Political representation plays an important role in democratic systems, but is elusive once examined closely. Students delve into the concept and relate different views to political life. Half of the course is spent on writing instruction.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Recommended: Upper-Division students. Political Science majors have first consideration for enrollment.

(Ib)

**POL SCI 138A. The Moral of the Story: Introductory Seminar in Ethics. 4 Units.**

Introduces major theories and classic texts in ethics, from Plato and Aristotelian virtue ethics to utilitarianism and Kant and contemporary moral psychology.

**POL SCI 138AW. Moral of the Story: Introduction to Ethics. 4 Units.**

Focuses on how we learn about ethics from stories, in the form of fables, bedtime stories, religious stories, soap operas, television, and movies as adults. Students bring in stories that informed their own ethical development.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

**POL SCI 138CW. Ethics of Difference. 4 Units.**

Examines differences traditionally judged politically salient—race, ethnicity, religion, gender. Personal interviews with an elderly person encourage students to understand the social construction of difference and to reexamine their own attitudes by putting themselves in the place of another.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science Majors have first consideration for enrollment.

(Ib)

**POL SCI 138DW. The Moral Life During War. 4 Units.**

Can people keep their humanity during war? What does the term humanity signify when simply surviving requires faith, courage, and desperation? When facing wartime brutality, must we abrogate morality? What does it mean to compose a moral life during war?.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science Majors have first consideration for enrollment.

Concurrent with POL SCI 238D.

(Ib)

**POL SCI 139. Special Topics in Political Theory and Methods. 4 Units.**

Studies in selected areas of political theory and methods. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 141B. International Political Economy. 4 Units.**

Examination of problems in global political-economic relations through competing conceptual lenses or grand theories: mercantilism, liberalism, and Marxism. Surveys North-North and North-South issues relating power and wealth.

Same as INTL ST 114A.

(VIII)

**POL SCI 141C. International Political Economy of East Asia. 4 Units.**

Integration of theoretical perspectives in international political economy with the study of economic development in East Asia, with special emphasis on regional integration.

(VIII)

**POL SCI 141E. U.S. Foreign Policy Toward Asia. 4 Units.**

U.S. policy toward the countries of East Asia: bilateral and regional security relationships, U.S. economic relations with the major Asian countries, the development of regional institutions, and human rights.

Same as INTL ST 142G.

**POL SCI 142B. The International Relations of East Asia. 4 Units.**

Surveys various aspects of relations between the nations of East Asia. Topics include the historical development of the region; current political and security relations, including the impact of the American military presence.

Same as INTL ST 142D.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 142D. U.S. Foreign Policy I: Globalism and Cold War. 4 Units.**

Looks at changing international perspectives, policy responses, and military strategies of presidential administrations from Truman to Reagan. In assessing the motives and objectives of U.S. foreign policy leaders during the "Cold War" era, the concept of "national interest" is examined.

Same as INTL ST 142A.

Restriction: International Studies Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment.

**POL SCI 142G. U.S. Coercive Diplomacy. 4 Units.**

Examines the theory of compellence and the U.S. practice of coercive diplomacy--the power to change behavior of other governments. Specific case examples: the Cuban missile crisis, bombing of North Vietnam, the Nicaraguan Contras, Desert Shield/Desert Storm, and Libya.

Same as INTL ST 142E.

Restriction: Upper-division students only. Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 142J. U.S. Intervention in Latin America. 4 Units.**

Explores political, economic, social, and cultural ties that bind Latin America to the United States. Focuses on U.S. intervention and Latin American response from early nineteenth century to present day. Case studies include Mexico, Guatemala, Cuba, Chile, and Central America.

Same as HISTORY 166, INTL ST 177D, CHC/LAT 150.

**POL SCI 143G. Homeland Security . 4.0 Units.**

Examines the 9/11 origins of the concept of homeland security; assess the evolution, structure, and operations of the Department of Homeland Security; critically examines the evolution of threat assessment to the U.S. and the utilization of risk management methodologies.

Same as INTL ST 141B.

**POL SCI 144A. Approaches to International Relations. 4 Units.**

Reviews theoretical and methodological approaches to the study of international relations using contending perspectives to analyze power and influence, capabilities, interdependence, reciprocity, international regimes, anarchy, cooperation, imperialism, and hegemony.

Same as INTL ST 140A.

Restriction: Upper-division students only. Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 145A. Ethics in an Age of Terror and Genocide. 4 Units.**

Original sources document personal impact of wars on genocides, from World War II to the Bosnian and Rwandan genocides and current wars in Iraq and Afghanistan. Students train for and conduct personal interviews with someone who lived through a war.

Same as INTL ST 154C.

**POL SCI 146B. Religion and World Politics. 4 Units.**

Examines the relationship between religion and world politics historically and today, focusing on connections with peace/war, democracy, human rights, secularism(s), and globalization. Covers major debates, scholarship, concepts, and theories through class exercises, exams, and essays.

Prerequisite: POL SCI 41A or INTL ST 11 or INTL ST 12 or REL STD 5A or REL STD 5B or REL STD 5C

Same as REL STD 115, INTL ST 151B.

**POL SCI 147CW. International Humanitarianism. 4 Units.**

Examines, analyzes, and evaluates the humanitarian phenomenon, the actors involved in it (including states, international organizations (IOs), and nongovernmental organizations (NGOs)), the rise of a body of international humanitarian law, and the problems and debates associated with international humanitarianism today.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as INTL ST 147CW.

(Ib)

**POL SCI 147D. International Organizations. 4 Units.**

Active learning course that examines origins, decision-making processes, activities, and evolution of leading international organizations (e.g. U.N., NATO, EU, AU, WTO, World Bank, IMF). Activities include drafting reforms, applying theory, assessing dysfunctions, and participating in U.N. negotiation simulations.

Same as INTL ST 147D.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 147E. Critical Investigations into Humanitarianism in Africa. 4 Units.**

Explores the complex phenomenon of aid to Africa (emergency and development aid), and the representational, cultural, historical, and other reasons why some participants and many observers critique it. Students occasionally engage with peers and faculty in African institutions.

**(VIII)****POL SCI 149. Special Topics in International Relations. 4 Units.**

Studies in selected areas of international relations. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 151B. Introduction to Chinese Politics. 4 Units.**

Background to the Chinese revolution, rise of the communist party; and institutions, ideology, and structure of Communist party rule from 1949-present.

Same as INTL ST 176C.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 151C. Chinese Politics: Policy, Leadership, and Change. 4 Units.**

Examines major policies from 1949 to the present, and considers the changing role of the Communist Party and its shifting treatment of various social groups; the era of Mao Zedong, reforms under Deng, and post-Deng politics.

Same as INTL ST 176D.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 151H. Voting and Political Manipulation. 4 Units.**

Introduction to social choice and cooperative games. Topics include majority rule, types of voting methods, apportionment and proportional representation, agenda manipulation, coalition formation, voting power, political consequences of electoral laws.

Same as INTL ST 156A, SOC SCI 121T, ECON 154.

Restriction: International Studies Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**POL SCI 152F. West European Politics. 4 Units.**

Explores four main themes: (1) thinking scientifically about politics; (2) understanding the linkages between different political structures and spheres of activity; (3) evaluating some theories about politics; (4) learning about three countries: Britain, France, and Germany.

Same as INTL ST 176I.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 152K. Immigration Politics in Western Europe. 4 Units.**

Examines immigration politics in Western Europe, analyzing trends and policy from the postwar period through to today. Topics include citizenship, immigrant integration, asylum, the far-right, and a rotating focus on contemporary issues, e.g., terrorism, Islamophobia.

Same as INTL ST 178A.

Overlaps with POL SCI 141D.

**POL SCI 153B. Canadian Politics. 4 Units.**

Addresses the basic structures and processes of contemporary Canadian government and politics. Additional topics may include regionalism, federalism, western alienation and oil, Canadian solutions to social welfare policy questions, developments in Quebec, and other issues associated with French-English relations.

Same as INTL ST 176L.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 153E. Human Rights. 4 Units.**

Examines the causes and consequences of human rights violations with a focus on Latin America. What are human rights? When and where are they violated? What political mechanisms are available to deal with human rights problems? How effective are they.

Same as INTL ST 154B.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 153G. Cuban Society and Revolution. 4 Units.**

Explores the causes, development, and legacy of the 1959 Revolution. Themes include economic dependency, democracy, race, gender, culture, and the always volatile relations between Cuba and the United States.

Same as INTL ST 177E, HISTORY 166C, CHC/LAT 157.

**POL SCI 154C. Comparative Politics: Four Nations, Three Continents. 4 Units.**

Studies four countries in a comparative fashion: their respective political histories and cultural traditions; actual differences among their superficially similar party, parliamentary, and executive institutions; contemporary economic policy. The countries represent three continents and varying levels of economic development.

Same as INTL ST 144A.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 154F. Peoples and Cultures of Post-Soviet Eurasia. 4 Units.**

Examines the cultures and political conflicts of the more than 130 indigenous ethnic groups in the European and Asian territories of the former U.S.S.R. Emphasis is on the theoretical issues of ethnicity, nationalism, and conflict management.

Same as INTL ST 162B, ANTHRO 164P.

**(VIII)**

**POL SCI 154G. Conflict Resolution in Cross-Cultural Perspective. 4 Units.**

Examines theories of conflict management. Analyzes how conflict is mitigated in diverse cultures: at the interpersonal level, between groups, and on the international scale. Students discuss readings, hear from conflict management practitioners, and simulate negotiations.

Same as ANTHRO 136D, SOC SCI 183E, INTL ST 183E.

**(VIII)**

**POL SCI 154J. Jews and Power. 4 Units.**

Examines the relationship between the Jewish people and political power over a 3500 year period. How have Jews preserved their communal interests and personal safety? How have they defined the proper relationship of the people to political authority.

Same as HISTORY 130F, REL STD 130F.

**POL SCI 154KW. US Government in Comparative Perspective. 4 Units.**

Introduction to the United States in comparative perspective, covering general features of the United States and other countries, such as institutional design and policy choices. Addresses the debates about American exceptionalism and American decline.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science Majors have first consideration for enrollment.

**(Ib)**

**POL SCI 155C. Organizations. 4 Units.**

How bureaucracies, formal organizations, and voluntary associations work, how/why they grow, and where they are going. History and structure of organizational rationality; dynamics of organized groups; behavior in organizations; limits of bureaucratization and attempts to overcome these limits through decentralization.

Same as SOCIOL 141.

Restriction: Sociology Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment.

**POL SCI 156A. Political Participation. 4 Units.**

The ways in which people in various political systems take part in politics, especially in activities directed toward affecting outcomes. Who is active, what they do, why they do it, and what difference it makes.

**POL SCI 156D. Protests, Movements, and Revolutions. 4 Units.**

A survey of models of collective action drawn from sociology, economics, psychology, and political science. Focus on areas such as social movements, strikes, crowd psychology, cults, fads, fashions, public opinion, and symbolic and mythical elements in collective culture.

Prerequisite: SOCIOL 1 or POL SCI 11A or ECON 1

Same as SOCIOL 174.

Restriction: Political Science Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**POL SCI 157B. International Divided Cities. 4 Units.**

Investigates urban divisions in international cities where deep-seated nationalistic ethnic differences create pressures for intergroup conflicts, autonomy, or territorial separation, and can incite violence. Urban political polarization as it is manifest in the urban setting.

Same as UPPP 178, SOCIOL 176.

**POL SCI 158D. Introduction to Contemporary Middle East Politics. 4 Units.**

An overview of basic issues that shape the politics of the Middle East and North Africa. Themes include implication of the colonization era, nation-state formation, inter-Arab relations, nationalism, Arab-Israel conflict, Islamic resurgence, and more.

Same as SOC SCI 188A, INTL ST 165.

**POL SCI 159. Special Topics in Comparative Politics. 4 Units.**

Studies in selected areas of comparative politics. Topics addressed vary each quarter.

Repeatability: May be repeated for credit unlimited times.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 169. Special Topics in Race and Ethnicity Politics. 4 Units.**

Studies in selected areas of race and ethnicity. Topics vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 171AW. Law and Society. 4 Units.**

Law and its various roles in society. The nature and meaning of law; legality and power in the American system; law as a mechanism for social change; the role of law in dispute processing, social control, compliance with judicial decisions.

Prerequisite: POL SCI 71A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science Majors have first consideration for enrollment.

(Ib)

**POL SCI 171CW. Comparative Constitutional Politics. 4 Units.**

Examines the impact of constitutional courts on politics and policy-making in Canada, France, Germany, and the United States. Cases may focus on the constitutional politics of free speech, abortion, rights to property, and the conduct of foreign relations.

Prerequisite: POL SCI 71A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science Majors have first consideration for enrollment.

(Ib)

**POL SCI 171D. American Constitutional Law. 4 Units.**

American constitutional interpretation of cases involving separation of powers, federal-state relations, rights of property, free expression, privacy, criminal due process, political participation, and equality. Includes legal research methods, development of judicial review, legal reasoning, and impact of Supreme Court decisions.

Prerequisite: POL SCI 71A

Overlaps with CRM/LAW C122.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 171F. Law in the Twenty-First Century. 4 Units.**

Examines the complex relationship between law, the social sciences, and modern society. Lectures explore such issues as the interplay between technology and constitutional rights, the impact of science on law, and the evolving roles of attorneys and judges.

Same as SOC SCI 172D.

Restriction: Political Science Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment.

**POL SCI 171G. Legal Implications of the Drug Trade. 4 Units.**

Examines United States policy to combat domestic and international narcotics trafficking. Analyzes the national drug policy and program implementation by federal and state agencies. Considers the effects of these policies on our individual constitutional rights and the criminal justice system.

**POL SCI 172A. International Law. 4 Units.**

Examination of the origin, changing structure, application of international law, and the role of legal norms in regulating the behavior of states and maintaining international order.

Prerequisite: POL SCI 71A

Same as INTL ST 145A.

**(VIII)**

**POL SCI 174A. Civil Liberties. 4 Units.**

Political analysis of selected Supreme Court cases involving claims under the Bill of Rights and the Fourteenth Amendment. Topics include: race, sex, and other forms of discrimination; criminal justice; privacy; freedom of speech and related claims.

Prerequisite: POL SCI 71A

Overlaps with CRM/LAW C122.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 174C. U.S. Supreme Court. 4 Units.**

Overview and analysis of the role played by the U.S. Supreme Court in the American political system. Judicial review, appointment of justices, judicial activism and judicial restraint, process of case selection, court deliberation, and decision-making, impact of Supreme Court decisions.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 174CW. U.S. Supreme Court. 4 Units.**

Overview and analysis of the role played by the U.S. Supreme Court in the American political system. Judicial review, appointment of justices, judicial activism and judicial restraint, process of case selection, court deliberation, and decision-making, impact of Supreme Court decisions.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science Majors have first consideration for enrollment.

**(Ib)**

**POL SCI 175. The Bill of Rights in Film. 4 Units.**

Focuses on ways American cinema has portrayed, represented, and analyzed U.S. Bills of Rights. Juxtaposes cinematic presentations on specific Bill of Rights clauses, treating films as cultural texts, with pertinent judicial decisions and more scholarly appraisals of those same provisions.

**POL SCI 179. Special Topics in Public Law. 4 Units.**

Studies in selected areas of public law. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI H180D. Honors Seminar in Political Science. 2-4 Units.**

Course for students enrolled in the Honors Program in Political Science.

Prerequisite: Only open to students in the Political Science Honors Program.

Repeatability: May be repeated for credit unlimited times.

**POL SCI H182A. Honors Thesis Workshop. 4 Units.**

A weekly seminar/workshop to facilitate the exchange of ideas and research strategies among students and to review their progress in writing the thesis.

Restriction: Open only to students in the Political Science Senior Thesis program.

**POL SCI 190W. Senior Thesis. 4 Units.**

Thesis research with Political Science faculty.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 3 times.

**(Ib)****POL SCI 197. Field Study. 1-4 Units.**

Field study with Political Science faculty.

Repeatability: Unlimited as topics vary.

**POL SCI 198. Directed Group Study. 1-4 Units.**

Directed group study with Political Science faculty.

Repeatability: Unlimited as topics vary.

**POL SCI 199. Independent Study. 1-4 Units.**

Independent study or research with a Political Science faculty member.

Repeatability: May be repeated for credit unlimited times.

**POL SCI 209A. Study of Democracy Colloquium. 1.33 Unit.**

Skills critical to professional success. Students learn and practice professional presentation skills, develop substantive knowledge in the field by attending talks and panels, and interact with scholars and professionals in the field.

Restriction: Graduate students only. POL SCI 209A may not be taken for credit if taken after SOCIOL 229.

**POL SCI 209B. Study of Democracy Colloquium. 1.33 Unit.**

This colloquium teaches students skills critical to professional success. Students learn and practice professional presentation skills and develop substantive knowledge in the field by attending talks and panels and interacting with scholars and professionals in the field.

Restriction: Graduate students only. POL SCI 209B may not be taken for credit if taken after SOCIOL 229 Democracy.

**POL SCI 209C. Study of Democracy Colloquium . 1.34 Unit.**

This colloquium teaches students skills critical to professional success. Students learn and practice professional presentation skills and develop substantive knowledge in the field by attending talks and panels and interacting with scholars and professionals in the field.

Restriction: Graduate students only. POL SCI 209C may not be taken for credit if taken after SOCIOL 229 Democracy.

**POL SCI 210A. Colloquium. 1.3 Unit.**

Doctoral training requires more than learning substantive debates and research methods; it also requires students learn professional practices, routines, and expectations. This year-long workshop offers students a mix of professional development, outside speakers, and casual conversations with departmental faculty.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**POL SCI 210B. Colloquium. 1.3 Unit.**

Doctoral training requires more than learning substantive debates and research methods; it also requires students learn professional practices, routines, and expectations. This year-long workshop offers students a mix of professional development, outside speakers, and casual conversations with departmental faculty.

Prerequisite: POL SCI 210A

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**POL SCI 210C. Colloquium. 1.4 Unit.**

Doctoral training requires more than learning substantive debates and research methods; it also requires students learn professional practices, routines, and expectations. This year-long workshop offers students a mix of professional development, outside speakers, and casual conversations with departmental faculty.

Prerequisite: POL SCI 210B

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**POL SCI 212A. Public Opinion. 4 Units.**

Introduction to the study of U.S. public opinion. Provides an overview of the theories regarding opinion formation, the methodologies employed, and the role of public opinion in democratic governments.

Restriction: Graduate students only.

**POL SCI 212B. Ethics Workshop. 4 Units.**

Students find an important question in ethics, search literature to assess topic's importance, pose question to be researched, propose method of analysis and type of data, analyze data, and note how their works contribute to knowledge in the field.

**POL SCI 219. Special Topics in Politics and Society. 4 Units.**

Current research in politics and society.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**POL SCI 221A. Public Policy. 4 Units.**

Explores different approaches to public policy analysis, the diverse conceptions of the goals and objectives that should be served by policy, and the appropriate role of the policy analyst. Policy consequences are traced to indirect and subtle incentives and disincentives.

Same as CRM/LAW C255, UPPP 221.

Restriction: Graduate students only.

**POL SCI 223A. Theories of Power and Empowerment. 4 Units.**

Studies different ways of thinking about power and its uses. Explores theories of power that inform various notions of empowerment, including resistance, participatory democracy, and workplace empowerment.

Same as MGMTPHD 297R, UPPP 279.

Restriction: Graduate students only.

**POL SCI 229. Special Topics in American Politics. 4 Units.**

Current research in American Politics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**POL SCI 231A. Political Epistemology. 4 Units.**

Focuses on fundamental issues of knowledge in the study of politics, especially interconnections and tensions between politics and knowledge. Counts as the Field Seminar in Political Theory.

Restriction: Graduate students only.

**POL SCI 231B. Theories of Textual Interpretation. 4 Units.**

Examination of different theories of textual interpretation, including Straussian, hermeneutical, poststructuralist, feminist, postcolonial, and critical race theories. Key questions include: How does one go about the task of interpreting texts? What makes one interpretation better or more insightful than another.

Restriction: Graduate students only.

**POL SCI 232A. Introduction to Voting Theory. 4 Units.**

Introduction to voting modules. Substantive topics include majority rule, voting methods and their properties, apportionment and proportional representation, agenda manipulation, coalition formation, voting power, political consequences of electoral laws.

Restriction: Graduate students only.

**POL SCI 238D. The Moral Life During War. 4 Units.**

Can people keep their humanity during war? What does the term humanity signify when simply surviving requires faith, courage, and desperation? When facing wartime brutality must we abrogate morality? What does it mean to compose a moral life during war?.

Restriction: Graduate students only. Political Science Majors have first consideration for enrollment.

Concurrent with POL SCI 138DW.

**POL SCI 239. Special Topics in Political Theory. 4 Units.**

Current research in political theory. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**POL SCI 241B. Seminar in International Relations Theory. 4 Units.**

Overview of the major theories guiding research and scholarship in international relations. Focus on major conceptual approaches (realism, neoliberalism, marxism) and levels of analysis (systemic, state, and subnational), as well as on methodological/epistemological debates engulfing the field.

Restriction: Graduate students only.

**POL SCI 241E. Research Design in International Relations. 4 Units.**

Surveys research design primarily through substantive readings in international relations. The purpose is to familiarize students with choices/dilemmas relevant to IR-specific research. Students at various stages in the graduate program and with different methodological orientations are welcome.

**POL SCI 249. Special Topics in International Relations. 4 Units.**

Current research in international relations. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**POL SCI 252G. Theories and Practice of Migration and Citizenship. 4 Units.**

Examines theories of migration and citizenship. In examining these themes, the course includes discussion of theory development, multi-method testing, and case study comparison with a focus on Western Europe and other advanced democratic receiving states.

**POL SCI 254A. Introduction to Game Theory. 4 Units.**

Introduction to non-cooperative games. The prisoner's dilemma, Nash equilibrium, sequential games, subgame perfection. Applications include collective action, agenda-setter models, spatial competition of political parties, models of revolution and arms race.

Restriction: Graduate students only.

**POL SCI 259. Special Topics in Comparative Politics. 4 Units.**

Current research in comparative politics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**POL SCI 260B. Political Participation. 4 Units.**

Examines theoretical approaches to the explanation of the pattern of participation and consideration of the results of empirical studies of such activity by mass publics (mainly in Europe and North America). Addresses issues in both comparative politics and political behavior.

Restriction: Graduate students only.

**POL SCI 273A. Advanced Qualitative Methods: Analyzing Qualitative Data. 4 Units.**

Introduction to the theory and practice of analyzing qualitative data. Students must have already learned about data collection and research design for qualitative research and must have qualitative data they can analyze.

Same as MGMTPHD 297K, UPPP 213.

Restriction: Graduate students only.

**POL SCI 276. Predictive Models in Social Sciences. 4 Units.**

Basic numeracy (logarithms, fixed-exponent and exponential formats, graphing). Models based on ignorance and logical constraints. Logical quantitative models (how things should be) to complement and guide statistical analysis (how things are).

**POL SCI 285A. Introduction to Political Psychology I. 4 Units.**

Reviews theoretical questions regarding the relationship between the analytical and normative and the polity. Considers relationships between the analytical and normative concerns of psychology and political science, addressing empirical literatures on political socialization, ideology and public opinion, identity and nationality.

**POL SCI 290. Dissertation Research. 1-12 Units.**

Dissertation research with Political Science faculty.

Repeatability: Unlimited as topics vary.

**POL SCI 299. Independent Study. 1-12 Units.**

Independent research with Political Science faculty.

Repeatability: Unlimited as topics vary.

## Psychology Courses

**PSYCH 7A. Introduction to Psychology. 4 Units.**

Introduction to field of psychology, addressing the application of scientific methods to the study of human development, learning, memory, problem solving, perception, biological mechanisms, emotions and motivation, personality, psychopathology, and effects of diverse social and cultural contexts on human behavior.

Same as PSCI 9.

Overlaps with PSYCH 9A, PSYCH 9B, PSYCH 9C, PSCI 11A, PSCI 11B.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment. PSCI 9 and PSYCH 7A may not be taken for credit if taken concurrently with or after PSCI 11A, PSCI 11B, PSCI 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)

**PSYCH 9A. Psychology Fundamentals. 4 Units.**

Designed to provide freshman with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSCI 11A.

Restriction: Lower-division students only. Cognitive Sciences Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. PSCI 9 and PSYCH 7A may not be taken for credit if taken after PSCI 11A, PSCI 11B, PSCI 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)

**PSYCH 9B. Psychology Fundamentals. 4 Units.**

Designed to provide freshmen with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSCI 11B.

Restriction: Lower-division students only. Cognitive Sciences Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

(III)

**PSYCH 9C. Psychology Fundamentals. 4 Units.**

Designed to provide freshman with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSCI 11C.

Restriction: Lower-division students only. Cognitive Sciences Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

(III)

**PSYCH 10A. Probability and Statistics in Psychology I. 4 Units.**

An introduction to probability and statistics. Emphasis on thorough understanding of the probabilistic basis of statistical inference. Examples drawn primarily from psychology.

Restriction: Psychology Majors have first consideration for enrollment.

(Va)

**PSYCH 10B. Probability and Statistics in Psychology II. 4 Units.**

An introduction to probability and statistics. Emphasis on thorough understanding of the probabilistic basis of statistical inference. Examples drawn primarily from psychology.

Prerequisite: PSYCH 10A

Restriction: Psychology Majors have first consideration for enrollment.

(Va)

**PSYCH 10C. Probability and Statistics in Psychology III. 4 Units.**

An introduction to probability and statistics. Emphasis on thorough understanding of the probabilistic basis of statistical inference. Examples drawn primarily from psychology.

Prerequisite: PSYCH 10B

Restriction: Psychology Majors have first consideration for enrollment.

(Vb)

**PSYCH 21A. Adolescent Psychology. 4 Units.**

Focuses on psychosocial dynamics of today's adolescents in America emphasizing the quest for identity, independence, values, and sexual orientation. The influence of society, family, school, and peers is analyzed. Strategies for helping troubled adolescents are discussed.

Overlaps with PSCI 112D.

(III)

**PSYCH 46A. Introduction to Human Memory. 4 Units.**

Covers the core concepts of modern research and theorizing about human memory, including structural subdivisions (e.g., perceptual memory, short-term memory, long-term memory), different measures of memory (e.g., recall, reorganization), and some practical applications of memory research (e.g., mnemonics).

(III)

**PSYCH 56L. Acquisition of Language. 4 Units.**

What children say, what they mean, and what they understand. Theories about the learning of language by one-, two-, and three-year-olds. Comparison of kinds of data on which these theories are based.

Same as LSCI 51.

(III)

**PSYCH 78A. Self-Identity and Society. 4 Units.**

Studies sociological contributions to theory and research in social psychology, with focus on the social influences on personality, attitudes, beliefs, and behavior; socialization, human groups, and social interaction.

Same as SOCIOL 31.

(III)

**PSYCH 89. Special Topics in Lower-Division Psychology. 4 Units.**

Studies in selected areas of psychology at the lower-division level. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**PSYCH H101A. Honors Seminar in Psychology I. 4 Units.**

Focuses on the research activities and honors thesis research projects of each student and the research of various Cognitive Sciences faculty. Students discuss their research interests in the early and later stages of their projects. Research projects and write-ups required.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

Restriction: Psychology Majors only. Cognitive Sciences Majors only. Social Science Honors students only.

**PSYCH H101B. Honors Seminar in Psychology II. 4 Units.**

Focuses on the research activities and honors thesis research projects of each student and the research of various Cognitive Sciences faculty. Students discuss their research interests in the early and later stages of their projects. Research projects and write-ups required.

Prerequisite: PSYCH H101A

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

Restriction: Psychology Majors only. Cognitive Sciences Majors only. Social Science Honors students only.

**PSYCH H101C. Honors Seminar in Psychology III. 4 Units.**

Focuses on the research activities and honors thesis research projects of each student and the research of various Cognitive Sciences faculty. Students discuss their research interests in the early and later stages of their projects. Research projects and write-ups required.

Prerequisite: PSYCH H101B

Repeatability: May be taken for credit 2 times.

Restriction: Psychology Majors only. Cognitive Sciences Majors only. Social Science Honors students only.

**PSYCH 111BW. Honors Advanced Experimental Psychology. 4 Units.**

Design and analysis of multivalent, factorial, and correlational studies. Students prepare proposals for independent research.

Corequisite: PSYCH H111B

Prerequisite: PSYCH H111A and (PSYC H11A or PSYCH 112A). Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Psychology Majors only. Social Science Honors students only.

**(Ib)**

**PSYCH H111A. Honors Experimental Psychology. 4 Units.**

Emphasis on design of experiments and analysis of results. Experiments are conducted in laboratory sections.

Prerequisite: ((PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C)) and ((PSYCH 10A and 10B and 10C) or (MATH 2A and MATH 2B and (MATH 7 or STATS 7))).

Overlaps with PSYCH 112A.

Restriction: Psychology and Cognitive Sciences Honors Program students only.

**PSYCH H111B. Honors Advanced Experimental Psychology Laboratory. 2 Units.**

Design and analysis of multivalent, factorial, and correlational studies. Students prepare proposals for independent research.

Corequisite: PSYCH 111BW

**PSYCH H111C. Honors Research in Experimental Psychology. 4 Units.**

Each student conducts a research project in experimental psychology. The projects are discussed in a seminar format. Written reports on each project are submitted at the end of the quarter.

Prerequisite: PSYCH 111BW or PSYCH 112B

Restriction: Psychology Majors only. Social Science Honors students only.

**PSYCH 112A. Experimental Psychology. 4 Units.**

Emphasis on design of experiments and analysis of results. Experiments are conducted in laboratory sections.

Corequisite: PSYCH 112LA

Prerequisite: ((PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C)) and ((PSYCH 10A and PSYCH 10B and PSYCH 10C) or (MATH 2A and MATH 2B and (MATH 7 or STATS 7)))

Overlaps with PSYCH H111A, PSYCH 112F, PSYCH 112G.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 112BW. Advanced Experimental Psychology. 4 Units.**

Design and analysis of multivalent, factorial, and correlational studies. Students prepare proposals for independent research.

Prerequisite: PSYCH 112A and PSYCH 112LA. Satisfactory completion of the Lower-Division Writing requirement.

Overlaps with PSYCH 112F, PSYCH 112FW, PSYCH 112G, PSYCH 112GW.

Restriction: Psychology Majors have first consideration for enrollment.

**(Ib)**

**PSYCH 112C. Research in Experimental Psychology. 4 Units.**

Each student conducts a research project in experimental psychology. The projects are discussed in a seminar format. Written reports on each project are submitted at the end of the quarter.

Corequisite: PSYCH 112LC

Prerequisite: PSYCH 112B and PSYCH 112LB

Overlaps with PSYCH 112F, PSYCH 112FW, PSYCH 112G, PSYCH 112GW.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 112D. Effective Graphical Presentation of Data. 4 Units.**

Learn to use MATLAB to produce graphical displays of data based on psychological principles for effective design. Approach is problem-oriented, with emphasis on case-studies using data from psychological experiments and real-world corpora. Assessment via independent individual projects.

Corequisite: PSYCH 112LD

Prerequisite: (PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C) and (PSYCH 10C or SOC SCI 10C or ANTHRO 10C or POL SCI 10C or SOCIOL 10C) or (MATH 2B and STATS 7)

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 112LA. Experimental Psychology Laboratory. 2 Units.**

Required laboratory section and co-requisite for Psych 112A.

Corequisite: PSYCH 112A

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 112LB. Advanced Experimental Psychology Laboratory. 2 Units.**

Required laboratory section for PSYCH 112B and PSYCH 112BW.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 112LC. Research in Experimental Psychology.**

Required laboratory section and co-requisite for PSYCH 112C.

Corequisite: PSYCH 112C

**PSYCH 112LD. Effective Graphical Presentation of Data Lab . 2 Units.**

Lab to learn to use MATLAB to produce graphical displays of data based on psychological principles for effective design. Approach is problem-oriented, with emphasis on case-studies using data from psychological experiments and real-world corpora. Assessment via independent individual projects.

Corequisite: PSYCH 112D

Restriction: Psychology Majors have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment.

**PSYCH 112LM. Research Methods in Psychology Laboratory. 2 Units.**

Required laboratory section and co-requisite for PSYCH 112M.

Corequisite: PSYCH 112M

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 112LR. Cognitive Robotics Laboratory. 2 Units.**

Required laboratory section and corequisite for PSYCH 112R.

Corequisite: PSYCH 112R

Restriction: Psychology Majors have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment.

**PSYCH 112M. Research Methods in Psychology. 4 Units.**

Research methods in psychology for majors who wish to fulfill this requirement separately from upper-division writing. Covers both experimental and descriptive research methods, analysis of results, and reading the psychological literature. Research experience is provided in laboratory sections.

Corequisite: PSYCH 112LM

Prerequisite: (PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C) and (PSYCH 10C or SOC SCI 10C or ANTHRO 10C or POL SCI 10C or SOCIOL 10C) or (MATH 2B and STATS 7)

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 112R. Cognitive Robotics. 4 Units.**

Introduces concepts on experimental design, embodiment, robot construction, and computer programming. Concepts of embodied intelligence and case studies of cognitive robotics are covered in lecture. Simple robots are constructed and programmed to carry out different behavioral experiments in lab.

Corequisite: PSYCH 112LR

Prerequisite: (PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C) and (PSYCH 10C or SOC SCI 10C or ANTHRO 10C or POL SCI 10C or SOCIOL 10C) or (MATH 2B and STATS 7)

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 114M. MATLAB Programming. 4 Units.**

MATLAB is a mathematical software package for solving quantitative problems often encountered in experimental psychology. Topics include rudiments of programming, statistical analysis of data, matrix algebra, signal processing, graphic visualization, and simulated models of cognitive and perceptual processes.

Restriction: Psychology Majors have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment.

**PSYCH 119. Special Topics in Research Methodologies. 1-4 Units.**

Studies in selected areas of research methodologies. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 120A. Abnormal Psychology. 4 Units.**

Introduction to psychopathology and behavioral deviations, and the concepts of theories regarding these conditions.

Prerequisite: PSYCH 7A or PSCI 9 or PSYCH 9C or PSCI 11C

Overlaps with PSCI 102C.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 120D. Developmental Psychology. 4 Units.**

A general introduction to the study of the physical, intellectual, social, and emotional development of the child from birth to adulthood.

Prerequisite: PSYCH 7A or PSCI 9 or PSYCH 9A or PSCI 11A

Overlaps with PSCI 111D.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Nursing Science Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 120H. History of Psychology. 4 Units.**

A history of the development of various schools and systems of psychological thought.

Prerequisite: (PSYCH 7A or PSCI 9) or (PSYCH 9A or PSCI 11A) and (PSYCH 9B or PSCI 11B) and (PSYCH 9C or PSCI 11C)

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 120P. Personality Theories. 4 Units.**

A survey of the evolution of personality theory during this century. An overview of major perspectives in the field, with special attention to Freud, Jung, and Adler.

Prerequisite: PSYCH 7A or PSCI 9 or PSYCH 9C or PSCI 11C

Overlaps with PSCI 170S.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 121M. Theories of Motivation. 4 Units.**

Factors affecting the behavioral performance of organisms. A survey of theoretical and empirical approaches to the physiological, psychological, and social factors which generate behavior.

Prerequisite: (PSYCH 7A or PSCI 9) or (PSYCH 9A or PSCI 11A) and (PSYCH 9B or PSCI 11B) and (PSYCH 9C or PSCI 11C)

Overlaps with PSCI 176S.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 121P. Positive Psychology. 4 Units.**

Positive psychology, at the subjective level, is about valued subjective experiences; at the individual level, it is about positive individual traits; and at the group level, it is about the civic virtues and institutions that move individuals toward better citizenship.

Prerequisite: (PSYCH 9A or PSCI 11A) and (PSYCH 9B or PSCI 11B) and (PSYCH 9C or PSCI 11C)

Overlaps with PSY BEH 184S.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 121S. Psychology of Sleep and Consciousness. 4 Units.**

Covers the physiology, neurochemistry, and neuroanatomy associated with sleep, contemporary sleep theory, REM and NREM, phenomenology, sleep disorders, examination of differences between conscious and unconscious cognitive function, the history of sleep and dream theories from ancient time to present day.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 122C. Clinical Psychology. 4 Units.**

Provides overview of the clinical psychology field including theories and techniques used in counseling and testing.

Overlaps with PSY BEH 150C.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 122I. Organizational/Industrial Psychology. 4 Units.**

Introduction to applied psychology in organizations, including personnel testing, selection, training and evaluation, job and classification analysis, job satisfaction and motivation, organizational development, leadership, market research, and consumer psychology. Potential ethical problems are discussed.

Prerequisite: (PSYCH 7A or PSY BEH 9) or (PSYCH 9A or PSY BEH 11A) or (PSYCH 9B or PSY BEH 11B) or (PSYCH 9C or PSY BEH 11C)

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 122P. Clinical Psychophysiology. 4 Units.**

Psychophysiology investigates the relationships between physiological processes and psychological phenomena. Technologies examined include reaction times, heart rate variability, EEGs, ERPs, magnetoencephalography, and eye tracking. Applications include diagnosis, the longitudinal assessment, and the identification of individuals at risk of disease onset.

Prerequisite: BIO SCI N110 or BIO SCI N115A or PSYCH 9A or PSCI 11A

Same as BIO SCI N118.

**(II ).**

**PSYCH 123P. Topics in Philosophy of Psychology. 4 Units.**

Selected topics in the philosophy of psychology, e.g., the nature of psychological explanation, reductionism, issues in cognitive, behavioral, and neuroscience.

Repeatability: Unlimited as topics vary.

Same as LPS 143, PHILOS 143.

Restriction: Psychology Majors have first consideration for enrollment. Philosophy Majors have first consideration for enrollment.

**PSYCH 124S. Sports Psychology. 4 Units.**

Discusses the field of sports psychology with an emphasis on clinical practice including motivation, goal setting, performance skills, and mental skills. Discusses and utilizes a wide range of techniques designed to enhance performance and manage problems among athletes.

Prerequisite: (PSYCH 7A or PSY BEH 9) or (PSYCH 9C or PSY BEH 11C)

Overlaps with PSY BEH 139H.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 124V. Psychology of Violence. 4 Units.**

Discusses the psychology of violence and aggression with an emphasis on understanding the psychological, social, and physiological roots of violent and aggressive behavior. Psychological treatment techniques and strategies for prevention of aggressive and violent behavior are also discussed.

Prerequisite: (PSYCH 7A or PSY BEH 9) or (PSYCH 9C or PSY BEH 11C)

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 129. Special Topics in General Psychology. 4 Units.**

Studies in selected areas of general psychology. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 130A. Perception and Sensory Processes. 4 Units.**

A general introduction to the scientific study of sensory processes and perceptual phenomena, with special emphasis in the visual systems.

Prerequisite: (PSYCH 7A or PSY BEH 9) or (PSYCH 9A or PSY BEH 11A)

Overlaps with PSYCH 131A, PSYCH 131B.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 131A. Vision. 4 Units.**

Visual perception and the anatomy and physiology of the visual system. Topics include the retina and the visual pathway; visual sensitivity; color vision; spatial vision; motion perception; and the development of the visual system.

Same as BIO SCI N182.

Overlaps with PSYCH 130A.

Restriction: Upper-division students only. Psychology Majors have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment. School of Biological Sciences students have first consideration for enrollment.

**PSYCH 131B. Hearing. 4 Units.**

Auditory perception, the anatomy and physiology of the auditory system, and the physics of sound. Topics include neural transduction of sound, sensitivity, sound localization, complex sound perception, and hearing loss.

Prerequisite: (PSYCH 9A or PSY BEH 11A) and (PSYCH 9B or PSY BEH 11B)

Overlaps with PSYCH 130A.

Restriction: Psychology Majors have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment.

**PSYCH 135M. The Mind/Body Problem. 4 Units.**

What is consciousness and what is matter and how are the two related? How can brains have minds? This multidisciplinary course draws on information from the fields of computer vision, artificial intelligence, cognition, neurophysiology, philosophy, and psychophysics.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 139. Special Topics in Perception and Sensory Processes. 4 Units.**

Studies in selected areas of perception and sensory processes. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 140C. Cognitive Science. 4 Units.**

Introduction to the investigations of the structure and function of the mind, from viewpoints of computation, neuroscience, philosophy, and cognitive psychology. Topics include perception, attention, knowledge representations, learning and memory, action, reasoning, and language.

Prerequisite: (PSYCH 7A or PSY BEH 9) and (PSYCH 9A or PSY BEH 11A) and (PSYCH 9B or PSY BEH 11B)

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 140L. Principles of Learning Theory. 4 Units.**

Investigation of the learning and memory processes of human and animals. Basic experimental approaches to learning and memory, empirical results, and theoretical interpretations of the evidence are discussed.

Prerequisite: (PSYCH 7A or PSY BEH 9) or (PSYCH 9A or PSY BEH 11A)

Restriction: Psychology Majors have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment.

**PSYCH 140M. Human Memory. 4 Units.**

Developments in the area of memory; history of memory research; theories of the nature of memory. Visual memory, recognition memory, high-speed scanning, free recall, short-term memory, mnemonics, retrieval, relationship of memory to thinking. Selected theoretical formulations for memory.

Prerequisite: (PSYCH 7A or PSY BEH 9) or (PSYCH 9B or PSY BEH 11B)

Restriction: Psychology Majors have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment.

**PSYCH 143P. Human Problem Solving. 4 Units.**

Modern developments in the psychology of human problem solving. Topics include concept identification, arithmetic, sets, logic puzzles, story problems, group problem solving, and theorem proving.

Prerequisite: (PSYCH 7A or PSY BEH 9) or (PSYCH 9B or PSY BEH 11B)

Restriction: Psychology Majors have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment.

**PSYCH 146MW. Writing about Memory. 4 Units.**

Covers a broad range of texts, literary, philosophical, and scientific, each probing the nature of memory and its meaning in human life. Readings are drawn from across many disciplines and many perspectives.

Prerequisite: PSYCH 7A or PSYCH 9B or PSY BEH 9 or PSY BEH 11B. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Psychology Majors have first consideration for enrollment.

**(Ib)****PSYCH 149. Special Topics in Cognition and Learning. 4 Units.**

Studies in selected areas of cognition and learning. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 150. Psychology of Language. 4 Units.**

Examines language using the tools of experimental psychology. From sounds to words to spoken and written sentences, explores how language is used in real time, and how its use reveals how it is represented in the mind.

Prerequisite: PSYCH 7A or PSCI 9 or PSYCH 9B or PSCI 11B or LSCI 3

Same as LSCI 155.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Language Science Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 156A. Acquisition of Language II. 4 Units.**

Focuses on native language learning, exploring the way in which infants and very young children unconsciously uncover the rich systematic knowledge of their native language. Examines both experimental and computational studies that quantitatively investigate the 'how' of language acquisition.

Prerequisite: PSYCH 56L or LINGUIS 51

Same as LINGUIS 150.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 157M. Computational Methods for Language Research. 4 Units.**

Focuses on computational methods useful for language research. Students become familiar with software and programming languages used for extracting information from electronic datasets and for creating basic simulations of linguistic cognition. No prior programming experience assumed.

Prerequisite: PSYCH 150 or LSCI 155 or PSYCH 156A or LSCI 151

Same as PSYCH 157M.

**PSYCH 159. Special Topics in Language. 4 Units.**

Studies in selected areas of language sciences. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 160A. Introduction to Cognitive Neuroscience. 4 Units.**

Introduction to the neural basis of human perceptual, motor, and cognitive abilities. Topics include sensory perception, motor control, memory, language, attention, emotion, frontal lobe function, functional brain imaging, and neuropsychological disorders.

Prerequisite: (PSYCH 7A or PSY BEH 9) and (PSYCH 9A or PSY BEH 11A) and (PSYCH 9B or PSY BEH 11B)

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 160D. Brain Disorders and Behavior. 4 Units.**

Examines the localization of human brain functions and the effects of neurological disorders on psychological functions such as perception, motor control, language, memory, and decision-making.

Prerequisite: (PSYCH 7A or PSY BEH 9) and (PSYCH 9A or PSY BEH 11A) and (PSYCH 9B or PSY BEH 11B) or BIO SCI 35 or BIO SCI N110

Same as BIO SCI N165.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Biological Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 160H. History of Cognitive Neuroscience. 4 Units.**

Studies of the human mind from ancient cultures to the innovation of modern methods of brain imaging. Logic of valid and invalid brain hypothesis are examined. Recurring theme is the competition between holistic and localized views of brain function.

Prerequisite: PSYCH 9A or PSY BEH 11A or PSYCH 7A or PSY BEH 9

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 161. Language and the Brain . 4 Units.**

Research analysis on biological bases of human linguistic capacity. Development, focusing on hemispheric specialization, plasticity; localization of specific linguistic functions in adults, with emphasis on study of aphasias; relation of linguistic capacity to general cognitive capacity, considering research on retardation.

Prerequisite: (PSYCH 7A or PSY BEH 9 or PSYCH 9A or PSY BEH 11A) and (PSYCH 9B or PSY BEH 11B or BIO SCI 35 or BIO SCI N110 or BIO SCI N115A)

Same as BIO SCI N160, LSCI 158.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Biological Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 161H. Hearing and the Brain. 4 Units.**

An overview of brain mechanisms of hearing, including perception of simple sounds, speech, and music. Begins with sound itself, and looks at processing by the ear, auditory pathways, auditory cortex, and beyond. Also auditory development, learning, and clinical issues.

Prerequisite: PSYCH 160A or BIO SCI 93 or BIO SCI H93

Same as BIO SCI N147.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Biological Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 162N. Human Neuropsychology. 4 Units.**

A survey of human brain disorders using a clinical case study approach to illustrate fundamental issues in studying brain and behavior. Topics include sensory deficits, attentional neglect, amnesia, cortical organization, clinical psychopathology, and more.

Prerequisite: BIO SCI N110 or BIO SCI N115A or PSYCH 9A or PSCI 11A

Same as BIO SCI N173, PSCI 163C.

Restriction: School of Biological Sciences students have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 169. Special Topics in Cognitive Neuroscience . 4 Units.**

Studies in selected areas of cognitive neuroscience. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 173A. Psychological Anthropology. 4 Units.**

Cultural differences and similarities in personality and behavior. Child-rearing practices and consequent adult personality characteristics, biocultural aspects of child development and attachment, culture and behavior evolutionary models, politically linked personality, cognitive anthropology, psychology of narrative forms, comparative national character studies.

Prerequisite: ANTHRO 2A or PSYCH 7A or (PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C)

Same as ANTHRO 132A.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 174E. African American Psychology. 4 Units.**

Historical overview of the development of black psychology and the African American frame of reference. Topics include personality development, psychological assessment, issues in education, black mental health, and the role of the African American psychologist in the community.

Same as AFAM 153.

**PSYCH 174H. Chicano/Latino Families. 4 Units.**

Introduction to the research, literature, and issues surrounding the topic of Chicano/Latino families including cultural history, contemporary issues, organization of family, traditions, lifestyles, values, beliefs, generational differences, gender issues, ethnic identity, evolution of demographic patterns, current economic and political standings.

Same as CHC/LAT 170, PSCI 166S, SOC SCI 165.

**PSYCH 176A. Political Psychology. 4 Units.**

Examination of how psychological theory and research may be used to better understand political thought and behavior. Drawing on theories of learning, cognition, and personality, discusses such topics as the formation of political attitudes, and the process of political decision-making.

Same as POL SCI 128C.

Restriction: Majors only. POL SCI 128C may not be taken for credit if taken after POL SCI 137C.

**PSYCH 177D. Deviance. 4 Units.**

Perspectives on deviance and criminality in behavior, institution, community, and myth. The suitability of contemporary theories of deviant behavior.

Same as SOCIOL 156, CRM/LAW C107.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 177F. Forensic Psychology: Advanced Seminar. 4 Units.**

Focuses on the psychology of criminal offending, particularly violent behavior. Examines violence, sexual offending, and mental disorder related to crime with regard to clinical assessment and treatment; mental health services within forensic institutions.

Prerequisite: (PSCI 9 or PSCI 11C or PSYCH 7A or PSYCH 9C) and PSCI 102C and (PSCI 178S or CRM/LAW C149)

Same as CRM/LAW C136, PSCI 156C.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSYCH 178N. Social Psychology of Networks. 4 Units.**

Review of network methods used in small group and organizational research. Discussion of social psychological literature relevant to the network of study of cognitive social structure, exchange/communication, identity negotiation, and social control. Case study of network datasets exemplifies research issues.

Same as SOCIOL 135.

Restriction: Sociology Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 179. Special Topics in Interdisciplinary Studies. 1-4 Units.**

Studies in selected areas of interdisciplinary studies. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 198. Directed Group Study. 1-4 Units.**

Directed study with Cognitive Sciences faculty.

Repeatability: May be repeated for credit unlimited times.

**PSYCH 199. Independent Study. 1-4 Units.**

Independent research with Cognitive Sciences faculty.

**PSYCH 201A. Cognitive Sciences Research Seminar. 1.3 Unit.**

Weekly reports and colloquia by faculty, students, and visitors.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Psychology Majors only.

**PSYCH 201B. Cognitive Sciences Research Seminar. 1.3 Unit.**

Weekly reports and colloquia by faculty, students, and visitors.

Prerequisite: PSYCH 201A

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Psychology Majors only.

**PSYCH 201C. Cognitive Sciences Research Seminar. 1.4 Unit.**

Weekly reports and colloquia by faculty, students, and visitors.

Prerequisite: PSYCH 201B

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Psychology Majors only.

**PSYCH 202A. Proseminar in the Cognitive Sciences. 1 Unit.**

Introduction to the conceptual foundations and basic research results in the cognitive sciences for first-year graduate students.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**PSYCH 203A. Discrete Mathematics and Probability. 4 Units.**

Logic and set theory are covered during the first three weeks, using an interactive computer system. The remaining seven weeks are devoted to probability theory and cover elementary concepts from samples spaces to Chebychev's Inequality and the moment generating function.

Restriction: Graduate students only.

**PSYCH 203C. Algorithmic Statistics. 4 Units.**

Discussion of the fundamentals of statistical inference and computational implementations of common statistical models.

Restriction: Graduate students only.

**PSYCH 203D. Applied Mathematics for Cognitive Sciences Research. 4 Units.**

Covers the basics of linear systems analysis, focusing on linear algebra, Fourier analysis, differential equations, and elementary signal processing. Applications in Cognitive Science and Cognitive Neuroscience research will be developed.

Prerequisite: PSYCH 205A

Restriction: Graduate students only. Psychology Majors only.

**PSYCH 205A. Computational and Research Methods with MATLAB. 4 Units.**

Introduces rudiments of programming, statistical analysis and probability theory, graphic visualization, GUI design, spectral analysis, and simulation models using MATLAB, a software package for solving quantitative problems often encountered in experimental psychology.

Restriction: Graduate students only.

**PSYCH 205B. Running Experiments Using MATLAB. 4 Units.**

Provides an in-depth introduction to writing MATLAB programs to run auditory and visual experiments. Topics covered include program structure, stimulus generation, presentation, and data collection.

Prerequisite: PSYCH 205A

**PSYCH 205C. Computational Statistics. 4 Units.**

Introduction to a number of computational statistics approaches including exploratory data analysis and modeling using a probabilistic framework with Bayesian graphical models. Emphasis will be on in-class programming using MATLAB.

Restriction: Graduate students only.

**PSYCH 210A. Introduction to Cognitive and Brain Sciences I: Perception. 4 Units.**

Discusses models of cognition and evidence linking cognition and the brain. Focus is on visual, auditory, and somatic perception and bottom-up mechanisms of attention.

Restriction: Graduate students only.

**PSYCH 210B. Introduction to Cognitive and Brain Sciences II: Cognition. 4 Units.**

Discusses models of cognition and evidence linking cognition and the brain. Focus is on emotion, top-down attention, goal-directed behavior, categorization, judgment, and decision-making.

Restriction: Graduate students only.

**PSYCH 210C. Introduction to Cognitive and Brain Sciences III: Learning and Development. 4 Units.**

Discusses experimental data, formal models of learning, and evidence linking learning and development to its neural substrates. Topics include Pavlovian and instrumental conditioning, language acquisition, causal reasoning, perceptual learning, category formation, and structure learning.

Restriction: Graduate students only.

**PSYCH 213. The Mind/Body Problem. 4 Units.**

Course is multidisciplinary, drawing on information from the fields of quantum physics, computer vision, artificial intelligence, cognition, neurophysiology, philosophy, and psychophysics.

Restriction: Graduate students only.

**PSYCH 214. Bayesian Cognitive Modeling. 4 Units.**

Considers a range of statistical methods of data analysis and simple cognitive models using the Bayesian graphical modeling framework.

Restriction: Graduate students only.

**PSYCH 218. Hearing. 4 Units.**

Examines auditory sensation and perception using psychophysical and neuroscientific perspectives. Covers physical aspects of sound; subcortical auditory processing; aspects of sensation and perception such as sensitivity, sound localization, and complex-sound recognition; neuroscientific studies of cortical function; and abnormal auditory processing.

Restriction: Graduate students only.

**PSYCH 229. Special Topics in Human Cognition. 1.3-4 Units.**

Current research in brain/ behavior relationships, human memory, and learning theory is presented.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PSYCH 231P. Topics in Philosophy of Psychology. 4 Units.**

Selected topics in the philosophy of psychology, e.g., the nature of psychological explanation, reductionism, issues in cognitive, behavioral, and neuroscience.

Repeatability: Unlimited as topics vary.

Same as LPS 243, PHILOS 243.

**PSYCH 234A. Mathematical Models of Cognitive Processes I . 4 Units.**

Mathematical models of various cognitive processes developed since 1960, including learning, memory, perception, psycholinguistics, and problem solving. Models are formulated in different mathematical languages: calculus, algebra, logic, probability, and computer. Difficulties in testing and validating models discussed.

Restriction: Graduate students only.

**PSYCH 237. Advanced Bayesian Cognitive Modeling. 4 Units.**

Considers a range of advanced cognitive process models including models of signal detection, memory retention, category learning, stimulus representation, and reasoning using the Bayesian graphical modeling framework.

Prerequisite: PSYCH 214

Restriction: Graduate students only.

**PSYCH 239. Special Topics in Methodology and Models. 1.3-4 Units.**

Current research in cognitive sciences methodologies, concepts, and models is presented.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PSYCH 245A. Computational Models of Language Learning. 4 Units.**

Focuses on computational models of native language learning, exploring how probabilistic learning and inference fare on difficult case studies within language acquisition. In all cases, grounds the learning models in available empirical data and considers their psychological plausibility.

Prerequisite: PSYCH 215L

Restriction: Graduate students only.

**PSYCH 245M. Computational Models of Language Learning. 4 Units.**

Focuses on computational models of native language learning, exploring how probabilistic learning and inference fare on difficult case studies within language acquisition. In all cases, grounds the learning models in available empirical data and considers their psychological plausibility.

Prerequisite: LSCI 251. LSCI 251 with a grade of B- or better

Same as LSCI 206C.

Restriction: Graduate students only.

Concurrent with LSCI 106M.

**PSYCH 249. Special Topics in Language Science. 1.3-4 Units.**

Foundations and current research in theoretical, experimental, and computational linguistics.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PSYCH 259. Special Topics in Human Performance. 1.3-4 Units.**

Current research in the human issues involved with sensation, perception, and cognition.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PSYCH 261N. Cortical Neuroscience. 4 Units.**

Physiology of the cerebral cortex, theoretical neuroscience, and the neural basis of perception.

Prerequisite: PSYCH 216

**PSYCH 262. Functional Neuroanatomy. 4 Units.**

It is impossible to truly understand human behavior without some understanding of the physical structure that enables behavior. Examines recent findings in functional neuroanatomy through lectures and papers discussing links between particular behaviors and specific brain structures.

Restriction: Graduate students only.

**PSYCH 265. Introduction to Functional MRI. 4 Units.**

Describes the fundamentals of imaging the human brain function using functional Magnetic Resonance Imaging (fMRI). Topics include basic fMRI physics, experimental design, and data acquisition and analysis.

Restriction: Graduate students only.

**PSYCH 268A. Computational Neuroscience. 4 Units.**

Introduction to computational neuroscience. Mathematical models of single neurons, neural circuits, thalamocortical systems, and cortical mass action can stimulate single-unit, local field potential, and EEG dynamics. These models are used to investigate mechanisms of sensation, motor control, attention, and consciousness.

Prerequisite: PSYCH 205A and (PSYCH 210A or PSYCH 210B or PSYCH 210C)

**PSYCH 268R. Cognitive Robotics. 4 Units.**

Introduces concepts for studying cognitive function by embedding brain models on robotic platforms. Topics include robot construction, computer programming, and the notion of embodiment. Students construct simple robots and program these robots to perform different behaviors.

**PSYCH 269. Special Topics in Cognitive Neuroscience. 1.3-4 Units.**

Current research in cognitive neuroscience.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PSYCH 289. Special Topics in Sensation and Perception. 1.3-4 Units.**

Current research in the reception and processing of visual and auditory stimuli presented.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PSYCH 290. Dissertation Research. 1-12 Units.**

Dissertation research with Cognitive Science faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Psychology Majors only.

**PSYCH 299. Individual Study. 4-12 Units.**

Individual research with Cognitive Science faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**Social Sciences Courses****SOC SCI 1A. Principles in the Social Sciences. 4 Units.**

Introduction to various disciplines within the social sciences. Provides an interdisciplinary perspective on understanding human behavior and social institutions, including interpersonal, economic, and cultural activities.

(III)

**SOC SCI H1E. Honors: Critical Issues on the Social Sciences. 6 Units.**

Major themes, methods, and works in the social sciences from an interdisciplinary perspective. Each quarter focuses on a different topic. Weekly seminars emphasizing development of critical thinking skills and quantitative analysis through written work are integral to the course.

Same as SOCECOL H20A.

Restriction: Campuswide Honors Collegium students only.

(III)

**SOC SCI H1F. Honors: Critical Issues on the Social Sciences. 6 Units.**

Major themes, methods, and works in the social sciences from an interdisciplinary perspective. Each quarter focuses on a different topic. Weekly seminars emphasizing development of critical thinking skills and quantitative analysis through written work are integral to the course.

Prerequisite: SOC SCI H1E or SOCECOL H20A

Same as SOCECOL H20B.

Restriction: Campuswide Honors Collegium students only.

(III)

**SOC SCI H1G. Honors: Critical Issues on the Social Sciences. 6 Units.**

Major themes, methods, and works in the social sciences from an interdisciplinary perspective. Each quarter focuses on a different topic. Weekly seminars emphasizing development of critical thinking skills and quantitative analysis through written work are integral to the course.

Prerequisite: SOC SCI H1F or SOCECOL H20B

Same as SOCECOL H20C.

Restriction: Campuswide Honors Collegium students only.

(III)

**SOC SCI 2A. Introduction to Social Science Analysis. 4 Units.**

Introduction to social science research and analytical models. Theory construction and use of research methods in an interdisciplinary context. Discussion of the application of social science research to public policy. Computer laboratories develop creative thinking, graphing, and data presentation skills.

Restriction: School of Social Sciences students have first consideration for enrollment.

(III)

**SOC SCI 3A. Computer-Based Research in the Social Sciences. 4 Units.**

Focuses on the data manipulation, data visualization, and information searching techniques. Hands-on experience in hypothesis testing, mapping, graphics, and data arrays.

Restriction: School of Social Sciences students have first consideration for enrollment.

**SOC SCI 4A. Introduction to Global Studies. 4 Units.**

Ongoing historical processes that increase global integration, the social, economic, and political interdependence of different regions, cultures, and peoples. Topics include ancient empires, colonialism, nationalism, industrialization, modern imperialism and warfare, decolonization, global social movements, conflict, inequality, and global governance.

Same as INTL ST 1.

Restriction: International Studies Majors have first consideration for enrollment.

(III and VIII ).

**SOC SCI 5A. Introduction to Human Geography. 4 Units.**

Human behavior in a geographical context. Spatial patterns and organization of the cultural, social, and economic activities of man as imposed on and influenced by the earth's physical setting.

(III)

**SOC SCI 5B. Introduction to Physical Geography. 4 Units.**

An introduction to the physical world we live in. Distribution and dynamics of the earth's air, water, and solid crust. Concepts and principles from climatology and geology. Selected examples from North America and beyond.

**SOC SCI 5D. US & World Geography. 4 Units.**

Survey of general geographical principles and facts on a world scale, as well as introduction to the broad regional and resource geography of the U.S., emphasizing in particular the interactions of physical and cultural factors.

(III, VIII)

**SOC SCI 10A. Probability and Statistics in Social Sciences I. 4 Units.**

Introduction to the variety of statistical applications in the social sciences. Descriptive statistics. Measures of central tendency and dispersion. Percentile ranks. Standardization and normal approximation. Basic probability theory focuses on application to statistical inference and binomial distribution. Laboratory required.

Corequisite: SOC SCI 3A

Prerequisite: SOC SCI 3A

Overlaps with PSYCH 10A, SOCECOL 13, POL SCI 10A, SOCIOL 10A, ECON 15A.

Restriction: Lower-division students only. Social Science Majors have first consideration for enrollment. SOC SCI 10A may not be taken for credit if taken after or concurrently with ECON 15A.

(Va)

**SOC SCI 10B. Probability and Statistics in Social Sciences II. 4 Units.**

Introduction to statistical inference, sampling distribution, standard error. Hypothesis tests for proportions and means. Inferential techniques for nominal variables including chi-square, study measures of strengths, significance of relationships between variables, assumptions, data requirements, and types of error in significance tests.

Prerequisite: SOC SCI 10A

Overlaps with ANTHRO 10B, POL SCI 10B, SOCECOL 13, SOCIOL 10B, PSYCH 10B.

Restriction: School of Social Sciences students have first consideration for enrollment.

(Va)

**SOC SCI 10C. Probability and Statistics in Social Sciences III. 4 Units.**

Focus on correlation, regression, and control for effects of variables. One-way and two-way factorial analysis of variance. A priori and a posteriori comparisons. Introduction to repeated measures design and non-parametric statistics. Discuss use of statistics in newspapers and popular magazines.

Prerequisite: SOC SCI 10B

Overlaps with ANTHRO 10C, POL SCI 10C, PSYCH 10C, SOCECOL 13, SOCIOL 10C.

Restriction: School of Social Sciences students have first consideration for enrollment.

(Vb)

**SOC SCI 11A. Barter to Bitcoin: Society, Technology and the Future of Money. 4 Units.**

Digital money has captured the broad imagination of speculators, coders, regulators, criminals and the mass media. Course puts this change in context: how do we understand money as a social, political and technological phenomenon?.

Same as IN4MATX 12.

(II and III ).

**SOC SCI 12. Global Political Ideologies. 4 Units.**

An overview of the major political ideologies shaping the current world order and global conflict. Topics include liberalism, democracy, nationalism, capitalism, communism, socialism, fascism, neoliberalism, clash of civilizations, sectarian violence, populist nationalism, and de-globalization.

Same as POL SCI 44B, INTL ST 12.

Restriction: International Studies Majors have first consideration for enrollment.

(III and VIII ).

**SOC SCI 15. Global Political Economy. 4 Units.**

The global economy as an integrated system. The rise of world trade, capitalism, national economies, market cycles, competing economic ideologies, development, globalization, transnational labor, multinational corporations, and the role of UN, World Bank, WTO, and the IMF in global governance.

Same as INTL ST 15.

Restriction: International Studies Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment.

(III and VIII ).

**SOC SCI 16. Human Rights and Global Governance. 4 Units.**

Historical development of civil, political rights and the rise of human rights in international law. Explores role, and limitations, of the UN, ICJ, and ICC in global governance. Reconceptualizing democracy and political representation in a postnational 21st century.

Same as POL SCI 45A, INTL ST 16.

Restriction: International Studies Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment.

(III and VIII ).

**SOC SCI 17. Global Environmental Issues. 4 Units.**

Examines problems such as global climate change, growing human populations, fisheries depletion, ocean acidification, biodiversity loss, deforestation, and food security. Introduces political, social, and economic factors contributing to environmental issues and their disproportional impacts on the world's poor and minorities.

Same as INTL ST 17.

Restriction: International Studies Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment.

(III and VIII ).

**SOC SCI 20. Model United Nations. 2 Units.**

Focuses on simulations of the foreign policy pursuits of selected countries in the international community. Emphasis placed on understanding the rules of debate, as well as the policy positions of the student's selected country in the United Nations.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 6 times.

**SOC SCI H30D. Social Science Perspectives on the Sustainability of Societies. 4 Units.**

Introduces the perspectives of social science using examples from different countries to explore how social issues regarding sustainability are influenced by a society's changing economic and political institutions, and how economic, political, and other social choices affect their sustainability.

Prerequisite: EARTHSS H30C. EARTHSS H30C with a grade of C or better

Restriction: Campuswide Honors Collegium students only.

(III)

**SOC SCI 40. Social Policy and Public Service. 4 Units.**

An introduction to the basic theories and principles of public policy. Students examine various influences on the development of public policy and the principle actors in the process, and learn to identify tools and techniques employed in policy making.

Same as SPPS 40.

(III)

**SOC SCI 66. Introduction to Gangs . 4 Units.**

Introduces students to street gang subculture and explores risk factors associated with gang membership. Students develop a working definition for street gang and understand the difference between social and legal definitions. Also explores the connection between prison and street gangs.

**SOC SCI 70C. Comparing Cultures. 4 Units.**

Introduces students to the scope of cross-cultural comparisons by analyzing the theories, methodologies, and facts utilized by anthropologists, sociologists, social psychologists, political scientists, and historians in comparing cultures.

(III, VII)

**SOC SCI 78A. Asian American Histories. 4 Units.**

Examines and compares diverse experiences of major Asian American groups since the mid-nineteenth century. Topics include origins of emigration; the formation and transformation of community; gender and family life; changing roles of Asian Americans in American society. Formerly ASIANAM 60A.

Same as ASIANAM 50, HISTORY 15C.

((III or IV) and VII ).

**SOC SCI 78B. Asian American Communities. 4 Units.**

Examines the renewal of Asian immigration following World War II. Explores contemporary Asian American populations and communities in the U.S., and the impact of contemporary Asian immigration on the U.S. political economy and social order.

Same as ASIANAM 52.

(III, VII)

**SOC SCI 78C. Asian Americans and Race . 4 Units.**

Analyzes the Asian American experience in comparative perspective, which includes comparisons of different ethnic and racial groups, and across gender and class. Possible topics include labor, economy, politics, migration, nation, popular culture, gender, family, sexuality, and multiraciality.

Same as ASIANAM 53.

(III, VII)

**SOC SCI 89. Special Topics in Social Sciences. 2-4 Units.**

Studies in selected areas of Social Sciences. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**SOC SCI 102A. Introduction to Geographic Information Systems in Social Sciences. 4 Units.**

Hands-on laboratory course introduces students to the fundamentals of Geographic Information Systems (GIS) technology using social science applications. Students learn to organize, manipulate, and display spatial data leading to the design of their own GIS research project.

Restriction: School of Social Sciences students have first consideration for enrollment.

**SOC SCI 102B. Intermediate Geographic Information Systems in Social Sciences. 4 Units.**

Expands Geographic Information Systems (GIS) skills to more advanced theories and concepts in the spatial analysis of social science issues and particularly to analyzing and interpreting spatial data. Students develop and complete a GIS research project of their own choosing.

Prerequisite: SOC SCI 102A

Restriction: School of Social Sciences students have first consideration for enrollment.

**SOC SCI 103A. Game Theory and Politics I. 4 Units.**

Introduction to game theory and a survey of its political applications. Examples of topics covered include voting in small committees, legislatures, and mass elections; interest group activities and environmental issues; institutional design, and the evolution of cooperative behavior.

Same as SOCIOL 134, POL SCI 130A.

Restriction: Social Policy/Public Service Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**SOC SCI 103B. Game Theory and Politics II. 4 Units.**

More advanced game theory and its political applications, beginning where Game Theory and Politics I ends. Examples of topics covered include revolutions; arms race; spatial models of party competition; political manipulation; political coalitions and their power.

Prerequisite: POL SCI 130A or ECON 116A

Same as POL SCI 130B.

Restriction: Social Policy/Public Service Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**SOC SCI 115D. International Business. 4 Units.**

Introduction to conducting business in the international arena, decision making in the organization, and globalization of markets and production. Topics covered range from tax and finance to ethics, marketing, and more. Continuing corporate regulatory scandals discussed.

Same as INTL ST 112A.

**SOC SCI 119. Special Topics in Geography. 4 Units.**

Studies in selected areas of geography. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**SOC SCI 120. Transnational Gangs. 4 Units.**

Examines the internationalization of U.S. domestic street gangs. The relationship between California gangs Mara Salvatrucha and 18th Street and Mexico/Central American gangs is assessed. Specified topics include: mobilization, migration, territorialism, culture, organization, and use of technology.

Same as INTL ST 130.

Overlaps with SOC SCI XI120, INTL ST XI130.

**SOC SCI 121T. Voting and Political Manipulation. 4 Units.**

Introduction to social choice and cooperative games. Topics include majority rule, types of voting methods, apportionment and proportional representation, agenda manipulation, coalition formation, voting power, political consequences of electoral laws.

Same as INTL ST 156A, POL SCI 151H, ECON 154.

Restriction: International Studies Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**SOC SCI 132. Veterans in History and Society. 4 Units.**

Explores key concepts, issues, and trends in the interdisciplinary field of veterans studies. Students gain a deep understanding of the ways that social scientists and historians have analyzed the identities, experiences, and worldviews of U.S. military veterans.

Same as HISTORY 149.

**SOC SCI 133. Veterans' Transitions. 4 Units.**

Provides veteran and non-veteran students with a comprehensive and academically rigorous overview of the ways and means through which diverse communities of veterans have made and continue to make the complex and multi-faceted transition from active military.

**SOC SCI 134W. Veterans' Voices. 4 Units.**

Uses the medium of academic writing to develop a broad understanding and appreciation for the wide range of worldviews, priorities, and values embodied in the creative production and activism of diverse U.S. military veterans.

(Ib)

**SOC SCI 152A. Non-Government Organization (NGO) Fundamentals. 4 Units.**

Introduction to non-governmental organizations, including their role in U.S. society and the international community. Explores varying definitions of NGOs and the characteristics held in common by all NGOs.

Same as INTL ST 152A.

**SOC SCI 152C. American Public Policy. 4 Units.**

Focuses on the development and implementation of public policy in the United States. Lectures cover theoretical models of the policy process as well as significant problems facing contemporary American decision-makers.

Same as PUBHLTH 132, POL SCI 121G, UPPP 129.

**SOC SCI 163A. Urban America . 4 Units.**

Students examine the historical, social, political, and economic factors that contributed to the construction of the American urban context, one that is poverty concentrated and racially/ethnically segregated. Students also critically assess the consequence of growing up in America's urban neighborhoods.

Same as CHC/LAT 162A, UPPP 104.

**SOC SCI 164B. Domestic Gangs. 4 Units.**

Examines the history and development of California street gangs and the role of historical events in that development. Students will be able to contrast and compare gang cohort behaviors between some of the major gangs in California.

Restriction: School of Social Sciences students have first consideration for enrollment.

**SOC SCI 164C. Prison Gangs. 4 Units.**

Examines the growth and spread of prison gangs throughout the country. Relationships between prison and street gangs, and possible relationships with foreign drug trafficking organizations studied. Violence examined as the standard to establish dominance in and out of prison.

Restriction: School of Social Sciences students have first consideration for enrollment.

**SOC SCI 164D. Juvenile Gangs. 4 Units.**

Examines risk factors that can be used to predict gang membership. Compares generational with non-generational gangs and develops a working sociological definition that can be used to identify street gangs. Myths about juveniles, street gangs.

Restriction: School of Social Sciences students have first consideration for enrollment.

**SOC SCI 165. Chicano/Latino Families. 4 Units.**

Introduction to the research, literature, and issues surrounding the topic of Chicano/Latino families including cultural history, contemporary issues, organization of family, traditions, lifestyles, values, beliefs, generational differences, gender issues, ethnic identity, evolution of demographic patterns, current economic and political standings.

Same as CHC/LAT 170, PSCI 166S, PSYCH 174H.

**SOC SCI 168B. Immigration and Inequality. 4 Units.**

Explores immigration, ethnicity, and inequality as interconnected social forces. International migration, propelled by global inequalities, plays a central role in the formation of multinational societies, shapes inter-group relations and patterns of ethnic inequality, and transforms the immigrants themselves.

Same as SOCIOL 166.

**SOC SCI 170A. Research Methods in the Social Sciences. 4 Units.**

Examines how interdisciplinary social science research questions are formulated and studies several research methods including: experimental method, quasi-experimental methods, survey research, field research, evaluation research, and meta-analysis. Parametric and non-parametric statistical methods are illustrated using the SPSS program.

Prerequisite: SOC SCI 1A and SOC SCI 2A and SOC SCI 3A and (SOC SCI 10A or STATS 7)

Restriction: Upper-division students only. School of Social Sciences students have first consideration for enrollment.

**SOC SCI 172AW. American Culture. 4 Units.**

A survey of the historical development of dominant American culture and society; emphasis on a close reading of key cultural texts, with weekly text as a model of writing, examining its use of language and rhetoric.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: School of Social Sciences students have first consideration for enrollment.

**(Ib)****SOC SCI 172D. Law in the Twenty-First Century. 4 Units.**

Examines the complex relationship between law, the social sciences, and modern society. Lectures explore such issues as the interplay between technology and constitutional rights, the impact of science on law, and the evolving roles of attorneys and judges.

Same as POL SCI 171F.

Restriction: Political Science Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment.

**SOC SCI 173L. Latinos in a Global Society. 4 Units.**

Examines interconnections between diverse Latino groups in the U.S. and the effects of globalization on their social, cultural, and political realities. Topics include immigration, demographics, socioeconomic differentiation, familial relations, political protest/resistance, law and policy, and links to 'homeland' issues.

Same as CHC/LAT 167.

**(VII)****SOC SCI 173N. Revolution in Latin America. 4 Units.**

Presents a comparative analysis of the causes, development, and consequences of selected revolutionary movements, focusing on outbreaks in Mexico, Bolivia, Cuba, Chile, Nicaragua, and Grenada. Explores topics of state formation, economic nationalism, social justice, ethnicity, and role of international affairs.

Same as CHC/LAT 151B, HISTORY 166D, INTL ST 177C.

**SOC SCI 177B. Asian American Women. 4 Units.**

Examines the representations and experiences of Asian American women from diverse perspectives. Explores the commonalities and differences among various groups of Asian American women, with particular focus on history, culture, values, and family roles.

Same as ASIANAM 162.

**SOC SCI 178C. Korean American Studies. 4 Units.**

Explores the factors that have distinctly shaped the Korean American experience, including patterns of racial domination, the profile of immigrant flow, immigrant roles in the urban political economy, politics in Korea, and the role of the church.

Same as ASIANAM 151C.

**SOC SCI 178D. Vietnamese American Studies. 4 Units.**

Studies the resettlement of Vietnamese in the United States following their exodus from Southeast Asia. Topics include the Vietnam War, the 1975 evacuation, boat and land refugees, the shaping of Vietnamese communities, and Vietnamese American literature.

Same as ASIANAM 151D.

**SOC SCI 178E. Japanese American Studies. 4 Units.**

Studies the settlement of Japanese in Hawaii and the continental United States since the late 19th century. Topics include sugar plantations, development of rural Japanese America, World War II internment, post-War community development, and persistence of Japanese American identity.

Same as ASIANAM 151E.

**SOC SCI 178F. South Asian American Studies. 4 Units.**

Examines and compares the experiences of South Asian immigrants in the U.S. over time. Looks at the economic, political, and social positions of the immigrants, with special emphasis on religious changes and the changes in the second and later generations.

Same as ASIANAM 151F.

Restriction: Asian American Studies Majors have first consideration for enrollment. Social Policy/Public Service Majors have first consideration for enrollment.

**SOC SCI 178H. Southeast Asian American Studies. 4 Units.**

Analyzes experiences of refugees and immigrants from Southeast Asia, which may include those from Cambodia, Laos, Vietnam, and the Philippines. Examines political and economic factors for their exodus and how they reconstruct their identities, histories, and communities.

Same as ASIANAM 151H.

**SOC SCI 178J. Chinese American Studies. 4 Units.**

Analyzes the experiences of Chinese in the United States. Immigration, Chinese exclusion, racial and gender identity. Historical overview and contemporary issues covered.

Same as ASIANAM 151J.

**SOC SCI 178K. Filipina/Filipino American Studies. 4 Units.**

Explores the experience of Filipina/Filipino Americans from the era of Spanish colonization of the Philippines to present-day community formations in the United States, with special emphasis on the 20th century. Topics include colonialism, nation, migration, gender, and culture.

Same as ASIANAM 151K.

**SOC SCI 179. Special Topics in Asian American Studies. 4 Units.**

Studies in selected areas of Asian American Studies. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**SOC SCI 181A. Ethical Leadership. 4 Units.**

Explores historical and contemporary theories of ethical and unethical leadership. Examines models of 'good leadership' such as cardinal and monastic virtues; and models of 'bad leadership,' such as Machiavelli's Prince. Explores the philosophies, styles, and accomplishments of leaders.

Restriction: School of Social Sciences students have first consideration for enrollment.

**SOC SCI 183A. Global and International Studies Forum. 4 Units.**

A faculty-student forum featuring lectures from a variety of institutions with discussion issues related to Global and International Studies.

Repeatability: May be taken for credit 4 times.

Same as SOCECOL 183A, INTL ST 183A.

**SOC SCI 183B. Seminar in Mediation. 4 Units.**

Student develop mediation skills and refine knowledge in the practice and theory of conflict resolution. Students who complete this course may serve as mediators in the Campus Mediation Program. Course is a prerequisite to completing Indep Study as an intern.

Same as INTL ST 183B, SOCECOL 183B.

Restriction: International Studies Majors have first consideration for enrollment. School of Humanities students have first consideration for enrollment. School of Social Ecology students have first consideration for enrollment. School of Social Sciences students have first consideration for enrollment.

**SOC SCI 183CW. Seminar Conflict Resolution. 4 Units.**

Designed for seniors who are pursuing the minor in Conflict Resolution and/or International Studies major. Provides a forum in which students will refine skills and theory in the study of cooperation and conflict, from local to global arenas.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as SOCECOL 183CW, INTL ST 183CW.

(Ib)

**SOC SCI 183E. Conflict Resolution in Cross-Cultural Perspective. 4 Units.**

Examines theories of conflict management. Analyzes how conflict is mitigated in diverse cultures: at the interpersonal level, between groups, and on the international scale. Students discuss readings, hear from conflict management practitioners, and simulate negotiations.

Same as ANTHRO 136D, POL SCI 154G, INTL ST 183E.

(VIII)

**SOC SCI 184A. Sage Leader Research I. 2 Units.**

Participants in the SAGE Scholars Program learn to define leadership concepts, discover various leadership styles, and develop strong leadership and communication skills resulting in strengthened ability to contribute to and interact with UCI and the Orange County community.

Grading Option: Pass/no pass only.

Restriction: SAGE Scholars Program students only.

**SOC SCI 184B. Sage Leader Research II. 4 Units.**

Provides a survey of contemporary topics and challenges in the fields of management and leadership. Case studies and text by leading authors are used to analyze key leadership issues in twenty-first century, with particular emphasis on current events.

Restriction: SAGE Scholars Program students only.

**SOC SCI 184GW. Media Writing. 4 Units.**

Designed to teach reporting and news writing basics. Students learn how to gather and organize information, ask effective questions, develop story ideas, research facts, and write stories on deadline.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Overlaps with INTL ST XI155B, SOC SCI XI184G.

Restriction: International Studies Majors have first consideration for enrollment.

**(Ib)**

**SOC SCI 185W. People in Society. 4 Units.**

Through readings about people in distinctly different societies throughout history, students learn concepts that cross the boundaries of the social science disciplines. Such themes as democracy, elitism, power, social class, and gender are the basis for discussion and writing.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: School of Social Sciences students only.

**(Ib)**

**SOC SCI 187. Twenty-First-Century Graduate Education. 2 Units.**

Graduate and professional education in twenty-first century United States. Examines strategies for admission to postbaccalaureate programs and success in graduate study culture. Introduction to processes including planning and preparation, school selection, entrance examination preparation, submission of applications, writing personal statements.

Grading Option: Pass/no pass only.

Restriction: Upper-division students only.

**SOC SCI 188A. Introduction to Contemporary Middle East Politics. 4 Units.**

An overview of basic issues that shape the politics of the Middle East and North Africa. Themes include implication of the colonization era, nation-state formation, inter-Arab relations, nationalism, Arab-Israel conflict, Islamic resurgence, and more.

Same as INTL ST 165, POL SCI 158D.

**SOC SCI 188K. Political Islam. 4 Units.**

Political Islam is a diverse phenomenon. While noticeable barriers exist to 'Islamist democracy,' it is the Islamists who will define the political future of much of the Muslim world. Reviews the experience of Saudi Arabia, Egypt, Pakistan, Turkey, and Indonesia.

Same as INTL ST 161A.

**SOC SCI 189. Special Topics in Social Sciences. 2-4 Units.**

Studies in selected areas of social sciences. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: School of Social Sciences students have first consideration for enrollment.

**SOC SCI H190A. Honors Research Workshop. 4 Units.**

Student develops a 10–15-page prospectus of research for the honors thesis which includes: the research question, literature review, methods of investigation, and bibliography. Student selects a faculty mentor who will supervise thesis research and writing in winter and spring.

Same as SPPS H190A.

Restriction: Social Science Majors only. Social Policy/Public Service Majors only. Social Science Honors students only.

**SOC SCI H190B. Honors Thesis Research. 4 Units.**

The student initiates and completes data collection for the honors thesis. A faculty mentor provides supervision and feedback on thesis chapters.

Prerequisite: SOC SCI H190A or SPPS H190A

Same as SPPS H190B.

**SOC SCI H190C. Honors Thesis. 4 Units.**

The student completes, with the approval of the faculty mentor, an honors thesis containing: statement of the problem, literature review, research hypotheses, methods of investigation, results, discussion, and bibliography.

Prerequisite: SOC SCI H190B or SPPS H190B. Satisfactory completion of the Lower-Division Writing requirement.

Same as SPPS H190C.

**(Ib)**

**SOC SCI 191. Graduate-Mentored Study in the Social Sciences. 4 Units.**

Offers a hands-on research experience while increasing awareness of the various disciplines in the social sciences and of the requirements of graduate school. Features graduate-mentored study under the supervision of the Associate Dean.

Prerequisite: Identification of a graduate student (who is in good standing) as a mentor.

Grading Option: Pass/no pass only.

**SOC SCI 193A. Field Studies in Social Policy and Public Service. 4 Units.**

Advanced training in qualitative and ethnographic research centered on community service. Students pursue field studies at nonprofit agencies (200 hours) to understand current social problems in underrepresented and underserved communities. Through field placement, students apply theory to practice.

Prerequisite: SOC SCI 70C or SOCIOL 63. Satisfactory completion of the Lower-Division Writing requirement.

Same as SPPS 193A.

Restriction: Social Policy/Public Service Majors only.

**SOC SCI 193B. Field Studies in Social Policy and Public Service. 4 Units.**

Advanced training in qualitative and ethnographic research centered on community service. Students pursue field studies at nonprofit agencies (200 hours) to understand current social problems in underrepresented and underserved communities. Through field placement, students apply theory to practice.

Prerequisite: SOC SCI 193A

Same as SPPS 193B.

**SOC SCI 193C. Field Studies in Social Policy and Public Service. 4 Units.**

Advanced training in qualitative and ethnographic research centered on community service. Students pursue field studies at nonprofit agencies (200 hours) to understand current social problems in underrepresented and underserved communities. Through field placement, students apply theory to practice.

Prerequisite: SOC SCI 193B

Same as SPPS 193C.

**SOC SCI 193CW. Field Studies in Social Policy and Public Service. 4 Units.**

Advanced training in qualitative and ethnographic research centered on community service. Students pursue field studies at nonprofit agencies (200 hours) to understand current social problems in underrepresented and under-served communities. Through field placement, students apply theory to practice.

Prerequisite: SOC SCI 193B

Same as SPPS 193CW.

Overlaps with SPPS 193C.

Restriction: Social Science Majors only.

**(Ib)**

**SOC SCI 194A. Public Service Internship. 2-4 Units.**

Introduces the role of etiquette and leadership in the professional environment. With a two-unit (50 hours) or four-unit (100 hours) credit option, students intern at a nonprofit agency exploring their roles as community leaders and improving their professional skills.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 8 units.

Restriction: Social Policy/Public Service Majors only.

**SOC SCI 194C. Management and Leadership Practicum-Social Science . 2-4 Units.**

Social Sciences Academic Resource Center (SSARC) Resource Managers (RMs) report directly to the Director and Associate Director, serving as frontline resource consultants, assisting visitors with resume development, graduate and professional school planning, internship placement, and professional development.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 12 units.

**SOC SCI 195A. Educational Policy Field Studies. 4 Units.**

Integrates academic course work with experiential learning; examines the effects of educational policy on urban and suburban schools; explores the relationship between community service and personal academic interests; and develops awareness about the challenges of public education.

Repeatability: May be taken for credit 3 times.

**SOC SCI 195B. Educational Policy Field Studies. 4 Units.**

Integrates academic course work with experiential learning; examines the effects of educational policy on urban and suburban schools; explores the relationship between community service and personal academic interests; and develops awareness about the challenges of public education.

Prerequisite: SOC SCI 195A

Repeatability: May be taken for credit 3 times.

**SOC SCI 195C. Educational Policy Field Studies . 4 Units.**

Integrates academic course work with experiential learning; examines the effects of educational policy on urban and suburban schools; explores the relationship between community service and personal academic interests; and develops awareness about the challenges of public education.

Prerequisite: SOC SCI 195B

Repeatability: May be taken for credit 3 times.

**SOC SCI 196. Global Connect. 2-4 Units.**

Identifies factors of change that influence the twenty-first century. Students serve as mentors at high schools to introduce globalization issues through workshops and lectures. Students must submit an application and have a 3.0 or higher overall GPA.

Repeatability: May be taken for credit 3 times.

**SOC SCI 197. Professional Internship. 2-4 Units.**

Students apply classroom knowledge through research projects in nonprofit agencies (local, state, and government) and the private sector. They pose solutions to agency-posed questions. Students gain field experience through 50 hours (for 2 units) or 100 (for 4 units).

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 8 units.

Restriction: School of Social Sciences students only.

**SOC SCI 198. Directed Group Study. 2-4 Units.**

Directed study with Social Science faculty.

Repeatability: May be taken for credit for 12 units.

**SOC SCI 199. Individual Study. 2-4 Units.**

Opportunities to do research and learn new skills outside the normal classroom environment. Students participate in planned research and study activities under a written contract with a supervising UCI instructor. Students may enroll for only one 199 each quarter.

Repeatability: May be taken for credit for 16 units.

Restriction: Upper-division students only.

**SOC SCI 211A. Mathematical Behavioral Sciences Colloquium. 2 Units.**

Weekly reports and colloquia by faculty, students, and visitors.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**SOC SCI 211B. Mathematical Behavioral Sciences Colloquium. 2 Units.**

Weekly reports and colloquia by faculty, students, and visitors.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**SOC SCI 211C. Mathematical Behavioral Sciences Colloquium. 2 Units.**

Weekly reports and colloquia by faculty, students, and visitors.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**SOC SCI 253K. Race and Justice Studies Writing Seminar . 4 Units.**

A required writing-intensive seminar conducted by an instructor affiliated with the Race and Justice Studies emphasis. Students with manuscripts on relevant topics will read and critique peer manuscripts, and revise manuscripts toward completion of articles, dissertation chapters, and other publications.

Prerequisite: CRM/LAW C260C

Same as HUMAN 261, CRM/LAW C261.

Restriction: Graduate students only.

**SOC SCI 254A. Transnational Migration. 4 Units.**

Examines borders and boundaries as material and semiotic constructs. Drawing upon an array of literatures, but loosely situated in U.S. geo/biopolitics, explores transformative troubleings of places, spaces, borders, and bodies of all sorts.

Same as ANTHRO 235A, CHC/LAT 215.

Restriction: Graduate students only.

**SOC SCI 272A. Origin and Evolution of Marxist Social Thought. 4 Units.**

Focuses on the genesis and evolution of Marxist social thought. The 'systemic' method of Marx and Engels to questions of economic production and reproduction is compared and contrasted with modern world-system grand visions, feminist-theoretic approaches, and postmodern critiques.

Prerequisite: Undergraduate course in political theory or equivalent.

Restriction: Graduate students only.

**SOC SCI 289. Special Topics in Social Science. 4 Units.**

Current research in Social Science.

Repeatability: Unlimited as topics vary.

**SOC SCI 290. Dissertation Research. 4-12 Units.**

Dissertation research with Social Science faculty.

Repeatability: May be repeated for credit unlimited times.

**SOC SCI 299. Independent Study. 1-12 Units.**

Independent research with Social Science faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**SOC SCI 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Letter Grade only.

Repeatability: May be repeated for credit unlimited times.

## Sociology Courses

**SOCIOL 1. Introduction to Sociology. 4 Units.**

Considers major sociological concepts, theories, and research findings illuminating processes of interpersonal interaction, social differentiation and stratification, integration and conflict, and change, with attention to variation in class, race/ethnic, gender, multicultural, and cross-national perspectives and experiences.

(III, VII)

**SOCIOL 2. Globalization and Transnational Sociology. 4 Units.**

Examines globalization and international issues from the perspective of sociology and related fields. Issues include economic globalization and global inequality, international environmental problems, international politics, trends in global culture, and global conflict.

(III, VIII)

**SOCIOL 3. Social Problems. 4 Units.**

Focuses on how institutional and organizational features of societies generate problems for people. Particular attention directed at a set of problems related to political and economic inequality: poverty, racism, sexism, urban and population problems, the environment, the criminal justice system.

(III, VII)

**SOCIOL 10A. Probability and Statistics. 4 Units.**

An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Same as ANTHRO 10A.

Overlaps with PSYCH 10A, SOCECOL 13, SOC SCI 10A, POL SCI 10A.

Restriction: Anthropology Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

(Va)

**SOCIOL 10B. Probability and Statistics. 4 Units.**

An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Prerequisite: SOCIOL 10A or ANTHRO 10A

Same as ANTHRO 10B.

Overlaps with PSYCH 10B, SOCECOL 13, SOC SCI 10B, POL SCI 10B.

Restriction: Anthropology Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**(Va)**

**SOCIOL 10C. Probability and Statistics. 4 Units.**

An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Prerequisite: SOCIOL 10B or ANTHRO 10B

Same as ANTHRO 10C.

Overlaps with PSYCH 10C, SOCECOL 13, SOC SCI 10C, POL SCI 10C.

Restriction: Anthropology Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**(Vb)**

**SOCIOL 19. Special Topics: Methods. 4 Units.**

Studies in selected areas of methods. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**SOCIOL 29. Special Topics: Theory. 4 Units.**

Studies in selected areas of theory. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: May be repeated for credit unlimited times.

**SOCIOL 31. Self-Identity and Society. 4 Units.**

Studies sociological contributions to theory and research in social psychology, with focus on the social influences on personality, attitudes, beliefs, and behavior; socialization, human groups, and social interaction.

Same as PSYCH 78A.

**(III)**

**SOCIOL 39. Special Topics: Social Psychology. 4 Units.**

Studies in selected areas of social psychology. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**SOCIOL 41. Small Group Dynamics. 4 Units.**

Deals with models for understanding behavior in small groups, including coalition formation, socialization, group norms and decision rules, leadership, conformity, group structure, and communication processes.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 43. City and Community. 4 Units.**

Examines nature, causes, and consequences of urbanization along with changing scale and complexity, demographic/ecological city growth patterns, quality of life in urban areas, processes of decision-making, and bearing of sociological investigation on public policy concerns in contemporary urban society.

Overlaps with UPPP 40.

**SOCIOL 44. Births, Deaths, and Migration. 4 Units.**

Introduction to the analysis of human population including fertility, mortality dispersion, sex distribution. Attention is focused on the effects of these variables on, e.g., over-population, social disorganization, and the stability of social institutions.

(VIII)

**SOCIOL 49. Special Topics: Structures. 4 Units.**

Studies in selected areas of structures. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**SOCIOL 51. Asian American Family & Community. 4 Units.**

Briefly examines the history of different Asian American groups and provides an in-depth analysis of issues related to family composition, mate selection, changing gender roles, and intergenerational conflict.

(VII)

**SOCIOL 56. Religion and Society. 4 Units.**

A critical and personal examination of the varieties of religious and spiritual experiences human beings are undergoing in contemporary society. The role of conscious understanding and unconscious conditioning regarding religion and spirituality.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 59. Special Topics: Social Institutions and Culture. 4 Units.**

Studies in selected areas of social institutions and culture. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**SOCIOL 62. Families and Intimate Relations. 4 Units.**

Sociological theories/research on marriage, kinship, intimacy, and divorce. Emphasis on comparing family patterns in different social classes, ethnic groups, and societies, and on relating family life to the economy and other social institutions. Topics include gender roles, child-rearing, historical change. Materials fee.

(III)

**SOCIOL 63. Race and Ethnicity. 4 Units.**

Focuses on racial and ethnic relations in the United States and compares them with those found in other societies. Analyzes the conditions that favor either cooperation and integration or rivalry, tension, and conflict. Appraises strategies for reducing and resolving conflicts.

Same as SPPS 70A.

(VII)

**SOCIOL 64. Sociology of Sexuality. 4 Units.**

Provides an introduction to and overview of the sociology of sex and sexuality. Considers the social meanings of sex and sexuality, the social contexts of sex and sexuality, and the social regulations of sex and sexuality.

(VII)

**SOCIOL 68. Gender and Race Inequality in the Workplace. 4 Units.**

Analysis of current state and trends in major inequality measures including the wage gap, occupational segregation, and access to managerial positions. Theories that purport to explain such differences, and the related empirical evidence, are also covered.

**SOCIOL 68A. Ethnic and Immigrant America. 4 Units.**

Focusing on Asian, Latino, and Black immigrant groups, examines the second generation's experience of straddling two cultures and growing up American. Covers topics such as assimilation, bilingualism, race relations, education, bicultural conflicts, interracial marriage, and multiracial identities.

Same as CHC/LAT 65.

(VII)

**SOCIOL 69. Special Topics: Age, Gender, Race, and Ethnicity. 4 Units.**

Studies in selected areas of age, gender, race, and ethnicity. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**SOCIOL 79. Special Topics: Societies and Social Inequality. 4 Units.**

Studies in selected areas of societies and social inequality. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**SOCIOL 110. Research Methods. 4 Units.**

Methods of data collection and analysis used by sociologists. Experimental methods, surveys, and interviews, field research and participant observation, demographic methods, historical and comparative approaches.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 119. Special Topics: Methods. 4 Units.**

Studies in selected areas of methods. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 120. Sociological Theory. 4 Units.**

What a theory of society is and is not. Historical and contemporary models, perspectives, and schools.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 120W. Sociological Theory. 4 Units.**

What a theory of society is and is not. Historical and contemporary models, perspectives, and schools.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology Majors have first consideration for enrollment.

**(Ib)****SOCIOL 129. Special Topics: Theory. 4 Units.**

Studies in selected areas of theory. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 134. Game Theory and Politics I. 4 Units.**

Introduction to game theory and a survey of its political applications. Examples of topics covered include voting in small committees, legislatures, and mass elections; interest group activities and environmental issues; institutional design, and the evolution of cooperative behavior.

Same as POL SCI 130A, SOC SCI 103A.

Restriction: Social Policy/Public Service Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**SOCIOL 135. Social Psychology of Networks. 4 Units.**

Review of network methods used in small group and organizational research. Discussion of social psychological literature relevant to the network of study of cognitive social structure, exchange/communication, identity negotiation, and social control. Case study of network datasets exemplifies research issues.

Same as PSYCH 178N.

Restriction: Sociology Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**SOCIOL 136. Religious Traditions of Asian Americans. 4 Units.**

Studies the religious traditions of Asian Americans, focusing on the transplantation of religious institutions, establishment of sacred spaces, celebration of religious holidays, socialization of children, as well as birth, marriage, gender relations, death, family.

Same as ASIANAM 143.

**SOCIOL 138. Business Decisions. 4 Units.**

Surveys normative and descriptive models of decision-making behavior, with an emphasis on organizational and policy contexts. Topics include rational choice theory, biases and heuristics, framing effects, and overconfidence. Management fads, panics, and herd behavior are also discussed.

Prerequisite: (ANTHRO 10A and ANTHRO 10B and ANTHRO 10C) or (SOCIOL 10A and SOCIOL 10B and SOCIOL 10C) or (SOC SCI 10A and SOC SCI 10B and SOC SCI 10C) or (MATH 2A and MATH 2B and (STATS 7 or MGMT 7)) or (STATS 120A and STATS 120B and STATS 120C) or (ECON 15A and ECON 15B)

Same as ECON 148.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 139. Special Topics: Social Psychology. 4 Units.**

Studies in selected areas of social psychology. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 141. Organizations. 4 Units.**

How bureaucracies, formal organizations, and voluntary associations work, how/why they grow, and where they are going. History and structure of organizational rationality; dynamics of organized groups; behavior in organizations; limits of bureaucratization and attempts to overcome these limits through decentralization.

Same as POL SCI 155C.

Restriction: Sociology Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment.

**SOCIOL 142. White-Collar Crime. 4 Units.**

Examines criminal activity in business and corporate enterprise, organizations, and the professions. Theories regarding the causes and control of white-collar and corporate crime are covered as well as the numerous definitions of these terms.

Same as CRM/LAW C142.

Restriction: Sociology Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**SOCIOL 143. Social Networks and Social Support. 4 Units.**

Examines the manner in which behaviors/attitudes of individuals are affected by their network ties to others. How are peoples' opportunities and well-being increased/decreased by their social networks? May include studies in mental/physical health, job seeking, separation and loss, and aging.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 144. Politics, Power, and Society. 4 Units.**

Includes an examination of the major theoretical approaches to political sociology, and the application of these ideas to the politics of advanced capitalist societies. Also considers stability and change in power structures.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 145. Occupations and Professions. 4 Units.**

What makes some jobs satisfying and others boring? How does technology influence the workplace? What changes are coming in the U.S. job market? Sociology and psychology of occupations. Students interview workers and study aspects of their occupations.

Restriction: Upper-division students only. Sociology Majors have first consideration for enrollment.

**SOCIOL 145W. Occupations and Professions. 4 Units.**

What makes some jobs satisfying and others boring? How does technology influence the workplace? What changes are coming in the U.S. job market? Sociology and psychology of occupations. Students interview workers and study aspects of their occupations.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Sociology Majors have first consideration for enrollment.

**(Ib)****SOCIOL 149. Special Topics: Structures. 4 Units.**

Studies in selected areas of structures. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 150. Sociological Lens on Religion. 4 Units.**

Examines the effects of religious beliefs, belonging, and institutions on social dynamics, including class, gender, and racial stratification, politics, and social movements. Additional topics: the sociological significance of conversion, commitment, and secularization/sacralization.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 151. Social Inequalities and Health. 4 Units.**

Introduces ways in which social inequalities produce health disparities. Begins with general perspectives on social causation of health, and then considers how particular individual attributes (e.g., gender, SES, race/ethnicity, nativity) and social contexts (e.g., neighborhoods) can get "under the skin."

**SOCIOL 154. Medical Sociology. 4 Units.**

Current problems in U.S. health-care system and proposals for reform. Examines financial barriers to access; problem of patient dumping; underinsurance; prenatal and perinatal care; child services; preventative care and needs of the elderly; minorities; low-income people; undocumented.

Same as PUBHLTH 135.

Restriction: Upper-division students only. Sociology Majors have first consideration for enrollment.

**SOCIOL 154W. Medical Sociology. 4 Units.**

Current problems in U.S. health-care system and proposals for reform. Examines financial barriers to access; problem of patient dumping; underinsurance; prenatal and perinatal care; child services; preventative care and needs of the elderly; minorities; low-income people; undocumented.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Sociology Majors have first consideration for enrollment.

**(Ib)****SOCIOL 155B. Baseball and Society. 4 Units.**

An examination of baseball's role in American social life over the last 150 years. Issues of fraternal organizations, national development, capitalism, rationalization, race and ethnicity, gender, economic organization, labor relations, and politics are discussed.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 155BW. Baseball and Society. 4 Units.**

An examination of baseball's role in American social life over the last 150 years. Issues of fraternal organizations, national development, capitalism, rationalization, race and ethnicity, gender, economic organization, labor relations, and politics are discussed.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology Majors have first consideration for enrollment.

**(Ib)**

**SOCIOL 156. Deviance. 4 Units.**

Perspectives on deviance and criminality in behavior, institution, community, and myth. The suitability of contemporary theories of deviant behavior.

Same as CRM/LAW C107, PSYCH 177D.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

Sociology Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**SOCIOL 157A. Sociology of Education. 4 Units.**

Focuses on education's role in creating and redressing inequality, and in shaping how we understand our place in society. Education from cross-national and historical perspectives, and education as a vehicle for examining and solving social problems. Course may be offered online.

**SOCIOL 157AW. Sociology of Education. 4 Units.**

Focuses on education's role in creating and redressing inequality, and in shaping how we understand our place in society. Education from cross-national and historical perspectives, and education as a vehicle for examining and solving social problems.

Overlaps with SOCIOL 157A.

**(Ib)**

**SOCIOL 157C. Comparing European and US Societies. 4 Units.**

Society, culture, institutions of U.S. and European countries. Fertility to football, guns to government, work to welfare, health to housework. Cross-national approaches for understanding the world and thinking critically about taken-for-granted practices. Policies the U.S. might borrow for social issues.

Same as INTL ST 157C.

**SOCIOL 158C. Money, Work, and Social Life . 4 Units.**

Sociological perspective on issues related to money and work. Consumption practices and lifestyles, jobs and organizations, issues of money in intimate relations, marriage, and households, illegal work, discrimination, economic globalization are discussed.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 158CW. Money, Work, and Social Life. 4 Units.**

Sociological perspective on issues related to money and work. Consumption practices and lifestyles, jobs and organizations, issues of money in intimate relations, marriage, and households, illegal work, discrimination, economic globalization are discussed.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology Majors have first consideration for enrollment.

**(Ib)**

**SOCIOL 159. Special Topics: Social Institutions and Culture. 4 Units.**

Studies in selected areas of social institutions and culture. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 161. Sociology of Sex and Gender. 4 Units.**

Explores complex processes contributing to social construction of gender and sexuality in the U.S. with focus on intersection of gender, race, ethnicity, sexuality, and class; evaluates how men and women are differentially constituted in family, education, work, politics, media, language.

**SOCIOL 161W. Sociology of Sex and Gender. 4 Units.**

Explores complex processes contributing to social construction of gender and sexuality in the U.S. with focus on intersection of gender, race, ethnicity, sexuality, and class; evaluates how men and women are differentially constituted in family, education, work, politics, media, language.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

**(Ib)**

**SOCIOL 164. Sociology of Aging . 4 Units.**

Introduction to sociology of age, aging, and the aged. Problems posed by aging population. Life course transitions and how social organizations influence the life course. Addresses work, health, and family in later life.

Overlaps with SOCIOL 164W.

Restriction: Upper-division students only. Sociology Majors have first consideration for enrollment.

**SOCIOL 164W. Sociology of Aging . 4 Units.**

Introduction to sociology of age, aging, and the aged. Problems posed by aging population. Life course transitions. How social organizations influence the life course. Work, health, family in later life.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Sociology Majors have first consideration for enrollment.

**(Ib)**

**SOCIOL 166. Immigration and Inequality. 4 Units.**

Explores immigration, ethnicity, and inequality as interconnected social forces. International migration, propelled by global inequalities, plays a central role in the formation of multinational societies, shapes inter-group relations and patterns of ethnic inequality, and transforms the immigrants themselves.

Same as SOC SCI 168B.

**SOCIOL 167A. Racial and Ethnic Relations in the United States. 4 Units.**

Examines central questions and issues in the field of race and ethnicity; the emergence, maintenance, and consequences of the ethnic and racial stratification system in the United States; the future of racial and ethnic relations; and relevant public policy issues.

Same as CHC/LAT 148.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**SOCIOL 167AW. Racial and Ethnic Relations in the United States. 4 Units.**

Examines central questions and issues in the field of race and ethnicity; the emergence, maintenance, and consequences of the ethnic and racial stratification system in the United States; the future of racial and ethnic relations; and relevant public policy issues.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as CHC/LAT 148W.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**(Ib)**

**SOCIOL 169. Special Topics in Age, Gender, Race, and Ethnicity. 4 Units.**

Studies in selected areas of age, gender, race, and ethnicity. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 170A. Vietnam War. 4 Units.**

Examines social structures and social changes in Vietnamese and U.S. societies through the study of the Vietnam War.

Same as INTL ST 143A.

**SOCIOL 170B. U.S. War on Terrorism. 4.0 Units.**

Analyzes the United States war on terrorism by focusing on terrorism, the U.S. wars in Afghanistan and Iraq, and changes in police powers through the Patriot Act, as well as the political leadership which directs the war.

Same as INTL ST 175A.

**SOCIOL 171. Environment and Society. 4 Units.**

Examines society's changing relationship to the natural world. Delineates different models of 'nature' and then explores their institutional roots, the social responses they have generated, and their implications for social inequality.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 172. Revolution and Social Transformation in China. 4 Units.**

Introduces the major political events in Mao's communist revolution and the social transformations afterward. Helps students understand the historic and political landscape from which China is now departing.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 173. Social Inequality. 4 Units.**

Sources, functions, and dynamics of the unequal distribution of wealth, prestige, knowledge, and power in American and other societies.

Overlaps with SOCIOL 173W.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 173W. Social Inequality. 4 Units.**

Sources, functions, and dynamics of the unequal distribution of wealth, prestige, knowledge, and power in American and other societies.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Overlaps with SOCIOL 173.

Restriction: Upper-division students only.

**(Ib)****SOCIOL 174. Protests, Movements, and Revolutions. 4 Units.**

A survey of models of collective action drawn from sociology, economics, psychology, and political science. Focus on areas such as social movements, strikes, crowd psychology, cults, fads, fashions, public opinion, and symbolic and mythical elements in collective culture.

Prerequisite: SOCIOL 1 or POL SCI 11A or ECON 1

Same as POL SCI 156D.

Restriction: Political Science Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**SOCIOL 175B. China in the Global Age. 4 Units.**

Chinese society from 1949 to present. Social change in the context of political control and ideological considerations. Focus on the power structure, political decision processes, and ideological legitimization, and interplay with the Chinese community and its culture.

Same as INTL ST 158D.

**SOCIOL 176. International Divided Cities. 4 Units.**

Investigates urban divisions in international cities where deep-seated nationalistic ethnic differences create pressures for intergroup conflicts, autonomy, or territorial separation, and can incite violence. Urban political polarization as it is manifest in the urban setting.

Same as POL SCI 157B, UPPP 178.

**SOCIOL 177. Immigration and Social Policy. 4 Units.**

Explains how people decide to migrate and how they are incorporated into a host society (both historically and currently), examines the effects of immigration on the U.S., analyzes how the framing of immigration shapes the discourse about the issue.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 177C. Undocumented Immigrant Experiences. 4 Units.**

Examines the experiences of undocumented immigrants and the policies that structure their educational, economic, social, and political participation.

Same as ASIANAM 130, CRM/LAW C187, CHC/LAT 164A.

**(III and VII ).**

**SOCIOL 177W. Immigration and Social Policy. 4 Units.**

Explains how people decide to migrate and how they are incorporated into a host society (both historically and currently), examines the effects of immigration on the U.S., analyzes how the framing of immigration shapes the discourse about the issue.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology Majors have first consideration for enrollment.

**(Ib)**

**SOCIOL 179. Special Topics: Societies and Social Inequality. 4 Units.**

Studies in selected areas of societies and social inequality. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 180A. Sociology Majors Seminar. 4 Units.**

Students learn sociology by doing it. A modest-sized research project is planned and implemented by each student.

Prerequisite: SOCIOL 110

Restriction: Sociology Majors only.

**SOCIOL 180AW. Sociology Majors Seminar. 4 Units.**

Students learn sociology by doing it. A modest-sized research project is planned and implemented by each student.

Prerequisite: SOCIOL 110. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology Majors only.

**(Ib)**

**SOCIOL 188BW. Honors Research and Thesis. 4 Units.**

Focuses on the design and implementation of individual research projects undertaken by senior Sociology majors. Writing projects consist of a proposal and paper on some empirical research.

Prerequisite: SOCIOL H188A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology Honors students only.

**(Ib)**

**SOCIOL H188A. Honors Research and Thesis. 4 Units.**

Focuses on the design and implementation of individual research projects undertaken by senior Sociology majors. Writing projects consist of a proposal and paper on some empirical research.

Restriction: Sociology Honors students only.

**SOCIOL 189. Special Topics: Honors Sequence. 4 Units.**

Independent honors research with Social Sciences faculty.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 197. Field Study. 4 Units.**

Field study with Sociology faculty.

Repeatability: May be repeated for credit unlimited times.

**SOCIOL 198. Directed Group Study . 4 Units.**

Directed study with Sociology faculty.

Repeatability: May be repeated for credit unlimited times.

**SOCIOL 199. Independent Study. 1-4 Units.**

Independent research with Sociology faculty.

Repeatability: May be repeated for credit unlimited times.

**SOCIOL 202A. Proseminar I in Sociology. 1 Unit.**

Introduces first-year graduate students in Sociology to the current research interests of Sociology faculty, as well as to other aspects of graduate life at UCI and to the profession of sociology more generally.

Restriction: Graduate students only.

**SOCIOL 202B. Proseminar II in Sociology. 4 Units.**

Focus is on second-year research projects, design, development, data gathering, analysis, and preparing oral and written presentations of the results. Students learn analytic and writing skills, gain experience with research processes, and become socialized about professional standards, customs, and institutions.

Restriction: Graduate students only.

**SOCIOL 210A. Classical Social Theory. 4 Units.**

Examines the development of classical sociological theory through the writings of Karl Marx, Emile Durkheim, Max Weber, Georg Simmel, and George Herbert Mead.

Restriction: Graduate students only.

**SOCIOL 210B. Contemporary Social Theory. 4 Units.**

Familiarizes students with 20th-century developments in social thought that have influenced sociological research, suggesting 'what is living and what is dead' in the 'classics' and offering an overview of the main outlines of recent sociological theorizing.

Restriction: Graduate students only.

**SOCIOL 211A. Sociology of Gender. 4 Units.**

An introduction to the sociology of gender in the U.S. and globally. The social construction of gender and sexuality; theoretical perspectives and feminist frameworks. Theories of economy, patriarchy, and race, and the social positions of women and men.

Restriction: Graduate students only.

**SOCIOL 212. Network Theory. 4 Units.**

An introduction to theoretical work in the field of social networks. Topics include baseline models, homophily, and propinquity, exchange and power, balance theory, diffusion and social influence, equivalence, and cohesion. Deductive use of theory to make novel predictions is emphasized.

Restriction: Graduate students only.

**SOCIOL 219. Special Topics: Theory. 2-4 Units.**

Studies in selected areas of theory. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SOCIOL 220A. Research Design. 4 Units.**

Data collection, organization, and analysis in ethnographic or quasi-experimental settings, including interviewing, participant observations, behavior observations, and questionnaires. Research design issues include sampling, longitudinal research, and comparative research. Emphasis on the integration of qualitative and quantitative data.

Overlaps with SOCIOL 265.

Restriction: Graduate students only.

**SOCIOL 221A. Graduate Statistics I. 4 Units.**

Statistics with emphasis on applications in sociology and anthropology. Examines exploratory uses of statistical tools in these fields as well as univariate, bivariate, and multivariate applications in the context of the general linear model.

Restriction: Graduate students only.

**SOCIOL 221B. Graduate Statistics II. 4 Units.**

Statistics with emphasis on applications in sociology and anthropology. Examines exploratory uses of statistical tools in these fields as well as univariate, bivariate, and multivariate applications in the context of the general linear model.

Prerequisite: SOCIOL 221A

Restriction: Graduate students only.

**SOCIOL 221C. Graduate Statistics III. 4 Units.**

Statistics with emphasis on applications in sociology and anthropology. Examines exploratory uses of statistical tools in these fields as well as univariate, bivariate, and multivariate applications in the context of the general linear model.

Prerequisite: SOCIOL 221A and SOCIOL 221B

Restriction: Graduate students only.

**SOCIOL 222A. Comparative and Historical Sociological Methods. 4 Units.**

Topics include the logic of comparative and historical analysis techniques and the examination of exemplar works in representative problem areas.

Restriction: Graduate students only.

**SOCIOL 224. Interview Methods . 4 Units.**

Hands-on introduction to the use of interviews in social scientific research. Topics include when to use interviews and/or focus groups; how to design an interview-based study, how to conduct interviews, analyze interview data, and write up and publish interview-based results.

Restriction: Graduate students only.

**SOCIOL 226A. Methods of Demographic Analysis. 4 Units.**

Introduces basic demographic methods used in social science and public health research. Topics include sources and limitations of demographic data; components of population growth; measures of nuptiality, fertility, mortality, and population mobility projection methods; and demographic models.

Same as PUBHLTH 209.

Restriction: Graduate students only.

**SOCIOL 227A. Seminar Ethnographic & Qualitative Field Methods. 4 Units.**

Comprehensive and critical discussion of the traditions of qualitative fieldwork; detailed examination of the collection, coding, analysis, and presentation of ethnographic/qualitative field data; and close mentoring of student projects culminating in an original research paper.

Grading Option: In Progress (Letter Grade with S/U).

Restriction: Graduate students only.

**SOCIOL 227B. Seminar Ethnographic & Qualitative Field Methods. 4 Units.**

Comprehensive and critical discussion of the traditions of qualitative fieldwork; detailed examination of the collection, coding, analysis, and presentation of ethnographic/qualitative field data; and close mentoring of student projects culminating in an original research paper.

Prerequisite: SOCIOL 227A

Restriction: Graduate students only.

**SOCIOL 229. Special Topics: Methods . 1-4 Units.**

Studies in selected areas of methods. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SOCIOL 230A. Race and Ethnicity. 4 Units.**

An examination of central questions and issues in the field of race and ethnicity through a critical analysis and discussion of the principal theoretical perspectives and paradigms that have framed much of the scholarship in the area.

Restriction: Graduate students only.

**SOCIOL 232. Inequality. 4 Units.**

Theoretical and empirical approaches to the study of social and economic inequality, with special attention to race/ethnicity, class, and gender.

Restriction: Graduate students only.

**SOCIOL 234. Ethnic America. 4 Units.**

Examines critically the meaning and measurement of ethnicity, race, and nation in sociological theory and research. Theories of ethnicity are explored, along with empirical studies of the construction of ethnic and pan-ethnic identities in historical and contemporary contexts.

Same as CHC/LAT 223.

Restriction: Graduate students only.

**SOCIOL 235. Poverty and Development . 4 Units.**

Examines competing conceptualizations, methods of measurement, and poverty alleviation strategies widely used in developing countries. Focuses on poverty conceptualized as economic deprivation, well-being, vulnerability, and social exclusion.

Same as UPPP 251.

Restriction: Graduate students only.

**SOCIOL 237. Educational Inequality. 4 Units.**

Focuses on macro-level explanations of inequality of schooling, particularly in the U.S. context. Explores traditional models, such as conflict, functionalism, status-attainment, cultural reproduction, and newer synthetic accounts. Emphasis on higher education access and the intersection of education and work.

Restriction: Graduate students only.

**SOCIOL 239. Special Topics: Social Inequality. 2-4 Units.**

Studies in selected areas of social inequality. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SOCIOL 240A. Social Movements. 4 Units.**

A survey of the field of Social Movements, oriented around critical themes in the major theoretical traditions and contemporary exemplars.

Restriction: Graduate students only.

**SOCIOL 241A. Political Sociology. 4 Units.**

Begins with an examination of the three major orientations to the State (Pluralist, Elitist, and Class). Next considers current topics in political sociology including the Welfare State, the New Deal, political behavior, social movements, participation, and democracy.

Restriction: Graduate students only.

**SOCIOL 242. Sociology of Culture. 4 Units.**

Major perspectives in the sociology of culture. Topics include the role of cultural dynamics in the reproduction of inequality, collective action, political and organizational decision making, emotional experience, and the social impacts of new technologies.

**SOCIOL 249. Special Topics: Political Sociology and Social Movements. 2-4 Units.**

Studies in selected areas of political sociology and social movements. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SOCIOL 252A. Global Urbanization. 4 Units.**

Examines the spread of cities worldwide in the 20th century. What are the political and economic causes of this process? What are the social-cultural, political, and economic effects? How is contemporary urbanization linked to global restructuring of other kinds.

Same as UPPP 273.

Restriction: Graduate students only.

**SOCIOL 259. Special Topics: Global Studies and Comparative Development. 2-4 Units.**

Studies in selected areas of global studies and comparative development. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SOCIOL 262A. Population. 4 Units.**

Introduces the interrelationships between population and social organization. Considers measurement and explanation of historical and contemporary trends in birth rates, death rates, migration, and marriage and divorce. Case material is drawn primarily from the U.S. and other industrialized nations.

Restriction: Graduate students only.

**SOCIOL 264. Immigrant America. 4 Units.**

The study of the causes and consequences of international migration has become one of the most vital fields of sociological theory and research. Examines principal theoretical perspectives and empirical research on contemporary immigration flows and the processes of incorporation.

Same as CHC/LAT 224.

Restriction: Graduate students only.

**SOCIOL 265. DASA Research Design. 4 Units.**

Data collection, organization, and analysis in population studies and demography. Research design issues include sampling, longitudinal research, and comparative research.

Prerequisite: Enrollment in DASA program.

Overlaps with SOCIOL 220A.

Restriction: Graduate students only.

**SOCIOL 268. Crimmigration. 4 Units.**

Examines the criminalization of immigration, with an emphasis on U.S. enforcement procedures and outcomes. Analyzes the devolution of federal immigration law to local authorities, the rise in immigrant detention and deportation, and the militarization of the U.S.-Mexico border.

Same as CHC/LAT 225, CRM/LAW C258.

Restriction: Graduate students only.

**SOCIOL 269. Special Topics: Social Demography. 4 Units.**

Studies in selected areas of social demography. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SOCIOL 279. Special Topics: Social Organizations and Institutions. 2-4 Units.**

Studies in selected areas of social organizations and institutions. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SOCIOL 280. Analysis of Social Network Data. 4 Units.**

Overview and application of methods for analyzing social network data. Topics include: data structures, visualization, graph theory, centrality, subgroups, positions, blockmodels, local properties, and statistical models. Social network analysis software is used to analyze a range of examples.

Restriction: Graduate students only.

**SOCIOL 281. Introduction to Social Networks. 4 Units.**

Provides a broad overview of the history, concepts, and applications of social networks. Students have the opportunity to delve deeply into applications of the network approach in their individual areas of interest.

Restriction: Graduate students only.

**SOCIOL 282. Theorizing Illegality and the Experiences of Undocumented Immigrants. 4 Units.**

Examines theories of illegality and citizenship, historical and contemporary undocumented immigrant experiences, and methodological concerns in this area of study.

Same as CHC/LAT 222.

Restriction: Graduate students only.

**SOCIOL 289. Special Topics . 2-4 Units.**

Studies in selected areas of Social Sciences. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SOCIOL 290. Dissertation Research. 1-12 Units.**

Dissertation research with Sociology faculty.

Repeatability: May be taken for credit 10 times.

Restriction: Graduate students only.

**SOCIOL 299. Independent Study. 1-12 Units.**

Independent research with Sociology faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Department of Anthropology

**Kim Fortun, Department Chair**

3203 Social & Behavioral Sciences Gateway

949-824-7602

<http://www.anthropology.uci.edu/>

Anthropology is the comparative study of past and present human societies and cultures. The Department of Anthropology at UCI is at the forefront of addressing issues in contemporary theory and ethnographic methods within the discipline. The Department has a strong interdisciplinary bent, with research and teaching interests in economic anthropology, political and legal anthropology, the anthropology of finance, social history and social change, the anthropology of science, technology and medicine, identity and ethnicity, gender and feminist studies, urban anthropology, modernity and development, religion, visual anthropology, and the arts and expressive culture.

The Department also has a strong emphasis on the study of contemporary issues, especially those concerned with emergent, fluid, and complex global phenomena such as international flows of goods, peoples, images, and ideas; the relationship between global processes and local practices; immigration, citizenship, and refugees; population politics; violence and political conflict; ethnicity and nationalism; gender and family; food, health, and technological innovation; law; development and economic transformation; urban studies; and environmental issues. Geographic regions of expertise include China, Southeast Asia, South Asia, Oceania, Europe, Latin America, the Caribbean, East Africa, Latino communities of the United States, and diasporic and transnational communities in the United States and abroad.

- Anthropology, B.A.
- Anthropology, Minor
- Anthropology, Ph.D.
- Critical Theory, Graduate Emphasis
- Feminist Studies, Graduate Emphasis
- Medical Anthropology, Minor

## Faculty

Samar Al-Bulushi, Ph.D. Yale University, *Assistant Professor of Anthropology* (surveillance, policing, and militarized urbanisms; Islam, Africa, and the racialized geopolitics of the war on terror; elites, diplomacy, and transnational governance)

Victoria Bernal, Ph.D. Northwestern University, *Professor of Anthropology; Culture and Theory; Gender and Sexuality Studies; Religious Studies* (gender, war, cyberspace, Islam, transnationalism, Africa)

Thomas D. Boellstorff, Ph.D. Stanford University, *Professor of Anthropology* (virtual worlds, sexuality, postcoloniality, HIV/AIDS, mass media and popular culture, language and culture, Indonesia, Southeast Asia)

John P. Boyd, Ph.D. University of Michigan, *Professor Emeritus of Anthropology*

Michael L. Burton, Ph.D. Stanford University, *Professor Emeritus of Anthropology*

Francis A. Cancian, Ph.D. Harvard University, *Professor Emeritus of Anthropology*

Leo Chavez, Ph.D. Stanford University, *Distinguished Professor of Anthropology* (migration, media, discourse analysis, visual semiotics, medicine)

Benjamin N. Colby, Ph.D. Harvard University, *Professor Emeritus of Anthropology*

Kim Fortun, Ph.D. Rice University, *Department Chair and Professor of Anthropology* (environmental problems and science, science and technology, environmental health, disaster, India)

Michael Fortun, Ph.D. Harvard University, *Associate Professor of Anthropology* (anthropology of science, air pollution science, data science, genetics, history of science, United States, Iceland)

David Theo Goldberg, Ph.D. The Graduate Center, City University of New York, *Director of the UC Humanities Research Institute and Professor of Comparative Literature; Anthropology; Criminology, Law and Society* (race, racism, race and the law, political theory, South Africa, digital humanities)

Susan M. Greenhalgh, Ph.D. Columbia University, *Professor Emeritus of Anthropology*

Sherine Hamdy, Ph.D. New York University, *Associate Professor of Anthropology* (medical anthropology, science, technology and society, bioethics, comics, Islam, Egypt, middle east)

Anneeth Kaur Hundle, Ph.D. University of Michigan, Ann Arbor, *Dhan Kaur Sahota Presidential Chair of Sikh Studies and Assistant Professor of Anthropology; Religious Studies* (Sikh studies, African and South Asian diaspora/studies; politics of afro-asianism; citizenship, race, and decolonization; minoritization and community formation, postcolonial and transnational feminisms; gender and sexuality; critical university studies; Uganda, East Africa, global south)

Angela C. Jenks, Ph.D. University of California, Berkeley, *Associate Professor of Teaching of Anthropology* (medical anthropology, race and ethnicity, urban ethnography, United States)

Eleana Kim, Ph.D. New York University, *Associate Professor of Anthropology; Asian American Studies* (kinship, transnationalism, environment, Korea)

Karen Leonard, Ph.D. University of Wisconsin, *Professor Emeritus of Anthropology; Religious Studies*

Lilith Mahmud, Ph.D. Harvard University, *Associate Professor of Anthropology* (freemasonry, elites, gender, nationalism, race, citizenship, critical studies of Europe, secrecy, transparency, knowledge production, secret societies, power)

George E. Marcus, Ph.D. Harvard University, *Distinguished Professor of Anthropology* (elites, ethnography, cultural critique, Pacific)

William M. Maurer, Ph.D. Stanford University, *Dean of the School of Social Sciences and Professor of Anthropology; Criminology, Law and Society; School of Law* (anthropology of law, globalization, Caribbean, anthropology of money and finance, gender and kinship)

Michael J. Montoya, Ph.D. Stanford University, *Professor Emeritus of Anthropology*

Keith Murphy, Ph.D. University of California, Los Angeles, *Associate Professor of Anthropology* (linguistics, design, aesthetics and morality, Sweden)

Sylvia Nam, Ph.D. University of California, Berkeley, *Assistant Professor of Anthropology; Biological Chemistry; Urban Planning and Public Policy* (urban studies, property, transnational expertise, Southeast Asia)

Valerie A. Olson, Ph.D. Rice University, *Associate Professor of Anthropology* (environmental systems, science and technology, U.S., extreme environments)

Kristin Peterson, Ph.D. Rice University, *Associate Professor of Anthropology* (science and technology, feminism, pharmaceuticals, West Africa)

Justin Richland, Ph.D. University of California, Los Angeles, *Associate Professor of Anthropology* (legal discourse analysis and semiotics, anthropology of law; contemporary native American law, politics, art, and ethnographic museology)

A. K. Romney, Ph.D. Harvard University, *Professor Emeritus of Anthropology*

Damien Sojoyner, Ph.D. University of Texas at Austin, *Associate Professor of Anthropology; Culture and Theory* (prisons; public education; urban anthropology; race; African diaspora theory; public policy and law; gender; United States)

Ian Straughn, Ph.D. University of Chicago, *Assistant Professor of Teaching of Anthropology; Religious Studies* (archaeology, cultural heritage, middle east and Islamic studies, space and landscape, material culture)

Roxanne Varzi, Ph.D. Columbia University, *Professor of Anthropology; Culture and Theory; Film and Media Studies; Religious Studies; Visual Studies* (Iran, media, war, visual anthropology, film studies, ethnographic and fiction writing)

Douglas R. White, Ph.D. University of Minnesota, *Professor Emeritus of Anthropology*

Mei Zhan, Ph.D. Stanford University, *Associate Professor of Anthropology* (medical anthropology, cultural and social studies of science, globalization, transnationalism, gender, China and United States)

## Affiliate Faculty

Lee Cabatingan, Ph.D. University of Chicago, *Assistant Professor of Criminology, Law and Society; Anthropology* (Caribbean law and sovereignty; construction of authority at the Caribbean Court of Justice)

Susan B. Coutin, Ph.D. Stanford University, *Professor of Criminology, Law and Society; Anthropology; Religious Studies* (law, culture, immigration, human rights, citizenship, political activism, Central America)

Eve Darian-Smith, Ph.D. University of Chicago, *Department Chair and Professor of Global and International Studies; Anthropology; Criminology, Law and Society*

Jerry Won Lee, Ph.D. University of Arizona, *Associate Professor of English; Anthropology; Asian American Studies; Comparative Literature; Culture and Theory*

Gabriele M. Schwab, Ph.D. University of Konstanz, *UCI Chancellor's Professor of Comparative Literature; Anthropology; Culture and Theory; English; European Languages and Studies; German* (modern literature, critical theory, psychoanalysis, comparative literature)

## Courses

### ANTHRO 2A. Introduction to Sociocultural Anthropology. 4 Units.

Introduction to cultural diversity and the methods used by anthropologists to account for it. Family relations, economic activities, politics, gender, and religion in a wide range of societies. Stresses the application of anthropological methods to research problems.

(III and VIII ).

### ANTHRO 2B. Introduction to Biological Anthropology. 4 Units.

Evolutionary theory and processes, comparative primate fossil record, human variation, and the adequacy of theory, and empirical data.

(III)

### ANTHRO 2C. Introduction to Archaeology. 4 Units.

Archaeological theory and cultural processes with emphasis on the American Southwest, Mesoamerica, and Mesopotamia.

(III)

### ANTHRO 2D. Introduction to Language and Culture. 4 Units.

Explores what the study of language can reveal about ourselves as bearers of culture. After introducing some basic concepts, examines how cultural knowledge is linguistically organized and how language might shape our perception of the world.

Same as LSCI 68.

(III)

**ANTHRO 10A. Probability and Statistics. 4 Units.**

An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Same as SOCIOL 10A.

Overlaps with PSYCH 10A, SOCECOL 13, SOC SCI 10A, POL SCI 10A.

Restriction: Anthropology Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**(Va)**

**ANTHRO 10B. Probability and Statistics. 4 Units.**

An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Prerequisite: SOCIOL 10A or ANTHRO 10A

Same as SOCIOL 10B.

Overlaps with PSYCH 10B, SOCECOL 13, SOC SCI 10B, POL SCI 10B.

Restriction: Anthropology Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**(Va)**

**ANTHRO 10C. Probability and Statistics. 4 Units.**

An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Prerequisite: SOCIOL 10B or ANTHRO 10B

Same as SOCIOL 10C.

Overlaps with PSYCH 10C, SOCECOL 13, SOC SCI 10C, POL SCI 10C.

Restriction: Anthropology Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**(Vb)**

**ANTHRO 20A. People, Cultures, and Environmental Sustainability. 4 Units.**

Anthropological consideration of global environmental sustainability from the perspective of human cultures and communities. Causes and consequences of population growth, natural resource management, environmental law, environmental ethics. Case studies emphasize tropical rain forests, arid lands of Africa and North America.

**(VIII)**

**ANTHRO 25A. Environmental Injustice. 4 Units.**

Explores how pollution, climate change, and other environmental problems impact people around the world, often worsening social inequality. Students use social science frameworks to understand environmental problems, different interpretations of these problems, and how people have organized for political change.

**(III and VII ).**

**ANTHRO 30A. Global Issues in Anthropological Perspective. 4 Units.**

Explores anthropological perspectives on issues of importance in an increasingly global society. Topics include emphases on ethnic conflict; identity; immigration and citizenship; religion and religious diversity; medical anthropology; legal anthropology; development and economic change; gender.

Restriction: Anthropology Majors have first consideration for enrollment.

**(VIII)**

**ANTHRO 30C. Visual Anthropology . 4 Units.**

Focusing on the construction of culture through visibility, this course engages traditional ethnographic films, popular media and anthropological texts to analyze ethics, "reality" and fiction; propaganda and documentary, construction of a frame, the responsibility of the filmmaker, photographer, and anthropologist.

**ANTHRO 41A. Global Cultures and Society. 4 Units.**

Offers a general overview of the rise of global interdependence in political, economic, demographic, and cultural terms. Considers what drove people from relative isolation into intensified intercourse with one another, and investigates the consequences of this shift.

Same as INTL ST 11.

Restriction: Anthropology Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

(III and VIII ).

**ANTHRO 45A. Science, Culture, Power. 4 Units.**

Examines science in historical and cultural context (Scientific and Darwinian Revolutions, Manhattan Project, contemporary biosciences) to understand scientific truths and their limits, scientists as social actors, and vital intersections of sciences with religion, politics, gender, and other forms of culture.

(III)

**ANTHRO 48. Archaeology or Aliens?: Conspiracy, Pseudoscience, and the Emergence of Civilizations. 4 Units.**

Archaeology has inspired (and sometimes actively encouraged) various theories about aliens, lost civilizations, dark conspiracies, and mysterious technologies. Does such an intimate relationship with these fantastic notions undermine archaeology and its claims of authoritative knowledge about past cultures.

(III and VIII ).

**ANTHRO 89. Special Topics in Anthropology. 1-4 Units.**

Studies in selected areas of Anthropology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 100A. Ethnography and Anthropological Methods. 4 Units.**

Anthropological research, learning ethnographic methods, and how to choose a research topic, construct research questions, explore library resources, collect data, and write an analytical paper on research findings.

Prerequisite or corequisite: ANTHRO 2A

Restriction: Anthropology Majors have first consideration for enrollment. Anthropology Minors have first consideration for enrollment. Medical Anthropology Minors have first consideration for enrollment.

**ANTHRO 100B. Anthropology Careers. 4 Units.**

Gives students the skills and perspective needed to leverage undergraduate anthropology education in diverse career domains. Students explore different career domains (health care, tech development, environmental governance, etc.) and learn to represent themselves professionally.

Restriction: Anthropology Majors only. Anthropology Minors only. Medical Anthropology Minors only.

**ANTHRO 121AW. Kinship and Social Organization. 4 Units.**

Organization of social life primarily in preindustrial societies. Theories of kinship, marriage regulations, sexual behavior, and social roles. Comparisons of biological, psychological, sociological, and economic explanations of social organization.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

**ANTHRO 121D. Cross-Cultural Studies of Gender. 4 Units.**

Explores the construction of gender in national and transnational contexts. Special attention is given to how race, sexuality, class, and global inequalities shape different experiences of gender, and how gender structures political, institutional, and social life across the world.

Same as INTL ST 153B.

(VII)

**ANTHRO 121G. Political Anthropology. 4 Units.**

Utilizes anthropological accounts of Western and non-Western societies to question conventional ways of thinking about power and politics. Classical traditions in political anthropology are critiqued; an alternative view is presented through recent anthropological political analyses of various topics.

**ANTHRO 121J. Urban Anthropology. 4 Units.**

Cultural roles of urban centers and processes of urbanization in comparative perspective, focusing on both nonwestern, nonindustrial societies of past and present; the relationship between modern urban centers and Third World peoples. Migration, urban poverty, in Africa, Asia, Latin America.

Same as INTL ST 153C.

**ANTHRO 124. Gold: The Alchemy of Socio-Economic Practice. 4 Units.**

Before bitcoin, before derivatives and mortgage-backed securities, before even writing itself, there was gold. Explore gold's role in the development of culture, politics, and power. From Pharaohs to modern financial wizards, gold has impacted and mediated social life.

Restriction: Anthropology Majors have first consideration for enrollment. Anthropology Minors have first consideration for enrollment. Archaeology Minors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Economics Minors have first consideration for enrollment.

**ANTHRO 125. Anthropology of Debt. 4 Units.**

Explores how debt has shaped culture across varied contexts geographically and historically. In what ways have societies naturalized indebtedness, taken it for granted as a fact of life, and used it for organizing social relations.

Restriction: Anthropology Majors have first consideration for enrollment. Anthropology Minors have first consideration for enrollment. Archaeology Minors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Economics Minors have first consideration for enrollment.

**ANTHRO 125A. Economic Anthropology. 4 Units.**

Economic systems in comparative perspective: production, distribution, and consumption in market and non-market societies; agricultural development in the third world.

Prerequisite: One course in general science, anthropology, economics, geography, or sociology.

Same as ECON 152A.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment. Anthropology Majors have first consideration for enrollment.

**ANTHRO 125B. Ecological Anthropology. 4 Units.**

Studies relationships between human communities and their natural environments. The role of environment in shaping culture; effects of extreme environments on human biology and social organization; anthropologist's role in studying global environmental problems, e.g., African famine, tropical rain forests destruction.

Prerequisite: ANTHRO 2A or ANTHRO 2B or ANTHRO 2C

**ANTHRO 125C. Environmental Anthropology. 4 Units.**

Introduces students to anthropological and qualitative research on the relationship of humans, non-humans, and environments. Focuses on how to analyze and evaluate social and cultural differences in environmental perception, relations, justice, governance, sustainability, and cosmology.

Prerequisite: ANTHRO 2A or ANTHRO 2B or ANTHRO 2C or ANTHRO 2D

**(III)****ANTHRO 125F. Humans and Other Animals. 4 Units.**

Explores peoples' relationships with other animals, a topic that continues to shape anthropological understandings of humanness, culture, and the social. Subthemes: symbol and matter, nature/culture, ontologies, relations, moralities, ecologies, futures.

Prerequisite: ANTHRO 2A or ANTHRO 2B or ANTHRO 2D

**ANTHRO 125S. The Anthropology of Money. 4 Units.**

Anthropological approaches to money; impact of money on subsistence economies; cultural history of money; and modern transformations of money. Students conduct ethnographic research on alternative money practices in Southern California, and create an online exhibition and research paper.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 125U. Immigration, Nation, and Media. 4 Units.**

Examines media shapes and reflects public opinion on immigration and its representation of immigrants, citizens, and ideas about the nation, and who belongs and who is a potential threat; as well as the relationship between scholars and journalists.

Same as CHC/LAT 123, SPSS 101A.

**ANTHRO 125X. Transnational Migration. 4 Units.**

Examines the movement of people across national borders, governmentality and the role of state practices to control populations, and issues of citizenship, belonging, and identity. Examples are drawn from the United States, Europe, Latin America, Asia, and Africa.

Same as CHC/LAT 161, INTL ST 117A.

**(VIII)****ANTHRO 125Z. Islam in America. 4 Units.**

Offers a critical academic study of Islam in America, focusing on the core tenets of belief, the diversity of practices, and historical transformations that have taken place since the arrival of Muslims in the United States.

Same as ASIANAM 142.

**ANTHRO 126. Cultures of the Middle East. 4 Units.**

The diversity of cultures and peoples who constitute the Middle East demonstrates the failure of much contemporary media and discourse to understand this region. Students learn about the broad scope of the contemporary Middle East through an ethnographic lens.

Restriction: Anthropology Majors have first consideration for enrollment. Anthropology Minors have first consideration for enrollment.

**ANTHRO 126A. Elite Cultures. 4 Units.**

The distinctive contribution that ethnographic studies have made to the understanding of elites past and present, in particular societies and globally.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 127. Controversies, Courts, Cultures: The Anthropology of Law. 4 Units.**

Assesses the contributions anthropology has made to legal scholarship, reviewing historical and contemporary themes. Considers both comparative questions of law's norms, structures, and practices around the globe, and the specific insights anthropology offers about contemporary U.S. law.

Same as CRM/LAW C183.

**(III)****ANTHRO 127A. Law and Modernity. 4 Units.**

The rise and spread of Enlightenment legal traditions, social contract theory, individual rights, ideologies of 'liberty, equality, fraternity'; contradictions of liberal law, its understandings of 'primitive' and 'civilized'; pervasive myths of property, difference, race, and rights. Reading- and writing-intensive.

Same as CRM/LAW C191.

