENCH 2B and FRENCH 2C may not be taken for full credit.

**(VIII)****FRENCH 10. French Peer Tutoring. 1 Unit.**

Tutoring Program in which advanced French students provide assistance to students at a lower level. One hour of tutoring per week.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**FRENCH 50. Topics in French Culture and the Modern World. 4 Units.**

Introductory course for non-majors. Focuses on France's role in the modern world and its cultural connections to Asia, the Middle East, Africa, Europe, and the Americas. Taught in English.

Repeatability: May be taken for credit 3 times as topics vary.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**FRENCH 232. Studies in Nonfictional Prose. 4 Units.**

Examines non-fictional genres such as the essay and the memoir.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**FRENCH 233. Studies in Poetry and Poetics. 4 Units.**

Examines the genre of poetry and theories of poetry.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**FRENCH 240. Studies on a Major Writer. 4 Units.**

Focused study of one author.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**FRENCH 250. Studies in Theory and Criticism. 4 Units.**

Advanced study of a topic in theory and/or criticism.

Repeatability: Unlimited as topics vary.

**FRENCH 254. History and Literature. 4 Units.**

Advanced study of literary works in their historical context.

Repeatability: Unlimited as topics vary.

**FRENCH 272. Cultural Studies . 4 Units.**

Examines the theoretical paradigm of cultural studies.

Repeatability: Unlimited as topics vary.

**FRENCH 290. Research in French Language and Literature. 4 Units.**

A project proposal is prepared by the student and approved by the faculty member who directs the project. Procedure must be completed by the end of the first week of classes. Limit: Once for M.A. candidates; twice for Ph.D. candidates.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only. French Majors only.

**FRENCH 299. Dissertation Research. 4-12 Units.**

For graduate students writing a dissertation with a faculty member in French.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Humanities students only.

**FRENCH 399. University Teaching. 4 Units.**

For graduate students completing a course on foreign language pedagogy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Humanities students only.

## German Courses

**GERMAN 1A. Fundamentals of German. 5 Units.**

Emphasizes the development of meaningful communicative skills in German for the purposes of interaction with German speakers and beginning study of German. With a learner-centered approach, the courses help students develop speaking, listening, reading, writing, and cultural skills and knowledge.

Overlaps with GERMAN S1AB, GERMAN 1AB.

**GERMAN 1AB. Intensive German Fundamentals . 7.5 Units.**

First half of first-year German in a time-intensive form. Development of meaningful communicative skills for the purposes of interaction with German speakers and beginning study of German. Learner-centered approach develops speaking, listening, reading, writing, and cultural skills and knowledge. Materials fee.

Prerequisite: Placement into GERMAN 1AB.

Overlaps with GERMAN S1AB, GERMAN 1A, GERMAN 1B.

Restriction: GERMAN 1AB and GERMAN 1A and GERMAN 1B and GERMAN S1AB may not be taken for full credit.

**GERMAN 1B. Fundamentals of German. 5 Units.**

Emphasizes the development of meaningful communicative skills in German for the purposes of interaction with German speakers and beginning study of German. With a learner-centered approach, students develop speaking, listening, reading, writing, and cultural skills and knowledge.

Prerequisite: GERMAN 1A. GERMAN 1A with a grade of C or better. Placement into GERMAN 1B is also accepted.

Overlaps with GERMAN S1AB, GERMAN S1BC, GERMAN 1AB, GERMAN 1BC.

**GERMAN 1BC. Intensive German Fundamentals. 7.5 Units.**

Second half of first-year German in a time-intensive form. Development of meaningful communicative skills for the purposes of interaction with German speakers and beginning study of German. Learner-centered approach develops speaking, listening, reading, writing, and cultural skills and knowledge. Materials fee.

Prerequisite: GERMAN 1AB or GERMAN 1B or GERMAN S1AB. GERMAN 1AB with a grade of C or better. GERMAN 1B with a grade of C or better. GERMAN S1AB with a grade of C or better. Placement into GERMAN 1BC is also accepted.

Overlaps with GERMAN 1B, GERMAN 1C, GERMAN S1BC.

Restriction: GERMAN 1BC and GERMAN 1B and GERMAN 1C and GERMAN S1AB may not be taken for full credit.

**(VI)**

**GERMAN 1C. Fundamentals of German. 5 Units.**

Emphasizes the development of meaningful communicative skills in German for the purposes of interaction with German speakers and beginning study of German. With a learner-centered approach, students develop speaking, listening, reading, writing, and cultural skills and knowledge.

Prerequisite: GERMAN 1B. GERMAN 1B with a grade of C or better. Placement into GERMAN 1C is also accepted.

Overlaps with GERMAN 1BC, GERMAN S1BC.

**(VI)**

**GERMAN S1AB. Fundamentals of German. 7.5 Units.**

First half of first-year German in a time-intensive form. Development of meaningful communicative skills for the purposes of interaction with German speakers and beginning study of German. Learner-centered approach develops speaking, listening, reading, writing, and cultural skills and knowledge.

Overlaps with GERMAN 1A, GERMAN 1B, GERMAN 1AB.

Restriction: GERMAN S1AB and GERMAN 1A and GERMAN 1B and GERMAN 1AB may not be taken for full credit.

**GERMAN S1BC. Fundamentals of German. 7.5 Units.**

Second half of first-year German in a time-intensive form. Development of meaningful communicative skills for the purposes of interaction with German speakers and beginning study of German. Learner-centered approach develops speaking, listening, reading, writing, and cultural skills and knowledge.

Prerequisite: GERMAN 1AB or GERMAN 1B or GERMAN S1AB. GERMAN 1AB with a grade of C or better. GERMAN 1B with a grade of C or better. GERMAN S1AB with a grade of C or better. Placement into GERMAN S1BC is also accepted.

Overlaps with GERMAN 1B, GERMAN 1C, GERMAN 1BC.

Restriction: GERMAN 1BC and GERMAN S1BC and GERMAN 1B and GERMAN 1C may not be taken for full credit.

**(VI)**

**GERMAN 2A. Intermediate German. 4 Units.**

Emphasizes communicative skills for the purposes of interaction with German speakers and intermediate study of German. With a learner-centered approach, helps students develop reading, writing, speaking, listening, grammatical, and cultural skills and knowledge. First-year grammar is reviewed and expanded.

Prerequisite: GERMAN 1BC or GERMAN 1C or GERMAN S1BC. GERMAN 1BC with a grade of C or better. GERMAN 1C with a grade of C or better. GERMAN S1BC with a grade of C or better. Placement into GERMAN 2A is also accepted.

Overlaps with GERMAN S2AB.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)**

**GERMAN 2B. Intermediate German. 4 Units.**

Emphasizes communicative skills for the purposes of interaction with German speakers and intermediate study of German. With a learner-centered approach, helps students develop reading, writing, speaking, listening, grammatical, and cultural skills and knowledge. First-year grammar is reviewed and expanded.

Prerequisite: GERMAN 2A. GERMAN 2A with a grade of C or better. Placement into GERMAN 2B is also accepted.

Overlaps with GERMAN S2AB, GERMAN S2BC.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)****GERMAN 2C. Intermediate German. 4 Units.**

Emphasizes communicative skills for the purposes of interaction with German speakers and intermediate study of German. With a learner-centered approach, helps students develop reading, writing, speaking, listening, grammatical, and cultural skills and knowledge. First-year grammar is reviewed and expanded.

Prerequisite: GERMAN 2B. GERMAN 2B with a grade of C or better. Placement into GERMAN 2C is also accepted.

Overlaps with GERMAN S2BC.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)****GERMAN S2AB. Intermediate German. 6 Units.**

First half of second-year German in a time-intensive form. Emphasizes communicative skills for the purposes of interaction with German speakers and intermediate study of German. Learner-centered approach develops reading, writing, speaking, listening, grammatical, and cultural skills and knowledge.

Prerequisite: GERMAN 1C or GERMAN S1BC

Overlaps with GERMAN 2A, GERMAN 2B.

Restriction: GERMAN S2AB and GERMAN 2A and GERMAN 2B may not be taken for full credit.

**(VIII)****GERMAN S2BC. Intermediate German. 6 Units.**

Second half of second-year German in a time-intensive form. Emphasizes communicative skills for the purposes of interaction with German speakers and intermediate study of German. Learner-centered approach develops reading, writing, speaking, listening, grammatical, and cultural skills and knowledge.

Prerequisite: GERMAN 2B or GERMAN S2AB. GERMAN 2B with a grade of C or better. GERMAN S2AB with a grade of C or better

Overlaps with GERMAN 2B, GERMAN 2C.

Restriction: GERMAN S2BC and GERMAN 2B and GERMAN 2C may not be taken for full credit.

**(VIII)****GERMAN 53. Advanced Conversation. 2 Units.**

Includes reading of political and cultural material. Conducted in German.

Prerequisite or corequisite: GERMAN 2C

Repeatability: May be repeated for credit unlimited times.

**GERMAN 97. Fundamentals of German (with Emphasis on Reading). 4 Units.**

Primarily for students interested in acquiring a solid reading knowledge of German. Facilitates comprehension and translation of texts in various disciplines. Does not serve as prerequisite for any higher-level German courses or fulfill any undergraduate foreign language requirement.

Repeatability: May be taken for credit 3 times.

Restriction: No German Studies Majors.

**GERMAN 101. Topics in Introduction to German Literature and Culture. 4 Units.**

Sample interpretations of texts in their cultural and historical contexts. Introduction to critical language in German.

Prerequisite or corequisite: GERMAN 2C. GERMAN 2C with a grade of C or better

Repeatability: Unlimited as topics vary.

**GERMAN 102. Topics in German Culture and Society. 4 Units.**

Interdisciplinary introduction to German culture from the perspective of its aesthetic, social, and political aspects. Methodological problems arising from an analysis of culture in its historical context.

Prerequisite or corequisite: GERMAN 2C. GERMAN 2C with a grade of C or better

Repeatability: Unlimited as topics vary.

**GERMAN 103. Topics in German Film. 4 Units.**

Introduction to the history and interpretation of German film within its cultural and social contexts. Enhances German grammar knowledge and vocabulary and develops sophisticated speaking, writing, and reading skills.

Prerequisite or corequisite: GERMAN 2C. GERMAN 2C with a grade of C or better

Repeatability: Unlimited as topics vary.

**GERMAN 104. Topics in German Linguistics. 4 Units.**

Introduces German or other Germanic-language linguistic, sociolinguistic, or ethnography-of-communication topics. Taught in German.

Prerequisite or corequisite: GERMAN 2C. GERMAN 2C with a grade of C or better

Repeatability: Unlimited as topics vary.

**GERMAN 105. German for Professions . 4 Units.**

Explores the structure of German business practices, including in scientific fields and engineering, while developing verbal and written skills important for professional life in Germany. Taught in German.

Prerequisite or corequisite: GERMAN 2C. GERMAN 2C with a grade of C or better

**GERMAN 115. Topics in Advanced German for Business and Economics. 4 Units.**

Explores the structure of the German economy and business practices while developing advanced verbal and written skills important for professional life in Germany. Taught in German.

Prerequisite or corequisite: GERMAN 101 or GERMAN 102 or GERMAN 103 or GERMAN 104 or GERMAN 105

Repeatability: Unlimited as topics vary.

**GERMAN 118. Topics in Studies in the Age of Goethe. 4 Units.**

Individual authors such as Lessing, Goethe, Schiller, Kleist, and Hölderlin, or the drama of the 'angry young men' of the German 1770s.

Prerequisite or corequisite: GERMAN 101 or GERMAN 102 or GERMAN 103 or GERMAN 104 or GERMAN 105

Repeatability: Unlimited as topics vary.

**GERMAN 119. Topics in 19th Century German Literature and Culture. 4 Units.**

Individual authors such as Büchner, Grillparzer, Keller, and Nietzsche, or broader social-literary phenomena.

Prerequisite or corequisite: GERMAN 101 or GERMAN 102 or GERMAN 103 or GERMAN 104 or GERMAN 105

Repeatability: Unlimited as topics vary.

**GERMAN 120. Topics in 20th Century German Literature and Culture. 4 Units.**

Individual authors such as Thomas Mann, Brecht, and Kafka, or topics addressing questions of genre and/or social-literary problems.

Prerequisite or corequisite: GERMAN 101 or GERMAN 102 or GERMAN 103 or GERMAN 104 or GERMAN 105

Repeatability: Unlimited as topics vary.

**GERMAN 130. Topics in German Literature and Culture. 4 Units.**

Literary and cultural topics not fully contained within the periods listed above, such as 'German Comedy' and 'Turn-of-the-Century Vienna.'

Prerequisite or corequisite: GERMAN 101 or GERMAN 102 or GERMAN 103 or GERMAN 104 or GERMAN 105

Repeatability: Unlimited as topics vary.

**GERMAN 140. Topics in Literary Theory and Criticism. 4 Units.**

In English. Theoretical dimensions of literary criticism and the German philosophical tradition. Topics have included Marxism, Freudian thought, German Idealist aesthetics, Historicism, twentieth-century hermeneutics, Frankfurt School, and Rezeptionsästhetik.

Repeatability: Unlimited as topics vary.

**GERMAN 140W. Topics in Literary Theory and Criticism. 4 Units.**

In English. Theoretical dimensions of literary criticism and the German philosophical tradition. Topics have included Marxism, Freudian thought, German Idealist aesthetics, Historicism, twentieth-century hermeneutics, Frankfurt School, and Rezeptionsästhetik.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only.

**(Ib)**

**GERMAN 150. German Literature and Culture in Translation. 4 Units.**

In English. Major works in Germanic literature and culture in context.

Repeatability: Unlimited as topics vary.

**GERMAN 150W. German Literature and Culture in Translation. 4 Units.**

In English. Major works in Germanic literature and culture in context.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only.

**(Ib)**

**GERMAN 160. German Cinema.**

Historical, theoretical, and comparative perspectives on German cinema.

Repeatability: Unlimited as topics vary.

**GERMAN 160W. German Cinema. 4 Units.**

Historical, theoretical, and comparative perspectives on German cinema.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only.

**(Ib)**

**GERMAN 170. Topics in German Linguistics. 4 Units.**

Explores linguistic, sociolinguistic, or ethnography-of-communication topics of German or other Germanic languages (Swedish, Icelandic, Yiddish, and others). Taught in English.

Repeatability: Unlimited as topics vary.

**GERMAN 170W. Topics in German Linguistics. 4 Units.**

Explores linguistic, sociolinguistic, or ethnography-of-communication topics of German or other Germanic languages (Swedish, Icelandic, Yiddish, and others). Taught in English.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only.

**(Ib)****GERMAN 197. German Internship . 4 Units.**

In this internship course, students will engage in professional practice (e.g., Engineering, Business Administration, government) in a German setting and thereby increase their knowledge of German language and culture in a setting beyond the academic classroom.

Prerequisite: GERMAN 2C

Grading Option: Pass/no pass only.

**GERMAN 199. Independent Study. 1-4 Units.**

Independent research with German faculty.

Repeatability: May be repeated for credit unlimited times.

**GERMAN 200. Literary Criticism . 4 Units.**

Topics in literary criticism.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**GERMAN 210. Literary Theory . 4 Units.**

Topics in literary theory.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**GERMAN 220. Selected Topics in German Linguistics . 4 Units.**

Topics in German linguistics.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**GERMAN 230. Literary and Cultural History. 4 Units.**

Topics in literary and cultural history.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**GERMAN 290. Independent Study. 4 Units.**

Counted toward course requirements for the M.A. or Ph.D. A term paper or project is required.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Humanities students only.

**GERMAN 298. Independent Directed Reading. 4-12 Units.**

For students preparing for doctoral examination.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**GERMAN 299. Dissertation Research. 4-12 Units.**

For students who have been admitted to doctoral candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Humanities students only.

**GERMAN 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Italian Courses

**ITALIAN 1A. Fundamentals of Italian. 5 Units.**

First quarter of first-year Italian in a hybrid format. Students are taught to conceptualize in Italian as they learn to understand, read, write, and speak. Classes are conducted entirely in Italian.

Overlaps with ITALIAN S1AB, ITALIAN 1AB.

**ITALIAN 1AB. Intensive Italian Fundamentals. 7.5 Units.**

First half of first-year Italian in a time-intensive form. Development of meaningful communicative skills for the purposes of interaction with Italian speakers and beginning study of Italian. Learner-centered approach develops speaking, listening, reading, writing, and cultural skills and knowledge.

Overlaps with ITALIAN 1A, ITALIAN 1B, ITALIAN S1AB.

Restriction: ITALIAN 1AB and ITALIAN 1A and ITALIAN 1B and ITALIAN S1AB may not be taken for full credit.

**ITALIAN 1B. Fundamentals of Italian. 5 Units.**

Second quarter of first-year Italian in a hybrid format. Students are taught to conceptualize in Italian as they learn to understand, read, write, and speak. Classes are conducted entirely in Italian.

Prerequisite: ITALIAN 1A. ITALIAN 1A with a grade of C or better. Placement into ITALIAN 1B is also accepted.

Overlaps with ITALIAN S1AB, ITALIAN S1BC, ITALIAN 1AB, ITALIAN 1BC.

**ITALIAN 1BC. Intensive Italian Fundamentals. 7.5 Units.**

Second half of first-year Italian in a time-intensive form. Development of meaningful communicative skills for the purposes of interaction with Italian speakers and beginning study of Italian. Learner-centered approach develops speaking, listening, reading, writing, and cultural skills and knowledge.

Prerequisite: ITALIAN 1AB or ITALIAN S1AB or ITALIAN 1B. ITALIAN 1AB with a grade of C or better. ITALIAN S1AB with a grade of C or better. ITALIAN 1B with a grade of C or better. Placement into ITALIAN 1BC is also accepted.

Overlaps with ITALIAN 1B, ITALIAN 1C, ITALIAN S1BC.

Restriction: ITALIAN 1AB and ITALIAN 1A and ITALIAN 1B and ITALIAN S1AB may not be taken for full credit.

## (VI)

**ITALIAN 1C. Fundamentals of Italian. 5 Units.**

Third quarter of first-year Italian in a hybrid format. Students are taught to conceptualize in Italian as they learn to understand, read, write, and speak. Classes are conducted entirely in Italian.

Prerequisite: ITALIAN 1B or ITALIAN 1AB or ITALIAN S1AB. ITALIAN 1B with a grade of C or better. ITALIAN 1AB with a grade of C or better. ITALIAN S1AB with a grade of C or better. Placement into ITALIAN 1C is also accepted.

Overlaps with ITALIAN S1BC, ITALIAN 1BC.

## (VI)

**ITALIAN S1AB. Italian Fundamentals. 7.5 Units.**

First-year Italian in an intensified form. Students are taught to conceptualize in Italian as they learn to understand, read, write, and speak. Classes are conducted entirely in Italian and meet daily three hours for five weeks each session.

Overlaps with ITALIAN 1A, ITALIAN 1B, ITALIAN 1AB.

Restriction: ITALIAN S1AB and ITALIAN 1A and ITALIAN 1B and ITALIAN 1AB may not be taken for full credit.

**ITALIAN S1BC. Italian Fundamentals. 7.5 Units.**

First-year Italian in an intensified form. Students are taught to conceptualize in Italian as they learn to understand, read, write, and speak. Classes are conducted entirely in Italian and meet daily three hours for five weeks each session.

Prerequisite: ITALIAN S1AB or ITALIAN 1B or ITALIAN 1AB. ITALIAN S1AB with a grade of C or better. ITALIAN 1B with a grade of C or better. ITALIAN 1AB with a grade of C or better

Overlaps with ITALIAN 1B, ITALIAN 1C, ITALIAN 1BC.

Restriction: ITALIAN S1BC and ITALIAN 1B and ITALIAN 1C and ITALIAN 1BC may not be taken for full credit.

**(VI)**

**ITALIAN 2A. Intermediate Italian. 4 Units.**

Texts of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in Italian.

Prerequisite: ITALIAN 1C or ITALIAN 1BC or ITALIAN S1BC. ITALIAN 1C with a grade of C or better. ITALIAN 1BC with a grade of C or better. ITALIAN S1BC with a grade of C or better. Placement into ITALIAN 2A is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)**

**ITALIAN 2B. Intermediate Italian. 4 Units.**

Texts of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in Italian.

Prerequisite: ITALIAN 2A. ITALIAN 2A with a grade of C or better. Placement into ITALIAN 2B is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)**

**ITALIAN 2C. Intermediate Italian. 4 Units.**

Texts of contemporary literary or social interest provide the focus for more advanced conversation, reading, and composition. Classes are conducted entirely in Italian.

Prerequisite: ITALIAN 2B. ITALIAN 2B with a grade of C or better. Placement into 2C is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)**

**ITALIAN 50. Topics in Italian Culture. 4 Units.**

Examines Italian culture at home and from abroad, in cinema, literature, and popular culture.

Repeatability: Unlimited as topics vary.

**(IV and VIII ).**

**ITALIAN 99. Special Studies in Italian. 4 Units.**

Both student and instructor arrive at the theme of the course and the critical approach to be followed in consultation. Intended to offer courses in Italian otherwise unavailable.

Repeatability: May be repeated for credit unlimited times.

**ITALIAN 150. Topics in Italian Literature and Culture. 4 Units.**

Major themes, periods, and/or movements in Italian literature and culture. Taught in English.

Repeatability: Unlimited as topics vary.

**ITALIAN 199. Tutorial in Italian Literature and Culture. 4 Units.**

The student must submit a written description of the proposed course to the instructor and the Chair prior to the beginning of the course.

Repeatability: Unlimited as topics vary.

## Russian Courses

**RUSSIAN 1A. Fundamentals of Russian. 5 Units.**

Focuses on reading, comprehension, basic composition, and conversation skills, and gives the student an initial exposure to the Russian cultural scene.

Prerequisite: Placement into RUSSIAN 1A.

**RUSSIAN 1B. Fundamentals of Russian. 5 Units.**

Focuses on reading, comprehension, basic composition, and conversation skills, and gives the student an initial exposure to the Russian cultural scene.

Prerequisite: RUSSIAN 1A. RUSSIAN 1A with a grade of C or better. Placement into RUSSIAN 1B is also accepted.

**RUSSIAN 1C. Fundamentals of Russian. 5 Units.**

Focuses on reading, comprehension, basic composition, and conversation skills, and gives the student an initial exposure to the Russian cultural scene.

Prerequisite: RUSSIAN 1AB or RUSSIAN 1B. RUSSIAN 1AB with a grade of C or better. RUSSIAN 1B with a grade of C or better. Placement into RUSSIAN 1C is also accepted.

### (VI)

**RUSSIAN 2A. Intermediate Russian. 4 Units.**

Students read simple passages from contemporary Russian literary texts and newspapers. Development of oral skills and exposure to Russian culture continue.

Prerequisite: RUSSIAN 1BC or RUSSIAN 1C. RUSSIAN 1BC with a grade of C or better. RUSSIAN 1C with a grade of C or better. Placement into RUSSIAN 2A is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

### (VIII)

**RUSSIAN 2B. Intermediate Russian. 4 Units.**

Students read simple passages from contemporary Russian literary texts and newspapers. Development of oral skills and exposure to Russian culture continue.

Prerequisite: RUSSIAN 2A. RUSSIAN 2A with a grade of C or better. Placement into RUSSIAN 2B is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

### (VIII)

**RUSSIAN 2C. Intermediate Russian. 4 Units.**

Students read simple passages from contemporary Russian literary texts and newspapers. Development of oral skills and exposure to Russian culture continue.

Prerequisite: RUSSIAN 2B. RUSSIAN 2B with a grade of C or better. Placement into RUSSIAN 2C is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

### (VIII)

**RUSSIAN 50. Russian Culture . 4 Units.**

Study of varied topics in Russian culture, area studies, and society, both in the present and in historical perspective.

Repeatability: May be taken for credit 4 times as topics vary.

### (IV, VIII)

**RUSSIAN 99. Special Studies Russian. 1-5 Units.**

Special studies under faculty supervision.

Repeatability: May be taken for credit 2 times.

**RUSSIAN 150. Topics in Russian Literature. 4 Units.**

Examines major themes in Russian literature, film, and other media from the eighteenth to twenty-first centuries. Taught in English.

Repeatability: Unlimited as topics vary.

**RUSSIAN 190. Topics in Russian Language Through Film. 4 Units.**

Uses Russian films of the late 20th century to enhance students' language skills and deepen their cultural knowledge. Work involves intensive conversation, reading and listening comprehension, and the acquisition of written skills and grammatical accuracy. Conducted primarily in Russian.

Prerequisite or corequisite: RUSSIAN 2C

Repeatability: Unlimited as topics vary.

**RUSSIAN 199. Independent Study. 1-4 Units.**

Independent study under direct faculty supervision.

Repeatability: May be taken for credit 2 times.

## European Studies, B.A.

The European Studies program focuses on the study of Europe from the vantage points of several disciplines in the humanities and social sciences. Because Europe is both a geographical place and an idea that changes throughout history, it has had different meanings at different times and in different places. The study of Europe thus requires an open, pluralistic, and interdisciplinary curriculum that takes a critical approach to the idea (or ideas) of Europe.

The program provides a multidisciplinary view of Europe as a whole and of its historical, political, and cultural formation and global implications and encounters with the non-European world. It also provides a focus on a specific area of European experience that cuts across traditional disciplinary and national boundaries. Participation in the UC Education Abroad Program in a European country is strongly recommended for all European Studies majors.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

**Requirements for the Major**

Completion of two years of language (through the 2C level or equivalent) in French, German, classical Greek, Italian, Latin, Portuguese, Russian, or Spanish.

Twelve courses:

A. Select two of the following:

HISTORY 70B	Problems in History: Europe
EURO ST 9	Topics in Europe in the Middle Ages
EURO ST 10	Topics in Historical Foundations (1500-1800)
EURO ST S10	Historical Foundations: Europe and the Foundations of the Modern World
EURO ST 11	Issues and Institutions in Modern Europe (1789-1945)
EURO ST S11	Europe's Futures: 1755-Present
EURO ST 12	What is the Origin of Language?
EURO ST 13	Topics in Contemporary Europe (1945 – Today)

B. Complete:

EURO ST 101A- 101B	European Studies Core I - Early Europe (Pre-1789) and European Studies Core II: Modern Europe (Post-1789)
--------------------	--

C. Seven courses from the generally approved and quarterly approved lists, four of which must be upper-division and five of which must be in the student's specialization.

D. Complete:

EURO ST 190W	Senior Seminar in European Studies
--------------	------------------------------------

**Residence Requirement for the Major:** At least five upper-division courses required for the major must be completed successfully at UCI.

**Specializations and Approved Courses:** The following specializations are available in the major in European Studies:

- Early Europe (Pre-1789)
- Modern Europe (Post-1789)
- French Studies
- German Studies
- Italian Studies
- Russian Studies
- Spanish Studies

The list of approved courses is extensive and varies from quarter to quarter, depending upon course scheduling. For complete up-to-date information about approved courses, students are advised to consult the European Languages and Studies website (<http://www.humanities.uci.edu/els/>).

A degree in European Studies prepares its graduates to enter advanced degree programs in international business, history, law, political science, and cultural studies. The strong academic skills and professional orientation acquired by European Studies majors are necessary to pursue successful careers in such fields as international banking, law, journalism, management, public relations, publishing, and government service, as well as social justice and non-governmental organization (NGO) work both in the United States and abroad. Humanities graduates in general learn to express ideas clearly, do independent research, and think analytically and imaginatively—the required tools for success beyond the undergraduate career.

## European Studies, Minor

The European Studies program focuses on the study of Europe from the vantage points of several disciplines in the humanities and social sciences. Because Europe is both a geographical place and an idea that changes throughout history, it has had different meanings at different times and in different places. The study of Europe thus requires an open, pluralistic, and interdisciplinary curriculum that takes a critical approach to the idea (or ideas) of Europe.

The program provides a multidisciplinary view of Europe as a whole and of its historical, political, and cultural formation and global implications and encounters with the non-European world. It also provides a focus on a specific area of European experience that cuts across traditional disciplinary and national boundaries. Participation in the UC Education Abroad Program in a European country is strongly recommended for all European Studies majors.

A. Select one of the following:

HISTORY 70B	Problems in History: Europe
EURO ST 9	Topics in Europe in the Middle Ages
EURO ST 10	Topics in Historical Foundations (1500-1800)
EURO ST S10	Historical Foundations: Europe and the Foundations of the Modern World
EURO ST 11	Issues and Institutions in Modern Europe (1789-1945)
EURO ST S11	Europe's Futures: 1755-Present
EURO ST 12	What is the Origin of Language?
EURO ST 13	Topics in Contemporary Europe (1945 – Today)

B. Complete:

EURO ST 101A- 101B	European Studies Core I - Early Europe (Pre-1789) and European Studies Core II: Modern Europe (Post-1789)
--------------------	--

**In addition to requirements A and B, European Studies minors take:**

C. Three courses selected from a single specialization, two of which must be upper-division.

**Residence Requirement for the Minor:** At least four upper-division courses required for the minor must be completed successfully at UCI. By petition, two of the four may be taken through the UC Education Abroad Program, provided course content is approved by the appropriate department Undergraduate Director.

**Specializations and Approved Courses:** The following specializations are available in the major in European Studies:

- Early Europe (Pre-1789)
- Modern Europe (Post-1789)
- French Studies
- German Studies
- Italian Studies

- Russian Studies
- Spanish Studies

The list of approved courses is extensive and varies from quarter to quarter, depending upon course scheduling. For complete up-to-date information about approved courses, students are advised to consult the European Languages and Studies website (<http://www.humanities.uci.edu/els/>).

## European Thought and Culture, M.A. (4+1)

The M.A. in European Thought and Culture draws on expertise from faculty in the Schools of Humanities and Social Sciences in order to take an interdisciplinary approach to this area of study. The degree provides students with a rigorous course of study in the foundational philosophical texts and cultural products in literature and the arts produced in Europe from the Middle Ages to the present, locating them in their historical contexts.

Students may enter the program from two different tracks: the 4+1 B.A./M.A. program for current UCI undergraduates and the stand-alone M.A. track for students from outside UCI.

The M.A. program in European Thought and Culture has two tracks for admission, the UCI 4+1 B.A./M.A. and the stand-alone M.A. Standards of admissibility are specific to each track and are as follows:

### 4+1 B.A./M.A. Track

- Completed graduate application
- Official transcript
- One letter of recommendation from an ETC faculty member or faculty member in a related field
- Writing sample
- Current UCI undergraduate student status
- Cumulative 3.0 GPA
- Cumulative 3.3 GPA in major
- Completion of EURO ST 200A, EURO ST 200B, and EURO ST 200C with a grade of B or higher
- Completion of two additional European Studies courses as defined by the European Studies Generally Approved Courses (<http://www.humanities.uci.edu/els/euro/approved.php>) and/or the Quarterly Approved Courses (<http://www.humanities.uci.edu/els/euro/quarterly.php>) list.
- Demonstrated reading knowledge in one European language other than English. See Language Requirement.

Applications are accepted on a rolling basis during the final year of undergraduate study.

### Stand-Alone M.A. Track

- Completed graduate application
- Official transcript
- Three letters of recommendation from faculty in related fields
- Writing sample
- Cumulative 3.0 GPA
- Cumulative 3.3 GPA in B.A. major
- Completion of one European language other than English. See Language Requirement.

Applications are accepted for fall admission only.

## Course Requirement

All M.A. students must complete a total of nine courses (36 units) for the degree:

A. Complete:

EURO ST 200A	Core Seminar I: Foundations of European Thought and Culture
EURO ST 200B	Core Seminar II: Theorizing Periods and Movements in European Thought and Culture
EURO ST 200C	Core Seminar III: European Thought and Culture Beyond Europe
EURO ST 201	Topics in European Studies (four courses)
EURO ST 299	Independent Research (two courses)

## Language Requirement

Students are required to demonstrate reading knowledge in one European language other than English. For all students, this prerequisite requirement is expected to be completed by the time they receive their B.A. through completion of two years of a European language (2C level or equivalent).

## Degree Conferral

All M.A. students must complete one of the following options as their degree capstone:

### Plan I – Thesis

The thesis, approximately 25 pages in length, is a piece of independent research reviewed and approved by the faculty advisor and thesis committee.

### Plan II – Comprehensive Exam

In this examination, students will have a 48-hour period to answer and submit a total of three essays; one 10-page essay on a specialized topic of research, and two five-page essays related to topics covered throughout degree coursework.

## Time to Degree

Students are expected to complete all degree requirements and the Master's thesis/comprehensive exam within one year (three quarters). Maximum time to degree is two years.

## French, B.A.

The Undergraduate Program in French offers a broad humanistic course of study designed for students with many interests. The orientation of the program is multidisciplinary, where the study of literature is linked to critical, historical, and political concerns. Courses reflect the faculty's interest in the related disciplines of history, philosophy, anthropology, visual studies, gender and sexuality studies, political science, postcolonial studies, and comparative literature. Students should consult with the faculty to plan a coherent program of courses to fulfill the major requirements. Students also should consult with faculty members concerning career plans in areas such as teaching, business, journalism, law, public service, as well as social justice and international non-governmental organization (NGO) work.