**ANTHRO 127B. Global Migrations, Anthropology, and the Law. 4 Units.**

Course explores how cultural contexts and national laws frame migration, and define categories of migrants, families, and people. Topics include illegality, transnational families, refugees and economic migrants, labor conditions, deportation practices, discipline and crime, citizenship controversies, and nativism.

**ANTHRO 128A. Science, Technology, Controversy. 4 Units.**

Explores ways in which the social sciences conceive of science as a sociocultural practice. Emphasis on literature in Science and Technology Studies (STS), especially writings that concern the relationship of science to space and place, power, and politics.

Restriction: Anthropology Majors only.

**ANTHRO 128B. Race, Gender, and Science. 4 Units.**

Perfect for pre-health, science and social science majors wanting to appreciate how science and society interact. Race and gender as biological and socio-cultural constructs are examined. Questions explored: What is disease? What is science? What are social and biological differences.

Same as CHC/LAT 176.

**(VII)****ANTHRO 128C. Digital Cultures . 4 Units.**

Explores cultural and political implications of the infotech revolution and the ways new media are used around the world, new cultural practices and spaces (e.g., cybercafes), debates surrounding the meanings of these new technologies, and their implications for transforming society.

Prerequisite: ANTHRO 2A and (ANTHRO 2B or ANTHRO 2C or ANTHRO 2D)

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 129. Special Topics: Social and Economic Anthropology. 1-4 Units.**

Studies in selected areas of Social and Economic Anthropology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 132A. Psychological Anthropology. 4 Units.**

Cultural differences and similarities in personality and behavior. Child-rearing practices and consequent adult personality characteristics, biocultural aspects of child development and attachment, culture and behavior evolutionary models, politically linked personality, cognitive anthropology, psychology of narrative forms, comparative national character studies.

Prerequisite: ANTHRO 2A or PSYCH 7A or (PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C)

Same as PSYCH 173A.

Restriction: Psychology Majors have first consideration for enrollment.

**ANTHRO 134A. Medical Anthropology. 4 Units.**

Introduces students to cross-cultural perspectives and critical theories in anthropological studies of medicine. Special attention is given to diverse ways of understanding bodies, illnesses, and therapeutic practices in our changing world.

Same as CHC/LAT 178A.

**(VIII)**

**ANTHRO 134B. Cultures of Biomedicine. 4 Units.**

An introduction to the anthropological study of biomedicine and biotechnology. Topics include medicalization, experimentation and discovery, diagnosis, expertise, health activism, and biotechnology.

**ANTHRO 134C. Medicine, Food, and Health. 4 Units.**

With anthropological studies of edible things as its foundation, this course explores topics related to the relationship between medical knowledge, eating, and health from a medical anthropological perspective.

Prerequisite: ANTHRO 2A or ANTHRO 2B or ANTHRO 2D

**ANTHRO 134F. Anthropology of the Body. 4 Units.**

Examines human bodies as both biological and sociocultural entities and explores the relationship among mind, body, and society cross-culturally. Topics include embodiment; race, sex, gender, and the body; somatization; control of the body; commodified bodies; and hybrid/cyborg bodies.

**ANTHRO 134G. HIV/AIDS in a Global Context. 4 Units.**

Examines issues concerning cultural conceptions of HIV infection and disease worldwide. Topics include treatment and prevention, identity and behavior, risk, ethnicity, gender, youth, sexuality, activism, drug use, illness, religion, the clinical encounter, national belonging, and the pharmaceutical industry.

**(VIII)**

**ANTHRO 134H. Anthropology of Food. 4 Units.**

Examines how food communicates ideas about ethnocentrism, disgust, privilege, gender, race, labor, social identities and hierarchies, globalization, power, and the 'Western diet' and its health consequences.

Same as CHC/LAT 118.

**ANTHRO 134N. Disease, Health, and Inequality. 4 Units.**

Examines the relationships among disease, health, and social inequality in the U.S. and globally. Topics include infectious and chronic disease case studies, health policy, and strategies for promoting health equity.

**ANTHRO 135A. Religion and Social Order. 4 Units.**

An anthropological exploration of religious belief and practices in diverse social and historical contexts. Emphasis placed on selected non-western traditions of the sacred, and on issues of power, ritual, moral order, and social transformation.

**ANTHRO 136A. Nationalism and Ethnicity in the Contemporary World. 4 Units.**

An exploration of the concepts of identity, culture, ethnicity, race, and nation through ethnographic cases, with a view to asking larger questions: how do people create nativeness and foreignness? How does 'culture' get worked into contemporary racisms and nationalisms.

Same as INTL ST 153E.

(VIII)

**ANTHRO 136B. History of Anthropological Theory. 4 Units.**

Provides foundational knowledge in the discipline of anthropology by reviewing competing approaches in anthropological theory, from the nineteenth century to the present. Covers historically fundamental approaches—social evolutionism, functionalism—and recent movements such as feminism, cultural studies, poststructuralism, and postmodernism.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 136D. Conflict Resolution in Cross-Cultural Perspective. 4 Units.**

Examines theories of conflict management. Analyzes how conflict is mitigated in diverse cultures: at the interpersonal level, between groups, and on the international scale. Students discuss readings, hear from conflict management practitioners, and simulate negotiations.

Same as POL SCI 154G, SOC SCI 183E, INTL ST 183E.

(VIII)

**ANTHRO 136G. Colonialism and Gender. 4 Units.**

An anthropological enquiry into the ways colonial relations of power have been structured and gendered throughout the world, and to what effect. Examines the social locations of men and women in the everyday exercise of colonial and imperial power.

Same as INTL ST 153D.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 136K. The Woman and the Body. 4 Units.**

Probes culture and politics of the female body in contemporary American life. Focusing on 'feminine beauty,' examines diverse notions of beauty, bodily practices, and body politics embraced by American women of different classes, ethnicities, and sexualities.

(VII)

**ANTHRO 138. Prisons and Public Education. 4 Units.**

Looks at the connections between schools and prisons in the United States. Students learn about ideas that push beyond common trope of the "school to prison pipeline."

Same as AFAM 159.

**ANTHRO 139. Special Topics in Cultural and Psychological Anthropology. 1-4 Units.**

Studies in selected areas of Cultural and Psychological Anthropology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 140. Sex and Conquest in Latin America. 4 Units.**

Competing ideas of masculinity and femininity, sexual violence, sexual identities, and gendered hierarchies informed how the Spanish engaged in military and religious domination of Mexican and Andean communities, as well as the forms of native resistance throughout colonial Latin America.

Same as HISTORY 160, CHC/LAT 150A, GEN&SEX 171A.

**ANTHRO 141A. Ancient Civilization of Mexico and the Southwest. 4 Units.**

The prehistory and cultural evolution of the civilization which originated in Mexico, including the Olmecs, Aztecs, Toltecs, Maya, and Zapotec, as well as the Pueblos of the Southwestern U.S. Topics include the origins of food production and of the state.

Same as INTL ST 177I.

**ANTHRO 146. Consumption and Culture. 4 Units.**

Our modern 'society of the spectacle' often equates your consumption to your very humanity. Explores the ways in which our desire for things expresses our identity, politics, place within society, and how what we consume dominates social life.

Restriction: Anthropology Majors have first consideration for enrollment. Anthropology Minors have first consideration for enrollment.

**ANTHRO 147. Egyptomania. 4 Units.**

An exploration into the archaeological heritage and cultures of ancient Egypt. Also examines how ancient Egypt became appropriated as a popular cultural phenomenon and site of scholarship in the centuries after the Pharaohs.

Restriction: Anthropology Majors have first consideration for enrollment. Anthropology Minors have first consideration for enrollment. Archaeology Minors have first consideration for enrollment.

**ANTHRO 147A. Archaeology of the Islamic World. 4 Units.**

The archaeological record connected with the Islamic tradition spans nearly 1,500 years and stretches from Spain to South East Asia. Working with artifacts and other materials, students learn about the sites and historical transformations associated with Islam and Muslim societies.

Restriction: Anthropology Majors have first consideration for enrollment. Anthropology Minors have first consideration for enrollment. Archaeology Minors have first consideration for enrollment.

**ANTHRO 147B. Archaeology, Politics, and Identity. 4 Units.**

Archaeologists don't excavate in a political vacuum. Their research has profound consequences for the ways in which people identify with and claim their cultural heritage. Examines archaeology's role in constructing such identities through the traces of the past.

Restriction: Anthropology Majors have first consideration for enrollment. Anthropology Minors have first consideration for enrollment. Archaeology Minors have first consideration for enrollment.

**ANTHRO 148. I Dig UCI. 4 Units.**

An introduction to archaeological fieldwork through participation in an active excavation on campus. Students engage with research design and learn the foundational methods of archaeological recovery: survey, mapping, sampling strategies, documentation, excavation, artifact identification, and interpretation.

**ANTHRO 149. Special Topics in Archaeology. 1-4 Units.**

Studies in selected areas of Archaeology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 150A. Language and Social Cognition. 4 Units.**

Explores the relationship between language and cognition in social and cultural contexts. The overall goal is to think through how language structure and use impact how individuals perceive, think about, and understand the world around them.

Same as LSCI 168S.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 151A. Improvisation, Language, and Culture. 4 Units.**

Addresses improvisation, both in performance and in everyday life. Examines improvisation as the 'flexible regulation' of everyday behavior by exploring different scholarly treatments of language and interaction, and working on developing actual theatrical improvisation skills.

Same as LSCI 168J.

Restriction: Upper-division students only.

**ANTHRO 152A. Language Origins: Evolution, Genetics, and the Brain. 4 Units.**

Examines how human language(s) may have originated. Studies pertinent techniques (reconstruction) and addresses related questions, including is our language faculty inborn (i.e., genetically encoded)? Can brain imaging and population genetics research help to unlock this mystery of human evolution?.

Same as LSCI 175, GLBLCLT 105, HISTORY 135G.

**ANTHRO 162A. Peoples and Cultures of Latin America. 4 Units.**

Surveys the prehistory of Latin America and its indigenous cultures, emphasizing the impact of colonial rule, capitalism, and twentieth-century transformations. Emphasis on communities from several countries. In some years, emphasis on comparisons between the Latin American and Caribbean experiences.

Same as INTL ST 177J, CHC/LAT 120.

(VIII)

**ANTHRO 162B. Indian North America. 4 Units.**

A survey of indigenous peoples in North America: American Indians, Alaska Natives, First Nations, Native Americans. Tribal populations and geographic distributions, political and social organization, sovereignty, self-determination, intergovernmental relations; cultural continuity and change; management, preservation, development of environments/resources.

**(VII)****ANTHRO 162C. Race and Empire in Colonial Latin America. 4 Units.**

Explores how native people of Latin America with enslaved and free African incorporated and defied Spanish and Portuguese colonization. Focuses on religious adaptations, resistance movements, legal systems, and the emergence of multicultural communities to explain how race shaped European empires.

Same as HISTORY 165.

**ANTHRO 162D. Anthropology of the United States. 4 Units.**

Examines anthropological research in and of the United States. Topics include race, class, identity, politics, law, and media.

**ANTHRO 163A. Peoples of the Pacific. 4 Units.**

The cultural history and recent developments among the Pacific peoples of Polynesia, Micronesia, Melanesia, New Guinea, and Australia.

Same as INTL ST 158B.

**(VIII)****ANTHRO 164A. 21st Century Africa. 4 Units.**

Comparative studies of the cultures and societies of Sub-Saharan Africa, with emphasis on critical study of colonialism and postcoloniality, social transformation, and the politics of identity.

Prerequisite: ANTHRO 2A

Same as INTL ST 157A.

Restriction: Anthropology Majors have first consideration for enrollment.

**(Ib)****ANTHRO 164P. Peoples and Cultures of Post-Soviet Eurasia. 4 Units.**

Examines the cultures and political conflicts of the more than 130 indigenous ethnic groups in the European and Asian territories of the former U.S.S.R. Emphasis is on the theoretical issues of ethnicity, nationalism, and conflict management.

Same as INTL ST 162B, POL SCI 154F.

**(VIII)****ANTHRO 165A. Modern Iran: Cinema and the City. 4 Units.**

Exploring modern Iran through film, literature, photography, travel writing, and philosophy and social science texts that introduce students to important concepts in post-colonial studies, social thought, war culture, religion, and media as experienced through the paradigm of a non-Western modernity.

Same as PERSIAN 165A.

**ANTHRO 169. Special Topics in Area Studies. 1-4 Units.**

Studies in selected areas of Anthropology. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 179. Special Topics: Methods and Formal Representations. 1-4 Units.**

Studies in selected areas of Methods and Formal Representations. Topics addressed vary each quarter.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 180AW. Anthropology Majors Writing Seminar. 4 Units.**

Anthropological theory designed especially for majors in Anthropology. Topics addressed vary each quarter.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 3 times as topics vary.

Restriction: Anthropology Majors only.

**(Ib)****ANTHRO 190. Senior Thesis. 4 Units.**

Senior thesis with Anthropology faculty.

Repeatability: May be taken for credit 3 times.

**ANTHRO H190A. Honors Research Design. 3 Units.**

Students design a research project and articulate its goals and significance. Written work consists of a research proposal describing the research questions, the relevant literature, methods of data collection and analysis, and ethical considerations.

Prerequisite or corequisite: ANTHRO 199

Restriction: Anthropology Honors students only.

**ANTHRO H190B. Honors Field Research. 3 Units.**

Students begin or continue ethnographic field research and gain experience with a variety of data collection methods, including participant-observation, interviews, surveys, and the study of archival and documentary materials.

Prerequisite or corequisite: ANTHRO 199 and ANTHRO H190A

Restriction: Anthropology Honors students only.

**ANTHRO H190C. Honors Research Analysis. 3 Units.**

Students apply qualitative data analysis techniques to ethnographic data collected as part of their Honors research.

Prerequisite or corequisite: ANTHRO H190B and ANTHRO 199. Anthropology Honors ONLY.

**ANTHRO H190W. Honors Thesis Writing. 3 Units.**

Students draft a senior honors thesis (typically) with the following sections: problem statement, literature review, ethnographic background, and descriptions of the methods, results, and conclusions.

Prerequisite or corequisite: ANTHRO H190C and ANTHRO 199. Anthropology Honors ONLY. Satisfactory completion of the Lower-Division Writing requirement.

**(Ib)****ANTHRO 197. Field Study. 1-4 Units.**

Field study with Anthropology faculty.

Repeatability: May be repeated for credit unlimited times.

**ANTHRO 198. Directed Group Study. 1-4 Units.**

Directed study with Anthropology faculty.

Repeatability: May be repeated for credit unlimited times.

**ANTHRO 199. Independent Study. 1-4 Units.**

Independent research with Anthropology faculty.

Repeatability: May be repeated for credit unlimited times.

**ANTHRO 202A. Proseminar in Anthropology. 4 Units.**

Year-long intensive introduction to the history of anthropological thought and reading in classical and contemporary ethnography for first-year graduate students.

Restriction: Graduate students only.

**ANTHRO 202B. Proseminar in Anthropology. 4 Units.**

Year-long intensive introduction to the history of anthropological thought and reading in classical and contemporary ethnography for first-year graduate students.

Prerequisite: ANTHRO 202A

Restriction: Graduate students only.

**ANTHRO 202C. Proseminar in Anthropology. 4 Units.**

Year-long intensive introduction to the history of anthropological thought and reading in classical and contemporary ethnography for first-year graduate students.

Prerequisite: ANTHRO 202B

Restriction: Graduate students only.

**ANTHRO 204A. Proseminar in Medicine, Science, and Technology. 4 Units.**

Explores the phenomena studied by 'medical anthropology' and 'science and technology studies' are inextricably linked, and how understanding formations requires moving between disparate fields of inquiry. Required for students pursuing a Graduate Certificate in Anthropologies of Medicine, Science, and Technology.

Restriction: Students pursuing a Graduate Certification in Anthropologies of Medicine, Science, and Technology have first consideration for enrollment.

**ANTHRO 215A. Ethnographic Methods. 4 Units.**

Exposes students to diverse methods, both traditional and experimental, used in anthropological ethnographic research. Students gain experience practicing diverse methods, and learn to select methods appropriate to particular study designs and contexts.

Restriction: Graduate students only.

**ANTHRO 215B. Research Design. 4 Units.**

Introduces research design for anthropology, including concept work and mapping, research topic and aims development, research question construction, and fieldwork planning.

Prerequisite: ANTHRO 215A

Restriction: Graduate students only.

**ANTHRO 215C. Grant and Proposal Writing. 4 Units.**

Focuses on production, critique, and revision of student research proposals. A practical seminar designed to improve student proposals, help students through the application processes, and increase students' chances of obtaining support for their research.

Prerequisite: ANTHRO 215B

Restriction: Graduate students only.

**ANTHRO 229A. Anthropology of Knowledge. 4 Units.**

Examines the politics of knowledge. Considers the long history of anthropological studies concerning a wide variety of knowledge forms and practices, including more recent feminist and postcolonial studies. Aims to investigate and enlarge normative definitions of knowledge and science.

**ANTHRO 230D. Ethnography and its Collaborative Futures. 4 Units.**

Structured readings of selected career-making ethnographic works, past and present, with an emphasis on how ethnographic projects evolve into diverse, collaborative projects.

**ANTHRO 230F. Ethnography. 4 Units.**

Explores the theory and practice of ethnography with a focus on anthropology, the discipline most associated with ethnography. Students are exposed to the theoretical underpinnings of ethnographic work, traditional and innovative practices, and sample ethnographies.

Same as CRM/LAW C222, CHC/LAT 217.

Restriction: Graduate students only.

**ANTHRO 232B. Medical Anthropology. 4 Units.**

Explores historical and contemporary theoretical positions and debates in medical anthropology. Topics may include subjectivity, theories of the body, biopolitics, biomedical technologies, sexuality, pharmaceuticals, political economy and health, infectious disease and epidemics, health disparities, and humanitarianism.

Restriction: Students pursuing a Graduate Certification in Anthropologies of Medicine, Science, and Technology have first consideration for enrollment.

**ANTHRO 235A. Transnational Migration. 4 Units.**

Examines borders and boundaries as material and semiotic constructs. Drawing upon an array of literatures, but loosely situated in U.S. geo/biopolitics, explores transformative troubleings of places, spaces, borders, and bodies of all sorts.

Same as SOC SCI 254A, CHC/LAT 215.

Restriction: Graduate students only.

**ANTHRO 240A. Economic Anthropology. 4 Units.**

Classic and contemporary theory in economic anthropology. Case studies: Latin America (primarily Mexico and the Andes), Africa, and the Pacific. Substantive topics: non-market exchange, markets and marketplaces, households, gender, management of common property (fisheries, pastoral lands, forests), labor, and development.

Restriction: Graduate students only.

**ANTHRO 245A. Seminar in Political Anthropology. 4 Units.**

Explores anthropological approaches to politics. Covers a range of issues and topics, including: theories of culture, power, and hegemony; approaches to colonial and post-colonial relations of global inequality; and ethnographic approaches to the modern state.

Restriction: Graduate students only.

**ANTHRO 246. Feminist Anthropology. 4 Units.**

Examines feminist anthropology's rise as an interdisciplinary field. Paying special attention to issues of power, subjectivity, and authority in the research encounter, feminist anthropologists' major contributions to ethnography, gender studies, queer studies, and cultural anthropology are surveyed.

Restriction: Graduate students only.

**ANTHRO 246E. Capital and Empire. 4 Units.**

Examines theories of capital and empire via anthropological theory, post/colonial critique, feminist theory, and Black political thought. Moreover, it examines social movements, geo/political trajectories and formations, and political economic trends that have emerged after the 2008 financial crisis.

Restriction: Graduate students only.

**ANTHRO 247A. Structuralism and Post-Structuralism. 4 Units.**

Traces recent theoretical discussions and arguments over the philosophical and historical 'subject' from structuralist decenterings toward the characteristically 'post-structuralist' contemporary concern with the historical and political constitution of subjectivities and subject positions.

Restriction: Graduate students only.

**ANTHRO 249A. Humanism and Posthumanism. 4 Units.**

Examines alternative forms of human, humanisms, and posthumanisms to explore the inherent ambiguities and shifting boundaries of knowing and being human, and to venture into modes of analysis that problematize the universality and globality of liberal humanism.

**ANTHRO 250A. The Cultural Politics of Visual Representation. 4 Units.**

Develops a theoretical framework for analyzing and reading visual images. Images, as cultural productions, are steeped in the values, ideologies, and taken-for-granted beliefs of the culture which produced them and a political economy that is class, race, and gender inflected.

**ANTHRO 250B. Digital Technologies, Culture, and Media. 4 Units.**

Explores questions of sociality in cyberspace, including what social theories and ethnographic methods are effective in studying online cultures. Topics include general issues like indexicality, reference, temporality, spatiality, and embodiment, and topics such as language, gender, ethnicity, property, and inequality.

Restriction: Graduate students only.

**ANTHRO 252A. Queer Anthropology. 4 Units.**

Explores historical and contemporary scholarship that employs ethnographic approaches to address the discursive construction of sexuality. Also examines how the discipline of anthropology has been shaped by the study of sexuality.

Restriction: Graduate students only.

**ANTHRO 253A. Design, Aesthetics, and Social Life. 4 Units.**

Anthropology has only recently recognized that design demands consideration as a cultural form linked to, yet nonetheless distinct from, other aesthetic endeavors. Course is largely oriented toward collaboratively working out a conceptual basis for a distinctly anthropological approach to design.

**ANTHRO 254. Digital Anthropology. 4 Units.**

Examines “the digital” from an anthropological perspective by exploring ethnographic research on digital culture and using anthropological frameworks to approach the digital and the human. Readings are interdisciplinary, including work from history and communications.

Restriction: Graduate students only.

**ANTHRO 255A. Disability Worlds. 4 Units.**

Explores disability from a range of methodological and theoretical perspectives. Examines the genealogy of disability in anthropology and related disciplines, with an emphasis on ethnographic work. Topics addressed include access, embodiment, politics, selfhood, and sexuality.

Restriction: Graduate students only.

**ANTHRO 256B. Secrecy, Security, and Surveillance. 4 Units.**

Explores secrecy and security as fundamental to constructions of public and private domains, relations of citizenship and sovereignty, the militarization of everyday life, and the ways that the fabrics of societies are woven of both trust and deceit.

Restriction: Graduate students only.

**ANTHRO 257A. Natures and Environments. 4 Units.**

Examines social scientific understandings of natural contexts and human milieus via a survey of key analytic categories. Begins by examining historical and ongoing definitions and problems organized around “nature” and “environment” as separate but imbricated concepts.

**ANTHRO 259A. Dissertation Writing Seminar. 4 Units.**

Intended for advanced, post-fieldwork Anthropology graduate students. Emphasis on the presentation of research design and results, problems of ethnographic writing, and qualitative and quantitative data and analysis. Prerequisites: post-fieldwork; graduate standing in Anthropology or consent of instructor.

Restriction: Graduate students only.

**ANTHRO 289. Special Topics in Anthropology. 1-4 Units.**

Studies in selected areas of Anthropology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ANTHRO 290. Dissertation Research. 4-12 Units.**

Dissertation research with Anthropology faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ANTHRO 299. Independent Study. 4-12 Units.**

Independent research with Anthropology faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Anthropology, B.A.

The major in Anthropology prepares students to embark on a wide range of careers, to pursue graduate studies, and to continue to learn and achieve in our culturally diverse world. The curriculum develops students' knowledge and skills, including (1) an understanding of cultural diversity and global relationships; (2) the fundamentals of conducting research and analyzing sources of information through ethnographic and other anthropological techniques; and (3) communication skills in organizing and presenting information in written reports and oral presentations.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

**Departmental Requirements for the Major**

School Requirements must be met and must include 12 courses (48 units) as specified below:

A. Complete the following:

ANTHRO 2A	Introduction to Sociocultural Anthropology
-----------	--

B. Select one of the following:

ANTHRO 2B	Introduction to Biological Anthropology
ANTHRO 2C	Introduction to Archaeology
ANTHRO 2D	Introduction to Language and Culture
C. Select one of the following:	
ANTHRO 2B	Introduction to Biological Anthropology
ANTHRO 2C	Introduction to Archaeology
ANTHRO 2D	Introduction to Language and Culture
ANTHRO 20A-89	
D. Complete the following:	
ANTHRO 100A	Ethnography and Anthropological Methods
ANTHRO 100B	Anthropology Careers
ANTHRO 180AW	Anthropology Majors Writing Seminar
E. Select six additional elective courses from the following:	
ANTHRO 120-179	

The four-quarter Honors Program in Anthropology is designed to allow undergraduates to pursue field research and write an honors thesis on a topic of their choice under the guidance of Department of Anthropology faculty members. Research projects typically involve a combination of library research, exploratory ethnographic interviews, participant observation, and systematic data collection and analysis.

Admission to the program is based on a formal application that is normally submitted in the winter quarter of the junior year. Please see the Department of Anthropology website (<https://www.anthropology.uci.edu/>) for detailed information. Applicants must be Anthropology majors with an overall grade point average of 3.3 and a grade point average of at least 3.5 in Anthropology major courses. Prior completion of, or concurrent enrollment in ANTHRO 100A is required. Successful completion of the honors program and the honors thesis satisfies the upper-division writing requirement.

Students who are accepted into the honors program complete a four-quarter honors seminar series beginning in spring quarter of their junior year. Students will write a proposal describing their research questions, the relevant background literature, and the methods of data collection and analysis (ANTHRO H190A); conduct ethnographic field research (ANTHRO H190B); apply qualitative data analysis methods to their research data (ANTHRO H190C); and write a senior honors thesis that is typically 40 to 80 pages long (ANTHRO H190W). Each quarter, students must concurrently be enrolled in one unit of ANTHRO 199 with their thesis advisor. Honors theses are read and evaluated by the advisor and the Undergraduate Program Director.

The faculty encourages Anthropology majors or minors to study abroad and experience a different culture while making progress toward degree objectives. The Study Abroad Center, which includes the UC Education Abroad Program (EAP) and the International Opportunities Program (IOP), assists students in taking advantage of many worldwide opportunities. For example, UCEAP offers excellent opportunities to study anthropology at many universities abroad; courses taken abroad can be used to fulfill departmental requirement C, D, and E. Study abroad also can provide opportunities for cross-cultural experience, field research, and foreign language training. The Undergraduate Research Opportunities Program (UROP) provides funding for independent field research. See the Study Abroad Center and the Undergraduate Research Opportunities Program sections of the *Catalogue* for additional information.

## Anthropology, Minor

Anthropology is the comparative study of past and present human societies and cultures. The Department of Anthropology at UCI is at the forefront of addressing issues in contemporary theory and ethnographic methods within the discipline. The department has a strong interdisciplinary bent, with research and teaching interests in economic anthropology, political and legal anthropology, the anthropology of finance, social history and social change, identity and ethnicity, gender and feminist studies, urban anthropology, and more. Undergraduate minors are welcome to participate in the activities of the Undergraduate Anthropology Club. Undergraduates are also encouraged to join Lambda Alpha, the anthropology Honors Society.

### Anthropology Minor Requirements

Requirements for the minor in Anthropology are met by taking seven Anthropology courses (28 units) as specified below:

A. Complete the following:	
ANTHRO 2A	Introduction to Sociocultural Anthropology
B. Select one of the following:	
ANTHRO 2B	Introduction to Biological Anthropology
ANTHRO 2C	Introduction to Archaeology
ANTHRO 2D	Introduction to Language and Culture
C. Select one of the following:	
ANTHRO 30A	Global Issues in Anthropological Perspective
ANTHRO 100B	Anthropology Careers

D. Select four courses (16 units) from the following:

ANTHRO 120–179

## Anthropology, Ph.D.

The Department of Anthropology offers a Ph.D. program in Anthropology. The program focuses on social and cultural anthropology, with a strong focus on understanding emergent processes and systems at a number of scales, including the national and transnational level. Areas of teaching emphasis include the anthropology of modernity and development; political, legal, and economic anthropology; ethnographic method; and the anthropology of science, technology, and medicine. In addition, Ph.D. students have the option of enrolling in a Feminist Studies or a Critical Theory emphasis, both of which involve interdisciplinary work with departments and centers in the School of Humanities.

The Department's faculty members have interests in ethnicity, gender, international migration, science, technology and medicine, law and finance, urban anthropology, youth culture, and social networks. The program also provides rigorous training in ethnographic method. The Department is committed to fostering new and innovative approaches to anthropological inquiry in a pluralistic and intellectually open academic environment. Program faculty take diverse theoretical and methodological approaches to a variety of substantive issues. They are united, however, in a willingness to question taken-for-granted theoretical premises and analytic frames, and to engage in good-faith intellectual dialogue about alternative models and approaches.

Students are admitted to the program based on their application materials and evidence of scholarly potential, including grade point average and letters of recommendation.

Successful applicants to our program excelled in their undergraduate work and have demonstrated strong intellectual capabilities and creativity in pursuit of their scholarly goals. The program does not require nor do we consider the Graduate Record Examination (GRE) as apart of the application process. The program gives primary consideration to an applicant's statement of purpose, letters of recommendation, and writing sample.

Students must complete a one-year Proseminar in Anthropology (ANTHRO 202A-ANTHRO 202B-ANTHRO 202C) during their first year. In their second year, students are required to complete a three-course sequence in ethnographic methods, research design, and grant writing (ANTHRO 215A, ANTHRO 215B, ANTHRO 215C). Students are also required to complete six elective courses in Anthropology, which are selected in consultation with their advisor and which normally cover a coherent area of specialization within the field. All course work must be completed before a student is advanced to candidacy. Students must demonstrate competence to read one foreign language, in accordance with the requirements of the Ph.D. in Anthropology.

At the end of the first year, students must pass a formal evaluation which is made by the Department on the basis of the first-year course work and examinations to be taken as part of the Proseminar. Students should advance to candidacy by the end of the third year; the advancement to candidacy examination is based on a research proposal, a review of relevant literature, and an annotated bibliography. The fourth (and, in many cases, some or all of the fifth) year is normally devoted to extended anthropological fieldwork. The sixth year (in some cases, also part of the fifth) is devoted to writing the dissertation, in close consultation with the advisor. The normative time for completion of the Ph.D. is seven years, and the maximum time permitted is eight years.

### Program in Law and Graduate Studies (J.D./Ph.D.)

Highly qualified students interested in combining the study of law with graduate research and/or professional qualifications in Anthropology are invited to undertake concurrent degree study under the auspices of UC Irvine's Program in Law and Graduate Studies (PLGS). Students in this program pursue a coordinated curriculum leading to a J.D. from the School of Law in conjunction with a Ph.D. in Anthropology. Additional information is available from the PLGS Program Director's office, 949-824-4158, or by email to [plgs@law.uci.edu](mailto:plgs@law.uci.edu). A full description of the program, with links to all relevant application information, can be found at the School of Law Concurrent Degree Programs website (<http://www.law.uci.edu/academics/interdisciplinary-studies/concurrent-degrees.html>).

## Medical Anthropology, Minor

The Medical Anthropology Minor is designed for students seeking expertise in cross-cultural understandings of illness, medicine, and the body. Students learn to analyze the experience and meanings of illness; understandings of the human body; cross-cultural mental health; social and political disease ecologies; medical practice and biotechnologies; and relationships among gender, race, class, medicine, and science.

A particular emphasis is on the political and economic forces that shape disease burdens and the contributions medical anthropology can make to efforts to achieve global health equity. The minor is open to students in any school and offers excellent preparation for students interested in careers in clinical medicine, nursing, pharmacy, biological research, public health, and environmental health.

### Medical Anthropology Minor Requirements

Requirements for the minor in Medical Anthropology are met by taking seven Anthropology courses (28 units) as specified below:

A. Complete the following:

ANTHRO 2A	Introduction to Sociocultural Anthropology
-----------	--

B. Select one of the following:

ANTHRO 2B	Introduction to Biological Anthropology
-----------	---

ANTHRO 2C	Introduction to Archaeology
ANTHRO 2D	Introduction to Language and Culture
C. Select one of the following:	
ANTHRO 30A	Global Issues in Anthropological Perspective
ANTHRO 100B	Anthropology Careers
D. Complete:	
ANTHRO 134A	Medical Anthropology
E. Select three topical courses (12 units) from the following:	
ANTHRO 25A	Environmental Injustice
ANTHRO 121D	Cross-Cultural Studies of Gender
ANTHRO 125F	Humans and Other Animals
ANTHRO 128A	Science, Technology, Controversy
ANTHRO 128B	Race, Gender, and Science
ANTHRO 132A	Psychological Anthropology
ANTHRO 134B	Cultures of Biomedicine
ANTHRO 134C	Medicine, Food, and Health
ANTHRO 134F	Anthropology of the Body
ANTHRO 134G	HIV/AIDS in a Global Context
ANTHRO 134N	Disease, Health, and Inequality
ANTHRO 136K	The Woman and the Body
ANTHRO 139	Special Topics in Cultural and Psychological Anthropology (special topics, by petition to the Undergraduate Director)
SOCIOL 154	Medical Sociology

**Residence Requirement for the Minors:** The four required upper-division courses must be completed successfully at UCI. Two of the four may be taken through the UC Education Abroad Program, provided course content is approved in advance by the Undergraduate Director of the Department of Anthropology.

NOTE: Students may complete only one of the following programs: the major in Anthropology, the minor in Anthropology, or the minor in Medical Anthropology.

## Department of Chicano/Latino Studies

**Louis DeSipio, Department Chair**

383 Social Science Tower

949-824-1420

<http://www.chicanolatinostudies.uci.edu/>

Chicano/Latino Studies is an interdisciplinary Department organized to provide undergraduate and graduate students with the opportunity to examine the historical and contemporary experiences of Americans of Latino origin or ancestry. This diverse population includes people who trace their heritage to Mexico, Puerto Rico, Cuba, El Salvador, Guatemala, Nicaragua, and other Latin American and Caribbean nations. The curriculum is designed to provide an awareness, knowledge, and appreciation of the language, history, culture, literature, sociology, anthropology, politics, social ecology, health, medicine, and creative (art, dance, drama, film, music) accomplishments of Chicano/Latino communities. The Department offers a B.A. in Chicano/Latino Studies, an undergraduate minor, and a graduate emphasis.

### Scholarship Opportunities

The **Jeff Garcilazo Fellowship/Scholarship Fund**, established in honor and memory of the late Chicano/Latino Studies and History professor, provides opportunities for students to examine the historical and contemporary experiences of Latino communities. The Jeff Garcilazo Prize is awarded annually to the undergraduate student author(s) of the best research paper(s) in Chicano/Latino Studies.

The **Hispanic Scholarship Fund (HSF)**, formerly the National Hispanic Scholarship Fund, awards scholarships annually to students enrolled in and attending an accredited college full-time from the fall through the spring (or summer) terms. More information is available at the Hispanic Scholarship Fund (<http://www.hsf.net/>) website (<http://www.hsf.net/>).

### Career Opportunities

Chicano/Latino Studies graduates have used their degrees as the foundation for careers in public service, social service, education, the corporate world, and the law. Many also go on to earn M.A. and Ph.D. degrees in Social Science and Humanities disciplines at major universities throughout the nation. What links all of these careers is that the Chicano/Latino Studies major prepares its students for careers that will speak of the needs of Chicano

and Latino communities nationwide and globally. The highest number of the Department's majors have pursued advanced degrees and professional degrees, such as law degrees or advanced teaching credentials. Their training at UCI has served them well in that the list of institutions that they are attending include the nation's best, such as Harvard University, Stanford University, Columbia University, and several University of California campuses.

Others have moved directly into the workforce. Interestingly, many have selected careers that offer the opportunity to ensure that younger Latinos are able to seize the same opportunities the Department's students did and attend four-year colleges and universities. Chicano/Latino Studies majors work as primary and secondary school teachers, work for advocacy organizations focusing on Latino health and children's services, and have taken positions in legislative offices both in California and in Washington, D.C.

## Additional Opportunities

In addition to satisfying the requirements for the major or minor, students are encouraged to take advantage of the variety of unique educational opportunities available at UCI. Through the University's Education Abroad Program (UCEAP), students receive academic credit while studying at universities in Mexico, Chile, Costa Rica, Brazil, or Spain.

Internship opportunities with private and public institutions concerned with the Chicano/Latino communities are available in Orange County, Sacramento, and Washington, D.C. Independent research with faculty on Chicano/Latino issues is also encouraged. Student research is conducted and given academic credit through independent study or group research courses. The Undergraduate Research Opportunities Program (UROP) and the Summer Academic Enrichment Program (SAEP) are examples of programs at UCI which allow students to work as research assistants with professors.

- Chicano/Latino Studies, B.A.
- Chicano/Latino Studies, Graduate Emphasis
- Chicano/Latino Studies, Minor

## Faculty

Belinda Campos, Ph.D. University of California, Berkeley, *Associate Professor of Chicano/Latino Studies; Family Medicine; Psychological Science* (culture, relationships, positive emotion, health)

Anita Casavantes Bradford, Ph.D. University of California, San Diego, *Associate Professor of Chicano/Latino Studies; Asian American Studies; History* (20th century U.S., U.S. in the world, Cuba and the Caribbean; history of childhood; history of immigration, race and ethnicity; transnational and comparative Latina/o history; religion, politics and social movements)

Louis DeSipio, Ph.D. University of Texas at Austin, *Professor of Chicano/Latino Studies; Political Science* (ethnic politics, Latino politics, immigration, naturalization, U.S. electoral politics)

Laura Enriquez, Ph.D. University of California, Los Angeles, *Assistant Professor of Chicano/Latino Studies; Asian American Studies; Sociology* (undocumented 1.5 generation young adults, immigration, citizenship, Latino families)

Raúl A. Fernández, Ph.D. Claremont Graduate University, *Executive Secretary of the UC-Cuba Academic Initiative and Professor Emeritus of Chicano/Latino Studies; Social Sciences*

Glenda M. Flores, Ph.D. University of Southern California, *Associate Professor of Chicano/Latino Studies; Sociology* (Latina/o sociology, gender and work, middle-class minorities, education, urban ethnography)

Gilbert G. Gonzalez, Ph.D. University of California, Los Angeles, *Professor Emeritus of Chicano/Latino Studies; Social Sciences*

Alana Lebron, Ph.D. University of Michigan, *Assistant Professor of Program in Public Health; Chicano/Latino Studies*

Alejandro Morales, Ph.D. Rutgers, The State University of New Jersey, *Professor Emeritus of Chicano/Latino Studies* (Latin American and Chicano literature, film studies)

Rocio Rosales, Ph.D. University of California, Los Angeles, *Assistant Professor of Sociology; Chicano/Latino Studies* (international migration, immigrant and ethnic economics, urban sociology, ethnography, Latino/a studies, race and ethnicity, immigrant detention)

Ana Rosas, Ph.D. University of Southern California, *Associate Professor of Chicano/Latino Studies; History* (Chicana/o comparative history, immigration, ethnicity)

Vicki L. Ruiz, Ph.D. Stanford University, *Professor Emeritus of History; Chicano/Latino Studies* (Chicana/Latina history, U.S. labor, immigration, gender)

Ruben G. Rumbaut, Ph.D. Brandeis University, *Distinguished Professor of Sociology; Chicano/Latino Studies; Criminology, Law and Society; Education* (international migration, immigration laws, criminalization, incarceration, social inequality and mobility, race and ethnicity)

Hector Tobar, M.F.A. University of California, Irvine, *Associate Professor of Chicano/Latino Studies; English* (storytelling, literature, history of Los Angeles, Latin American history, Latino history)

## Courses

### **CHC/LAT 61. Introduction to Chicano/Latino Studies I. 4 Units.**

An introduction to the study of the historical foundations of the Chicano/Latino experience. Addresses such topics as empire, migration, immigrant settlement, economic integration, race, gender, and the formation of group identities.

(III, VII)

### **CHC/LAT 62. Introduction to Chicano/Latino Studies II. 4 Units.**

Provides an introduction to the arts, literature, and culture of Chicano/Latino communities. Analyzes representations of and cultural production in Chicano/Latino communities through such media as folklore, literature, art, film, architecture, dance theatre, performance, music, poetry, mass media, and language.

(III, VII)

### **CHC/LAT 63. Introduction to Chicano/Latino Studies III. 4 Units.**

Examines contemporary public policy issues in Chicano/Latino communities. Each offering addresses at least three of the following themes: migration, immigrant incorporation, identity construction, language policy, health policy, politics, sexuality, gender, labor, class, and education.

(III and VII).

### **CHC/LAT 64. Introduction to Race and Ethnicity in Political Science. 4 Units.**

Examines major theories that attempt to explain the roles of race and ethnicity in U.S. politics.

Same as POL SCI 61A.

(III and VII).

### **CHC/LAT 65. Ethnic and Immigrant America. 4 Units.**

Focusing on Asian, Latino, and Black immigrant groups, examines the second generation's experience of straddling two cultures and growing up American. Covers topics such as assimilation, bilingualism, race relations, education, bicultural conflicts, interracial marriage, and multiracial identities.

Same as SOCIOL 68A.

(VII)

### **CHC/LAT H80. Latina/o Childhoods: Comparative Approaches to the Study of Children and Youth. 4 Units.**

Students in this seminar compare the experiences of Latina/o children to other young people in the U.S. and around the world, analyzing the historical, political, economic, and sociocultural factors that have differently structured the life stage we understand as "childhood."

Restriction: Campuswide Honors Collegium students only.

(III)

### **CHC/LAT 101. Research in the Latino Community. 4 Units.**

Students engage in firsthand research in the local Orange County environment. Students identify a research problem, conduct a literature review, develop questions and/or hypotheses, appropriate methods, and write a proposal.

Prerequisite: Two courses from CHC/LAT 61 or CHC/LAT 62 or CHC/LAT 63 and two courses from CHC/LAT 110-189.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment.

### **CHC/LAT 102W. Chicano/Latino Research Seminar. 4 Units.**

Taught as a writing and research seminar in Chicano/Latino Studies. Student develops own project; engages in peer editing; drafts, writes, and presents paper at Spring research conference. Prior course work in Chicano/Latino Studies helpful, i.e., CHC/LAT 61, 62, 63.

Prerequisite: CHC/LAT 101. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Chicano/Latino Studies Majors only.

(Ib)

### **CHC/LAT 110. Topics in Chicano Literature and Culture. 4 Units.**

Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter. Taught in English.

Repeatability: May be taken for credit 4 times as topics vary.

Same as SPANISH 140.

**CHC/LAT 118. Anthropology of Food. 4 Units.**

Examines how food communicates ideas about ethnocentrism, disgust, privilege, gender, race, labor, social identities and hierarchies, globalization, power, and the 'Western diet' and its health consequences.

Same as ANTHRO 134H.

**CHC/LAT 120. Peoples and Cultures of Latin America. 4 Units.**

Surveys the prehistory of Latin America and its indigenous cultures, emphasizing the impact of colonial rule, capitalism, and twentieth-century transformations. Emphasis on communities from several countries. In some years, emphasis on comparisons between the Latin American and Caribbean experiences.

Same as INTL ST 177J, ANTHRO 162A.

**(VIII)****CHC/LAT 121. Latina/Latino Pop: Latina/Latino Popular Culture. 4 Units.**

With a focus on the politics of language and space/place, prepares students to critically analyze sites of Latina/Latino popular culture including: music, film, performance, sports, media, and varied subcultures.

Same as HISTORY 151D.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment. History Majors have first consideration for enrollment.

**CHC/LAT 123. Immigration, Nation, and Media. 4 Units.**

Examines media shapes and reflects public opinion on immigration and its representation of immigrants, citizens, and ideas about the nation, and who belongs and who is a potential threat; as well as the relationship between scholars and journalists.

Same as ANTHRO 125U, SPPS 101A.

**CHC/LAT 124W. Immigrant Emotionality. 4 Units.**

Explores the emotional universe created by the Latin American immigrant experience, and guides students in the creation of a literary work based on an investigation into, or reflection on that experience.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

**(Ib)****CHC/LAT 129. Special Topics in Literature, Arts, Media, Culture. 1-4 Units.**

Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment.

**CHC/LAT 132A. Chicana/Chicano History: Pre-Colonial to 1900. 4 Units.**

Examines social history of the southwest region from antiquity to 1900. Discusses major questions, theory and research methods pertinent to Chicanas/Chicanos. Themes include: indigenous empires, conquest, colonialism, social stratification, ideology, marriage, sexuality, industrial capitalism, accommodation and resistance.

Same as HISTORY 151A.

**CHC/LAT 132B. Chicana/Chicano History: Twentieth Century. 4 Units.**

Examines social history of the Southwest with emphasis on Mexican-origin people. Discusses major questions, theory and research methods pertinent to Chicana/Chicano history. Themes explored include: immigration, xenophobia, class struggle, leadership, generational cohorts, unionization, education, barrioization, ethnicity, patriarchy, sexuality.

Same as HISTORY 151B.

**CHC/LAT 134. U.S. Latino Literature and Cultures. 4 Units.**

Focuses on aspects of literature, art, cultural production, and history of the multifaceted Latino cultures that have developed within the United States. Focuses on one group, such as Caribbean Americans, Chicanos, Central Americans, or a comparative perspective of several groups.

Same as SPANISH 110C.

**CHC/LAT 135. Latinas in the Twentieth Century U.S.. 4 Units.**

Latinas in the U.S. from 1900 to present, offering a diversity of their cultures, regional histories, sexualities, generations, and classes.

Same as HISTORY 151C.

**CHC/LAT 139. Special Topics in Chicano/Latino History. 1-4 Units.**

Studies in selected areas of Chicano/Latino History. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Chicano/Latino Studies Majors only.

**CHC/LAT 147. Comparative Minority Politics. 4 Units.**

Examines the political experiences of Blacks, Latinos, and Asian Americans in the United States from roughly 1950 to the present. Focuses on how each group has pursued political empowerment via both conventional political channels and social movements.

Same as AFAM 151, ASIANAM 132, POL SCI 124C.

**CHC/LAT 148. Racial and Ethnic Relations in the United States. 4 Units.**

Examines central questions and issues in the field of race and ethnicity; the emergence, maintenance, and consequences of the ethnic and racial stratification system in the United States; the future of racial and ethnic relations; and relevant public policy issues.

Same as SOCIOL 167A.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**CHC/LAT 148W. Racial and Ethnic Relations in the United States. 4 Units.**

Examines central questions and issues in the field of race and ethnicity; the emergence, maintenance, and consequences of the ethnic and racial stratification system in the United States; the future of racial and ethnic relations; and relevant public policy issues.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as SOCIOL 167AW.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**(Ib)**

**CHC/LAT 150. U.S. Intervention in Latin America. 4 Units.**

Explores political, economic, social, and cultural ties that bind Latin America to the United States. Focuses on U.S. intervention and Latin American response from early nineteenth century to present day. Case studies include Mexico, Guatemala, Cuba, Chile, and Central America.

Same as POL SCI 142J, INTL ST 177D, HISTORY 166.

**CHC/LAT 150A. Sex and Conquest in Latin America. 4 Units.**

Competing ideas of masculinity and femininity, sexual violence, sexual identities, and gendered hierarchies informed how the Spanish engaged in military and religious domination of Mexican and Andean communities, as well as the forms of native resistance throughout colonial Latin America.

Same as ANTHRO 140, HISTORY 160, GEN&SEX 171A.

**CHC/LAT 151. Latinos in U.S. Politics. 4 Units.**

Comparing the political issues facing Latino groups by examining their migration histories, voting behavior, nonelectoral participation, and policy issues. Latino issues are examined on the national, state, and local levels, including formal representation, immigration, affirmative action, and language policy.

Same as POL SCI 124B.

**(VII)**

**CHC/LAT 151B. Revolution in Latin America. 4 Units.**

Presents a comparative analysis of the causes, development, and consequences of selected revolutionary movements, focusing on outbreaks in Mexico, Bolivia, Cuba, Chile, Nicaragua, and Grenada. Explores topics of state formation, economic nationalism, social justice, ethnicity, and role of international affairs.

Same as SOC SCI 173N, HISTORY 166D, INTL ST 177C.

**CHC/LAT 152A. Race, Ethnicity, and Social Control. 4 Units.**

Provides a historical and sociological survey of racial and ethnic group relations in contexts of crime control, emphasizing the roles of racial ideology, structural racism, and social movements in shaping these dynamic relations, and their significance to American liberal democracy.

Same as CRM/LAW C116.

**CHC/LAT 152B. Community, Social Justice, and Health Equity Research for Action. 4 Units.**

Focuses on community as a unit of identity, community, well-being, and social justice perspectives and initiatives to promote community health. Addresses community change and improvements in community well-being, with a focus on health equity research for action.

Prerequisite: PUBHLTH 1 or PUBHLTH 2 or CHC/LAT 61 or CHC/LAT 62 or CHC/LAT 63

Same as PUBHLTH 115.

**CHC/LAT 153. Cross-Cultural Research on Urban Gangs. 4 Units.**

Taking an urban policy approach, examines the background and contemporary traditions of gangs in several ethnic groups including African-, Asian-, and Mexican-Americans. Cross-cultural exploration of the varied facets of gang life. The major social-control institutions affecting them.

Same as CRM/LAW C156.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment. Chicano/Latino Studies Majors have first consideration for enrollment.

**(VII)****CHC/LAT 154. Latino Metropolis. 4 Units.**

Explores the processes of Latino urbanization in the United States and the spatialization of Latino identities, particularly in the context of Southern California with selected comparisons drawing from other cities.

Same as UPPP 172.

**(VII)****CHC/LAT 155. Culture Change and the Mexican People. 4 Units.**

Reviews culture contact and colonization, innovation diffusion, acculturation, assimilation, culture conflict and marginality, modernization, urbanization, legal transformations. Mexico and the Southwestern U.S. are reviewed through several centuries to better appreciate the indigenous base of the Mexican people.

Same as CRM/LAW C172.

**CHC/LAT 156W. Chicano/Latinos and Labor. 4 Units.**

Explores theories that explain the occupational pathways and workplace experiences of Latinos in various work sectors. Investigates jobs such as migrant labor, child street vendors, Latina/Latino professionals, and Latinos migrating to the U.S. South that work in poultry processing plants.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

**(Ib)****CHC/LAT 157. Cuban Society and Revolution. 4 Units.**

Explores the causes, development, and legacy of the 1959 Revolution. Themes include economic dependency, democracy, race, gender, culture, and the always volatile relations between Cuba and the United States.

Same as POL SCI 153G, HISTORY 166C, INTL ST 177E.

**CHC/LAT 158. Feminisms of Color. 4 Units.**

Surveys the development of Chicana feminist thought and practice. Focuses on historical contemporary writings by and about Chicana feminists. Draws from interdisciplinary scholarship in order to survey the diversity of Chicana feminisms.

**(VII)****CHC/LAT 159. Special Topics in Society, Labor, Politics, Law, Gender, Race, Ethnicity. 1-4 Units.**

Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Chicano/Latino Studies Majors only.

**CHC/LAT 161. Transnational Migration. 4 Units.**

Examines the movement of people across national borders, governmentality and the role of state practices to control populations, and issues of citizenship, belonging, and identity. Examples are drawn from the United States, Europe, Latin America, Asia, and Africa.

Same as ANTHRO 125X, INTL ST 117A.

**(VIII)**

**CHC/LAT 162A. Urban America . 4 Units.**

Students examine the historical, social, political, and economic factors that contributed to the construction of the American urban context, one that is poverty concentrated and racially/ethnically segregated. Students also critically assess the consequence of growing up in America's urban neighborhoods.

Same as SOC SCI 163A, UPPP 104.

**CHC/LAT 163. U.S. Immigration Policy. 4 Units.**

Examines selected immigration policy debates since the nineteenth century, rationale and consequences of immigration law since 1965, problems of administration, implementation and enforcement, impact of immigration policy on foreign relations, and contemporary debate regarding the future of U.S. policy.

Same as POL SCI 126C.

**(VII)**

**CHC/LAT 164A. Undocumented Immigrant Experiences. 4 Units.**

Examines the experiences of undocumented immigrants and the policies that structure their educational, economic, social, and political participation.

Same as ASIANAM 130, CRM/LAW C187, SOCIOL 177C.

**(III and VII ).**

**CHC/LAT 166. Chicano Movement. 4 Units.**

Explores the history of Mexicans in the U.S. with particular attention paid to their integration into the U.S. capitalist economy. Examines this economic history and the Chicano movement, 'El Movimiento,' within the wide context of socio-economic change.

Same as UPPP 177.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**CHC/LAT 167. Latinos in a Global Society. 4 Units.**

Examines interconnections between diverse Latino groups in the U.S. and the effects of globalization on their social, cultural, and political realities. Topics include immigration, demographics, socioeconomic differentiation, familial relations, political protest/resistance, law and policy, and links to 'homeland' issues.

Same as SOC SCI 173L.

**(VII)**

**CHC/LAT 168. Chicano/Latino Social Psychology. 4 Units.**

Examines theories, research, and major issues of relevance to understanding social psychological processes in Chicano/Latino populations. Topics include social development, cultural orientations, gender and sexuality, close relationships, happiness and well-being, stereotyping, prejudice and discrimination, and mental and physical health.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as PSCI 192Q.

Restriction: Psychological Science Majors have first consideration for enrollment. Chicano/Latino Studies Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**(VII)**

**CHC/LAT 169. Special Topics in Globalization, Transnationalism, Immigration, U.S.-Mexico Border. 1-4 Units.**

Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**CHC/LAT 170. Chicano/Latino Families. 4 Units.**

Introduction to the research, literature, and issues surrounding the topic of Chicano/Latino families including cultural history, contemporary issues, organization of family, traditions, lifestyles, values, beliefs, generational differences, gender issues, ethnic identity, evolution of demographic patterns, current economic and political standings.

Same as SOC SCI 165, PSCI 166S, PSYCH 174H.

**CHC/LAT 176. Race, Gender, and Science. 4 Units.**

Perfect for pre-health, science and social science majors wanting to appreciate how science and society interact. Race and gender as biological and socio-cultural constructs are examined. Questions explored: What is disease? What is science? What are social and biological differences.

Same as ANTHRO 128B.

**(VII)****CHC/LAT 178A. Medical Anthropology. 4 Units.**

Introduces students to cross-cultural perspectives and critical theories in anthropological studies of medicine. Special attention is given to diverse ways of understanding bodies, illnesses, and therapeutic practices in our changing world.

Same as ANTHRO 134A.

**(VIII)****CHC/LAT 179. Special Topics in Health, Medicine, and Psychosocial Dynamics. 1-4 Units.**

Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment.

**CHC/LAT 183. Multicultural Education in K-12 Schools. 4 Units.**

Provides a theoretical and empirical overview of educational issues affecting low-income immigrant and U.S. born minority student populations in an increasingly diverse and changing society.

Same as EDUC 124.

**(VII)****CHC/LAT 189. Special Topics in Educational Policy and Issues. 1-4 Units.**

Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: May be repeated for credit unlimited times.

**CHC/LAT H190A. Honors Research Preparation. 4 Units.**

Students write a proposal describing their research question, the relevant background literature, and the method of data collection and analysis. Field work for the project may begin this quarter.

Restriction: Chicano/Latino Studies Honors students only.

**CHC/LAT H190B. Honors Field Research. 4 Units.**

Students begin or continue their research for their senior honors thesis.

Prerequisite: CHC/LAT H190A

**CHC/LAT H190C. Honors Thesis. 4 Units.**

Student drafts a senior honor thesis (typically) with the following sections: problem statement, literature review, description of the methods, results, and conclusions.

Prerequisite: CHC/LAT H190A and CHC/LAT H190B

**CHC/LAT H190W. Honors Thesis. 4 Units.**

Student drafts a senior honor thesis (typically) with the following sections: problem statement, literature review, description of the methods, results, and conclusions.

Prerequisite: CHC/LAT H190A and CHC/LAT H190B. Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

**CHC/LAT 198. Directed Group Study. 1-4 Units.**

Directed study with Chicano/Latino faculty.

Repeatability: May be repeated for credit unlimited times.

**CHC/LAT 199. Independent Study. 1-4 Units.**

Independent research with Chicano/Latino faculty.

Repeatability: May be repeated for credit unlimited times.

**CHC/LAT 200A. Theoretical Issues in Chicano/Latino Research. 4 Units.**

Introduction to theoretical issues in the scholarship in Chicano/Latino Studies. Theories from social sciences, humanities, critical theory. Topics: immigration, identity, gender and sexuality, globalization, transnationalism, social, political, and economic integration, race theory, labor market participation, social history, cultural productions.

**CHC/LAT 210A. Cultural and Historical Precedents for Latinos and Medical Care. 2 Units.**

Introduction to the history of Latinos, focusing on relevant pre-Columbian, colonial, and modern social and cultural developments, including issues of race, gender, sexuality, religious beliefs, and health beliefs and practices.

Grading Option: In Progress (Letter Grade with S/U).

**CHC/LAT 210B. Cultural and Historical Precedents for Latinos and Medical Care. 2 Units.**

Introduction to the history of Latinos, focusing on relevant pre-Columbian, colonial, and modern social and cultural developments, including issues of race, gender, sexuality, religious beliefs, and health beliefs and practices.

Prerequisite: CHC/LAT 210A

Restriction: CHC/LAT 210A-210B and CHC/LAT 212 may not both be taken for credit.

**CHC/LAT 211A. Latinos/Latinas and Medical Care: Contemporary Issues. 2 Units.**

Introduction to medical anthropological and social science perspectives on Latinos/Latinas in relation to a number of health and medically-related issues, i.e., immigration, gender, reproduction, culture, social structure, political economy, sexuality, utilization of medical services, and health beliefs.

Same as PUBHLTH 211A.

**CHC/LAT 211B. Latinos/Latinas and Medical Care: Contemporary Issues. 2 Units.**

Introduction to medical anthropological and social science perspectives on Latinos/Latinas in relation to a number of health and medically-related issues, i.e., immigration, gender, reproduction, culture, social structure, political economy, sexuality, utilization of medical services, and health beliefs.

Prerequisite: CHC/LAT 211A

Same as PUBHLTH 211B.

**CHC/LAT 215. Transnational Migration. 4 Units.**

Examines borders and boundaries as material and semiotic constructs. Drawing upon an array of literatures, but loosely situated in U.S. geo/biopolitics, explores transformative troubleings of places, spaces, borders, and bodies of all sorts.

Same as SOC SCI 254A, ANTHRO 235A.

Restriction: Graduate students only.

**CHC/LAT 217. Ethnography. 4 Units.**

Explores the theory and practice of ethnography with a focus on anthropology, the discipline most associated with ethnography. Students are exposed to the theoretical underpinnings of ethnographic work, traditional and innovative practices, and sample ethnographies.

Same as ANTHRO 230F, CRM/LAW C222.

Restriction: Graduate students only.

**CHC/LAT 222. Theorizing Illegality and the Experiences of Undocumented Immigrants. 4 Units.**

Examines theories of illegality and citizenship, historical and contemporary undocumented immigrant experiences, and methodological concerns in this area of study.

Same as SOCIOL 282.

Restriction: Graduate students only.

**CHC/LAT 223. Ethnic America. 4 Units.**

Examines critically the meaning and measurement of ethnicity, race, and nation in sociological theory and research. Theories of ethnicity are explored, along with empirical studies of the construction of ethnic and pan-ethnic identities in historical and contemporary contexts.

Same as SOCIOL 234.

Restriction: Graduate students only.

**CHC/LAT 224. Immigrant America. 4 Units.**

The study of the causes and consequences of international migration has become one of the most vital fields of sociological theory and research. Examines principal theoretical perspectives and empirical research on contemporary immigration flows and the processes of incorporation.

Same as SOCIOL 264.

Restriction: Graduate students only.

**CHC/LAT 225. Crimmigration. 4 Units.**

Examines the criminalization of immigration, with an emphasis on U.S. enforcement procedures and outcomes. Analyzes the devolution of federal immigration law to local authorities, the rise in immigrant detention and deportation, and the militarization of the U.S.-Mexico border.

Same as SOCIOL 268, CRM/LAW C258.

Restriction: Graduate students only.

**CHC/LAT 251. Models of Practice and Intervention at the Community Level. 4 Units.**

Examines and critiques current models, frameworks, theories for.

Prerequisite: CHC/LAT 200A or PUBHLTH 246

Same as PUBHLTH 251.

Restriction: Graduate students only.

**CHC/LAT 289. Special Topics in Chicano/Latino Studies. 1-4 Units.**

Current research in Chicano/Latino Studies.

Repeatability: May be repeated for credit unlimited times.

**CHC/LAT 290. Dissertation Research. 1-12 Units.**

Dissertation research with Chicano/Latino faculty.

Repeatability: May be taken for credit 10 times.

Restriction: Graduate students only.

**CHC/LAT 299. Independent Study. 1-12 Units.**

Independent study with Chicano/Latino Studies faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Chicano/Latino Studies, B.A.

Chicano/Latino Studies is an interdisciplinary department organized to provide undergraduate and graduate students with the opportunity to examine the historical and contemporary experiences of Americans of Latino origin or ancestry. This diverse population includes people who trace their heritage to Mexico, Puerto Rico, Cuba, El Salvador, Guatemala, Nicaragua, and other Latin American and Caribbean nations. The curriculum is designed to provide an awareness, knowledge, and appreciation of the language, history, culture, literature, sociology, anthropology, politics, social ecology, health,

medicine, and creative (art, dance, drama, film, music) accomplishments of Chicano/Latino communities. The Department offers a B.A. degree in Chicano/Latino Studies, an undergraduate minor, and a graduate emphasis.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Departmental Requirements for the Major

A. Complete the following five core courses:

CHC/LAT 61	Introduction to Chicano/Latino Studies I
CHC/LAT 62	Introduction to Chicano/Latino Studies II
CHC/LAT 63	Introduction to Chicano/Latino Studies III
CHC/LAT 101	Research in the Latino Community
CHC/LAT 102W	Chicano/Latino Research Seminar

B. Complete the following:

SPANISH 2A	Intermediate Spanish (or equivalent) <sup>1</sup>
------------	---

C. Complete one comparative ethnic studies course selected from African American Studies, Asian American Studies, or

EDUC 124	Multicultural Education in K-12 Schools <sup>2</sup>
----------	--

D. Select three upper-division electives, one from each of the following categories:

Literature, Arts, and Media (CHC/LAT 110–129)
History (CHC/LAT 130–139)
Inequalities and Social Context (CHC/LAT 140–189)

E. Select four additional elective courses, three of which must be upper-division, selected from CHC/LAT courses. <sup>3</sup>

<sup>1</sup> Students are encouraged to continue their Spanish language education through SPANISH 2C.

<sup>2</sup> Course must focus on the study of African American or Asian American communities in the United States.

<sup>3</sup> Electives may include Independent Study courses (CHC/LAT 199). Students may obtain credit for one of these three courses through participation in a study abroad program in Mexico. Students must consult with the Department office for additional information regarding this option.

**Residence Requirement for the Major:** A minimum of five upper-division courses required for the major must be completed successfully at UCI. Courses taken through the UC Education Abroad Program will be counted toward satisfaction of the residence requirement.

Students are encouraged to pursue field research and write a substantial research paper on topics of their choice under the guidance of Chicano/Latino faculty members. Often, this project will grow out of issues examined in CHC/LAT 102W. Research projects typically involve a combination of library research and fieldwork in the Chicano/Latino community. Methods and analytical frameworks vary depending on the student and faculty advisors. Interested students should enroll in CHC/LAT 199.

The Honors Program in Chicano/Latino Studies is designed to allow undergraduates to pursue independent research and write an honors thesis on topics of their choice under the guidance of Chicano/Latino Studies faculty members. Research projects typically involve a combination of library research, data analysis, and field research. The program is open to all senior Chicano/Latino Studies majors with a grade point average of 3.3 or better overall, with 3.5 in Chicano/Latino Studies courses (at least five courses). Prior completion of or concurrent enrollment in CHC/LAT 101 is strongly recommended. Successful completion of the Honors Program and the honors thesis satisfies the upper-division writing requirement.

Although course work for the Honors Program does not start until the senior year, it is highly recommended that during the spring quarter of the junior year, students find a professor willing to serve as their research project advisor on the basis of a mutually acceptable abstract that indicates the goal and significance of their project. If extensive research is to be undertaken at this time, students should enroll in CHC/LAT 199.

During the fall quarter of the senior year, students enroll in CHC/LAT H190A and write a proposal describing their research question, the relevant background literature, and the method of data collection and analysis. Fieldwork for the project may begin during this quarter.

In the winter quarter of the senior year, students begin or continue their research by enrolling in CHC/LAT H190B. In the spring quarter of the senior year, students enroll in CHC/LAT H190C and complete a senior honors thesis.

## Chicano/Latino Studies, Graduate Emphasis

The Department of Chicano/Latino Studies offers a graduate emphasis in Chicano/Latino Studies, which is available in conjunction with the Ph.D. programs in the Departments of Anthropology; Criminology, Law and Society; English; History; Political Science; Planning, Policy, and Design; Sociology; Spanish and Portuguese; Gender and Sexuality Studies; the program in Visual Studies; the School of Education; and the program in Social Science. Satisfactory completion of the emphasis is certified by the Chair of Chicano/Latino Studies and is noted in the student's dossier.

Applicants must first be admitted to, or currently enrolled in, one of the participating programs listed above. Applicants must submit to the Chicano/Latino Graduate Program Committee (1) an application form listing prior undergraduate and graduate course work related to Chicano/Latino Studies (if any), institutions attended, and major(s); and (2) a one- to two-page statement of purpose, including career objectives, areas of interest and research, and record of research, teaching, community, and/or creative work.

The Committee determines admissions, in consultation with the Chicano/Latino Studies core faculty, based upon the extent to which the applicant's research interests relate to Chicano/Latino Studies, the applicant's previous course work, and research or other experience related to Chicano/Latino Studies. Lack of prior course work does not preclude admission, so long as the statement of research interests is congruent with the graduate emphasis and makes a compelling case.

Minimum course work for the graduate emphasis in Chicano/Latino Studies consists of four courses: CHC/LAT 200A and three elective courses selected from the list of graduate courses in Chicano/Latino Studies. Two of these elective courses must be cross-listed with department(s) other than the department in which the student is earning his/her Ph.D. One must be cross-listed with a department in a School other than the School in which the student is earning his/her degree and the second must be cross-listed with a department other than the department in which the student is earning his/her degree.

For doctoral students, the qualifying examination and dissertation topic should incorporate U.S. Latinos and/or issues relevant to Chicano/Latino Studies as a central focus of analysis. One member of the candidate's dissertation committee should be a core or affiliate faculty of the Chicano/Latino Studies Department.

## Chicano/Latino Studies, Minor

The minor in Chicano/Latino studies provides undergraduate students with an opportunity to examine the historical and contemporary experiences of Chicanos and Latinos. The curriculum provides awareness, knowledge and appreciation of the language, history, culture, literature, sociology, anthropology, politics, social ecology, health, medicine and creative accomplishments in Chicano/Latino communities. In addition to satisfying the requirements for the minor, students are encouraged to take advantage of the variety of unique educational opportunities available at UCI. Opportunities like the Education Abroad Program (EAP), the Undergraduate Research Opportunities Program (UROP) and the Summer Academic Enrichment Program (SAEP) allow students to gain real-world experience that complements their participation in the Chicano/Latino studies department.

### Departmental Requirements

Completion of seven courses as follows:

A. Complete the following core courses:

CHC/LAT 61	Introduction to Chicano/Latino Studies I
CHC/LAT 62	Introduction to Chicano/Latino Studies II
CHC/LAT 63	Introduction to Chicano/Latino Studies III

B. Select three upper-division courses from CHC/LAT 100–189.

C. Complete the following:

SPANISH 2A	Intermediate Spanish (or equivalent) <sup>1</sup>
------------	---

<sup>1</sup> Students who are exempted from SPANISH 2A based on high school study or its equivalent or through test results must instead complete a fourth upper-division course selected from CHC/LAT 100–189.

**Residence Requirements for the Minor:** Other than the language requirement, no more than two courses taken at other academic institutions may be used toward satisfaction of the minor.

## Department of Cognitive Sciences

**Ramesh Srinivasan, Department Chair**

2201 Social & Behavioral Sciences Gateway

949-824-6692

<http://www.cogsci.uci.edu/>

Cognitive Science is a multidisciplinary field integrating behavioral research, computational models, and neuroscience. The department of Cognitive Sciences at UC Irvine has a tradition of excellence in quantitative approaches to understanding the brain, perception, cognition, and behavior. The department maintains its historic strengths in mathematical psychology, and has seen them expand to include computational approaches to studying cognition. The department has also grown a strong and broad research program and graduate concentration in cognitive neuroscience, with expertise ranging from language and memory to brain-computer interfaces. The department continues to specialize in vision and auditory research, and has newer research areas in the language sciences, cognitive development, and cognitive robotics.

## Undergraduate Information

Students should be aware that psychology courses are offered in several different departments and programs. Students interested in general psychology including the areas of development, clinical, perception, learning, memory, cognitive processes, and neuroscience are advised to consult the course listings for the B.A. in Psychology section. The courses in this major are designed to provide students with a strong foundation in general psychology. Students specifically interested in a program with a quantitative approach to theory and research in any of the areas of Cognitive Neuroscience; Experimental Psychology (emphasizing Sensation, Perception, Attention, and Memory); Language Science; or Computational Cognitive Science should consult the course listings for the B.S. in Cognitive Sciences also here in this section. Students interested in other areas of psychology are advised to consult the course listings in the School of Social Ecology and the School of Biological Sciences sections.

- Cognitive Sciences, B.S.
- Cognitive Sciences, Ph.D.
- Hearing and Speech Sciences, Minor
- Psychology, B.A.
- Psychology, B.S.
- Psychology, Minor

## Faculty

Bruce G. Berg, Ph.D. Indiana University, *Associate Professor of Cognitive Sciences* (audition, auditory attention, psychophysics of complex sounds, computational models of hearing)

Aaron Bornstein, Ph.D. New York University, *Assistant Professor of Cognitive Sciences* (memory, decision-making, reinforcement learning, neuroimaging, computational cognitive neuroscience)

Alyssa Brewer, Ph.D. Stanford University, *Associate Professor of Cognitive Sciences; Language Science* (neuroimaging of visual perception, visual deficits, neurological disorders)

Nadia Chernyak, Ph.D. Cornell University, *Assistant Professor of Cognitive Sciences* (cognitive development, social cognition, prosocial behavior, moral cognition, agency and free will, conceptual development)

Thomas M. D'Zmura, Ph.D. University of Rochester, *Professor of Cognitive Sciences* (vision, hearing, language, brain-computer interfaces)

Barbara A. Doshier, Ph.D. University of Oregon, *UCI Distinguished Professor of Cognitive Sciences* (human information processing, memory retrieval, attention, visual perception)

Emily D. Grossman, Ph.D. Vanderbilt University, *Professor of Cognitive Sciences* (visual perception, neuroimaging)

Gregory S. Hickok, Ph.D. Brandeis University, *Professor of Cognitive Sciences; Language Science* (neuroanatomy of language, neural plasticity, neuroimaging, cognitive neuroscience)

Jeffrey L. Krichmar, Ph.D. George Mason University, *Professor of Cognitive Sciences; Computer Science* (computational neuroscience, robotics)

Michael D. Lee, Ph.D. University of Adelaide, *Professor of Cognitive Sciences* (computational models and bayesian methods in decision making, representation, categorization, individual differences, and the wisdom of the crowd)

Mimi Liljeholm, Ph.D. University of California, Los Angeles, *Assistant Professor of Cognitive Sciences* (neural and computational bases of learning, reasoning, and decision making)

Sara Mednick, Ph.D. Harvard University, *Associate Professor of Cognitive Sciences* (memory consolidation, sleep, pharmacology, aging, brain stimulation)

Louis E. Narens, Ph.D. University of California, Los Angeles, *Professor of Cognitive Sciences; Logic and Philosophy of Science* (measurement, logic, metacognition)

Emre Neftci, Ph.D. University of Zurich, *Assistant Professor of Cognitive Sciences; Computer Science* (computational neuroscience, neuromorphic engineering, machine learning)

Lisa Pearl, Ph.D. University of Maryland, College Park, *Professor of Language Science; Cognitive Sciences; Logic and Philosophy of Science* (language development, linguistics, computational sociolinguistics, cognitive modeling)

Megan Peters, Ph.D. University of California, Los Angeles, *Assistant Professor of Cognitive Sciences* (perception, metacognition, consciousness, computational modeling, computational cognitive neuroscience)

Zygmunt Pizlo, Ph.D. University of Maryland at College Park, *Falmagne Endowed Chair and Professor of Cognitive Sciences* (human and machine vision, 3D shape, symmetry, virtual reality, robotics, problem solving)

Virginia Richards, Ph.D. University of California, Berkeley, *Professor of Cognitive Sciences* (auditory perception and cognition, human psychophysics)

Jeffrey Rouder, Ph.D. University of California, Irvine, *Falmagne Endowed Chair and Professor of Cognitive Sciences* (mathematical and statistical models of perception and cognition, bayesian mixed models, psychometrics)

Kourosh Saberi, Ph.D. University of California, Berkeley, *Professor of Cognitive Sciences* (conscious systems, evolutionary game theory, nature of reality, machine learning, artificial intelligence)

Barbara W. Sarnecka, Ph.D. University of Michigan, *Professor of Cognitive Sciences; Logic and Philosophy of Science* (cognitive development, language development, number concepts, conceptual change, individual cognitive development, historical development of science and mathematics)

Ramesh Srinivasan, Ph.D. Tulane University, *Department Chair and Professor of Cognitive Sciences; Biomedical Engineering* (perception, attention, decision-making, cognitive and clinical neuroscience)

Mark Steyvers, Ph.D. Indiana University, *Professor of Cognitive Sciences; Computer Science; Psychological Science* (higher-order cognition, cognitive neuroscience, computational modeling, collective intelligence)

Joachim S. Vandekerckhove, Ph.D. University of Leuven, *Associate Professor of Cognitive Sciences; Statistics* (response time modeling, model fitting, computational statistics, psychometrics, bayesian statistics)

Charles E. Wright, Ph.D. University of Michigan, *Associate Professor of Cognitive Sciences* (cognitive psychology, human motor control, fitts task, aimed movements, handwriting, immersive virtual reality, 1/f noise, quantitative models)

## Affiliate Faculty

Drew Bailey, Ph.D. University of Missouri, *Associate Professor of Education; Cognitive Sciences; Psychological Science*

Nikil D. Dutt, Ph.D. University of Illinois at Urbana–Champaign, *UCI Chancellor's Professor of Computer Science; Cognitive Sciences; Electrical Engineering and Computer Science* (embedded systems, computer architecture, electronic design automation, software systems, brain-inspired architectures and computing)

Charles C. Fowlkes, Ph.D. University of California, Berkeley, *Professor of Computer Science; Cognitive Sciences* (artificial intelligence, computer vision, machine learning, computational biology)

Susanne M. Jaeggi, Ph.D. University of Bern, *Associate Professor of Education; Cognitive Sciences* (working memory, executive functions, cognitive training, lifespan development aging, individual differences)

Elizabeth F. Loftus, Ph.D. Stanford University, *UCI Distinguished Professor of Psychological Science; Cognitive Sciences; Criminology, Law and Society; School of Law* (cognitive psychology, human memory, psychology and law)

David C. Lyon, Ph.D. Vanderbilt University, *Department Vice Chair and Associate Professor of Anatomy and Neurobiology; Cognitive Sciences*

John Middlebrooks, Ph.D. University of California, San Francisco, *Professor of Otolaryngology; Biomedical Engineering; Cognitive Sciences; Neurobiology and Behavior*

Hal S. Stern, Ph.D. Stanford University, *UCI Chancellor's Professor of Statistics; Cognitive Sciences*

Fan-Gang Zeng, Ph.D. Syracuse University, *Director of Hearing Research and Professor of Otolaryngology; Anatomy and Neurobiology; Biomedical Engineering; Cognitive Sciences*

## Cognitive Sciences Courses

### COGS 14P. Python for Cognitive Science and Neuroscience Research. 4 Units.

Introduces Python for data analysis and modeling encountered in cognitive science and neuroscience. Topics include data structures, execution control, graphic visualization, and interaction with sound and display interfaces. Application in statistical analysis, model simulation, and stimulus presentation and experimental control.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**COGS 109. Cognitive Sciences Research Seminar. 4 Units.**

Read and discuss examples of the primary research leading to the concepts covered in Psychology Fundamentals. Focuses on how this research is conducted and how inferences from it are drawn.

Prerequisite or corequisite: PSYC 9A

Restriction: Cognitive Sciences Majors only.

**COGS 110. Quantitative Methods for Cognitive Sciences Research. 4 Units.**

Basics of quantitative methods used in cognitive sciences research focusing on linear algebra, Fourier analysis, multivariate statistics, and signal detection theory. Examples drawn from models and methods used in cognitive sciences research with practical examples.

Prerequisite: MATH 2B and STAT 7 and (PSYC 114M or ICS 31)

Restriction: Cognitive Sciences majors only.

## Psychology Courses

**PSYCH 7A. Introduction to Psychology. 4 Units.**

Introduction to field of psychology, addressing the application of scientific methods to the study of human development, learning, memory, problem solving, perception, biological mechanisms, emotions and motivation, personality, psychopathology, and effects of diverse social and cultural contexts on human behavior.

Same as PSCI 9.

Overlaps with PSYCH 9A, PSYCH 9B, PSYCH 9C, PSCI 11A, PSCI 11B.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment. PSCI 9 and PSYCH 7A may not be taken for credit if taken concurrently with or after PSCI 11A, PSCI 11B, PSCI 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)

**PSYCH 9A. Psychology Fundamentals. 4 Units.**

Designed to provide freshman with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSCI 11A.

Restriction: Lower-division students only. Cognitive Sciences Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. PSCI 9 and PSYCH 7A may not be taken for credit if taken after PSCI 11A, PSCI 11B, PSCI 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)

**PSYCH 9B. Psychology Fundamentals. 4 Units.**

Designed to provide freshmen with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSCI 11B.

Restriction: Lower-division students only. Cognitive Sciences Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

(III)

**PSYCH 9C. Psychology Fundamentals. 4 Units.**

Designed to provide freshman with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSCI 11C.

Restriction: Lower-division students only. Cognitive Sciences Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

(III)

**PSYCH 10A. Probability and Statistics in Psychology I. 4 Units.**

An introduction to probability and statistics. Emphasis on thorough understanding of the probabilistic basis of statistical inference. Examples drawn primarily from psychology.

Restriction: Psychology Majors have first consideration for enrollment.

(Va)

**PSYCH 10B. Probability and Statistics in Psychology II. 4 Units.**

An introduction to probability and statistics. Emphasis on thorough understanding of the probabilistic basis of statistical inference. Examples drawn primarily from psychology.

Prerequisite: PSYCH 10A

Restriction: Psychology Majors have first consideration for enrollment.

(Va)

**PSYCH 10C. Probability and Statistics in Psychology III. 4 Units.**

An introduction to probability and statistics. Emphasis on thorough understanding of the probabilistic basis of statistical inference. Examples drawn primarily from psychology.

Prerequisite: PSYCH 10B

Restriction: Psychology Majors have first consideration for enrollment.

(Vb)

**PSYCH 21A. Adolescent Psychology. 4 Units.**

Focuses on psychosocial dynamics of today's adolescents in America emphasizing the quest for identity, independence, values, and sexual orientation. The influence of society, family, school, and peers is analyzed. Strategies for helping troubled adolescents are discussed.

Overlaps with PSCI 112D.

(III)

**PSYCH 46A. Introduction to Human Memory. 4 Units.**

Covers the core concepts of modern research and theorizing about human memory, including structural subdivisions (e.g., perceptual memory, short-term memory, long-term memory), different measures of memory (e.g., recall, reorganization), and some practical applications of memory research (e.g., mnemonics).

(III)

**PSYCH 56L. Acquisition of Language. 4 Units.**

What children say, what they mean, and what they understand. Theories about the learning of language by one-, two-, and three-year-olds. Comparison of kinds of data on which these theories are based.

Same as LSCI 51.

(III)

**PSYCH 78A. Self-Identity and Society. 4 Units.**

Studies sociological contributions to theory and research in social psychology, with focus on the social influences on personality, attitudes, beliefs, and behavior; socialization, human groups, and social interaction.

Same as SOCIOL 31.

**(III)****PSYCH 89. Special Topics in Lower-Division Psychology. 4 Units.**

Studies in selected areas of psychology at the lower-division level. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**PSYCH H101A. Honors Seminar in Psychology I. 4 Units.**

Focuses on the research activities and honors thesis research projects of each student and the research of various Cognitive Sciences faculty. Students discuss their research interests in the early and later stages of their projects. Research projects and write-ups required.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

Restriction: Psychology Majors only. Cognitive Sciences Majors only. Social Science Honors students only.

**PSYCH H101B. Honors Seminar in Psychology II. 4 Units.**

Focuses on the research activities and honors thesis research projects of each student and the research of various Cognitive Sciences faculty. Students discuss their research interests in the early and later stages of their projects. Research projects and write-ups required.

Prerequisite: PSYCH H101A

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

Restriction: Psychology Majors only. Cognitive Sciences Majors only. Social Science Honors students only.

**PSYCH H101C. Honors Seminar in Psychology III. 4 Units.**

Focuses on the research activities and honors thesis research projects of each student and the research of various Cognitive Sciences faculty. Students discuss their research interests in the early and later stages of their projects. Research projects and write-ups required.

Prerequisite: PSYCH H101B

Repeatability: May be taken for credit 2 times.

Restriction: Psychology Majors only. Cognitive Sciences Majors only. Social Science Honors students only.

**PSYCH 111BW. Honors Advanced Experimental Psychology. 4 Units.**

Design and analysis of multivalent, factorial, and correlational studies. Students prepare proposals for independent research.

Corequisite: PSYCH H111B

Prerequisite: PSYCH H111A and (PSYC H11A or PSYCH 112A). Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Psychology Majors only. Social Science Honors students only.

**(Ib)****PSYCH H111A. Honors Experimental Psychology. 4 Units.**

Emphasis on design of experiments and analysis of results. Experiments are conducted in laboratory sections.

Prerequisite: ((PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C)) and ((PSYCH 10A and 10B and 10C) or (MATH 2A and MATH 2B and (MATH 7 or STATS 7))).

Overlaps with PSYCH 112A.

Restriction: Psychology and Cognitive Sciences Honors Program students only.

**PSYCH H111B. Honors Advanced Experimental Psychology Laboratory. 2 Units.**

Design and analysis of multivalent, factorial, and correlational studies. Students prepare proposals for independent research.

Corequisite: PSYCH 111BW

**PSYCH H111C. Honors Research in Experimental Psychology. 4 Units.**

Each student conducts a research project in experimental psychology. The projects are discussed in a seminar format. Written reports on each project are submitted at the end of the quarter.

Prerequisite: PSYCH 111BW or PSYCH 112B

Restriction: Psychology Majors only. Social Science Honors students only.

**PSYCH 112A. Experimental Psychology. 4 Units.**

Emphasis on design of experiments and analysis of results. Experiments are conducted in laboratory sections.

Corequisite: PSYCH 112LA

Prerequisite: ((PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C)) and ((PSYCH 10A and PSYCH 10B and PSYCH 10C) or (MATH 2A and MATH 2B and (MATH 7 or STATS 7)))

Overlaps with PSYCH H111A, PSYCH 112F, PSYCH 112G.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 112BW. Advanced Experimental Psychology. 4 Units.**

Design and analysis of multivalent, factorial, and correlational studies. Students prepare proposals for independent research.

Prerequisite: PSYCH 112A and PSYCH 112LA. Satisfactory completion of the Lower-Division Writing requirement.

Overlaps with PSYCH 112F, PSYCH 112FW, PSYCH 112G, PSYCH 112GW.

Restriction: Psychology Majors have first consideration for enrollment.

**(Ib)**

**PSYCH 112C. Research in Experimental Psychology. 4 Units.**

Each student conducts a research project in experimental psychology. The projects are discussed in a seminar format. Written reports on each project are submitted at the end of the quarter.

Corequisite: PSYCH 112LC

Prerequisite: PSYCH 112B and PSYCH 112LB

Overlaps with PSYCH 112F, PSYCH 112FW, PSYCH 112G, PSYCH 112GW.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 112D. Effective Graphical Presentation of Data. 4 Units.**

Learn to use MATLAB to produce graphical displays of data based on psychological principles for effective design. Approach is problem-oriented, with emphasis on case-studies using data from psychological experiments and real-world corpora. Assessment via independent individual projects.

Corequisite: PSYCH 112LD

Prerequisite: (PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C) and (PSYCH 10C or SOC SCI 10C or ANTHRO 10C or POL SCI 10C or SOCIOL 10C) or (MATH 2B and STATS 7)

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 112LA. Experimental Psychology Laboratory. 2 Units.**

Required laboratory section and co-requisite for Psych 112A.

Corequisite: PSYCH 112A

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 112LB. Advanced Experimental Psychology Laboratory. 2 Units.**

Required laboratory section for PSYCH 112B and PSYCH 112BW.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 112LC. Research in Experimental Psychology.**

Required laboratory section and co-requisite for PSYCH 112C.

Corequisite: PSYCH 112C

**PSYCH 112LD. Effective Graphical Presentation of Data Lab . 2 Units.**

Lab to learn to use MATLAB to produce graphical displays of data based on psychological principles for effective design. Approach is problem-oriented, with emphasis on case-studies using data from psychological experiments and real-world corpora. Assessment via independent individual projects.

Corequisite: PSYCH 112D

Restriction: Psychology Majors have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment.

**PSYCH 112LM. Research Methods in Psychology Laboratory. 2 Units.**

Required laboratory section and co-requisite for PSYCH 112M.

Corequisite: PSYCH 112M

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 112LR. Cognitive Robotics Laboratory. 2 Units.**

Required laboratory section and corequisite for PSYCH 112R.

Corequisite: PSYCH 112R

Restriction: Psychology Majors have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment.

**PSYCH 112M. Research Methods in Psychology. 4 Units.**

Research methods in psychology for majors who wish to fulfill this requirement separately from upper-division writing. Covers both experimental and descriptive research methods, analysis of results, and reading the psychological literature. Research experience is provided in laboratory sections.

Corequisite: PSYCH 112LM

Prerequisite: (PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C) and (PSYCH 10C or SOC SCI 10C or ANTHRO 10C or POL SCI 10C or SOCIOL 10C) or (MATH 2B and STATS 7)

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 112R. Cognitive Robotics. 4 Units.**

Introduces concepts on experimental design, embodiment, robot construction, and computer programming. Concepts of embodied intelligence and case studies of cognitive robotics are covered in lecture. Simple robots are constructed and programmed to carry out different behavioral experiments in lab.

Corequisite: PSYCH 112LR

Prerequisite: (PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C) and (PSYCH 10C or SOC SCI 10C or ANTHRO 10C or POL SCI 10C or SOCIOL 10C) or (MATH 2B and STATS 7)

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 114M. MATLAB Programming. 4 Units.**

MATLAB is a mathematical software package for solving quantitative problems often encountered in experimental psychology. Topics include rudiments of programming, statistical analysis of data, matrix algebra, signal processing, graphic visualization, and simulated models of cognitive and perceptual processes.

Restriction: Psychology Majors have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment.

**PSYCH 119. Special Topics in Research Methodologies. 1-4 Units.**

Studies in selected areas of research methodologies. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 120A. Abnormal Psychology. 4 Units.**

Introduction to psychopathology and behavioral deviations, and the concepts of theories regarding these conditions.

Prerequisite: PSYCH 7A or PSCI 9 or PSYCH 9C or PSCI 11C

Overlaps with PSCI 102C.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 120D. Developmental Psychology. 4 Units.**

A general introduction to the study of the physical, intellectual, social, and emotional development of the child from birth to adulthood.

Prerequisite: PSYCH 7A or PSCI 9 or PSYCH 9A or PSCI 11A

Overlaps with PSCI 111D.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Nursing Science Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 120H. History of Psychology. 4 Units.**

A history of the development of various schools and systems of psychological thought.

Prerequisite: (PSYCH 7A or PSCI 9) or (PSYCH 9A or PSCI 11A) and (PSYCH 9B or PSCI 11B) and (PSYCH 9C or PSCI 11C)

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 120P. Personality Theories. 4 Units.**

A survey of the evolution of personality theory during this century. An overview of major perspectives in the field, with special attention to Freud, Jung, and Adler.

Prerequisite: PSYCH 7A or PSCI 9 or PSYCH 9C or PSCI 11C

Overlaps with PSCI 170S.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 121M. Theories of Motivation. 4 Units.**

Factors affecting the behavioral performance of organisms. A survey of theoretical and empirical approaches to the physiological, psychological, and social factors which generate behavior.

Prerequisite: (PSYCH 7A or PSCI 9) or (PSYCH 9A or PSCI 11A) and (PSYCH 9B or PSCI 11B) and (PSYCH 9C or PSCI 11C)

Overlaps with PSCI 176S.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 121P. Positive Psychology. 4 Units.**

Positive psychology, at the subjective level, is about valued subjective experiences; at the individual level, it is about positive individual traits; and at the group level, it is about the civic virtues and institutions that move individuals toward better citizenship.

Prerequisite: (PSYCH 9A or PSCI 11A) and (PSYCH 9B or PSCI 11B) and (PSYCH 9C or PSCI 11C)

Overlaps with PSY BEH 184S.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 121S. Psychology of Sleep and Consciousness. 4 Units.**

Covers the physiology, neurochemistry, and neuroanatomy associated with sleep, contemporary sleep theory, REM and NREM, phenomenology, sleep disorders, examination of differences between conscious and unconscious cognitive function, the history of sleep and dream theories from ancient time to present day.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 122C. Clinical Psychology. 4 Units.**

Provides overview of the clinical psychology field including theories and techniques used in counseling and testing.

Overlaps with PSY BEH 150C.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 122I. Organizational/Industrial Psychology. 4 Units.**

Introduction to applied psychology in organizations, including personnel testing, selection, training and evaluation, job and classification analysis, job satisfaction and motivation, organizational development, leadership, market research, and consumer psychology. Potential ethical problems are discussed.

Prerequisite: (PSYCH 7A or PSY BEH 9) or (PSYCH 9A or PSY BEH 11A) or (PSYCH 9B or PSY BEH 11B) or (PSYCH 9C or PSY BEH 11C)

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 122P. Clinical Psychophysiology. 4 Units.**

Psychophysiology investigates the relationships between physiological processes and psychological phenomena. Technologies examined include reaction times, heart rate variability, EEGs, ERPs, magnetoencephalography, and eye tracking. Applications include diagnosis, the longitudinal assessment, and the identification of individuals at risk of disease onset.

Prerequisite: BIO SCI N110 or BIO SCI N115A or PSYCH 9A or PSCI 11A

Same as BIO SCI N118.

(II ).

**PSYCH 123P. Topics in Philosophy of Psychology. 4 Units.**

Selected topics in the philosophy of psychology, e.g., the nature of psychological explanation, reductionism, issues in cognitive, behavioral, and neuroscience.

Repeatability: Unlimited as topics vary.

Same as LPS 143, PHILOS 143.

Restriction: Psychology Majors have first consideration for enrollment. Philosophy Majors have first consideration for enrollment.

**PSYCH 124S. Sports Psychology. 4 Units.**

Discusses the field of sports psychology with an emphasis on clinical practice including motivation, goal setting, performance skills, and mental skills. Discusses and utilizes a wide range of techniques designed to enhance performance and manage problems among athletes.

Prerequisite: (PSYCH 7A or PSY BEH 9) or (PSYCH 9C or PSY BEH 11C)

Overlaps with PSY BEH 139H.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 124V. Psychology of Violence. 4 Units.**

Discusses the psychology of violence and aggression with an emphasis on understanding the psychological, social, and physiological roots of violent and aggressive behavior. Psychological treatment techniques and strategies for prevention of aggressive and violent behavior are also discussed.

Prerequisite: (PSYCH 7A or PSY BEH 9) or (PSYCH 9C or PSY BEH 11C)

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 129. Special Topics in General Psychology. 4 Units.**

Studies in selected areas of general psychology. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 130A. Perception and Sensory Processes. 4 Units.**

A general introduction to the scientific study of sensory processes and perceptual phenomena, with special emphasis in the visual systems.

Prerequisite: (PSYCH 7A or PSY BEH 9) or (PSYCH 9A or PSY BEH 11A)

Overlaps with PSYCH 131A, PSYCH 131B.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 131A. Vision. 4 Units.**

Visual perception and the anatomy and physiology of the visual system. Topics include the retina and the visual pathway; visual sensitivity; color vision; spatial vision; motion perception; and the development of the visual system.

Same as BIO SCI N182.

Overlaps with PSYCH 130A.

Restriction: Upper-division students only. Psychology Majors have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment. School of Biological Sciences students have first consideration for enrollment.

**PSYCH 131B. Hearing. 4 Units.**

Auditory perception, the anatomy and physiology of the auditory system, and the physics of sound. Topics include neural transduction of sound, sensitivity, sound localization, complex sound perception, and hearing loss.

Prerequisite: (PSYCH 9A or PSY BEH 11A) and (PSYCH 9B or PSY BEH 11B)

Overlaps with PSYCH 130A.

Restriction: Psychology Majors have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment.

**PSYCH 135M. The Mind/Body Problem. 4 Units.**

What is consciousness and what is matter and how are the two related? How can brains have minds? This multidisciplinary course draws on information from the fields of computer vision, artificial intelligence, cognition, neurophysiology, philosophy, and psychophysics.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 139. Special Topics in Perception and Sensory Processes. 4 Units.**

Studies in selected areas of perception and sensory processes. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 140C. Cognitive Science. 4 Units.**

Introduction to the investigations of the structure and function of the mind, from viewpoints of computation, neuroscience, philosophy, and cognitive psychology. Topics include perception, attention, knowledge representations, learning and memory, action, reasoning, and language.

Prerequisite: (PSYCH 7A or PSY BEH 9) and (PSYCH 9A or PSY BEH 11A) and (PSYCH 9B or PSY BEH 11B)

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 140L. Principles of Learning Theory. 4 Units.**

Investigation of the learning and memory processes of human and animals. Basic experimental approaches to learning and memory, empirical results, and theoretical interpretations of the evidence are discussed.

Prerequisite: (PSYCH 7A or PSY BEH 9) or (PSYCH 9A or PSY BEH 11A)

Restriction: Psychology Majors have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment.

**PSYCH 140M. Human Memory. 4 Units.**

Developments in the area of memory; history of memory research; theories of the nature of memory. Visual memory, recognition memory, high-speed scanning, free recall, short-term memory, mnemonics, retrieval, relationship of memory to thinking. Selected theoretical formulations for memory.

Prerequisite: (PSYCH 7A or PSY BEH 9) or (PSYCH 9B or PSY BEH 11B)

Restriction: Psychology Majors have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment.

**PSYCH 143P. Human Problem Solving. 4 Units.**

Modern developments in the psychology of human problem solving. Topics include concept identification, arithmetic, sets, logic puzzles, story problems, group problem solving, and theorem proving.

Prerequisite: (PSYCH 7A or PSY BEH 9) or (PSYCH 9B or PSY BEH 11B)

Restriction: Psychology Majors have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment.

**PSYCH 146MW. Writing about Memory. 4 Units.**

Covers a broad range of texts, literary, philosophical, and scientific, each probing the nature of memory and its meaning in human life. Readings are drawn from across many disciplines and many perspectives.

Prerequisite: PSYCH 7A or PSYCH 9B or PSY BEH 9 or PSY BEH 11B. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Psychology Majors have first consideration for enrollment.

(Ib)

**PSYCH 149. Special Topics in Cognition and Learning. 4 Units.**

Studies in selected areas of cognition and learning. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 150. Psychology of Language. 4 Units.**

Examines language using the tools of experimental psychology. From sounds to words to spoken and written sentences, explores how language is used in real time, and how its use reveals how it is represented in the mind.

Prerequisite: PSYCH 7A or PSCI 9 or PSYCH 9B or PSCI 11B or LSCI 3

Same as LSCI 155.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Language Science Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 156A. Acquisition of Language II. 4 Units.**

Focuses on native language learning, exploring the way in which infants and very young children unconsciously uncover the rich systematic knowledge of their native language. Examines both experimental and computational studies that quantitatively investigate the 'how' of language acquisition.

Prerequisite: PSYCH 56L or LINGUIS 51

Same as LINGUIS 150.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 157M. Computational Methods for Language Research. 4 Units.**

Focuses on computational methods useful for language research. Students become familiar with software and programming languages used for extracting information from electronic datasets and for creating basic simulations of linguistic cognition. No prior programming experience assumed.

Prerequisite: PSYCH 150 or LSCI 155 or PSYCH 156A or LSCI 151

Same as PSYCH 157M.

**PSYCH 159. Special Topics in Language. 4 Units.**

Studies in selected areas of language sciences. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 160A. Introduction to Cognitive Neuroscience. 4 Units.**

Introduction to the neural basis of human perceptual, motor, and cognitive abilities. Topics include sensory perception, motor control, memory, language, attention, emotion, frontal lobe function, functional brain imaging, and neuropsychological disorders.

Prerequisite: (PSYCH 7A or PSY BEH 9) and (PSYCH 9A or PSY BEH 11A) and (PSYCH 9B or PSY BEH 11B)

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 160D. Brain Disorders and Behavior. 4 Units.**

Examines the localization of human brain functions and the effects of neurological disorders on psychological functions such as perception, motor control, language, memory, and decision-making.

Prerequisite: (PSYCH 7A or PSY BEH 9) and (PSYCH 9A or PSY BEH 11A) and (PSYCH 9B or PSY BEH 11B) or BIO SCI 35 or BIO SCI N110

Same as BIO SCI N165.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Biological Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 160H. History of Cognitive Neuroscience. 4 Units.**

Studies of the human mind from ancient cultures to the innovation of modern methods of brain imaging. Logic of valid and invalid brain hypothesis are examined. Recurring theme is the competition between holistic and localized views of brain function.

Prerequisite: PSYCH 9A or PSY BEH 11A or PSYCH 7A or PSY BEH 9

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 161. Language and the Brain . 4 Units.**

Research analysis on biological bases of human linguistic capacity. Development, focusing on hemispheric specialization, plasticity; localization of specific linguistic functions in adults, with emphasis on study of aphasias; relation of linguistic capacity to general cognitive capacity, considering research on retardation.

Prerequisite: (PSYCH 7A or PSY BEH 9 or PSYCH 9A or PSY BEH 11A) and (PSYCH 9B or PSY BEH 11B or BIO SCI 35 or BIO SCI N110 or BIO SCI N115A)

Same as BIO SCI N160, LSCI 158.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Biological Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 161H. Hearing and the Brain. 4 Units.**

An overview of brain mechanisms of hearing, including perception of simple sounds, speech, and music. Begins with sound itself, and looks at processing by the ear, auditory pathways, auditory cortex, and beyond. Also auditory development, learning, and clinical issues.

Prerequisite: PSYCH 160A or BIO SCI 93 or BIO SCI H93

Same as BIO SCI N147.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Biological Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 162N. Human Neuropsychology. 4 Units.**

A survey of human brain disorders using a clinical case study approach to illustrate fundamental issues in studying brain and behavior. Topics include sensory deficits, attentional neglect, amnesia, cortical organization, clinical psychopathology, and more.

Prerequisite: BIO SCI N110 or BIO SCI N115A or PSYCH 9A or PSCI 11A

Same as BIO SCI N173, PSCI 163C.

Restriction: School of Biological Sciences students have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 169. Special Topics in Cognitive Neuroscience . 4 Units.**

Studies in selected areas of cognitive neuroscience. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 173A. Psychological Anthropology. 4 Units.**

Cultural differences and similarities in personality and behavior. Child-rearing practices and consequent adult personality characteristics, biocultural aspects of child development and attachment, culture and behavior evolutionary models, politically linked personality, cognitive anthropology, psychology of narrative forms, comparative national character studies.

Prerequisite: ANTHRO 2A or PSYCH 7A or (PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C)

Same as ANTHRO 132A.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 174E. African American Psychology. 4 Units.**

Historical overview of the development of black psychology and the African American frame of reference. Topics include personality development, psychological assessment, issues in education, black mental health, and the role of the African American psychologist in the community.

Same as AFAM 153.

**PSYCH 174H. Chicano/Latino Families. 4 Units.**

Introduction to the research, literature, and issues surrounding the topic of Chicano/Latino families including cultural history, contemporary issues, organization of family, traditions, lifestyles, values, beliefs, generational differences, gender issues, ethnic identity, evolution of demographic patterns, current economic and political standings.

Same as CHC/LAT 170, PSCI 166S, SOC SCI 165.

**PSYCH 176A. Political Psychology. 4 Units.**

Examination of how psychological theory and research may be used to better understand political thought and behavior. Drawing on theories of learning, cognition, and personality, discusses such topics as the formation of political attitudes, and the process of political decision-making.

Same as POL SCI 128C.

Restriction: Majors only. POL SCI 128C may not be taken for credit if taken after POL SCI 137C.

**PSYCH 177D. Deviance. 4 Units.**

Perspectives on deviance and criminality in behavior, institution, community, and myth. The suitability of contemporary theories of deviant behavior.

Same as SOCIOL 156, CRM/LAW C107.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 177F. Forensic Psychology: Advanced Seminar. 4 Units.**

Focuses on the psychology of criminal offending, particularly violent behavior. Examines violence, sexual offending, and mental disorder related to crime with regard to clinical assessment and treatment; mental health services within forensic institutions.

Prerequisite: (PSCI 9 or PSCI 11C or PSYCH 7A or PSYCH 9C) and PSCI 102C and (PSCI 178S or CRM/LAW C149)

Same as CRM/LAW C136, PSCI 156C.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSYCH 178N. Social Psychology of Networks. 4 Units.**

Review of network methods used in small group and organizational research. Discussion of social psychological literature relevant to the network of study of cognitive social structure, exchange/communication, identity negotiation, and social control. Case study of network datasets exemplifies research issues.

Same as SOCIOL 135.

Restriction: Sociology Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSYCH 179. Special Topics in Interdisciplinary Studies. 1-4 Units.**

Studies in selected areas of interdisciplinary studies. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Psychology Majors have first consideration for enrollment.

**PSYCH 198. Directed Group Study. 1-4 Units.**

Directed study with Cognitive Sciences faculty.

Repeatability: May be repeated for credit unlimited times.

**PSYCH 199. Independent Study. 1-4 Units.**

Independent research with Cognitive Sciences faculty.

**PSYCH 201A. Cognitive Sciences Research Seminar. 1.3 Unit.**

Weekly reports and colloquia by faculty, students, and visitors.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Psychology Majors only.

**PSYCH 201B. Cognitive Sciences Research Seminar. 1.3 Unit.**

Weekly reports and colloquia by faculty, students, and visitors.

Prerequisite: PSYCH 201A

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Psychology Majors only.

**PSYCH 201C. Cognitive Sciences Research Seminar. 1.4 Unit.**

Weekly reports and colloquia by faculty, students, and visitors.

Prerequisite: PSYCH 201B

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Psychology Majors only.

**PSYCH 202A. Proseminar in the Cognitive Sciences. 1 Unit.**

Introduction to the conceptual foundations and basic research results in the cognitive sciences for first-year graduate students.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**PSYCH 203A. Discrete Mathematics and Probability. 4 Units.**

Logic and set theory are covered during the first three weeks, using an interactive computer system. The remaining seven weeks are devoted to probability theory and cover elementary concepts from samples spaces to Chebychev's Inequality and the moment generating function.

Restriction: Graduate students only.

**PSYCH 203C. Algorithmic Statistics. 4 Units.**

Discussion of the fundamentals of statistical inference and computational implementations of common statistical models.

Restriction: Graduate students only.

**PSYCH 203D. Applied Mathematics for Cognitive Sciences Research. 4 Units.**

Covers the basics of linear systems analysis, focusing on linear algebra, Fourier analysis, differential equations, and elementary signal processing. Applications in Cognitive Science and Cognitive Neuroscience research will be developed.

Prerequisite: PSYCH 205A

Restriction: Graduate students only. Psychology Majors only.

**PSYCH 205A. Computational and Research Methods with MATLAB. 4 Units.**

Introduces rudiments of programming, statistical analysis and probability theory, graphic visualization, GUI design, spectral analysis, and simulation models using MATLAB, a software package for solving quantitative problems often encountered in experimental psychology.

Restriction: Graduate students only.

**PSYCH 205B. Running Experiments Using MATLAB. 4 Units.**

Provides an in-depth introduction to writing MATLAB programs to run auditory and visual experiments. Topics covered include program structure, stimulus generation, presentation, and data collection.

Prerequisite: PSYCH 205A

**PSYCH 205C. Computational Statistics. 4 Units.**

Introduction to a number of computational statistics approaches including exploratory data analysis and modeling using a probabilistic framework with Bayesian graphical models. Emphasis will be on in-class programming using MATLAB.

Restriction: Graduate students only.

**PSYCH 210A. Introduction to Cognitive and Brain Sciences I: Perception. 4 Units.**

Discusses models of cognition and evidence linking cognition and the brain. Focus is on visual, auditory, and somatic perception and bottom-up mechanisms of attention.

Restriction: Graduate students only.

**PSYCH 210B. Introduction to Cognitive and Brain Sciences II: Cognition. 4 Units.**

Discusses models of cognition and evidence linking cognition and the brain. Focus is on emotion, top-down attention, goal-directed behavior, categorization, judgment, and decision-making.

Restriction: Graduate students only.

**PSYCH 210C. Introduction to Cognitive and Brain Sciences III: Learning and Development. 4 Units.**

Discusses experimental data, formal models of learning, and evidence linking learning and development to its neural substrates. Topics include Pavlovian and instrumental conditioning, language acquisition, causal reasoning, perceptual learning, category formation, and structure learning.

Restriction: Graduate students only.

**PSYCH 213. The Mind/Body Problem. 4 Units.**

Course is multidisciplinary, drawing on information from the fields of quantum physics, computer vision, artificial intelligence, cognition, neurophysiology, philosophy, and psychophysics.

Restriction: Graduate students only.

**PSYCH 214. Bayesian Cognitive Modeling. 4 Units.**

Considers a range of statistical methods of data analysis and simple cognitive models using the Bayesian graphical modeling framework.

Restriction: Graduate students only.

**PSYCH 218. Hearing. 4 Units.**

Examines auditory sensation and perception using psychophysical and neuroscientific perspectives. Covers physical aspects of sound; subcortical auditory processing; aspects of sensation and perception such as sensitivity, sound localization, and complex-sound recognition; neuroscientific studies of cortical function; and abnormal auditory processing.

Restriction: Graduate students only.

**PSYCH 229. Special Topics in Human Cognition. 1.3-4 Units.**

Current research in brain/ behavior relationships, human memory, and learning theory is presented.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PSYCH 231P. Topics in Philosophy of Psychology. 4 Units.**

Selected topics in the philosophy of psychology, e.g., the nature of psychological explanation, reductionism, issues in cognitive, behavioral, and neuroscience.

Repeatability: Unlimited as topics vary.

Same as LPS 243, PHILOS 243.

**PSYCH 234A. Mathematical Models of Cognitive Processes I . 4 Units.**

Mathematical models of various cognitive processes developed since 1960, including learning, memory, perception, psycholinguistics, and problem solving. Models are formulated in different mathematical languages: calculus, algebra, logic, probability, and computer. Difficulties in testing and validating models discussed.

Restriction: Graduate students only.

**PSYCH 237. Advanced Bayesian Cognitive Modeling. 4 Units.**

Considers a range of advanced cognitive process models including models of signal detection, memory retention, category learning, stimulus representation, and reasoning using the Bayesian graphical modeling framework.

Prerequisite: PSYCH 214

Restriction: Graduate students only.

**PSYCH 239. Special Topics in Methodology and Models. 1.3-4 Units.**

Current research in cognitive sciences methodologies, concepts, and models is presented.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PSYCH 245A. Computational Models of Language Learning. 4 Units.**

Focuses on computational models of native language learning, exploring how probabilistic learning and inference fare on difficult case studies within language acquisition. In all cases, grounds the learning models in available empirical data and considers their psychological plausibility.

Prerequisite: PSYCH 215L

Restriction: Graduate students only.

**PSYCH 245M. Computational Models of Language Learning. 4 Units.**

Focuses on computational models of native language learning, exploring how probabilistic learning and inference fare on difficult case studies within language acquisition. In all cases, grounds the learning models in available empirical data and considers their psychological plausibility.

Prerequisite: LSCI 251. LSCI 251 with a grade of B- or better

Same as LSCI 206C.

Restriction: Graduate students only.

Concurrent with LSCI 106M.

**PSYCH 249. Special Topics in Language Science. 1.3-4 Units.**

Foundations and current research in theoretical, experimental, and computational linguistics.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PSYCH 259. Special Topics in Human Performance. 1.3-4 Units.**

Current research in the human issues involved with sensation, perception, and cognition.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PSYCH 261N. Cortical Neuroscience. 4 Units.**

Physiology of the cerebral cortex, theoretical neuroscience, and the neural basis of perception.

Prerequisite: PSYCH 216

**PSYCH 262. Functional Neuroanatomy. 4 Units.**

It is impossible to truly understand human behavior without some understanding of the physical structure that enables behavior. Examines recent findings in functional neuroanatomy through lectures and papers discussing links between particular behaviors and specific brain structures.

Restriction: Graduate students only.

**PSYCH 265. Introduction to Functional MRI. 4 Units.**

Describes the fundamentals of imaging the human brain function using functional Magnetic Resonance Imaging (fMRI). Topics include basic fMRI physics, experimental design, and data acquisition and analysis.

Restriction: Graduate students only.

**PSYCH 268A. Computational Neuroscience. 4 Units.**

Introduction to computational neuroscience. Mathematical models of single neurons, neural circuits, thalamocortical systems, and cortical mass action can stimulate single-unit, local field potential, and EEG dynamics. These models are used to investigate mechanisms of sensation, motor control, attention, and consciousness.

Prerequisite: PSYCH 205A and (PSYCH 210A or PSYCH 210B or PSYCH 210C)

**PSYCH 268R. Cognitive Robotics. 4 Units.**

Introduces concepts for studying cognitive function by embedding brain models on robotic platforms. Topics include robot construction, computer programming, and the notion of embodiment. Students construct simple robots and program these robots to perform different behaviors.

**PSYCH 269. Special Topics in Cognitive Neuroscience. 1.3-4 Units.**

Current research in cognitive neuroscience.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PSYCH 289. Special Topics in Sensation and Perception. 1.3-4 Units.**

Current research in the reception and processing of visual and auditory stimuli presented.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PSYCH 290. Dissertation Research. 1-12 Units.**

Dissertation research with Cognitive Science faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Psychology Majors only.

**PSYCH 299. Individual Study. 4-12 Units.**

Individual research with Cognitive Science faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Cognitive Sciences, B.S.

The B.S. in Cognitive Sciences is structured to provide students with a challenging introduction to the broad field of Cognitive Sciences that is strongly grounded in theory and an empirical approach emphasizing experimental/computational methods. To ensure an intellectually coherent experience, students in the major are able to choose courses from areas including: (a) Cognitive Neuroscience; (b) Experimental Psychology–Sensation, Perception,

Attention, and Memory; (c) Language Science; and (d) Computational Cognitive Science. In addition, students are required to acquire a background in (a) calculus, (b) statistics, (c) introductory computer programming, and (d) some combination of the natural sciences, logic and philosophy of science, linguistics, or more advanced computer science or mathematics.

NOTE: Students may complete either the B.A. in Psychology, the B.S. in Psychology, or the B.S. in Cognitive Sciences. You may not double major within the majors offered by the department.

The B.S. in Cognitive Sciences is structured to provide students with a challenging introduction to the broad field of Cognitive Sciences that is strongly grounded in theory and an empirical approach emphasizing experimental/computational methods. To ensure an intellectually coherent experience, students in the major are able to choose courses from areas including: (a) Cognitive Neuroscience; (b) Experimental Psychology—Sensation, Perception, Attention, and Memory; (c) Language Science; and (d) Computational Cognitive Science. In addition, students are required to acquire a background in (a) calculus, (b) statistics, (c) introductory computer programming, and (d) some combination of the natural sciences, logic and philosophy of science, linguistics, or more advanced computer science or mathematics.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Departmental Requirements for the Major

School requirements must be met and must include courses as specified below:

A. Complete the following:

MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
COGS 110 or STATS 110	Quantitative Methods for Cognitive Sciences Research Statistical Methods for Data Analysis I
PSYCH 114M or I&C SCI 31	MATLAB Programming Introduction to Programming
PSYCH 9A- 9B- 9C	Psychology Fundamentals and Psychology Fundamentals and Psychology Fundamentals
COGS 109	Cognitive Sciences Research Seminar
PSYCH H101A	Honors Seminar in Psychology I
PSYCH H111A	Honors Experimental Psychology
PSYCH 111BW- H111B	Honors Advanced Experimental Psychology and Honors Advanced Experimental Psychology Laboratory
PSYCH H111C	Honors Research in Experimental Psychology
STATS 7	Basic Statistics

B. Select three courses from the following list:

BIO SCI 35	The Brain and Behavior
BIO SCI 36	Drugs and the Brain
BIO SCI 37	Brain Dysfunction and Repair
BIO SCI 38	Mind, Memory, Amnesia, and the Brain
BIO SCI 93	From DNA to Organisms
BIO SCI 94	From Organisms to Ecosystems
I&C SCI 31	Introduction to Programming <sup>1</sup>
I&C SCI 32	Programming with Software Libraries
I&C SCI 33	Intermediate Programming
PHYSICS 3A- 3B- 3C	Basic Physics I and Basic Physics II and Basic Physics III
or	
PHYSICS 7C- 7D- 7E	Classical Physics and Classical Physics and Classical Physics

with labs PHYSICS 7LC and PHYSICS 7LD

NOTE: Careful selection should be made in order to satisfy general education requirements and prerequisites for upper-division courses.

C. Three additional courses must be taken in Biology, Physics, Computer Science, Linguistics, Logic and Philosophy of Science, Mathematics, or Statistics. They can be chosen either from the list above or from the following list:

LSCI 1	Languages of the World
LSCI 3	Introduction to Linguistics
LSCI 10	Introduction to Phonology
LSCI 20	Introduction to Syntax
LSCI 51	Acquisition of Language
LSCI 68	Introduction to Language and Culture
LPS 30	Introduction to Symbolic Logic
LPS 31	Introduction to Inductive Logic
MATH 2D	Multivariable Calculus
MATH 2E	Multivariable Calculus
MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations
MATH 4	
PHYSICS 15	Physics of Music
PSYCH 56L	Acquisition of Language
STATS 111	Statistical Methods for Data Analysis II
STATS 112	Statistical Methods for Data Analysis III

D. Three core courses must be selected from this list:

PSYCH 120A	Abnormal Psychology
PSYCH 120D	Developmental Psychology
PSYCH 120H	History of Psychology
PSYCH 120P	Personality Theories
PSYCH 130A	Perception and Sensory Processes
PSYCH 140C	Cognitive Science
PSYCH 140L	Principles of Learning Theory
PSYCH 140M	Human Memory
PSYCH 150	Psychology of Language
PSYCH 160A	Introduction to Cognitive Neuroscience
PSYCH 160D	Brain Disorders and Behavior

E. Four core electives must be selected from this list:

COMPSCI 171	Introduction to Artificial Intelligence
COMPSCI 178	Machine Learning and Data-Mining
COMPSCI 183	Introduction to Computational Biology
LSCI 102	Formal Languages and Automata
LSCI 111	Intermediate Phonology
LSCI 121	Intermediate Syntax
PSYCH 112R- 112LR	Cognitive Robotics and Cognitive Robotics Laboratory
PSYCH 131A	Vision
PSYCH 131B	Hearing
PSYCH 156A	Acquisition of Language II
PSYCH 161	Language and the Brain
PSYCH 161H	Hearing and the Brain
PSYCH 162N	Human Neuropsychology

F. Six additional electives must be selected from the lists under requirements D and E only. <sup>2</sup>

G. All courses for the above major requirements must be taken with a grade of B- or better. Students must maintain an overall grade point average of 3.0 for courses within the major.

<sup>1</sup> If not used to satisfy Introductory Programming Requirement.

<sup>2</sup> If accepted into the Honors Program, only four additional electives must be selected from the lists under requirements D and E.

## Honors Program in Psychology and Cognitive Sciences

The Honors Program in Psychology and Cognitive Sciences is an advanced educational and research program for outstanding undergraduate students in these two majors.

The program emphasizes advanced competence in scientific research, and allows participants the opportunity to pursue advanced work in independent research, in addition to earning honors upon graduation. While the program is designed for students who are interested in pursuing graduate study or seeking challenging research experiences as a capstone to their undergraduate experience, all Psychology and Cognitive Sciences majors who meet the minimum eligibility requirements are welcome to apply.

The program has a limited number of openings and seeks to attract outstanding students who plan to undertake postgraduate education in some field of cognitive/psychological sciences. Admission to the program is based on a formal application submitted prior to the start of the junior year. Applicants should have an overall grade point average of at least 3.2 and a grade point average of at least 3.5 in courses within their major. Students are encouraged to apply in the summer two years prior to graduation, and, in some instances, may be accepted one year prior to graduation.

During the junior year, students who participate in the program are expected to enroll in the Honors Experimental Psychology series (PSYCH H111A-PSYCH 111BW-PSYCH H111C), and enroll in the first course in the Honors Seminar series (PSYCH H101A) in the fall quarter. As seniors, following successful completion of these junior-year requirements, honors students are enrolled in the remaining courses of the Honors Seminar series in fall (PSYCH H101B) and spring (PSYCH H101C). In addition, honors students must successfully complete a senior honors thesis as part of the senior-year course work.

The Honors Experimental Psychology series can be used to satisfy the Research Methods requirement for the major. The Honors Seminar series may be used to satisfy two of the courses required by Part A of the B.S. in Psychology major requirements.

## Cognitive Sciences, Ph.D.

The Department of Cognitive Sciences offers a Ph.D. program in cognitive sciences, along with a concentration in cognitive neuroscience, to prepare students for research and teaching careers in academia, industry, and government. The emphasis is on modern techniques of experimentation and theory construction. Special attention is given to providing hands-on research experience and equipping students with sophisticated mathematical and computing skills. The department faculty, which includes two members of the National Academy of Sciences, has many who serve as editors or editorial board members of leading professional journals, and as members of NSF and NIH study panels. Many cognitive sciences faculty are also members of UCI's Institute for Mathematical Behavioral Sciences, and the department is generally regarded as one of the world's leading centers for mathematically oriented research in cognitive psychology. The department is also allied closely to the school's Center for Cognitive Neuroscience and Engineering and the Center for Language Science.

In addition to meeting the general requirements for admission, applicants should have acquired a background in mathematics equivalent to at least one year of calculus. Advanced course work in some of the following fields is highly desirable: psychology, computer science, mathematics, physical sciences, engineering, biology, logic, and linguistics. Standard requirements for admission include Graduate Record Examination (GRE) scores for tests taken within the past five years, official transcripts of all college course work, and at least three letters of recommendation. Applicants whose primary language is not English are required to demonstrate proficiency in English for admission consideration. Information about this requirement is available at <https://www.grad.uci.edu/admissions/applying-to-uci/english-proficiency.php>.

To receive full consideration for fellowship and assistantship awards, applications must be received by December 1. Admissions decisions are made in March. Application materials are available online at the Graduate Division website (<http://www.grad.uci.edu/html>).

A. Select two cognitive and brain sciences core courses:

PSYCH 210A	Introduction to Cognitive and Brain Sciences I: Perception
PSYCH 210B	Introduction to Cognitive and Brain Sciences II: Cognition
PSYCH 210C	Introduction to Cognitive and Brain Sciences III: Learning and Development

B. Select three quantitative courses:

PSYCH 203A	Discrete Mathematics and Probability
PSYCH 203C	Algorithmic Statistics
PSYCH 203D	Applied Mathematics for Cognitive Sciences Research
PSYCH 214	Bayesian Cognitive Modeling
STATS 210	Statistical Methods I: Linear Models

C. Select two computational methods courses:

PSYCH 205A	Computational and Research Methods with MATLAB
PSYCH 205B	Running Experiments Using MATLAB
PSYCH 205C	Computational Statistics

D. Select two Cognitive Sciences core courses from PSYCH 211-219

E. Complete three electives

Students must fulfill the Ph.D. program's computer-programming language requirement.

Students are expected to enroll in the Cognitive Sciences Research Seminar PSYCH 201A-PSYCH 201B- PSYCH 201C during all quarters in residence prior to passage of the advancement-to-candidacy examination. During the fall of the first year in the program, students must enroll in PSYCH 202A.

**Second-year examination.** During the first year, in consultation with their advisor, the student should establish an advisory committee consisting of three faculty members, including the advisor and at least one other cognitive sciences faculty member. The committee should meet with the student during spring quarter of the first year to determine the student's area(s) of research interest and to identify the published literature with which the student must be familiar. At the beginning of the fall quarter of their second year, students will be required to take a second-year examination. It will involve (1)

a critical review of work in the student's area of research interest, and (2) an oral examination by the student's committee members. Should the student fail the second-year exam, the student will be allowed to repeat the exam in the winter quarter. A subsequent failure results in the student exiting the program.

**Pre-advancement talk.** Prior to advancement, usually in the third year, each student is required to give a talk to the department faculty and students. Each student is expected to carry out theoretical/empirical research during the first two years. By the start of the third year, each student should have completed a research project of a scope and nature that is potentially publishable in a professional journal. This talk is required prior to the student's advancement to candidacy.

**Advancement examination.** The advancement examination consists of a written research proposal in NIH NRSA Predoctoral Fellowship format and an oral defense of the proposed research. The requirements for advancement are detailed below.

**Dissertation.** Students must submit a dissertation describing original publishable research and present a public defense of the dissertation as the final requirement of the Ph.D. program as detailed below.

## Requirements for Advancement to Candidacy

The requirements for advancement to candidacy are (1) the student must meet the requirements listed above for the appropriate Master's degree; (2) the student must, in addition, form a five-member faculty committee selected according to Graduate Division policy. The committee will examine the student on a topic which is determined in consultation with the committee. A written document describing the student's work on this topic must be submitted to the committee prior to advancement. The student must demonstrate an understanding of the background and issues for the research topic and show sufficient preparation and creativity to undertake planning for a dissertation project (e.g., by describing a possible experimental design or outlining a possible theoretical development); and (3) students are required to advance to candidacy by the end of their third year in the program.

## Requirements for the Ph.D.

The requirements for the Ph.D. degree are (1) the student must formally present and defend a written dissertation proposal to a committee of at least three members selected according to Graduate Division requirements. The dissertation proposal presentation may take place as part of the examination for Advancement to Candidacy, in which case, that five-member committee will approve the dissertation proposal; (2) the proposal must be approved prior to the final dissertation defense (usually at least three months before to allow time for the candidate to incorporate suggestions and changes required by the committee); (3) prior to the approval of the final version of the dissertation the student is expected to defend the dissertation in a public colloquium announced with at least two week's notice; and (4) all requirements for the Ph.D. degree must be fulfilled within three years after advancement to candidacy.

The normative time for advancement to candidacy is three years. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is six years.

## Joint M.S. in Statistics and Ph.D. in Cognitive Sciences Program

Students must be admitted into the Ph.D. program in Cognitive Sciences or the Ph.D. program in Cognitive Sciences with a concentration in Cognitive Neuroscience in order to be eligible for the joint program. During their first year, Ph.D. students interested in pursuing the joint program must enroll in STATS 210 and either STATS 202 or STATS 211, which fulfills the quantitative requirement in the Ph.D. program.

### Admissions

In the winter quarter of their first year, interested Ph.D. students must contact the Graduate Director to indicate interest in applying for the joint M.S./Ph.D. program. The application consists of:

1. A copy of the original application to the Department of Cognitive Sciences' Ph.D. program, including transcripts, GRE scores, and letters of recommendation.
2. A letter from the Cognitive Sciences Department Chair recommending the student for the joint program in Statistics/Cognitive Sciences.
3. A letter of approval from the School of Social Sciences' Associate Dean for Research and Graduate Studies.

The Department of Statistics reviews the application to determine whether the student is adequately prepared for the M.S. in Statistics component.

Upon admission into the joint program, the student is expected to pass a comprehensive exam covering the material in either STATS 210-STATS 211-STATS 212 or STATS 210-STATS 202-STATS 203, following the spring quarter. In the fall of the second year, the student enrolls as an M.S. in Statistics student through the Department of Statistics and completes the remaining coursework and comprehensive exam. During this year, the student continues to receive financial support from the School of Social Sciences, as outlined in the original admissions letter.

After successfully completing one year in the Statistics program, the student will enroll in the Cognitive Sciences Ph.D. program in year three, and complete the normal requirements for the Ph.D.

**Requirements for the M.S. in Statistics**

A. Complete the following:

STATS 200A- 200B- 200C	Intermediate Probability and Statistical Theory and Intermediate Probability and Statistical Theory and Intermediate Probability and Statistical Theory
STATS 202	Statistical Methods for Data Analysis II <sup>1</sup>
STATS 203	Statistical Methods for Data Analysis III <sup>1</sup>
STATS 210	Statistical Methods I: Linear Models
STATS 205	Introduction to Bayesian Data Analysis

B. Complete three quarters of STATS 280

C. Select two elective graduate courses offered by the Department of Statistics <sup>2</sup>D. Select three electives from the Ph.D. program in Cognitive Sciences. The three electives must be selected from the following two areas: <sup>3</sup>**Computational Methods**

PSYCH 203C	Algorithmic Statistics
PSYCH 205A	Computational and Research Methods with MATLAB
PSYCH 205B	Running Experiments Using MATLAB
PSYCH 205C	Computational Statistics
PSYCH 214	Bayesian Cognitive Modeling
PSYCH 237	Advanced Bayesian Cognitive Modeling

**Neuroscience Methods**

PSYCH 265	Introduction to Functional MRI
PSYCH 268A	Computational Neuroscience

<sup>1</sup> STATS 211 and STATS 212 may be substituted for STATS 202 and STATS 203.<sup>2</sup> At most, one of the two elective courses may be STATS 299, and only with prior approval from the Department's Graduate Committee.<sup>3</sup> These three courses fulfill requirements for both programs.

The entire program of courses must be approved by the Statistics Department Graduate Committee. Students with previous graduate training in statistics may petition the Committee to substitute other courses for a subset of the required courses. Students are required to pass a written comprehensive examination ordinarily at the end of the first year covering the material in either STATS 202, STATS 203, and STATS 210 or STATS 210, STATS 211, and STATS 212. At the end of the second year, the student must pass a written comprehensive examination covering the material from STATS 200A-STATS 200B-STATS 200C.

**Requirements for the Ph.D. in Cognitive Sciences**

A. Complete the following:

PSYCH 210A- 210B	Introduction to Cognitive and Brain Sciences I: Perception and Introduction to Cognitive and Brain Sciences II: Cognition
PSYCH 205A	Computational and Research Methods with MATLAB

B. Select one of the following:

PSYCH 205B	Running Experiments Using MATLAB
PSYCH 205C	Computational Statistics
PSYCH 214	Bayesian Cognitive Modeling

C. Select two Cognitive Science core courses from PSYCH 211-219.

D. Complete three electives (one technical elective is required).

The technical elective must be selected from the following two technical areas:

**Computational Methods**

PSYCH 203C	Algorithmic Statistics
PSYCH 205A	Computational and Research Methods with MATLAB
PSYCH 205B	Running Experiments Using MATLAB
PSYCH 205C	Computational Statistics
PSYCH 214	Bayesian Cognitive Modeling
PSYCH 237	Advanced Bayesian Cognitive Modeling

**Neuroscience Methods**

PSYCH 265

Introduction to Functional MRI

PSYCH 268A

Computational Neuroscience

Students must fulfill the Ph.D. program's computer-programming language requirement.

Students are expected to enroll in the Cognitive Sciences Research Seminar PSYCH 201A-PSYCH 201B-PSYCH 201C during all quarters in residence prior to passage of the advancement to candidacy examination. During the fall of the first year in the program, students must enroll in PSYCH 202A (Proseminar in the Cognitive Sciences).

**Second-year examination.** During the first-year in the Ph.D. program, the student in consultation with their advisor should establish an advisory committee consisting of three faculty members, including the advisor and at least one other cognitive sciences faculty member. The committee should meet with the student during the spring quarter of the first year to determine the student's area(s) of research interest and to identify the published literature with which the student must be familiar. At the beginning of the fall quarter of their second year in the Ph.D. program, students will be required to take a second-year examination. It involves (1) a critical review of work in the student's area of research interest, and (2) an oral examination by the student's committee members. Should the student fail the second year exam, the student will be allowed to repeat the exam in the winter quarter. A subsequent failure results in the student leaving the program.

**Pre-advancement talk.** Prior to advancement, usually in the third year in the Ph.D., each student is required to give a talk to the department faculty and students. Each student is expected to carry out theoretical/empirical research during the first two years. By the start of the third year, each student should have completed a research project of a scope and nature that is potentially publishable in a professional journal. This talk is required prior to the student's advancement to candidacy.

**Advancement examination.** The advancement examination consists of a written research proposal in NIH NRSA Predoctoral Fellowship format, and an oral defense of the proposed research. The requirements for advancement are detailed below.

**Dissertation.** Students must submit a dissertation describing original publishable research and present a public defense of the dissertation as the final requirement of the Ph.D. program as detailed below.

## Ph.D. in Cognitive Sciences with a Concentration in Cognitive Neuroscience

Students can also pursue a Ph.D. in cognitive sciences with a concentration in cognitive neuroscience. This is an interdisciplinary field which studies the relation between mind and brain. With the development of non-invasive functional brain imaging techniques during the last two decades, the integration of cognitive and neural models of information processing has become a major focus in the field, and a major growth area within the department's academic plan.

Commensurate with the multidisciplinary nature of cognitive neuroscience, the department expects to admit students with a variety of undergraduate educational backgrounds. These include, but are not necessarily limited to, undergraduate degrees in psychology/cognitive science, neuroscience, biology, computer science, mathematics and engineering.

A. Select two cognitive and brain sciences core courses:

PSYCH 210A	Introduction to Cognitive and Brain Sciences I: Perception
PSYCH 210B	Introduction to Cognitive and Brain Sciences II: Cognition
PSYCH 210C	Introduction to Cognitive and Brain Sciences III: Learning and Development

B. Select two quantitative courses:

PSYCH 203A	Discrete Mathematics and Probability
PSYCH 203C	Algorithmic Statistics
PSYCH 203D	Applied Mathematics for Cognitive Sciences Research
PSYCH 214	Bayesian Cognitive Modeling
STATS 210	Statistical Methods I: Linear Models

C. Select one computational methods course:

PSYCH 205A	Computational and Research Methods with MATLAB
PSYCH 205B	Running Experiments Using MATLAB
PSYCH 205C	Computational Statistics

D. Complete two neuroscience methods courses:

PSYCH 265	Introduction to Functional MRI
PSYCH 268A	Computational Neuroscience

E. Select two neuroscience courses from PSYCH 261-269

F. Complete three electives

Students must fulfill the Ph.D. program's computer-programming language requirement.

Students are expected to enroll in the Cognitive Sciences Research Seminar PSYCH 201A-PSYCH 201B- PSYCH 201C during all quarters in residence prior to passage of the advancement-to-candidacy examination. During the fall of the first year in the program, students must enroll in PSYCH 202A.

**Second-year examination.** During the first year, the student in consultation with their advisor should establish an advisory committee consisting of three faculty members, including the advisor and at least one other cognitive sciences faculty member. The committee should meet with the student during spring quarter of the first year to determine the student's area(s) of research interest and to identify the published literature with which the student must be familiar. At the beginning of the fall quarter of their second year, students will be required to take a second-year examination. It will involve (1) a critical review of work in the student's area of research interest, and (2) an oral examination by the student's committee members. Should the student fail the second year exam, the student will be allowed to repeat the exam in the winter quarter. A subsequent failure results in the student leaving the program.

**Pre-advancement talk.** Prior to advancement, usually in the third year, each student is required to give a talk to the department faculty and students. Each student is expected to carry out theoretical/empirical research during the first two years. By the start of the third year, each student should have completed a research project of a scope and nature that is potentially publishable in a professional journal. This talk is required prior to the student's advancement to candidacy.

**Advancement examination.** The advancement examination consists of a written research proposal in NIH NRSA Predoctoral Fellowship format and an oral defense of the proposed research. The requirements for advancement are detailed below.

**Dissertation.** Students must submit a dissertation describing original publishable research and present a public defense of the dissertation as the final requirement of the Ph.D. program as detailed below.

## M.S. in Cognitive Neuroscience

Students enrolled in the concentration program in Cognitive Neuroscience may earn an M.S. in Cognitive Neuroscience by completing the following requirements: The student must 1) complete the required course work as outlined below; 2) pass the second year examination, which requires both a written critical review of literature in the student's area of interest and an oral examination by the student's committee members; and 3) fulfill a computer-programming language requirement by satisfactorily completing the computational research methods requirement, or by demonstrating proficiency in use of a programming language for cognitive sciences research as assessed by two faculty members and approved by the Graduate Director.

## Hearing and Speech Sciences, Minor

A minor in Hearing and Speech Sciences will provide in-depth training for undergraduates interested in becoming scientists and/or clinicians in health-related fields. This minor will help stimulate students' interest in hearing and speech as well as increase their opportunities to be admitted to postgraduate programs in audiology, speech-language pathology, biomedical engineering, psychology, neuroscience, medicine and other allied areas.

A minor in Hearing and Speech Sciences will provide in-depth training for undergraduates interested in becoming scientists and/or clinicians in health-related fields. This minor will help stimulate students' interest in hearing and speech as well as increase their opportunities to be admitted to postgraduate programs in audiology, speech-language pathology, biomedical engineering, psychology, neuroscience, medicine and other allied areas.

### Hearing and Speech Sciences Minor Requirements

A. Complete the following:

BIO SCI N110 or PSYCH 160A	Neurobiology and Behavior Introduction to Cognitive Neuroscience
-------------------------------	---

B. Statistic course(s) selected from the following: <sup>1</sup>

STATS 120A- 120B- 120C	Introduction to Probability and Statistics I and Introduction to Probability and Statistics II and Introduction to Probability and Statistics III
PSYCH 10A- 10B- 10C	Probability and Statistics in Psychology I and Probability and Statistics in Psychology II and Probability and Statistics in Psychology III
SOC SCI 10A- 10B- 10C	Probability and Statistics in Social Sciences I and Probability and Statistics in Social Sciences II and Probability and Statistics in Social Sciences III
STATS 7	Basic Statistics
STATS 8	Introduction to Biological Statistics
PUBHLTH 7A	Public Health Statistics I

C. Complete the following:

BIO SCI N147	Hearing and the Brain
--------------	-----------------------

D. Complete four courses from the following categories, with at least one course from each category:

#### Category I:

MATH 3A or MATH 113A	Introduction to Linear Algebra Mathematical Modeling in Biology
PSYCH 114M or I&C SCI 31	MATLAB Programming Introduction to Programming
An additional statistics or probability course beyond Requirement B (listed above).	

**Category II:**

LSCI 3	Introduction to Linguistics
LSCI 10	Introduction to Phonology
PSYCH 56L	Acquisition of Language (same as LINGUIS 51)
PSYCH 150	Psychology of Language (same as LINGUIS 155)

**Category III:**

BIO SCI N152	Developmental Neurobiology
PSYCH 131B	Hearing
PSYCH 161	Language and the Brain

E. Research Requirement - one quarter of research experience mentored by a CHR member (others may be allowed with prior approval). One year of research is highly recommended: <sup>2</sup>

BME 199	Individual Study
BIO SCI 199	Independent Study in Biological Sciences Research
MATH 199A or MATH 199B or MATH 199C	Special Studies in Mathematics Special Studies in Mathematics Special Studies in Mathematics
PSYCH 199	Independent Study

<sup>1</sup> For students with majors within the School of Social Sciences, one statistics course in addition to the School requirement must be completed. For students with majors outside of the School of Social Sciences, at least one statistics course is required. Other statistics courses may be approved for substitution.

<sup>2</sup> Note: BIO SCI 194S is a prerequisite to BME 199 and BIO SCI 199.

**Residency Requirement:** A minimum of five courses required for the minor must be completed at UCI. Approved courses taken in the Education Abroad Program are considered to be in-residence courses.

## Psychology, B.A.

NOTE: Students may complete either the B.A. in Psychology, the B.S. in Psychology, or the B.S. in Cognitive Sciences. You may not double major within the majors offered by the department.

The courses in this major are designed to provide students with a strong foundation in general psychology.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Departmental Requirements for the Major

School requirements must be met and must include 18 courses (70 units) as specified below:

A. Complete the following:

PSYCH 9A- 9B- 9C	Psychology Fundamentals and Psychology Fundamentals and Psychology Fundamentals
------------------	---

B. Two introductory courses (eight units) in the social sciences selected from:

ANTHRO 2A	Introduction to Sociocultural Anthropology
ANTHRO 2B	Introduction to Biological Anthropology
ANTHRO 2D	Introduction to Language and Culture
ECON 1	Introduction to Economics
LSCI 3	Introduction to Linguistics
POL SCI 11C	Introduction to Political Science: Micropolitics
SOC SCI 5A	Introduction to Human Geography
SOCIOL 1	Introduction to Sociology

SOCIOL 2	Globalization and Transnational Sociology
SOCIOL 3	Social Problems
or one or two quarters of the following when topic is not psychology:	
SOC SCI H1E- H1F- H1G	Honors: Critical Issues on the Social Sciences and Honors: Critical Issues on the Social Sciences and Honors: Critical Issues on the Social Sciences
C. A one-quarter course and laboratory in experimental psychology or research methods selected from the following:	
PSYCH 112A- 112LA	Experimental Psychology and Experimental Psychology Laboratory
PSYCH 112D- 112LD	Effective Graphical Presentation of Data and Effective Graphical Presentation of Data Lab
PSYCH 112M- 112LM	Research Methods in Psychology and Research Methods in Psychology Laboratory
PSYCH 112R- 112LR	Cognitive Robotics and Cognitive Robotics Laboratory
NOTE: These courses have as prerequisites PSYCH 9A, PSYCH 9B, PSYCH 9C and one year of mathematics/statistics (see course listings). These prerequisites are strictly enforced. PSYCH 112A, PSYCH 112LA are the first quarter of a multi-quarter sequence that satisfies the upper-division writing requirement and allows students to plan and conduct research projects. Students taking these courses should plan to continue in them through at least the second quarter. Students who intend to fulfill the upper-division writing requirement in some other way should consider taking PSYCH 112D and PSYCH 112LD, PSYCH 112M and PSYCH 112LM, or PSYCH 112R and PSYCH 112LR to fulfill the laboratory requirement.	
D. Select four upper-division Psychology core courses (16 units). These courses are designated with an ending number '0' and include the following:	
PSYCH 120A	Abnormal Psychology
PSYCH 120D	Developmental Psychology
PSYCH 120H	History of Psychology
PSYCH 120P	Personality Theories
PSYCH 130A	Perception and Sensory Processes
PSYCH 140C	Cognitive Science
PSYCH 140L	Principles of Learning Theory
PSYCH 140M	Human Memory
PSYCH 150	Psychology of Language
PSYCH 160A	Introduction to Cognitive Neuroscience
PSYCH 160D	Brain Disorders and Behavior
E. Select seven additional courses (four or more units each) with emphasis in psychology, distributed as follows:	
1. No more than one of the seven may be lower-division. PSYCH 7A may not be used to fulfill this requirement.	
2. Three of the upper-division courses used to satisfy requirements D and E must be taken from one of the following modules: Psychology 110–119 (Research Methodologies), 120–129 (General Psychology), 130–139 (Perception and Sensory Processes), 140–149 and 150–159 (Learning and Cognition and Language Sciences combined), 160–169 (Cognitive Neuroscience), and 170–179 (Interdisciplinary Studies).	
3. Certain courses offered in the School of Biological Sciences and the School of Social Ecology may be used in partial satisfaction of this requirement. A total of three of these courses (12 units) may be used in this way with a maximum of two from either of these Schools.	
Psychology and Social Behavior courses that do not overlap with Psychology courses may be used along with PSY BEH 193E (same as CRM/LAW C105) and BIO SCI D137, BIO SCI E174, BIO SCI N110, and BIO SCI N159.	
4. No more than three of the courses (each of four or more units) may be numbered 190–199.	

NOTE: Psychology majors are strongly encouraged to take BIO SCI 1A and BIO SCI 35 toward satisfaction of the science and technology portion of the general education requirement (category II). Furthermore, it is strongly recommended that students who intend to pursue post-baccalaureate work in psychology take the PSYCH 112A-PSYCH 112BW-PSYCH 112C sequence. Most psychology graduate programs require statistics (which, at UCI, may be satisfied by taking PSYCH 10A-PSYCH 10B-PSYCH 10C or SOC SCI 10A-SOC SCI 10B-SOC SCI 10C), but some require calculus (which, at UCI, may be satisfied by taking MATH 2A-MATH 2B).

#### General

## Honors Program in Psychology and Cognitive Sciences

The Honors Program in Psychology and Cognitive Sciences is an advanced educational and research program for outstanding undergraduate students in these two majors.

The program emphasizes advanced competence in scientific research, and allows participants the opportunity to pursue advanced work in independent research, in addition to earning honors upon graduation. While the program is designed for students who are interested in pursuing graduate study or seeking challenging research experiences as a capstone to their undergraduate experience, all Psychology and Cognitive Sciences majors who meet the minimum eligibility requirements are welcome to apply.

The program has a limited number of openings and seeks to attract outstanding students who plan to undertake postgraduate education in some field of cognitive/psychological sciences. Admission to the program is based on a formal application submitted prior to the start of the junior year. Applicants should have an overall grade point average of at least 3.2 and a grade point average of at least 3.5 in courses within their major. Students are encouraged to apply in the summer two years prior to graduation, and, in some instances, may be accepted one year prior to graduation.

During the junior year, students who participate in the program are expected to enroll in the Honors Experimental Psychology series (PSYCH H111A-PSYCH 111BW-PSYCH H111C), and enroll in the first course in the Honors Seminar series (PSYCH H101A) in the fall quarter. As seniors, following successful completion of these junior-year requirements, honors students are enrolled in the remaining courses of the Honors Seminar series in fall (PSYCH H101B) and spring (PSYCH H101C). In addition, honors students must successfully complete a senior honors thesis as part of the senior-year course work.

The Honors Experimental Psychology series can be used to satisfy the Research Methods requirement for the major. The Honors Seminar series may be used to satisfy two of the courses required by Part A of the B.S. in Psychology major requirements.

## Psychology, B.S.

Students should be aware that psychology courses are offered in several different departments and programs.

The B.A. in Psychology is designed to provide students with a strong foundation in general psychology, including the areas of development, clinical, perception, learning, memory, cognitive processes, and neuroscience. The B.S. in Psychology incorporates more science content, as the physical and biological sciences play a critical role in deeper study of the mind and brain. The B.S. in Cognitive Sciences is structured to provide students with a challenging introduction to the broad field of Cognitive Sciences that is strongly grounded in theory emphasizing experimental and computational methods.

Students interested in other areas of psychology are advised to consult the course listings in the School of Social Ecology and the School of Biological Sciences sections.

NOTE: Students may complete either the B.A. in Psychology, the B.S. in Psychology, or the B.S. in Cognitive Sciences. You may not double major within the majors offered by the department.

## Requirements for the B.S. in Psychology

**All students must meet the** University Requirements.

**All students must meet the** School Requirements.

### Departmental Requirements for the Major

School requirements must be met and must include courses as specified below:

A. Complete:

PSYCH 10A- 10B- 10C	Probability and Statistics in Psychology I and Probability and Statistics in Psychology II and Probability and Statistics in Psychology III
PSYCH 9A- 9B- 9C	Psychology Fundamentals and Psychology Fundamentals and Psychology Fundamentals

B. Select one of the following:

LPS 30	Introduction to Symbolic Logic
LPS 31	Introduction to Inductive Logic

C. Select three of the following. At least two of these courses must come from a single discipline:

#### Background in Science

BIO SCI 35	The Brain and Behavior
BIO SCI 36	Drugs and the Brain
BIO SCI 37	Brain Dysfunction and Repair
BIO SCI 38	Mind, Memory, Amnesia, and the Brain
BIO SCI 41	Aspects of Mood Disorder
BIO SCI 47	Stress
BIO SCI 75	Human Development: Conception to Birth
BIO SCI 93	From DNA to Organisms
BIO SCI 94	From Organisms to Ecosystems
CHEM 1A- 1LA	General Chemistry and General Chemistry Laboratory
CHEM 1B	General Chemistry
CHEM 1C- 1LC	General Chemistry and General Chemistry Laboratory
PHYSICS 3A	Basic Physics I
PHYSICS 3B- 3LB	Basic Physics II and Basic Physics Laboratory
PHYSICS 3C- 3LC	Basic Physics III and Basic Physics Laboratory
PHYSICS 7C- 7LC	Classical Physics and Classical Physics Laboratory
PHYSICS 7D- 7LD	Classical Physics and Classical Physics Laboratory
PHYSICS 7E	Classical Physics

D. Complete three additional courses that must be taken in Biology, Physics, Chemistry, Logic and Philosophy of Science, Mathematics, or Statistics. They can be selected from the above list, from the Logic requirements (requirement B.), or from the following list:

**Additional Science Background**

MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
MATH 5A- 5B	Calculus for Life Sciences and Calculus for Life Sciences
MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations
LPS 30	Introduction to Symbolic Logic
LPS 31	Introduction to Inductive Logic
LPS 40	The Nature of Scientific Inquiry
LPS 60	The Making of Modern Science
PHYSICS 15	Physics of Music
STATS 110- 111- 112	Statistical Methods for Data Analysis I and Statistical Methods for Data Analysis II and Statistical Methods for Data Analysis III
CHEM 51A	Organic Chemistry
CHEM 51B- 51LB	Organic Chemistry and Organic Chemistry Laboratory
CHEM 51C- 51LC	Organic Chemistry and Organic Chemistry Laboratory

E. Select four from the following:

**Psychology Core Courses**

PSYCH 120A	Abnormal Psychology
PSYCH 120D	Developmental Psychology
PSYCH 120H	History of Psychology
PSYCH 120P	Personality Theories
PSYCH 130A	Perception and Sensory Processes
PSYCH 140C	Cognitive Science
PSYCH 140L	Principles of Learning Theory
PSYCH 140M	Human Memory
PSYCH 150	Psychology of Language
PSYCH 160A	Introduction to Cognitive Neuroscience
PSYCH 160D	Brain Disorders and Behavior
PSYCH 160H	History of Cognitive Neuroscience

F. Select three courses from the following modules: <sup>1</sup>

**Psychology Module Courses**

PSYCH 120 to PSYCH 129 (General)
PSYCH 130 to PSYCH 139 (Perception and Sensory Processes)
PSYCH 140 to PSYCH 149 (Cognition and Learning) <sup>2</sup>
PSYCH 150 to PSYCH 159 (Language)
PSYCH 160 to PSYCH 169 (Cognitive Neuroscience)

G. Select three of the following:

**Research Methods**

PSYCH 112A- 112LA	Experimental Psychology and Experimental Psychology Laboratory
PSYCH 112BW- 112LB	Advanced Experimental Psychology and Advanced Experimental Psychology Laboratory
PSYCH 112C- 112LC	Research in Experimental Psychology and Research in Experimental Psychology
PSYCH 112D- 112LD	Effective Graphical Presentation of Data and Effective Graphical Presentation of Data Lab
PSYCH 112M- 112LM	Research Methods in Psychology and Research Methods in Psychology Laboratory

## PSYCH 112R- 112LR

Cognitive Robotics  
and Cognitive Robotics Laboratory

H. Select four courses from the following (four or more units each) with emphasis in psychology, distributed as follows: <sup>2</sup>

1. No more than one may be lower-division. PSYC 7A may not be used to fulfill this requirement.

2. No more than one of the courses may be numbered 190-199.

<sup>1</sup> Core courses may be used to fulfill this requirement, but cannot count for both requirements.

<sup>2</sup> PSYCH 141J, PSYCH 141K, PSYCH 141L, PSYCH 141M, PSYCH 141N, PSYCH 141O, PSYCH 141P, PSYCH 141Q, PSYCH 141R cannot be used to fulfill this requirement.

## Sample Program - General

## Psychology, Minor

Students with a variety of interests (e.g., business, education, health care, and criminology) may seek a wider exposure to psychology. The flexibility of the minor in psychology offers the opportunity to pursue deeper understanding areas of psychology relevant to an individual's field.

### Psychology Minor Requirements

Requirements for the minor in psychology are met by taking seven or eight psychology courses (28 or 32 units) as specified below:

A. Complete the following:

PSYCH 7A	Introduction to Psychology (for the 28-unit minor)
or	
PSYCH 9A- 9B- 9C	Psychology Fundamentals and Psychology Fundamentals and Psychology Fundamentals (for the 32-unit minor)

B. Select three upper-division psychology courses from the following:

PSYCH 120A	Abnormal Psychology
PSYCH 120D	Developmental Psychology
PSYCH 120H	History of Psychology
PSYCH 120P	Personality Theories
PSYCH 130A	Perception and Sensory Processes
PSYCH 140C	Cognitive Science
PSYCH 140L	Principles of Learning Theory
PSYCH 140M	Human Memory
PSYCH 150	Psychology of Language
PSYCH 160A	Introduction to Cognitive Neuroscience
PSYCH 160D	Brain Disorders and Behavior

C. Complete one of the following:

For students who took PSYCH 7A: Select three additional psychology courses (four or more units each) no more than one of which is a lower-division course.

For students who took PSYCH 9A, PSYCH 9B, PSYCH 9C: select two additional upper-division psychology courses (four or more units each). PSYCH 190–199 cannot be used to fulfill this requirement.

D. In addition, the school mathematics and computer science requirement (school requirement 1) must be satisfied.

## Department of Economics

### William Branch, Department Chair

3279 Social Science Plaza B

949-824-5788

<http://www.economics.uci.edu/>

Economics is concerned with the way individuals or societies allocate scarce resources and distribute goods and services. Any situation requiring choice among competing alternatives can be viewed as an economic problem. Economics courses enable students to study the way individuals make these choices (microeconomics), the way governments make these choices (public choice), and the aggregate consequences of these choices (macroeconomics). In addition, the Economics curriculum addresses international trade, money and banking, and economic development of the less developed nations.

Faculty members in the Department of Economics have research and teaching interests that span a broad range of fields. In addition to strengths in micro theory, macroeconomics, and econometrics (Bayesian and classical), the Department has expertise in many applied fields, including economic history, industrial organization, international economics, labor economics, public choice and public finance, transportation economics, and urban economics. Members of the Department maintain close ties with members of the Department of Political Science, the Department of Statistics, and The Paul Merage School of Business. Members of the Department maintain affiliations with the Center for Population, Inequality, and Policy, Institute for Mathematical Behavioral Sciences, Institute of Transportation Studies, Institute on Global Conflict and Cooperation, Center for the Study of Democracy, and program in International Studies.

Wilima Wadhwa, Ph.D. University of California, Irvine, *Lecturer of Economics*

## Affiliate Faculty

Frank D. Bean, Ph.D. Duke University, *UCI Distinguished Professor of Sociology; Economics; Education* (international migration, demography, Mexican immigration, racial and ethnic relations, economic sociology, family)

N. Edward Coulson, Ph.D. University of California, San Diego, *Professor of Paul Merage School of Business; Economics; Psychological Science*

Greg Duncan, Ph.D. University of Michigan, *UCI Distinguished Professor of Education; Economics; Psychological Science* (economics of education, program evaluation, child development)

Bernard N. Grofman, Ph.D. University of Chicago, *Professor of Political Science; Economics* (public choice, mathematical models of collective decision making, formal democratic theory, politics of small groups, representation, voting rights)

David Hirshleifer, Ph.D. University of Chicago, *Paul Merage Chair in Business Growth and Distinguished Professor of Paul Merage School of Business; Economics*

Philippe Jorion, Ph.D. University of Chicago, *Professor of Paul Merage School of Business; Economics*

Marek Kaminski, Ph.D. University of Maryland, College Park, *Associate Professor of Political Science; Economics* (voting models, democratization, political consequences of electoral laws)

Radhika Lunawat, Ph.D. University of Minnesota, *Assistant Professor of Paul Merage School of Business; Economics*

Emily Owens, Ph.D. University of Maryland at College Park, *Professor of Criminology, Law and Society; Economics* (how government policies affect the prevalence of criminal activity as well as how agents within the criminal justice system, particularly police, prosecutors, and judges, respond to policy changes)

Jean-Daniel M. Saphores, Ph.D. Cornell University, *Professor of Civil and Environmental Engineering; Economics; Urban Planning and Public Policy* (transportation and environmental systems (with a focus on air pollution and energy use), travel behavior analysis, alternative fuel vehicles, automated vehicles, transit use, sustainable infrastructure management, and decision making under uncertainty using real options)

Brian Skyrms, Ph.D. University of Pittsburgh, *UCI Distinguished Professor of Logic and Philosophy of Science; Economics; Philosophy*

## Courses

### ECON 1. Introduction to Economics. 4 Units.

An analysis of the problems society faces in organizing itself to provide goods and services. How decisions of government, business, and the individual relate to current economic problems such as unemployment, inflation, poverty, and environmental pollution.

Restriction: No Economics Majors. ECON 1 may not be taken for credit if taken concurrently or after ECON 20A or ECON 20B.

(III)

**ECON 11. The Internet and Public Policy. 4 Units.**

How the Internet works. Current public policy issues concerning the Internet. Introductory economics. Communications law. Interactions between information technology, economics, and law. Case studies about Internet and communications policy.

Same as ICS 11.

**(II or III).**

**ECON 12. Federal Reserve: Past, Present, and Future. 4 Units.**

Studies central banking in the United States from colonial times to the present. Focuses on the past, present, and future of the Federal Reserve and precursors to that system, which was established in 1913.

**ECON 13. Global Economy. 4 Units.**

Acquaints students with the fundamental patterns of the global economy. Emphasizes the historical roots and political implications of economic choices.

Same as IS 13.

Restriction: International Studies Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**(III, VIII)**

**ECON 15A. Probability and Statistics in Economics I. 4 Units.**

An introduction to probability, statistics, and econometrics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Examples from economics.

Prerequisite: MATH 2A and MATH 2B

Overlaps with MGMT 7.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**(Va)**

**ECON 15B. Probability and Statistics in Economics II. 4 Units.**

An introduction to probability, statistics, and econometrics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Examples from economics.

Prerequisite: ECON 15A

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**(Va)**

**ECON 17. An Economic Approach to Religion. 4 Units.**

Introduction to how basic economic concepts such as demand, supply, consumption, production, competition, free-riding, innovation, regulation, and rent-seeking can be applied to understand observed religious behavior.

Same as RLGN 17.

**(III)**

**ECON 20A. Basic Economics I. 4 Units.**

The fundamentals of microeconomics. The behavior of firms and consumers: markets, supply/demand, utility maximization, resource allocation, and efficiency.

Overlaps with MGMT 4A, ECON 23.

Restriction: Economics, Quantitative Economics, Business Economics, and Business Info Management majors have first consideration for enrollment. For School of Social Sciences majors, MGMT 4A may not be used as a substitute for ECON 20A.

**(III)**

**ECON 20B. Basic Economics II. 4 Units.**

The fundamentals of macroeconomics. Government behavior: monetary and fiscal policy, inflation, and unemployment. Effective fall 2006, the content of Economics 20B is macroeconomics. This course cannot be taken to repeat Economics 20B taken prior to fall 2006.

Prerequisite: ECON 20A or ECON 13 or ECON 23

Overlaps with MGMT 4B.

Restriction: Business Information Mgmt Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment. For School of Social Sciences majors, MGMT 4B may not be used as a substitute for ECON 20B.

(III)

**ECON 23. Basic Economics for Engineers. 4 Units.**

The fundamentals of microeconomics. The behavior of firms and of consumers: markets, supply/demand, utility maximization, resource allocation, and efficiency.

Overlaps with ECON 20A.

Restriction: Engineering Majors only. Mechanical Engineering Majors only. Aerospace Engineering Majors only. Civil Engineering Majors only. Environmental Engineering Majors only.

(III)

**ECON 25. The Economics of Accounting Decisions. 4 Units.**

Introduction to accounting concepts and principles, including the accounting model and accounting style, transaction analysis, and preparation of financial statements. An analysis of the similarities and differences between accounting and economic concepts (e.g., value, profits).

Prerequisite: ECON 20A

Overlaps with MGMT 30A.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 100A. Intermediate Economics I. 4 Units.**

Determinants of supply and demand; operation of competitive and monopolistic markets; imperfections of the market system, explanations of unemployment, inflation, recessions; public policy for macroeconomic problems.

Prerequisite: ECON 20A and ECON 20B and MATH 2A and MATH 2B

Overlaps with ECON 105A.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 100B. Intermediate Economic II. 4 Units.**

Determinants of supply and demand; operation of competitive and monopolistic markets; imperfections of the market system, explanations of unemployment, inflation, recessions; public policy for macroeconomic problems.

Prerequisite: ECON 100A

Overlaps with ECON 105B.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 100C. Intermediate Economic III. 4 Units.**

Determinants of supply and demand; operation of competitive and monopolistic markets; imperfections of the market system, explanations of unemployment, inflation, recessions; public policy for macroeconomic problems.

Prerequisite: ECON 100B

Overlaps with ECON 105C.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 105A. Intermediate Quantitative Economics I . 4 Units.**

An advanced and mathematical version of ECON 100A for students in the Quantitative Economics major.

Prerequisite: ECON 20A and ECON 20B and MATH 2A and MATH 2B and MATH 3A

Overlaps with ECON 100A.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 105B. Intermediate Quantitative Economics II . 4 Units.**

An advanced and mathematical version of ECON 100B for students in the Quantitative Economics major.

Prerequisite: ECON 105A

Overlaps with ECON 100B.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 105C. Intermediate Quantitative Economics III . 4 Units.**

An advanced and mathematical version of ECON 100C for students in the Quantitative Economics major.

Prerequisite: ECON 105B

Overlaps with ECON 100C.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 107. Economics of Asymmetric Information. 4 Units.**

Focuses on the effects of asymmetric information in the markets for traditional economic goods and resources, such as labor, insurance, used cars, credit, and in auctions and bargaining problems. Prerequisite:..

Prerequisite: ECON 100A or ECON 105A

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 109. Special Topics in Economic Theory. 4 Units.**

Studies in selected areas of Economics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: May be repeated for credit unlimited times.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 115. Behavioral Economics. 4 Units.**

Studies the behavioral and psychological biases in economics settings. Both individual decisions and games are discussed.

Prerequisite: ECON 20A and ECON 20B

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 116A. Game Theory I. 4 Units.**

Extensive form games with perfect information, and coalitional games. The key solution concepts are Nash Equilibrium, Backward Induction, and the Core. Substantive examples include public good production, oligopoly, electoral competition, auctions, holdup, market entry, and voting.

Prerequisite: (ECON 15B or STAT 120B) and (ECON 100A or ECON 105A)

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 116B. Game Theory II. 4 Units.**

Two-quarter sequence on game theory. Bayesian games, extensive form games with imperfect information, zero-sum games.

Prerequisite: ECON 116A

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 122A. Applied Econometrics I. 4 Units.**

Introduction to econometrics emphasizing practical applications in microeconomics and macroeconomics.

Prerequisite or corequisite: ECON 100A or ECON 105A and (ECON 15B or MATH 130B or MATH 133A or STAT 120C)

Overlaps with ECON 123A, ECON 123B.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 122B. Applied Econometrics II. 4 Units.**

Introduction to econometrics emphasizing practical applications in microeconomics and macroeconomics.

Prerequisite: ECON 122A

Overlaps with ECON 123B.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 122CW. Data Analysis Writing. 4 Units.**

Research writing course in econometrics focusing on individual research projects. Students employ econometric analysis to address an economic question in a 20-page paper and present their findings to the class in a short presentation.

Prerequisite: ECON 15A and ECON 15B and ECON 122A and ECON 122B. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

(Ib)

**ECON 123A. Econometrics I. 4 Units.**

Specification, estimation, and testing of econometric models. Applications in various areas of microeconomics and macroeconomics.

Prerequisite: MATH 2A and MATH 2B and MATH 3A and STAT 120A and STAT 120B and (STAT 120C or MATH 131C) and (ECON 100A and ECON 100B and ECON 100C) or (ECON 105A and ECON 105B and ECON 105C)

Overlaps with ECON 122A, ECON 122B.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 123B. Econometrics II. 4 Units.**

Specification, estimation, and testing of econometric models. Applications in various areas of microeconomics and macroeconomics.

Prerequisite: ECON 123A

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 123CW. Econometrics III. 4 Units.**

Seminar course in which students do an original econometric research project.

Prerequisite: ECON 123B. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**(Ib)**

**ECON 125. Business Forecasting. 4 Units.**

Students learn how to produce forecasts of the behavior of economic (and other) variables. The techniques examined are linear regression, nonlinear regression, and nonparametric kernel regression; AR, MA, ARMA, ARIMA, and Box-Jenkins.

Prerequisite: ECON 122A

Overlaps with MGMT 180.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 126. Computational Macroeconomics. 4 Units.**

Introduction to the computational methods for studying economic growth and the business cycle. Students learn how to write computer programs to simulate macroeconomic models, download and manage data from internet resources, and to do basic statistics.

Prerequisite or corequisite: (ECON 100C or ECON 105C) and (ECON 122A or ECON 123A)

Restriction: Business Economics Majors only. Economics Majors only. Quantitative Economics Majors only.

**ECON 127A. Experimental Economics . 4 Units.**

Students will learn what constitutes proper experimental design and what laboratory experiments teach us about human behavior and the economy. Students will participate in a sample experiment, evaluate the results, and discuss experiment design and larger issues. Formerly ECON 117.

Prerequisite: ECON 15B and ECON 100B

**ECON 128. Machine Learning for Economists. 4 Units.**

Develops the theory and computation of recent methods at the intersection of econometrics and machine learning as used in economics and business. Building on intermediate econometrics, it introduces causal random forests, double machine learning, and neural networks.

Prerequisite: ECON 123A

Restriction: Business Economics Majors only. Economics Majors only. Quantitative Economics Majors only.

**ECON 129. Special Topics in Quantitative Methods. 4 Units.**

Studies in selected areas of Quantitative Methods. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 131A. The Economics of Risk and Uncertainty. 4 Units.**

The theory of insurance and joint-ownership of risky enterprises; optimal procedures for the allocation of uncertain payoffs.

Prerequisite or corequisite: (ECON 15B or ECON 105A or MATH 130B) and (ECON 100B or ECON 105B or STAT 120B or MATH 133A) and (ECON 100C or STAT 120C)

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 132A. Introduction to Financial Investments. 4 Units.**

Modern theories of investment and their application to the study of financial markets. The relation between risk and return, diversification, asset pricing, efficient markets hypothesis, and the market valuation of stocks, bonds, options, and futures.

Prerequisite or corequisite: ECON 15A and ECON 15B and (ECON 122A or ECON 123A) and (ECON 100A and ECON 100B and ECON 100C) or (ECON 105A and ECON 105B and ECON 105C) or (MATH 130A and STAT 120A and STAT 120B and STAT 120C) or MATH 130B or MATH 133A

Overlaps with MGMT 141.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 134A. Corporate Finance. 4 Units.**

Provides an overview of the modern theory and practice of corporate finance and focuses on two fundamental financial decisions; investment as well as financing. Beginning with discounted cash flow analysis, basic theory will be applied to the valuation of stocks.

Prerequisite: (ECON 100A and ECON 100B and ECON 100C) or (ECON 105A and ECON 105B and ECON 105C) and (ECON 15A or MATH 130A or STAT 120A) and (ECON 15B or STAT 120B)

Overlaps with MGMT 109.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 135. Mathematics of Finance. 4 Units.**

After reviewing tools from probability, statistics, and elementary differential and partial differential equations, concepts such as hedging, arbitrage, Puts, Calls, the design of portfolios, the derivation and solution of the Blac-Scholes, and other equations are discussed.

Prerequisite: MATH 3A or MATH H3A

Same as MATH 176.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Mathematics Majors have first consideration for enrollment.

**ECON 137W. Financial Markets and the Macroeconomy. 4 Units.**

Students are required to write a paper on a research question related to.

Prerequisite: ECON 122A or ECON 123A. Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

**ECON 139. Special Topics in Financial Economics. 4 Units.**

Studies in selected areas of Financial Economics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 140. Managerial Economics. 4 Units.**

A collection of concepts and methods for effective decision making. Explores how the tools of microeconomics, including game theory and industrial organization theory, can be used to make better managerial decisions, particularly those involving allocation of resources within firms.

Prerequisite: (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B)

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 141A. Public Economics I. 4 Units.**

Examines the role of the government in the economy and its impact on individuals and firms.

Prerequisite: (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B)

**ECON 141B. Public Economics II. 4 Units.**

Theory of public goods, externalities, voting models, analysis of bureaucracy, the Tiebout model, income redistribution, intergovernmental grants.

Prerequisite: (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B)

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 142A. Industrial Organization I. 4 Units.**

The theory of market structure. Imperfect markets, government policies, and industry performance.

Prerequisite: (ECON 15A and ECON 15B) and (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B)

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 142CW. Industrial Organization III. 4 Units.**

Research in industrial organization. Satisfies the honors research requirement.

Prerequisite: (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B). Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

(Ib)

**ECON 143. Energy Economics. 4 Units.**

The economics of markets for oil, natural gas, electricity, and renewable energy, and their interactions with each other and the rest of the economy. Effects of government intervention, policy measures, economic policy issues arising between energy use and the environment.

Prerequisite: ECON 15A and (ECON 100A or ECON 105A)

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 144A. Urban Economics I. 4 Units.**

Why cities exist, economics of urban land-use, housing demand and tenure choice, traffic congestion.

Prerequisite or corequisite: ECON 20A and ECON 20B. Recommended: ECON 100A.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 144B. Urban Economics II. 4 Units.**

Housing policy analysis, urban public goods and services, crime, pollution, urban amenities.

Prerequisite: ECON 20A and ECON 20B. Recommended: ECON 100A.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 145E. Economics of the Environment. 4 Units.**

Surveys economic aspects of natural resources, pollution, population, and the environment. Examines the causes of pollution; analysis of public policies regarding these problems. Emphasis on microeconomic aspects of environmental problems.

Prerequisite: ECON 100A or ECON 105A

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 145FW. Economics of the Environment II. 4 Units.**

Applications of the tools covered in ECON 145E to topics such as global warming, destruction of the ozone layer, and emissions trading. Emphasis on independent research papers. Syllabus and classes include writing technique.

Prerequisite: ECON 145E. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

(Ib)

**ECON 145L. Economics of Law. 4 Units.**

Examination of several economic concepts which are useful in understanding legal rules: externalities, the assignment of property rights, and Coase's theorem. Examples are drawn from the fields of pollution control, no-fault insurance, medical malpractice, and product liability.

Prerequisite or corequisite: (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B)

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 146A. Illegal Economics. 4 Units.**

How illegal firms function in illegal markets, why individuals participate in these groups and markets, and what federal, state, and local governments do to disrupt organized illegal activity.

Same as CLS C182.

Restriction: Business Economics Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**ECON 147A. Corporate Governance. 4 Units.**

Studies topics in the internal organization of firms, including rent seeking, incentive contracts, principal-agent problems, internal labor markets, contests, and herd behavior.

Prerequisite: ECON 100A

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 147B. Economics of Strategy. 4 Units.**

Uses tools of economics, game theory in particular, to develop an understanding of business decision-making. Deals with questions such as how the firm decides what kind of business to be in, how large should it be, and others.

Prerequisite: (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B)

Overlaps with MGMT 110, MGMT 168.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 148. Business Decisions. 4 Units.**

Surveys normative and descriptive models of decision-making behavior, with an emphasis on organizational and policy contexts. Topics include rational choice theory, biases and heuristics, framing effects, and overconfidence. Management fads, panics, and herd behavior are also discussed.

Prerequisite: (ANTH 10A and ANTH 10B and ANTH 10C) or (SOCL 10A and SOCL 10B and SOCL 10C) or (SSCI 10A and SSCI 10B and SSCI 10C) or (MATH 2A and MATH 2B and (STAT 7 or MGMT 7)) or (STAT 120A and STAT 120B and STAT 120C) or (ECON 15A and ECON 15B)

Same as SOCL 138.

Restriction: Sociology Majors have first consideration for enrollment.

**ECON 149. Special Topics in Economics of Public and Private Organizations. 4 Units.**

Studies in selected areas of Economics of Public and Private Organizations. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 149W. Special Topics in Economics of Public and Private Organizations. 4 Units.**

Studies in selected areas of Economics of Public and Private Organizations. Topics addressed vary each quarter.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**(Ib)**

**ECON 151A. Labor Economics and Human Resources I. 4 Units.**

Labor demand, labor supply, human capital, personnel economics, and other topics.

Prerequisite: (ECON 15A and ECON 15B) and (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B)

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 152A. Economic Anthropology. 4 Units.**

Economic systems in comparative perspective: production, distribution, and consumption in market and non-market societies; agricultural development in the third world.

Prerequisite: One course in general science, anthropology, economics, geography, or sociology.

Same as ANTH 125A.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment. Anthropology Majors have first consideration for enrollment.

**ECON 154. Voting and Political Manipulation. 4 Units.**

Introduction to social choice and cooperative games. Topics include majority rule, types of voting methods, apportionment and proportional representation, agenda manipulation, coalition formation, voting power, political consequences of electoral laws.

Same as IS 156A, SSCI 121T, PLSC 151H.

Restriction: International Studies Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON H155. Current Issues in Political Economy. 4 Units.**

Political economy seeks explanations that combine insights from both economics and politics. Topics include the interaction of government and markets, the causes of the Great Recession, and the sources of income and wealth inequality.

Prerequisite: ECON 20A or ECON 20B or ECON 13 or IS 13

Restriction: Economics Honors students only.

**ECON 157. Economic Development. 4 Units.**

Considers the process of economic development across the globe and why some countries are rich and others poor. Discusses the major problems facing developing countries, such as population growth, education, capital formation, environmental protection, and international trade.

Prerequisite: ECON 20A and ECON 20B

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 158. Economics of Education. 4 Units.**

Arms students with tools, concepts, and evidence that can be used to analyze complex policy questions in education, enabling students to arrive at their own reasoned judgments about how to improve education.

Prerequisite: ECON 15A and ECON 100A

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 161A. Money and Banking. 4 Units.**

Basic elements of money and banking: institutional features and economics of financial markets and, in particular, the U.S. banking system; determinants of interest rates; the Federal Reserve and its role in money supply; effects of money on output and inflation.

Prerequisite or corequisite: (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B) and (ECON 100C or ECON 105C)

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 161B. International Money. 4 Units.**

Open economy macroeconomics and determination of exchange rates. Asset-market approach to the balance of payments. Internal and external balance in the economy. Macroeconomic policies under fixed and floating exchange rates. The international monetary system and institutions.

Prerequisite or corequisite: (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B) and ECON 100C

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 161D. Advanced Money and Banking. 4 Units.**

Studies business cycles in the United States during the last century. The first portion of the course reviews the theoretical models employed to study economic fluctuations and empirical methods used to measure fluctuations.

Prerequisite: ECON 161A and (ECON 100C or ECON 105C)

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 162. Poverty, Growth, and Development. 4 Units.**

Examines India as a case study for each of the topics studied: growth experience of India along with its poverty eradication record, aspects of poverty, and the policies that have been undertaken to tackle poverty.

Prerequisite: (ECON 15A or STAT 120A) and (ECON 15B or STAT 120B) and (ECON 100A and ECON 100B and ECON 100C) or (ECON 105A and ECON 105B and ECON 105C)

**ECON 164AW. The Industrial Revolution in Western Europe. 4 Units.**

How do economists explain the process of economic development during the past three centuries? Has the process of industrialization affected living standards? Focusing on these questions, students learn how to apply economic theory and quantitative methods.

Prerequisite or corequisite: ECON 100C or ECON 105C. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

(Ib)

**ECON 164C. American Economic History from Colonization to the Present. 4 Units.**

Examines how the American economy evolved from colonization to the post-war era. Topics include relations with foreign countries, the emergence of manufacturing and big business, railroads, slavery, war, the Great Depression, the rise of fiscal and monetary policies.

Prerequisite: ECON 20A and ECON 20B

**ECON 165. Economics of International Business . 4 Units.**

Students learn to understand and analyze the principal economic issues in the international business arena. Covers topics such as trade theory, foreign direct investment, foreign exchange market, and strategy of international business.

Prerequisite or corequisite: ECON 100C or ECON 105C

**ECON 167. International Trade and Commercial Policy. 4 Units.**

Determination of trade flows and the relative prices. Gains from trade, the terms of trade, and income distribution. Imperfect competition and international trade. The effect of tariffs, export subsidies, and import quotas. The effects of free and restricted trade.

Prerequisite: ECON 100A or ECON 105A

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 169. Special Topics in Development Economics. 4 Units.**

Studies in selected areas of Development Economics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 190. Senior Thesis. 4 Units.**

Students work with faculty to complete their honors thesis.

Repeatability: May be taken for credit 3 times.

**ECON 190BW. Economics Honors Colloquium II. 4 Units.**

Colloquium required for honors students in Economics, Quantitative Economics, and Business Economics. Introduces students to independent research and helps students plan a research program. Students complete their thesis.

Prerequisite: ECON H190A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Economics Honors students only.

**(Ib)****ECON H190A. Economics Honors Colloquium I. 4 Units.**

Colloquium required for honors students in economics, quantitative economics, and business economics. Introduces students to independent research. Helps students plan a research program. Prepares students for thesis writing.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Economics Honors students only.

**ECON 197. Field Study. 4 Units.**

Not listed in Catalogue.

Repeatability: Unlimited as topics vary.

Restriction: Authorization required or Enrollment by add card only

**ECON 198. Directed Group Study. 4 Units.**

Not listed in Catalogue.

Repeatability: Unlimited as topics vary.

Restriction: Authorization required or Enrollment by add card only

**ECON 199. Independent Study. 1-5 Units.**

Independent research with Economics faculty.

Repeatability: May be repeated for credit unlimited times.

**ECON 200A. Graduate Colloquium for Economics I. 2 Units.**

Weekly reports and colloquia by faculty, students, and visitors. Supplemented by class discussion of these presentations and other material on current research methodology.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Economics Majors only.

**ECON 200B. Graduate Colloquium for Economics II. 2 Units.**

Weekly reports and colloquia by faculty, students, and visitors. Supplemented by class discussion of these presentations and other material on current research methodology.

Prerequisite: ECON 200A

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Economics Majors only.

**ECON 200C. Graduate Colloquium for Economics III. 2 Units.**

Weekly reports and colloquia by faculty, students, and visitors. Supplemented by class discussion of these presentations and other material on current research methodology.

Prerequisite: ECON 200B

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Economics Majors only.

**ECON 202. Probability and Statistics. 4 Units.**

Provides lectures on probability theory and the beginning of mathematical statistics (continued in ECON 220A-ECON 221A) necessary to prepare students for the required econometrics sequence. Topics include probability, distributions, mathematical expectation, sampling, and point estimation.

Restriction: Graduate students only.

**ECON 203A. Mathematics for Economists. 4 Units.**

Gives students the mathematical background required for graduate work in economics. Topics covered include multivariate calculus, differential equations, and linear algebra.

Restriction: Graduate students only.

**ECON 210A. Microeconomic Theory I. 4 Units.**

Theoretical microeconomics. Emphasis on the meaning and empirical interpretation of theoretical models. Topics include theory of the firm, theory of the market, theory of the consumer, duality theory, application to econometrics, general equilibrium and welfare economics, uncertainty, game theory.

Restriction: Graduate students only.

**ECON 210B. Microeconomic Theory II. 4 Units.**

Theoretical microeconomics. Emphasis on the meaning and empirical interpretation of theoretical models. Topics include theory of the firm, theory of the market, theory of the consumer, duality theory, application to econometrics, general equilibrium and welfare economics, uncertainty, game theory.

Prerequisite: ECON 210A

Restriction: Graduate students only.

**ECON 210C. Microeconomic Theory III. 4 Units.**

Theoretical microeconomics. Emphasis on the meaning and empirical interpretation of theoretical models. Topics include theory of the firm, theory of the market, theory of the consumer, duality theory, application to econometrics, general equilibrium and welfare economics, uncertainty, game theory.

Prerequisite: ECON 210B

Restriction: Graduate students only.

**ECON 210D. Macroeconomic Theory I. 4 Units.**

Advanced macroeconomic theory including alternative macroeconomic models, microeconomic foundations of macroeconomics, investment and growth theory, inflation and unemployment, rational expectations and macroeconomic policy, wealth effects, crowding out and fiscal policy, money and interest, open economy models.

Restriction: Graduate students only.

**ECON 210E. Macroeconomic Theory II. 4 Units.**

Advanced macroeconomic theory including alternative macroeconomic models, microeconomic foundations of macroeconomics, investment and growth theory, inflation and unemployment, rational expectations and macroeconomic policy, wealth effects, crowding out and fiscal policy, money and interest, open economy models.

Corequisite: ECON 211L

Prerequisite: ECON 210D

Restriction: Graduate students only.

**ECON 210F. Macroeconomic Theory III. 4 Units.**

Advanced macroeconomic theory including alternative macroeconomic models, microeconomic foundations of macroeconomics, investment and growth theory, inflation and unemployment, rational expectations and macroeconomic policy, wealth effects, crowding out and fiscal policy, money and interest, open economy models.

Prerequisite: ECON 210E

Restriction: Graduate students only.

**ECON 211L. Macroeconomics Theory II Lab. 2 Units.**

Overview of stochastic processes; introduction to dynamic programming; two equilibrium concepts; Ricardian equivalence; real business cycle model; complete versus incomplete markets; asset pricing and the equity premium puzzle.

Corequisite: ECON 210E

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**ECON 219. Special Topics in Economic Theory. 2-4 Units.**

Studies in selected areas of Economic Theory. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**ECON 220A. Statistics and Econometrics I. 4 Units.**

Takes up where ECON 202 leaves off. Continuing in the likelihood perspective, begins with Bayesian point estimation and then covers interval estimation and hypothesis testing from both frequentist and Bayesian perspectives.

Corequisite: ECON 221A

Restriction: Graduate students only.

**ECON 220B. Statistics and Econometrics II. 4 Units.**

Begins by relaxing the ideal conditions of the standard regression model. Potential topics include kernel density estimation, instrumental variables (IV), two stage least squares (2SLS), panel data models, and simulation-based Bayesian methods, including Gibbs sampling, and the bootstrap.

Corequisite: ECON 221B

Prerequisite: ECON 220A

Restriction: Graduate students only.

**ECON 220C. Statistics and Econometrics III. 4 Units.**

Covers econometric time series, discrete choice and count models, sample selection, and duration models along with Bayesian and classical asymptotic methods.

Corequisite: ECON 221C

Prerequisite: ECON 220B

Restriction: Graduate students only.

**ECON 221A. Statistics and Econometrics Laboratory I. 2 Units.**

Discussion of problems in statistics and econometrics, and their relationships to statistical and econometrics theory. Instruction in the use of computers for applied econometric work.

Corequisite: ECON 220A

**ECON 221B. Statistics and Econometrics Laboratory II. 2 Units.**

Discussion of problems in statistics and econometrics, and their relationships to statistical and econometrics theory. Instruction in the use of computers for applied econometric work.

Corequisite: ECON 220B

**ECON 221C. Statistics and Econometrics Laboratory III. 2 Units.**

Discussion of problems in statistics and econometrics, and their relationships to statistical and econometrics theory. Instruction in the use of computers for applied econometric work.

Corequisite: ECON 220C

**ECON 222. Replication and Applied Economics Writing. 4 Units.**

Before the course begins, students choose a published empirical economics article and obtain the necessary data to replicate it. Students will replicate and extend the economic analysis and write a paper describing their work.

Prerequisite: ECON 220A and ECON 220B and ECON 220C

**ECON 223A. Discrete Choice Econometrics. 4 Units.**

Specification, estimation, and testing of discrete choice models, with emphasis on cross-sectional and panel data models and applications. Students use computer packages to apply models and techniques to real data.

Prerequisite: ECON 220A and ECON 220B and ECON 220C

**ECON 224A. Time Series Econometrics. 4 Units.**

Econometric analysis of time series data. Moving average and autoregressive series, regression analysis, Box-Jenkins techniques, computational methods, and causality conditions.

Prerequisite: ECON 220A and ECON 220B and ECON 220C

**ECON 227A. Experimental Econ I. 4 Units.**

An introduction to experimental social science. Students learn experimental methodology, design, and analysis, and be exposed to active research areas. Each student writes a proposal for their own experiment and presents the design in class.

Restriction: Graduate students only.

**ECON 227B. Experimental Econ II. 4 Units.**

Focuses on implementing experimental projects in a laboratory environment. Subjects learn about human subjects protection, program experimental software for their own projects, and conduct live experiment sessions.

Restriction: Graduate students only.

**ECON 229. Special Topics in Econometrics. 2-4 Units.**

Studies in selected areas of Econometrics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**ECON 232. Business Cycles in Historical Perspective. 4 Units.**

Investigates business cycles in the United States and worldwide during the last two centuries. Topics include causes and consequences of business fluctuations, monetary and fiscal policy, models of fluctuations, and empirical macroeconomics.

Prerequisite: ECON 210A and ECON 210B and ECON 210C and ECON 210D and ECON 210E and ECON 210F

**ECON 234. American Economic History. 4 Units.**

Focuses on American economic history from colonization onwards. Topics include the development of legal systems, transport systems, financial markets, industrialization, migration, immigration, technological change, and the consequences of slavery.

Prerequisite: ECON 210A and ECON 210B and ECON 210C and ECON 210D and ECON 210E and ECON 210F

**ECON 239. Special Topics in Financial Economics. 2-4 Units.**

Studies in selected areas of Financial Economics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**ECON 241A. Industrial Organization I. 4 Units.**

Analysis of the structure and economic performance of markets, and the impact of public policy and their efficiency and equity. Effects of information structure. Oligopoly, cartels, mergers, vertical integration, patents, innovation, antitrust, and regulation.

Prerequisite: ECON 100B and ECON 203A

Restriction: Graduate students only.

**ECON 241B. Industrial Organization II. 4 Units.**

Analysis of the structure and economic performance of markets, and the impact of public policy and their efficiency and equity. Effects of information structure. Price flexibility and dispersion, auctions, search and industrial structure, intrafirm organization.

Prerequisite: ECON 241A and ECON 100B and ECON 203A

Restriction: Graduate students only.

**ECON 243A. Game Theory. 4 Units.**

A formal introduction to non-cooperative game theory. Topics include properties of Nash Equilibrium and equilibrium refinements, games with imperfect information, and games with incomplete information.

Prerequisite: ECON 210A and ECON 210B and ECON 210C

Restriction: Graduate students only.

**ECON 243B. Advanced Game Theory. 4 Units.**

Provides advanced instruction in game theory. The topics covered will be (i) the theory of repeated games and (ii) evolutionary game theory. Applications include bargaining, collusion, reputation, social norms, and the evolution of preferences via natural selection and cultural transmission.

Prerequisite: ECON 243A

Restriction: Graduate students only.

**ECON 245. Empirical Methods in Applied Microeconomics. 4 Units.**

Focuses on the empirical methods used in modern applied microeconomics. Teaches methods that can be applied to produce original research in applied fields using cross-sectional and panel data. Applications will be drawn heavily from labor, public, health and development economics.

**ECON 249. Special Topics in Microeconomics. 2-4 Units.**

Studies in selected areas of Microeconomics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: May be repeated for credit unlimited times.

**ECON 251A. Labor Economics I . 4 Units.**

Analysis of the relationships between education and the labor market (human capital theory), between resources devoted to education and the return to education (the education production function) and between education and labor market inequality (the theory of skill-biased technical change).

Prerequisite: ECON 203A

Restriction: Graduate students only.

**ECON 251B. Labor Economics II. 4 Units.**

Analysis of core topics in labor economics, with an emphasis on empirical methods. Topics may include minimum wages, discrimination, gender, aging and retirement, labor market networks, personnel economics, and employment policy.

Prerequisite: ECON 203A

Restriction: Graduate students only.

**ECON 251C. Labor Economics III . 4 Units.**

Discussion of treatment effect/program evaluation in labor economics, emphasizing identification. Classical labor topics, including human capital, technology, wages, labor supply, and migration are discussed in the context of causal inference. A unified framework is used in analyzing identification strategies.

Prerequisite: ECON 203A

Restriction: Graduate students only.

**ECON 255. Microeconomics and Public Policy. 4 Units.**

Introduces the fundamental principles of microeconomics that are required for applied policy analysis. Provides students with an intuitive understanding of the microeconomic approach, and familiarizes them with concepts used in applied public policy analysis.

Repeatability: May be taken for credit 2 times.

Same as PPOL 240.

Restriction: Graduate students only.

**ECON 259. Special Topics in Labor Economics. 2-4 Units.**

Studies in selected areas of Labor Economics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**ECON 260B. Monetary Economics II. 4 Units.**

Surveys recent issues on monetary policy in uncertain environments. Examines settings where both the policy makers and the private sector are uncertain of future outcomes or the underlying economic structure.

**ECON 261A. International Trade I. 4 Units.**

Covers theoretical models, empirical methods, and policy issues in international trade. Following the conventional treatment of the Richardian model, the Heckscher-Ohlin model and the specific factors model, new trade models which incorporate scale economics and imperfect competition will be discussed.

Prerequisite: ECON 210A and ECON 210B

**ECON 263A. Advanced Macroeconomics I. 4 Units.**

Students build Dynamic Stochastic General Equilibrium (DSGE) macroeconomic models from microeconomic foundations. This approach emphasizes intertemporal optimization by firms and households and typically incorporates nominal rigidities such as sluggish price and/or wage adjustment.

**ECON 269. Special Topics in Macroeconomics. 2-4 Units.**

Studies in selected areas of Macroeconomics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**ECON 270A. Political Economy I. 4 Units.**

Political Economy lies at the intersection of economics and political science. Studies effects of politics on the economy and uses tools derived from economics to understand the behavior of governments and of citizens when they deal with politics.

Restriction: Graduate students only.

**ECON 270B. Political Economy II. 4 Units.**

Political Economy lies at the intersection of economics and political science. Studies effects of politics on the economy and uses tools derived from economics to understand the behavior of governments and of citizens when they deal with politics.

Prerequisite: ECON 270A

Restriction: Graduate students only.

**ECON 270C. Political Economy III. 4 Units.**

Political Economy lies at the intersection of economics and political science. Studies effects of politics on the economy and uses tools derived from economics to understand the behavior of governments and of citizens when they deal with politics.

Prerequisite: ECON 270B

Restriction: Graduate students only.

**ECON 272A. Public Economics I. 4 Units.**

Covers two broad categories of government expenditure policies, redistribution programs, and social insurance, from a theoretical and empirical perspective, as well as the effects on individuals of the income tax system.

Prerequisite: ECON 210A and ECON 210B and ECON 210C

**ECON 272B. Public Economics II. 4 Units.**

Covers the theory of public goods and models of decentralized provision of such goods, including voluntary provision, voting, bureaucratic provision, and preference revelation mechanisms.

Prerequisite: ECON 210A and ECON 210B and ECON 210C

**ECON 275. Economics of Government. 4 Units.**

Prepares students to analyze public policy questions with tools from economics. By the end, students should be able to identify important economic issues in public policy debates and consume and critique economic research on these topics.

Same as PPOL 227.

**ECON 279. Special Topics in Political Economy. 2-4 Units.**

Studies in selected areas of Political Economy. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**ECON 281A. Urban Economics I. 4 Units.**

Economic reasons for the existence of cities, analysis of urban spatial structure, urban sprawl, Third World urbanization, hedonic price analysis, housing tenure choice.

Prerequisite: ECON 210A

**ECON 281B. Urban Economics II. 4 Units.**

Housing in the portfolio, land-use controls, rent control, homelessness, neighborhood effects, urban quality-of-life measurement, and subcenters.

Prerequisite: ECON 210A

**ECON 282A. Transportation Economics I. 4 Units.**

Applies microeconomic concepts of demand, costs, pricing, investment, and project evaluation to analyze transportation activities. Empirical studies include travel demand using discrete models, and cost functions.

Restriction: Graduate students only.

**ECON 282B. Transportation Economics II. 4 Units.**

Economics of the airline industry. Hub-and-spoke networks, the effects of competition on airfares, price dispersion, airline alliances, airport congestion, product unbundling.

Prerequisite: ECON 282A

Restriction: Graduate students only.

**ECON 289. Special Topics in Urban and Transportation Economics. 2-4 Units.**

Studies in selected areas of Urban and Transportation Economics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: May be repeated for credit unlimited times.

**ECON 290. Dissertation Research. 2-12 Units.**

Dissertation research with Economics faculty.

Repeatability: May be repeated for credit unlimited times.

**ECON 299. Independent Study. 2-4 Units.**

Independent research with Economics faculty.

Repeatability: May be repeated for credit unlimited times.

## Business Economics, B.A.

The Business Economics major is for students seeking a business orientation in their study of economics. It does not replicate the traditional undergraduate business school curriculum. Instead, it offers a more tightly focused curriculum that is guided by the rigorous logic and integrative perspective of economics.

NOTE: Students may complete only one of the three Economics majors.

**Freshmen:** Preference will be given to those who rank among the highest using the selection criteria as stated in the Undergraduate Admissions section of this *Catalogue*.

**Transfer Student Applicants:** Transfer applicants with the highest grades overall who satisfactorily complete course prerequisites will be given preference for admission. All applicants must complete one course in microeconomics, one course in macroeconomics, and two semesters/two quarters of approved first-year calculus. Applicants interested in the major of Quantitative Economics must also complete one quarter/one semester of approved linear algebra.

**Change of Major:** Information about change-of-major requirements, procedures, and policies is available in the School of Social Sciences Undergraduate Student Affairs Office and at the UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu>).

### Departmental Requirements for the Major in Business Economics

The Business Economics major is for students seeking a business orientation in their study of economics. It does not replicate the traditional undergraduate business school curriculum. Instead, it offers a more tightly focused curriculum that is guided by the rigorous logic and integrative perspective of economics. University and School requirements must be met and must include 19 courses as specified below.

#### A. Lower-division:

ECON 20A- 20B	Basic Economics I and Basic Economics II
ECON 15A- 15B	Probability and Statistics in Economics I and Probability and Statistics in Economics II
ECON 25	The Economics of Accounting Decisions
MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus

#### B. Upper-division:

ECON 100A- 100B- 100C	Intermediate Economics I and Intermediate Economic II and Intermediate Economic III
ECON 122A- 122B	Applied Econometrics I and Applied Econometrics II

#### C. Seven additional Economics courses, including at least four four-unit upper-division courses.<sup>1</sup>

Two of the electives must be selected from following business electives list:

ECON 125	Business Forecasting
ECON 131A	The Economics of Risk and Uncertainty
ECON 132A	Introduction to Financial Investments
ECON 134A	Corporate Finance
ECON 135	Mathematics of Finance
ECON 142A	Industrial Organization I
ECON 143	Energy Economics
ECON 161A	Money and Banking
ECON 161B	International Money
ECON 167	International Trade and Commercial Policy

And two of the electives must be selected from the following management electives list:

ECON 140	Managerial Economics
ECON 145L	Economics of Law
ECON 147A	Corporate Governance
ECON 147B	Economics of Strategy
ECON 148	Business Decisions
ECON 115	Behaviorial Economics
ECON 151A	Labor Economics and Human Resources I
ECON 165	Economics of International Business

#### D. A maximum of three four-unit courses selected from ECON 190–199 may be counted toward the major.

<sup>1</sup> It is strongly recommended that students satisfy the upper-division writing requirement with one of the Economics electives.

Undergraduates in any of the three Economics majors may complete the Honors Program in Economics. Entry into the program requires a 3.4 GPA or better in upper-division Economics courses and an overall GPA of 3.2 or better. Undergraduates hoping to enter the program must apply no later than the spring quarter of their junior year. Students in the Honors Program must complete an honors thesis and the two-quarter Economics Honors Colloquium (ECON H190A-ECON 190BW; satisfies the upper-division writing requirement).

## Economics, B.A.

This major is designed for students seeking a broad education applicable to occupations in business, law, and government or as preparation for graduate school in the social sciences.

The Honors Program in Economics is open to high-achieving students in all Economics majors.

NOTE: Students may complete only one of the three Economics majors.

**Freshmen:** Preference will be given to those who rank among the highest using the selection criteria as stated in the Undergraduate Admissions section of this *Catalogue*.

**Transfer Student Applicants:** Transfer applicants with the highest grades overall who satisfactorily complete course prerequisites will be given preference for admission. All applicants must complete one course in microeconomics, one course in macroeconomics, and two semesters/two quarters of approved first-year calculus. Applicants interested in the major of Quantitative Economics must also complete one quarter/one semester of approved linear algebra.

**Change of Major:** Information about change-of-major requirements, procedures, and policies is available in the School of Social Sciences Undergraduate Student Affairs Office and at the UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu>).

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Departmental Requirements for the Major in Economics

This major is designed for students seeking a broad education applicable to occupations in business, law, and government or as preparation for graduate school in the social sciences. University and School requirements must be met and must include 16 courses as specified below.

A. Lower-division:

ECON 20A- 20B	Basic Economics I and Basic Economics II
ECON 15A- 15B	Probability and Statistics in Economics I and Probability and Statistics in Economics II

MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
B. Upper-division: ECON 100A- 100B- 100C	Intermediate Economics I and Intermediate Economic II and Intermediate Economic III
ECON 122A	Applied Econometrics I
C. Six additional ECON courses, one of which may be lower-division.	
D. A maximum of three four-unit courses selected from ECON 190–199 may be counted toward the major.	

Undergraduates in any of the three Economics majors may complete the Honors Program in Economics. Entry into the program requires a 3.4 GPA or better in upper-division Economics courses and an overall GPA of 3.2 or better. Undergraduates hoping to enter the program must apply no later than the spring quarter of their junior year. Students in the Honors Program must complete an honors thesis and the two-quarter Economics Honors Colloquium (ECON H190A-ECON 190BW; satisfies the upper-division writing requirement).

## Economics, Minor

The minor introduces students to the fundamentals of economic theory and builds basic economic literacy. Students apply economic theory in two upper-division electives of their choosing. The minor is ideal for anyone seeking careers in business, government, law, or non-profits or who simply has interest in economic issues.

### Economics Minor Requirements

Requirements for the minor in Economics are met by taking nine courses (36 units) as specified below:

A. Complete the following core courses (28 units):

ECON 15A- 15B	Probability and Statistics in Economics I and Probability and Statistics in Economics II <sup>1</sup>
ECON 20A- 20B	Basic Economics I and Basic Economics II <sup>2</sup>
and select one of the following sequences:	
ECON 100A- 100B- 100C	Intermediate Economics I and Intermediate Economic II and Intermediate Economic III
or	

ECON 105A- 105B- 105C

Intermediate Quantitative Economics I  
and Intermediate Quantitative Economics II  
and Intermediate Quantitative Economics IIIB. Electives (eight units): two upper-division ECON electives (excluding ECON 199).<sup>3</sup>

NOTE: Prerequisites for the Economics core courses include MATH 2A-MATH 2B and MATH 4.

- <sup>1</sup> MGMT 7 may not be used to substitute for ECON 15A-ECON 15B. Furthermore, students will not receive credit for MGMT 7 if taken after ECON 15A-ECON 15B.
- <sup>2</sup> Note that ECON 20A-ECON 20B is a requirement of both the undergraduate major in Business Administration and the Economics minor.
- <sup>3</sup> As noted in the Economics courses list (click on the 'Courses' tab at the top of this page), some courses overlap with upper-division courses offered by The Paul Merage School of Business. Where there is overlap, students may use the course to count toward satisfying the upper-division requirements of the Business Administration major or the Economics minor, but not both.

## Economics, Ph.D.

The Department of Economics offers a Ph.D. program in Economics. Drawing upon the School's strong quantitative tradition, it specializes in public choice, transportation economics, urban economics, econometrics, macroeconomics, and applied microeconomics. Admission is highly selective and is limited to students whose interests mesh closely with those of the faculty. By requiring a high degree of overlap between faculty and student research interests, the program offers extensive faculty contact within a tutorial framework. Motivated and well-qualified students find the graduate program highly attractive because of its small size and its great flexibility. Self-discipline and an inquiring mind are prerequisites.

The deadline for application for admission is December 1 for fall quarter. Students are admitted for winter or spring quarters only under exceptional circumstances. Late applications are considered on a space-available basis. All applicants must take the Graduate Record Exam (GRE) prior to the application deadline. Applicants whose primary language is not English must also submit Test of English as a Foreign Language (TOEFL) scores. To be considered for any financial aid (including a teaching assistantship), students who are not citizens of countries where English is either the primary or dominant language as approved by the UCI Graduate Council must submit a passing score from the Test of Spoken English (TSE).

The Master's degree is awarded only to students admitted to the Ph.D. program who have completed the following requirements: The nine core courses in microeconomics (ECON 210A-ECON 210B-ECON 210C), macroeconomics (ECON 210D-ECON 210E-ECON 210F), and econometrics (ECON 220A-ECON 220B-ECON 220C), with no grade lower than a B and with a grade point average across all graduate courses of at least 3.1. Pass the written preliminary exam following the first-year courses at least at the Master's-pass level.

### Requirements

All students must show competence in the core areas of microeconomics, macroeconomics, and econometrics. This is done by taking the three-quarter required course sequences in microeconomics, macroeconomics, and econometrics, with no grade lower than a B and with a grade point average across these courses of at least 3.25. The Department may also require students to pass a written qualifying exam in one or more of the core course sequences after taking the courses.

Students take the oral candidacy examination based on their research. A student making satisfactory progress in the program will have advanced to Ph.D. candidacy before the beginning of their third year.

Students also must master two fields of economics by taking a two-course sequence (possibly including independent reading courses) and writing a research paper in each field. Students also must enroll for at least four quarters in the graduate colloquium, in which attendance at regular Economics faculty research colloquia is supplemented by discussion of the papers presented and additional reading. Students are encouraged to become conversant with areas of current economic research early in their graduate careers, in order to facilitate a timely transition from meeting course and field requirements to thinking through a dissertation research plan.

Two or three quarters before the expected completion of the dissertation, the dissertation committee will organize an oral examination of the candidate's dissertation prospectus. Ordinarily, the prospectus will describe in detail the dissertation, and will typically be accompanied by at least one completed chapter of the dissertation.

Students are expected to complete their dissertation by the end of their fifth year. The maximum time permitted for completion of the Ph.D. is six years.

### Ph.D. in Economics with a Concentration in Transportation

Students can also pursue a Ph.D. in Economics with a concentration in Transportation Economics. This option draws upon the transportation researchers on the campus within the School of Social Sciences, The Henry Samueli School of Engineering, The Paul Merage School of Business, and the School of Social Ecology. Students benefit from association with the Institute of Transportation Studies, which facilitates student research by providing research assistantships and interdisciplinary seminars on all modes of transportation.

### Requirements

Requirements for the concentration are the same as those described above with the following three exceptions:

1. Instead of the third quarter of microeconomics and macroeconomics, students may substitute specified courses such as Discrete Choice Econometrics (ECON 223A), Travel Demand Analysis I (ENGRCEE 220A), or Management Science (MGMTMBA 201B);
2. One of the student's two required fields of competence must be transportation economics; the other must be a related field such as urban economics, labor economics, industrial organization, or a transportation-related field from outside economics (such as travel demand and flow theory, urban and transportation policy analysis, environmental impacts of transportation, or urban and transportation planning) subject to the approval of the Director of Graduate Studies for Economics; and
3. Students must take at least one additional course from a list of designated courses in transportation and related subject areas.

## Ph.D. in Economics with a Concentration in Public Choice

Students can also pursue a Ph.D. in Economics with a concentration in Public Choice. This is an interdisciplinary field, at the intersection of Economics and Political Science, which draws on quantitative tools to model the functioning of political institutions. Faculty from the Departments of Economics, Political Science, and Logic and Philosophy of Science and from The Paul Merage School of Business are involved in research that supports the concentration.

### Requirements

Students who elect this concentration are admitted under the normal procedures for the program in Economics and must fulfill all the requirements for the Economics degree with the following modifications:

1. One of the student's two required fields of competence must be public choice; included is a three-quarter core course in public choice, ECON 270A-ECON 270B-ECON 270C, which is jointly organized by faculty in the Departments of Economics and Political Science. (A background in economic theory is a prerequisite to this sequence.) The requirement for competence in a second field may be met with a one-quarter course, instead of two, if it provides sufficient fluency in the field; and
2. Students must obtain a background knowledge in political science equivalent to that provided by a one-year undergraduate survey course, if they do not already have it.

## Ph.D. in Economics with a Concentration in Monetary Policy and Central Banking

Students can also pursue a Ph.D. in Economics with a concentration in Monetary Policy and Central Banking. The concentration draws on faculty's expertise in Monetary Policy and Central Banking - a number of UCI faculty members across the social sciences have experience working in and with central banks. This concentration provides students with the tools necessary for careers in monetary policy research or central banking.

### Requirements

Students who elect to earn a Ph.D. in Economics with a concentration in Monetary Policy and Central Banking are admitted under the normal procedures for the program in Economics, and must fulfill all the requirements for the Economics degree. In addition, a candidate for the concentration in Monetary Policy and Central Banking must:

1. Fulfill the requirements for the macroeconomics subfield as one of the two fields of specialization required of all Economics Ph.D. candidates.
2. Fulfill the requirements for either the international economics subfield or the econometrics subfield as the second of the two fields of specialization required of all Economics Ph.D. candidates.
3. Students must take ECON 224A.
4. Students' dissertations must be aligned with the research initiatives undertaken by central banks, as determined by the program director.

## Program in Law and Graduate Studies (J.D./Ph.D.)

Highly qualified students interested in combining the study of law with graduate research and/or professional qualifications in Economics are invited to undertake concurrent degree study under the auspices of UC Irvine's Program in Law and Graduate Studies (PLGS). Students in this program pursue a coordinated curriculum leading to a J.D. degree from the School of Law in conjunction with a Ph.D. degree in Economics. Additional information is available from the PLGS Program Director's office, 949-824-4158, or by email to [plgs@law.uci.edu](mailto:plgs@law.uci.edu). A full description of the program, with links to all relevant application information, can be found at the School of Law Concurrent Degree Programs website (<http://www.law.uci.edu/academics/interdisciplinary-studies/concurrent-degrees.html>).

UCI is a major research university and has an excellent library that offers in electronic and print formats more than 3.2 million volumes, as well as special interlibrary loan arrangements with the other University of California libraries. The School of Social Sciences provides computer rooms, conference rooms, and offices for graduate students. The Economics Department has a small library with current journals and unpublished working papers from other universities. Students also have access to advanced computing resources as well as PC and UNIX laboratories.

Currently, there are four research units that provide excellent research opportunities for Economics graduate students: the Institute of Transportation Studies, the Center for Research on Information Technology and Organizations, the Institute for Mathematical Behavioral Sciences, and the Center for Economics & Public Policy (CEPP), established in 2011, which seeks to improve analysis, formulation, and debate on economics-related public policy issues at the international, national, state, and local levels.

## Quantitative Economics, B.A.

The Department strongly urges students to consider the major in Quantitative Economics, which best prepares them for careers in business and finance, for law school, for M.B.A. programs, and for graduate studies in the social sciences.

The Honors Program in Economics is open to high-achieving students in all Economics majors.

NOTE: Students may complete only one of the three Economics majors.

**Freshmen:** Preference will be given to those who rank among the highest using the selection criteria as stated in the Undergraduate Admissions section of this *Catalogue*.

**Transfer Student Applicants:** Transfer applicants with the highest grades overall who satisfactorily complete course prerequisites will be given preference for admission. All applicants must complete one course in microeconomics, one course in macroeconomics, and two semesters/two quarters of approved first-year calculus. Applicants interested in the major of Quantitative Economics must also complete one quarter/one semester of approved linear algebra.

**Change of Major:** Information about change-of-major requirements, procedures, and policies is available in the School of Social Sciences Undergraduate Student Affairs Office and at the UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu>).

### Departmental Requirements for the Major in Quantitative Economics

The Department strongly urges students to consider the major in Quantitative Economics, which best prepares them for careers in business and finance, for law school, for M.B.A. programs, and for graduate studies in the social sciences. University and School requirements must be met and must include 19 courses as specified below.

A. Lower-division:

ECON 20A- 20B	Basic Economics I and Basic Economics II
MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
MATH 3A	Introduction to Linear Algebra

B. Upper-division:

ECON 105A- 105B- 105C	Intermediate Quantitative Economics I and Intermediate Quantitative Economics II and Intermediate Quantitative Economics III
ECON 123A- 123B	Econometrics I and Econometrics II

C. Select one of the following series:

STATS 120A- 120B- 120C	Introduction to Probability and Statistics I and Introduction to Probability and Statistics II and Introduction to Probability and Statistics III
MATH 130A- 130B- 130C	Probability I and Probability II and Stochastic Processes

D. Complete five additional four-unit upper-division Economics electives. One course must satisfy the upper-division writing requirement. Two courses must be selected from the list below.<sup>1</sup>

ECON 107	Economics of Asymmetric Information
ECON 116A	Game Theory I
ECON 116B	Game Theory II
ECON 122CW	Data Analysis Writing
ECON 123CW	Econometrics III
ECON 126	Computational Macroeconomics
ECON 128	Machine Learning for Economists
ECON 129	Special Topics in Quantitative Methods
ECON 131A	The Economics of Risk and Uncertainty
ECON 135	Mathematics of Finance

E. A maximum of three four-unit courses selected from ECON 190–199 may be counted toward the major.

<sup>1</sup> Additional courses may be added to this list; up-to-date information is available at the Department of Economics website (<http://www.economics.uci.edu/>).

Undergraduates in any of the three Economics majors may complete the Honors Program in Economics. Entry into the program requires a 3.4 GPA or better in upper-division Economics courses and an overall GPA of 3.2 or better. Undergraduates hoping to enter the program must apply no later than the spring quarter of their junior year. Students in the Honors Program must complete an honors thesis and the two-quarter Economics Honors Colloquium (ECON H190A-ECON 190BW; satisfies the upper-division writing requirement).

<b>Freshman</b>		
<b>Fall</b>	<b>Winter</b>	<b>Spring</b>
ECON 20A	ECON 20B	Intro. Soc. Sci. course
MATH 2A	MATH 2B	General Education
Lower-Division Writing	Lower-Division Writing	MATH 3A
	General Education	
<b>Sophomore</b>		
<b>Fall</b>	<b>Winter</b>	<b>Spring</b>

## Department of Global and International Studies

### Eve Darian-Smith, Department Chair

569 Social Science Tower

949-824-1072

<https://www.globalstudies.uci.edu> (<https://www.globalstudies.uci.edu/>)

The Department of Global and International Studies provides a critical interdisciplinary perspective on pressing global issues such as climate change, mass migrations, human rights, global health, food insecurity, rising authoritarianism, regional conflict, and the global political economy.

International Studies majors acquire 21st century analytical skills and knowledge that will enable them to understand and contribute to shaping the rapidly evolving global community. The degree in International Studies prepares students for graduate study and professional careers in a variety of fields in the national and international job markets such as international affairs and public policy, international law, international organizations, academic research and teaching, and non-governmental work (in human rights, humanitarianism, development and environmental issues).

- Global Studies, Graduate Emphasis
- Global Studies, Ph.D.
- International Studies, B.A.
- International Studies, Minor

## Faculty

Yousuf Al-Bulushi, Ph.D. University of North Carolina at Chapel Hill, *Assistant Professor of Global and International Studies*

Long T. Bui, Ph.D. University of California, San Diego, *Assistant Professor of Global and International Studies*

Eve Darian-Smith, Ph.D. University of Chicago, *Department Chair and Professor of Global and International Studies; Anthropology; Criminology, Law and Society*

Ruth Goldstein, Ph.D. University of California, Berkeley, *Assistant Professor of Global and International Studies*

Philip McCarty, Ph.D. University of California, Santa Barbara, *Associate Professor of Teaching of Global and International Studies*

Gustavo Oliveira, Ph.D. University of California, Berkeley, *Assistant Professor of Global and International Studies*

Vibhuti Ramachandran, Ph.D. New York University, *Assistant Professor of Global and International Studies; Criminology, Law and Society*

## Courses

### **INTL ST 1. Introduction to Global Studies. 4 Units.**

Ongoing historical processes that increase global integration, the social, economic, and political interdependence of different regions, cultures, and peoples. Topics include ancient empires, colonialism, nationalism, industrialization, modern imperialism and warfare, decolonization, global social movements, conflict, inequality, and global governance.

Same as SOC SCI 4A.

Restriction: International Studies Majors have first consideration for enrollment.

**(III and VIII ).**

### **INTL ST 11. Global Cultures and Society. 4 Units.**

Offers a general overview of the rise of global interdependence in political, economic, demographic, and cultural terms. Considers what drove people from relative isolation into intensified intercourse with one another, and investigates the consequences of this shift.

Same as ANTHRO 41A.

Restriction: Anthropology Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(III and VIII ).**

### **INTL ST 12. Global Political Ideologies. 4 Units.**

An overview of the major political ideologies shaping the current world order and global conflict. Topics include liberalism, democracy, nationalism, capitalism, communism, socialism, fascism, neoliberalism, clash of civilizations, sectarian violence, populist nationalism, and de-globalization.

Same as POL SCI 44B, SOC SCI 12.

Restriction: International Studies Majors have first consideration for enrollment.

**(III and VIII ).**

### **INTL ST 13. Global Economy. 4 Units.**

Acquaints students with the fundamental patterns of the global economy. Emphasizes the historical roots and political implications of economic choices.

Same as ECON 13.

Restriction: International Studies Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**(III, VIII)**

### **INTL ST 14. Introduction to International Relations. 4 Units.**

Analysis of political relations between and among nations with emphasis on explanations of conflict and cooperation. The role of ideologies and their relation to international problems are also examined.

Same as POL SCI 41A.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(III and VIII ).**

### **INTL ST 15. Global Political Economy. 4 Units.**

The global economy as an integrated system. The rise of world trade, capitalism, national economies, market cycles, competing economic ideologies, development, globalization, transnational labor, multinational corporations, and the role of UN, World Bank, WTO, and the IMF in global governance.

Same as SOC SCI 15.

Restriction: International Studies Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment.

**(III and VIII ).**

**INTL ST 16. Human Rights and Global Governance. 4 Units.**

Historical development of civil, political rights and the rise of human rights in international law. Explores role, and limitations, of the UN, ICJ, and ICC in global governance. Reconceptualizing democracy and political representation in a postnational 21st century.

Same as POL SCI 45A, SOC SCI 16.

Restriction: International Studies Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment.

(III and VIII ).

**INTL ST 17. Global Environmental Issues. 4 Units.**

Examines problems such as global climate change, growing human populations, fisheries depletion, ocean acidification, biodiversity loss, deforestation, and food security. Introduces political, social, and economic factors contributing to environmental issues and their disproportional impacts on the world's poor and minorities.

Same as SOC SCI 17.

Restriction: International Studies Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment.

(III and VIII ).

**INTL ST 32A. Dilemmas of Diversity. 4 Units.**

Focuses on racial, ethnic, and gender diversity, multiculturalism, and their impact on our social and political ideals. Traces the sources of ideas about difference, equality, and toleration, and examines tensions that occur when forms of identity conflict with one another.

Same as POL SCI 32A.

(VII)

**INTL ST 100. Global Trials. 4 Units.**

Explores landmark legal trials that have impacted both domestic and world affairs. The trials provide a lens through which to explore society at the time, as well as shed light on the historical legacies of current social, political, and legal values.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**INTL ST 101A. Global Social Movements. 4 Units.**

The evolution of global social movements over past 250 years. Age of Revolutions in America, France, and Haiti; nationalism and labor; 1960s global decolonization; 21st century Latin American indigenous movements; Occupy Wall Street, Arab Spring, and social media's #metoo, #BlackLivesMatter.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**INTL ST 101B. Global Cities and Slums. 4 Units.**

Cities as a window into contemporary challenges of the globalized world. Global cities such as Los Angeles, London, and Beijing compared with cities with slums in the global south such as Rio de Janeiro, Johannesburg, and Mumbai.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**INTL ST 102A. Global Refugees and Stateless People. 4 Units.**

Examines the reason behind global refugee crises, and what it means to be a displaced migrant or stateless person in history and in contemporary society. Links case studies about refugees around the world.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**INTL ST 102B. Global Asias and Orientalism. 4 Units.**

Examines how the modern world is divided between East and West in the age of globalization. Through the postcolonial framework of Orientalism, it considers a pluralistic idea of Asia and the current notion of the new world order as one.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**INTL ST 103A. Case Studies in Global and Planetary Health. 4 Units.**

Explores critical global health and planetary health studies, linking past trends to current research of health inequalities. Case studies include maternal-fetal mortality, environmental contamination, disaster preparedness, pharmaceutical development and access, and humanitarian aid interventions.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**INTL ST 104A. Global Trafficking. 4 Units.**

Explores trafficking in different global contexts. Covers sex trafficking, labor trafficking, and organ trafficking. Tracks the use of the concept in policy, human rights, law, humanitarianism, and media. Provides a complex and nuanced understanding of the problem and its solutions.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**INTL ST 104BW. Global Gender and Sexuality. 4 Units.**

Develops critical insights into gender and sexuality as products of the world around us and as lived experiences across the globe. Topics include agency and resistance, intersectionality, feminisms, colonialism, heteronormativity, gender violence, masculinities, media and popular culture, globalization and migration.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**(Ib)**

**INTL ST 106A. Global Political Ecology. 4 Units.**

Introduction to political ecology and critical analysis of the global scale and globalization. Topics include current and historical climate change, fossil fuels, international trade and investment, soil erosion and pollution, deforestation, waste, ocean ecology, water crisis, wars, revolutions, and refugees.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**INTL ST 106B. Global Food Environment. 4 Units.**

Examines the global political ecology of food, focusing on the U.S., China, and Brazil. Topics include the history of agriculture, imperialism/neocolonialism, Malthusianism, migration, agro-industrialization, deforestation, GMOs, agrochemicals, soil and water contamination, land struggles, food security/safety/sovereignty, dietary habits, and climate change.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**INTL ST 111B. World of Coffee . 4 Units.**

History of consumption and production of coffee over the centuries, and coffee's cultural, economic, social, political consequences. Coffee's social life as a drug, symbol of hospitality, religious rite, sociability and bourgeois lifestyle, commodity, source of livelihoods, imperial revenues, corporate profits.

Same as HISTORY 163.

**INTL ST 112A. International Business. 4 Units.**

Introduction to conducting business in the international arena, decision making in the organization, and globalization of markets and production. Topics covered range from tax and finance to ethics, marketing, and more. Continuing corporate regulatory scandals discussed.

Same as SOC SCI 115D.

**INTL ST 114A. International Political Economy. 4 Units.**

Examination of problems in global political-economic relations through competing conceptual lenses or grand theories: mercantilism, liberalism, and Marxism. Surveys North-North and North-South issues relating power and wealth.

Same as POL SCI 141B.

**(VIII)**

**INTL ST 115. Global Poverty and Inequality in the 21st Century. 4 Units.**

Explores a multidisciplinary understanding of poverty and inequality in the 21st century and assesses impact of education, health, technology, and other interventions. Course offered online only.

Same as UPPP 115.

**INTL ST 117A. Transnational Migration. 4 Units.**

Examines the movement of people across national borders, governmentality and the role of state practices to control populations, and issues of citizenship, belonging, and identity. Examples are drawn from the United States, Europe, Latin America, Asia, and Africa.

Same as CHC/LAT 161, ANTHRO 125X.

**(VIII)**

**INTL ST 122. Nuclear Environments. 4 Units.**

Understanding the impact of the nuclear age on the environment and human health through interrelated developments of nuclear power and nuclear weapons. The early years of weapon development, catastrophic environmental pollution, perils of nuclear power in the U.S. and Russia.

Same as SOCECOL E127, PUBHLTH 168.

**(VIII)****INTL ST 124A. Introduction to the Comparative Study of Legal Cultures. 4 Units.**

Traces the anthropological and comparative cultural study of law from the nineteenth century to the present; briefly surveys the diversity of recorded legal cultures and critically examines key concepts which have been used to describe and classify them.

Same as CRM/LAW C102.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 130. Transnational Gangs. 4 Units.**

Examines the internationalization of U.S. domestic street gangs. The relationship between California gangs Mara Salvatrucha and 18th Street and Mexico/Central American gangs is assessed. Specified topics include: mobilization, migration, territorialism, culture, organization, and use of technology.

Same as SOC SCI 120.

Overlaps with SOC SCI XI120, INTL ST XI130.

**INTL ST 131A. Just War Revisited. 4 Units.**

Examines the evolution of the doctrine of the just war across the history of Western political thought, the importance of changes in the doctrine and whether it applies today; examines international relations case studies to determine today's relevancy.

Same as POL SCI 135B.

**INTL ST 140A. Approaches to International Relations. 4 Units.**

Reviews theoretical and methodological approaches to the study of international relations using contending perspectives to analyze power and influence, capabilities, interdependence, reciprocity, international regimes, anarchy, cooperation, imperialism, and hegemony.

Same as POL SCI 144A.

Restriction: Upper-division students only. Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 141B. Homeland Security . 4.0 Units.**

Examines the 9/11 origins of the concept of homeland security; assess the evolution, structure, and operations of the Department of Homeland Security; critically examines the evolution of threat assessment to the U.S. and the utilization of risk management methodologies.

Same as POL SCI 143G.

**INTL ST 142A. U.S. Foreign Policy I: Globalism and Cold War. 4 Units.**

Looks at changing international perspectives, policy responses, and military strategies of presidential administrations from Truman to Reagan. In assessing the motives and objectives of U.S. foreign policy leaders during the "Cold War" era, the concept of "national interest" is examined.

Same as POL SCI 142D.

Restriction: International Studies Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment.

**INTL ST 142D. The International Relations of East Asia. 4 Units.**

Surveys various aspects of relations between the nations of East Asia. Topics include the historical development of the region; current political and security relations, including the impact of the American military presence.

Same as POL SCI 142B.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 142E. U.S. Coercive Diplomacy. 4 Units.**

Examines the theory of compellence and the U.S. practice of coercive diplomacy--the power to change behavior of other governments. Specific case examples: the Cuban missile crisis, bombing of North Vietnam, the Nicaraguan Contras, Desert Shield/Desert Storm, and Libya.

Same as POL SCI 142G.

Restriction: Upper-division students only. Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 142G. U.S. Foreign Policy Toward Asia. 4 Units.**

U.S. policy toward the countries of East Asia: bilateral and regional security relationships, U.S. economic relations with the major Asian countries, the development of regional institutions, and human rights.

Same as POL SCI 141E.

**INTL ST 143A. Vietnam War. 4 Units.**

Examines social structures and social changes in Vietnamese and U.S. societies through the study of the Vietnam War.

Same as SOCIOL 170A.

**INTL ST 144A. Comparative Politics: Four Nations, Three Continents. 4 Units.**

Studies four countries in a comparative fashion: their respective political histories and cultural traditions; actual differences among their superficially similar party, parliamentary, and executive institutions; contemporary economic policy. The countries represent three continents and varying levels of economic development.

Same as POL SCI 154C.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 145A. International Law. 4 Units.**

Examination of the origin, changing structure, application of international law, and the role of legal norms in regulating the behavior of states and maintaining international order.

Prerequisite: POL SCI 71A

Same as POL SCI 172A.

**(VIII)**

**INTL ST 147CW. International Humanitarianism. 4 Units.**

Examines, analyzes, and evaluates the humanitarian phenomenon, the actors involved in it (including states, international organizations (IOs), and nongovernmental organizations (NGOs)), the rise of a body of international humanitarian law, and the problems and debates associated with international humanitarianism today.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as POL SCI 147CW.

**(Ib)**

**INTL ST 147D. International Organizations. 4 Units.**

Active learning course that examines origins, decision-making processes, activities, and evolution of leading international organizations (e.g. U.N., NATO, EU, AU, WTO, World Bank, IMF). Activities include drafting reforms, applying theory, assessing dysfunctions, and participating in U.N. negotiation simulations.

Same as POL SCI 147D.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 148W. Global Futures. 4 Units.**

Develops critical insights into our collective future as it reflects different perspectives of the world. Topics include techno-orientalism, afro-futurism, feminist futures, indigenous cosmology, and environmental concerns.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**(Ib)**

**INTL ST 150. Racism and Global Apartheid. 4 Units.**

The concept of race has been used to draw a global color line dividing rich from poor, developed from developing, first from third worlds. Racism is used to justify slavery, colonialism, imperialism, eugenics, genocide, and extreme inequalities produced by globalization.

Restriction: International Studies Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment.

**INTL ST 151B. Religion and World Politics. 4 Units.**

Examines the relationship between religion and world politics historically and today, focusing on connections with peace/war, democracy, human rights, secularism(s), and globalization. Covers major debates, scholarship, concepts, and theories through class exercises, exams, and essays.

Prerequisite: POL SCI 41A or INTL ST 11 or INTL ST 12 or REL STD 5A or REL STD 5B or REL STD 5C

Same as POL SCI 146B, REL STD 115.

**INTL ST 152A. Non-Government Organization (NGO) Fundamentals. 4 Units.**

Introduction to non-governmental organizations, including their role in U.S. society and the international community. Explores varying definitions of NGOs and the characteristics held in common by all NGOs.

Same as SOC SCI 152A.

**INTL ST 153B. Cross-Cultural Studies of Gender. 4 Units.**

Explores the construction of gender in national and transnational contexts. Special attention is given to how race, sexuality, class, and global inequalities shape different experiences of gender, and how gender structures political, institutional, and social life across the world.

Same as ANTHRO 121D.

**(VII)****INTL ST 153C. Urban Anthropology. 4 Units.**

Cultural roles of urban centers and processes of urbanization in comparative perspective, focusing on both nonwestern, nonindustrial societies of past and present; the relationship between modern urban centers and Third World peoples. Migration, urban poverty, in Africa, Asia, Latin America.

Same as ANTHRO 121J.

**INTL ST 153D. Colonialism and Gender. 4 Units.**

An anthropological enquiry into the ways colonial relations of power have been structured and gendered throughout the world, and to what effect. Examines the social locations of men and women in the everyday exercise of colonial and imperial power.

Same as ANTHRO 136G.

Restriction: Anthropology Majors have first consideration for enrollment.

**INTL ST 153E. Nationalism and Ethnicity in the Contemporary World. 4 Units.**

An exploration of the concepts of identity, culture, ethnicity, race, and nation through ethnographic cases, with a view to asking larger questions: how do people create nativeness and foreignness? How does 'culture' get worked into contemporary racisms and nationalisms.

Same as ANTHRO 136A.

**(VIII)****INTL ST 153F. Militarism and Gender. 4 Units.**

Examination of feminist approaches to militarism, war, and political violence; drawing on representations of women as both victims of and participants in military violence; effects of militarism on formations of gender; effects of military industrial complex on nationalism and identity.

Same as GEN&SEX 167A.

**INTL ST 154B. Human Rights. 4 Units.**

Examines the causes and consequences of human rights violations with a focus on Latin America. What are human rights? When and where are they violated? What political mechanisms are available to deal with human rights problems? How effective are they.

Same as POL SCI 153E.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 154C. Ethics in an Age of Terror and Genocide. 4 Units.**

Original sources document personal impact of wars on genocides, from World War II to the Bosnian and Rwandan genocides and current wars in Iraq and Afghanistan. Students train for and conduct personal interviews with someone who lived through a war.

Same as POL SCI 145A.

**INTL ST 154W. Ethics and Justice in International Affairs. 4 Units.**

Analyzes choices regarding the use of force, resolving conflict, and promoting human rights and social justice. Special attention is given to the American experience as a principal case study of ethics and statecraft.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. International Studies Majors have first consideration for enrollment.

**(Ib)**

**INTL ST 156A. Voting and Political Manipulation. 4 Units.**

Introduction to social choice and cooperative games. Topics include majority rule, types of voting methods, apportionment and proportional representation, agenda manipulation, coalition formation, voting power, political consequences of electoral laws.

Same as POL SCI 151H, SOC SCI 121T, ECON 154.

Restriction: International Studies Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**INTL ST 157A. 21st Century Africa. 4 Units.**

Comparative studies of the cultures and societies of Sub-Saharan Africa, with emphasis on critical study of colonialism and postcoloniality, social transformation, and the politics of identity.

Prerequisite: ANTHRO 2A

Same as ANTHRO 164A.

Restriction: Anthropology Majors have first consideration for enrollment.

**(Ib)**

**INTL ST 157C. Comparing European and US Societies. 4 Units.**

Society, culture, institutions of U.S. and European countries. Fertility to football, guns to government, work to welfare, health to housework. Cross-national approaches for understanding the world and thinking critically about taken-for-granted practices. Policies the U.S. might borrow for social issues.

Same as SOCIOL 157C.

**INTL ST 158B. Peoples of the Pacific. 4 Units.**

The cultural history and recent developments among the Pacific peoples of Polynesia, Micronesia, Melanesia, New Guinea, and Australia.

Same as ANTHRO 163A.

**(VIII)**

**INTL ST 158D. China in the Global Age. 4 Units.**

Chinese society from 1949 to present. Social change in the context of political control and ideological considerations. Focus on the power structure, political decision processes, and ideological legitimation, and interplay with the Chinese community and its culture.

Same as SOCIOL 175B.

**INTL ST 161A. Political Islam. 4 Units.**

Political Islam is a diverse phenomenon. While noticeable barriers exist to 'Islamist democracy,' it is the Islamists who will define the political future of much of the Muslim world. Reviews the experience of Saudi Arabia, Egypt, Pakistan, Turkey, and Indonesia.

Same as SOC SCI 188K.

**INTL ST 162B. Peoples and Cultures of Post-Soviet Eurasia. 4 Units.**

Examines the cultures and political conflicts of the more than 130 indigenous ethnic groups in the European and Asian territories of the former U.S.S.R. Emphasis is on the theoretical issues of ethnicity, nationalism, and conflict management.

Same as POL SCI 154F, ANTHRO 164P.

**(VIII)****INTL ST 163. Global Inequalities. 4 Units.**

An examination of various forms of social, economic, and political inequality within and between nations. Different approaches to understanding inequality and the intersections of poverty, race, ethnicity, class, gender, nationality, health, and violence.

Restriction: International Studies Majors have first consideration for enrollment.

**INTL ST 165. Introduction to Contemporary Middle East Politics. 4 Units.**

An overview of basic issues that shape the politics of the Middle East and North Africa. Themes include implication of the colonization era, nation-state formation, inter-Arab relations, nationalism, Arab-Israel conflict, Islamic resurgence, and more.

Same as SOC SCI 188A, POL SCI 158D.

**INTL ST 175A. U.S. War on Terrorism. 4.0 Units.**

Analyzes the United States war on terrorism by focusing on terrorism, the U.S. wars in Afghanistan and Iraq, and changes in police powers through the Patriot Act, as well as the political leadership which directs the war.

Same as SOCIOL 170B.

**INTL ST 176C. Introduction to Chinese Politics. 4 Units.**

Background to the Chinese revolution, rise of the communist party; and institutions, ideology, and structure of Communist party rule from 1949-present.

Same as POL SCI 151B.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 176D. Chinese Politics: Policy, Leadership, and Change. 4 Units.**

Examines major policies from 1949 to the present, and considers the changing role of the Communist Party and its shifting treatment of various social groups; the era of Mao Zedong, reforms under Deng, and post-Deng politics.

Same as POL SCI 151C.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 176I. West European Politics. 4 Units.**

Explores four main themes: (1) thinking scientifically about politics; (2) understanding the linkages between different political structures and spheres of activity; (3) evaluating some theories about politics; (4) learning about three countries: Britain, France, and Germany.

Same as POL SCI 152F.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 176L. Canadian Politics. 4 Units.**

Addresses the basic structures and processes of contemporary Canadian government and politics. Additional topics may include regionalism, federalism, western alienation and oil, Canadian solutions to social welfare policy questions, developments in Quebec, and other issues associated with French-English relations.

Same as POL SCI 153B.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 177C. Revolution in Latin America. 4 Units.**

Presents a comparative analysis of the causes, development, and consequences of selected revolutionary movements, focusing on outbreaks in Mexico, Bolivia, Cuba, Chile, Nicaragua, and Grenada. Explores topics of state formation, economic nationalism, social justice, ethnicity, and role of international affairs.

Same as CHC/LAT 151B, HISTORY 166D, SOC SCI 173N.

**INTL ST 177D. U.S. Intervention in Latin America. 4 Units.**

Explores political, economic, social, and cultural ties that bind Latin America to the United States. Focuses on U.S. intervention and Latin American response from early nineteenth century to present day. Case studies include Mexico, Guatemala, Cuba, Chile, and Central America.

Same as POL SCI 142J, HISTORY 166, CHC/LAT 150.

**INTL ST 177E. Cuban Society and Revolution. 4 Units.**

Explores the causes, development, and legacy of the 1959 Revolution. Themes include economic dependency, democracy, race, gender, culture, and the always volatile relations between Cuba and the United States.

Same as POL SCI 153G, HISTORY 166C, CHC/LAT 157.

**INTL ST 177G. Revolution and Reaction in Cold War Latin America. 4 Units.**

Explores Latin American experiences of revolutionary change and military dictatorship during the Cold War (1945-1990). Pays particular attention to the lives of women, peasants, workers, and the urban middle classes. Case studies include Guatemala, Cuba, Chile, Argentina, Nicaragua, and Mexico.

Same as HISTORY 166B.

**INTL ST 177I. Ancient Civilization of Mexico and the Southwest. 4 Units.**

The prehistory and cultural evolution of the civilization which originated in Mexico, including the Olmecs, Aztecs, Toltecs, Maya, and Zapotec, as well as the Pueblos of the Southwestern U.S. Topics include the origins of food production and of the state.

Same as ANTHRO 141A.

**INTL ST 177J. Peoples and Cultures of Latin America. 4 Units.**

Surveys the prehistory of Latin America and its indigenous cultures, emphasizing the impact of colonial rule, capitalism, and twentieth-century transformations. Emphasis on communities from several countries. In some years, emphasis on comparisons between the Latin American and Caribbean experiences.

Same as ANTHRO 162A, CHC/LAT 120.

**(VIII)**

**INTL ST 178A. Immigration Politics in Western Europe. 4 Units.**

Examines immigration politics in Western Europe, analyzing trends and policy from the postwar period through to today. Topics include citizenship, immigrant integration, asylum, the far-right, and a rotating focus on contemporary issues, e.g., terrorism, Islamophobia.

Same as POL SCI 152K.

Overlaps with POL SCI 141D.

**INTL ST 179. Special Topics: Geographic Focus in International Studies. 4 Units.**

Studies in selected areas of international studies. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**INTL ST H180. International Studies Honors Research Seminar. 4 Units.**

Assists students to prepare a thesis prospectus for the Honors Program in International Studies. Students choose a topic, learn writing and research methods, write a prospectus and orally present and defend it, and conduct a literature review.

Restriction: International Studies Majors have first consideration for enrollment. Social Science Honors students only.

**INTL ST 183A. Global and International Studies Forum. 4 Units.**

A faculty-student forum featuring lectures from a variety of institutions with discussion issues related to Global and International Studies.

Repeatability: May be taken for credit 4 times.

Same as SOCECOL 183A, SOC SCI 183A.

**INTL ST 183B. Seminar in Mediation. 4 Units.**

Student develop mediation skills and refine knowledge in the practice and theory of conflict resolution. Students who complete this course may serve as mediators in the Campus Mediation Program. Course is a prerequisite to completing Indep Study as an intern.

Same as SOC SCI 183B, SOCECOL 183B.

Restriction: International Studies Majors have first consideration for enrollment. School of Humanities students have first consideration for enrollment. School of Social Ecology students have first consideration for enrollment. School of Social Sciences students have first consideration for enrollment.

**INTL ST 183CW. Seminar Conflict Resolution. 4 Units.**

Designed for seniors who are pursuing the minor in Conflict Resolution and/or International Studies major. Provides a forum in which students will refine skills and theory in the study of cooperation and conflict, from local to global arenas.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as SOCECOL 183CW, SOC SCI 183CW.

**(Ib)****INTL ST 183E. Conflict Resolution in Cross-Cultural Perspective. 4 Units.**

Examines theories of conflict management. Analyzes how conflict is mitigated in diverse cultures: at the interpersonal level, between groups, and on the international scale. Students discuss readings, hear from conflict management practitioners, and simulate negotiations.

Same as ANTHRO 136D, SOC SCI 183E, POL SCI 154G.

**(VIII)****INTL ST 189. Special Topics: Global Focus in International Studies. 2-4 Units.**

Studies in selected areas of international studies. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**INTL ST H190. Honors Thesis. 4 Units.**

Students work with faculty to complete their honors thesis.

Repeatability: May be taken for credit 2 times.

Restriction: International Studies Honors students only.

**INTL ST 199. Individual Study. 2-4 Units.**

Students participate in planned research and study under written contract with a supervising UCI instructor. Students may enroll for only one individual study course each quarter.

Repeatability: Unlimited as topics vary.

**INTL ST 201. What is Global Studies?. 4 Units.**

Introduces graduates to the field of global and international studies. Landmark studies outline the transition from globalization studies to contemporary global studies. Identify complex global issues, underlying processes of globalization, and the impacts they have on people around the world.

Restriction: Graduate students only.

**INTL ST 202. Foundations of European Social Thought. 4 Units.**

Provides graduate students with a broad overview of the major landmarks in the development of modern social thought. Introduces key philosophers and theorists Adam Smith, Marx, Durkheim, Weber, Freud, and Du Bois, focusing on the global dimensions of their work.

Restriction: Graduate students only.

**INTL ST 203. Globalizing Social Theory in the Age of Extremes. 4 Units.**

Examines important developments in social theory between 1914 and 1991. The overarching goal is to synthesize from these various approaches a critical and transdisciplinary theoretical framework to analyze complex global issues.

Restriction: Graduate students only.

**INTL ST 204. Theories of Globalization. 4 Units.**

Theories of globalization engage deep historical transformations, keeping the interrelated dynamics of economics, politics, and culture in focus. Theories examine transformations emanating at transnational and state levels, and from below in the form of social movements led by everyday people.

Restriction: Graduate students only.

**INTL ST 205. Theories from the Global South. 4 Units.**

Looking beyond the theoretical traditions of the Euro-American academy scholars can begin to engage important theoretical contributions from the Global South. Explores alternative standpoints and interventions challenging dominant narratives and calling into question taken-for-granted assumptions, categories, concepts, values, and perspectives.

Restriction: Graduate students only.

**INTL ST 206. Engaging Global Issues. 4 Units.**

Critical and interdisciplinary works on global issues serve as examples that graduates can use in their own research. Each week focuses on a different example of outstanding global research done by a scholar having an important impact on the field.

Restriction: Graduate students only.

**INTL ST 207. Research Design and Methods . 4 Units.**

Fundamentals of empirical research design, strategies for global research, sampling logics, reliability, validity, mixed methods, integrating qualitative and quantitative methods. Introduction to basic data collection methods and examples of more advanced methodological strategies. Research ethics and the IRB review process.

Restriction: Graduate students only.

**INTL ST 208. Grant Writing. 4 Units.**

Focuses on production, critique, and revision of student research proposals. A practical seminar designed to improve student proposals, help students through the application processes, and increase students' chances of obtaining support for their research.

Restriction: Graduate students only.

**INTL ST 210A. Proseminar in Global Studies I. 4 Units.**

Year-long intensive introduction to graduate students to a range of topics pertinent to the field of Global Studies. The guest speakers and topics addressed vary each quarter.

Repeatability: May be taken for credit 6 times.

Restriction: Graduate students only.

**INTL ST 210B. Proseminar in Global Studies II. 4 Units.**

Year-long intensive introduction to graduate students to a range of topics pertinent to the field of Global Studies. The guest speakers and topics addressed vary each quarter.

Repeatability: May be taken for credit 6 times.

Restriction: Graduate students only.

**INTL ST 210C. Proseminar in Global Studies III. 4 Units.**

Year-long intensive introduction to graduate students to a range of topics pertinent to the field of Global Studies. The guest speakers and topics addressed vary each quarter.

Repeatability: May be taken for credit 6 times.

Restriction: Graduate students only.

**INTL ST 260. Directed Reading and Research. 4-12 Units.**

Readings focused on specialized topics in consultation with, and with the consent of, a faculty member. Students are expected to produce a paper based on the readings.

Repeatability: May be taken for credit 6 times.

Restriction: Graduate students only.

**INTL ST 290. Dissertation Research. 1-12 Units.**

Dissertation research with Global and International Studies faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**INTL ST 299. Independent Study. 4-12 Units.**

Independent research with Global and International Studies faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## **Global Studies, Graduate Emphasis**

**Philip McCarty, Graduate Director**

591 Social Science Tower  
 949-824-6352  
 philip.mccarty@uci.edu (%20philip.mccarty@uci.edu)

Students from any UCI graduate or professional program (except for those in self-supporting graduate programs) are eligible to apply to the emphasis in Global Studies, administered through the Department of Global and International Studies.

In the spring quarter of their first or second year, interested Ph.D. students must contact the Graduate Director (philip.mccarty@uci.edu) to indicate interests in applying for the Graduate Emphasis in Global Studies. The application process consists of:

- An online application: <https://www.globalstudies.uci.edu/grad/emphasis.php>
- A one-page statement of purpose, including areas of interest and research
- One copy of student's unofficial transcript
- Two faculty letters of recommendation (one from the student's primary advisor)

Upon admission into the Graduate Emphasis in Global Studies, the student must complete the three-course sequence: INTL ST 204-INTL ST 205-INTL ST 206.

The emphasis is comprised of three inter-connected components: 1) a year-long theory and research sequence of three seminars taught by core faculty in the Department of Global and International Studies; 2) cross-disciplinary and interdisciplinary mentorship and advising; and 3) ongoing professionalization opportunities for students. The courses are designed to be taken in sequence, but to ensure flexibility, a student can take the courses in any order and complete them over one year or more.

Each student will be assigned a faculty member *outside* of his or her home department and will meet with that mentor on a regular basis to discuss the student's ongoing research.

Admitted students who satisfactorily complete the program requirements are awarded a letter signed by the Director noting that the student has incorporated Global Studies into their research and professional activities.

## Global Studies, Ph.D.

The Department of Global and International Studies offers a Ph.D. program in Global Studies. The program provides a critical transdisciplinary degree that stands out from other programs for its cutting-edge curriculum, faculty research, and embracing of scholarship from across the social sciences and humanities engaging multiple theoretical perspectives and methodologies. Faculty analyze global issues such as conflict, inequality, migration, human rights, climate change, health, indigeneity, racial formations, global cultures, diasporas, and development from an interdisciplinary perspective.

The program is unique for its foregrounding the importance of engaging global south scholarship and non-western epistemologies that broaden the base of knowledge production and bring new perspectives to bear on the pressing global issues of our times. The program interrogates taken-for-granted concepts and relations of power while foregrounding the deep historical legacies of colonialism and imperialism.

Graduate students work closely with core faculty in the Department in conjunction with over 50 associated faculty from across the campus, providing access to a broad spectrum of expertise and interdisciplinary scholarship. The Department maintains close ties with the School of Humanities, as well as faculty housed in various ethnic programs including Asian American Studies, African American Studies, and Chicano/Latino Studies. Graduate students have the opportunity to participate in and apply for funding from a variety of interdisciplinary research units including the Center for Global Peace and Conflict Studies; the Humanities Research Center; the Latin American Studies Center; Center for Critical Korean Studies; and the Long China-US Institute. In addition, Ph.D. students have the option of taking graduate emphases in Feminist Studies, Critical Theory, and Law, Society and Culture. Students are also encouraged to work with faculty in the School of Law and College of Health Sciences.

Applicants are normally expected to have earned an undergraduate degree in the social sciences or humanities, though applications are also welcome from students with backgrounds in other areas. All applicants are expected to possess strong analytical and writing skills. The online application must be submitted, and all supporting materials must be received by December 1. Supporting materials must include: a personal statement of the applicant's experiences, interest in specified global issues, and career goals; one academic writing sample; GRE exam scores (taken within the last five years); TOEFL for international students; three letters of recommendation; and a statement indicating how the proposed research interests promote diversity and inclusive excellence.

Students must complete at least 48 units in the first two years, excluding units earned in SOC SCI 399 (University Teaching). The number of units earned thereafter will vary in accordance with the time required to pass the qualifying examination, advance to candidacy, and complete the dissertation.

A. Complete:

INTL ST 201	What is Global Studies?
INTL ST 202	Foundations of European Social Thought
INTL ST 203	Globalizing Social Theory in the Age of Extremes

INTL ST 204	Theories of Globalization
INTL ST 205	Theories from the Global South
INTL ST 206	Engaging Global Issues
B. Complete:	
INTL ST 207	Research Design and Methods
INTL ST 208	Grant Writing
INTL ST 210A- 210B- 210C	Proseminar in Global Studies I and Proseminar in Global Studies II and Proseminar in Global Studies III
C. Select two electives offered by the Department of International Studies or an outside department. <sup>1</sup>	
D. During the fourth, fifth, and sixth years, students take, as needed, up to 12 units in INTL ST 290.	

<sup>1</sup> Students do not have to take two elective courses in their first two years, but are strongly encouraged to do so. Students choose electives in consultation with the Graduate Director and/or their advisor.

## Master's Degree

NOTE: Although the Department does not have a terminal master's program, students may earn an optional Master's degree as part of the Ph.D. program.

Students enrolled in the Global Studies program may earn an M.A. in Global Studies by completing the following requirements. Students must:

1. Complete satisfactorily the first two years of coursework in the Ph.D. program
2. Complete satisfactorily the preliminary examination for the Ph.D. program
3. Fulfill the language requirement of the Ph.D. program.

## Language Requirement

Before advancing to candidacy, students must demonstrate a reading knowledge of one language other than English relevant to the student's program of study. This requirement will be met by passing a translation examination administered by the Department.

## Advancement to Candidacy

The qualifying examination, administered by a committee of faculty members, is typically taken in early to mid-Spring quarter of the third year. The qualifying examination consists of two parts: 1) preliminary examination and 2) prospectus defense. Toward the end of the second year of study, students start preparing by establishing a primary advisor and committee. The student will work with their committee members to establish a reading list on two different topics of relevance to their research interests over the summer. In the fall quarter of the third year, the student will enroll in two Directed Reading courses and produce two papers (of approximately 30 pages each). These papers will include literature reviews and develop conceptual and theoretical frameworks pertinent to the students' research interests. These papers will be orally examined by the committee at the end of the fall quarter of the third year.

The dissertation prospectus is presented in a colloquium that includes all three members of the dissertation committee plus two other members of the Academic Senate, one of whom (the "outside" member) may not hold either a primary or joint appointment in the department of Global and International Studies. The dissertation colloquium is typically held mid-Spring quarter in the third year. The basis of the dissertation prospectus is a significant research grant (i.e., National Science Foundation grant). Upon presentation and acceptance of the prospectus, the student will be advanced to candidacy for a Ph.D.

## Dissertation

Students must submit a dissertation describing original publishable research and present a public defense of the dissertation as the final requirement of the Ph.D. as listed below. The normative time for completion of the Ph.D. is six years, and the maximum time permitted is eight years.

The requirements for the Ph.D. are 1) the student must formally present and defend a written dissertation proposal to a committee of at least three members selected according to Graduate Division requirements. The dissertation proposal presentation may take place as part of the examination for Advancement to Candidacy, in which case, that five-member committee will approve the dissertation proposal. 2) The proposal must be approved prior to the final dissertation defense (usually at least three months before to allow time for the candidate to incorporate suggestions and changes required by the committee); 3) prior to the approval of the final version of the dissertation, the student is expected to defend the dissertation in a public colloquium announced with at least two weeks' notice; and 4) all requirements for the Ph.D. degree must be fulfilled within three years after advancement to candidacy.

# International Studies, B.A.

The major in international studies provides an interdisciplinary perspective on global politics, economics, cultures and history. International studies majors acquire twenty-first-century analytical skills and knowledge that will enable them to understand and contribute to shaping the rapidly evolving global community. The degree in international studies prepares students for careers in a variety of fields such as international public policy, international business and finance, international organizations, non-governmental organizations, and academic research and teaching.

Requirements for the major include a core set of courses: Introduction to Global Studies, Global Cultures and Society, Global Political Ideologies, Global Political Economy, Human Rights and Global Governance, and Global Environmental Issues. Also required is an additional lower-division social science course, and the Global and International Studies Forum. Students also choose both a geographic focus and a global focus to enable them to broaden and deepen areas of knowledge and topics of particular interest. The final requirements are competence in a language other than English and an international experience or approved internship.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

## Requirements for the Major

All International Studies majors must complete a minimum of 16 courses for a letter grade, with a minimum GPA of 2.0.

A. Complete:

INTL ST 1	Introduction to Global Studies
-----------	--------------------------------

B. Select four from the following:

INTL ST 11	Global Cultures and Society
INTL ST 12	Global Political Ideologies
INTL ST 15	Global Political Economy
INTL ST 16	Human Rights and Global Governance
INTL ST 17	Global Environmental Issues

C. Select one from the following:

ANTHRO 2A	Introduction to Sociocultural Anthropology
HISTORY 21A	World: Innovations
HISTORY 21B	World: Empires and Revolutions
HISTORY 21C	World: Nation, War, and Rights
INTL ST 13	Global Economy
INTL ST 14	Introduction to International Relations
POL SCI 51A	Introduction to Politics Around the World
SOC SCI 5D	US & World Geography
SOCIOL 2	Globalization and Transnational Sociology

D. Competency in a language other than English. <sup>1</sup>

E. Geographic Focus: Select two upper-division courses in any one geographic area. <sup>2</sup>

F. Global Focus: Select five upper-division courses. At least two courses must be from Module A. <sup>2</sup>

### Module A:

INTL ST 100	Global Trials
INTL ST 101A	Global Social Movements
INTL ST 101B	Global Cities and Slums
INTL ST 102A	Global Refugees and Stateless People
INTL ST 103A	Case Studies in Global and Planetary Health
INTL ST 104A	Global Trafficking
INTL ST 104BW	Global Gender and Sexuality
INTL ST 106A	Global Political Ecology
INTL ST 106B	Global Food Environment
INTL ST 150	Racism and Global Apartheid
INTL ST 163	Global Inequalities

### Module B:

For a quarterly list of approved upper-division courses, please visit the Social Sciences Undergraduate Student Affairs Office: <https://www.undergrad.socsci.uci.edu/policies/index.php>

G. Two quarters of INTL ST 183A, one quarter of which must be taken during the junior or senior year as a capstone experience.

H. At least one quarter of international experience.<sup>3</sup>

<sup>1</sup> Competency is established by college-level course work equivalent to UCI's fifth quarter of study (usually 2B).

<sup>2</sup> Visit the Global and International Studies website ([http://catalogue.uci.edu/schoolofsocialsciences/departments/globalandinternationalstudies/internationalstudies\\_ba/%20https://www.globalstudies.uci.edu/](http://catalogue.uci.edu/schoolofsocialsciences/departments/globalandinternationalstudies/internationalstudies_ba/%20https://www.globalstudies.uci.edu/)) for a list of approved courses. Although some courses are listed in more than one focus, students may not double count a course for both their geographic and global focus areas. Study abroad counts as one course in the geographic focus.

<sup>3</sup> Majors are encouraged to study abroad through the University's Education Abroad Program (UCEAP) or the Independent Programs, which are available for periods of a quarter, year, or summer. When this is not possible, work overseas (through Independent Programs) or a domestic internship with the UCDC Internship Program, the UCI Washington D.C. Academic Internship Program, or Social Science Internship Program (SOC SCI 197) with an international focus may be substituted. Study abroad counts as one course in the regional focus.

## Honors Program in International Studies

The Honors Program allows International Studies majors to engage in research leading to the completion of an honors thesis. The topic for the honors thesis is selected by the student, in consultation with a faculty advisor, and should reflect a theme consistent with the student's module in the International Studies major.

The honors program is open to all junior and senior International Studies majors with an overall GPA of 3.0 and a 3.5 GPA in the major.

During the spring quarter of the junior year or during the summer before the senior year, students formally apply to the honors program. Students will be notified of their selection to the honors program by September 1. In the fall quarter, students enroll in International Studies INTL ST H180, Honors Research Seminar. In this course, each student formulates a written research plan (i.e., prospectus) for the honors thesis. Students also select a faculty member who agrees to supervise the research, evaluate the written work, and approve the honors thesis. In the winter quarter, students enroll in International Studies INTL ST H190, Honors Thesis, with their faculty advisor. The faculty advisor supervises and evaluates data collection and analysis and reads and edits chapter drafts. In the spring quarter, students enroll in a second quarter of INTL ST H190, Honors Thesis, with their faculty advisor. The thesis is to be completed by the student and approved by the advisor prior to the end of the quarter.

Honors students must also demonstrate a high level of language proficiency by completing two courses beyond the 2A level in language, literature, or culture taught in their chosen international language.

International Studies majors are also required to pursue some form of international experience, as explained in major requirement H.

## Sigma Iota Rho: National Honors Society

The National Honor Society in International Studies was established in 1985, and welcomed the University of California, Irvine, designated Gamma Gamma, as a new chapter on November 30, 2006. The Gamma Gamma Chapter was established primarily as a means by which to honor those students who have excelled academically and to foster integrity and creative performance in the understanding of world affairs.

For more information, call the Department of Global and International Studies office at 949-824-0151.

## International Studies, Minor

The minor in international studies provides an interdisciplinary perspective on contemporary global issues, societies, and cultures. International studies minors acquire knowledge that will enable them to understand and contribute to shaping the rapidly evolving global community. The minor in international studies helps prepare students for graduate study or professional careers in a variety of fields in the national and international job markets such as international affairs and public policy, international business and finance, international organizations, and academic research and teaching.

Requirements for the minor include a core set of courses: Introduction to Global Studies, Global Cultures and Society, Global Political Ideologies, Global Political Economy, Human Rights and Global Governance, and Global Environmental Issues. Students also choose both a geographic focus and a global focus to enable them to broaden and deepen areas of knowledge and topics of particular interest. The final requirement is one quarter of the Global and International Studies Forum.

### International Studies Minor Requirements

A. Complete:

INTL ST 1	Introduction to Global Studies
-----------	--------------------------------

B. Select one of the following:

INTL ST 11	Global Cultures and Society
INTL ST 12	Global Political Ideologies
INTL ST 15	Global Political Economy
INTL ST 16	Human Rights and Global Governance
INTL ST 17	Global Environmental Issues

C. Geographic Focus: Two upper-division courses in one geographic area <sup>1</sup>

D. Global Focus: Three upper-division courses. At least one must be from Module A.

**Module A:**

INTL ST 100	Global Trials
INTL ST 101A	Global Social Movements
INTL ST 101B	Global Cities and Slums
INTL ST 102A	Global Refugees and Stateless People
INTL ST 103A	Case Studies in Global and Planetary Health
INTL ST 104A	Global Trafficking
INTL ST 104BW	Global Gender and Sexuality
INTL ST 106A	Global Political Ecology
INTL ST 106B	Global Food Environment
INTL ST 150	Racism and Global Apartheid
INTL ST 163	Global Inequalities

**Module B <sup>1</sup>**

E. One quarter of INTL ST 183A

<sup>1</sup> Visit the Global and International Studies website (<https://www.globalstudies.uci.edu/>) for a list of approved courses. Although some courses are listed in more than one focus, students may not double count a course for both their geographic and global focus. Study abroad counts as one course in the geographic focus.

## Department of Language Science

**Lisa Pearl, Department Chair**

2314 Social & Behavioral Sciences Gateway

949-824-2307

<https://www.langsci.uci.edu/>

Language is a system of communication with an extraordinarily intricate structure. The scientific study of the mental representations and biological basis of language involves many questions, including what the nature of this system is, how humans master it so early in their cognitive development, how humans use it to communicate, and how it is implemented in human biology.

The Department offers a B.A. in Language Science, an undergraduate minor, and undergraduate courses.

- Language Science, B.A.
- Language Science, Ph.D.
- Linguistics, Minor

## Faculty

Alyssa Brewer, Ph.D. Stanford University, *Associate Professor of Cognitive Sciences; Language Science* (neuroimaging of visual perception, visual deficits, neurological disorders)

Richard Futrell, Ph.D. Massachusetts Institute of Technology, *Assistant Professor of Computer Science; Language Science* (language processing, Bayesian modeling, NLP)

Brandy Gatlin-Nash, Ph.D. Florida State University, *Assistant Professor of Education; Language Science*

Gregory S. Hickok, Ph.D. Brandeis University, *Professor of Cognitive Sciences; Language Science* (neuroanatomy of language, neural plasticity, neuroimaging, cognitive neuroscience)

J. Zoe Klemfuss, Ph.D. Cornell University, *Assistant Professor of Psychological Science; Language Science* (narrative development, children's autobiographical memory, sociocontextual influences on children's narrative, memory and well-being, children's eyewitness abilities)

Judith Kroll, Ph.D. Brandeis University, *Distinguished Professor of Language Science* (psycholinguistics, bilingualism, second language acquisition, language production, lexical processing, reading, visual cognition, gender and science)

Glenn S. Levine, Ph.D. University of Texas at Austin, *German Language Program Director and Professor of German; Education; Language Science* (applied linguistics, foreign language pedagogy, German-Jewish culture and history, Yiddish language and culture, European culinary history)

Virginia Mann, Ph.D. Massachusetts Institute of Technology, *Professor of Language Science; Education* (reading ability: phenome awareness, developmental dyslexia, phonological skills, early intervention, precocious readers; speech perception: context effects, cross-linguistic comparisons)

Lisa Pearl, Ph.D. University of Maryland, College Park, *Professor of Language Science; Cognitive Sciences; Logic and Philosophy of Science* (language development, linguistics, computational sociolinguistics, cognitive modeling)

Elizabeth Pena, Ph.D. Temple University, *Professor of Education; Language Science*

Gregory Scontras, Ph.D. Harvard University, *Assistant Professor of Language Science* (semantics, pragmatics, computational modeling, heritage bilingualism)

Sameer Singh, Ph.D. University of Massachusetts Amherst, *Assistant Professor of Computer Science; Electrical Engineering and Computer Science; Language Science* (artificial intelligence and machine learning, databases and data mining, scientific and numerical computing)

Julio R. Torres, Ph.D. Georgetown University, *Assistant Professor of Spanish and Portuguese; Language Science* (heritage and second language acquisition; multilingualism)

Bernard H. Tranel, Ph.D. University of California, San Diego, *Professor of Language Science*

Kai Wehmeier, Ph.D. University of Münster, *Director, Center for the Advancement of Logic, its Philosophy, History, and Applications and Professor of Logic and Philosophy of Science; Language Science; Philosophy*

## Language Science Courses

### **LSCI 1. Languages of the World. 4 Units.**

The world has over 6,000 languages, with an exuberant variety of sounds, words, grammars. Introduction to a representative (about eight), drawn from every continent. Students not expected to learn these languages, but to explore and study their structure and complexity.

(VIII)

### **LSCI 2. Discovering Language. 4 Units.**

Explores language's pervasiveness and diversity; demonstrates ways linguistics illuminates language's crucial--albeit hidden--societal role. Issues: self- and group-identification, language death, language in legal and educational settings. Illustrations: spoken and signed languages, varieties of English, Native American languages.

(VII)

### **LSCI 3. Introduction to Linguistics. 4 Units.**

Emphasis on the notion that language is a remarkable achievement of the human mind. Current insights into the nature of language. Survey of various subfields of linguistics. Introduction to linguistic analysis.

(III and V.B ).

### **LSCI 10. Introduction to Phonology. 4 Units.**

Basic concepts in phonetic description and phonological analysis.

(III and V.B ).

### **LSCI 20. Introduction to Syntax. 4 Units.**

Basic concepts in syntactic description and grammatical analysis.

Prerequisite: LSCI 3

(III and V.B ).

### **LSCI 43. Introduction to Symbolic Logic. 4 Units.**

An introduction to the symbolism and methods of the logic of statements, including evaluation of arguments by truth tables, the techniques of natural deduction, and semantic tableaux.

Same as LPS 30, PHIL 30.

(Vb)

**LSCI 51. Acquisition of Language. 4 Units.**

What children say, what they mean, and what they understand. Theories about the learning of language by one-, two-, and three-year-olds. Comparison of kinds of data on which these theories are based.

Same as PSYC 56L.

(III)

**LSCI 51B. Foundations of Bilingual Education and Bilingualism. 4 Units.**

Provides a comprehensive overview of current issues in bilingual education and bilingualism. Topics include dimensions of bilingualism, the effects of bilingualism on children's linguistic and cognitive development, bilingual education programs, literacy, special needs, and assessment.

Same as EDUC 52, HUM 52.

**LSCI 68. Introduction to Language and Culture. 4 Units.**

Explores what the study of language can reveal about ourselves as bearers of culture. After introducing some basic concepts, examines how cultural knowledge is linguistically organized and how language might shape our perception of the world.

Same as ANTH 2D.

(III)

**LSCI 99. Special Topics in Language Science. 4 Units.**

Special Topics at lower-division level.

Repeatability: Unlimited as topics vary.

**LSCI 102. Formal Languages and Automata. 4 Units.**

Formal aspects of describing and recognizing languages by grammars and automata. Parsing regular and context-free languages. Ambiguity, nondeterminism. Elements of computability; Turing machines, random access machines, undecidable problems, NP-completeness.

Prerequisite: (ICS 46 or CSE 46) and MATH 2B and ICS 6B and ICS 6D. ICS 46 with a grade of C or better. CSE 46 with a grade of C or better

Same as CS 162.

Restriction: School of Info & Computer Sci students have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment. Language Science Majors have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**LSCI 106M. Computational Models of Language Learning. 4 Units.**

Focuses on using computational models to investigate questions related to language learning. Topics include computational models of language acquisition, principles underlying models of language learning and language change, computational learning theory, and modeling information extraction from language by humans.

Prerequisite: LSCI 151. LSCI 151 with a grade of A- or better

Concurrent with LSCI 206C.

**LSCI 107M. Computational Methods for Language Research. 4 Units.**

Focuses on computational methods useful for language research. Students become familiar with software and programming languages used for extracting information from electronic datasets and for creating basic simulations of linguistic cognition. No prior programming experience assumed.

Prerequisite: PSYC 150 or LSCI 155 or PSYC 156A or LSCI 151

Same as PSYC 157M.

**LSCI 109. Special Topics in Computational Linguistics. 4 Units.**

Topics in computational linguistics.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**LSCI 111. Intermediate Phonology. 4 Units.**

Fundamentals of phonological theory. Intensive practice in phonological analysis.

Prerequisite: Recommended: LSCI 10

Concurrent with LING 211.

**LSCI 115. Introduction to Phonetics. 4 Units.**

Introduces students to fundamental concepts of phonetics. The sound systems of selected languages around the world, including that of English, are described in detail. Students are trained to work with speech sound recognition, phonetic transcription, and language sound production.

Prerequisite: LSCI 3

**LSCI 119. Special Topics in Phonetics/Phonology. 4 Units.**

Topics in Phonetics/Phonology.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**LSCI 121. Intermediate Syntax. 4 Units.**

Examines various phenomena within a generative theory of syntax, focusing on the nature of syntactic rules, representations, and constraints. Introduces methods of experimental syntax, providing students hands-on opportunity to recognize the connection(s) between theory and experiential results.

Prerequisite: LSCI 20

**LSCI 124. Current Topics in Syntactic Theory. 4 Units.**

Research seminar in syntax. Intensive study of a small number of well-defined topics which have had significant impact on the development of syntactic theory.

Repeatability: May be repeated for credit unlimited times.

**LSCI 129. Special Topics in Syntax. 4 Units.**

Topics in Syntax.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**LSCI 139. Special Topics in Morphology. 4 Units.**

Topics in Morphology.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**LSCI 141. Topics in Philosophy of Language. 4 Units.**

Selected topics in the philosophy of language, e.g., the nature of meaning, mechanisms of reference, speech acts.

Repeatability: Unlimited as topics vary.

Same as LPS 145, PHIL 145.

**LSCI 142. Introduction to Logic. 4 Units.**

Introduction to sentence logic, including truth tables and natural deduction; and to predicate logic, including semantics and natural deduction.

Same as LPS 104, PHIL 104.

**LSCI 143. Introduction to Formal Semantics. 4 Units.**

Introduces students to the analytical tools used in the investigation of natural language semantics. Topics include the truth-conditional approach to meaning, compositionality, scope and anaphora, generalized quantifier theory, and intensionality.

Prerequisite: LPS 30 or PHIL 30 or LPS 104 or PHIL 104. LPS 30 with a grade of A- or better. PHIL 30 with a grade of A- or better. LPS 104 with a grade of A- or better. PHIL 104 with a grade of A- or better

**LSCI 145A. Elementary Set Theory. 4 Units.**

An introduction to the basic working vocabulary of mathematical reasoning. Topics include sets, Boolean operations, ordered n-tuples, relations, functions, ordinal and cardinal numbers.

Same as LPS 105A, PHIL 105A.

**LSCI 145B. Metalogic. 4 Units.**

Introduction to formal syntax (proof theory) and semantics (model theory) for first-order logic, including the deduction, completeness, compactness, and Löwenheim-Skolem theorems.

Prerequisite: PHIL 105A

Same as LPS 105B, PHIL 105B.

Overlaps with MATH 150.

**LSCI 145C. Undecidability and Incompleteness. 4 Units.**

Introduction to the formal theory of effective processes, including recursive functions, Turing machines, Church's thesis, and proofs of Gödel's incompleteness theorem for arithmetic, and Church's undecidability theorem for first-order logic.

Prerequisite: PHIL 105B

Same as LPS 105C, PHIL 105C.

Overlaps with MATH 152.

Concurrent with LPS 205C.

**LSCI 149. Special Topics in Semantics. 4 Units.**

Topics in Semantics.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**LSCI 151. Acquisition of Language II. 4 Units.**

Focuses on native language learning, exploring the way in which infants and very young children unconsciously uncover the rich systematic knowledge of their native language. Examines both experimental and computational studies that quantitatively investigate the 'how' of language acquisition.

**LSCI 151B. Bilingual Acquisition. 4 Units.**

Focuses on different forms of bilingualism, including bilingual first language acquisition, early second language acquisition, and late second language acquisition. Research techniques discussed include theoretical, experimental, and computational methods.

Prerequisite: LSCI 151 or PSYC 156A. Placement via consent of the instructor is also accepted.

**LSCI 151S. Second Language Acquisition . 4 Units.**

Examines a number of theoretical perspectives that attempt to explain second language learning with a focus on adult learners. How universal constraints, individual differences, and social factors influence the task of learning a second language as an adult.

Prerequisite: LSCI 3 or SPAN 113B

**LSCI 152. Acquisition of Language III . 4 Units.**

Focuses on native language learning, exploring the way in which infants and very young children unconsciously uncover the rich systematic knowledge of their native language. Examines both experimental and computational studies that quantitatively investigate the 'how' of language acquisition.

**LSCI 155. Psychology of Language. 4 Units.**

Examines language using the tools of experimental psychology. From sounds to words to spoken and written sentences, explores how language is used in real time, and how its use reveals how it is represented in the mind.

Prerequisite: PSYC 7A or PSCI 9 or PSYC 9B or PSCI 11B or LSCI 3

Same as PSYC 150.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Language Science Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**LSCI 158. Language and the Brain . 4 Units.**

Research analysis on biological bases of human linguistic capacity. Development, focusing on hemispheric specialization, plasticity; localization of specific linguistic functions in adults, with emphasis on study of aphasias; relation of linguistic capacity to general cognitive capacity, considering research on retardation.

Prerequisite: (PSYC 7A or PSB 9 or PSYC 9A or PSB 11A) and (PSYC 9B or PSB 11B or BIOL 35 or BIOL N110 or BIOL N115A)

Same as BIOL N160, PSYC 161.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Biological Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**LSCI 159. Special Topics in Psycholinguistics. 4 Units.**

Topics in Psycholinguistics.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**LSCI 164A. Topics in Romance Languages. 4 Units.**

Topics in Romance Languages.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**LSCI 164B. French Phonetics. 4 Units.**

Study of the sound structure of French. Introduction to elements of general phonetics, contrastive (French/English) phonetics, and French phonetics and phonology. Designed to help students improve their pronunciation. Also serves as a preparatory course for language teaching.

Prerequisite: FREN 1C

**LSCI 165B. Structure of Japanese. 4 Units.**

An overview of the linguistic features of modern Japanese. Provides students with a systematic introduction to the nature and characteristics of the language.

Same as EAS 123.

**LSCI 165L. Language Change, Acquisition, and Complexity. 4 Units.**

Focuses on models of language change, acquisition, and complexity, looking at the connections between them to explain empirical data relating to the form of existing languages and how languages change over time. Emphasis is placed on computational and mathematical models.

Prerequisite: PSYC 156A. PSYC 156A with a grade of A- or better

**LSCI 168J. Improvisation, Language, and Culture. 4 Units.**

Addresses improvisation, both in performance and in everyday life. Examines improvisation as the 'flexible regulation' of everyday behavior by exploring different scholarly treatments of language and interaction, and working on developing actual theatrical improvisation skills.

Same as ANTH 151A.

Restriction: Upper-division students only.

**LSCI 168S. Language and Social Cognition. 4 Units.**

Explores the relationship between language and cognition in social and cultural contexts. The overall goal is to think through how language structure and use impact how individuals perceive, think about, and understand the world around them.

Same as ANTH 150A.

Restriction: Anthropology Majors have first consideration for enrollment.

**LSCI 169. Special Topics in Language Studies. 4 Units.**

Topics in Language Studies.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**LSCI 172. History of English. 4 Units.**

Traces the history of English from its roots through its earliest written records and into the present, including fundamental changes in morphology, phonology, syntax, semantics, and vocabulary, as well as social, cultural, and historical forces affecting language.

Prerequisite: LSCI 3

**LSCI 175. Language Origins: Evolution, Genetics, and the Brain. 4 Units.**

Examines how human language(s) may have originated. Studies pertinent techniques (reconstruction) and addresses related questions, including is our language faculty inborn (i.e., genetically encoded)? Can brain imaging and population genetics research help to unlock this mystery of human evolution?.

Same as ANTH 152A, GLBC 105, HIST 135G.

**LSCI 176. Introduction to Pidgins and Creoles. 4 Units.**

Explores the linguistic structures of pidgin and creole languages and examines major theories for the surprisingly high degree of similarity found across pidgin and creole languages. Includes sociolinguistic and field methods.

Prerequisite: LSCI 3 or SPAN 113A

**LSCI 179. Special Topics in Historical Linguistics. 4 Units.**

Topics in Historical Linguistics.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**LSCI 182V. Language and Literacy. 4 Units.**

Addresses the linguistic principles and processes that underlie oral and written language proficiency. Emphasis is on how to use phonology, morphology, orthography, semantics, syntax, and pragmatics to support literacy and oral language development for K-12 students.

Same as EDUC 151, PSCI 192V.

Restriction: Language Science Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Education Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**LSCI 189. Special Topics in Applied Language Science: Writing Skills for Language Science. 4 Units.**

Topics in Applied Language Science.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**LSCI 195A. Language Science Research I. 4 Units.**

Provides students with in-depth experience in different facets of research in language science. It includes theoretical, behavioral, computational, and/or applied language science topics and methodologies.

Prerequisite: Permission of faculty advisor. If this is not the same faculty member as the course instructor, the faculty advisor will coordinate with the course instructor when it comes to assessing the student's research process at the end of each quarter.

Repeatability: May be repeated for credit unlimited times.

**LSCI 195B. Language Science Research II. 4 Units.**

Provides students with in-depth experience in different facets of research in language science. It includes theoretical, behavioral, computational, and/or applied language science topics and methodologies.

Prerequisite: Permission of faculty advisor. If this is not the same faculty member as the course instructor, the faculty advisor will coordinate with the course instructor when it comes to assessing the student's research process at the end of each quarter.

Repeatability: May be repeated for credit unlimited times.

**LSCI 195C. Language Science Research III. 4 Units.**

Provides students with in-depth experience in different facets of research in language science. It includes theoretical, behavioral, computational, and/or applied language science topics and methodologies.

Prerequisite: Permission of faculty advisor. If this is not the same faculty member as the course instructor, the faculty advisor will coordinate with the course instructor when it comes to assessing the student's research process at the end of each quarter.

Repeatability: May be repeated for credit unlimited times.

**LSCI 195W. Writing Skills for Language Science. 4 Units.**

Focuses on written technical communication skills in language science. Topics include the scientific publication process (focusing on research abstracts), how to write for pieces of different lengths, and writing for different audiences.

(Ib)

**LSCI 198. Directed Group Study. 4 Units.**

Directed study with Linguistics faculty.

Repeatability: Unlimited as topics vary.

**LSCI 199. Independent Study. 4 Units.**

Independent research with Linguistics faculty. Students may enroll for only one 199 each quarter.

Repeatability: May be repeated for credit unlimited times.

**LSCI 201A. Language Science Research. 1.3 Unit.**

Involves colloquia and scientific reports by faculty, students, and visitors. Students are exposed to current language science research and gain experience in active listening and scientific discourse.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Language Science Majors only.

**LSCI 201B. Language Science Research . 1.3 Unit.**

Involves colloquia and scientific reports by faculty, students, and visitors. Students are exposed to current language science research and gain experience in active listening and scientific discourse.

Grading Option: In Progress (Letter Grade with S/U).

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Language Science Majors only.

**LSCI 201C. Language Science Research. 1.3 Unit.**

Involves colloquia and scientific reports by faculty, students, and visitors. Students are exposed to current language science research and gain experience in active listening and scientific discourse.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Language Science Majors only.

**LSCI 202A. Skills for Language Science I. 4 Units.**

Focuses on computational skills for language science research. Topics include computational literacy, programming languages, and database interfaces that are useful for language science research, allowing for general scripting and file manipulation, and enabling statistical analysis and data visualization.

Restriction: Graduate students only.

**LSCI 202B. Skills for Language Science II. 4 Units.**

Introduction to the scientific publication process and practice of scientific writing skills.

Prerequisite: LSCI 202A

Restriction: Graduate students only.

**LSCI 202C. Skills for Language Science III. 4 Units.**

Introduction to scientific presentation for audiences of different backgrounds and practice of scientific presentations skills.

Prerequisite: LSCI 202B

Repeatability: May be taken for credit for 4 units as topics vary.

Restriction: Graduate students only.

**LSCI 202D. Advanced Skills for Language Science . 4 Units.**

Practice of advanced professional writing skills, including writing of grants, journal publications, research profiles, academic CVs, teaching statements, and cover letters. Students bring their own academic material to workshop.

Prerequisite: LSCI 202A and LSCI 202B and LSCI 202C. LSCI 202A with a grade of B or better. LSCI 202B with a grade of B or better. LSCI 202C with a grade of B or better

Restriction: Graduate students only.

**LSCI 206C. Computational Models of Language Learning. 4 Units.**

Focuses on computational models of native language learning, exploring how probabilistic learning and inference fare on difficult case studies within language acquisition. In all cases, grounds the learning models in available empirical data and considers their psychological plausibility.

Prerequisite: LSCI 251. LSCI 251 with a grade of B- or better

Same as PSYC 245M.

Restriction: Graduate students only.

Concurrent with LSCI 106M.

**LSCI 209. Special Topics in Computational Linguistics. 1-4 Units.**

Focuses on ongoing research in linguistics. Variable units based on course content, as determined by Department. May be repeated for credit as topic varies.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

Concurrent with LSCI 109.

**LSCI 239. Special Topics in Morphology. 4 Units.**

Topics in morphology.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**LSCI 248M. Modal Logic. 4 Units.**

Introduction to modal logic methods and their application.

Restriction: Graduate students only.

**LSCI 250. Psycholinguistics. 4 Units.**

Examines how language is used in real time, and how its use reveals how it is represented in the mind and the brain.

Restriction: Graduate students only.

**LSCI 250B. Bilingualism. 4 Units.**

Examines how bilingualism interfaces with language representation, language use, and language development.

Restriction: Graduate students only.

**LSCI 250H. Heritage Language Acquisition. 4 Units.**

Examines how heritage languages are represented in speakers' minds, processed in real time, and acquired.

Restriction: Graduate students only.

**LSCI 251. Language Acquisition. 4 Units.**

Focuses on native language learning, exploring the way in which infants and very young children unconsciously uncover the rich systematic knowledge of their native language. Examines both experimental and computational studies that quantitatively investigate the 'how' of language acquisition.

Restriction: Graduate students only.

**LSCI 251A. Atypical Acquisition. 4 Units.**

Focuses on different types of atypical acquisition, including acquisition in special populations and acquisition under atypical circumstances. Research techniques discussed include theoretical, experimental, and computational methods.

Restriction: Graduate students only.

Concurrent with LSCI 151A.

**LSCI 253M. Experimental Methods for Language Research. 4 Units.**

Focuses on experimental methods useful for language research. Students become familiar with software and programming languages used for implementing and analyzing behavioral experiments.

Restriction: Graduate students only.

**LSCI 259. Special Topics in Psycholinguistics. 4 Units.**

Topics in Psycholinguistics. May be repeated for credit as topic varies.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**LSCI 265L. Language Change, Acquisition, and Complexity. 4 Units.**

Focuses on models of language change, acquisition, and complexity, looking at the connections between them to explain empirical data relating to the form of existing languages and how languages change over time. Emphasis is placed on computational and mathematical models.

Restriction: Graduate students only.

Concurrent with LSCI 165L.

**LSCI 281L. Language Learning with Digital Media. 4 Units.**

Provides students with a graduate-level introduction to key issues of digital media in second-language teaching and learning.

Restriction: Graduate students only.

**LSCI 281S. Second Language Acquisition and Teaching. 4 Units.**

Explores the prevailing paradigms that seek to account for how adults learn second languages (L2s) in instructed settings.

Restriction: Graduate students only.

**LSCI 290. Dissertation Research. 4-12 Units.**

Dissertation Research.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**LSCI 299. Independent Study. 1-12 Units.**

Independent study. Research with language science faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

## Linguistics Courses

### LINGUIS 150. Acquisition of Language II. 4 Units.

Focuses on native language learning, exploring the way in which infants and very young children unconsciously uncover the rich systematic knowledge of their native language. Examines both experimental and computational studies that quantitatively investigate the 'how' of language acquisition.

Prerequisite: PSYCH 56L or LINGUIS 51

Same as PSYCH 156A.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

## Language Science, B.A.

The B.A. in Language Science provides students with an interdisciplinary foundation in the scientific study of language, including its mental representations, its development and use, and its biological basis.

Students completing the B.A. in Language Science combine interests in theoretical linguistics, language development and use, the advanced study of natural or formal languages, and some combination of neuroscience, psychology, logic, computer science, anthropology, education, and hearing and speech sciences. In the process of relating these interests to the scientific study of language and its applications, students develop an understanding of the analytical tools of formal language study.

Graduates have an interdisciplinary language science background that makes them attractive for a variety of careers, including teaching, language technology industry positions, teaching English as a second language abroad, interpreting and translation, technical writing, language consulting for legal firms and medical practices, and advertising, among many others.