Lower-division language courses encourage students to participate in the creative process of language, to think in French as they learn to understand, speak, read, and write. These courses are taught entirely in French, and the approach to teaching stresses the interdependence of the four basic language skills and makes them mutually reinforcing.

At the intermediate lower-division level, texts of contemporary literary and social interest provide the focus for advanced conversation, reading, and composition.

A series of more advanced grammar and composition courses are generally taken in the third year of language study. FRENCH 102A, FRENCH 102B, FRENCH 102C, FRENCH 102D, and FRENCH 102E carry on the work of the intermediate levels; FRENCH 102B and FRENCH 102D focus attention on particular issues and themes.

Upper-division offerings are taught either in the seminar mode or in small group settings. Because classes are limited in size, they promote and encourage participation and discussion and facilitate direct contact with professors. In recent years, courses have been offered in Literature and the Enlightenment, the Surrealist Imagination, Autobiography, Francophone Literature, Political Fictions, Women of Paris, Tales of the Fantastic, the French New Wave, the Body in Renaissance Literature and Art, Paris as Art Capital, Black Paris/Paris Noir, French Critical Theory, France and Algeria, and Marcel Proust. The content of courses changes yearly according to the interests of both faculty and students.

The program strongly encourages its students to take advantage of the study-abroad programs in French-speaking countries to improve their language skills and gain invaluable cultural experience in a foreign university setting. The program recommends the UC Education Abroad Program, which runs programs of differing lengths in France (Lyon, Bordeaux, and Paris). Credit for courses taken through study-abroad programs is available. Students are advised to discuss their course of study with the Undergraduate Director before their departure and to arrange to bring home proof of their work.

Language placement examinations are not required, although an optional placement examination is available. Students will be placed in French language courses according to their years of previous study. See Language Other Than English Placement and Progression.

Transfer students who have had a previous course (or courses) in French from another college or university who want to enroll in any FRENCH 1A through FRENCH 2C course at UCI must take a copy of their transcript to their academic counseling office in order to receive authorization to enroll in the appropriate course. In exceptional cases, students may be advised to take FRENCH 2C at the same time as FRENCH 102A, FRENCH 102B, FRENCH 102C, FRENCH 102D, or FRENCH 102E in order to move more quickly through the major or minor.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Departmental Requirements for the Major

A. Select two courses from the following:

FRENCH 102A	Grammar and Composition
FRENCH 102B	Topics in Issues in French and Francophone Culture
FRENCH 102C	Translation
FRENCH 102D	Topics in the Work World in French

**FRENCH 102E****Advanced French Language and Style**

B. Complete 10 additional upper-division French courses other than FRENCH 102A, 102B, 102C, 102D, or 102E:

A maximum of four courses may be taught entirely in English.

At least one course must be completed in each of the following historical periods:

- Pre-18th century literature and culture
- 18th or 19th century literature and culture
- 20th or 21st century literature and culture

**Residence Requirement for the Major:** Five upper-division courses must be successfully completed at UCI, of which a maximum of three may be taught entirely in English.

**Education Abroad Option:** A maximum of four upper-division courses taken during study abroad may be counted toward the major requirement. All such courses must be approved by the Undergraduate Director and students are advised to consult with the Undergraduate Director before and after their stay abroad. Course approval typically involves the following: 1) Presentation of syllabi and other pertinent course materials (term papers, exams, etc.) from the host university, and 2) approval from the Undergraduate Director and the Humanities Office of Undergraduate Study. In planning their undergraduate career, all students should keep in mind the Residence Requirement (stated above).

The great majority of students who major in French pursue careers in education, business, and commerce, where they can take advantage not only of their proficiency in French language but also of their knowledge of French and Francophone literature and culture. Students also go on to law school, to medical school, and to careers in the diplomatic service or NGOs. The multidisciplinary approach to the study of literature and culture teaches students to think critically and develops analytical skills that can be applied to a wide range of problems. It also helps students develop the interpretive and writing skills necessary to express their own ideas clearly and persuasively. Whether they enter business or professions such as law, education, or government, French majors acquire the intellectual and communicative skills requisite for success.

## French, Minor

The Undergraduate Program in French offers a broad humanistic course of study designed for students with many interests. The orientation of the program is multidisciplinary, where the study of literature is linked to critical, historical, and political concerns. Courses reflect the faculty's interest in the related disciplines of history, philosophy, anthropology, visual studies, gender and sexuality studies, political science, postcolonial studies, and comparative literature.

Lower-division language courses encourage students to participate in the creative process of language, to think in French as they learn to understand, speak, read, and write. These courses are taught entirely in French, and the approach to teaching stresses the interdependence of the four basic language skills and makes them mutually reinforcing.

At the intermediate lower-division level, texts of contemporary literary and social interest provide the focus for advanced conversation, reading, and composition.

A series of more advanced grammar and composition courses are generally taken in the third year of language study. FRENCH 102A, FRENCH 102B, FRENCH 102C, FRENCH 102D, and FRENCH 102E carry on the work of the intermediate levels; FRENCH 102B and FRENCH 102D focus attention on particular issues and themes.

Upper-division offerings are taught either in the seminar mode or in small group settings. Because classes are limited in size, they promote and encourage participation and discussion and facilitate direct contact with professors. In recent years, courses have been offered in Literature and the Enlightenment, the Surrealist Imagination, Autobiography, Francophone Literature, Political Fictions, Women of Paris, Tales of the Fantastic, the French New Wave, the Body in Renaissance Literature and Art, Paris as Art Capital, Black Paris/Paris Noir, French Critical Theory, France and Algeria, and Marcel Proust. The content of courses changes yearly according to the interests of both faculty and students.

The program strongly encourages its students to take advantage of the study-abroad programs in French-speaking countries to improve their language skills and gain invaluable cultural experience in a foreign university setting. The program recommends the UC Education Abroad Program, which runs programs of differing lengths in France (Lyon, Bordeaux, and Paris). Credit for courses taken through study-abroad programs is available. Students are advised to discuss their course of study with the Undergraduate Director before their departure and to arrange to bring home proof of their work.

Language placement examinations are not required, although an optional placement examination is available. Students will be placed in French language courses according to their years of previous study. See Language Other Than English Placement and Progression.

Transfer students who have had a previous course (or courses) in French from another college or university who want to enroll in any FRENCH 1A through FRENCH 2C course at UCI must take a copy of their transcript to their academic counseling office in order to receive authorization to enroll in the appropriate course. In exceptional cases, students may be advised to take FRENCH 2C at the same time as FRENCH 102A, FRENCH 102B, FRENCH 102C, FRENCH 102D, or FRENCH 102E in order to move more quickly through the major or minor.

A. Select two courses from the following:

**FRENCH 102A****Grammar and Composition**

FRENCH 102B	Topics in Issues in French and Francophone Culture
FRENCH 102C	Translation
FRENCH 102D	Topics in the Work World in French
FRENCH 102E	Advanced French Language and Style

B. Complete at least five upper-division French courses other than FRENCH 102A, 102B, 102C, 102D, or 102E:

A maximum of three courses may be taught entirely in English.

At least one course must be completed in each of the following historical periods:

- Pre-18th century literature and culture
- 18th or 19th century literature and culture
- 20th or 21st century literature and culture

**Residence Requirement for the Minor:** At least four upper-division courses required for the minor must be completed successfully at UCI, of which a maximum of two may be taught entirely in English. By petition, two of the four may be taken through the UC Education Abroad Program, providing course content is approved in advance by the appropriate department Undergraduate Director.

## German Studies, B.A.

The German Studies programs emphasize the humanistic endeavor of understanding and evaluating culture. Courses are focused on language, literature, and film in context, that is, within the historical, social, philosophical, linguistic, intellectual, and political circumstances of their production and continuing reception. Courses on German, Austrian, and Swiss literature, film, and culture offer a variety of critical perspectives from historical, social, or politically engaged readings to feminist analysis and cultural studies. Topics range from authors, periods, and genres to the history of German-language literature and film, philosophy, theory and criticism, European cultural relations, and cultural artifacts in a globalized social and political context.

The German Studies major can be combined as a double major with any other UCI course of study, and the minor may be taken in tandem with any UCI major.

Courses in the program are taught in German to the extent compatible with the aim of the course. In the lower-division language courses students develop skills in speaking, listening, reading, and writing through an engaging, collaborative, task-based curriculum. The courses place a great deal of emphasis on meaningful cultural literacy in German, employing a diverse range of authentic texts and materials from the beginning. During the second year (intermediate), students benefit from a curriculum based on authentic literary and cultural content (theatre, media) and simulation of "real world" situations. These courses have the additional goal of contributing to students' education in the humanities and developing their skills in critical thinking.

After completion of the intermediate level, students enroll in the GERMAN 101–GERMAN 105 series, which emphasizes advanced reading, writing, and speaking skills while providing an introduction to a variety of German topics and texts in literature, culture, film, linguistics, and business. These courses are taken either in preparation for, or concurrently with GERMAN 115, GERMAN 118, GERMAN 119, GERMAN 120, GERMAN 130, which provide advanced instruction in periods ranging historically from the Reformation to the present and cover a variety of topics and approaches. A further series of courses (GERMAN 140, GERMAN 150, GERMAN 160, GERMAN 170) is taught in English for both German Studies students and those who do not speak the language, and covers topics in German, Austrian, and Swiss literature and culture, literary theory, philosophy, linguistics, and criticism as well as German-language cinema.

Students are encouraged to participate in work- and study-abroad programs in German-speaking countries. The Department recommends the UC Education Abroad Program (EAP) in Berlin where students may enroll at any of the city universities (Free University, Humboldt University, Berlin Technical University) and take courses at others as desirable. UCEAP students complete an advanced language program before enrolling in university courses.

German placement tests are recommended for students who have successfully completed foreign language classes in high school or elsewhere. To obtain information about the German placement test, contact the UCI Academic Testing Office at 949-824-6207. Students with college-level course work should present their transcript to their academic advising office, for assistance in determining which UCI course to take.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Departmental Requirements for the Major

A. Select six of the following:

GERMAN 101	Topics in Introduction to German Literature and Culture
GERMAN 102	Topics in German Culture and Society
GERMAN 103	Topics in German Film
GERMAN 104	Topics in German Linguistics
GERMAN 105	German for Professions
GERMAN 115	Topics in Advanced German for Business and Economics

GERMAN 117	
GERMAN 118	Topics in Studies in the Age of Goethe
GERMAN 119	Topics in 19th Century German Literature and Culture
GERMAN 120	Topics in 20th Century German Literature and Culture
GERMAN 130	Topics in German Literature and Culture
GERMAN 197	German Internship
B. Select six additional courses chosen from Section A and below: <sup>1</sup>	
GERMAN 140	Topics in Literary Theory and Criticism
GERMAN 150	German Literature and Culture in Translation
GERMAN 160	German Cinema
GERMAN 170	Topics in German Linguistics
EURO ST 9	Topics in Europe in the Middle Ages
EURO ST 10	Topics in Historical Foundations (1500-1800)
EURO ST S10	Historical Foundations: Europe and the Foundations of the Modern World
EURO ST 11	Issues and Institutions in Modern Europe (1789-1945)
EURO ST S11	Europe's Futures: 1755-Present
EURO ST 12	What is the Origin of Language?
EURO ST 13	Topics in Contemporary Europe (1945 – Today)
EURO ST 101A	European Studies Core I - Early Europe (Pre-1789)
EURO ST 101B	European Studies Core II: Modern Europe (Post-1789)
LSCI 3	Introduction to Linguistics
Comparative Literature <sup>2</sup>	
German history <sup>2</sup>	
German philosophy <sup>2</sup>	
German political science <sup>2</sup>	

<sup>1</sup> GERMAN 140, GERMAN 150, GERMAN 160, GERMAN 170 are variable topics courses and may be repeated for credit as topics vary; one of which can be taken in satisfaction of the upper-division writing requirement.

<sup>2</sup> Must be approved by the advisor for the major.

**Residence Requirements for the Major:** Five upper-division courses must be taken in residence at UCI for the major. However, if a student participates in the Education Abroad Program, two of those can be taken abroad, pending approval from the department.

The ability to speak and write German can open up opportunities in communications, international business and banking, transportation, government, science and technology, tourism, library services, and teaching, as well as in social justice and non-governmental organization (NGO) work. Because German plays an important role in modern technology, employers in international law, business, the film industry, the airline and travel industry, journalism, professional translating, and all levels of education increasingly seek students with a knowledge of German. German is excellent preparation for professional schools. It can be combined successfully with work in the natural sciences, business and management, and computer sciences, and it is invaluable for advanced work in the humanities and the arts.

## German Studies, Minor

The German Studies programs emphasize the humanistic endeavor of understanding and evaluating culture. Courses are focused on language, literature, and film in context, that is, within the historical, social, philosophical, linguistic, intellectual, and political circumstances of their production and continuing reception. Courses on German, Austrian, and Swiss literature, film, and culture offer a variety of critical perspectives from historical, social, or politically engaged readings to feminist analysis and cultural studies. Topics range from authors, periods, and genres to the history of German-language literature and film, philosophy, theory and criticism, European cultural relations, and cultural artifacts in a globalized social and political context.

The German Studies major can be combined as a double major with any other UCI course of study, and the minor may be taken in tandem with any UCI major.

Courses in the program are taught in German to the extent compatible with the aim of the course. In the lower-division language courses students develop skills in speaking, listening, reading, and writing through an engaging, collaborative, task-based curriculum. The courses place a great deal of emphasis on meaningful cultural literacy in German, employing a diverse range of authentic texts and materials from the beginning. During the second year (intermediate), students benefit from a curriculum based on authentic literary and cultural content (theatre, media) and simulation of “real world” situations. These courses have the additional goal of contributing to students’ education in the humanities and developing their skills in critical thinking.

After completion of the intermediate level, students enroll in the GERMAN 101 –GERMAN 105 series, which emphasizes advanced reading, writing, and speaking skills while providing an introduction to a variety of German topics and texts in literature, culture, film, linguistics, and business. These courses are taken either in preparation for, or concurrently with GERMAN 115 , GERMAN 118 , GERMAN 119 , GERMAN 120 , GERMAN 130 , which provide advanced instruction in periods ranging historically from the Reformation to the present and cover a variety of topics and approaches. A further series of courses (GERMAN 140 , GERMAN 150 , GERMAN 160 , GERMAN 170 ) is taught in English for both German Studies students and those who do not speak the language, and covers topics in German, Austrian, and Swiss literature and culture, literary theory, philosophy, linguistics, and criticism as well as German-language cinema.

Students are encouraged to participate in work- and study-abroad programs in German-speaking countries. The Department recommends the UC Education Abroad Program (EAP) in Berlin where students may enroll at any of the city universities (Free University, Humboldt University, Berlin Technical University) and take courses at others as desirable. UCEAP students complete an advanced language program before enrolling in university courses.

German placement tests are recommended for students who have successfully completed foreign language classes in high school or elsewhere. To obtain information about the German placement test, contact the UCI Academic Testing Office at 949-824-6207. Students with college-level course work should present their transcript to their academic counseling office, for assistance in determining which UCI course to take.

A. Select four of the following:

GERMAN 101	Topics in Introduction to German Literature and Culture
GERMAN 102	Topics in German Culture and Society
GERMAN 103	Topics in German Film
GERMAN 104	Topics in German Linguistics
GERMAN 105	German for Professions
GERMAN 115	Topics in Advanced German for Business and Economics
GERMAN 117	
GERMAN 118	Topics in Studies in the Age of Goethe
GERMAN 119	Topics in 19th Century German Literature and Culture
GERMAN 120	Topics in 20th Century German Literature and Culture
GERMAN 130	Topics in German Literature and Culture

B. Select three of the following:

GERMAN 101	Topics in Introduction to German Literature and Culture
GERMAN 102	Topics in German Culture and Society
GERMAN 103	Topics in German Film
GERMAN 104	Topics in German Linguistics
GERMAN 105	German for Professions
GERMAN 115	Topics in Advanced German for Business and Economics
GERMAN 117	
GERMAN 118	Topics in Studies in the Age of Goethe
GERMAN 119	Topics in 19th Century German Literature and Culture
GERMAN 120	Topics in 20th Century German Literature and Culture
GERMAN 130	Topics in German Literature and Culture
GERMAN 140	Topics in Literary Theory and Criticism
GERMAN 150	German Literature and Culture in Translation
GERMAN 160	German Cinema
GERMAN 170	Topics in German Linguistics
EURO ST 9	Topics in Europe in the Middle Ages
EURO ST 10	Topics in Historical Foundations (1500-1800)
EURO ST S10	Historical Foundations: Europe and the Foundations of the Modern World
EURO ST 11	Issues and Institutions in Modern Europe (1789-1945)
EURO ST S11	Europe's Futures: 1755-Present
EURO ST 12	What is the Origin of Language?
EURO ST 13	Topics in Contemporary Europe (1945 – Today)
EURO ST 101A	European Studies Core I - Early Europe (Pre-1789)
EURO ST 101B	European Studies Core II: Modern Europe (Post-1789)
LSCI 3	Introduction to Linguistics

Comparative Literature <sup>1</sup>German history <sup>1</sup>German philosophy <sup>1</sup>German political science <sup>1</sup><sup>1</sup> Must be approved by the advisor for the minor.

**Residence Requirement for the Minor:** Four upper-division courses required for the minor must be completed successfully at UCI. By petition, two of the four may be taken through the UC Education Abroad Program, provided that course content is approved in advance by the German Undergraduate Director and the Humanities Office of Undergraduate Study.

## German, Ph.D.

The graduate programs in German at UCI combine innovation with a solid foundation in traditional approaches. The course of study focuses on both the German literary tradition and foreign language pedagogy, with the goal of integrating works of literature, philosophy, and art into pertinent cultural, theoretical, and historical contexts in teaching and research. UC Irvine has a decades-long reputation for excellence in the study of Critical Theory, having placed first in most rankings, and the campus provides a learning context that encourages students to push the boundaries of thinking in their discipline.

Students may apply to either the M.A. program or the Ph.D. program, but only students applying to the Ph.D. program can be admitted with fellowship funding. Students with a B.A. may apply directly to the Ph.D. program and receive fellowship support, but their official advancement into the Ph.D. program is contingent upon successful completion of the M.A. before or during the second year of study. Students who already hold the M.A. degree are also encouraged to apply to the Ph.D. program.

The Ph.D. program is organized to encourage completion within five years, and there is special funding and potential employment available for those who do finish in five years. A student arriving with a B.A. normally will require three years to complete course work for the Ph.D. and qualify for advancement to candidacy. A student arriving with an M.A. will normally require two years to advance to candidacy. Most of the course work is done within the Department, but students are encouraged to broaden their studies by taking related courses in other departments in the School of Humanities, such as comparative literature, critical theory, feminist theory, or visual studies; other combinations of courses may be selected in consultation with the graduate advisor. Our innovative exam structure (involving course-syllabus development) and post-exam timeline are designed both to expedite progress to degree and to enhance the professional training of our students.

For students who enter with normal academic preparation and pursue a full-time program of study, the normative time to degree for the Ph.D. is six years or less.

The program requires a minimum of 22 approved courses from students entering with a bachelor's degree. These may include courses in philosophy, history, comparative literature, and others suitable for the individual student's program of study. The student also will participate in each of the German Program's colloquia. The student will augment the reading list and keep it current during the whole course of study. At least two years of residence are required.

Students entering with the master's degree will be advised individually as to remaining course requirements.

### Qualifying Examination

In order to advance to candidacy, the student must take and pass a qualifying examination. At least two months prior to the planned date of the exam, students must submit a comprehensive reading list, prepared in consultation with their committee chair, to the examination committee. The committee may make recommendations to the list. On the basis of that list, students must design three courses, drafted in consultation with the student's committee chair. These courses should be graduate seminars organized around topics, genres, authors, or periods. At least one of these courses must comprise the student's intended area of dissertation research. The three courses must be clearly distinct and have minimal overlap. These courses must include reading lists of required and optional texts, main secondary literature, a written justification/course description, and a basic syllabus (for a 13-week semester course). No more than one course may be a modification of a seminar taken in the program. These courses must be submitted to the committee members at least two weeks prior to an oral examination date. Students must submit a dissertation prospectus to their advisor and, following approval by the advisor, circulate it to the entire committee. The oral exam will be a three-hour exploration of the reading list, focusing on the courses. In addition, part of the qualifying exam will involve a discussion of the student's dissertation prospectus. Upon successful completion of the qualifying examination, the candidate will have advanced to Ph.D. candidacy.

### Dissertation Prospectus

Students must submit a dissertation prospectus to their advisor and, following approval by the advisor, circulate it to the entire committee.

### Dissertation Chapter Review

Students must submit a substantial piece of writing (approximately 45 pages) from their dissertation ordinarily in the form of a chapter and a comprehensive bibliography. In consultation with their dissertation committee chair, they schedule a date and time for the oral review with the committee,

which lasts approximately two-three hours. Prior to the oral review the student will make a public presentation, open to the UCI community and guests, in the form of a lecture with questions and answers.

### **Doctoral Colloquium**

Students who have advanced to candidacy and are in residence must attend a colloquium for doctoral candidates. The colloquium will be held at least two times per quarter. Students will be expected to present sections of their prospectus or dissertation.

### **Dissertation Defense**

The oral defense of the dissertation focuses on the adequacy of the student's research and thesis.

### **Normative Time to Degree and Expected Programs of Study**

*For students entering with a B.A.:*

Year 1: Course work;

Year 2: Course work; M.A. completed;

Year 3: Course work; Qualifying Examination and Dissertation Prospectus (latest, fall of year four); advance to candidacy;

Year 4: Dissertation chapter review and public presentation;

Year 5: Completion of dissertation; defense.

*For students entering with an M.A.:*

Year 1: Course work;

Year 2: Course work; Qualifying Examination and Dissertation Prospectus (latest, fall of year three); advance to candidacy;

Year 3: Dissertation chapter review and public presentation;

Year 4: Completion of dissertation; defense.

### **Teaching German**

Since the majority of German Ph.D. candidates choose careers that involve teaching, the faculty recognizes its obligation to offer them both outstanding pedagogical training and real-world preparatory experience. Therefore, all candidates for the German M.A. and Ph.D. are required to pass HUMAN 398A and HUMAN 398B - Foreign Language Teaching: Approaches and Methods - which together comprise one graduate seminar taught over two quarters. In addition, all candidates for the German M.A. and Ph.D. program are required to teach under the supervision of a faculty member one course in each of at least three quarters (for which they will receive credit as GERMAN 399). Three of these courses may be counted toward the 22 courses required for the Ph.D. HUMAN 398A and HUMAN 398B will not count toward the 22 courses required for the Ph.D.

### **Faculty Mentors**

Each graduate student will be assigned a faculty mentor to consult at least once each quarter about progress, the program, academic questions, or any other issues pertaining to the student's graduate career. A student may change mentors for any reason (indeed, without giving a reason) at any time after meeting with either the graduate advisor or chair.

### **First-Year Review**

Students ending their first year of study at UCI must undergo a more comprehensive review procedure. This applies to students entering with either a B.A. or an M.A. After the review, students will be apprised of the faculty's evaluation and advised on a future course of study or recommended for discontinuation of the program.

### **Annual Review**

All students will undergo an annual review by the faculty of the program. Each spring the faculty will meet to discuss students' progress in the program. Annual review and evaluation of student performance and progress assure both the student and the faculty that each student is meeting the academic standards, teaching standards (for teaching assistants and associates, readers, and "ABD" lecturers), and professional standards of conduct expected of graduate students in the program. The review process provides an opportunity to assess and make recommendations regarding any deficiencies in student performance and progress. The following factors will be considered in determining graduate student performance and progress: grade point average, time to degree, foreign language requirement, and teaching performance.

### **Grade Point Average**

All graduate students in German, including those in both the master's program and the doctoral program, are expected to maintain a 3.3 GPA. A GPA below 3.3 in any quarter falls below the academic standard expected by the program. Pursuant to the terms of appointment, a student whose GPA falls below 3.3 in any given quarter and whose cumulative GPA is not 3.3 by the end of the academic year may be ineligible for funding, and faculty may recommend the student be disqualified from the program.

## Foreign Language Requirements

Students must possess reading knowledge of one language other than German or English. This can be demonstrated by completing one year or the equivalent of University-level language study (1C), or passing one of the 97 graduate reading courses, or passing a translation examination administered by the Department. In the two-hour examination, the student translates selections from a scholarly book or article in the target language into English. A dictionary may be used during the examination. Full-time students must demonstrate near-native speaking abilities in German and English. Students with significant deficiencies in language competency that will adversely affect their academic progress normally will not be admitted to doctoral candidacy. Students in the doctoral program will meet language requirements on a schedule established by their doctoral committees, but in all cases the requirements must be met prior to taking the Ph.D. qualifying examination. If these requirements are not met in a timely manner, faculty may recommend disqualification from the program.

## Italian Studies, Minor

The Italian Program at the University of California, Irvine offers a minor in Italian Studies with courses both in Italian language from introductory to intermediate, and in English on a variety of literary and cultural subjects, such as Dante, Renaissance Theater, Holocaust literature, and contemporary migration. Taking an interdisciplinary approach, students study Italian culture through film, music, theater, history and literature. Beyond the Department of European Languages and Studies, Italian Studies students also take courses in history, art history, classics, and other areas.

Students may also choose to major or minor in European Studies (<https://www.humanities.uci.edu/els/euro/ugrad.php>) with a specialization in Italian Studies.

The University of California also offers students many opportunities to expand their knowledge of Italian by studying in Italy in the cities of Bologna, Florence, Rome, Milan, and other locations, applying a number of credits earned abroad directly to their major or minor at UCI. Learn more about UC Education Abroad by visiting the UCEAP (<https://uceap.universityofcalifornia.edu/study-abroad-in-italy/?f%5B0%5D=country%3A28>) website. For additional programs in Italy led by UC faculty see the Other UC Programs (<https://studyabroad.uci.edu/other-uc-programs/>) webpage.

The minor in Italian Studies is an interdisciplinary curriculum that allows students to go beyond second-year Italian and engage in various aspects of Italian culture by taking courses in Italian literature and other courses related to Italian history and culture in the Departments of Art History, Comparative Literature, English, Film and Media Studies, History, and Philosophy.

## Requirements for the Italian Studies Minor

A. Complete the following:

ITALIAN 2C	Intermediate Italian
------------	----------------------

B. Three course topics from the following, no more than two of which may be lower-division:

ITALIAN 50	Topics in Italian Culture
ITALIAN 150	Topics in Italian Literature and Culture

C. Four courses selected from the following, when topics are appropriate. No more than two courses may be taken from any one department, with the exception of Italian courses.

ART HIS 120	Studies in Renaissance and Baroque Art
ART HIS 121	Studies in Southern Renaissance Art
ART HIS 125	Studies in Southern Baroque Art
EURO ST 101A	European Studies Core I - Early Europe (Pre-1789)
EURO ST 101B	European Studies Core II: Modern Europe (Post-1789)
FLM&MDA 160	National/Regional Cinemas and Media
ITALIAN 150	Topics in Italian Literature and Culture
ART HIS 107	Studies in Roman Art
CLASSIC 140	Classics and History: The Ancient World
CLASSIC 150	Classical Mythology
CLASSIC 170	Topics in Classical Civilization
HISTORY 112D	Topics in Early Modern Europe
HISTORY 135E	Topics in the History of Science and Technology

**Residence Requirement for the Minor:** At least four upper-division courses must be completed successfully at UCI. By petition, two of the four may be taken at an Italian university through the UC Education Abroad Program, at a UCEAP study center in Italy, or through a UC Faculty-Led Program in Italy.

The Department strongly encourages its students to take advantage of the study-abroad programs in Italy to improve their language skills and gain invaluable cultural experience in a foreign university setting. The Department recommends the UC Education Abroad Program in Italy and UC Faculty-Led Programs in Italy.

Credit for courses taken through study-abroad programs is available. Students are advised to discuss their course of study with the Undergraduate Director before their departure and to arrange to bring home proof of their work.

## Russian Studies, Minor

Spanning both Europe and Asia, Russia is one of the world's dominant political entities. Its rich cultural traditions have enhanced world literature, theatre, art, film, and dance. As the world's first socialist state, it became a major political rival of the United States after the Second World War. In the past decade, Russians have abandoned their socialist system and are now in the process of making a rocky transition to capitalism. Although Russia lost sizable amounts of territory in this transition, the Russian language now serves as the *lingua franca* throughout many areas formerly controlled by the Soviet Union.

While the demand for specialists in various sectors of government has eased, relationships between our countries at other levels of society are growing more active and business opportunities are exciting and rewarding. Other areas in which the need for Russian language competence is evident right now include trade, environmental protection, social services, law, medicine, and technology.

All students in Russian language courses are encouraged to take part in the UC Education Abroad Program and spend a portion of their junior or senior year studying in Russia. Visit the Study Abroad Center website (<http://www.studyabroad.uci.edu>) for additional information.

The Russian Studies minor is a multidisciplinary curriculum combining the Humanities and Social Sciences. It is designed to introduce students to the rich history and culture of Russia and provide them with the intellectual and linguistic tools necessary for sustained engagement with this area of the world.

A. Complete:

RUSSIAN 2C	Intermediate Russian (or equivalent)
------------	--------------------------------------

B. Complete:

RUSSIAN 50	Russian Culture (three different topics)
------------	--

C. Select sixteen units of upper-division courses from the following:

RUSSIAN 150	Topics in Russian Literature
RUSSIAN 190	Topics in Russian Language Through Film
HISTORY 124B	Twentieth-Century Russia
HISTORY 190	Colloquium (when topics are related to Russia)
POL SCI 154F/ANTHRO 164P	Peoples and Cultures of Post-Soviet Eurasia
POL SCI 159	Special Topics in Comparative Politics (when topics are related to Russia)

A maximum of four units may be chosen from the following courses devoted in part to Russian themes: HISTORY 114, HISTORY 126B, and POL SCI 142D.

Students may petition other relevant courses.

**Residence Requirement for the Minor:** At least four upper-division courses required for the minor must be completed successfully at UCI. By petition, two of the four may be taken through the UC Education Abroad Program, provided course content is approved in advance by the appropriate department chair.

## Department of Film and Media Studies

**Fatimah Tobing-Rony, Department Chair**

2000 Humanities Gateway

949-824-3532

[www.humanities.uci.edu/filmandmediastudies/](http://www.humanities.uci.edu/filmandmediastudies/) (<http://www.humanities.uci.edu/filmandmediastudies/>)

The Department of Film and Media Studies at UC Irvine offers students a liberal arts education in the film, broadcast, and digital media landscape. Our majors acquire skills in theoretical and historical cultural analysis, and broad knowledge of the history of moving images. Students strengthen their writing through active engagement with all aspects of cinematic, broadcast, and digital culture. The department also teaches courses in screenwriting and production, with the goal of deepening the understanding of media through some hands-on training.

Film and Media Studies focuses on nurturing our diverse student body and our students' varied backgrounds and interests. Courses reflect an interdisciplinary and historically grounded approach to the study of moving images, on big and small screens alike. From parsing the history of television policy to writing for video games, our students get a unique interdisciplinary education in the historical and social background of the study of film, television, and new media. Our outstanding faculty are engaged in innovative research on topics like globalization, gender studies, queer theory, broadcast studies, intellectual history, new media and critical game studies, history of photography, and national cinema approaches to the analysis of

Film and Media Studies, and our courses give our students access to this cutting-edge research. In our production and screenwriting courses, students get hands-on experience creating short films, television pilots, webisodes, computer games, and other visual media.

Film and Media Studies students join their professors and industry professionals in attending some of the most important film festivals in our area. The department regularly invites film directors, scholars, and industry professionals to offer a rich array of programming including screening original films and media and hosting production-based workshops. UC Irvine's location in the heart of Southern California, close to studios and some of the most important film and television archives in the United States, makes outstanding internship opportunities and serious research possible for our majors. Our location makes it convenient for our students to do internships for credit at some of the leading companies in the entertainment industry. Students also have the opportunity to collaborate on filmmaking through our student-run club, the Film-Arts-Drama Alliance (FADA). FADA members write, direct, produce, and craft short films through the Zotfilm program in fall and winter quarters. In spring quarter, FADA screens these and other student-created films at Zotfest, one of the longest-running student-organized film festivals in the United States.

Film and Media Studies encourages students to take advantage of the many opportunities that UC Irvine offers to study abroad. Our students have studied in UCEAP programs all over the world and regularly earn credit towards their degrees. Information on these programs is available through the UCI Study Abroad Center (<http://www.studyabroad.uci.edu/>).

In order to cover the extra costs generated by the purchase and rental of media demanded by the specialized Film and Media Studies curriculum, the School of Humanities charges a laboratory fee to students taking Film and Media Studies courses.