This foundation in formal and applied language science also prepares graduates for graduate and professional programs in any of the areas related to languages science, including speech-language pathology, linguistics, cognitive science, cognitive neuroscience, developmental psychology, natural language processing, and education.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Core

A. Complete the following:

LSCI 3	Introduction to Linguistics
LSCI 10	Introduction to Phonology
LSCI 20	Introduction to Syntax
LSCI 43	Introduction to Symbolic Logic
LSCI 51	Acquisition of Language

B. Select two courses from the following:

LSCI 164A	Topics in Romance Languages
LSCI 164B	French Phonetics
LSCI 165B	Structure of Japanese
LSCI 172	History of English
SPANISH 113A	Spanish Phonetics
SPANISH 113B	Introduction to Spanish Linguistics
GERMAN 104	Topics in German Linguistics
LSCI 102	Formal Languages and Automata
LSCI 142	Introduction to Logic
LSCI 145A	Elementary Set Theory

Any '3-level' non-English language course or any advanced level non-English language course. <sup>1, 2</sup>

### Additional Core

C. Select five courses from any linguistics course that is not listed in section A, B, or D, including the courses below. At least three courses must be upper-division:

LSCI 1	Languages of the World
LSCI 2	Discovering Language
LSCI 68	Introduction to Language and Culture
LSCI 111	Intermediate Phonology
LSCI 115	Introduction to Phonetics

LSCI 121	Intermediate Syntax
LSCI 143	Introduction to Formal Semantics
LSCI 145B	Metalogic
LSCI 145C	Undecidability and Incompleteness
LSCI 151	Acquisition of Language II
LSCI 158	Language and the Brain
LSCI 168J	Improvisation, Language, and Culture
LSCI 168S	Language and Social Cognition

A 199 course affiliated with the Language Science Program, or a research course, with a minimum 4 unit enrollment requirement. <sup>3</sup>

### Specializations

D. Select four courses from the following. Courses must come from at least two of the categories listed below:

#### I. Theoretical

LSCI 119	Special Topics in Phonetics/Phonology
LSCI 124	Current Topics in Syntactic Theory
LSCI 129	Special Topics in Syntax
LSCI 141	Topics in Philosophy of Language
LSCI 149	Special Topics in Semantics
LSCI 176	Introduction to Pidgins and Creoles
SPANISH 187	Selected Topics in Spanish Linguistics

#### II. Behavioral and Neuroscientific

LSCI 151B	Bilingual Acquisition
LSCI 151S	Second Language Acquisition
LSCI 159	Special Topics in Psycholinguistics
LSCI 165L	Language Change, Acquisition, and Complexity
LSCI 175	Language Origins: Evolution, Genetics, and the Brain

#### III. Computational

LSCI 107M	Computational Methods for Language Research
LSCI 109	Special Topics in Computational Linguistics
COMPSCI 142A	Compilers and Interpreters
COMPSCI 142B	Language Processor Construction
COMPSCI 171	Introduction to Artificial Intelligence
COMPSCI 177	Applications of Probability in Computer Science

#### IV. Applied

PSYCH 131B	Hearing
PSYCH 161H	Hearing and the Brain
PSYCH 141J-PSYCH 141K-PSYCH 141L-PSYCH 141M-PSYCH 141N- PSYCH 141O-PSYCH 141P-PSYCH 141Q-PSYCH 141R	and and and and and and and
MUSIC 158A- 158B- 158C	Diction and Diction and Diction
EDUC 134	Teaching English Internationally
EDUC 151	Language and Literacy
BME 148	Microimplants
DRAMA 35	Speech for the Theatre
CHINESE 100A- 100B- 100C	Classical Chinese and Classical Chinese and Classical Chinese

JAPANESE 100A- 100B

Classical Japanese  
and Classical Japanese

EAS 125

- <sup>1</sup> Advanced non-English language courses are those requiring the highest level course in the relevant sequence as a prerequisite.
- <sup>2</sup> May be used more than once. For example, a student could use 3A and 3B to satisfy both courses in section II. In addition, if a student places out of the 3-level in a language, the the Natural/Formal language requirement is satisfied by the courses placed out of.
- <sup>3</sup> May be a research course, whose numbering varies by department. Individual study may count for up to two of the additional core courses if taken for multiple quarters or with multiple faculty members affiliated with Language Science.

## Language Science, Ph.D.

The Ph.D. program in Language Science provides interdisciplinary training across a broad range of topics relating to the scientific study of language that spans fields such as linguistics, cognitive science, psychology, computer science, philosophy, logic, neuroscience, speech, hearing, education, and engineering.

This integrative approach to the science of language explores interfaces between traditional frameworks, fostering a more complete understanding of the human communication system. Emphasis is placed on modern techniques of theory construction and empirical investigation, and students are prepared for research and teaching careers in academia, industry, and government. Special attention is given to providing hands-on research experience and equipping students with sophisticated quantitative methods and technical communication skills.

While undergraduate training in linguistics is desirable, applications are also welcomed from students with backgrounds in other areas, including cognitive science, psychology, computer science, neuroscience, logic, philosophy, mathematics, engineering, hearing, speech, language studies, education, and anthropology. Decisions on admissions are based on Graduate Record Examination (GRE) scores for tests taken within the past five years, official transcripts of all college coursework, a statement of purpose, at least three letters of recommendation, and at least one sample of technical writing. Applicants whose primary language is not English are required to demonstrate proficiency in English for admission consideration. Information about this requirement is available here (<https://grad.uci.edu/admissions/applying-to-uci/english-proficiency.php>).

### Requirements for the Ph.D.

#### Course Requirements

A. Complete:

LSCI 202A- 202B- 202C- 202D

Skills for Language Science I  
and Skills for Language Science II  
and Skills for Language Science III  
and Advanced Skills for Language Science

B. Complete five content-focused courses. Eligible courses include, but are not limited to, the following:

LSCI 206C	Computational Models of Language Learning
LSCI 209	Special Topics in Computational Linguistics
LSCI 239	Special Topics in Morphology
LSCI 250	Psycholinguistics
LSCI 250B	Bilingualism
LSCI 250H	Heritage Language Acquisition
LSCI 251	Language Acquisition
LSCI 251A	Atypical Acquisition
LSCI 259	Special Topics in Psycholinguistics
LSCI 265L	Language Change, Acquisition, and Complexity
LSCI 281L	Language Learning with Digital Media
LSCI 281S	Second Language Acquisition and Teaching

C. Complete three methods-focused courses. Other courses currently considered Language Science methods-focused courses that are taught in other departments are available at the Language Science graduate website.

LSCI 248M	Modal Logic
LSCI 253M	Experimental Methods for Language Research

D. Complete:

LSCI 201A- 201B- 201C

Language Science Research  
and Language Science Research  
and Language Science ResearchE. Complete the foreign language requirement.<sup>1</sup>

Students must complete 12 courses distributed as follows: five content-focused courses (including theoretical, psycholinguistic, computational, or neurolinguistic areas), three methods courses (including computational, corpus, experimental, neuroscience, or logical methods), and the four course Language Science technical and professional skills sequence. (LSCI 202A-D).

Students must also attend Language Science seminars (LSCI 201A-B-C) and fulfill the Ph.D. program's foreign language requirement.

All requirements for the Ph.D. must be fulfilled within three years after advancement to candidacy. The normative time for advancement to candidacy is three and a half years. The normative time for completion is five years, and the maximum time permitted is six years.

### Research Proposal

Students are required to complete a research proposal by the fall of their second year (fourth quarter).

### Concentration Examination

Students are required to complete a targeted literature review in the area of their concentration by the winter of their second year (sixth quarter), orally presented to a committee of three faculty members.

### Qualifying Research Talk and Paper

Students are required to submit and orally present a research paper of publishable quality by the spring of their third year (ninth quarter).

### Advancement (CADA)

In lieu of a formal admission to candidacy examination, students are required to complete a conceptual analysis of the dissertation area (CADA) by the winter of their fourth year (10<sup>th</sup> quarter), defended orally to a committee of five faculty members. The CADA provides the opportunity for the student to develop a perspective on a body of literature relevant to the dissertation research. This perspective may include discussion of research conducted by the student and potential future research, as it relates to the larger body of literature.

A written document describing the student's CADA must be submitted to the committee prior to advancement. Students are required to advance to candidacy by the end of the winter quarter of their fourth year in the program.

### Dissertation

Students must submit a dissertation describing original publishable research and present a public defense of the dissertation to a committee of three faculty members as the final requirement of the Ph.D. program.

## Linguistics, Minor

Linguistics is the scientific study of this human language ability. It is concerned with describing languages and with understanding our knowledge of language as speakers and how we come to have that knowledge. It is connected to many other fields of study, including psychology, anthropology, sociology, biology, physics, mathematics, computer science, philosophy, and literature.

### Linguistics Minor Requirements

Requirements for the minor in Linguistics are met by taking seven linguistics courses (28 units) as specified below:

A. Complete the following:

LSCI 3	Introduction to Linguistics
LSCI 10	Introduction to Phonology
LSCI 20	Introduction to Syntax

B. Four additional linguistics courses, three of which must be upper-division.

**Residence Requirement:** At least three upper-division courses required for the minor must be completed successfully at UCI.

## Department of Logic and Philosophy of Science

**Simon Huttegger, Department Chair**

785 Social Science Tower

949-824-1520

<http://www.lps.uci.edu/>

The Department of Logic and Philosophy of Science (LPS) brings together faculty and students interested in a wide range of topics loosely grouped in the following areas: general philosophy of science; philosophy of the particular sciences; logic, foundations and philosophy of mathematics; and philosophy of mathematics in application. LPS enjoys strong cooperative relations with UCI's Department of Philosophy; in particular, the two units jointly administer a single graduate program which offers the Ph.D. in Philosophy. LPS also has strong interconnections with several science departments, including Mathematics and Physics, as well as the School of Biological Sciences, the Donald Bren School of Information and Computer Sciences, the Departments of Cognitive Sciences and Economics, and the graduate concentration in Mathematical Behavioral Sciences. The Program in Law and Graduate Studies is a concurrent degree study leading to a J.D. from the School of Law in conjunction with a Ph.D. in the Department of Logic and Philosophy of Science.

## Salzburg Exchange Program

LPS and the Department of Philosophy jointly administer an Exchange Program with the University of Salzburg. The program has two parts. The Scholarly Exchange provides opportunities for faculty and graduate students in LPS and Philosophy to visit Salzburg and for faculty and graduate students from Salzburg to visit one or the other of the UCI units. The Program also sponsors joint conferences, held alternately in Irvine and in Salzburg; these are co-sponsored by Salzburg and the UCI Interdisciplinary Program in the History and Philosophy of Science.

To be eligible for the Salzburg Exchange, a graduate student must have advanced to candidacy. The selected student spends one semester in Salzburg, usually teaching one course in the general area of the thesis topic. An upper-division course may be taught in English, but lower-division courses must be taught in German. (Some previous visitors have learned serviceable German by attending a Goethe institute during the preceding summer.) Typically, a Salzburg visitor will receive a Salzburg Fellowship intended to cover travel expenses, and a stipend; those who teach while in Salzburg will also receive a salary intended to cover living expenses (including health and dental insurance).

Applications from LPS graduate students (including a curriculum vita and syllabi for courses that might be taught) should be sent to the LPS Salzburg Exchange Director by November 1.

## Program in Law and Graduate Studies (J.D./Ph.D.)

Highly qualified students interested in combining the study of law with graduate research and/or professional qualifications in Logic and Philosophy of Science are invited to undertake concurrent degree study under the auspices of UC Irvine's Program in Law and Graduate Studies (PLGS). Students in this program pursue a coordinated curriculum leading to a J.D. degree from the School of Law in conjunction with a Ph.D. degree in the Department of Logic and Philosophy of Science. Contact the PLGS Program Director's office for additional information at 949-824-4158, or by email to [plgs@law.uci.edu](mailto:plgs@law.uci.edu). A full description of the program, with links to all relevant application information, can be found at the School of Law Concurrent Degree Programs website (<http://www.law.uci.edu/academics/interdisciplinary-studies/concurrent-degrees.html>) and in the School of Law School section of the *Catalogue*.

- Philosophy, Ph.D. (School of Humanities)
- Philosophy, Political Science, and Economics, M.A. (4+1)

## Faculty

Jeffrey A. Barrett, Ph.D. Columbia University, *Professor of Logic and Philosophy of Science; Philosophy*

Jean-Paul Carvalho, Ph.D. Oxford University, *Associate Professor of Economics; Logic and Philosophy of Science; Religious Studies*

Matthew Foreman, Ph.D. University of California, Berkeley, *Distinguished Professor of Mathematics; Logic and Philosophy of Science* (ergodic theory and dynamical systems, logic and foundations)

Steven A. Frank, Ph.D. University of Michigan, *Distinguished Professor and Donald Bren Professor of Ecology and Evolutionary Biology; Logic and Philosophy of Science*

Isaac Goldbring, Ph.D. University of Illinois at Urbana-Champaign, *Associate Professor of Mathematics; Logic and Philosophy of Science* (logic and foundations)

Jeremy Heis, Ph.D. University of Pittsburgh, *Associate Professor of Logic and Philosophy of Science; Philosophy*

Simon Huttegger, Ph.D. University of Salzburg, *Department Chair and Professor of Logic and Philosophy of Science*

Arthur D. Lander, Ph.D. University of California, San Francisco, *Donald Bren Professor and Professor of Developmental and Cell Biology; Biomedical Engineering; Logic and Philosophy of Science* (systems biology of development, pattern formation, growth control)

David B. Malament, Ph.D. The Rockefeller University, *Professor Emeritus of Logic and Philosophy of Science*

John Manchak, Ph.D. University of California, Irvine, *Professor of Logic and Philosophy of Science; Religious Studies*

Michael T. McBride, Ph.D. Yale University, *Professor of Economics; Logic and Philosophy of Science; Religious Studies*

James L. McGaugh, Ph.D. University of California, Berkeley, *Research Professor and Professor Emeritus of Neurobiology and Behavior; Logic and Philosophy of Science*

Toby Meadows, Ph.D. University of Melbourne, *Assistant Professor of Logic and Philosophy of Science*

Richard Mendelsohn, Ph.D. Massachusetts Institute of Technology, *Adjunct Professor of Logic and Philosophy of Science*

Louis E. Narens, Ph.D. University of California, Los Angeles, *Professor of Cognitive Sciences; Logic and Philosophy of Science* (measurement, logic, metacognition)

Riley D. Newman, Ph.D. University of California, Berkeley, *Professor Emeritus of Physics and Astronomy; Logic and Philosophy of Science; Physics and Astronomy*

Cailin O'Connor, Ph.D. University of California, Irvine, *Associate Professor of Logic and Philosophy of Science*

Lisa Pearl, Ph.D. University of Maryland, College Park, *Professor of Language Science; Cognitive Sciences; Logic and Philosophy of Science* (language development, linguistics, computational sociolinguistics, cognitive modeling)

Lauren Ross, Ph.D. University of Pittsburgh, *Assistant Professor of Logic and Philosophy of Science*

Donald G. Saari, Ph.D. Purdue University, *UCI Distinguished Professor Emeritus of Economics; Logic and Philosophy of Science; Mathematics*

Barbara W. Sarnecka, Ph.D. University of Michigan, *Professor of Cognitive Sciences; Logic and Philosophy of Science* (cognitive development, language development, number concepts, conceptual change, individual cognitive development, historical development of science and mathematics)

Jonas Schultz, Ph.D. Columbia University, *Professor Emeritus of Physics and Astronomy; Logic and Philosophy of Science*

Brian Skyrms, Ph.D. University of Pittsburgh, *UCI Distinguished Professor of Logic and Philosophy of Science; Economics; Philosophy*

P. Kyle Stanford, Ph.D. University of California, San Diego, *Professor of Logic and Philosophy of Science; Philosophy*

James O. Weatherall, Ph.D. Stevens Institute of Technology, *Professor of Logic and Philosophy of Science*

Kai Wehmeier, Ph.D. University of Münster, *Director, Center for the Advancement of Logic, its Philosophy, History, and Applications and Professor of Logic and Philosophy of Science; Language Science; Philosophy*

Daniel Whiteson, Ph.D. University of California, Berkeley, *Professor of Physics and Astronomy; Logic and Philosophy of Science*

Martin Zeman, Ph.D. Humboldt University of Berlin, *Professor of Mathematics; Logic and Philosophy of Science* (logic and foundations)

## Courses

### **LPS 29. Critical Reasoning. 4 Units.**

Introduction to analysis and reasoning. The concepts of argument, premise, and conclusion, validity and invalidity, consistency and inconsistency. Identifying and assessing premises and inferences. Deductive versus inductive reasoning, and introduction to the probability calculus. Evaluating definitions. Informal fallacies.

Same as PHIL 29.

**(II and Vb ).**

### **LPS 30. Introduction to Symbolic Logic. 4 Units.**

An introduction to the symbolism and methods of the logic of statements, including evaluation of arguments by truth tables, the techniques of natural deduction, and semantic tableaux.

Same as LSCI 43, PHIL 30.

**(Vb)**

### **LPS 31. Introduction to Inductive Logic. 4 Units.**

Philosophical questions concerning the foundations of scientific inference, e.g., the traditional problem of induction, the Goodman paradox, the concept of cause, Mill's method of inductive reasoning, probability calculus, different interpretations of probability, and their interaction in inductive reasoning.

Same as PHIL 31.

**(II, Va)**

**LPS 40. The Nature of Scientific Inquiry. 4 Units.**

Investigates the nature, scope, and status of scientific knowledge and the methods used to acquire it. Uses concrete historical examples from a variety of scientific fields to identify distinctive features of the scientific enterprise and explore their significance.

(II)

**LPS 60. The Making of Modern Science. 4 Units.**

Surveys the history of science and mathematics since the Scientific Revolution, examining central developments both chronologically and thematically, as well as investigating their significance for contemporary philosophical debates about the role and status of current scientific theories.

Same as HIST 60.

(GE II or GE IV ).

**LPS H80. Scientific Realism and Instrumentalism. 4 Units.**

Explores competing views of the character and status of theoretical knowledge in science, including challenges to and defenses of the view that contemporary scientific theories offer straightforward and accurate descriptions of how things stand in otherwise inaccessible domains of nature.

Restriction: Campuswide Honors Collegium students only.

(II)

**LPS H81. What is Space? . 4 Units.**

Historical, philosophical, scientific exploration of the concept of 'space.' Questions of interest include: What kind of a thing is space? How can we know what space is like? How is space different from time.

Restriction: Campuswide Honors Collegium students only.

(II)

**LPS 91. The Philosophy of Sex. 4 Units.**

Discusses the origins of biological sex, dynamics of sexual selection, sex differences in humans, and the construction of gender in human societies. Seeks to understand the role social values play in the creation of science.

Same as PHIL 91.

Overlaps with LPS H91.

(III)

**LPS H91. The Philosophy and Biology of Sex. 4 Units.**

Covers the origins of biological sex, dynamics of sexual selection, the evolution and cultural creation of sexual behavior in humans, and the construction of gender in human societies.

Restriction: Campuswide Honors Collegium students only.

(II and III ).

**LPS H95. Jurisprudence and Constitutional Law. 4 Units.**

Applies competing theories of the nature of law and legal reasoning to evaluate decisions of the U.S. Supreme Court in controversial areas of constitutional law such as free speech, privacy, sexual conduct, affirmative action, and political campaign contributions.

Restriction: Campuswide Honors Collegium students only.

(III)

**LPS 100W. Writing Philosophy. 4 Units.**

Discussion of those aspects of writing of special importance in philosophy, e.g., philosophical terminology, techniques for evaluating arguments, philosophical definitions and theories. At least 4,000 words of assigned composition based on philosophical readings.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as PHIL 100W.

Restriction: Upper-division students only.

(Ib)

**LPS 102. Introduction to the Theory of Knowledge. 4 Units.**

A study of one or more of the basic issues in epistemology, e.g., the role of perception in the acquisition of knowledge, the nature of evidence, the distinction between belief and knowledge, and the nature of truth and certainty.

Same as PHIL 102.

**LPS 104. Introduction to Logic. 4 Units.**

Introduction to sentence logic, including truth tables and natural deduction; and to predicate logic, including semantics and natural deduction.

Same as LSCI 142, PHIL 104.

**LPS 105A. Elementary Set Theory. 4 Units.**

An introduction to the basic working vocabulary of mathematical reasoning. Topics include sets, Boolean operations, ordered n-tuples, relations, functions, ordinal and cardinal numbers.

Same as LSCI 145A, PHIL 105A.

**LPS 105B. Metalogic. 4 Units.**

Introduction to formal syntax (proof theory) and semantics (model theory) for first-order logic, including the deduction, completeness, compactness, and Löwenheim-Skolem theorems.

Prerequisite: PHIL 105A

Same as LSCI 145B, PHIL 105B.

Overlaps with MATH 150.

**LPS 105C. Undecidability and Incompleteness. 4 Units.**

Introduction to the formal theory of effective processes, including recursive functions, Turing machines, Church's thesis, and proofs of Gödel's incompleteness theorem for arithmetic, and Church's undecidability theorem for first-order logic.

Prerequisite: PHIL 105B

Same as LSCI 145C, PHIL 105C.

Overlaps with MATH 152.

Concurrent with LPS 205C.

**LPS 106. Topics in Logic . 4 Units.**

Selected topics in mathematical or philosophical logic.

Prerequisite: PHIL 105B or LPS 105B

Repeatability: Unlimited as topics vary.

Same as PHIL 106.

**LPS 108. Topics in Induction, Probability, and Decision Theory. 4 Units.**

Selected topics in induction, probability, and decision theory.

Repeatability: Unlimited as topics vary.

Same as PHIL 108.

**LPS 113. Topics in Modern Philosophy. 4 Units.**

Focuses on the works of central philosophical figures of modern Philosophy (e.g., Descartes, Leibniz, Hobbes, Locke, Hume, Kant) or on the treatment of one or more central philosophical problems by a number of these figures.

Repeatability: Unlimited as topics vary.

Same as PHIL 113.

**LPS 115. Topics in History of Analytic Philosophy. 4 Units.**

Review of central theories or figures in the history of analytic philosophy. Emphasis on writings of Frege, Russell, Schlick, Carnap, and Quine. Topics include the nature of meaning and truth, the synthetic/analytic distinction, and scientific knowledge.

Repeatability: Unlimited as topics vary.

Same as PHIL 115.

**LPS 120. Topics in Metaphysics. 4 Units.**

Examines central philosophical questions concerning our own fundamental nature and that of the world around us (e.g., causation and necessity, determination, free will, personal identity, the mind-body problem).

Repeatability: Unlimited as topics vary.

Same as PHIL 120.

**LPS 121. Topics in the Theory of Knowledge . 4 Units.**

One or more topics in the theory of knowledge, e.g., the nature of rational justification, of perceptual knowledge, of a priori knowledge.

Repeatability: Unlimited as topics vary.

Same as PHIL 121.

**LPS H123. What is Disease?. 4 Units.**

Explores philosophical issues associated with scientific efforts to understand and explain disease.

Restriction: Campuswide Honors Collegium students only.

**(II)****LPS H125. What Is Time? . 4 Units.**

Engages the question 'what is time?' by drawing on physics, philosophy, fiction, film, and psychology. Organized around understanding and addressing the tension between time as represented in physics and our immediate temporal experience.

Restriction: Campuswide Honors Collegium students only.

**(III)****LPS 140. Topics in Philosophy of Science. 4 Units.**

Selected topics in contemporary philosophy of science, e.g., the status of theoretical entities, the confirmation of theories, the nature of scientific explanation.

Repeatability: Unlimited as topics vary.

Same as PHIL 140.

**LPS 141A. Topics in Philosophy of Physics. 4 Units.**

Selected topics in the philosophy of physics, e.g., the interpretation of quantum mechanics, the nature of spacetime, the problem of quantum field theories.

Repeatability: Unlimited as topics vary.

Same as PHIL 141A.

**LPS 141B. Geometry and Spacetime. 4 Units.**

An examination of the foundations of the special theory of relativity, with emphasis on the geometry of Minkowski spacetime, and its relation to both Euclidean and non-Euclidean (hyperbolic) plane geometries.

Prerequisite: MATH 2D and (MATH 3A or MATH 6G)

Same as PHIL 141B.

**LPS 141C. Philosophy of Quantum Mechanics. 4 Units.**

An examination of the standard von Neumann-Dirac formulation of quantum mechanics. The quantum measurement problem is discussed along with several proposed solutions, including GRW, many-worlds, man-minds, and Bohm's theory.

Same as PHIL 141C.

**LPS 141D. Probability and Determinism. 4 Units.**

An examination of a cluster of interrelated issues concerning probability, determinism, logic, and the foundations of quantum mechanics.

Prerequisite: MATH 2D and (MATH 3A or MATH 6G)

Same as PHIL 141D.

**LPS H141. Honors Philosophy of Quantum Mechanics. 4 Units.**

An examination of the standard von Neumann-Dirac formulation of quantum mechanics. The quantum measurement problem is discussed along with several proposed solutions, including GRW, many-worlds, man-minds, and Bohm's theory.

Overlaps with LPS 141C.

Restriction: Campuswide Honors Collegium students only.

**LPS 142W. Writing/Philosophy of Biology. 4 Units.**

Philosophy of biology, e.g., scientific method in biology, the structure of evolutionary theory, teleology, ethics, and evolution. Course work includes one 4,000-word and four 1,000-word papers.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as PHIL 142W, BIOL E142W.

Restriction: Juniors only.

**(Ib)**

**LPS 143. Topics in Philosophy of Psychology. 4 Units.**

Selected topics in the philosophy of psychology, e.g., the nature of psychological explanation, reductionism, issues in cognitive, behavioral, and neuroscience.

Repeatability: Unlimited as topics vary.

Same as PHIL 143, PSYC 123P.

Restriction: Psychology Majors have first consideration for enrollment. Philosophy Majors have first consideration for enrollment.

**LPS 144. Topics in Philosophy of Social Science. 4 Units.**

Selected topics in the philosophy of the social sciences, e.g., Is their goal to understand behavior or to predict and control it?; Are they normative and the natural sciences not?; Do they incorporate philosophical doctrines about language and mind?.

Repeatability: May be taken for credit for 4 units as topics vary.

Same as PHIL 144.

**LPS 145. Topics in Philosophy of Language. 4 Units.**

Selected topics in the philosophy of language, e.g., the nature of meaning, mechanisms of reference, speech acts.

Repeatability: Unlimited as topics vary.

Same as LSCI 141, PHIL 145.

**LPS 146. Topics in Philosophy of Logic. 4 Units.**

Selected topics in the philosophy of logic, e.g., the nature of logical truth and our knowledge of it, the status of propositions, definite descriptions, and existential presuppositions.

Repeatability: Unlimited as topics vary.

Same as PHIL 146.

**LPS 147. Topics in Philosophy of Mathematics. 4 Units.**

Selected historical and contemporary topics in the philosophy of mathematics, e.g., mathematical truth and ontology, mathematical knowledge, the nature and role of proof, the workings of mathematics in application.

Repeatability: Unlimited as topics vary.

Same as PHIL 147.

**LPS 199. Independent Study. 1-4 Units.**

Independent research with Logic and Philosophy of Science faculty.

Repeatability: May be taken for credit for 12 units.

**LPS 200. Topics in Logic and Philosophy of Science. 4 Units.**

Studies in selected areas of Logic and Philosophy of Science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**LPS 205A. Set Theory. 4 Units.**

The basic working vocabulary of mathematical reasoning. Topics include: sets, Boolean operations, ordered n-tuples, relations, functions, ordinal and cardinal numbers.

Same as PHIL 205A.

**LPS 205B. Metalogic. 4 Units.**

Formal syntax (proof theory) and semantics (model theory) for first-order logic, including the deduction, completeness, compactness, and Loewenheim-Skolem theorems.

Prerequisite: PHIL 205A or LPS 205A

Same as PHIL 205B.

**LPS 205C. Undecidability and Incompleteness. 4 Units.**

Formal theory of effective processes, including recursive function, Turing machines, Church's thesis, proofs of Goedel's incompleteness theorem for arithmetics, and Church's undecidability for first-order logic.

Prerequisite: PHIL 205B or LPS 205B

Same as PHIL 205C.

Restriction: Graduate students only.

Concurrent with LPS 105C.

**LPS 206. Topics in Logic . 4 Units.**

Studies in selected areas of logic. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 206.

**LPS 213. Topics in Modern Philosophy. 4 Units.**

Studies in selected areas of modern philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 213.

**LPS 215. Topics in Analytic Philosophy. 4 Units.**

Studies in selected areas of analytic philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 215.

**LPS 220. Topics in Metaphysics. 4 Units.**

Studies in selected areas of metaphysics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 220.

**LPS 221. Topics in Epistemology. 4 Units.**

Studies in selected areas of epistemology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 221.

**LPS 221A. Medical Epistemology. 4 Units.**

Analysis of epistemological issues concerning medical research and healthcare. Topics may include medical evidence, transmission of medical knowledge in the doctor-patient interaction, medical expertise, epistemology of medical disagreement, classification of illness, well-being, philosophy of pain, or medical decision making.

Same as PHIL 221A.

Restriction: Graduate students only.

**LPS 232. Topics in Political and Social Philosophy. 4 Units.**

Studies in selected areas of political and social philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 232.

**LPS 240. Topics in Philosophy of Science. 4 Units.**

Studies in selected areas of philosophy of science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 240.

**LPS 241. Topics in Philosophy of Physics. 4 Units.**

Studies in selected areas of philosophy of physics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 241.

**LPS 242. Topics in Philosophy of Biology. 4 Units.**

Studies in selected areas of philosophy of biology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 242.

**LPS 243. Topics in Philosophy of Psychology. 4 Units.**

Selected topics in the philosophy of psychology, e.g., the nature of psychological explanation, reductionism, issues in cognitive, behavioral, and neuroscience.

Repeatability: Unlimited as topics vary.

Same as PHIL 243, PSYC 231P.

**LPS 244. Topics in Philosophy of Social Science. 4 Units.**

Studies in selected areas of philosophy and social science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 244.

**LPS 245. Topics in Philosophy of Language. 4 Units.**

Studies in selected areas of philosophy of language. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 245.

**LPS 246. Topics in Philosophy of Logic. 4 Units.**

Studies in selected areas of philosophy of logic. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 246.

**LPS 247. Topics in Philosophy of Mathematics. 4 Units.**

Studies in selected areas of philosophy of mathematics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 247.

**LPS 289. Logic and Philosophy of Science Workshop. 1-4 Units.**

A two- or three-quarter-long workshop on selected topics in logic and philosophy of science.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**LPS 298. Independent Study. 4-12 Units.**

Independent research with Logic and Philosophy of Science Faculty.

Repeatability: May be taken for credit for 12 units.

**LPS 299. Directed Research. 1-12 Units.**

Directed study with Logic and Philosophy of Science Faculty.

Repeatability: May be repeated for credit unlimited times.

**LPS 399. University Teaching. 4-12 Units.**

Required of and limited to Teaching Assistants.

Repeatability: May be taken for credit for 12 units.

## Philosophy, Ph.D. (School of Social Sciences)

The Department of Logic and Philosophy of Science and the Department of Philosophy jointly administer a Ph.D. program in Philosophy with two independent tracks: the Philosophy track and the LPS track. Both tracks begin from a common core of requirements in standard philosophical fields (e.g., history of philosophy, logic, ethics, metaphysics/epistemology) and branch off thereafter; both tracks offer the Ph.D. in Philosophy. Applicants are advised to apply to the unit whose faculty areas of specialization and curriculum correspond best with their interests. Students are expected to reside in the same unit as their primary advisor, but faculty in both units are available for all other academic purposes (course work, independent studies, committee membership, and more). See the Department of Philosophy in the School of Humanities for a description of the Philosophy track.

The M.A. in Philosophy may also be awarded to Ph.D. students who complete the necessary requirements.

Applicants for the LPS track must have a bachelor's degree, but there is no formal requirement as to the field of that degree. The most natural undergraduate majors for LPS graduate students would be philosophy, mathematics or the sciences, but those with other degrees who are interested in the LPS fields should feel free to apply.

Complete applications must include GRE scores, transcripts, letters of recommendation and a writing sample. The deadline for application is December 1.

Several forms of incoming fellowships are available on a competitive basis; these include a stipend, student fees, tuition and nonresident supplemental tuition (for out-of-state students). In subsequent years, some additional fellowship funding is available, but students in good standing are most often supported with teaching assistantships.

All required courses must be completed with a grade of B or better.

The **History of Philosophy Requirement** provides a broad perspective. Graduate courses in three out of the following four areas—Modern Rationalism, Modern Empiricism, Kant, and Twentieth Century—must be completed by the end of the seventh quarter in residence.

The **Logic Requirement** acquaints students with the fundamentals of modern logic: elementary set theory, metalogic, effective procedures and Gödel's incompleteness theorems. LPS 205A, LPS 205B, and LPS 205C must be completed by the end of the seventh quarter in residence.

The **Field Requirement** provides exposure to a range of philosophical disciplines. One graduate course in moral philosophy and one graduate course in metaphysics/epistemology must be completed by the end of the seventh quarter in residence. (These courses may not also be used to satisfy the History Requirement.)

The **Philosophy of Science Requirement** provides exposure to a range of philosophy of science, from general philosophy of science to the philosophies of particular sciences (e.g., physics, biology), to the philosophies of mathematics and logic. Three selected courses from LPS 240–247

must be completed by the end of the seventh quarter in residence. (These courses may be repeated as topics vary.) Courses used to satisfy the Philosophy of Science Requirement may also be used to satisfy the History or Field Requirements.

The **Tools of Research Requirement** provides some flexibility for students with various levels of interest in pursuing the philosophy of a particular science. So, for example, a student most interested in historical issues in the philosophy of mathematics might benefit most from the study of German, while a student most interested in the philosophy of quantum mechanics should take a series of graduate courses in physics. (Students wishing to specialize further in the philosophy of a particular science might wish to pursue more demanding options; see the Emphases in Mathematics, Physics, and Biology and the Behavioral Sciences, below.) To satisfy this requirement, a student must pass an examination on an appropriate foreign language or receive a grade of B or better in three appropriate graduate courses in a discipline or disciplines outside philosophy by the end of the ninth quarter in residence. Though the discipline(s) here must be outside philosophy, they might be taught by Philosophy or LPS faculty. The two-hour language examination will be administered by an LPS faculty member and will require the student to translate (with the aid of a dictionary) a passage or passages from philosophical or scientific authors.

The **Portfolio Requirement** ensures that students have acquired dissertation-level skills in the writing of philosophy: e.g., the ability to isolate, understand and evaluate arguments in the philosophical literature; the ability to assimilate secondary literature; the ability to formulate and defend an original philosophical thesis. The portfolio is designed to display these skills. To satisfy this requirement, a student must submit an extended writing sample, most often consisting of several individual papers, that demonstrates the skills necessary to write a Ph.D. dissertation. (A successful portfolio typically consists of several papers totaling around 80 pages. These may be revisions of term papers. Each paper should present and defend a definite thesis and should be accessible to faculty members unfamiliar with the literature in question. The papers in the portfolio need not be of publishable quality, but they must, collectively, demonstrate the specified skills.) Portfolios will be evaluated by the entire LPS faculty. (LPS track students may request that relevant Philosophy Department faculty also be present at the evaluation meeting.) Portfolios must be submitted by the end of the fourth week of the seventh quarter.

The **Candidacy Examination** demonstrates that the student has a viable dissertation topic and an adequate grasp of related literature. To satisfy this requirement, a student must prepare and be examined on a reading list of canonical literature in the area of the dissertation and a brief (15–20 page) dissertation proposal. The reading list should in effect define the context of the proposed dissertation. The examination must be completed by the end of the tenth quarter in residence. The normative time for advancement to candidacy is 3.3 years.

**Dissertation Defense.** Students must pass a final oral examination focusing on the content of the dissertation administered by the Dissertation Committee. The normative time for completion of the Ph.D. is six years, and the maximum time permitted is seven years.

### **LPS Track Emphasis in Mathematics**

In addition to the LPS track described above, students may elect to pursue the more demanding option of the Mathematics emphasis. Faculty in the UCI and UCLA Departments of Mathematics participate in the Mathematics emphasis. Students in the emphasis take courses and receive advising from these participating Mathematics professors, as well as from the faculty of LPS and the Philosophy Department. Mathematics emphasis students must satisfy the following requirement in addition to the usual LPS track requirements:

#### **Mathematics Requirement**

A student must receive a grade of B or better in six graduate courses in mathematics. (Though the courses here are in mathematics, some might be taught by LPS faculty. They may also be used to satisfy the Tools of Research requirement.)

### **LPS Track Emphasis in Physics**

In addition to the LPS track described above, students may elect to pursue the more demanding option of the Physics emphasis. Physics emphasis students must satisfy the following requirement in addition to the usual LPS track requirements:

#### **Physics Requirement**

A student must receive a grade of B or better in three sections of PHILOS 241, as well as in three additional graduate courses in Physics or Mathematics. (Though the courses here are in physics or mathematics, they might be taught by LPS faculty. They may also be used to satisfy the Tools of Research requirement, but not the Philosophy of Science requirement.)

### **LPS Track Emphasis in Biology and the Behavioral Sciences**

In addition to the LPS track described above, students may elect to pursue the more demanding option of the Emphasis in Biology and the Behavioral Sciences. Emphasis students must satisfy the following requirement in addition to the usual LPS track requirements.

#### **Biology/Behavioral Sciences Requirement**

A student must receive a grade of B or better in six graduate courses, each of which is in biology or the behavioral sciences. (In some cases, with the approval of the student's advisor and the DGS, courses taught by LPS faculty may satisfy the emphasis requirements. Emphasis courses may also be used to satisfy the Tools of Research requirement, but not the Philosophy of Science requirement.)

## **Philosophy, Political Science, and Economics, M.A. (4+1)**

The goal of this program is to train students in three critically important and related approaches to understanding the social world around us. Philosophy develops analytic rigor and trains students to reason logically. Political science provides an understanding of how institutions impact modern societies

and helps students evaluate the choices that such institutions regularly make. And economics is the study of how individuals, firms, and governments make decisions which together determine how resources are allocated. An appreciation of economics has increasingly become crucial for an understanding of institutional policy making. The objective of the M.A. in PPE is to prepare students for careers in government, law, private or public corporations, and non-profit organizations.

In order to be admitted to the program, undergraduate students must submit an application in the winter quarter of their third year. More information on the application process can be found on the LPS Department Graduate Program website (<http://www.lps.uci.edu/grad/ppe.php>).

The program of study can be divided into three stages: pre-requirements that must be met for admission into the program, undergraduate requirements to be completed before the end of the fourth year, and graduate requirements to be completed by the end of the fifth year.

### Pre-Requirements

- MATH 2A and MATH 2B.
- Advancement toward completing a B.A. in one of the associated disciplines.

### Undergraduate Requirements

- Completion of a B.A. in one of the associated disciplines.
- Three additional courses - including at least one upper-division course - in each of the two disciplines that are not the student's major.

### Graduate Requirements

- Proseminar in PPE I, II, III.
- Six graduate courses approved by the director of the PPE program, two in each of the three areas.

The normative time to degree is four years in undergraduate study and one additional year as graduate students. A full description of the program can be found on the LPS Department Graduate Program website (<http://www.lps.uci.edu/grad/ppe.php>).

## Department of Political Science

### Department Chair

5225 Social Science Plaza B  
949-824-4012  
<http://www.polisci.uci.edu/>

The Department of Political Science offers a wide variety of courses at the introductory, lower-division and more specialized upper-division levels. The curriculum is organized into four areas: American Politics, Political Theory, International Relations, and Comparative Politics. In addition to the traditional fields of political science, the department offers an introductory course in Law and a variety of upper-division courses where students can explore specialized areas in Law. The department also offers an Honors Program in Political Science for juniors and seniors, culminating in a senior honors thesis.

The department is composed of a strong and diverse faculty especially interested in analyzing central questions of political science related to such topics as policy-making, political structures, participation, conflict, change and development, transition to democracy, voting theory, power and authority, and interstate relations. The faculty has particular strength in interdisciplinary approaches, in comparative analysis, and in democratic theory.

### Program in Law and Graduate Studies (J.D./Ph.D.)

Highly qualified students interested in combining the study of law with graduate research and/or professional qualifications in political science are invited to undertake concurrent degree study under the auspices of UC Irvine's Program in Law and Graduate Studies (PLGS). Students in this program pursue a coordinated curriculum leading to a J.D. degree from the School of Law in conjunction with a Ph.D. degree in political science. Additional information is available from the PLGS program director's office, 949-824-4158, or by email to [plgs@law.uci.edu](mailto:plgs@law.uci.edu). A full description of the program, with links to all relevant application information, can be found at the School of Law Concurrent Degree Programs website (<http://www.law.uci.edu/academics/interdisciplinary-studies/concurrent-degrees.html>).

- Philosophy, Political Science, and Economics, M.A. (4+1)
- Political Science, B.A.
- Political Science, Minor
- Political Science, Ph.D.

### Faculty

Edwin Amenta, Ph.D. University of Chicago, *Professor of Sociology; Political Science* (political sociology, historical and comparative sociology, social movements, social policy)

Matthew N. Beckmann, Ph.D. University of Michigan, *Associate Professor of Political Science* (presidency, congress, interest groups, mass media, and politics)

Graeme T. Boushey, Ph.D. University of Washington, *Associate Professor of Political Science; Urban Planning and Public Policy* (California politics and statewide elections, American politics, state and federal policy-making, ballot measures and the initiative process)

Daniel R. Brunstetter, Ph.D. University of California, Davis, *Associate Professor of Political Science; European Languages and Studies* (political theory, international relations, French political thought)

Alejandro E. Camacho, J.D., LL.M. Harvard University, Georgetown University, *Professor of School of Law; Political Science*

David O. Carter, J.D. University of California, Los Angeles, *Lecturer of Political Science*

Simone Chambers, Ph.D. Columbia University, *Professor of Political Science* (democratic theory, ethics, secularism, rhetoric, civility, and the public sphere)

James N. Danziger, Ph.D. Stanford University, *Professor Emeritus of Political Science*

Louis DeSipio, Ph.D. University of Texas at Austin, *Professor of Chicano/Latino Studies; Political Science* (ethnic politics, Latino politics, immigration, naturalization, U.S. electoral politics)

David Feldman, Ph.D. University of Missouri-Columbia, *Professor of Urban Planning and Public Policy; Political Science*

Mark J. Fisher, M.D. University of Cincinnati, *Professor of Neurology; Anatomy and Neurobiology; Political Science*

David John Frank, Ph.D. Stanford University, *Professor of Sociology; Education; Political Science* (globalization, sexuality, the natural environment, higher education)

Howard A. Gillman, Ph.D. University of California, Los Angeles, *Chancellor and Professor of Political Science; Criminology, Law and Society; History; School of Law*

Sara Goodman, Ph.D. Georgetown University, *Associate Professor of Political Science; European Languages and Studies* (citizenship policy, immigration, immigrant integration, ethnic diversity in democracies, diaspora)

Bernard N. Grofman, Ph.D. University of Chicago, *Professor of Political Science; Economics* (public choice, mathematical models of collective decision making, formal democratic theory, politics of small groups, representation, voting rights)

Heidi Hardt, Ph.D. Graduate Institute of International and Development Studies, *Assistant Professor of Political Science* (international security, international organizations, NATO, European Union, African Union, crisis management, organizational learning)

Richard L. Hasen, J.D. University of California, Los Angeles, *UCI Chancellor's Professor of School of Law; Political Science*

Marek Kaminski, Ph.D. University of Maryland, College Park, *Associate Professor of Political Science; Economics* (voting models, democratization, political consequences of electoral laws)

Pamela A. Kelley, J.D. Yale University, *Lecturer of Political Science* (civil rights law, constitutional law, gender discrimination, legal profession, leadership, ethics)

Claire J. Kim, Ph.D. Yale University, *Professor of Asian American Studies; Political Science*

Jeffrey Kopstein, Ph.D. University of California, Berkeley, *Professor of Political Science; Religious Studies* (comparative politics, dictatorship and democracy, ethnic politics, political violence, post-communism)

Ines Levin, Ph.D. California Institute of Technology, *Assistant Professor of Political Science* (elections, voting, statistics)

Erin Lockwood, Ph.D. Northwestern University, *Assistant Professor of Political Science* (financial derivatives, financial regulation, international political economy, political theory, risk and uncertainty)

Cecelia M. Lynch, Ph.D. Columbia University, *Professor of Political Science; Religious Studies* (international relations (theory, organization, law) religion and ethics, social movements and civil society actors (on peace, security, globalization, humanitarianism, and religion)

Richard Matthew, Ph.D. Princeton University, *Professor of Urban Planning and Public Policy; Political Science*

Mary McThomas, Ph.D. University of California, Los Angeles, *Associate Professor of Political Science* (immigration, theories of citizenship, feminist political theory, gender and politics)

Carrie Menkel-Meadow, J.D. University of Pennsylvania, *UCI Chancellor's Professor of Political Science; School of Law*

David S. Meyer, Ph.D. Boston University, *Professor of Sociology; Political Science; Urban Planning and Public Policy* (social movements, public policy, peace and war, social justice)

Kristen R. Monroe, Ph.D. University of Chicago, *UCI Chancellor's Professor of Political Science* (ethics, international relations, political and moral psychology, normative political theory, politics of difference, conflict resolution)

Kevin E. Olson, Ph.D. Northwestern University, *Professor of Political Science; Culture and Theory; European Languages and Studies* (political theory, history of political thought, legal theory, philosophy of the social sciences)

Davin Phoenix, Ph.D. University of Michigan, *Assistant Professor of Political Science* (racial attitudes, affect and behavior, public opinion, political communication, urban politics, mobilization of marginalized groups)

Shawn W. Rosenberg, M.Litt. University of Oxford, *Professor of Political Science* (political psychology, deliberative democracy, ideology, social theory, social and development psychology)

Kamal Sadiq, Ph.D. University of Chicago, *Associate Professor of Political Science* (comparative politics, immigration and citizenship in developing countries, India and southeast Asia, Asian security)

William R. Schonfeld, Ph.D. Princeton University, *Professor Emeritus of Political Science*

Sherilyn K. Sellgren, M.B.A. University of California, Irvine, *Lecturer of Political Science*

Caesar D. Sereseres, Ph.D. University of California, Riverside, *Associate Professor of Political Science* (U.S. foreign policy, U.S. Latin American relations, Mexican-American politics)

Gregory Shaffer, J.D. Stanford University, *Director, Center of Globalization, Law and Society and UCI Chancellor's Professor of School of Law; Political Science*

Stergios Skaperdas, Ph.D. Johns Hopkins University, *Clifford S. Heinz Chair and Professor of Economics; Political Science*

Charles Smith, Ph.D. University of California, San Diego, *Professor of Political Science; Criminology, Law and Society* (law and legal institutions, comparative and international law)

Etel Solingen, Ph.D. University of California, Los Angeles, *Thomas T. and Elizabeth C. Tierney Chair in Global Peace and Conflict Studies and Professor of Political Science* (international relations theory, international political economy, international cooperation, macropolitics/institutions, comparative politics, world politics and regional orders)

Dorothy J. Solinger, Ph.D. Stanford University, *Professor Emeritus of Political Science* (Chinese domestic politics and political economy, comparative politics, East Asian politics)

Rein Taagepera, Ph.D. University of Delaware, *Professor Emeritus of Political Science*

Michael Tesler, Ph.D. University of California, Los Angeles, *Associate Professor of Political Science* (American politics, race, ethnicity and politics, quantitative methods)

Danielle M. Thomsen, Ph.D. Cornell University, *Assistant Professor of Political Science* (American politics, U.S. congress, political parties, gender and politics)

Keith Topper, Ph.D. University of California, Los Angeles, *Associate Professor of Political Science; Culture and Theory* (political theory, critical theory, poststructuralism, theories of power, language and politics, theory and politics of interpretation, politics of culture, philosophy of the social sciences)

Rodolfo D. Torres, Ph.D. Claremont Graduate University, *Professor of Urban Planning and Public Policy; Political Science*

Carole J. Uhlaner, Ph.D. Harvard University, *Professor Emeritus of Political Science* (comparative political behavior, formal theory/social choice)

Robert M. Uriu, Ph.D. Columbia University, *Associate Professor of Political Science* (international relations, international political economy, international politics of East Asia/Japan, U.S. foreign policy toward East Asia)

Samantha Vortherms, Ph.D. University of Wisconsin, Madison, *Assistant Professor of Political Science* (comparative political economy, development, social welfare)

Martin P. Wattenberg, Ph.D. University of Michigan, *Professor of Political Science* (American and comparative political behavior)

Christopher A. Whytock, J.D. Georgetown University, *Professor of School of Law; Political Science*

Tiffany Willoughby-Herard, Ph.D. University of California, Santa Barbara, *Associate Professor of African American Studies; Comparative Literature; Culture and Theory; Political Science* (South Africa, poor whites, race in foreign policy, diaspora, comparative racial politics, third world feminisms, feminist pedagogy, black political thought)

## Courses

### **POL SCI 10A. Probability and Statistics in Political Science I. 4 Units.**

Introduction to the variety of statistical applications in the social sciences. Descriptive statistics. Measures of central tendency and dispersion. Percentile ranks. Standardization and normal approximation. Basic probability theory focuses on application to statistical inference and binomial distribution. Laboratory required.

Prerequisite: SOC SCI 3A

Overlaps with ANTHRO 10A, ECON 15A, PSYCH 10A, SOCECOL 13, SOC SCI 9A, SOCIOL 10A.

Restriction: Lower-division students only.

(Va)

### **POL SCI 10B. Probability and Statistics in Political Science II. 4 Units.**

Introduction to statistical inference, sampling distribution, standard error. Hypothesis tests for proportions and means. Inferential techniques for nominal variables including chi-square, study measures of strengths, significance of relationships between variables, assumptions, data requirements, and types of error in significance tests.

Prerequisite: POL SCI 10A

Overlaps with ANTHRO 10B, ECON 15B, PSYCH 10B, SOCECOL 13, SOC SCI 9B, SOC SCI 10B.

(Va)

### **POL SCI 10C. Probability and Statistics in Political Science III. 4 Units.**

Focus on correlation, regression, and control for effects of variables. One-way and two-way factorial analysis of variance. A priori and a posteriori comparisons. Introduction to repeated measures design and non-parametric statistics. Discusses use of statistics in newspapers and popular magazines.

Prerequisite: POL SCI 10B

Overlaps with ANTHRO 10C, PSYCH 10C, SOCECOL 13, SOC SCI 9C, SOC SCI 10C, SOCIOL 10C.

(Vb)

### **POL SCI 11A. Introduction to Political Science: Political Analysis. 4 Units.**

Presents various modes of understanding politics. Emphasis on basic approaches to political analysis, their uses in constructing theories, and their application to particular national political systems.

(III and VIII ).

### **POL SCI 11C. Introduction to Political Science: Micropolitics. 4 Units.**

Introduction to political behavior of individuals and groups within national systems. Three questions addressed: How do individuals come to understand the political world? How do individuals behave within this world? How do groups and individuals engage in the political process.

(III)

### **POL SCI 21A. Introduction to American Government. 4 Units.**

Introduction to American political processes and institutions. Topics include elections, political participation, parties, interest groups, the Presidency, Congress, the bureaucracy, and the judiciary.

(III)

### **POL SCI 31A. Introduction to Political Theory. 4 Units.**

Types of questions: What is politics? What are the theoretical and philosophical bases for different types of political arrangements? How do these perspectives get translated into reality? Among others, the works of Rousseau, Locke, Mill, and Marx are read.

(III)

### **POL SCI 32A. Dilemmas of Diversity. 4 Units.**

Focuses on racial, ethnic, and gender diversity, multiculturalism, and their impact on our social and political ideals. Traces the sources of ideas about difference, equality, and toleration, and examines tensions that occur when forms of identity conflict with one another.

Same as INTL ST 32A.

(VII)

**POL SCI 41A. Introduction to International Relations. 4 Units.**

Analysis of political relations between and among nations with emphasis on explanations of conflict and cooperation. The role of ideologies and their relation to international problems are also examined.

Same as INTL ST 14.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

(III and VIII ).

**POL SCI 44B. Global Political Ideologies. 4 Units.**

An overview of the major political ideologies shaping the current world order and global conflict. Topics include liberalism, democracy, nationalism, capitalism, communism, socialism, fascism, neoliberalism, clash of civilizations, sectarian violence, populist nationalism, and de-globalization.

Same as INTL ST 12, SOC SCI 12.

Restriction: International Studies Majors have first consideration for enrollment.

(III and VIII ).

**POL SCI 45A. Human Rights and Global Governance. 4 Units.**

Historical development of civil, political rights and the rise of human rights in international law. Explores role, and limitations, of the UN, ICJ, and ICC in global governance. Reconceptualizing democracy and political representation in a postnational 21st century.

Same as INTL ST 16, SOC SCI 16.

Restriction: International Studies Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment.

(III and VIII ).

**POL SCI 49. Lower-Division Special Topics in International Relations. 4 Units.**

Studies in selected areas of international relations. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**POL SCI 51A. Introduction to Politics Around the World. 4 Units.**

Introduces comparative politics. Compares political systems in a variety of countries. Includes elections, parties, parliaments, presidents, protest movements, and other aspects of national politics. Addresses how to make meaningful comparisons across countries.

(III, VIII)

**POL SCI 61A. Introduction to Race and Ethnicity in Political Science. 4 Units.**

Examines major theories that attempt to explain the roles of race and ethnicity in U.S. politics.

Same as CHC/LAT 64.

(III and VII ).

**POL SCI 71A. Introduction to Law. 4 Units.**

An introduction to the study of judicial politics. Questions include: what is law?; what is a court?; who are the judges? Analysis of a wide range of judicial decisions illustrates the political importance of courts in the U.S. and elsewhere.

(III)

**POL SCI 79. Lower-Division Special Topics in Law. 4 Units.**

Studies in selected areas of law. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**POL SCI H80. Globalization and Human Security. 4 Units.**

Emerging issues of human security in the globalized world, including personal human security, physical integrity, human trafficking, global climate change, food. Challenges of these complex human security problems for a multi-scalar system (international, national, local).

Restriction: Campuswide Honors Collegium students only.

(III, VIII)

**POL SCI 120. Public Opinion. 4 Units.**

Theories concerning sources of public opinion, processes by which it is altered, organization of citizens' belief systems, and role of public opinion in government policy. Students analyze survey data as a research project.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 121A. The American Presidency. 4 Units.**

Presents a comprehensive survey of the American presidency and considers the question of political power.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 121C. U.S. Elections and Voting Behavior. 4 Units.**

Examines how voters evaluate political parties, candidates, and issues in electoral campaigns to reach their decisions. Numerous controversies concerning the degree of issue voting, sophistication of candidate evaluations, and the decline of political parties are discussed.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 121F. Presidents Since World War II. 4 Units.**

Reviews the actions and character of presidents from Harry Truman through Bill Clinton. Each week a different president is examined from a variety of perspectives. Students are expected to write a substantial original research paper.

Prerequisite: POL SCI 21A

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 121G. American Public Policy. 4 Units.**

Focuses on the development and implementation of public policy in the United States. Lectures cover theoretical models of the policy process as well as significant problems facing contemporary American decision-makers.

Same as PUBHLTH 132, SOC SCI 152C, UPPP 129.

**POL SCI 121HW. Writing for the President of the United States. 4 Units.**

Imagines how White House staffers can help presidents with clear, focused, and effective writing. Through a variety of formats, students study, hone, and practice writing skills that will prove useful- in and out of the White House.

Prerequisite: POL SCI 21A

(Ib)

**POL SCI 122A. American Metropolitan Politics. 4 Units.**

Explores the politics of urban and suburban America, including the policy making process; the exercise of political power; local politics, federalism and the problems of metropolitanism; and major policy problems facing urban areas.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 122B. California Politics. 4 Units.**

Examines the structure and function of California government, traces historical development of political power, with constantly changing casts of power-brokers and seekers. Explores California exceptionalism and the roles played by the electorate, legislature, executive, and organized interests in policy making.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 122BW. California Politics. 4 Units.**

Examines the structure and function of California government, traces historical development of political power, with constantly changing casts of power-brokers and seekers. Explores California exceptionalism and the roles played by the electorate, legislature, executive, and organized interests in policy making.

Prerequisite: Satisfactory completion of the Lower-Division writing requirement.

Restriction: Political Science Majors have first consideration for enrollment.

(Ib)

**POL SCI 123B. Representation. 4 Units.**

Deals with classical theories of representation: issues of racial and political representation in U.S. legislatures and city councils; proportional representation models; and comparative election systems.

Prerequisite: SOC SCI 3A or SOC SCI 10A or SOC SCI 10B

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 124A. The Politics of Protest. 4 Units.**

Examines the Civil Rights, Black Power, and women's movements in relationship to the Asian American movement. Uses social movement theories to illuminate the cases, and the cases to critique and revise the theories.

Same as ASIANAM 144.

**(VII)****POL SCI 124B. Latinos in U.S. Politics. 4 Units.**

Comparing the political issues facing Latino groups by examining their migration histories, voting behavior, nonelectoral participation, and policy issues. Latino issues are examined on the national, state, and local levels, including formal representation, immigration, affirmative action, and language policy.

Same as CHC/LAT 151.

**(VII)****POL SCI 124C. Comparative Minority Politics. 4 Units.**

Examines the political experiences of Blacks, Latinos, and Asian Americans in the United States from roughly 1950 to the present. Focuses on how each group has pursued political empowerment via both conventional political channels and social movements.

Same as AFAM 151, CHC/LAT 147, ASIANAM 132.

**POL SCI 124E. African American Politics. 4 Units.**

Examines politics of African Americans in order to gain a broader perspective of the American political process. Major developments in African American politics (including the civil rights movement, Black presidential bids), continuing problem of racism, responsiveness of key governing institutions.

Same as AFAM 152.

**POL SCI 125A. The United States Congress. 4 Units.**

Does the Congress do a good job of representing the American citizenry? Is it the most appropriate mechanism for the creation, resolution, and implementation of public policy.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 125CW. Constitutional Convention. 4 Units.**

Analyzes the Constitution, its amendments, and periods of Constitutional reform as a foundation for a critical evaluation of the Constitution with an eye both to necessary reforms and to elements of the Constitution that should be maintained.

Prerequisite: POL SCI 21A. Satisfactory completion of the Lower-Division Writing requirement.

**(Ib)****POL SCI 126C. U.S. Immigration Policy. 4 Units.**

Examines selected immigration policy debates since the nineteenth century, rationale and consequences of immigration law since 1965, problems of administration, implementation and enforcement, impact of immigration policy on foreign relations, and contemporary debate regarding the future of U.S. policy.

Same as CHC/LAT 163.

**(VII)****POL SCI 126D. Urban Politics and Policy. 4 Units.**

Examines economic limits of cities and welfare policy. Addresses such issues as why are the poor concentrated in the central cities? Which anti-poverty programs will work best in cities? Which level of government can best combat poverty in the U.S.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 126F. Politics of Animal Rights. 4 Units.**

Examines animal rights/welfare movement's efforts to transform moral, practical, and legal standing of nonhuman animals in contemporary U.S. Explores intersection of racism, sexism, and speciesism informed by theories of race and ethnicity, including Asian American Studies.

Same as ASIANAM 168.

Restriction: Political Science Majors have first consideration for enrollment. Asian American Studies Majors have first consideration for enrollment.

**POL SCI 128BW. Political Ideologies: The Way We View Our World. 4 Units.**

Politics has become divisive and ideological. But ideologies are poorly understood and have become mere labels for identifying friends and enemies. Course analyzes the nature of ideology, focusing on liberalism, conservatism, fascism, socialism, and contemporary 'liberation' ideologies.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(lb)

**POL SCI 128C. Political Psychology. 4 Units.**

Examination of how psychological theory and research may be used to better understand political thought and behavior. Drawing on theories of learning, cognition, and personality, discusses such topics as the formation of political attitudes, and the process of political decision-making.

Same as PSYCH 176A.

Restriction: Majors only. POL SCI 128C may not be taken for credit if taken after POL SCI 137C.

**POL SCI 129. Special Topics in American Politics and Society. 4 Units.**

Studies in selected areas of American politics and society. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 130A. Game Theory and Politics I. 4 Units.**

Introduction to game theory and a survey of its political applications. Examples of topics covered include voting in small committees, legislatures, and mass elections; interest group activities and environmental issues; institutional design, and the evolution of cooperative behavior.

Same as SOCIOL 134, SOC SCI 103A.

Restriction: Social Policy/Public Service Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**POL SCI 130B. Game Theory and Politics II. 4 Units.**

More advanced game theory and its political applications, beginning where Game Theory and Politics I ends. Examples of topics covered include revolutions; arms race; spatial models of party competition; political manipulation; political coalitions and their power.

Prerequisite: POL SCI 130A or ECON 116A

Same as SOC SCI 103B.

Restriction: Social Policy/Public Service Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 131C. Modern Political Theory. 4 Units.**

Examines major thinkers and intellectual movements in the political thought of the 17th and 18th centuries.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 131F. Twentieth Century Political Theory. 4 Units.**

Examines major thinkers and intellectual movements in the political thought of the 20th Century.

Prerequisite: POL SCI 31A

**POL SCI 134F. Social and Political Theory. 4 Units.**

Focus is on recent major work in social and political theory. An in-depth analysis of a relatively small body of writing. Authors discussed include Jurgen Habermas, Anthony Giddens, and Richard Rorty.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 135A. Origins of Liberalism. 4 Units.**

Examines the ideals, social forces, and historical events that gave rise to liberal political theory. Topics include patriarchal authority, the divine right of kings, religious toleration, slavery, colonialism, political economy, the evolution of law, and tensions between liberty and equality.

Prerequisite: POL SCI 31A

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 135B. Just War Revisited. 4 Units.**

Examines the evolution of the doctrine of the just war across the history of Western political thought, the importance of changes in the doctrine and whether it applies today; examines international relations case studies to determine today's relevancy.

Same as INTL ST 131A.

**POL SCI 136B. Cannibals and Conquistadores: The Philosophy of the Other. 4 Units.**

Examines critically the notion of the 'other' by looking at the philosophical challenges difference poses in the context of the European discovery of the New World. Seeks to understand the naissence of the concept of human rights and tolerance.

**POL SCI 136BW. Cannibals and Conquistadores: The Philosophy of the Other. 4 Units.**

Examines critically the notion of the 'other' by looking at the philosophical challenges difference poses in the context of the European discovery of the New World. Seeks to understand the naissence of the concept of human rights and tolerance.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Overlaps with POL SCI 136B.

(Ib)

**POL SCI 137BW. Types of Political Representation. 4 Units.**

Political representation plays an important role in democratic systems, but is elusive once examined closely. Students delve into the concept and relate different views to political life. Half of the course is spent on writing instruction.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Recommended: Upper-Division students. Political Science majors have first consideration for enrollment.

(Ib)

**POL SCI 138A. The Moral of the Story: Introductory Seminar in Ethics. 4 Units.**

Introduces major theories and classic texts in ethics, from Plato and Aristotelian virtue ethics to utilitarianism and Kant and contemporary moral psychology.

**POL SCI 138AW. Moral of the Story: Introduction to Ethics. 4 Units.**

Focuses on how we learn about ethics from stories, in the form of fables, bedtime stories, religious stories, soap operas, television, and movies as adults. Students bring in stories that informed their own ethical development.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

**POL SCI 138CW. Ethics of Difference. 4 Units.**

Examines differences traditionally judged politically salient—race, ethnicity, religion, gender. Personal interviews with an elderly person encourage students to understand the social construction of difference and to reexamine their own attitudes by putting themselves in the place of another.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science Majors have first consideration for enrollment.

(Ib)

**POL SCI 138DW. The Moral Life During War. 4 Units.**

Can people keep their humanity during war? What does the term humanity signify when simply surviving requires faith, courage, and desperation? When facing wartime brutality, must we abrogate morality? What does it mean to compose a moral life during war?.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science Majors have first consideration for enrollment.

Concurrent with POL SCI 238D.

**(Ib)**

**POL SCI 139. Special Topics in Political Theory and Methods. 4 Units.**

Studies in selected areas of political theory and methods. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 141B. International Political Economy. 4 Units.**

Examination of problems in global political-economic relations through competing conceptual lenses or grand theories: mercantilism, liberalism, and Marxism. Surveys North-North and North-South issues relating power and wealth.

Same as INTL ST 114A.

**(VIII)**

**POL SCI 141C. International Political Economy of East Asia. 4 Units.**

Integration of theoretical perspectives in international political economy with the study of economic development in East Asia, with special emphasis on regional integration.

**(VIII)**

**POL SCI 141E. U.S. Foreign Policy Toward Asia. 4 Units.**

U.S. policy toward the countries of East Asia: bilateral and regional security relationships, U.S. economic relations with the major Asian countries, the development of regional institutions, and human rights.

Same as INTL ST 142G.

**POL SCI 142B. The International Relations of East Asia. 4 Units.**

Surveys various aspects of relations between the nations of East Asia. Topics include the historical development of the region; current political and security relations, including the impact of the American military presence.

Same as INTL ST 142D.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 142D. U.S. Foreign Policy I: Globalism and Cold War. 4 Units.**

Looks at changing international perspectives, policy responses, and military strategies of presidential administrations from Truman to Reagan. In assessing the motives and objectives of U.S. foreign policy leaders during the "Cold War" era, the concept of "national interest" is examined.

Same as INTL ST 142A.

Restriction: International Studies Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment.

**POL SCI 142G. U.S. Coercive Diplomacy. 4 Units.**

Examines the theory of compellence and the U.S. practice of coercive diplomacy--the power to change behavior of other governments. Specific case examples: the Cuban missile crisis, bombing of North Vietnam, the Nicaraguan Contras, Desert Shield/Desert Storm, and Libya.

Same as INTL ST 142E.

Restriction: Upper-division students only. Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 142J. U.S. Intervention in Latin America. 4 Units.**

Explores political, economic, social, and cultural ties that bind Latin America to the United States. Focuses on U.S. intervention and Latin American response from early nineteenth century to present day. Case studies include Mexico, Guatemala, Cuba, Chile, and Central America.

Same as HISTORY 166, INTL ST 177D, CHC/LAT 150.

**POL SCI 143G. Homeland Security . 4.0 Units.**

Examines the 9/11 origins of the concept of homeland security; assess the evolution, structure, and operations of the Department of Homeland Security; critically examines the evolution of threat assessment to the U.S. and the utilization of risk management methodologies.

Same as INTL ST 141B.

**POL SCI 144A. Approaches to International Relations. 4 Units.**

Reviews theoretical and methodological approaches to the study of international relations using contending perspectives to analyze power and influence, capabilities, interdependence, reciprocity, international regimes, anarchy, cooperation, imperialism, and hegemony.

Same as INTL ST 140A.

Restriction: Upper-division students only. Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 145A. Ethics in an Age of Terror and Genocide. 4 Units.**

Original sources document personal impact of wars on genocides, from World War II to the Bosnian and Rwandan genocides and current wars in Iraq and Afghanistan. Students train for and conduct personal interviews with someone who lived through a war.

Same as INTL ST 154C.

**POL SCI 146B. Religion and World Politics. 4 Units.**

Examines the relationship between religion and world politics historically and today, focusing on connections with peace/war, democracy, human rights, secularism(s), and globalization. Covers major debates, scholarship, concepts, and theories through class exercises, exams, and essays.

Prerequisite: POL SCI 41A or INTL ST 11 or INTL ST 12 or REL STD 5A or REL STD 5B or REL STD 5C

Same as REL STD 115, INTL ST 151B.

**POL SCI 147CW. International Humanitarianism. 4 Units.**

Examines, analyzes, and evaluates the humanitarian phenomenon, the actors involved in it (including states, international organizations (IOs), and nongovernmental organizations (NGOs)), the rise of a body of international humanitarian law, and the problems and debates associated with international humanitarianism today.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as INTL ST 147CW.

**(Ib)****POL SCI 147D. International Organizations. 4 Units.**

Active learning course that examines origins, decision-making processes, activities, and evolution of leading international organizations (e.g. U.N., NATO, EU, AU, WTO, World Bank, IMF). Activities include drafting reforms, applying theory, assessing dysfunctions, and participating in U.N. negotiation simulations.

Same as INTL ST 147D.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 147E. Critical Investigations into Humanitarianism in Africa. 4 Units.**

Explores the complex phenomenon of aid to Africa (emergency and development aid), and the representational, cultural, historical, and other reasons why some participants and many observers critique it. Students occasionally engage with peers and faculty in African institutions.

**(VIII)****POL SCI 149. Special Topics in International Relations. 4 Units.**

Studies in selected areas of international relations. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 151B. Introduction to Chinese Politics. 4 Units.**

Background to the Chinese revolution, rise of the communist party; and institutions, ideology, and structure of Communist party rule from 1949-present.

Same as INTL ST 176C.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 151C. Chinese Politics: Policy, Leadership, and Change. 4 Units.**

Examines major policies from 1949 to the present, and considers the changing role of the Communist Party and its shifting treatment of various social groups; the era of Mao Zedong, reforms under Deng, and post-Deng politics.

Same as INTL ST 176D.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 151H. Voting and Political Manipulation. 4 Units.**

Introduction to social choice and cooperative games. Topics include majority rule, types of voting methods, apportionment and proportional representation, agenda manipulation, coalition formation, voting power, political consequences of electoral laws.

Same as INTL ST 156A, SOC SCI 121T, ECON 154.

Restriction: International Studies Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**POL SCI 152F. West European Politics. 4 Units.**

Explores four main themes: (1) thinking scientifically about politics; (2) understanding the linkages between different political structures and spheres of activity; (3) evaluating some theories about politics; (4) learning about three countries: Britain, France, and Germany.

Same as INTL ST 176I.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 152K. Immigration Politics in Western Europe. 4 Units.**

Examines immigration politics in Western Europe, analyzing trends and policy from the postwar period through to today. Topics include citizenship, immigrant integration, asylum, the far-right, and a rotating focus on contemporary issues, e.g., terrorism, Islamophobia.

Same as INTL ST 178A.

Overlaps with POL SCI 141D.

**POL SCI 153B. Canadian Politics. 4 Units.**

Addresses the basic structures and processes of contemporary Canadian government and politics. Additional topics may include regionalism, federalism, western alienation and oil, Canadian solutions to social welfare policy questions, developments in Quebec, and other issues associated with French-English relations.

Same as INTL ST 176L.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 153E. Human Rights. 4 Units.**

Examines the causes and consequences of human rights violations with a focus on Latin America. What are human rights? When and where are they violated? What political mechanisms are available to deal with human rights problems? How effective are they.

Same as INTL ST 154B.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 153G. Cuban Society and Revolution. 4 Units.**

Explores the causes, development, and legacy of the 1959 Revolution. Themes include economic dependency, democracy, race, gender, culture, and the always volatile relations between Cuba and the United States.

Same as INTL ST 177E, HISTORY 166C, CHC/LAT 157.

**POL SCI 154C. Comparative Politics: Four Nations, Three Continents. 4 Units.**

Studies four countries in a comparative fashion: their respective political histories and cultural traditions; actual differences among their superficially similar party, parliamentary, and executive institutions; contemporary economic policy. The countries represent three continents and varying levels of economic development.

Same as INTL ST 144A.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 154F. Peoples and Cultures of Post-Soviet Eurasia. 4 Units.**

Examines the cultures and political conflicts of the more than 130 indigenous ethnic groups in the European and Asian territories of the former U.S.S.R. Emphasis is on the theoretical issues of ethnicity, nationalism, and conflict management.

Same as INTL ST 162B, ANTHRO 164P.

**(VIII)****POL SCI 154G. Conflict Resolution in Cross-Cultural Perspective. 4 Units.**

Examines theories of conflict management. Analyzes how conflict is mitigated in diverse cultures: at the interpersonal level, between groups, and on the international scale. Students discuss readings, hear from conflict management practitioners, and simulate negotiations.

Same as ANTHRO 136D, SOC SCI 183E, INTL ST 183E.

**(VIII)****POL SCI 154J. Jews and Power. 4 Units.**

Examines the relationship between the Jewish people and political power over a 3500 year period. How have Jews preserved their communal interests and personal safety? How have they defined the proper relationship of the people to political authority.

Same as HISTORY 130F, REL STD 130F.

**POL SCI 154KW. US Government in Comparative Perspective. 4 Units.**

Introduction to the United States in comparative perspective, covering general features of the United States and other countries, such as institutional design and policy choices. Addresses the debates about American exceptionalism and American decline.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science Majors have first consideration for enrollment.

**(Ib)****POL SCI 155C. Organizations. 4 Units.**

How bureaucracies, formal organizations, and voluntary associations work, how/why they grow, and where they are going. History and structure of organizational rationality; dynamics of organized groups; behavior in organizations; limits of bureaucratization and attempts to overcome these limits through decentralization.

Same as SOCIOL 141.

Restriction: Sociology Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment.

**POL SCI 156A. Political Participation. 4 Units.**

The ways in which people in various political systems take part in politics, especially in activities directed toward affecting outcomes. Who is active, what they do, why they do it, and what difference it makes.

**POL SCI 156D. Protests, Movements, and Revolutions. 4 Units.**

A survey of models of collective action drawn from sociology, economics, psychology, and political science. Focus on areas such as social movements, strikes, crowd psychology, cults, fads, fashions, public opinion, and symbolic and mythical elements in collective culture.

Prerequisite: SOCIOL 1 or POL SCI 11A or ECON 1

Same as SOCIOL 174.

Restriction: Political Science Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**POL SCI 157B. International Divided Cities. 4 Units.**

Investigates urban divisions in international cities where deep-seated nationalistic ethnic differences create pressures for intergroup conflicts, autonomy, or territorial separation, and can incite violence. Urban political polarization as it is manifest in the urban setting.

Same as UPPP 178, SOCIOL 176.

**POL SCI 158D. Introduction to Contemporary Middle East Politics. 4 Units.**

An overview of basic issues that shape the politics of the Middle East and North Africa. Themes include implication of the colonization era, nation-state formation, inter-Arab relations, nationalism, Arab-Israel conflict, Islamic resurgence, and more.

Same as SOC SCI 188A, INTL ST 165.

**POL SCI 159. Special Topics in Comparative Politics. 4 Units.**

Studies in selected areas of comparative politics. Topics addressed vary each quarter.

Repeatability: May be repeated for credit unlimited times.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 169. Special Topics in Race and Ethnicity Politics. 4 Units.**

Studies in selected areas of race and ethnicity. Topics vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 171AW. Law and Society. 4 Units.**

Law and its various roles in society. The nature and meaning of law; legality and power in the American system; law as a mechanism for social change; the role of law in dispute processing, social control, compliance with judicial decisions.

Prerequisite: POL SCI 71A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science Majors have first consideration for enrollment.

**(Ib)**

**POL SCI 171CW. Comparative Constitutional Politics. 4 Units.**

Examines the impact of constitutional courts on politics and policy-making in Canada, France, Germany, and the United States. Cases may focus on the constitutional politics of free speech, abortion, rights to property, and the conduct of foreign relations.

Prerequisite: POL SCI 71A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science Majors have first consideration for enrollment.

**(Ib)**

**POL SCI 171D. American Constitutional Law. 4 Units.**

American constitutional interpretation of cases involving separation of powers, federal-state relations, rights of property, free expression, privacy, criminal due process, political participation, and equality. Includes legal research methods, development of judicial review, legal reasoning, and impact of Supreme Court decisions.

Prerequisite: POL SCI 71A

Overlaps with CRM/LAW C122.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 171F. Law in the Twenty-First Century. 4 Units.**

Examines the complex relationship between law, the social sciences, and modern society. Lectures explore such issues as the interplay between technology and constitutional rights, the impact of science on law, and the evolving roles of attorneys and judges.

Same as SOC SCI 172D.

Restriction: Political Science Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment.

**POL SCI 171G. Legal Implications of the Drug Trade. 4 Units.**

Examines United States policy to combat domestic and international narcotics trafficking. Analyzes the national drug policy and program implementation by federal and state agencies. Considers the effects of these policies on our individual constitutional rights and the criminal justice system.

**POL SCI 172A. International Law. 4 Units.**

Examination of the origin, changing structure, application of international law, and the role of legal norms in regulating the behavior of states and maintaining international order.

Prerequisite: POL SCI 71A

Same as INTL ST 145A.

**(VIII)****POL SCI 174A. Civil Liberties. 4 Units.**

Political analysis of selected Supreme Court cases involving claims under the Bill of Rights and the Fourteenth Amendment. Topics include: race, sex, and other forms of discrimination; criminal justice; privacy; freedom of speech and related claims.

Prerequisite: POL SCI 71A

Overlaps with CRM/LAW C122.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 174C. U.S. Supreme Court. 4 Units.**

Overview and analysis of the role played by the U.S. Supreme Court in the American political system. Judicial review, appointment of justices, judicial activism and judicial restraint, process of case selection, court deliberation, and decision-making, impact of Supreme Court decisions.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 174CW. U.S. Supreme Court. 4 Units.**

Overview and analysis of the role played by the U.S. Supreme Court in the American political system. Judicial review, appointment of justices, judicial activism and judicial restraint, process of case selection, court deliberation, and decision-making, impact of Supreme Court decisions.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science Majors have first consideration for enrollment.

**(Ib)****POL SCI 175. The Bill of Rights in Film. 4 Units.**

Focuses on ways American cinema has portrayed, represented, and analyzed U.S. Bills of Rights. Juxtaposes cinematic presentations on specific Bill of Rights clauses, treating films as cultural texts, with pertinent judicial decisions and more scholarly appraisals of those same provisions.

**POL SCI 179. Special Topics in Public Law. 4 Units.**

Studies in selected areas of public law. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI H180D. Honors Seminar in Political Science. 2-4 Units.**

Course for students enrolled in the Honors Program in Political Science.

Prerequisite: Only open to students in the Political Science Honors Program.

Repeatability: May be repeated for credit unlimited times.

**POL SCI H182A. Honors Thesis Workshop. 4 Units.**

A weekly seminar/workshop to facilitate the exchange of ideas and research strategies among students and to review their progress in writing the thesis.

Restriction: Open only to students in the Political Science Senior Thesis program.

**POL SCI 190W. Senior Thesis. 4 Units.**

Thesis research with Political Science faculty.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 3 times.

**(Ib)**

**POL SCI 197. Field Study. 1-4 Units.**

Field study with Political Science faculty.

Repeatability: Unlimited as topics vary.

**POL SCI 198. Directed Group Study. 1-4 Units.**

Directed group study with Political Science faculty.

Repeatability: Unlimited as topics vary.

**POL SCI 199. Independent Study. 1-4 Units.**

Independent study or research with a Political Science faculty member.

Repeatability: May be repeated for credit unlimited times.

**POL SCI 209A. Study of Democracy Colloquium. 1.33 Unit.**

Skills critical to professional success. Students learn and practice professional presentation skills, develop substantive knowledge in the field by attending talks and panels, and interact with scholars and professionals in the field.

Restriction: Graduate students only. POL SCI 209A may not be taken for credit if taken after SOCIOL 229.

**POL SCI 209B. Study of Democracy Colloquium. 1.33 Unit.**

This colloquium teaches students skills critical to professional success. Students learn and practice professional presentation skills and develop substantive knowledge in the field by attending talks and panels and interacting with scholars and professionals in the field.

Restriction: Graduate students only. POL SCI 209B may not be taken for credit if taken after SOCIOL 229 Democracy.

**POL SCI 209C. Study of Democracy Colloquium . 1.34 Unit.**

This colloquium teaches students skills critical to professional success. Students learn and practice professional presentation skills and develop substantive knowledge in the field by attending talks and panels and interacting with scholars and professionals in the field.

Restriction: Graduate students only. POL SCI 209C may not be taken for credit if taken after SOCIOL 229 Democracy.

**POL SCI 210A. Colloquium. 1.3 Unit.**

Doctoral training requires more than learning substantive debates and research methods; it also requires students learn professional practices, routines, and expectations. This year-long workshop offers students a mix of professional development, outside speakers, and casual conversations with departmental faculty.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**POL SCI 210B. Colloquium. 1.3 Unit.**

Doctoral training requires more than learning substantive debates and research methods; it also requires students learn professional practices, routines, and expectations. This year-long workshop offers students a mix of professional development, outside speakers, and casual conversations with departmental faculty.

Prerequisite: POL SCI 210A

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**POL SCI 210C. Colloquium. 1.4 Unit.**

Doctoral training requires more than learning substantive debates and research methods; it also requires students learn professional practices, routines, and expectations. This year-long workshop offers students a mix of professional development, outside speakers, and casual conversations with departmental faculty.

Prerequisite: POL SCI 210B

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**POL SCI 212A. Public Opinion. 4 Units.**

Introduction to the study of U.S. public opinion. Provides an overview of the theories regarding opinion formation, the methodologies employed, and the role of public opinion in democratic governments.

Restriction: Graduate students only.

**POL SCI 212B. Ethics Workshop. 4 Units.**

Students find an important question in ethics, search literature to assess topic's importance, post question to be researched, propose method of analysis and type of data, analyze data, and note how their works contribute to knowledge in the field.

**POL SCI 219. Special Topics in Politics and Society. 4 Units.**

Current research in politics and society.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**POL SCI 221A. Public Policy. 4 Units.**

Explores different approaches to public policy analysis, the diverse conceptions of the goals and objectives that should be served by policy, and the appropriate role of the policy analyst. Policy consequences are traced to indirect and subtle incentives and disincentives.

Same as CRM/LAW C255, UPPP 221.

Restriction: Graduate students only.

**POL SCI 223A. Theories of Power and Empowerment. 4 Units.**

Studies different ways of thinking about power and its uses. Explores theories of power that inform various notions of empowerment, including resistance, participatory democracy, and workplace empowerment.

Same as MGMTPHD 297R, UPPP 279.

Restriction: Graduate students only.

**POL SCI 229. Special Topics in American Politics. 4 Units.**

Current research in American Politics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**POL SCI 231A. Political Epistemology. 4 Units.**

Focuses on fundamental issues of knowledge in the study of politics, especially interconnections and tensions between politics and knowledge. Counts as the Field Seminar in Political Theory.

Restriction: Graduate students only.

**POL SCI 231B. Theories of Textual Interpretation. 4 Units.**

Examination of different theories of textual interpretation, including Straussian, hermeneutical, poststructuralist, feminist, postcolonial, and critical race theories. Key questions include: How does one go about the task of interpreting texts? What makes one interpretation better or more insightful than another.

Restriction: Graduate students only.

**POL SCI 232A. Introduction to Voting Theory. 4 Units.**

Introduction to voting modules. Substantive topics include majority rule, voting methods and their properties, apportionment and proportional representation, agenda manipulation, coalition formation, voting power, political consequences of electoral laws.

Restriction: Graduate students only.

**POL SCI 238D. The Moral Life During War. 4 Units.**

Can people keep their humanity during war? What does the term humanity signify when simply surviving requires faith, courage, and desperation? When facing wartime brutality must we abrogate morality? What does it mean to compose a moral life during war?

Restriction: Graduate students only. Political Science Majors have first consideration for enrollment.

Concurrent with POL SCI 138DW.

**POL SCI 239. Special Topics in Political Theory. 4 Units.**

Current research in political theory. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**POL SCI 241B. Seminar in International Relations Theory. 4 Units.**

Overview of the major theories guiding research and scholarship in international relations. Focus on major conceptual approaches (realism, neoliberalism, marxism) and levels of analysis (systemic, state, and subnational), as well as on methodological/epistemological debates engulfing the field.

Restriction: Graduate students only.

**POL SCI 241E. Research Design in International Relations. 4 Units.**

Surveys research design primarily through substantive readings in international relations. The purpose is to familiarize students with choices/dilemmas relevant to IR-specific research. Students at various stages in the graduate program and with different methodological orientations are welcome.

**POL SCI 249. Special Topics in International Relations. 4 Units.**

Current research in international relations. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**POL SCI 252G. Theories and Practice of Migration and Citizenship. 4 Units.**

Examines theories of migration and citizenship. In examining these themes, the course includes discussion of theory development, multi-method testing, and case study comparison with a focus on Western Europe and other advanced democratic receiving states.

**POL SCI 254A. Introduction to Game Theory. 4 Units.**

Introduction to non-cooperative games. The prisoner's dilemma, Nash equilibrium, sequential games, subgame perfection. Applications include collective action, agenda-setter models, spatial competition of political parties, models of revolution and arms race.

Restriction: Graduate students only.

**POL SCI 259. Special Topics in Comparative Politics. 4 Units.**

Current research in comparative politics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**POL SCI 260B. Political Participation. 4 Units.**

Examines theoretical approaches to the explanation of the pattern of participation and consideration of the results of empirical studies of such activity by mass publics (mainly in Europe and North America). Addresses issues in both comparative politics and political behavior.

Restriction: Graduate students only.

**POL SCI 273A. Advanced Qualitative Methods: Analyzing Qualitative Data. 4 Units.**

Introduction to the theory and practice of analyzing qualitative data. Students must have already learned about data collection and research design for qualitative research and must have qualitative data they can analyze.

Same as MGMTPHD 297K, UPPP 213.

Restriction: Graduate students only.

**POL SCI 276. Predictive Models in Social Sciences. 4 Units.**

Basic numeracy (logarithms, fixed-exponent and exponential formats, graphing). Models based on ignorance and logical constraints. Logical quantitative models (how things should be) to complement and guide statistical analysis (how things are).

**POL SCI 285A. Introduction to Political Psychology I. 4 Units.**

Reviews theoretical questions regarding the relationship between the analytical and normative and the polity. Considers relationships between the analytical and normative concerns of psychology and political science, addressing empirical literatures on political socialization, ideology and public opinion, identity and nationality.

**POL SCI 290. Dissertation Research. 1-12 Units.**

Dissertation research with Political Science faculty.

Repeatability: Unlimited as topics vary.

**POL SCI 299. Independent Study. 1-12 Units.**

Independent research with Political Science faculty.

Repeatability: Unlimited as topics vary.

## Political Science, B.A.

As a political science major at UCI, you explore how politics works at the individual, group, national, and international levels. Students are introduced to the findings and the methods for gathering information about political behavior and political processes. Course work emphasizes the development of analytic thinking and clear writing skills. Upper-division courses are organized around general areas of study, including American society and politics, comparative politics, international relations, public law, and political theory.

Students have many opportunities to pursue special topics in political science through independent study courses, field studies, the department's honors program and internships. Many political science majors participate in such programs as the UC/DC Internship Program, in Washington, D.C. and the University's Education Abroad Program. Political science majors learn how to understand politics and acquire the skills for effective performance in many professional fields.

To major in the program, contact the Social Science Undergraduate Student Affairs. ([http://undergraduatestudies.ss.uci.edu/ugs\\_usa\\_contact/](http://undergraduatestudies.ss.uci.edu/ugs_usa_contact/))

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Departmental Requirements for the Major

School requirements must be met and must include 12 courses (48 units) as specified below:

A. Select four lower-division (one or two digit) POL SCI courses below. One must be the introductory course for the module selected under II below.

POL SCI 11A	Introduction to Political Science: Political Analysis
POL SCI 11B	
POL SCI 11C	Introduction to Political Science: Micropolitics
POL SCI 21A	Introduction to American Government
POL SCI 31A	Introduction to Political Theory
POL SCI 41A	Introduction to International Relations
POL SCI 51A	Introduction to Politics Around the World
POL SCI 61A	Introduction to Race and Ethnicity in Political Science
POL SCI 71A	Introduction to Law

Complete any one additional lower-division POL SCI course (not used above) (4 units)

B. Seven upper-division POL SCI courses (28 units) chosen from among the POL SCI modules numbered 120–179. Three of these courses must be from one module.

American Politics and Government (POL SCI 120-129)
Political Theory and Methods (POL SCI 130-139)
International Relations (POL SCI 140-149)
Comparative Politics (POL SCI 150-159)
Public Law (POL SCI 170-179)

The Honors Program in Political Science is open to all senior political science majors who meet the minimum academic qualifications (3.5 GPA in political science courses and 3.2 GPA overall). Students submit an application to the department office before the end of their junior year. In addition to satisfying the requirements for the major in political science, honors program participants must complete additional course work as specified below.

During the year prior to the year in which the thesis will be written, a prospective honors program student should identify a Department of Political Science faculty member who is willing to supervise the student's thesis. Students are ordinarily expected to take an upper-division political science course or a POL SCI 199 Independent Study course with the advisor prior to their senior year.

During their senior year, students must enroll in the Honors Thesis Workshop (POL SCI H182A), offered during the fall quarter. This course is in addition to the seven upper division courses required for the regular major. Honors students also enroll in three quarters of the senior thesis course (POL SCI 190W) with their advisor, which are independent study courses for writing the thesis. The POL SCI 190W courses do not count toward the upper-division political sciences courses required for the major although they are counted as 'other' upper-division social science courses towards graduation requirements. Students write their senior thesis, which is designed and completed under their faculty advisor's supervision. Upon successful completion of the program, including approval of their senior honors thesis by the faculty advisor and a GPA of at least 3.5 in their political science courses, the students will graduate with honors in Political Science and their transcripts note that they were in the Honors Program in Political Science.

## Political Science, Minor

Are you interested in studying Political Science but do not want to major in it? You may want to consider the minor in Political Science. The program enables you to explore the field beyond the introductory level but in less depth than the major.

To minor, contact the Social Sciences Undergraduate Student Affairs Office ([http://undergraduatestudies.ss.uci.edu/ugs\\_usa\\_contact/](http://undergraduatestudies.ss.uci.edu/ugs_usa_contact/)).

### Political Science Minor Requirements

Requirements for the minor in Political Science are met by taking seven political science courses (28 units) as specified below:

A. Select one of the following:

POL SCI 11A	Introduction to Political Science: Political Analysis
POL SCI 11B	
POL SCI 11C	Introduction to Political Science: Micropolitics
POL SCI 21A	Introduction to American Government
POL SCI 31A	Introduction to Political Theory
POL SCI 41A	Introduction to International Relations
POL SCI 51A	Introduction to Politics Around the World
POL SCI 61A	Introduction to Race and Ethnicity in Political Science
POL SCI 71A	Introduction to Law

B. Select six additional Political Science courses, four of which must be upper-division.

## Political Science, Ph.D.

The Department of Political Science offers a Ph.D. program in Political Science. The department has attained a reputation for producing the very best innovative and interdisciplinary scholarship. Faculty are engaged in the study of such key questions as the politics of advanced and democratizing societies, international cooperation and peace, the politics of racial and ethnic minority groups, and the origins of altruism and morality and their impact on world politics.

Graduate students can pursue concentration in public choice and specializations in democracy studies, international relations, and race and minority politics. The Ph.D. program offers big payoffs to graduate students, in fact, because of the extended range of inquiry an interdisciplinary program affords.

Political science faculty members are regular participants in and help direct several research units on campus. The Center for the Study of Democracy, an Organized Research Unit at UCI, sponsors research and education aimed at improving the democratic process in the United States and expanding democracy around the world. The UCI Interdisciplinary Center for the Scientific Study of Ethics and Morality explores questions concerning the origins and causes of morality. The Center for Global Peace and Conflict Studies (CGPACS), housed in the School of Social Sciences, is a multidisciplinary program dedicated to promoting scholarly, student and public understanding of international conflict and cooperation. The Institute for Mathematical Behavioral Sciences, also located in the School of Social Sciences, offers opportunities for participation in ongoing faculty research, notably with faculty members engaged in fields of public choice and political economy.

The deadline for application for fall quarter admission is December 1. Applications received after the deadline may be considered, although it is not guaranteed they will be reviewed. Students are admitted for winter or spring quarters only under exceptional circumstances. Additional information is available in the general section on admission to social science graduate programs. Please note especially the required examinations.

### Requirements

During the first two years in the doctoral program, students must complete three of the following five seminars: Field Seminar in American Politics, Field Seminar in Comparative Politics, Field Seminar in International Relations, Field Seminar in Political Theory, and Foundations of Political Science. Prior to advancement to Ph.D. candidacy, doctoral students must complete two fields of study, one of which must come from the following list: American Politics, Comparative Politics, International Relations, or Political Theory. Each student must complete a second field, which may come (1) from one of the four listed above; (2) from an area of faculty strength, such as democracy studies, methodology and modeling, critical theory, ethics, political psychology, political economy/public choice, race and ethnicity, or public law; or (3) from a specialized area of interdisciplinary study. If the student chooses the specialized area of interdisciplinary study (3), this area must be approved by the student's advisor and the graduate committee. Students must complete four or five courses in their first field and three–five courses in their second field. The precise number is to be determined in each field by the field faculty. The field seminar in each field counts as one of the required courses.

Students are expected to have successfully completed course work resulting in knowledge of basic introductory statistics. Students who do not have this preparation must acquire the equivalent background during their first or second year in graduate school. Undergraduate statistics courses are considered to be remedial, and thus will not count toward graduate course credit needed for the Ph.D. Competence in a foreign language is required. Students may substitute mastery of an advanced research skill or an advanced qualitative skill in place of a foreign language. To acquire such a quantitative skill (which could involve course work in such disciplines as economics, mathematics and computer science, or statistics), students must complete at least one year of upper-level, undergraduate course work in mathematics, economics, or computer science or one year in graduate-level

statistics beyond the required minimum of two quarters of introductory statistics. To acquire a qualitative skill, students must complete at least one year of graduate-level course work in qualitative or interpretative research methods. A student electing to meet the foreign language requirement should select a foreign language which is useful for research in his or her dissertation or in which there is a substantial body of scholarly literature.

### Reviews and Examinations

Students ordinarily are expected to maintain a grade point average of 3.5 or better. At the completion of the first year, a review of performance in the graduate program will be conducted for each student by the political science faculty.

Students must complete two qualifying papers. The first qualifying paper must be completed and approved by the end of the winter quarter of a student's second year in the program; the second qualifying paper must be completed and approved by the winter quarter of a student's third year in the program. There must be two faculty readers on each qualifying paper, and only one faculty reader may serve as a reader on both papers. Upon successful completion of these papers and demonstration of competence in a foreign language, mastery of an advanced quantitative skill, or an advanced qualitative skill, a candidacy committee is appointed to oversee the qualifying examination and the formal advancement to candidacy. Students are expected to advance to candidacy by the end of their eighth quarter in the Ph.D. program. All students must pass the advancement to candidacy examination by the end of the tenth quarter in the Ph.D. program.

After the student advances to candidacy, the doctoral committee, usually composed of three members of the candidacy committee, reviews a dissertation prospectus and supervises work toward completion of the dissertation. Within six months of the oral qualifying examination (the formal advancement to candidacy), students are expected to meet with their doctoral committee, in order to discuss with the members a dissertation prospectus.

The normative time for completion of the Ph.D. is six years, and the maximum time permitted is seven years.

### Ph.D. in Political Science with a Concentration in Public Choice/Political Economy

Public choice is an interdisciplinary field, at the intersection of political science and economics, which draws on sophisticated quantitative tools to model the functioning of political institutions. Public choice examines such areas as theories of voter and party choice; the theory of constitutions; the theory of committees and elections; models of regulation; problems of public goods and externalities; rent-seeking models; and issues in social choice, social welfare, and demand revelation.

This concentration is administered by an interdisciplinary committee of faculty from the Departments of Political Science and Economics.

### Requirements

Students who elect this concentration are admitted under the normal procedures for the program in political science and must fulfill all the requirements for the political science degree, with the following modifications:

1. Students must complete the three-quarter core sequence in public choice, which is taught jointly by political science and economics faculty. This sequence is usually taken in the student's second or third year.
2. Students must complete three additional graduate-level, four-unit courses in related fields with the consent of their graduate advisor, chosen from a set of courses designated by the interdisciplinary committee. The courses chosen are to be tailored to the individual interests and academic background of the student and usually will include at least two economics courses (such as Econometrics, Game Theory, and Law and Economics) and one political science course (such as those on electoral systems, party systems, constitutions, courts).
3. Students are expected to write their dissertation on a topic related to public choice. Usually the dissertation advisor will be a political science member of the interdisciplinary committee.

### Program in Law and Graduate Studies (J.D./Ph.D.)

Highly qualified students interested in combining the study of law with graduate research and/or professional qualifications in political science are invited to undertake concurrent degree study under the auspices of UC Irvine's Program in Law and Graduate Studies (PLGS). Students in this program pursue a coordinated curriculum leading to a J.D. degree from the School of Law in conjunction with a Ph.D. degree in political science. Additional information is available from the PLGS program director's office, 949-824-4158, or by email to [plgs@law.uci.edu](mailto:plgs@law.uci.edu). A full description of the program, with links to all relevant application information, can be found at the School of Law Concurrent Degree Programs website (<http://www.law.uci.edu/academics/interdisciplinary-studies/concurrent-degrees.html>).

## Department of Sociology

### Department Chair

4211 Social Science Plaza B

949-824-6800

<http://www.sociology.uci.edu/>

Sociology involves the study of societies and human groups. It examines social conflict and cooperation, inequality and the social organization of families, communities, workplaces and nations. The program at UCI covers the breadth of the discipline while giving students opportunities to conduct independent research, participate in an Honors Program, and to take advantage of departmental opportunities in such areas as business, economy

and organizations; diversity and inequality; global and international sociology; and social problems and public policy. All students take basic courses on social institutions, theory and methods. Students then take more specialized courses such as race and ethnicity, social psychology, sociology of gender, or political sociology. Courses are enriched by ongoing faculty research on such topics as the work and family of immigrants to the U.S., economic change in Asia, the relation between women and men in different social classes and ethnic groups, and attitudes on sexual behavior.

In addition to developing students' ability to critically analyze and understand social patterns, the major is relevant to professional careers in education, social work, urban planning, law, business, public health, non-governmental organization, and government service. It also provides training for advanced graduate work in sociology and related fields.

## Program in Law and Graduate Studies (J.D./Ph.D.)

Highly qualified students interested in combining the study of law with graduate research and/or professional qualifications in Sociology are invited to undertake concurrent degree study under the auspices of UC Irvine's Program in Law and Graduate Studies (PLGS). Students in this program pursue a coordinated curriculum leading to a J.D. from the School of Law in conjunction with a Ph.D. in Sociology. Additional information is available from the PLGS director's office, 949-824-4158, or by email to [plgs@law.uci.edu](mailto:plgs@law.uci.edu). A full description of the program, with links to all relevant application information, can be found at the School of Law Concurrent Degree Programs website (<http://www.law.uci.edu/academics/interdisciplinary-studies/concurrent-degrees.html>).

- Sociology, B.A.
- Sociology, Minor
- Sociology, Ph.D.

## Faculty

Edwin Amenta, Ph.D. University of Chicago, *Professor of Sociology; Political Science* (political sociology, historical and comparative sociology, social movements, social policy)

Stanley Bailey, Ph.D. University of California, Los Angeles, *Professor of Sociology; Religious Studies* (race and ethnicity, religion, immigration, Latin America)

Nina Bandelj, Ph.D. Princeton University, *Professor of Sociology* (economic sociology, culture, organizations, social networks, political economy, globalization, social change, central and eastern Europe)

Frank D. Bean, Ph.D. Duke University, *UCI Distinguished Professor of Sociology; Economics; Education* (international migration, demography, Mexican immigration, racial and ethnic relations, economic sociology, family)

Catherine I. Bolzendahl, Ph.D. Indiana University, *Associate Professor of Sociology* (gender, gender and sexuality studies, the welfare state, political sociology, comparative sociology, family, quantitative methodology)

Susan K. Brown, Ph.D. University of Washington, *Professor of Sociology; Religious Studies* (immigration, inequality, urban sociology)

Carter Butts, Ph.D. Carnegie Mellon University, *Professor of Sociology; Computer Science; Electrical Engineering and Computer Science; Statistics* (mathematical sociology, social networks, quantitative methodology, human judgment and decision making, economic sociology)

Katherine Faust, Ph.D. University of California, Irvine, *Professor of Sociology* (social networks, animal social organization, population processes and social networks, research methods)

David John Frank, Ph.D. Stanford University, *Professor of Sociology; Education; Political Science* (globalization, sexuality, the natural environment, higher education)

Rachel E. Goldberg, Ph.D. Brown University, *Assistant Professor of Sociology* (health, social demography, family, children and youth, gender, migration)

Ann Hironaka, Ph.D. Stanford University, *Professor of Sociology; Asian American Studies* (political sociology, war and peace, environmental sociology, ethnic and racial conflict)

Matthew L. Huffman, Ph.D. University of California, Santa Barbara, *Professor of Sociology* (inequality, organizations, work and employment, research methods)

Julia C. Lerch, Ph.D. Stanford University, *Assistant Professor of Sociology* (sociology of education, global and transnational sociology, civic education, humanitarian emergencies, international organizations)

Shampa Mazumdar, Ph.D. Northeastern University, *Lecturer of Sociology; Religious Studies* (religion, immigration, Asian American, urban sociology)

David S. Meyer, Ph.D. Boston University, *Professor of Sociology; Political Science; Urban Planning and Public Policy* (social movements, public policy, peace and war, social justice)

Andrew Penner, Ph.D. University of California, Berkeley, *UCI Chancellor's Fellow and Professor of Sociology* (gender, inequality, education, family, race)

Francesca Polletta, Ph.D. Yale University, *Professor of Sociology* (social movements, democracy, culture, sociology of law, political sociology, social theory)

Charles C. Ragin, Ph.D. University of North Carolina at Chapel Hill, *UCI Chancellor's Professor of Sociology* (comparative and historical sociology, social inequality, political sociology, quantitative methodology, qualitative methodology)

Belinda Robnett, Ph.D. University of Michigan, *Professor of Sociology* (social movements, race and ethnicity, gender, social change, African Americans)

Rocio Rosales, Ph.D. University of California, Los Angeles, *Assistant Professor of Sociology; Chicano/Latino Studies* (international migration, immigrant and ethnic economics, urban sociology, ethnography, Latino/a studies, race and ethnicity, immigrant detention)

Ruben G. Rumbaut, Ph.D. Brandeis University, *Distinguished Professor of Sociology; Chicano/Latino Studies; Criminology, Law and Society; Education* (international migration, immigration laws, criminalization, incarceration, social inequality and mobility, race and ethnicity)

David Schaefer, Ph.D. University of Arizona, *Associate Professor of Sociology* (social networks, social psychology, criminology, health, human development)

Evan Schofer, Ph.D. Stanford University, *Professor of Sociology* (comparative political sociology, sociology of education, quantitative methods and statistics, globalization, sociology of the environment, organizations, sociology of science)

Tonya L. Schuster, Ph.D. University of California, Riverside, *Lecturer of Sociology* (sociology of medicine and alternative medicine, social relationships and health social psychology, research design)

David A. Smith, Ph.D. University of North Carolina at Chapel Hill, *Professor of Sociology; Urban Planning and Public Policy* (world systems analysis, urbanization, development, comparative-historical sociology, dependent development in east Asia)

David A. Snow, Ph.D. University of California, Los Angeles, *Professor Emeritus of Sociology* (collective behavior, protest and social movements, framing processes, social psychology and culture, homelessness and social problems, qualitative methods)

Judith Stepan-Norris, Ph.D. University of California, Los Angeles, *Professor of Sociology* (labor unions, sociology of work, political sociology, American society, research methods, historical-comparative methods, class formation)

Sabrina Strings, Ph.D. University of California, San Diego, *Assistant Professor of Sociology* (race, gender, embodiment, sociology of medicine, sociology of media)

Yang Su, Ph.D. Stanford University, *Associate Professor of Sociology* (social movements and collective action, political sociology, China's political transition)

Judith Treas, Ph.D. University of California, Los Angeles, *UCI Chancellor's Professor of Sociology* (gender, inequality, family, aging and life course, social demography)

Kristin E. Turney, Ph.D. University of Pennsylvania, *Associate Professor of Sociology; Criminology, Law and Society* (social inequality, family demography, population health, incarceration and punishment, intergenerational transmission of disadvantage, child well-being)

Irene I. Vega, Ph.D. University of California, Los Angeles, *Assistant Professor of Sociology* (international migration, socio-legal studies, race/ethnicity, educational inequality)

Feng Wang, Ph.D. University of Michigan, *Professor of Sociology* (contemporary demographic, economic, and social processes, social inequality in state socialisms, contemporary China)

## Affiliate Faculty

Richard Arum, Ph.D. University of California, Berkeley, *Dean of the School of Education and Professor of Education; Criminology, Law and Society; Sociology*

Gilberto Q. Conchas, Ph.D. University of Michigan, *Professor of Education; Asian American Studies; Sociology* (urban education, sociology of education, comparative race and ethnicity)

Laura Enriquez, Ph.D. University of California, Los Angeles, *Assistant Professor of Chicano/Latino Studies; Asian American Studies; Sociology* (undocumented 1.5 generation young adults, immigration, citizenship, Latino families)

George Farkas, Ph.D. Cornell University, *UCI Distinguished Professor of Education; Sociology* (educational achievement gaps, interventions, educational policy)

Martha S. Feldman, Ph.D. Stanford University, *Roger W. and Janice M. Johnson Chair in Civic Governance and Public Management and Professor of Urban Planning and Public Policy; Paul Merage School of Business; Sociology* (organization theory and behavior, stability and change in organizations, decision-making and information processing, public management, qualitative research methods)

Glenda M. Flores, Ph.D. University of Southern California, *Associate Professor of Chicano/Latino Studies; Sociology* (Latina/o sociology, gender and work, middle-class minorities, education, urban ethnography)

Michael R. Gottfredson, Ph.D. University at Albany, State University of New York, *Chancellor's Professor of Criminology, Law and Society; School of Law; Sociology* (criminology, juvenile delinquency, crime theory, public policy)

John R. Hipp, Ph.D. University of North Carolina at Chapel Hill, *Professor of Criminology, Law and Society; Sociology; Urban Planning and Public Policy* (community context of crime, household decisions and neighborhood change, research methods)

Valerie Jenness, Ph.D. University of California, Santa Barbara, *Distinguished Professor of Criminology, Law and Society; Sociology* (links between deviance and social control [especially law], the politics of crime control and criminalization, social movements and social change, corrections and public policy)

Sharon Koppman, Ph.D. University of Arizona, *Assistant Professor of Paul Merage School of Business; Sociology* (work and occupations, sociology of culture, creative industries)

Charis E. Kubrin, Ph.D. University of Washington, *Professor of Criminology, Law and Society; Sociology* (crime, neighborhood effects and social processes, race/ethnicity and violence, immigration and crime)

James W. Meeker, J.D., Ph.D. State University of New York at Buffalo, *Professor Emeritus of Criminology, Law and Society; Sociology* (sociology of law, criminal justice, research methodology, statistics, access to civil justice)

Walter Nicholls, Ph.D. University of California, Los Angeles, *Associate Professor of Urban Planning and Public Policy; Sociology* (urban sociology, politics and policy, social movements, immigration, comparative urbanism, theory, planning conflicts)

Andrew Noymer, Ph.D. University of California, Berkeley, *Associate Professor of Program in Public Health; Sociology*

Henry N. Pontell, Ph.D. State University of New York at Stony Brook, *Professor Emeritus of Criminology, Law and Society; Sociology* (white-collar and corporate crime, criminology, criminal justice, deviance and social control, sociology of law)

Maria G. Rendón, Ph.D. Harvard University, *Assistant Professor of Urban Planning and Public Policy; Sociology* (urban sociology, immigration, race/ethnicity, sociology of education and social policy)

Naomi Sugie, Ph.D. Princeton University, *Associate Professor of Criminology, Law and Society; Sociology* (sociology of crime and punishment, inequality, families, demography, methods, new technologies for data collection)

Bryan Sykes, Ph.D. University of California, Berkeley, *Associate Professor of Criminology, Law and Society; Program in Public Health; Sociology* (demography, criminology, research methods, health, social inequality, statistics)

Shauhin A. Talesh, J.D., Ph.D. University of Connecticut, University of California, Berkeley, *Director, Law and Graduate Studies Program and Professor of School of Law; Criminology, Law and Society; Sociology*

Linda T. Vö, Ph.D. University of California, San Diego, *Professor of Asian American Studies; Culture and Theory; Sociology; Urban Planning and Public Policy* (race and ethnic relations, immigrants and refugees, gender relations, community and urban studies)

Kirk Williams, Ph.D. University of Arizona, *Professor of Criminology, Law and Society; Sociology* (family violence, youth violence, homicide studies, risk assessment, violence prevention program evaluation)

## Courses

### **SOCIOL 1. Introduction to Sociology. 4 Units.**

Considers major sociological concepts, theories, and research findings illuminating processes of interpersonal interaction, social differentiation and stratification, integration and conflict, and change, with attention to variation in class, race/ethnic, gender, multicultural, and cross-national perspectives and experiences.

(III, VII)

**SOCIOL 2. Globalization and Transnational Sociology. 4 Units.**

Examines globalization and international issues from the perspective of sociology and related fields. Issues include economic globalization and global inequality, international environmental problems, international politics, trends in global culture, and global conflict.

(III, VIII)

**SOCIOL 3. Social Problems. 4 Units.**

Focuses on how institutional and organizational features of societies generate problems for people. Particular attention directed at a set of problems related to political and economic inequality: poverty, racism, sexism, urban and population problems, the environment, the criminal justice system.

(III, VII)

**SOCIOL 10A. Probability and Statistics. 4 Units.**

An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Same as ANTHRO 10A.

Overlaps with PSYCH 10A, SOCECOL 13, SOC SCI 10A, POL SCI 10A.

Restriction: Anthropology Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

(Va)

**SOCIOL 10B. Probability and Statistics. 4 Units.**

An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Prerequisite: SOCIOL 10A or ANTHRO 10A

Same as ANTHRO 10B.

Overlaps with PSYCH 10B, SOCECOL 13, SOC SCI 10B, POL SCI 10B.

Restriction: Anthropology Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

(Va)

**SOCIOL 10C. Probability and Statistics. 4 Units.**

An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Prerequisite: SOCIOL 10B or ANTHRO 10B

Same as ANTHRO 10C.

Overlaps with PSYCH 10C, SOCECOL 13, SOC SCI 10C, POL SCI 10C.

Restriction: Anthropology Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

(Vb)

**SOCIOL 19. Special Topics: Methods. 4 Units.**

Studies in selected areas of methods. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**SOCIOL 29. Special Topics: Theory. 4 Units.**

Studies in selected areas of theory. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: May be repeated for credit unlimited times.

**SOCIOL 31. Self-Identity and Society. 4 Units.**

Studies sociological contributions to theory and research in social psychology, with focus on the social influences on personality, attitudes, beliefs, and behavior; socialization, human groups, and social interaction.

Same as PSYCH 78A.

(III)

**SOCIOL 39. Special Topics: Social Psychology. 4 Units.**

Studies in selected areas of social psychology. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**SOCIOL 41. Small Group Dynamics. 4 Units.**

Deals with models for understanding behavior in small groups, including coalition formation, socialization, group norms and decision rules, leadership, conformity, group structure, and communication processes.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 43. City and Community. 4 Units.**

Examines nature, causes, and consequences of urbanization along with changing scale and complexity, demographic/ecological city growth patterns, quality of life in urban areas, processes of decision-making, and bearing of sociological investigation on public policy concerns in contemporary urban society.

Overlaps with UPPP 40.

**SOCIOL 44. Births, Deaths, and Migration. 4 Units.**

Introduction to the analysis of human population including fertility, mortality dispersion, sex distribution. Attention is focused on the effects of these variables on, e.g., over-population, social disorganization, and the stability of social institutions.

(VIII)

**SOCIOL 49. Special Topics: Structures. 4 Units.**

Studies in selected areas of structures. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**SOCIOL 51. Asian American Family & Community. 4 Units.**

Briefly examines the history of different Asian American groups and provides an in-depth analysis of issues related to family composition, mate selection, changing gender roles, and intergenerational conflict.

(VII)

**SOCIOL 56. Religion and Society. 4 Units.**

A critical and personal examination of the varieties of religious and spiritual experiences human beings are undergoing in contemporary society. The role of conscious understanding and unconscious conditioning regarding religion and spirituality.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 59. Special Topics: Social Institutions and Culture. 4 Units.**

Studies in selected areas of social institutions and culture. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**SOCIOL 62. Families and Intimate Relations. 4 Units.**

Sociological theories/research on marriage, kinship, intimacy, and divorce. Emphasis on comparing family patterns in different social classes, ethnic groups, and societies, and on relating family life to the economy and other social institutions. Topics include gender roles, child-rearing, historical change. Materials fee.

(III)

**SOCIOL 63. Race and Ethnicity. 4 Units.**

Focuses on racial and ethnic relations in the United States and compares them with those found in other societies. Analyzes the conditions that favor either cooperation and integration or rivalry, tension, and conflict. Appraises strategies for reducing and resolving conflicts.

Same as SPPS 70A.

(VII)

**SOCIOL 64. Sociology of Sexuality. 4 Units.**

Provides an introduction to and overview of the sociology of sex and sexuality. Considers the social meanings of sex and sexuality, the social contexts of sex and sexuality, and the social regulations of sex and sexuality.

(VII)

**SOCIOL 68. Gender and Race Inequality in the Workplace. 4 Units.**

Analysis of current state and trends in major inequality measures including the wage gap, occupational segregation, and access to managerial positions. Theories that purport to explain such differences, and the related empirical evidence, are also covered.

**SOCIOL 68A. Ethnic and Immigrant America. 4 Units.**

Focusing on Asian, Latino, and Black immigrant groups, examines the second generation's experience of straddling two cultures and growing up American. Covers topics such as assimilation, bilingualism, race relations, education, bicultural conflicts, interracial marriage, and multiracial identities.

Same as CHC/LAT 65.

(VII)

**SOCIOL 69. Special Topics: Age, Gender, Race, and Ethnicity. 4 Units.**

Studies in selected areas of age, gender, race, and ethnicity. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**SOCIOL 79. Special Topics: Societies and Social Inequality. 4 Units.**

Studies in selected areas of societies and social inequality. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**SOCIOL 110. Research Methods. 4 Units.**

Methods of data collection and analysis used by sociologists. Experimental methods, surveys, and interviews, field research and participant observation, demographic methods, historical and comparative approaches.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 119. Special Topics: Methods. 4 Units.**

Studies in selected areas of methods. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 120. Sociological Theory. 4 Units.**

What a theory of society is and is not. Historical and contemporary models, perspectives, and schools.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 120W. Sociological Theory. 4 Units.**

What a theory of society is and is not. Historical and contemporary models, perspectives, and schools.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology Majors have first consideration for enrollment.

(Ib)

**SOCIOL 129. Special Topics: Theory. 4 Units.**

Studies in selected areas of theory. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 134. Game Theory and Politics I. 4 Units.**

Introduction to game theory and a survey of its political applications. Examples of topics covered include voting in small committees, legislatures, and mass elections; interest group activities and environmental issues; institutional design, and the evolution of cooperative behavior.

Same as POL SCI 130A, SOC SCI 103A.

Restriction: Social Policy/Public Service Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**SOCIOL 135. Social Psychology of Networks. 4 Units.**

Review of network methods used in small group and organizational research. Discussion of social psychological literature relevant to the network of study of cognitive social structure, exchange/communication, identity negotiation, and social control. Case study of network datasets exemplifies research issues.

Same as PSYCH 178N.

Restriction: Sociology Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**SOCIOL 136. Religious Traditions of Asian Americans. 4 Units.**

Studies the religious traditions of Asian Americans, focusing on the transplantation of religious institutions, establishment of sacred spaces, celebration of religious holidays, socialization of children, as well as birth, marriage, gender relations, death, family.

Same as ASIANAM 143.

**SOCIOL 138. Business Decisions. 4 Units.**

Surveys normative and descriptive models of decision-making behavior, with an emphasis on organizational and policy contexts. Topics include rational choice theory, biases and heuristics, framing effects, and overconfidence. Management fads, panics, and herd behavior are also discussed.

Prerequisite: (ANTHRO 10A and ANTHRO 10B and ANTHRO 10C) or (SOCIOL 10A and SOCIOL 10B and SOCIOL 10C) or (SOC SCI 10A and SOC SCI 10B and SOC SCI 10C) or (MATH 2A and MATH 2B and (STATS 7 or MGMT 7)) or (STATS 120A and STATS 120B and STATS 120C) or (ECON 15A and ECON 15B)

Same as ECON 148.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 139. Special Topics: Social Psychology. 4 Units.**

Studies in selected areas of social psychology. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 141. Organizations. 4 Units.**

How bureaucracies, formal organizations, and voluntary associations work, how/why they grow, and where they are going. History and structure of organizational rationality; dynamics of organized groups; behavior in organizations; limits of bureaucratization and attempts to overcome these limits through decentralization.

Same as POL SCI 155C.

Restriction: Sociology Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment.

**SOCIOL 142. White-Collar Crime. 4 Units.**

Examines criminal activity in business and corporate enterprise, organizations, and the professions. Theories regarding the causes and control of white-collar and corporate crime are covered as well as the numerous definitions of these terms.

Same as CRM/LAW C142.

Restriction: Sociology Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**SOCIOL 143. Social Networks and Social Support. 4 Units.**

Examines the manner in which behaviors/attitudes of individuals are affected by their network ties to others. How are peoples' opportunities and well-being increased/decreased by their social networks? May include studies in mental/physical health, job seeking, separation and loss, and aging.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 144. Politics, Power, and Society. 4 Units.**

Includes an examination of the major theoretical approaches to political sociology, and the application of these ideas to the politics of advanced capitalist societies. Also considers stability and change in power structures.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 145. Occupations and Professions. 4 Units.**

What makes some jobs satisfying and others boring? How does technology influence the workplace? What changes are coming in the U.S. job market? Sociology and psychology of occupations. Students interview workers and study aspects of their occupations.

Restriction: Upper-division students only. Sociology Majors have first consideration for enrollment.

**SOCIOL 145W. Occupations and Professions. 4 Units.**

What makes some jobs satisfying and others boring? How does technology influence the workplace? What changes are coming in the U.S. job market? Sociology and psychology of occupations. Students interview workers and study aspects of their occupations.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Sociology Majors have first consideration for enrollment.

**(Ib)****SOCIOL 149. Special Topics: Structures. 4 Units.**

Studies in selected areas of structures. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 150. Sociological Lens on Religion. 4 Units.**

Examines the effects of religious beliefs, belonging, and institutions on social dynamics, including class, gender, and racial stratification, politics, and social movements. Additional topics: the sociological significance of conversion, commitment, and secularization/sacralization.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 151. Social Inequalities and Health. 4 Units.**

Introduces ways in which social inequalities produce health disparities. Begins with general perspectives on social causation of health, and then considers how particular individual attributes (e.g., gender, SES, race/ethnicity, nativity) and social contexts (e.g., neighborhoods) can get "under the skin."

**SOCIOL 154. Medical Sociology. 4 Units.**

Current problems in U.S. health-care system and proposals for reform. Examines financial barriers to access; problem of patient dumping; underinsurance; prenatal and perinatal care; child services; preventative care and needs of the elderly; minorities; low-income people; undocumented.

Same as PUBHLTH 135.

Restriction: Upper-division students only. Sociology Majors have first consideration for enrollment.

**SOCIOL 154W. Medical Sociology. 4 Units.**

Current problems in U.S. health-care system and proposals for reform. Examines financial barriers to access; problem of patient dumping; underinsurance; prenatal and perinatal care; child services; preventative care and needs of the elderly; minorities; low-income people; undocumented.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Sociology Majors have first consideration for enrollment.

(Ib)

**SOCIOL 155B. Baseball and Society. 4 Units.**

An examination of baseball's role in American social life over the last 150 years. Issues of fraternal organizations, national development, capitalism, rationalization, race and ethnicity, gender, economic organization, labor relations, and politics are discussed.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 155BW. Baseball and Society. 4 Units.**

An examination of baseball's role in American social life over the last 150 years. Issues of fraternal organizations, national development, capitalism, rationalization, race and ethnicity, gender, economic organization, labor relations, and politics are discussed.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology Majors have first consideration for enrollment.

(Ib)

**SOCIOL 156. Deviance. 4 Units.**

Perspectives on deviance and criminality in behavior, institution, community, and myth. The suitability of contemporary theories of deviant behavior.

Same as CRM/LAW C107, PSYCH 177D.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**SOCIOL 157A. Sociology of Education. 4 Units.**

Focuses on education's role in creating and redressing inequality, and in shaping how we understand our place in society. Education from cross-national and historical perspectives, and education as a vehicle for examining and solving social problems. Course may be offered online.

**SOCIOL 157AW. Sociology of Education. 4 Units.**

Focuses on education's role in creating and redressing inequality, and in shaping how we understand our place in society. Education from cross-national and historical perspectives, and education as a vehicle for examining and solving social problems.

Overlaps with SOCIOL 157A.

(Ib)

**SOCIOL 157C. Comparing European and US Societies. 4 Units.**

Society, culture, institutions of U.S. and European countries. Fertility to football, guns to government, work to welfare, health to housework. Cross-national approaches for understanding the world and thinking critically about taken-for-granted practices. Policies the U.S. might borrow for social issues.

Same as INTL ST 157C.

**SOCIOL 158C. Money, Work, and Social Life . 4 Units.**

Sociological perspective on issues related to money and work. Consumption practices and lifestyles, jobs and organizations, issues of money in intimate relations, marriage, and households, illegal work, discrimination, economic globalization are discussed.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 158CW. Money, Work, and Social Life. 4 Units.**

Sociological perspective on issues related to money and work. Consumption practices and lifestyles, jobs and organizations, issues of money in intimate relations, marriage, and households, illegal work, discrimination, economic globalization are discussed.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology Majors have first consideration for enrollment.

(Ib)

**SOCIOL 159. Special Topics: Social Institutions and Culture. 4 Units.**

Studies in selected areas of social institutions and culture. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 161. Sociology of Sex and Gender. 4 Units.**

Explores complex processes contributing to social construction of gender and sexuality in the U.S. with focus on intersection of gender, race, ethnicity, sexuality, and class; evaluates how men and women are differentially constituted in family, education, work, politics, media, language.

**SOCIOL 161W. Sociology of Sex and Gender. 4 Units.**

Explores complex processes contributing to social construction of gender and sexuality in the U.S. with focus on intersection of gender, race, ethnicity, sexuality, and class; evaluates how men and women are differentially constituted in family, education, work, politics, media, language.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

**SOCIOL 164. Sociology of Aging . 4 Units.**

Introduction to sociology of age, aging, and the aged. Problems posed by aging population. Life course transitions and how social organizations influence the life course. Addresses work, health, and family in later life.

Overlaps with SOCIOL 164W.

Restriction: Upper-division students only. Sociology Majors have first consideration for enrollment.

**SOCIOL 164W. Sociology of Aging . 4 Units.**

Introduction to sociology of age, aging, and the aged. Problems posed by aging population. Life course transitions. How social organizations influence the life course. Work, health, family in later life.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Sociology Majors have first consideration for enrollment.

(Ib)

**SOCIOL 166. Immigration and Inequality. 4 Units.**

Explores immigration, ethnicity, and inequality as interconnected social forces. International migration, propelled by global inequalities, plays a central role in the formation of multinational societies, shapes inter-group relations and patterns of ethnic inequality, and transforms the immigrants themselves.

Same as SOC SCI 168B.

**SOCIOL 167A. Racial and Ethnic Relations in the United States. 4 Units.**

Examines central questions and issues in the field of race and ethnicity; the emergence, maintenance, and consequences of the ethnic and racial stratification system in the United States; the future of racial and ethnic relations; and relevant public policy issues.

Same as CHC/LAT 148.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**SOCIOL 167AW. Racial and Ethnic Relations in the United States. 4 Units.**

Examines central questions and issues in the field of race and ethnicity; the emergence, maintenance, and consequences of the ethnic and racial stratification system in the United States; the future of racial and ethnic relations; and relevant public policy issues.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as CHC/LAT 148W.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

(Ib)

**SOCIOL 169. Special Topics in Age, Gender, Race, and Ethnicity. 4 Units.**

Studies in selected areas of age, gender, race, and ethnicity. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 170A. Vietnam War. 4 Units.**

Examines social structures and social changes in Vietnamese and U.S. societies through the study of the Vietnam War.

Same as INTL ST 143A.

**SOCIOL 170B. U.S. War on Terrorism. 4.0 Units.**

Analyzes the United States war on terrorism by focusing on terrorism, the U.S. wars in Afghanistan and Iraq, and changes in police powers through the Patriot Act, as well as the political leadership which directs the war.

Same as INTL ST 175A.

**SOCIOL 171. Environment and Society. 4 Units.**

Examines society's changing relationship to the natural world. Delineates different models of 'nature' and then explores their institutional roots, the social responses they have generated, and their implications for social inequality.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 172. Revolution and Social Transformation in China. 4 Units.**

Introduces the major political events in Mao's communist revolution and the social transformations afterward. Helps students understand the historic and political landscape from which China is now departing.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 173. Social Inequality. 4 Units.**

Sources, functions, and dynamics of the unequal distribution of wealth, prestige, knowledge, and power in American and other societies.

Overlaps with SOCIOL 173W.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 173W. Social Inequality. 4 Units.**

Sources, functions, and dynamics of the unequal distribution of wealth, prestige, knowledge, and power in American and other societies.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Overlaps with SOCIOL 173.

Restriction: Upper-division students only.

**(Ib)**

**SOCIOL 174. Protests, Movements, and Revolutions. 4 Units.**

A survey of models of collective action drawn from sociology, economics, psychology, and political science. Focus on areas such as social movements, strikes, crowd psychology, cults, fads, fashions, public opinion, and symbolic and mythical elements in collective culture.

Prerequisite: SOCIOL 1 or POL SCI 11A or ECON 1

Same as POL SCI 156D.

Restriction: Political Science Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**SOCIOL 175B. China in the Global Age. 4 Units.**

Chinese society from 1949 to present. Social change in the context of political control and ideological considerations. Focus on the power structure, political decision processes, and ideological legitimation, and interplay with the Chinese community and its culture.

Same as INTL ST 158D.

**SOCIOL 176. International Divided Cities. 4 Units.**

Investigates urban divisions in international cities where deep-seated nationalistic ethnic differences create pressures for intergroup conflicts, autonomy, or territorial separation, and can incite violence. Urban political polarization as it is manifest in the urban setting.

Same as POL SCI 157B, UPPP 178.

**SOCIOL 177. Immigration and Social Policy. 4 Units.**

Explains how people decide to migrate and how they are incorporated into a host society (both historically and currently), examines the effects of immigration on the U.S., analyzes how the framing of immigration shapes the discourse about the issue.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 177C. Undocumented Immigrant Experiences. 4 Units.**

Examines the experiences of undocumented immigrants and the policies that structure their educational, economic, social, and political participation.

Same as ASIANAM 130, CRM/LAW C187, CHC/LAT 164A.

(III and VII ).

**SOCIOL 177W. Immigration and Social Policy. 4 Units.**

Explains how people decide to migrate and how they are incorporated into a host society (both historically and currently), examines the effects of immigration on the U.S., analyzes how the framing of immigration shapes the discourse about the issue.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology Majors have first consideration for enrollment.

(Ib)

**SOCIOL 179. Special Topics: Societies and Social Inequality. 4 Units.**

Studies in selected areas of societies and social inequality. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 180A. Sociology Majors Seminar. 4 Units.**

Students learn sociology by doing it. A modest-sized research project is planned and implemented by each student.

Prerequisite: SOCIOL 110

Restriction: Sociology Majors only.

**SOCIOL 180AW. Sociology Majors Seminar. 4 Units.**

Students learn sociology by doing it. A modest-sized research project is planned and implemented by each student.

Prerequisite: SOCIOL 110. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology Majors only.

(Ib)

**SOCIOL 188BW. Honors Research and Thesis. 4 Units.**

Focuses on the design and implementation of individual research projects undertaken by senior Sociology majors. Writing projects consist of a proposal and paper on some empirical research.

Prerequisite: SOCIOL H188A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology Honors students only.

(Ib)

**SOCIOL H188A. Honors Research and Thesis. 4 Units.**

Focuses on the design and implementation of individual research projects undertaken by senior Sociology majors. Writing projects consist of a proposal and paper on some empirical research.

Restriction: Sociology Honors students only.

**SOCIOL 189. Special Topics: Honors Sequence. 4 Units.**

Independent honors research with Social Sciences faculty.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology Majors have first consideration for enrollment.

**SOCIOL 197. Field Study. 4 Units.**

Field study with Sociology faculty.

Repeatability: May be repeated for credit unlimited times.

**SOCIOL 198. Directed Group Study . 4 Units.**

Directed study with Sociology faculty.

Repeatability: May be repeated for credit unlimited times.

**SOCIOL 199. Independent Study. 1-4 Units.**

Independent research with Sociology faculty.

Repeatability: May be repeated for credit unlimited times.

**SOCIOL 202A. Proseminar I in Sociology. 1 Unit.**

Introduces first-year graduate students in Sociology to the current research interests of Sociology faculty, as well as to other aspects of graduate life at UCI and to the profession of sociology more generally.

Restriction: Graduate students only.

**SOCIOL 202B. Proseminar II in Sociology. 4 Units.**

Focus is on second-year research projects, design, development, data gathering, analysis, and preparing oral and written presentations of the results. Students learn analytic and writing skills, gain experience with research processes, and become socialized about professional standards, customs, and institutions.

Restriction: Graduate students only.

**SOCIOL 210A. Classical Social Theory. 4 Units.**

Examines the development of classical sociological theory through the writings of Karl Marx, Emile Durkheim, Max Weber, Georg Simmel, and George Herbert Mead.

Restriction: Graduate students only.

**SOCIOL 210B. Contemporary Social Theory. 4 Units.**

Familiarizes students with 20th-century developments in social thought that have influenced sociological research, suggesting 'what is living and what is dead' in the 'classics' and offering an overview of the main outlines of recent sociological theorizing.

Restriction: Graduate students only.

**SOCIOL 211A. Sociology of Gender. 4 Units.**

An introduction to the sociology of gender in the U.S. and globally. The social construction of gender and sexuality; theoretical perspectives and feminist frameworks. Theories of economy, patriarchy, and race, and the social positions of women and men.

Restriction: Graduate students only.

**SOCIOL 212. Network Theory. 4 Units.**

An introduction to theoretical work in the field of social networks. Topics include baseline models, homophily, and propinquity, exchange and power, balance theory, diffusion and social influence, equivalence, and cohesion. Deductive use of theory to make novel predictions is emphasized.

Restriction: Graduate students only.

**SOCIOL 219. Special Topics: Theory. 2-4 Units.**

Studies in selected areas of theory. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SOCIOL 220A. Research Design. 4 Units.**

Data collection, organization, and analysis in ethnographic or quasi-experimental settings, including interviewing, participant observations, behavior observations, and questionnaires. Research design issues include sampling, longitudinal research, and comparative research. Emphasis on the integration of qualitative and quantitative data.

Overlaps with SOCIOL 265.

Restriction: Graduate students only.

**SOCIOL 221A. Graduate Statistics I. 4 Units.**

Statistics with emphasis on applications in sociology and anthropology. Examines exploratory uses of statistical tools in these fields as well as univariate, bivariate, and multivariate applications in the context of the general linear model.

Restriction: Graduate students only.

**SOCIOL 221B. Graduate Statistics II. 4 Units.**

Statistics with emphasis on applications in sociology and anthropology. Examines exploratory uses of statistical tools in these fields as well as univariate, bivariate, and multivariate applications in the context of the general linear model.

Prerequisite: SOCIOL 221A

Restriction: Graduate students only.

**SOCIOL 221C. Graduate Statistics III. 4 Units.**

Statistics with emphasis on applications in sociology and anthropology. Examines exploratory uses of statistical tools in these fields as well as univariate, bivariate, and multivariate applications in the context of the general linear model.

Prerequisite: SOCIOL 221A and SOCIOL 221B

Restriction: Graduate students only.

**SOCIOL 222A. Comparative and Historical Sociological Methods. 4 Units.**

Topics include the logic of comparative and historical analysis techniques and the examination of exemplar works in representative problem areas.

Restriction: Graduate students only.

**SOCIOL 224. Interview Methods . 4 Units.**

Hands-on introduction to the use of interviews in social scientific research. Topics include when to use interviews and/or focus groups; how to design an interview-based study, how to conduct interviews, analyze interview data, and write up and publish interview-based results.

Restriction: Graduate students only.

**SOCIOL 226A. Methods of Demographic Analysis. 4 Units.**

Introduces basic demographic methods used in social science and public health research. Topics include sources and limitations of demographic data; components of population growth; measures of nuptiality, fertility, mortality, and population mobility projection methods; and demographic models.

Same as PUBHLTH 209.

Restriction: Graduate students only.

**SOCIOL 227A. Seminar Ethnographic & Qualitative Field Methods. 4 Units.**

Comprehensive and critical discussion of the traditions of qualitative fieldwork; detailed examination of the collection, coding, analysis, and presentation of ethnographic/qualitative field data; and close mentoring of student projects culminating in an original research paper.

Grading Option: In Progress (Letter Grade with S/U).

Restriction: Graduate students only.

**SOCIOL 227B. Seminar Ethnographic & Qualitative Field Methods. 4 Units.**

Comprehensive and critical discussion of the traditions of qualitative fieldwork; detailed examination of the collection, coding, analysis, and presentation of ethnographic/qualitative field data; and close mentoring of student projects culminating in an original research paper.

Prerequisite: SOCIOL 227A

Restriction: Graduate students only.

**SOCIOL 229. Special Topics: Methods . 1-4 Units.**

Studies in selected areas of methods. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SOCIOL 230A. Race and Ethnicity. 4 Units.**

An examination of central questions and issues in the field of race and ethnicity through a critical analysis and discussion of the principal theoretical perspectives and paradigms that have framed much of the scholarship in the area.

Restriction: Graduate students only.

**SOCIOL 232. Inequality. 4 Units.**

Theoretical and empirical approaches to the study of social and economic inequality, with special attention to race/ethnicity, class, and gender.

Restriction: Graduate students only.

**SOCIOL 234. Ethnic America. 4 Units.**

Examines critically the meaning and measurement of ethnicity, race, and nation in sociological theory and research. Theories of ethnicity are explored, along with empirical studies of the construction of ethnic and pan-ethnic identities in historical and contemporary contexts.

Same as CHC/LAT 223.

Restriction: Graduate students only.

**SOCIOL 235. Poverty and Development . 4 Units.**

Examines competing conceptualizations, methods of measurement, and poverty alleviation strategies widely used in developing countries. Focuses on poverty conceptualized as economic deprivation, well-being, vulnerability, and social exclusion.

Same as UPPP 251.

Restriction: Graduate students only.

**SOCIOL 237. Educational Inequality. 4 Units.**

Focuses on macro-level explanations of inequality of schooling, particularly in the U.S. context. Explores traditional models, such as conflict, functionalism, status-attainment, cultural reproduction, and newer synthetic accounts. Emphasis on higher education access and the intersection of education and work.

Restriction: Graduate students only.

**SOCIOL 239. Special Topics: Social Inequality. 2-4 Units.**

Studies in selected areas of social inequality. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SOCIOL 240A. Social Movements. 4 Units.**

A survey of the field of Social Movements, oriented around critical themes in the major theoretical traditions and contemporary exemplars.

Restriction: Graduate students only.

**SOCIOL 241A. Political Sociology. 4 Units.**

Begins with an examination of the three major orientations to the State (Pluralist, Elitist, and Class). Next considers current topics in political sociology including the Welfare State, the New Deal, political behavior, social movements, participation, and democracy.

Restriction: Graduate students only.

**SOCIOL 242. Sociology of Culture. 4 Units.**

Major perspectives in the sociology of culture. Topics include the role of cultural dynamics in the reproduction of inequality, collective action, political and organizational decision making, emotional experience, and the social impacts of new technologies.

**SOCIOL 249. Special Topics: Political Sociology and Social Movements. 2-4 Units.**

Studies in selected areas of political sociology and social movements. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SOCIOL 252A. Global Urbanization. 4 Units.**

Examines the spread of cities worldwide in the 20th century. What are the political and economic causes of this process? What are the social-cultural, political, and economic effects? How is contemporary urbanization linked to global restructuring of other kinds.

Same as UPPP 273.

Restriction: Graduate students only.

**SOCIOL 259. Special Topics: Global Studies and Comparative Development. 2-4 Units.**

Studies in selected areas of global studies and comparative development. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SOCIOL 262A. Population. 4 Units.**

Introduces the interrelationships between population and social organization. Considers measurement and explanation of historical and contemporary trends in birth rates, death rates, migration, and marriage and divorce. Case material is drawn primarily from the U.S. and other industrialized nations.

Restriction: Graduate students only.

**SOCIOL 264. Immigrant America. 4 Units.**

The study of the causes and consequences of international migration has become one of the most vital fields of sociological theory and research. Examines principal theoretical perspectives and empirical research on contemporary immigration flows and the processes of incorporation.

Same as CHC/LAT 224.

Restriction: Graduate students only.

**SOCIOL 265. DASA Research Design. 4 Units.**

Data collection, organization, and analysis in population studies and demography. Research design issues include sampling, longitudinal research, and comparative research.

Prerequisite: Enrollment in DASA program.

Overlaps with SOCIOL 220A.

Restriction: Graduate students only.

**SOCIOL 268. Crimmigration. 4 Units.**

Examines the criminalization of immigration, with an emphasis on U.S. enforcement procedures and outcomes. Analyzes the devolution of federal immigration law to local authorities, the rise in immigrant detention and deportation, and the militarization of the U.S.-Mexico border.

Same as CHC/LAT 225, CRM/LAW C258.

Restriction: Graduate students only.

**SOCIOL 269. Special Topics: Social Demography. 4 Units.**

Studies in selected areas of social demography. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SOCIOL 279. Special Topics: Social Organizations and Institutions. 2-4 Units.**

Studies in selected areas of social organizations and institutions. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SOCIOL 280. Analysis of Social Network Data. 4 Units.**

Overview and application of methods for analyzing social network data. Topics include: data structures, visualization, graph theory, centrality, subgroups, positions, blockmodels, local properties, and statistical models. Social network analysis software is used to analyze a range of examples.

Restriction: Graduate students only.

**SOCIOL 281. Introduction to Social Networks. 4 Units.**

Provides a broad overview of the history, concepts, and applications of social networks. Students have the opportunity to delve deeply into applications of the network approach in their individual areas of interest.

Restriction: Graduate students only.

**SOCIOL 282. Theorizing Illegality and the Experiences of Undocumented Immigrants. 4 Units.**

Examines theories of illegality and citizenship, historical and contemporary undocumented immigrant experiences, and methodological concerns in this area of study.

Same as CHC/LAT 222.

Restriction: Graduate students only.

**SOCIOL 289. Special Topics . 2-4 Units.**

Studies in selected areas of Social Sciences. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SOCIOL 290. Dissertation Research. 1-12 Units.**

Dissertation research with Sociology faculty.

Repeatability: May be taken for credit 10 times.

Restriction: Graduate students only.

**SOCIOL 299. Independent Study. 1-12 Units.**

Independent research with Sociology faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Sociology, B.A.

Sociology studies patterns of relationships among people, how behavior is shaped by these patterns of relationships, and how conflicts and cooperation among groups affect social structure and effect social change. Sociology majors are introduced to the most important ideas, methods, and findings of sociology in the introductory courses, explore basic subareas of sociology in the lower division courses, and pursue specialized study in the upper-division courses.

In research and teaching, the Department's faculty emphasize empirical sociological research in such areas as small groups, organizations, work, art, world systems, gender, family, and social networks.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

**Departmental Requirements for the Major**

School requirements must be met and must include 12 courses (48 units) as specified below:

A. Complete the following:

SOCIOL 1	Introduction to Sociology
SOCIOL 2	Globalization and Transnational Sociology

or SOCIOL 3	Social Problems
B. Complete one course in methods and one in theory:	
SOCIOL 110	Research Methods
SOCIOL 120	Sociological Theory
C. Complete one course in research design and implementation:	
SOCIOL 180A	Sociology Majors Seminar
D. Complete seven SOCIOL courses, of which no more than three may be lower-division.	
E. Complete three additional School of Social Sciences courses, of which no more than one may be lower-division.	

The Honors Program in Sociology is open to outstanding Sociology majors during their junior or senior year. To gain admission to the program, potential honors students normally take Sociology courses in theory (SOCIOL 120), methods (SOCIOL 110), statistics (SOCIOL 10A-SOCIOL 10B-SOCIOL 10C or equivalent) and at least two Sociology core courses. Students who receive an average grade of 3.5 or better in these courses are eligible for the honors program. In addition, honors students should have a grade point average of 3.2 or better in all courses taken at UCI. Majors who are transfers may petition for entry into the program based on their grades from their former schools.

During their junior or senior year, honors program students write a thesis, designed and carried out under faculty supervision. projects normally entail some empirical analysis of sociological data. Students meet regularly in a two-quarter honors seminar to design and carry out these projects, to exchange ideas, and to help analyze each other's work (SOCIOL H188A-SOCIOL 188BW satisfies Sociology major requirement C: Honors students do *not* have to take SOCIOL 180A). In addition, honors students are required to attend at least six Sociology colloquia and subsequent meetings to discuss relevant sociological issues. Upon successful completion of the program, including approval of an honors thesis by the faculty mentor and honors instructor and receiving a grade of B+ or higher in SOCIOL 188BW, students graduate with honors in Sociology.

## Sociology, Minor

Sociology studies patterns of relationships among people, how behavior is shaped by these patterns of relationships, and how conflicts and cooperation among groups affect social structure and effect social change.

### Sociology Minor Requirements

Requirements for the minor are met by taking seven Sociology courses (28 units) as specified below:

A. Complete the following:	
SOCIOL 1	Introduction to Sociology
SOCIOL 2	Globalization and Transnational Sociology
or SOCIOL 3	Social Problems
B. Complete one course in methods and one in theory:	
SOCIOL 110	Research Methods
SOCIOL 120	Sociological Theory
C. Select three SOCIOL courses, of which no more than two may be lower-division.	
<b>Lower-Division Courses</b>	
SOCIOL 2-79 <sup>1</sup>	
<b>Upper-Division Courses</b>	
SOCIOL 112-199 <sup>2</sup>	
SOCIOL 121-179 <sup>2</sup>	

<sup>1</sup> Cannot count SOCIOL 2 if used to complete section A., or cannot count SOCIOL 3 if used to complete section A.

<sup>2</sup> SOCIOL 110 and SOCIOL 120 cannot be used to fulfill this requirement.

## Sociology, Ph.D.

The Department of Sociology offers a Ph.D. program in Sociology. Particular emphases include social networks, gender, race/ethnicity, labor, social movements, family, migration, population, political economy, and states and global transformation. The program provides structured training in sociological theory, statistics, and qualitative and quantitative research methods. While the core of the program is sociological, it may also include an interdisciplinary component, incorporating links to anthropology, education, law, political science, history, criminology, and urban planning. Small entering cohorts ensure personalized attention for each student and guarantee access to professors, allowing for close mentorship relationships. Program faculty take diverse theoretical and methodological approaches to a variety of substantive issues, are committed to empirical research addressing central sociological issues, and are open to intellectual cross-pollination from cognate disciplines.

Graduate students have the opportunity to participate in a variety of interdisciplinary research units, including the Center for the Study of Democracy; the Center for Global Peace and Conflict Studies; the Center for Research on Immigration, Population and Public Policy; and the Center for Demographic

and Social Analysis. The Sociology Department maintains ties with Gender and Sexuality Studies and various ethnic studies programs, such as Asian American studies, Chicano/Latino studies, and African American studies. Research and funding opportunities are also available through UC-wide programs like Pacific Rim Studies and the Humanities Research Institute located on the UCI campus.

Students in the program come from diverse educational, ethnic, geographical, and social backgrounds. The deadline for applications to receive full funding consideration for fall admission is December 1. Students are admitted for winter and spring quarter only under exceptional circumstances. Admission is based on application materials and evidence of scholarly potential, including grade point average, GRE scores, statement of purpose, and letters of recommendation.

Students must complete a two-quarter proseminar, a course in research design, a three-quarter statistics sequence, one seminar each in classical and contemporary theory, an advanced sociological methodology course, and nine Sociology seminars selected in consultation with the student's advisor, in order to build competency in two areas of specialization in the discipline. Course work prepares students to complete an independent research project, which is presented in oral and written form during the winter quarter of their second year. Students must pass a formal evaluation at the end of their second year involving assessment of course work and the second-year research project and evaluation of teaching or research experience.

Knowledge of one foreign language is required. All required course work must be completed prior to advancement to candidacy. The normative time to advance to candidacy is four years. The advancement-to-candidacy examination is based on field examinations in two broad areas of sociology and an oral defense of a dissertation research prospectus, contextualized in the appropriate literature and including a discussion of data collection and methods of analysis. In preparation, students usually take at least the required one quarter of the Dissertation Seminar course during the third year. After advancing to candidacy, students are expected to work in close consultation with their advisor and dissertation committee. Committee approval of a satisfactory dissertation follows a final oral defense of the document. The normative time for completion of the Ph.D. is six years, and the maximum time permitted is eight years.

### Program in Law and Graduate Studies (J.D./Ph.D.)

Highly qualified students interested in combining the study of law with graduate research and/or professional qualifications in Sociology are invited to undertake concurrent degree study under the auspices of UC Irvine's Program in Law and Graduate Studies (PLGS). Students in this program pursue a coordinated curriculum leading to a J.D. from the School of Law in conjunction with a Ph.D. in Sociology. Additional information is available from the PLGS director's office, 949-824-4158, or by email to [plgs@law.uci.edu](mailto:plgs@law.uci.edu). A full description of the program, with links to all relevant application information, can be found at the School of Law Concurrent Degree Programs website (<http://www.law.uci.edu/academics/interdisciplinary-studies/concurrent-degrees.html>).

## Social Policy and Public Service, B.A.

**Jeanett Castellanos, Director**

2231 Social Science Plaza B

949-824-6298

<http://www.spps.socsci.uci.edu/>

The major in Social Policy and Public Service (SPPS) provides an interdisciplinary perspective on the study of policies and society at the individual and group levels. Students can select one of three focus areas while completing their upper-division work: (1) Education, (2) Governance, or (3) Health. The curriculum emphasizes social welfare, social structures, and public policy to facilitate in-depth analysis of complex social issues while generating real-world skills and application capacities. Centered in a scientist-practitioner model, field placements at local non-profit and government agencies, community action research, and internships offer valuable experiential learning that promotes critical decision-making and problem-solving skills.

The curriculum for the major exposes students to various social science methods and topics, teaching applied computer-based research and statistical analyses; internship experiences in community, public, and educational organizations; and a more in-depth understanding of social science research and methodology. To ensure competency in a specific area of interest, students choose one of three focus areas: (1) Education, (2) Governance, or (3) Health.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Requirements for the Major

School requirements must be met and must include 15 courses (60 units) as specified below. Students must take all required courses for the major for a letter grade.

A. An understanding of the fundamental concepts, analytical tools, and methods of social science:

SOC SCI 1A	Principles in the Social Sciences
SOC SCI 2A	Introduction to Social Science Analysis
SOC SCI 3A	Computer-Based Research in the Social Sciences

B. One course in Introduction to Social Policy and Public Service:

SOC SCI 40	Social Policy and Public Service
------------	----------------------------------

## C. One course in Cultural Competency:

SOC SCI 70C or SOCIOL 63	Comparing Cultures Race and Ethnicity
-----------------------------	--

## D. One course in Leadership:

SOC SCI 181A	Ethical Leadership
--------------	--------------------

## E. Two courses in Research Methods:

SOC SCI 102A	Introduction to Geographic Information Systems in Social Sciences
SOC SCI 170A	Research Methods in the Social Sciences

## F. Three quarters of Field Studies:

SOC SCI 193A- 193B- 193C	Field Studies in Social Policy and Public Service and Field Studies in Social Policy and Public Service and Field Studies in Social Policy and Public Service (must be taken consecutively)
--------------------------	---

## G. Four units of off-campus internship experience:

SOC SCI 194A	Public Service Internship
--------------	---------------------------

## H. Functional Focus: 12 units in one of the following areas:

**Education:**

EDUC 124	Multicultural Education in K-12 Schools
EDUC 126	Ethics and Education
EDUC 132	Reading and Writing Enrichment for After-School Programs
EDUC 150	Changing the High School Experience
EDUC 157	Educational Research and Evaluation
EDUC 175	Foundations of Education
EDUC 180	Interdisciplinary Topics in Education
CHC/LAT 189	Special Topics in Educational Policy and Issues
ECON 158	Economics of Education
PSYCH 141J-PSYCH 141K-PSYCH 141L	and and
SOC SCI 196	Global Connect

**Governance:**

ANTHRO 121G	Political Anthropology
ANTHRO 121J	Urban Anthropology
INTL ST 161A	Political Islam
INTL ST 165	Introduction to Contemporary Middle East Politics
INTL ST 177C	Revolution in Latin America
INTL ST 177E	Cuban Society and Revolution
POL SCI 122A	American Metropolitan Politics
POL SCI 122B	California Politics
POL SCI 124A	The Politics of Protest
POL SCI 124B	Latinos in U.S. Politics
POL SCI 124C	Comparative Minority Politics
POL SCI 124E	African American Politics
POL SCI 125A	The United States Congress
POL SCI 126C	U.S. Immigration Policy
POL SCI 126D	Urban Politics and Policy
POL SCI 130A	Game Theory and Politics I
POL SCI 130B	Game Theory and Politics II
POL SCI 137B	
POL SCI 142D	U.S. Foreign Policy I: Globalism and Cold War
POL SCI 151H	Voting and Political Manipulation
POL SCI 171A	
POL SCI 171D	American Constitutional Law
POL SCI 171F	Law in the Twenty-First Century

POL SCI 172A	International Law
POL SCI 174A	Civil Liberties
POL SCI 174C	U.S. Supreme Court
POL SCI 179	Special Topics in Public Law
SOC SCI 152A	Non-Government Organization (NGO) Fundamentals
SOC SCI 188A	Introduction to Contemporary Middle East Politics
SOCIOL 138	Business Decisions
SOCIOL 141	Organizations
SOCIOL 144	Politics, Power, and Society
SOCIOL 177W	Immigration and Social Policy
<b>Health:</b>	
ANTHRO 128B	Race, Gender, and Science
ANTHRO 132A	Psychological Anthropology
ANTHRO 134A	Medical Anthropology
ANTHRO 134G	HIV/AIDS in a Global Context
CHC/LAT 168	Chicano/Latino Social Psychology
CHC/LAT 179	Special Topics in Health, Medicine, and Psychosocial Dynamics
PSYCH 120A	Abnormal Psychology
PSYCH 120D	Developmental Psychology
PSYCH 121S	Psychology of Sleep and Consciousness
PSYCH 174E	African American Psychology
SOCIOL 135	Social Psychology of Networks
SOCIOL 154	Medical Sociology

NOTE: Certain special topics courses may be applicable to this major; students should see their undergraduate advisor prior to enrolling in a special topics course to ensure that it meets the requirements. SOC SCI 184A Sage Leader Research I-SOC SCI 184B Sage Leader Research II may not be used to satisfy school requirements.

## Honors Program

The honors program allows majors to engage in research leading to the completion of an honors thesis. The topic for the honors thesis, reflecting a social science theme, is determined by the student in consultation with a faculty advisor. In addition to satisfying the requirements for the major, honors program participants must complete additional course work as specified below.

The honors program is composed of three four-unit courses: SOC SCI H190A Honors Research Workshop, SOC SCI H190B Honors Thesis Research, and SOC SCI H190C Honors Thesis. Satisfactory completion of the honors thesis course also satisfies the upper-division writing requirement. The honors program is open to all junior and senior Social Policy and Public Service majors with an overall GPA of 3.20 and a 3.50 GPA in at least five Social Science courses.

The schedule of courses for the honors program is as follows:

1. During the spring quarter of the junior year or the summer prior to the senior year, students formally apply to the honors program through the School of Social Sciences Undergraduate Student Affairs Office.
2. In the fall quarter of the senior year, students enroll in SOC SCI H190A. This course ends with each student writing a research plan for the honors thesis. Students also select a faculty mentor who has agreed to supervise the research and evaluate the final version of their honors thesis.
3. In the winter quarter of the senior year, students enroll in SOC SCI H190B, attend class and work with their faculty mentor, who supervises and evaluates data collection and analysis.
4. In the spring quarter of the senior year, students enroll in SOC SCI H190C, attend class and work with their faculty mentor to complete the final version of their honors thesis.

## Pi Gamma Mu: International Honor Society

The International Honor Society in Social Sciences is the oldest and preeminent honor society in the social sciences with over 150 active chapters in the United States and overseas. The mission of Pi Gamma Mu at UC Irvine is to foster and honor superior scholarship in the Social Sciences and to encourage cooperation and social service among its members. The organization champions its members to pursue further education in their field and provides information and opportunities to help them achieve students achieve their professional goals. Its mission is to encourage and recognize superior scholarship in social science disciplines and to foster cooperation and social service among its members. For more information, call 949-824-9229.

## Social Science, M.A.

In addition to the departmental graduate programs, the School offers the M.A. in Social Science with concentrations in Demographic and Social Analysis and Medicine, Science and Technology Studies (<http://www.anthropology.uci.edu>).

### M.A. in Social Science with a Concentration in Demographic and Social Analysis

<http://www.demography.uci.edu>

The M.A. in Social Science with a concentration in Demographic and Social Analysis offers specialized training in the research skills to address practical problems confronting society, business, government, and the nonprofit sector. The concentration emphasizes the Pacific Rim and issues defining Southern California's population, such as immigration, changing household and family structure, racial and economic inequalities, and the impact of local and regional population growth. Informed by the interdisciplinary field of demography, the program draws on faculty and courses in the Schools of Social Sciences and Social Ecology.

#### Admission

Students are admitted to the program in the fall quarter. Students must hold a B.A. or B.S., normally in a social science or related field, and should have had at least four units of undergraduate statistics or equivalent mathematics courses. Students must meet the general admission requirements for graduate studies, which include official transcripts of all college course work, Graduate Record Examination scores for tests taken within the past five years, and three letters of recommendation. Applicants whose first language is not English must also take the Internet-based Test of English as a Foreign Language (TOEFL) and achieve a score of at least 80 out of 120. The International English Language Testing System (IELTS) examination may be used instead, in which case a minimum overall score of 7 out of 9 is required, with a score of not less than 6 out of 9 on any individual module.

#### Requirements

The M.A. requires 36 units of study and an oral exit examination. All students must complete 20 units of required courses which include one course in research design, one in demographic methods, one in populations, and two in statistics. In addition, students must complete 16 units of elective courses in population issues or research methods. No more than four units may be internship, independent study, directed readings, or thesis courses (to prepare for the oral examination). One or two electives may be upper-division undergraduate courses, with the remainder being graduate courses. All courses must be completed with a grade of B or better.

The M.A. in Social Science with a concentration in Demographic and Social Analysis may also be awarded to Ph.D. students who complete the necessary requirements.

For a list of the graduate courses in Social Science click on the 'Courses' tab above and scroll down to SOC SCI 209.

<http://www.anthropology.uci.edu>

**NOTE: Admission to the terminal M.A. in Medicine, Science, and Technology Concentration is currently closed. For more information,** visit the program website (<https://grad.uci.edu/academics/degree-programs/academic-masters/SocialScience-MedicineScienceandTechStudiesMA.php>).

The Department of Anthropology offers a Masters of Arts concentration in the School of Social Sciences focused on Medicine, Science, and Technology Studies, informally known as the M.A. in MSTs. Students who complete the program will earn an M.A. in Social Sciences (Medicine, Science, and Technology Studies).

This degree is the only terminal M.A. degree in either medical anthropology or science and technology studies in the University of California system. The program recognizes that these two fields and the social phenomena they examine are inextricably linked, and flexible course offerings provide students with an opportunity to pursue projects that focus on either field or that bridge both areas of study.

Ethnographers of medicine, science, and technology are in high demand, and the M.A. in MSTs will enable students to respond to the significant and rapidly changing impact of medicine, science, and technology upon economies and societies around the world. The program helps to prepare students for a range of employment opportunities in academia, public health, technology industries, and the nonprofit sector.

Students admitted for Fall 2014 will form the program's first cohort and will be enrolled in courses with current Ph.D. and possibly B.A. students. The program is administered by the Department of Anthropology, but draws on the expertise of faculty across the Irvine campus.

#### Requirements

##### Course Requirements

The M.A. in MSTs is a one-year program. Students will take three courses per quarter for a total of nine courses (36 units). All courses must be completed with a grade of B or better.

Required courses include:

1. ANTHRO 204A Proseminar in Medicine, Science, and Technology (4 units)
2. Eight elective courses (32 units) that may include:

- Approved graduate courses in the Anthropology department
- An internship, independent study, or directed reading (up to 4 units)
- Up to two electives may be approved upper-division undergraduate courses in the Anthropology department
- Up to two electives may be approved courses taken outside the Anthropology department
- Up to two electives may be Anthropology methods courses

### **Comprehensive Examination**

In addition to completing the required coursework, students must successfully complete a written comprehensive examination administered each year by the program committee.

### **Optional: Master's with Honors Paper**

In addition to the comprehensive exam, students in the program who wish to produce a written analysis larger than those created in conjunction with specific graduate courses may also complete the "Master's with Honor's Paper" option.

Students must declare their intention to earn a "Master's with Honors Paper" in the fall quarter of the program. The "Master's with Honors paper" involves combining two or three graduate seminar papers into a longer comprehensive thesis under the supervision of a program faculty member. Papers from undergraduate courses cannot be used for this option.

After completing this option, students may list the approved Honors Paper on their curricula vitae.

### **Course Offerings**

#### **Approved Graduate Courses in the Anthropology Department**

The following Anthropology graduate courses may be counted as electives toward the M.A. in MSTs:

ANTHRO 229A Anthropology of Knowledge  
 ANTHRO 232B Medical Anthropology  
 ANTHRO 249A Humanism and Posthumanism  
 ANTHRO 250A The Cultural Politics of Visual Representation  
 ANTHRO 250B Digital Technologies, Culture, and Media  
 ANTHRO 253A Design, Aesthetics, and Social Life  
 ANTHRO 257A Natures and Environments  
 ANTHRO 289 Other Knowledges  
 ANTHRO 289 Technomethods for Language and Culture  
 ANTHRO 289 Engaging Contradictions: Activist Scholarship

#### **Approved Upper-Division Undergraduate Courses in the Anthropology Department**

Up to two of the following Anthropology undergraduate courses may be counted as electives toward the M.A. in MSTs:

ANTHRO 125B Ecological Anthropology  
 ANTHRO 125F Humans and Other Animals  
 ANTHRO 128B Race, Gender, and Science  
 ANTHRO 128C Digital Cultures  
 ANTHRO 132A Psychological Anthropology  
 ANTHRO 134A Medical Anthropology  
 ANTHRO 134C Medicine, Food, and Health  
 ANTHRO 134G HIV/AIDS in a Global Context  
 ANTHRO 134F Anthropology of the Body  
 ANTHRO 139 Anthropology of Biomedicine and Biotechnology

Students may petition for additional courses to be counted as electives.

## **Social Science, Ph.D.**

Potential graduate students should apply to the Office of Research and Graduate Studies for admission to the Ph.D. program in Mathematical Behavioral Sciences.

<http://www.imbs.uci.edu/graduate> (<http://www.imbs.uci.edu/graduate/>)

The concentration in Mathematical Behavioral Sciences offers a program of interdisciplinary and mathematical approaches to the study of human behavior, providing high levels of training in current mathematical modeling and in mathematics and software use and programming. The program is

administered by an interdisciplinary group of faculty. Within the concentration, two optional emphases are available: Social Networks; and Games, Decisions, and Dynamical Systems. Specific requirements are detailed below.

## Admission

Admission to the concentration in Mathematical Behavioral Sciences requires evidence of appreciable mathematical skill and knowledge. As an absolute minimum, a candidate should have taken one full year of calculus, including calculus of several variables, and one course in linear algebra, and should also provide evidence of additional mathematical depth. This depth can be manifested in a number of different ways including, but not restricted to, an undergraduate degree in mathematics or physical science, a high score on the quantitative section of the GRE general test, or a strong undergraduate minor in mathematics. In addition, students should have some exposure to a behavioral science field. Especially useful is some experience with behavioral science modeling.

Those students interested in either the emphasis in Social Networks or the emphasis in Games, Decisions, and Dynamical Systems should make this clear in their application. A student is free at any time after admission to move into or out of either emphasis, but will be subject to the requirements in effect at the time of original admission to the concentration in Mathematical Behavioral Sciences.

## General Requirements

Four major classes of requirements must be fulfilled. Since a number of options are available, the student will, in consultation with an advisor, develop a plan of study.

**Quantitative/Mathematical.** To be completed by the end of the third year:

1. one course each in analysis beyond calculus, abstract algebra beyond linear algebra, and logic; and
2. two quarters of mathematical statistics, with calculus as a prerequisite and covering the fundamentals of probability and random variables.

A list of courses eligible for satisfying the Quantitative/Mathematical requirement is available at the Institute for Mathematical Behavioral Sciences website (<http://www.imbs.uci.edu/graduate/masters.php>).

**Language/Computer.** All students must be sufficiently familiar with various computer programs and languages to be able to conduct serious research in their field of interest and must submit either proposed courses or some demonstration of competency as part of their plan of study. In addition, students must either

1. attain proficiency in reading social science technical publications in one foreign language with a substantial relevant technical literature or
2. demonstrate proficiency in computer programming considerably beyond that of the standard computer requirement.

Because of the continually changing nature of computer languages and software, the conditions for fulfilling this additional computer expertise requirement is left to the judgment of the faculty subcommittee on computers of the Ph.D. program.

**Substantive Minor.** Students are expected to develop considerable expertise in some substantive field and in the application of models to it. This requires the completion of three courses at the upper-division or graduate level that do not necessarily entail extensive modeling, and three courses or seminars in which the primary thrust is mathematical modeling.

**Research Papers and Colloquia.** At the end of the second year, a 10–20-page paper reporting original research or a penetrating analysis of some subtopic of mathematical behavioral science (or either social networks, or games, decisions, and dynamical systems with a formal or mathematical component) is expected. An oral presentation will be given to faculty and graduate students. Two faculty members are assigned to read and evaluate the paper and talk.

Students are required to take for credit four quarters of the Mathematical Behavioral Sciences Colloquium, SOC SCI 211A--SOC SCI 211C, during their first three years. Although not a formal requirement, students are expected to attend the colloquium on a regular basis whenever in residence.

**Time to Degree.** Students must advance to candidacy in their fourth year. The normative time for completion of the Ph.D. is six years. The maximum time permitted is seven years.

## Emphasis in Social Networks

The requirements for the emphasis in Social Networks are the same as the general requirements noted above, with the following exceptions:

Students may choose to complete the first part of the Quantitative/Mathematical requirement with one course each in discrete mathematics, graph theory, and logic.

Social Networks students are required to attend about 75 percent of the Mathematical Behavioral Sciences Colloquia, including all that are designated as Social Networks Colloquia, and also must attend occasional colloquia, usually of local faculty and graduate students, which are separate from the general Mathematical Behavioral Sciences Colloquia.

### Emphasis in Games, Decisions, and Dynamical Systems

The requirements for the emphasis in Games, Decisions, and Dynamical Systems are the same as the general requirements noted above, with the following exceptions:

Students must complete eight graduate courses emphasizing game theory, decision theory, or dynamical systems. Examples of such courses are:

ANTHRO 289	Special Topics in Anthropology (when topics are Networks and Social Evolution; Cognition, Technology, and Genes; Dynamical Processes.)
ECON 243A	Game Theory
ECON 270A- 270B- 270C	Political Economy I and Political Economy II and Political Economy III

These courses will count toward the substantive minor requirement.

Students are required to attend about 75 percent of the Mathematical Behavioral Sciences Colloquia, including all that are designated as Games, Decisions, and Dynamical Systems colloquia, and must also must attend occasional colloquia, usually of local faculty and graduate students, which are separate from the general Mathematical Behavioral Sciences Colloquia.

## The Curriculum in Geography

The curriculum in geography promotes critical and creative thinking about the earth's physical and social elements. Providing a strong background on geographic issues, the curriculum addresses topics such as the evolution of the landscape, arrangement of urban centers, the internal structure of cities, and the arrangement of industrial and agricultural activities. Social elements addressed include the pattern of movement of people, goods and ideas, and relationships between humans and the environment.

### Courses in Geography

SOC SCI 5A	Introduction to Human Geography
SOC SCI 5B	Introduction to Physical Geography
SOC SCI 5D	US & World Geography
SOC SCI 119	Special Topics in Geography

252 Berk Hall  
949-824-1514  
<http://www.nursing.uci.edu/>  
[nssao@uci.edu](mailto:nssao@uci.edu)

The Sue and Bill Gross School of Nursing offers a B.S., M.S., and Ph.D. in Nursing Science, and a Doctor of Nursing Practice (D.N.P.). The baccalaureate degree is a scholarly, evidence-based, clinical practice program, preparing students to take the NCLEX-RN licensing examination upon graduation. The M.S. prepares graduate nurses with research and evidence-based practice competency; expertise in specialized concentrations of nursing practice; leadership role preparation; and health policy and advocacy skills for health promotion and disease prevention to support underserved populations. Currently, we have a Master's Entry Program in Nursing (MEPN) with a concentration in Community and Population Health Nursing. The Ph.D. prepares academic nurse scholars for research and teaching careers. The Ph.D. program advances the scholarly discipline of nursing through development of theory and empirical research; contributes to the growing body of knowledge in the field of nursing; and creates the future academic leaders of the nursing profession. The Doctor of Nursing Practice degree program is a professional practice-focused doctorate designed to develop competencies for advanced clinical leadership roles in nursing and healthcare. Nurses who complete the D.N.P. program will be prepared for career opportunities in an increasingly complex and changing healthcare environment. The program design and curriculum is geared toward working nurses and capitalizes on the educational richness of the College of Health Sciences.

- Doctor of Nursing Practice (D.N.P.)
- Nursing Science, B.S.
- Nursing Science, M.S.
- Nursing Science, Ph.D.

## Courses

### **NUR SCI 90. Introduction to Pain Medicine. 2 Units.**

Gives students introductory knowledge in pain medicine.

### **NUR SCI 92. Compassion in Health Care. 1 Unit.**

An overview of the importance of compassion in health care, providing examples from a variety of health care professions through lectures and discussion.

Grading Option: Pass/no pass only.

### **NUR SCI 110W. Frameworks for Professional Nursing Practice. 5 Units.**

Conceptual frameworks for professional practice. Scope of professional nursing, jurisprudence and ethics, professional interpersonal relationships, and health care delivery systems in the context of the social, political, and economic environments. Socialization of the student for professional roles in nursing.

Corequisite: NUR SCI 112LA and NUR SCI 114A and NUR SCI 118A

Prerequisite: BIO SCI D170 and BIO SCI E109. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Nursing Science Majors only.

### **(Ib)**

### **NUR SCI 112LA. Foundations of Professional Practice. 3 Units.**

Development of skills in communication, interviewing, functional and physical health assessment across the life span, the art and science of human care, and clinical judgment.

Corequisite: NUR SCI 110W and NUR SCI 114A and NUR SCI 118A

Prerequisite: BIO SCI E109 and BIO SCI D170

Restriction: Nursing Science Majors only.

### **NUR SCI 112LB. Foundations of Professional Practice. 4 Units.**

Development of skills in communication, interviewing, functional and physical health assessment across the life span, the art and science of human care, and clinical judgment.

Corequisite: NUR SCI 114B and NUR SCI 118B and NUR SCI 125 and NUR SCI 135

Prerequisite: NUR SCI 112LA and NUR SCI 110W and NUR SCI 114A and NUR SCI 118A

Restriction: Nursing Science Majors only.

### **NUR SCI 114A. Applied Pharmacology I. 2 Units.**

Presents principles of pharmacology applied to interventions in pathophysiologic states across the life span. Discussion of the major drug groups with implications for monitoring, drug administration, toxicity, and patient education are included.

Corequisite: NUR SCI 110W and NUR SCI 118A and NUR SCI 112LA

Prerequisite: BIO SCI E109 and BIO SCI D170

Restriction: Nursing Science Majors only.

Concurrent with NUR SCI 264A.

**NUR SCI 114B. Applied Pharmacology II. 2 Units.**

Presents principles of pharmacology applied to interventions in pathophysiologic states across the life span. Discussion of the major drug groups with implications for monitoring, drug administration, toxicity, and patient education are included.

Corequisite: NUR SCI 118B and NUR SCI 112LB and NUR SCI 125 and NUR SCI 135

Prerequisite: NUR SCI 114A and NUR SCI 118A and NUR SCI 110W and NUR SCI 112LA

Restriction: Nursing Science Majors only.

Concurrent with NUR SCI 264B.

**NUR SCI 116. Human Growth and Development through the Lifespan. 4 Units.**

Examines theories and concepts of typical human development throughout the life cycle, from the time of conception through adulthood, and familiarizes students with the many forces that shape individual development, including family, society, and culture.

Prerequisite: PSYCH 7A or PSY BEH 9. PSYCH 7A with a grade of C or better. PSY BEH 9 with a grade of C or better

Repeatability: May be taken for credit 2 times.

Restriction: Program in Nursing Science students only.

**NUR SCI 118A. Human Health and Disease I. 2 Units.**

Presents content on pathologic alterations in physiologic processes in cells, tissues, organs, and systems across the life span. Emphasis on critical thinking, application of concepts to clinical practice, and related research.

Corequisite: NUR SCI 114A and NUR SCI 112LA and NUR SCI 110W

Prerequisite: BIO SCI E109 and BIO SCI D170

Restriction: Nursing Science Majors only.

Concurrent with NUR SCI 268A.

**NUR SCI 118B. Human Health and Disease II. 2 Units.**

Presents content on pathologic alterations in physiologic processes in cells, tissues, organs, and systems across the life span. Emphasis on critical thinking, application of concepts to clinical practice, and related research.

Corequisite: NUR SCI 114B and NUR SCI 112LB and NUR SCI 125 and NUR SCI 135

Prerequisite: NUR SCI 112LA and NUR SCI 114A and NUR SCI 118A and NUR SCI 110W

Restriction: Nursing Science Majors only.

Concurrent with NUR SCI 268B.

**NUR SCI 120. Adult Health Care. 8 Units.**

Restorative, perioperative, supportive care of adults with acute/chronic alterations in oxygenation, regulation, immune response, elimination, metabolism, mobility, cognition, and substance abuse. Concurrent practicum occurs in inpatient medical-surgical units, perioperative units and outpatient clinics utilizing critical thinking and research skills.

Corequisite: NUR SCI 140

Prerequisite: NUR SCI 112LB and NUR SCI 114B and NUR SCI 118B and NUR SCI 125 and NUR SCI 135

Restriction: Nursing Science Majors only.

Concurrent with NUR SCI 266.

**NUR SCI 125. Research Methods and Applications in Health Care. 4 Units.**

Foundational concepts of research in health care. Emphasizes critical evaluation and interpretation of research for application in practice.

Corequisite: NUR SCI 112LB and NUR SCI 114B and NUR SCI 118B and NUR SCI 135

Prerequisite: NUR SCI 110W and NUR SCI 112LA and NUR SCI 114A and NUR SCI 118A. And a basic statistics course.

Restriction: Nursing Science Majors only.

**NUR SCI 130. Maternity and Women's Health Care. 8 Units.**

Provides didactic and clinical experiences in nursing management of women's wellness across the lifespan, the childbirth process, and newborn care. Incorporates concepts of family-centered care, teamwork and collaboration, patient safety, quality improvement and informatics, utilizing an evidence-based practice approach.

Corequisite: NUR SCI 132

Prerequisite: NUR SCI 120 and NUR SCI 140 and PSYCH 120D

Restriction: Nursing Science Majors only.

Concurrent with NUR SCI 273.

**NUR SCI 132. Pediatrics: Care of Children and Families. 7 Units.**

Provides didactic and clinical experiences in nursing management of infants, children, and adolescents with acute, chronic and/or life-threatening conditions. Incorporates concepts of family-centered care, teamwork and collaboration, patient safety, quality improvement and informatics, utilizing an evidence-based practice approach.

Corequisite: NUR SCI 130

Prerequisite: NUR SCI 120 and NUR SCI 140 and PSYCH 120D

Restriction: Nursing Science Majors only.

Concurrent with NUR SCI 272.

**NUR SCI 133. Complementary and Integrative Health . 2 Units.**

Complementary and integrative healthcare emphasized a holistic, patient-focused approach to healthcare and wellness. Key research is critically evaluated and applications for improving patient care emphasized. Knowledge and skills are developed through lectures, guest speakers, and discussion.

**NUR SCI 135. Older Adult Health Care. 2 Units.**

Theories of aging and application of principles of gerontology in health maintenance of older adults. Concepts and principles of rehabilitation and palliative care.

Corequisite: NUR SCI 112LB and NUR SCI 114B and NUR SCI 118B and NUR SCI 125

Prerequisite: NUR SCI 112LA and NUR SCI 114A and NUR SCI 118A and NUR SCI 110W

Restriction: Nursing Science Majors only.

Concurrent with NUR SCI 265.

**NUR SCI 140. Human Behavior and Mental Health Care. 7 Units.**

Biopsychosocial and cultural influences on promotion and restoration of mental health in adults and adolescents. Assessment, classification, and care of clients with mental health problems and/or substance abuse. Concurrent practicum in adult/adolescent inpatient psychiatric units and outpatient mental health clinics.

Corequisite: NUR SCI 120

Prerequisite: NUR SCI 112LB and NUR SCI 114B and NUR SCI 118B and NUR SCI 125 and NUR SCI 135

Restriction: Nursing Science Majors only.

Concurrent with NUR SCI 267.

**NUR SCI 150. Critical and Specialty Health Care. 6 Units.**

Delivery of patient-centered care for individuals with life-threatening alterations in health status utilizing technology and pharmacology for life support. Concurrent practicum in critical care units emphasizes collaboration, team work, and quality improvement in safe care delivery.

Corequisite: NUR SCI 160 and NUR SCI 179A

Prerequisite: NUR SCI 130 and NUR SCI 132

Restriction: Nursing Science Majors only.

Concurrent with NUR SCI 274.

**NUR SCI 160. Leadership and Management in Health Care. 4 Units.**

Principles, concepts, and theories related to organizations, management, leadership, decision-making, and group process applied to the delivery of health care. The professional nurse using evidenced-based practice, collaboration, and informatics is incorporated in concurrent practicum emphasizing safe patient care delivery.

Corequisite: NUR SCI 150 and NUR SCI 179A

Prerequisite: NUR SCI 130 and NUR SCI 132

Restriction: Nursing Science Majors only.

Concurrent with NUR SCI 276.

**NUR SCI 170. Community-Based Health Care. 6 Units.**

Epidemiology, primary health care promotion, and disease prevention applied to nursing care of individuals, families, groups, and communities. Includes sociocultural, political, economic, and environmental influences. Concepts and methods of assessing populations and communities incorporated in concurrent practicum.

Corequisite: NUR SCI 175L and NUR SCI 179BW

Prerequisite: NUR SCI 150 and NUR SCI 160 and NUR SCI 179A

Restriction: Nursing Science Majors only.

Concurrent with NUR SCI 271.

**NUR SCI 175L. Clinical Preceptorship. 6 Units.**

Independent study course focusing on critical thinking skills for nursing practice in selected clinical areas of interest to the student. The clinical experience focuses on core competencies: patient-centered care, evidence-based practice, quality improvement, safety, and informatics.

Corequisite: NUR SCI 170 and NUR SCI 179BW

Prerequisite: NUR SCI 150 and NUR SCI 160 and NUR SCI 179A

Grading Option: Pass/no pass only.

Restriction: Nursing Science Majors only.

Concurrent with NUR SCI 275.

**NUR SCI 179AW. Scholarly Concentration I. 2 Units.**

Focuses on analysis and use of evidence to improve nursing practice. Emphasis is to develop critical analysis skills synthesizing a body of research evidence for clinical issues on a formal, collaborative written paper.

Corequisite: NUR SCI 150 and NUR SCI 160

Prerequisite: NUR SCI 130 and NUR SCI 132

Restriction: Nursing Science Majors only.

**(Ib)**

**NUR SCI 179B. Scholarly Concentration II. 2 Units.**

Continuation of evidence-based research and application for nursing practice. Emphasis is to develop a collaborative quality improvement project with clinical nurses applying the evidence to improve nursing practice.

Corequisite: NUR SCI 170 and NUR SCI 175L

Prerequisite: NUR SCI 179A

Restriction: Nursing Science Majors only.

**NUR SCI 199. Independent Study in Nursing Science. 1-4 Units.**

Original research with Nursing Science faculty.

Repeatability: May be repeated for credit unlimited times.

**NUR SCI 200. Research Methods and Evaluation for Evidence-Based Practice. 3 Units.**

Clinical research methods and evaluation procedures relevant to evidence-based advanced nursing practice.

Prerequisite: Undergraduate statistics course; undergraduate nursing research course.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 210. Advanced Pathophysiology. 3 Units.**

Principles of normal body functioning and pathophysiologic changes that occur as a result of compensatory mechanisms and disease. Physical and psychological aspects of altered health are explored from the cellular to the level of the total body system.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 212. Philosophy of Science for Nursing Scholarship. 4 Units.**

Development of philosophy of science in relation to nursing science, scholarship, and practice; emphasis on inquiry, scientific reasoning, and contemporary philosophical thought; historical and contemporary influences on nursing science theory development; evaluation/analysis of interdisciplinary theory and application to nursing research.

Restriction: Graduate students only.

**NUR SCI 215. Health Promotion/Disease Prevention. 3 Units.**

Covers the evidence-based national clinical preventive services guidelines for health promotion and disease prevention. Emphasizes counseling about personal health behaviors, screening tests for the early detection of risk factors and disease, immunizations and chemo-prophylaxis.

Restriction: Graduate students only.

**NUR SCI 220. The Ecology of Healthy Communities. 2 Units.**

Nursing science research contributions and opportunities as they pertain to the ecology of health in local, national, and global communities. Emphasis on methodological and ethical issues, research gaps, and clinical translational opportunities.

Restriction: Graduate students only.

**NUR SCI 222A. Seminar in Clinical Translational Science. 2 Units.**

Discussion of clinical translational science methods in the context of nursing science research. Emphasis placed on interdisciplinary and community participatory research approaches.

Prerequisite: Consent of the instructor is required.

Restriction: Graduate students only.

**NUR SCI 222B. Seminar in Clinical Translational Science. 2 Units.**

Discussion of clinical translational science methods in the context of nursing science research. Emphasis placed on interdisciplinary and community participatory research approaches. Course may be offered online.

Prerequisite: NUR SCI 222A

Restriction: Graduate students only.

**NUR SCI 223A. Biostatistics for Health Sciences I. 4 Units.**

Helps students to develop skills necessary for applying statistical principles and practices in health research. This is achieved through in-depth review of existing research articles and hands-on statistical programming exercises.

Restriction: Graduate students only.

**NUR SCI 223B. Biostatistics for Health Sciences II. 4 Units.**

Introduces advanced methods of statistical analysis and research design used in health research. These include linear, logistic, Poisson regression, and a brief introduction to regression models for correlated data.

Prerequisite: NUR SCI 223A

Restriction: Graduate students only.

**NUR SCI 224. Research Designs in Nursing Science. 4 Units.**

Provides an introduction to qualitative and quantitative research designs, methods, and analyses in nursing science. Evaluation of measurement and population issues, data management, ethics, analytical approaches, mixed methods work, and translational potential in the context of research.

Restriction: Graduate students only. Nursing Science Majors only.

**NUR SCI 225A. Advanced Pharmacology I. 3 Units.**

Principles of pharmacology that serve as a foundation for the pharmacotherapeutic management of patients evaluated and treated by advanced practice nurses. Emphasis includes the application of pharmacokinetic and pharmacodynamic principles.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 225B. Advanced Pharmacology II. 2 Units.**

Principles of pharmacology that serve as a foundation for the pharmacotherapeutic management of patients evaluated and treated by advanced practice nurses. Emphasis includes the application of pharmacokinetic and pharmacodynamic principles.

Prerequisite: NUR SCI 225A. NUR SCI 225A with a grade of B or better

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 226. Theoretical and Conceptual Frameworks. 4 Units.**

Explores the history, roles, and uses of theory in nursing and health scholarship. Students examine, analyze, and utilize the components of theory, theory construction, concept analysis, and theory evaluation.

Restriction: Graduate students only.

**NUR SCI 227A. Grant Writing I. 4 Units.**

Introduction to the principles and methods of proposal writing used in preparing grant proposals. Provides content on the process for good proposal development, key elements and sections of proposal, necessary information to include in grant proposal and development of budget.

Prerequisite: NUR SCI 212 and NUR SCI 233 and NUR SCI 226 and NUR SCI 246 and NUR SCI 247

Restriction: Graduate students only.

**NUR SCI 227B. Grant Writing II. 2 Units.**

Provides a continuation of skill building in preparing a grant proposal, with emphasis on developing the educational training plan, budget and budget justification, the IRB and ethics component, and letters of support for a career-development grant.

Prerequisite: NUR SCI 227A. NUR SCI 227A with a grade of B or better

Restriction: Graduate students only.

**NUR SCI 230. Advanced Health and Physical Assessment. 3 Units.**

Application of theoretical concepts related to comprehensive health assessment of patients across the lifespan. Analysis, synthesis, and application of comprehensive health assessment data.

Corequisite: NUR SCI 230L

Restriction: Graduate students only.

**NUR SCI 230L. Advanced Health and Physical Assessment Laboratory. 1 Unit.**

Clinical laboratory course for the application of concepts related to comprehensive health assessment of patients across the lifespan.

Corequisite: NUR SCI 230

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 231. DNP Prologue . 2 Units.**

An onsite 2 ½ day immersive experience that provides an introduction to DNP scholarship and foundations essential for academic success in a doctoral program. Preparatory activities and onsite individual and group assignments are completed.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 232. Leadership and Professional Collaboration in Healthcare. 4 Units.**

Explore and debate the relationship between various leadership and collaboration models, theories health care practice, and outcomes. Prepares DNP graduates to assume leadership roles across the healthcare spectrum.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 233. Appraisal and Translation of Evidence for Practice . 3-4 Units.**

Provides advanced concepts on research methods and measurement strategies that are applicable to support the advanced practice nurse to access, evaluate, and utilize data from various sources including research, quality improvement initiatives, and information technology origins to achieve improvements.

Prerequisite: Consent of the instructor is required.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 234. Health Politics and Policy. 4 Units.**

Participants will analyze, apply, and evaluate current health policy-related literature, engage in the process of health policy development within professional, regulatory, or administrative environments, and develop an evidence-based health policy proposal across the spectrum of health care systems.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 235. DNP Scholarly Project I: Conceptualization and Planning . 1 Unit.**

Students gain the knowledge, skills, and abilities necessary to develop an evidence-based project plan and proposal. Structured didactic content and application of the Student's DNP Scholarly Project. First of four DNP Scholarly Project courses.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 236. Social Determinants of Health and Health Equity . 3 Units.**

The four components of the Clinical Prevention and Population Health Framework: evidence-based practice, clinical preventive service and health promotion, health systems and policy, and population health and community aspects of practice with emphasis on ethical care delivery.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 237. DNP Intersession. 2 Units.**

Provides DNP students an opportunity to present and receive faculty and peer feedback on their DNP project plan. Recommendations related to practical data collection and information gathering approaches and data analysis are also emphasized.

Prerequisite: NUR SCI 235. NUR SCI 235 with a grade of B or better

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 238. Foundations of Health Systems and Health Economics. 3 Units.**

Foundational understanding of how healthcare is financed in the U.S. Explores economic theories and policies, various types of healthcare organizations, and healthcare delivery systems. Healthcare finance is discussed at national and practice levels.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 239. The Science of Change, Quality Improvement, and Program Evaluation. 4 Units.**

Intro to science of quality improvement and program evaluation. Focus on info system technology and its application in quality improvement. Focus placed on the role of the advanced practice nurse leader in developing and leading clinical quality and safety initiatives.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**NUR SCI 240. DNP Scholarly Project II: Proposal. 1 Unit.**

Developing a full proposal that reflects synthesis of the student's knowledge from prior coursework and work in an area of interest or expertise under the direction of a faculty mentor. Second of four DNP Scholarly Project course sequence.

Prerequisite: NUR SCI 237. NUR SCI 237 with a grade of B or better

Restriction: Graduate students only. Consent of instructor required to enroll.

**NUR SCI 241. DNP Scholarly Project III: Implementation and Evaluation. 1 Unit.**

Continued development of knowledge, skills, and abilities to implement the chosen DNP proposal. Students receive direction from a faculty mentor and peer feedback as they become engaged in the microsystem where they are implementing their DNP Scholarly Project.

Prerequisite: NUR SCI 240. NUR SCI 240 with a grade of B or better

Restriction: Graduate students only.

**NUR SCI 242. DNP Scholarly Project IV: Implications . 1 Unit.**

Selection and implementation of evidence-based interventions supported through informatics and technological advances and measurement of outcomes in a selected practicum site as applicable. Includes reflection and mapping of the DNP Scholarly Project with DNP Essentials as published.

Prerequisite: NUR SCI 241. NUR SCI 241 with a grade of B or better

Restriction: Graduate students only.

**NUR SCI 243. DNP Epilogue. 2 Units.**

DNP students develop DNP competency through the presentation of their project and development of a professional manuscript. Individual direction from the DNP Project Team and peer feedback are provided throughout the course.

Prerequisite: NUR SCI 242. NUR SCI 242 with a grade of B or better

Restriction: Graduate students only.

**NUR SCI 245. Primary Care Adult/Gerontology Acute Common Conditions . 3 Units.**

Assessment and management of acute or episodic problems affecting patients and families across the lifespan. Diagnostics, pharmacology, pathophysiology, and therapeutics are integrated. Concepts of quality health care, resource management, and shared-decision making are emphasized.

Prerequisite: NUR SCI 210 and NUR SCI 230. NUR SCI 210 with a grade of B or better. NUR SCI 230 with a grade of B or better

Restriction: Graduate students only.

**NUR SCI 246. Qualitative Research Designs in Nursing Science. 4 Units.**

Seminar in qualitative research philosophies, methods, and analysis in nursing science clinical research. Consideration of population access and sampling, ethics, data management, analytical approaches, and translational potential.

Restriction: Graduate students only.

**NUR SCI 247. Quantitative Research Designs in Nursing Science. 4 Units.**

Seminar in experimental and survey research designs, methods, and analysis in nursing science clinical research. Consideration of measurement issues, mixed methods models, population access and sampling, data management, analytical approaches, and translational potential.

Prerequisite: NUR SCI 212

Restriction: Graduate students only.

**NUR SCI 248. Curricular Design for the Health Professions. 3 Units.**

Introduces students to the theoretical foundations, essential components, and accreditation standards for curriculum development at the program level. Outcome competencies are addressed as they apply to the development and evaluation of an educational program to meet society's diverse healthcare needs.

Restriction: Graduate students only.

**NUR SCI 249. Transformational Leadership in Education for the Health Professions. 4 Units.**

Students are introduced to the role of the nurse educator as change agent, leader, and scholar and provided experience in planning learner-centered learning activities that are engaging and effective in achieving desired student performance.

Restriction: Graduate students only.

**NUR SCI 250. Primary Care Women's Health. 2 Units.**

Primary health care needs of women including adolescent, adult, and aging adults. Emphasizes assessment, diagnosis, prevention, management, and education of common gynecologic and family planning health care needs.

Prerequisite: NUR SCI 210 and NUR SCI 230. NUR SCI 210 with a grade of B or better. NUR SCI 230 with a grade of B or better

Restriction: Graduate students only. Consent of instructor required to enroll.

**NUR SCI 251. Nursing Informatics . 4 Units.**

Provides an overview of nursing informatics topics for practice.

Restriction: Graduate students only.

**NUR SCI 255. Primary Care Obstetrics. 2 Units.**

Assessment and management of women during pregnancy. Diagnostics, pharmacology, pathophysiology and therapeutics are integrated. Includes assessment, differential diagnosis, management, patient/family education, and counseling related to normal pregnancy care.

Prerequisite: NUR SCI 210 NUR SCI 230. NUR SCI 210 with a grade of B or better. NUR SCI 230 with a grade of B or better

Restriction: Graduate students only. Consent of instructor required to enroll.

**NUR SCI 260A. Primary Care Adult/Gerontology Chronic Conditions . 3 Units.**

Assessment and management of acute or episodic problems affecting adult and geriatric patients and their families. Diagnostics, pharmacology, pathophysiology, and therapeutic are integrated.

Prerequisite: NUR SCI 245. NUR SCI 245 with a grade of B or better

Restriction: Graduate students only. Consent of instructor required to enroll.

**NUR SCI 262. Foundations of Professional Nursing Practice. 4 Units.**

Focuses on the development of skills in therapeutic communication, interviewing, functional assessment across the lifespan, the art and science of human care, and clinical judgment. Faculty-facilitated, participatory peer group, and self-learning laboratory activities are included.

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

**NUR SCI 263. Frameworks for Professional Nursing Practice. 4 Units.**

A theory-intensive course focused on conceptual frameworks for professional nursing practice. Topics address the professional, political, and economic contexts of nursing practice, with an emphasis on jurisprudence and ethics, professional interpersonal relationships, and nursing's role in the care delivery system.

Restriction: Graduate students only.

**NUR SCI 264A. Applied Pharmacology I. 2 Units.**

Principles of pharmacology applied to intervention in pathophysiologic states across the life span. Discussion of the major drug groups with implications for monitoring, drug administration, toxicity, and patient education included. Physical, psychological, social, and cultural factors affecting drug administration.

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

Concurrent with NUR SCI 114A.

**NUR SCI 264B. Applied Pharmacology II. 2 Units.**

Principles of pharmacology applied to intervention in pathophysiologic states across the life span. Discussion of the major drug groups with implications for monitoring, drug administration, toxicity, and patient education included. Physical, psychological, social, and cultural factors affecting drug administration.

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

Concurrent with NUR SCI 114B.

**NUR SCI 265. Older Adult Health Care. 2 Units.**

Analyzes the interaction of physical, pathophysiological, psychological, social, cultural, and health care policy factors influencing the health and health care of older adults. Topics include health risk factors, health assessment, acute illness and chronic conditions, and ethical issues.

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

Concurrent with NUR SCI 135.

**NUR SCI 266. Adult Health Care . 8 Units.**

Focuses on the restorative, peri-operative, and supportive nursing management of adults with acute or chronic alterations in oxygenation, regulation, immune response, elimination, metabolism, mobility, cognition, and substance abuse. Diagnostics, pharmacology, pathophysiology, and therapeutics will be integrated.

Prerequisite: NUR SCI 200 and NUR SCI 262 and NUR SCI 264A and NUR SCI 264B and NUR SCI 268A and NUR SCI 268B and NUR SCI 265 and NUR SCI 281

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

Concurrent with NUR SCI 120.

**NUR SCI 267. Human Behavior and Mental Health Nursing . 7 Units.**

Focuses on nursing management of individuals across the lifespan with alterations in mental health. Mental health promotion and crisis intervention, chemical dependency, acute and chronic care for psychiatric conditions, rehabilitation, and recovery will be addressed.

Prerequisite: NUR SCI 200 and NUR SCI 262 and NUR SCI 264A and NUR SCI 264B and NUR SCI 268A and NUR SCI 268B and NUR SCI 265 and NUR SCI 281

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

Concurrent with NUR SCI 140.

**NUR SCI 268A. Pathophysiology I . 2 Units.**

Focuses on pathologic alterations in physiologic processes in cells, tissues, organs, and systems across the life span. Content includes disease processes, linkage of relevant physiology to disease states, and factors that influence epidemiology and pathophysiology.

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

Concurrent with NUR SCI 118A.

**NUR SCI 268B. Pathophysiology II . 2 Units.**

Focuses on pathologic alterations in physiologic processes in cells, tissues, organs, and systems across the life span. Content includes disease processes, linkage of relevant physiology to disease states, and factors that influence epidemiology and pathophysiology.

Prerequisite: NUR SCI 268A

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

Concurrent with NUR SCI 118B.

**NUR SCI 270. Primary Care Pediatrics. 2 Units.**

Assessment and management of acute or episodic problems affecting pediatric patients and their families. Diagnostics, pharmacology, pathophysiology, and therapeutics are integrated.

Prerequisite: NUR SCI 210 and NUR SCI 230. NUR SCI 210 with a grade of B or better. NUR SCI 230 with a grade of B or better

Restriction: Graduate students only. Consent of instructor required to enroll.

**NUR SCI 271. Community-Based Health Care . 6 Units.**

Epidemiology, primary health care promotion, and disease prevention applied to nursing care of individuals, families, groups, and communities. Includes sociocultural, political, economic, and environmental influences. Concepts and methods of assessing populations and communities incorporated in concurrent practicum.

Prerequisite: NUR SCI 215 and NUR SCI 274 and NUR SCI 276

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

Concurrent with NUR SCI 170.

**NUR SCI 272. Pediatrics: Care of Children and Families. 7 Units.**

Provides didactic and clinical experiences in nursing management of infants, children, and adolescents with acute, chronic, and/or life-threatening conditions. Incorporates concepts of family-centered care, teamwork and collaboration, patient safety, quality improvement and informatics, utilizing an evidence-based practice approach.

Prerequisite: NUR SCI 266 and NUR SCI 267

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

Concurrent with NUR SCI 132.

**NUR SCI 273. Maternity and Women's Health Care. 8 Units.**

Provides didactic and clinical experiences in nursing management of women's wellness across the lifespan, the childbirth process, and newborn care. Incorporates concepts of family-centered care, teamwork and collaboration, patient safety, quality improvement and informatics, utilizing an evidence-based practice approach.

Prerequisite: NUR SCI 266 and NUR SCI 267

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

Concurrent with NUR SCI 130.

**NUR SCI 274. Critical and Specialty Health Care. 6 Units.**

Focuses on the restorative, supportive care of individuals with life-threatening alterations in health status utilizing technology and pharmacology for life support. The course includes pathophysiology, diagnostics, monitoring, pharmacology, therapeutics, and evidence-based management interventions will be integrated.

Prerequisite: NUR SCI 272 and NUR SCI 273

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

Concurrent with NUR SCI 150.

**NUR SCI 275. Clinical Preceptorship. 6 Units.**

Independent study course focusing on in-depth clinical nursing practice in a selected clinical area of interest to the graduate student. Students are mentored by a preceptor who is an expert clinician in the area.

Prerequisite: NUR SCI 215 and NUR SCI 274 and NUR SCI 276

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

Concurrent with NUR SCI 175L.

**NUR SCI 276. Leadership and Management in Health Care. 4 Units.**

Explores the professional nurse as leader and manager of a health care team. Principles and theories related to organizations, leadership, decision-making, and group process are applied to the delivery of health care at the individual and population levels.

Prerequisite: NUR SCI 272 and NUR SCI 273

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

Concurrent with NUR SCI 160.

**NUR SCI 279A. Frameworks for the Advanced Practice Registered Nursing Role: Nurse Practitioner . 2 Units.**

Orientation to the scope and standards of advanced practice registered nursing pertinent to the APRN role. Principles of jurisprudence, ethics, and advocacy will be introduced along with conceptual frameworks for advanced nursing practice.

Restriction: Graduate students only.

**NUR SCI 281. Professional Issues in Nursing . 3 Units.**

Provides an orientation to the scope and standards of professional nursing practice for master's students. The social, political, and economic environments affecting health care delivery systems and the ethics of professional nursing practice are analyzed.

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

**NUR SCI 282. Compassionate Care with Underserved Populations. 2-3 Units.**

Addresses theory/research on health risk factors (e.g., psychiatric illness, sociocultural and economic characteristics) that impact patient health and well-being across the lifespan. Emphasis is on cultural awareness, lifestyle modification, community resources, and communication/coping strategies to promote well-being.

Restriction: Graduate students only.

**NUR SCI 283. Primary Care Procedures. 2 Units.**

Introduces the theoretical basis for common procedures performed in primary care clinical practice. Focus includes EKG interpretation, x-ray interpretation, minor surgery, and orthopaedic procedures.

Prerequisite: NUR SCI 245. NUR SCI 245 with a grade of B or better

Restriction: Graduate students only. Consent of instructor required to enroll.

**NUR SCI 284. Scholarly Concentration. 3 Units.**

Independent study focusing on critique, analysis, and synthesis of research evidence as a basis for graduate practice nursing in an area of interest to the student.

Prerequisite: NUR SCI 200

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

**NUR SCI 285. DNP APRN Practicum I. 2 Units.**

Clinical application of theory and research related to the advanced assessment and health promotion of patients across the lifespan.

Prerequisite: NUR SCI 210 and NUR SCI 230 and (NUR SCI 230L or NUR SCI 231L). NUR SCI 210 with a grade of B or better. NUR SCI 230 with a grade of B or better. NUR SCI 230L with a grade of B or better. NUR SCI 231L with a grade of B or better

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**NUR SCI 286. DNP APRN Practicum II. 2 Units.**

Clinical field study applying theory, research, and developing clinical skills related to the provision of care to patients and their families in increasingly complex clinical situations.

Prerequisite: NUR SCI 285. NUR SCI 285 with a grade of B or better

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Consent of instructor required to enroll.

**NUR SCI 287. DNP APRN Practicum III. 6 Units.**

Clinical application of theory and research through clinical experiences in selected primary care settings designed to provide students with competencies in the assessment, diagnosis, management, and education/counseling in selected populations.

Prerequisite: NUR SCI 286. NUR SCI 286 with a grade of B or better

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Consent of instructor required to enroll.

**NUR SCI 288. DNP APRN Practicum IV. 7 Units.**

Continued clinical application of theory and research through clinical experiences in selected primary care settings designed to provide students with competencies in the assessment, diagnosis, management, and education/counseling in selected populations.

Prerequisite: NUR SCI 287. NUR SCI 287 with a grade of B or better

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Consent of instructor required to enroll.

**NUR SCI 289. DNP APRN Practicum V. 8 Units.**

Culminating clinical experience serves as a transition from the student role to that of the advanced practice nurse.

Prerequisite: NUR SCI 288. NUR SCI 288 with a grade of B or better

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Consent of instructor required to enroll.

**NUR SCI 290. DNP APRN Practicum VI. 4 Units.**

Through continued clinical experience, students demonstrate increased responsibility and accountability for performance as an advanced practice nurse and clinical scholar, synthesizing knowledge of pathophysiology and disease management, evidence-based guidelines, anticipatory guidance, models of provider-patient communication, and provision of educational resources.

Prerequisite: NUR SCI 289. NUR SCI 289 with a grade of B or better

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Consent of instructor required to enroll.

**NUR SCI 291. DNP Practicum I. 4-8 Units.**

Implementation and evaluation of an evidence-based, DNP project in an area of advanced practice in partnership with a selected agency or organization that solves a practice problem or improves population health, educational, or performance outcomes.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**NUR SCI 292. DNP Practicum II. 5-10 Units.**

Implementation and evaluation of an evidence-based, DNP project in an area of advanced practice in partnership with a selected agency or organization that solves a practice problem or improves population health, educational, or performance outcomes.

Prerequisite: NUR SCI 291. NUR SCI 291 with a grade of B or better

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Consent of instructor required to enroll.

**NUR SCI 293. DNP Practicum III. 4-8 Units.**

Implementation and evaluation of an evidence-based, DNP project in an area of advanced practice in partnership with a selected agency or organization that solves a practice problem or improves population health, educational, or performance outcomes.

Prerequisite: NUR SCI 292. NUR SCI 292 with a grade of B or better

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Consent of instructor required to enroll.

**NUR SCI 294. Directed Study in Vulnerable Populations. 1-4 Units.**

Independent study that focuses on individually designed clinical learning experiences and goals within a selected vulnerable population, such as the homeless, veterans, minority groups, etc. Students work in a clinical setting addressing health care needs of the vulnerable population(s).

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 2 times.

Restriction: Nursing Science, Community and Population Health Nursing Majors only.

**NUR SCI 296. Doctoral Dissertation Reading and Writing. 4-12 Units.**

Dissertation research with Nursing Sciences faculty.

Prerequisite: Advancement to candidacy.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**NUR SCI 298. Directed Studies in Nursing Science. 1-12 Units.**

Directed study with Nursing Science faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**NUR SCI 299. Independent Study in Nursing Science. 1-12 Units.**

Independent research with Nursing Science faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**NUR SCI 399. University Teaching. 4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Doctor of Nursing Practice (D.N.P.)

The Doctor of Nursing Practice (D.N.P.) degree program is a professional practice-focused doctorate designed to develop competencies for advanced clinical and leadership roles in nursing and healthcare. The D.N.P. program increases opportunities for nurses to meet the demands of an increasingly complex and changing healthcare landscape. The program and innovative curriculum capitalize on the educational richness of the College of Health Sciences.

This program utilizes a hybrid educational delivery platform.

**DNP - Family Nurse Practitioner Track**

The DNP Family Nurse Practitioner track is designed for students who have a B.S. or M.S. in nursing and are seeking a terminal practice-focused nursing degree and certification as a family nurse practitioner (FNP); this track can be completed in 11 quarters.

**DNP (Post-Master's) Track**

The DNP (Post-Master's) Track is designed for students who have an M.S. in nursing and are seeking a terminal practice-focused nursing degree without certification as a nurse practitioner (NP); this track can be completed in seven quarters.

**DNP - Family Nurse Practitioner**

Applicants must have:

- Earned a bachelor's or master's degree in nursing from an accredited program
- An active, unrestricted California RN license
- At least one year full-time work (or equivalent) as a registered nurse in the U.S. prior to the start of program entry
- Completed a course in descriptive and inferential statistics with a grade of B or better within five years of admission to the program

- A complete application file including the application form, official transcripts, three letters of recommendation, and a resume or curriculum vitae
- Applicants must meet the general requirements of the UCI Graduate Division. A personal interview is required of all applicants considered for admission. The GRE is not required.

### **DNP (Post-Master's)**

Applicants must have:

- Earned a master's degree in nursing from an accredited program
- An active, unrestricted RN license in the state where D.N.P. practicum work will occur
- At least one year fulltime work (or equivalent) as registered nurse in the U.S. prior to the start of program entry
- Completed a course in descriptive and inferential statistics with a grade of B or better within five years admission to the program.
- A complete application file including the application form, official transcripts, three letters of recommendation, and a resume or curriculum vitae
- Applicants must meet the general requirements of the UCI Graduate Division
- A personal interview is required of all applicants considered for admission. The GRE is not required.

Students enrolled in the DNP - Family Nurse Practitioner track complete 98 units and 1020 hours of clinical practice. Students enrolled in the DNP (Post-Master's) track complete 53 units and 540 hours of clinical practice. There is no foreign language requirement; proficiency in a language other than English is desirable but not required.

In lieu of a thesis or dissertation, a Scholarly Project will be required for this professional degree. In preparation for developing this D.N.P. Scholarly Project, students will complete a D.N.P. Project Proposal and present this to their D.N.P. Scholarly Project Team during the D.N.P. Scholarly Project II: Proposal course. Once approved by the Team, the student begins implementation of their D.N.P. Scholarly Project. The D.N.P. Scholarly Project requires students to demonstrate a synthesis of evidence-based practice in a practice area specific to their specialty and interest.

The students provide a final presentation of the completed work to the D.N.P. Team and invited University and community guests in their last quarter, at the conclusion of the D.N.P. epilogue course. Development of a formal manuscript suitable for publication is also required.

The normative time to degree for the DNP - Family Nurse Practitioner track is three years, with a maximum time permitted of five years. The normative time to degree for the DNP (Post-Master's) track is two years, with a maximum time permitted of four years.

### **DNP - Family Nurse Practitioner Requirements**

A. Complete:

NUR SCI 200	Research Methods and Evaluation for Evidence-Based Practice
NUR SCI 210	Advanced Pathophysiology
NUR SCI 215	Health Promotion/Disease Prevention
NUR SCI 222A	Seminar in Clinical Translational Science
NUR SCI 225A	Advanced Pharmacology I
NUR SCI 225B	Advanced Pharmacology II
NUR SCI 230	Advanced Health and Physical Assessment
NUR SCI 230L	Advanced Health and Physical Assessment Laboratory
NUR SCI 231	DNP Prologue
NUR SCI 232	Leadership and Professional Collaboration in Healthcare
NUR SCI 233	Appraisal and Translation of Evidence for Practice
NUR SCI 234	Health Politics and Policy
NUR SCI 235	DNP Scholarly Project I: Conceptualization and Planning
NUR SCI 236	Social Determinants of Health and Health Equity
NUR SCI 237	DNP Intersession
NUR SCI 238	Foundations of Health Systems and Health Economics
NUR SCI 239	The Science of Change, Quality Improvement, and Program Evaluation
NUR SCI 240	DNP Scholarly Project II: Proposal
NUR SCI 241	DNP Scholarly Project III: Implementation and Evaluation
NUR SCI 242	DNP Scholarly Project IV: Implications
NUR SCI 243	DNP Epilogue
NUR SCI 245	Primary Care Adult/Gerontology Acute Common Conditions
NUR SCI 250	Primary Care Women's Health
NUR SCI 255	Primary Care Obstetrics

NUR SCI 260A	Primary Care Adult/Gerontology Chronic Conditions
NUR SCI 270	Primary Care Pediatrics
NUR SCI 279A	Frameworks for the Advanced Practice Registered Nursing Role: Nurse Practitioner
NUR SCI 282	Compassionate Care with Underserved Populations
NUR SCI 283	Primary Care Procedures
NUR SCI 285	DNP APRN Practicum I
NUR SCI 286	DNP APRN Practicum II
NUR SCI 287	DNP APRN Practicum III
NUR SCI 288	DNP APRN Practicum IV
NUR SCI 289	DNP APRN Practicum V
NUR SCI 290	DNP APRN Practicum VI

B. If additional units are needed, select from the following:

NUR SCI 248	Curricular Design for the Health Professions
NUR SCI 249	Transformational Leadership in Education for the Health Professions

### DNP (Post-Master's) Requirements

A. Complete:

NUR SCI 231	DNP Prologue
NUR SCI 232	Leadership and Professional Collaboration in Healthcare
NUR SCI 222A	Seminar in Clinical Translational Science
NUR SCI 233	Appraisal and Translation of Evidence for Practice
NUR SCI 234	Health Politics and Policy
NUR SCI 235	DNP Scholarly Project I: Conceptualization and Planning
NUR SCI 236	Social Determinants of Health and Health Equity
NUR SCI 237	DNP Intersession
NUR SCI 238	Foundations of Health Systems and Health Economics
NUR SCI 239	The Science of Change, Quality Improvement, and Program Evaluation
NUR SCI 240	DNP Scholarly Project II: Proposal
NUR SCI 241	DNP Scholarly Project III: Implementation and Evaluation
NUR SCI 242	DNP Scholarly Project IV: Implications
NUR SCI 243	DNP Epilogue
NUR SCI 248	Curricular Design for the Health Professions
NUR SCI 249	Transformational Leadership in Education for the Health Professions
NUR SCI 291	DNP Practicum I
NUR SCI 292	DNP Practicum II
NUR SCI 293	DNP Practicum III

## Nursing Science, B.S.

Nurse professionals are members of interdisciplinary teams who work with people of all ages, cultural backgrounds, and lifestyles to help them achieve the highest level of wellness possible. The Bachelor of Science degree program in Nursing Science prepares graduates to function as generalists in professional nursing practice and to collaborate with other health care providers in clinics, hospitals, and community health settings. The undergraduate curriculum is designed to provide theory and research-based clinical experiences that integrate critical thinking, compassion, and caring behaviors that build clinical expertise. Students who successfully complete the B.S. degree in Nursing Science are eligible to take the licensure examination to become a registered nurse.

Most of the courses required for the major require completion of prerequisites. The sample program shown is a preferred sequence that accounts for all prerequisites. Most required courses are offered in sequence and only once a year. Full-time enrollment is required.

All students interested in the Nursing Science major should be aware that they will be required to do the following: (1) meet the physical and mental requirements necessary to perform nursing practice functions as outlined in Chapter 6, Article 2, Item 2725 of the *Business and Professions Code of California*; (2) complete a criminal background check prior to entering the clinical portion of the major in the junior year as required by health care facilities in which students will have clinical experiences; (3) purchase uniforms and other required equipment such as stethoscopes; (4) have access to transportation for off-campus clinical experiences beginning in the junior year.

Meeting the UCI admission criteria does not guarantee admission into the major. The admission process is competitive due to limited enrollment.

**Freshmen:** Preference will be given to those who rank the highest using the selection criteria as stated in the Admissions section of the *Catalogue*.

**Transfer students:** Admission to the major is limited and selective. Junior-level applicants with the highest grades overall and who satisfactorily complete course prerequisites will be given preference for admission to the Nursing Science major. The following list of prerequisites is required for transfer students applying for fall 2019 entry and beyond. All applicants must complete the following with grades of B or better: one year of general chemistry equivalent to UCI's CHEM 1A - CHEM 1B - CHEM 1C; one quarter/semester of organic chemistry equivalent to UCI's CHEM 51A; one quarter/semester of genetics equivalent to UCI's BIO SCI 97; one quarter/semester of biochemistry equivalent to UCI's BIO SCI 98; one quarter/semester of human physiology with laboratory equivalent to UCI's BIO SCI E109 and BIO SCI E112L; one quarter/semester of microbiology with laboratory equivalent to UCI's BIO SCI M122 and BIO SCI M118L; one quarter/semester of human anatomy with laboratory equivalent to UCI's BIO SCI D170; one quarter/semester of philosophy equivalent to UCI's PHILOS 4 or PHILOS 5; one quarter/semester of psychology equivalent to UCI's PSYCH 7A/PSCI 9; one quarter/semester of public health equivalent to UCI's PUBHLTH 1; one quarter/semester of sociology equivalent to UCI's SOCIOL 1; and one quarter/semester of statistics equivalent to UCI's STATS 7 or STATS 8. Applicants must have a cumulative GPA of 3.0 or higher to be considered.

**Change of Major:** Due to strict limits on the number of students who can be admitted to the program and rigid sequencing of much of the upper-division curriculum, change-of-major students need to apply in the month of November for winter quarter admission, at the earliest in sophomore year. Students should review the UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu/>) and the Sue and Bill Gross School of Nursing website (<http://www.nursing.uci.edu/>) for information regarding change of major admission requirements, application instructions, and selection criteria. Change-of-major students who are intending to apply to the Sue and Bill Gross School of Nursing should be aware that the School cannot waive course prerequisites for any School of Biological Sciences or School of Physical Sciences courses, prior to admission into the Nursing Science major. As such, change of major students must adhere to the course prerequisites that these Schools have established and have published in the course descriptions that appear in the *Catalogue*.

All major requirements must be passed with a C or better if taken at UCI. Students are required to take all lower- and upper-division science courses required for the major at UCI once they have matriculated at UCI. Non-science, lower-division courses required for the major that have been taken at another institution must be completed with a B or better. General education courses (not required for the major) taken at another institution must be completed with a C or better. All Nursing Science courses must be taken at UCI. Students must maintain a 2.75 GPA in their upper-division Nursing Science courses to remain in good standing. If Nursing Science students fail any courses required for the major, they should contact Student Affairs for the repeat policy. Students interested in studying abroad should contact Student Affairs.

**All students must meet the University Requirements.**

### Major Requirements

#### Complete the following courses:

BIO SCI 97	Genetics
BIO SCI 98	Biochemistry
BIO SCI D170	Applied Human Anatomy
BIO SCI E109	Human Physiology
BIO SCI E112L	Physiology Laboratory
BIO SCI M122	General Microbiology
BIO SCI M118L	Experimental Microbiology Laboratory
CHEM 1A- 1B- 1C	General Chemistry and General Chemistry and General Chemistry
CHEM 51A	Organic Chemistry
PHILOS 4 or PHILOS 5	Introduction to Ethics Contemporary Moral Problems

#### Select one of the following:

PSCI 9	Introduction to Psychology
PSCI 11A	Psychology Fundamentals
PSCI 11B	Psychology Fundamentals
PSCI 11C	Psychology Fundamentals
PSYCH 7A	Introduction to Psychology
PSYCH 9A	Psychology Fundamentals
PSYCH 9B	Psychology Fundamentals
PSYCH 9C	Psychology Fundamentals
PSYCH 78A	Self-Identity and Society

**Select one of the following:**

ANTHRO 2A	Introduction to Sociocultural Anthropology
ANTHRO 2D	Introduction to Language and Culture
ANTHRO 41A	Global Cultures and Society
SOC SCI 1A	Principles in the Social Sciences
SOCIOL 1	Introduction to Sociology
SOCIOL 2	Globalization and Transnational Sociology
SOCIOL 3	Social Problems
SOCIOL 31	Self-Identity and Society
SOCIOL 44	Births, Deaths, and Migration
SOCIOL 62	Families and Intimate Relations

**Select one of the following:**

PSYCH 10A	Probability and Statistics in Psychology I
SOC SCI 10A	Probability and Statistics in Social Sciences I
SOCIOL 10A	Probability and Statistics
STATS 7	Basic Statistics
STATS 8	Introduction to Biological Statistics

**Complete the following course:**

PUBHLTH 1	Principles of Public Health
-----------	-----------------------------

**Complete the following Nursing Science courses:**

NUR SCI 110W	Frameworks for Professional Nursing Practice
NUR SCI 112LA	Foundations of Professional Practice
NUR SCI 112LB	Foundations of Professional Practice
NUR SCI 114A	Applied Pharmacology I
NUR SCI 114B	Applied Pharmacology II
NUR SCI 116	Human Growth and Development through the Lifespan
NUR SCI 118A	Human Health and Disease I
NUR SCI 118B	Human Health and Disease II
NUR SCI 120	Adult Health Care
NUR SCI 125	Research Methods and Applications in Health Care
NUR SCI 130	Maternity and Women's Health Care
NUR SCI 132	Pediatrics: Care of Children and Families
NUR SCI 135	Older Adult Health Care
NUR SCI 140	Human Behavior and Mental Health Care
NUR SCI 150	Critical and Specialty Health Care
NUR SCI 160	Leadership and Management in Health Care
NUR SCI 170	Community-Based Health Care
NUR SCI 175L	Clinical Preceptorship
NUR SCI 179AW	Scholarly Concentration I
NUR SCI 179B	Scholarly Concentration II

NOTE: Double majors with Nursing Science, Pharmaceutical Sciences, Public Health Sciences, Biomedical Engineering: Premedical, or with any of the School of Biological Sciences majors are not permitted. Students majoring in Nursing Science may not minor in Biological Sciences.

Honors at graduation, e.g., *cum laude*, *magna cum laude*, *summa cum laude*, are awarded to approximately the top 16 percent of the graduating seniors. To be eligible for honors, a general criterion is that students must have completed at least 72 units in residence at a University of California campus. Other important factors are considered (see Honors Recognition).

**Freshman**

## Nursing Science, M.S.

The Master of Science (M.S.) in Nursing Science at the University of California, Irvine is a graduate degree program that prepares students to lead innovations in health care delivery and elevated nursing care across practice settings. The program course work is designed to prepare graduate-educated nurses with: (1) research and evidence-based practice competency; (2) expertise in specialized concentrations of nursing practice; (3) leadership role preparation, including collaborative inter-professional team building; and (4) leadership skills in health policy to become advocates for health promotion and disease prevention efforts supporting population health. The M.S. provides students with a foundation for seamless progression into a research or practice-focused doctoral program.

### Concentration in Community and Population Health Nursing (CPHN)

The MEPN Program offers graduates of non-nursing baccalaureate programs direct entry into an accelerated master's degree program, with the ability to autonomously practice nursing as an M.S.-prepared nurse upon graduation. Graduates of the program will qualify to take the national licensing examination (NCLEX) for registered nurses, be eligible for certification as a Public Health Nurse and earn a Master of Science. The master's degree program also prepares students for future research or practice-focused doctoral studies.

Consistent with the Sue and Bill Gross School of Nursing mission to provide strong research-based academic and professional programs, the new program aims to prepare excellent researchers, educators, and clinicians. Goals of the CPHN concentration are to prepare graduate nurses to lead and expand care to under-served populations in the following areas:

- Generalist nursing practice across a wide variety of healthcare settings, from acute care to community, home, and transition management;
- Nursing scholarship and evidence-based practice;
- Leadership in interprofessional health care teams;
- Innovative advancements in health care delivery, quality improvement, and improved access to care in our underserved communities.

The CPHN curriculum was designed to ensure that the nine essential core areas delineated by the American Association of Colleges of Nursing (AACN) – the umbrella organization that provides national accreditation through their Commission on Collegiate Nursing Education (CCNE) – are met throughout the program. In addition, the Quad Council and the Core Competencies for Public Health Professionals competencies for public health practice are incorporated throughout the curriculum.

Community and Population Health Nursing concentration applicants must have earned a bachelor's degree in a non-nursing university program and have a 3.0 cumulative grade point average (on a 4.0 scale). In addition, they must have completed courses in the following subjects with a C or better: statistics, psychology (preferably human development lifespan), sociology/cultural anthropology, anatomy, physiology, and microbiology with labs, and chemistry. Applicants must meet the general requirements of the UCI Graduate Division. The GRE is not required for admission to the Sue and Bill Gross School of Nursing.

**Core Curriculum**

A. Complete the following:

NUR SCI 200	Research Methods and Evaluation for Evidence-Based Practice
NUR SCI 215	Health Promotion/Disease Prevention
NUR SCI 263	Frameworks for Professional Nursing Practice
NUR SCI 281	Professional Issues in Nursing
NUR SCI 282	Compassionate Care with Underserved Populations
NUR SCI 284	Scholarly Concentration

**Community and Population Health Nursing Concentration Courses:**

NUR SCI 200	Research Methods and Evaluation for Evidence-Based Practice
NUR SCI 215	Health Promotion/Disease Prevention
NUR SCI 262	Foundations of Professional Nursing Practice
NUR SCI 263	Frameworks for Professional Nursing Practice
NUR SCI 264A	Applied Pharmacology I
NUR SCI 264B	Applied Pharmacology II
NUR SCI 265	Older Adult Health Care
NUR SCI 266	Adult Health Care
NUR SCI 267	Human Behavior and Mental Health Nursing
NUR SCI 268A	Pathophysiology I
NUR SCI 268B	Pathophysiology II
NUR SCI 271	Community-Based Health Care
NUR SCI 272	Pediatrics: Care of Children and Families
NUR SCI 273	Maternity and Women's Health Care
NUR SCI 274	Critical and Specialty Health Care
NUR SCI 275	Clinical Preceptorship
NUR SCI 276	Leadership and Management in Health Care
NUR SCI 281	Professional Issues in Nursing
NUR SCI 282	Compassionate Care with Underserved Populations
NUR SCI 284	Scholarly Concentration
NUR SCI 294	Directed Study in Vulnerable Populations

Successful completion of required course work will advance students to M.S. candidacy the quarter prior to scheduled completion of the program. All M.S. concentration students complete a Scholarly Concentration project in an area of interest culminating in a major paper and oral presentation. Full-time M.S. students are expected to complete the program within two years.

## Nursing Science, Ph.D.

The Doctor of Philosophy (Ph.D.) in Nursing Science is designed to prepare nurse scientists with expertise in clinical-translational research methods to advance the scholarly discipline and to contribute to the growing body of knowledge in the field of nursing. The program emphasizes the combination of translational science methods with traditional models for research to comprehensively address health and healthcare needs of local, national and global communities.

To be considered for admission, applicants must have a Bachelor or Master of Science degree in Nursing from a regionally and CCNE accredited institution with degree standards equivalent to the University of California. Degrees from international programs must have accreditations satisfactory to the Graduate Division and the Sue and Bill Gross School of Nursing and be equivalent to UC educational requirements.

Applicants are required to submit transcripts showing a minimum grade point average (GPA) of 3.2 for undergraduate work or 3.5 for graduate work from an accredited institution and a scholarship record commensurate with requirements of the Graduate Division and the Sue and Bill Gross School of Nursing. Previous education at the undergraduate and/or graduate levels will be evaluated for equivalency of design, theory, and intensity as a means of determining whether the prior degree standards are equivalent to those required by the UC system. If English is not the applicant's first language, the applicant must demonstrate proficiency in English prior to admission commensurate with that identified by the Graduate Division for the Test of English as a Foreign Language (TOEFL) or TOEFL Internet-Based (TOEFL iBT).

Applicants who did not have a course in descriptive and inferential statistics within the last five years must complete a course similar to STATS 7 prior to admission. Applicants must have an undergraduate- or graduate-level research course in order to apply. Applicants who have had intensive research

experience may submit a request to waive this prerequisite; there are no guarantees that this request will be granted. Each applicant's file will be reviewed on a case-by-case basis.

In addition, applicants are required to submit:

- A statement of objectives for graduate study compatible with the areas of focus below (please see the Ph.D. section of the School of Nursing website (<http://www.nursing.uci.edu/doctor-philosophy.asp>) for more details);
- A resume or *Curriculum Vitae* detailing educational background, professional work, previous research, and volunteer work as well as other relevant information such as fluency in another language;
- Examples of scholarly work;
- Three letters of recommendation submitted on the Graduate Division Recommendation Form from persons in a supervisory role who are able to comment on academic abilities, research-related abilities/capabilities, and/or work-related experiences; and
- Evidence of licensure as a registered nurse.

A personal interview will be required of applicants considered for admission. Acceptance is based on materials submitted, research interests related to those of faculty, and results of the interview process.

The specific field of emphasis for the Ph.D. program is Nursing Science. Generally, this involves increasing the quality of life for the community that nurses serve. Consistent with faculty research expertise, the Ph.D. program will specifically promote the development of scientific and theoretical expertise that contributes to scholarly endeavors in six key areas: integrative health and wellness promotion, community health, philosophical and theoretical foundations in nursing, health services and practice, digital technology and health, health disparities and diversity. These areas of research emphasis intersect as they contribute to healthy communities. Emphasis will be placed on building expertise in the use of translational science methods in conjunction with traditional models for research. Research emphasis areas are described below.

**Integrative Health and Wellness Promotion.** Integrative health is an approach to care that puts the patient at the center and addresses the full range of physical, emotional, mental, social, spiritual, and environmental influences that affect a person's health. Employing a personalized strategy that considers the patient's unique conditions, needs and circumstances, integrative health uses the most appropriate interventions from an array of scientific disciplines to heal illness and disease and help people regain and maintain optimum health and wellness. Students choosing this focus may work with UCI faculty (Nursing Science and others) on stress and coping, women's health, whole person health and wellness, the distribution of health-related events and social determinants of health influencing these events, to name a few specific areas.

**Community Health.** Community health is a blend of primary health care and nursing practice with public health nursing to provide care that is preventive, curative, and rehabilitative. The philosophy of care is based on the belief that care directed to the individual, the family, and the group contributes to the health care of the population as a whole. Students choosing this focus will have an opportunity to study the development of community activities that contribute to the promotion of, education about, and maintenance of good health. These activities require comprehensive health programs that pay special attention to social and ecological influences and specific populations at risk.

**Philosophical and Theoretical Foundations in Nursing.** While empirical scholarship is a critical element of nursing, generating evidence for sound interventions that improve the health of patients, families, and communities, philosophical/theoretical scholarship is also vital for the development of the discipline. Students choosing this focus will have the opportunity to work with leading scholars to advance understanding of the nature of nursing science and practice.

**Health Services and Practice.** Health policy and the economics of delivering health care are important issues affecting health outcomes. Students choosing this focus will have an opportunity to examine the implications of a variety of policies and services on health and health system outcomes. There will be opportunities to study with researchers who have expertise in health care system management, law, organizational theory and behavior, and quality of care.

**Digital Technology and Health.** Digital technology is the integrated use of electronic information and telecommunications technology to support remote clinical health care, patient and professional health-related education, public health and health administration to deliver relevant and up-to-date, real-time, information to researchers in a more efficient way, given the sheer amount of data being produced every day. Students choosing this focus may work with UCI faculty (Nursing Science and others) on support and enhancement of a collaborative informatics community; promotion of software standards for interoperability; growth of collaborative innovation across informatics tools, methods and processes; data science education for clinicians and researchers; and development of novel methods and tools for the evaluation of the impact of these activities to enhance health care through data and informatics.

**Health Disparities and Diversity.** The focus on Health Disparities acknowledges that there are individuals, families, and communities who are not equally treated in the quest for health. Many do not have equal access to quality health care nor the means to achieve an equal level of desired health outcomes. The emphasis will examine these health disparities among diverse populations who encounter differences in treatment and outcomes. Students choosing this focus will have an opportunity to work with diverse community members in Orange County and beyond, and they will be mentored by researchers who study the experiences of these community members.

Ph.D. students are required to complete 50 quarter units of formal course work selected in part by consultation with the faculty advisor, subject to review by a faculty oversight committee. These courses will cover the necessary fundamental and methodological principles, and accommodate cross-

disciplinary themes in nursing science. Students will also be required to participate in the educational mission of the Sue and Bill Gross School of Nursing as teaching assistants for two quarters.

Students will have two formal examinations along the process toward writing their thesis. First they will write a comprehensive examination following completion of required course work and electives (50 required quarter units). The next benchmark will be the proposal defense (qualifying exam), in which students will advance to candidacy upon successful presentation of an original dissertation research proposal and oral defense of the proposal. Ph.D. completion requires submission of an acceptable dissertation and oral defense. The normative time to degree is five years, and the maximum time permitted is seven years.

#### Required Courses

NUR SCI 212	Philosophy of Science for Nursing Scholarship
NUR SCI 223A	Biostatistics for Health Sciences I
NUR SCI 224	Research Designs in Nursing Science
NUR SCI 226	Theoretical and Conceptual Frameworks
NUR SCI 227A	Grant Writing I
NUR SCI 296	Doctoral Dissertation Reading and Writing

#### Elective Courses

At least 20 units of elective courses contributing to the area of proposed research must be taken. Elective courses may be taken inside or outside of the School of Nursing and must be chosen in consultation with the student's faculty advisor.

Examples of potential electives:

NUR SCI 223B	Biostatistics for Health Sciences II
NUR SCI 227B	Grant Writing II
NUR SCI 233	Appraisal and Translation of Evidence for Practice
NUR SCI 246	Qualitative Research Designs in Nursing Science
NUR SCI 247	Quantitative Research Designs in Nursing Science
NUR SCI 251	Nursing Informatics

## Michael Green, Dean

5200 Engineering Hall

Undergraduate Counseling: 949-824-4334

Graduate Counseling: 949-824-8090

<http://www.eng.uci.edu/>

With engineering as the driving force in economic areas such as health care, communications, and sustainability, it is critical to rethink what it means to be an engineer. While there has been strength in the conventional engineering disciplines for centuries, today's global complexity is placing new demands on how we live, learn, and work. With this in mind, our strategic plan for the Samueli School places leadership and innovation as foundational elements for educating tomorrow's engineers.

The academic mission of the Samueli School is to advance engineering discovery through the creation of original scholarship and research applied to societal grand challenges, to educate and train the next generation of global innovators, and to provide a technological edge to industry by facilitating technology transfer and talent acquisition. The school includes six academic departments: biomedical engineering; chemical and biomolecular engineering; civil and environmental engineering; electrical engineering and computer science; materials science and engineering; and mechanical and aerospace engineering.

We offer undergraduate degrees in a wide range of traditional and emerging fields. Students have choices and can take advantage of the many opportunities available to them. The first year of study for each engineering major is similar, designed to allow exploration of the foundations of engineering and selection of a program that best fits each student's individual interests.

All engineering programs combine science, engineering fundamentals, design principles and application, and a culminating design experience. Students are encouraged to participate in research and hands-on engineering design opportunities to develop the practical skills needed for graduate study or employment.

The school is also committed to increasing diversity in engineering. The Office of Access and Inclusion supports the recruitment, retention, and graduation of undergraduate and graduate students from populations underrepresented in engineering.

The Samueli School's faculty members are leaders in their disciplines who have achieved worldwide recognition for their research and dedicated teaching. Faculty quality has remained high while increasing steadily in number and diversity over the past few years, giving students a remarkable range of expertise in engineering and with it, a large number of different advanced courses and research opportunities.

The School offers undergraduate majors in Aerospace Engineering (AE), Biomedical Engineering (BME), Biomedical Engineering: Premedical (BMEP), Chemical Engineering (ChE), Civil Engineering (CE), Computer Engineering (CpE), Computer Science and Engineering (CSE, a jointly administered program with the Donald Bren School of Information and Computer Sciences), Electrical Engineering (EE), Engineering (a general program, GE), Environmental Engineering (EnE), Materials Science and Engineering (MSE), and Mechanical Engineering (ME). The undergraduate majors in Aerospace, Biomedical, Chemical, Civil, Computer, Computer Science and Engineering, Electrical, Environmental, Materials Science and Engineering, and Mechanical Engineering are accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>; Computer Science and Engineering (CSE) is also accredited by the Computing Accreditation Commission of ABET, <http://www.abet.org>. The undergraduate major in Biomedical Engineering: Premedical (BMEP) is not designed to be accredited, therefore is not accredited by ABET.

**Aerospace Engineering** considers the flight characteristics, performance, and design of aircraft and spacecraft. An upper-division series of courses in aerodynamics, propulsion, structures, and control follows a common core with Mechanical Engineering. The skills acquired in those courses are integrated in the capstone aerospace design course. The intent of the program is to produce highly proficient engineers who can tackle the aerospace engineering challenges of the future.

**Biomedical Engineering** applies engineering principles to solve complex medical problems and focuses at improving the quality of health care by advancing technology and reducing costs. Examples include advanced biomedical imaging systems, the design of microscale diagnostic systems, drug delivery systems, and tissue engineering. Specializations are available that focus student's technical expertise on biophotonics or biomems.

**Biomedical Engineering: Premedical** shares introductory engineering courses with Biomedical Engineering, but replaces senior engineering laboratories and design courses with biology and organic chemistry courses required by medical schools for admission. The intent of the program is to produce students with a basic engineering background who are qualified to enter medical school.

**Chemical Engineering** applies the knowledge of chemistry, mathematics, physics, biology, and humanities to solve societal problems in areas such as energy, health, the environment, food, textiles, shelter, semiconductors, and homeland security. Employment opportunities exist in various industries such as chemical, petroleum, polymer, pharmaceutical, food, textile, fuel, consumer products, and semiconductor, as well as in local, state, and federal governments.

**Civil Engineering** addresses the challenges of large-scale engineering projects of importance to society as a whole, such as water distribution, transportation, and building design. Specializations are provided in General Civil Engineering, Environmental Hydrology and Water Resources, Structural Engineering, and Transportation Systems Engineering.

**Computer Engineering** addresses the design and analysis of digital computers, including both software and hardware. Computer design includes topics such as computer architecture, VLSI circuits, data base, software engineering, design automation, system software, and data structures and algorithms. Courses include programming in high-level languages such as Python, Java, C, C++; use of software packages for analysis and design; design of system software such as operating systems and hardware/software interfaces; application of computers in solving engineering problems, and laboratories in both hardware and software experiences.

**Computer Science and Engineering** is designed to provide students with the fundamentals of computer science, both hardware and software, and the application of engineering concepts, techniques, and methods to both computer systems engineering and software system design. The program gives students access to multidisciplinary problems in engineering with a focus on total systems engineering. Students learn the computer science principles that are critical to development of software, hardware, and networking of computer systems. From that background, engineering concepts and methods are added to give students exposure to circuit design, network design, and digital signal processing. Elements of engineering practice include systems view, manufacturing and economic issues, and multidisciplinary engineering applications. The program is administered jointly by the Department of Electrical Engineering and Computer Science in The Henry Samueli School of Engineering and by the Department of Computer Science in the Donald Bren School of Information and Computer Sciences.

**Electrical Engineering** is one of the major contributors to the modernization of our society. Many of the most basic and pervasive products and services are either based on or related to the scientific and engineering principles taught at the Department of Electrical Engineering and Computer Science. Students specialize in Electronic Circuit Design; Semiconductors and Optoelectronics; RF, Antennas and Microwaves; Digital Signal Processing; or Communications.

**The major in Engineering** is a special program of study for upper-division students who wish to combine the study of engineering principles with other areas such as the physical and biological sciences, social and behavioral science, humanities, and arts. Students may construct their own specialization. Click on the 'Undergraduate Study' tab above for information about this major.

**Environmental Engineering** concerns the development of strategies to control and minimize pollutant emissions, to treat waste, and to remediate polluted natural systems. Emphasis areas include air quality and combustion, water quality, and water resources engineering.

**Materials Science and Engineering** is concerned with the generation and application of knowledge relating the composition, structure, and synthesis of materials to their properties and applications. During the past two decades, Materials Science and Engineering has become an indispensable component of modern engineering education, partly because of the crucial role materials play in national defense, the quality of life, and the economic security and competitiveness of the nation; and partly because the selection of materials has increasingly become an integral part of almost every modern engineering design. Emphasis in the Materials Science and Engineering curriculum is placed on the synthesis, characterization, and properties of advanced functional materials; analysis, selection, and design related to the use of materials; the application of computers to materials problems; and the presence of an interdisciplinary theme that allows a qualified student to combine any engineering major with the Materials Science and Engineering major.

**Mechanical Engineering** considers the design, control, and motive power of fluid, thermal, and mechanical systems ranging from microelectronics to spacecraft to the human body. Specializations allow students to focus their technical electives in the areas of Aerospace Engineering, Energy Systems and Environmental Engineering, Flow Physics and Propulsion Systems, and Design of Mechanical Systems.

The School offers M.S. and Ph.D. degrees in Biomedical Engineering; Chemical and Biomolecular Engineering; Civil Engineering; Electrical and Computer Engineering, with concentrations in Computer Engineering and Electrical Engineering; Engineering, with concentrations in Environmental Engineering, and Materials and Manufacturing Technology; Materials Science and Engineering; and Mechanical and Aerospace Engineering. Specialized research opportunities are available within each of these programs. In Biomedical Engineering, areas of research include micro/nanoscale biomedical devices for diagnostics and therapeutics, biophotonics, systems/synthetic bioengineering, tissue/organ engineering, cardiovascular engineering, cancer biotechnology, and neuroengineering. Bioreaction and bioreactor engineering, recombinant cell technology, and bioseparation processes are research areas in Biochemical Engineering. In Civil Engineering, research opportunities are provided in structural/earthquake engineering, reliability engineering, transportation systems engineering, environmental engineering, and water resources. Research opportunities in Electrical and Computer Engineering are available in the areas of parallel and distributed computer systems, VLSI design, computer architecture, image and signal processing, communications, control systems, and optical and solid-state devices. Research in combustion and propulsion sciences, laser diagnostics, supersonic flow, direct numerical simulation, computer-aided design, robotics, control theory, parameter identification, material processing, electron microscopy, and ceramic engineering are all available in Mechanical and Aerospace Engineering. The School also offers the M.S. degree in Engineering Management, a joint degree program with the Paul Merage School of Business; and the M.S. degree in Biotechnology Management, a joint degree program with the School of Biological Sciences and The Paul Merage School of Business.

Additional information about undergraduate and graduate academic study and research opportunities are available through the Samueli School of Engineering website ([engineering.uci.edu](http://engineering.uci.edu)), and directly from the Departments of Biomedical Engineering, Chemical and Biomolecular Engineering, Civil and Environmental Engineering, Electrical Engineering and Computer Science, Materials Science and Engineering, and Mechanical and Aerospace Engineering.

## Requirements for the Bachelor's Degree

All students in The Henry Samueli School of Engineering must fulfill the following requirements.

**All students must meet the University Requirements.**

**All students must meet the School Requirements:**

The following are minimum subject-matter requirements for graduation:

*Mathematics and Basic Science Courses:* Students must complete a minimum of 48 units of college-level mathematics and basic sciences.

*Engineering Topics Courses:* Students must complete a minimum of 72 units of engineering topics. *Engineering topics* are defined as courses with applied content relevant to the field of engineering.

**Design Units:** All undergraduate Engineering courses indicate both a total and a design unit value. Design unit values are listed at the end of the course description. Each student is responsible for the inclusion of courses whose design units total that required by the program of study.

**The Academic Plan and Advising Requirements:** To remain affiliated with The Henry Samueli School of Engineering, all students enrolled in the School are required to meet annually with their designated faculty for advising and mentoring and to have an academic plan on file with the Student Affairs Office which has been approved by their academic counselor. Students who do not have a plan on file, or deviate from this plan without approval from an academic counselor will be subject to probation. Students on probation for two consecutive quarters who do not have a plan on file, or deviate from this plan without approval from an academic counselor will be subject to disqualification. Students who fail to meet with a faculty advisor each year will have a hold placed on their enrollment for the upcoming term.

**Duplication of Subject Material:** Students who take courses which involve considerable duplication of subject material may not receive full graduation credit for all units thus completed.

**Residence Requirement:** In addition to the University residence requirement, at least 36 upper-division engineering units specified by each major must be completed successfully at University of California.

**Variations:** Variations from the general School degree requirements may be made subject to the approval of the faculty of the School. Students wishing to obtain variances should submit petitions to the School's Student Affairs Office via <http://undergraduate.eng.uci.edu/forms>. (<http://undergraduate.eng.uci.edu/forms/>)

## Undergraduate Study

**Michael M Green, Associate Dean for Undergraduate Student Affairs**

Student Affairs Office

305 Rockwell Engineering Center

949-824-4334

## Admissions

The sequential nature of the Engineering program and the fact that many courses are offered only once a year make it beneficial for students to begin their studies in the fall quarter. Applicants wishing to be admitted for the fall quarter, 2021, must have submitted their completed application forms during the priority filing period (November 1 - November 30, 2020).

**High school students** wishing to enter the UCI Engineering program must have completed four years of mathematics through pre-calculus or math analysis and are advised to have completed one year each of physics and chemistry. That preparation, along with honors courses and advanced placement courses, is fundamental to success in the Engineering program and is vital to receiving first consideration for admittance to an Engineering major during periods of restricted enrollments. Students applying for admission for fall quarter should complete their examination requirements during May or June of their junior year or during their senior year, but no later than the December test date. (Typically, this means that students will take the SAT or the ACT Plus Writing Test in October or November. Applicants are strongly encouraged to take a math or science AP or SAT exam. Applicants should favor the Math Level 2 SAT Subject Test over the Math Level 1 Test. Applicants must apply for admission to a specific Engineering major or Engineering Undeclared.

If enrollment limitations make it necessary, unaccommodated Engineering applicants may be offered alternative majors at UCI.

**Transfer students** may be admitted to The Henry Samueli School of Engineering either from another major at UCI or from another college or university. A student seeking admission to The Henry Samueli School of Engineering from colleges and schools other than UCI must satisfy University requirements for admission with advanced standing and should complete appropriate prerequisites for their major of choice. Applicants should prioritize completing subject requirements (math, science, engineering) over completion of IGETC or UCI general education and lower-division requirements prior to transfer. IGETC is not considered in transfer selection while subject requirements contribute directly to reducing time to graduate. Since requirements vary from major to major, those contemplating admission with advanced standing to the School should consult each Department's *Catalogue* section and the UCI Office of Undergraduate Admissions, 949-824-6703, for the specific requirements of each program. All transfer students should arrange for early consultation with The Henry Samueli School of Engineering Student Affairs Office at 949-824-4334.

**Change of Major:** Students who wish to change their major to one offered by the School should contact the Engineering Student Affairs Office for information about change-of-major requirements, procedures, and policies. Interested students must attend a change of major workshop. Information is also available at the UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu/>).

## Engineering Gateway Freshman-Year Curriculum

Students who know that they want to major in engineering but who are unsure of the specific major should apply for the Engineering Gateway Curriculum and follow the Sample Engineering Gateway Curriculum. Students following the Engineering Gateway Curriculum are required to meet with an academic advisor every quarter and are strongly encouraged to declare a major as soon as possible and then follow the appropriate sample program of study for that major.

### Sample Engineering Gateway Curriculum - Freshman <sup>1</sup>

Freshman		
Fall	Winter	Spring
MATH 2A	MATH 2B	MATH 2D
ENGR 7A	ENGR 7B	PHYSICS 7D
ENGR 1A or CHEM 1A	CHEM 1B	PHYSICS 7LD

Select one of the following:

EECS 10

EECS 12

ENGRMAE 10

I&C SCI 31<sup>2</sup>

PHYSICS 7C

PHYSICS 7LC

Select one of the following:

CHEM 1C- 1LC

or General Education

- <sup>1</sup> Students who choose to major in Biomedical Engineering or Biomedical Engineering: Premedical should enroll in BME 1 in the fall quarter of the sophomore year. Students who choose to major in Computer Engineering should enroll in EECS 20 by the spring or summer quarter preceding their sophomore year.
- <sup>2</sup> Students who are considering the Computer Science and Engineering major should enroll in I&C SCI 31

Students who choose certain majors during the first year may replace Chemistry courses with required major courses.

Students should choose a major by the end of the spring quarter of their freshman year or earlier. Some modification in the program of study might be appropriate if the student chooses a major before the end of the freshman year. In any case, when the major is chosen, the student must meet immediately with an academic counselor to plan the program of study.

## Minors/Concentrations of Interest to Engineers

### Minor in Earth and Atmospheric Sciences

The minor in Earth and Atmospheric Sciences focuses on the application of physical, chemical, and biological principles to understanding the complex interactions of the atmosphere, ocean, and land through climate and biogeochemical cycles. See the minor in Earth and Atmospheric Sciences page for more information.

### Minor in Global Sustainability

The interdisciplinary minor in Global Sustainability trains students to understand the changes that need to be made in order for the human population to live in a sustainable relationship with the resources available on this planet. See the minor in Global Sustainability page for more information.

### Concentration: Engineering and Computer Science in the Global Context

The globalization of the marketplace for information technology services and products makes it likely that The Henry Samueli School of Engineering graduates will work in multicultural settings or be employed by companies with extensive international operations, or customer bases. The goal of the concentration is to help students develop and integrate knowledge of the history, language, and culture of a country or geographic region outside the United States, through course work both at UCI and an international host campus, followed by a technology-related internship in the host country.

All of The Henry Samueli School of Engineering majors in good standing may propose an academic plan that demonstrates the ability to complete the concentration (a minimum of eight courses) and other requirements for graduation in a reasonable time frame. It is expected that a student's proposal will reflect a high degree of planning that includes the guidance of academic counselors and those at the UCI Study Abroad Center regarding course selection, as well as considerations related to internship opportunities, housing, and financial aid. Each student's proposed program of study must be approved by the Associate Dean for Student Affairs in The Henry Samueli School of Engineering. The Associate Dean will be available to assist qualified students with the development of a satisfactory academic plan, as needed.

The concentration consists of the following components:

1. A minimum of eight courses at UCI or at the international campus with an emphasis on the culture, language (if applicable and necessary), history, literature of the country that corresponds to the international portion of the program, international law, international labor policy, global issues, global institutions, global conflict and negotiation, and global economics;
2. A one- or two-semester sequence of technical courses related to the major and, possibly, culture, history, and literature courses taken at an international university;
3. A two-month or longer technical internship experience in the same country as the international educational experience.

More information about the requirements for the concentration is available in The Henry Samueli School of Engineering Student Affairs Office.

The concentration in Engineering and Computer Science in the Global Context is open to students in Aerospace Engineering, Biomedical Engineering, Biomedical Engineering: Premedical, Chemical Engineering, Civil Engineering, Computer Engineering, Engineering (General), Electrical Engineering, Environmental Engineering, Materials Science and Engineering, and Mechanical Engineering.

## Academic Advising

Academic advising is available from academic counselors and peer advisors in the School's Student Affairs Office, 305 Rockwell Engineering Center. *Students must realize, however, that ultimately they alone are responsible for the planning of their own program and for satisfactory completion of the graduation requirements.* Students are encouraged to consult with the academic counselors in the Engineering Student Affairs Office whenever they desire to change their program of study. All Engineering majors are required to meet with their faculty advisor at least once each year.

Some engineering students will need *more than four years* to obtain their B.S., particularly if part-time employment or extracurricular activities make heavy demands on their time. Normally, such students can stay on track, and are encouraged to do so, by enrolling in summer sessions at UCI or at other institutions when a petition has been approved in advance.

High-achieving students may declare a second major. Early consultation with the School is advisable. However, students are not eligible to declare a second major until they have successfully completed two years with a minimum 3.0 GPA in engineering-related courses.

Required courses may be replaced by other courses of equivalent content if the student substantiates the merits of the courses in the program of study and obtains prior approval from faculty in the School.

Students should be aware that most Engineering courses require the completion of prerequisites. The sample programs shown in each departmental description constitute preferred sequences which take into account all prerequisites.

School policy does not permit the deletion of Engineering courses after the second week or addition of Engineering courses after the second week of the quarter without the Associate Dean's approval.

Undergraduate students who have high academic standing, who have completed the necessary prerequisites, and who have obtained permission from the School may qualify to take certain graduate-level courses.

Students are required to complete UCI's lower-division writing requirement (see the Requirements for a Bachelor's Degree section) during the first two years. Thereafter, proficiency in writing and computing (using a higher-level language such as Python, C, C++, Java, or MATLAB) is expected in all Engineering courses.

The Pass/Not Pass option is available to encourage students to enroll in courses outside their major field. Pass/Not Pass option cannot be used to satisfy specific course requirements of the students school and major. Students must take courses to fulfill the UC Entry Level Writing requirement for a grade. For more complete information, see the Academic Regulations and Procedures section of this *Catalogue*.

## Career Advising

The UCI Division of Career Pathways provides services to students and alumni including career counseling, information about job opportunities, a career library, and workshops on resume preparation, job search, and interview techniques. See the Division of Career Pathways website (<https://career.uci.edu/>) for additional information. In addition, special career planning events are held throughout the year including four annual Career Fairs. Individual career counseling is available, and students have access to the Career Library which contains information on graduate and professional schools in engineering, as well as general career information.

## Proficiency Examinations

A student may take a course by examination with the approval of the faculty member in charge of the course and the Dean of the School. Normally, ability will be demonstrated by a written or oral examination; if a portion of the capability involves laboratory exercises, the student may be required to perform experiments as well. The proficiency examination is not available for any course a student has completed at UCI.

## Honors

**Graduation with Honors.** Undergraduate honors at graduation in The Henry Samueli School of Engineering are computed by using 50 percent of the overall UCI GPA and 50 percent of the upper-division Engineering GPA. A general criterion is that students must have completed at least 72 units in residence at a University of California campus. Approximately 2 percent of the graduating class shall be awarded *summa cum laude*, 4 percent *magna cum laude*, and 10 percent *cum laude*, with no more than 16 percent being awarded honors. To learn more about the other important factors that are considered, visit Honors Recognition.

**Dean's Honor List.** The quarterly Dean's Honor List is composed of students who have received a 3.5 GPA while carrying a minimum of 12 graded units.

**Gregory Bogaczyk Memorial Scholarship.** This scholarship was established in memory of Gregory Bogaczyk, a former UCI Mechanical Engineering student, and is contributed by the Bogaczyk family and friends. An award is given each year to a junior or senior Mechanical Engineering student.

**Haggai Memorial Endowed Scholarship.** This memorial fund was established in honor of Ted Haggai, an electrical engineer. This scholarship is awarded to an outstanding senior electrical engineering student and member of Tau Beta Pi. Primary consideration will be given to members of Tau Beta Pi who have contributed outstanding service to both UCI and The Henry Samueli School of Engineering.

**Christine Jones Memorial Scholarship.** This scholarship was established in memory of Christine Jones, an Electrical Engineering graduate, Class of 1989. The primary focus of this scholarship is to provide financial support to a female undergraduate student in The Henry Samueli School of Engineering.

**Deborah and Peter Pardoen Memorial Scholarship.** This scholarship is awarded each year to a graduating senior in Mechanical Engineering or in Aerospace Engineering. The scholarship is based on outstanding service to The Henry Samueli School of Engineering and the community.

**Henry Samueli Endowed Scholarship.** This premier scholarship, established by Henry Samueli, is awarded to outstanding freshmen and transfer students in The Henry Samueli School of Engineering. Recipients are chosen by the School based on their academic excellence. The award is renewable up to four years for freshmen and up to two years for transfer students.

Additional awards in other categories are made throughout the academic year.

## Office of Access and Inclusion

200A Rockwell Engineering Center; 949-824-7134  
Sharnnia Artis, Assistant Dean for Access and Inclusion

The Office of Access and Inclusion (OAI) facilitates and supports the recruitment, retention, and graduation of undergraduate and graduate students from historically excluded populations who are currently underrepresented in the Samueli School of Engineering and the Donald Bren School of Information and Computer Sciences. Services include mentoring, tutoring, career and academic workshops and coaching, and assistance for students looking to conduct undergraduate research or prepare for graduate school.

## Special Programs and Courses

### Campuswide Honors Collegium

The Campuswide Honors Collegium is available to selected high-achieving students from all academic majors from their freshman through senior years. For more information contact the Campuswide Honors Collegium, 1200 Student Services II; 949-824-5461; [honors@uci.edu](mailto:honors@uci.edu); or visit the Campuswide Honors Collegium website (<http://www.honors.uci.edu/>).

### Engineering 199

Every undergraduate student in The Henry Samueli School of Engineering has the opportunity to pursue independent research under the direct supervision of a professor in the School. Interested students should consult with a faculty member to discuss the proposed research project. If the project is agreed upon, the student must fill out a 199 Proposal Form and submit it to the Engineering Student Affairs Office.

### Undergraduate Research Opportunities Program

The Undergraduate Research Opportunities Program (UROP) encourages and facilitates research and creative activities by undergraduates. Research opportunities are available not only from every discipline, interdisciplinary program, and school, but also from many outside agencies, including national laboratories, industrial partners, and other universities. UROP offers assistance to students and faculty through all phases of the research activity: proposal writing, developing research plans, resource support, conducting the research and analyzing data, and presenting results of the research at the annual spring UCI Undergraduate Research Symposium. Calls for proposals are issued in the fall and spring quarters. Projects supported by UROP may be done at any time during the academic year and/or summer, and the research performed must meet established academic standards and emphasize interaction between the student and the faculty supervisor. In addition, all students participating in faculty-guided research activities are welcome to submit their research papers for faculty review and possible publication in the annual *UCI Undergraduate Research Journal*. For more information, contact the UROP Office, 1100 Student Services II; 949-824-4189; [urop@uci.edu](mailto:urop@uci.edu); or visit the Undergraduate Research Opportunities Program website (<http://www.urop.uci.edu/>).

### Accelerated M.S. or Ph.D. Status Program in The Henry Samueli School of Engineering

Exceptionally promising UCI undergraduate Engineering students may, during their junior or senior year, petition for streamlined admissions into a graduate program within The Henry Samueli School of Engineering. Accelerated M.S. Status would allow a student to petition for exemption from UCI's Graduate Record Examination (GRE) requirement for graduate school admission. (The exemption applies only to current UCI students applying for admission to one of the M.S. programs in The Henry Samueli School of Engineering; other graduate schools may still require the GRE.) A current UCI undergraduate student whose ultimate goal is a Ph.D. may apply for Accelerated Status, however, a GRE score must be submitted.

Accelerated Status applicants would in all other ways be evaluated in the same manner as other applicants to the School's graduate programs. Occasionally, a candidate for Accelerated Status may be required by the faculty to submit GRE scores in support of the graduate application.

Students who successfully petition for Accelerated Status, upon matriculation to the graduate degree program, may petition to credit toward the M.S. degree up to 18 units (with a grade of B or better) of graduate-level course work completed in excess of requirements for the UCI bachelor's degree.

Visit the UCI Undergraduate Accelerated Status website (<https://www.eng.uci.edu/admissions/graduate/accelerated-status-program/>) for more detailed information about this program and its eligibility requirements.

### UC Education Abroad Program

Engineering students may participate in a number of programs which offer unique opportunities for education and training abroad. The University's Education Abroad Program (UCEAP) offers engineering course work for UCI academic credit at a number of universities. Some of the UCEAP-affiliated engineering schools require proficiency in the host country's language, while others are English speaking. Study abroad may postpone the student's graduation for one or two quarters, depending primarily on the student's language preparation (which can begin in the freshman year), but the added experience can add to the student's maturity and professional competence. UCEAP students pay regular UCI fees and tuition and keep any scholarships they may have. Visit the Study Abroad Center website (<http://www.studyabroad.uci.edu>) for additional information.

## Student Participation and Organizations

Faculty and committee meetings (except those involving personnel considerations) are open meetings; in addition to designated student representatives, all students are encouraged and expected to participate in the development of School policy. Student evaluation of the quality of instruction for each course is requested each quarter.

Engineering students may join any of a number of student organizations. Most of these organizations are professionally oriented and in many instances are local chapters of national engineering societies. A primary function of these groups is to provide regular technical and social meetings for students with common interests. Most of the groups also participate in the annual Engineering Week activities and in other School functions.

**Associated General Contractors (AGC).** A student chapter of the national organization, AGC at UCI is an academic engineering club for students interested in the construction field.

**American Indian Science & Engineering Society (AISES).** The mission of AISES is to increase the representation of American Indians in engineering, science, and technology. Chapters emphasize education as a tool that will facilitate personal and professional growth opportunities through mentor programs, leadership training, scholarships, conferences, and summer job opportunities.

**American Institute of Aeronautics and Astronautics (AIAA).** The AIAA is a technical society of 40,000 professional and student members devoted to science and engineering in the field of aerospace. The local chapter's primary activities include seminars, tours of industries, and mentoring for students by professional members.

**American Institute of Chemical Engineers (AIChE).** AIChE, a student chapter of the national organization, provides Chemical Engineering majors with the opportunity to interact with faculty and professionals in the field.

**American Society for Civil Engineers (ASCE).** One of the larger engineering clubs, ASCE at UCI is a student chapter of the national organization. The ASCE focuses its efforts on interactions with professional engineers, sponsorship of Engineering Week activities, and participation in the annual ASCE Southwest Conference.

**American Society for Materials (ASM).** The student chapter of ASM at UCI provides the opportunity for Materials Science and Engineering (MSE) students to meet engineers and scientists from local industry, attend seminars organized by the Orange Coast Chapter of ASM International, and organize discussion sessions that focus on progress and advances in the MSE field and that promote interactions between MSE students and materials faculty.

**American Society of Mechanical Engineers (ASME).** The student chapter of ASME at UCI provides the opportunity for Mechanical Engineering majors to meet with professors, organize social events, and participate in events and competitions supported by the ASME national organization.

**Biomedical Engineering Society (BMES).** The student chapter of BMES at UCI is an academic club for students in the field of Biomedical Engineering.

**Chi Epsilon.** This organization is a national engineering honor society which is dedicated to the purpose of promoting and maintaining the status of civil engineering as an ideal profession. Chi Epsilon was organized to recognize the characteristics of the individual that are fundamental to the successful pursuit of an engineering career.

**Electric Vehicle Association/UCI (EVA/UCI).** EVA/UCI gives students an opportunity for hands-on work on electric car conversions coupled with design experience.

**Engineering Student Council (ESC).** The ESC is the umbrella organization that provides a voice for all Engineering student chapters. A significant activity of the Council is organizing UCI's annual Engineering Week celebration.

**Engineers Without Borders (EWB).** This humanitarian organization combines travel with the idea that engineers can play an instrumental role in addressing the world's assorted challenges. Through the implementation of equitable, economical, and sustainable engineering projects, EWB-UCI works to improve quality of life within developing communities abroad.

**Eta Kappa Nu.** A student chapter of the National Electrical Engineering Honor Society, Eta Kappa Nu's purpose is to promote creative interaction between electrical engineers and give them the opportunity to express themselves uniquely and innovatively to project the profession in the best possible manner.

**Filipinos Unifying Student-Engineers in an Organized Network (FUSION).** Fusion is the merging of diverse, distinct, or separate elements into a unified whole. The mission of FUSION is to promote the academic and professional development of student engineers by providing an organized network of support.

**Institute of Electrical and Electronic Engineers (IEEE).** A student chapter of a multinational organization, IEEE at UCI encompasses academic, professional, and social activities.

**Institute of Transportation Engineers (ITE).** ITE is a student chapter of a national group of transportation engineering professionals. Offering opportunities to meet both professionals and other students, ITE focuses its activities on an annual project with practical applications.

**Mexican-American Engineers and Scientists (MAES) / Latinos in Science and Engineering.** Open to all students, MAES is a student and professional organization with the purpose of aiding students in their academic, professional, and social endeavors.

**National Society of Black Engineers (NSBE).** The NSBE, with almost 6,000 members, is one of the largest student-managed organizations in the country. The Society is dedicated to the realization of a better tomorrow through the development of intensive programs to increase the recruitment, retention, and successful graduation of underrepresented students in engineering and other technical majors.

**Omega Chi Epsilon.** The student chapter of the National Chemical Engineering Honor Society aims to recognize and promote high scholarship, original investigation, and professional service in chemical engineering.

**Phi Sigma Rho.** This national sorority is open to women in engineering, engineering technology, and STEM majors. Its purpose is to provide social opportunities, promote academic excellence, and provide encouragement and friendship.

**Pi Tau Sigma.** The mechanical engineering honor society, Pi Tau Sigma, is committed to recognizing those of high achievement. The goal of the organization is to promote excellence in academic, professional, and social activities.

**Sigma Gamma Tau.** The aerospace engineering honor society, Sigma Gamma Tau, is committed to recognizing those of high achievement. The goal of the organization is to promote excellence in academic, professional, and social activities.

**Society of Hispanic Professional Engineers (SHPE).** SHPE is both a student and professional organization. The UCI SHPE chapter works to recruit, retain, and graduate Latino engineers by providing a comprehensive program which includes high school visitations, coordinated study sessions, and industry speakers and tours. At the professional level there are opportunities for career positions and scholarships for members who are enrolled in undergraduate and graduate engineering and computer science programs.

**Society of Automotive Engineers (SAE).** Members of the SAE chapter at UCI participate in technical expositions, mini-Baja buggy races, student competitions, and social activities.

**Society of Women Engineers (SWE).** SWE is a national service organization dedicated to the advancement of women in engineering. UCI's student chapter encourages academic and social support, and membership is open to both men and women in technical majors interested in promoting camaraderie and in helping to make engineering study a positive experience.

**Structural Engineers Association of Southern California (SEAOSC).** The UCI student chapter of SEAOSC introduces students to the field of structural engineering through tours, speakers, and SEAOSC dinners with professional members of the organization.

**Sustainable Energy Technology Club (SETC).** With the common theme of energy, club members explore how science and technology can be used as a driving force behind making changes in society with respect to a cleaner environment and less wasteful lifestyles.

**Tau Beta Pi.** The national Engineering honor society, Tau Beta Pi acknowledges academic excellence in the wide variety of engineering disciplines. Tau Beta Pi at UCI sponsors community service activities, social events, and technical and nontechnical seminars.

**Theta Tau.** This is a national fraternity of men and women studying engineering. The goals are to promote the social and professional development of its members during and after their college years.

**Triangle.** This national social fraternity is open to men majoring in engineering, architecture, and the physical, mathematical, biological, and computer sciences. Its purpose is to develop balanced men who cultivate high moral character, foster lifelong friendships, and live their lives with integrity.

## Graduate Study

**Fadi J. Kurdahi, Associate Dean for Graduate and Professional Studies**

Graduate and Professional Studies  
204 Rockwell Engineering Center  
949-824-8090

## Admissions

For information on requirements for admission to graduate study at UCI, contact the appropriate Engineering department, or Graduate and Professional Studies in The Henry Samueli School of Engineering. Additional information is available in the *Catalogue's* Graduate Division section. Admission to graduate standing in The Henry Samueli School of Engineering is generally accorded to those possessing a B.S. in engineering or an allied field obtained with an acceptable level of scholarship from an institution of recognized standing. Those seeking admission without the prerequisite scholarship record may, in some cases, undertake remedial work; if completed at the stipulated academic level, they will be considered for admission. Those admitted from an allied field may be required to take supplementary upper-division courses in basic engineering subjects. The Graduate Record Examination (GRE) General Test is required of all applicants.

## Financial Support

Financial assistance is available to Ph.D. students in the form of fellowships, teaching assistantships, and research assistantships. Students should contact the Department to learn more about fellowships and teaching assistantships. Research assistantships are available through individual faculty members. Although not required, it is beneficial for applicants to contact the faculty member directly to establish the potential for research support.

## Part-Time Study

Domestic students may pursue the M.S. on a part-time basis, carrying fewer units per quarter. Since University residency requirements necessitate the successful completion of a minimum number of units in graduate or upper-division work in each of at least three regular University quarters, part-time students should seek the advice of a counselor in The Henry Samueli School of Engineering Graduate and Professional Studies and the approval of the Graduate Advisor in their program. Students taking courses in UCI Division of Continuing Education prior to enrollment in a graduate program should consult the following section on Transfer of Courses.

## Biomedical Engineering Courses

### **BME 1. Introduction to Biomedical Engineering. 3 Units.**

Introduction to the central topics of biomedical engineering. Offers a perspective on bioengineering as a discipline in a seminar format. Principles of problem solving, design, engineering inventiveness, entrepreneurship, information access, communication, ethics, teamwork, and social responsibility are emphasized.

(Design units: 1)

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment.

### **BME 3. Engineering Innovations in Treating Diabetes. 4 Units.**

Innovations in diabetes treatment from the 1800s until the present: purification of insulin, measuring and control of blood glucose, recombinant DNA, clinical trials, and ethics. Solving optimization problems in engineering with Excel.

(II and VA ).

### **BME 50A. Cell and Molecular Engineering. 4 Units.**

Molecular, structural, genetic, biophysical, and cellular principles of life and bioengineering. Introduction to molecular bioengineering, genetic engineering, synthetic biology, and cell biology. Applications to genetic and biomolecular design.

(Design units: 1)

Corequisite: BME 1

Prerequisite: CHEM 1C or CHEM H2C

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

### **BME 50B. Cell and Molecular Engineering. 4 Units.**

Physiological function from a cellular, molecular, and biophysical perspective. Introduction to genetics, neuronal signaling, and cell cycle control.

(Design units: 1)

Prerequisite: BME 50A

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment.

### **BME 60A. Engineering Analysis/Design: Data Acquisition. 4 Units.**

Fundamentals of LabVIEW programming, basics of computer-based experimentation, establishing interface between computer and data acquisition instrumentation, signal conditioning basics. Materials fee.

(Design units: 2)

Prerequisite: PHYS 7D

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment.

**BME 60B. Engineering Analysis/Design: Data Analysis. 4 Units.**

Overview of MATLAB; numeric, cell, and structure arrays; file management; plotting and model building; solving linear algebraic equations; signal and image processing. Materials fee.

(Design units: 1)

Prerequisite: MATH 3A

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment.

**BME 60C. Engineering Analysis/Design: Computer-Aided Design. 4 Units.**

Introduction to SolidWorks and Computer-Aided Design software; design; analysis; rapid prototyping; visualization and presentation; manufacturing planning. Materials fee.

(Design units: 2)

Prerequisite or corequisite: BME 1

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment.

**BME 60D. Engineering Analysis/Design: Finite-Element Simulation. 4 Units.**

Introduction to finite-element simulation; fundamentals of Multiphysics simulation;.

(Design units: 2)

Prerequisite: BME 60B and BME 60C

**BME 110A. Biomechanics I. 4 Units.**

Introduction to statics and dynamics. Topics include rigid bodies, analysis of structures, forces in beams, moments of inertia, friction, kinetics, work, and energy.

(Design units: 1)

Prerequisite: PHYS 7C and MATH 3A and MATH 3D and BME 60B and BME 60C

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**BME 110B. Biomechanics II. 4 Units.**

Introduction to biomechanics from subcellular to tissue levels. Introduction to stress, strain, and constitutive laws of cells and tissues. Emphasis is placed on biosolids. Introduction to elastic and viscoelastic behaviors with emphasis on the standard linear model of viscoelasticity.

(Design units: 1)

Prerequisite: BME 110A

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**BME 110C. Biomechanics III. 4 Units.**

Introduction to human biomechanics with emphasis on cardiovascular biomechanics and biofluid mechanics.

(Design units: 0)

Prerequisite: BME 110B

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

**BME 111. Design of Biomaterials. 4 Units.**

Natural and synthetic polymeric materials. Metal and ceramics implant materials. Mechanical properties, degradation, surface characterization, and design of materials. Wound repair, blood clotting, foreign body response, biocompatibility of material. Artificial organs and medical devices. Government regulations.

(Design units: 3)

Corequisite: BME 50B or BIO SCI 99.

Prerequisite: CHEM 1C

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**BME 114. Genetic Engineering and Synthetic Biology. 4 Units.**

Exploring how biological function can be engineered and 'synthesized' from the DNA level up.

(Design units: 0)

Prerequisite: (CHEM 1C or CHEM H2C) and MATH 3D and BME 50A and BME 50B

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

**BME 120. Sensory Motor Systems. 4 Units.**

A quantitative and systems approach to understanding physiological systems. Systems covered include the nervous and musculoskeletal systems.

(Design units: 2)

Prerequisite: (BME 60B or EECS 10 or EECS 12 or CEE 20 or MAE 10) and MATH 3D and PHYS 7D

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

Concurrent with BME 220.

**BME 121. Quantitative Physiology: Organ Transport Systems. 4 Units.**

A quantitative and systems approach to understanding physiological systems. Systems covered include the cardiopulmonary, circulatory, and renal systems.

(Design units: 1)

Prerequisite: (BME 60B or EECS 10 or EECS 12 or CEE 20 or MAE 10) and MATH 3D

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment.

**BME 130. Biomedical Signals and Systems. 4 Units.**

Analysis of analog and digital biomedical signals; Fourier Series expansions; difference and differential equations; convolutions. System models: discrete-time and continuous-time linear time-invariant systems; Laplace and Fourier transforms. Analysis of signals and systems using computer programs.

(Design units: 1)

Corequisite: BME 60B

Prerequisite: (MATH 3A or ICS 6N) and MATH 3D. Recommended: STAT 8.

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment.

**BME 132. Introduction to Computational Biology. 4 Units.**

The use of theories and methods based on computer science, mathematics, and physics in molecular biology and biochemistry. Basics in biomolecular modeling. Analysis of sequence and structural data of biomolecules. Analysis of biomolecular functions.

Prerequisite: MATH 2D or MATH 3A or STAT 7 or STAT 8

Same as BIOL M123, CS 183.

Concurrent with MBB 223 and BME 232.

**BME 135. Photomedicine. 4 Units.**

Studies the use of optical and engineering-based systems (laser-based) for diagnosis, treating diseases, manipulation of cells and cell function. Physical, optical, and electro-optical principles are explored regarding molecular, cellular, organ, and organism applications.

(Design units: 0)

Prerequisite: PHYS 3C or PHYS 7D

Same as BIOL D130.

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

**BME 136. Engineering Medical Optics. 4 Units.**

Principles of optics and photonics, integration of optical components into systems and devices, and analysis of physiological signals obtained from Biophotonics measurements.

(Design units: 3)

Prerequisite: BME 130 and (BME 135 or BIOL D130)

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

Concurrent with BME 251.

**BME 137. Introduction to Biomedical Imaging. 4 Units.**

Introduction to imaging modalities widely used in medicine and biology, including X-ray, computed tomography (CT), nuclear medicine (PET and SPET), ultrasonic imaging, magnetic resonance imaging (MRI), optical tomography, imaging contrast, imaging processing, and complementary nature of the imaging modalities.

(Design units: 1)

Prerequisite: BME 130 or EECS 50 or EECS 150

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

**BME 138. Spectroscopy and Imaging of Biological Systems. 4 Units.**

Principles of spectroscopy; absorption; molecular orbitals; multiphoton transitions; Jablonski diagram; fluorescence anisotropy; fluorescence decay; quenching; FRET; excited state reactions; solvent relaxations; instruments; microscopy: wide field, LSM, TPE; fluorescent probes, fluctuations spectroscopy; optical resolution and super-resolution; CARS and SHG microscopy.

(Design units: 1)

Prerequisite: (MATH 3A or ICS 6N) and MATH 3D. Recommended: STAT 8.

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment.

Concurrent with BME 238.

**BME 140. Design of Biomedical Electronics. 4 Units.**

Analog and digital circuits in bioinstrumentation. AC and DC circuit analysis, design and construction of filter and amplifiers using operational amplifier, digitization of signals and data acquisition, bioelectrical signals, design and construction of ECG instrument, bioelectrical signal measurement and analysis. Materials fee.

(Design units: 3)

Prerequisite: BME 60A and BME 130

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

**BME 142. Microfabrication. 4 Units.**

Essentials of photolithography, soft-lithography, microfabrication, Microelectromechanical Systems (MEMS), BioMEMS; applications in biomedical engineering.

(Design units: 2)

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

**BME 147. Microfluidics and Lab-on-a-Chip. 4 Units.**

Introduction to principles of microfluidics and state-of-the-art micro Total Analysis Systems (uTAS). Lab-on-a-Chip for biomolecular assays with device design principles for microscale sample preparation, flow transport, biomolecular manipulation, separation and detection, and the technologies for integrating these devices into microsystems.

(Design units: 1)

Prerequisite: BME 110C

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

Concurrent with BME 260.

**BME 148. Microimplants. 4 Units.**

Essential concepts of biomedical implants at the micro scale. Design, fabrication, and applications of several microimplantable devices including cochlear, retinal, neural, and muscular implants.

(Design units: 1)

Prerequisite: BME 111

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

Concurrent with BME 262.

**BME 149. Biomedical Microdevices . 4 Units.**

In-depth review of microfabricated devices designed for biological and medical applications. Studies of the design, implementation, manufacturing, and marketing of commercial and research bio-medical devices.

(Design units: 0)

Concurrent with BME 261.

**BME 150. Biotransport Phenomena. 4 Units.**

Fundamentals of heat and mass transfer, similarities in the respective rate equations. Emphasis on practical application of fundamental principles.

(Design units: 0)

Prerequisite: (BME 60B or CEE 20) and (MATH 3A or ICS 6N) and MATH 3D

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment.

**BME 160. Tissue Engineering. 4 Units.**

Quantitative analysis of cell and tissue functions. Emerging developments in stem cell technology, biodegradable scaffolds, growth factors, and others important in developing clinical products. Applications of bioengineering.

(Design units: 2)

Prerequisite: (BME 50B or BIOL 99) and BME 111 and BME 121 and BME 150

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment.

**BME 170. Biomedical Engineering Laboratory. 4 Units.**

Measurement and analysis of biological systems using engineering tools and techniques. Laboratory experiments involve living systems with the emphasis on measuring physiological parameters. Materials fee.

(Design units: 1)

Prerequisite: BME 50B and BME 120 and BME 130

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

**BME 171. Cell and Tissue Engineering Laboratory. 4 Units.**

Techniques in molecular, cellular, and tissue engineering. Topics include bacterial and mammalian cell culture, DNA cloning and gene transfer, fabrication of biomaterial scaffolds, and immunassays and microscopy techniques for cell-based assays.

(Design units: 0)

Prerequisite: BME 160

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment.

**BME 180A. Biomedical Engineering Design. 3 Units.**

Design strategies, techniques, tools, and protocols commonly encountered in biomedical engineering; industrial design experience in group projects; ethics, economic analysis, and FDA product approval. Materials fee.

(Design units: 3)

Prerequisite: (BME 60B or MAE 10 or EECS 10) and (BME 60C or MAE 52 or EECS 31L) and (BME 140 or MAE 106 or EECS 170B). BME 180A, BME 180B, and BME 180C must be taken in the same academic year.

Grading Option: In progress only.

Restriction: Seniors only. Biomedical Engineering Majors only.

**BME 180B. Biomedical Engineering Design. 3 Units.**

Design strategies, techniques, tools, and protocols commonly encountered in biomedical engineering; industrial design experience in group projects; ethics, economic analysis, and FDA product approval. Materials fee.

(Design units: 3)

Prerequisite: BME 180A. BME 180A, BME 180B, and BME 180C must be taken in the same academic year.

Grading Option: In progress only.

Restriction: Seniors only. Biomedical Engineering Majors only.

**BME 180C. Biomedical Engineering Design. 3 Units.**

Design strategies, techniques, tools, and protocols commonly encountered in biomedical engineering; industrial design experience in group projects; ethics, economic analysis, and FDA product approval. Materials fee.

(Design units: 3)

Prerequisite: BME 180B. BME 180A, BME 180B, and BME 180C must be taken in the same academic year.

Restriction: Seniors only. Biomedical Engineering Majors only.

**BME 195. Special Topics in Biomedical Engineering. 1-4 Units.**

Studies in selected areas of Biomedical Engineering. Topics addressed vary each quarter.

(Design units: 1-4)

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**BME 197. Seminars in Biomedical Engineering. 2 Units.**

Presentation of advanced topics and reports of current research efforts in Biomedical Engineering.

(Design units: 1-2)

Restriction: Seniors only. Biomedical Engineering Majors have first consideration for enrollment.

Concurrent with BME 298.

**BME 199. Individual Study. 1-4 Units.**

Independent research conducted in the lab of a biomedical engineering core faculty member. A formal written report of the research conducted is required at the conclusion of the quarter.

(Design units: 1-4)

Prerequisite: BIOL 194S

Repeatability: May be taken for credit for 8 units.

**BME 199P. Individual Study. 1-4 Units.**

Supervised independent reading, research, or design for undergraduate Engineering majors. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**BME 210. Molecular and Cellular Engineering. 4 Units.**

Engineering of physiological function at the genetic, cellular, and tissue scales. Topics include cloning and genetic engineering, extracellular matrix biomaterials, principles of regenerative medicine and tissue engineering, and experimental design.

Restriction: Graduate students only.

**BME 211. Microscale Tissue Engineering. 4 Units.**

Engineering of physiological function at the scale of individual cells. Topics include cell micropatterning, microfluidic tissue culture, engineering the cellular microenvironment, and microphysiological systems.

Restriction: Graduate students only.

**BME 212. Cardiovascular Mechanobiology. 4 Units.**

Advanced topics in cellular engineering and mechanobiology, with focus on the cardiovascular system. Tools and techniques used to manipulate and measure mechanical forces at the molecular, cellular, tissue, and organ levels, and their applications in cardiovascular devices and tissue engineering.

Restriction: Graduate students only.

**BME 213. Systems Cell and Developmental Biology. 4 Units.**

Introduces concepts needed to understand cell and developmental biology at the systems level, i.e., how the parts (molecules) work together to create a complex output. Emphasis on using mathematical/computational modeling to expand/modify insights provided by intuition.

Same as DEVB 232.

Restriction: Graduate students only.

**BME 215. Linking Modeling and Experiments in Bioengineering. 4 Units.**

Overview of modeling based on experimental techniques in bioengineering. Construct and evaluate models of varying complexity and to relate them to experimental data.

Prerequisite: BME 220 and BME 221

Restriction: Graduate students only.

**BME 220. Sensory Motor Systems. 4 Units.**

A quantitative and systems approach to understanding physiological systems. Systems covered include the nervous and musculoskeletal systems.

Restriction: Graduate students only.

Concurrent with BME 120.

**BME 221. Organ Transport Systems. 4 Units.**

A quantitative and systems approach to understanding physiological systems. Systems covered include the cardiopulmonary, circulatory, and renal systems.

Restriction: Graduate students only.

**BME 222. Biofluid Mechanics . 4 Units.**

Introduces principles of biofluid mechanics in a research oriented scheme and approaches a wide spectrum of biofluid related problems in human body and solutions that involves engineering concepts.

Restriction: Graduate students only.

**BME 224. Molecular and Cellular Biophotonics. 4 Units.**

Principles underlying the application of photonic technologies to biomolecular and cellular systems. Sample technologies Optical Tweezers, Linear and Nonlinear Optical Microscopy and Fluorescence Lifetime and Correlation Methods, and their use to investigate emergent problems in Molecular, Cellular, and Developmental Biology.

Same as CHEM 224.

Restriction: Graduate students only.

**BME 225. Tissue and Organ Biophotonics. 4 Units.**

Principles underlying the application of photonic technologies to tissues, organs, organisms. Sample technologies include Optical Coherence Tomography, Optical Speckle Imaging, Optoacoustic Imaging, Wide-Field Spectroscopic Imaging, Diffuse Optical Spectroscopy. Addressing the use of these technologies to detect/monitor disease and physiological processes.

**BME 230A. Applied Engineering Mathematics I. 4 Units.**

Analytical techniques applied to engineering problems in transport phenomena, process dynamics and control, and thermodynamics.

**BME 230B. Applied Engineering Mathematics II. 4 Units.**

Focuses on biomedical system identification. Includes fundamental techniques of model building and testing such as formulation, solution of governing equations, sensitivity theory, identifiability theory, and uncertainty analysis.

Restriction: Graduate students only.

**BME 232. Introduction to Computational Biology. 4 Units.**

The use of theories and methods based on computer science, mathematics, and physics in molecular biology and biochemistry. Basics in biomolecular modeling. Analysis of sequence and structural data of biomolecules. Analysis of biomolecular functions.

Same as MBB 223.

Restriction: Graduate students only.

Concurrent with BIOL M123 and CS 183 and BME 132.

**BME 233. Dynamic Systems in Biology and Medicine. 4 Units.**

Introduces principles of system theory to analyze biological, biochemical, physiological, and bioengineering systems. Analytical and computational tools are used to model and analyze dynamic systems such as population, neuronal and heart dynamics, biochemical and physiological systems, oxygen diffusion and similar.

Restriction: Graduate students only.

**BME 234. Neuroimaging Data Analysis. 4 Units.**

Knowledge and understanding of recent techniques for the analysis of healthy and pathological structure and function in neuroimaging data.

Restriction: Graduate students only.

**BME 234P. Neuroimaging Data Analysis. 4 Units.**

Knowledge and understanding of recent techniques for the analysis of healthy and pathological structure and function in neuroimaging data.

Restriction: Master of Engineering students only. Graduate students only.

**BME 238. Spectroscopy and Imaging of Biological Systems. 4 Units.**

Principles of spectroscopy; absorption; molecular orbitals; multiphoton transitions; Jablonski diagram; fluorescence anisotropy; fluorescence decay; quenching; FRET; excited state reactions; solvent relaxations; instruments; microscopy: wide field, LSM, TPE; fluorescent probes, fluctuations spectroscopy; optical resolution and super-resolution; CARS and SHG microscopy.

Restriction: Graduate students only.

Concurrent with BME 138.