## Career Opportunities

Film and Media Studies at UC Irvine prepares students for graduate study and professional life in the Film and Media Studies areas. Our students have been admitted to Ph.D. and M.F.A. programs at UCLA, USC, New York University, and the University of Texas at Austin. Film and Media studies majors have gone on to law school and to get Ph.D.s in a variety of fields. Alumni also make careers in all aspects of the entertainment industry, finding work in the film, television, and game industries in Southern California and beyond. Film and Media Studies students find careers in directing, cinematography, editing, journalism, advertising, marketing, and distribution. Our students' diverse backgrounds have enabled them to work in bilingual or global media outlets. The Department encourages all qualified students to do professional internships. Visit the internship page on our website (<http://www.humanities.uci.edu/filmandmediastudies/undergraduate/interns.php>) for more information about the diverse array of internships that you can do for credit.

The UCI Division of Career Pathways provides services to students and alumni including career counseling, information about job opportunities, a career library, and workshops on résumé preparation, job search, and interview techniques. See the UCI Division of Career Pathways website (<http://career.uci.edu/>) for additional information.

- Film and Media Studies, B.A.
- Film and Media Studies, Minor
- Graduate Program in Visual Studies

## Faculty

Catherine Benamou, Ph.D. New York University, *Associate Professor of Film and Media Studies; Culture and Theory; Visual Studies* (Hispanophone and Lusophone cinema and television, U.S. Latino media, Orson Welles and maverick cinema, transnational flows, spectatorship, cinematic memory and cultures of preservation)

Elizabeth M. Cane, M.F.A. University of California, Los Angeles, *Lecturer of Film and Media Studies*

Marie Cartier, Ph.D. Claremont Graduate University, *Lecturer of Film and Media Studies*

Desha Dauchan, M.F.A. University of California, Los Angeles, *Lecturer of Film and Media Studies*

Sohail Daulatzai, Ph.D. University of Southern California, *Associate Professor of Film and Media Studies; African American Studies; Visual Studies* (decolonization, empire, race, Muslim studies, Black studies)

Bambi Haggins, Ph.D. University of California, Los Angeles, *Associate Professor of Film and Media Studies; African American Studies; Visual Studies* (Black [African American] comedy in film, television, digital media and performance, television history, comedy as social and political discourse, African-American studies, American studies)

Kristen L. Hatch, Ph.D. University of California, Los Angeles, *Associate Professor of Film and Media Studies; Visual Studies* (classical Hollywood, stardom, melodrama, histories of gender, race and sexuality, girlhood studies)

Lucas Hilderbrand, Ph.D. New York University, *Professor of Film and Media Studies; Visual Studies* (Queer cultures and media, cultural studies, documentary, pornography, popular music, video art, histories of technology)

Victoria E. Johnson, Ph.D. University of Southern California, *Professor of Film and Media Studies; African American Studies; Culture and Theory; Visual Studies* (U.S. television, history, media industry studies, critical race theory, cultural geography, sound and music in popular media, media law and policy)

Peter O. Krapp, Ph.D. University of California, Santa Barbara, *Professor of Film and Media Studies; English; European Languages and Studies; Informatics; Music; Visual Studies* (digital culture, media history, cultural memory)

Felicidad (Bliss) Lim, Ph.D. New York University, *Professor of Film and Media Studies; Visual Studies* (Philippine cinema, temporality, postcolonial and feminist film theory, transnational horror and the fantastic, film archives)

Catherine Liu, Ph.D. Yale University, *Professor of Film and Media Studies; Visual Studies* (Hou Hsiao-hsien, culture wars, Frankfurt School, historiography of critical theory/cultural studies, surveillance, cold war culture and neoliberalism)

Glen M. Mimura, Ph.D. University of California, Santa Cruz, *Associate Professor of Film and Media Studies; Visual Studies* (minoritarian and political film; media and race; popular culture and social movements)

Allison J. Perlman, Ph.D. University of Texas at Austin, *Associate Professor of History; Film and Media Studies; Visual Studies* (history of broadcasting, American social movements, media law and policy, media activism, popular memory)

Fatimah Tobing Rony, Ph.D. Yale University, *Department Chair and Associate Professor of Film and Media Studies; Visual Studies* (ethnographic film, race and representation, film production)

Bonnie Ruberg, Ph.D. University of California, Berkeley, *Assistant Professor of Film and Media Studies; Visual Studies* (video games, digital media, digital cultures, queer studies, gender and sexuality)

Braxton Soderman, Ph.D. Brown University, *Assistant Professor of Film and Media Studies; Visual Studies* (digital and new media studies, video games, networks, digital art and electronic literature)

## Affiliate Faculty

Kyung Hyun Kim, Ph.D. University of Southern California, *Professor of Korean Culture; Asian American Studies; Film and Media Studies; Visual Studies* (East Asian cinema, modern Korea, critical theory)

Jared Charles Sexton, Ph.D. University of California, Berkeley, *Professor of African American Studies; Culture and Theory; Film and Media Studies; Visual Studies* (race and sexuality, policing and imprisonment, contemporary U.S. cinema and political culture, multiracial coalition, critical theory)

Michael F. Szalay, Ph.D. Johns Hopkins University, *Department Chair and Professor of English; Film and Media Studies; Visual Studies* (contemporary television and literature)

Roxanne Varzi, Ph.D. Columbia University, *Professor of Anthropology; Culture and Theory; Film and Media Studies; Religious Studies; Visual Studies* (Iran, media, war, visual anthropology, film studies, ethnographic and fiction writing)

## Courses

### FLM&MDA H80. Honors Seminar: Race Sport Media. 4 Units.

Honors seminar examining the intersection of race, sports, and media in everyday U.S. popular culture (film, TV, advertising, gaming, social media) and political culture. Materials fee.

Restriction: Campuswide Honors Collegium students only.

(IV and VII ).

### FLM&MDA 85A. Introduction to Film and Visual Analysis. 4 Units.

Introduces the language and techniques of visual and film analysis. Teaches students to analyze the moving image; emphasize framing, camera movement, and sound; and conveys how editing produces meaning, reproduces historical ideologies, fosters or disrupts narrative, and cues spectators.

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

(IV)

### FLM&MDA 85B. Broadcast Media History and Analysis. 4 Units.

History of broadcast media from the radio era to the present day, including social, political, institutional, and audience analysis as well as methods of visual and aural analysis of these media.

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

(IV)

**FLM&MDA 85C. New Media and Digital Technologies. 4 Units.**

The study of digital media, computer-mediated communication, and Internet cultures, from historical and theoretical perspectives.

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

**(IV)****FLM&MDA 101A. History of Film I: The Silent Era. 4 Units.**

The aesthetic, industrial, and socio-historical developments of cinema in the U.S. and internationally from its invention to the adoption of synchronous sound. Includes early exhibition, developments in narrative and editing, the formation of the studio system, and avant-garde film movements. Materials fee.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 101B. History of Film II: The Studio Era. 4 Units.**

The aesthetic, industrial, and socio-historical developments of cinema in the U.S. and internationally from the 1930s through the 1960s. Includes the Hollywood studio system, propaganda films, Italian neorealism, post-war Japanese cinema, and the French New Wave. Materials fee.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 101C. History of Film III: The Contemporary Era. 4 Units.**

The aesthetic, industrial, and socio-historical developments of cinema in the U.S. and internationally from the late 1960s to the present. Includes New Hollywood and independent U.S. films, ethnic cinemas, postcolonial cinemas, East-Asian new waves, and digital filmmaking. Materials fee.

Prerequisite: FLM&MDA 85A and FLM&MDA 101B. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 110. Film and Media Theory. 4 Units.**

Survey of major directions in film and media theory. Various theories of mass culture, realism, auteurism, semiotics, feminism, cultural studies, and theories of other media, with an emphasis on developing the student's ability to analyze and articulate a theoretical argument. Materials fee.

Prerequisite: FLM&MDA 85A and FLM&MDA 85B and FLM&MDA 85C and (FLM&MDA 101A or FLM&MDA 101B or FLM&MDA 101C). Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 111. Film and Media Theory and Practice. 4 Units.**

Seminar focusing on issues in film and media production and editing. Reading and exercises to understand aspects of film and media production (montage, sound, film movement, directing, and mise en scène), and how ideology works in tandem with style.

Prerequisite: FLM&MDA 85A and FLM&MDA 85B and FLM&MDA 85C and FLM&MDA 120A and (FLM&MDA 101A or FLM&MDA 101B or FLM&MDA 101C). Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 112. Genre Study . 4 Units.**

Critical approaches to the serial productions we call 'genre' films such as westerns, weepies, musicals, horror films, and others; televisual genres, such as sitcoms, drama, comedy, news, docudrama, police; Internet categories, such as chat-rooms, listservs, Web pages.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 113. Narrative/Image . 4 Units.**

What relations do sound, image, and story assume in film, television, video, and Internet narratives? In what ways do these media interact with and borrow from each other and traditional story-telling media? How have the new media explored non-narrative strategies.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 114. Film, Media, and the Arts. 4 Units.**

A synthetic entity, film draws on both established and popular arts. Looks at visual media's exchanges with 'high' and 'low' culture, exploring its relation to areas such as photography, music, painting, and architecture.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 115. Authorship . 4 Units.**

Theoretical and analytical discussions of visual media authorship, focusing on case studies of directors, producers, scriptwriters, and film, video, and digital artists.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 117A. Introduction to Screenwriting. 4 Units.**

Introduction to the technique and format of the screenplay, with a particular focus on its three act structural elements: coverage, treatment, and 60 beat outline. Materials fee.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 117B. Intermediate Screenwriting. 4 Units.**

Exercises in the development of screenplays, with emphasis on formal and structural considerations of character development. Students work with the hero structure and other character development methodologies, such as method acting. Materials fee.

Prerequisite: FLM&MDA 117A. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 117C. Screenwriting Workshop. 4 Units.**

Continuation and intensification of work initiated in 117B. Students complete a full-length screenplay. Concentrates on both practical and technical concerns, addressing pragmatic and aesthetic questions in intensive small-group discussions. Materials fee.

Prerequisite: FLM&MDA 117B. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 118A. Writing Television I. 4 Units.**

Introduction to the technique and format of the television screenplay. Focuses on character, storytelling, structure, and scene development; culminating in a one-hour drama series treatment and first act of the pilot.

Prerequisite: FLM&MDA 85B. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 118B. Writing Television II. 4 Units.**

Intermediate-level screenwriting class exploring the one-hour television drama format. Students write and workshop an original pilot, continuing work started in 118A, and finish a complete draft of the pilot script.

Prerequisite: FLM&MDA 118A. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 120A. Basic Production. 4 Units.**

Introduction to the basic apparatus of video/film production. The elementary essentials of production, including the use of camera and lenses, lighting, editing, and sound. Materials fee.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 120B. Intermediate Production. 4 Units.**

Students work on individual and group projects, utilizing skills and insights introduced in Film and Media Studies 120A. Materials fee.

Prerequisite: FLM&MDA 120A. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 120C. Production Workshop. 4 Units.**

As film and video are collaborative media, students form production groups and ultimately produce final 10-15-minute film/video projects. Materials fee.

Prerequisite: FLM&MDA 120B. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 130. Multicultural Topics in the Media. 4 Units.**

Investigation of media representations of gender, race, and sexuality in the United States. Topics include media images of and by one or more minority groups in the United States, including African Americans, Asian Americans, Chicano/Latinos, Native Americans, gays, and lesbians.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 139W. Writing on Film and Media. 4 Units.**

Writing on cinema, television, and/or digital culture, emphasizing identification of reliable sources, close readings, addressing academic, professional, and/or popular audiences. Requires at least 4,000 words of assigned composition.

Prerequisite: FLM&MDA 85A or FLM&MDA 85B or FLM&MDA 85C. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Film and Media Studies Majors only.

**(Ib)**

**FLM&MDA 143. Critical Theory of Television. 4 Units.**

Introduction to critical, theoretical, and scholarly understandings and analyses of television, which offer in-depth analyses of television programming, audience reception practices, and industry strategies of address.

Prerequisite: FLM&MDA 85B. Satisfactory completion of the Lower-Division Writing requirement.

**FLM&MDA 144. Studies in New Media. 4 Units.**

Advanced analysis of the technologies, texts, theories, and cultures of computers, video games, networks, or platforms.

Prerequisite: FLM&MDA 85C. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 145. Popular Culture and Media. 4 Units.**

Considers the forms, ideologies, consumption, and marketing of popular entertainment and technologies. May focus on cultural studies methods, transnational approaches, and synergy between media.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 146. Sound Studies. 4 Units.**

Focuses on the production, theories, and meanings of sound recordings, music, and/or audio technologies. Topics may include the cultures of popular music and audio devices, music television, and theories of film sound.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 150. Audiences and Reception. 4 Units.**

Explores the dynamics of address, interpretation, and appropriation between film and media texts and their viewers. Topics may include reception studies, fandom, audience-defined modes of production, demographics, spectatorial pleasure, and historical approaches to audiences.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 151. Documentary and Experimental Film and Media. 4 Units.**

Examines nonfiction and/or experimental cinemas and media, such as documentary, the historical avant-garde, video art, and activist media. Students consider the specific aesthetics and ideologies of forms distinct from narrative feature films.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 160. National/Regional Cinemas and Media. 4 Units.**

National schools, period styles, or cultural movements beyond U.S. cinema, as defined by national borders or by geographic regions, such as Latin America. May be approached from a comparative perspective.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 161. Global/Transnational Cinemas and Media. 4 Units.**

Analyzes the multinational production, circulation, and reception of film and media texts beyond singular national borders or specific geographic regions. Topics may include transnational co-productions, exports, and diasporic reception.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 162. US Cinema . 4 Units.**

Explores the modes of production and distribution, aesthetics, and contexts that have shaped cinema in the United States. Topics may include classical Hollywood, American independent cinema, or periods such as 1970s cinema.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 185. Television and New Media. 4 Units.**

Advanced seminar focusing on special topics in television and new media. Past examples have included courses on media marketing and brand identity; television and sound; game theory; and other issues related to popular culture, broadcast media, and new media technologies.

Prerequisite: FLM&MDA 85B or FLM&MDA 85C. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 190. Special Topics in Film and Modern Media. 4 Units.**

Special issues concerned with film and media history, theory, and criticism.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 191. Special Topics in Critical Practice. 4 Units.**

Integrates critical analysis, historical, and theoretical methods with creative projects to illuminate film and media production and industries. May include courses in adaptation, writing television, media activism, writing the short film, performance studies, and movie title sequences.

Prerequisite: FLM&MDA 85A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 192. Special Topics in Advanced Film Production. 4 Units.**

Focuses on special topics in production. Culminates in final 6-10-minute group film projects. Topics include producing, acting, and/or directing in short films, experimental films, documentaries, television, and other media.

Prerequisite: FLM&MDA 120A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 193. Special Topics in Advanced Screenwriting. 4 Units.**

Focuses on special topics in screenwriting. Topics include adaptation, alternative screenwriting, writing the first feature, act two construction, and rewriting.

Prerequisite: FLM&MDA 117A or FLM&MDA 118A. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

**FLM&MDA 197. Professional Internship. 2-4 Units.**

Professional internship in the film, broadcast, and/or digital media industries designed to provide students with closely supervised professional experience to enhance their understanding of media from industrial, historical, and critical perspectives. Journal and final report required.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

Restriction: Upper-division students only.

**FLM&MDA 198. Creative Project. 2-4 Units.**

Creative project in screenwriting, filmmaking, videomaking, or Web or internet design intended to provide advanced production and creative writing training beyond the Film and Media Studies 117A-B-C or 120A-B-C series. Final project required.

Prerequisite: (FLM&MDA 85A and FLM&MDA 117A and FLM&MDA 117B and FLM&MDA 117C) or (FLM&MDA 120A and FLM&MDA 120B and FLM&MDA 120C). Satisfactory completion of the Lower-Division Writing requirement. Recommended: FLM&MDA 101A.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Upper-division students only.

**FLM&MDA 199. Directed Research. 4 Units.**

Directed reading and research under supervision of a faculty member in topic areas not covered by regular course offerings. Final research paper required.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only.

**FLM&MDA 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## Film and Media Studies, B.A.

Film and Media Studies focuses on nurturing our diverse student body and our students' varied backgrounds and interests. Courses reflect an interdisciplinary and historically grounded approach to the study of moving images, on big and small screens alike. From parsing the history of television policy to writing for video games, our students get a unique interdisciplinary education in the historical and social background of the study of film, television, and new media. Our outstanding faculty are engaged in innovative research on topics like globalization, gender studies, queer theory, broadcast studies, intellectual history, new media and critical game studies, history of photography, and national cinema approaches to the analysis of Film and Media Studies, and our courses give our students access to this cutting-edge research. In our production and screenwriting courses, students get hands-on experience creating short films, television pilots, webisodes, computer games, and other visual media.

### Requirements for the B.A. in Film and Media Studies

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

#### Departmental Requirements for the Major

A. Complete the following:

FLM&MDA 85A	Introduction to Film and Visual Analysis
FLM&MDA 85B	Broadcast Media History and Analysis
FLM&MDA 85C	New Media and Digital Technologies
FLM&MDA 101A	History of Film I: The Silent Era
FLM&MDA 101B	History of Film II: The Studio Era
FLM&MDA 101C	History of Film III: The Contemporary Era

B. Complete either:

FLM&MDA 110	Film and Media Theory
or	
FLM&MDA 111	Film and Media Theory and Practice

C. Select one of the following:

FLM&MDA 117A	Introduction to Screenwriting
FLM&MDA 118A	Writing Television I
FLM&MDA 120A	Basic Production

D. Select four of the following:

FLM&MDA 112	Genre Study
FLM&MDA 113	Narrative/Image
FLM&MDA 114	Film, Media, and the Arts

FLM&MDA 115	Authorship
FLM&MDA 117B	Intermediate Screenwriting <sup>1</sup>
FLM&MDA 117C	Screenwriting Workshop <sup>1</sup>
FLM&MDA 118B	Writing Television II <sup>1</sup>
FLM&MDA 120B	Intermediate Production <sup>1</sup>
FLM&MDA 120C	Production Workshop <sup>1</sup>
FLM&MDA 130	Multicultural Topics in the Media
FLM&MDA 139W	Writing on Film and Media
FLM&MDA 143	Critical Theory of Television
FLM&MDA 144	Studies in New Media
FLM&MDA 145	Popular Culture and Media
FLM&MDA 146	Sound Studies
FLM&MDA 150	Audiences and Reception
FLM&MDA 151	Documentary and Experimental Film and Media
FLM&MDA 160	National/Regional Cinemas and Media
FLM&MDA 161	Global/Transnational Cinemas and Media
FLM&MDA 162	US Cinema
FLM&MDA 185	Television and New Media
FLM&MDA 190	Special Topics in Film and Modern Media
FLM&MDA 191	Special Topics in Critical Practice
FLM&MDA 192	Special Topics in Advanced Film Production
FLM&MDA 193	Special Topics in Advanced Screenwriting

<sup>1</sup> Only two of the courses marked may be applied toward this requirement.

**Residence Requirement for the Major:** At least five upper-division courses required for the major must be completed successfully at UCI.

Film and Media Studies at UC Irvine prepares students for graduate study and professional life in the Film and Media Studies areas. Our students have been admitted to Ph.D. and M.F.A. programs at UCLA, USC, New York University, and the University of Texas at Austin. Film and Media studies majors have gone on to law school and to get Ph.D.s in a variety of fields. Alumni also make careers in all aspects of the entertainment industry, finding work in the film, television, and game industries in Southern California and beyond. Film and Media Studies students find careers in directing, cinematography, editing, journalism, advertising, marketing, and distribution. Our students' diverse backgrounds have enabled them to work in bilingual or global media outlets. The Department encourages all qualified students to do professional internships. Visit the internship page on our website (<http://www.humanities.uci.edu/filmandmediastudies/undergraduate/interns.php>) for more information about the diverse array of internships that you can do for credit.

The UCI Division of Career Pathways provides services to students and alumni including career counseling, information about job opportunities, a career library, and workshops on résumé preparation, job search, and interview techniques. See the UCI Division of Career Pathways website (<http://career.uci.edu/>) for additional information.

## Film and Media Studies, Minor

Film and Media Studies focuses on nurturing our diverse student body and our students' varied backgrounds and interests. Courses reflect an interdisciplinary and historically grounded approach to the study of moving images, on big and small screens alike. From parsing the history of television policy to writing for video games, our students get a unique interdisciplinary education in the historical and social background of the study of film, television, and new media. Our outstanding faculty are engaged in innovative research on topics like globalization, gender studies, queer theory, broadcast studies, intellectual history, new media and critical game studies, history of photography, and national cinema approaches to the analysis of Film and Media Studies, and our courses give our students access to this cutting-edge research. In our production and screenwriting courses, students get hands-on experience creating short films, television pilots, webisodes, computer games, and other visual media.

### Requirements for the Minor in Film and Media Studies

#### Departmental Requirements

A. Complete:

FLM&MDA 85A	Introduction to Film and Visual Analysis
-------------	--

B. Select three of the following:

FLM&MDA 85B	Broadcast Media History and Analysis
FLM&MDA 85C	New Media and Digital Technologies

FLM&MDA 101A	History of Film I: The Silent Era
FLM&MDA 101B	History of Film II: The Studio Era
FLM&MDA 101C	History of Film III: The Contemporary Era
C. Select three of the following:	
FLM&MDA 110	Film and Media Theory
FLM&MDA 111	Film and Media Theory and Practice
FLM&MDA 112	Genre Study
FLM&MDA 113	Narrative/Image
FLM&MDA 114	Film, Media, and the Arts
FLM&MDA 115	Authorship
FLM&MDA 130	Multicultural Topics in the Media
FLM&MDA 143	Critical Theory of Television
FLM&MDA 144	Studies in New Media
FLM&MDA 145	Popular Culture and Media
FLM&MDA 146	Sound Studies
FLM&MDA 150	Audiences and Reception
FLM&MDA 151	Documentary and Experimental Film and Media
FLM&MDA 160	National/Regional Cinemas and Media
FLM&MDA 161	Global/Transnational Cinemas and Media
FLM&MDA 162	US Cinema
FLM&MDA 185	Television and New Media
FLM&MDA 190	Special Topics in Film and Modern Media
FLM&MDA 191	Special Topics in Critical Practice

**Residence Requirement for the Minor:** Four upper-division courses must be completed successfully at UCI. By petition, two of the four may be taken through the UC Education Abroad Program, providing course content is approved in advance by the appropriate department chair.

## Department of Gender and Sexuality Studies

**Jeanne Scheper, Department Chair**

3000 Humanities Gateway

949-824-2376

<http://www.humanities.uci.edu/genderandsexualitystudies/>

UCI's Department of Gender and Sexuality Studies is dedicated to the study of gender and sexuality in their complex articulation with other social categories such as race, ethnicity, class, religion, and nationality. The Department's goal is to foster critical and creative analysis of the various disciplinary perspectives—historical, political, economic, representational, technological, and scientific—that have constituted women, gender, and sexuality as objects of study. By emphasizing a rigorous interdisciplinary perspective in their teaching and research, the Gender and Sexuality Studies faculty seek to produce new knowledge about the social meanings of gender, race, class, and sexuality, and to equip students with a range of analytical and methodological skills.

The field of Gender and Sexuality Studies grew out of Women's Studies, an interdisciplinary field that developed at a phenomenal rate from a handful of student-initiated courses in the early 1970s to more than 600 programs in colleges and universities across the United States offering degrees at the B.A., M.A., and Ph.D. levels. UCI's Department of Women's Studies was founded as a program in 1975 and has grown significantly since that time. To reflect its expanding scope of inquiry, the department changed its name in 2014 to the Department of Gender and Sexuality Studies. The Department offers a B.A. in Gender and Sexuality Studies, a minor in Gender and Sexuality Studies, a minor in Queer Studies, and a graduate emphasis in Feminist Studies.

Gender and Sexuality Studies provides a unique intellectual community for undergraduate and graduate students, where faculty and students share a commitment to interactive teaching and learning. Students work closely with faculty to plan a coherent program of study and to anticipate work toward advanced degrees and a wide variety of career options.

### Career Opportunities

A degree in Gender and Sexuality Studies prepares students for multidisciplinary opportunities in graduate degree programs and for numerous careers in both the public and private sectors. Businesses, corporations, government and educational institutions increasingly find the need for expert knowledge about gender and sexuality. The growth of organizations and agencies that deal with women's, gender, and LGBTQ+ rights issues—at the local, national, and global levels—is expanding opportunities for graduates with degree specializations in Gender and Sexuality Studies. GSS graduates bring unique skills and knowledge to the professions of law, medicine, social work, education, counseling, and to government service, all of which increasingly

require expertise on issues concerning gender and sexuality. Students of Gender and Sexuality Studies develop critical and analytical skills that prove valuable in the full range of innovative career, employment, and philanthropic/humanitarian/social justice choices.

The UCI Division of Career Pathways (<http://career.uci.edu/>) provides services to students and alumni including career counseling, information about job opportunities, a career library, and workshops on resume preparation, job search, and interview techniques.

- Feminist Studies, Graduate Emphasis
- Gender and Sexuality Studies, B.A.
- Gender and Sexuality Studies, Minor
- Queer Studies, Minor

## Faculty

Jonathan Alexander, Ph.D. Louisiana State University, *Associate Dean, Division of Undergraduate Education and Campus Writing Coordinator and Chancellor's Professor of English; Culture and Theory; Education; Gender and Sexuality Studies; Informatics* (writing studies, sexuality studies, queer theory, new media studies)

Victoria Bernal, Ph.D. Northwestern University, *Professor of Anthropology; Culture and Theory; Gender and Sexuality Studies; Religious Studies* (gender, war, cyberspace, Islam, transnationalism, Africa)

Michele B. Goodwin, J.D. Boston College, *Director, Center for Biotechnology and Global Health Policy and UCI's Chancellor's Professor of School of Law; Criminology, Law and Society; Gender and Sexuality Studies; Program in Public Health*

Laura H. Kang, Ph.D. University of California, Santa Cruz, *Professor of Gender and Sexuality Studies* (feminist epistemologies and theories, cultural studies, ethnic studies)

Nasrin Rahimieh, Ph.D. University of Alberta, *Director of the Humanities Core Program and Howard Baskerville Professor of Comparative Literature; European Languages and Studies; Gender and Sexuality Studies* (Modern Persian literature and culture, diaspora studies, women's writing.)

Catherine Z. Sameh, Ph.D. Rutgers, The State University of New Jersey, *Assistant Professor of Gender and Sexuality Studies* (Iranian feminism, human rights, transnational feminisms, gender and social movements in the Middle East and Muslim world, Islam, women of color feminisms)

Jeanne Scheper, Ph.D. University of California, Santa Barbara, *Department Chair and Associate Professor of Gender and Sexuality Studies* (feminist performance studies and visual culture, cultural studies, theories of race, gender and sexuality, trans-Atlantic modernism)

Jennifer Terry, Ph.D. University of California, Santa Cruz, *Professor of Gender and Sexuality Studies; Comparative Literature* (cultural studies, social theory; science and technology studies, formations of gender and sexuality, critical approaches to modernity, American studies in transnational perspective, processes of militarization)

Heidi E. Tinsman, Ph.D. Yale University, *Department Chair and Professor of History; Gender and Sexuality Studies* (Latin America, gender and sexuality, world history)

## Courses

### GEN&SEX 20. Introduction to Queer Studies. 4 Units.

Study of sexuality from the perspective of lesbian, gay, queer, transgender scholarship spanning humanities, social sciences, and arts.

(IV and VII).

### GEN&SEX 50A. Gender and Feminism in Everyday Life. 4 Units.

What is gender? Why does studying it matter? Explores how feminism has understood not only gender as a category of social analysis, but how gender structures personal identities, family, citizenship, work and leisure, social policy, sexuality, and language.

(IV, VII)

### GEN&SEX 50B. Gender and Power. 4 Units.

From workplace to home to schools to prisons, how are societal institutions and politics "gendered"? Examines power and inequalities around gender, race, class, and sexuality in national and transnational contexts.

(IV, VII)

### GEN&SEX 50C. Gender and Popular Culture. 4 Units.

An investigation of gender, race, and sexuality in film, TV, video, music, and advertising, with attention to the ways that popular culture shapes understandings of technology, national identities, leisure and work, historical memory, international communication, and multicultural representation.

(IV, VII)

**GEN&SEX 60A. Gender and Science. 4 Units.**

Examines science from a variety of feminist viewpoints in order to explore how science influences everyday life. Special attention is given to the ways science shapes our understanding of gender, race, and sexuality.

(III)

**GEN&SEX 60B. Gender and Law. 4 Units.**

Introduction to the relationship between gender, race, sexuality, and the law. Critical thinking about how law defines citizenship, political representation, and democracy, focusing on the history of legal reform undertaken in the name of women as a social group.

(III)

**GEN&SEX 60C. Gender and Religion. 4 Units.**

Introduces the topic of religion in a feminist context by performing cross-cultural exploration of gender, authority, and faith in various traditions. Study includes (but is not limited to) writings of contemporary Jewish, Christian, and Muslim feminists.

Same as REL STD 61.

(III and VIII ).

**GEN&SEX 100A. Feminism and Social Change. 4 Units.**

Explores feminist modes of knowledge production in relation to histories and activist practices of various social movements. Examines the kinds of information, research, ideas, theories, and concepts that underlie feminist cultural analysis and social movement organizing.

**GEN&SEX 100B. Feminist Theory. 4 Units.**

Introduction to historical traditions in theory and various conceptual frameworks informing scholarship in gender studies, sexuality studies, and women's studies as a field of critical inquiry.

**GEN&SEX 100C. Feminist Cultural Studies. 4 Units.**

Investigation of the theories and methods that inform the feminist study of culture. Focuses on the interpretation of the visual arts and literature created by, and predominately for, women.

**GEN&SEX 100D. Queer Knowledges. 4 Units.**

Explores the emergence of historical elaboration of non-normative sexual identities, practices, and communities; focuses on medical, legal, literary, aesthetic, scientific, and religious notions about homosexuality and appropriations and subversions of these notions by queer people.

**GEN&SEX 110A. Gender, State, and Nation. 4 Units.**

Examination of gender and sexuality in relation to the production of identities created through participation in state and nation. Examines complexity of relationship between feminism and nationalism, feminism and the state.

**GEN&SEX 110B. Money, Sex, and Power. 4 Units.**

Examination of gender and sexuality in relation to the emergence of the modern world, modernity, and capitalism; commodification, circulation, and transnational exchanges relating to race, gender, class, sexuality, religion, and nationality.

**GEN&SEX 110D. The Politics of Health and Medicine. 4 Units.**

Focuses on cultural and political-economic analysis and representations of disease both within the U.S. and globally.

**GEN&SEX 120A. Histories of Sexuality. 4 Units.**

Examines the historical production of non-normative sexual and gender identities, bodies, practices, and communities. Explores how past formations inform and shape the present and future.

**GEN&SEX 120B. Image Problems. 4 Units.**

Examination of scholarly approaches to gender stereotypes and politics of representation as they present possibilities for critical analysis and produce problems and limitations; how powerful ideas of gender intersect with other forms of social differentiation such as race and class.

**GEN&SEX 120C. Practices of Embodiment. 4 Units.**

Explores how science, medicine, and law have shaped the understanding of differentiated bodies; examines shifting norms and ideals about producing, shaping, adorning, and dressing gendered bodies across diverse historical, cultural, social, economic, and spatial contexts.

**GEN&SEX 139. Topics in Gender Studies. 4 Units.**

Various topics in gender studies. Encompasses issues of gender, culture, race and class, including issues of sexualities and social justice.

Repeatability: Unlimited as topics vary.

**GEN&SEX 155. Topics in Gender and Sexuality Studies. 4 Units.**

Designed to provide students with an opportunity to conduct advanced work in Gender and Sexuality Studies.

Repeatability: Unlimited as topics vary.

**GEN&SEX 157. Topics in Queer Studies. 4 Units.**

Explores issues in queer studies from one or more of the following perspectives: theoretical, historical, legal, economic, political, sociological, and representation in the arts.

Repeatability: Unlimited as topics vary.

**GEN&SEX 165F. Gender and Technology. 4 Units.**

Using a variety of disciplinary methods, examines how various technological processes and products produce culturally complex meanings associated with gender and technology.

**GEN&SEX 167A. Militarism and Gender. 4 Units.**

Examination of feminist approaches to militarism, war, and political violence; drawing on representations of women as both victims of and participants in military violence; effects of militarism on formations of gender; effects of military industrial complex on nationalism and identity.

Same as INTL ST 153F.

**GEN&SEX 170. Topics in Gender, Feminism, Literature, and Language. 4 Units.**

Topics cover issues in language and literature which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 171. Topics in Gender, Feminism, and History. 4 Units.**

Topics cover issues in history which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 171A. Sex and Conquest in Latin America. 4 Units.**

Competing ideas of masculinity and femininity, sexual violence, sexual identities, and gendered hierarchies informed how the Spanish engaged in military and religious domination of Mexican and Andean communities, as well as the forms of native resistance throughout colonial Latin America.