**BME 240. Introduction to Clinical Medicine for Biomedical Engineering. 4 Units.**

An introduction to clinical medicine for graduate students in biomedical engineering. Lectures and rotations through nephrology, gastroenterology, pulmonary, and critical care cardiology.

Restriction: Graduate students only. Biomedical Engineering Majors only.

**BME 251. Engineering Medical Optics. 4 Units.**

Principles of optics and photonics, integration of optical components into systems and devices, and analysis of physiologic signals obtained from Biophotonics measurements.

Restriction: Graduate students only.

Concurrent with BME 136.

**BME 252. Critical Thinking in Biophotonics. 2 Units.**

Critical thematic review of current research papers in the field of Biophotonics.

Prerequisite: BME 224 or BME 225

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**BME 260. Microfluidics and Lab-On-A-Chip. 4 Units.**

Introduction to microfluidics and state-of-the-art micro Total Analysis Systems (uTAS). Lab-on-a-Chip for biomolecular assays with device design principles for microscale sample preparation, flow transport, biomolecular manipulation, separation and detection, and the technologies for integrating these devices into microsystems.

Restriction: Graduate students only.

Concurrent with BME 147.

**BME 262. Microimplants. 4 Units.**

Essential concepts of biomedical implants at the micro scale. Design, fabrication, and applications of several microimplantable devices including cochlear, retinal, neural, and muscular implants.

Restriction: Graduate students only.

Concurrent with BME 148.

**BME 262P. Microimplants. 4 Units.**

Essential concepts of biomedical implants at the micro scale. Design, fabrication, and applications of several microimplantable devices including cochlear, retinal, neural, and muscular implants.

Restriction: Master of Engineering students only. Graduate students only.

**BME 264. Auditory Science and Technology. 2 Units.**

Advanced topics in auditory science and technology from cochlear mechanics to cochlear implants.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**BME 290. Critical Thinking and Writing. 4 Units.**

Critical thinking and writing are essential ingredients for success in scientific research. Examines examples from the scientific literature to extract principles of good scientific reasoning, experimental design, and writing.

Restriction: Graduate students only.

**BME 295. Special Topics in Biomedical Engineering. 1-4 Units.**

Studies in selected areas of Biomedical Engineering. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**BME 295P. Special Topics in Biomedical Engineering. 4 Units.**

Studies in selected areas of Biomedical Engineering. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Master of Engineering students only. Graduate students only.

**BME 296. Master of Science Thesis Research. 1-16 Units.**

Individual research or investigation conducted in the pursuit of preparing and completing the thesis required for the M.S. in Engineering.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**BME 297. Doctor of Philosophy Dissertation Research. 1-16 Units.**

Individual research or investigation conducted in the pursuit of preparing and completing the dissertation required for the Ph.D. in Engineering.

Repeatability: May be repeated for credit unlimited times.

**BME 298. Seminars in Biomedical Engineering. 2 Units.**

Presentation of advanced topics and reports of current research efforts in biomedical engineering. Designed for graduate students in the Biomedical Engineering program.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Concurrent with BME 197.

**BME 299. Individual Research. 1-16 Units.**

Individual research or investigation under the direction of an individual faculty.

Repeatability: May be repeated for credit unlimited times.

## Chemical and Biomolecular Engr Courses

**CBE 40A. Chemical Processes and Material Balances. 4 Units.**

Introduction to chemical engineering and the industries where chemical engineers play vital roles. Problem-solving skills and techniques. Quantitative calculations and applications using mass and energy balances. Stoichiometric equations, multiple bypasses, and others in process industries.

Prerequisite: MATH 2B and PHYS 7C and (CHEM 1B or CHEM H2B)

Restriction: Chemical Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**CBE 40B. Process Thermodynamics. 3 Units.**

Principles of thermodynamics: definitions, basic concepts, and laws; property relationships; construction of thermodynamic charts and tables; energy balances; phase and chemical equilibria; combined mass and energy balances.

Prerequisite: CBE 40A and (MATH 3A or ICS 6N). CBE 40A with a grade of C- or better

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 40C. Chemical Engineering Thermodynamics. 4 Units.**

Elements of chemical engineering thermodynamics, including equilibrium and stability; equations of state; generalized correlations of properties of materials; properties of ideal and non-ideal mixtures; thermodynamics of real solutions; ideal and non-ideal phase equilibria; chemical equilibria for ideal and non-ideal solutions.

Prerequisite: (EECS 10 or EECS 12 or ICS 31 or MAE 10) and MATH 2D and CBE 40B. CBE 40B with a grade of C- or better

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 100. Introduction to Numerical Methods in Engineering. 3 Units.**

An introduction to the fundamentals of numerical analysis and the computer algorithms in MATLAB for the solution of engineering problems, with emphasis on problems arising in chemical engineering thermodynamics, transport phenomena, and reaction engineering.

Prerequisite: CBE 40C

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 105. Engineering Physical Chemistry. 4 Units.**

Provides an integrated view of both classical and molecular perspectives on thermodynamics, thermodynamic potentials, entropy, and the second law. Students learn how to use statistical mechanics to create a bridge between the quantum mechanical world and the familiar macroscopic one.

Prerequisite: CHEM 1C and CBE 40C and (PHYS 7D or PHYS 7E)

Overlaps with CHEM 132A, CHEM 132B, CHEM 132C.

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 110. Reaction Kinetics and Reactor Design. 4 Units.**

Introduction to quantitative analysis of chemical reactions and chemical reactor design. Reactor operations including batch, continuous stirred tank, and tubular reactor. Homogeneous and heterogeneous reactions.

Prerequisite: CHEM 1C and MATH 3D and CBE 40B and CBE 40C and CBE 100. CBE 40B with a grade of C- or better. CBE 40C with a grade of C- or better

Restriction: Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engineering majors have second consideration for enrollment.

**CBE 120A. Momentum Transfer. 4 Units.**

Fluid statics, surface tension, Newton's law of viscosity, non-Newtonian and complex flows, momentum equations, laminar and turbulent flow, velocity profiles, flow in pipes and around objects, piping systems design, pumps and mixing, and other applications to chemical and related industries.

Prerequisite: CBE 40C and MATH 3D. CBE 40C with a grade of C- or better

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 120B. Heat Transfer. 3 Units.**

Principles of conduction, radiation, and convection of heat; phenomenological rate laws, differential and macroscopic energy balances; heat transfer rates, steady state and unsteady state conduction, convection; applications to chemical and related industries.

Prerequisite: CBE 120A. CBE 120A with a grade of C- or better

Restriction: Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engineering majors have second consideration for enrollment.

**CBE 120C. Mass Transfer. 3 Units.**

Molecular and continuum approaches to diffusion and convection in multi-component mixtures; steady state, quasi-steady state and transient mass transfer; effect of reactions on mass transfer; convective mass transfer; simultaneous mass, heat and momentum transfer; applications to chemical and related industries.

Prerequisite: CBE 120B and CBE 100

Restriction: Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engineering majors have second consideration for enrollment.

**CBE 130. Separation Processes. 4 Units.**

Application of equilibria and mass and energy balances for design of separation processes. Use of equilibrium laws for design of distillation, absorption, stripping, and extraction equipment. Design of multicomponent separators.

Prerequisite: CBE 40B and CBE 40C. CBE 40B with a grade of C- or better. CBE 40C with a grade of C- or better

Restriction: Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engineering majors have second consideration for enrollment.

**CBE 140A. Chemical Engineering Laboratory I. 4 Units.**

Experimental study of thermodynamics, fluid mechanics, and heat and mass transfer. Operation and evaluation of process equipment, data analysis. Materials fee.

Prerequisite: CBE 110 and CBE 120C

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 140B. Chemical Engineering Laboratory II. 4 Units.**

Continuation of the CBE 140A covering mass transfer operations such as distillation, absorption, extraction, etc. Rate and equilibria studies in simple chemical systems with and without reaction. Study of chemical process. Materials fee.

Prerequisite: CBE 130 and CBE 145 and CBE 140A

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 145. Chemical Process Control. 4 Units.**

Dynamic responses and control of chemical process equipment, dynamic modeling of chemical processes, linear system analysis, analyses and design of feedback loops and advanced control systems.

Prerequisite: CBE 110 and CBE 120B and CBE 120C

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 150A. Chemical Engineering Design I. 3 Units.**

Introduction to process design; flow sheets for chemical processes; synthesis of multicomponent separation sequences and reaction paths; synthesis of heat exchange networks; computer-aided design and simulation of processes and components pacts.

Prerequisite: CBE 110 and CBE 120C and CBE 130

Restriction: Seniors only. Chemical Engineering Majors only.

**CBE 150B. Chemical Engineering Design II. 3 Units.**

Application of chemical engineering basics to practical design problems; process economics; process safety; environmental impacts; a major team design project with progress reports, oral presentation, and technical report with engineering drawings and economics.

Prerequisite: CBE 150A

Restriction: Seniors only. Chemical Engineering Majors only.

**CBE 160. Engineering Biology. 3 Units.**

First-principle introduction to the modern biochemistry, molecular biology, and cell biology with an engineering language. The goal is to demonstrate that the vastly diverse biological phenomena can be explained by a set of fundamental principles in chemistry, thermodynamics, and kinetics.

**CBE 161. Introduction to Biochemical Engineering. 3 Units.**

Application of engineering principles to biochemical processes. Topics include microbial pathways, energetics and control systems, enzyme and microbial kinetics, and the design and analysis of biological reactors.

Prerequisite: CEMS 110 and (CHEM 1C or CHEM H2C) and MATH 3D

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 163. Kinetics of Biochemical Networks. 4 Units.**

Principles from statistical mechanics, thermodynamics, and chemical kinetics applied to biochemical systems, from fundamental processes such as receptor-ligand binding and enzyme catalysis, to complex cellular functions including signal transduction and gene regulation.

Prerequisite: CBE 120A

Restriction: Chemical Engineering Majors have first consideration for enrollment.

Concurrent with CBE 263.

**CBE 176. Nuclear and Radiochemistry. 4 Units.**

Advanced treatment of nuclear structure, nuclear reactions, and radioactive-decay processes. Introduction to nuclear activation analysis, isotope effects, radiation chemistry, hot-atom chemistry, nuclear age-dating methods, nuclear reactors, and nuclear power.

Prerequisite: (CHEM M3C or CHEM 1C or CHEM H2C) and MATH 2D

Same as CHEM 133.

Overlaps with CHEM 170.

Restriction: Chemistry Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment.

Concurrent with CHEM 233 and CBE 276.

**CBE 181. Polymer Science and Engineering. 4 Units.**

An introduction to physical aspects of polymers, including configuration and conformation of polymer chains and characterization techniques; crystallinity, viscoelasticity, mechanical properties, polymer alloys, processing, and application.

Prerequisite: ENGR 54 and (CBE 110 or MSE 165)

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 183. Surface and Adhesion Science. 4 Units.**

Structure, thermodynamics of, kinetics, and reactions on surfaces. Surface electronic and mechanical properties and characterization of all classes of materials including metals, semiconductors, ceramics, polymers, and soft materials. Adhesion between different materials is also addressed.

Prerequisite: (CBE 110 or MSE 165C) and (MSE 141 or MSE 69)

Same as MSE 176.

Restriction: Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

Concurrent with MSE 276 and CBE 283.

**CBE 187. Semiconductor Device Packaging. 3 Units.**

Introduction to the semiconductor device packaging and assembly process. Electrical, thermal, optical, and mechanical aspects of package design and reliability. Special topics on optoelectronics packaging are covered.

Prerequisite: CBE 40B

Restriction: Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**CBE 195. Special Topics in Chemical Engineering. 1-4 Units.**

Studies in selected areas of Chemical Engineering. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**CBE 198. Group Study. 1-4 Units.**

Group study of selected topics in engineering.

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**CBE 199. Individual Study. 1-4 Units.**

For undergraduate engineering majors in supervised but independent readings, research, or design. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

Repeatability: May be taken for credit for 8 units.

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 199P. Individual Study. 1-4 Units.**

For undergraduate Engineering majors in supervised but independent reading, research, or design. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in The School of Engineering.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**CBE 200. Applied Engineering Mathematics I. 4 Units.**

Analytical techniques applied to engineering problems in transport phenomena, process dynamics and control, and thermodynamics.

Restriction: Graduate students only.

**CBE 210. Reaction Engineering. 4 Units.**

Advanced topics in reaction engineering, reactor stability analysis, diffusional effect in heterogeneous catalysis, energy balance, optimization of reactor operation, dispersed in phase reactors.

Restriction: Graduate students only.

**CBE 220A. Transport Phenomena I. 4 Units.**

Continuum modeling and analysis of heat and mass transfer from an integrated viewpoint. Scaling concepts, relevance of characteristic time- and length-scales, steady- and unsteady-state processes, bounded and unbounded problems, and convective transport, with applications to chemical and biological processes.

Restriction: Graduate students only.

**CBE 220B. Transport Phenomena II. 4 Units.**

Introduces flow of isothermal fluids from a momentum transport viewpoint. Steady- and unsteady-state creeping and laminar flows; viscous and inviscid flows; Navier-Stokes equations; lubrication theory; boundary layer theory; with specific application to complex chemical and biological engineering processes.

Prerequisite: CBE 220A

Restriction: Graduate students only.

**CBE 240. Advanced Engineering Thermodynamics. 4 Units.**

Introduction to modern thermodynamics and applications, with a focus on aspects relevant to chemical and materials engineering. Mathematical tools; equilibrium and stability; microscope rigorous equations of state; molecular-level thermodynamics of real mixtures; and phase and chemical equilibrium.

Restriction: Graduate students only.

**CBE 249. Special Topics in Chemical Engineering. 1-4 Units.**

Studies in selected areas of Chemical Engineering. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**CBE 250. Research Methods and Technical Communication. 4 Units.**

Intended for Ph.D. students to develop critical research skills in creating archival papers, intellectual property and technical proposals, and in analysis of the scientific literature.

Restriction: Graduate students only.

**CBE 261. Molecular Biotechnology. 4 Units.**

Engineering and biological principles important in recombinant cell technology. Host/vector selection; plasmid propagation; optimization of cloned gene expression; metabolic engineering; protein secretion; experimental techniques; modeling of recombinant cell systems.

Restriction: Graduate students only.

**CBE 262. Metabolic Engineering and Synthetic Biology. 4 Units.**

Synthesis of chemicals from renewable carbon and energy sources using.

Restriction: Graduate students only.

**CBE 263. Kinetics of Biochemical Networks . 4 Units.**

Principles from statistical mechanics, thermodynamics, and chemical kinetics applied to biochemical systems, from fundamental processes such as receptor-ligand binding and enzyme catalysis, to complex cellular functions including signal transduction and gene regulation.

Restriction: Graduate students only.

Concurrent with CBE 163.

**CBE 264. Drug Delivery. 4 Units.**

Introduction to design of drug delivery systems. Includes physicochemical and pharmacokinetic considerations in drug formulations, types of therapeutics, routes of administration, biomaterials, and novel drug delivery systems.

**CBE 266. Bioseparation Processes. 4 Units.**

Introduction to design of bioseparation processes. The recovery and purification of biologically produced proteins, chemicals, and particulates are important. Focuses on the use of chemical engineering skills and principles in the analysis and design of biologically-based processes.

Restriction: Graduate students only.

**CBE 276. Nuclear and Radiochemistry. 4 Units.**

Advanced treatment of nuclear structure, nuclear reactions, and radioactive-decay processes. Introduction to nuclear activation analysis, isotope effects, radiation chemistry, hot-atom chemistry, nuclear age-dating methods, nuclear reactors, and nuclear power.

Same as CHEM 233.

Restriction: Graduate students only.

Concurrent with CHEM 133 and CBE 176.

**CBE 277. Detection and Measurement of Radiation. 4 Units.**

Basic principles of detection and measurement of ionizing radiation; both theory and practical aspects of measurement techniques for alpha, beta, gamma, and neutron radiation, properties of different detector materials, electronics and data treatments, and analysis.

Prerequisite: CHEM 233 or CBE 276

Same as CHEM 244.

Restriction: Graduate students only.

**CBE 280. Advanced Polymer Science and Engineering. 4 Units.**

The synthesis, characterization, microstructure, rheology, and properties of polymer materials. Polymers in solution and in the liquid, crystalline and glassy states. Engineering and processing properties, including viscoelasticity and rheology. Forming and processing methods. Environmental issues.

Restriction: Graduate students only.

**CBE 282. Colloid Science and Engineering. 4 Units.**

An introduction to the basic foundations of colloid science, interfacial phenomena, suspensions and complex fluids, and engineering and assembly of colloidal materials.

Restriction: Graduate students only.

**CBE 283. Surface and Adhesion Science. 4 Units.**

Structure, thermodynamics of, kinetics, and reactions on surfaces. Surface electronic and mechanical properties and characterization of all classes of materials including metals, semiconductors, ceramics, polymers, and soft materials. Adhesion between different materials is also addressed.

Same as MSE 276.

Restriction: Graduate students only.

Concurrent with MSE 176 and CBE 183.

**CBE 288. Optoelectronics Packaging. 4 Units.**

Basic and current issues in the packaging of integrated circuits (IC) and fiber-optic devices are discussed.

Restriction: Graduate students only.

**CBE 295. Seminars in Engineering. 1-4 Units.**

Seminars scheduled each year by individual faculty in major field of interest.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**CBE 296. Master of Science Thesis Research. 1-16 Units.**

Individual research or investigation conducted in preparation for the thesis required for the M.S. degree.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CBE 297. Doctor of Philosophy Dissertation Research. 1-16 Units.**

Individual research or investigation conducted in preparation for the dissertation required for the Ph.D. degree.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CBE 298. Seminars in Engineering. 2 Units.**

Presentation of advanced topics and reports of current research efforts in chemical engineering.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CBE 299. Individual Research. 1-16 Units.**

Individual research or investigation under the direction of an individual faculty member.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## **Civil and Environmental Engr Courses**

**ENGRCEE 11. Methods II: Probability and Statistics. 4 Units.**

Modeling and analysis of engineering problems under uncertainty. Engineering applications of probability and statistical concepts and methods.

(Design units: 0)

Prerequisite: (ENGRCEE 20 or EECS 10 or EECS 12 or ENGRMAE 10 or I&C SCI 31) and MATH 3A

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 20. Introduction to Computational Problem Solving. 4 Units.**

Introduction to computer programming within a numerical computing environment (MATLAB or similar) including types of data representation, graphical display of data, and development of modular programs with application to engineering analysis and problem solving.

(Design units: 1)

Corequisite: MATH 3A

Overlaps with BME 60B.

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 21. Computational Problem Solving. 4 Units.**

Engineering analysis and problem solving using MATLAB (or similar), including matrix algebra, solving systems of linear and nonlinear equations, numerical integration of ordinary differential equations (ODEs) and coupled ODEs, and analysis of numerical errors.

(Design units: 1)

Corequisite: MATH 3D

Prerequisite: (ENGRCEE 20 or BME 60B) and (MATH 3A or I&C SCI 6N)

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 30. Statics. 4 Units.**

Addition and resolution of forces, distributed forces, equivalent system of forces centroids, first moments, moments and products on inertia, equilibrium of rigid bodies, trusses, beams, cables. Course may be offered online.

(Design units: 0)

Corequisite: MATH 2D

Prerequisite: MATH 2D and PHYSICS 7C

Same as ENGR 30, ENGRMAE 30.

Restriction: School of Engineering students have first consideration for enrollment.

**ENGRCEE 60. Contemporary and Emerging Environmental Challenges. 4 Units.**

Introduces contemporary and emerging environmental challenges, illustrates links between human behavior, environmental policy, and engineering practices, examines policy options in the context of current institutions, and introduces tools and frameworks to reach sound economic, social, and environmental solutions.

(Design units: 0)

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**(III)****ENGRCEE 80. Dynamics. 4 Units.**

Introduction to the kinematics and dynamics of particles and rigid bodies. The Newton-Euler, Work/Energy, and Impulse/Momentum methods are explored for ascertaining the dynamics of particles and rigid bodies. An engineering design problem using these fundamental principles is also undertaken.

(Design units: 0.5)

Prerequisite: MATH 2D and PHYSICS 7C

Same as ENGR 80, ENGRMAE 80.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 81A. Civil Engineering Practicum I. 3 Units.**

Introduction to civil engineering through presentations on structural, environmental, water, and transportation systems. Introduction to graphics. Graphical visualization and communication using hand and computer sketching. Fundamentals of Computer Aided Design (CAD) using AutoCad. Laboratory sessions. Materials fee.

(Design units: 2)

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 81B. Civil Engineering Practicum II. 3 Units.**

Principles of surveying; fundamentals of Geographic Information Systems (GIS); introduction to the state-of-the-art and future areas of the profession, including applications of advanced technology and computers; Introduction to visualization and communication of design concepts; laboratory sessions. Materials fee.

(Design units: 1)

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 110. Methods III: Modeling, Economics, and Management. 4 Units.**

Analysis, modeling, and management of civil engineering systems. Statistics and system performance studies, probabilistic models and simulation, basic economics and capital investments, project elements and organization, managerial concepts and network technique, project scheduling. Emphasis on real-world examples. Laboratory sessions.

(Design units: 1)

Prerequisite: ENGRCEE 11

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 111. Methods IV: Systems Analysis and Decision-Making. 4 Units.**

Analysis and optimization for decision-making in civil and infrastructural systems. Topics include linear programming formulations and solution algorithms, network models, and logistical models. Emphasis is on project-level and managerial decision-making and selection from alternative designs.

(Design units: 1)

Prerequisite: (MATH 3A or I&C SCI 6N) and MATH 3D

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 114. GIS for Civil and Environmental Engineering. 4 Units.**

GIS for CEE provides an introduction to Geographic Information Systems (GIS) and their various applications in civil and environmental engineering. Topics include GIS data formats, data queries, spatial and attribute data, spatial data analysis, coordinate systems, and raster data analysis.

Concurrent with ENGRCEE 214.

**ENGRCEE 121. Transportation Systems I: Analysis and Design. 4 Units.**

Introduction to analysis and design of fundamental transportation system components, basic elements of geometric and pavement design, vehicle flow and elementary traffic, basic foundations of transportation planning and forecasting. Laboratory sessions.

(Design units: 2)

Prerequisite: ENGRCEE 11 and ENGRCEE 81A

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 122. Transportation Systems II: Operations and Control. 4 Units.**

Introduction to fundamentals of urban traffic engineering, including data collection, analysis, and design. Traffic engineering studies, traffic flow theory, traffic control devices, traffic signals, capacity and level of service analysis of freeways and urban streets. Laboratory sessions.

(Design units: 2)

Prerequisite: ENGRCEE 11 and ENGRCEE 121

Restriction: Civil Engineering Majors have first consideration for enrollment.

Concurrent with ENGRCEE 229A.

**ENGRCEE 123. Transportation Systems III: Planning and Forecasting. 4 Units.**

Theoretical foundations of transportation planning, design, and analysis methods. Theory and application of aggregate and disaggregate models for land use development, trip generation, destination, mode, and route choice. Transportation network analysis. Planning, design, and evaluation of system alternatives.

(Design units: 2)

Corequisite: ENGRCEE 110

Prerequisite: ENGRCEE 121

Restriction: Civil Engineering Majors have first consideration for enrollment.

Concurrent with ENGRCEE 223.

**ENGRCEE 124. Transportation Systems IV: Freeway Operations and Control. 4 Units.**

Fundamentals of traffic on urban freeways, including data collection analysis, and design. Traffic engineering studies, traffic flow theory, freeway traffic control devices, capacity, and level of service analysis of freeways and highways. Laboratory sessions.

(Design units: 2)

Prerequisite: ENGRCEE 121

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 125. Transportation and the Environment. 4 Units.**

Analysis of the impacts of motor vehicle transportation on the environment. Introduction to life cycle analysis applied to transportation. Basic economic tools for transportation externalities. Transportation planning, urban form, health, and the environment. Transportation sustainability.

(Design units: 0)

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 130. Soil Mechanics. 4 Units.**

Mechanics of soils, composition and classification of soils, compaction, compressibility and consolidation, shear strength, seepage, bearing capacity, lateral earth pressure, retaining walls, piles.

(Design units: 0)

Corequisite: ENGRCEE 130L

Prerequisite: ENGRCEE 150 and ENGRCEE 170

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 130L. Soil Mechanics Laboratory. 1 Unit.**

Laboratory procedures of soil testing for engineering problems. Materials fee.

(Design units: 0)

Corequisite: ENGRCEE 130

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 149. Introduction to Earthquake Engineering. 4 Units.**

Plate tectonics. Structural dynamics. Earthquake magnitude, intensity, and frequency. Seismic damage to structures. Earthquake load prediction including response spectra, normal mode, and direct integration techniques. The basis of building code earthquake load requirements for buildings.

(Design units: 2)

Prerequisite: ENGRCEE 11 and ENGRCEE 20 and ENGRCEE 151A

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 150. Mechanics of Materials. 4 Units.**

Stresses and strains, strain-stress diagrams, axial deformations, torsion, bending and shear stresses in beams, shear force and bending moment diagrams, combined stresses, principal stresses, Mohr's circle, deflection of beams, columns.

(Design units: 1)

Prerequisite: ENGRCEE 30 or ENGRMAE 30 or ENGR 30. ENGRCEE 30 with a grade of C- or better

Overlaps with ENGR 150, ENGRMAE 150.

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 150L. Mechanics of Materials Laboratory. 1 Unit.**

Experimental methods and fundamentals for mechanics of materials analysis. Materials fee.

(Design units: 0)

Prerequisite or corequisite: (ENGRCEE 30 or ENGRMAE 30 or ENGR 30) and ENGRCEE 150. ENGRCEE 30 with a grade of C- or better

Overlaps with ENGRMAE 150L.

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 151A. Structural Analysis. 4 Units.**

Fundamentals of structural analysis and loading. Deformation of statically determinate and indeterminate structures. Influence lines. Structural systems.

(Design units: 0)

Prerequisite: ENGRCEE 150 or ENGRMAE 150. ENGRCEE 150 with a grade of C- or better

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 151B. Structural Timber Design. 4 Units.**

Design of timber structures. Beams, columns, beam-columns, roof, and connections.

(Design units: 3)

Prerequisite: ENGRCEE 151A

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 151C. Reinforced Concrete Design. 4 Units.**

Ultimate strength design. Design of reinforced concrete beam sections. Design for shear and deflection. Design of columns. Design of isolated and combined footings. Laboratory sessions. Materials fee.

(Design units: 3)

Prerequisite: ENGRCEE 151A

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 152. Computer Methods in Structural Analysis and Design. 4 Units.**

Matrix techniques for indeterminate framed structures. Computer implementation using the stiffness method. Software packages for design of reinforced concrete, steel, and/or timber structures.

(Design units: 2)

Prerequisite: ENGRCEE 151C

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 155. Structural Steel Design. 4 Units.**

Design in steel of tension members, beams, columns, welded and bolted connections; eccentrically loaded and moment resistant joints; plate girders. Plastic design; load and resistance factor design. Composite construction; introduction to computer-aided design.

(Design units: 4)

Prerequisite: ENGRCEE 151A

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 156. Foundation Design. 4 Units.**

Applications of soil mechanics principles to the analysis and design of shallow foundations, retaining walls, pile foundations, and braced cuts. Design criteria: bearing capacity, working loads and tolerable settlements, structural integrity of the foundation element. Damage from construction operations.

(Design units: 3)

Prerequisite: ENGRCEE 130 and ENGRCEE 151C

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 160. Environmental Processes. 4 Units.**

Introduction to environmental processes in air and water, mass balances, and transport phenomena. Fundamentals of water-quality engineering including water and wastewater treatment.

(Design units: 1)

Prerequisite: (CHEM 1B or CHEM H2B) and ENGRCEE 170

Restriction: Civil Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 162. Introduction to Environmental Chemistry. 4 Units.**

Basic concepts from general, physical, and analytical chemistry as they relate to environmental engineering. Particular emphasis on the fundamentals of equilibrium and kinetics as they apply to acid-base chemistry, gas solubility, and redox reactions. Laboratory sessions. Materials fee.

(Design units: 0)

Prerequisite: (ENGR 1A or CHEM 1A or CHEM H2A) and (CHEM 1B or CHEM H2B) and (CHEM 1LC or CHEM 1LE or CHEM H2LB or CHEM M2LB) and (CHEM 51A or CHEM H52A)

Restriction: Chemical Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 163. Wastewater Treatment Process Design. 4 Units.**

Design of biological treatment processes. Topics include attached and suspended growth, aeration, anaerobic systems, process control, and economics. Design projects included. Materials fee.

(Design units: 4)

Prerequisite: ENGRCEE 160

Restriction: Civil Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 164. Carbon and Energy Footprint Analysis. 4 Units.**

Process design for wastewater treatment. Mass- and energy-balance analysis applied to water and wastewater treatment systems. Case studies include analysis of water supply, treatment, reclamation, and reuse.

(Design units: 2)

Prerequisite: ENGRCEE 160

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

Concurrent with ENGRCEE 264.

**ENGRCEE 165. Physical-Chemical Treatment Processes. 4 Units.**

Theory and dynamics of physical and chemical separation processes in water and wastewater treatment. Topics include coagulation, sedimentation, filtration, gas-transfer, membrane separations, and adsorption.

(Design units: 2)

Prerequisite: ENGRCEE 160 and (ENGRMAE 91 or CBE 40C)

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

Concurrent with ENGRCEE 265.

**ENGRCEE 169. Environmental Microbiology for Engineers. 4 Units.**

Fundamental and applied principles of microbiology. Structures and functions of microorganisms, the microbiology of water, wastewater and soil used in environmental engineering, and the impact of microorganisms on human and environmental health.

(Design units: 0)

Prerequisite: ENGRCEE 160

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 170. Introduction to Fluid Mechanics. 4 Units.**

Thermodynamic and mechanical fluid properties; fluid statics; control volume and differential approaches for mass, momentum, and energy; dimensional analysis and similarity.

(Design units: 1)

Corequisite: MATH 2E and ENGRCEE 20

Prerequisite: PHYSICS 7C

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 171. Water Resources Engineering. 4 Units.**

Principles governing the analysis and design of water resource systems including pressurized pipelines, pipe networks, channels, and ground water. Coverage of fluid mass, momentum and energy conservation, flow resistance, and related laboratory measurements in different systems. Materials fee.

(Design units: 2)

Prerequisite: ENGRCEE 170

Restriction: Chemical Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 172. Groundwater Hydrology. 4 Units.**

Topics include conservation of fluid mass, storage properties of porous media, matrix compressibility, boundary conditions, flow nets, well hydraulics, groundwater chemistry, and solute transport. Design projects and computer applications included.

(Design units: 2)

Prerequisite: ENGRCEE 170 or ENGRMAE 130A or CBE 120A

Restriction: Civil Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

Concurrent with ENGRCEE 272.

**ENGRCEE 173. Watershed Modeling. 4 Units.**

Basic principles of hydrologic modeling are practiced. Concepts of watershed delineation, land use change impact, design studies, and GIS tools are discussed. Focus on the USACE (HEC) software tools (HEC-HMS, and HEC-RAS) along with their associated GIS interfaces.

(Design units: 1)

Prerequisite: ENGRCEE 170 and ENGRCEE 176

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

Concurrent with ENGRCEE 273.

**ENGRCEE 176. Hydrology. 4 Units.**

Elements of the hydrologic cycle including precipitation, infiltration, evapotranspiration, ground water, and runoff. Unit Hydrograph theory and routing methods. Introduction to precipitation/runoff relationship and watershed modeling. Statistical methods and flood frequency analysis.

(Design units: 2)

Prerequisite: ENGRCEE 170 or ENGRMAE 130A

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

Concurrent with ENGRCEE 276.

**ENGRCEE 178. Fluid Mechanics of Open Channels. 4 Units.**

Fundamentals of fluid motion in open channels. Navier-Stokes equations and one-dimensional momentum and energy principles. Topics include rapidly varied flow, flow resistance and turbulence, gradually varied flow, unsteady flow, and computational methods for channel flow modeling.

(Design units: 1)

Prerequisite: (ENGRCEE 20 or BME 60B or ENGRMAE 10) and (ENGRCEE 170 or ENGRMAE 130A or CBEMS 125A)

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 181A. Senior Design Practicum I. 2 Units.**

Team designs land development project including infrastructural, environmental, circulation aspects. Focus on traffic impact studies, design of roads, geometry, signals, geotechnical and hydrological analysis, design of structural elements, economic analysis. Oral/Written interim and final design reports. Laboratory sessions.

(Design units: 1)

Prerequisite: ENGRCEE 81A and ENGRCEE 81B and ENGRCEE 110 and (ENGRCEE 121 or ENGRCEE 151C or ENGRCEE 162 or ENGRCEE 171). ENGRCEE 181A and ENGRCEE 181B and ENGRCEE 181C must be taken in the same academic year.

Restriction: Seniors only. Civil Engineering Majors only. Environmental Engineering Majors only.

**ENGRCEE 181B. Senior Design Practicum II. 2 Units.**

Team designs land development project including infrastructural, environmental, circulation aspects. Focus on traffic impact studies, design of roads, geometry, signals, geotechnical and hydrological analysis, design of structural elements, economic analysis. Oral/Written interim and final design reports. Laboratory sessions.

(Design units: 2)

Corequisite: ENGRCEE 130

Prerequisite: ENGRCEE 181A. CEE 181A and ENGRCEE 181B and ENGRCEE 181C must be taken in the same academic year.

Grading Option: In Progress (Letter Grade with P/NP).

Restriction: Seniors only. Civil Engineering Majors only. Environmental Engineering Majors only.

**ENGRCEE 181C. Senior Design Practicum III. 2 Units.**

Team designs land development project including infrastructural, environmental, circulation aspects. Focus on traffic impact studies, design of roads, geometry, signals, geotechnical and hydrological analysis, design of structural elements, economic analysis. Oral/Written interim and final design reports. Laboratory sessions.

(Design units: 2)

Prerequisite: ENGRCEE 181B. ENGRCEE 181A and CEE 181B and ENGRCEE 181C must be taken in the same academic year.

Restriction: Seniors only. Civil Engineering Majors only. Environmental Engineering Majors only.

**ENGRCEE 195. Special Topics in Civil and Environmental Engineering. 1-4 Units.**

Studies in selected areas of Civil and Environmental Engineering. Topics addressed vary each quarter.

(Design units: 1-4)

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**ENGRCEE 198. Group Study. 1-4 Units.**

Group study of selected topics in Civil and Environmental Engineering.

(Design units: 1-4)

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**ENGRCEE 199. Individual Study. 1-4 Units.**

For undergraduate Engineering majors in supervised but independent reading, research, or design. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Repeatability: May be taken for credit for 8 units.

**ENGRCEE 199P. Individual Study. 1-4 Units.**

Supervised independent reading, research, or design for undergraduate Engineering majors. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**ENGRCEE 214. GIS for Civil and Environmental Engineering. 4 Units.**

GIS for CEE provides an introduction to Geographic Information Systems (GIS) and their various applications in civil and environmental engineering. Topics include GIS data formats, data queries, spatial and attribute data, spatial data analysis, coordinate systems, raster data analysis.

Concurrent with ENGRCEE 114.

**ENGRCEE 220A. Travel Demand Analysis I. 4 Units.**

Fundamentals of transportation systems analysis. Theoretical aspects of travel demand. Travel behavior. Modeling of performance characteristics and costs of transportation modes. In-depth presentation of travel demand modeling techniques. Development of travel choice models including mode, route, and destination choice. Equilibrium.

Restriction: Graduate students only.

**ENGRCEE 220B. Travel Demand Analysis II. 4 Units.**

Methods of discrete choice analysis and their applications in the modeling of transportation systems. Emphasis on the development of a sound understanding of theoretical aspects of discrete choice modeling that are useful in many applications in travel demand analysis.

Prerequisite: ENGRCEE 220A

Restriction: Graduate students only.

**ENGRCEE 220C. Travel Demand Analysis III: Activity-based Approaches. 4 Units.**

The methodological underpinnings of activity-based travel demand modeling. Presents methodologies within the context of a generalization of discrete choice modeling approaches, emphasizing the distinctions that separate these two approaches and presenting appropriate mathematical and statistical tools to address these distinctions.

Prerequisite: ENGRCEE 220A

Restriction: Graduate students only.

**ENGRCEE 221A. Transportation Systems Analysis I. 4 Units.**

Introduction to mathematical methods and models to address logistics and urban transportation problems. Techniques include stochastic models, queueing theory, linear programming, and introductory non-linear optimization.

Restriction: Graduate students only.

**ENGRCEE 221B. Transportation Systems Analysis II. 4 Units.**

Advanced mathematical methods and models to address logistics and urban transportation problems. Topics include network flows, advanced optimization techniques, network models, and heuristic algorithms.

Prerequisite: ENGRCEE 221A

Restriction: Graduate students only.

**ENGRCEE 222. Transit Systems Planning. 4 Units.**

Planning methods for public transportation in urban areas. Technological and operating characteristics of vehicles, facilities, and systems. Short-range planning techniques: data collection and analysis, demand analysis, mode choice, operational strategies, financial analysis. Design of systems to improve performance.

Restriction: Graduate students only.

**ENGRCEE 223. Transportation Systems III: Planning and Forecasting. 4 Units.**

Theoretical foundations of transportation planning, design, and analysis methods. Theory and application of aggregate and disaggregate models for land use development, trip generation, destination, mode, and route choice. Transportation network analysis. Planning, design, and evaluation of system alternatives.

Restriction: Graduate students only.

Concurrent with ENGRCEE 123.

**ENGRCEE 224A. Transportation Data Analysis I. 4 Units.**

Statistical analysis of transportation data sources. Analysis of categorical and ordinal data. Regression and advanced multivariate analysis methods such as discriminant analysis, canonical correlation, and factor analysis. Sampling techniques, sample error and bias, survey instrument design.

Restriction: Graduate students only.

**ENGRCEE 225B. Transportation Planning Models II. 4 Units.**

Design and application of comprehensive transportation models. Network development, demand modeling, and equilibrium assignment. Model calibration, validation, prediction, and evaluation. Regional modeling, site impact analysis, and circulation studies. Design of transportation alternatives.

Prerequisite: ENGRCEE 223

Restriction: Graduate students only.

**ENGRCEE 226A. Traffic Flow Theory I. 4 Units.**

Traffic measurement and fundamental speed-density-flow relationships. Kinematic models. Shock waves. Statistical-kinetic theory of traffic. Introductory car-following principles and stability. Gap acceptance. Platoon dispersion. Two-fluid model. Queueing process. Multi-regime and catastrophe models. Higher-order continuum models. Microscopic and macroscopic simulation.

Restriction: Graduate students only.

**ENGRCEE 226B. Traffic Flow Theory II. 4 Units.**

Advanced mathematical analysis of vehicular flow. Detailed treatise on car-following models. Fourier and Laplace analysis of stability problems. Perturbation analysis. Derivation of macroscopic traffic flow relationships from microscopic considerations. Advanced hydrodynamic theory.

Prerequisite: ENGRCEE 226A

Restriction: Graduate students only.

**ENGRCEE 228A. Urban Transportation Networks I. 4 Units.**

Analytical approaches and algorithms to the formulation and solution of the equilibrium assignment problem for transportation networks. Emphasis on user equilibrium (UE) comparison with system optimal, mathematical programming formulation, supply functions, estimation. Estimating origin-destination matrices, network design problems.

Prerequisite: ENGRCEE 220A

Restriction: Graduate students only.

**ENGRCEE 228B. Urban Transportation Networks II. 4 Units.**

Advanced analysis, optimization, and modeling of transportation networks. Topics include advanced static and dynamic traffic assignment algorithms, linear and nonlinear multi-commodity network flow optimization, network simplex, and network control problems.

Prerequisite: ENGRCEE 221A and ENGRCEE 228A

Restriction: Graduate students only.

**ENGRCEE 229A. Traffic Systems Operations and Control I. 4 Units.**

Introduction to operation, control, and analysis of arterial and freeway traffic systems. Control concepts, traffic stream principles, detectors, local controllers, system masters, traffic signal and ramp metering timing principles, traffic measurement technologies, traffic delay principles.

Restriction: Graduate students only.

Concurrent with ENGRCEE 122.

**ENGRCEE 229B. Traffic Systems Operations and Control II. 4 Units.**

Advanced topics related to operation, control, and analysis of arterial and freeway traffic systems. Control concepts, traffic stream principles, detectors, local controllers, system masters, traffic signal and ramp metering timing principles.

Prerequisite: ENGRCEE 229A

Restriction: Graduate students only.

**ENGRCEE 231. Foundation Engineering. 4 Units.**

Essentials for design and analysis of structural members that transmit superstructure loads to the ground. Topics include subsurface investigations, excavation, dewatering, bracing, footing, mat foundations, piles and pile foundations, caissons and cofferdams, other special foundations.

Restriction: Graduate students only.

**ENGRCEE 232. Geotech Earthquake Engineering. 4 Units.**

In-situ and laboratory determination of dynamic soil properties, liquefaction of soil, cyclic softening of clays, seismic compression and settlement analyses, ground improvement methods, seismic slope stability, introduction to soil structure interaction.

Restriction: Graduate students only.

**ENGRCEE 240. High Performance Materials. 4 Units.**

Part I: Linear and nonlinear fracture mechanics, methodology, real-world case studies; Part II: Composite material toughening, underlying micromechanics, materials engineering towards microstructure tailoring and new material design approaches; Part III: Emerging high-performance engineering materials for safety, energy and the environment.

Restriction: Graduate students only.

**ENGRCEE 242. Advanced Strength of Materials. 4 Units.**

Beams on elastic foundations. Combined axial and lateral loads. Curved beams. Unsymmetric bending. Shear center. Stresses and strains. Basic equations for theory of elasticity. Energy principles. Theory of torsion. Combined bending and torsion.

Restriction: Graduate students only.

**ENGRCEE 243. Mechanics of Composite Materials. 4 Units.**

Stress-strain relationship for orthotropic materials; invariant properties of an orthotropic lamina; biaxial strength theory for an orthotropic lamina; mechanics of materials approach to stiffness; elasticity approach to stiffness; classical lamination theory; strength of laminates; statistical theory of fatigue damage.

Restriction: Graduate students only.

**ENGRCEE 247. Structural Dynamics. 4 Units.**

Vibration of discrete and continuous mass elastic systems. Isolation and transmissibility. Dynamic recording instruments. Introduction to nonlinear theory of vibration. Response of structures to earthquake, traffic, and wind loads. Response spectra concepts. Normal mode analysis. Numerical integration techniques.

Restriction: Graduate students only.

**ENGRCEE 249. Earthquake Engineering. 4 Units.**

Earthquake magnitude, intensity, and frequency. Seismic damage to structures. Earthquake load prediction including response spectra, normal mode, and direct integration techniques. The basis of building code earthquake load requirements for buildings. Seismic response of special structures. Lifeline engineering.

Restriction: Graduate students only.

**ENGRCEE 250. Finite Element Method in Structural Engineering. 4 Units.**

Finite element concepts in structural engineering including variational formulations, shape functions, elements assembly, convergence and computer programming. Stiffness of truss, beam, and frame members, two- and three-dimensional solids, plate and shell elements. Static, vibration, stability, and inelastic analysis.

Restriction: Graduate students only.

**ENGRCEE 252. Multiscale Modeling of Materials and Structures. 4 Units.**

Introduction to modeling materials and structures across length.

Restriction: Graduate students only.

**ENGRCEE 254. Advanced Reinforced Concrete Behavior and Design. 4 Units.**

Flexural strength of reinforced concrete elements. Flexural ductility of unconfined and confined members with axial loads. Shear and torsional behaviors. Strength of reinforced concrete ductile frames and shear walls. Reinforced concrete detailing.

Restriction: Graduate students only.

**ENGRCEE 255. Advanced Behavior and Design of Steel Structures. 4 Units.**

Advanced principles of structural steel design. Analysis and design of beam-column members, braced and unbraced frames for buildings, and plate girders. Review of seismic design provisions. Design of connections.

Restriction: Graduate students only.

**ENGRCEE 258. Earthquake Resistant Structural Design. 4 Units.**

Objectives of seismic design. Cyclic load-distortion characteristics of typical structural elements. Desirable structural form. Ductility and methods of achieving it. Use of energy dissipators. Project involving design of multistory, multibay rigid-jointed plane frame.

Restriction: Graduate students only.

**ENGRCEE 260. Desalination. 4 Units.**

Introduction of state of technology, costs and benefits, environmental issues, and implementation issues related to desalination. Emphasis on membrane processes and biofouling prevention.

Restriction: Graduate students only.

**ENGRCEE 261. Applied Environmental Microbiology. 4 Units.**

Microbes in the environment and their impact on human interactions. Microbiological application in solving environmental engineering problems.

Restriction: Graduate students only.

**ENGRCEE 262. Environmental Chemistry II. 4 Units.**

Advanced concepts from physical and organic chemistry as they relate to environmental engineering. Emphasis on equilibrium and kinetics as they apply to redox reactions, coordination, absorption, gas phase reactions, and ion exchange.

Restriction: Graduate students only.

**ENGRCEE 263. Advanced Biological Treatment Processes. 4 Units.**

Analysis of biological processes in natural and engineered systems. Biological treatment processes, both aerobic and anaerobic, with emphasis on suspended growth systems including design consideration. Containment degradation or control covered. Includes laboratory on molecular tools used in wastewater treatment.

Restriction: Graduate students only.

**ENGRCEE 264. Carbon and Energy Footprint Analysis. 4 Units.**

Process design for wastewater treatment. Mass- and energy- balance analysis applied to water and wastewater treatment systems. Case studies include analysis of water supply, treatment, reclamation, and reuse.

Restriction: Graduate students only.

Concurrent with ENGRCEE 164.

**ENGRCEE 265. Physical-Chemical Treatment Processes. 4 Units.**

Theory and dynamics of physical and chemical separation processes in water and wastewater treatment. Topics include coagulation, sedimentation, filtration, gas transfer, membrane separations, and absorption.

Restriction: Graduate students only.

Concurrent with ENGRCEE 165.

**ENGRCEE 266. Drinking Water and Wastewater Biotechnology. 4 Units.**

Water and wastewater microbiology. Engineering principles, molecular aspects, and overview of microorganisms of importance to public health. Topics include aerobic and anaerobic wastewater treatment and disinfection of pathogens in water, wastewaters, and biosolids.

Restriction: Graduate students only.

**ENGRCEE 267. Energy, Climate Change, and Urban Air Quality. 4 Units.**

An introduction to the connection between energy, climate change, and urban air quality. It will focus on air quality and climate implications of energy choices, bringing light to the most important and time-relevant issues.

Restriction: Graduate students only.

**ENGRCEE 269. Beach Dynamics. 4 Units.**

Coastal erosion in California, human and natural influences on southern California beaches, and present-day challenges. Littoral cells and sediment budgets. Water wave theory. Littoral sediment transport and shoreline change modeling. Shoreline stabilization using green and gray infrastructure.

Restriction: Graduate students only.

**ENGRCEE 270. Flood Risk and Modeling. 4 Units.**

Global and national trends in flooding and related impacts including disasters; flood risk management; theory and numerical methods for flood inundation modeling; flood risk communication strategies including flood hazard visualizations.

**ENGRCEE 271. Flow in Unsaturated Porous Media. 4 Units.**

Fluid flow in the unsaturated zone (zone of aeration) of the subsurface. Soil-water physics, flow in regional groundwater systems, miscible displacement, mathematical modeling techniques.

Restriction: Graduate students only.

**ENGRCEE 272. Groundwater Hydrology. 4 Units.**

Topics include conservation of fluid mass, storage properties of porous media, matrix compressibility, boundary conditions, flow nets, well hydraulics, groundwater chemistry, and solute transport. Includes introduction to advanced topics in porous media. Design projects and computer applications included.

Restriction: Graduate students only.

Concurrent with ENGRCEE 172.

**ENGRCEE 273. Watershed Modeling. 4 Units.**

Basic principles of hydrologic modeling are practiced. Concepts of watershed delineation, land use change impact, design studies, and GIS tools are discussed. Focus on the USACE (HEC) software tools (HEC-HMS and HEC-RAS) along with their associated GIS interfaces.

Restriction: Graduate students only.

Concurrent with ENGRCEE 173.

**ENGRCEE 274. Climate Data Analysis. 4 Units.**

Trend analysis; statistical indices for diagnosing and detecting changes in extremes; nonstationary processes; extreme value analysis; multivariate extreme value methods; tail dependence estimation; uncertainties in observed and projected changes in climate extremes.

**ENGRCEE 275. Topics in Coastal Engineering. 4 Units.**

Linear wave theory. Wave properties: particle kinematics, energy propagation, shoaling, refraction, reflection, diffraction, and breaking. Wave statistics and spectra. Selected topics from: design of coastal structures; harbor engineering; littoral transport and shoreline morphology; and hydrodynamics of estuaries.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ENGRCEE 276. Hydrology. 4 Units.**

Elements of the hydrologic cycle including precipitation, infiltration, evapotranspiration, ground water, and runoff. Unit Hydrograph theory and routing methods. Introduction to precipitation/runoff relationship and watershed modeling. Statistical methods and flood frequency analysis. Discussion section covers advanced topics.

Restriction: Graduate students only.

Concurrent with ENGRCEE 176.

**ENGRCEE 277. Hydrologic Transport Fundamentals. 4 Units.**

Process description, mathematical and numerical modeling of transport processes in surface and ground water. Topics include advection, molecular diffusion, Taylor dispersion, mechanical dispersion in porous media, shear flow dispersion in channels, and turbulent jets and plumes.

Restriction: Graduate students only.

**ENGRCEE 279. Environmental Transport Modeling. 4 Units.**

Computational modeling of multi-dimensional flow and scalar transport problems in surface and ground water. Topics include mathematical model formulation, numerical method selection, serial and parallel implementation, model verification and validation.

Restriction: Graduate students only.

**ENGRCEE 281. Structural Reliability. 4 Units.**

Applications of probability theory to reliability analysis of engineering structures. Theory of structural reliability. Estimation of static random loads. Reliability analysis of structural components and system. Monte Carlo simulation.

Restriction: Graduate students only.

**ENGRCEE 283. Mathematical Methods in Engineering Analysis. 4 Units.**

Matrices; vector calculus; eigenvalue problems; Fourier analysis; partial differential equations; special functions; numerical analysis; finite difference method.

**ENGRCEE 289. Analysis of Hydrologic Systems. 4 Units.**

Application of systems theory in hydrologic, land surface, biogeochemical modeling. Design, identification, and calibration of conceptual models. Principles of dynamic systems, modeling approaches, theory of linear systems, mathematical concepts of differential calculus, theoretical concepts of parameter estimation and optimization theory.

**ENGRCEE 290. Merging Models and Data. 4 Units.**

Introduction to optimization and data assimilation methods for model calibration and uncertainty quantification. Local, global and multi-method search. Bayesian analysis using Monte Carlo simulation with Random Walk Metropolis, and adaptive samplers. Filtering methods for recursive inference. Illustration using environmental models.

Restriction: Graduate students only.

**ENGRCEE 291. Hydrologic Remote Sensing. 4 Units.**

Introduction to principles of remote sensing and application in hydrology. Review of sensor systems, thermal and multispectral image processing, and image classification. Examples from remote sensing of hydrologic processes such as precipitation, soil moisture, and vegetation are covered.

Prerequisite: ENGRCEE 276

Restriction: Graduate students only.

**ENGRCEE 292. Wavelets in Hydrology, Engineering, and Geoscience. 4 Units.**

Multiscale analysis of hydrologic, engineering, and earth system processes; energy decomposition in the time-frequency domain via wavelets; applications to fluid flows, climate and mechanical signals for feature extraction, trend analysis, coherent structures, and upscaling/downscaling.

Restriction: Graduate students only.

**ENGRCEE 295. Seminars in Engineering. 1-4 Units.**

Seminars scheduled each year by individual faculty in major field of interest.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ENGRCEE 296. Master of Science Thesis Research. 1-16 Units.**

Individual research or investigation conducted in preparation of the thesis required for the M.S. degree in Engineering.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ENGRCEE 297. Doctor of Philosophy Dissertation Research. 1-16 Units.**

Individual research or investigation conducted in preparation for the dissertation required for the Ph.D. degree in Engineering.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ENGRCEE 298. Special Topics in Civil Engineering. 1-4 Units.**

Presentation of advanced topics and special research areas in civil engineering.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ENGRCEE 299. Individual Research. 1-16 Units.**

Individual research or investigation under the direction of an individual faculty member.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Computer Sci and Engineering Courses

**CSE 90. Systems Engineering and Technical Communications . 2 Units.**

Introduces systems engineering concepts, including specifications and requirements, hardware and software design, integration, testing, and documentation. Emphasizes organization and writing of reports and effective presentations.

Restriction: Computer Science Engineering Majors have first consideration for enrollment.

**CSE 112. Electronic Devices and Circuits. 4 Units.**

A first course in the design of Very Large Scale Integrated (VLSI) systems. Introduction to CMOS technology; MOS transistors and CMOS circuits. Analysis and synthesis of CMOS gates. Layout design techniques for building blocks and systems. Introduction to CAD tools.

(Design units: 4)

Prerequisite: PHYS 7D and (CSE 70A or EECS 70A)

Overlaps with EECS 119, EECS 170D.

Restriction: Computer Science Engineering Majors have first consideration for enrollment.

**CSE 199. Individual Study. 1-4 Units.**

Supervised independent reading, research, or design for undergraduate Engineering majors. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Repeatability: May be taken for credit for 8 units.

## Electrical Engr and Comp Sci Courses

**EECS 1. Introduction to Electrical Engineering and Computer Engineering. 1 Unit.**

Introduction to the fields of Electrical Engineering and Computer Engineering, including possible careers in both traditional and new emerging areas. Background on both the Electrical Engineering and the Computer Engineering majors, curriculum requirements, specializations, and faculty research interests.

(Design units: 0)

Restriction: Electrical Engineering Majors have first consideration for enrollment.

**EECS 10. Computational Methods in Electrical and Computer Engineering. 4 Units.**

An introduction to computers and structured programming. Binary Data Representation. Hands-on experience with a high-level structured programming language. Introduction to algorithm efficiency. Applications of structured programming in solving engineering problems. Programming laboratory.

(Design units: 0)

Corequisite: MATH 2A

Prerequisite: MATH 2A

Overlaps with EECS 12, ICS 31.

Restriction: Electrical Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment.

**EECS 12. Introduction to Programming. 4 Units.**

An introduction to computers and programming. Python programming syntax/style, types. Numbers and sequences. Control flow. I/O and errors/exceptions. Function calling, parameter passing, formal arguments, return values. Variable scoping. Programming laboratory.

(Design units: 0)

Corequisite: MATH 2A

Overlaps with EECS 10, ICS 31.

Restriction: Computer Engineering Majors have first consideration for enrollment.

**EECS 20. Computer Systems and C Programming. 4 Units.**

Introduction to computing systems. Data representation and operations. Simple logic design. Basic computer organization. Instruction set architecture and assembly language programming. Introduction to C. Functions and recursion, data structures, pointers. Programming laboratory.

(Design units: 1)

Prerequisite: EECS 12

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 22. Advanced C Programming. 3 Units.**

C language programming concepts. Control flow, function calls, recursion. Basic and composite data types, static and dynamic data structures. Program modules and compilation units. Preprocessor macros. C standard libraries.

(Design units: 1)

Prerequisite: EECS 10 or EECS 20

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 22L. Software Engineering Project in C Language. 3 Units.**

Hands-on experience with the ANSI-C programming language. Medium-sized programming projects, team work. Software specification, documentation, implementation, testing. Definition of data structures and application programming interface. Creation of program modules, linking with external libraries. Rule-based compilation, version control.

(Design units: 3)

Prerequisite: EECS 22

Restriction: Computer Engineering Majors have first consideration for enrollment.

**EECS 31. Introduction to Digital Systems. 4 Units.**

Digital representation of information. Specification, analysis, design and optimization of combinational and sequential logic, register-transfer components and register-transfer systems with datapaths and controllers. Introduction to high-level and algorithmic state-machines and custom processors.

(Design units: 2)

Prerequisite: ICS 31 or EECS 10 or EECS 12 or MAE 10

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 31L. Introduction to Digital Logic Laboratory. 3 Units.**

Introduction to common digital integrated circuits: gates, memory circuits, MSI components. Operating characteristics, specifications, applications. Design of simple combinational and sequential digital systems (arithmetic processors game-playing machines). Construction and debugging techniques using hardware description languages and CAD tools.

(Design units: 3)

Prerequisite: EECS 31 and (EECS 10 or EECS 12 or ICS 32)

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 40. Object-Oriented Systems and Programming. 4 Units.**

Primitive types and expressions. The class and method definition. Information hiding and encapsulation. Objects and reference. Overloading. Constructors. Inheritance basics. Programming with inheritance. Dynamic binding and polymorphism. Exception handling. An overview of streams and file input/output. Programming laboratory.

(Design units: 2)

Prerequisite: EECS 22L

Restriction: Computer Engineering Majors have first consideration for enrollment.

**EECS 50. Discrete-Time Signals and Systems. 4 Units.**

Analysis of discrete-time linear-time-invariant (DTLTI) systems in the time domain and using z-transforms. Introduction to techniques based on Discrete-Time, Discrete, and Fast Fourier Transforms. Examples of their application to digital signal processing and digital communications.

(Design units: 0)

Prerequisite: EECS 70A

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 55. Engineering Probability. 4 Units.**

Sets and set operations; nature of probability, sample spaces, fields of events, probability measures; conditional probability, independence, random variables, distribution functions, density functions, conditional distributions and densities; moments, characteristic functions, random sequences, independent and Markov sequences.

(Design units: 0)

Prerequisite: MATH 2D

Restriction: Computer Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment.

**EECS 70A. Network Analysis I. 4 Units.**

Modeling and analysis of electrical networks. Basic network theorems. Sinusoidal steady state and transient analysis of RLC networks and the impedance concept.

(Design units: 1)

Corequisite: MATH 3D

Prerequisite: PHYS 7D and (EECS 10 or EECS 12 or MAE 10 or ICS 31 or CEE 20)

Overlaps with MAE 60.

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**EECS 70B. Network Analysis II. 4 Units.**

Laplace transforms, complex frequency, and the s-plane. Network functions and frequency response, including resonance. Bode plots. Two-port network characterization.

(Design units: 1)

Corequisite: EECS 70LB

Prerequisite: (BME 60B or EECS 10 or EECS 12 or ICS 31 or CEE 20 or MAE 10) and EECS 70A

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**EECS 70LA. Network Analysis I Laboratory. 1 Unit.**

Laboratory to accompany EECS 70A.

(Design units: 0)

Corequisite: EECS 70A

Prerequisite: PHYS 7D and (EECS 10 or EECS 12 or BME 60B or CEE 20 or MAE 10)

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 70LB. Network Analysis II Laboratory. 1 Unit.**

Laboratory to accompany EECS 70B. Materials fee.

(Design units: 1)

Corequisite: EECS 70B

Prerequisite: (BME 60B or EECS 10 or EECS 12 or ICS 31 or CEE 20 or MAE 10) and EECS 70A

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 101. Introduction to Machine Vision. 3 Units.**

The use of digital computers for the analysis of visual scenes; image formation and sensing, color, segmentation, shape estimation, motion, stereo, pattern classification, computer architectures, applications. Computer experiments are used to illustrate fundamental principles.

(Design units: 2)

Prerequisite: EECS 150 or EECS 50

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 111. System Software. 4 Units.**

Multiprogramming, interrupt, processes, kernel, parallelism, critical sections, deadlocks, communication, multiprocessing, multilevel memory management, binding, name management, file systems, protection, resource allocation, scheduling. Experience with concurrent programming, synchronization mechanisms, interprocess communication.

(Design units: 2)

Prerequisite: EECS 112 and (ICS 46 or EECS 114)

Overlaps with CS 143A.

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 112. Organization of Digital Computers. 4 Units.**

Building blocks and organization of digital computers, the arithmetic, control, and memory units, and input/output devices and interfaces. Microprogramming and microprocessors.

(Design units: 4)

Prerequisite: EECS 31L

Overlaps with CS 152.

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 112L. Organization of Digital Computers Laboratory. 3 Units.**

Specification and implementation of a processor-based system using a hardware description language such as VHDL. Hands-on experience with design tools including simulation, synthesis, and evaluation using testbenches.

(Design units: 3)

Prerequisite: EECS 112

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 113. Processor Hardware/Software Interfaces. 4 Units.**

Hardware/software interfacing, including memory and bus interfaces, devices, I/O, and compiler code generation/instruction scheduling. Experience microcontroller programming and interfacing. Specific compiler code generation techniques including local variable and register allocations, instruction dependence and scheduling, and code optimization.

(Design units: 3)

Prerequisite: EECS 112

Restriction: Computer Engineering Majors have first consideration for enrollment. Computer Science and Engineering Majors have second consideration for enrollment.

**EECS 114. Engineering Data Structures and Algorithms. 4 Units.**

Introduces abstract behavior of classes data structures, alternative implementations, informal analysis of time and space efficiency. Also introduces classic algorithms and efficient algorithm design techniques (recursion, divide-and-conquer, branch-and-bound, dynamic programming).

(Design units: 2)

Prerequisite: EECS 40

Restriction: Computer Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 116. Introduction to Data Management. 4 Units.**

Introduction to the design of databases and the use of database management systems (DBMS) for applications. Topics include entity-relationship modeling for design, relational data model, relational algebra, relational design theory, and Structured Query Language (SQL) programming.

(Design units: 1)

Prerequisite: ICS 33 or CSE 43 or EECS 114. ICS 33 with a grade of C or better. CSE 43 with a grade of C or better

Same as CS 122A.

Restriction: Computer Science Engineering Majors have first consideration for enrollment. School of Info & Computer Sci students have first consideration for enrollment.

**EECS 117. Parallel Computer Systems. 3 Units.**

General introduction to parallel computing focusing on parallel algorithms and architectures. Parallel models: Flynn's taxonomy, dataflow models. Parallel architectures: systolic arrays, hypercube architecture, shared memory machines, dataflow machines, reconfigurable architectures. Parallel algorithms appropriate to each machine type area also discussed.

(Design units: 1)

Prerequisite: EECS 20 and EECS 114 and EECS 112

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 118. Introduction to Knowledge and Software Engineering. 4 Units.**

Introduction of basic concepts in knowledge engineering and software engineering. Knowledge representation and reasoning, search planning, software life cycle, requirements engineering, software design languages, declarative programming, testing, database and web programming.

(Design units: 2)

Prerequisite: EECS 40

Restriction: Computer Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 119. VLSI. 4 Units.**

Design techniques for Very Large Scale Integrated (VLSI) systems and chips. Review CMOS and related process technologies; primitives such as logic gates and larger design blocks; layout; floor planning; design hierarchy, component interfaces; use of associated CAD tools for design.

(Design units: 4)

Prerequisite: EECS 112 and EECS 170B

Overlaps with EECS 170D, CSE 112.

Restriction: Computer Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 120. Fundamentals of Parallel Computing. 4 Units.**

Fundamentals of parallel computing, focusing on parallel algorithms and architectures. Topics include design of parallel and I/O efficient algorithms, basics of parallel machine architectures, and current/emerging programming models (shared memory, distributed memory, and accelerators).

Prerequisite: (EECS 12 or CS 152) and EECS 114

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 121. System Security. 3 Units.**

Fundamentals and practices of system security. Topics include cryptographic (encryption, decryption, and message authentication), software vulnerabilities (buffer overflow), network security (layer 2-7 attacks and defenses and PKI), web security (XSS and XSRF), and privacy.

Prerequisite: EECS 22 or ICS 45C

**EECS 141A. Communication Systems I. 3 Units.**

Introduction to analog communication systems including effects of noise. Modulation-demodulation for AM, DSB-SC, SSB, VSB, QAM, FM, PM, and PCM with application to radio, television, and telephony. Signal processing as applied to communication systems.

(Design units: 1)

Prerequisite: EECS 55 and EECS 150

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 141B. Communication Systems II. 3 Units.**

Signal space analysis. Optimum receivers for digital communication. Maximum a posteriori and maximum likelihood detection. Matched filter and correlation receiver. PAM, QAM, PSK, FSK, and MSK and their performance. Introduction to equalization, synchronization, information theory, and error control codes.

(Design units: 1)

Prerequisite: EECS 141A

Restriction: Computer Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**EECS 144. Antenna Design for Wireless Communication Links. 4 Units.**

Analysis and synthesis of antennas and antenna arrays. Adaptive arrays and digital beam forming for advanced wireless links. Friis transmission formula. Wireless communication equations for cell-site and mobile antennas, interference, slow and fast fading in mobile communication.

(Design units: 0)

Prerequisite: EECS 180A

**EECS 145. Electrical Engineering Analysis. 4 Units.**

Vector calculus, complex functions, and linear algebra with applications to electrical engineering problems.

(Design units: 0)

Prerequisite: MATH 3D

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment. Computer Science Engineering majors have second consideration for enrollment.

**EECS 148. Computer Networks. 4 Units.**

Computer network architectures, protocols, and applications. Internet congestion control, addressing, and routing. Local area networks. Multimedia networking.

(Design units: 2)

Prerequisite: EECS 55 or STAT 67

Same as CS 132.

Restriction: Computer Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**EECS 150. Continuous-Time Signals and Systems. 4 Units.**

Characteristics and properties of continuous-time (analog) signals and systems. Analysis of linear time-invariant continuous-time systems using differential equation convolutional models. Analysis of these systems using Laplace transforms, Fourier series, and Fourier transforms. Examples from applications to telecommunications.

(Design units: 0)

Prerequisite: EECS 70A and EECS 145

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 152A. Digital Signal Processing. 3 Units.**

Nature of sampled data, sampling theorem, difference equations, data holds, z-transform, w-transform, digital filters, Butterworth and Chebychev filters, quantization effects.

(Design units: 2)

Prerequisite: EECS 50

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 152B. Digital Signal Processing Design and Laboratory. 3 Units.**

Design and implementation of algorithms on a DSP processor and using computer simulation. Applications in signal and image processing, communications, radar, etc.

(Design units: 3)

Prerequisite: EECS 152A

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 159A. Senior Design Project I. 3 Units.**

Teaches problem definition, detailed design, integration, and testability with teams of students specifying, designing, building, and testing complex systems. Lectures include engineering values, discussions, and ethical ramifications of engineering decisions.

(Design units: 3)

Prerequisite: EECS 113 or EECS 170C or CS 145

Restriction: Seniors only. Computer Science Engineering Majors only. Electrical Engineering Majors only. Computer Engineering Majors only.

**EECS 159B. Senior Design Project II. 3 Units.**

Teaches problem definition, detailed design, integration, and testability with teams of students specifying, designing, building, and testing complex systems. Lectures include engineering values, discussions, and ethical ramifications of engineering decisions. Materials fee.

(Design units: 3)

Prerequisite: EECS 159A

Restriction: Computer Science Engineering Majors only. Electrical Engineering Majors only. Computer Engineering Majors only.

**EECS 160A. Introduction to Control Systems. 4 Units.**

Modeling, stability, and specifications of feedback control systems. Root locus, Bode plots, Nyquist criteria, and state-space methods for dynamic analysis and design.

(Design units: 2)

Corequisite: EECS 160LA

Prerequisite: (EECS 10 or EECS 12 or MAE 10 or BME 60B or CEE 20) and EECS 150 and EECS 170B and EECS 170LB

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 160LA. Control Systems I Laboratory. 1 Unit.**

Laboratory accompanying EECS 160A. Materials fee.

(Design units: 1)

Corequisite: EECS 160A

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 163. Power Systems. 4 Units.**

Generation, transmission, and use of electrical energy. Fault calculation, protection, stability, and power flow.

(Design units: 1)

Corequisite: EECS 163L

Prerequisite: EECS 70B

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 163L. Power Systems Laboratory. 1 Unit.**

Experiments and field trips relevant to studies in power systems. Materials fee.

(Design units: 0)

Corequisite: EECS 163

Restriction: Computer Science Engineering Majors only. Electrical Engineering Majors only. Computer Engineering Majors only.

**EECS 166A. Industrial and Power Electronics. 4 Units.**

Power switching devices, pulse width modulation (PWM) methods, switching converter topologies, control, and magnetics. Materials fee.

(Design units: 2)

Prerequisite: EECS 170C and EECS 160A

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have second consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

Concurrent with EECS 267A.

**EECS 170A. Electronics I. 4 Units.**

The properties of semiconductors, electronic conduction in solids, the physics and operation principles of semiconductor devices such as diodes and transistors, transistor equivalent circuits, and transistor amplifiers.

(Design units: 1)

Corequisite: PHYS 7E

Prerequisite: PHYS 7D and EECS 70B

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 170B. Electronics II. 4 Units.**

Design and analysis of single-stage amplifiers, biasing circuits, inverters, logic gates, and memory elements based on CMOS transistors.

(Design units: 2)

Corequisite: EECS 170LB

Prerequisite: EECS 70B and EECS 170A and EECS 170LA

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 170C. Electronics III. 4 Units.**

Principles of operation, design, and utilization of integrated circuit modules, including multi-stage amplifiers, operational amplifiers, and logic circuits.

(Design units: 2)

Corequisite: EECS 170LC

Prerequisite: EECS 170B and EECS 170LB

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have second consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 170D. Integrated Electronic Circuit Design. 4 Units.**

Design and fabrication of modern digital integrated circuits. Fabrication of CMOS process, transistor-level design simulation, functional characteristics of basic digital integrated circuits, and different logic families including the static and dynamic logic, layout, and extraction of digital circuits.

(Design units: 4)

Prerequisite: EECS 170C and EECS 170LC

Overlaps with EECS 119, CSE 112.

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have second consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 170E. Analog and Communications IC Design. 4 Units.**

Advanced topics in design of analog and communications integrated circuits. Topics include: implementation of passive components in integrated circuits; overview of frequency response of amplifiers, bandwidth estimation techniques, high-frequency amplifier design; design of radio-frequency oscillators.

(Design units: 3)

Prerequisite: EECS 170C

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have second consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 170LA. Electronics I Laboratory. 1 Unit.**

Laboratory accompanying EECS 170A to perform experiments on semiconductor material properties, semiconductor device physics and operation principles, and transistor amplifiers to improve experimental skills and to enhance the understanding of lecture materials.

(Design units: 1)

Corequisite: EECS 170A and PHYS 7E

Prerequisite: PHYS 7D and EECS 70B

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**EECS 170LB. Electronics II Laboratory. 1 Unit.**

Laboratory accompanying EECS 170B.

(Design units: 1)

Corequisite: EECS 170B

Prerequisite: EECS 170A and EECS 170LA

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 170LC. Electronics III Laboratory. 1 Unit.**

Laboratory accompanying EECS 170C to provide hands-on training in design of digital/analog circuits/subsystems. Materials fee.

(Design units: 1)

Corequisite: EECS 170C

Prerequisite: EECS 170B and EECS 170LB

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have second consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 174. Semiconductor Devices. 4 Units.**

Metal-semiconductor junctions, diodes, bipolar junction transistors, MOS structures, MOSFETs, CMOS technology, LEDs, and laser diodes.

(Design units: 1)

Prerequisite: EECS 170A

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment. Materials Science Engineering Majors have second consideration for enrollment.

**EECS 176. Fundamentals of Solid-State Electronics and Materials. 4 Units.**

Physical properties of semiconductors and the roles materials play in device operation. Topics include: crystal structure, phonon vibrations, energy band, transport phenomenon, optical properties and quantum confinement effect essential to the understanding of electronic, optoelectronic and nanodevices.

(Design units: 1)

Prerequisite: EECS 170A

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**EECS 179. Microelectromechanical Systems (MEMS). 4 Units.**

Small-scale machines, small-scale phenomena, MEMS fabrication, MEMS CAD tools, MEMS devices and packaging, MEMS testing.

(Design units: 2)

Restriction: Upper-division students only. Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment.

**EECS 180A. Engineering Electromagnetics I. 4 Units.**

Electrostatics, magnetostatics, and electromagnetic fields: solutions to problems in engineering applications; transmission lines, Maxwell's equations and phasors, plane wave propagation, reflection, and transmission.

(Design units: 1)

Prerequisite: PHYS 7E and EECS 145

Restriction: Electrical Engineering Majors have first consideration for enrollment. Biomedical Engineering Majors have first consideration for enrollment. Materials Science Engineering Majors have first consideration for enrollment.

**EECS 180B. Engineering Electromagnetics II. 4 Units.**

Time-varying electromagnetic fields, plane waves, polarization, guidance of waves like rectangular waveguides and microstrips, optical fibers resonant cavities, skin effects and losses, spherical waves, radiation and reception of waves, antenna basics.

(Design units: 1)

Prerequisite: EECS 180A

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 180C. Engineering Electromagnetics III. 4 Units.**

Propagation in anisotropic media. Propagation in ferrites and non-reciprocal devices. Scattering and dispersion. Electromagnetic properties of materials. Scattering of small nanoparticles. Spherical waves. Cross section of large and small objects. Radar equation. Coherent and incoherent radiation.

(Design units: 0)

Prerequisite: EECS 180B

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment.

**EECS 182. Monolithic Microwave Integrated Circuit (MMIC) Analysis and Design. 4 Units.**

Design of microwave amplifiers including low-noise amplifiers, multiple stage amplifiers, power amplifiers, and introduction to broadband amplifiers. The goal is to provide the basic knowledge for the design of microwave amplifiers ranging from wireless system to radar system.

(Design units: 3)

Prerequisite: EECS 180A

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment.

**EECS 188. Optical Electronics. 4 Units.**

Photodiodes and optical detection, photometry and radiometry, geometric optics, lens theory, imaging system, EM wave propagation, optical waveguides and fibers, heterojunction structures, laser theory, semiconductor lasers, and optical transmission system.

(Design units: 1)

Prerequisite: EECS 180A

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 195. Special Topics in Electrical and Computer Engineering. 1-4 Units.**

Studies special topics in selected areas of Electrical and Computer Engineering. Topics addressed vary each quarter.

(Design units: 1-4)

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**EECS 198. Group Study. 1-4 Units.**

Group study of selected topics in Electrical and Computer Engineering.

(Design units: 1-4)

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**EECS 199. Individual Study. 1-4 Units.**

For undergraduate Engineering majors in supervised but independent reading, research, or design. Students taking Individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Repeatability: May be taken for credit for 8 units.

**EECS 199P. Individual Study. 1-4 Units.**

For undergraduate Engineering majors in supervised but independent reading, research, or design. Students taking individual study for design credit are to submit a written paper to the instructor and to the Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**EECS 202A. Principles of Imaging. 4 Units.**

Linear systems, probability and random processes, image processing, projecting imaging, tomographic imaging.

Same as PHYS 233A.

Restriction: Graduate students only.

Concurrent with PHYS 147A.

**EECS 202B. Techniques in Medical Imaging I: X-ray, Nuclear, and NMR Imaging. 4 Units.**

Ionizing radiation, planar and tomographic radiographic and nuclear imaging, magnetism, NMR, MRI imaging.

Prerequisite: EECS 202A

Same as PHYS 233B.

Restriction: Graduate students only.

Concurrent with PHYS 147B.

**EECS 202BP. Techniques in Medical Imaging: X-ray, Nuclear, and NMR Imaging. 4 Units.**

Ionizing radiation, planar and tomographic radiographic and nuclear imaging, magnetism, NMR, MRI imaging.

Restriction: Master of Engineering students only. Graduate students only.

**EECS 202C. Techniques in Medical Imaging II: Ultrasound, Electrophysiological, Optical. 4 Units.**

Sound and ultrasound, ultrasonic imaging, physiological electromagnetism, EEG, MEG, ECG, MCG, optical properties of tissues, fluorescence and bioluminescence, MR impedance imaging, MR spectroscopy, electron spin resonance and ESR imaging.

Prerequisite: EECS 202B

Same as PHYS 233C.

Restriction: Graduate students only.

Concurrent with PHYS 147C.

**EECS 203A. Digital Image Processing. 4 Units.**

Pixel-level digital image representation and elementary operations; Fourier and other unitary transforms; compression, enhancement, filtering, and restoration; laboratory experience is provided.

Restriction: Graduate students only.

**EECS 211. Advanced System Software. 4 Units.**

Study of operating systems including interprocess communication, scheduling, resource management, concurrency, reliability, validation, protection and security, and distributed computing support. System software design languages and modeling analysis.

Restriction: Graduate students only.

**EECS 211P. Advanced System Software. 4 Units.**

Study of operating systems including interprocess communication, scheduling, resource management, concurrency, reliability, validation, protection and security, and distributed computing support. System software design languages and modeling analysis.

Prerequisite: Recommended: Undergraduate-level knowledge of system software (e.g. EECS 111) and organization of digital computers (e.g. UCI EECS 112).

Restriction: Master of Engineering students only. Graduate students only.

**EECS 213. Computer Architecture. 4 Units.**

Problems in hardware, firmware (microprogram), and software. Computer architecture for resource sharing, real-time applications, parallelism, microprogramming, and fault tolerance. Various architectures based on cost/performance and current technology.

Restriction: Graduate students only.

**EECS 213P. Computer Architecture. 4 Units.**

Problems in hardware, firmware (microprogram), and software. Computer architecture for resource sharing, real-time applications, parallelism, microprogramming, and fault tolerance. Various architectures based on cost/performance and current technology.

Prerequisite: Recommended: Undergraduate-level knowledge of organization of digital computers (e.g. EECS 112 and EECS 112L).

Restriction: Master of Engineering students only. Graduate students only.

**EECS 215. Design and Analysis of Algorithms. 4 Units.**

Computer algorithms from a practical standpoint. Algorithms for symbolic and numeric problems such as sorting, searching, graphs, and network flow. Analysis includes algorithm time and space complexity.

**EECS 215P. Design and Analysis of Algorithms. 4 Units.**

Computer algorithms from a practical standpoint. Algorithms for symbolic and numeric problems such as sorting, searching, graphs, and network flow. Analysis includes algorithm time and space complexity.

Restriction: Master of Engineering students only. Graduate students only.

**EECS 216. Advanced Application of Algorithms. 4 Units.**

Medium-sized group and individual programming project. Topics include specification requirements documentation, practical implementation of algorithms, and testing/verification of design.

Prerequisite: Recommended: Undergraduate course work in engineering data structures and algorithms.

**EECS 217. VLSI System Design. 4 Units.**

Overview of integrated fabrication, circuit simulation, basic device physics, device layout, timing; MOS logic design; layout generation, module generation, techniques for very large scale integrated circuit design.

Restriction: Graduate students only.

**EECS 220. Advanced Digital Signal Processing Architecture. 4 Units.**

Study the latest DSP architectures for applications in communication (wired and wireless) and multimedia processing. Emphasis given to understanding the current design techniques and to evaluate the performance, power, and application domain of the latest DSP processors.

Prerequisite: EECS 213

Restriction: Graduate students only.

**EECS 220P. Advanced Digital Signal Processing Architecture. 4 Units.**

Study the latest DSP architectures for applications in communication (wired and wireless) and multimedia processing. Emphasis given to understanding the current design techniques and to evaluate the performance, power, and application domain of the latest DSP processors.

Prerequisite: EECS 213P

Restriction: Master of Engineering students only. Graduate students only.

**EECS 221. Topics in Computer Engineering. 4 Units.**

New research results in computer engineering.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EECS 222. Embedded System Modeling. 4 Units.**

Computational models for embedded systems. System-level specification and description languages. Concepts, requirements, examples. Embedded system models at different levels of abstraction. Modeling of test benches, design under test, IP components. Discrete event simulation, semantics, and algorithms. Formerly EECS 222A.

Restriction: Graduate students only.

**EECS 223. Real-Time Computer Systems. 4 Units.**

Time bases, clock synchronization, real-time communication protocols, specification of requirements, task scheduling. Validation of timelines, real-time configuration management.

Prerequisite: EECS 211 and EECS 213

Restriction: Graduate students only.

**EECS 223P. Real-Time Computer Systems. 4 Units.**

Time bases, clock synchronization, real-time communication protocols, specification of requirements, task scheduling. Validation of timelines, real-time configuration management.

Prerequisite: EECS 211P and EECS 213P

Restriction: Master of Engineering students only. Graduate students only.

**EECS 224. High-Performance Computing. 4 Units.**

Fundamentals of high-performance computing, covering both theory and practice. Topics include performance analysis and tuning, design of parallel and I/O efficient algorithms, basics of parallel machine architectures, and current/emerging programming models (shared memory, distributed memory, and accelerators).

Prerequisite: EECS 215 or CS 260

Restriction: Graduate students only.

**EECS 225. Embedded Systems Design. 4 Units.**

Embedded systems design flow and methodology. Design space exploration. Co-design of hardware and software, embedded architecture and network exploration and synthesis. System software/hardware interface generation. Real-time constraints, specification-to-architecture mapping, design tools and methodologies. Formerly EECS 222B.

Restriction: Graduate students only.

**EECS 226. Embedded System Software. 4 Units.**

Embedded system software concepts, requirements, examples, for engineering applications such as multi-media and automotive. Software generation methodology. Algorithmic specification, design constraints. Embedded operating systems. Static, dynamic, real-time scheduling. Input/output, interrupt handling. Code generation, compilation, instruction set simulation. Formerly EECS 222C.

Restriction: Graduate students only.

**EECS 227. Cyber-Physical System Design. 4 Units.**

Model-based design of cyber-physical systems including, e.g., plant, sensing, control, actuation, embedded hardware/software, communication, real-time analysis, various levels of simulation (MILS, SILS, HILS), tools and methodologies for automatic synthesis, and application from various interdisciplinary domains.

Restriction: Graduate students only.

**EECS 229. Low Power SoC Design. 4 Units.**

From an inverter to server centers, low-power design theory and practice in modern systems-on-chip (SoC), energy efficient design time and runtime methods are surveyed at circuit, RTL, and architecture levels. Lab assignments will help students quantify tradeoffs and design practices.

Prerequisite: EECS 217

Restriction: Graduate students only.

**EECS 230. Energy Efficiency. 4 Units.**

Green energy sources for production, transmission, storage, and utilization of electricity, with a special focus on solar, wind, and nuclear energy production. Study of newly developed renewable sources of energy including capital cost, product cost, environmental issues, and technical feasibility.

**EECS 231. Advanced System Security. 4 Units.**

Advanced study about system security. Topics include software vulnerabilities (buffer overflow), vulnerability discovery (fuzzing), network security, side-channel analysis (power analysis and micro-architecture attacks), machine-learning security, IoT security, and privacy (differential privacy).

Restriction: Graduate students only.

**EECS 240. Random Processes. 4 Units.**

Extensions of probability theory to random variables varying with time. General properties of stochastic processes. Convergence. Estimation, including nonlinear and linear minimum mean square error and maximum likelihood. Spectral density and linear filters. Poisson processes and discrete-time Markov chains.

Restriction: Graduate students only.

**EECS 240P. Random Processes. 4 Units.**

Extensions of probability theory to random variables varying with time. General properties of stochastic processes. Convergence. Estimation, including nonlinear and linear minimum mean square error and maximum likelihood. Spectral density and linear filters. Poisson processes and discrete-time Markov chains.

Prerequisite: Recommended: Knowledge of engineering probability (e.g. EECS 55).

Restriction: Master of Engineering students only. Graduate students only.

**EECS 241A. Digital Communications I. 4 Units.**

Concepts and applications of digital communication systems. Baseband digital transmission of binary, multi-amplitude, and multidimensional signals. Introduction to and performance analysis of different modulation schemes.

**EECS 241AP. Digital Communications I. 4 Units.**

Concepts and applications of digital communication systems. Baseband digital transmission of binary, multi-amplitude, and multidimensional signals. Introduction to and performance analysis of different modulation schemes.

Restriction: Master of Engineering students only. Graduate students only.

**EECS 241B. Digital Communications II. 4 Units.**

Concepts and applications of equalization, multi-carrier modulation, spread spectrum and CDMA. Digital communications through fading memory channels.

Prerequisite: EECS 241A

Restriction: Graduate students only.

**EECS 241BP. Digital Communications II. 4 Units.**

Concepts and applications of equalization, multi-carrier modulation, spread spectrum, and CDMA. Digital communications through fading memory channels.

Prerequisite: EECS 241AP

Restriction: Master of Engineering students only. Graduate students only.

**EECS 242. Information Theory. 4 Units.**

Fundamental capabilities and limitations of information sources and information transmission systems. Analytical framework for modeling and evaluating communication systems: entropy, mutual information asymptotic equipartition property, entropy rates of a stochastic process, data compression, channel capacity, differential entropy, the Gaussian channel.

Prerequisite: EECS 240

**EECS 243. Error Correcting Codes. 4 Units.**

Different techniques for error correcting codes and analyzing their performance. Linear block codes; cyclic codes; convolutional codes. Minimum distance; optimal decoding; Viterbi decoding; bit error probability. Coding gain; trellis coded modulation.

Prerequisite: EECS 240

Restriction: Graduate students only.

**EECS 244. Wireless Communications. 4 Units.**

Introduction to wireless communications systems. Wireless channel modeling. Single carries, spread spectrum, and multi-carrier wireless modulation schemes. Diversity techniques. Multiple-access schemes. Transceiver design and system level tradeoffs. Brief overview of GSM, CDMA, (IS-95) and 2.5, 3G cellular schemes.

Prerequisite: EECS 241B

Restriction: Graduate students only.

**EECS 244P. Wireless Communications. 4 Units.**

Introduction to wireless communications systems. Wireless channel modeling. Single carries, spread spectrum, and multi-carrier wireless modulation schemes. Diversity techniques. Multiple-access schemes. Transceiver design and system level tradeoffs. Brief overview of GSM, CDMA, (IS-95) and 2.5, 3G cellular schemes.

Prerequisite: EECS 241BP

Restriction: Master of Engineering students only. Graduate students only.

**EECS 245. Space-Time Coding. 4 Units.**

A fundamental study of: Capacity of MIMO Channels, space-time code design criteria, space-time block codes, space-time trellis codes, differential detection for multiple antennas, spatial multiplexing, BLAST.

Prerequisite: EECS 242

Restriction: Graduate students only.

**EECS 247. Information Storage. 4 Units.**

Storage architecture, storage network and networking algorithms in data centers, principle of storage devices and non-volatile memory, data consistency, data availability and integrity, power management.

Restriction: Graduate students only.

**EECS 248A. Computer and Communication Networks. 4 Units.**

Network architecture of the Internet, telephone networks, cable networks, and cell phone networks. Network performance models. Network performance models. Advanced concepts and implementations of flow and congestion control, addressing, internetworking, forwarding, routing, multiple access, streaming, and quality-of-service.

Prerequisite: EECS 148 or CS 132

Same as CS 232, NSYS 201.

Restriction: Graduate students only.

**EECS 250. Digital Signal Processing I. 4 Units.**

Fundamental principles of digital signal processing, sampling, decimation and interpolation, discrete Fourier transforms and FFT algorithms, transversal and recursive filters, discrete random processes, and finite-word effects in digital filters.

Restriction: Graduate students only.

**EECS 250P. Digital Signal Processing I. 4 Units.**

Fundamental principles of digital signal processing, sampling, decimation and interpolation, discrete Fourier transforms and FFT algorithms, transversal and recursive filters, discrete random processes, and finite-word effects in digital filters.

Prerequisite: Recommended: Knowledge of digital signal processing (e.g. EECS 152A).

Restriction: Master of Engineering students only. Graduate students only.

**EECS 251A. Detection, Estimation, and Demodulation Theory. 4 Units.**

Fundamentals of hypothesis testing and Bayes and Maximum Likelihood Estimation. ARMA and state variable models for random time series analysis. Wiener and Kalman filtering and prediction. Adaptive algorithms for identification and tracking of parameters of time-varying models.

Prerequisite: EECS 240

**EECS 251B. Detection, Estimation, and Demodulation Theory. 4 Units.**

Fundamentals of hypothesis testing and Bayes and Maximum Likelihood Estimation. ARMA and state variable models for random time series analysis. Wiener and Kalman filtering and prediction. Adaptive algorithms for identification and tracking of parameters of time-varying models.

Prerequisite: EECS 240

**EECS 260A. Linear Systems I. 4 Units.**

State-space representation of continuous-time and discrete-time linear systems. Controllability, observability, stability. Realization of rational transfer functions.

Restriction: Graduate students only.

**EECS 261A. Linear Optimization Methods. 4 Units.**

Formulation, solution, and analysis of linear programming and linear network flow problems. Simplex methods, dual ascent methods, interior point algorithms, and auction algorithms. Duality theory and sensitivity analysis. Shortest path, max-flow, assignment, and minimum cost flow problems.

Restriction: Graduate students only.

**EECS 267A. Industrial and Power Electronics. 4 Units.**

Power switching devices, pulse width modulation (PWM) methods, switching converter topologies, control, and magnetics. Materials fee.

Restriction: Graduate students only.

Concurrent with EECS 166A.

**EECS 267B. Topics in Industrial and Power Electronics. 4 Units.**

Practical design of switching converters, electromagnetic compatibility, thermal management, and/or control methods.

Prerequisite: EECS 267A

Restriction: Graduate students only.

**EECS 270A. Advanced Analog Integrated Circuit Design I. 4 Units.**

Basic transistor configurations; differential pairs; active load/current sources; supply/temperature-independent biasing; op-amp gain and output stages; amplifier frequency response and stability compensation; nonidealities in op-amps; noise and dynamic range in analog circuits.

Restriction: Graduate students only.

**EECS 270AP. Advanced Analog Integrated Circuit Design I. 4 Units.**

Basic transistor configurations; differential pairs; active load/current sources; supply/temperature-independent biasing; op-amp gain and output stages; amplifier frequency response and stability compensation; nonidealities in op-amps; noise and dynamic range in analog circuits.

Prerequisite: Recommended: Introductory knowledge of control systems (e.g. EECS 160A) and electronics (e.g. EECS 170C).

Restriction: Master of Engineering students only. Graduate students only.

**EECS 270B. Advanced Analog Integrated Circuit Design II. 4 Units.**

Advanced transistor modeling issues; discrete-time and continuous-time analog Integrated Circuit (IC) filters; phase-locked loops; design of ICs operating at radio frequencies; low-voltage/low-power design techniques; A/D and D/A converters; AGC circuits.

Prerequisite: EECS 270A

Restriction: Graduate students only.

**EECS 270BP. Advanced Analog Integrated Circuit Design II. 4 Units.**

Advanced transistor modeling issues; discrete-time and continuous-time analog Integrated Circuit (IC) filters; phase-locked loops; design of ICs operating at radio frequencies; low-voltage/low-power design techniques; A/D and D/A converters; AGC circuits.

Prerequisite: EECS 270AP

Restriction: Master of Engineering students only. Graduate students only.

**EECS 270C. Design of Integrated Circuits for Broadband Applications. 4 Units.**

Topics include: broadband standards and protocols; high-frequency circuit design techniques; PLL theory and design; design of transceivers; electrical/optical interfaces.

Prerequisite: EECS 270A

Restriction: Graduate students only.

**EECS 270D. Radio-Frequency Integrated Circuit Design. 4 Units.**

Topics include: RF component modeling; matching network design; transmission line theory/modeling; Smith chart and S-parameters; noise modeling of active and passive components; high-frequency amplifier design; low-noise amplifier (LNA) design; mixer design; RF power amplifier.

Prerequisite: EECS 270A

Restriction: Graduate students only.

**EECS 270DP. Radio-Frequency Integrated Circuit Design. 4 Units.**

Topics include RF component modeling; matching network design; transmission line theory/modeling; Smith chart and S-parameters; noise modeling of active and passive components; high-frequency amplifier design; low-noise amplifier (LNA) design; mixer design; RF power amplifier.

Prerequisite: EECS 270AP

Restriction: Master of Engineering students only. Graduate students only.

**EECS 270E. High Frequency (Millimeter-Wave and Terahertz) Circuits. 4 Units.**

Discussion of the new methodologies, circuits, and systems developed at mm-wave and terahertz frequency ranges due to the growing interest in high speed communication and high frequency signal generation.

Restriction: Graduate students only.

**EECS 272. Topics in Electrical Engineering. 4 Units.**

New research results in electronic system design.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EECS 275A. Very Large Scale Integration (VLSI) Project. 4 Units.**

Students create VLSI design projects from conception through architecture, floor planning, detailed design, simulation, verification, and submission for project fabrication. Emphasis on practical experience in robust VLSI design techniques. (Successful students are expected to take EECS 275B.).

Restriction: Graduate students only.

**EECS 275B. Very Large Scale Integration (VLSI) Project Testing. 4 Units.**

Test and document student-created Complementary Metal Oxide Semiconductor (CMOS) Very Large Scale Integration (VLSI) projects designed in EECS 275A. Emphasis on practical laboratory experience in VLSI testing techniques. Materials fee.

Prerequisite: EECS 275A

Restriction: Graduate students only.

**EECS 277A. Advanced Semiconductor Devices I. 4 Units.**

Advanced complementary metal-oxide-semiconductor field-effect transistors (CMOSFET), device scaling, device modeling and fabrication, equivalent circuits, and their applications for digital, analog, RF.

Restriction: Graduate students only.

**EECS 277B. Advanced Semiconductor Devices II. 4 Units.**

Metal-semiconductor field-effect transistors (MESFET), heterojunction bipolar transistors (HBT), microwave semiconductor devices, equivalent circuits, device modeling and fabrication, microwave amplifiers, transmitters, and receivers.

Restriction: Graduate students only.

**EECS 277C. Nanotechnology. 4 Units.**

Fabrication and characterization techniques of electrical circuit elements at the nanometer scale. Quantized conductance, semiconductor quantum dots, single electron transistors, molecular wires, carbon nanotubes, self-assembly of nano-circuit elements, quantum methods of information processing.

Restriction: Graduate students only.

**EECS 278. Micro-System Design. 4 Units.**

Covers the fundamentals of the many disciplines needed for design of Micro-Electro-Mechanical Systems (MEMS): microfabrication technology, structural mechanics on micro-scale, electrostatics, circuit interface, control, computer-aided design, and system integration.

Same as MAE 247.

Restriction: Graduate students only.

**EECS 279. Micro-Sensors and Actuators. 4 Units.**

Introduction to the technology of Micro-Electro-Mechanical Systems (MEMS). Fundamental principles and applications of important microsensors, actuation principles on microscale. Introduction to the elements of signal processing; processing of materials for micro sensor/actuator fabrication; smart sensors and microsensor/microactuator array devices.

Same as MAE 249.

Restriction: Graduate students only.

**EECS 280A. Advanced Engineering Electromagnetics I. 4 Units.**

Stationary electromagnetic fields, Maxwell's equations, circuits and transmission lines, plane waves, guided waves, and radiation.

Restriction: Graduate students only.

**EECS 280AP. Advanced Engineering Electromagnetics I. 4 Units.**

Stationary electromagnetic fields, Maxwell's equations, circuits and transmission lines, plane waves, guided waves, and radiation.

Prerequisite: Recommended: Knowledge of engineering electromagnetics (e.g. EECS 180A)

Restriction: Master of Engineering students only. Graduate students only.

**EECS 280B. Advanced Engineering Electromagnetics II. 4 Units.**

Two- and three-dimensional boundary value problems, dielectric waveguides and other special waveguides, microwave networks and antenna arrays, electromagnetic properties of materials, and electromagnetic optics.

Prerequisite: EECS 280A

Restriction: Graduate students only.

**EECS 282. Monolithic Microwave Integrated Circuit (MMIC) Analysis and Design II. 4 Units.**

Design of microwave amplifiers using computer-aided design tools. Covers low-noise amplifiers, multiple stage amplifiers, broadband amplifiers, and power amplifiers. Hybrid circuit design techniques including filters and baluns. Theory and design rules for microwave oscillator design.

Restriction: Graduate students only.

**EECS 284P. RF Antenna Design . 4 Units.**

Advanced transmission line design, radiation of electromagnetic waves, dipole antennas, antenna arrays, advanced antenna designs, and practical design considerations in communications systems. Course is supplemented by RF design tools and modeling.

Prerequisite: EECS 280AP

Restriction: Master of Engineering students only. Graduate students only.

**EECS 285A. Optical Communications. 4 Units.**

Introduction to fiber optic communication systems, optical and electro-optic materials, and high-speed optical modulation and switching devices.

Restriction: Graduate students only.

**EECS 285AP. Optical Communications. 4 Units.**

Introduction to fiber optic communication systems, optical and electro-optic materials, and high-speed optical modulation and switching devices.

Prerequisite: Undergraduate-level Engineering Electromagnetics I (e.g. EECS E80A).

Restriction: Master of Engineering students only. Graduate students only.

**EECS 285B. Lasers and Photonics. 4 Units.**

Covers the fundamentals of lasers and applications, including Gaussian beam propagation, interaction of optical radiation with matters, and concepts of optical gain and feedback. Applications are drawn from diverse fields of optical communication, signal processing, and material diagnosis.

Prerequisite: Undergraduate course work in electromagnetic theory and atomic physics.

**EECS 285C. Nano Imaging. 4 Units.**

Theory and practice of modern nanoscale imaging techniques and applications. Traces the development of microscopy from ancient times to modern day techniques used for visualizing the nano-world from atoms to molecules including hands-on experience in the laboratory.

Restriction: Graduate students only.

**EECS 290. Curricular Practical Training. 1 Unit.**

Curricular practical training. Students will go through practical training under an industry mentor in a technical field corresponding to their concentration area.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EECS 292. Preparation for M.S. Comprehensive Examination. 1-8 Units.**

Individual reading and preparation for the M.S. comprehensive examination.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EECS 293. Preparation for Ph.D. Preliminary Examination. 1-8 Units.**

Individual reading and preparation for the Ph.D. preliminary examination.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EECS 294. Electrical Engineering and Computer Science Colloquium. 1 Unit.**

Invited speakers discuss their latest research results in electrical engineering and computer science.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EECS 295. Seminars in Engineering. 1-4 Units.**

Scheduled each year by individual faculty in major field of interest.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EECS 295P. Special Topics in Electrical Engineering and Computer Science. 4 Units.**

Studies in selected areas of Electrical Engineering. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Master of Engineering students only. Graduate students only.

**EECS 296. Master of Science Thesis Research. 1-16 Units.**

Individual research or investigation conducted in the pursuit of preparing and completing the thesis required for the M.S. degree in Engineering.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EECS 297. Doctor of Philosophy Dissertation Research. 1-16 Units.**

Individual research or investigation conducted in preparing and completing the dissertation required for the Ph.D. degree in Engineering.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EECS 298. Topics in Electrical Engineering and Computer Science. 4 Units.**

Study of Electrical and Computer Engineering concepts.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EECS 299. Individual Research. 1-16 Units.**

Individual research or investigation under the direction of an individual faculty member.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Engineering Courses

**ENGR 1A. General Chemistry for Engineers. 4 Units.**

Emphasis on solid-state chemistry. Quantum theory, atomic structure, periodic trends, chemical bonding, molecular orbitals, electronic band structure, gases, liquids, intermolecular forces, unit cells, crystal lattices, phase transformations, and electrochemistry.

(Design units: 0)

Prerequisite: AP Chemistry or SAT Subject Chemistry or SAT Mathematics or ACT Mathematics. AP Chemistry with a minimum score of 3. SAT Subject Chemistry with a minimum score of 600. SAT Mathematics with a minimum score of 600. ACT Mathematics with a minimum score of 27. A score of 85 or higher on the Engineering Chemistry Placement Exam (fee required) is also accepted.

Overlaps with CHEM 1A.

Restriction: Electrical Engineering Majors have first consideration for enrollment. Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Materials Science Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**(II)**

**ENGR 7A. Introduction to Engineering I. 2 Units.**

Introduction to engineering disciplines and the design process. Students enrolled in the online lecture also attend a three-hour lab on campus. Materials fee.

(Design units: 1)

Grading Option: In Progress (Letter Grade with P/NP).

Restriction: Lower-division students only. School of Engineering students have first consideration for enrollment.

**ENGR 7B. Introduction to Engineering II. 2 Units.**

Introduction to engineering disciplines and the design process. Students enrolled in the online lecture also attend a three-hour lab on campus. Materials fee.

(Design units: 2)

Prerequisite: ENGR 7A

Restriction: Lower-division students only. School of Engineering students have first consideration for enrollment.

**ENGR 30. Statics. 4 Units.**

Addition and resolution of forces, distributed forces, equivalent system of forces centroids, first moments, moments and products on inertia, equilibrium of rigid bodies, trusses, beams, cables. Course may be offered online.

(Design units: 0)

Corequisite: MATH 2D

Prerequisite: MATH 2D and PHYS 7C

Same as CEE 30, MAE 30.

Restriction: School of Engineering students have first consideration for enrollment.

**ENGR 54. Principles of Materials Science and Engineering. 4 Units.**

Superconductors to biodegradable polymers. Structure and properties of materials, including metal, ceramics, polymers, semiconductors, composites, traditional materials. Atomic structure, bonding, defects, phase equilibria, mechanical properties, electrical, optical and magnetic properties. Introduction to materials processing and synthesis. Materials fee.

(Design units: 0)

Prerequisite: (ENGR 1A or CHEM 1A or CHEM H2A) and PHYS 7C

Restriction: School of Engineering students have first consideration for enrollment.

**ENGR 80. Dynamics. 4 Units.**

Introduction to the kinematics and dynamics of particles and rigid bodies. The Newton-Euler, Work/Energy, and Impulse/Momentum methods are explored for ascertaining the dynamics of particles and rigid bodies. An engineering design problem using these fundamental principles is also undertaken.

(Design units: 0.5)

Prerequisite: MATH 2D and PHYS 7C

Same as CEE 80, MAE 80.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGR 92. Engineering and Computer Educational Laboratory. 1-4 Workload Units.**

Comprehensive academic support designed primarily for underrepresented or underprepared students in Engineering, ICS, or selected areas of the physical sciences. Typical program activities: tutoring, study skills, career planning, self-esteem enhancement, library research techniques.

(Design units: 0)

Grading Option: Workload Credit P/NP Only.

Repeatability: May be taken for credit for 12 units.

**ENGR 93. Public and Professional Service in Engineering. 1-2 Workload Units.**

Student participation in public and professional service activities related to engineering.

(Design units: 0)

Grading Option: Workload Credit P/NP Only.

Repeatability: May be repeated for credit unlimited times.

**ENGR 98. Group Study . 1-4 Units.**

Group study of selected topics in engineering.

(Design units: 1-4)

Repeatability: Unlimited as topics vary.

**ENGR 100. Special Topics in Fabrication Safety. 1 Workload Unit.**

Hands on training in the safe use of item fabrication: metalworking, woodworking, electronics fabrication, composites, welding, adhesives, water disposal, and others. Safety certification will be granted from this course and is required for access to Engineering School fabrication facilities.

(Design units: 0)

Grading Option: Workload Credit Letter Grade with P/NP.

Repeatability: Unlimited as topics vary.

Restriction: School of Engineering students have first consideration for enrollment.

**ENGR 150. Mechanics of Structures. 4 Units.**

Stresses and strains. Torsion. Bending. Beam deflection. Shear force and moment distributions in beams. Yielding and buckling of columns. Combined loading. Transformation of stresses and strain. Yielding criteria. Finite elements analysis of frames. Dynamic of two-bar truss.

(Design units: 2)

Prerequisite: (CEE 30 or ENGR 30 or MAE 30) and MATH 3A

Same as MAE 150.

Overlaps with CEE 150.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**ENGR 165. Advanced Manufacturing. 4 Units.**

Principles in manufacturing processes. All machining requires energy: mechanical (cutting and shaping), heat energy (laser cutting), photochemical (photolithography), chemical energy (electro chemical machining and chemical vapor deposition). These methods and their fundamentals are examined. Materials fee.

(Design units: 2)

Restriction: Seniors only. School of Engineering students only.

Concurrent with ENGR 265.

**ENGR 180. Entrepreneurship for Scientists and Engineers. 4 Units.**

Learn the theory and practice of entrepreneurship and intrapreneurship. Covers positioning an idea, establishing the value propositions and benefits case, going to market strategy, creating an execution plan, and raising funds. Concepts are applied to a real-world venture project.

(Design units: 0)

Restriction: Upper-division students only. School of Engineering students have first consideration for enrollment.

Concurrent with ENGR 280.

**ENGR 189. Senior Project - Topics Vary. 1-4 Units.**

Multidisciplinary group senior project of theoretical or applied nature involving design.

(Design units: 1-4)

Repeatability: May be taken for credit for 12 units as topics vary.

Restriction: Seniors only.

**ENGR 190W. Communications in the Professional World. 4 Units.**

Upper-division technical writing course including the development of presentation skills. Effective communication with a range of audiences. Recognition of ethical and professional responsibilities for engineers.

(Design units: 0)

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: School of Engineering students only. Graduating seniors with an application on file have first consideration.

**(Ib)**

**ENGR 191. Curricular Practical Training. 1 Unit.**

Practical training under an industry mentor in a technical field corresponding to students' area of interest.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**ENGR 195. Special Topics in Engineering. 1-4 Units.**

Studies in selected areas of Engineering. Topics addressed vary each quarter.

(Design units: 1-4)

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**ENGR 196W. Engineering Thesis. 4 Units.**

Preparation of final presentation and paper describing individual research in Engineering completed in one or more quarters of individual study (i.e., ENGR 199).

(Design units: 0)

Prerequisite: Completion of at least 4 units of Individual Research in Engineering. Satisfactory completion of the Lower-Division Writing requirement.

**(Ib)**

**ENGR H196W. Honors Thesis. 4 Units.**

Preparation of final presentation and paper describing individual research in Engineering. For participants in the Campuswide Honors Program.

(Design units: 1-4)

Prerequisite: ENGR H199. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Campuswide Honors Collegium students only.

**(Ib)**

**ENGR 199. Individual Study. 1-4 Units.**

Supervised independent reading, research, or design for undergraduate Engineering majors. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Repeatability: May be taken for credit for 8 units.

Restriction: School of Engineering students only.

**ENGR 199P. Individual Study. 1-4 Units.**

Supervised independent reading, research, or design for undergraduate Engineering majors. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**ENGR H199. Individual Study for Honors Students. 1-5 Units.**

Supervised research in Engineering for participants in the Campuswide Honors Program. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-5)

Repeatability: May be repeated for credit unlimited times.

Restriction: Campuswide Honors Collegium students only.

**ENGR 200AP. Entrepreneurship Science and Engineering: Innovation. 4 Units.**

Teaches concepts on how to develop innovate/disruptive ideas through actual delivery and adoption. Focuses on the critical thinking skills, the process of developing an idea into a product/service, and teaching a framework to foster adoption of the idea and product.

Restriction: Master of Engineering students only. Graduate students only.

**ENGR 200BP. Entrepreneurship Science and Engineering: Build. 4 Units.**

Learn how to build an executable plan to transform an idea into a product. Learn how to construct a go-to market plan, raise funds for building the product, and leverage ecosystem resources to fill in resource gaps.

Restriction: Master of Engineering students only. Graduate students only.

**ENGR 200CP. Entrepreneurship Science and Engineering: Launch. 4 Units.**

Understand how to build an actual product. Learn about prototyping and basic project management skills. Learn a framework on when to pivot for course corrections. Identify how to define outcome metrics and measure progress as the product is launched.

Restriction: Master of Engineering students only. Graduate students only.

**ENGR 210P. Capstone Project . 4 Units.**

Students are required to complete a project that deals with a specific emphasis of their Master of Engineering concentration/specialization.

Repeatability: May be taken for credit 4 times.

Restriction: Master of Engineering students only. Graduate students only.

**ENGR 265. Advanced Manufacturing. 4 Units.**

Principles in manufacturing processes. All machining requires energy: mechanical (cutting and shaping), heat energy (laser cutting), photochemical (photolithography), chemical energy (electro chemical machining and chemical vapor deposition). These methods and their fundamentals are examined. Materials fee.

Restriction: Graduate students only. School of Engineering students only.

Concurrent with ENGR 165.

**ENGR 280. Entrepreneurship for Scientists and Engineers. 4 Units.**

Learn the theory and practice of entrepreneurship and intrapreneurship. Covers positioning an idea, establishing the value propositions and benefits case, going to market strategy, creating an execution plan, and raising funds. Concepts are applied to a real-world venture project.

Restriction: School of Engineering students have first consideration for enrollment. Graduate students only.

Concurrent with ENGR 180.

**ENGR 290. Developing Teaching Excellence. 4 Units.**

Introduces the Scholarship of Teaching and Learning (SoTL) as it applies to Engineering Education. Focuses on how teaching practice can be guided by the research literature on teaching and learning.

Restriction: Graduate students only.

**ENGR 291. Internship. 1 Unit.**

Practical training under an industry mentor in a technical field corresponding to the student's area of interest.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ENGR 295. Special Topics in Engineering. 1-4 Units.**

Studies in selected areas of Engineering. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ENGR 296. Master of Science Thesis Research. 1-16 Units.**

Individual research or investigation conducted in the pursuit of preparing and completing the thesis required for the M.S. in Engineering.

Repeatability: May be repeated for credit unlimited times.

**ENGR 297. Doctor of Philosophy Dissertation Research. 1-16 Units.**

Individual research or or investigation conducted in the pursuit of preparing and completing the dissertation required for the Ph.D. in Engineering.

Repeatability: May be repeated for credit unlimited times.

**ENGR 299. Individual Research. 1-16 Units.**

Individual research or investigation under the direction of an individual faculty.

Repeatability: May be repeated for credit unlimited times.

**ENGR 399. University Teaching. 4 Units.**

University teaching with Engineering faculty.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Teaching assistants only.

## Materials Science and Engineering Courses

**MSE 60. Laboratory in Synthesis and Characterization of Materials. 4 Units.**

Synthesis and characterization of ceramic, polymer, and semiconductor materials. Connect the process, structure, properties, and performance to materials science knowledge in a hands-on laboratory setting. Materials fee.

Prerequisite: ENGR 54 and CHEM 1C

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

**MSE 69. Electronic and Optical Properties in Materials. 4 Units.**

Covers the electronic, optical, and dielectric properties of crystalline and amorphous materials to provide a foundation of the underlying physical principles governing the properties of existing and emerging electronic and photonic materials.

Prerequisite: PHYS 7D and PHYS 7E and (MATH 3A or ICS 6N) and MATH 3D and ENGR 54

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

**MSE 141. Nano-Scale Materials and Applications. 4 Units.**

Overview of the chemistry, physics, and applications of nanometer-scale materials. Explore the effects of composition, bonding, and confinement on physical properties of nanomaterials, their chemical syntheses, and their device physics in electronic, optoelectronic, and energy technologies.

Prerequisite: (ENGR 1A or CHEM 1A or CHEM H2A) and ENGR 54 and MSE 69

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

Concurrent with MSE 241.

**MSE 151. Polymeric Materials. 4 Units.**

An introduction to physical aspects of polymers, including polymer molecular size and configuration, solution and bulk phase structural properties, mechanical properties including viscoelasticity and rheology, polymer synthesis methods, characterization techniques, processing methods, and examples from existing and emerging polymeric materials.

Prerequisite: ENGR 54 and (MSE 165A or CBE 40C or MAE 91)

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

**MSE 155. Mechanical Behavior and Design Principles. 4 Units.**

Principles governing structure and mechanical behavior of materials, relationship relating microstructure and mechanical response with application to elasticity, plasticity, yielding, necking, creep, and fracture of materials. Introduction to experimental techniques to characterize the properties of materials. Design parameters.

Prerequisite: ENGR 54

Same as MAE 156.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Aerospace Engineering majors have second consideration for enrollment.

**MSE 155L. Mechanical Behavior Laboratory. 1 Unit.**

Introduction to experimental techniques to characterize mechanical properties of materials. Emphasis on correlations between property and microstructure. Experiments include: plastic stability in tension, effect of grain size on flow stress, microstructural engineering. Materials fee.

Corequisite: MSE 155

Prerequisite: ENGR 54

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

**MSE 158. Ceramic Materials for Sustainable Energy. 4 Units.**

A technical elective for students interested in materials. Topics covered include structure and properties of ceramic materials, and design for sustainable energy applications.

Prerequisite: ENGR 54

Restriction: Materials Science and Engr Majors have first consideration for enrollment. Chemical Engineering majors have second consideration for enrollment.

**MSE 163. Computer Techniques in Experimental Research. 4 Units.**

Principles and practical guidelines of automated materials testing. Computer fundamentals, programming languages, data acquisition and control hardware, interfacing techniques, programming strategies, data analysis, data storage, safeguard procedures.

Restriction: Materials Science and Engr Majors have first consideration for enrollment. Chemical Engineering majors have second consideration for enrollment.

**MSE 164. X-ray Diffraction, Electron Microscopy, and Microanalysis. 4 Units.**

Material characterization using X-ray diffraction and scanning electron microscopy (SEM). Topics include X-ray diffraction and analysis; SEM imaging and microanalysis. Materials fee.

Prerequisite: ENGR 54 and PHYS 7D

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

**MSE 164L. X-ray Diffraction, Electron Microscopy, and Microanalysis Lab. 1 Unit.**

Material characterization using X-ray diffraction and scanning electron microscopy (SEM). Topics include X-ray diffraction and analysis; SEM imaging and microanalysis.

Prerequisite: ENGR 54 and PHYS 7D

Restriction: Materials Science and Engr Majors only.

**MSE 165A. Thermodynamics of Materials. 4 Units.**

Treatment of the laws of thermodynamics and their application in understanding properties and equilibrium states of engineering materials. Develops relationships pertaining to multiphase equilibrium and presents graphical constructions for interpretation of phase diagrams. Statistical thermodynamics in relation to materials phenomena.

Prerequisite: CHEM 1C and PHYS 7C

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

**MSE 165B. Diffusion and Heat Transport in Materials. 4 Units.**

Examines how kinetics affect materials development, behavior, and processing. Highlights the ways in which kinetics and diffusion are key to designing materials processing and heat treating strategies, with examples in various applied topics.

Prerequisite: MSE 165A or CBE 40C or MAE 91. MSE 165A with a grade of C- or better

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

**MSE 165C. Materials Kinetics and Phase Transformations. 4 Units.**

Treatment of the kinetics of solid-state reactions and reactions at interfaces. Thermodynamics and kinetics of phase transformations, including solidification processes, diffusional and diffusionless phase transformations.

Prerequisite: ENGR 54 and (MSE 165B or (CBE 120B and CBE 120C) or MAE 120). MSE 165B with a grade of C- or better

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

**MSE 165CL. Laboratory in Materials Kinetics and Phase Transformations. 1 Unit.**

Covers topics of practical application of the kinetics of solid state reactions, reactions at interfaces, and the thermodynamics and kinetics of phase transformations to common materials systems.

Prerequisite: ENGR 54 and (MSE 165B or (CBE 120B and CBE 120C) or MAE 120). MSE 165B with a grade of C- or better

Restriction: Materials Science and Engr Majors only.

**MSE 171. Green Engineering: Theory and Practice. 4 Units.**

Methods and impacts of selecting alternative technologies, processes, materials, chemicals, to reduce pollution, waste, and use of toxic substances, thereby creating "green," environmentally responsible, sustainable solutions. Topics include environmental regulations, recycling, life-cycle assessment, economic analysis, design, green chemistry, and toxicology.

Restriction: Seniors only. Materials Science and Engr Majors have first consideration for enrollment.

**MSE 173. Fundamentals of Materials Processing: How are Materials Processed to Make Things?. 4 Units.**

An in-depth knowledge of manufacturing processes with focus on the fundamentals of materials processing (heat flow, mass flow, fluid flow, etc.). Processing fundamentals that apply to the three main classes of engineering materials: metals, ceramics, and polymers.

Prerequisite: ENGR 54

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

**MSE 174. Composite Materials Design. 3 Units.**

Introduction to fiber-reinforced composites for mechanical applications. Properties of reinforcing fibers. Manufacture of fibers and composites. Micromechanics of fiber composites. Strength criteria and failure modes. Macromechanics in design of laminated composite structures.

Prerequisite: ENGR 54 and ENGR 150

**MSE 175. Design Failure Investigation. 4 Units.**

Survey of mechanisms by which devices fail, including overload, fatigue, corrosion, and wear. Use of fractography and other evidence to interpret failure modes and specify design/manufacturing changes. Students redesign failed parts or structures based on actual parts and/or case histories.

Prerequisite: ENGR 54

Restriction: Materials Science and Engr Majors have first consideration for enrollment. Chemical Engineering majors have second consideration for enrollment.

**MSE 176. Surface and Adhesion Science. 4 Units.**

Structure, thermodynamics of, kinetics, and reactions on surfaces. Surface electronic and mechanical properties and characterization of all classes of materials including metals, semiconductors, ceramics, polymers, and soft materials. Adhesion between different materials is also addressed.

Prerequisite: (CBE 110 or MSE 165C) and (MSE 141 or MSE 69)

Same as CBE 183.

Restriction: Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

Concurrent with MSE 276 and CBE 283.

**MSE 189A. Senior Design Project I. 3 Units.**

Group supervised senior design projects that deal with materials selection in engineering design and that involve case studies in ethics, safety, design, failure modes, new products, and patents. Activities conclude with a presentation of the projects. Materials fee.

Prerequisite: ENGR 54 and MSE 155 and MSE 60 and MSE 165C

Grading Option: In Progress (Letter Grade with P/NP).

Restriction: Seniors only. Materials Science and Engr Majors only. MSE 189A, MSE 189B, and MSE 189C must be taken in the same academic year.

**MSE 189B. Senior Design Project II. 3 Units.**

Group supervised senior design projects that deal with materials selection in engineering design and that involve case studies in ethics, safety, design, failure modes, new products, and patents. Activities conclude with a presentation of the projects. Materials fee.

Prerequisite: MSE 189A

Grading Option: In Progress (Letter Grade with P/NP).

Restriction: Seniors only. Materials Science and Engr Majors only. MSE 189A, MSE 189B, and MSE 189C must be taken in the same academic year.

**MSE 189C. Senior Design Project III. 3 Units.**

Group supervised senior design projects that deal with materials selection in engineering design and that involve case studies in ethics, safety, design, failure modes, new products, and patents. Activities conclude with a presentation of the projects. Materials fee.

Prerequisite: MSE 189B

Restriction: Seniors only. Materials Science and Engr Majors only. MSE 189A, MSE 189B, and MSE 189C must be taken in the same academic year.

**MSE 190. Materials Selection and Design. 4 Units.**

Meaning and phases of design; design considerations; properties of engineering materials; materials property charts; materials selection; process selection; multi-constraint and multi-objective design. Selection of shape in mechanical components. Designing with hybrid materials: challenges and opportunities. Environmental considerations; case studies.

Prerequisite: ENGR 54 and ENGR 150

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

**MSE 191. Materials Outreach. 3 Units.**

Demonstrates major concepts in Materials Science and Engineering. Concepts of materials engineering covered include deformation in crystalline solids, effects of heat treatment on mechanical properties, thermal barrier materials, composites design, mechanical behavior of polymers, superconductivity in ceramics.

Prerequisite: ENGR 54

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

**MSE 195. Special Topics in Materials Science and Engineering. 1-4 Units.**

Studies in selected areas of Materials Science and Engineering. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**MSE 198. Group Study. 1-4 Units.**

Group study of selected topics in engineering.

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**MSE 199. Individual Study. 1-4 Units.**

Supervised independent reading, research, or design for undergraduate Engineering majors. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

Repeatability: May be taken for credit for 8 units.

Restriction: Materials Science and Engr Majors only.

**MSE 199P. Individual Study. 1-4 Units.**

Supervised independent reading, research, or design for undergraduate Engineering majors. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**MSE 200. Crystalline Solids: Structure, Imperfections, and Properties. 4 Units.**

Principles and concepts underlying the study of advanced materials including alloys, composites, ceramics, semiconductors, polymers, ferroelectrics, and magnetics. Crystal structure and defects, surface and interface properties, thermodynamics and kinetics of phase transformations, and material processing, related to fundamental material properties.

Restriction: Graduate students only.

**MSE 201A. Critical Analysis and Technical Communication I. 2 Units.**

Develop an understanding of the process to conduct research. Topics include performing analytical analysis of the scientific literature, formation of a hypothesis, defining investigations to validate hypothesis, communicating analysis in written form, writing a research proposal.

Restriction: Graduate students only.

**MSE 201B. Critical Analysis and Technical Communication II. 2 Units.**

Develop oral presentation skills and skills to understand significance of published research. Topics include performing critical and analytical analysis of the scientific literature, connecting core course content with experimental/theoretical methods in the scientific literature, and communicating analysis in oral form.

Prerequisite: MSE 201A

Restriction: Graduate students only.

**MSE 205. Materials Physics. 4 Units.**

Covers the electronic, optical, and dielectric properties of crystalline materials to provide a foundation of the underlying physical principles of governing the properties of existing and emerging electronic and photonic materials.

Prerequisite: MSE 200

Restriction: Graduate students only.

**MSE 241. Nano-Scale Materials and Applications. 4 Units.**

Overview of the chemistry, physics, and applications of nanometer-scale materials. Explore the effects of composition, bonding, and confinement on physical properties of nanomaterials, their chemical syntheses, and their device physics in electronic, optoelectronic, and energy technologies.

Prerequisite: MSE 200 and MSE 205

Restriction: Graduate students only.

Concurrent with MSE 141.

**MSE 249. Special Topics in Materials Science and Engineering. 1-4 Units.**

Studies in selected areas of Materials Science and Engineering. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**MSE 254. Polymer Science and Engineering. 4 Units.**

An introduction to physical aspects of polymers, including configuration and conformation of polymer chains and characterization techniques; crystallinity viscoelasticity, rheology, and processing.

Restriction: Graduate students only.

**MSE 255A. Design with Ceramic Materials. 4 Units.**

Dependence of ceramic properties on bonding, crystal structure, defects, and microstructure. Ceramic manufacturing technology. Survey of physical properties. Strength, deformation, and fracture of ceramics. Mechanical design with brittle, environment-sensitive materials exhibiting time-dependent strengths.

Prerequisite: ENGR 54

Restriction: Graduate students only.

**MSE 256A. Mechanical Behavior of Engineering Materials. 4 Units.**

Principles governing structure and mechanical behavior of materials, relationship relating microstructure and mechanical response with application to elasticity, plasticity, creep, and fatigue, study of rate-controlling mechanisms and failure modes, fracture of materials.

Restriction: Graduate students only.

**MSE 256B. Fracture of Engineering Materials. 4 Units.**

Fracture mechanics and its application to engineering materials. Elastic properties of cracks, the stress intensity factor, the crack tip plastic zone, the J integral approach, fracture toughness testing, the crack tip opening displacement, fracture at high temperatures, fatigue crack growth.

Restriction: Graduate students only.

**MSE 259. Transmission Electron Microscopy. 4 Units.**

The theory and operation of the transmission electron microscope (TEM), including the basic construction, electron optics, electron diffraction and reciprocal space, formation of image and electron diffraction information, microanalysis, and specimen preparation.

Prerequisite: MSE 200

Restriction: Graduate students only.

**MSE 262. Grain Boundaries and Interfaces in Nanocrystalline Materials. 4 Units.**

Structure and character of grain boundaries and interfaces in solids including nanocrystalline materials. Role of grain boundaries in chemical segregation, fracture, deformation, creep, conductivity, diffusion, and grain growth. Experimental techniques and computational methods used to characterize and model grain boundaries.

Prerequisite: MSE 200

**MSE 264. Scanning Electron Microscopy. 4 Units.**

The theory and operation of the scanning electron microscope (SEM) and X-ray microanalysis. Topics covered include the basic design and electron optics, electron beam - specimen interactions, image formation and interpretation, X-ray spectrometry, and other related topics and techniques.

Prerequisite: MSE 200

Restriction: Graduate students only.

**MSE 265. Phase Transformations. 4 Units.**

Advanced thermodynamics and kinetics of phase transformations and phase transitions.

Prerequisite: MSE 200

Restriction: Graduate students only.

**MSE 267. Seminar in Systems Microbiology Research. 1 Unit.**

A research and journal club seminar that covers topics on bacteria and phage using approaches and principles from biology, engineering, and physics.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Same as MBB 268, PHYS 268.

Restriction: Upper-division students only. Graduate students only.

**MSE 271. Green Engineering: Theory and Practice. 4 Units.**

Methods and impacts of selecting alternative technologies, processes, materials, chemicals, to reduce pollution, waste, and use of toxic substances, thereby creating "green," environmentally responsible, sustainable solutions. Topics include environmental regulations, recycling, life-cycle assessment, economic analysis, design, green chemistry, and toxicology.

Restriction: Graduate students only.

**MSE 273. Electroceramics & Solid State Electrochemical Systems. 4 Units.**

Theory, underlying principles, experimental techniques, and applications of electroceramics and solid-state electrochemical systems. Links solid state physics, atomic structure, thermodynamics, defect chemistry, and transport processes to electrical properties of ceramics - spanning from insulators to fast-ion conductors and HT superconductors.

Prerequisite: MSE 200

**MSE 276. Surface and Adhesion Science. 4 Units.**

Structure, thermodynamics of, kinetics, and reactions on surfaces. Surface electronic and mechanical properties and characterization of all classes of materials including metals, semiconductors, ceramics, polymers, and soft materials. Adhesion between different materials is also addressed.

Same as CBE 283.

Restriction: Graduate students only.

Concurrent with MSE 176 and CBE 183.

**MSE 295. Seminar in Engineering. 1-4 Units.**

Seminars by individual faculty in major fields of interest.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**MSE 296. Master of Science Thesis Research. 1-16 Units.**

Individual research or investigation conducted in preparation for the thesis required for the M.S. degree in Engineering.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**MSE 297. Doctor of Philosophy Dissertation Research. 1-16 Units.**

Individual research or investigation conducted in preparation for the dissertation required for the Ph.D. degree in Engineering.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**MSE 298. Seminars in Materials Science and Engineering. 2 Units.**

Presentation of advanced topics and reports of current research efforts in Materials Science and Engineering.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**MSE 299. Individual Research. 1-16 Units.**

Individual research or investigation under the direction of an individual faculty member.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Mechanical and Aerospace Engr Courses

### **ENGRMAE 10. Introduction to Engineering Computations. 4 Units.**

Introduction to the solution of engineering problems through the use of the computer. Elementary programming, numerical analysis, and data visualization with a high-level programming language such as MATLAB.

(Design units: 1)

Corequisite: MATH 2A

Prerequisite: MATH 2A or MATH 5A

Overlaps with EECS 10, EECS 12, BME 60B.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

### **ENGRMAE 30. Statics. 4 Units.**

Addition and resolution of forces, distributed forces, equivalent system of forces centroids, first moments, moments and products on inertia, equilibrium of rigid bodies, trusses, beams, cables. Course may be offered online.

(Design units: 0)

Corequisite: MATH 2D

Prerequisite: MATH 2D and PHYSICS 7C

Same as ENGRCEE 30, ENGR 30.

Restriction: School of Engineering students have first consideration for enrollment.

### **ENGRMAE 52. Computer-Aided Design. 4 Units.**

Develops skills for interpretation and presentation of mechanical design drawings and the use of CAD in engineering design. An integrated approach to drafting based on sketching, manual drawing, and three-dimensional CAD techniques is presented.

(Design units: 0.5)

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

### **ENGRMAE 57. Manufacturing Processes in Engineering. 2 Units.**

With laboratory. Machines and processes of mechanical manufacturing. Safety and professional procedures emphasized. Use of measuring instruments, hand tools, lathe, mill, drill press, bandsaw, grinder, welding equipment.

(Design units: 0)

Grading Option: Pass/no pass only.

Restriction: School of Engineering students have first consideration for enrollment.

### **ENGRMAE 60. Electric Circuits. 4 Units.**

Design and analysis of analog circuits based on lumped circuit elements with emphasis on the use of operational amplifiers. Sinusoidal and transient response. Constructional and laboratory testing of analog circuits, and introduction to data acquisition. Materials fee.

(Design units: 2)

Corequisite: MATH 3D

Prerequisite: PHYSICS 7D and PHYSICS 7LD

Overlaps with EECS 70A.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Materials Science Engineering Majors have first consideration for enrollment.

**ENGRMAE 80. Dynamics. 4 Units.**

Introduction to the kinematics and dynamics of particles and rigid bodies. The Newton-Euler, Work/Energy, and Impulse/Momentum methods are explored for ascertaining the dynamics of particles and rigid bodies. An engineering design problem using these fundamental principles is also undertaken.

(Design units: 0.5)

Prerequisite: MATH 2D and PHYSICS 7C

Same as ENGRCEE 80, ENGR 80.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRMAE 91. Introduction to Thermodynamics. 4 Units.**

Thermodynamic principles; open and closed systems representative of engineering problems. First and second law of thermodynamics with applications to engineering systems and design.

(Design units: 0.5)

Prerequisite: PHYSICS 7C and MATH 2D

Overlaps with CBE 40B.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRMAE 93. Topics in Design Project . 1-4 Units.**

Early-stage design/hands-on experience for students, and allows them to participate alongside seniors in the design project.

(Design units: 1)

Repeatability: Unlimited as topics vary.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment.

**ENGRMAE 106. Mechanical Systems Laboratory. 4 Units.**

Experiments in linear systems, including op-amp circuits, vibrations, and control systems. Emphasis on demonstrating that mathematical models can be useful tools for the analysis and design of electro-mechanical systems. Materials fee.

(Design units: 2)

Prerequisite: ENGRMAE 60 or EECS 70A

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRMAE 107. Fluid Thermal Science Laboratory. 4 Units.**

Fluid and thermal engineering laboratory. Experimental analysis of fluid flow, heat transfer, and thermodynamic systems. Probability, statistics, and uncertainty analysis. Report writing is emphasized and a design project is required. Materials fee.

(Design units: 1)

Corequisite: ENGRMAE 120

Restriction: Mechanical Engineering Majors have first consideration for enrollment.

**ENGRMAE 108. Aerospace Laboratory. 4 Units.**

Analytical and experimental investigation in aerodynamics, fluid dynamics, and heat transfer. Emphasis on study of flow over objects and lift and drag on airfoils. Introduction to basic diagnostic techniques. Report writing is emphasized. Design project is required.

(Design units: 2)

Prerequisite: ENGRMAE 130B

Restriction: Aerospace Engineering Majors have first consideration for enrollment. Mechanical Engineering majors have second consideration for enrollment.

**ENGRMAE 110. Combustion and Fuel Cell Systems. 4 Units.**

Fundamentals of gaseous, liquid, and coal-fired combustion and fuel cell systems. Fuels, fuel-air mixing, aerodynamics, and combustion and fuel cell thermodynamics. Operating and design aspects of practical systems including engines, power generators, boilers, furnaces, and incinerators.

(Design units: 2)

Prerequisite: ENGRMAE 115

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRMAE 112. Propulsion. 4 Units.**

Application of thermodynamics and fluid mechanics to basic flow processes and cycle performance in propulsion systems: gas turbines, ramjets, scramjets, and rockets.

(Design units: 1)

Prerequisite: ENGRMAE 135

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment.

**ENGRMAE 113. Electric Propulsion. 4 Units.**

Space propulsion requirements and maneuvers, stressing those best suited to electric propulsion. An introduction to plasma physics. Electrothermal, electromagnetic, and electrostatic accelerators, with emphasis in technologies (ion engines, Hall thrusters, and colloidal thrusters) belonging to the latter family.

(Design units: 1)

Prerequisite: ENGRMAE 112

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment.

Concurrent with ENGRMAE 213.

**ENGRMAE 114. Fuel Cell Fundamentals and Technology. 4 Units.**

Introduction to electrochemistry and electrocatalysis; nature of fuel-cell electrodes and electrolytes; charge transfer reactions at interfaces; charge transport and mass transport processes; fuel processing reactions; determination of fuel cell efficiency, fuel flexibility, emissions, and other characteristics.

(Design units: 0)

Prerequisite: ENGRMAE 115

Restriction: Seniors only. Mechanical Engineering Majors have first consideration for enrollment. Chemical Engineering majors have second consideration for enrollment.

Concurrent with ENGRMAE 214A.

**ENGRMAE 115. Applied Engineering Thermodynamics. 4 Units.**

Application of thermodynamic principles to compressible and incompressible processes representative of practical engineering problems; power cycles, refrigeration cycles, multicomponent mixtures, air conditioning systems, combustion, and compressible flow. Design of a thermodynamic process.

(Design units: 2)

Prerequisite: ENGRMAE 91 or CBE 40B or ENGRMSE 65A

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRMAE 117. Solar and Renewable Energy Systems. 4 Units.**

Basic principles, design, and operation of solar and other renewable energy systems including solar photo-voltaic, solar thermal, wind, and PEM fuel cell. Includes power generation and storage, and renewable fuels for transportation and stationary power generation.

(Design units: 1)

Prerequisite: (ENGRMAE 91 or CBE 40B)

Restriction: Mechanical Engineering Majors have first consideration for enrollment.

**ENGRMAE 118. Sustainable Energy Systems. 4 Units.**

Basic principles, design, and operation of sustainable energy systems including wind, solar photo-voltaic and thermal, hydroelectric, geothermal, oceanic, biomass combustion, advanced coal, and next generation nuclear. Includes power generation, storage, and transmission for stationary power generation.

(Design units: 1)

Prerequisite: ENGRMAE 115

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment.

Concurrent with ENGRMAE 218.

**ENGRMAE 119. Climate Solutions. 4 Units.**

Focuses on carbon neutrality and climate stability, addressing.

Same as EARTHSS 179, UPPP 111.

Restriction: Upper-division students only.

**ENGRMAE 120. Heat and Mass Transfer. 4 Units.**

Fundamentals of heat and mass transfer. Conduction, heat and mass transfer by convection in laminar and turbulent flows, radiation heat transfer, and combined modes of heat and mass transfer. Practical engineering applications.

(Design units: 0)

Prerequisite: ENGRMAE 130B

Overlaps with CBE 120B.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**ENGRMAE 130A. Introduction to Fluid Mechanics. 4 Units.**

Fundamental concepts; fluid statics; fluid dynamics; Bernoulli's equation; control-volume analysis; basic flow equations of conservation of mass, momentum, and energy; differential analysis; potential flow; viscous incompressible flow.

(Design units: 0)

Corequisite: ENGRMAE 91

Prerequisite: PHYSICS 7C and MATH 2D and MATH 2E and MATH 3D and (ENGRMAE 30 or ENGRCEE 30 or ENGR 30) and (ENGRMAE 80 or ENGRCEE 80 or ENGR 80). PHYSICS 7C with a grade of C- or better. MATH 2D with a grade of C- or better. MATH 2E with a grade of C- or better. MATH 3D with a grade of C- or better. ENGRMAE 30 with a grade of C- or better. ENGRCEE 30 with a grade of C- or better. ENGR 30 with a grade of C- or better. ENGRMAE 80 with a grade of C- or better. ENGRCEE 80 with a grade of C- or better. ENGR 80 with a grade of C- or better

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment.

**ENGRMAE 130B. Introduction to Viscous and Compressible Flows. 4 Units.**

Introduction to the analysis of viscous flows including fully developed laminar and turbulent flow in a pipe, viscous flow over immersed bodies, evaluation of boundary layer characteristics, lift and drag, compressible flow in a duct and normal shock waves.

(Design units: 1)

Prerequisite: ENGRMAE 130A

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment.

**ENGRMAE 132. Computational Fluid Dynamics. 4 Units.**

Introduction to computational fluid dynamics in simple engineering devices. The numerical simulations will be performed via the widely-used software ANSYS-Fluent. While Fluent is the choice of software, all major CFD packages are based on a similar numerical method.

(Design units: 0)

Prerequisite: ENGRMAE 130B. ENGRMAE 130B with a grade of C- or better

Restriction: Aerospace Engineering Majors only. Mechanical Engineering Majors only.

**ENGRMAE 135. Compressible Flow. 4 Units.**

Compressibility effects in fluid mechanics. One-dimensional flow with area variation, friction, heat transfer, and shocks. Design of gas supply systems. Two-dimensional flow with oblique shocks and isentropic waves. Supersonic airfoil theory and design, wind tunnel design. Basic diagnostics.

(Design units: 1)

Prerequisite: ENGRMAE 130A

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment.

**ENGRMAE 136. Aerodynamics. 4 Units.**

Analysis of flow over aircraft wings and airfoils, prediction of lift, moment, and drag. Topics: fluid dynamics equations; flow similitude; viscous effects; vorticity, circulation, Kelvin's theorem, potential flow; superposition principle, Kutta-Joukowski theorem; thin airfoil theory; finite wing theory; compressibility.

(Design units: 1)

Prerequisite: ENGRMAE 130B

Restriction: Aerospace Engineering Majors have first consideration for enrollment. Mechanical Engineering Majors have first consideration for enrollment.

**ENGRMAE 145. Theory of Machines and Mechanisms. 4 Units.**

Presents the basic mathematical theory of machines. Focuses on the principles of cam design, gearing and gear train analysis, and the kinematic and dynamic analysis of linkages, together with an introduction to robotics.

(Design units: 2)

Prerequisite: ENGRMAE 52 and (ENGRMAE 80 or ENGRCEE 80 or ENGR 80) and (MATH 3A or I&C SCI 6N)

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Materials Science and Engineering majors have second consideration for enrollment.

**ENGRMAE 146. Astronautics. 4 Units.**

Motion in gravitational force fields, orbit transfers, rocketry, interplanetary trajectories, attitude dynamics and stabilization, navigation, reentry, the space environment.

(Design units: 1)

Prerequisite: ENGRMAE 80 or ENGRCEE 80 or ENGR 80

Restriction: Aerospace Engineering Majors have first consideration for enrollment.

**ENGRMAE 147. Vibrations. 4 Units.**

Analysis of structural vibrations of mechanical systems. Modeling for lumped and distributed parameter systems. Topics include single and multi-degree of freedom systems, free and forced vibrations, Fourier series, convolution integral, mass/stiffness matrices, and normal modes with design project.

(Design units: 1)

Prerequisite: (ENGR 80 or ENGRCEE 80 or ENGRMAE 80) and MATH 2E and MATH 3D

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**ENGRMAE 150. Mechanics of Structures. 4 Units.**

Stresses and strains. Torsion. Bending. Beam deflection. Shear force and moment distributions in beams. Yielding and buckling of columns. Combined loading. Transformation of stresses and strain. Yielding criteria. Finite elements analysis of frames. Dynamic of two-bar truss.

(Design units: 2)

Prerequisite: (ENGRCEE 30 or ENGR 30 or ENGRMAE 30) and MATH 3A

Same as ENGR 150.