Same as ANTHRO 140, CHC/LAT 150A, HISTORY 160.

**GEN&SEX 174. Topics in Gender, Feminism, and the Arts. 4 Units.**

Topics cover issues in the arts which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 175. Topics in Gender, Feminism, and the Media. 4 Units.**

Topics cover issues in the media which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 180. Topics in Gender, Feminism, and Anthropology. 4 Units.**

Topics cover issues in Anthropology which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 181. Topics in Gender, Feminism, and Cognitive Psychology. 4 Units.**

Topics cover issues in cognitive psychology which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 182. Topics in Gender, Feminism and Economics. 4 Units.**

Topics cover issues in economics which relate to women and gender or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 183. Topics in Gender, Feminism, and Sociology. 4 Units.**

Topics cover issues in sociology which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 184. Topics in Gender, Feminism, and Political Science. 4 Units.**

Topics cover issues in political science which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 185. Topics in Gender, Feminism, and Social Sciences. 4 Units.**

Topics cover issues in social sciences which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 187. Topics in Gender, Feminism, and Social Ecology. 4 Units.**

Topics cover issues in social ecology which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 188. Topics in Gender, Feminism, and Science. 4 Units.**

Topics cover issues in science which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 189. Topics in Gender, Feminism, and Interdisciplinary Studies. 4 Units.**

Topics cover issues in interdisciplinary studies which relate to women or gender, or which are taught from a feminist methodological perspective.

Repeatability: Unlimited as topics vary.

**GEN&SEX 190. Topics in Sexualities Studies. 4 Units.**

Topics cover issues in the humanities, social sciences, sciences, and arts that relate to critical inquiry of sexualities.

Repeatability: Unlimited as topics vary.

**GEN&SEX 197. Senior Seminar in Gender and Sexuality Studies. 4 Units.**

Students read advanced scholarship in Gender and Sexuality Studies and complete a major seminar paper.

Prerequisite: Satisfactory completion of the Upper-Division Writing requirement.

Restriction: Gender and Sexuality Studies Majors only.

**GEN&SEX 199. Independent Study . 1-4 Units.**

Directed reading and research in consultation with a faculty member. Substantial written work required. Includes independent study, involving 3-12 hours a week.

Repeatability: May be repeated for credit unlimited times.

**GEN&SEX 200A. Feminist Knowledge and Social Change. 4 Units.**

Provides a broad and introductory overview of Women's Studies and feminist knowledge, including key concepts, theoretical frameworks, disciplinary approaches and methods, and critical debates that have shaped the field.

Repeatability: May be taken for credit 2 times.

**GEN&SEX 200B. Problems in Feminist Research. 4 Units.**

Colloquium on analytic approaches to interdisciplinary feminist research in Women's Studies and exploration of how feminist knowledges are produced in different academic disciplines.

Repeatability: May be taken for credit 2 times.

**GEN&SEX 201. Special Topics in Feminist Studies. 4 Units.**

Seminars on various topics in feminist studies.

Repeatability: Unlimited as topics vary.

**GEN&SEX 210A. Topics in Graduate Feminist Theory. 4 Units.**

In-depth introduction to various theoretical frameworks that have and continue to inform scholarship in Women's Studies including (but not limited to) identity, representation, and political economy.

Repeatability: Unlimited as topics vary.

**GEN&SEX 290. Directed Research. 2-12 Units.**

Directed graduate study/research in Gender and Sexuality Studies.

Repeatability: May be taken for credit for 24 units.

Restriction: Graduate students only.

**GEN&SEX 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

## Feminist Studies, Graduate Emphasis

The Department of Gender and Sexuality Studies offers an emphasis in Feminist Studies, which is available to all graduate students at UCI. Satisfactory completion of the emphasis is certified by the Director of Graduate Study.

Students may apply for admission to the emphasis following successful completion of either GEN&SEX 200A or GEN&SEX 200B. For complete information about application policies and procedures, refer to the Gender and Sexuality Studies website (<http://www.humanities.uci.edu/genderandsexualitystudies/graduate/>) or contact the Director of Graduate Study.

### Emphasis Requirements

Minimum course work for the graduate emphasis in Feminist Studies consists of four courses: two core courses, GEN&SEX 200A-GEN&SEX 200B, a coherent sequence normally taken in consecutive quarters; one elective graduate seminar in the Department of Gender and Sexuality Studies; and one additional graduate seminar in feminist scholarship taught outside of the department. Within 30 days of completion of the outside course, students must submit a substantive narrative (500 words minimum) to the Director of Graduate Study about how their coursework sufficiently and effectively engaged with Feminist Studies. The narrative should include specific examples of how students engaged with feminist theories, frameworks, and key concepts in their coursework. In the event the Director of Graduate Study does not approve the narrative, the students will have the opportunity to repeat the process with another course.

The course requirements for Ph.D., M.A., and M.F.A. candidates are the same.

For doctoral students, the qualifying examination and dissertation topic should incorporate Feminist Studies in a meaningful way.

### Requirements for Completion

During the final year of their graduate program, students must complete a GFE checklist, which includes the submission of the outside course narrative and a sample of work related to Feminist Studies (e.g. a dissertation chapter or substantive paper, a video, or other creative work). Upon receipt, the Graduate Director will verify completion of four required graduate courses related to Feminist Studies.

NOTE: The dissertation may be accepted in fulfillment of the sample of work when Feminist Studies is incorporated in a substantive way.

## Gender and Sexuality Studies, B.A.

UCI's Department of Gender and Sexuality Studies is dedicated to the study of gender and sexuality in their complex articulation with other social categories such as race, ethnicity, class, religion, and nationality. The Department's goal is to foster critical and creative analysis of the various disciplinary perspectives—historical, political, economic, representational, technological, and scientific—that have constituted women, gender, and sexuality as objects of study. By emphasizing a rigorous interdisciplinary perspective in their teaching and research, the Gender and Sexuality Studies faculty seek to produce new knowledge about the social meanings of gender, race, class, and sexuality, and to equip students with a range of analytical and methodological skills.

The field of Gender and Sexuality Studies grew out of Women's Studies, an interdisciplinary field that developed at a phenomenal rate from a handful of student-initiated courses in the early 1970s to more than 600 programs in colleges and universities across the United States offering degrees at the B.A., M.A., and Ph.D. levels. UCI's Department of Women's Studies was founded as a program in 1975 and has grown significantly since that time. To reflect its expanding scope of inquiry, the department changed its name in 2014 to the Department of Gender and Sexuality Studies. The Department offers a B.A. in Gender and Sexuality Studies, a minor in Gender and Sexuality Studies, a minor in Queer Studies, and a graduate emphasis in Feminist Studies.

Gender and Sexuality Studies provides a unique intellectual community for undergraduate and graduate students, where faculty and students share a commitment to interactive teaching and learning. Students work closely with faculty to plan a coherent program of study and to anticipate work toward advanced degrees and a wide variety of career options.

## Undergraduate Program

### Requirements for the B.A. in Gender and Sexuality Studies

All students must meet the University Requirements.

All students must meet the School Requirements.

#### Departmental Requirements for the Major

A. Three introductory core courses:

GEN&SEX 50A	Gender and Feminism in Everyday Life
-------------	--------------------------------------

and select two of the following:

GEN&SEX 20	Introduction to Queer Studies
GEN&SEX 50B	Gender and Power
GEN&SEX 50C	Gender and Popular Culture
GEN&SEX 60A	Gender and Science
GEN&SEX 60B	Gender and Law
GEN&SEX 60C	Gender and Religion

B. Five advanced core courses from:

GEN&SEX 100A	Feminism and Social Change
GEN&SEX 100B	Feminist Theory
GEN&SEX 100D	Queer Knowledges
GEN&SEX 110A	Gender, State, and Nation
GEN&SEX 110B	Money, Sex, and Power
GEN&SEX 110D	The Politics of Health and Medicine
GEN&SEX 120A	Histories of Sexuality
GEN&SEX 120B	Image Problems
GEN&SEX 120C	Practices of Embodiment

C. Three advanced elective core courses selected from GEN&SEX 139–190

D. Complete:

GEN&SEX 197	Senior Seminar in Gender and Sexuality Studies
-------------	--

**Residence Requirement for the Major:** A minimum of five upper-division courses required for the major must be completed successfully at UCI.

A degree in Gender and Sexuality Studies prepares students for multidisciplinary opportunities in graduate degree programs and for numerous careers in both the public and private sectors. Businesses, corporations, government and educational institutions increasingly find the need for expert knowledge about gender and sexuality. The growth of organizations and agencies that deal with women's, gender, and LGBTQ+ rights issues—at the local, national, and global levels—is expanding opportunities for graduates with degree specializations in Gender and Sexuality Studies. GSS graduates bring unique skills and knowledge to the professions of law, medicine, social work, education, counseling, and to government service, all of which increasingly require expertise on issues concerning gender and sexuality. Students of Gender and Sexuality Studies develop critical and analytical skills that prove valuable in the full range of innovative career, employment, and philanthropic/humanitarian/social justice choices.

The UCI Division of Career Pathways (<http://career.uci.edu/>) provides services to students and alumni including career counseling, information about job opportunities, a career library, and workshops on resume preparation, job search, and interview techniques.

## Gender and Sexuality Studies, Minor

The Department offers a minor in Gender & Sexuality Studies which examines the complex articulations of gender and sexuality with systems that differentiate races, ethnicities, socio-economic classes, religions, and nationalities. Students examine how the authority of sciences, technologies, images, narratives, laws, and religions have been formative in producing prevailing ideas about gender and sexuality. Our teaching and research agendas reflect a commitment to refining three key methods: 1) Feminist Transnational Analysis; 2) Critical Interdisciplinarity; 3) Cultural Theory.

#### Departmental Requirements

A. Three introductory core courses selected from:

GEN&SEX 20	Introduction to Queer Studies
GEN&SEX 50A	Gender and Feminism in Everyday Life
GEN&SEX 50B	Gender and Power
GEN&SEX 50C	Gender and Popular Culture
GEN&SEX 60A	Gender and Science

GEN&SEX 60B	Gender and Law
GEN&SEX 60C	Gender and Religion
B. Three advanced core courses selected from the following:	
GEN&SEX 100A	Feminism and Social Change
GEN&SEX 100B	Feminist Theory
GEN&SEX 100D	Queer Knowledges
GEN&SEX 110A	Gender, State, and Nation
GEN&SEX 110B	Money, Sex, and Power
GEN&SEX 110D	The Politics of Health and Medicine
GEN&SEX 120A	Histories of Sexuality
GEN&SEX 120B	Image Problems
GEN&SEX 120C	Practices of Embodiment

C. One advanced elective course selected from GEN&SEX 139–190

**Residence Requirement for the Minor:** A minimum of four upper-division courses required for the minor must be completed successfully at UCI. By petition, two of the four may be taken through the UC Education Abroad Program, provided course content is approved in advance by the appropriate department chair.

## Queer Studies, Minor

The Department of Gender and Sexuality Studies offers a minor in Queer Studies. Taking as a point of departure that sexuality is a complex historical and cultural phenomenon, Queer Studies examines this complexity, drawing upon methods from anthropology, art, art history, biology, history, literature, philosophy, psychology, and sociology. Interdisciplinary insights from area studies, cultural studies, critical legal studies, ethnic studies, gender studies, religious studies, science and technology studies, visual studies, and women's studies also enrich this area of study.

### Departmental Requirements

A. Complete:

GEN&SEX 20	Introduction to Queer Studies
------------	-------------------------------

B. Select two of the following:

GEN&SEX 50A	Gender and Feminism in Everyday Life
GEN&SEX 50B	Gender and Power
GEN&SEX 50C	Gender and Popular Culture
GEN&SEX 60A	Gender and Science
GEN&SEX 60B	Gender and Law
GEN&SEX 60C	Gender and Religion

C. Complete two upper-division core courses:

GEN&SEX 100D	Queer Knowledges
GEN&SEX 157	Topics in Queer Studies

D. Select two upper-division courses from the following:

GEN&SEX 100–190 (excluding GEN&SEX 100D and GEN&SEX 157)
--

**Residence Requirement for the Minor:** A minimum of four upper-division courses required for the minor must be successfully completed at UCI. Two of the four may be taken through the UC Education Abroad Program, provided course content is approved in advance by the appropriate department chair.

## Department of History

**Heidi Tinsman, Department Chair**

200 Murray Krieger Hall

949-824-6521

<http://www.humanities.uci.edu/history/>

The undergraduate program in History is designed to develop critical intelligence and to foster an awareness of ourselves and our world through the study of the past. The Department presents a variety of approaches to history, and each emphasizes basic disciplinary skills: weighing evidence, constructing logical arguments, and exploring the role of theory in historical analysis and human action.

The Department offers a number of lower-division courses open to majors as well as non-majors, most of which fulfill part of the UCI general education requirements.

Students who are interested in the study of history but are majoring in other disciplines may minor in History. The minor incorporates elements of the Department's program for majors but allows students enough flexibility to pursue programs in other departments and schools.

Upper-division courses range from the examination of individual nation-states (e.g., Chinese history), to studies of the relations among nation-states (e.g., Emergence of the Modern Middle East), to historical analyses of political, socio-economic, and cultural factors (e.g., Women in the United States). Students are also provided the opportunity for small-group learning experiences through colloquia. The colloquia are conducted as discussion groups, involve close reading and analysis of primary and secondary texts, and require writing.

In addition, History students have the option of pursuing advanced study through programs offered by the Department, the School of Humanities, and the University. Within the Department of History, students have the opportunity to complete an advanced research seminar series or to design their own research project with a faculty advisor through Independent Study.

## Specialization in History for Future Teachers

The Specialization in History for Future Teachers is designed to prepare history majors who aspire to earn a post-baccalaureate teaching credential. Through specific history course requirements, courses in the School of Education, and a field work requirement, students will be well positioned for admission to teaching credential programs.

## Phi Alpha Theta

Phi Alpha Theta is a charter member of the Association of College Honor Societies for undergraduates, graduates, and faculty within the discipline of history. Becoming a member to the society will grant you honor cords for graduation and allow eligibility for several national and regional scholarships. To become eligible for initiation, students must have achieved junior standing, have completed seven or more history courses in residence at UCI, and have acquired a minimum 3.5 GPA in the major and a minimum 3.3 GPA overall. For more information, please contact the History Undergraduate Program Coordinator.

## Study Abroad

The department strongly encourages majors and minors to take advantage of the University's study abroad programs and to experience a different culture, for a quarter or longer, while making progress toward their UCI degree. Moreover, students who are particularly interested in the history of a specific country or region would greatly benefit from direct study and cultural interaction within that country or region. Information about studying abroad can be found at UCI's Study Abroad Center website. (<http://www.studyabroad.uci.edu/>)

- Armenian Studies, Minor
- History, B.A.
- History, M.A.
- History, Minor
- History, Ph.D.

## Faculty

Emily L. Baum, Ph.D. University of California, San Diego, *Associate Professor of History; Religious Studies* (modern Chinese history, history of medicine)

Houri Berberian, Ph.D. University of California, Los Angeles, *Director of the Armenian Studies Program and Meghrouni Family Chair in Armenian Studies and Professor of History; Religious Studies* (modern Armenian history, Middle East history)

Sharon B. Block, Ph.D. Princeton University, *Professor of History* (digital humanities, early American, race and sexuality)

Alex Borucki, Ph.D. Emory University, *Associate Professor of History; African American Studies* (African diaspora, early modern Atlantic world, slave trade, colonial Latin America)

Anita Casavantes Bradford, Ph.D. University of California, San Diego, *Associate Professor of Chicano/Latino Studies; Asian American Studies; History* (20th century U.S., U.S. in the world, Cuba and the Caribbean; history of childhood; history of immigration, race and ethnicity; transnational and comparative Latina/o history; religion, politics and social movements)

Vinayak Chaturvedi, Ph.D. University of Cambridge, *Associate Professor of History; Culture and Theory; European Languages and Studies; Religious Studies* (modern South Asia, social and intellectual history)

Yong Chen, Ph.D. Cornell University, *Associate Dean of Curriculum and Student Services and Professor of History; Asian American Studies; Religious Studies* (Asian American history and immigration, food and culture, U.S./China economic and cultural interactions)

Simon A. Cole, Ph.D. Cornell University, *Professor of Criminology, Law and Society; History; School of Law* (science, technology, law, criminal justice)

Ian Collier, Ph.D. University of Melbourne, *Professor of History; European Languages and Studies* (Europe and the Muslim world, the French Revolution and the global history of the Revolutionary age)

Touraj Daryaee, Ph.D. University of California, Los Angeles, *UCI Endowed Chair in Persian Studies and Culture and Professor of History; Religious Studies* (Iran, Zoroastrianism, Ancient Medieval World)

Alice Fahs, Ph.D. New York University, *Professor Emerita of History* (Civil War America, American cultural history, gender)

Sarah Bennett Farmer, Ph.D. University of California, Berkeley, *Associate Professor of History* (modern French history, twentieth-century Europe, social and cultural history)

David Fedman, Ph.D. Stanford University, *Assistant Professor of History* (Japan and Korea, environmental history, historical geography, global history, modern war)

Richard I. Frank, Ph.D. University of California, Berkeley, *Professor Emeritus of History* (Roman history, Classical tradition)

Dorothy B. Fujita-Rony, Ph.D. Yale University, *Associate Professor of Asian American Studies; Culture and Theory; History* (U.S. history, Asian American studies)

Howard A. Gillman, Ph.D. University of California, Los Angeles, *Chancellor and Professor of Political Science; Criminology, Law and Society; History; School of Law*

James B. Given, Ph.D. Stanford University, *Professor Emeritus of History*

Qitao Guo, Ph.D. University of California, Berkeley, *Associate Professor of History; Religious Studies* (social, cultural, and religious history of pre-modern China (the Ming and Qing dynasties))

Douglas M. Haynes, Ph.D. University of California, Berkeley, *Vice Chancellor for Equity, Diversity, and Inclusion and Professor of History; African American Studies* (social and cultural history of modern Britain, social history of modern medicine)

Andrew Highsmith, Ph.D. University of Michigan, *Associate Professor of History* (United States history since 1865; cities and suburbs in American life; public policy history; political history; social inequality; land-use policy)

Lamar M. Hill, Ph.D. University of London, *Professor Emeritus of History*

David B. Igler, Ph.D. University of California, Berkeley, *Professor of History* (U.S., American West, environmental, and Pacific history)

Adria Imada, Ph.D. New York University, *Associate Professor of History* (indigenous and Pacific Islands studies, race, gender and medicine, visual studies)

Winston A. James, Ph.D. University of London, *Professor of History* (Caribbean, African American, African diaspora)

Michael P. Johnson, Ph.D. Stanford University, *Professor Emeritus of History*

Mark A. LeVine, Ph.D. New York University, *Professor of History; Religious Studies* (modern Middle Eastern history, Islamic studies, histories of empire and globalization)

Matthias Lehmann, Ph.D. Freie Universität Berlin, *Director of the Interdisciplinary Minor in Jewish Studies and Teller Family Chair in Jewish History and Professor of History; Religious Studies* (early modern and modern Jewish history, Sephardic studies)

Joan Malczewski, Ph.D. Columbia University, *Associate Professor of History* (American political development, education, progressivism, philanthropy, and American south)

Lynn Mally, Ph.D. University of California, Berkeley, *Professor Emerita of History*

Joseph H. McKenna, Ph.D. Fordham University, *Lecturer of History; Religious Studies* (history of religious ideas)

Nancy Ann McLoughlin, Ph.D. University of California, Santa Barbara, *Associate Professor of History; European Languages and Studies; Religious Studies* (late Medieval Europe, intellectual history, gender)

Jessica Millward, Ph.D. University of California, Los Angeles, *Associate Professor of History; African American Studies; Culture and Theory* (U.S., slavery, African diaspora, African American gender and women)

Laura J. Mitchell, Ph.D. University of California, Los Angeles, *Associate Professor of History* (social and cultural history of South Africa, Africa, and the world)

Robert G. Moeller, Ph.D. University of California, Berkeley, *Professor Emeritus of History* (modern European history)

Susan Katharine Morrissey, Ph.D. University of California, Berkeley, *Professor of History; European Languages and Studies* (Russia, terrorism and political violence, suicide)

Keith L. Nelson, Ph.D. University of California, Berkeley, *UCI Endowed Chair and Edward A. Dickson Professor Emeritus of History; Religious Studies*

Rachel S. O'Toole, Ph.D. University of North Carolina at Chapel Hill, *Associate Professor of History* (Colonial Latin America, African Diaspora, colonialisms, race, racism, indigenous histories, gender, Atlantic worlds)

Spencer C. Olin, Ph.D. Claremont Graduate University, *Professor Emeritus of History*

Alka Patel, Ph.D. Harvard University, *Associate Professor of Art History; History; Religious Studies; Visual Studies* (South Asian and Islamic art and architecture, historiographies, Islamic diasporas in Cuba)

Allison J. Perlman, Ph.D. University of Texas at Austin, *Associate Professor of History; Film and Media Studies; Visual Studies* (history of broadcasting, American social movements, media law and policy, media activism, popular memory)

Kavita S. Philip, Ph.D. Cornell University, *Professor of History; Informatics* (history of modern South Asia, science and technology, political ecology, critical theoretical studies of race, gender, colonialism, new media, and globalization)

Kathryn Ragsdale, Ph.D. University of Chicago, *Lecturer of History* (Japan: Meiji to present; Asia-Pacific War; Japanese film and popular culture)

Renee J. Raphael, Ph.D. Princeton University, *Associate Professor of History; European Languages and Studies; Religious Studies* (early modern Europe, history of science, intellectual history)

James Robertson, Ph.D. New York University, *Assistant Professor of History* (intellectual and cultural history of Europe and the Balkans)

Jaime E. Rodriguez, Ph.D. University of Texas at Austin, *Professor Emeritus of History*

Ana Rosas, Ph.D. University of Southern California, *Associate Professor of Chicano/Latino Studies; History* (Chicana/o comparative history, immigration, ethnicity)

Emily S. Rosenberg, Ph.D. State University of New York at Stony Brook, *Professor Emerita of History* (U.S. and the world, transnational/global history, international relations)

Vicki L. Ruiz, Ph.D. Stanford University, *Professor Emeritus of History; Chicano/Latino Studies* (Chicana/Latina history, U.S. labor, immigration, gender)

Sharon V. Salinger, Ph.D. University of California, Los Angeles, *Professor Emerita of History* (early America and early Modern Caribbean—social and labor history, race, gender)

Chelsea Schields, Ph.D. City University of New York, *Assistant Professor of History* (history of modern Europe, colonialism, decolonization, gender and sexuality)

Patricia Seed, Ph.D. University of Wisconsin-Madison, *Professor of History; Informatics* (mapping: history and design, game design, navigation)

Timothy Tackett, Ph.D. Stanford University, *Professor Emeritus of History*

Heidi E. Tinsman, Ph.D. Yale University, *Department Chair and Professor of History; Gender and Sexuality Studies* (Latin America, gender and sexuality, world history)

Steven Topik, Ph.D. University of Texas at Austin, *Professor Emeritus of History* (Brazil, Latin America, world history, commodities especially coffee, the state in the economy)

Anne Walthall, Ph.D. University of Chicago, *Professor Emerita of History*

Jeffrey N. Wasserstrom, Ph.D. University of California, Berkeley, *UCI Chancellor's Professor of History; School of Law* (modern China, protest, world history)

Jonathan M. Wiener, Ph.D. Harvard University, *Professor Emeritus of History*

## Courses

### HISTORY 10. The Holocaust. 4 Units.

Introduction to the history of European Jewish communities before the Holocaust; the origins of Nazi antisemitism; the implementation of the 'Final Solution'; Jewish resistance to the Nazis; and attempts in film and literature to represent the Holocaust since 1945.

(IV, VIII)

**HISTORY 11. Genocide and Crimes Against Humanity Since WWII. 4 Units.**

Investigates instances of genocide since 1945 (including Cambodia, Bosnia, Rwanda, and others); explores the history behind these mass murders; considers why people kill, how victims survive, and questions whether international agreements are enough to prevent crimes against humanity.

(III, VIII)

**HISTORY 12. Introductory Topics in History . 4 Units.**

Introduces methods and premises of historical study. Topics include introductions to cultural, political, economic, social, and religious history.

Repeatability: Unlimited as topics vary.

(IV)

**HISTORY 15A. Native American History. 4 Units.**

An overview of major developments in Indian-white relations from the American Revolution to the present with an emphasis on political and legal history. How tribal sovereignty has been redefined over time is a central theme of the course.

(IV, VII)

**HISTORY 15C. Asian American Histories. 4 Units.**

Examines and compares diverse experiences of major Asian American groups since the mid-nineteenth century. Topics include origins of emigration; the formation and transformation of community; gender and family life; changing roles of Asian Americans in American society. Formerly ASIANAM 60A.

Same as ASIANAM 50, SOC SCI 78A.

((III or IV) and VII ).

**HISTORY 15D. History of Sexuality in the US . 4 Units.**

Explores intertwined histories of sexuality, race, and gender in the US. By examining how different cultures and times viewed sexuality, race and gender, it analyzes relationships between regulation of bodies/behaviors and construction of cultural, economic, and political norms.

(IV, VII)

**HISTORY 15F. What to Eat? Immigrants and the Development of American Cuisines. 4 Units.**

Relationship between immigration and changing American foodways; impact of several major culinary traditions of immigrants and racial minorities, such as African Americans, Asian Americans, Mexican Americans, Italian Americans, Irish Americans, and Jewish Americans, on America's gastronomical and socioeconomic landscape.

((III or IV) and VII ).

**HISTORY 15G. Racial Segregation in Modern U.S.. 4 Units.**

Explores the history of racial segregation in the United States from the late 19th century to the present.

(VII)

**HISTORY 16A. World Religions I. 4 Units.**

An introduction to the history, doctrine, culture, and writing of Judaism, Christianity, and Islam.

Same as REL STD 5A.

(IV and VIII ).

**HISTORY 16B. World Religions II. 4 Units.**

An introduction to various religious traditions in selected areas of the world—including India and South Asia, East Asia, Africa, and the Americas.

Same as REL STD 5B.

(IV and VIII ).

**HISTORY 16C. Religious Dialogue. 4 Units.**

Lectures and discussion on controversial topics in religion: sexual morality; religious violence; science; treatment of women and girls; religious truth, American Constitutional matters; secularization; the future of religion, and other topics.

Same as REL STD 5C.

(IV, VIII)

**HISTORY 18A. Major Jewish Texts. 4 Units.**

Introduction to the diversity of Jewish cultures from ancient to modern times. Surveys the Jewish experience in various societies and civilizations: ancient Mediterranean, Middle East and North Africa, Europe, and the Americas.

(IV and VIII ).

**HISTORY 21A. World: Innovations. 4 Units.**

Treats major themes of world historical development through the mid-seventeenth century, focusing on the Eurasian world, but with secondary emphasis on Africa and the Americas.

(IV, VIII)

**HISTORY 21B. World: Empires and Revolutions. 4 Units.**

Examines three major transformations that made the world of 1870 dramatically different from that of 1650: e.g., the scientific revolution, industrialization, and the formation of modern states and nations.

(IV, VIII)

**HISTORY 21C. World: Nation, War, and Rights. 4 Units.**

Considers several major currents of modern history: technological change and its social effects; changes in gender relations; totalitarianism; peasant revolutions and the crisis of colonization; international migration; and ecological problems.

(IV and VIII ).

**HISTORY 36A. The Formation of Ancient Greek Society: Early Greece. 4 Units.**

A survey of ancient Greek civilization from its origins in the Bronze Age to the mid-Archaic period. Examines political and social history, as well as literature, art, religion, and archaeological remains.

Same as CLASSIC 36A.

(IV)

**HISTORY 36B. The Formation of Ancient Greek Society: Late Archaic and Classical Greece. 4 Units.**

A survey of ancient Greek civilization from the Late Archaic period to the Classical period. Focuses on major institutions and cultural phenomena as seen through the study of ancient Greek literature, history, archaeology, and religion.

Same as CLASSIC 36B.

(IV)

**HISTORY 36C. The Formation of Ancient Greek Society: Fourth-Century and Hellenistic Greece. 4 Units.**

A survey of ancient Greek civilization from the fourth century BCE through to the Hellenistic period. Focuses on major institutions and cultural phenomena as seen through the study of ancient Greek literature, history, archaeology, and religion.

Same as CLASSIC 36C.

(IV)

**HISTORY 37A. The Formation of Ancient Roman Society: Origins to Roman Republic. 4 Units.**

A survey of the development of Roman civilization from its eighth century BCE beginnings to the civil wars of the first century BCE. Examines political and social history, as well as literature, art, architecture, and religion.

Same as CLASSIC 37A.

(IV)

**HISTORY 37B. The Formation of Ancient Roman Society: Roman Empire. 4 Units.**

A survey of Roman civilization from Augustus's consolidation of power following the civil wars of the first century BCE to the crisis of the third century CE. Includes social history, literature, art, architecture, and religion.

Same as CLASSIC 37B.

(IV)

**HISTORY 37C. The Formation of Ancient Roman Society: The Fall of Rome. 4 Units.**

A survey of Roman civilization from the crisis of the third century CE to the so-called "fall of Rome" in 476 CE. Examines political and social history, as well as literature, art, architecture, and religion.

Same as CLASSIC 37C.

(IV)

**HISTORY 40A. Colonial America: New Worlds. 4 Units.**

Important themes in the social, economic, political, and cultural development in North America that transformed part of the geographical space into the U.S. Topics include Native Americans, European colonization, African enslavement, borderlands, gender, economic stratification, the American Revolution, the Constitution.

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

(IV)

**HISTORY 40B. Nineteenth-Century U.S.: Crisis and Expansion. 4 Units.**

Explores the transformation of American society, economy, and politics during the nineteenth century. Topics include industrial revolution, slavery, antislavery, women's rights, reform movements, Civil War and Reconstruction, immigration and ethnicity, and cultural and social transformation.

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

(IV)

**HISTORY 40C. Modern America: Culture and Power. 4 Units.**

Important themes in U.S. history in the twentieth and early twenty-first centuries. Topics include corporate capitalism, empire, immigration, race, gender, consumer society, World Wars, Progressiveness, New Deal, Great Society, civil rights, women's movements, Vietnam War, conservative politics, and economic stratification.

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

(IV)

**HISTORY 50. Crises and Revolutions. 4 Units.**

Study of turning points in world history, illustrating themes and methods of historical analysis.

Repeatability: May be taken for credit 3 times as topics vary.

(IV, VIII)

**HISTORY 60. The Making of Modern Science. 4 Units.**

Surveys the history of science and mathematics since the Scientific Revolution, examining central developments both chronologically and thematically, as well as investigating their significance for contemporary philosophical debates about the role and status of current scientific theories.

Same as LPS 60.

(GE II or GE IV ).

**HISTORY 70A. Problems in History: Asia. 4 Units.**

An introduction to the historical problems, the issues of interpretation, the primary sources, and the historical scholarship of the history of Asia, with an emphasis on developing skills in historical essay-writing.

Repeatability: Unlimited as topics vary.

(IV, VIII)

**HISTORY 70B. Problems in History: Europe. 4 Units.**

An introduction to the historical problems, the issues of interpretation, the primary sources, and the historical scholarship of the history of Europe, with an emphasis on developing skills in historical essay-writing.

Repeatability: Unlimited as topics vary.

(IV, VIII)

**HISTORY 70C. Problems in History: United States. 4 Units.**

An introduction to the historical problems, the issues of interpretation, the primary sources, and the historical scholarship of the history of the United States, with an emphasis on developing skills in historical essay-writing.

Repeatability: Unlimited as topics vary.

(IV)

**HISTORY 70D. Problems in History: Latin America. 4 Units.**

An introduction to the historical problems, the issues of interpretation, the primary sources, and the historical scholarship of the history of Latin America, with an emphasis on developing skills in historical essay-writing.

Repeatability: Unlimited as topics vary.

(IV, VIII)

**HISTORY 70E. Problems in History: Middle East and Africa. 4 Units.**

An introduction to the historical problems, the issues of interpretation, the primary sources, and the historical scholarship of the history of the Middle East and Africa, with an emphasis on developing skills in historical essay-writing.

Repeatability: Unlimited as topics vary.

(IV, VIII)

**HISTORY 70F. Problems in History: Transregional History. 4 Units.**

An introduction to the historical problems, the issues of interpretation, the primary sources, and the historical scholarship of transregional history, with an emphasis on developing skills in historical essay-writing.

Repeatability: Unlimited as topics vary.

(IV, VIII)

**HISTORY 100W. Writing About History. 4 Units.**

Specialized courses focusing on history writing and research skills. Each class reflects the instructor's intellectual interests and is conducted as a discussion group. Limited to 18 students. Several short writing assignments and one longer project meeting the upper-division writing requirement.

Prerequisite: HISTORY 12 or HISTORY 15A or HISTORY 15C or HISTORY 15D or HISTORY 16A or HISTORY 16B or HISTORY 16C or HISTORY 18A or HISTORY 21A or HISTORY 21B or HISTORY 21C or HISTORY 40A or HISTORY 40B or HISTORY 40C or HISTORY 60 or HISTORY 70A or HISTORY 70B or HISTORY 70C or HISTORY 70D or HISTORY 70E or HISTORY 70F. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: History Majors have first consideration for enrollment.

(Ib)

**HISTORY 102B. Topics in Environmental History. 4 Units.**

Explores the many historical interfaces between climate change, modes of production, and culture. Topics include the environmental history of warfare, imperialism, and famine in the nineteenth century and the history of environmental thought.

Repeatability: Unlimited as topics vary.

**HISTORY 110D. Topics in Medieval Europe. 4 Units.**

Studies of the topics in Medieval Europe.

Repeatability: Unlimited as topics vary.

**HISTORY 112D. Topics in Early Modern Europe. 4 Units.**

Theme-based approach to the main social, political, and cultural developments in Europe between the fifteenth and eighteenth centuries. Topics included Renaissance humanism, Reformation and Counter-Reformation, scientific revolution, court culture and nation building, interactions with non-European peoples, cities and commerce.

Repeatability: Unlimited as topics vary.

**HISTORY 114. Topics in Modern European History. 4 Units.**

Course content changes with instructor. Topics include the Inquisition; science and religion in modern Europe; sex and society in modern Europe; French revolutions; culture in interwar Europe; the Holocaust; the fall of communism in Eastern Europe.

Repeatability: Unlimited as topics vary.

**HISTORY 120D. War and Empire: France and the World in the 20th Century. 4 Units.**

Examines French experience of World War I, the defeat and occupation by Germany in World War II, the violent struggles that came with the loss of the French empire in the 1950s and 1960s, immigration, French responses to globalization.

**HISTORY 122B. Hitler and the Germans. 4 Units.**

Focuses on Hitler's rise to power and Nazi society. Examines Germany's defeat in World War I; the political and cultural experimentation of the 1920s; the causes of Hitler's success; and life in Germany under the Nazis.

**HISTORY 123D. Topics in Spanish History. 4 Units.**

Topics include Spain in the nineteenth century, the Spanish Civil War, and dictatorship and democracy in modern Spain.

Repeatability: Unlimited as topics vary.

**HISTORY 124B. Twentieth-Century Russia. 4 Units.**

Political and social developments in Twentieth-Century Russia.

**HISTORY 126B. The Era of World War II: 1933-45. 4 Units.**

The era of World War II and its political, social and economic history.

**HISTORY 128C. Topics in the History of Women in Europe. 4 Units.**

Studies in selected areas of history of European women. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 130C. Topics in the Jewish History. 4 Units.**

Studies in selected areas of Jewish history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 130F. Jews and Power. 4 Units.**

Examines the relationship between the Jewish people and political power over a 3500 year period. How have Jews preserved their communal interests and personal safety? How have they defined the proper relationship of the people to political authority.

Same as POL SCI 154J, REL STD 130F.

**HISTORY 131A. History of Zoroastrianism. 4 Units.**

Reviews major trends in the history of Zoroastrianism.

Same as REL STD 131A.

**HISTORY 131B. Ancient Persia. 4 Units.**

Survey of the history of Persia in antiquity.

**HISTORY 131C. Medieval Persia. 4 Units.**

A survey of Persian history in the context of Late Antique and Medieval Islamic history.

**HISTORY 131D. Modern Iran. 4 Units.**

The history of Iran from the end of the Safavid Empire in the eighteenth century to the present.

**HISTORY 132B. The Emergence of the Modern Middle East. 4 Units.**

Offers a survey of the history of the Middle East from the 19th century to the present time. Formerly History 133A.

**HISTORY 132C. Women and Gender in the Middle East. 4 Units.**

Focuses on women and gender in the Middle East from the pre-modern to the contemporary.

**HISTORY 132D. Armenians and Armenia in Ancient to Early Modern World History. 4 Units.**

A history of Armenia and Armenians from ethnogenesis to the early modern period at the end of the 1700s within a regional and global context. Takes into account interactions and encounters with the empires, and peoples that encompassed their orbit.

**HISTORY 132E. Armenians and Armenia in Modern World History. 4 Units.**

Covers the most important themes in the history of Armenians and Armenia in the 19th, 20th, and 21st centuries within a regional (i.e., Middle East and Caucasus) and global context.

**HISTORY 132H. Topics in Middle Eastern History. 4 Units.**

Topics include the cultural, political, intellectual, social, and/or economic histories of one or many regions of the Middle East.

Repeatability: Unlimited as topics vary.

**HISTORY 134A. Africa: Societies and Cultures. 4 Units.**

Introduction to the variety of cultures, political organizations, social structures, and artistic expressions created by Africans over a broad time span. Indigenous development of African societies in distinct regions of the continent. Issues, themes, processes for understanding history of Africa.

**HISTORY 134C. Topics in the History of Africa. 4 Units.**

Studies in selected areas of African history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 134D. Topics in South African History. 4 Units.**

Introduction to important historical events and processes in Southern Africa. Focuses on particular themes and explores how those themes change over time. Topics include: changing ideas about race, the development of class structures, identity formation, the role of gender.

Repeatability: Unlimited as topics vary.

**HISTORY 134E. History of the African Diaspora. 4 Units.**

Examines the causes and consequences of the multiple diasporas of African peoples since the sixteenth century in the Atlantic world, especially the Americas and Europe.

Same as AFAM 137.

**HISTORY 135B. Crossing the World's Oceans: From Sail to Steam. 4 Units.**

Explores the basics of oceanography, the evolution of ships and sailing in the ancient Mediterranean world, the North Atlantic, Polynesia, the South China Sea, the Arab Indian Ocean, the global oceanic world, and the discovery of celestial and terrestrial navigation.

**HISTORY 135E. Topics in the History of Science and Technology. 4 Units.**

Studies in selected areas of science and technological history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 135G. Language Origins: Evolution, Genetics, and the Brain. 4 Units.**

Examines how human language(s) may have originated. Studies pertinent techniques (reconstruction) and addresses related questions, including is our language faculty inborn (i.e., genetically encoded)? Can brain imaging and population genetics research help to unlock this mystery of human evolution?.

Same as ANTHRO 152A, GLBLCLT 105, LSCI 175.

**HISTORY 136D. Topics in the History of Medicine and Health Care. 4 Units.**

Studies in selected areas of Medicine and Health Care history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 140B. Revolutionary America: 1740-1790. 4 Units.**

An exploration of why 13 continental colonies, whose commercial and cultural connections with Britain far exceed their interaction with one another, resisted imperial reform after 1763 to the point of war in 1775 and independence the following year.

**HISTORY 142A. California Dreaming: Conquest, Conflict, and Globalization in the Golden State. 4 Units.**

California as a case study of national trends and as a unique setting: its specific problems and culture. Major themes include: colonization, immigration, race relations, agricultural development, industrialization, urbanization, working class movements, social conflict, and political reform.

**HISTORY 142B. Topics in American Social and Economic History. 4 Units.**

Studies in selected areas of American social and economic history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 144G. Topics in American Cultural and Intellectual History. 4 Units.**

Studies in selected areas of American cultural and intellectual history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 146H. Topics in Women and Gender Relations in the United States. 4 Units.**

Studies in selected areas of women and gender relations in the United States. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 147. Education and the American Dream: Historical Perspectives on Democracy and Education. 4 Units.**

Examines the relationship between public schooling and the promotion of democratic ideals in American society over the past two centuries.

Same as EDUC 174.

**HISTORY 148B. Topics in Multicultural U.S. History. 4 Units.**

Examines the variety of cultural expressions through which the people who came to inhabit the United States historically signify their collective identities.

Repeatability: Unlimited as topics vary.

**HISTORY 149. Veterans in History and Society. 4 Units.**

Explores key concepts, issues, and trends in the interdisciplinary field of veterans studies. Students gain a deep understanding of the ways that social scientists and historians have analyzed the identities, experiences, and worldviews of U.S. military veterans.

Same as SOC SCI 132.

**HISTORY 150. Topics in African American History. 4 Units.**

Studies in selected areas of African American history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as AFAM 138.

**HISTORY 151A. Chicana/Chicano History: Pre-Colonial to 1900. 4 Units.**

Examines social history of the southwest region from antiquity to 1900. Discusses major questions, theory and research methods pertinent to Chicanas/Chicanos. Themes include: indigenous empires, conquest, colonialism, social stratification, ideology, marriage, sexuality, industrial capitalism, accommodation and resistance.

Same as CHC/LAT 132A.

**HISTORY 151B. Chicana/Chicano History: Twentieth Century. 4 Units.**

Examines social history of the Southwest with emphasis on Mexican-origin people. Discusses major questions, theory and research methods pertinent to Chicana/Chicano history. Themes explored include: immigration, xenophobia, class struggle, leadership, generational cohorts, unionization, education, barriozation, ethnicity, patriarchy, sexuality.

Same as CHC/LAT 132B.

**HISTORY 151C. Latinas in the Twentieth Century U.S.. 4 Units.**

Latinas in the U.S. from 1900 to present, offering a diversity of their cultures, regional histories, sexualities, generations, and classes.

Same as CHC/LAT 135.

**HISTORY 151D. Latina/Latino Pop: Latina/Latino Popular Culture. 4 Units.**

With a focus on the politics of language and space/place, prepares students to critically analyze sites of Latina/Latino popular culture including: music, film, performance, sports, media, and varied subcultures.

Same as CHC/LAT 121.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment. History Majors have first consideration for enrollment.

**HISTORY 152. Topics in Asian-American History. 4 Units.**

Introduction to important themes in the history of people of Asian ancestry in the United States from the nineteenth century to the present.

Repeatability: Unlimited as topics vary.

**HISTORY 152A. Asian American Labor. 4 Units.**

Explores history of Asian Americans and work from the nineteenth century to the present. Areas of study include migration, colonialism, family, social organization, and work culture.

Same as ASIANAM 137.

**HISTORY 152B. Asian American and African American Relations. 4 Units.**

Addresses relationships of Asian American and African American communities in the United States. Topics include race, class, gender, labor, economic systems, political mobilization, community, civil rights, activism, cultural expression.

Same as AFAM 117, ASIANAM 167.

**HISTORY 154. American Urban History. 4 Units.**

A study of urban communities in the United States, from colonial times to the present. Traces the impact of industrialization and urbanization on social and cultural life, and investigates the significance of urban life for U.S. democratic culture.

**HISTORY 160. Sex and Conquest in Latin America. 4 Units.**

Competing ideas of masculinity and femininity, sexual violence, sexual identities, and gendered hierarchies informed how the Spanish engaged in military and religious domination of Mexican and Andean communities, as well as the forms of native resistance throughout colonial Latin America.

Same as ANTHRO 140, CHC/LAT 150A, GEN&SEX 171A.

**HISTORY 162. Topics in Brazilian History. 4 Units.**

Studies in selected areas of Brazilian history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 163. World of Coffee . 4 Units.**

History of consumption and production of coffee over the centuries, and coffee's cultural, economic, social, political consequences. Coffee's social life as a drug, symbol of hospitality, religious rite, sociability and bourgeois lifestyle, commodity, source of livelihoods, imperial revenues, corporate profits.

Same as INTL ST 111B.

**HISTORY 164A. Caribbean History: Colonization to Emancipation. 4 Units.**

Exploration of the history of the archipelago from pre-Columbian times to the end of slavery; examining the impact of European colonization, decimation of the indigenous populations, African slavery, resistance, and emancipation; the unity and diversity of experience in region.

Same as AFAM 134A.

**HISTORY 164B. Caribbean History: Emancipation to Independence. 4 Units.**

Post-emancipation and anti-colonial struggles ending with political independence for most of the region. Examines social, political, economic, cultural dimensions of post-emancipation period, including large-scale migration to Central America, the U.S., and Britain; the region's global cultural and political contribution.

Same as AFAM 134B.

**HISTORY 165. Race and Empire in Colonial Latin America. 4 Units.**

Explores how native people of Latin America with enslaved and free African incorporated and defied Spanish and Portuguese colonization. Focuses on religious adaptations, resistance movements, legal systems, and the emergence of multicultural communities to explain how race shaped European empires.

Same as ANTHRO 162C.

**HISTORY 165A. War and Revolution in Colonial Latin America. 4 Units.**

Comparison of how Andeans resurrected the leaders of the Inca, a defeated indigenous empire, to contest the Spanish empire with how enslaved Africans, with their descendants and others, defeated Spanish colonial rule in what would become the Cuban nation.

**HISTORY 166. U.S. Intervention in Latin America. 4 Units.**

Explores political, economic, social, and cultural ties that bind Latin America to the United States. Focuses on U.S. intervention and Latin American response from early nineteenth century to present day. Case studies include Mexico, Guatemala, Cuba, Chile, and Central America.

Same as POL SCI 142J, INTL ST 177D, CHC/LAT 150.

**HISTORY 166B. Revolution and Reaction in Cold War Latin America. 4 Units.**

Explores Latin American experiences of revolutionary change and military dictatorship during the Cold War (1945-1990). Pays particular attention to the lives of women, peasants, workers, and the urban middle classes. Case studies include Guatemala, Cuba, Chile, Argentina, Nicaragua, and Mexico.

Same as INTL ST 177G.

**HISTORY 166C. Cuban Society and Revolution. 4 Units.**

Explores the causes, development, and legacy of the 1959 Revolution. Themes include economic dependency, democracy, race, gender, culture, and the always volatile relations between Cuba and the United States.

Same as POL SCI 153G, INTL ST 177E, CHC/LAT 157.

**HISTORY 166D. Revolution in Latin America. 4 Units.**

Presents a comparative analysis of the causes, development, and consequences of selected revolutionary movements, focusing on outbreaks in Mexico, Bolivia, Cuba, Chile, Nicaragua, and Grenada. Explores topics of state formation, economic nationalism, social justice, ethnicity, and role of international affairs.

Same as CHC/LAT 151B, SOC SCI 173N, INTL ST 177C.

**HISTORY 169. Topics in Latin American History. 4 Units.**

Studies in selected areas of Latin American history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 170A. Ancient India. 4 Units.**

Examines the visual and religious history of the region defined as 'India' today, but necessarily encompassing modern Bangladesh and Pakistan. Culminates with the supposed Golden Age of the Gupta empire and its far-reaching legacies.

Same as ART HIS 155A, REL STD 122.

Concurrent with ART HIS 255A.

**HISTORY 170B. Medieval India. 4 Units.**

Begins with the Gupta period's aesthetic legacies in South Asia's architecture, sculpture, and painting. Explores the dispersal of Islam throughout South Asia, including the Muslim communities of southern India.

Same as ART HIS 155B, REL STD 123.

Concurrent with ART HIS 255B.

**HISTORY 171D. Chinese History to 1800. 4 Units.**

A survey of the history of China to 1800.

**HISTORY 171E. Chinese History: 1800-1949. 4 Units.**

An examination of Chinese society and thought from the late-eighteenth century to the 1949 revolution. Focuses on the role of intellectuals; popular culture; women in Chinese society; developments in commerce and urban life; rebellion; foreign imperialism.

**HISTORY 171G. Topics in the History of China. 4 Units.**

Topics include the cultural, political, economic, social, intellectual, and religious history of China.

Repeatability: Unlimited as topics vary.

**HISTORY 172G. Topics in the History of Japan. 4 Units.**

Topics include the cultural, political, economic, social, intellectual and religious history of Japan.

Repeatability: Unlimited as topics vary.

**HISTORY 173G. Topics in the History of Korea. 4 Units.**

Topics include the cultural, political, economic, social, intellectual, and religious history of Korea.

Repeatability: Unlimited as topics vary.

**HISTORY 174G. Topics in the History of South Asia. 4 Units.**

Topics include the cultural, political, economic, social, intellectual, and religious history of South Asia.

Repeatability: Unlimited as topics vary.

**HISTORY 180. Special Studies in Social History. 4 Units.**

Studies in selected areas of social history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 182. Special Studies in Intellectual-Cultural History. 4 Units.**

Studies in selected areas of intellectual-cultural history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 183. Special Studies in International History. 4 Units.**

Studies in selected areas of international history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 184. Special Studies in Comparative History. 4 Units.**

Studies in selected areas of comparative history. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 185. Special Studies in Social Theory. 4 Units.**

Studies in selected areas of social theory. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**HISTORY 190. Colloquium . 4 Units.**

Specialized courses dealing primarily with close reading and analysis of primary and secondary works; required reports and papers. Each colloquium reflects the instructor's intellectual interests and is conducted as a discussion group. Limited to 18 students.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only. History Majors have first consideration for enrollment.

**HISTORY 193. Advanced Research Seminar I. 4 Units.**

The first course in a two-quarter advanced research sequence, this course allows upper-division history majors to undertake significant research and writing under close faculty supervision.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: History majors only. Upper-division students only.

**HISTORY 194. Advanced Research Seminar II. 4 Units.**

Second course in a two-quarter advanced research sequence. Allows upper division history majors to undertake significant research and writing under close faculty supervision.

Prerequisite: HISTORY 193. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. History Majors only.

**HISTORY 197. Internships in Public History. 4 Units.**

Students will sharpen their abilities to research, critically interpret, and present history by "doing history" beyond the formal classroom. Internships, which introduce students to the field of "public history," include working as archivists, oral historians, project advisers, and exhibit curators.

Grading Option: Pass/no pass only.

Restriction: Upper-division students only. History Majors only.

**HISTORY 198. Directed Group Study. 4 Units.**

Special topics through directed reading. Paper required.

Repeatability: Unlimited as topics vary.

**HISTORY 199. Independent Reading. 1-4 Units.**

Investigation of special topics through directed reading. Paper required.

Repeatability: May be repeated for credit unlimited times.

**HISTORY 200. History and Theory. 4 Units.**

Explores a variety of theoretical issues and methodological concerns that have sparked lively debate in the humanities and social sciences in past decades and which remain of urgent concern to 21st-century historical writing.

Repeatability: May be repeated for credit unlimited times.

**HISTORY 202A. First-Year Research Seminar. 4 Units.**

Introduction to historical methodologies and preparation for the first-year research paper. Required of all first-year doctoral students and M.A. students.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. History Majors only.

**HISTORY 202B. First-Year Research Seminar. 4 Units.**

Research and writing of a paper demonstrating command of historical methods explored in HISTORY 202A. Required of all first-year Ph.D. students and M.A. students.

Prerequisite: HISTORY 202A

Repeatability: May be taken for credit 1 times as topics vary.

**HISTORY 204A. Second-Year Research Seminar. 4 Units.**

Part one of a two-quarter sequence required of all Ph.D. students during the second year of the program; not required for M.A. students. Includes primary research and writing a research paper, often related to a future dissertation topic.

Restriction: Graduate students only. History Majors only.

**HISTORY 204B. Second-Year Research Seminar. 4 Units.**

Part two of a two-quarter sequence required of all Ph.D. students. Taken during the second year of the Ph.D. program; not required for M.A. students. Includes primary research and writing a research paper, often related to a future dissertation topic.

Prerequisite: HISTORY 204A

Restriction: Graduate students only. History Majors only.

**HISTORY 230. Topics in European History . 4 Units.**

Studies in selected themes and time periods in European history. Topics and period vary.

Repeatability: Unlimited as topics vary.

**HISTORY 240. Topics in World History. 4 Units.**

Studies in selected themes and time periods in world history. Topics and period vary.

Repeatability: Unlimited as topics vary.

**HISTORY 250. Topics in Latin American History . 4 Units.**

Studies in selected themes and time periods in Latin American history. Topics and period vary.

Repeatability: Unlimited as topics vary.

**HISTORY 260. Topics in American History. 4 Units.**

Studies in selected themes and time periods in U.S. history. Topics and period vary.

Repeatability: Unlimited as topics vary.

**HISTORY 270C. Seminar in Japanese History: 1600-Present. 4 Units.**

Studies in Japanese history since 1600. Topics addressed vary each quarter.

**HISTORY 273. Research Methods in Chinese History. 4 Units.**

Introduces major tools for research in Qing and twentieth-century Chinese history as well as an introduction to research tools for earlier periods.

**HISTORY 280. Topics in Asian History. 4 Units.**

Studies in selected themes and time periods in Asian history. Topics and period vary.

Repeatability: Unlimited as topics vary.

**HISTORY 290. Special Topics . 4 Units.**

Lectures, readings, and discussion on subjects more limited in scope than those included in the year-long colloquium series.

Repeatability: Unlimited as topics vary.

**HISTORY 291. Directed Reading. 4-12 Units.**

Reading courses focused on specialized topics.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. History Majors only.

**HISTORY 297. History Internship. 4 Units.**

Limited to History graduate students with Department-approved internships. Materials fee.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. History Majors only.

**HISTORY 298. Experimental Group Study. 4-12 Units.**

Open to four or more students.

Repeatability: May be repeated for credit unlimited times.

**HISTORY 299. Dissertation Research. 4-12 Units.**

Specifically designed for students researching and writing their dissertations.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Advancement to Ph.D. candidacy.

**HISTORY 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Armenian Studies, Minor

The minor in Armenian Studies encourages undergraduate students to acquire the academic breadth and depth to comprehend the major issues, themes, and concepts of Armenian culture and heritage. The interdisciplinary minor consists of courses in a variety of disciplines, including history, politics, anthropology, and Armenian language. Students will expand their understanding of the broader dynamics of the Armenian experience through different eras and geographic settings, both in Armenia and the Diaspora.

### Requirements for the Minor in Armenian Studies

A. Complete:

ARMN 1C	Elementary Armenian <sup>1</sup>
GLBL ME 60A	Humanities and Arts: Problems and Methods for Global Middle East Studies
HISTORY 132D	Armenians and Armenia in Ancient to Early Modern World History
HISTORY 132E	Armenians and Armenia in Modern World History

B. Select three from the following: <sup>2</sup>

HISTORY 124B	Twentieth-Century Russia
HISTORY 131B	Ancient Persia
HISTORY 132B	The Emergence of the Modern Middle East
HISTORY 132C	Women and Gender in the Middle East
HISTORY 132H	Topics in Middle Eastern History

INTL ST 117A/ANTHRO 125X	Transnational Migration
INTL ST 165/POL SCI 158D/SOC SCI 188A	Introduction to Contemporary Middle East Politics
POL SCI 154J	Jews and Power
COM LIT 100A	Nations, Regions, and Beyond <sup>3</sup>
COM LIT 107	Colonialisms and Postcolonialisms <sup>3</sup>
COM LIT 108	Diasporic Literatures and Cultures <sup>3</sup>
COM LIT 150	Literature in Translation <sup>3</sup>

- <sup>1</sup> Students who place above the 1C level are required to substitute a higher-level Armenian language course or an additional course from Area B.
- <sup>2</sup> With the approval of the Director, other relevant courses may satisfy the requirements for the minor.
- <sup>3</sup> These courses must have a Middle Eastern focus to be counted toward the minor.

**Residence Requirement for the Minor:** Four upper-division courses required for the minor must be successfully completed at UCI. Two of the four may be taken through the UC Education Abroad Program, provided course content is approved in advance by the Director.

## History, B.A.

The undergraduate program in History is designed to develop critical intelligence and to foster an awareness of ourselves and our world through the study of the past. The Department presents a variety of approaches to history, and each emphasizes basic disciplinary skills: weighing evidence, constructing logical arguments, and exploring the role of theory in historical analysis and human action.

Upper-division courses range from the examination of individual nation-states (e.g., Chinese history), to studies of the relations among nation-states (e.g., Emergence of the Modern Middle East), to historical analyses of political, socio-economic, and cultural factors (e.g., Women in the United States). Students are also provided the opportunity for small-group learning experiences through colloquia. The colloquia are conducted as discussion groups, involve close reading and analysis of primary and secondary texts, and require writing.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Departmental Requirements for the Major

Twelve courses are required:

A. Select two of the following:

HISTORY 70A	Problems in History: Asia
HISTORY 70B	Problems in History: Europe
HISTORY 70C	Problems in History: United States
HISTORY 70D	Problems in History: Latin America
HISTORY 70E	Problems in History: Middle East and Africa
HISTORY 70F	Problems in History: Transregional History

B. Two additional lower-division History courses

C. Four upper-division History courses

D. Complete the following:

HISTORY 100W	Writing About History
HISTORY 190	Colloquium

E. Two additional lower- or upper-division History courses

F. At least one of the twelve required courses must be devoted to the period prior to 1800.

**Residence Requirement for the History Major:** One course from the History 70 series, HISTORY 100W, HISTORY 190, and three upper-division History courses must be completed successfully at UCI. By petition, two of the six may be taken through the UC Education Abroad Program, provided that course content is approved in advance by the Chair of the History Undergraduate Program Committee.

The Specialization in History for Future Teachers is designed to prepare history majors who aspire to earn a post-baccalaureate teaching credential. Through specific history course requirements, courses in the School of Education, and a field work requirement, students will be well positioned for admission to teaching credential programs.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

Fifteen courses are required:

A. Select one of the following series:

HISTORY 21A- 21B- 21C	World: Innovations and World: Empires and Revolutions and World: Nation, War, and Rights
or	
HISTORY 40A- 40B- 40C	Colonial America: New Worlds and Nineteenth-Century U.S.: Crisis and Expansion and Modern America: Culture and Power

B. Complete the following:

HISTORY 70C	Problems in History: United States
HISTORY 100W	Writing About History
HISTORY 190	Colloquium

C. Select two courses from the following:

HISTORY 70A	Problems in History: Asia
HISTORY 70B	Problems in History: Europe
HISTORY 70D	Problems in History: Latin America
HISTORY 70E	Problems in History: Middle East and Africa
HISTORY 70F	Problems in History: Transregional History

D. Select one course in California History.

HISTORY 142A	California Dreaming: Conquest, Conflict, and Globalization in the Golden State
HISTORY 151A	Chicana/Chicano History: Pre-Colonial to 1900
HISTORY 151B	Chicana/Chicano History: Twentieth Century

E. Two upper-division U.S. History courses.

F. Two upper-division non-U.S. History courses.

G. Select one course from the School of Education.

EDUC 108	Adolescent Development and Education
EDUC 124	Multicultural Education in K-12 Schools
EDUC 128	Exceptional Learners
EDUC 131	Educational Technology
EDUC 173	Cognition and Learning in Educational Settings

H. Complete at least two units of field work from EDUC 100 or other relevant experience with prior departmental approval.

**Residence Requirement for the History Major with a Specialization in History for Future Teachers:** HISTORY 70C, HISTORY 100W, HISTORY 190, and three upper-division History courses must be completed successfully at UCI. By petition, two of the six may be taken through the UC Education Abroad Program, provided that course content is approved in advance by the Chair of the History Undergraduate Program Committee.

The training and discipline derived from historical studies provide a valuable experience for all educated persons seeking to understand themselves and their world. Many students who complete undergraduate degrees in the Department of History go on to graduate school in a variety of fields, including history, law, business, international relations, and education.

The study of history is valuable preparation for many other careers as well. The strong academic and professional orientation acquired by History majors is necessary to pursue successful careers in such diverse fields as advertising, the non-profit sector, journalism, management, public relations, publishing, international relations, and government service.

The UCI Division of Career Pathways provides services to students on resume preparation, job search, and interview techniques. See the UCI Division of Career Pathways website (<http://career.uci.edu/>) for additional information.

The department strongly encourages majors and minors to take advantage of the University's study abroad programs and to experience a different culture, for a quarter or longer, while making progress toward their UCI degree. Moreover, students who are particularly interested in the history of a specific country or region would greatly benefit from direct study and cultural interaction within that country or region. Information about studying abroad can be found at UCI's Study Abroad Center website. (<http://www.studyabroad.uci.edu/>)

## History, M.A.

The Department of History at the University of California, Irvine emphasizes graduate training in regional areas, world and transnational history, and thematic specialties as elaborated in the graduate handbook. Whatever the student's chosen emphasis, the History Graduate Program encourages

students to think across national and regional borders and to have a solid understanding of how the discipline of History contributes to debates about global and local transformation.

It is desirable that an applicant have the equivalent of an undergraduate major in History; however, the Department also considers students who have previously specialized in other subject areas and who have strong analytical and writing skills. The Department's required grade-point minimums and English Language Proficiency requirements for international student admission are consistent with university policy. A GRE score is not required for admission. Students are accepted for fall admission only.

### Program of Study

Masters students receive similar opportunities as those offered doctoral students to train in the history of area regions and thematic emphases. A total of nine courses are required: three in a first field (either area-based or thematic), two in a second field (area-based or thematic), the two-quarter first-year research seminar (HISTORY 202A and HISTORY 202B), and two electives that may be taken outside the Department. It is strongly recommended that at least one of these electives be a directed readings course (HISTORY 291) with the advisor to either work on the thesis or prepare for the comprehensive exam. Upon entering the program, M.A. students must choose a department faculty member to serve as their advisor.

### Time Limits

The M.A. is a one-year program in academic residence as a full-time student. However, it is understood that many M.A. students are employed and need to enroll on a part-time basis. Students are allowed up to three years of graduate study to complete the degree.

### Degree Conferral

**Degree Conferral Plan I- Thesis:** The master's thesis represents a revision of the first-year research paper, equivalent to a scholarly article, under the supervision of the faculty advisor. The project is reviewed and approved by the advisor and the thesis committee.

**Degree Conferral Plan II- Comprehensive Exam:** At the end of the final quarter, the M.A. candidate must pass a comprehensive oral exam administered by the faculty advisor and one other faculty member. Students are examined on their first field.

### Language Requirement

Students in the M.A. program whose major field requires use of foreign language sources must demonstrate competence in a foreign language in the process of writing the first-year research paper and thesis. Other M.A. students do not have to meet a foreign language or alternative skills requirement.

## History, Minor

Students who are interested in the study of history but are majoring in other disciplines may minor in History. The minor incorporates elements of the Department's program for majors but allows students enough flexibility to pursue programs in other departments and schools.

Upper-division courses range from the examination of individual nation-states (e.g., Chinese history), to studies of the relations among nation-states (e.g., Emergence of the Modern Middle East), to historical analyses of political, socio-economic, and cultural factors (e.g., Women in the United States). Students are also provided the opportunity for small-group learning experiences through colloquia. The colloquia are conducted as discussion groups, involve close reading and analysis of primary and secondary texts, and require writing.

### Departmental Requirements

Seven courses are required:

- A. Select three lower-division History courses.
- B. Select four upper-division History courses.

**Residence Requirement for the Minor:** All four upper-division History courses must be completed successfully at UCI. By petition, two of the four may be taken through the UC Education Abroad Program, providing course content is approved in advance by the Chair of the History Undergraduate Program Committee.

## History, Ph.D.

The Doctoral Program in History is designed to provide students with advanced historical research skills and a solid grounding in the theory and methodology of history. This combination reflects the Department's conviction that scholars should approach significant questions about the past with rigor and sophistication. The Department requires that students develop critical abilities in dealing with primary sources, secondary syntheses, and the interrelationship of history and theory. Candidates for the Ph.D. in History are expected to gain teaching experience as an integral part of their graduate training. This is accomplished through work as a teaching assistant.

### Coursework

Doctoral students take a minimum of 15 formal courses to be completed during the first two years of the program. Ten courses must be taken within the History Department.

## History and Theory

Required coursework for doctoral students includes a mandatory two-quarter sequence in History and Theory, during the first year. These courses explore a variety of theoretical issues and methodological concerns that have sparked debate in the humanities and social sciences in the past decades and which remain pertinent to 21st century historical writing. Topics may include the relationship between materialist approaches and cultural analysis; subjectivity and governance; gender and sexuality; ethnicity and racial formation; the politics of religion; 'the archive' and archival practice; nationalism and postcolonialism; world history and transnational studies.

## Field Emphases

Doctoral students are required to take a total of six courses satisfying requirements for specialization in two historical fields, in either area studies or thematic fields. Students take three courses in each field. The Department offers area studies fields in Asian History, European History, Latin American History, Middle East and African History, U.S. History, and World History. Thematic fields vary depending on demand. Students may take courses satisfying field requirements in any order.

## Research Seminars

Doctoral students are required to take a two-quarter course sequence in research and writing both their first and second year in the graduate program. In the first year, students take a proseminar on historical methodology (HISTORY 202A) followed by a second quarter (HISTORY 202B) in which they write a research paper that engages the methodologies and questions explored in the previous quarter. Students who enter the doctoral program with a master's may petition to be exempt from the first-year research sequence, pending acceptance of the M.A. thesis as an equivalent to the final research paper of the sequence.

In the second year of study, Ph.D. students take a two-course sequence (HISTORY 204A and HISTORY 204B) in which they research and write a paper on a topic of their choice. The second year research paper is required of all doctoral students.