Overlaps with ENGRCEE 150.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**ENGRMAE 150L. Mechanics of Structures Laboratory. 1 Unit.**

Experimental techniques for the measurement of mechanical properties of materials and structures. Methods for load, displacement, and strain measurements. Tension, bending, compression tests. Determination of strength, stiffness, toughness for metals, polymers, ceramics, and composites. Deformation of structures. Materials fee.

(Design units: 0)

Corequisite: ENGRMAE 150

Prerequisite: ENGRMAE 30 or ENGR 30 or ENGRCEE 30

Overlaps with ENGRCEE 150L.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**ENGRMAE 151. Mechanical Engineering Design. 4 Units.**

A comprehensive group design project experience that involves identifying customer needs, idea generation, reverse engineering, preliminary design, standards, prototype development, testing, analysis, and redesign of a product involving fluid, thermal, and mechanical components. Introduces design for manufacturing and the environment. Materials fee.

(Design units: 3)

Corequisite: ENGRMAE 170

Prerequisite: ENGRMAE 120 and ENGRMAE 145

Restriction: Seniors only. Mechanical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**ENGRMAE 152. Introduction to Computer-Aided Engineering. 4 Units.**

Elements and principles of computer-aided engineering with modern hardware and software are presented with a design focus. Case studies are used to assist in finite-element method techniques. Not offered every year.

(Design units: 2)

Prerequisite: (ENGRMAE 150 or ENGR 150) and ENGRMAE 120

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**ENGRMAE 153. Advanced BIOMEMS Manufacturing Techniques. 4 Units.**

Introduction to BIOMEMS. Advanced biotechnology/biomedicine equipment based on MEMS and NEMS. Fundamentals of MEMS/NEMS sensing techniques and the biological and physics principles involved and the preferred MEMS and NEMS manufacturing techniques.

(Design units: 0)

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Biomedical Engineering Majors have first consideration for enrollment.

Concurrent with ENGRMAE 253.

**ENGRMAE 155. Composite Materials and Structures. 4 Units.**

Motivation for composite materials. Different classifications according to the nature of the matrix (PMC, MMC, CMC) and the reinforcement topology (fibers, whiskers, particulates). Mechanical properties. Failure mechanisms. Designing with composite materials. Advantages and limitations of homogenization techniques for numerical modeling.

(Design units: 0)

Prerequisite: ENGR 54 and (ENGRMAE 150 or ENGRCEE 150 or ENGR 150)

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering majors have second consideration for enrollment. Chemical Engineering majors have second consideration for enrollment. Civil Engineering majors have second consideration for enrollment. Materials Science and Engineering majors have second consideration for enrollment.

Concurrent with ENGRMAE 255.

**ENGRMAE 156. Mechanical Behavior and Design Principles. 4 Units.**

Principles governing structure and mechanical behavior of materials, relationship relating microstructure and mechanical response with application to elasticity, plasticity, yielding, necking, creep, and fracture of materials. Introduction to experimental techniques to characterize the properties of materials. Design parameters.

(Design units: 2)

Prerequisite: ENGR 54

Same as ENGRMSE 155.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Aerospace Engineering majors have second consideration for enrollment.

**ENGRMAE 157. Lightweight Structures. 4 Units.**

Fundamentals of torsion and bending. Analysis and design of thin-wall and composite beams. Stress analysis of aircraft components. Stiffness, strength, and buckling. Introduction to the Finite Element method and its application to plates and shells.

(Design units: 2)

Prerequisite: ENGR 150 or ENGRCEE 150 or ENGRMAE 150

Restriction: Aerospace Engineering Majors have first consideration for enrollment. Mechanical Engineering majors have second consideration for enrollment. Civil Engineering majors have second consideration for enrollment. Materials Science and Engineering majors have second consideration for enrollment.

**ENGRMAE 158. Aircraft Performance. 4 Units.**

Flight theory applied to subsonic propeller and jet aircraft. Nature of aerodynamic forces, drag and lift of wing and fuselage, high-lift devices, level-flight performance, climb and glide performance, range, endurance, take-off and landing distances, static and dynamic stability and control.

(Design units: 2)

Prerequisite: ENGRMAE 130A

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment.

**ENGRMAE 159. Aircraft Design. 4 Units.**

Preliminary design of subsonic general aviation and transport aircraft with emphasis on layout, aerodynamic design, propulsion, and performance. Estimation of total weight and weight distribution, design of wings, fuselage, and tail, selection and location of engines, prediction of overall performance.

(Design units: 4)

Prerequisite: ENGRMAE 112 and ENGRMAE 136 and ENGRMAE 158

Restriction: Aerospace Engineering Majors have first consideration for enrollment. Mechanical Engineering Majors have first consideration for enrollment.

**ENGRMAE 164. Air Pollution and Control. 4 Units.**

Sources, dispersion, and effects of air pollutants. Topics include emission factors, emission inventory, air pollution, meteorology, air chemistry, air quality modeling, impact assessment, source and ambient monitoring, regional control strategies.

(Design units: 2)

Prerequisite: (ENGRMAE 91 or CBE 40B) and ENGRMAE 130A

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRMAE 170. Introduction to Control Systems. 4 Units.**

Feedback control systems. Modeling, stability, and systems specifications. Root locus, Nyquist, and Bode methods of analysis and design.

(Design units: 2)

Prerequisite: (ENGRMAE 80 or ENGRCEE 80 or ENGR 80) and ENGRMAE 106

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**ENGRMAE 171. Digital Control Systems. 4 Units.**

Methods for analysis and design of discrete-time control systems. Z-transforms, difference equations, discrete Fourier transforms. Sampling theorem and applications. Z-plane stability, frequency response. Digital controller design. Introduction to digital filters.

(Design units: 2)

Prerequisite: ENGRMAE 170

Restriction: Civil Engineering Majors have first consideration for enrollment. Mechanical Engineering Majors have first consideration for enrollment.

**ENGRMAE 172. Design of Computer-Controlled Robots. 4 Units.**

Students design a small robotic device and program it to exhibit sentient behaviors. The basic aspects of mechatronic design are covered, including motor and sensor selection, control strategies, and microcomputer programming for the implementation of control paradigms. Materials fee.

(Design units: 3)

Corequisite: ENGRMAE 60

Prerequisite: ENGRMAE 170

Restriction: Mechanical Engineering Majors have first consideration for enrollment.

Concurrent with ENGRMAE 280.

**ENGRMAE 175. Dynamics and Control of Aerospace Vehicles. 4 Units.**

Equations of motion, linearization, stability derivatives, and longitudinal and lateral modes of motion. Handling qualities, sensors and actuators, and effects of various feedbacks on stability and performance. Stability augmentation. Autopilot design.

(Design units: 3)

Prerequisite: ENGRMAE 106

Restriction: Aerospace Engineering Majors have first consideration for enrollment. Mechanical Engineering Majors have first consideration for enrollment.

**ENGRMAE 182. Introduction to Machine Learning. 4 Units.**

Fundamental principles necessary to understand statistical learning methods. Introduction to the R programming language. Mathematical foundation for various machine learning algorithms. Computer implementation.

**ENGRMAE 183. Computer-Aided Mechanism Design. 4 Units.**

Focuses on design of planar, spherical, and spatial mechanisms using computer algebra and graphics. Topics include exact and approximate analytical design techniques. Students are required to use existing software (or develop new algorithms) to design various mechanisms for new applications.

(Design units: 4)

Prerequisite: MATH 3A or I&C SCI 6N

Restriction: Mechanical Engineering Majors have first consideration for enrollment.

**ENGRMAE 184. Fundamentals of Experimental Design. 4 Units.**

Review of statistics as applied to experimental research. Fundamentals and principles of statistical experimental design and analysis with emphasis on understanding and use of designed experiments, response surfaces, linear regression modeling, and process optimization.

(Design units: 1)

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment.

Concurrent with ENGRMAE 284.

**ENGRMAE 185. Numerical Analysis in Mechanical Engineering. 4 Units.**

Solution of mechanical-engineering equations by means of numerical methods. Errors in numerical analysis. Nonlinear equation and sets of equations. Numerical differentiation and integration. Ordinary differential equations. Boundary-value problems. Partial differential equations.

(Design units: 2)

Prerequisite: (ENGRMAE 10 or EECS 10 or EECS 12 or BME 60B) and MATH 3D and MATH 2E

Overlaps with MATH 105A.

**ENGRMAE 188. Engineering Design in Industry. 4 Units.**

Principles of engineering design in the context of an industrial application. Local manufacturing firms define an engineering design project to be completed in 10 weeks. Projects include initial brainstorming to final design, with a formal presentation.

(Design units: 4)

Repeatability: May be taken for credit 3 times.

Restriction: Mechanical Engineering Majors have first consideration for enrollment.

**ENGRMAE 189. Senior Project - Special Topics. 1-4 Units.**

Group or individual senior project of theoretical or applied nature involving design. Materials fee.

(Design units: 1-4)

Repeatability: May be taken for credit for 12 units as topics vary.

Restriction: Seniors only. Mechanical Engineering Majors only.

**ENGRMAE 193. Topics in MAE Design. 1-4 Units.**

Provides early-stage design/hands-on experience for upper-division students, and allows them to participate in senior design projects course ENGRMAE 189.

(Design units: 1)

Repeatability: May be taken for credit for 12 units as topics vary.

Restriction: Aerospace Engineering Majors have first consideration for enrollment. Mechanical Engineering Majors have first consideration for enrollment.

**ENGRMAE 195. Seminars in Engineering. 1-4 Units.**

Seminars by individual faculty in major fields of interest. Materials fee.

(Design units: 1-4)

Repeatability: Unlimited as topics vary.

**ENGRMAE 198. Group Study. 1-4 Units.**

Group study of selected topics in Aerospace and Mechanical Engineering.

(Design units: 1-4)

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**ENGRMAE 199. Individual Study. 1-4 Units.**

For undergraduate Engineering majors in supervised but independent reading, research, or design. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Repeatability: May be taken for credit for 8 units.

**ENGRMAE 199P. Individual Study. 1-4 Units.**

For undergraduate Engineering majors in supervised but independent reading, research, or design. Students taking individual study for design are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**ENGRMAE 200A. Engineering Analysis I. 4 Units.**

Linear algebra, including vector spaces, matrices, linear systems of equations, least squares, and the eigenvalue problem. Ordinary differential equations, including analytical and numerical solution methods, stability, and phase portraits.

Restriction: Graduate students only.

**ENGRMAE 200B. Engineering Analysis II. 4 Units.**

Review of ordinary differential equations, including Bessel and Legendre functions. Partial differential equations, including the diffusion equation, Laplace's equation, and the wave equation. Fourier series, Fourier and Laplace transforms and their applications.

Restriction: Graduate students only.

**ENGRMAE 205. Perturbation Methods in Engineering. 4 Units.**

Asymptotic Expansions of integrals. Regular and singular perturbations. Perturbation methods for ordinary and partial differential equations. Matched asymptotic expansions. Multiple-scale asymptotic expansion schemes. Not offered every year.

Prerequisite: ENGRMAE 200A and ENGRMAE 200B. Knowledge of linear differential equations.

Restriction: Graduate students only.

**ENGRMAE 206. Nonlinear Optimization Methods. 4 Units.**

Numerical methods for constrained and unconstrained optimization. Necessary and sufficient conditions for optimality. Conjugate gradient, variable metric algorithms. Gradient projection, penalty functions, and Lagrange methods. Not offered every year.

Prerequisite: ENGRMAE 200A

Restriction: Graduate students only.

**ENGRMAE 207. Methods of Computer Modeling in Engineering and the Sciences. 4 Units.**

Unified introduction to finite volume, finite element, field-boundary element, meshless, primal, dual, and mixed methods. Nonlinear problems posed by ordinary as well as partial differential equations. Computer implementations and comparisons of accuracy and convergence.

Restriction: Graduate students only.

**ENGRMAE 209P. Energy Efficiency Technology. 4 Units.**

Principles, design, operation of energy efficient technology in the built environment, including solar energy, green building design, low waste/emissions construction materials, energy harvesting, built environment energy conversion and storage, high efficiency lighting, daylighting, heat pumps, cooling systems, renewable power systems.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 210. Advanced Fundamentals of Combustion. 4 Units.**

Premixed, nonpremixed, and heterogenous reactions, with emphasis on kinetics, thermal ignition, turbulent flame propagation, detonations, explosions, flammability limits, diffusion flame, quenching, flame stabilization, and particle and spray combustion. Not offered every year.

Prerequisite: ENGRMAE 224 or ENGRMAE 230B

Restriction: Graduate students only.

**ENGRMAE 211P. Energy Storage Systems and Technology. 4 Units.**

Basic principles, design, and operation of energy storage systems and technology including lithium ion battery systems for transportation and stationary applications, for flow batteries (e.g., vanadium redox, sodium sulfur), and for reversible fuel cell electrolyzer systems and hydrogen energy storage.

Prerequisite: Required: Undergraduate-level knowledge of applied engineering thermodynamics.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 212. Engineering Electrochemistry: Fundamentals and Applications. 4 Units.**

Introduction to engineering electrochemistry fundamentals and applications. Examine thermodynamics and transport principles in typical electrochemical systems. Electrochemical sensors, batteries, fuel cells, and supercapacitors. Manufacturing aspects will also be covered.

Restriction: Graduate students only.

**ENGRMAE 212P. Engineering Electrochemistry: Fundamentals and Applications. 4 Units.**

Introduction to engineering electrochemistry fundamentals and applications. Examine thermodynamics and transport principles in typical electrochemical systems. Electrochemical sensors, batteries, fuel cells, and supercapacitors. Manufacturing aspects are also covered.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 213. Electric Propulsion. 4 Units.**

Space propulsion requirements and maneuvers, stressing those best suited to electric propulsion. An introduction to plasma physics. Electrothermal, electromagnetic and electrostatic accelerators, with emphasis in technologies (ion engines, Hall thrusters and colloidal thrusters) belonging to the latter family.

Restriction: Graduate students only.

Concurrent with ENGRMAE 113.

**ENGRMAE 214A. Fuel Cell Fundamentals and Technology. 4 Units.**

Introduction to electrochemistry and electrocatalysis; nature of fuel-cell electrodes and electrolytes; charge transfer reactions at interfaces; charge transport and mass transport processes; fuel processing reactions; determination of fuel cell efficiency, fuel flexibility, emissions and other characteristics.

Restriction: Graduate students only.

Concurrent with ENGRMAE 114.

**ENGRMAE 214AP. Fuel Cell Fundamentals and Technology. 4 Units.**

Introduction to electrochemistry and electrocatalysis; nature of fuel-cell electrodes and electrolytes; charge transfer reactions at interfaces; charge transport and mass transport processes; fuel processing reactions; determination of fuel cell efficiency, fuel flexibility, emissions, and other characteristics.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 214B. Fuel Cell Systems and Degradation. 4 Units.**

Fuel cell systems design; impacts of operating conditions; experimental and theoretical analysis methods for fuel cells systems; introduction to degradation mechanisms and mitigation techniques; provides broad insight into fuel-cell science, technology, system design and operation. Offered every other year.

Prerequisite: ENGRMAE 214A

Restriction: Graduate students only.

**ENGRMAE 214C. PEM Fuel Cells . 4 Units.**

An in-depth introduction to the fundamentals of PEM fuel cells, including thermodynamics, kinetics, and transport in electrochemical systems. Topics of specific interest to mechanical engineers will include water/heat management and dynamic responses.

Prerequisite: ENGRMAE 214A

Restriction: Graduate students only.

**ENGRMAE 215. Advanced Combustion Technology. 4 Units.**

Pollutant formation and experimental methods. Formation of gaseous pollutants and soot; transformation and emission of fuel contaminants in gas, liquid, and solid fuel combustion; methods employed to measure velocity, turbulence intensity, temperature, composition, particle size; methods to visualize reacting flows.

Prerequisite: ENGRMAE 200A and (ENGRMAE 230A or ENGRMAE 270A)

Restriction: Graduate students only.

**ENGRMAE 216. Statistical Thermodynamics. 4 Units.**

Statistics of independent particles, development of quantum mechanical description of atoms and molecules, application of quantum mechanics, evaluation of thermodynamics properties for solids, liquids, and gases, statistical mechanics of dependent particles (ensembles).

Restriction: Graduate students only.

**ENGRMAE 217. Generalized Thermodynamics. 4 Units.**

Generalized thermodynamics develops the laws of continuum thermodynamics from a set of plausible and intuitive postulates. The postulates are motivated qualitatively by a statistical description of matter and are justified by a posterior success for the resulting theory.

Restriction: Graduate students only.

**ENGRMAE 217P. Generalized Thermodynamics. 4 Units.**

Generalized thermodynamics develops the laws of continuum thermodynamics from a set of plausible and intuitive postulates. The postulates are motivated qualitatively by a statistical description of matter and are justified by a posterior success for the resulting theory.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 218. Sustainable Energy Systems. 4 Units.**

Basic principles, design and operation of sustainable energy systems including wind, solar photo-voltaic and thermal, hydroelectric, geothermal, oceanic, biomass combustion, advanced coal and next generation nuclear. Includes power generation, storage, and transmission for stationary power generation.

Restriction: Graduate students only.

Concurrent with ENGRMAE 118.

**ENGRMAE 218P. Sustainable Energy Systems. 4 Units.**

Basic principles, design, and operation of sustainable energy systems including wind, solar photo-voltaic and thermal, hydroelectric, geothermal, oceanic, biomass combustion, advanced coal, and next generation nuclear. Includes power generation, storage, and transmission for stationary power generation.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 219P. Solar and Renewable Energy Systems. 4 Units.**

Basic principles, design, and operation of solar and other renewable energy systems including solar photo-voltaic, solar thermal, wind, and PEM fuel cell. Includes power generation and storage, and renewable fuels for transportation and stationary power generation.

Prerequisite: Required: Knowledge of applied engineering thermodynamics.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 220. Conduction Heat Transfer. 4 Units.**

Steady state and transient conduction heat transfer in one- and multi-dimensional geometries. Analytical methods, exact and approximate. Numerical techniques are also included.

Restriction: Graduate students only.

**ENGRMAE 221. Convective Heat and Mass Transfer. 4 Units.**

Laminar and turbulent convective heat and mass transfer in external and internal flows. Forced and free convection. Exact and approximate solutions. Similarity solutions. Variable properties. Concentration boundary layer theory. Mass transfer conductance.

Prerequisite: ENGRMAE 230B

Restriction: Graduate students only.

**ENGRMAE 222. Radiative Heat Transfer. 4 Units.**

Black body radiation. Radiative transport equations for surfaces separated by non-participating media. Radiant energy transfer through absorbing, emitting, and scattering media. Radiation-conduction interaction. Radiation-convection interaction. Introduction to finite-difference solutions.

Restriction: Graduate students only.

**ENGRMAE 223A. Numerical Methods in Heat, Mass, and Momentum Transport (Laminar Flows) I. 4 Units.**

Introduction to the discretization of various types of partial differential equations (parabolic, elliptic, hyperbolic). Finite-volume discretization for one- and two-dimensional flows. Use of a two-dimensional elliptic procedure to predict sample laminar flows.

Prerequisite or corequisite: ENGRMAE 230A

Restriction: Graduate students only.

**ENGRMAE 223B. Numerical Methods in Heat, Mass, and Momentum II. 4 Units.**

Introduction to turbulence. Reynolds-averaging of Navier-Stokes equations. Second-order closure of the average equations. Use of two-dimensional elliptic procedure to predict confined turbulent flows. Not offered every year.

Prerequisite: ENGRMAE 223A

Restriction: Graduate students only.

**ENGRMAE 224. Advanced Transport Phenomena. 4 Units.**

Fundamentals of transport phenomena in fluid (gas and liquid), solid, and nano systems. Conservation equations, fundamentals of diffusion, ion transport, dispersion in turbulent/laminar flows, absorption, differential/staged distillation, transport in membranes, and nano/microscale transport phenomena. Not offered every year.

Restriction: Graduate students only.

**ENGRMAE 226. Special Topics in Fluid and Thermal Sciences. 1-4 Units.**

Special topics of current interest in fluid mechanics, heat and mass transfer, multiphase flows, or combustion. Emphasis could be placed on theory, computational methods, or experimental techniques.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ENGRMAE 227. Thermal Resistance Analysis in Microdevices and Nanomaterials. 4 Units.**

Heat transfer and thermal resistance analysis relevant for microdevices and nanomaterials. Overview of recent progress in nanotechnology and materials science. Thermal modeling strategies for novel electronic devices and energy conversion systems.

Restriction: Graduate students only.

**ENGRMAE 228. Nanoscale Phase Change Transport Physics. 4 Units.**

Discusses a wide range of phase change processes (i.e., evaporation, boiling, condensation, and freezing) through the use of novel thermal metamaterials with the aim of enhancing phase change performances.

Prerequisite: Undergraduate-level heat transfer is recommended.

Restriction: Graduate students only.

**ENGRMAE 229P. Nanoscale Materials for Modern Electronics. 4 Units.**

Introduction to design and synthesis of nanomaterials. Topics include thermal and liquid transport in materials systems, phase change heat transfer physics, and mechanical properties in materials systems.

Prerequisite: Required: Undergraduate-level knowledge of heat transfer.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 230A. Inviscid Incompressible Fluid Mechanics I. 4 Units.**

Equations of motion. Vector notation. Flow kinematics. Potential flow and complex potential. Vorticity and circulation. Bernoulli's theorem. Crocco's theorem. Conformal, Joukowski, and Schwarz-Christoffel transformations.

Restriction: Graduate students only.

**ENGRMAE 230B. Viscous Incompressible Fluid Mechanics II. 4 Units.**

Review of mass, momentum, energy equations. Stress tensor, constitutive relations. Laminar flows. Stokes and Oseen flows. Self-similarity. Boundary layer theory: thin-layer approximation, Falkner-Skan, Blasius solutions, integral methods. Jet, wake, cavity flows. Introduction to turbulence: instability, Reynolds averaging, mixing length.

Restriction: Graduate students only.

**ENGRMAE 230C. Compressible Fluid Dynamics. 4 Units.**

One-dimensional unsteady flow; Riemann invariants, acoustics, shock tube. Two-dimensional flow: shock polars, linear theory, similarity rules, method of characteristics. Three dimensional flow: slender-body theory. Effects of viscosity and conductivity: laminar boundary layer, Crocco-Busemann relations.

Prerequisite: ENGRMAE 230A or ENGRMAE 230B

Restriction: Graduate students only.

**ENGRMAE 230D. Theoretical Foundations of Fluid Mechanics. 4 Units.**

Well-posed problems and boundary, initial, and interface conditions; strong and weak solutions. Similarity, perturbation theory and limit behavior, bifurcations. Dispersive and nondispersive wave propagation, acoustics, ship waves, internal gravity waves, water waves. Vortices: mutual interactions and stability. Jets, wakes, cavities.

Prerequisite: ENGRMAE 230A and ENGRMAE 230B

Restriction: Graduate students only.

**ENGRMAE 231. Fundamentals of Turbulence. 4 Units.**

Phenomenon of turbulence. Reynolds equations. Dynamics of turbulence. Free turbulent shear flows. Wall-bounded turbulent shear flows. Turbulent transport of scalar quantities. Spectral dynamics. Mathematical models of turbulence.

Prerequisite: ENGRMAE 230A and ENGRMAE 230B

Restriction: Graduate students only.

**ENGRMAE 233. Turbulent Free Shear Flows. 4 Units.**

Practical and theoretical aspects of turbulent free shear flows. Instability, global scaling laws, mixing, and noise generation in incompressible and compressible shear layers, jets, and wakes. Kelvin-Helmholtz instability, near- and far-field growth rates, effect of compressibility, aeroacoustics of jets.

Prerequisite: ENGRMAE 200B and ENGRMAE 230A and ENGRMAE 230B

Restriction: Graduate students only.

**ENGRMAE 236. Nonequilibrium Gas Dynamics. 4 Units.**

Molecular description of fluid flow. Boltzmann equation. Chapman-Enskog expansion for flows with translational nonequilibrium. Shock structure. Inviscid flows with chemical and vibrational nonequilibrium. Not offered every year.

Prerequisite: ENGRMAE 230C

Restriction: Graduate students only.

**ENGRMAE 237. Computational Fluid Dynamics. 4 Units.**

Mathematical, physical, and computational fundamentals of computational fluid dynamics, numerical methods for solving the Euler and Navier-Stokes equations. Topics include: finite-difference and finite-volume discretization, time marching methods, von Neumann analysis, upwinding, flux splitting, TVD, and other high-resolution shock-capturing schemes.

Prerequisite: ENGRMAE 230C

Restriction: Graduate students only.

**ENGRMAE 238. Experimental Fluid Dynamics. 4 Units.**

Concepts and techniques for measurement of fluid motion. Quantitative and qualitative flow visualization. Flow facilities, shadowgraph, schlieren, interferometer, thermal anemometer. Laser diagnostics, fluorescence, Rayleigh, Raman, Mie scattering. Laser-Doppler, particle-image, and image-correlation velocimetry. Three- and four-dimensional digital imaging.

Prerequisite: ENGRMAE 230A and ENGRMAE 230B

Restriction: Graduate students only.

**ENGRMAE 239. Dynamics of Unsteady Flows. 4 Units.**

Unsteady potential flow modeling (Kelvin's circulation theorem, unsteady Bernoulli's equation). Theodorsen's frequency response, Wagner's step response, and the Kussner sharp-edged gust. State Space approximations for Unsteady Loads. Vortex Lattice. Flutter.

Prerequisite: ENGRMAE 230A is recommended.

Restriction: Graduate students only.

**ENGRMAE 241. Dynamics. 4 Units.**

Kinematics and dynamics of three-dimensional motions. Lagrange's equations, Newton-Euler equations. Applications include robot systems and spinning satellites.

Restriction: Graduate students only.

**ENGRMAE 242. Robotics. 4 Units.**

Spatial rigid-body transformations. Forward and inverse kinematics. Jacobian of serial and parallel chains. Screw coordinates and transformations. Rate and static analyses using screw theory. Singularity analysis. Trajectory generation. Not offered every year.

Restriction: Graduate students only.

**ENGRMAE 244. Theoretical Kinematics. 4 Units.**

Spatial rigid body kinematics is presented with applications to robotics. Orthogonal Matrices, Rodrigues' formula, Quaternions, Plucker coordinates, screw theory, and dual numbers are studied using modern projective geometry and multi-linear algebra. Applications include trajectory planning, inverse kinematics, and workspace analysis.

Restriction: Graduate students only.

**ENGRMAE 245. Spatial Mechanism Design. 4 Units.**

Fundamental kinematic theory required for planar, spherical, and spatial mechanism design. The focus is on algebraic methods for the exact solution of constraint equations. Not offered every year.

Restriction: Graduate students only.

**ENGRMAE 247. Micro-System Design. 4 Units.**

Covers the fundamentals of the many disciplines needed for design of Micro-Electro-Mechanical Systems (MEMS): microfabrication technology, structural mechanics on micro-scale, electrostatics, circuit interface, control, computer-aided design, and system integration.

Same as EECS 278.

Restriction: Graduate students only.

**ENGRMAE 247P. Micro-System Design. 4 Units.**

Covers the fundamentals of the many disciplines needed for design of Micro-Electro-Mechanical Systems (MEMS): microfabrication technology, structural mechanics on micro-scale, electrostatics, circuit interface, control, computer-aided design, and system integration.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 249. Micro-Sensors and Actuators. 4 Units.**

Introduction to the technology of Micro-Electro-Mechanical Systems (MEMS). Fundamental principles and applications of important microsensors, actuation principles on microscale. Introduction to the elements of signal processing; processing of materials for micro sensor/actuator fabrication; smart sensors and microsensor/microactuator array devices.

Same as EECS 279.

Restriction: Graduate students only.

**ENGRMAE 250. Biorobotics. 4 Units.**

Sensors, actuators, and neural circuits for biological movement control from an engineering perspective. Current approaches to robotic and mechatronic devices that support and enhance human movement in health and following neurologic injuries like stroke and spinal cord injury.

Restriction: Graduate students only.

**ENGRMAE 252. Fundamentals of Microfabrication. 4 Units.**

Introduces Engineering and Science students to the science of miniaturization. Different options to make very small machines (micro and nano size) are reviewed, materials choices are discussed, scaling laws are analyzed, and many practical applications are listed.

Restriction: Graduate students only.

**ENGRMAE 252P. Fundamentals of Microfabrication. 4 Units.**

Introduces engineering and science students to the science of miniaturization. Different options to make very small machines (micro and nano size) are reviewed, materials choices are discussed, scaling laws are analyzed, and many practical applications are listed.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 253. Advanced BIOMEMS Manufacturing Techniques. 4 Units.**

Introduction to BIOMEMS. Advanced biotechnology/biomedicine equipment based on MEMS and NEMS. Fundamentals of MEMS/NEMS sensing techniques and the biological and physics principles involved and the preferred MEMS and NEMS manufacturing techniques.

Restriction: Graduate students only.

Concurrent with ENGRMAE 153.

**ENGRMAE 254. Mechanics of Solids and Structures. 4 Units.**

Finite deformation kinematics; stress and strain measures; invariance in solid mechanics; objective rates; constitutive theory of elastic and inelastic solids; rate formulations; computational approaches; theories of plates and shells; applications to aerospace vehicles.

Restriction: Graduate students only.

**ENGRMAE 254P. Mechanics of Solids and Structures. 4 Units.**

Finite deformation kinematics; stress and strain measures; invariance in solid mechanics; objective rates; constitutive theory of elastic and inelastic solids; rate formulations; computational approaches; theories of plates and shells; applications to aerospace vehicles.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 255. Composite Materials and Structures. 4 Units.**

Motivation for composite materials. Different classifications according to the nature of the matrix (PMC, MMC, CMC) and the reinforcement topology (fibers, whiskers, particulates). Mechanical properties. Failure mechanisms. Designing with composite materials. Advantages and limitations of homogenization techniques for numerical modeling.

Restriction: Graduate students only.

Concurrent with ENGRMAE 155.

**ENGRMAE 256. Nanomechanics. 4 Units.**

Nanoscale materials and the experimental and computational techniques used to measure their properties. Mechanical behavior is the main focus, but other material properties such as diffusion and electron transport are discussed.

Restriction: Graduate students only.

**ENGRMAE 257P. Fabrication and Characterization of Nanomaterials . 4 Units.**

Introduction to nanoscale materials and experimental and computational techniques. Topics materials synthesis techniques, thin film deposition, nanoparticle and nanowire growth, characterization with electrons and X-rays, forces and surface interactions at the nanoscale, structure-property scaling laws, and atomistic/multiscale computer modeling.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 258. Mechanical Behavior of Solids - Continuum Theories. 4 Units.**

Presents a continuum, macroscopic view of deformation and failure of solids. Covers elasticity, plasticity, visco-elasticity, visco-plasticity, fracture and fatigue. Topics include discussions of physical behavior, mathematical formalism and measurement techniques.

Prerequisite: ENGRMAE 254

Restriction: Graduate students only.

**ENGRMAE 259. Mechanical Behavior of Solids - Atomistic Theories. 4 Units.**

Presents atomistic mechanisms that control mechanical behavior of materials. Covers plasticity, dislocation theory, strengthening mechanisms, high-temperature diffusion and grain boundary sliding, shear localization, void formation, ductile rupture, brittle fracture and fatigue.

Restriction: Graduate students only.

**ENGRMAE 259P. Mechanical Behavior of Solids - Atomistic Theories. 4 Units.**

Presents atomistic mechanisms that control mechanical behavior of materials. Covers plasticity, dislocation theory, strengthening mechanisms, high-temperature diffusion and grain boundary sliding, shear localization, void formation, ductile rupture, brittle fracture, and fatigue.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 260. Current Issues Related to Air Quality, Climate, and Energy. 4 Units.**

Current issues related to the atmosphere, climate, and air quality in the context of energy conversion and sustainability. Topics include transportation systems; building design; impacts on humans and ecosystems; modeling and meteorology; economics; and application to public policies.

Prerequisite: ENGRMAE 261 or CHEM 245 or EARTHSS 240

Same as CHEM 241.

Restriction: Graduate students only.

**ENGRMAE 270A. Linear Systems I. 4 Units.**

Input-output and state-space representations of continuous-time linear systems. State transition matrices, Controllability and observability. Irreducible realizations. State feedback and observer design.

Restriction: Graduate students only.

**ENGRMAE 270B. Linear Systems II. 4 Units.**

Advanced topics in linear systems: bases, linear operator representations, and Jordan forms. Review of dynamical systems, and stability. Time-varying systems, discrete-time representations, and multi-input/multi-output systems. Introduction to continuous and discrete time linear regulator (LQR) problems. Not offered every year.

Prerequisite: ENGRMAE 270A

Restriction: Graduate students only.

**ENGRMAE 272. Robust Control Theory. 4 Units.**

Methods for control design of systems with uncertainty. Feedback stability and small gain theorem. Multivariable stability margins and multiplier theory. H-infinity-optimal control, linear matrix inequalities. Not offered every year.

Prerequisite: ENGRMAE 270A

Restriction: Graduate students only.

**ENGRMAE 274. Optimal Control. 4 Units.**

Principles and methods of optimal control. Topics include objectives and issues in controlling nonlinear systems; linear variational and adjoint equations; optimality conditions via variational calculus, maximum principle, and dynamic programming; solution methods; applications to control robots and aerospace vehicles.

Prerequisite: ENGRMAE 200A and ENGRMAE 270A

Restriction: Graduate students only.

**ENGRMAE 275. Nonlinear Feedback Systems. 4 Units.**

Advanced tools for feedback control system analysis and synthesis. Norms, operators,  $L_p$  spaces, contraction mapping theorem, Lyapunov techniques along with their extensions. Circle criterion positivity and passivity. Applications to nonlinear control methods, such as sliding mode or adaptive techniques.

Prerequisite: ENGRMAE 270B

Restriction: Graduate students only.

**ENGRMAE 276. Geometric Nonlinear Control. 4 Units.**

Using the mathematics of differential geometry, a number of the concepts and results of linear systems theory have been extended to nonlinear systems. Describes these extensions and illustrate their use in nonlinear system analysis and design. Not offered every year.

Prerequisite: ENGRMAE 200A and ENGRMAE 270A

Restriction: Graduate students only.

**ENGRMAE 277. Learning Control Systems. 4 Units.**

Supervised learning for classification and regression: perceptrons, support vector machines, feed-forward neural networks, Gaussian processes. Generalization and model selection: cross-validation, regularization, and Bayesian methods. Unsupervised learning: clustering and dimensionality reduction. Learning control systems. Introduction to reinforcement learning.

Restriction: Graduate students only.

**ENGRMAE 278. Parameter and State Estimation. 4 Units.**

Bayesian and frequentist approaches to parameter and state estimation. Properties of estimators. Linear Gaussian systems and the Kalman Filter. Nonlinear state estimation, extended and unscented Kalman Filters. Introduction to Monte Carlo methods and particle filtering. Application to tracking and navigation.

Prerequisite: ENGRMAE 200A and ENGRMAE 270A

Restriction: Graduate students only.

**ENGRMAE 279. Special Topics in Mechanical Systems. 4 Units.**

Selected topics of current interest in mechanical systems. Topics include robotics, kinematics, control, dynamics, and geometric modeling.

Prerequisite: ENGRMAE 270A and ENGRMAE 241

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ENGRMAE 280. Design of Computer-Controlled Robots. 4 Units.**

The basic aspects of mechatronic design are covered, including motor and sensor selection, control strategies, finite state machines, inertial measurement units, and implementation of advanced feedback control laws. Students work in groups to create their own mechatronic device. Materials fee.

Restriction: Graduate students only.

Concurrent with ENGRMAE 172.

**ENGRMAE 284. Fundamentals of Experimental Design. 4 Units.**

Fundamentals and principles of statistical experimental design and analysis. Emphasis addresses understanding and use of designed experiments, response surfaces, linear regression modeling, process optimization, and development of links between empirical and theoretical models.

Restriction: Graduate students only.

Concurrent with ENGRMAE 184.

**ENGRMAE 294. Master of Science Thesis Project. 4 Units.**

Tutorial in which masters-level students taking the comprehensive examination option undertake a masters-level research project.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ENGRMAE 295. Special Topics in Mechanical and Aerospace Engineering. 1-4 Units.**

Special topics by individual faculty in major fields of interest.

Repeatability: Unlimited as topics vary.

**ENGRMAE 295P. Special Topics in Mechanical and Aerospace Engineering. 4 Units.**

Studies in selected areas of Mechanical and Aerospace Engineering. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 296. Master of Science Thesis Research. 1-16 Units.**

Individual research or investigation conducted in the pursuit of preparing and completing the thesis required for the M.S. in Engineering.

Repeatability: May be repeated for credit unlimited times.

**ENGRMAE 297. Doctor of Philosophy Dissertation Research. 1-16 Units.**

Individual research or investigation conducted in the pursuit of preparing and completing the dissertation required for the Ph.D. in Engineering.

Repeatability: May be repeated for credit unlimited times.

**ENGRMAE 298. Seminars in Mechanical and Aerospace Engineering. 1 Unit.**

Presentation of advanced topics and reports of current research efforts in mechanical engineering. Required of all graduate students in mechanical engineering.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**ENGRMAE 299. Individual Research. 1-16 Units.**

Individual research or investigation under the direction of an individual faculty member.

Repeatability: May be repeated for credit unlimited times.

Restriction: Consent of instructor to enroll

## Department of Biomedical Engineering

**Zoran Nenadic, Department Chair**

3120 Natural Sciences II

949-824-9196

<http://www.eng.uci.edu/dept/bme> (<http://www.eng.uci.edu/dept/bme/>)

Biomedical engineering combines engineering expertise with medical needs for the enhancement of health care. It is a branch of engineering in which knowledge and skills are developed and applied to define and solve problems in biology and medicine. Students choose the biomedical engineering field to be of service to people, for the excitement of working with living systems, and to apply advanced technology to the complex problems of medical care. Biomedical engineers may be called upon to design instruments and devices, to bring together knowledge from many sources to develop new procedures, or to carry out research to acquire knowledge needed to solve new problems.

During the last 20 years, we have witnessed unprecedented advances in engineering, medical care, and the life sciences. The combination of exploding knowledge and technology in biology, medicine, the physical sciences, and engineering, coupled with the changes in the way health care will be delivered in the next century, provide a fertile ground for biomedical engineering. Biomedical engineering, at the confluence of these fields, has played a vital role in this progress. Traditionally, engineers have been concerned with inanimate materials, devices, and systems, while life scientists have investigated biological structure and function. Biomedical engineers integrate these disciplines in a unique way, combining the methodologies of the physical sciences and engineering with the study of biological and medical problems. The collaboration between engineers, physicians, biologists, and physical scientists is an integral part of this endeavor and has produced many important discoveries in the areas of artificial organs, artificial implants, and diagnostic equipment.

The Department offers a B.S. in Biomedical Engineering (BME), a four-year engineering curriculum accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org/>), <http://www.abet.org>. This program prepares students for a wide variety of careers in Biomedical Engineering in industry, hospitals, and research laboratories or for further education in graduate school.

The Department also offers a B.S. in Biomedical Engineering: Premedical (BMEP), a four-year engineering curriculum taken with required premedical courses. It is one of many majors that can serve as preparation for further training in medical, veterinary, or allied health professions. It is also suitable for students interested in pursuing graduate work in Biomedical Engineering and other biomedical areas such as physiology, neurosciences, and bioinformatics. The curriculum has less engineering content but more biological sciences and chemistry course work than the Biomedical Engineering major. The undergraduate major in Biomedical Engineering: Premedical is not designed to be accredited, therefore is not accredited by ABET.

Areas of graduate study and research include biophotonics, biomedical nanoscale systems, biomedical computational technologies, and tissue engineering.

- Biomedical Engineering, B.S.
- Biomedical Engineering, M.S.
- Biomedical Engineering, Minor
- Biomedical Engineering, Ph.D.
- Biomedical Engineering: Premedical, B.S.

## Faculty

Kyriacos Athanasiou, Ph.D. Columbia University, *Henry Samueli Chair in Engineering and Director of DELTAi (Directing Engineering and Life Science Translational Advances at Irvine) and Distinguished Professor of Biomedical Engineering* (understanding and enhancing the healing processes of musculoskeletal tissues as well as the body's cartilaginous tissues, effecting translation of engineering innovations to clinical use, especially in terms of instruments and devices)

Michael W. Berns, Ph.D. Cornell University, *Arnold and Mabel Beckman Chair in Laser Biomedicine and Professor of Surgery; Biomedical Engineering; Developmental and Cell Biology*

Elliot L. Botvinick, Ph.D. University of California, San Diego, *Professor of Surgery; Biomedical Engineering*

Gregory Brewer, Ph.D. University of California, San Diego, *Adjunct Professor of Biomedical Engineering* (neuronal networks, decoding brain learning and memory, brain-inspired computing, Alzheimer's disease, brain aging, neuron cell culture)

James P. Brody, Ph.D. Princeton University, *Associate Professor of Biomedical Engineering* (bioinformatics, micro-nanoscale systems)

Bernard H. Choi, Ph.D. University of Texas at Austin, *Professor of Surgery; Biomedical Engineering*

Michelle Digman, Ph.D. University of Illinois at Chicago, *Associate Professor of Biomedical Engineering; Developmental and Cell Biology* (biophotonics, fluorescence Spectroscopy and microscopy, nano-scale imaging, mechanotransduction, cancer cell migration, fluorescence lifetime and metabolic mapping)

Timothy L. Downing, Ph.D. University of California, Berkeley, *Assistant Professor of Biomedical Engineering; Microbiology and Molecular Genetics* (stem cells and tissue engineering, regenerative biology, cell programming, epigenomics, mechanobiology)

Anthony J. Durkin, Ph.D. University of Texas at Austin, *Associate Professor of Biomedical Engineering* (spatial frequency domain imaging, wide field functional imaging, quantitative near-infrared spectroscopy of superficial tissues, chemometrics, fluorescence spectroscopy, quantitative spectral imaging)

Enrico Gratton, Ph.D. University of Rome, *Distinguished Professor of Biomedical Engineering; Developmental and Cell Biology; Physics and Astronomy* (design of new fluorescence instruments, protein dynamics, single molecule, fluorescence microscopy, photon migration in tissues)

Anna Grosberg, Ph.D. California Institute of Technology, *Associate Professor of Biomedical Engineering; Chemical and Biomolecular Engineering* (computational modeling of biological systems, biomechanics, cardiac tissue engineering)

Jered Haun, Ph.D. University of Pennsylvania, *Associate Professor of Biomedical Engineering; Chemical and Biomolecular Engineering; Materials Science and Engineering* (nanotechnology, molecular engineering, computational simulations, targeted drug delivery, clinical cancer detection)

Elliot E. Hui, Ph.D. University of California, Berkeley, *Associate Professor of Biomedical Engineering* (microscale tissue engineering, bioMEMS, cell-cell interactions, global health diagnostics)

Tibor Juhasz, Ph.D. Attila József University, *Professor of Ophthalmology; Biomedical Engineering*

Arash Kheradvar, Ph.D. California Institute of Technology, *Professor of Biomedical Engineering; Mechanical and Aerospace Engineering* (cardiac mechanics, cardiovascular devices, cardiac imaging)

Michelle Khine, Ph.D. University of California, Berkeley, *Professor of Biomedical Engineering; Chemical and Biomolecular Engineering; Materials Science and Engineering* (development of novel nano- and micro-fabrication technologies and systems for single cell analysis, stem cell research, in-vitro diagnostics)

Christine King, Ph.D. University of California, Irvine, *Assistant Professor of Teaching of Biomedical Engineering* (engineering and STEM education, active learning, wireless health systems, rehabilitation, brain-computer interfaces, robotics)

Frithjof Kruggel, M.D. Ludwig Maximilian University of Munich, *Professor of Biomedical Engineering* (biomedical signal and image processing, anatomical and functional neuroimaging in humans, structure-function relationship in the human brain)

Abraham P. Lee, Ph.D. University of California, Berkeley, *Professor of Biomedical Engineering; Mechanical and Aerospace Engineering* (integrated point-of-care diagnostics, engineered 'theranostic' vesicles and particles, active cell sorting microdevices, microphysiological microsystems, and high throughput droplet bioassays)

Chang C. Liu, Ph.D. Scripps Research Institute, *Assistant Professor of Biomedical Engineering; Chemistry; Molecular Biology and Biochemistry* (genetic engineering, directed evolution, synthetic biology, chemical biology)

Wendy F. Liu, Ph.D. Johns Hopkins University, *Associate Professor of Biomedical Engineering; Chemical and Biomolecular Engineering* (biomaterials, microdevices in cardiovascular engineering, cell-cell and cell-micro-environment interactions, cell functions and controls)

Beth A. Lopour, Ph.D. University of California, Berkeley, *Assistant Professor of Biomedical Engineering; Mechanical and Aerospace Engineering* (computational neuroscience, signal processing, mathematical modeling, epilepsy, translational research)

Joshua Mauney, Ph.D. Tufts University, *Jerry D. Choate Presidential Chair in Urology Tissue and Engineering and Associate Professor of Urology; Biomedical Engineering*

Zoran Nenadic, Ph.D. Washington University, *William J. Link Chair in Biomedical Engineering and Department Chair and Professor of Biomedical Engineering; Electrical Engineering and Computer Science* (adaptive biomedical signal processing, control algorithms for biomedical devices, brain-machine interfaces, modeling and analysis of biological neural networks)

Ronke Olabisi, Ph.D. University of Wisconsin-Madison, *Assistant Professor of Biomedical Engineering* (orthopedic tissue engineering and regenerative medicine for injury, aging, disease, and space flight)

Daryl Preece, Ph.D. University of Glasgow, *Assistant Professor of Biomedical Engineering* (nano-optics, neuro-photonics, optical forces and mechanotransduction, singular optics, and biophotonics)

William C. Tang, Ph.D. University of California, Berkeley, *Professor of Biomedical Engineering; Chemical and Biomolecular Engineering; Electrical Engineering and Computer Science* (micro-electro-mechanical systems (MEMS) nanoscale engineering for biomedical applications, microsystems integration, microimplants, microbiomechanics, microfluidics)

## Affiliate Faculty

Alpesh N. Amin, M.D. M.B.A. Northwestern University, *Department Chair and Thomas and Mary Cesario Endowed Chair in Medicine and Professor of Medicine; Biomedical Engineering; Paul Merage School of Business; Program in Public Health; Radiological Sciences*

Pierre F. Baldi, Ph.D. California Institute of Technology, *Director of the Institute for Genomics and Bioinformatics and Distinguished Professor of Computer Science; Biological Chemistry; Biomedical Engineering; Developmental and Cell Biology; Mathematics* (artificial intelligence and machine learning, biomedical informatics, databases and data mining, environmental informatics, statistics and statistical theory)

Bruce Blumberg, Ph.D. University of California, Los Angeles, *Professor of Developmental and Cell Biology; Biomedical Engineering; Environmental Health Sciences; Pharmaceutical Sciences* (gene regulation by nuclear hormone receptors in vertebrate development physiology, endocrine disruption)

Andrew Browne, M.D., Ph.D. University of Cincinnati, *Health Sciences Assistant Clinical Professor of Ophthalmology; Biomedical Engineering*

Peter J. Burke, Ph.D. Yale University, *Professor of Electrical Engineering and Computer Science; Biomedical Engineering; Materials Science and Engineering* (nano-electronics, bio-nanotechnology)

Hung Cao, Ph.D. University of Texas at Arlington, *Assistant Professor of Electrical Engineering and Computer Science; Biomedical Engineering* (MEMS, sensors, implants, heart disease, neurological disease, wireless biomedical systems)

Dan M. Cooper, M.D. University of California, San Francisco, *Senior Associate Dean, Clinical Translational Science and Associate Vice Chancellor, Clinical Translational Research and Professor of Pediatrics; Biomedical Engineering; Pharmaceutical Sciences*

Robert Corn, Ph.D. University of California, Berkeley, *UCI Distinguished Professor of Chemistry; Biomedical Engineering* (analytical, chemical biology, physical chemistry and chemical physics, polymer, materials, nanoscience)

Nancy A. Da Silva, Ph.D. California Institute of Technology, *Professor of Chemical and Biomolecular Engineering; Biomedical Engineering* (molecular biotechnology, metabolic engineering and synthetic biology, eukaryotic expression systems, biorenewable chemicals)

Hamid Djalilian, M.D. University of Minnesota, *Professor of Otolaryngology; Biomedical Engineering*

James Earthman, Ph.D. Stanford University, *Professor of Materials Science and Engineering; Biomedical Engineering* (biomaterials, compositionally complex materials, nanocrystalline alloys, quantitative percussion diagnostics, deformation and damage processes)

Rahim Esfandiyarpour, Ph.D. Stanford University, *Assistant Professor of Electrical Engineering and Computer Science; Biomedical Engineering* (nanotechnology and nanoscience, flexible electronics, MEMS and NEMS fabrication and modeling, stretchable and wearable bio devices, translational micro/nanotechnologies, biological and chemical sensors, microfluidics, microelectronics circuits and systems, physiological monitoring, Internet of Things (IOT) bio devices, technology development for personalized/precision medicine, and Point of Care (POC) diagnostics)

Gregory R.D. Evans, M.D. University of Southern California, *Department Chair and Professor of Plastic Surgery; Biomedical Engineering; Surgery*

Lisa Flanagan-Monuki, Ph.D. University of California, San Diego, *Associate Professor of Neurology; Anatomy and Neurobiology; Biomedical Engineering*

Ron D. Frostig, Ph.D. University of California, Los Angeles, *Professor of Neurobiology and Behavior; Biomedical Engineering*

Zhibin Guan, Ph.D. University of North Carolina at Chapel Hill, *Professor of Chemistry; Biomedical Engineering; Chemical and Biomolecular Engineering; Materials Science and Engineering* (chemical biology, organic and synthetic, polymer, materials, nanoscience)

Gultekin Gulsen, Ph.D. Bogazici University, *Associate Professor of Radiological Sciences; Biomedical Engineering; Physics and Astronomy*

Ranjan Gupta, M.D. Albany Medical College, *Professor of Orthopaedic Surgery; Biomedical Engineering*

Frank P.K. Hsu, M.D. University of Maryland, College Park, *Department Chair and Department Chair of Physical Medicine and Rehabilitation and Professor of Neurological Surgery; Biomedical Engineering; Otolaryngology*

Lan Huang, Ph.D. University of Florida, *Professor of Physiology and Biophysics; Biological Chemistry; Biomedical Engineering; Pharmaceutical Sciences*

Christopher C. Hughes, Ph.D. University of London, *Director of Edwards Lifesciences Center for Advanced Cardiovascular Technology and Professor of Molecular Biology and Biochemistry; Biomedical Engineering* (tissue engineering, growth and patterning of blood vessels)

James V. Jester, Ph.D. University of Southern California, *Jack H. Skirball Chair in Ophthalmology Research and Professor of Ophthalmology; Biomedical Engineering*

Joyce H. Keyak, Ph.D. University of California, San Francisco, *Professor in Residence of Radiological Sciences; Biomedical Engineering; Mechanical and Aerospace Engineering*

Baruch D. Kuppermann, M.D., Ph.D. University of Miami, *California Institute of Technology, Director, Gavin Herbert Eye Institute; Roger F. Steinart, M.D., Endowed Chair in Ophthalmology and Department Chair and Professor of Ophthalmology; Biomedical Engineering*

Young Jik Kwon, Ph.D. University of Southern California, *Professor of Pharmaceutical Sciences; Biomedical Engineering; Chemical and Biomolecular Engineering; Molecular Biology and Biochemistry* (gene therapy, drug delivery, cancer-targeted therapeutics, artificially-induced cellular vesicles, multi-modal therapies)

Jonathan Lakey, Ph.D. University of Alberta, *Professor of Surgery; Biomedical Engineering*

Arthur D. Lander, Ph.D. University of California, San Francisco, *Donald Bren Professor and Professor of Developmental and Cell Biology; Biomedical Engineering; Logic and Philosophy of Science* (systems biology of development, pattern formation, growth control)

Guann-Pyng Li, Ph.D. University of California, Los Angeles, *Director of the UCI Division of the California Institute for Telecommunications and Information Technology (Calit2), Director of the Integrated Nanosystems Research Facility and Professor of Electrical Engineering and Computer Science; Biomedical Engineering* (micro/nano technology for sensors and actuators, internet of things (IoT), smart manufacturing, biomedical devices and millimeter wave wireless communication)

Jack J. Lin, M.D. Rush University, *Associate Professor of Neurology; Biomedical Engineering*

John S. Lowengrub, Ph.D. Courant Institute of Mathematical Sciences, *Chancellor's Professor of Mathematics; Biomedical Engineering* (applied and computational mathematics, mathematical and computational biology)

Ray Luo, Ph.D. University of Maryland, College Park, *Professor of Molecular Biology and Biochemistry; Biomedical Engineering; Chemical and Biomolecular Engineering; Materials Science and Engineering* (protein structure, noncovalent associations involving proteins)

Marc J. Madou, Ph.D. Ghent University, *UCI Chancellor's Professor of Mechanical and Aerospace Engineering; Biomedical Engineering; Chemical and Biomolecular Engineering* (miniaturization science (MEMS and NEMS) with emphasis on chemical and biological applications )

John Middlebrooks, Ph.D. University of California, San Francisco, *Professor of Otolaryngology; Biomedical Engineering; Cognitive Sciences; Neurobiology and Behavior*

Sabee Y. Molloy, Ph.D. University of Wisconsin-Madison, *Professor of Radiological Sciences; Biomedical Engineering*

Jogeshwar Mukherjee, Ph.D. Jodhpur National University, *Professor in Residence of Radiological Sciences; Biomedical Engineering*

J. Stuart Nelson, Ph.D. University of California, Irvine, *Professor of Surgery; Biomedical Engineering*

Qing Nie, Ph.D. Ohio State University, *Director of the NSF-Simons Center for Multiscale Cell Fate Research and Chancellor's Professor of Mathematics; Biomedical Engineering* (applied and computational mathematics, mathematical and computational biology)

Pranav Patel, M.D. Saint Louis University, *Chief, Division of Cardiology; Director of Cardiac Catheterization Laboratory and Cardiac Care Unit (CCU) and Health Sciences Associate Clinical Professor of Medicine; Biomedical Engineering*

David J. Reinkensmeyer, Ph.D. University of California, Berkeley, *Professor of Anatomy and Neurobiology; Biomedical Engineering; Mechanical and Aerospace Engineering; Physical Medicine and Rehabilitation*

Phillip C-Y Sheu, Ph.D. University of California, Berkeley, *Professor of Electrical Engineering and Computer Science; Biomedical Engineering; Computer Science* (semantic computing, robotic computing, artificial intelligence, biomedical computing, multimedia computing)

Andrei M. Shkel, Ph.D. University of Wisconsin-Madison, *Professor of Mechanical and Aerospace Engineering; Biomedical Engineering; Electrical Engineering and Computer Science* (design and advanced control of micro-electro-mechanical systems (MEMS); high precision micro-machined gyroscopes; MEMS-enhanced optical systems, tools and prosthetic appliances; electromechanical and machine-information systems integration)

Zuzanna S. Siwy, Ph.D. Silesian University of Technology, *Professor of Physics and Astronomy; Biomedical Engineering; Chemistry*

Ramesh Srinivasan, Ph.D. Tulane University, *Department Chair and Professor of Cognitive Sciences; Biomedical Engineering* (perception, attention, decision-making, cognitive and clinical neuroscience)

Peter Tseng, Ph.D. University of California, Los Angeles, *Assistant Professor of Electrical Engineering and Computer Science; Biomedical Engineering* ((bio) Micro-Electro-Mechanical systems, wearable technology, materials-by-design, bioelectromagnetism, nanotechnology)

Vasan Venugopalan, Sc.D. Massachusetts Institute of Technology, *Department Chair and Professor of Chemical and Biomolecular Engineering; Biomedical Engineering; Materials Science and Engineering; Mechanical and Aerospace Engineering; Surgery* (laser-generated thermal, mechanical and radiative transport processes for application in medical diagnostics, imaging, therapeutics, biotechnology)

Szu-Wen Wang, Ph.D. Stanford University, *Professor of Chemical and Biomolecular Engineering; Biomedical Engineering* (combining principles of self-assembly with nature-inspired macromolecular systems to engineer new materials and therapeutic strategies)

H. Kumar Wickramasinghe, Ph.D. University of London, *Henry Samueli Endowed Chair in Engineering and Professor of Electrical Engineering and Computer Science; Biomedical Engineering* (nanoscale measurements and characterization, scanning probe microscopy, storage technology, nano-bio measurement technology)

Brian Wong, M.D. Johns Hopkins University, *Professor of Otolaryngology; Biomedical Engineering*

Xiangmin Xu, Ph.D. Vanderbilt University, *Professor of Anatomy and Neurobiology; Biomedical Engineering; Computer Science*

Albert Fan Yee, Ph.D. University of California, Berkeley, *Professor of Chemical and Biomolecular Engineering; Biomedical Engineering* (physics of polymers and soft materials, and their applications in nanotechnology and biomedical devices. Mechanics and toughening of polymers and composites)

Fan-Gang Zeng, Ph.D. Syracuse University, *Director of Hearing Research and Professor of Otolaryngology; Anatomy and Neurobiology; Biomedical Engineering; Cognitive Sciences*

Weian Zhao, Ph.D. McMaster University, *Associate Professor of Pharmaceutical Sciences; Biological Chemistry; Biomedical Engineering; Materials Science and Engineering* (stem cell therapy, diagnostics, biosensors, immunotherapy, single-cell analysis)

## Courses

### **BME 1. Introduction to Biomedical Engineering. 3 Units.**

Introduction to the central topics of biomedical engineering. Offers a perspective on bioengineering as a discipline in a seminar format. Principles of problem solving, design, engineering inventiveness, entrepreneurship, information access, communication, ethics, teamwork, and social responsibility are emphasized.

(Design units: 1)

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment.

### **BME 3. Engineering Innovations in Treating Diabetes. 4 Units.**

Innovations in diabetes treatment from the 1800s until the present: purification of insulin, measuring and control of blood glucose, recombinant DNA, clinical trials, and ethics. Solving optimization problems in engineering with Excel.

(II and VA ).

### **BME 50A. Cell and Molecular Engineering. 4 Units.**

Molecular, structural, genetic, biophysical, and cellular principles of life and bioengineering. Introduction to molecular bioengineering, genetic engineering, synthetic biology, and cell biology. Applications to genetic and biomolecular design.

(Design units: 1)

Corequisite: BME 1

Prerequisite: CHEM 1C or CHEM H2C

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

### **BME 50B. Cell and Molecular Engineering. 4 Units.**

Physiological function from a cellular, molecular, and biophysical perspective. Introduction to genetics, neuronal signaling, and cell cycle control.

(Design units: 1)

Prerequisite: BME 50A

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment.

### **BME 60A. Engineering Analysis/Design: Data Acquisition. 4 Units.**

Fundamentals of LabVIEW programming, basics of computer-based experimentation, establishing interface between computer and data acquisition instrumentation, signal conditioning basics. Materials fee.

(Design units: 2)

Prerequisite: PHYS 7D

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment.

### **BME 60B. Engineering Analysis/Design: Data Analysis. 4 Units.**

Overview of MATLAB; numeric, cell, and structure arrays; file management; plotting and model building; solving linear algebraic equations; signal and image processing. Materials fee.

(Design units: 1)

Prerequisite: MATH 3A

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment.

**BME 60C. Engineering Analysis/Design: Computer-Aided Design. 4 Units.**

Introduction to SolidWorks and Computer-Aided Design software; design; analysis; rapid prototyping; visualization and presentation; manufacturing planning. Materials fee.

(Design units: 2)

Prerequisite or corequisite: BME 1

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment.

**BME 60D. Engineering Analysis/Design: Finite-Element Simulation. 4 Units.**

Introduction to finite-element simulation; fundamentals of Multiphysics simulation;.

(Design units: 2)

Prerequisite: BME 60B and BME 60C

**BME 110A. Biomechanics I. 4 Units.**

Introduction to statics and dynamics. Topics include rigid bodies, analysis of structures, forces in beams, moments of inertia, friction, kinetics, work, and energy.

(Design units: 1)

Prerequisite: PHYS 7C and MATH 3A and MATH 3D and BME 60B and BME 60C

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**BME 110B. Biomechanics II. 4 Units.**

Introduction to biomechanics from subcellular to tissue levels. Introduction to stress, strain, and constitutive laws of cells and tissues. Emphasis is placed on biosolids. Introduction to elastic and viscoelastic behaviors with emphasis on the standard linear model of viscoelasticity.

(Design units: 1)

Prerequisite: BME 110A

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**BME 110C. Biomechanics III. 4 Units.**

Introduction to human biomechanics with emphasis on cardiovascular biomechanics and biofluid mechanics.

(Design units: 0)

Prerequisite: BME 110B

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

**BME 111. Design of Biomaterials. 4 Units.**

Natural and synthetic polymeric materials. Metal and ceramics implant materials. Mechanical properties, degradation, surface characterization, and design of materials. Wound repair, blood clotting, foreign body response, biocompatibility of material. Artificial organs and medical devices. Government regulations.

(Design units: 3)

Corequisite: BME 50B or BIO SCI 99.

Prerequisite: CHEM 1C

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**BME 114. Genetic Engineering and Synthetic Biology. 4 Units.**

Exploring how biological function can be engineered and 'synthesized' from the DNA level up.

(Design units: 0)

Prerequisite: (CHEM 1C or CHEM H2C) and MATH 3D and BME 50A and BME 50B

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

**BME 120. Sensory Motor Systems. 4 Units.**

A quantitative and systems approach to understanding physiological systems. Systems covered include the nervous and musculoskeletal systems.

(Design units: 2)

Prerequisite: (BME 60B or EECS 10 or EECS 12 or CEE 20 or MAE 10) and MATH 3D and PHYS 7D

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

Concurrent with BME 220.

**BME 121. Quantitative Physiology: Organ Transport Systems. 4 Units.**

A quantitative and systems approach to understanding physiological systems. Systems covered include the cardiopulmonary, circulatory, and renal systems.

(Design units: 1)

Prerequisite: (BME 60B or EECS 10 or EECS 12 or CEE 20 or MAE 10) and MATH 3D

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment.

**BME 130. Biomedical Signals and Systems. 4 Units.**

Analysis of analog and digital biomedical signals; Fourier Series expansions; difference and differential equations; convolutions. System models: discrete-time and continuous-time linear time-invariant systems; Laplace and Fourier transforms. Analysis of signals and systems using computer programs.

(Design units: 1)

Corequisite: BME 60B

Prerequisite: (MATH 3A or ICS 6N) and MATH 3D. Recommended: STAT 8.

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment.

**BME 132. Introduction to Computational Biology. 4 Units.**

The use of theories and methods based on computer science, mathematics, and physics in molecular biology and biochemistry. Basics in biomolecular modeling. Analysis of sequence and structural data of biomolecules. Analysis of biomolecular functions.

Prerequisite: MATH 2D or MATH 3A or STAT 7 or STAT 8

Same as BIOL M123, CS 183.

Concurrent with MBB 223 and BME 232.

**BME 135. Photomedicine. 4 Units.**

Studies the use of optical and engineering-based systems (laser-based) for diagnosis, treating diseases, manipulation of cells and cell function. Physical, optical, and electro-optical principles are explored regarding molecular, cellular, organ, and organism applications.

(Design units: 0)

Prerequisite: PHYS 3C or PHYS 7D

Same as BIOL D130.

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

**BME 136. Engineering Medical Optics. 4 Units.**

Principles of optics and photonics, integration of optical components into systems and devices, and analysis of physiological signals obtained from Biophotonics measurements.

(Design units: 3)

Prerequisite: BME 130 and (BME 135 or BIOL D130)

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

Concurrent with BME 251.

**BME 137. Introduction to Biomedical Imaging. 4 Units.**

Introduction to imaging modalities widely used in medicine and biology, including X-ray, computed tomography (CT), nuclear medicine (PET and SPET), ultrasonic imaging, magnetic resonance imaging (MRI), optical tomography, imaging contrast, imaging processing, and complementary nature of the imaging modalities.

(Design units: 1)

Prerequisite: BME 130 or EECS 50 or EECS 150

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

**BME 138. Spectroscopy and Imaging of Biological Systems. 4 Units.**

Principles of spectroscopy; absorption; molecular orbitals; multiphoton transitions; Jablonski diagram; fluorescence anisotropy; fluorescence decay; quenching; FRET; excited state reactions; solvent relaxations; instruments; microscopy: wide field, LSM, TPE; fluorescent probes, fluctuations spectroscopy; optical resolution and super-resolution; CARS and SHG microscopy.

(Design units: 1)

Prerequisite: (MATH 3A or ICS 6N) and MATH 3D. Recommended: STAT 8.

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment.

Concurrent with BME 238.

**BME 140. Design of Biomedical Electronics. 4 Units.**

Analog and digital circuits in bioinstrumentation. AC and DC circuit analysis, design and construction of filter and amplifiers using operational amplifier, digitization of signals and data acquisition, bioelectrical signals, design and construction of ECG instrument, bioelectrical signal measurement and analysis. Materials fee.

(Design units: 3)

Prerequisite: BME 60A and BME 130

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

**BME 142. Microfabrication. 4 Units.**

Essentials of photolithography, soft-lithography, microfabrication, Microelectromechanical Systems (MEMS), BioMEMS; applications in biomedical engineering.

(Design units: 2)

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

**BME 147. Microfluidics and Lab-on-a-Chip. 4 Units.**

Introduction to principles of microfluidics and state-of-the-art micro Total Analysis Systems (uTAS). Lab-on-a-Chip for bimolecular assays with device design principles for microscale sample preparation, flow transport, bimolecular manipulation, separation and detection, and the technologies for integrating these devices into microsystems.

(Design units: 1)

Prerequisite: BME 110C

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

Concurrent with BME 260.

**BME 148. Microimplants. 4 Units.**

Essential concepts of biomedical implants at the micro scale. Design, fabrication, and applications of several microimplantable devices including cochlear, retinal, neural, and muscular implants.

(Design units: 1)

Prerequisite: BME 111

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

Concurrent with BME 262.

**BME 149. Biomedical Microdevices . 4 Units.**

In-depth review of microfabricated devices designed for biological and medical applications. Studies of the design, implementation, manufacturing, and marketing of commercial and research bio-medical devices.

(Design units: 0)

Concurrent with BME 261.

**BME 150. Biotransport Phenomena. 4 Units.**

Fundamentals of heat and mass transfer, similarities in the respective rate equations. Emphasis on practical application of fundamental principles.

(Design units: 0)

Prerequisite: (BME 60B or CEE 20) and (MATH 3A or ICS 6N) and MATH 3D

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment.

**BME 160. Tissue Engineering. 4 Units.**

Quantitative analysis of cell and tissue functions. Emerging developments in stem cell technology, biodegradable scaffolds, growth factors, and others important in developing clinical products. Applications of bioengineering.

(Design units: 2)

Prerequisite: (BME 50B or BIOL 99) and BME 111 and BME 121 and BME 150

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment.

**BME 170. Biomedical Engineering Laboratory. 4 Units.**

Measurement and analysis of biological systems using engineering tools and techniques. Laboratory experiments involve living systems with the emphasis on measuring physiological parameters. Materials fee.

(Design units: 1)

Prerequisite: BME 50B and BME 120 and BME 130

Restriction: Biomedical Engineering Majors have first consideration for enrollment.

**BME 171. Cell and Tissue Engineering Laboratory. 4 Units.**

Techniques in molecular, cellular, and tissue engineering. Topics include bacterial and mammalian cell culture, DNA cloning and gene transfer, fabrication of biomaterial scaffolds, and immunassays and microscopy techniques for cell-based assays.

(Design units: 0)

Prerequisite: BME 160

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Biomedical Engr: Premedical Majors have first consideration for enrollment.

**BME 180A. Biomedical Engineering Design. 3 Units.**

Design strategies, techniques, tools, and protocols commonly encountered in biomedical engineering; industrial design experience in group projects; ethics, economic analysis, and FDA product approval. Materials fee.

(Design units: 3)

Prerequisite: (BME 60B or MAE 10 or EECS 10) and (BME 60C or MAE 52 or EECS 31L) and (BME 140 or MAE 106 or EECS 170B). BME 180A, BME 180B, and BME 180C must be taken in the same academic year.

Grading Option: In progress only.

Restriction: Seniors only. Biomedical Engineering Majors only.

**BME 180B. Biomedical Engineering Design. 3 Units.**

Design strategies, techniques, tools, and protocols commonly encountered in biomedical engineering; industrial design experience in group projects; ethics, economic analysis, and FDA product approval. Materials fee.

(Design units: 3)

Prerequisite: BME 180A. BME 180A, BME 180B, and BME 180C must be taken in the same academic year.

Grading Option: In progress only.

Restriction: Seniors only. Biomedical Engineering Majors only.

**BME 180C. Biomedical Engineering Design. 3 Units.**

Design strategies, techniques, tools, and protocols commonly encountered in biomedical engineering; industrial design experience in group projects; ethics, economic analysis, and FDA product approval. Materials fee.

(Design units: 3)

Prerequisite: BME 180B. BME 180A, BME 180B, and BME 180C must be taken in the same academic year.

Restriction: Seniors only. Biomedical Engineering Majors only.

**BME 195. Special Topics in Biomedical Engineering. 1-4 Units.**

Studies in selected areas of Biomedical Engineering. Topics addressed vary each quarter.

(Design units: 1-4)

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**BME 197. Seminars in Biomedical Engineering. 2 Units.**

Presentation of advanced topics and reports of current research efforts in Biomedical Engineering.

(Design units: 1-2)

Restriction: Seniors only. Biomedical Engineering Majors have first consideration for enrollment.

Concurrent with BME 298.

**BME 199. Individual Study. 1-4 Units.**

Independent research conducted in the lab of a biomedical engineering core faculty member. A formal written report of the research conducted is required at the conclusion of the quarter.

(Design units: 1-4)

Prerequisite: BIOL 194S

Repeatability: May be taken for credit for 8 units.

**BME 199P. Individual Study. 1-4 Units.**

Supervised independent reading, research, or design for undergraduate Engineering majors. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**BME 210. Molecular and Cellular Engineering. 4 Units.**

Engineering of physiological function at the genetic, cellular, and tissue scales. Topics include cloning and genetic engineering, extracellular matrix biomaterials, principles of regenerative medicine and tissue engineering, and experimental design.

Restriction: Graduate students only.

**BME 211. Microscale Tissue Engineering. 4 Units.**

Engineering of physiological function at the scale of individual cells. Topics include cell micropatterning, microfluidic tissue culture, engineering the cellular microenvironment, and microphysiological systems.

Restriction: Graduate students only.

**BME 212. Cardiovascular Mechanobiology. 4 Units.**

Advanced topics in cellular engineering and mechanobiology, with focus on the cardiovascular system. Tools and techniques used to manipulate and measure mechanical forces at the molecular, cellular, tissue, and organ levels, and their applications in cardiovascular devices and tissue engineering.

Restriction: Graduate students only.

**BME 213. Systems Cell and Developmental Biology. 4 Units.**

Introduces concepts needed to understand cell and developmental biology at the systems level, i.e., how the parts (molecules) work together to create a complex output. Emphasis on using mathematical/computational modeling to expand/modify insights provided by intuition.

Same as DEVB 232.

Restriction: Graduate students only.

**BME 215. Linking Modeling and Experiments in Bioengineering. 4 Units.**

Overview of modeling based on experimental techniques in bioengineering. Construct and evaluate models of varying complexity and to relate them to experimental data.

Prerequisite: BME 220 and BME 221

Restriction: Graduate students only.

**BME 220. Sensory Motor Systems. 4 Units.**

A quantitative and systems approach to understanding physiological systems. Systems covered include the nervous and musculoskeletal systems.

Restriction: Graduate students only.

Concurrent with BME 120.

**BME 221. Organ Transport Systems. 4 Units.**

A quantitative and systems approach to understanding physiological systems. Systems covered include the cardiopulmonary, circulatory, and renal systems.

Restriction: Graduate students only.

**BME 222. Biofluid Mechanics . 4 Units.**

Introduces principles of biofluid mechanics in a research oriented scheme and approaches a wide spectrum of biofluid related problems in human body and solutions that involves engineering concepts.

Restriction: Graduate students only.

**BME 224. Molecular and Cellular Biophotonics. 4 Units.**

Principles underlying the application of photonic technologies to biomolecular and cellular systems. Sample technologies Optical Tweezers, Linear and Nonlinear Optical Microscopy and Fluorescence Lifetime and Correlation Methods, and their use to investigate emergent problems in Molecular, Cellular, and Developmental Biology.

Same as CHEM 224.

Restriction: Graduate students only.

**BME 225. Tissue and Organ Biophotonics. 4 Units.**

Principles underlying the application of photonic technologies to tissues, organs, organisms. Sample technologies include Optical Coherence Tomography, Optical Speckle Imaging, Optoacoustic Imaging, Wide-Field Spectroscopic Imaging, Diffuse Optical Spectroscopy. Addressing the use of these technologies to detect/monitor disease and physiological processes.

**BME 230A. Applied Engineering Mathematics I. 4 Units.**

Analytical techniques applied to engineering problems in transport phenomena, process dynamics and control, and thermodynamics.

**BME 230B. Applied Engineering Mathematics II. 4 Units.**

Focuses on biomedical system identification. Includes fundamental techniques of model building and testing such as formulation, solution of governing equations, sensitivity theory, identifiability theory, and uncertainty analysis.

Restriction: Graduate students only.

**BME 232. Introduction to Computational Biology. 4 Units.**

The use of theories and methods based on computer science, mathematics, and physics in molecular biology and biochemistry. Basics in biomolecular modeling. Analysis of sequence and structural data of biomolecules. Analysis of biomolecular functions.

Same as MBB 223.

Restriction: Graduate students only.

Concurrent with BIOL M123 and CS 183 and BME 132.

**BME 233. Dynamic Systems in Biology and Medicine. 4 Units.**

Introduces principles of system theory to analyze biological, biochemical, physiological, and bioengineering systems. Analytical and computational tools are used to model and analyze dynamic systems such as population, neuronal and heart dynamics, biochemical and physiological systems, oxygen diffusion and similar.

Restriction: Graduate students only.

**BME 234. Neuroimaging Data Analysis. 4 Units.**

Knowledge and understanding of recent techniques for the analysis of healthy and pathological structure and function in neuroimaging data.

Restriction: Graduate students only.

**BME 234P. Neuroimaging Data Analysis. 4 Units.**

Knowledge and understanding of recent techniques for the analysis of healthy and pathological structure and function in neuroimaging data.

Restriction: Master of Engineering students only. Graduate students only.

**BME 238. Spectroscopy and Imaging of Biological Systems. 4 Units.**

Principles of spectroscopy; absorption; molecular orbitals; multiphoton transitions; Jablonski diagram; fluorescence anisotropy; fluorescence decay; quenching; FRET; excited state reactions; solvent relaxations; instruments; microscopy: wide field, LSM, TPE; fluorescent probes, fluctuations spectroscopy; optical resolution and super-resolution; CARS and SHG microscopy.

Restriction: Graduate students only.

Concurrent with BME 138.

**BME 240. Introduction to Clinical Medicine for Biomedical Engineering. 4 Units.**

An introduction to clinical medicine for graduate students in biomedical engineering. Lectures and rotations through nephrology, gastroenterology, pulmonary, and critical care cardiology.

Restriction: Graduate students only. Biomedical Engineering Majors only.

**BME 251. Engineering Medical Optics. 4 Units.**

Principles of optics and photonics, integration of optical components into systems and devices, and analysis of physiologic signals obtained from Biophotonics measurements.

Restriction: Graduate students only.

Concurrent with BME 136.

**BME 252. Critical Thinking in Biophotonics. 2 Units.**

Critical thematic review of current research papers in the field of Biophotonics.

Prerequisite: BME 224 or BME 225

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

**BME 260. Microfluidics and Lab-On-A-Chip. 4 Units.**

Introduction to microfluidics and state-of-the-art micro Total Analysis Systems (uTAS). Lab-on-a-Chip for biomolecular assays with device design principles for microscale sample preparation, flow transport, biomolecular manipulation, separation and detection, and the technologies for integrating these devices into microsystems.

Restriction: Graduate students only.

Concurrent with BME 147.

**BME 262. Microimplants. 4 Units.**

Essential concepts of biomedical implants at the micro scale. Design, fabrication, and applications of several microimplantable devices including cochlear, retinal, neural, and muscular implants.

Restriction: Graduate students only.

Concurrent with BME 148.

**BME 262P. Microimplants. 4 Units.**

Essential concepts of biomedical implants at the micro scale. Design, fabrication, and applications of several microimplantable devices including cochlear, retinal, neural, and muscular implants.

Restriction: Master of Engineering students only. Graduate students only.

**BME 264. Auditory Science and Technology. 2 Units.**

Advanced topics in auditory science and technology from cochlear mechanics to cochlear implants.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**BME 290. Critical Thinking and Writing. 4 Units.**

Critical thinking and writing are essential ingredients for success in scientific research. Examines examples from the scientific literature to extract principles of good scientific reasoning, experimental design, and writing.

Restriction: Graduate students only.

**BME 295. Special Topics in Biomedical Engineering. 1-4 Units.**

Studies in selected areas of Biomedical Engineering. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**BME 295P. Special Topics in Biomedical Engineering. 4 Units.**

Studies in selected areas of Biomedical Engineering. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Master of Engineering students only. Graduate students only.

**BME 296. Master of Science Thesis Research. 1-16 Units.**

Individual research or investigation conducted in the pursuit of preparing and completing the thesis required for the M.S. in Engineering.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**BME 297. Doctor of Philosophy Dissertation Research. 1-16 Units.**

Individual research or investigation conducted in the pursuit of preparing and completing the dissertation required for the Ph.D. in Engineering.

Repeatability: May be repeated for credit unlimited times.

**BME 298. Seminars in Biomedical Engineering. 2 Units.**

Presentation of advanced topics and reports of current research efforts in biomedical engineering. Designed for graduate students in the Biomedical Engineering program.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Concurrent with BME 197.

**BME 299. Individual Research. 1-16 Units.**

Individual research or investigation under the direction of an individual faculty.

Repeatability: May be repeated for credit unlimited times.

## Biomedical Engineering, B.S.

**Program Educational Objectives:** Graduates of the Biomedical Engineering program will (1) promote continuous improvement in the field of biomedical engineering; (2) communicate effectively the relevant biomedical engineering problem to be solved across the engineering, life science, and medical disciplines; (3) apply critical reasoning as well as quantitative and design skills to identify and solve problems in biomedical engineering; and (4) lead and manage biomedical engineering projects in industry, government, or academia that involve multidisciplinary team members. (Program educational objectives are those aspects of engineering that help shape the curriculum; achievement of these objectives is a shared responsibility between the student and UCI.)

Biomedical Engineering students learn engineering and principles of biology, physiology, chemistry, and physics. They may go on to design devices to diagnose and treat disease, engineer tissues to repair wounds, develop cutting-edge genetic treatments, or create computer programs to understand how the human body works.

The curriculum emphasizes education in the fundamentals of engineering sciences that form the common basis of all engineering sub-specialties. Education with this focus is intended to provide students with a solid engineering foundation for a career in which engineering practice may change rapidly. In addition, elements of bioengineering design are incorporated at every level in the curriculum. This is accomplished by integration of laboratory experimentation, computer applications, and exposure to real bioengineering problems throughout the program. Students also work as teams in senior design project courses to solve multidisciplinary problems suggested by industrial and clinical experience.

NOTE: Students may complete only one of the following programs: the major in Biomedical Engineering, the major in Biomedical Engineering: Premedical, or the minor in Biomedical Engineering.

**High School Students:** See School admissions information.

**Transfer Students:** Preference will be given to junior-level applicants with the highest grades overall, and who have satisfactorily completed the following **required** courses: two years of approved calculus, one year of calculus-based physics with laboratories (mechanics, electricity and magnetism), completion of lower-division writing, one year of general chemistry (with laboratory), and one course in introductory programming. For course equivalency specific to each college, visit <http://assist.org>.

Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. Students who enroll at UCI in need of completing lower-division coursework may find that it will take longer than two years to complete their degrees. For further information, contact The Henry Samueli School of Engineering at 949-824-4334.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Major Requirements

#### Mathematics and Basic Science Courses:

Students must complete a minimum of 48 units of mathematics and basic sciences including:

**Core Courses:**

BIO SCI 194S	Safety and Ethics for Research
CHEM 1A- 1B- 1C	General Chemistry and General Chemistry and General Chemistry
CHEM 1LC	General Chemistry Laboratory
MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
MATH 2D	Multivariable Calculus
MATH 2E	Multivariable Calculus
MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations
PHYSICS 7C	Classical Physics
PHYSICS 7LC	Classical Physics Laboratory
PHYSICS 7D- 7E	Classical Physics and Classical Physics
PHYSICS 7LD	Classical Physics Laboratory
STATS 8	Introduction to Biological Statistics

**Engineering Topics Courses:**

Students must complete a minimum of 28 units of engineering design including:

**Core Courses:**

BME 1	Introduction to Biomedical Engineering
BME 50A- 50B	Cell and Molecular Engineering and Cell and Molecular Engineering
BME 60A- 60B- 60C	Engineering Analysis/Design: Data Acquisition and Engineering Analysis/Design: Data Analysis and Engineering Analysis/Design: Computer-Aided Design
BME 110A- 110B- 110C	Biomechanics I and Biomechanics II and Biomechanics III
BME 111	Design of Biomaterials
BME 120	Sensory Motor Systems
BME 121	Quantitative Physiology: Organ Transport Systems
BME 130	Biomedical Signals and Systems
BME 140	Design of Biomedical Electronics
BME 150	Biotransport Phenomena
BME 170	Biomedical Engineering Laboratory
BME 180A- 180B- 180C	Biomedical Engineering Design and Biomedical Engineering Design and Biomedical Engineering Design

**Engineering Electives:**

Students select, with the approval of a faculty advisor a minimum of 12 units of engineering topics needed to satisfy school and major requirements. (The nominal Biomedical Engineering program will require 182 units of courses to satisfy all university and major requirements. Because each student comes to UCI with a different level of preparation, the actual number of units will vary.)

**Engineering Professional Topics Course:**

ENGR 190W	Communications in the Professional World
-----------	--

**Optional Specialization in Biophotonics****Select three of the following:**

BME 135	Photomedicine
BME 136	Engineering Medical Optics
BME 137	Introduction to Biomedical Imaging

BME 138	Spectroscopy and Imaging of Biological Systems
EECS 180A	Engineering Electromagnetics I

These courses will also satisfy the Engineering Electives requirement.

### Optional Specialization in Micro and Nano Biomedical Engineering

#### Select three of the following:

BME 142	Microfabrication
BME 147	Microfluidics and Lab-on-a-Chip
BME 148	Microimplants
MSE 141	Nano-Scale Materials and Applications
ENGRMAE 153	Advanced BIOMEMS Manufacturing Techniques

These courses will also satisfy the Engineering Electives requirement.

The sample program of study chart shown is typical for the major in Biomedical Engineering. Students should keep in mind that this program is based upon a sequence of prerequisites, beginning with adequate preparation in high school mathematics, physics, and chemistry. Students who are not adequately prepared, or who wish to make changes in the sequence for other reasons, must have their program approved by their faculty advisor. Biomedical Engineering majors are encouraged to consult with academic counselors as needed, and students who are academically at risk are mandated to see a counselor as frequently as deemed necessary by the advising staff.

Freshman		
Fall	Winter	Spring
MATH 2A	MATH 2B	MATH 2D

## Biomedical Engineering, M.S.

The Biomedical Engineering faculty have special interest and expertise in four thrust areas: Biophotonics, Biomedical Micro/Nanoscale Systems, Bioimaging and Computation, and Molecular and Cellular Engineering. Biophotonics faculty are interested in photomedicine, laser microscopy, optical coherence tomography, medical imaging, and phototherapy. Biomedical Micro/Nanoscale Systems faculty are interested in molecular engineering, polymer chemistry, molecular motors, design and fabrication of microelectromechanical systems (MEMS), integrated microsystems to study intercellular signaling, and single molecule studies of protein dynamics. Biomedical Computation faculty are interested in computational biology, biomedical signal and image processing, medical imaging, computational methods in protein engineering, and data mining.

Because of its interdisciplinary nature, biomedical engineering attracts students with a variety of backgrounds. Thus, the requirements for admission are tailored to students who have a bachelor's degree in an engineering, physical science, or biological science discipline, with a grade point average of 3.20 or higher in their upper-division course work. The minimum course work requirements for admission are six quarters of calculus through linear algebra and ordinary differential equations, three quarters of calculus-based physics, three quarters of chemistry, and two quarters of biology. Students without a physics, chemistry, or engineering undergraduate degree may be required to take additional relevant undergraduate engineering courses during their

first year in the program; any such requirements will be specifically determined by the BME Graduate Committee on a case-by-case basis and will be made known to the applicant at the time of acceptance to the program.

The recommended minimum combined verbal and quantitative portion of the GRE is 310, or a minimum combined MCAT score in Verbal Reasoning, Physical Sciences, and Biological Sciences problems of 508. A minimum score of 94 on the Test of English as a Foreign Language (TOEFL iBT) is recommended of all international students whose native language is not English. In addition, all applicants must submit three letters of recommendation.

Exceptionally promising UCI undergraduates may apply for admission through The Henry Samueli School of Engineering's accelerated M.S. and M.S./Ph.D. program, however, these students must satisfy the course work and letters of recommendation requirements described above.

## Core Requirement

Both the M.S. and Ph.D. require the students to complete 42 course units. These units include six core courses, the BME 298 seminar series, two elective courses, and four units of independent research.

A. Complete the following core courses:

BME 210	Molecular and Cellular Engineering
BME 220	Sensory Motor Systems
BME 221	Organ Transport Systems
BME 230A	Applied Engineering Mathematics I
BME 230B	Applied Engineering Mathematics II
BME 240	Introduction to Clinical Medicine for Biomedical Engineering

B. Complete:

BME 298	Seminars in Biomedical Engineering (three quarters)
---------	---

C. Complete two electives

D. Complete four units of independent research

The core courses cover the basics of cells, tissues, and physiology at the microscopic and macroscopic scale, engineering mathematics, and clinical theory. Core requirements can be waived for students entering the Ph.D. program with an M.S. degree in Biomedical Engineering.

## Elective Requirement

The two elective courses required to fulfill the course requirements for the M.S. and Ph.D. are offered within The Henry Samueli School of Engineering and the Schools of Biological Sciences, Physical Sciences, and Medicine. The electives must provide breadth in biomedical engineering, but also provide specific skills necessary to the specific research the student may undertake as part of the degree requirements. The selection of these courses should be based upon approval of the student's faculty advisor. Upper-division undergraduate courses and courses outside of the HSSoE may be selected upon approval of the BME Graduate Advisor. Elective requirements can be waived for students entering the Ph.D. program with an M.S. in Biomedical Engineering.

Students must successfully complete a minimum of 42 units of course work, as listed under "Core Requirement" and "Elective Requirement" above. A maximum of eight M.S. research units (i.e., BME 296) may be applied toward the 42-unit requirement.

In addition, the M.S. requires conducting a focused research project. Students must select a thesis advisor and complete an original research investigation including a written thesis, and obtain approval of the thesis by a thesis committee. During their research project, students are expected to enroll in at least 12 units of independent research per quarter.

The degree will be granted upon the recommendation of the Chair of the Department of Biomedical Engineering and The Henry Samueli School of Engineering Associate Dean for Student Affairs. The maximum time permitted is three years.

NOTE: Students who entered prior to fall of 2012 should follow the course requirements outlined within the *Catalogue* of the year they entered. The changes in number of units per course is not intended to change the course requirements for the degree nor to have any impact in the number of courses students are taking.

Although a student is not required to formally choose a specific research focus area, four research thrust areas have been identified for the program: Biophotonics, Biomedical Micro/Nanoscale Systems, Bioimaging & Computation, and Molecular & Cellular Engineering. These areas capitalize on existing strengths within The Henry Samueli School of Engineering and UCI as a whole, interact in a synergistic fashion, and will train biomedical engineers who are in demand in both private industry and academia.

**Biophotonics.** This research area includes the use of light to probe individual cells and tissues and whole organs for diagnostic and therapeutic purposes. The research areas include both fundamental investigation on the basic mechanisms of light interaction with biological systems and the clinical application of light to treat and diagnose disease. Current and future foci of the faculty are (1) microscope-based optical techniques to manipulate and study cells and organelles; (2) development of optically based technologies for the non-invasive diagnosis of cells and tissues using techniques

that include fiber-optic-based sensors, delivery systems, and imaging systems; and (3) development of optically based devices for minimally invasive surgery.

**Biomedical Micro/Nanoscale Systems.** This class of research areas encompasses the understanding, use and design of biomedical devices and systems that are at the micron or submicron level. Current strengths within The Henry Samueli School of Engineering and the UCI faculty as a whole include biomaterials, micro-electromechanical systems (MEMS), and the design of new biomedical molecules. The focus of biomedical engineering research in this area is the integration of micro and nano-scale systems with the needs of clinical medicine. Projected areas of growth include (1) micro/nano-electromechanical systems (M/NEMS) for biomedical devices, biofluid assay and micro implantable prosthesis (2) programmable DNA/ molecular microchip for sequencing and diagnostics; (3) cellular, tissue, and organ constructs on-a-chip; and (4) biomaterials and self-assembled nanostructures for biosensors and drug delivery.

**Biomedical Imaging & Computation.** Biomedical computational technologies include both advanced computational techniques, as well as advanced biomedical database systems and knowledge-base systems. Computational technologies that will be developed in this research area include (1) methods for biomedical analysis and diagnosis such as physical modeling of light-tissue interactions, atomic-level interactions, image processing, pattern recognition, and machine-learning algorithms; (2) language instruction and platform standardization; and (3) machine-patient interfaces. Areas of research related to biomedical database systems include the development of new technologies which can capture the rich semantics of biomedical information for intelligent reasoning.

**Molecular & Cellular Engineering.** Rapid developments in genetics, molecular biology, and cellular biology have extended the reach of engineering into the subcellular, cellular, and tissue size scales. As a result, several new fields including genetic engineering, cell-based therapy, and tissue engineering have emerged and matured in the past decades with the broad goal of extracting and applying engineering design principles to the most fundamental levels of biological organization.

## Program in Law and Graduate Studies (J.D./M.S.-BME; J.D./Ph.D.-BME)

Highly-qualified students interested in combining the study of law with graduate qualifications in the BME program are invited to undertake concurrent degree study under the auspices of UC Irvine's Program in Law and Graduate Studies (PLGS). Students in this program pursue a coordinated curriculum leading to a J.D. from the School of Law in conjunction with a Master's or Ph.D. in the BME program. Additional information is available from the PLGS Program Director's Office, 949-824-4158, or by email to [plgs@law.uci.edu](mailto:plgs@law.uci.edu). A full description of the program, with links to all relevant application information, can be found at the School of Law Concurrent Degree Programs website (<http://www.law.uci.edu/academics/interdisciplinary-studies/concurrent-degrees.html>) and in the Law School section of the *Catalogue*.

## Biomedical Engineering, Minor

The minor in Biomedical Engineering requires a total of nine courses: two advanced mathematics courses, five core Biomedical Engineering courses, and two Biomedical Engineering electives. Some of these courses may include prerequisites that may or may not be part of a student's course requirements for their major. Private biomedical industry has indicated a keen interest in engineers that have a more traditional engineering degree (i.e., electrical engineering), but also possess some in-depth knowledge of biomedical systems. Hence, the minor in Biomedical Engineering is designed to provide a student with the introductory skills necessary to perform as an engineer in the biomedical arena.

NOTE: Students may not receive both a minor in Biomedical Engineering and a specialization in Biochemical Engineering within the Chemical Engineering major.

### Mathematics Courses:

MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations

### Engineering Topics Courses:

BME 1	Introduction to Biomedical Engineering
BME 50A- 50B	Cell and Molecular Engineering and Cell and Molecular Engineering
BME 120	Sensory Motor Systems
BME 121	Quantitative Physiology: Organ Transport Systems

### Technical Electives:

Students select, with the approval of a faculty advisor, two technical elective courses:

BME 110A	Biomechanics I
BME 110B	Biomechanics II
BME 130	Biomedical Signals and Systems
BME 135/BIO SCI D130	Photomedicine
BME 136	Engineering Medical Optics
BME 140	Design of Biomedical Electronics
BME 160	Tissue Engineering

BME 199	Individual Study
CBE 181	Polymer Science and Engineering
EECS 179	Microelectromechanical Systems (MEMS)
EECS 188	Optical Electronics

## Biomedical Engineering, Ph.D.

The Biomedical Engineering faculty have special interest and expertise in four thrust areas: Biophotonics, Biomedical Micro/Nanoscale Systems, Bioimaging and Computation, and Molecular and Cellular Engineering. Biophotonics faculty are interested in photomedicine, laser microscopy, optical coherence tomography, medical imaging, and phototherapy. Biomedical Micro/Nanoscale Systems faculty are interested in molecular engineering, polymer chemistry, molecular motors, design and fabrication of microelectromechanical systems (MEMS), integrated microsystems to study intercellular signaling, and single molecule studies of protein dynamics. Biomedical Computation faculty are interested in computational biology, biomedical signal and image processing, medical imaging, computational methods in protein engineering, and data mining.

Because of its interdisciplinary nature, biomedical engineering attracts students with a variety of backgrounds. Thus, the requirements for admission are tailored to students who have a bachelor's degree in an engineering, physical science, or biological science discipline, with a grade point average of 3.20 or higher in their upper-division course work. The minimum course work requirements for admission are six quarters of calculus through linear algebra and ordinary differential equations, three quarters of calculus-based physics, three quarters of chemistry, and two quarters of biology. Students without a physics, chemistry, or engineering undergraduate degree may be required to take additional relevant undergraduate engineering courses during their first year in the program; any such requirements will be specifically determined by the BME Graduate Committee on a case-by-case basis and will be made known to the applicant at the time of acceptance to the program.

The recommended minimum combined verbal and quantitative portion of the GRE is 310, or a minimum combined MCAT score in Verbal Reasoning, Physical Sciences, and Biological Sciences problems of 508. A minimum score of 94 on the Test of English as a Foreign Language (TOEFL iBT) is recommended of all international students whose native language is not English. In addition, all applicants must submit three letters of recommendation.

Exceptionally promising UCI undergraduates may apply for admission through The Henry Samueli School of Engineering's accelerated M.S. and M.S./Ph.D. program, however, these students must satisfy the course work and letters of recommendation requirements described above.

### Core Requirement

Both the M.S. and Ph.D. require the students to complete 42 course units. These units include six core courses, the BME 298 seminar series, two elective courses, and four units of independent research.

A. Complete the following core courses:

BME 210	Molecular and Cellular Engineering
BME 220	Sensory Motor Systems
BME 221	Organ Transport Systems
BME 230A	Applied Engineering Mathematics I
BME 230B	Applied Engineering Mathematics II
BME 240	Introduction to Clinical Medicine for Biomedical Engineering

B. Complete:

BME 298	Seminars in Biomedical Engineering (three quarters)
---------	---

C. Complete two electives

D. Complete four units of independent research

The core courses cover the basics of cells, tissues, and physiology at the microscopic and macroscopic scale, engineering mathematics, and clinical theory. Core requirements can be waived for students entering the Ph.D. program with an M.S. degree in Biomedical Engineering.

### Elective Requirement

The two elective courses required to fulfill the course requirements for the M.S. and Ph.D. are offered within The Henry Samueli School of Engineering and the Schools of Biological Sciences, Physical Sciences, and Medicine. The electives must provide breadth in biomedical engineering, but also provide specific skills necessary to the specific research the student may undertake as part of the degree requirements. The selection of these courses should be based upon approval of the student's faculty advisor. Upper-division undergraduate courses and courses outside of the HSSoE may be selected upon approval of the BME Graduate Advisor. Elective requirements can be waived for students entering the Ph.D. program with an M.S. in Biomedical Engineering.

The Ph.D. requires the achievement of an original and significant body of research that advances the discipline. Students with a B.S. may enter the Ph.D. program directly, provided they meet the background requirements described above. The Graduate Committee will handle applicants on a case-by-case basis, and any specific additional courses required by the student will be made explicit at the time of admission.

Each student will match with a faculty advisor, and an individual program of study is designed by the student and their faculty advisor. Two depth courses are required beyond that of the M.S. degree in preparation for the qualifying examination. Six milestones are required: (1) successful completion of 42 units of course work beyond the bachelor's degree, as listed under "Core Requirement" and "Elective Requirement" above; (2) successful completion of a preliminary examination; (3) establishing an area of specialization by taking two depth courses and three quarters of BME 298 during the second year; (4) formal advancement to candidacy by successfully passing the qualifying examination; (5) students in their third or fourth year must present results of their current research in the BME seminar series; and (6) completion of a significant body of original research and the submission of an acceptable written dissertation and its successful oral defense. During their research project, students are expected to enroll in at least 12 units of independent research per quarter. Students entering the Ph.D. program with an M.S. in Biomedical Engineering cannot receive another M.S. in Biomedical Engineering from UCI. Therefore, the requirements for milestone (1) can be waived, and the award of the Ph.D. is based on achieving milestones (2)–(6).

The preliminary examination will normally be taken at the end of the first year (May). A student must take it within two years of matriculating in the program and must either have passed all of the core courses or have an M.S. in Biomedical Engineering prior to taking the examination. The Preliminary Examination Committee prepares the examination and sets the minimum competency level for continuing on in the Ph.D. program. Students who fail may retake the examination the following year. Students who fail the second attempt will not be allowed to continue in the program. However, they may be eligible to receive a Master's degree upon completion of an original research investigation including a written thesis (refer to Master of Science Degree requirements). In the event a Ph.D. student decides not to continue in the program, the thesis-only option for the M.S. will still be enforced. After passing the preliminary examination at the Ph.D. competency level, students will match with a BME faculty advisor and design an individual program of study with their advisor.

Advancement to candidacy must be completed by the end of the summer of the second year following the passing of the preliminary examination. (Special exceptions can be made, but a formal request with justification must be supplied in writing to the BME Graduate Advisor.) The qualifying examination follows campus and The Henry Samueli School of Engineering guidelines and consists of an oral and written presentation of original work completed thus far, and a coherent plan for completing a body of original research. The qualifying examination is presented to the student's graduate advisory committee, which is selected by the student and faculty advisor and must have a minimum of five faculty (including the faculty advisor). Of these five faculty, three must be BME faculty. In addition, one faculty member must have his/her primary appointment outside the Department of Biomedical Engineering. The fifth member must have his/her primary appointment outside of The Henry Samueli School of Engineering.

The Ph.D. is awarded upon submission of an acceptable written dissertation and its successful oral defense. The degree is granted upon the recommendation of the graduate advisory committee and the Dean of Graduate Division. The normative time for completion of the Ph.D. is five years (four years for students who entered with a master's degree). The maximum time permitted is seven years.

Requirements listed here pertain to students enrolled in academic year 2012–13 or later. Students enrolled before this date may refer to a previous version of this *Catalogue*.

Although a student is not required to formally choose a specific research focus area, four research thrust areas have been identified for the program: Biophotonics, Biomedical Micro/Nanoscale Systems, Bioimaging & Computation, and Molecular & Cellular Engineering. These areas capitalize on existing strengths within The Henry Samueli School of Engineering and UCI as a whole, interact in a synergistic fashion, and will train biomedical engineers who are in demand in both private industry and academia.

**Biophotonics.** This research area includes the use of light to probe individual cells and tissues and whole organs for diagnostic and therapeutic purposes. The research areas include both fundamental investigation on the basic mechanisms of light interaction with biological systems and the clinical application of light to treat and diagnose disease. Current and future foci of the faculty are (1) microscope-based optical techniques to manipulate and study cells and organelles; (2) development of optically based technologies for the non-invasive diagnosis of cells and tissues using techniques that include fiber-optic-based sensors, delivery systems, and imaging systems; and (3) development of optically based devices for minimally invasive surgery.

**Biomedical Micro/Nanoscale Systems.** This class of research areas encompasses the understanding, use and design of biomedical devices and systems that are at the micron or submicron level. Current strengths within The Henry Samueli School of Engineering and the UCI faculty as a whole include biomaterials, micro-electromechanical systems (MEMS), and the design of new biomedical molecules. The focus of biomedical engineering research in this area is the integration of micro and nano-scale systems with the needs of clinical medicine. Projected areas of growth include (1) micro/nano-electromechanical systems (M/NEMS) for biomedical devices, biofluid assay and micro implantable prosthesis (2) programmable DNA/ molecular microchip for sequencing and diagnostics; (3) cellular, tissue, and organ constructs on-a-chip; and (4) biomaterials and self-assembled nanostructures for biosensors and drug delivery.

**Biomedical Imaging & Computation.** Biomedical computational technologies include both advanced computational techniques, as well as advanced biomedical database systems and knowledge-base systems. Computational technologies that will be developed in this research area include (1) methods for biomedical analysis and diagnosis such as physical modeling of light-tissue interactions, atomic-level interactions, image processing, pattern recognition, and machine-learning algorithms; (2) language instruction and platform standardization; and (3) machine-patient interfaces. Areas of research related to biomedical database systems include the development of new technologies which can capture the rich semantics of biomedical information for intelligent reasoning.

**Molecular & Cellular Engineering.** Rapid developments in genetics, molecular biology, and cellular biology have extended the reach of engineering into the subcellular, cellular, and tissue size scales. As a result, several new fields including genetic engineering, cell-based therapy, and tissue engineering

have emerged and matured in the past decades with the broad goal of extracting and applying engineering design principles to the most fundamental levels of biological organization.

## Program in Law and Graduate Studies (J.D./M.S.-BME; J.D./Ph.D.-BME)

Highly-qualified students interested in combining the study of law with graduate qualifications in the BME program are invited to undertake concurrent degree study under the auspices of UC Irvine's Program in Law and Graduate Studies (PLGS). Students in this program pursue a coordinated curriculum leading to a J.D. from the School of Law in conjunction with a Master's or Ph.D. in the BME program. Additional information is available from the PLGS Program Director's Office, 949-824-4158, or by email to [plgs@law.uci.edu](mailto:plgs@law.uci.edu). A full description of the program, with links to all relevant application information, can be found at the School of Law Concurrent Degree Programs website (<http://www.law.uci.edu/academics/interdisciplinary-studies/concurrent-degrees.html>) and in the Law School section of the *Catalogue*.

## Biomedical Engineering: Premedical, B.S.

**Program Educational Objectives:** Graduates of the Biomedical Engineering: Premedical program will: (1) demonstrate a broad knowledge in the field of biomedical engineering; (2) demonstrate critical reasoning as well as quantitative skills to identify, formulate, analyze and solve biomedical problems; (3) qualify to pursue entry into a medical college, or medical research in biomedical engineering, or other professional health programs. (Program educational objectives are those aspects of engineering that help shape the curriculum; achievement of these objectives is a shared responsibility between the student and UCI.) The major program objective is to prepare students for medical school. The curriculum is designed to meet the requirements for admission to medical schools, but is also suitable for those planning to enter graduate school in biomedical engineering, physiology, biology, neurosciences, or related fields. It has less engineering content and more biological sciences than the accompanying Biomedical Engineering major. It is one of many majors that can serve as preparation for further training in medical, veterinary, or allied health professions.

The Biomedical Engineering: Premedical curriculum provides future physicians with a quantitative background in biomechanics, physiology, and biotransport. Such a background is increasingly important because of the heavy utilization of biomedical technology in modern medical practice. The curriculum includes courses in the sciences that satisfy the requirements of most medical schools.

**High School Students:** See School admissions information.

**Transfer Students:** Preference will be given to junior-level applicants with the highest grades overall, and who have satisfactorily completed the following **required** courses: two years of approved calculus, one year of calculus-based physics with laboratories (mechanics, electricity and magnetism), completion of lower-division writing, one year of general chemistry (with laboratory), one year of organic chemistry (with laboratory), and one course in introductory programming. For course equivalency specific to each college, see [assist.org](https://assist.org) (<https://assist.org>).

Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. Students who enroll at UCI in need of completing lower-division coursework may find that it will take longer than two years to complete their degrees. For further information, contact The Henry Samueli School of Engineering at 949-824-4334.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

## Major Requirements

### Mathematics and Basic Science Courses:

Students must complete a minimum of 48 units of mathematics and basic sciences including:

CHEM 1A- 1B- 1C	General Chemistry and General Chemistry and General Chemistry
CHEM 1LC- 1LD	General Chemistry Laboratory and General Chemistry Laboratory
CHEM 51A- 51B- 51C	Organic Chemistry and Organic Chemistry and Organic Chemistry
CHEM 51LB- 51LC	Organic Chemistry Laboratory and Organic Chemistry Laboratory
MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
MATH 2D	Multivariable Calculus
MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations
PHYSICS 7C	Classical Physics
PHYSICS 7LC	Classical Physics Laboratory

## PHYSICS 7D- 7E

Classical Physics  
and Classical Physics

## PHYSICS 7LD

Classical Physics Laboratory

Students select, with the approval of a faculty advisor, any additional basic science course needed to satisfy school and major requirements.

**Engineering Topics Courses:**

Students must complete the following engineering topics including:

BIO SCI 97	Genetics
BIO SCI 98	Biochemistry
BIO SCI 99	Molecular Biology
BIO SCI 100	Scientific Writing
BIO SCI D103	Cell Biology
or BIO SCI D104	Developmental Biology
BIO SCI D111L	Developmental and Cell Biology Laboratory
BIO SCI E112L- M114L- M116L	Physiology Laboratory and Biochemistry Laboratory and Molecular Biology Laboratory (select two of these three courses)
BIO SCI 194S	Safety and Ethics for Research
BME 1	Introduction to Biomedical Engineering
BME 60A- 60B- 60C	Engineering Analysis/Design: Data Acquisition and Engineering Analysis/Design: Data Analysis and Engineering Analysis/Design: Computer-Aided Design
BME 110A- 110B	Biomechanics I and Biomechanics II
BME 111	Design of Biomaterials
BME 120	Sensory Motor Systems
BME 121	Quantitative Physiology: Organ Transport Systems
BME 130	Biomedical Signals and Systems
BME 150	Biotransport Phenomena

Students select, with the approval of a faculty advisor, at least three additional engineering topics courses needed to satisfy school and major requirements.

(The nominal Biomedical Engineering: Premedical program will require 189 units of courses to satisfy all university and major requirements. Because each student comes to UCI with a different level of preparation, the actual number of units will vary).

The sample program of study chart shown is typical for the major in Biomedical Engineering: Premedical. Students should keep in mind that this program is based upon a sequence of prerequisites, beginning with adequate preparation in high school mathematics, physics, and chemistry. Students who are not adequately prepared, or who wish to make changes in the sequence for other reasons, must have their program approved by their faculty advisor. Biomedical Engineering: Premedical majors are encouraged to consult with academic counselors as needed, and students who are academically at risk are mandated to see a counselor as frequently as deemed necessary by the advising staff.

Freshman		
Fall	Winter	Spring
MATH 2A	MATH 2B	MATH 2D
CHEM 1A	CHEM 1B	CHEM 1C
BME 1	PHYSICS 7C	CHEM 1LC
General Education	PHYSICS 7LC	PHYSICS 7D
	General Education	PHYSICS 7LD
Sophomore		
Fall	Winter	Spring
MATH 3A	MATH 3D	CHEM 51C
CHEM 1LD	CHEM 51B	CHEM 51LC
CHEM 51A	CHEM 51LB	BME 60C
PHYSICS 7E	BME 60B	General Education
BME 60A	General Education	General Education

<sup>1</sup> Select two of BIO SCI E112L, BIO SCI M114L, BIO SCI M116L.

## Department of Chemical and Biomolecular Engineering

### Vasan Venugopalan, Department Chair

916 Engineering Tower

949-824-6412

<http://www.eng.uci.edu/dept/cbe> (<http://www.eng.uci.edu/dept/cbe/>)

The Department of Chemical and Biomolecular Engineering offers the B.S. in Chemical Engineering, and the M.S. and Ph.D. in Chemical and Biomolecular Engineering.

Chemical Engineering uses knowledge of chemistry, mathematics, physics, biology, and humanities to solve societal problems in areas such as energy, health, the environment, food, clothing, materials, and sustainability and serves a variety of processing industries whose vast array of products include chemicals, petroleum products, plastics, pharmaceuticals, foods, textiles, fuels, consumer products, and electronic and cryogenic materials. Chemical Engineering also advances societal goals by developing environmentally conscious and sustainable technologies to meet global challenges.

The undergraduate curriculum in Chemical Engineering builds on basic courses in chemical engineering, other branches of engineering, and electives which provide a strong background in humanities and human behavior. Elective programs developed by the student with a faculty advisor may include such areas as applied chemistry, biomolecular engineering, chemical reaction engineering, chemical processing, environmental engineering, materials science, process control systems engineering, and biomedical engineering.

- Chemical and Biomolecular Engineering, M.S.
- Chemical and Biomolecular Engineering, Ph.D.
- Chemical Engineering, B.S.

## Faculty

Tayloria Adams, Ph.D. Michigan Technological University, *Assistant Professor of Chemical and Biomolecular Engineering* (dielectrophoresis, microfluidic devices, stem cells, biomarker development, cell membrane biophysics, cell sorting)

Plamen Atanassov, Ph.D. Bulgarian Academy of Sciences, *UCI Chancellor's Professor of Chemical and Biomolecular Engineering; Chemistry; Materials Science and Engineering* (electrocatalysis and electrocatalysts for energy conversion processes; bio-electrocatalysis and energy harvesting systems)

Nancy A. Da Silva, Ph.D. California Institute of Technology, *Professor of Chemical and Biomolecular Engineering; Biomedical Engineering* (molecular biotechnology, metabolic engineering and synthetic biology, eukaryotic expression systems, biorenewable chemicals)

Alon A. Gorodetsky, Ph.D. California Institute of Technology, *Associate Professor of Chemical and Biomolecular Engineering; Chemistry; Materials Science and Engineering* (cephalopods, adaptive materials, camouflage, bioelectronics)

Juan Hong, Ph.D. Purdue University, *Professor Emeritus of Chemical and Biomolecular Engineering*

Daniel Knight, Ph.D. Ohio State University, *Assistant Professor of Teaching of Chemical and Biomolecular Engineering* (engineering pedagogy)

Han Li, Ph.D. University of California, Los Angeles, *Assistant Professor of Chemical and Biomolecular Engineering* (molecular biotechnology)

Henry Lim, Ph.D. Northwestern University, *Professor Emeritus of Chemical and Biomolecular Engineering*

Ali Mohraz, Ph.D. University of Michigan, *Associate Professor of Chemical and Biomolecular Engineering; Materials Science and Engineering* (colloid science, soft matter engineering with applications in health care and energy materials)

Robert J. Nielsen, Ph.D. California Institute of Technology, *Assistant Professor of Chemical and Biomolecular Engineering* (electronic structure, electrocatalysis, mechanism, alkane activation, homogenous catalysis)

Mikael Nilsson, Ph.D. Chalmers University of Technology, *Adjunct Professor of Chemical and Biomolecular Engineering; Materials Science and Engineering* (actinide chemistry, solvent extraction fundamental chemistry and process development, extraction and detection equipment development, radiolysis and phase composition of organic solvent)

Elizabeth L. Read, Ph.D. University of California, Berkeley, *Assistant Professor of Chemical and Biomolecular Engineering; Molecular Biology and Biochemistry* (dynamics of complex biochemical systems, regulation of immune responses)

Erdem Sasmaz, Ph.D. Stanford University, *Assistant Professor of Chemical and Biomolecular Engineering* (heterogenous catalysis and nanoparticle synthesis for clean energy production and carbon dioxide utilization)

Frank G. Shi, Ph.D. California Institute of Technology, *Professor of Chemical and Biomolecular Engineering; Materials Science and Engineering* (optoelectronic devices and materials, optoelectronic device packaging materials, optoelectronic medical devices and packaging, white LED technologies, high power LED packaging)

Vasan Venugopalan, Sc.D. Massachusetts Institute of Technology, *Department Chair and Professor of Chemical and Biomolecular Engineering; Biomedical Engineering; Materials Science and Engineering; Mechanical and Aerospace Engineering; Surgery* (laser-generated thermal, mechanical and radiative transport processes for application in medical diagnostics, imaging, therapeutics, biotechnology)

Szu-Wen Wang, Ph.D. Stanford University, *Professor of Chemical and Biomolecular Engineering; Biomedical Engineering* (combining principles of self-assembly with nature-inspired macromolecular systems to engineer new materials and therapeutic strategies)

Albert Fan Yee, Ph.D. University of California, Berkeley, *Professor of Chemical and Biomolecular Engineering; Biomedical Engineering* (physics of polymers and soft materials, and their applications in nanotechnology and biomedical devices. Mechanics and toughening of polymers and composites)

Iryna Zenyuk, Ph.D. Carnegie Mellon University, *Associate Director of National Fuel Cell Research Center and Assistant Professor of Chemical and Biomolecular Engineering; Materials Science and Engineering; Mechanical and Aerospace Engineering* (renewable energy, fuel cells, electrolyzers, batteries, X-ray imaging techniques, multi-scale modeling, transport phenomena)

## Affiliate Faculty

Shane Ardo, Ph.D. Johns Hopkins University, *Associate Professor of Chemistry; Chemical and Biomolecular Engineering; Materials Science and Engineering* (inorganic and organometallic, physical chemistry and chemical physics, polymer, materials, nanoscience)

Anna Grosberg, Ph.D. California Institute of Technology, *Associate Professor of Biomedical Engineering; Chemical and Biomolecular Engineering* (computational modeling of biological systems, biomechanics, cardiac tissue engineering)

Zhibin Guan, Ph.D. University of North Carolina at Chapel Hill, *Professor of Chemistry; Biomedical Engineering; Chemical and Biomolecular Engineering; Materials Science and Engineering* (chemical biology, organic and synthetic, polymer, materials, nanoscience)

Jered Haun, Ph.D. University of Pennsylvania, *Associate Professor of Biomedical Engineering; Chemical and Biomolecular Engineering; Materials Science and Engineering* (nanotechnology, molecular engineering, computational simulations, targeted drug delivery, clinical cancer detection)

Allon Hochbaum, Ph.D. University of California, Berkeley, *Associate Professor of Materials Science and Engineering; Chemical and Biomolecular Engineering; Chemistry* (nanoscale materials and hybrid bio-inorganic devices for applications in clean energy)

Michelle Khine, Ph.D. University of California, Berkeley, *Professor of Biomedical Engineering; Chemical and Biomolecular Engineering; Materials Science and Engineering* (development of novel nano- and micro-fabrication technologies and systems for single cell analysis, stem cell research, in-vitro diagnostics)

Young Jik Kwon, Ph.D. University of Southern California, *Professor of Pharmaceutical Sciences; Biomedical Engineering; Chemical and Biomolecular Engineering; Molecular Biology and Biochemistry* (gene therapy, drug delivery, cancer-targeted therapeutics, artificially-induced cellular vesicles, multi-modal therapies)

Matthew Law, Ph.D. University of California, Berkeley, *Associate Professor of Chemistry; Chemical and Biomolecular Engineering; Materials Science and Engineering* (inorganic and organometallic, physical chemistry and chemical physics, polymer, materials, nanoscience)

Wendy F. Liu, Ph.D. Johns Hopkins University, *Associate Professor of Biomedical Engineering; Chemical and Biomolecular Engineering* (biomaterials, microdevices in cardiovascular engineering, cell-cell and cell-micro-environment interactions, cell functions and controls)

Ray Luo, Ph.D. University of Maryland, College Park, *Professor of Molecular Biology and Biochemistry; Biomedical Engineering; Chemical and Biomolecular Engineering; Materials Science and Engineering* (protein structure, noncovalent associations involving proteins)

Marc J. Madou, Ph.D. Ghent University, *UCI Chancellor's Professor of Mechanical and Aerospace Engineering; Biomedical Engineering; Chemical and Biomolecular Engineering* (miniaturization science (MEMS and NEMS) with emphasis on chemical and biological applications )

Martha L. Mecartney, Ph.D. Stanford University, *Professor Emeritus of Materials Science and Engineering; Chemical and Biomolecular Engineering* (ceramics for energy applications and for extreme environments, flash sintering, interfacial design of thermal conductivity, transmission electron microscopy)

Bihter Padak, Ph.D. Stanford University, *Assistant Professor of Mechanical and Aerospace Engineering; Chemical and Biomolecular Engineering*

Regina Ragan, Ph.D. California Institute of Technology, *Endowed Chair for the Center for Diversity in Engineering Education and Professor of Materials Science and Engineering; Chemical and Biomolecular Engineering* (exploration and development of novel material systems for nanoscale electronic and optoelectronic devices)

Timothy Rupert, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Materials Science and Engineering; Chemical and Biomolecular Engineering; Mechanical and Aerospace Engineering* (mechanical behavior, nanomaterials, structure property relationships, microstructural stability, grain boundaries and interfaces, materials characterization)

William C. Tang, Ph.D. University of California, Berkeley, *Professor of Biomedical Engineering; Chemical and Biomolecular Engineering; Electrical Engineering and Computer Science* (micro-electro-mechanical systems (MEMS) nanoscale engineering for biomedical applications, microsystems integration, microimplants, microbiomechanics, microfluidics)

Yoon Jin Won, Ph.D. Stanford University, *Assistant Professor of Mechanical and Aerospace Engineering; Chemical and Biomolecular Engineering* (multi-scale structures for thermal and energy applications, in particular fabrication, characterization, and integration of structured materials)

## Courses

### **CBE 40A. Chemical Processes and Material Balances. 4 Units.**

Introduction to chemical engineering and the industries where chemical engineers play vital roles. Problem-solving skills and techniques. Quantitative calculations and applications using mass and energy balances. Stoichiometric equations, multiple bypasses, and others in process industries.

Prerequisite: MATH 2B and PHYS 7C and (CHEM 1B or CHEM H2B)

Restriction: Chemical Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

### **CBE 40B. Process Thermodynamics. 3 Units.**

Principles of thermodynamics: definitions, basic concepts, and laws; property relationships; construction of thermodynamic charts and tables; energy balances; phase and chemical equilibria; combined mass and energy balances.

Prerequisite: CBE 40A and (MATH 3A or ICS 6N). CBE 40A with a grade of C- or better

Restriction: Chemical Engineering Majors have first consideration for enrollment.

### **CBE 40C. Chemical Engineering Thermodynamics. 4 Units.**

Elements of chemical engineering thermodynamics, including equilibrium and stability; equations of state; generalized correlations of properties of materials; properties of ideal and non-ideal mixtures; thermodynamics of real solutions; ideal and non-ideal phase equilibria; chemical equilibria for ideal and non-ideal solutions.

Prerequisite: (EECS 10 or EECS 12 or ICS 31 or MAE 10) and MATH 2D and CBE 40B. CBE 40B with a grade of C- or better

Restriction: Chemical Engineering Majors have first consideration for enrollment.

### **CBE 100. Introduction to Numerical Methods in Engineering. 3 Units.**

An introduction to the fundamentals of numerical analysis and the computer algorithms in MATLAB for the solution of engineering problems, with emphasis on problems arising in chemical engineering thermodynamics, transport phenomena, and reaction engineering.

Prerequisite: CBE 40C

Restriction: Chemical Engineering Majors have first consideration for enrollment.

### **CBE 105. Engineering Physical Chemistry. 4 Units.**

Provides an integrated view of both classical and molecular perspectives on thermodynamics, thermodynamic potentials, entropy, and the second law. Students learn how to use statistical mechanics to create a bridge between the quantum mechanical world and the familiar macroscopic one.

Prerequisite: CHEM 1C and CBE 40C and (PHYS 7D or PHYS 7E)

Overlaps with CHEM 132A, CHEM 132B, CHEM 132C.

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 110. Reaction Kinetics and Reactor Design. 4 Units.**

Introduction to quantitative analysis of chemical reactions and chemical reactor design. Reactor operations including batch, continuous stirred tank, and tubular reactor. Homogeneous and heterogeneous reactions.

Prerequisite: CHEM 1C and MATH 3D and CBE 40B and CBE 40C and CBE 100. CBE 40B with a grade of C- or better. CBE 40C with a grade of C- or better

Restriction: Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engineering majors have second consideration for enrollment.

**CBE 120A. Momentum Transfer. 4 Units.**

Fluid statics, surface tension, Newton's law of viscosity, non-Newtonian and complex flows, momentum equations, laminar and turbulent flow, velocity profiles, flow in pipes and around objects, piping systems design, pumps and mixing, and other applications to chemical and related industries.

Prerequisite: CBE 40C and MATH 3D. CBE 40C with a grade of C- or better

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 120B. Heat Transfer. 3 Units.**

Principles of conduction, radiation, and convection of heat; phenomenological rate laws, differential and macroscopic energy balances; heat transfer rates, steady state and unsteady state conduction, convection; applications to chemical and related industries.

Prerequisite: CBE 120A. CBE 120A with a grade of C- or better

Restriction: Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engineering majors have second consideration for enrollment.

**CBE 120C. Mass Transfer. 3 Units.**

Molecular and continuum approaches to diffusion and convection in multi-component mixtures; steady state, quasi-steady state and transient mass transfer; effect of reactions on mass transfer; convective mass transfer; simultaneous mass, heat and momentum transfer; applications to chemical and related industries.

Prerequisite: CBE 120B and CBE 100

Restriction: Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engineering majors have second consideration for enrollment.

**CBE 130. Separation Processes. 4 Units.**

Application of equilibria and mass and energy balances for design of separation processes. Use of equilibrium laws for design of distillation, absorption, stripping, and extraction equipment. Design of multicomponent separators.

Prerequisite: CBE 40B and CBE 40C. CBE 40B with a grade of C- or better. CBE 40C with a grade of C- or better

Restriction: Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engineering majors have second consideration for enrollment.

**CBE 140A. Chemical Engineering Laboratory I. 4 Units.**

Experimental study of thermodynamics, fluid mechanics, and heat and mass transfer. Operation and evaluation of process equipment, data analysis. Materials fee.

Prerequisite: CBE 110 and CBE 120C

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 140B. Chemical Engineering Laboratory II. 4 Units.**

Continuation of the CBE 140A covering mass transfer operations such as distillation, absorption, extraction, etc. Rate and equilibria studies in simple chemical systems with and without reaction. Study of chemical process. Materials fee.

Prerequisite: CBE 130 and CBE 145 and CBE 140A

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 145. Chemical Process Control. 4 Units.**

Dynamic responses and control of chemical process equipment, dynamic modeling of chemical processes, linear system analysis, analyses and design of feedback loops and advanced control systems.

Prerequisite: CBE 110 and CBE 120B and CBE 120C

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 150A. Chemical Engineering Design I. 3 Units.**

Introduction to process design; flow sheets for chemical processes; synthesis of multicomponent separation sequences and reaction paths; synthesis of heat exchange networks; computer-aided design and simulation of processes and components.

Prerequisite: CBE 110 and CBE 120C and CBE 130

Restriction: Seniors only. Chemical Engineering Majors only.

**CBE 150B. Chemical Engineering Design II. 3 Units.**

Application of chemical engineering basics to practical design problems; process economics; process safety; environmental impacts; a major team design project with progress reports, oral presentation, and technical report with engineering drawings and economics.

Prerequisite: CBE 150A

Restriction: Seniors only. Chemical Engineering Majors only.

**CBE 160. Engineering Biology. 3 Units.**

First-principle introduction to the modern biochemistry, molecular biology, and cell biology with an engineering language. The goal is to demonstrate that the vastly diverse biological phenomena can be explained by a set of fundamental principles in chemistry, thermodynamics, and kinetics.

**CBE 161. Introduction to Biochemical Engineering. 3 Units.**

Application of engineering principles to biochemical processes. Topics include microbial pathways, energetics and control systems, enzyme and microbial kinetics, and the design and analysis of biological reactors.

Prerequisite: CEMS 110 and (CHEM 1C or CHEM H2C) and MATH 3D

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 163. Kinetics of Biochemical Networks. 4 Units.**

Principles from statistical mechanics, thermodynamics, and chemical kinetics applied to biochemical systems, from fundamental processes such as receptor-ligand binding and enzyme catalysis, to complex cellular functions including signal transduction and gene regulation.

Prerequisite: CBE 120A

Restriction: Chemical Engineering Majors have first consideration for enrollment.

Concurrent with CBE 263.

**CBE 176. Nuclear and Radiochemistry. 4 Units.**

Advanced treatment of nuclear structure, nuclear reactions, and radioactive-decay processes. Introduction to nuclear activation analysis, isotope effects, radiation chemistry, hot-atom chemistry, nuclear age-dating methods, nuclear reactors, and nuclear power.

Prerequisite: (CHEM M3C or CHEM 1C or CHEM H2C) and MATH 2D

Same as CHEM 133.

Overlaps with CHEM 170.

Restriction: Chemistry Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment.

Concurrent with CHEM 233 and CBE 276.

**CBE 181. Polymer Science and Engineering. 4 Units.**

An introduction to physical aspects of polymers, including configuration and conformation of polymer chains and characterization techniques; crystallinity, viscoelasticity, mechanical properties, polymer alloys, processing, and application.

Prerequisite: ENGR 54 and (CBE 110 or MSE 165)

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 183. Surface and Adhesion Science. 4 Units.**

Structure, thermodynamics of, kinetics, and reactions on surfaces. Surface electronic and mechanical properties and characterization of all classes of materials including metals, semiconductors, ceramics, polymers, and soft materials. Adhesion between different materials is also addressed.

Prerequisite: (CBE 110 or MSE 165C) and (MSE 141 or MSE 69)

Same as MSE 176.

Restriction: Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

Concurrent with MSE 276 and CBE 283.

**CBE 187. Semiconductor Device Packaging. 3 Units.**

Introduction to the semiconductor device packaging and assembly process. Electrical, thermal, optical, and mechanical aspects of package design and reliability. Special topics on optoelectronics packaging are covered.

Prerequisite: CBE 40B

Restriction: Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**CBE 195. Special Topics in Chemical Engineering. 1-4 Units.**

Studies in selected areas of Chemical Engineering. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**CBE 198. Group Study. 1-4 Units.**

Group study of selected topics in engineering.

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**CBE 199. Individual Study. 1-4 Units.**

For undergraduate engineering majors in supervised but independent readings, research, or design. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

Repeatability: May be taken for credit for 8 units.

Restriction: Chemical Engineering Majors have first consideration for enrollment.

**CBE 199P. Individual Study. 1-4 Units.**

For undergraduate Engineering majors in supervised but independent reading, research, or design. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in The School of Engineering.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**CBE 200. Applied Engineering Mathematics I. 4 Units.**

Analytical techniques applied to engineering problems in transport phenomena, process dynamics and control, and thermodynamics.

Restriction: Graduate students only.

**CBE 210. Reaction Engineering. 4 Units.**

Advanced topics in reaction engineering, reactor stability analysis, diffusional effect in heterogeneous catalysis, energy balance, optimization of reactor operation, dispersed in phase reactors.

Restriction: Graduate students only.

**CBE 220A. Transport Phenomena I. 4 Units.**

Continuum modeling and analysis of heat and mass transfer from an integrated viewpoint. Scaling concepts, relevance of characteristic time- and length-scales, steady- and unsteady-state processes, bounded and unbounded problems, and convective transport, with applications to chemical and biological processes.

Restriction: Graduate students only.

**CBE 220B. Transport Phenomena II. 4 Units.**

Introduces flow of isothermal fluids from a momentum transport viewpoint. Steady- and unsteady-state creeping and laminar flows; viscous and inviscid flows; Navier-Stokes equations; lubrication theory; boundary layer theory; with specific application to complex chemical and biological engineering processes.

Prerequisite: CBE 220A

Restriction: Graduate students only.

**CBE 240. Advanced Engineering Thermodynamics. 4 Units.**

Introduction to modern thermodynamics and applications, with a focus on aspects relevant to chemical and materials engineering. Mathematical tools; equilibrium and stability; microscope rigorous equations of state; molecular-level thermodynamics of real mixtures; and phase and chemical equilibrium.

Restriction: Graduate students only.

**CBE 249. Special Topics in Chemical Engineering. 1-4 Units.**

Studies in selected areas of Chemical Engineering. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**CBE 250. Research Methods and Technical Communication. 4 Units.**

Intended for Ph.D. students to develop critical research skills in creating archival papers, intellectual property and technical proposals, and in analysis of the scientific literature.

Restriction: Graduate students only.

**CBE 261. Molecular Biotechnology. 4 Units.**

Engineering and biological principles important in recombinant cell technology. Host/vector selection; plasmid propagation; optimization of cloned gene expression; metabolic engineering; protein secretion; experimental techniques; modeling of recombinant cell systems.

Restriction: Graduate students only.

**CBE 262. Metabolic Engineering and Synthetic Biology. 4 Units.**

Synthesis of chemicals from renewable carbon and energy sources using.

Restriction: Graduate students only.

**CBE 263. Kinetics of Biochemical Networks . 4 Units.**

Principles from statistical mechanics, thermodynamics, and chemical kinetics applied to biochemical systems, from fundamental processes such as receptor-ligand binding and enzyme catalysis, to complex cellular functions including signal transduction and gene regulation.

Restriction: Graduate students only.

Concurrent with CBE 163.

**CBE 264. Drug Delivery. 4 Units.**

Introduction to design of drug delivery systems. Includes physicochemical and pharmacokinetic considerations in drug formulations, types of therapeutics, routes of administration, biomaterials, and novel drug delivery systems.

**CBE 266. Bioseparation Processes. 4 Units.**

Introduction to design of bioseparation processes. The recovery and purification of biologically produced proteins, chemicals, and particulates are important. Focuses on the use of chemical engineering skills and principles in the analysis and design of biologically-based processes.

Restriction: Graduate students only.

**CBE 276. Nuclear and Radiochemistry. 4 Units.**

Advanced treatment of nuclear structure, nuclear reactions, and radioactive-decay processes. Introduction to nuclear activation analysis, isotope effects, radiation chemistry, hot-atom chemistry, nuclear age-dating methods, nuclear reactors, and nuclear power.

Same as CHEM 233.

Restriction: Graduate students only.

Concurrent with CHEM 133 and CBE 176.

**CBE 277. Detection and Measurement of Radiation. 4 Units.**

Basic principles of detection and measurement of ionizing radiation; both theory and practical aspects of measurement techniques for alpha, beta, gamma, and neutron radiation, properties of different detector materials, electronics and data treatments, and analysis.

Prerequisite: CHEM 233 or CBE 276

Same as CHEM 244.

Restriction: Graduate students only.

**CBE 280. Advanced Polymer Science and Engineering. 4 Units.**

The synthesis, characterization, microstructure, rheology, and properties of polymer materials. Polymers in solution and in the liquid, crystalline and glassy states. Engineering and processing properties, including viscoelasticity and rheology. Forming and processing methods. Environmental issues.

Restriction: Graduate students only.

**CBE 282. Colloid Science and Engineering. 4 Units.**

An introduction to the basic foundations of colloid science, interfacial phenomena, suspensions and complex fluids, and engineering and assembly of colloidal materials.

Restriction: Graduate students only.

**CBE 283. Surface and Adhesion Science. 4 Units.**

Structure, thermodynamics of, kinetics, and reactions on surfaces. Surface electronic and mechanical properties and characterization of all classes of materials including metals, semiconductors, ceramics, polymers, and soft materials. Adhesion between different materials is also addressed.

Same as MSE 276.

Restriction: Graduate students only.

Concurrent with MSE 176 and CBE 183.

**CBE 288. Optoelectronics Packaging. 4 Units.**

Basic and current issues in the packaging of integrated circuits (IC) and fiber-optic devices are discussed.

Restriction: Graduate students only.

**CBE 295. Seminars in Engineering. 1-4 Units.**

Seminars scheduled each year by individual faculty in major field of interest.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**CBE 296. Master of Science Thesis Research. 1-16 Units.**

Individual research or investigation conducted in preparation for the thesis required for the M.S. degree.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CBE 297. Doctor of Philosophy Dissertation Research. 1-16 Units.**

Individual research or investigation conducted in preparation for the dissertation required for the Ph.D. degree.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CBE 298. Seminars in Engineering. 2 Units.**

Presentation of advanced topics and reports of current research efforts in chemical engineering.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CBE 299. Individual Research. 1-16 Units.**

Individual research or investigation under the direction of an individual faculty member.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Chemical and Biomolecular Engineering, M.S.

Chemical engineering uses the knowledge of chemistry, mathematics, physics, biology, and humanities to solve societal problems in areas such as energy, health, environment, food, clothing, materials, shelter, and sustainability and serves a variety of processing industries whose vast array of products include chemicals, petroleum products, plastics, pharmaceuticals, foods, textiles, fuels, consumer products, and electronic and cryogenic materials. Chemical Engineering also advances societal goals by developing environmentally conscious and sustainable technologies to meet global challenges. Chemical engineering is an engineering discipline that has its strongest ties with the molecular sciences. This is an important asset since sciences such as chemistry, molecular biology, biomedicine, and solid-state physics are providing the seeds for future technologies. Chemical engineering has a bright future as the discipline which will bridge science with engineering in multidisciplinary environments.

Biomolecular Engineering is concerned with the processing of biological materials and processes that use biological agents such as living cells, enzymes, or antibodies. Biomolecular Engineering, with integrated knowledge of the principles of biology and chemical engineering, plays a major engineering role in the rapidly developing area of biotechnology. Career opportunities in Biomolecular Engineering are available in a variety of industries such as biotechnology, chemical, environmental, food, petrochemical, and pharmaceutical industries.

The principal objectives of the graduate curriculum in Chemical and Biomolecular Engineering are to develop and expand students' abilities to solve new and more challenging engineering problems and to promote their skills in independent thinking and learning in preparation for careers in manufacturing, research, or teaching. These objectives are reached through a program of course work and research designed by each student with the assistance, advice, and approval of a primary faculty advisor and a faculty advisory committee. Programs of study leading to the M.S. and Ph.D. in Chemical and Biomolecular Engineering are offered.

Students applying with the objective of a Ph.D. are admitted to the M.S./Ph.D. program only if they are likely to successfully complete a Ph.D. program. These students do not formally re-apply to the Ph.D. program after completing the M.S. Students who apply to the M.S.-only program must petition for the Ph.D. program if they desire to continue on for the Ph.D. Financial support is usually reserved for those students who plan to complete the Ph.D. The normative time to complete M.S. and Ph.D. degrees is two and five years, respectively.

It is strongly recommended that students have background and training in core Chemical Engineering topics (transport phenomena, thermodynamics, and reaction kinetics) as well as a strong background in mathematics, chemistry, and physics. A student who enters the program without undergraduate preparation in chemical engineering is required to take three to five additional prerequisite courses (MATH 3A and MATH 3D, and CBE 40B -CBE 40C, CBE 110, CBE 161, and CBE 120A).

Students are required to take the following courses for the M.S. and as a basis for the Ph.D. preliminary examination.

CBE 210	Reaction Engineering
CBE 220A	Transport Phenomena I
CBE 200	Applied Engineering Mathematics I
CBE 240	Advanced Engineering Thermodynamics

## Electives

Graduate advisors should be consulted on the selection of elective courses. All graduate courses offered in CBE are potential electives. Graduate-level courses offered in other Engineering departments and relevant graduate courses from other schools may also be taken as electives.

Two plans are available for the M.S. degree: a thesis option and a comprehensive examination option. Opportunities are available for part-time study toward the M.S.

### Plan I: Thesis Option

For the M.S. thesis option, students are required to complete a research study of great depth and originality and obtain approval for a complete program of study. A minimum of 36 units is required for the M.S. The following are required: four required core courses, three quarters of CBE 298 (Department Seminar), five additional graduate elective courses numbered 200–289 (or 200–295 if offered by other departments), related to their field of graduate studies, and approved by the graduate advisor. Up to two of these elective courses can be substituted by up to eight units of CBE 296 (M.S. Thesis Research), and one of the elective courses may be substituted by an upper-division undergraduate elective course approved by the CBE graduate advisor.

Full-time graduate students must enroll in the departmental seminar each quarter during their first year unless exempt by petition.

### Plan II: Comprehensive Examination Option

For the comprehensive examination option, students are required to complete 36 units of study and a comprehensive examination. The following are required: four required core courses, three quarters of CBE 298 (Department Seminar), five additional graduate elective courses numbered 200–289 (or 200–295 if offered by other departments), related to their field of graduate studies, and approved by the graduate advisor. One of the elective courses may be substituted by an upper-division undergraduate elective course approved by the CBE graduate advisor. Research units (CBE 296/CBE 299) do not count towards the degree requirements of the Comprehensive Exam Option.

Full-time graduate students must enroll in the departmental seminar each quarter during their first year unless exempt by petition.

In addition to fulfilling the course requirements outlined above, it is a University requirement for the Master of Science degree that students fulfill a minimum of 36 units of study.

## Additional Information

Students are required to consult the graduate student handbook for more specific details regarding the course, exam, and unit requirements.

# Chemical and Biomolecular Engineering, Ph.D.

Chemical engineering uses the knowledge of chemistry, mathematics, physics, biology, and humanities to solve societal problems in areas such as energy, health, environment, food, clothing, materials, shelter, and sustainability and serves a variety of processing industries whose vast array of products include chemicals, petroleum products, plastics, pharmaceuticals, foods, textiles, fuels, consumer products, and electronic and cryogenic materials. Chemical Engineering also advances societal goals by developing environmentally conscious and sustainable technologies to meet global challenges. Chemical engineering is an engineering discipline that has its strongest ties with the molecular sciences. This is an important asset since sciences such as chemistry, molecular biology, biomedicine, and solid-state physics are providing the seeds for future technologies. Chemical engineering has a bright future as the discipline which will bridge science with engineering in multidisciplinary environments.

Biomolecular Engineering is concerned with the processing of biological materials and processes that use biological agents such as living cells, enzymes, or antibodies. Biomolecular Engineering, with integrated knowledge of the principles of biology and chemical engineering, plays a major engineering role in the rapidly developing area of biotechnology. Career opportunities in Biomolecular Engineering are available in a variety of industries such as biotechnology, chemical, environmental, food, petrochemical, and pharmaceutical industries.

The principal objectives of the graduate curriculum in Chemical and Biomolecular Engineering are to develop and expand students' abilities to solve new and more challenging engineering problems and to promote their skills in independent thinking and learning in preparation for careers in manufacturing, research, or teaching. These objectives are reached through a program of course work and research designed by each student with the assistance, advice, and approval of a primary faculty advisor and a faculty advisory committee. Programs of study leading to the M.S. and Ph.D. in Chemical and Biomolecular Engineering are offered.