## Language Requirement

All students must demonstrate a proficiency in one language other than English prior to taking the Ph.D. candidacy qualifying exam. Competency in a language may be established either by passing a departmental examination (proctored in the department office) or through extensive language use in one of the research seminars. The language used to satisfy this requirement is subject to their advisors' approval.

## Summary of Required Course of Study:

1. History and Theory - two courses
2. Research Seminars – four courses
3. First Field - three courses
4. Second Field – three courses
5. Electives - three courses
6. Foreign Language Proficiency

## First-Year Review

To be admitted formally into the doctoral program, students must satisfactorily pass a departmental evaluation at the end of their first year of study; this includes students who entered with a M.A. from another institution. Doctoral students can be awarded an M.A. from UCI after fulfilling requirements for residence, one language, and successfully completing 36 units, including 28 units in required courses.

## The Candidacy Qualifying Exam and Dissertation Prospectus

In the third year of the doctoral program, students prepare for their candidacy qualifying exam and write the dissertation prospectus. Most third year students enroll in the intensive readings course (HISTORY 298) or directed readings (HISTORY 291) to work closely with faculty in preparing for exams and writing their prospectus.

The candidacy qualifying exam is an oral, two-hour meeting during which a student is examined in their first and second field by a committee of four faculty members, plus an additional faculty referee. Upon successful completion of the exam, the student is officially advanced to doctoral candidacy (all but dissertation) and presents the dissertation prospectus in a colloquium including all members of the dissertation committee for formal approval. Both the exam and prospectus colloquium should be completed by the end of the third year.

## Dissertation Research and Writing

The dissertation is the most important part of the Department's doctoral program. The dissertation is an original piece of historical scholarship, involving extensive primary research and original analysis of secondary source material. Students spend a year or more engaged in intensive research, and another year or more writing the dissertation. Throughout this period, students work closely with the advisor and the dissertation committee members. The finished dissertation must be approved by all members of the dissertation committee.

## Teaching

Most graduate students begin work as a teaching assistant for the Department or School courses during their second year and continue throughout their tenure in the program, except when dissertation research or writing require their residency away from the university. Students have the opportunity

to apply to teach their own courses during summer session once they have advanced to doctoral candidacy. Students beyond their second year are required to also apply for teaching positions outside the department, e.g. in Composition or Humanities Core.

### Time to Degree for the Ph.D.

Normative time to degree for the doctoral program is seven years. Maximum time to degree permitted is nine years.

### Requirements for Admission to the Ph.D. Program

It is desirable that an applicant have the equivalent of an undergraduate major in History; however, the Department also considers students who have previously specialized in other subject areas and who have strong analytical and writing skills. Many students entering the program hold a Masters degree in History, or an associated field. The Department's required grade-point minimums and English Language Proficiency requirements for international student admission are consistent with university policy. A GRE score is not required for admission. Students are accepted for fall admission only.

## Department of Philosophy

### Annalisa Coliva, Department Chair

85 Humanities Instructional Building

949-824-6525

<http://www.humanities.uci.edu/philosophy/>

The Department of Philosophy is world-class and has particular strengths in three main areas. History of philosophy, including ancient, modern, and contemporary philosophy, both analytic and continental; epistemology, philosophy of mind and metaphysics, pursued with analytic methodologies but open to the influences of the continental tradition; ethics, legal, and political philosophy, social and value theory.

UC Irvine's philosophy graduate program (<https://www.humanities.uci.edu/philosophy/graduate/>) is jointly administered by the Department of Philosophy in the School of Humanities and the Department of Logic and Philosophy of Science in the School of Social Sciences (<https://lps.uci.edu/>). The graduate program is ranked among the top programs in the United States, and among the very best in a number of subfields of philosophy (see the Philosophical Gourmet Report (<https://leiterreports.typepad.com/blog/2017/12/2017-18-pgr-us-top-50-results.html>)). Graduate applications need to be addressed either to the Department of Philosophy, or to the Department of Logic and Philosophy of Science, depending on the dominant interests of the student. But graduate students have full access to all the courses and faculty of the two Departments. We have been able to place (<https://www.humanities.uci.edu/philosophy/graduate/placement.php>) our Ph.D. students at well-reputed universities and colleges.

The success of our undergraduate program is based on a rigorous education both in historical and in contemporary issues. Because of the collaboration between the two Departments undergraduate and graduate students can take courses ranging from philosophy of quantum mechanics and decision theory to medieval ethics and phenomenology. The fact that our majors have gone on to study in first-rate graduate programs and to pursue successful careers in law and medicine is a testament to the quality of the program.

- Medical Humanities, Graduate Emphasis
- Philosophy, B.A.
- Philosophy, Minor
- Philosophy, Ph.D. (School of Humanities)

## Faculty

Ermanno Bencivenga, Ph.D. University of Toronto, *Professor of Philosophy; Humanities*

Sven D. Bernecker, Ph.D. Stanford University, *Professor of Philosophy*

Anna Boncompagni, Ph.D. University of Roma Tre Italy, *Assistant Professor of Philosophy*

Annalisa Coliva, Ph.D. University of St. Andrews, *Professor of Philosophy*

Marcello Fiocco, Ph.D. University of California, Santa Barbara, *Associate Professor of Philosophy*

Margaret P. Gilbert, Ph.D. Oxford University, *Abraham I. Melden Chair in Moral Philosophy and Professor of Philosophy*

Sean Greenberg, Ph.D. Harvard University, *Associate Professor of Philosophy; European Languages and Studies; Religious Studies*

Jeffrey S. Helmreich, Ph.D. University of California, Los Angeles, *Assistant Professor of Philosophy; School of Law*

Aaron J. James, Ph.D. Harvard University, *Professor of Philosophy*

Stephen N. Jolley, Ph.D. Cambridge University, *Professor Emeritus of Philosophy*

Bonnie D. Kent, Ph.D. Columbia University, *Professor Emeritus of Philosophy; Religious Studies*

Joseph F. Lambert, Ph.D. Michigan State University, *Professor Emeritus of Philosophy*

Alan Nelson, Ph.D. University of Illinois at Chicago, *Professor Emeritus of Philosophy*

Casey C. Perin, Ph.D. University of California, Berkeley, *Associate Professor of Philosophy*

Duncan Pritchard, Ph.D. University of St. Andrews, *Professor of Philosophy*

Gerasimos X. Santas, Ph.D. Cornell University, *Professor Emeritus of Philosophy*

Karl Schafer, Ph.D. New York University, *Professor of Philosophy*

Martin Schwab, Ph.D. Heidelberg University, *Professor Emeritus of Philosophy*

David W. Smith, Ph.D. Stanford University, *Professor of Philosophy*

Nicholas P. White, Ph.D. Harvard University, *Professor Emeritus of Philosophy*

Peter W. Woodruff, Ph.D. University of Pittsburgh, *Professor Emeritus of Philosophy*

## Affiliate Faculty

Jeffrey A. Barrett, Ph.D. Columbia University, *Professor of Logic and Philosophy of Science; Philosophy*

Jeremy Heis, Ph.D. University of Pittsburgh, *Associate Professor of Logic and Philosophy of Science; Philosophy*

Brian Skyrms, Ph.D. University of Pittsburgh, *UCI Distinguished Professor of Logic and Philosophy of Science; Economics; Philosophy*

P. Kyle Stanford, Ph.D. University of California, San Diego, *Professor of Logic and Philosophy of Science; Philosophy*

Kai Wehmeier, Ph.D. University of Münster, *Director, Center for the Advancement of Logic, its Philosophy, History, and Applications and Professor of Logic and Philosophy of Science; Language Science; Philosophy*

## Courses

### **PHILOS 1. Introduction to Philosophy. 4 Units.**

A selection of philosophical problems, concepts, and methods, e.g., free will, cause and substance, personal identity, the nature of philosophy itself. Materials fee.

(IV)

### **PHILOS 2. Puzzles and Paradoxes. 4 Units.**

Introduction to the formal tools needed to comprehend and evaluate philosophical arguments and theoretical reasoning in general.

(IV and VB ).

### **PHILOS 3. Technology and Society. 4 Units.**

A study of the nature of technology, its relation to human values, the philosophical assumptions in its development, and the philosophical implications of technology.

(II)

### **PHILOS 4. Introduction to Ethics. 4 Units.**

Selected topics from the history of ethics, e.g., the nature of the good life and the moral justification of conduct.

(IV)

### **PHILOS 5. Contemporary Moral Problems. 4 Units.**

Selected moral issues of current interest, e.g., abortion, sexual morality, euthanasia, capital punishment, reverse discrimination, civil disobedience, or violence.

(IV)

**PHILOS 7. Introduction to Existentialism. 4 Units.**

An analysis of themes in phenomenology and existentialism and their philosophical origins, e.g., consciousness, self and other, freedom and individuality.

(IV)

**PHILOS 10. History of Ancient Philosophy. 4 Units.**

Examination of the central philosophical themes developed by the pre-Socratics, Socrates, Plato, Aristotle, the Stoics, the Epicureans, and the Skeptics.

(IV)

**PHILOS 11. History of Medieval Philosophy. 4 Units.**

A study of some of the major theological and philosophical texts from the Medieval period.

Prerequisite: Recommended: PHILOS 10.

(IV)

**PHILOS 12. History of Modern Philosophy. 4 Units.**

A study of major developments in western philosophy from Descartes to Kant with readings from Descartes, Leibniz, Locke, Berkeley, Hume, and Kant.

Prerequisite: Recommended: PHILOS 10 or PHILOS 11.

(IV)

**PHILOS 13. History of Contemporary Philosophy. 4 Units.**

A study of recent philosophical developments in Anglo-American and Continental philosophy with readings from such figures as Russell, Moore, Wittgenstein, Quine, Heidegger, and Sartre.

Prerequisite: Recommended: PHILOS 12.

(IV)

**PHILOS 21. Philosophy and Religion. 4 Units.**

Examines the intersection of religion and philosophy from a standpoint that does not presuppose previous academic study of either. Both Western and Eastern traditions and perspectives may be explored.

Repeatability: Unlimited as topics vary.

Same as REL STD 21.

(IV)

**PHILOS 22. Introduction to Law and Society. 4 Units.**

What constitutes a legal system? What does it mean for a society to have a system as a part of the social fabric. Examines the social status of law and its use as a tool for fashioning society.

(III)

**PHILOS 29. Critical Reasoning. 4 Units.**

Introduction to analysis and reasoning. The concepts of argument, premise, and conclusion, validity and invalidity, consistency and inconsistency. Identifying and assessing premises and inferences. Deductive versus inductive reasoning, and introduction to the probability calculus. Evaluating definitions. Informal fallacies.

Same as LPS 29.

(II and Vb ).

**PHILOS 30. Introduction to Symbolic Logic. 4 Units.**

An introduction to the symbolism and methods of the logic of statements, including evaluation of arguments by truth tables, the techniques of natural deduction, and semantic tableaux.

Same as LPS 30, LSCI 43.

(Vb)

**PHILOS 31. Introduction to Inductive Logic. 4 Units.**

Philosophical questions concerning the foundations of scientific inference, e.g., the traditional problem of induction, the Goodman paradox, the concept of cause, Mill's method of inductive reasoning, probability calculus, different interpretations of probability, and their interaction in inductive reasoning.

Same as LPS 31.

**(II, Va)**

**PHILOS 40. Special Topics in Philosophy. 4 Units.**

Lectures on selected topics at the lower-division level.

Repeatability: Unlimited as topics vary.

**PHILOS 91. The Philosophy of Sex. 4 Units.**

Discusses the origins of biological sex, dynamics of sexual selection, sex differences in humans, and the construction of gender in human societies. Seeks to understand the role social values play in the creation of science.

Same as LPS 91.

Overlaps with LPS H91.

**(III)**

**PHILOS 100W. Writing Philosophy. 4 Units.**

Discussion of those aspects of writing of special importance in philosophy, e.g., philosophical terminology, techniques for evaluating arguments, philosophical definitions and theories. At least 4,000 words of assigned composition based on philosophical readings.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as LPS 100W.

Restriction: Upper-division students only.

**(Ib)**

**PHILOS 101. Introduction to Metaphysics. 4 Units.**

A study of one or more of the problems of 'first philosophy,' e.g., substance, free will, causation, abstract entities, identity.

**PHILOS 102. Introduction to the Theory of Knowledge. 4 Units.**

A study of one or more of the basic issues in epistemology, e.g., the role of perception in the acquisition of knowledge, the nature of evidence, the distinction between belief and knowledge, and the nature of truth and certainty.

Same as LPS 102.

**PHILOS 102W. Introduction to the Theory of Knowledge. 4 Units.**

A study of one or more of the basic issues in epistemology, e.g., the role of perception in the acquisition of knowledge, the nature of evidence, the distinction between belief and knowledge, and the nature of truth and certainty.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Overlaps with PHILOS 102, LPS 102.

**(Ib)**

**PHILOS 103. Introduction to Moral Philosophy. 4 Units.**

A study of one or more of the problems of contemporary moral philosophy, e.g., the nature of justice, liberalism versus conservatism, happiness and its relation to virtue and right conduct, the objectivity of moral standards.

**PHILOS 104. Introduction to Logic. 4 Units.**

Introduction to sentence logic, including truth tables and natural deduction; and to predicate logic, including semantics and natural deduction.

Same as LPS 104, LSCI 142.

**PHILOS 105A. Elementary Set Theory. 4 Units.**

An introduction to the basic working vocabulary of mathematical reasoning. Topics include sets, Boolean operations, ordered n-tuples, relations, functions, ordinal and cardinal numbers.

Same as LPS 105A, LSCI 145A.

**PHILOS 105B. Metalogic. 4 Units.**

Introduction to formal syntax (proof theory) and semantics (model theory) for first-order logic, including the deduction, completeness, compactness, and Löwenheim-Skolem theorems.

Prerequisite: PHILOS 105A

Same as LPS 105B, LSCI 145B.

Overlaps with MATH 150.

**PHILOS 105C. Undecidability and Incompleteness. 4 Units.**

Introduction to the formal theory of effective processes, including recursive functions, Turing machines, Church's thesis, and proofs of Gödel's incompleteness theorem for arithmetic, and Church's undecidability theorem for first-order logic.

Prerequisite: PHILOS 105B

Same as LPS 105C, LSCI 145C.

Overlaps with MATH 152.

Concurrent with LPS 205C.

**PHILOS 106. Topics in Logic . 4 Units.**

Selected topics in mathematical or philosophical logic.

Prerequisite: PHILOS 105B or LPS 105B

Repeatability: Unlimited as topics vary.

Same as LPS 106.

**PHILOS 108. Topics in Induction, Probability, and Decision Theory. 4 Units.**

Selected topics in induction, probability, and decision theory.

Repeatability: Unlimited as topics vary.

Same as LPS 108.

**PHILOS 110. Topics in Ancient Philosophy. 4 Units.**

Selected topics from the writings of Plato and Aristotle, e.g., Aristotle's criticisms of Plato's metaphysics, ethics, or politics.

Repeatability: May be taken for credit 2 times as topics vary.

**PHILOS 111. Topics in Medieval Philosophy. 4 Units.**

Studies of some of the major issues of concern to Medieval philosophers, e.g., universals, the nature and existence of God, faith, and reason.

Repeatability: May be taken for credit 2 times as topics vary.

**PHILOS 113. Topics in Modern Philosophy. 4 Units.**

Focuses on the works of central philosophical figures of modern Philosophy (e.g., Descartes, Leibniz, Hobbes, Locke, Hume, Kant) or on the treatment of one or more central philosophical problems by a number of these figures.

Repeatability: Unlimited as topics vary.

Same as LPS 113.

**PHILOS 114. Topics in Nineteenth-Century Philosophy. 4 Units.**

Studies of some of the major figures after Kant (e.g., Hegel, Nietzsche, Marx, Kierkegaard), especially in German idealism and social thought.

Repeatability: Unlimited as topics vary.

**PHILOS 115. Topics in History of Analytic Philosophy. 4 Units.**

Review of central theories or figures in the history of analytic philosophy. Emphasis on writings of Frege, Russell, Schlick, Carnap, and Quine. Topics include the nature of meaning and truth, the synthetic/analytic distinction, and scientific knowledge.

Repeatability: Unlimited as topics vary.

Same as LPS 115.

**PHILOS 116. Topics in Continental Philosophy. 4 Units.**

Studies of some of the major figures (e.g., Husserl), movements (e.g., phenomenology, existentialism) in early twentieth-century continental European thought.

Repeatability: Unlimited as topics vary.

**PHILOS 117. Topics in Asian Philosophy. 4 Units.**

Selected topics in the philosophies of Asia, e.g. Jainism, Buddhism, Yoga, Vedanta, Confucianism, Taoism, and Shinto.

Repeatability: Unlimited as topics vary.

**PHILOS 120. Topics in Metaphysics. 4 Units.**

Examines central philosophical questions concerning our own fundamental nature and that of the world around us (e.g., causation and necessity, determination, free will, personal identity, the mind-body problem).

Repeatability: Unlimited as topics vary.

Same as LPS 120.

**PHILOS 121. Topics in the Theory of Knowledge . 4 Units.**

One or more topics in the theory of knowledge, e.g., the nature of rational justification, of perceptual knowledge, of a priori knowledge.

Repeatability: Unlimited as topics vary.

Same as LPS 121.

**PHILOS 121A. Medical Epistemology. 4 Units.**

Analysis of epistemological issues concerning medical research and health care. Topics may include medical evidence, transmission of medical knowledge, medical expertise, the epistemology of medical disagreement, classification of illnesses, well-being, philosophy of pain, and medical decision making.

**PHILOS 122. Topics in Philosophy of Mind. 4 Units.**

Selected topics involving the concept of mind, e.g., the relation between mind and body, the self, personal identity, consciousness, the unconscious.

Repeatability: Unlimited as topics vary.

**PHILOS 123. Topics in Philosophy of Religion. 4 Units.**

Critical examination of concepts involved in the theological literature, e.g., the nature and existence of God, miracles, the problem of evil, divine command theories in ethics.

Repeatability: Unlimited as topics vary.

**PHILOS 130. Topics in Moral Philosophy. 4 Units.**

Selected topics in ethics.

Repeatability: Unlimited as topics vary.

**PHILOS 131A. Applied Ethics. 4 Units.**

Topics may include capital punishment, world hunger, obligations to future generations, environmental ethics, animal rights, economic justice, sexual morality, affirmative action, racism and sexism, or legalization of drugs.

**PHILOS 131C. Medical Ethics. 4 Units.**

Analysis of moral issues concerning health care. Topics may include just allocation of scarce medical resources, the doctor/patient relationship, genetic engineering, surrogate motherhood, abortion, euthanasia, or social policy concerning AIDS.

**PHILOS 132. Topics in Political and Social Philosophy. 4 Units.**

Selected topics in social and political philosophy, e.g., the functions of government, the justification of political authority, the nature of democracy, the varieties of liberty, and social justice. Readings from classical and contemporary sources.

Repeatability: Unlimited as topics vary.

**PHILOS 133. Topics in Philosophy of Law. 4 Units.**

Selected topics concerning legal systems and the concept of law, e.g., the nature and purpose of law, the nature of authority, the relationship between law and morality, law and political-economic systems.

Repeatability: Unlimited as topics vary.

**PHILOS 140. Topics in Philosophy of Science. 4 Units.**

Selected topics in contemporary philosophy of science, e.g., the status of theoretical entities, the confirmation of theories, the nature of scientific explanation.

Repeatability: Unlimited as topics vary.

Same as LPS 140.

**PHILOS 141A. Topics in Philosophy of Physics. 4 Units.**

Selected topics in the philosophy of physics, e.g., the interpretation of quantum mechanics, the nature of spacetime, the problem of quantum field theories.

Repeatability: Unlimited as topics vary.

Same as LPS 141A.

**PHILOS 141B. Geometry and Spacetime. 4 Units.**

An examination of the foundations of the special theory of relativity, with emphasis on the geometry of Minkowski spacetime, and its relation to both Euclidean and non-Euclidean (hyperbolic) plane geometries.

Prerequisite: MATH 2D and (MATH 3A or MATH 6G)

Same as LPS 141B.

**PHILOS 141C. Philosophy of Quantum Mechanics. 4 Units.**

An examination of the standard von Neumann-Dirac formulation of quantum mechanics. The quantum measurement problem is discussed along with several proposed solutions, including GRW, many-worlds, man-minds, and Bohm's theory.

Same as LPS 141C.

**PHILOS 141D. Probability and Determinism. 4 Units.**

An examination of a cluster of interrelated issues concerning probability, determinism, logic, and the foundations of quantum mechanics.

Prerequisite: MATH 2D and (MATH 3A or MATH 6G)

Same as LPS 141D.

**PHILOS 142W. Writing/Philosophy of Biology. 4 Units.**

Philosophy of biology, e.g., scientific method in biology, the structure of evolutionary theory, teleology, ethics, and evolution. Course work includes one 4,000-word and four 1,000-word papers.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as LPS 142W, BIO SCI E142W.

Restriction: Juniors only.

**(Ib)****PHILOS 143. Topics in Philosophy of Psychology. 4 Units.**

Selected topics in the philosophy of psychology, e.g., the nature of psychological explanation, reductionism, issues in cognitive, behavioral, and neuroscience.

Repeatability: Unlimited as topics vary.

Same as LPS 143, PSYCH 123P.

Restriction: Psychology Majors have first consideration for enrollment. Philosophy Majors have first consideration for enrollment.

**PHILOS 144. Topics in Philosophy of Social Science. 4 Units.**

Selected topics in the philosophy of the social sciences, e.g., Is their goal to understand behavior or to predict and control it?; Are they normative and the natural sciences not?; Do they incorporate philosophical doctrines about language and mind?.

Repeatability: May be taken for credit for 4 units as topics vary.

Same as LPS 144.

**PHILOS 145. Topics in Philosophy of Language. 4 Units.**

Selected topics in the philosophy of language, e.g., the nature of meaning, mechanisms of reference, speech acts.

Repeatability: Unlimited as topics vary.

Same as LPS 145, LSCI 141.

**PHILOS 146. Topics in Philosophy of Logic. 4 Units.**

Selected topics in the philosophy of logic, e.g., the nature of logical truth and our knowledge of it, the status of propositions, definite descriptions, and existential presuppositions.

Repeatability: Unlimited as topics vary.

Same as LPS 146.

**PHILOS 147. Topics in Philosophy of Mathematics. 4 Units.**

Selected historical and contemporary topics in the philosophy of mathematics, e.g., mathematical truth and ontology, mathematical knowledge, the nature and role of proof, the workings of mathematics in application.

Repeatability: Unlimited as topics vary.

Same as LPS 147.

**PHILOS 150. Phenomenology . 4 Units.**

A study of the foundations of phenomenology in Husserl and its background in Bolzano, Frege, Brentano, Meinong, Kant, and Descartes.

**PHILOS 151. Existentialism. 4 Units.**

A study of such central existentialist thinkers as Heidegger and Sartre.

Prerequisite: Recommended: PHILOS 7 or PHILOS 150.

**PHILOS 162. Social Ontology. 4 Units.**

Examines how things in one's social environment exist. Such things are compared and contrasted to others in what might be regarded as the given, natural environment. Topics discussed include natural kinds; artifacts; essentialism; constructivism; intentionality; agency.

**PHILOS 163. Social Epistemology. 4 Units.**

Social epistemology is specifically concerned with questions concerning knowledge and justification that arise in a social context. Topics discussed include testimony, experts, disagreement, group knowledge, feminist epistemology, legal epistemology, and epistemology of education.

**PHILOS 164. Well-Being. 4 Units.**

Examines what it is that makes a life good (or bad) for the person who lives it. Topics include hedonism, desire-satisfaction theories of well-being (as well as other such theories), the notion of harm, the possibility of posthumous harm.

**PHILOS 165. Philosophy of Action. 4 Units.**

Philosophy of action is specifically concerned with questions concerning the nature of acting, and related phenomena such as intending, willing, trying, and trusting. It deals both with individual and group action and their moral and epistemological underpinnings.

**PHILOS 190. Special Topics in Philosophy. 4 Units.**

Lectures on selected topics to be given by regular faculty and visiting faculty.

Repeatability: Unlimited as topics vary.

**PHILOS 199. Directed Special Studies. 2-4 Units.**

Independent study on a research topic supervised by a faculty member.

Repeatability: May be repeated for credit unlimited times.

**PHILOS 199H. Honors Directed Special Studies. 2 Units.**

Independent study on a research topic supervised by a faculty member, with the objective of preparing the Department of Philosophy honors paper.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**PHILOS 200. Special Topics in Philosophy. 4 Units.**

Seminars on selected topics to be given by regular faculty and visiting faculty.

Repeatability: Unlimited as topics vary.

**PHILOS 201. First-Year Seminar. 4 Units.**

An examination of some standard works in the history of philosophy, value theory, metaphysics, or epistemology; required of all first-year Philosophy graduate students in the School of Humanities.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only. Philosophy Majors only. Logic and Philosophy of Sci Majors only.

**PHILOS 205A. Set Theory. 4 Units.**

The basic working vocabulary of mathematical reasoning. Topics include: sets, Boolean operations, ordered n-tuples, relations, functions, ordinal and cardinal numbers.

Same as LPS 205A.

**PHILOS 205B. Metalogic. 4 Units.**

Formal syntax (proof theory) and semantics (model theory) for first-order logic, including the deduction, completeness, compactness, and Loewenheim-Skolem theorems.

Prerequisite: PHILOS 205A or LPS 205A

Same as LPS 205B.

**PHILOS 205C. Undecidability and Incompleteness. 4 Units.**

Formal theory of effective processes, including recursive function, Turing machines, Church's thesis, proofs of Goedel's incompleteness theorem for arithmetics, and Church's undecidability for first-order logic.

Prerequisite: PHILOS 205B or LPS 205B

Same as LPS 205C.

Restriction: Graduate students only.

Concurrent with LPS 105C.

**PHILOS 206. Topics in Logic . 4 Units.**

Studies in selected areas of logic. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 206.

**PHILOS 210. Topics in Ancient Philosophy. 4 Units.**

Studies in selected areas of ancient philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 211. Topics in Medieval Philosophy. 4 Units.**

Studies in selected areas of medieval philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 212. Topics in Renaissance Philosophy. 4 Units.**

Studies in selected areas of renaissance philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 213. Topics in Modern Philosophy. 4 Units.**

Studies in selected areas of modern philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 213.

**PHILOS 214. Topics in Nineteenth-Century Philosophy. 4 Units.**

Studies in selected areas of nineteenth-century philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 215. Topics in Analytic Philosophy. 4 Units.**

Studies in selected areas of analytic philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 215.

**PHILOS 216. Topics in Continental Philosophy. 4 Units.**

Studies in selected areas of continental philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 218. Topics in Contemporary Philosophy. 4 Units.**

Studies in selected areas of contemporary philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 220. Topics in Metaphysics. 4 Units.**

Studies in selected areas of metaphysics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 220.

**PHILOS 221. Topics in Epistemology. 4 Units.**

Studies in selected areas of epistemology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 221.

**PHILOS 221A. Medical Epistemology. 4 Units.**

Analysis of epistemological issues concerning medical research and healthcare. Topics may include medical evidence, transmission of medical knowledge in the doctor-patient interaction, medical expertise, epistemology of medical disagreement, classification of illness, well-being, philosophy of pain, or medical decision making.

Same as LPS 221A.

Restriction: Graduate students only.

**PHILOS 222. Topics in Mind and Action. 4 Units.**

Studies in selected areas of mind and action. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 230. Topics in Ethics . 4 Units.**

Studies in selected areas of ethics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 232. Topics in Political and Social Philosophy. 4 Units.**

Studies in selected areas of political and social philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 232.

**PHILOS 234. Topics in Aesthetics . 4 Units.**

Studies in selected areas of aesthetics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 240. Topics in Philosophy of Science. 4 Units.**

Studies in selected areas of philosophy of science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 240.

**PHILOS 241. Topics in Philosophy of Physics. 4 Units.**

Studies in selected areas of philosophy of physics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 241.

**PHILOS 242. Topics in Philosophy of Biology. 4 Units.**

Studies in selected areas of philosophy of biology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 242.

**PHILOS 243. Topics in Philosophy of Psychology. 4 Units.**

Selected topics in the philosophy of psychology, e.g., the nature of psychological explanation, reductionism, issues in cognitive, behavioral, and neuroscience.

Repeatability: Unlimited as topics vary.

Same as LPS 243, PSYCH 231P.

**PHILOS 244. Topics in Philosophy of Social Science. 4 Units.**

Studies in selected areas of philosophy and social science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 244.

**PHILOS 245. Topics in Philosophy of Language. 4 Units.**

Studies in selected areas of philosophy of language. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 245.

**PHILOS 246. Topics in Philosophy of Logic. 4 Units.**

Studies in selected areas of philosophy of logic. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 246.

**PHILOS 247. Topics in Philosophy of Mathematics. 4 Units.**

Studies in selected areas of philosophy of mathematics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as LPS 247.

**PHILOS 250. Topics in Existentialism and Phenomenology. 4 Units.**

Studies in selected areas of existentialism and phenomenology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**PHILOS 298. Independent Study. 4-12 Units.**

Independent research with Philosophy faculty.

Repeatability: May be repeated for credit unlimited times.

**PHILOS 299. Directed Research. 4-12 Units.**

Directed research with Philosophy faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHILOS 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Philosophy, B.A.

Instruction in philosophy relies essentially upon discussion in which students are active participants. Wherever possible, therefore, classes are limited in size in order to permit sustained interchanges between students and instructor.

Some of the courses offered are of general interest to all students. Others are designed to explore issues that arise in selected and special disciplines such as art or science. The undergraduate advisor should be consulted for advice about courses best suited to the specialized needs of particular students.

The program of course offerings is also designed for those Philosophy majors whose intention may be either to enter some professional school upon graduation (e.g., law) or to engage in graduate work in philosophy.

The faculty encourages Philosophy majors and minors to seriously consider expanding their perspective through an experience of study abroad. The Study Abroad Center (<https://studyabroad.uci.edu/>) assists students in taking advantage of many worldwide opportunities for study and research. Specifically, those interested in analytic philosophy could consider the EAP programs in the United Kingdom, Canada, Sweden, Australia, and New Zealand, and those interested in Continental philosophy could consider the EAP programs in France, Germany, and Italy. See the Study Abroad Center section of the *Catalogue* or an academic counselor for additional information.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Departmental Requirements for the Major

A. Select one of the following:

PHILOS 1	Introduction to Philosophy
PHILOS 2	Puzzles and Paradoxes
PHILOS 3	Technology and Society
PHILOS 4	Introduction to Ethics
PHILOS 5	Contemporary Moral Problems

B. Select one of the following:

PHILOS 30	Introduction to Symbolic Logic
PHILOS 104	Introduction to Logic

C. Select two of the following:

PHILOS 10	History of Ancient Philosophy
PHILOS 11	History of Medieval Philosophy
PHILOS 12	History of Modern Philosophy
PHILOS 13	History of Contemporary Philosophy

D. Complete:

PHILOS 101	Introduction to Metaphysics
PHILOS 102	Introduction to the Theory of Knowledge
or	
PHILOS 102W	Introduction to the Theory of Knowledge
PHILOS 103	Introduction to Moral Philosophy

E. Select five of the following: <sup>1</sup>

PHILOS 100W	Writing Philosophy
PHILOS 105–199	

<sup>1</sup> Students planning to pursue graduate school are strongly advised to take PHILOS 105A and PHILOS 105B.

**Residence Requirement:** At least five upper-division courses required for the major must be completed successfully at UCI.

## B.A. in Philosophy with a Specialization in Medicine and Well-Being

All students must meet the University Requirements.

All students must meet the School Requirements.

A. Complete:

PHILOS 1 or PHILOS 2	Introduction to Philosophy Puzzles and Paradoxes
PHILOS 3	Technology and Society
PHILOS 91	The Philosophy of Sex

B. Select one of the following:

PHILOS 4	Introduction to Ethics
PHILOS 5	Contemporary Moral Problems

C. Complete:

PHILOS 101	Introduction to Metaphysics
PHILOS 102 or PHILOS 102W	Introduction to the Theory of Knowledge Introduction to the Theory of Knowledge
PHILOS 103	Introduction to Moral Philosophy

D. Select five of the following:

PHILOS 121A	Medical Epistemology
PHILOS 131C	Medical Ethics
PHILOS 140	Topics in Philosophy of Science
PHILOS 142W	Writing/Philosophy of Biology
PHILOS 162	Social Ontology
PHILOS 163	Social Epistemology
PHILOS 164	Well-Being

**Residence Requirement:** At least five upper-division courses required for the major must be completed successfully at UCI.

## B.A. in Philosophy with a Specialization in Law and Society

All students must meet the University Requirements.

All students must meet the School Requirements.

A. Complete:

PHILOS 1 or PHILOS 2	Introduction to Philosophy Puzzles and Paradoxes
PHILOS 3	Technology and Society
PHILOS 22	Introduction to Law and Society

B. Select one of the following:

PHILOS 4	Introduction to Ethics
PHILOS 5	Contemporary Moral Problems

C. Complete:

PHILOS 101	Introduction to Metaphysics
PHILOS 102 or PHILOS 102W	Introduction to the Theory of Knowledge Introduction to the Theory of Knowledge
PHILOS 103	Introduction to Moral Philosophy

D. Select five of the following:

PHILOS 130	Topics in Moral Philosophy
PHILOS 132	Topics in Political and Social Philosophy
PHILOS 133	Topics in Philosophy of Law
PHILOS 144	Topics in Philosophy of Social Science
PHILOS 162	Social Ontology
PHILOS 163	Social Epistemology
PHILOS 165	Philosophy of Action

**Residence Requirement:** At least five upper-division courses required for the major must be completed successfully at UCI.

The Department of Philosophy provides high-achieving students with the opportunity to work closely with a faculty member to gain advanced philosophical training and to produce a paper of exceptional quality. We deem such experience to have intrinsic value (though the additional training and paper might also be useful if a student intends to apply to graduate school). In recognition of the extra work needed to produce this paper - it is to be done in addition to all major requirements - a student will receive an honors designation on their degree.

To receive this honors designation, a student must take PHILOS 199H, the honors directed special studies course, in two consecutive quarters with the same faculty member. During these quarters, the student will prepare, under the supervision of the faculty member, a substantial piece of original work (a paper of approximately 5,000 words).

PHILOS 199H is a 2-unit course and is graded P/NP. The course does not count towards the major. Thus, the two PHILOS 199H courses are to be done in addition to all major requirements. PHILOS 199H may be taken in conjunction with a graduate seminar with the permission of the instructor of the seminar.

To be eligible to enroll in PHILOS 199H, a student must be a philosophy major, have a GPA of at least 3.7 in all philosophy courses (not just major courses) and be planning to graduate within three quarters. A student must find a faculty member from the Department willing to supervise and evaluate their work. The student, in consultation with their supervisor, must also find a second reader.

To receive the honors designation, the student must maintain a GPA of at least 3.7 to the conclusion of their coursework. The honors paper must be deemed of sufficient quality by both the supervisor and the second reader.

The study of argument and the precision and clarity of thought and writing required of Philosophy majors are excellent preparation for a variety of careers. Many undergraduates trained in Philosophy go on to professional schools in medicine, business, or law. The analytical skills developed in Philosophy courses are especially useful in legal education; indeed, many UCI Philosophy graduates have been successful at top law schools. Former Philosophy students have also used their skills to advantage in careers in government, business, teaching, law enforcement, and computer programming. Many Philosophy majors also continue their education at the graduate level, either in philosophy or a related discipline.

The UCI (<http://career.uci.edu/>) Division of Career Pathways Center provides services to students and alumni including career counseling, information about job opportunities, a career library, and workshops on résumé preparation, job search, and interview techniques.

## Philosophy, Minor

Philosophy is a skill, not merely a subject matter. This skill, critical thinking, is what illuminates the traditional subject matter of the discipline, topics like the nature of reality or of knowledge or of goodness or God. As a skill, philosophy is more like riding a bike than geology or American history (although the discipline itself does have a venerable history). This skill of critical thinking enables one to question in such a way as to reveal the presuppositions of an issue, to discern the connections among those things relevant to that issue, and to recognize the consequences of these connections in light of further considerations. Critical thinking can be applied to issues well beyond those traditionally associated with philosophy—in fact, this sort of thinking can be applied to any issue that might be of interest to one (food, technology, social media, friendship, society, love, race, gender, etc.). Philosophy is, therefore, a most valuable and transferable skill.

The Minor in Philosophy is for those considering majoring in Philosophy or for those who would like to develop their critical thinking skills while majoring in another discipline. Regardless of what one studies or what one's interests are, one will benefit from becoming a more engaged and critical thinker.

The Minor in Philosophy comprises seven courses: three from a wide range of introductory courses and four from an even wider range of upper-division ones. There are many ways of designing the minor to fit with one's schedule and particular interests.

A. Select three of the following:

PHILOS 1	Introduction to Philosophy
PHILOS 2	Puzzles and Paradoxes
PHILOS 3	Technology and Society
PHILOS 4	Introduction to Ethics
PHILOS 5	Contemporary Moral Problems
PHILOS 10	History of Ancient Philosophy
PHILOS 11	History of Medieval Philosophy
PHILOS 12	History of Modern Philosophy
PHILOS 13	History of Contemporary Philosophy
PHILOS 22	Introduction to Law and Society
PHILOS 30	Introduction to Symbolic Logic

B. Complete four additional upper-division courses selected from PHILOS 100W–199. (PHILOS 199 may be taken for four units only.)

**Residence Requirement for the Minor:** Four upper-division courses must be completed successfully at UCI. By petition, two of the four may be taken through the UC Education Abroad Program, providing course content is approved in advance by the appropriate department chair.

## Philosophy, Ph.D. (School of Humanities)

The Ph.D. program in Philosophy is jointly and cooperatively administered by the Department of Philosophy in the School of Humanities and the Department of Logic and Philosophy of Science (LPS) in the School of Social Sciences. The graduate program has two distinct tracks—the Philosophy track and the LPS track—both of which begin from a common core of shared requirements in history of philosophy, logic, ethics, and metaphysics/epistemology. Students are advised to apply to the track whose faculty, areas of specialization, and curriculum most closely correspond to their interests. The Philosophy track is described here. See the Department of Logic and Philosophy of Science for a description of the LPS track.

UCI's Philosophy Department is committed to providing students a well-rounded graduate education, including central areas of contemporary philosophy and a solid foundation in the history of philosophy. Those with interests in mathematics, the natural sciences, or the social sciences are encouraged to take courses in Logic and Philosophy of Science and to include LPS faculty members on their dissertation committees. The cooperative two-track program provides students the benefits of faculty expertise in a host of areas.

Every year the Philosophy Department invites distinguished philosophers from other universities to present their work to faculty and graduate students. Participation in this colloquium series, though not mandatory, contributes significantly to graduate education. Colloquia sponsored by Logic and Philosophy of Science might also be of interest to Philosophy track students.

Every new graduate student is assigned a faculty member whose purpose is to oversee the student's progress through the major requirements for the advanced degree. The student consults with this faculty member each quarter about progress and any administrative or academic difficulties. After a student has satisfied course and distribution requirements and passed the Portfolio Exam (discussed below), he or she identifies a faculty member in the Philosophy Department as his or her principal dissertation advisor. Together they will recruit the other faculty members, from both inside and outside the Department of Philosophy, who will serve as the student's dissertation committee.

There is no set number of courses required for the Philosophy track, so that work can be tailored to the individual student's needs and interests. However, as a prerequisite for the Ph.D., every student is required to have some experience in teaching. Before students receive their first appointment as TAs in this department, they must complete the TA training program offered by UCI's Division of Teaching Excellence and Innovation.

Normative time to degree in the Philosophy track is seven years for the normally qualified student. Time to advancement to candidacy is four years. Time in candidacy is three years. Maximum time to degree permitted is nine years. A master's degree is not a prerequisite for the Ph.D. The following are requirements for the Ph.D.:

### First-Year Seminar

An examination of some standard works in the history of Philosophy, value theory, metaphysics, or epistemology; required of all first-year Philosophy graduate students in the School of Humanities.

### Distribution Requirements

Students are required to take a range of courses designed to expose them to the various historical periods and fields of philosophy. When course offerings are announced, students are notified about which courses can be used to satisfy which requirements. In some cases, the requirement satisfied will ultimately depend on the content of the student's term paper(s).

The Distribution Requirements are:

1. *History.* To satisfy this requirement, students must receive a grade of B or better in at least four courses covering at least three of the following areas: Ancient, Medieval, Modern Empiricism, Modern Rationalism, Kant, Nineteenth Century, and Twentieth Century.
2. *Field.* To satisfy this requirement, students must receive a grade of B or better in two courses in value theory, one course in logic, and two courses in metaphysics/epistemology, broadly construed.

These requirements must be completed by the end of the seventh quarter in residence.

### Logic Requirement

Students must receive a grade of B or better in an approved logic course. This requirement must be completed by the end of the seventh quarter in residence.

### Tools of Research

The student's dissertation advisor may require his or her advisee to pursue the tool(s) of research deemed useful for the advisee's dissertation research. A student might, for example, be required to take classes outside the Department of Philosophy or learn languages other than English. The Tools of Research requirement must be completed by the end of the 12th quarter in residence.

## **The Portfolio**

A portfolio of at least two papers is an extended writing sample designed to demonstrate a student's ability (a) to understand, analyze, and evaluate positions and arguments in the philosophical literature, and (b) to formulate and defend an original philosophical thesis. These virtues must be displayed at a level of sophistication indicating the student's ability to write a Ph.D. dissertation.

The portfolio must be submitted to the Graduate Coordinator at the end of the fifth week of the student's sixth quarter in residence. Portfolios will be evaluated by the entire faculty of the Philosophy Department. (Philosophy track students may request that relevant LPS faculty also be present at the evaluation meeting.)

## **Prospectus Examination**

In preparation for the prospectus examination, students choose a dissertation advisor and a dissertation committee. They consult with their thesis advisor and other appropriate faculty to prepare a reading list on their area of concentration and a brief dissertation proposal with a comprehensive bibliography. The exam is an oral exam and is normally completed at the end of the seventh quarter, but must be completed by the end of the ninth quarter in residence. The prospectus exam is to determine whether the dissertation project is viable and promises results that will fulfill standards expected for a dissertation in the profession.

## **Candidacy Examination**

In preparation for the candidacy examination, students prepare at least a draft chapter of their dissertation, an outline of the organization of the work, and update their prospectus and bibliography in consultation with their dissertation advisor and their dissertation committee. Students apply for candidacy by filing appropriate forms, including a list (devised in consultation with their advisor) of appropriate members for their Candidacy Committee; one of these, the External Examiner, must come from outside the Department of Philosophy. The Committee is then appointed by the Philosophy Department, on behalf of the Dean of the Graduate Division and the Graduate Council, to administer the oral candidacy examination on the prospectus and draft chapter(s) to determine whether or not the student will be approved to continue work on the dissertation.

The Candidacy Examination is normally completed at the end of the ninth quarter, but must be completed by the end of the 12th quarter in residence. The Philosophy Department Chair, on behalf of the Dean of the Graduate Division and the Graduate Council, then appoints a Doctoral Committee (typically taken from the Candidacy Committee and naturally including the dissertation advisor) to supervise the writing of the dissertation.

## **Dissertation Defense**

Students must defend their dissertation during an oral examination administered by their Doctoral Committee.

## **Optional Emphasis in Critical Theory**

The School of Humanities offers an emphasis in Critical Theory that can be appended to the Philosophy track. A student interested in the emphasis begins by taking the three-quarter Critical Theory Workshop. With the recommendation of a workshop instructor or a Critical Theory faculty member in the Philosophy Department, the student may then apply to the Critical Theory Committee for admission to the emphasis. Emphasis students must complete the following requirements in addition to the usual Philosophy track requirements.

### **The Critical Theory Workshop**

Students must successfully complete the three-quarter Critical Theory Workshop. This sequence is conceived as a reading group, normally conducted by a team of instructors, and developed with the input of all participants. Significant texts are discussed and analyzed in class; no term papers are required. (Students receive 0 units and In-progress grades for the fall and winter quarters; passing students receive 4 units and a Satisfactory grade for the spring quarter.

### **Advanced Critical Theory Requirement**

Students must receive a grade of B or better in three HUMAN 270 courses offered under the supervision of the Critical Theory Committee. At least three such courses will be offered each year. With the approval of the Philosophy Department, these courses can be used to satisfy the tools of research requirement.

### **Mini-Seminar Requirement**

Students must participate in two committee-sponsored mini-seminars (six–eight hours each) offered by visiting scholars on their ongoing research.

### **Research Paper Requirement**

Students must complete a research paper under the guidance of a three-member committee, selected in consultation with the Director; at least one member must be from outside of the Philosophy Department. This paper may (but need not) be part of the portfolio or dissertation.

Upon completion of the emphasis requirements, a letter certifying that fact, signed by the Dean of Humanities and the Director of the Critical Theory Emphasis, will be added to the student's dossier.

## **Program in Law and Graduate Studies (J.D./Ph.D.)**

Highly qualified students interested in combining the study of law with graduate research and/or professional qualifications in Logic and Philosophy of Science are invited to undertake concurrent degree study under the auspices of UC Irvine's Program in Law and Graduate Studies (PLGS). Students in this program pursue a coordinated curriculum leading to a J.D. degree from the School of Law in conjunction with a Ph.D. degree in the

Department of Logic and Philosophy of Science. Contact the PLGS Program Director's office for additional information at 949-824-4158, or by email to [plgs@law.uci.edu](mailto:plgs@law.uci.edu). A full description of the program, with links to all relevant application information, can be found at the School of Law Concurrent Degree Programs website (<http://www.law.uci.edu/academics/interdisciplinary-studies/concurrent-degrees.html>) and in the School of Law School section (<http://catalogue.uci.edu/schooloflaw/#lawandgraduatestudies>) of the *Catalogue*.

The Department of Philosophy and the Department of Logic and Philosophy of Science jointly administer an Exchange Program with the University of Salzburg. The program has two parts. The Scholarly Exchange provides opportunities for faculty and graduate students in Philosophy and LPS to visit Salzburg and for faculty and graduate students from Salzburg to visit one or the other of the UCI units. The Program also sponsors joint conferences, held alternately in Irvine and in Salzburg; these are co-sponsored by Salzburg and the UCI Interdisciplinary Program in the History and Philosophy of Science.

To be eligible for the Salzburg Exchange, a graduate student must have advanced to candidacy. The selected student spends one semester in Salzburg, usually teaching one course in the general area of the thesis topic. An upper-division course may be taught in English, but lower-division courses must be taught in German. (Some previous visitors have learned serviceable German by attending a Goethe institute during the preceding summer.) Typically, a Salzburg visitor will receive a Salzburg Fellowship intended to cover travel expenses, and a stipend; those who teach while in Salzburg will also receive a salary intended to cover living expenses (including health and dental insurance).

Application should be made to the Philosophy Department's Salzburg Exchange Director by November 1 and should include a curriculum vita and syllabi for possible courses to be taught. The Director and/or the Philosophy Department Graduate Coordinator should be consulted for further information.

## Department of Spanish and Portuguese

### Luis F. Avilés, Department Chair

322 Humanities Hall

949-824-6901

<http://www.humanities.uci.edu/spanishandportuguese/>

The Department of Spanish and Portuguese offers programs of study leading to the B.A. in Spanish with emphases in Literature and Culture, Spanish for Future Teachers, and Cinema: Spain, Latin America, and U.S. Latino; and an M.A. and Ph.D. in Spanish.

While members of the faculty are recognized nationally and internationally for their research, creative writing, and contributions to the academic profession, one of the Department's highest priorities is to maintain teaching excellence. The Department's goal is to provide students with a level-specific, solid education in the diverse fields of study that are offered. Many of the undergraduate and graduate courses reflect the faculty's interest in bringing together historical, critical-theoretical, and interdisciplinary perspectives in the study of literature and other cultural artifacts such as film. At the graduate level, students are encouraged to take courses in other UCI programs such as Gender and Sexuality Studies, the Critical Theory Emphasis, Comparative Literature, and Film and Media Studies.

The Department of Spanish and Portuguese offers a minor in Spanish and a minor in Spanish/English Bilingual Education. The Spanish minor provides the opportunity to develop language proficiency while expanding knowledge of Hispanic cultures, literature, and linguistics. Many Spanish minors combine their studies with fields such as political science (pre-law), pre-med, communications, psychology, and economics. The goal of the minor in Spanish/English Bilingual Education is to create a pathway to better prepare students who wish to become future bilingual teachers.

- Spanish, B.A.
- Spanish, M.A.
- Spanish, Minor
- Spanish, Ph.D.
- Spanish/English Bilingual Education, Minor

## Spanish Language Course Placement

### Lower-Division Spanish Language Courses

The goal of SPANISH 1A, SPANISH 1AB, SPANISH 1B, SPANISH 1C, SPANISH 2A, SPANISH 2B, and SPANISH 2C is to help students achieve beginning to intermediate proficiency in Spanish as well as an awareness of cultural perspectives and practices of Spanish-speaking communities in Spain, Latin America, and the United States. SPANISH 3 focuses on the development of academic writing skills in Spanish. SPANISH 3H is designed for students who grew up speaking Spanish at home.

At the same time, these beginning Spanish classes are an excellent portal to study abroad, be that in Spain or in Latin America. For an overview of relevant study sites, visit the Study Abroad Center website (<http://www.cie.uci.edu/>).

NOTE: SPANISH 1A, SPANISH S1AB, and SPANISH 1AB are open only to students who have no prior knowledge of Spanish.

## Enrollment Authorization

Students must take a copy of their high school transcript to their academic counseling office to activate their eligibility to enroll in SPANISH 1A, SPANISH S1AB, or SPANISH 1AB. Equivalent sequences/courses may not be repeated for credit. Other counseling offices are encouraged to call the Humanities Office of Undergraduate Study (<https://www.humanities.uci.edu/undergrad/>) if they have questions about a particular student's eligibility to enroll at a given level.

Students with prior coursework or knowledge in Spanish may need to take the Spanish placement test and adhere to the department's placement policies. Students who score above the range of scores required for SPANISH 3 or SPANISH 3H on the Spanish placement test may proceed to enroll in upper-division Spanish courses.

Students who earn a C or better in Spanish language courses at UCI will be allowed to enroll in the next course in the language sequence without taking a placement exam. Equivalent sequences/courses may not be repeated for credit.

## Enrollment in introductory level Spanish courses is determined based on the following categories of Spanish language experience:

**No previous experience in Spanish:** Students with no previous background in Spanish must submit their high school transcript to their academic counseling office to activate their eligibility to enroll in SPANISH 1A or SPANISH 1AB.

**High school courses in Spanish:** Students with a previous high school background in Spanish must take UCI's placement test. Eligibility to enroll will be based on the result of that placement test (see the UCI Academic Testing Center's website (<http://www.testingcenter.uci.edu/>) for more information).

**College or University courses in Spanish:** Students with a previous course (or courses) in Spanish from another college or university must take UCI's placement test. Eligibility to enroll will be based on the result of that placement test (see the UCI Academic Testing Center's website (<http://www.testingcenter.uci.edu/>) for more information).

**Graduation from a high school in a Spanish-speaking country or Spanish Academy:** Students who graduated from a high school or academy where the primary language of instruction was Spanish must take a copy of their transcripts to the Language Curriculum Director, Humanities Hall 322, to determine where they should be placed.

**Students with GE VI-satisfying SAT Subject Test scores, International Baccalaureate (IB) scores, or Advanced Placement (AP) examination scores:** Students who have completed one of the previously listed exams who plan to enroll in a Spanish course at UCI are still required to take UCI's Spanish placement test. Students cannot earn units or grade points at UCI in courses from which they have been exempted on the basis of IB or AP credit, even if the placement test result recommends enrollment in such a level. (see the UCI Academic Testing Center's website (<http://www.testingcenter.uci.edu/>) for more information).

## Progression in Spanish at UCI

Students who earn a C or better in Spanish language courses at UCI will be allowed to enroll in the next course in the language sequence without taking a placement exam.

To enroll in SPANISH 3, a student must have passed SPANISH 2C or must have earned a placement exam score qualifying for enrollment into SPANISH 3.

SPANISH 3H is designed for students who grew up speaking Spanish at home, and need to work on their writing skills. To enroll in this course, a student must have earned a placement exam score qualifying for enrollment into SPANISH 3H.

Students who score above the range of scores required for SPANISH 3 or SPANISH 3H on the Spanish placement test may proceed to enroll in upper-division Spanish courses.

**Placement testing** is offered throughout the academic year (summer included). For details about registering for a placement test, contact the Academic Testing Center:

3040 Anteater Instruction and Research Building  
949-824-6207

Email: [testcenter@uci.edu](mailto:testcenter@uci.edu) ([testoff@uci.edu](mailto:testoff@uci.edu))

<http://www.testingcenter.uci.edu> (<http://www.testingcenter.uci.edu/>)

Placement test results are valid for one calendar year.

## Faculty

Ana Maria Amar Sanchez, Ph.D. University of Buenos Aires, *Professor Emerita of Spanish and Portuguese*

Luis Avilés, Ph.D. Brown University, *Professor of Spanish and Portuguese* (Golden Age literature and critical theory)

Anne J. Cruz, Ph.D. Stanford University, *Professor Emerita of Spanish and Portuguese*

Lucia G. Cunningham, Ph.D. University of Kansas, *Professor Emerita of Spanish and Portuguese*

Ivette N. Hernandez-Torres, Ph.D. Brown University, *Associate Professor of Spanish and Portuguese* (Colonial Latin America, Latin America and Caribbean literatures and cultures)

Horacio Legras, Ph.D. Duke University, *Professor of Spanish and Portuguese; Comparative Literature; Culture and Theory; European Languages and Studies* (Latin American literature and culture, Latin American film, visual arts in Latin America, psychoanalysis, and photography)

Viviana A. Mahieux, Ph.D. Harvard University, *Associate Professor of Spanish and Portuguese* (Latin American avant-gardes, journalism and literature, material cultures, media studies, modern and contemporary Mexico)

Santiago Morales-Rivera, Ph.D. Harvard University, *Associate Professor of Spanish and Portuguese; European Languages and Studies* (Modern Peninsular literature and culture, critical theory, literary history, narrative, music)

Gonzalo Navajas, Ph.D. University of California, Los Angeles, *Distinguished Professor of Spanish and Portuguese* (eighteenth through twentieth-first century Spanish literature and intellectual history, film, critical theory, cultural criticism, creative writing)

Dayle S. Nunez, Ph.D. Stanford University, *Professor Emeritus of Spanish and Portuguese*

Hector H. Orjuela, Ph.D. University of Kansas, *Professor Emeritus of Spanish and Portuguese*

Julian I. Palley, Ph.D. University of New Mexico, *Professor Emeritus of Spanish and Portuguese*

Armin Schwegler, Ph.D. University of California, Berkeley, *Professor of Spanish and Portuguese* (Spanish linguistics, history of the Spanish language, Creole languages, language contact, African influences in Latin America, language origins)

Jacobo Sefami, Ph.D. University of Texas at Austin, *Professor of Spanish and Portuguese* (Latin American literature, with emphasis in 20th/21st century poetry; Latin American Jewish writers)

Julio R. Torres, Ph.D. Georgetown University, *Assistant Professor of Spanish and Portuguese; Language Science* (heritage and second language acquisition; multilingualism)

Juan Villegas, Ph.D. University of Chile, *Professor Emeritus of Spanish and Portuguese*

Zidia O. Webb, M.A. Michigan State University, *Associate Professor of Teaching Emeritus of Spanish and Portuguese*

## Portuguese Courses

### **PORTUG 121. Topics in Luso-Brazilian Literature. 4 Units.**

In English. Contextualized study of a major author, current, or genre in Brazilian, Portuguese, and/or Lusophone African literature. Examples: Gender, Race, and Sexualities in Postcolonial Lusophone Literatures; Women and Writing in Brazil and Portugal; The Short Story.

Repeatability: Unlimited as topics vary.

### **PORTUG 243. Studies in Luso-Brazilian Literature and Culture. 4 Units.**

Critical analysis of selected literary works from Portugal and/or Brazil. Contextualizes the works within their historical and literary specificity, and discusses pertinent theoretical issues raised by them. Taught in Portuguese.

Prerequisite: Reading knowledge of Portuguese.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

## Spanish Courses

### **SPANISH 1A. Fundamentals of Spanish. 5 Units.**

Communicative approach with emphasis on conversational skills: the students and their environment, their experiences, and their opinions about issues. Reading and writing skills also introduced.

Prerequisite: Placement into SPANISH 1A.

Overlaps with SPANISH 1AB, SPANISH S1AB.

Restriction: SPANISH 1A and SPANISH 1AB and SPANISH S1AB may not be taken for full credit.

**SPANISH 1AB. Fundamentals Intensive Spanish. 10 Units.**

An intensive, proficiency-oriented, and task-based approach, designed to develop basic oral communicative abilities in Spanish. Reading and writing skills, along with an introduction to Hispanic cultures.

Prerequisite: Placement into SPANISH 1A.

Overlaps with SPANISH 1A, SPANISH 1B, SPANISH S1AB.

Restriction: SPANISH 1AB and SPANISH 1A and SPANISH 1B and SPANISH S1AB may not be taken for full credit.

**SPANISH 1B. Fundamentals of Spanish. 5 Units.**

Communicative approach with emphasis on conversational skills: the students and their environment, their experiences, and their opinions about issues. Reading and writing skills also introduced.

Prerequisite: SPANISH 1A. SPANISH 1A with a grade of C or better. Placement into SPANISH 1B is also accepted.

Overlaps with SPANISH 1AB, SPANISH S1AB.

Restriction: SPANISH 1B and SPANISH 1AB and SPANISH S1AB may not be taken for full credit.

**SPANISH 1C. Fundamentals of Spanish. 5 Units.**

Communicative approach with emphasis on conversational skills: the students and their environment, their experiences, and their opinions about issues. Reading and writing skills also introduced.

Prerequisite: SPANISH 1AB or SPANISH 1B or SPANISH S1AB. SPANISH 1AB with a grade of C or better. SPANISH 1B with a grade of C or better. SPANISH S1AB with a grade of B or better. Placement into SPANISH 1C is also accepted.

Overlaps with SPANISH S1BC.

Restriction: SPANISH 1C and SPANISH S1BC may not be taken for full credit.

**(VI)**

**SPANISH S1AB. Fundamentals of Spanish. 7.5 Units.**

First half of first-year Spanish in an intensified form. Communicative approach with emphasis on conversational skills.

Prerequisite: Placement into SPANISH 1A.

Overlaps with SPANISH 1A, SPANISH 1B, SPANISH 1AB.

Restriction: SPANISH S1AB and SPANISH 1A and SPANISH 1B and SPANISH 1AB may not be taken for full credit.

**SPANISH S1BC. Fundamentals of Spanish. 7.5 Units.**

Second half of first-year Spanish in an intensified form. Communicative approach with emphasis on conversational skills.

Prerequisite: SPANISH S1AB or SPANISH 1A or SPANISH 1B. SPANISH S1AB with a grade of C or better. SPANISH 1A with a grade of C or better. SPANISH 1B with a grade of C or better. Placement into SPANISH 1B or SPANISH 1C is also accepted.

Overlaps with SPANISH 1B, SPANISH 1C, SPANISH 1AB.

Restriction: SPANISH S1BC and SPANISH 1B and SPANISH 1C and SPANISH 1AB may not be taken for full credit.

**(VI)**

**SPANISH 2A. Intermediate Spanish. 4 Units.**

Conversation, reading, and composition skills are developed using texts of literary and social interest. Emphasis on grammar review.

Prerequisite: SPANISH 1C or SPANISH S1BC. SPANISH 1C with a grade of C or better. SPANISH S1BC with a grade of C or better. Placement into SPANISH 2A is also accepted.

Overlaps with SPANISH 2AB, SPANISH S2AB.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)**

**SPANISH 2AB. Intermediate Intensive Spanish. 8 Units.**

Intensive intermediate course designed to improve student's abilities in reading, writing, speaking, and comprehension, including a thorough introduction to Hispanic cultures. Grammatical component of the language is gradually reviewed and tested.

Prerequisite: SPANISH 1C or SPANISH S1BC. SPANISH 1C with a grade of C or better. SPANISH S1BC with a grade of C or better. Placement into SPANISH 2A is also accepted.

Overlaps with SPANISH 2A, SPANISH 2B, SPANISH S2AB.

(VIII)

**SPANISH 2B. Intermediate Spanish. 4 Units.**

Conversation, reading, and composition skills are developed using texts of literary and social interest. Emphasis on grammar review.

Prerequisite: SPANISH 2A. SPANISH 2A with a grade of C or better. Placement into SPANISH 2B is also accepted.

Overlaps with SPANISH 2AB, SPANISH S2AB.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

(VIII)

**SPANISH 2C. Intermediate Spanish. 4 Units.**

Conversation, reading, and composition skills are developed using texts of literary and social interest. Emphasis on grammar review.

Prerequisite: SPANISH 2AB or SPANISH 2B or SPANISH S2AB. SPANISH 2AB with a grade of C or better. SPANISH 2B with a grade of C or better. SPANISH S2AB with a grade of B or better. Placement into SPANISH 2C is also accepted.

Overlaps with SPANISH S2BC.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

(VIII)

**SPANISH S2AB. Intermediate Spanish. 6 Units.**

First half of second-year Spanish in an intensified form. Conversation, reading, and composition skills are developed using texts of literary and social interest. Emphasis on grammar review.

Prerequisite: SPANISH 1C or SPANISH S1BC. SPANISH 1C with a grade of C or better. SPANISH S1BC with a grade of C or better. Placement into SPANISH 2A is also accepted.

Overlaps with SPANISH 2A, SPANISH 2B, SPANISH 2AB.

(VIII)

**SPANISH S2BC. Intermediate Spanish. 6 Units.**

Second half of second-year Spanish in an intensified form. Conversation, reading, and composition skills are developed using texts of literary and social interest. Emphasis on grammar review.

Prerequisite: SPANISH 2B or SPANISH S2AB or SPANISH 2A. SPANISH 2B with a grade of C or better. SPANISH S2AB with a grade of C or better. SPANISH 2A with a grade of B or better. Placement into SPANISH 2B or SPANISH 2C is also accepted.

Overlaps with SPANISH 2B, SPANISH 2C, SPANISH 2AB, SPANISH 2.

Restriction: SPANISH S2BC and SPANISH 2B and SPANISH 2C and SPANISH 2AB and SPANISH 2 may not be taken for full credit.

(VIII)

**SPANISH 3. US Latino Communities. 4 Units.**

Focuses on intermediate to advanced grammar and composition. Emphasis is placed on key elements of grammar, which constitutes about 70 percent of the curriculum, and composition writing, which constitutes the remaining 30 percent.

Prerequisite: SPANISH 2C or SPANISH S2BC. SPANISH 2C with a grade of C or better. SPANISH S2BC with a grade of C or better. Placement into SPANISH 3 is also accepted.

Overlaps with SPANISH 3H.

(VIII)

**SPANISH 3H. Heritage Spanish: Latinidad. 4 Units.**

Designed for students who grew up speaking Spanish in their homes/communities, whose schooling has been primarily in English, and need additional practice writing in Spanish.

Prerequisite: Placement into SPANISH 3H.

Overlaps with SPANISH 3.

**(VII)**

**SPANISH 44. Hispanic Literatures for Nonmajors. 4 Units.**

Focuses on major Spanish and Latin American literary texts within a historical and theoretical perspective. Taught in English with literary texts read in the original language.

Prerequisite: SPANISH 2 or SPANISH 2C or SPANISH S2BC

Restriction: No Spanish Majors.

**(VIII)**

**SPANISH 50. Latin America, U.S. Latino, and Iberian Cultures. 4 Units.**

Introduction (for non-majors) to the culture of the Spanish- and Portuguese-speaking worlds (Europe, Latin America, U.S., Africa). May focus on any time period. Taught in English.

Repeatability: May be taken for credit 3 times as topics vary.

**(IV and VIII ).**

**SPANISH 60E. Mexico and Central America: A Survey . 4 Units.**

Panoramic view of Mexico and Central America examining key texts throughout history. Shows the richness of the culture, and an appraisal of various forms of representation, including images, chronicles, novels, essays, poems, and a film. Taught in English.

Overlaps with SPANISH 60S.

**(IV and VIII ).**

**SPANISH 60S. Mexico and Central America: A Survey . 4 Units.**

Panoramic view of Mexico and Central America examining key texts throughout history. Shows the richness of the culture, and an appraisal of various forms of representation, including images, chronicles, novels, essays, poems, and a film. Taught in Spanish.

Prerequisite: Placement into SPANISH 2A or higher via Spanish Placement Test B is required.

Overlaps with SPANISH 60E.

**(IV and VIII ).**

**SPANISH 61. The Culture of the Visual Image in Latin America . 4 Units.**

A survey of visual forms of expression which have endured through more than five centuries of pre-colonial, colonial, and independent Latin America. Forms to be treated in the class include painting, monuments, sculpture, urban planning, graffiti, comics, and photography.

**(IV and VIII ).**

**SPANISH 62. Latinx, Multilingualism, and Social Justice . 4 Units.**

Explores the role of multilingualism (Spanish, indigenous languages, Latino English) in Latinx social justice movements in the United States with an emphasis on California. Course is taught in English.

**(VII)**

**SPANISH 97. Fundamentals of Spanish (with Emphasis on Reading). 4 Units.**

Designed for students interested in acquiring a solid reading knowledge of Spanish, and to facilitate the understanding and translating of Spanish texts covering a variety of disciplines. Does not fulfill any undergraduate foreign language requirement. Taught in English.