Students applying with the objective of a Ph.D. are admitted to the M.S./Ph.D. program only if they are likely to successfully complete a Ph.D. program. These students do not formally re-apply to the Ph.D. program after completing the M.S. Students who apply to the M.S.-only program must petition for the Ph.D. program if they desire to continue on for the Ph.D. Financial support is usually reserved for those students who plan to complete the Ph.D. The normative time to complete M.S. and Ph.D. degrees is two and five years, respectively.

The Ph.D. in Chemical and Biomolecular Engineering requires a commitment on the part of the student to dedicated study and collaboration with the faculty. Ph.D. students are selected on the basis of outstanding demonstrated potential and scholarship. Applicants must hold the appropriate prerequisite degrees from recognized institutions of high standing. After substantial preparation, Ph.D. candidates work under the supervision of faculty

advisors. The process involves extended immersion in a research atmosphere and culminates in the production of original research results presented in a dissertation.

Milestones to be passed in the Ph.D. program in order to remain in good standing include the following: acceptance into a research group by the faculty advisor at the end of the student's first year of study; successful completion of the Ph.D. preliminary examination by the end of the second year; preparation for pursuing research and the development of a research proposal culminating in passing the Qualifying Examination by the end of the third year of the Ph.D. program. The Qualifying Examination includes faculty evaluation of a written research dossier and an oral presentation. Students must advance to candidacy in their third year (second year for students who entered with a master's degree).

The core course requirements for the Ph.D. are the same as for the M.S. Students must enroll in the departmental seminar each quarter during their first year unless exempt by petition. Ph.D. students must take two additional elective courses beyond the M.S. requirements. These courses are to be taken after the first year of graduate work, should be relevant to the Ph.D. dissertation topic, and must be selected in consultation with the research advisor and approved by the CBE graduate advisor. The preliminary examination is based on the four core courses and the ability of the student to comprehend and present a research paper. M.S. students who have completed a CBE M.S. degree elsewhere must have a written approval by the graduate advisor to waive required CBE core courses, if they have taken the equivalent courses elsewhere.

Final examination involves the oral presentation and defense of an acceptable dissertation in a seminar attended by students and faculty. The Ph.D. is granted upon the recommendation of the Doctoral Committee and the Dean of the Graduate Division. The normative time for completion of the Ph.D. is five years (four years for students who entered with a master's degree). The maximum time permitted is seven years.

## Chemical Engineering, B.S.

**Program Educational Objectives:** Graduates of the Chemical Engineering program will (1) demonstrate achievement by applying a broad knowledge of chemical engineering; (2) apply critical reasoning and quantitative skills to identify and solve problems in chemical engineering; (3) implement skills for effective communication and teamwork; (4) demonstrate the potential to effectively lead chemical engineering projects in industry, government, or academia; and (5) exhibit a commitment to lifelong learning.

(Program educational objectives are those aspects of engineering that help shape the curriculum; achievement of these objectives is a shared responsibility between the student and UCI.)

**High School Students:** See School Admissions information.

**Transfer Students:** Preference will be given to junior-level applicants with the highest grades overall, and who have satisfactorily completed the following **required** courses: two years of approved calculus, one year of calculus-based physics with laboratories (mechanics, electricity and magnetism), completion of lower-division writing, one year of general chemistry (with laboratory), one year of organic chemistry (with laboratory), and one course in introductory programming. For course equivalency specific to each college, visit <http://assist.org>.

Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. Students who enroll at UCI in need of completing lower-division coursework may find that it will take longer than two years to complete their degrees. For further information, contact The Henry Samueli School of Engineering at 949-824-4334.

**All students are required to meet the University Requirements.**

**All students are required to meet the School Requirements.**

### Major Requirements

#### Mathematics and Basic Science Courses:

CHEM 1A or ENGR 1A	General Chemistry General Chemistry for Engineers
CHEM 1B- 1C- 1LC- 1LD	General Chemistry and General Chemistry and General Chemistry Laboratory and General Chemistry Laboratory
CHEM 51A- 51B- 51C- 51LB- 51LC	Organic Chemistry and Organic Chemistry and Organic Chemistry and Organic Chemistry Laboratory and Organic Chemistry Laboratory
CBE 105	Engineering Physical Chemistry
MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
MATH 2D	Multivariable Calculus
MATH 2E	Multivariable Calculus

MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations
PHYSICS 7C- 7LC	Classical Physics and Classical Physics Laboratory
PHYSICS 7D- 7LD	Classical Physics and Classical Physics Laboratory

**Engineering Topics Courses:**

Students must complete a minimum of 18 units of engineering design.

CBE 40A- 40B- 40C	Chemical Processes and Material Balances and Process Thermodynamics and Chemical Engineering Thermodynamics
CBE 100	Introduction to Numerical Methods in Engineering
CBE 110	Reaction Kinetics and Reactor Design
CBE 120A- 120B- 120C	Momentum Transfer and Heat Transfer and Mass Transfer
CBE 130	Separation Processes
CBE 140A- 140B	Chemical Engineering Laboratory I and Chemical Engineering Laboratory II
CBE 145	Chemical Process Control
CBE 150A- 150B	Chemical Engineering Design I and Chemical Engineering Design II
ENGR 54	Principles of Materials Science and Engineering
ENGRMAE 10	Introduction to Engineering Computations

Students select, with the approval of a faculty advisor, any additional engineering topics courses needed to satisfy school and department requirements.

**Technical Elective Courses:**

Students select, with the approval of a faculty advisor, a minimum of 19 units of technical electives. Students may select an area of specialization and complete the associated requirements, as shown below.

(The nominal Chemical Engineering program will require 192 units of courses to satisfy all university and major requirements. Students typically need at least 14 units of engineering topics from technical electives to meet school requirements. Because each student comes to UCI with a different level of preparation, the actual number of units will vary.)

**Engineering Professional Topics Course:**

ENGR 190W	Communications in the Professional World
-----------	--

**Specialization in Biomolecular Engineering:**

Requires:

CBE 161	Introduction to Biochemical Engineering
and a minimum of 8 units from the following:	
BIO SCI 98	Biochemistry
BIO SCI 99	Molecular Biology
BME 50A	Cell and Molecular Engineering
BME 50B	Cell and Molecular Engineering
BME 121	Quantitative Physiology: Organ Transport Systems
BME 160	Tissue Engineering
CBE 163	Kinetics of Biochemical Networks
CBE 199	Individual Study

**Specialization in Energy and the Environment:**

Requires a minimum of 11 units including at least one course from the following:

CBE 176	Nuclear and Radiochemistry
CBE 199	Individual Study
MSE 141	Nano-Scale Materials and Applications

and select the remaining units from the following:

ENGRCEE 160	Environmental Processes
ENGRCEE 162	Introduction to Environmental Chemistry

ENGRCEE 163	Wastewater Treatment Process Design
ENGRCEE 171	Water Resources Engineering
ENGRCEE 172	Groundwater Hydrology
ENGRMAE 110	Combustion and Fuel Cell Systems
ENGRMAE 114	Fuel Cell Fundamentals and Technology
ENGRMAE 164	Air Pollution and Control

**Specialization in Materials Science:**

Requires a minimum of 12 units from:

CBE 181	Polymer Science and Engineering
CBE 187	Semiconductor Device Packaging
CBE 199	Individual Study (up to 4 units)
ENGR 150	Mechanics of Structures <sup>1</sup>
MSE 155	Mechanical Behavior and Design Principles
MSE 158	Ceramic Materials for Sustainable Energy
MSE 163	Computer Techniques in Experimental Research
MSE 175	Design Failure Investigation
ENGRMAE 155	Composite Materials and Structures

<sup>1</sup> Requires ENGR 30, not included in total.

The sample program of study chart shown is typical for the major in Chemical Engineering. Students should keep in mind that this program is based upon a sequence of prerequisites, beginning with adequate preparation in high school mathematics, physics, and chemistry. Students who are not adequately prepared, or who wish to make changes in the sequence for other reasons, must have their program approved by their faculty advisor. Chemical Engineering majors are encouraged to consult with academic counselors as needed, and students who are academically at risk are mandated to see a counselor as frequently as deemed necessary by the advising staff.

Freshman		
Fall	Winter	Spring
MATH 2A	MATH 2B	MATH 2D
ENGRMAE 10	PHYSICS 7C	PHYSICS 7D
CHEM 1A or ENGR 1A	PHYSICS 7LC	PHYSICS 7LD
General Education	CHEM 1B	CHEM 1C
	General Education	CHEM 1LC
Sophomore		
Fall	Winter	Spring
MATH 3A	MATH 3D	MATH 2E
CHEM 51A	CHEM 51B	CHEM 51C
CHEM 1LD	CHEM 51LB	CHEM 51LC
CBE 40A	CBE 40B	CBE 40C
General Education	ENGR 54	General Education
Junior		
Fall	Winter	Spring
CBE 120A	CBE 110	CBE 120C
CBE 100	CBE 120B	CBE 130
General Education	CBE 105	Technical Elective
General Education	General Education	General Education
Senior		
Fall	Winter	Spring
CBE 145	CBE 150A	CBE 150B

Technical Elective	General Education	General Education

## Department of Civil and Environmental Engineering

**C. Sunny Jiang, Department Chair**

E4130 Engineering Gateway

949-824-5333

<http://www.eng.uci.edu/dept/cee> (<http://www.eng.uci.edu/dept/cee/>)

Civil Engineering is described as the art of sustainably harnessing the natural environment to meet human needs. The success of this endeavor is evident all around us. The arid plain which greeted the early settlers in Southern California has been transformed into a thriving regional community largely by the application of civil engineering.

The goal of the Civil Engineering curriculum is to prepare graduates for a career in practice, research, or teaching. At the undergraduate level a common core of fundamental subjects is provided, and students are required to specialize in their senior year. Specializations are offered in General Civil Engineering, Environmental Hydrology and Water Resource Engineering, Structural Engineering, and Transportation Systems Engineering. Graduate opportunities are in three major thrust areas: structural analysis, design, and reliability; transportation systems engineering; and water resources and environmental engineering.

The career opportunities in civil engineering are varied. Graduates may look forward to long-term careers in major corporations, public bodies, the military, private consulting firms, or to being self-employed in private practice. History has shown a civil engineering education to be a good ground for many administrative and managerial positions.

Environmental Engineering involves designing environmental protection or remediation strategies for multiple resources—water, air, and soil, often with combinations of physical, chemical, and biological treatment methods in the context of a complex regulatory framework.

The goal of the Environmental Engineering curriculum is to prepare graduates with a strong basic science background, particularly in chemistry and biology, and to provide students with a broad exposure to several environmental engineering science disciplines. Courses relating to transport processes, water quality control, air quality control, and process design are included in the core.

Career opportunities in environmental engineering are diverse. Graduates generally find careers related to pollution control and the remediation of air, water, and soil environments.

- Civil and Environmental Engineering, M.S.
- Civil and Environmental Engineering, Ph.D.
- Civil Engineering, B.S.
- Environmental Engineering, B.S.

## Faculty

Mohammad Javad Abdolhosseini Qomi, Ph.D. Massachusetts Institute of Technology, *Assistant Professor of Civil and Environmental Engineering* (mechanics and physics of multi-scale porous materials, nano- and meso-chemo-mechanics, engineering advanced materials for sustainable infrastructures)

Adeyemi Adeleye, Ph.D. University of California, Santa Barbara, *Assistant Professor of Civil and Environmental Engineering* (water/environmental chemistry, environmental nanotechnology, pollution remediation, fate and effects of emerging contaminants)

Amir Aghakouchak, Ph.D. University of Stuttgart, *Professor of Civil and Environmental Engineering* (hydrology, climatology, remote sensing of environment, climate extremes, compound and cascading hazards, climate change, stochastic modeling, water resources management)

Alfredo H.-S. Ang, Ph.D. University of Illinois at Urbana-Champaign, *Professor Emeritus of Civil and Environmental Engineering* (structural and earthquake engineering, risk and reliability engineering)

Tirtha Banerjee, Ph.D. Duke University, *Assistant Professor of Civil and Environmental Engineering* (atmospheric boundary layer dynamics, turbulent fluid dynamics, land/water/vegetation - atmosphere interaction, wildfires, vegetation dynamics, carbon and water cycles, hydrology, wetlands and terrestrial aquatic interfaces)

William J. Cooper, Ph.D. University of Miami, *Professor Emeritus of Civil and Environmental Engineering; Urban Planning and Public Policy* (environmental chemistry, advanced oxidation processes for water treatment, aquatic photochemistry of carbon cycling)

Kristen A. Davis, Ph.D. Stanford University, *Associate Professor of Civil and Environmental Engineering; Earth System Science* (coastal oceanography, fluid mechanics, turbulent flows)

Russell L. Detwiler, Ph.D. University of Colorado Boulder, *Associate Professor of Civil and Environmental Engineering* (groundwater hydrology, contaminant fate and transport, subsurface process modeling, groundwater/surface-water interaction)

Efi Foufoula-Georgiou, Ph.D. University of Florida, *Distinguished Professor of Civil and Environmental Engineering* (hydrology and geomorphology with emphasis on modeling the interactions between the atmosphere, land, and the terrestrial environment at plot to large-watershed scale)

Stanley B. Grant, Ph.D. California Institute of Technology, *Professor Emeritus of Civil and Environmental Engineering* (environmental engineering, inland and coastal water quality, coagulation and filtration of colloidal contaminants, environmental microbiology)

Gary L. Guymon, Ph.D. University of California, Davis, *Professor Emeritus of Civil and Environmental Engineering* (water resources, groundwater, modeling uncertainty)

Kuo-Lin Hsu, Ph.D. University of Arizona, *Professor of Civil and Environmental Engineering* (remote sensing of precipitation, hydrologic systems modeling, stochastic hydrology, water resources systems planning)

Michael Hyland, Ph.D. Northwestern University, *Assistant Professor of Civil and Environmental Engineering* (modeling, design, control, and analysis of smart city transportation systems with emphases on shared-use autonomous mobility services and urban transit networks)

R. (Jay) Jayakrishnan, Ph.D. University of Texas at Austin, *Professor of Civil and Environmental Engineering* (transportation systems analysis)

C. Sunny Jiang, Ph.D. University of South Florida, *Department Chair and Professor of Civil and Environmental Engineering; Ecology and Evolutionary Biology; Environmental Health Sciences* (water pollution microbiology, environmental biotechnology, aquatic microbial ecology)

Wenlong Jin, Ph.D. University of California, Davis, *Associate Professor of Civil and Environmental Engineering* (intelligent transportation systems, traffic flow theory, transportation network analysis)

Joel Lanning, Ph.D. University of California, San Diego, *Assistant Professor of Teaching of Civil and Environmental Engineering* (seismic design of civil structures, large-scale testing, alternative building materials, teaching methods in engineering education)

Anne Lemnitzer, Ph.D. University of California, Los Angeles, *Associate Professor of Civil and Environmental Engineering* (geotechnical and earthquake engineering, soil structure interaction, RC design, seismic monitoring)

Mo Li, Ph.D. University of Michigan, *Assistant Professor of Civil and Environmental Engineering; Materials Science and Engineering* (unconventional infrastructure materials, and their interfaces with structural engineering, advanced manufacturing, spatial damage sensing, and the environment)

Michael G. McNally, Ph.D. University of California, Irvine, *Professor of Civil and Environmental Engineering; Urban Planning and Public Policy* (travel behavior, transportation systems analysis)

Ayman S. Mosallam, Ph.D. Catholic University of America, *Professor of Civil and Environmental Engineering* (advanced composites and hybrid systems, seismic repair and rehabilitation of structures, diagnostic/prognostic structural health monitoring techniques, 3D printing in Construction and sustainable and green building technology)

Farzad Naeim, Ph.D. University of Southern California, *Adjunct Professor of Civil and Environmental Engineering* (performance-based earthquake engineering; structural health monitoring; seismic instrumentation; structural design of tall buildings; nonlinear response of structures; seismic isolation; energy dissipation systems and devices; design characteristics of earthquake ground motions; seismic analysis and design of complex structures)

Phu Dinh Nguyen, Ph.D. University of California, Irvine, *Assistant Adjunct Professor of Civil and Environmental Engineering* (hydrology, GIS, satellite precipitation estimation algorithms, databases and visualization tools for remotely-sensed data and information, crowdsourcing, water resources systems)

Betty H. Olson, Ph.D. University of California, Berkeley, *Professor Emeritus of Civil and Environmental Engineering* (molecular applications for optimizing biological processes in wastewater treatment, environmental health, drinking water microbiology)

Gerard C. Pardo, Ph.D. Stanford University, *Professor Emeritus of Civil and Environmental Engineering* (structural analysis, experimental structural dynamics)

Wilfred W. Recker, Ph.D. Carnegie Mellon University, *Distinguished Professor of Civil and Environmental Engineering* (transportation systems modeling, traffic control, and urban systems analysis)

Stephen G. Ritchie, Ph.D. Cornell University, *Director of the Institute of Transportation Studies and Professor of Civil and Environmental Engineering* (transportation engineering, advanced traffic management and control systems, development and application of emerging technologies in transportation)

Diego Rosso, Ph.D. University of California, Los Angeles, *Director of the UCI Water-Energy Nexus Center (WEX) and Professor of Civil and Environmental Engineering* (environmental process engineering, mass transfer, wastewater treatment, carbon- and energy-footprint analysis)

Brett F. Sanders, Ph.D. University of Michigan, *Professor of Civil and Environmental Engineering; Urban Planning and Public Policy* (urban flooding, coastal flooding, dam-break flooding, flood hazard modeling, flood risk management, sediment management, shallow-water hydrodynamics and morphodynamics, computational methods, remote-sensing with drones, translational research for flood modeling targeting community resilience, population health and poverty alleviation)

Jean-Daniel M. Saphores, Ph.D. Cornell University, *Professor of Civil and Environmental Engineering; Economics; Urban Planning and Public Policy* (transportation and environmental systems (with a focus on air pollution and energy use), travel behavior analysis, alternative fuel vehicles, automated vehicles, transit use, sustainable infrastructure management, and decision making under uncertainty using real options)

Jan W. Scherfig, Ph.D. University of California, Berkeley, *Professor Emeritus of Civil and Environmental Engineering* (water reclamation, waste treatment processes, environmental engineering)

Soroosh Sorooshian, Ph.D. University of California, Los Angeles, *Director of the Center for Hydrometeorology and Remote Sensing (CHRS) and UCI Distinguished Professor of Civil and Environmental Engineering; Earth System Science* (hydrology, hydrometeorology and hydroclimate modeling, remote sensing, water resources management)

Lizhi Sun, Ph.D. University of California, Los Angeles, *Professor of Civil and Environmental Engineering* (micro- and nano-mechanics, composites and nanocomposites, smart materials and structures, multiscale modeling, elastography)

Roberto Villaverde, Ph.D. University of Illinois at Urbana-Champaign, *Professor Emeritus of Civil and Environmental Engineering* (structural dynamics and earthquake engineering)

Jasper A. Vrugt, Ph.D. University of Amsterdam, *Associate Professor of Civil and Environmental Engineering; Earth System Science* (examining how (eco)systems work, why theories deviate from data, how scientists diagnose change, as applied to biogeosciences, ecology, geomorphology, geophysics, hydrology, soils)

Jann N. Yang, DSc Columbia University, *Professor Emeritus of Civil and Environmental Engineering* (system identification and damage detection, structural health monitoring, structural control, earthquake engineering, structural dynamics)

Farzin Zareian, Ph.D. Stanford University, *Associate Professor of Civil and Environmental Engineering* (structural engineering, performance-based earthquake engineering, structural reliability, structural control)

## Affiliate Faculty

Jacob Brouwer, Ph.D. Massachusetts Institute of Technology, *Professor of Mechanical and Aerospace Engineering; Civil and Environmental Engineering* (fuel cells, energy systems dynamics, electrochemical systems design and analysis, chemical kinetics, reacting flows)

Donald Dabdub, Ph.D. California Institute of Technology, *Associate Dean, Undergraduate Education and Professor of Mechanical and Aerospace Engineering; Civil and Environmental Engineering* (mathematical modeling of urban and global air pollution, dynamics of atmospheric aerosols, secondary organic aerosols, impact of energy generation on air quality, chemical reactions at gas-liquid interfaces)

Steven J. Davis, Ph.D. Stanford University, *Associate Professor of Earth System Science; Civil and Environmental Engineering*

Derek Dunn-Rankin, Ph.D. University of California, Berkeley, *Professor Emeritus of Mechanical and Aerospace Engineering; Civil and Environmental Engineering; Environmental Health Sciences* (combustion, optical particle sizing, particle aerodynamics, laser diagnostics and spectroscopy)

James T. Randerson, Ph.D. Stanford University, *UCI Chancellor's Professor of Earth System Science; Civil and Environmental Engineering; Ecology and Evolutionary Biology*

Eric Rignot, Ph.D. University of Southern California, *Department Chair and Donald Bren Professor of Earth System Science; Civil and Environmental Engineering*

G. Scott Samuelsen, Ph.D. University of California, Berkeley, *Director of Advanced Power and Energy Program, Research Professor and Professor Emeritus of Mechanical and Aerospace Engineering; Civil and Environmental Engineering* (combustion, sprays, laser diagnostics, air quality, turbulent transport, alternative fuels, modeling reacting flows, practical systems, energy and environmental conflict)

## Courses

### **ENGRCEE 11. Methods II: Probability and Statistics. 4 Units.**

Modeling and analysis of engineering problems under uncertainty. Engineering applications of probability and statistical concepts and methods.

(Design units: 0)

Prerequisite: (ENGRCEE 20 or EECS 10 or EECS 12 or ENGRMAE 10 or I&C SCI 31) and MATH 3A

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 20. Introduction to Computational Problem Solving. 4 Units.**

Introduction to computer programming within a numerical computing environment (MATLAB or similar) including types of data representation, graphical display of data, and development of modular programs with application to engineering analysis and problem solving.

(Design units: 1)

Corequisite: MATH 3A

Overlaps with BME 60B.

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 21. Computational Problem Solving. 4 Units.**

Engineering analysis and problem solving using MATLAB (or similar), including matrix algebra, solving systems of linear and nonlinear equations, numerical integration of ordinary differential equations (ODEs) and coupled ODEs, and analysis of numerical errors.

(Design units: 1)

Corequisite: MATH 3D

Prerequisite: (ENGRCEE 20 or BME 60B) and (MATH 3A or I&C SCI 6N)

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 30. Statics. 4 Units.**

Addition and resolution of forces, distributed forces, equivalent system of forces centroids, first moments, moments and products on inertia, equilibrium of rigid bodies, trusses, beams, cables. Course may be offered online.

(Design units: 0)

Corequisite: MATH 2D

Prerequisite: MATH 2D and PHYSICS 7C

Same as ENGR 30, ENGRMAE 30.

Restriction: School of Engineering students have first consideration for enrollment.

**ENGRCEE 60. Contemporary and Emerging Environmental Challenges. 4 Units.**

Introduces contemporary and emerging environmental challenges, illustrates links between human behavior, environmental policy, and engineering practices, examines policy options in the context of current institutions, and introduces tools and frameworks to reach sound economic, social, and environmental solutions.

(Design units: 0)

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**(III)****ENGRCEE 80. Dynamics. 4 Units.**

Introduction to the kinematics and dynamics of particles and rigid bodies. The Newton-Euler, Work/Energy, and Impulse/Momentum methods are explored for ascertaining the dynamics of particles and rigid bodies. An engineering design problem using these fundamental principles is also undertaken.

(Design units: 0.5)

Prerequisite: MATH 2D and PHYSICS 7C

Same as ENGR 80, ENGRMAE 80.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 81A. Civil Engineering Practicum I. 3 Units.**

Introduction to civil engineering through presentations on structural, environmental, water, and transportation systems. Introduction to graphics. Graphical visualization and communication using hand and computer sketching. Fundamentals of Computer Aided Design (CAD) using AutoCad. Laboratory sessions. Materials fee.

(Design units: 2)

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 81B. Civil Engineering Practicum II. 3 Units.**

Principles of surveying; fundamentals of Geographic Information Systems (GIS); introduction to the state-of-the-art and future areas of the profession, including applications of advanced technology and computers; Introduction to visualization and communication of design concepts; laboratory sessions. Materials fee.

(Design units: 1)

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 110. Methods III: Modeling, Economics, and Management. 4 Units.**

Analysis, modeling, and management of civil engineering systems. Statistics and system performance studies, probabilistic models and simulation, basic economics and capital investments, project elements and organization, managerial concepts and network technique, project scheduling. Emphasis on real-world examples. Laboratory sessions.

(Design units: 1)

Prerequisite: ENGRCEE 11

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 111. Methods IV: Systems Analysis and Decision-Making. 4 Units.**

Analysis and optimization for decision-making in civil and infrastructural systems. Topics include linear programming formulations and solution algorithms, network models, and logistical models. Emphasis is on project-level and managerial decision-making and selection from alternative designs.

(Design units: 1)

Prerequisite: (MATH 3A or I&C SCI 6N) and MATH 3D

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 114. GIS for Civil and Environmental Engineering. 4 Units.**

GIS for CEE provides an introduction to Geographic Information Systems (GIS) and their various applications in civil and environmental engineering. Topics include GIS data formats, data queries, spatial and attribute data, spatial data analysis, coordinate systems, and raster data analysis.

Concurrent with ENGRCEE 214.

**ENGRCEE 121. Transportation Systems I: Analysis and Design. 4 Units.**

Introduction to analysis and design of fundamental transportation system components, basic elements of geometric and pavement design, vehicle flow and elementary traffic, basic foundations of transportation planning and forecasting. Laboratory sessions.

(Design units: 2)

Prerequisite: ENGRCEE 11 and ENGRCEE 81A

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 122. Transportation Systems II: Operations and Control. 4 Units.**

Introduction to fundamentals of urban traffic engineering, including data collection, analysis, and design. Traffic engineering studies, traffic flow theory, traffic control devices, traffic signals, capacity and level of service analysis of freeways and urban streets. Laboratory sessions.

(Design units: 2)

Prerequisite: ENGRCEE 11 and ENGRCEE 121

Restriction: Civil Engineering Majors have first consideration for enrollment.

Concurrent with ENGRCEE 229A.

**ENGRCEE 123. Transportation Systems III: Planning and Forecasting. 4 Units.**

Theoretical foundations of transportation planning, design, and analysis methods. Theory and application of aggregate and disaggregate models for land use development, trip generation, destination, mode, and route choice. Transportation network analysis. Planning, design, and evaluation of system alternatives.

(Design units: 2)

Corequisite: ENGRCEE 110

Prerequisite: ENGRCEE 121

Restriction: Civil Engineering Majors have first consideration for enrollment.

Concurrent with ENGRCEE 223.

**ENGRCEE 124. Transportation Systems IV: Freeway Operations and Control. 4 Units.**

Fundamentals of traffic on urban freeways, including data collection analysis, and design. Traffic engineering studies, traffic flow theory, freeway traffic control devices, capacity, and level of service analysis of freeways and highways. Laboratory sessions.

(Design units: 2)

Prerequisite: ENGRCEE 121

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 125. Transportation and the Environment. 4 Units.**

Analysis of the impacts of motor vehicle transportation on the environment. Introduction to life cycle analysis applied to transportation. Basic economic tools for transportation externalities. Transportation planning, urban form, health, and the environment. Transportation sustainability.

(Design units: 0)

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 130. Soil Mechanics. 4 Units.**

Mechanics of soils, composition and classification of soils, compaction, compressibility and consolidation, shear strength, seepage, bearing capacity, lateral earth pressure, retaining walls, piles.

(Design units: 0)

Corequisite: ENGRCEE 130L

Prerequisite: ENGRCEE 150 and ENGRCEE 170

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 130L. Soil Mechanics Laboratory. 1 Unit.**

Laboratory procedures of soil testing for engineering problems. Materials fee.

(Design units: 0)

Corequisite: ENGRCEE 130

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 149. Introduction to Earthquake Engineering. 4 Units.**

Plate tectonics. Structural dynamics. Earthquake magnitude, intensity, and frequency. Seismic damage to structures. Earthquake load prediction including response spectra, normal mode, and direct integration techniques. The basis of building code earthquake load requirements for buildings.

(Design units: 2)

Prerequisite: ENGRCEE 11 and ENGRCEE 20 and ENGRCEE 151A

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 150. Mechanics of Materials. 4 Units.**

Stresses and strains, strain-stress diagrams, axial deformations, torsion, bending and shear stresses in beams, shear force and bending moment diagrams, combined stresses, principal stresses, Mohr's circle, deflection of beams, columns.

(Design units: 1)

Prerequisite: ENGRCEE 30 or ENGRMAE 30 or ENGR 30. ENGRCEE 30 with a grade of C- or better

Overlaps with ENGR 150, ENGRMAE 150.

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 150L. Mechanics of Materials Laboratory. 1 Unit.**

Experimental methods and fundamentals for mechanics of materials analysis. Materials fee.

(Design units: 0)

Prerequisite or corequisite: (ENGRCEE 30 or ENGRMAE 30 or ENGR 30) and ENGRCEE 150. ENGRCEE 30 with a grade of C- or better

Overlaps with ENGRMAE 150L.

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 151A. Structural Analysis. 4 Units.**

Fundamentals of structural analysis and loading. Deformation of statically determinate and indeterminate structures. Influence lines. Structural systems.

(Design units: 0)

Prerequisite: ENGRCEE 150 or ENGRMAE 150. ENGRCEE 150 with a grade of C- or better

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 151B. Structural Timber Design. 4 Units.**

Design of timber structures. Beams, columns, beam-columns, roof, and connections.

(Design units: 3)

Prerequisite: ENGRCEE 151A

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 151C. Reinforced Concrete Design. 4 Units.**

Ultimate strength design. Design of reinforced concrete beam sections. Design for shear and deflection. Design of columns. Design of isolated and combined footings. Laboratory sessions. Materials fee.

(Design units: 3)

Prerequisite: ENGRCEE 151A

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 152. Computer Methods in Structural Analysis and Design. 4 Units.**

Matrix techniques for indeterminate framed structures. Computer implementation using the stiffness method. Software packages for design of reinforced concrete, steel, and/or timber structures.

(Design units: 2)

Prerequisite: ENGRCEE 151C

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 155. Structural Steel Design. 4 Units.**

Design in steel of tension members, beams, columns, welded and bolted connections; eccentrically loaded and moment resistant joints; plate girders. Plastic design; load and resistance factor design. Composite construction; introduction to computer-aided design.

(Design units: 4)

Prerequisite: ENGRCEE 151A

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 156. Foundation Design. 4 Units.**

Applications of soil mechanics principles to the analysis and design of shallow foundations, retaining walls, pile foundations, and braced cuts. Design criteria: bearing capacity, working loads and tolerable settlements, structural integrity of the foundation element. Damage from construction operations.

(Design units: 3)

Prerequisite: ENGRCEE 130 and ENGRCEE 151C

Restriction: Civil Engineering Majors have first consideration for enrollment.

**ENGRCEE 160. Environmental Processes. 4 Units.**

Introduction to environmental processes in air and water, mass balances, and transport phenomena. Fundamentals of water-quality engineering including water and wastewater treatment.

(Design units: 1)

Prerequisite: (CHEM 1B or CHEM H2B) and ENGRCEE 170

Restriction: Civil Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 162. Introduction to Environmental Chemistry. 4 Units.**

Basic concepts from general, physical, and analytical chemistry as they relate to environmental engineering. Particular emphasis on the fundamentals of equilibrium and kinetics as they apply to acid-base chemistry, gas solubility, and redox reactions. Laboratory sessions. Materials fee.

(Design units: 0)

Prerequisite: (ENGR 1A or CHEM 1A or CHEM H2A) and (CHEM 1B or CHEM H2B) and (CHEM 1LC or CHEM 1LE or CHEM H2LB or CHEM M2LB) and (CHEM 51A or CHEM H52A)

Restriction: Chemical Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 163. Wastewater Treatment Process Design. 4 Units.**

Design of biological treatment processes. Topics include attached and suspended growth, aeration, anaerobic systems, process control, and economics. Design projects included. Materials fee.

(Design units: 4)

Prerequisite: ENGRCEE 160

Restriction: Civil Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 164. Carbon and Energy Footprint Analysis. 4 Units.**

Process design for wastewater treatment. Mass- and energy-balance analysis applied to water and wastewater treatment systems. Case studies include analysis of water supply, treatment, reclamation, and reuse.

(Design units: 2)

Prerequisite: ENGRCEE 160

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

Concurrent with ENGRCEE 264.

**ENGRCEE 165. Physical-Chemical Treatment Processes. 4 Units.**

Theory and dynamics of physical and chemical separation processes in water and wastewater treatment. Topics include coagulation, sedimentation, filtration, gas-transfer, membrane separations, and adsorption.

(Design units: 2)

Prerequisite: ENGRCEE 160 and (ENGRMAE 91 or CBE 40C)

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

Concurrent with ENGRCEE 265.

**ENGRCEE 169. Environmental Microbiology for Engineers. 4 Units.**

Fundamental and applied principles of microbiology. Structures and functions of microorganisms, the microbiology of water, wastewater and soil used in environmental engineering, and the impact of microorganisms on human and environmental health.

(Design units: 0)

Prerequisite: ENGRCEE 160

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 170. Introduction to Fluid Mechanics. 4 Units.**

Thermodynamic and mechanical fluid properties; fluid statics; control volume and differential approaches for mass, momentum, and energy; dimensional analysis and similarity.

(Design units: 1)

Corequisite: MATH 2E and ENGRCEE 20

Prerequisite: PHYSICS 7C

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 171. Water Resources Engineering. 4 Units.**

Principles governing the analysis and design of water resource systems including pressurized pipelines, pipe networks, channels, and ground water. Coverage of fluid mass, momentum and energy conservation, flow resistance, and related laboratory measurements in different systems. Materials fee.

(Design units: 2)

Prerequisite: ENGRCEE 170

Restriction: Chemical Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 172. Groundwater Hydrology. 4 Units.**

Topics include conservation of fluid mass, storage properties of porous media, matrix compressibility, boundary conditions, flow nets, well hydraulics, groundwater chemistry, and solute transport. Design projects and computer applications included.

(Design units: 2)

Prerequisite: ENGRCEE 170 or ENGRMAE 130A or CBE 120A

Restriction: Civil Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

Concurrent with ENGRCEE 272.

**ENGRCEE 173. Watershed Modeling. 4 Units.**

Basic principles of hydrologic modeling are practiced. Concepts of watershed delineation, land use change impact, design studies, and GIS tools are discussed. Focus on the USACE (HEC) software tools (HEC-HMS, and HEC-RAS) along with their associated GIS interfaces.

(Design units: 1)

Prerequisite: ENGRCEE 170 and ENGRCEE 176

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

Concurrent with ENGRCEE 273.

**ENGRCEE 176. Hydrology. 4 Units.**

Elements of the hydrologic cycle including precipitation, infiltration, evapotranspiration, ground water, and runoff. Unit Hydrograph theory and routing methods. Introduction to precipitation/runoff relationship and watershed modeling. Statistical methods and flood frequency analysis.

(Design units: 2)

Prerequisite: ENGRCEE 170 or ENGRMAE 130A

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

Concurrent with ENGRCEE 276.

**ENGRCEE 178. Fluid Mechanics of Open Channels. 4 Units.**

Fundamentals of fluid motion in open channels. Navier-Stokes equations and one-dimensional momentum and energy principles. Topics include rapidly varied flow, flow resistance and turbulence, gradually varied flow, unsteady flow, and computational methods for channel flow modeling.

(Design units: 1)

Prerequisite: (ENGRCEE 20 or BME 60B or ENGRMAE 10) and (ENGRCEE 170 or ENGRMAE 130A or CBEMS 125A)

Restriction: Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRCEE 181A. Senior Design Practicum I. 2 Units.**

Team designs land development project including infrastructural, environmental, circulation aspects. Focus on traffic impact studies, design of roads, geometry, signals, geotechnical and hydrological analysis, design of structural elements, economic analysis. Oral/Written interim and final design reports. Laboratory sessions.

(Design units: 1)

Prerequisite: ENGRCEE 81A and ENGRCEE 81B and ENGRCEE 110 and (ENGRCEE 121 or ENGRCEE 151C or ENGRCEE 162 or ENGRCEE 171). ENGRCEE 181A and ENGRCEE 181B and ENGRCEE 181C must be taken in the same academic year.

Restriction: Seniors only. Civil Engineering Majors only. Environmental Engineering Majors only.

**ENGRCEE 181B. Senior Design Practicum II. 2 Units.**

Team designs land development project including infrastructural, environmental, circulation aspects. Focus on traffic impact studies, design of roads, geometry, signals, geotechnical and hydrological analysis, design of structural elements, economic analysis. Oral/Written interim and final design reports. Laboratory sessions.

(Design units: 2)

Corequisite: ENGRCEE 130

Prerequisite: ENGRENGRCEE 181A. CEE 181A and ENGRCEE 181B and ENGRCEE 181C must be taken in the same academic year.

Grading Option: In Progress (Letter Grade with P/NP).

Restriction: Seniors only. Civil Engineering Majors only. Environmental Engineering Majors only.

**ENGRCEE 181C. Senior Design Practicum III. 2 Units.**

Team designs land development project including infrastructural, environmental, circulation aspects. Focus on traffic impact studies, design of roads, geometry, signals, geotechnical and hydrological analysis, design of structural elements, economic analysis. Oral/Written interim and final design reports. Laboratory sessions.

(Design units: 2)

Prerequisite: ENGRENGRCEE 181B. ENGRCEE 181A and CEE 181B and ENGRCEE 181C must be taken in the same academic year.

Restriction: Seniors only. Civil Engineering Majors only. Environmental Engineering Majors only.

**ENGRCEE 195. Special Topics in Civil and Environmental Engineering. 1-4 Units.**

Studies in selected areas of Civil and Environmental Engineering. Topics addressed vary each quarter.

(Design units: 1-4)

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**ENGRCEE 198. Group Study. 1-4 Units.**

Group study of selected topics in Civil and Environmental Engineering.

(Design units: 1-4)

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**ENGRCEE 199. Individual Study. 1-4 Units.**

For undergraduate Engineering majors in supervised but independent reading, research, or design. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Repeatability: May be taken for credit for 8 units.

**ENGRCEE 199P. Individual Study. 1-4 Units.**

Supervised independent reading, research, or design for undergraduate Engineering majors. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**ENGRCEE 214. GIS for Civil and Environmental Engineering. 4 Units.**

GIS for CEE provides an introduction to Geographic Information Systems (GIS) and their various applications in civil and environmental engineering. Topics include GIS data formats, data queries, spatial and attribute data, spatial data analysis, coordinate systems, raster data analysis.

Concurrent with ENGRCEE 114.

**ENGRCEE 220A. Travel Demand Analysis I. 4 Units.**

Fundamentals of transportation systems analysis. Theoretical aspects of travel demand. Travel behavior. Modeling of performance characteristics and costs of transportation modes. In-depth presentation of travel demand modeling techniques. Development of travel choice models including mode, route, and destination choice. Equilibrium.

Restriction: Graduate students only.

**ENGRCEE 220B. Travel Demand Analysis II. 4 Units.**

Methods of discrete choice analysis and their applications in the modeling of transportation systems. Emphasis on the development of a sound understanding of theoretical aspects of discrete choice modeling that are useful in many applications in travel demand analysis.

Prerequisite: ENGRCEE 220A

Restriction: Graduate students only.

**ENGRCEE 220C. Travel Demand Analysis III: Activity-based Approaches. 4 Units.**

The methodological underpinnings of activity-based travel demand modeling. Presents methodologies within the context of a generalization of discrete choice modeling approaches, emphasizing the distinctions that separate these two approaches and presenting appropriate mathematical and statistical tools to address these distinctions.

Prerequisite: ENGRCEE 220A

Restriction: Graduate students only.

**ENGRCEE 221A. Transportation Systems Analysis I. 4 Units.**

Introduction to mathematical methods and models to address logistics and urban transportation problems. Techniques include stochastic models, queueing theory, linear programming, and introductory non-linear optimization.

Restriction: Graduate students only.

**ENGRCEE 221B. Transportation Systems Analysis II. 4 Units.**

Advanced mathematical methods and models to address logistics and urban transportation problems. Topics include network flows, advanced optimization techniques, network models, and heuristic algorithms.

Prerequisite: ENGRCEE 221A

Restriction: Graduate students only.

**ENGRCEE 222. Transit Systems Planning. 4 Units.**

Planning methods for public transportation in urban areas. Technological and operating characteristics of vehicles, facilities, and systems. Short-range planning techniques: data collection and analysis, demand analysis, mode choice, operational strategies, financial analysis. Design of systems to improve performance.

Restriction: Graduate students only.

**ENGRCEE 223. Transportation Systems III: Planning and Forecasting. 4 Units.**

Theoretical foundations of transportation planning, design, and analysis methods. Theory and application of aggregate and disaggregate models for land use development, trip generation, destination, mode, and route choice. Transportation network analysis. Planning, design, and evaluation of system alternatives.

Restriction: Graduate students only.

Concurrent with ENGRCEE 123.

**ENGRCEE 224A. Transportation Data Analysis I. 4 Units.**

Statistical analysis of transportation data sources. Analysis of categorical and ordinal data. Regression and advanced multivariate analysis methods such as discriminant analysis, canonical correlation, and factor analysis. Sampling techniques, sample error and bias, survey instrument design.

Restriction: Graduate students only.

**ENGRCEE 225B. Transportation Planning Models II. 4 Units.**

Design and application of comprehensive transportation models. Network development, demand modeling, and equilibrium assignment. Model calibration, validation, prediction, and evaluation. Regional modeling, site impact analysis, and circulation studies. Design of transportation alternatives.

Prerequisite: ENGRCEE 223

Restriction: Graduate students only.

**ENGRCEE 226A. Traffic Flow Theory I. 4 Units.**

Traffic measurement and fundamental speed-density-flow relationships. Kinematic models. Shock waves. Statistical-kinetic theory of traffic. Introductory car-following principles and stability. Gap acceptance. Platoon dispersion. Two-fluid model. Queueing process. Multi-regime and catastrophe models. Higher-order continuum models. Microscopic and macroscopic simulation.

Restriction: Graduate students only.

**ENGRCEE 226B. Traffic Flow Theory II. 4 Units.**

Advanced mathematical analysis of vehicular flow. Detailed treatise on car-following models. Fourier and Laplace analysis of stability problems. Perturbation analysis. Derivation of macroscopic traffic flow relationships from microscopic considerations. Advanced hydrodynamic theory.

Prerequisite: ENGRCEE 226A

Restriction: Graduate students only.

**ENGRCEE 228A. Urban Transportation Networks I. 4 Units.**

Analytical approaches and algorithms to the formulation and solution of the equilibrium assignment problem for transportation networks. Emphasis on user equilibrium (UE) comparison with system optimal, mathematical programming formulation, supply functions, estimation. Estimating origin-destination matrices, network design problems.

Prerequisite: ENGRCEE 220A

Restriction: Graduate students only.

**ENGRCEE 228B. Urban Transportation Networks II. 4 Units.**

Advanced analysis, optimization, and modeling of transportation networks. Topics include advanced static and dynamic traffic assignment algorithms, linear and nonlinear multi-commodity network flow optimization, network simplex, and network control problems.

Prerequisite: ENGRCEE 221A and ENGRCEE 228A

Restriction: Graduate students only.

**ENGRCEE 229A. Traffic Systems Operations and Control I. 4 Units.**

Introduction to operation, control, and analysis of arterial and freeway traffic systems. Control concepts, traffic stream principles, detectors, local controllers, system masters, traffic signal and ramp metering timing principles, traffic measurement technologies, traffic delay principles.

Restriction: Graduate students only.

Concurrent with ENGRCEE 122.

**ENGRCEE 229B. Traffic Systems Operations and Control II. 4 Units.**

Advanced topics related to operation, control, and analysis of arterial and freeway traffic systems. Control concepts, traffic stream principles, detectors, local controllers, system masters, traffic signal and ramp metering timing principles.

Prerequisite: ENGRCEE 229A

Restriction: Graduate students only.

**ENGRCEE 231. Foundation Engineering. 4 Units.**

Essentials for design and analysis of structural members that transmit superstructure loads to the ground. Topics include subsurface investigations, excavation, dewatering, bracing, footing, mat foundations, piles and pile foundations, caissons and cofferdams, other special foundations.

Restriction: Graduate students only.

**ENGRCEE 232. Geotech Earthquake Engineering. 4 Units.**

In-situ and laboratory determination of dynamic soil properties, liquefaction of soil, cyclic softening of clays, seismic compression and settlement analyses, ground improvement methods, seismic slope stability, introduction to soil structure interaction.

Restriction: Graduate students only.

**ENGRCEE 240. High Performance Materials. 4 Units.**

Part I: Linear and nonlinear fracture mechanics, methodology, real-world case studies; Part II: Composite material toughening, underlying micromechanics, materials engineering towards microstructure tailoring and new material design approaches; Part III: Emerging high-performance engineering materials for safety, energy and the environment.

Restriction: Graduate students only.

**ENGRCEE 242. Advanced Strength of Materials. 4 Units.**

Beams on elastic foundations. Combined axial and lateral loads. Curved beams. Unsymmetric bending. Shear center. Stresses and strains. Basic equations for theory of elasticity. Energy principles. Theory of torsion. Combined bending and torsion.

Restriction: Graduate students only.

**ENGRCEE 243. Mechanics of Composite Materials. 4 Units.**

Stress-strain relationship for orthotropic materials; invariant properties of an orthotropic lamina; biaxial strength theory for an orthotropic lamina; mechanics of materials approach to stiffness; elasticity approach to stiffness; classical lamination theory; strength of laminates; statistical theory of fatigue damage.

Restriction: Graduate students only.

**ENGRCEE 247. Structural Dynamics. 4 Units.**

Vibration of discrete and continuous mass elastic systems. Isolation and transmissibility. Dynamic recording instruments. Introduction to nonlinear theory of vibration. Response of structures to earthquake, traffic, and wind loads. Response spectra concepts. Normal mode analysis. Numerical integration techniques.

Restriction: Graduate students only.

**ENGRCEE 249. Earthquake Engineering. 4 Units.**

Earthquake magnitude, intensity, and frequency. Seismic damage to structures. Earthquake load prediction including response spectra, normal mode, and direct integration techniques. The basis of building code earthquake load requirements for buildings. Seismic response of special structures. Lifeline engineering.

Restriction: Graduate students only.

**ENGRCEE 250. Finite Element Method in Structural Engineering. 4 Units.**

Finite element concepts in structural engineering including variational formulations, shape functions, elements assembly, convergence and computer programming. Stiffness of truss, beam, and frame members, two- and three-dimensional solids, plate and shell elements. Static, vibration, stability, and inelastic analysis.

Restriction: Graduate students only.

**ENGRCEE 252. Multiscale Modeling of Materials and Structures. 4 Units.**

Introduction to modeling materials and structures across length.

Restriction: Graduate students only.

**ENGRCEE 254. Advanced Reinforced Concrete Behavior and Design. 4 Units.**

Flexural strength of reinforced concrete elements. Flexural ductility of unconfined and confined members with axial loads. Shear and torsional behaviors. Strength of reinforced concrete ductile frames and shear walls. Reinforced concrete detailing.

Restriction: Graduate students only.

**ENGRCEE 255. Advanced Behavior and Design of Steel Structures. 4 Units.**

Advanced principles of structural steel design. Analysis and design of beam-column members, braced and unbraced frames for buildings, and plate girders. Review of seismic design provisions. Design of connections.

Restriction: Graduate students only.

**ENGRCEE 258. Earthquake Resistant Structural Design. 4 Units.**

Objectives of seismic design. Cyclic load-distortion characteristics of typical structural elements. Desirable structural form. Ductility and methods of achieving it. Use of energy dissipators. Project involving design of multistory, multibay rigid-jointed plane frame.

Restriction: Graduate students only.

**ENGRCEE 260. Desalination. 4 Units.**

Introduction of state of technology, costs and benefits, environmental issues, and implementation issues related to desalination. Emphasis on membrane processes and biofouling prevention.

Restriction: Graduate students only.

**ENGRCEE 261. Applied Environmental Microbiology. 4 Units.**

Microbes in the environment and their impact on human interactions. Microbiological application in solving environmental engineering problems.

Restriction: Graduate students only.

**ENGRCEE 262. Environmental Chemistry II. 4 Units.**

Advanced concepts from physical and organic chemistry as they relate to environmental engineering. Emphasis on equilibrium and kinetics as they apply to redox reactions, coordination, absorption, gas phase reactions, and ion exchange.

Restriction: Graduate students only.

**ENGRCEE 263. Advanced Biological Treatment Processes. 4 Units.**

Analysis of biological processes in natural and engineered systems. Biological treatment processes, both aerobic and anaerobic, with emphasis on suspended growth systems including design consideration. Containment degradation or control covered. Includes laboratory on molecular tools used in wastewater treatment.

Restriction: Graduate students only.

**ENGRCEE 264. Carbon and Energy Footprint Analysis. 4 Units.**

Process design for wastewater treatment. Mass- and energy- balance analysis applied to water and wastewater treatment systems. Case studies include analysis of water supply, treatment, reclamation, and reuse.

Restriction: Graduate students only.

Concurrent with ENGRCEE 164.

**ENGRCEE 265. Physical-Chemical Treatment Processes. 4 Units.**

Theory and dynamics of physical and chemical separation processes in water and wastewater treatment. Topics include coagulation, sedimentation, filtration, gas transfer, membrane separations, and absorption.

Restriction: Graduate students only.

Concurrent with ENGRCEE 165.

**ENGRCEE 266. Drinking Water and Wastewater Biotechnology. 4 Units.**

Water and wastewater microbiology. Engineering principles, molecular aspects, and overview of microorganisms of importance to public health. Topics include aerobic and anaerobic wastewater treatment and disinfection of pathogens in water, wastewaters, and biosolids.

Restriction: Graduate students only.

**ENGRCEE 267. Energy, Climate Change, and Urban Air Quality. 4 Units.**

An introduction to the connection between energy, climate change, and urban air quality. It will focus on air quality and climate implications of energy choices, bringing light to the most important and time-relevant issues.

Restriction: Graduate students only.

**ENGRCEE 269. Beach Dynamics. 4 Units.**

Coastal erosion in California, human and natural influences on southern California beaches, and present-day challenges. Littoral cells and sediment budgets. Water wave theory. Littoral sediment transport and shoreline change modeling. Shoreline stabilization using green and gray infrastructure.

Restriction: Graduate students only.

**ENGRCEE 270. Flood Risk and Modeling. 4 Units.**

Global and national trends in flooding and related impacts including disasters; flood risk management; theory and numerical methods for flood inundation modeling; flood risk communication strategies including flood hazard visualizations.

**ENGRCEE 271. Flow in Unsaturated Porous Media. 4 Units.**

Fluid flow in the unsaturated zone (zone of aeration) of the subsurface. Soil-water physics, flow in regional groundwater systems, miscible displacement, mathematical modeling techniques.

Restriction: Graduate students only.

**ENGRCEE 272. Groundwater Hydrology. 4 Units.**

Topics include conservation of fluid mass, storage properties of porous media, matrix compressibility, boundary conditions, flow nets, well hydraulics, groundwater chemistry, and solute transport. Includes introduction to advanced topics in porous media. Design projects and computer applications included.

Restriction: Graduate students only.

Concurrent with ENGRCEE 172.

**ENGRCEE 273. Watershed Modeling. 4 Units.**

Basic principles of hydrologic modeling are practiced. Concepts of watershed delineation, land use change impact, design studies, and GIS tools are discussed. Focus on the USACE (HEC) software tools (HEC-HMS and HEC-RAS) along with their associated GIS interfaces.

Restriction: Graduate students only.

Concurrent with ENGRCEE 173.

**ENGRCEE 274. Climate Data Analysis. 4 Units.**

Trend analysis; statistical indices for diagnosing and detecting changes in extremes; nonstationary processes; extreme value analysis; multivariate extreme value methods; tail dependence estimation; uncertainties in observed and projected changes in climate extremes.

**ENGRCEE 275. Topics in Coastal Engineering. 4 Units.**

Linear wave theory. Wave properties: particle kinematics, energy propagation, shoaling, refraction, reflection, diffraction, and breaking. Wave statistics and spectra. Selected topics from: design of coastal structures; harbor engineering; littoral transport and shoreline morphology; and hydrodynamics of estuaries.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ENGRCEE 276. Hydrology. 4 Units.**

Elements of the hydrologic cycle including precipitation, infiltration, evapotranspiration, ground water, and runoff. Unit Hydrograph theory and routing methods. Introduction to precipitation/runoff relationship and watershed modeling. Statistical methods and flood frequency analysis. Discussion section covers advanced topics.

Restriction: Graduate students only.

Concurrent with ENGRCEE 176.

**ENGRCEE 277. Hydrologic Transport Fundamentals. 4 Units.**

Process description, mathematical and numerical modeling of transport processes in surface and ground water. Topics include advection, molecular diffusion, Taylor dispersion, mechanical dispersion in porous media, shear flow dispersion in channels, and turbulent jets and plumes.

Restriction: Graduate students only.

**ENGRCEE 279. Environmental Transport Modeling. 4 Units.**

Computational modeling of multi-dimensional flow and scalar transport problems in surface and ground water. Topics include mathematical model formulation, numerical method selection, serial and parallel implementation, model verification and validation.

Restriction: Graduate students only.

**ENGRCEE 281. Structural Reliability. 4 Units.**

Applications of probability theory to reliability analysis of engineering structures. Theory of structural reliability. Estimation of static random loads. Reliability analysis of structural components and system. Monte Carlo simulation.

Restriction: Graduate students only.

**ENGRCEE 283. Mathematical Methods in Engineering Analysis. 4 Units.**

Matrices; vector calculus; eigenvalue problems; Fourier analysis; partial differential equations; special functions; numerical analysis; finite difference method.

**ENGRCEE 289. Analysis of Hydrologic Systems. 4 Units.**

Application of systems theory in hydrologic, land surface, biogeochemical modeling. Design, identification, and calibration of conceptual models. Principles of dynamic systems, modeling approaches, theory of linear systems, mathematical concepts of differential calculus, theoretical concepts of parameter estimation and optimization theory.

**ENGRCEE 290. Merging Models and Data. 4 Units.**

Introduction to optimization and data assimilation methods for model calibration and uncertainty quantification. Local, global and multi-method search. Bayesian analysis using Monte Carlo simulation with Random Walk Metropolis, and adaptive samplers. Filtering methods for recursive inference. Illustration using environmental models.

Restriction: Graduate students only.

**ENGRCEE 291. Hydrologic Remote Sensing. 4 Units.**

Introduction to principles of remote sensing and application in hydrology. Review of sensor systems, thermal and multispectral image processing, and image classification. Examples from remote sensing of hydrologic processes such as precipitation, soil moisture, and vegetation are covered.

Prerequisite: ENGRCEE 276

Restriction: Graduate students only.

**ENGRCEE 292. Wavelets in Hydrology, Engineering, and Geoscience. 4 Units.**

Multiscale analysis of hydrologic, engineering, and earth system processes; energy decomposition in the time-frequency domain via wavelets; applications to fluid flows, climate and mechanical signals for feature extraction, trend analysis, coherent structures, and upscaling/downscaling.

Restriction: Graduate students only.

**ENGRCEE 295. Seminars in Engineering. 1-4 Units.**

Seminars scheduled each year by individual faculty in major field of interest.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ENGRCEE 296. Master of Science Thesis Research. 1-16 Units.**

Individual research or investigation conducted in preparation of the thesis required for the M.S. degree in Engineering.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ENGRCEE 297. Doctor of Philosophy Dissertation Research. 1-16 Units.**

Individual research or investigation conducted in preparation for the dissertation required for the Ph.D. degree in Engineering.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ENGRCEE 298. Special Topics in Civil Engineering. 1-4 Units.**

Presentation of advanced topics and special research areas in civil engineering.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ENGRCEE 299. Individual Research. 1-16 Units.**

Individual research or investigation under the direction of an individual faculty member.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Civil and Environmental Engineering, M.S.

Civil and Environmental Engineering provides innovative solutions at the interface of the natural and the built environment for the benefit of society. As such, education and research addresses the efficient design, maintenance, and sustainability of infrastructure while preserving and sustaining natural, social, and economic resources. The Department of Civil and Environmental Engineering focuses its graduate study and research program on four areas: **Structures, Geotechnics, and Materials**, including civil infrastructure materials, engineering mechanics, advanced composites, structural dynamics, performance-based earthquake engineering, geotechnical engineering, and reliability and risk assessment; **Transportation Systems**, including traffic operations and management, advanced information technology applications, travel behavior, and transportation systems analysis; **Hydrology and Water Resources Systems**, including dynamics of the hydrologic cycle and climate induced variability, flood and drought prediction and mitigation, and remote sensing of hydrologic systems; and **Environmental and Energy Systems**, including environmental pollution mitigation, water and air quality, water treatment technologies, water and energy nexus, and renewable energy.

The M.S. reflects achievement of an advanced level of competence for the professional practice of civil and environmental engineering. Two plans are available to those working toward the M.S.: Thesis option and Course Work option. Opportunities are available for part-time study toward the M.S. The Plan of Study for both options must be developed in consultation with a Faculty Advisor and approved by the Program Graduate Advisor.

### Plan I: Thesis Option

The thesis option requires completion of 48 units of study of which a maximum of ten units can be taken for study in conjunction with the thesis research topic. Upon approval of the Program Graduate Advisor, the maximum of 10 units of thesis research can be extended to 16 units. Thesis research includes the completion of an original research project; the writing of the thesis describing it; and review by a thesis committee. Of the 48 units, a minimum of 28 units must be in non-research, graduate-level approved engineering or related courses (numbered 200–292). The remaining units may be earned as graduate-level course work, individual research, or upper-division undergraduate units (maximum ten units).

## Plan II: Course Work Option

Course Work option requires the completion of 48 units of study, at least 40 of which must be in non-research graduate-level approved engineering or related courses (numbered 200–292). The remaining eight units may be earned as graduate-level course work, individual research, or upper-division undergraduate units.

At the point of application a student is required to choose one of four focus areas: Structures, Geotechnics and Materials; Transportation Systems; Hydrology and Water Resources Systems; or Environmental and Energy Systems. Once admitted, each student will be assigned to an advisor from among active faculty in their focus area. Financial support through research or teaching assistantships and a variety of fellowships and scholarships is available to qualified students and highly competitive. Interdisciplinary study in one or more areas outside of the student's primary focus area is strongly encouraged.

### Structures, Geotechnics, and Materials

This area emphasizes the application of analytical, numerical, experimental, and practical approaches to the investigation of built infrastructure systems that withstand natural and man-made loads and hazards. Specific interests include sensors and structural health monitoring, composites for infrastructure applications, reliability and risk assessment of civil engineering systems, structural control, system identification and damage detection, performance-based earthquake engineering, soil-structure interaction, smart materials and structures, multi-scale modeling, and sustainable green materials and infrastructural systems.

### Transportation Systems

Among leading centers for transportation research, the department offers a graduate research area that is distinguished by its interdisciplinary approach to the study of current and emerging urban transportation issues and through its partnership with the UC Irvine Institute of Transportation Studies. This area focuses on the planning, design, operation, and management of complex transportation systems. Emphasis is on the development of fundamental knowledge in engineering, systems analysis, modeling, and planning, combined with advanced computational techniques and information technologies, to address transportation problems affecting urban travel and goods movement.

### Hydrology and Water Resources Systems

Developing sustainable water supplies while preserving natural resources and the environment is a grand challenge in the 21st century requiring interdisciplinary thinking and engineering solutions. This area focuses on fundamentals and the use of mathematical, computational, and experimental approaches to understanding the dynamics of the hydrologic cycle, transport within aquatic systems, and the impact of human activity, particularly in urban areas. Specific areas include water resources planning, remote sensing of the environment, water-related hazards such as floods and droughts, and transport in land, oceans, and the atmosphere.

### Environmental and Energy Systems

Treatment, distribution, and collection of water and wastewater are energy intensive operations, and energy generation and distribution have direct and indirect impacts on environmental systems. This area addresses these interrelated challenges by focusing on the treatment and supply of water for municipal, agricultural, energy, and environmental uses, sustainable practices for managing urban stormwater, and chemical and microbiological processes for water treatment. Additionally, novel approaches for energy generation and distribution are covered in this area. Understanding and minimizing emissions of greenhouse gasses associated with water and wastewater treatment and energy generation and distribution are common themes in this area.

## Civil and Environmental Engineering, Ph.D.

The Ph.D. indicates attainment of an original and significant research contribution to the state-of-the-art in the candidate's field, and an ability to communicate advanced engineering concepts. The doctoral program is tailored to the individual needs and background of the student. The detailed program of study for each Ph.D. student is formulated in consultation with a faculty advisor who takes into consideration the objectives and preparation of the candidate. The program of study must be approved by the faculty advisor and the Graduate Advisor of the Department.

The Ph.D. dissertation is written documentation of original research that has impact on the chosen field of study. For the UCI Samueli School of Engineering, impact in the field is measured by accepted or published peer-reviewed journal articles, peer-reviewed conference proceedings, patents, or analogous evidence of original, significant, and independent contribution to the state of the art in the field as assessed by the approved dissertation committee.

There are no specific course requirements. Within this flexible framework, the School maintains specific guidelines that outline the milestones of a typical doctoral program. All doctoral students should consult the Civil and Environmental Engineering program's guidelines for details, but there are several milestones to be passed: admission to the Ph.D. program by the faculty; early assessment of the student's research potential (this includes a preliminary examination); research preparation; formal advancement to candidacy by passing the qualifying examination in the third year (second year for students who entered with a master's degree); completion of a significant research investigation; and the submission and oral defense of an acceptable dissertation. There is no foreign language requirement. Ph.D. students have to meet departmental research requirements as a research assistant or equivalent, with or without salary. The degree is granted upon the recommendation of the Doctoral Committee and the Dean of Graduate Studies. The normative time for completion of the Ph.D. is five years (four years for students who entered with a master's degree). The maximum time permitted is seven years.

At the point of application a student is required to choose one of four focus areas: Structures, Geotechnics and Materials; Transportation Systems; Hydrology and Water Resources Systems; or Environmental and Energy Systems. Once admitted, each student will be assigned to an advisor from among active faculty in their focus area. Financial support through research or teaching assistantships and a variety of fellowships and scholarships is available to qualified students and highly competitive. Interdisciplinary study in one or more areas outside of the student's primary focus area is strongly encouraged.

### **Structures, Geotechnics, and Materials**

This area emphasizes the application of analytical, numerical, experimental, and practical approaches to the investigation of built infrastructure systems that withstand natural and man-made loads and hazards. Specific interests include sensors and structural health monitoring, composites for infrastructure applications, reliability and risk assessment of civil engineering systems, structural control, system identification and damage detection, performance-based earthquake engineering, soil-structure interaction, smart materials and structures, multi-scale modeling, and sustainable green materials and infrastructural systems.

### **Transportation Systems**

Among leading centers for transportation research, the department offers a graduate research area that is distinguished by its interdisciplinary approach to the study of current and emerging urban transportation issues and through its partnership with the UC Irvine Institute of Transportation Studies. This area focuses on the planning, design, operation, and management of complex transportation systems. Emphasis is on the development of fundamental knowledge in engineering, systems analysis, modeling, and planning, combined with advanced computational techniques and information technologies, to address transportation problems affecting urban travel and goods movement.

### **Hydrology and Water Resources Systems**

Developing sustainable water supplies while preserving natural resources and the environment is a grand challenge in the 21st century requiring interdisciplinary thinking and engineering solutions. This area focuses on fundamentals and the use of mathematical, computational, and experimental approaches to understanding the dynamics of the hydrologic cycle, transport within aquatic systems, and the impact of human activity, particularly in urban areas. Specific areas include water resources planning, remote sensing of the environment, water-related hazards such as floods and droughts, and transport in land, oceans, and the atmosphere.

### **Environmental and Energy Systems**

Treatment, distribution, and collection of water and wastewater are energy intensive operations, and energy generation and distribution have direct and indirect impacts on environmental systems. This area addresses these interrelated challenges by focusing on the treatment and supply of water for municipal, agricultural, energy, and environmental uses, sustainable practices for managing urban stormwater, and chemical and microbiological processes for water treatment. Additionally, novel approaches for energy generation and distribution are covered in this area. Understanding and minimizing emissions of greenhouse gasses associated with water and wastewater treatment and energy generation and distribution are common themes in this area.

## **Civil Engineering, B.S.**

**Program Educational Objectives:** Graduates of the Civil Engineering program will (1) establish a Civil Engineering career in industry, government, or academia and achieve professional licensure as appropriate; (2) demonstrate excellence and innovation in engineering problem solving and design in a global and societal context; (3) commit to lifelong learning and professional development to stay current in technology and contemporary issues; and (4) take on increasing levels of responsibility and leadership in technical and/or managerial roles. (Program educational objectives are those aspects of engineering that help shape the curriculum; achievement of these objectives is a shared responsibility between the student and UCI.)

The curriculum provides the opportunity to obtain a firm foundation in engineering science and to develop the techniques of analysis and design, which are basic for the successful practitioner. Emphasis is placed on developing problem-solving skills.

**High School Students:** See School Admissions information.

**Transfer Students:** Preference will be given to junior-level applicants with the highest grades overall, and who have satisfactorily completed the following **required** courses: two years of approved calculus, one year of calculus-based physics with laboratories (mechanics, electricity and magnetism), completion of lower-division writing, one year of general chemistry (with laboratory), and one course in introductory programming. For course equivalency specific to each college, see <https://assist.org>.

Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. Students who enroll at UCI in need of completing lower-division coursework may find that it will take longer than two years to complete their degrees. For further information, contact The Henry Samueli School of Engineering at 949-824-4334.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### **Major Requirements**

#### **Mathematics and Basic Science Courses:**

CHEM 1A

General Chemistry

or

ENGR 1A	General Chemistry for Engineers
CHEM 1B	General Chemistry
ENGRCEE 11	Methods II: Probability and Statistics
MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
MATH 2D	Multivariable Calculus
MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations
MATH 2E	Multivariable Calculus
PHYSICS 7C	Classical Physics
PHYSICS 7LC	Classical Physics Laboratory
PHYSICS 7D	Classical Physics
PHYSICS 7LD	Classical Physics Laboratory

One basic science elective selected from any Biological Science or Earth Systems Science course with approved GE II designation.

**Lower-Division Technical Elective:**

Select one course from two of the sections:

## Section A:

ENGR 7A- 7B	Introduction to Engineering I and Introduction to Engineering II *
-------------	---

## Section B:

CHEM 1LE	Accelerated General Chemistry Lab
CHEM 1C- 1LC	General Chemistry and General Chemistry Laboratory

## Section C:

EECS 70A	Network Analysis I
ENGR 54	Principles of Materials Science and Engineering
ENGRMAE 80	Dynamics
ENGRMAE 91	Introduction to Thermodynamics

**Engineering Topics Courses:**

ENGRCEE 20	Introduction to Computational Problem Solving
ENGRCEE 21	Computational Problem Solving
ENGRCEE 30	Statics
ENGRCEE 81A	Civil Engineering Practicum I
ENGRCEE 81B	Civil Engineering Practicum II
ENGRCEE 110	Methods III: Modeling, Economics, and Management
ENGRCEE 111	Methods IV: Systems Analysis and Decision-Making
ENGRCEE 121	Transportation Systems I: Analysis and Design
ENGRCEE 130	Soil Mechanics
ENGRCEE 130L	Soil Mechanics Laboratory
ENGRCEE 150	Mechanics of Materials
ENGRCEE 150L	Mechanics of Materials Laboratory
ENGRCEE 151A	Structural Analysis
ENGRCEE 151C	Reinforced Concrete Design
ENGRCEE 160	Environmental Processes
ENGRCEE 170	Introduction to Fluid Mechanics
ENGRCEE 171	Water Resources Engineering
ENGRCEE 181A- 181B- 181C	Senior Design Practicum I and Senior Design Practicum II and Senior Design Practicum III

**Engineering Professional Topics Courses:**

ECON 20A- 20B	Basic Economics I and Basic Economics II
---------------	---

ENGR 190W	Communications in the Professional World
ENGRCEE 60	Contemporary and Emerging Environmental Challenges
or UPPP 8	Introduction to Environmental Analysis and Design

**Specialization Electives:**

Students must select one of the areas of specialization and complete the associated requirements, as shown below. Students select, with the approval of a faculty advisor, any additional engineering topics courses needed to satisfy school and departmental requirements.

**Specialization in General Civil Engineering:**

Requires four courses, at least one course each from three of the following four options:

(1) Select one:	
ENGRCEE 122	Transportation Systems II: Operations and Control
ENGRCEE 123	Transportation Systems III: Planning and Forecasting
(2) Select one:	
ENGRCEE 149	Introduction to Earthquake Engineering
ENGRCEE 151B	Structural Timber Design
ENGRCEE 152	Computer Methods in Structural Analysis and Design
ENGRCEE 155	Structural Steel Design
ENGRCEE 156	Foundation Design
(3) Select one:	
ENGRCEE 163	Wastewater Treatment Process Design
ENGRCEE 164	Carbon and Energy Footprint Analysis
ENGRCEE 165	Physical-Chemical Treatment Processes
ENGRCEE 169	Environmental Microbiology for Engineers
(4) Select one:	
ENGRCEE 172	Groundwater Hydrology
ENGRCEE 173	Watershed Modeling
ENGRCEE 176	Hydrology
ENGRCEE 178	Fluid Mechanics of Open Channels

**Specialization in Environmental Hydrology and Water Resources:**

Select four of the following:

ENGRCEE 163	Wastewater Treatment Process Design
ENGRCEE 164	Carbon and Energy Footprint Analysis
ENGRCEE 165	Physical-Chemical Treatment Processes
ENGRCEE 169	Environmental Microbiology for Engineers
ENGRCEE 172	Groundwater Hydrology
ENGRCEE 173	Watershed Modeling
ENGRCEE 176	Hydrology
ENGRCEE 178	Fluid Mechanics of Open Channels

**Specialization in Structural Engineering:**

ENGRCEE 155	Structural Steel Design
-------------	-------------------------

Select three of the following:

ENGRCEE 149	Introduction to Earthquake Engineering
ENGRCEE 151B	Structural Timber Design
ENGRCEE 152	Computer Methods in Structural Analysis and Design
ENGRCEE 156	Foundation Design
ENGRMAE 155	Composite Materials and Structures
ENGRMAE 157	Lightweight Structures

**Specialization in Transportation Systems Engineering:**

ENGRCEE 122	Transportation Systems II: Operations and Control
ENGRCEE 123	Transportation Systems III: Planning and Forecasting

Select two of the following:

EECS 70A	Network Analysis I (EECS 70A may not be used in this Specialization if used for a Lower-Division Technical Elective.)
----------	---

ENGRCEE 124	Transportation Systems IV: Freeway Operations and Control
ENGRCEE 125	Transportation and the Environment
ENGRMAE 170	Introduction to Control Systems
ENGRMAE 171	Digital Control Systems

- \* ENGR 7A-ENGR 7B is available only to lower-division students in Fall and Winter quarters. Both ENGR 7A-ENGR 7B must be taken to be counted as one Lower-Division Technical Elective.

In addition, students must aggregate a minimum of 22 design units. Design unit values are indicated at the end of each course description. The faculty advisors and the Student Affairs Office can provide necessary guidance for satisfying the design requirements.

(The nominal Civil Engineering program will require 185 units of courses depending on specialization to satisfy all university and major requirements. Because each student comes to UCI with a different level of preparation, the actual number of units will vary.)

At most an aggregate total of 6 units of 199 or H199 courses may be used to satisfy degree requirements.

The sample program of study chart shown is typical for the accredited major in Civil Engineering. Students should keep in mind that this program is based upon a rigid set of prerequisites, beginning with adequate preparation in high school mathematics, physics, and chemistry. Therefore, the course sequence should not be changed except for the most compelling reasons. Students must have their programs approved by their faculty advisor. Civil Engineering majors are encouraged to consult with academic counselors as needed, and students who are academically at risk are mandated to see a counselor as frequently as deemed necessary by the advising staff.

### Sample Program of Study — Civil Engineering

Freshman		
Fall	Winter	Spring
MATH 2A	MATH 2B	MATH 2D

## Environmental Engineering, B.S.

**Program Educational Objectives:** Graduates of the Environmental Engineering program will (1) establish an Environmental Engineering career in industry, government, or academia and achieve professional licensure as appropriate; (2) demonstrate excellence and innovation in engineering problem solving and design in a global and societal context; (3) commit to lifelong learning and professional development to stay current in technology and contemporary issues; and (4) take on increasing levels of responsibility and leadership in technical and/or managerial roles. (Program educational objectives are those aspects of engineering that help shape the curriculum; achievement of these objectives is a shared responsibility between the student and UCI.)

The curriculum includes a core of mathematics, physics, chemistry, and biology, as well as engineering mechanics and methods courses. Students may select from a variety of environmental engineering courses to fulfill the remaining portion of the program and to focus their environmental engineering training in one or more of the following areas: water supply and resources, waste water management, or atmospheric systems and air pollution control. Design experiences are integrated into environmental engineering courses, and seniors enroll in a capstone design course.

**High School Students:** See School Admissions information.

**Transfer Students:** Preference will be given to junior-level applicants with the highest grades overall, and who have satisfactorily completed the following **required** courses: two years of approved calculus, one year of calculus-based physics with laboratories (mechanics, electricity and magnetism), completion of lower-division writing, one year of general chemistry (with laboratory), and one course in introductory programming. For course equivalency specific to each college, visit [assist.org](https://assist.org) (<https://assist.org>).

Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. Students who enroll at UCI in need of completing lower-division coursework may find that it will take longer than two years to complete their degrees. For further information, contact The Henry Samueli School of Engineering at 949-824-4334.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Major Requirements

#### Mathematics and Basic Science Courses:

CHEM 1A or ENGR 1A	General Chemistry General Chemistry for Engineers
CHEM 1B- 1C	General Chemistry and General Chemistry
CHEM 1LC- 1LD	General Chemistry Laboratory and General Chemistry Laboratory
CHEM 51A	Organic Chemistry
ENGRCEE 11	Methods II: Probability and Statistics

MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
MATH 2D	Multivariable Calculus
MATH 2E	Multivariable Calculus
MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations
PHYSICS 7C	Classical Physics
PHYSICS 7LC	Classical Physics Laboratory
PHYSICS 7D	Classical Physics
PHYSICS 7LD	Classical Physics Laboratory

Two additional basic science electives, one Earth System Science course approved for General Education II and one Biological Sciences course approved for General Education II.

#### Lower-Division Engineering Elective:

Students must take one course from the following:

CBE 40A	Chemical Processes and Material Balances
EECS 70A	Network Analysis I
ENGR 7A- 7B	Introduction to Engineering I and Introduction to Engineering II *
ENGR 54	Principles of Materials Science and Engineering
ENGRCEE 80 or ENGRMAE 80	Dynamics Dynamics

#### Engineering Topics Courses:

Students must complete a minimum of 19 units of engineering design.

##### Core Courses:

ENGRCEE 20	Introduction to Computational Problem Solving
ENGRCEE 21	Computational Problem Solving
ENGRCEE 30	Statics
ENGRCEE 81A	Civil Engineering Practicum I
ENGRCEE 81B	Civil Engineering Practicum II
ENGRMAE 91	Introduction to Thermodynamics
ENGRCEE 110	Methods III: Modeling, Economics, and Management
ENGRCEE 130- 130L	Soil Mechanics and Soil Mechanics Laboratory
ENGRCEE 150- 150L	Mechanics of Materials and Mechanics of Materials Laboratory
ENGRCEE 160	Environmental Processes
ENGRCEE 162	Introduction to Environmental Chemistry
ENGRCEE 170	Introduction to Fluid Mechanics
ENGRCEE 181A- 181B- 181C	Senior Design Practicum I and Senior Design Practicum II and Senior Design Practicum III

##### Engineering Elective Courses:

Students must take two courses each from two of the following three groups and one course from the remaining group. At least one of the Engineering electives must be one of the following courses: ENGRCEE 165, ENGRCEE 172, or ENGRCEE 178.

##### Water Supply and Resources:

ENGRCEE 171	Water Resources Engineering
ENGRCEE 172	Groundwater Hydrology
ENGRCEE 173	Watershed Modeling
ENGRCEE 176	Hydrology
ENGRCEE 178	Fluid Mechanics of Open Channels

##### Environmental Processes:

ENGRCEE 163	Wastewater Treatment Process Design
ENGRCEE 164	Carbon and Energy Footprint Analysis

ENGRCEE 165	Physical-Chemical Treatment Processes
ENGRCEE 169	Environmental Microbiology for Engineers
<b>Atmospheric Systems and Air Pollution Control:</b>	
EARTHSS 112	Global Climate Change and Impacts
ENGRMAE 110	Combustion and Fuel Cell Systems
ENGRMAE 115	Applied Engineering Thermodynamics
ENGRMAE 164	Air Pollution and Control

All additional engineering topics courses needed to satisfy school and major requirements must be approved by the faculty advisor. Environmental Engineering is an inherently interdisciplinary program. Students interested in pursuing a second degree along with Environmental Engineering may be able to substitute appropriate course work for required courses stated above. Please consult with an Engineering academic or faculty advisor.

#### Engineering Professional Topics Courses:

ECON 20A- 20B	Basic Economics I and Basic Economics II
ENGR 190W	Communications in the Professional World
ENGRCEE 60 or UPPP 8	Contemporary and Emerging Environmental Challenges Introduction to Environmental Analysis and Design

(The nominal Environmental Engineering program requires 191 units of courses to satisfy all university and major requirements. Because each student comes to UCI with a different level of preparation, the actual number of units will vary.)

At most an aggregate total of 6 units of 199 or H199 courses may be used to satisfy degree requirements.

- \* ENGR 7A-ENGR 7B is available only to lower-division students in Fall and Winter quarters. Both ENGR 7A-ENGR 7B must be taken to be counted as one Lower-Division Engineering Elective course.

The sample program of study chart shown is typical for the major in Environmental Engineering. Students should keep in mind that this program is based upon a sequence of prerequisites, beginning with adequate preparation in high school mathematics, physics, and chemistry. Students who are not adequately prepared, or who wish to make changes in the sequence for other reasons, must have their programs approved by their faculty advisor. Environmental Engineering majors are encouraged to consult with academic counselors as needed, and students who are academically at risk are mandated to see a counselor as frequently as deemed necessary by the advising staff.

# Department of Electrical Engineering and Computer Science

## Athina Markopoulou, Department Chair

2213 Engineering Hall

949-824-4821

<http://www.eng.uci.edu/dept/eecs> (<http://www.eng.uci.edu/dept/eecs/>)

Electrical Engineering and Computer Science is a broad field of study reaching from physical electronic devices all the way up to complex computer software. It encompasses diverse subject areas such as photonics, electromagnetics, physics of semiconductor devices, analog, digital, and power electronics and circuits, communication and signal processing, as well as digital hardware and software systems, computer systems and networks, and distributed computing. Knowledge of the mathematical and natural sciences is applied to the theory, design, and implementation of electronic devices and systems for the benefit of society.

The Department offers three undergraduate degrees: Electrical Engineering, Computer Engineering, as well as Computer Science and Engineering. Computer Science and Engineering is offered in conjunction with the Donald Bren School of Information and Computer Sciences; information is available in the Interdisciplinary Studies section of the Catalogue.

Some electrical engineers focus on the study of electronic devices and circuits that are the basic building blocks of complex electronic systems. Others study power electronics and the generation, transmission, and utilization of electrical energy. A large group of electrical engineers studies the application of these complex systems to other areas, including medicine, biology, geology, and ecology. Still another group studies complex electronic systems such as automatic controls, telecommunications, wireless communications, and signal processing.

Computer engineers are trained in various fields of computer science and engineering. They engage in the design and analysis of digital computers and networks, including software and hardware systems. Computer design includes topics such as computer architecture, embedded systems, design automation, system software, data structures and algorithms, computer networks, and cloud computing. Computer Engineering courses include programming in high-level languages such as Python, C/C++ and Java; design of application and system software; design of hardware/software interfaces and embedded systems; and application of computers in solving engineering problems. Laboratories in both hardware and software experiences are integrated within the Computer Engineering curriculum.

The undergraduate curriculum in Electrical Engineering and Computer Engineering provides a solid foundation for future career growth, enabling graduates' careers to grow technically, administratively, or both. Many electrical and computer engineers will begin work in a large organizational environment as members of an engineering team, obtaining career satisfaction from solving meaningful problems that contribute to the success of the organization's overall goal. As their careers mature, technical growth most naturally results from the acquisition of an advanced degree and further development of the basic thought processes instilled in the undergraduate years. Administrative growth can result from the development of management skills on the job and/or through advanced degree programs in management.

Graduates of Electrical Engineering, Computer Engineering, and Computer Science and Engineering will find a variety of career opportunities in areas including wireless communication, voice and video coding, biomedical electronics, circuit design, optical devices and communication, semiconductor devices and fabrication, power systems, power electronics, computer hardware and software design, computer networks, design of embedded computer systems, application software, data storage and retrieval, pattern recognition, computer modeling, and parallel and cloud computing.

- Computer Engineering, B.S.
- Computer Science and Engineering, B.S.
- Electrical and Computer Engineering, M.S.
- Electrical and Computer Engineering, Ph.D.
- Electrical Engineering, B.S.

## Faculty

Hamidreza Aghasi, Ph.D. Cornell University, *Assistant Professor of Electrical Engineering and Computer Science* (analog circuit design, mm-wave and terahertz integrated circuits, high resolution integrated sensing and imaging, neuromorphic computation, emerging device technologies)

Mohammad A. Al Faruque, Ph.D. University of Kaiserslautern, *Chair of Emulex Career Development and Associate Professor of Electrical Engineering and Computer Science; Computer Science; Mechanical and Aerospace Engineering* (cyber-physical systems, internet of things, embedded systems, CPS security)

Nicolaos G. Alexopoulos, Ph.D. University of Michigan, *Professor Emeritus of Electrical Engineering and Computer Science* (high-frequency integrated circuit antennas, wireless communication, materials)

Ender Ayanoglu, Ph.D. Stanford University, *Professor of Electrical Engineering and Computer Science* (communication systems, communication theory, communication networks)

Nader Bagherzadeh, Ph.D. University of Texas at Austin, *Professor of Electrical Engineering and Computer Science; Computer Science* (parallel processing, computer architecture, computer graphics, memory systems, 3-D ICs, heterogeneous computing, low-power processing)

Neil J. Bershad, Ph.D. Rensselaer Polytechnic Institute, *Professor Emeritus of Electrical Engineering and Computer Science* (communication and information theory, signal processing)

Ozdal Boyraz, Ph.D. University of Michigan, *Professor of Electrical Engineering and Computer Science* (integrated optics, silicon photonics, optical communications systems, and microwave photonics)

Peter J. Burke, Ph.D. Yale University, *Professor of Electrical Engineering and Computer Science; Biomedical Engineering; Materials Science and Engineering* (nano-electronics, bio-nanotechnology)

Hung Cao, Ph.D. University of Texas at Arlington, *Assistant Professor of Electrical Engineering and Computer Science; Biomedical Engineering* (MEMS, sensors, implants, heart disease, neurological disease, wireless biomedical systems)

Filippo Capolino, Ph.D. University of Florence, *Professor of Electrical Engineering and Computer Science* (optics/electromagnetics in nanostructures and sensors, antennas/microwaves, RF and wireless systems)

Aparna Chandramowlishwaran, Ph.D. Georgia Institute of Technology, *Assistant Professor of Electrical Engineering and Computer Science; Computer Science; Mechanical and Aerospace Engineering* (high-performance computing, domain-specific compilers, algorithm-architecture co-design, data analysis, and scientific computing)

Pai H. Chou, Ph.D. University of Washington, *Professor Emeritus of Electrical Engineering and Computer Science* (embedded systems, low-power design, wireless sensing systems, energy harvesting, wearable medical devices, real-time systems, hardware/software co-design)

Jose B. Cruz, Ph.D. University of Illinois at Urbana-Champaign, *Professor Emeritus of Electrical Engineering and Computer Science*

Quoc-Viet Dang, Ph.D. University of California, Irvine, *Assistant Professor of Teaching of Electrical Engineering and Computer Science* (e-learning, data analysis, autonomous vehicle racing, cyber-physical systems, making the world a better place)

Franco De Flaviis, Ph.D. University of California, Los Angeles, *Professor of Electrical Engineering and Computer Science* (microwave systems, wireless communications, electromagnetic circuit simulations)

Rainer B. Doemer, Ph.D. Dortmund University, *Professor of Electrical Engineering and Computer Science; Computer Science* (system-level design, embedded computer systems, design methodologies, specification and modeling languages, advanced parallel simulation, integration of hardware and software systems)

Salma Elmalaki, Ph.D. University of California, Los Angeles, *Assistant Professor of Teaching of Electrical Engineering and Computer Science* (mobile computing, pervasive autonomous system, personalized computing, and internet-of-things (IoT))

Ahmed Eltawil, Ph.D. University of California, Los Angeles, *Professor of Electrical Engineering and Computer Science* (design of system and architectures for computing and communication devices, low power implementations and architectures for digital signal processing)

Rahim Esfandiyarpour, Ph.D. Stanford University, *Assistant Professor of Electrical Engineering and Computer Science; Biomedical Engineering* (nanotechnology and nanoscience, flexible electronics, MEMS and NEMS fabrication and modeling, stretchable and wearable bio devices, translational micro/nanotechnologies, biological and chemical sensors, microfluidics, microelectronics circuits and systems, physiological monitoring, Internet of Things (IoT) bio devices, technology development for personalized/precision medicine, and Point of Care (POC) diagnostics)

Leonard A. Ferrari, Ph.D. University of California, Irvine, *Professor Emeritus of Electrical Engineering and Computer Science* (machine vision, signal processing, computer graphics)

Daniel D. Gajski, Ph.D. University of Pennsylvania, *Professor Emeritus of Electrical Engineering and Computer Science* (embedded systems, software/hardware design, design methodologies and tools, science of design)

Jean-Luc Gaudiot, Ph.D. University of California, Los Angeles, *Professor of Electrical Engineering and Computer Science; Computer Science* (parallel processing, computer architecture, processor architecture)

Ramon Gomez, Ph.D. University of California, Los Angeles, *Assistant Adjunct Professor of Electrical Engineering and Computer Science* (analog and RF circuit design)

Michael M. Green, Ph.D. University of California, Los Angeles, *Stacy Nicholas Dean of The Henry Samueli School of Engineering and Associate Dean for Undergraduate Student Affairs of The Henry Samueli School of Engineering and Professor of Electrical Engineering and Computer Science* (analog/mixed-signal IC design, broadband circuit design, theory of nonlinear circuits)

Glenn E. Healey, Ph.D. Stanford University, *Professor of Electrical Engineering and Computer Science* (machine learning, data science, sabermetrics, physical modeling, computer vision, image processing)

Payam Heydari, Ph.D. University of Southern California, *Professor of Electrical Engineering and Computer Science* (design and analysis of analog, radio-frequency, millimeter-wave and terahertz integrated circuits)

Syed A. Jafar, Ph.D. Stanford University, *Professor of Electrical Engineering and Computer Science* (wireless communication and information theory)

Hamid Jafarkhani, Ph.D. University of Maryland, College Park, *Conexant-Broadcom Chair in the Center for Pervasive Communications and UCI Chancellor's Professor of Electrical Engineering and Computer Science* (communication theory, signal processing coding, wireless networks, medical image segmentation)

Pramod Khargonekar, Ph.D. University of Florida, *UCI Distinguished Professor of Electrical Engineering and Computer Science* (systems and control theory; learning and intelligent systems; applications to renewable energy and smart grid, neural engineering, and economics; leadership and creativity; technology and society)

Stuart A. Kleinfelder, Ph.D. Stanford University, *Professor of Electrical Engineering and Computer Science* (circuits and systems for visual imaging, X-rays, electron microscopy, particle physics, and other applications)

Fadi J. Kurdahi, Ph.D. University of Southern California, *Director, Center for Embedded Computer Systems and Associate Dean for Graduate and Professional Studies and Professor of Electrical Engineering and Computer Science; Computer Science* (embedded and cyber-physical systems, VLSI system design, design automation of digital systems)

Chin C. Lee, Ph.D. Carnegie Mellon University, *Director of Materials and Manufacturing Technology and Professor of Electrical Engineering and Computer Science* (electronic packaging, bonding technology, metallurgy, thermal design, semiconductor devices, electromagnetic theory, acoustics and optoelectronics)

Henry P. Lee, Ph.D. University of California, Berkeley, *Professor of Electrical Engineering and Computer Science* (photonics, fiber-optics and compound semiconductors)

Guann-Pyng Li, Ph.D. University of California, Los Angeles, *Director of the UCI Division of the California Institute for Telecommunications and Information Technology (Calit2), Director of the Integrated Nanosystems Research Facility and Professor of Electrical Engineering and Computer Science; Biomedical Engineering* (micro/nano technology for sensors and actuators, internet of things (IoT), smart manufacturing, biomedical devices and millimeter wave wireless communication)

Zhou Li, Ph.D. Indiana University Bloomington, *Assistant Professor of Electrical Engineering and Computer Science* (data-driven security analytics, internet measurement, side-channel analysis, IoT security)

Kwei-Jay Lin, Ph.D. University of Maryland, College Park, *Professor of Electrical Engineering and Computer Science; Computer Science* (real-time systems, distributed systems, service-oriented computing)

Athina Markopoulou, Ph.D. Stanford University, *Nicolaos G. and Sue Curtis Alexopoulos Presidential Chair in Electrical Engineering and Computer Science and Department Chair and Professor of Electrical Engineering and Computer Science; Computer Science* (networking: including network protocols, network measurement and analysis, mobile systems and mobile data analysis, network security and privacy)

Henry Samueli, Ph.D. University of California, Los Angeles, *Adjunct Professor of Electrical Engineering and Computer Science* (digital signal processing, communications systems engineering, CMOS integrated circuit design for applications in high-speed data transmission systems)

Terry Sanger, M.D. Harvard Medical School, *Vice President and Chief Scientific Officer for Children's Hospital Orange County and Professor of Electrical Engineering and Computer Science*

Yanning Shen, Ph.D. University of Minnesota, *Assistant Professor of Electrical Engineering and Computer Science* (machine learning, data science, network science, and statistical-signal processing)

Phillip C-Y Sheu, Ph.D. University of California, Berkeley, *Professor of Electrical Engineering and Computer Science; Biomedical Engineering; Computer Science* (semantic computing, robotic computing, artificial intelligence, biomedical computing, multimedia computing)

Yasser Shoukry, Ph.D. University of California, Los Angeles, *Assistant Professor of Electrical Engineering and Computer Science* (resilience, safety, security and privacy of artificial intelligence (AI), controlled cyber-physical systems (CPS), internet-of-things (IoT), and robotic systems)

Keyue M. Smedley, Ph.D. California Institute of Technology, *Professor of Electrical Engineering and Computer Science* (power electronics, renewables, energy storage and grid stabilization)

Allen R. Stubberud, Ph.D. University of California, Los Angeles, *Professor Emeritus of Electrical Engineering and Computer Science*

A. Lee Swindlehurst, Ph.D. Stanford University, *Professor of Electrical Engineering and Computer Science* (signal processing, estimation and detection theory, applications in wireless communications, geo-positioning, radar, sonar, biomedicine)

Harry H. Tan, Ph.D. University of California, Los Angeles, *Professor Emeritus of Electrical Engineering and Computer Science* (communication and information theory, stochastic processes)

Chen S. Tsai, Ph.D. Stanford University, *Distinguished Professor of Electrical Engineering and Computer Science* (integrated microwave magnetics, Ultrasonic Atomization for Nanoparticles Synthesis, silicon photonics)

Wei Kang (Kevin) Tsai, Ph.D. Massachusetts Institute of Technology, *Professor Emeritus of Electrical Engineering and Computer Science* (data communication networks, control systems)

Peter Tseng, Ph.D. University of California, Los Angeles, *Assistant Professor of Electrical Engineering and Computer Science; Biomedical Engineering* ((bio) Micro-Electro-Mechanical systems, wearable technology, materials-by-design, bioelectromagnetism, nanotechnology)

Zhiying Wang, Ph.D. California Institute of Technology, *Assistant Professor of Electrical Engineering and Computer Science* (information theory, coding theory for data storage, modeling, compression, and computation for genomic data)

H. Kumar Wickramasinghe, Ph.D. University of London, *Henry Samueli Endowed Chair in Engineering and Professor of Electrical Engineering and Computer Science; Biomedical Engineering* (nanoscale measurements and characterization, scanning probe microscopy, storage technology, nano-bio measurement technology)

Homayoun Yousefi-zadeh, Ph.D. University of Southern California, *Adjunct Professor of Electrical Engineering and Computer Science* (communications networks)

## Affiliate Faculty

Carter Butts, Ph.D. Carnegie Mellon University, *Professor of Sociology; Computer Science; Electrical Engineering and Computer Science; Statistics* (mathematical sociology, social networks, quantitative methodology, human judgment and decision making, economic sociology)

Nikil D. Dutt, Ph.D. University of Illinois at Urbana-Champaign, *UCI Chancellor's Professor of Computer Science; Cognitive Sciences; Electrical Engineering and Computer Science* (embedded systems, computer architecture, electronic design automation, software systems, brain-inspired architectures and computing)

Michael S. Franz, Ph.D. Swiss Federal Institute of Technology in Zurich, *UCI Chancellor's Professor of Computer Science; Electrical Engineering and Computer Science* (systems software, particularly compilers and virtual machines, trustworthy computing, software engineering)

Ian G. Harris, Ph.D. University of California, San Diego, *Professor of Computer Science; Electrical Engineering and Computer Science* (hardware/software covalidation, manufacturing test)

Scott A. Jordan, Ph.D. University of California, Berkeley, *Professor of Computer Science; Electrical Engineering and Computer Science* (pricing and differentiated services in the Internet, resource allocation in wireless networks, telecommunications policy)

Zak Kassas, Ph.D. University of Texas at Austin, *Assistant Professor of Mechanical and Aerospace Engineering; Electrical Engineering and Computer Science* (cyber-physical systems (CPS), autonomous vehicles (aerial, ground, indoor, underwater), satellite-based navigation, intelligent transportation systems (ITS), cognitive and software-defined radio (SDR), sensor fusion)

Marco Levorato, Ph.D. University of Padua, *Assistant Professor of Computer Science; Electrical Engineering and Computer Science* (artificial intelligence and machine learning, networks and distributed systems, statistics and statistical theory, stochastic modeling, signal processing)

Aditi Majumder, Ph.D. University of North Carolina at Chapel Hill, *Professor of Computer Science; Electrical Engineering and Computer Science* (novel displays and cameras for computer graphics and visualization, human-computer interaction, applied computer vision)

Zoran Nenadic, Ph.D. Washington University, *William J. Link Chair in Biomedical Engineering and Department Chair and Professor of Biomedical Engineering; Electrical Engineering and Computer Science* (adaptive biomedical signal processing, control algorithms for biomedical devices, brain-machine interfaces, modeling and analysis of biological neural networks)

Eric Potma, Ph.D. University of Groningen, *Professor of Chemistry; Electrical Engineering and Computer Science* (analytical, chemical biology, physical chemistry and chemical physics)

Isaac D. Scherson, Ph.D. Weizmann Institute of Science, *Professor of Computer Science; Electrical Engineering and Computer Science* (parallel computing architectures, massively parallel systems, parallel algorithms, interconnection networks, performance evaluation)

Andrei M. Shkel, Ph.D. University of Wisconsin-Madison, *Professor of Mechanical and Aerospace Engineering; Biomedical Engineering; Electrical Engineering and Computer Science* (design and advanced control of micro-electro-mechanical systems (MEMS); high precision micro-machined gyroscopes; MEMS-enhanced optical systems, tools and prosthetic appliances; electromechanical and machine-information systems integration)

Sameer Singh, Ph.D. University of Massachusetts Amherst, *Assistant Professor of Computer Science; Electrical Engineering and Computer Science; Language Science* (artificial intelligence and machine learning, databases and data mining, scientific and numerical computing)

William C. Tang, Ph.D. University of California, Berkeley, *Professor of Biomedical Engineering; Chemical and Biomolecular Engineering; Electrical Engineering and Computer Science* (micro-electro-mechanical systems (MEMS) nanoscale engineering for biomedical applications, microsystems integration, microimplants, microbiomechanics, microfluidics)

## Courses

### **EECS 1. Introduction to Electrical Engineering and Computer Engineering. 1 Unit.**

Introduction to the fields of Electrical Engineering and Computer Engineering, including possible careers in both traditional and new emerging areas. Background on both the Electrical Engineering and the Computer Engineering majors, curriculum requirements, specializations, and faculty research interests.

(Design units: 0)

Restriction: Electrical Engineering Majors have first consideration for enrollment.

### **EECS 10. Computational Methods in Electrical and Computer Engineering. 4 Units.**

An introduction to computers and structured programming. Binary Data Representation. Hands-on experience with a high-level structured programming language. Introduction to algorithm efficiency. Applications of structured programming in solving engineering problems. Programming laboratory.

(Design units: 0)

Corequisite: MATH 2A

Prerequisite: MATH 2A

Overlaps with EECS 12, ICS 31.

Restriction: Electrical Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment.

### **EECS 12. Introduction to Programming. 4 Units.**

An introduction to computers and programming. Python programming syntax/style, types. Numbers and sequences. Control flow. I/O and errors/exceptions. Function calling, parameter passing, formal arguments, return values. Variable scoping. Programming laboratory.

(Design units: 0)

Corequisite: MATH 2A

Overlaps with EECS 10, ICS 31.

Restriction: Computer Engineering Majors have first consideration for enrollment.

### **EECS 20. Computer Systems and C Programming. 4 Units.**

Introduction to computing systems. Data representation and operations. Simple logic design. Basic computer organization. Instruction set architecture and assembly language programming. Introduction to C. Functions and recursion, data structures, pointers. Programming laboratory.

(Design units: 1)

Prerequisite: EECS 12

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

### **EECS 22. Advanced C Programming. 3 Units.**

C language programming concepts. Control flow, function calls, recursion. Basic and composite data types, static and dynamic data structures. Program modules and compilation units. Preprocessor macros. C standard libraries.

(Design units: 1)

Prerequisite: EECS 10 or EECS 20

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 22L. Software Engineering Project in C Language. 3 Units.**

Hands-on experience with the ANSI-C programming language. Medium-sized programming projects, team work. Software specification, documentation, implementation, testing. Definition of data structures and application programming interface. Creation of program modules, linking with external libraries. Rule-based compilation, version control.

(Design units: 3)

Prerequisite: EECS 22

Restriction: Computer Engineering Majors have first consideration for enrollment.

**EECS 31. Introduction to Digital Systems. 4 Units.**

Digital representation of information. Specification, analysis, design and optimization of combinational and sequential logic, register-transfer components and register-transfer systems with datapaths and controllers. Introduction to high-level and algorithmic state-machines and custom processors.

(Design units: 2)

Prerequisite: ICS 31 or EECS 10 or EECS 12 or MAE 10

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 31L. Introduction to Digital Logic Laboratory. 3 Units.**

Introduction to common digital integrated circuits: gates, memory circuits, MSI components. Operating characteristics, specifications, applications. Design of simple combinational and sequential digital systems (arithmetic processors game-playing machines). Construction and debugging techniques using hardware description languages and CAD tools.

(Design units: 3)

Prerequisite: EECS 31 and (EECS 10 or EECS 12 or ICS 32)

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 40. Object-Oriented Systems and Programming. 4 Units.**

Primitive types and expressions. The class and method definition. Information hiding and encapsulation. Objects and reference. Overloading. Constructors. Inheritance basics. Programming with inheritance. Dynamic binding and polymorphism. Exception handling. An overview of streams and file input/output. Programming laboratory.

(Design units: 2)

Prerequisite: EECS 22L

Restriction: Computer Engineering Majors have first consideration for enrollment.

**EECS 50. Discrete-Time Signals and Systems. 4 Units.**

Analysis of discrete-time linear-time-invariant (DTLTI) systems in the time domain and using z-transforms. Introduction to techniques based on Discrete-Time, Discrete, and Fast Fourier Transforms. Examples of their application to digital signal processing and digital communications.

(Design units: 0)

Prerequisite: EECS 70A

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 55. Engineering Probability. 4 Units.**

Sets and set operations; nature of probability, sample spaces, fields of events, probability measures; conditional probability, independence, random variables, distribution functions, density functions, conditional distributions and densities; moments, characteristic functions, random sequences, independent and Markov sequences.

(Design units: 0)

Prerequisite: MATH 2D

Restriction: Computer Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment.

**EECS 70A. Network Analysis I. 4 Units.**

Modeling and analysis of electrical networks. Basic network theorems. Sinusoidal steady state and transient analysis of RLC networks and the impedance concept.

(Design units: 1)

Corequisite: MATH 3D

Prerequisite: PHYS 7D and (EECS 10 or EECS 12 or MAE 10 or ICS 31 or CEE 20)

Overlaps with MAE 60.

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**EECS 70B. Network Analysis II. 4 Units.**

Laplace transforms, complex frequency, and the s-plane. Network functions and frequency response, including resonance. Bode plots. Two-port network characterization.

(Design units: 1)

Corequisite: EECS 70LB

Prerequisite: (BME 60B or EECS 10 or EECS 12 or ICS 31 or CEE 20 or MAE 10) and EECS 70A

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**EECS 70LA. Network Analysis I Laboratory. 1 Unit.**

Laboratory to accompany EECS 70A.

(Design units: 0)

Corequisite: EECS 70A

Prerequisite: PHYS 7D and (EECS 10 or EECS 12 or BME 60B or CEE 20 or MAE 10)

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 70LB. Network Analysis II Laboratory. 1 Unit.**

Laboratory to accompany EECS 70B. Materials fee.

(Design units: 1)

Corequisite: EECS 70B

Prerequisite: (BME 60B or EECS 10 or EECS 12 or ICS 31 or CEE 20 or MAE 10) and EECS 70A

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 101. Introduction to Machine Vision. 3 Units.**

The use of digital computers for the analysis of visual scenes; image formation and sensing, color, segmentation, shape estimation, motion, stereo, pattern classification, computer architectures, applications. Computer experiments are used to illustrate fundamental principles.

(Design units: 2)

Prerequisite: EECS 150 or EECS 50

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 111. System Software. 4 Units.**

Multiprogramming, interrupt, processes, kernel, parallelism, critical sections, deadlocks, communication, multiprocessing, multilevel memory management, binding, name management, file systems, protection, resource allocation, scheduling. Experience with concurrent programming, synchronization mechanisms, interprocess communication.

(Design units: 2)

Prerequisite: EECS 112 and (ICS 46 or EECS 114)

Overlaps with CS 143A.

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 112. Organization of Digital Computers. 4 Units.**

Building blocks and organization of digital computers, the arithmetic, control, and memory units, and input/out devices and interfaces. Microprogramming and microprocessors.

(Design units: 4)

Prerequisite: EECS 31L

Overlaps with CS 152.

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 112L. Organization of Digital Computers Laboratory. 3 Units.**

Specification and implementation of a processor-based system using a hardware description language such as VHDL. Hands-on experience with design tools including simulation, synthesis, and evaluation using testbenches.

(Design units: 3)

Prerequisite: EECS 112

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 113. Processor Hardware/Software Interfaces. 4 Units.**

Hardware/software interfacing, including memory and bus interfaces, devices, I/O, and compiler code generation/instruction scheduling. Experience microcontroller programming and interfacing. Specific compiler code generation techniques including local variable and register allocations, instruction dependence and scheduling, and code optimization.

(Design units: 3)

Prerequisite: EECS 112

Restriction: Computer Engineering Majors have first consideration for enrollment. Computer Science and Engineering Majors have second consideration for enrollment.

**EECS 114. Engineering Data Structures and Algorithms. 4 Units.**

Introduces abstract behavior of classes data structures, alternative implementations, informal analysis of time and space efficiency. Also introduces classic algorithms and efficient algorithm design techniques (recursion, divide-and-conquer, branch-and-bound, dynamic programming).

(Design units: 2)

Prerequisite: EECS 40

Restriction: Computer Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 116. Introduction to Data Management. 4 Units.**

Introduction to the design of databases and the use of database management systems (DBMS) for applications. Topics include entity-relationship modeling for design, relational data model, relational algebra, relational design theory, and Structured Query Language (SQL) programming.

(Design units: 1)

Prerequisite: ICS 33 or CSE 43 or EECS 114. ICS 33 with a grade of C or better. CSE 43 with a grade of C or better

Same as CS 122A.

Restriction: Computer Science Engineering Majors have first consideration for enrollment. School of Info & Computer Sci students have first consideration for enrollment.

**EECS 117. Parallel Computer Systems. 3 Units.**

General introduction to parallel computing focusing on parallel algorithms and architectures. Parallel models: Flynn's taxonomy, dataflow models. Parallel architectures: systolic arrays, hypercube architecture, shared memory machines, dataflow machines, reconfigurable architectures. Parallel algorithms appropriate to each machine type area also discussed.

(Design units: 1)

Prerequisite: EECS 20 and EECS 114 and EECS 112

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 118. Introduction to Knowledge and Software Engineering. 4 Units.**

Introduction of basic concepts in knowledge engineering and software engineering. Knowledge representation and reasoning, search planning, software life cycle, requirements engineering, software design languages, declarative programming, testing, database and web programming.

(Design units: 2)

Prerequisite: EECS 40

Restriction: Computer Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 119. VLSI. 4 Units.**

Design techniques for Very Large Scale Integrated (VLSI) systems and chips. Review CMOS and related process technologies; primitives such as logic gates and larger design blocks; layout; floor planning; design hierarchy, component interfaces; use of associated CAD tools for design.

(Design units: 4)

Prerequisite: EECS 112 and EECS 170B

Overlaps with EECS 170D, CSE 112.

Restriction: Computer Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 120. Fundamentals of Parallel Computing. 4 Units.**

Fundamentals of parallel computing, focusing on parallel algorithms and architectures. Topics include design of parallel and I/O efficient algorithms, basics of parallel machine architectures, and current/emerging programming models (shared memory, distributed memory, and accelerators).

Prerequisite: (EECS 12 or CS 152) and EECS 114

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 121. System Security. 3 Units.**

Fundamentals and practices of system security. Topics include cryptographic (encryption, decryption, and message authentication), software vulnerabilities (buffer overflow), network security (layer 2-7 attacks and defenses and PKI), web security (XSS and XSRF), and privacy.

Prerequisite: EECS 22 or ICS 45C

**EECS 141A. Communication Systems I. 3 Units.**

Introduction to analog communication systems including effects of noise. Modulation-demodulation for AM, DSB-SC, SSB, VSB, QAM, FM, PM, and PCM with application to radio, television, and telephony. Signal processing as applied to communication systems.

(Design units: 1)

Prerequisite: EECS 55 and EECS 150

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 141B. Communication Systems II. 3 Units.**

Signal space analysis. Optimum receivers for digital communication. Maximum a posteriori and maximum likelihood detection. Matched filter and correlation receiver. PAM, QAM, PSK, FSK, and MSK and their performance. Introduction to equalization, synchronization, information theory, and error control codes.

(Design units: 1)

Prerequisite: EECS 141A

Restriction: Computer Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**EECS 144. Antenna Design for Wireless Communication Links. 4 Units.**

Analysis and synthesis of antennas and antenna arrays. Adaptive arrays and digital beam forming for advanced wireless links. Friis transmission formula. Wireless communication equations for cell-site and mobile antennas, interference, slow and fast fading in mobile communication.

(Design units: 0)

Prerequisite: EECS 180A

**EECS 145. Electrical Engineering Analysis. 4 Units.**

Vector calculus, complex functions, and linear algebra with applications to electrical engineering problems.

(Design units: 0)

Prerequisite: MATH 3D

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment. Computer Science Engineering majors have second consideration for enrollment.

**EECS 148. Computer Networks. 4 Units.**

Computer network architectures, protocols, and applications. Internet congestion control, addressing, and routing. Local area networks. Multimedia networking.

(Design units: 2)

Prerequisite: EECS 55 or STAT 67

Same as CS 132.

Restriction: Computer Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have first consideration for enrollment.

**EECS 150. Continuous-Time Signals and Systems. 4 Units.**

Characteristics and properties of continuous-time (analog) signals and systems. Analysis of linear time-invariant continuous-time systems using differential equation convolutional models. Analysis of these systems using Laplace transforms, Fourier series, and Fourier transforms. Examples from applications to telecommunications.

(Design units: 0)

Prerequisite: EECS 70A and EECS 145

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 152A. Digital Signal Processing. 3 Units.**

Nature of sampled data, sampling theorem, difference equations, data holds, z-transform, w-transform, digital filters, Butterworth and Chebychev filters, quantization effects.

(Design units: 2)

Prerequisite: EECS 50

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 152B. Digital Signal Processing Design and Laboratory. 3 Units.**

Design and implementation of algorithms on a DSP processor and using computer simulation. Applications in signal and image processing, communications, radar, etc.

(Design units: 3)

Prerequisite: EECS 152A

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 159A. Senior Design Project I. 3 Units.**

Teaches problem definition, detailed design, integration, and testability with teams of students specifying, designing, building, and testing complex systems. Lectures include engineering values, discussions, and ethical ramifications of engineering decisions.

(Design units: 3)

Prerequisite: EECS 113 or EECS 170C or CS 145

Restriction: Seniors only. Computer Science Engineering Majors only. Electrical Engineering Majors only. Computer Engineering Majors only.

**EECS 159B. Senior Design Project II. 3 Units.**

Teaches problem definition, detailed design, integration, and testability with teams of students specifying, designing, building, and testing complex systems. Lectures include engineering values, discussions, and ethical ramifications of engineering decisions. Materials fee.

(Design units: 3)

Prerequisite: EECS 159A

Restriction: Computer Science Engineering Majors only. Electrical Engineering Majors only. Computer Engineering Majors only.

**EECS 160A. Introduction to Control Systems. 4 Units.**

Modeling, stability, and specifications of feedback control systems. Root locus, Bode plots, Nyquist criteria, and state-space methods for dynamic analysis and design.

(Design units: 2)

Corequisite: EECS 160LA

Prerequisite: (EECS 10 or EECS 12 or MAE 10 or BME 60B or CEE 20) and EECS 150 and EECS 170B and EECS 170LB

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 160LA. Control Systems I Laboratory. 1 Unit.**

Laboratory accompanying EECS 160A. Materials fee.

(Design units: 1)

Corequisite: EECS 160A

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 163. Power Systems. 4 Units.**

Generation, transmission, and use of electrical energy. Fault calculation, protection, stability, and power flow.

(Design units: 1)

Corequisite: EECS 163L

Prerequisite: EECS 70B

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment.

**EECS 163L. Power Systems Laboratory. 1 Unit.**

Experiments and field trips relevant to studies in power systems. Materials fee.

(Design units: 0)

Corequisite: EECS 163

Restriction: Computer Science Engineering Majors only. Electrical Engineering Majors only. Computer Engineering Majors only.

**EECS 166A. Industrial and Power Electronics. 4 Units.**

Power switching devices, pulse width modulation (PWM) methods, switching converter topologies, control, and magnetics. Materials fee.

(Design units: 2)

Prerequisite: EECS 170C and EECS 160A

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have second consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

Concurrent with EECS 267A.

**EECS 170A. Electronics I. 4 Units.**

The properties of semiconductors, electronic conduction in solids, the physics and operation principles of semiconductor devices such as diodes and transistors, transistor equivalent circuits, and transistor amplifiers.

(Design units: 1)

Corequisite: PHYS 7E

Prerequisite: PHYS 7D and EECS 70B

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 170B. Electronics II. 4 Units.**

Design and analysis of single-stage amplifiers, biasing circuits, inverters, logic gates, and memory elements based on CMOS transistors.

(Design units: 2)

Corequisite: EECS 170LB

Prerequisite: EECS 70B and EECS 170A and EECS 170LA

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 170C. Electronics III. 4 Units.**

Principles of operation, design, and utilization of integrated circuit modules, including multi-stage amplifiers, operational amplifiers, and logic circuits.

(Design units: 2)

Corequisite: EECS 170LC

Prerequisite: EECS 170B and EECS 170LB

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have second consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 170D. Integrated Electronic Circuit Design. 4 Units.**

Design and fabrication of modern digital integrated circuits. Fabrication of CMOS process, transistor-level design simulation, functional characteristics of basic digital integrated circuits, and different logic families including the static and dynamic logic, layout, and extraction of digital circuits.

(Design units: 4)

Prerequisite: EECS 170C and EECS 170LC

Overlaps with EECS 119, CSE 112.

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have second consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 170E. Analog and Communications IC Design. 4 Units.**

Advanced topics in design of analog and communications integrated circuits. Topics include: implementation of passive components in integrated circuits; overview of frequency response of amplifiers, bandwidth estimation techniques, high-frequency amplifier design; design of radio-frequency oscillators.

(Design units: 3)

Prerequisite: EECS 170C

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have second consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 170LA. Electronics I Laboratory. 1 Unit.**

Laboratory accompanying EECS 170A to perform experiments on semiconductor material properties, semiconductor device physics and operation principles, and transistor amplifiers to improve experimental skills and to enhance the understanding of lecture materials.

(Design units: 1)

Corequisite: EECS 170A and PHYS 7E

Prerequisite: PHYS 7D and EECS 70B

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**EECS 170LB. Electronics II Laboratory. 1 Unit.**

Laboratory accompanying EECS 170B.

(Design units: 1)

Corequisite: EECS 170B

Prerequisite: EECS 170A and EECS 170LA

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 170LC. Electronics III Laboratory. 1 Unit.**

Laboratory accompanying EECS 170C to provide hands-on training in design of digital/analog circuits/subsystems. Materials fee.

(Design units: 1)

Corequisite: EECS 170C

Prerequisite: EECS 170B and EECS 170LB

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Engineering Majors have second consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 174. Semiconductor Devices. 4 Units.**

Metal-semiconductor junctions, diodes, bipolar junction transistors, MOS structures, MOSFETs, CMOS technology, LEDs, and laser diodes.

(Design units: 1)

Prerequisite: EECS 170A

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment. Materials Science Engineering Majors have second consideration for enrollment.

**EECS 176. Fundamentals of Solid-State Electronics and Materials. 4 Units.**

Physical properties of semiconductors and the roles materials play in device operation. Topics include: crystal structure, phonon vibrations, energy band, transport phenomenon, optical properties and quantum confinement effect essential to the understanding of electronic, optoelectronic and nanodevices.

(Design units: 1)

Prerequisite: EECS 170A

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**EECS 179. Microelectromechanical Systems (MEMS). 4 Units.**

Small-scale machines, small-scale phenomena, MEMS fabrication, MEMS CAD tools, MEMS devices and packaging, MEMS testing.

(Design units: 2)

Restriction: Upper-division students only. Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment.

**EECS 180A. Engineering Electromagnetics I. 4 Units.**

Electrostatics, magnetostatics, and electromagnetic fields: solutions to problems in engineering applications; transmission lines, Maxwell's equations and phasors, plane wave propagation, reflection, and transmission.

(Design units: 1)

Prerequisite: PHYS 7E and EECS 145

Restriction: Electrical Engineering Majors have first consideration for enrollment. Biomedical Engineering Majors have first consideration for enrollment. Materials Science Engineering Majors have first consideration for enrollment.

**EECS 180B. Engineering Electromagnetics II. 4 Units.**

Time-varying electromagnetic fields, plane waves, polarization, guidance of waves like rectangular waveguides and microstrips, optical fibers resonant cavities, skin effects and losses, spherical waves, radiation and reception of waves, antenna basics.

(Design units: 1)

Prerequisite: EECS 180A

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 180C. Engineering Electromagnetics III. 4 Units.**

Propagation in anisotropic media. Propagation in ferrites and non-reciprocal devices. Scattering and dispersion. Electromagnetic properties of materials. Scattering of small nanoparticles. Spherical waves. Cross section of large and small objects. Radar equation. Coherent and incoherent radiation.

(Design units: 0)

Prerequisite: EECS 180B

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment.

**EECS 182. Monolithic Microwave Integrated Circuit (MMIC) Analysis and Design. 4 Units.**

Design of microwave amplifiers including low-noise amplifiers, multiple stage amplifiers, power amplifiers, and introduction to broadband amplifiers. The goal is to provide the basic knowledge for the design of microwave amplifiers ranging from wireless system to radar system.

(Design units: 3)

Prerequisite: EECS 180A

Restriction: Computer Science Engineering Majors have first consideration for enrollment. Electrical Engineering Majors have first consideration for enrollment.

**EECS 188. Optical Electronics. 4 Units.**

Photodiodes and optical detection, photometry and radiometry, geometric optics, lens theory, imaging system, EM wave propagation, optical waveguides and fibers, heterojunction structures, laser theory, semiconductor lasers, and optical transmission system.

(Design units: 1)

Prerequisite: EECS 180A

Restriction: Electrical Engineering Majors have first consideration for enrollment. Computer Science Engineering Majors have second consideration for enrollment.

**EECS 195. Special Topics in Electrical and Computer Engineering. 1-4 Units.**

Studies special topics in selected areas of Electrical and Computer Engineering. Topics addressed vary each quarter.

(Design units: 1-4)

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**EECS 198. Group Study. 1-4 Units.**

Group study of selected topics in Electrical and Computer Engineering.

(Design units: 1-4)

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**EECS 199. Individual Study. 1-4 Units.**

For undergraduate Engineering majors in supervised but independent reading, research, or design. Students taking Individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Repeatability: May be taken for credit for 8 units.

**EECS 199P. Individual Study. 1-4 Units.**

For undergraduate Engineering majors in supervised but independent reading, research, or design. Students taking individual study for design credit are to submit a written paper to the instructor and to the Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**EECS 202A. Principles of Imaging. 4 Units.**

Linear systems, probability and random processes, image processing, projecting imaging, tomographic imaging.

Same as PHYS 233A.

Restriction: Graduate students only.

Concurrent with PHYS 147A.

**EECS 202B. Techniques in Medical Imaging I: X-ray, Nuclear, and NMR Imaging. 4 Units.**

Ionizing radiation, planar and tomographic radiographic and nuclear imaging, magnetism, NMR, MRI imaging.

Prerequisite: EECS 202A

Same as PHYS 233B.

Restriction: Graduate students only.

Concurrent with PHYS 147B.

**EECS 202BP. Techniques in Medical Imaging: X-ray, Nuclear, and NMR Imaging. 4 Units.**

Ionizing radiation, planar and tomographic radiographic and nuclear imaging, magnetism, NMR, MRI imaging.

Restriction: Master of Engineering students only. Graduate students only.

**EECS 202C. Techniques in Medical Imaging II: Ultrasound, Electrophysiological, Optical. 4 Units.**

Sound and ultrasound, ultrasonic imaging, physiological electromagnetism, EEG, MEG, ECG, MCG, optical properties of tissues, fluorescence and bioluminescence, MR impedance imaging, MR spectroscopy, electron spin resonance and ESR imaging.

Prerequisite: EECS 202B

Same as PHYS 233C.

Restriction: Graduate students only.

Concurrent with PHYS 147C.

**EECS 203A. Digital Image Processing. 4 Units.**

Pixel-level digital image representation and elementary operations; Fourier and other unitary transforms; compression, enhancement, filtering, and restoration; laboratory experience is provided.

Restriction: Graduate students only.

**EECS 211. Advanced System Software. 4 Units.**

Study of operating systems including interprocess communication, scheduling, resource management, concurrency, reliability, validation, protection and security, and distributed computing support. System software design languages and modeling analysis.

Restriction: Graduate students only.

**EECS 211P. Advanced System Software. 4 Units.**

Study of operating systems including interprocess communication, scheduling, resource management, concurrency, reliability, validation, protection and security, and distributed computing support. System software design languages and modeling analysis.

Prerequisite: Recommended: Undergraduate-level knowledge of system software (e.g. EECS 111) and organization of digital computers (e.g. UCI EECS 112).

Restriction: Master of Engineering students only. Graduate students only.

**EECS 213. Computer Architecture. 4 Units.**

Problems in hardware, firmware (microprogram), and software. Computer architecture for resource sharing, real-time applications, parallelism, microprogramming, and fault tolerance. Various architectures based on cost/performance and current technology.

Restriction: Graduate students only.

**EECS 213P. Computer Architecture. 4 Units.**

Problems in hardware, firmware (microprogram), and software. Computer architecture for resource sharing, real-time applications, parallelism, microprogramming, and fault tolerance. Various architectures based on cost/performance and current technology.

Prerequisite: Recommended: Undergraduate-level knowledge of organization of digital computers (e.g. EECS 112 and EECS 112L).

Restriction: Master of Engineering students only. Graduate students only.

**EECS 215. Design and Analysis of Algorithms. 4 Units.**

Computer algorithms from a practical standpoint. Algorithms for symbolic and numeric problems such as sorting, searching, graphs, and network flow. Analysis includes algorithm time and space complexity.

**EECS 215P. Design and Analysis of Algorithms. 4 Units.**

Computer algorithms from a practical standpoint. Algorithms for symbolic and numeric problems such as sorting, searching, graphs, and network flow. Analysis includes algorithm time and space complexity.

Restriction: Master of Engineering students only. Graduate students only.

**EECS 216. Advanced Application of Algorithms. 4 Units.**

Medium-sized group and individual programming project. Topics include specification requirements documentation, practical implementation of algorithms, and testing/verification of design.

Prerequisite: Recommended: Undergraduate course work in engineering data structures and algorithms.

**EECS 217. VLSI System Design. 4 Units.**

Overview of integrated fabrication, circuit simulation, basic device physics, device layout, timing; MOS logic design; layout generation, module generation, techniques for very large scale integrated circuit design.

Restriction: Graduate students only.

**EECS 220. Advanced Digital Signal Processing Architecture. 4 Units.**

Study the latest DSP architectures for applications in communication (wired and wireless) and multimedia processing. Emphasis given to understanding the current design techniques and to evaluate the performance, power, and application domain of the latest DSP processors.

Prerequisite: EECS 213

Restriction: Graduate students only.

**EECS 220P. Advanced Digital Signal Processing Architecture. 4 Units.**

Study the latest DSP architectures for applications in communication (wired and wireless) and multimedia processing. Emphasis given to understanding the current design techniques and to evaluate the performance, power, and application domain of the latest DSP processors.

Prerequisite: EECS 213P

Restriction: Master of Engineering students only. Graduate students only.

**EECS 221. Topics in Computer Engineering. 4 Units.**

New research results in computer engineering.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EECS 222. Embedded System Modeling. 4 Units.**

Computational models for embedded systems. System-level specification and description languages. Concepts, requirements, examples. Embedded system models at different levels of abstraction. Modeling of test benches, design under test, IP components. Discrete event simulation, semantics, and algorithms. Formerly EECS 222A.

Restriction: Graduate students only.

**EECS 223. Real-Time Computer Systems. 4 Units.**

Time bases, clock synchronization, real-time communication protocols, specification of requirements, task scheduling. Validation of timelines, real-time configuration management.

Prerequisite: EECS 211 and EECS 213

Restriction: Graduate students only.

**EECS 223P. Real-Time Computer Systems. 4 Units.**

Time bases, clock synchronization, real-time communication protocols, specification of requirements, task scheduling. Validation of timelines, real-time configuration management.

Prerequisite: EECS 211P and EECS 213P

Restriction: Master of Engineering students only. Graduate students only.

**EECS 224. High-Performance Computing. 4 Units.**

Fundamentals of high-performance computing, covering both theory and practice. Topics include performance analysis and tuning, design of parallel and I/O efficient algorithms, basics of parallel machine architectures, and current/emerging programming models (shared memory, distributed memory, and accelerators).

Prerequisite: EECS 215 or CS 260

Restriction: Graduate students only.

**EECS 225. Embedded Systems Design. 4 Units.**

Embedded systems design flow and methodology. Design space exploration. Co-design of hardware and software, embedded architecture and network exploration and synthesis. System software/hardware interface generation. Real-time constraints, specification-to-architecture mapping, design tools and methodologies. Formerly EECS 222B.

Restriction: Graduate students only.

**EECS 226. Embedded System Software. 4 Units.**

Embedded system software concepts, requirements, examples, for engineering applications such as multi-media and automotive. Software generation methodology. Algorithmic specification, design constraints. Embedded operating systems. Static, dynamic, real-time scheduling. Input/output, interrupt handling. Code generation, compilation, instruction set simulation. Formerly EECS 222C.

Restriction: Graduate students only.

**EECS 227. Cyber-Physical System Design. 4 Units.**

Model-based design of cyber-physical systems including, e.g., plant, sensing, control, actuation, embedded hardware/software, communication, real-time analysis, various levels of simulation (MILS, SILS, HILS), tools and methodologies for automatic synthesis, and application from various interdisciplinary domains.

Restriction: Graduate students only.

**EECS 229. Low Power SoC Design. 4 Units.**

From an inverter to server centers, low-power design theory and practice in modern systems-on-chip (SoC), energy efficient design time and runtime methods are surveyed at circuit, RTL, and architecture levels. Lab assignments will help students quantify tradeoffs and design practices.

Prerequisite: EECS 217

Restriction: Graduate students only.

**EECS 230. Energy Efficiency. 4 Units.**

Green energy sources for production, transmission, storage, and utilization of electricity, with a special focus on solar, wind, and nuclear energy production. Study of newly developed renewable sources of energy including capital cost, product cost, environmental issues, and technical feasibility.

**EECS 231. Advanced System Security. 4 Units.**

Advanced study about system security. Topics include software vulnerabilities (buffer overflow), vulnerability discovery (fuzzing), network security, side-channel analysis (power analysis and micro-architecture attacks), machine-learning security, IoT security, and privacy (differential privacy).

Restriction: Graduate students only.

**EECS 240. Random Processes. 4 Units.**

Extensions of probability theory to random variables varying with time. General properties of stochastic processes. Convergence. Estimation, including nonlinear and linear minimum mean square error and maximum likelihood. Spectral density and linear filters. Poisson processes and discrete-time Markov chains.

Restriction: Graduate students only.

**EECS 240P. Random Processes. 4 Units.**

Extensions of probability theory to random variables varying with time. General properties of stochastic processes. Convergence. Estimation, including nonlinear and linear minimum mean square error and maximum likelihood. Spectral density and linear filters. Poisson processes and discrete-time Markov chains.

Prerequisite: Recommended: Knowledge of engineering probability (e.g. EECS 55).

Restriction: Master of Engineering students only. Graduate students only.

**EECS 241A. Digital Communications I. 4 Units.**

Concepts and applications of digital communication systems. Baseband digital transmission of binary, multi-amplitude, and multidimensional signals. Introduction to and performance analysis of different modulation schemes.

**EECS 241AP. Digital Communications I. 4 Units.**

Concepts and applications of digital communication systems. Baseband digital transmission of binary, multi-amplitude, and multidimensional signals. Introduction to and performance analysis of different modulation schemes.

Restriction: Master of Engineering students only. Graduate students only.

**EECS 241B. Digital Communications II. 4 Units.**

Concepts and applications of equalization, multi-carrier modulation, spread spectrum and CDMA. Digital communications through fading memory channels.

Prerequisite: EECS 241A

Restriction: Graduate students only.

**EECS 241BP. Digital Communications II. 4 Units.**

Concepts and applications of equalization, multi-carrier modulation, spread spectrum, and CDMA. Digital communications through fading memory channels.

Prerequisite: EECS 241AP

Restriction: Master of Engineering students only. Graduate students only.

**EECS 242. Information Theory. 4 Units.**

Fundamental capabilities and limitations of information sources and information transmission systems. Analytical framework for modeling and evaluating communication systems: entropy, mutual information asymptotic equipartition property, entropy rates of a stochastic process, data compression, channel capacity, differential entropy, the Gaussian channel.

Prerequisite: EECS 240

**EECS 243. Error Correcting Codes. 4 Units.**

Different techniques for error correcting codes and analyzing their performance. Linear block codes; cyclic codes; convolutional codes. Minimum distance; optimal decoding; Viterbi decoding; bit error probability. Coding gain; trellis coded modulation.

Prerequisite: EECS 240

Restriction: Graduate students only.

**EECS 244. Wireless Communications. 4 Units.**

Introduction to wireless communications systems. Wireless channel modeling. Single carries, spread spectrum, and multi-carrier wireless modulation schemes. Diversity techniques. Multiple-access schemes. Transceiver design and system level tradeoffs. Brief overview of GSM, CDMA, (IS-95) and 2.5, 3G cellular schemes.

Prerequisite: EECS 241B

Restriction: Graduate students only.

**EECS 244P. Wireless Communications. 4 Units.**

Introduction to wireless communications systems. Wireless channel modeling. Single carries, spread spectrum, and multi-carrier wireless modulation schemes. Diversity techniques. Multiple-access schemes. Transceiver design and system level tradeoffs. Brief overview of GSM, CDMA, (IS-95) and 2.5, 3G cellular schemes.

Prerequisite: EECS 241BP

Restriction: Master of Engineering students only. Graduate students only.

**EECS 245. Space-Time Coding. 4 Units.**

A fundamental study of: Capacity of MIMO Channels, space-time code design criteria, space-time block codes, space-time trellis codes, differential detection for multiple antennas, spatial multiplexing, BLAST.

Prerequisite: EECS 242

Restriction: Graduate students only.

**EECS 247. Information Storage. 4 Units.**

Storage architecture, storage network and networking algorithms in data centers, principle of storage devices and non-volatile memory, data consistency, data availability and integrity, power management.

Restriction: Graduate students only.

**EECS 248A. Computer and Communication Networks. 4 Units.**

Network architecture of the Internet, telephone networks, cable networks, and cell phone networks. Network performance models. Network performance models. Advanced concepts and implementations of flow and congestion control, addressing, internetworking, forwarding, routing, multiple access, streaming, and quality-of-service.

Prerequisite: EECS 148 or CS 132

Same as CS 232, NSYS 201.

Restriction: Graduate students only.

**EECS 250. Digital Signal Processing I. 4 Units.**

Fundamental principles of digital signal processing, sampling, decimation and interpolation, discrete Fourier transforms and FFT algorithms, transversal and recursive filters, discrete random processes, and finite-word effects in digital filters.

Restriction: Graduate students only.

**EECS 250P. Digital Signal Processing I. 4 Units.**

Fundamental principles of digital signal processing, sampling, decimation and interpolation, discrete Fourier transforms and FFT algorithms, transversal and recursive filters, discrete random processes, and finite-word effects in digital filters.

Prerequisite: Recommended: Knowledge of digital signal processing (e.g. EECS 152A).

Restriction: Master of Engineering students only. Graduate students only.

**EECS 251A. Detection, Estimation, and Demodulation Theory. 4 Units.**

Fundamentals of hypothesis testing and Bayes and Maximum Likelihood Estimation. ARMA and state variable models for random time series analysis. Wiener and Kalman filtering and prediction. Adaptive algorithms for identification and tracking of parameters of time-varying models.

Prerequisite: EECS 240

**EECS 251B. Detection, Estimation, and Demodulation Theory. 4 Units.**

Fundamentals of hypothesis testing and Bayes and Maximum Likelihood Estimation. ARMA and state variable models for random time series analysis. Wiener and Kalman filtering and prediction. Adaptive algorithms for identification and tracking of parameters of time-varying models.

Prerequisite: EECS 240

**EECS 260A. Linear Systems I. 4 Units.**

State-space representation of continuous-time and discrete-time linear systems. Controllability, observability, stability. Realization of rational transfer functions.

Restriction: Graduate students only.

**EECS 261A. Linear Optimization Methods. 4 Units.**

Formulation, solution, and analysis of linear programming and linear network flow problems. Simplex methods, dual ascent methods, interior point algorithms, and auction algorithms. Duality theory and sensitivity analysis. Shortest path, max-flow, assignment, and minimum cost flow problems.

Restriction: Graduate students only.

**EECS 267A. Industrial and Power Electronics. 4 Units.**

Power switching devices, pulse width modulation (PWM) methods, switching converter topologies, control, and magnetics. Materials fee.

Restriction: Graduate students only.

Concurrent with EECS 166A.

**EECS 267B. Topics in Industrial and Power Electronics. 4 Units.**

Practical design of switching converters, electromagnetic compatibility, thermal management, and/or control methods.

Prerequisite: EECS 267A

Restriction: Graduate students only.

**EECS 270A. Advanced Analog Integrated Circuit Design I. 4 Units.**

Basic transistor configurations; differential pairs; active load/current sources; supply/temperature-independent biasing; op-amp gain and output stages; amplifier frequency response and stability compensation; nonidealities in op-amps; noise and dynamic range in analog circuits.

Restriction: Graduate students only.

**EECS 270AP. Advanced Analog Integrated Circuit Design I. 4 Units.**

Basic transistor configurations; differential pairs; active load/current sources; supply/temperature-independent biasing; op-amp gain and output stages; amplifier frequency response and stability compensation; nonidealities in op-amps; noise and dynamic range in analog circuits.

Prerequisite: Recommended: Introductory knowledge of control systems (e.g. EECS 160A) and electronics (e.g. EECS 170C).

Restriction: Master of Engineering students only. Graduate students only.

**EECS 270B. Advanced Analog Integrated Circuit Design II. 4 Units.**

Advanced transistor modeling issues; discrete-time and continuous-time analog Integrated Circuit (IC) filters; phase-locked loops; design of ICs operating at radio frequencies; low-voltage/low-power design techniques; A/D and D/A converters; AGC circuits.

Prerequisite: EECS 270A

Restriction: Graduate students only.

**EECS 270BP. Advanced Analog Integrated Circuit Design II. 4 Units.**

Advanced transistor modeling issues; discrete-time and continuous-time analog Integrated Circuit (IC) filters; phase-locked loops; design of ICs operating at radio frequencies; low-voltage/low-power design techniques; A/D and D/A converters; AGC circuits.

Prerequisite: EECS 270AP

Restriction: Master of Engineering students only. Graduate students only.

**EECS 270C. Design of Integrated Circuits for Broadband Applications. 4 Units.**

Topics include: broadband standards and protocols; high-frequency circuit design techniques; PLL theory and design; design of transceivers; electrical/optical interfaces.

Prerequisite: EECS 270A

Restriction: Graduate students only.

**EECS 270D. Radio-Frequency Integrated Circuit Design. 4 Units.**

Topics include: RF component modeling; matching network design; transmission line theory/modeling; Smith chart and S-parameters; noise modeling of active and passive components; high-frequency amplifier design; low-noise amplifier (LNA) design; mixer design; RF power amplifier.

Prerequisite: EECS 270A

Restriction: Graduate students only.

**EECS 270DP. Radio-Frequency Integrated Circuit Design. 4 Units.**

Topics include RF component modeling; matching network design; transmission line theory/modeling; Smith chart and S-parameters; noise modeling of active and passive components; high-frequency amplifier design; low-noise amplifier (LNA) design; mixer design; RF power amplifier.

Prerequisite: EECS 270AP

Restriction: Master of Engineering students only. Graduate students only.

**EECS 270E. High Frequency (Millimeter-Wave and Terahertz) Circuits. 4 Units.**

Discussion of the new methodologies, circuits, and systems developed at mm-wave and terahertz frequency ranges due to the growing interest in high speed communication and high frequency signal generation.

Restriction: Graduate students only.

**EECS 272. Topics in Electrical Engineering. 4 Units.**

New research results in electronic system design.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EECS 275A. Very Large Scale Integration (VLSI) Project. 4 Units.**

Students create VLSI design projects from conception through architecture, floor planning, detailed design, simulation, verification, and submission for project fabrication. Emphasis on practical experience in robust VLSI design techniques. (Successful students are expected to take EECS 275B.).

Restriction: Graduate students only.

**EECS 275B. Very Large Scale Integration (VLSI) Project Testing. 4 Units.**

Test and document student-created Complementary Metal Oxide Semiconductor (CMOS) Very Large Scale Integration (VLSI) projects designed in EECS 275A. Emphasis on practical laboratory experience in VLSI testing techniques. Materials fee.

Prerequisite: EECS 275A

Restriction: Graduate students only.

**EECS 277A. Advanced Semiconductor Devices I. 4 Units.**

Advanced complementary metal-oxide-semiconductor field-effect transistors (CMOSFET), device scaling, device modeling and fabrication, equivalent circuits, and their applications for digital, analog, RF.

Restriction: Graduate students only.

**EECS 277B. Advanced Semiconductor Devices II. 4 Units.**

Metal-semiconductor field-effect transistors (MESFET), heterojunction bipolar transistors (HBT), microwave semiconductor devices, equivalent circuits, device modeling and fabrication, microwave amplifiers, transmitters, and receivers.

Restriction: Graduate students only.

**EECS 277C. Nanotechnology. 4 Units.**

Fabrication and characterization techniques of electrical circuit elements at the nanometer scale. Quantized conductance, semiconductor quantum dots, single electron transistors, molecular wires, carbon nanotubes, self-assembly of nano-circuit elements, quantum methods of information processing.

Restriction: Graduate students only.

**EECS 278. Micro-System Design. 4 Units.**

Covers the fundamentals of the many disciplines needed for design of Micro-Electro-Mechanical Systems (MEMS): microfabrication technology, structural mechanics on micro-scale, electrostatics, circuit interface, control, computer-aided design, and system integration.

Same as MAE 247.

Restriction: Graduate students only.

**EECS 279. Micro-Sensors and Actuators. 4 Units.**

Introduction to the technology of Micro-Electro-Mechanical Systems (MEMS). Fundamental principles and applications of important microsensors, actuation principles on microscale. Introduction to the elements of signal processing; processing of materials for micro sensor/actuator fabrication; smart sensors and microsensor/microactuator array devices.

Same as MAE 249.

Restriction: Graduate students only.

**EECS 280A. Advanced Engineering Electromagnetics I. 4 Units.**

Stationary electromagnetic fields, Maxwell's equations, circuits and transmission lines, plane waves, guided waves, and radiation.

Restriction: Graduate students only.

**EECS 280AP. Advanced Engineering Electromagnetics I. 4 Units.**

Stationary electromagnetic fields, Maxwell's equations, circuits and transmission lines, plane waves, guided waves, and radiation.

Prerequisite: Recommended: Knowledge of engineering electromagnetics (e.g. EECS 180A)

Restriction: Master of Engineering students only. Graduate students only.

**EECS 280B. Advanced Engineering Electromagnetics II. 4 