Prerequisite: Does not serve as prerequisite for any higher-level Spanish courses.

Restriction: No Spanish Majors.

**SPANISH 101A. Introduction to Iberian Literature and Culture. 4 Units.**

Introduction to the major authors and movements of Iberian literature and culture from the Middle Ages to the present.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

**SPANISH 101B. Introductory Studies to Latin American Literature and Culture. 4 Units.**

A historical overview of Latin American literature and culture mainly focused on canonical texts. Topics include colonialism and postcolonialism, the nation, indigenismo, gender, and literary movements. Also introduces literary analysis, research methods, and cultural critique.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

**SPANISH 104. Writing in Spanish. 4 Units.**

Focuses on the use of writing as a medium to encourage critical thinking and the practical analysis of literary texts, as well as the study of historical and social issues in the Spanish-speaking world.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

**SPANISH 105. Spanish Communication. 4 Units.**

Designed to help students develop Spanish oral skills by exposing them to different verbal Spanish language registers. Special emphasis placed on abilities essential to professional or academic careers. Intended for Spanish majors as an important component of their overall education.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

**SPANISH 107. Advanced Spanish Grammar. 4 Units.**

Designed for students who have demonstrated a substantial level of proficiency in their studies of the Spanish language. Takes thorough approach to advanced grammatical problems, in order to assist students in their mastery of the elements of the Spanish language.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

**SPANISH 110A. Topics in Peninsular Literature and Cultures. 4 Units.**

Topics in Peninsular literature and cultures.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: Unlimited as topics vary.

**SPANISH 110B. Topics in Latin American Literature and Cultures. 4 Units.**

Topics in Latin American literature and cultures.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: Unlimited as topics vary.

**SPANISH 110C. U.S. Latino Literature and Cultures. 4 Units.**

Focuses on aspects of literature, art, cultural production, and history of the multifaceted Latino cultures that have developed within the United States. Focuses on one group, such as Caribbean Americans, Chicanos, Central Americans, or a comparative perspective of several groups.

Same as CHC/LAT 134.

**SPANISH 113A. Spanish Phonetics. 4 Units.**

Introduction to fundamental notions of Spanish phonetics. Particular attention paid to problems of pronunciation that arise in native and non-native speakers of Spanish due to interference between Spanish and English. Phonology (the system that underlies phonetics) and Spanish dialectology included.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

**SPANISH 113B. Introduction to Spanish Linguistics. 4 Units.**

Application of basic notions of linguistics to Spanish, Spanish phonology, morphology, syntax, and semantics. Special attention to the application of linguistics to the teaching of Spanish.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

**SPANISH 119. Textual Analysis and Interpretation. 4 Units.**

Focus on analysis and interpretation of literary texts. Emphasis on narrative, poetry, theater/performance, and visual media. Introduces students to major currents in theoretical thought, such as cultural studies, postmodernism, and others. Oral presentations and short essays required. Taught in Spanish.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

**SPANISH 121. Topics in Golden Age Literature and Culture. 4 Units.**

Golden Age Literature in Spain, including the Renaissance and Baroque periods. Works of poetry, narrative, and theater. Historical and cultural background.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: May be taken for credit 3 times as topics vary.

**SPANISH 122. Topics in 18th and 19th Century Spanish Literature and Culture. 4 Units.**

The main literary and ideological trends in 18th and 19th century Spain, including the enlightenment, romanticism, realism, and naturalism.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: May be taken for credit 3 times as topics vary.

**SPANISH 123. Topics in 20th and 21st Century Spanish Literature and Culture. 4 Units.**

20th century Spanish authors. Works of poetry, narrative, or theater. Historical context of the period and principles of literary theory.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: May be taken for credit 3 times as topics vary.

**SPANISH 130A. Topics in Latin American Colonial Literature and Culture. 4 Units.**

Topics in Latin American colonial literature and culture.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: Unlimited as topics vary.

**SPANISH 130B. Topics in Latin American Literature and Culture of the 19th Century. 4 Units.**

Topics in Latin American literature and culture of the 19th century.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: Unlimited as topics vary.

**SPANISH 130C. Topics in Latin American Literature and Culture of the 20th Century. 4 Units.**

Topics in Latin American literature and culture of the 20th century.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: Unlimited as topics vary.

**SPANISH 140. Topics in Chicano Literature and Culture. 4 Units.**

Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter. Taught in English.

Repeatability: May be taken for credit 4 times as topics vary.

Same as CHC/LAT 110.

**SPANISH 150. Topics in Literature in Translation. 4 Units.**

Study of texts by modern and contemporary Peninsular, Latin American, and/or U.S. Latino writers in translation. Taught in English. Not applicable toward Spanish major or minor requirements.

Repeatability: Unlimited as topics vary.

**SPANISH 160. Topics in Luso-Hispanic Film Studies. 4 Units.**

Study of Peninsular, Latin-American, and/or U.S. Latino film. Taught in English or Spanish.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: Unlimited as topics vary.

**SPANISH 185. Selected Topics in Peninsular Literature and Culture. 4 Units.**

Selection of representative topics in Spanish and/or Portuguese literature and culture.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: Unlimited as topics vary.

**SPANISH 186. Selected Topics in Latin American Literature and Culture. 4 Units.**

Selection of representative topics in the history of Latin American literature and culture.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: Unlimited as topics vary.

**SPANISH 187. Selected Topics in Spanish Linguistics. 4 Units.**

Major topics in Spanish linguistics.

Prerequisite: SPANISH 3 or SPANISH 3H. Placement into SPANISH 101A is also accepted.

Repeatability: Unlimited as topics vary.

**SPANISH 190. Colloquium. 4 Units.**

Specialized, discussion-based course dealing primarily with a research topic that reflects the instructor's current intellectual interests. Required oral presentation(s) and final research paper. Limited to 15 students.

Prerequisite: SPANISH 107 or SPANISH 113A

Restriction: Upper-division students only. Spanish Majors only.

**SPANISH 199. Independent Study. 1-4 Units.**

Research paper required.

Repeatability: May be repeated for credit unlimited times.

**SPANISH 201. History of the Spanish Language. 4 Units.**

Diachronic survey of phonological changes from Latin to Old Spanish to Modern Spanish. Focuses in Castilian including Romance languages and other peninsula dialects for comparative purposes. Morphological changes.

**SPANISH 204. Spanish in Contact. 4 Units.**

Sociohistorical and linguistic overview of Spanish in contact with Basque, Catalan, English, German, American Indian, and African languages in Spain, Latin America, and the United States. Examines theories about language contact, and linguistic changes in Spanish phonology and grammar.

**SPANISH 205. Spanish Dialectology. 4 Units.**

Phonological, morphological, and syntactic variations in Spanish as spoken in the Hispanic world, from synchronic and diachronic points of view. The study of Spanish as spoken in the United States.

Restriction: Graduate students only.

**SPANISH 214. Topics in Golden Age Literature and Culture. 4 Units.**

Topics in Golden Age literature and culture.

Repeatability: Unlimited as topics vary.

**SPANISH 218. Topics in Enlightenment and Romanticism. 4 Units.**

Topics in Enlightenment and Romanticism.

Repeatability: Unlimited as topics vary.

**SPANISH 219. Topics in Nineteenth Century. 4 Units.**

Topics in nineteenth-century Spanish literature and culture.

Repeatability: Unlimited as topics vary.

**SPANISH 220. Topics in Twentieth Century. 4 Units.**

Topics in twentieth-century Spanish literature and culture.

Repeatability: Unlimited as topics vary.

**SPANISH 221. Topics in Iberian Studies. 4 Units.**

Cross-cultural connections and interactions between different ethnicities in the Iberian Peninsula.

Repeatability: Unlimited as topics vary.

**SPANISH 231. Topics in Colonial Latin America. 4 Units.**

Topics in Colonial Latin America.

Repeatability: Unlimited as topics vary.

**SPANISH 232. Topics in Nineteenth-Century Latin America. 4 Units.**

Topics in nineteenth-century Latin America.

Repeatability: Unlimited as topics vary.

**SPANISH 233. Topics in Twentieth-Century Latin America. 4 Units.**

Topics in twentieth-century Latin America.

Repeatability: Unlimited as topics vary.

**SPANISH 234. Topics in Latin America. 4 Units.**

Topics in Latin America.

Repeatability: Unlimited as topics vary.

**SPANISH 235. Topics in Trans-Oceanic Studies. 4 Units.**

Focuses on meaningful connections between different geographical and cultural areas.

Repeatability: Unlimited as topics vary.

**SPANISH 239A. Topics in Literary Theory I. 4 Units.**

Traces the development of Western literary critical principles from Aristotle to the twentieth century through selected readings of key figures in intellectual history (Aristotle, St. Augustine, Descartes, Kant, Hegel, Marx, Nietzsche, William James, Freud).

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SPANISH 239B. Topics in Literary Theory II. 4 Units.**

Study of major critical movements of the twentieth century, from Modernism's varied trends to those of the Postmodern/Postcolonial period. Emphasis on the development of prior critical discourses as well as revisionary theories.

Prerequisite: SPANISH 239A

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SPANISH 239C. Special Topics in Theory. 4 Units.**

Focus on issues related to critical theory, theory of literature, cultural criticism and visual arts as they pertain specifically to Latin America, Spain, Portugal, and Brazil. Topics vary. Examples: Latin American cultural studies; theory, film, and media in post-war Spain.

Repeatability: Unlimited as topics vary.

**SPANISH 245. Topics in Luso-Hispanic Film. 4 Units.**

Topics in Luso-Hispanic Film.

Repeatability: Unlimited as topics vary.

**SPANISH 251. Topics in Chicano Literature and Culture. 4 Units.**

Topics in Chicano Literature and Culture.

Repeatability: Unlimited as topics vary.

**SPANISH 252. Topics in U.S. Latino Literature and Culture. 4 Units.**

Topics in U.S. Latino Literature and Culture.

Repeatability: Unlimited as topics vary.

**SPANISH 260. Seminar in Spanish . 4 Units.**

Topics in Spanish.

Repeatability: Unlimited as topics vary.

**SPANISH 270. Creative Writing Workshop in Spanish/English. 4 Units.**

Discussion of theory and practice of creative writing. Focus on critical analysis of participant's work in progress. Texts may be written in Spanish and/or English and may be written in poetry or prose format.

Repeatability: Unlimited as topics vary.

**SPANISH 290. Individual Study. 4 Units.**

Individual Study.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SPANISH 291. Directed Reading. 4 Units.**

Directed Reading in Spanish.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SPANISH 292. Teaching Practicum. 4 Units.**

Teaching Practicum.

Grading Option: Satisfactory/unsatisfactory only.

**SPANISH 299. Dissertation Research. 4-12 Units.**

Dissertation Research.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Humanities students only.

**SPANISH 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Spanish, B.A.

The B.A. program in Spanish is devoted to the study of the languages and cultures of Spanish-speaking countries.

Enrollment in introductory level Spanish courses is determined based on the following categories of Spanish language experience:

**No previous experience in Spanish:** Students with no previous background in Spanish must submit their high school transcript to their academic counseling office to activate their eligibility to enroll in SPANISH 1A or SPANISH 1AB.

**High school courses in Spanish:** Students with a previous high school background in Spanish must take UCI's placement test. Eligibility to enroll will be based on the result of that placement test (see the UCI Academic Testing Center's website (<http://www.testingcenter.uci.edu>) for more information).

**College or University courses in Spanish:** Students with a previous course (or courses) in Spanish from another college or university must take UCI's placement test. Eligibility to enroll will be based on the result of that placement test (see the UCI Academic Testing Center's website (<http://www.testingcenter.uci.edu>) for more information).

**Graduation from a high school in a Spanish-speaking country or Spanish Academy:** Students who graduated from a high school or academy where the primary language of instruction was Spanish must take a copy of their transcripts to the Language Curriculum Director, Humanities Hall 322, to determine where they should be placed.

**Students with GE VI-satisfying SAT Subject Test scores, International Baccalaureate (IB) scores, or Advanced Placement (AP) examination scores:** Students who have completed one of the previously listed exams who plan to enroll in a Spanish course at UCI are still required to take UCI's Spanish placement test. Students cannot earn units or grade points at UCI in courses from which they have been exempted on the basis of

IB or AP credit, even if the placement test result recommends enrollment in such a level. (see the UCI Academic Testing Center's website (<http://www.testingcenter.uci.edu>) for more information).

### **Progression in Spanish at UCI**

Students who earn a C or better in Spanish language courses at UCI will be allowed to enroll in the next course in the language sequence without taking a placement exam.

To enroll in SPANISH 3, a student must have passed SPANISH 2C or must have earned a placement exam score qualifying for enrollment into SPANISH 3.

SPANISH 3H is designed for students who grew up speaking Spanish at home, and need to work on their writing skills. To enroll in this course, a student must have earned a placement exam score qualifying for enrollment into SPANISH 3H.

Students who score above the range of scores required for SPANISH 3 or SPANISH 3H on the Spanish placement test may proceed to enroll in upper-division Spanish courses.

**Placement testing** is offered throughout the academic year (summer included). For details about registering for a placement test, contact the Academic Testing Center:

3040 Anteater Instruction and Research Building  
949-824-6207

Email: [testcenter@uci.edu](mailto:testcenter@uci.edu) ([testoff@uci.edu](mailto:testoff@uci.edu))

<http://www.testingcenter.uci.edu>

Placement test results are valid for one calendar year.

UC Irvine offers students the opportunity to live in an on-campus housing unit in Arroyo Vista where Spanish can be spoken on a daily basis. The name of this Spanish-only housing unit is *La Casa Nuestra*.

*La Casa Nuestra* is a residential Spanish language immersion program that relies on participants to comply with the Spanish-Only Language Rule that applies to all shared living spaces within the *Casa*. The rule applies at all times, including evenings and weekends. Residents may choose to speak English (or other languages) in their bedrooms, but, in the spirit of the *Casa*, are encouraged to make an effort to speak Spanish, even in their rooms, whenever possible. The program is open to all UCI students with 2-3 years of high school Spanish and/or 1 year of college Spanish. Visit the *La Casa Nuestra* information on the Department of Spanish and Portuguese Undergraduate Program website (<http://www.humanities.uci.edu/spanishandportuguese/undergrad/>).

The B.A. program in Spanish is devoted to the study of the languages and cultures of Spanish-speaking countries. Students are encouraged to participate in UC Irvine's *La Casa Nuestra* housing program, which offers Spanish-language immersion on a 24/7 basis as described above.

Students select one of three emphases:

1. Literature and Culture;
2. Spanish for Future Teachers; or
3. Cinema: Spain, Latin America, and U.S. Latino.

Each of these emphases strives to teach students to speak Spanish with fluency, and to carry out academic work in this language. NOTE: An emphasis may be chosen upon declaring the Spanish major, or at a later stage. The major, however, goes far beyond mere language learning, as it is designed to offer a broad humanistic education. The courses explore the literatures and cultures of Spain and Latin America from their first manifestations to the present. The faculty approach this rich cultural legacy from an interdisciplinary perspective that puts Latin American and Spanish texts in dialogue with other fields of knowledge such as anthropology, linguistics, history, women's studies, and studies on globalization, among others. The program also offers courses in Spanish and Latin American film, as well as in visual culture. Unless stated otherwise, courses in the three emphases are taught in Spanish.

Upper-division courses in the department are designed to help students achieve the learning outcomes of the Spanish major.

### **Learning outcomes:**

1. Students convey information and formulate opinions in Spanish across oral and written modalities while demonstrating control of grammatical structures, register, and style in Spanish.

SPANISH 104, SPANISH 105, SPANISH 107, and SPANISH 190

2. Students analyze and interpret the production of literary and cinematographic works from Spanish-speaking writers and filmmakers while understanding the historical and sociopolitical contexts of these works.

SPANISH 101A, SPANISH 101B, SPANISH 119, SPANISH 140, SPANISH 160, SPANISH 185, SPANISH 186, and SPANISH 190

3. Students identify and describe linguistic phenomena (e.g., sound system, word order, acquisition) that pertain to the Spanish-speaking world while taking into account speaker, regional, and situational variations.

SPANISH 113A, SPANISH 113B, SPANISH 187, and SPANISH 190

4. Students distinguish and describe cultural practices and diverse social and ethnic perspectives from the Spanish-speaking world, (including Iberian, Latin American, and U.S. Latino communities).

SPANISH 101A, SPANISH 101B, SPANISH 140, SPANISH 160, SPANISH 185, SPANISH 186, and SPANISH 190

The faculty encourages students who are serious about improving their Spanish language ability in reading, writing, and speaking to take advantage of opportunities to immerse themselves in the Spanish language by studying in Argentina, Chile, Mexico, Spain, or other Spanish-speaking countries through various study abroad programs administered through UCI's Study Abroad Center. Programs are available for the summer, one quarter, one semester, or one year. This allows students to complete a significant portion of their bachelor's degree requirements in Spain or Latin America (for details, see Residence Requirements below). While abroad, students are given the opportunity to improve their Spanish in a natural context, and to enjoy exposure to other cultures. Once back at UCI, students who have studied abroad typically use this newly gained knowledge to excel in advanced upper-division courses, and to successfully enter graduate school programs or the career path of their choice. See the Study Abroad Center section of the *Catalogue* or an academic counselor for additional information.

**Double Major:** Students in the B.A. program often double major. Double majoring in Spanish and a second department provides the best of both worlds: the requirements for the Spanish major give students the linguistic and humanistic skills that will qualify them for diverse career paths, while the second degree provides students with the additional expertise they are seeking. Together, these bachelor's degrees will reward students with a distinctively competitive edge. A double major is especially useful for pre-med, pre-law, and other students (future teachers included) who want an extensive education in the natural or social sciences and a strong liberal arts program as well.

## Requirements for the B.A. in Spanish

**All students must meet the** University Requirements.

**All students must meet the** School Requirements.

**All students must meet the** Language Other Than English Placement and Progression policies.

### Departmental Requirements for the Major in Spanish

SPANISH 2C or the equivalent is a prerequisite to SPANISH 3 (or SPANISH 3H). SPANISH 3 or SPANISH 3H is the prerequisite for most of the upper-division courses.

Students must choose one of the following emphases:

#### 1. Emphasis in Literature and Culture

A. Complete:

SPANISH 3	US Latino Communities
or SPANISH 3H	Heritage Spanish: Latinidad
SPANISH 101A	Introduction to Iberian Literature and Culture
SPANISH 101B	Introductory Studies to Latin American Literature and Culture
SPANISH 107	Advanced Spanish Grammar
or SPANISH 113A	Spanish Phonetics
or SPANISH 113B	
SPANISH 119	Textual Analysis and Interpretation
SPANISH 190	Colloquium

B. Seven additional upper-division Spanish courses (taken in the Department of Spanish and Portuguese), of which at least four must be in literature and culture.

#### 2. Emphasis in Spanish for Future Teachers <sup>1</sup>

A. Complete:

SPANISH 3	US Latino Communities
or SPANISH 3H	Heritage Spanish: Latinidad
SPANISH 101A	Introduction to Iberian Literature and Culture
SPANISH 101B	Introductory Studies to Latin American Literature and Culture
SPANISH 107	Advanced Spanish Grammar
SPANISH 113A	Spanish Phonetics
SPANISH 113B	Introduction to Spanish Linguistics
SPANISH 119	Textual Analysis and Interpretation
SPANISH 190	Colloquium

B. Four upper-division Spanish courses.

### 3. Emphasis in Cinema: Spain, Latin America, and U.S. Latino

A. Complete:

SPANISH 3 or SPANISH 3H	US Latino Communities Heritage Spanish: Latinidad
SPANISH 101A	Introduction to Iberian Literature and Culture
SPANISH 101B	Introductory Studies to Latin American Literature and Culture
SPANISH 107 or SPANISH 113A	Advanced Spanish Grammar Spanish Phonetics
SPANISH 119	Textual Analysis and Interpretation
SPANISH 190	Colloquium

B. Complete:

FLM&MDA 85A	Introduction to Film and Visual Analysis
-------------	--

C. Six upper-division electives:

1. Four must be in film:

(a) One film course may come from any department

(b) Three film courses must be taken in the Department of Spanish and Portuguese

2. Two literature courses taught in Spanish, from the Department of Spanish and Portuguese

- <sup>1</sup> Students who wish to pursue a career in teaching are encouraged to complete the minor in Educational Studies in tandem with the emphasis. The following courses are recommended in fulfillment of the minor in Educational Studies: EDUC 108, EDUC 124, EDUC 128, EDUC 131, EDUC 173, EDUC 349; and EDUC 160, or two quarters of HUMAN 195.

**Residence Requirement for the Major (all emphases):** At least five upper-division courses required for the major must be completed successfully at UCI. By petition, two of the five may be taken through the UC Education Abroad Program, providing course content is approved by the Humanities Office of Undergraduate Study and the Undergraduate Director of the Department of Spanish and Portuguese. See also the Study Abroad Option information below.

Students are encouraged to study abroad, possibly satisfying a significant portion of their major requirements abroad. For the maximum number of courses allowed and other pertinent details, see the Spanish Undergraduate Program website (<http://www.humanities.uci.edu/spanishandportuguese/undergrad/>).

All courses taken abroad must be approved. Approval typically involves the following: (1) presentation of syllabi and other pertinent course materials (term papers, exams, etc.) from the host university, and (2) submission of a UCI Humanities Petition form (available online, and to be completed after the student's return to UCI) to the Undergraduate Director of the Department of Spanish and Portuguese, and to the Humanities Office of Undergraduate Study (HIB 143). Students are advised to consult with the Undergraduate Director and the Humanities Office of Undergraduate Study, both before and after their stay abroad. See also the Residence Requirement above.

With over 400 million speakers, Spanish is the third most widely spoken language in the world, which explains in part why Spanish has such a growing global reach and rapidly increasing national and international appeal—in business, education, the media, sports, as well as elsewhere. Knowledge of the Spanish language and cultures has thus become highly marketable in many professions (nursing, the entertainment and/or travel industry, tourism, among others).

The Spanish B.A. degree prepares students to have ready access to careers that require advanced knowledge of the Spanish language and the multiple cultures associated with it. At the same time, competitive students in the program obtain a solid preparation for graduate school. The students' graduate career paths vary widely and include literary and/or cultural studies, teaching, nursing, law/ business, nonprofit organizations, medicine, sociology, and other specialties.

The UCI Division of Career Pathways provides services to students and alumni including career counseling, information about job opportunities, a career library, and workshops on resume preparation, job search, and interview techniques. For additional information, visit the Division of Career Pathways (<http://www.career.uci.edu>) and the Department's Careers in Foreign Language websites (<http://www.humanities.uci.edu/spanish/career.htm>).

## Spanish, M.A.

The Master of Arts degree in Spanish is a two-year program of study designed to expose the beginning graduate student to all periods of peninsular, Latin American, and Chicano/Latino literature and culture. The degree is awarded upon the successful completion of course work and written and oral comprehensive examinations. A minimum of eight graduate seminars must be completed in the Department of Spanish and Portuguese with a letter grade.

Students are required to take one course in Theory (SPANISH 239A or SPANISH 239B or equivalent). Master's candidates must complete a minimum of three quarters of course work in the Department; the maximum time to complete the master's program is two years. The M.A. exam must be taken no later than the fifth quarter of graduate study. Students entering with a bachelor's degree must satisfy the requirements for a master's degree before they proceed toward a Ph.D. This includes the master's level examinations and course work. Normally only students intending to work toward the Ph.D. are admitted to the graduate program.

## Spanish, Minor

The Department of Spanish and Portuguese offers a minor in Spanish and a minor in Spanish/English Bilingual Education. The Spanish minor provides the opportunity to develop language proficiency while expanding knowledge of Hispanic cultures, literature, and linguistics. Many Spanish minors combine their studies with fields such as political science (pre-law), pre-med, communications, psychology, and economics. The goal of the minor in Spanish/English Bilingual Education is to create a pathway to better prepare students who wish to become future bilingual teachers.

### Requirements for the Spanish Minor

**All students are subject to the** Language Other Than English Placement and Progression **policies.**

A. Complete the following:

SPANISH 3	US Latino Communities
or SPANISH 3H	Heritage Spanish: Latinidad

B. Six upper-division departmental Spanish courses, one of which may be taught in English (excluding SPANISH 150).

**Residence Requirement for the Spanish Minor:** At least four upper-division courses required for the minor must be completed successfully at UCI. By petition, two of the four may be taken through the UC Education Abroad Program, providing course content is approved in advance by the appropriate department or committee chair.

## Spanish, Ph.D.

The Department of Spanish and Portuguese offers a Ph.D. in Spanish with a focus in Spanish, Spanish-American, or Chicano/Latino literatures and cultures. The program integrates period and genre studies with work in literary and critical theory, linguistics, sociohistorical studies, and cultural studies. The Department seeks to professionalize its Ph.D. candidates not as narrow specialists but rather as scholars and critics acquainted with a range of fields that relate to and enhance their discipline. Graduate emphases in Comparative Literature, Critical Theory, and Women's Studies are available; other areas of study (for example, film, history) may be designed with approval from the student's Ph.D. guidance committee. The Department has been traditionally committed to excellence in teaching, both in its own practice and in the formation of its graduates.

### Language Requirements

An additional foreign language (with proficiency equivalent to the 2C level) is required; this requirement may be satisfied by examination or course work. The selection of a foreign language must be approved by the student's guidance committee and is based on the specific research interests and field of study of the candidate.

### Course Requirements

A minimum of 16 courses beyond the B.A. or eight beyond the M.A. are required. One course in linguistics (diachronic or synchronic) is required at the Ph.D. level. For incoming students who have not taken a graduate level foreign language teaching methodology course, the seminar course (HUMAN 398A-HUMAN 398B) is required. HUMAN 398A-HUMAN 398B will be completed over the course of two quarters; HUMAN 398A will be completed during the spring quarter of the first year, and HUMAN 398B in the fall quarter of the second year. HUMAN 398A-HUMAN 398B will not be part of the 16 required courses beyond the B.A. or eight beyond the M.A. Note that these requirements may include course work completed in the master's program; the remaining elective courses are selected with the approval of the student's guidance committee to prepare for the doctoral examination and the dissertation. Students are encouraged to take more than the minimum number of required courses.

Continuing students and students who transfer into the doctoral program from elsewhere must take a minimum of eight graduate courses at UCI, of which six must be in the Department of Spanish and Portuguese. With regard to students who enter the Ph.D. program with their master's degree from another institution, the Ph.D. guidance committee will determine the number of courses that will be accepted.

A student may pursue the Ph.D. with an emphasis in Comparative Literature by taking a minimum of five courses in the Comparative Literature program.

### Time to Degree

The normative time for completion of the Ph.D. is seven years; four years to candidacy, three years in candidacy. The maximum time permitted is eight years.

### Teaching

The Department recognizes its responsibility to train all Ph.D. candidates as teachers and requires that all doctoral students with no prior teaching experience complete a minimum of three quarters of language teaching (SPANISH 399). Moreover, all doctoral students are encouraged to complete a

teaching practicum by co-teaching an upper-division course with a professor and enrolling in SPANISH 292, which is graded Satisfactory/Unsatisfactory only.

### Qualifying Examination

Upon completion of course work, the Ph.D. student advances to candidacy by passing the written and oral qualifying examinations by unanimous decision. The qualifying examination requires the student to develop two topics in close consultation with the examination committee. One topic must present a critical problem from a historical perspective, while the other may focus on a more specific area within the student's major field of interest. Students are encouraged to incorporate theoretical and interdisciplinary components into the formulation of their topics. A two-hour oral examination that includes discussion of the written examinations is also required. The normative time for advancement to candidacy is four years.

### Dissertation

A dissertation topic is chosen by the candidate in consultation with the dissertation director and committee, and normally falls within the major field covered by the qualifying examinations. The candidate presents a study plan to the dissertation committee, which approves the proposal and a preliminary research outline. The student submits drafts of chapters to the dissertation director who corrects and approves the drafts and circulates them to other committee members for commentary. The defense of the dissertation will occur upon its completion during the residency of the candidate.

## Spanish/English Bilingual Education, Minor

The Department of Spanish and Portuguese offers a minor in Spanish and a minor in Spanish/English Bilingual Education. The Spanish minor provides the opportunity to develop language proficiency while expanding knowledge of Hispanic cultures, literature, and linguistics. Many Spanish minors combine their studies with fields such as political science (pre-law), pre-med, communications, psychology, and economics. The goal of the minor in Spanish/English Bilingual Education is to create a pathway to better prepare students who wish to become future bilingual teachers.

**All students are subject to the Language other than English Placement and Progression (<http://catalogue.uci.eduhttps://schoolofhumanities/#undergraduateprogramtext>) policies.**

A. Complete:

HUMAN/EDUC 52	Foundations of Bilingual Education and Bilingualism
---------------	---

B. Complete:

EDUC 101	Strategies for Tutoring and Teacher Aiding in a Bilingual Classroom
EDUC 107	Child Development in Education
EDUC 124	Multicultural Education in K-12 Schools

C. Complete:

SPANISH 101B	Introductory Studies to Latin American Literature and Culture
SPANISH 113B	Introduction to Spanish Linguistics

One additional upper-division course taught in Spanish, in the Department of Spanish and Portuguese.

**Residence Requirement for the Spanish/English Bilingual Education Minor:** HUMAN 52/EDUC 52, EDUC 101, EDUC 107, EDUC 124, and at least one upper-division Spanish course must be completed successfully at UCI. By petition, the upper-division Spanish course may be taken through the UC Education Abroad Program, provided course content is approved in advance by the appropriate undergraduate studies advisor or department chair.

## Graduate Program in Visual Studies

**Roland Betancourt, Director**

2000 Humanities Gateway

949-824-1124

<http://www.humanities.uci.edu/visualstudies/>

The graduate program in Visual Studies, administered jointly by the faculties of the Department of Art History and the Department of Film and Media Studies, offers students the opportunity to pursue a doctorate in the cultural analysis of visual artifacts and experiences. Visual Studies synthesizes methodological insights from both component disciplines in order to examine the social practices of visual representation and visibility itself. The program leads to a Ph.D. in Visual Studies. While the program (in certain instances) grants an M.A. to students en route to their Ph.D., it admits only those students intending to complete their doctorate at UCI.

In addition, an emphasis in Visual Studies, described on the Requirements tab, is available to Ph.D. and M.F.A. students in all departments at UCI.

- Visual Studies, Graduate Emphasis
- Visual Studies, Ph.D.

## Faculty

Catherine Benamou, Ph.D. New York University, *Associate Professor of Film and Media Studies; Culture and Theory; Visual Studies* (Hispanophone and Lusophone cinema and television, U.S. Latino media, Orson Welles and maverick cinema, transnational flows, spectatorship, cinematic memory and cultures of preservation)

Roland Betancourt, Ph.D. Yale University, *Director of the Graduate Program in Visual Studies and Chancellor's Fellow and Associate Professor of Art History; Religious Studies; Visual Studies* (Byzantine and Medieval art, critical and queer theory; histories of race, gender, and sexuality)

Matthew P. Canepa, Ph.D. University of Chicago, *Elahe Omidyar Mir-Djali Presidential Chair and Professor of Art History; Religious Studies; Visual Studies* (Achaemenid, Seleucid, Parthian, and Sasanian art and archaeology; Iranian visual cultures and Afro-Eurasian exchange; critical approaches to space, place, landscape, urbanism, and memory)

Bridget R. Cooks Cumbo, Ph.D. University of Rochester, *Associate Professor of African American Studies; Art History; Culture and Theory; Visual Studies* (African American art, museum studies, feminist and post-colonial theory)

Sohail Daulatzai, Ph.D. University of Southern California, *Associate Professor of Film and Media Studies; African American Studies; Visual Studies* (decolonization, empire, race, Muslim studies, Black studies)

Bambi Haggins, Ph.D. University of California, Los Angeles, *Associate Professor of Film and Media Studies; African American Studies; Visual Studies* (Black [African American] comedy in film, television, digital media and performance, television history, comedy as social and political discourse, African-American studies, American studies)

Kristen L. Hatch, Ph.D. University of California, Los Angeles, *Associate Professor of Film and Media Studies; Visual Studies* (classical Hollywood, stardom, melodrama, histories of gender, race and sexuality, girlhood studies)

James D. Herbert, Ph.D. Yale University, *Professor of Art History; Visual Studies* (modern European art)

Lucas Hilderbrand, Ph.D. New York University, *Professor of Film and Media Studies; Visual Studies* (Queer cultures and media, cultural studies, documentary, pornography, popular music, video art, histories of technology)

Victoria E. Johnson, Ph.D. University of Southern California, *Professor of Film and Media Studies; African American Studies; Culture and Theory; Visual Studies* (U.S. television, history, media industry studies, critical race theory, cultural geography, sound and music in popular media, media law and policy)

Peter O. Krapp, Ph.D. University of California, Santa Barbara, *Professor of Film and Media Studies; English; European Languages and Studies; Informatics; Music; Visual Studies* (digital culture, media history, cultural memory)
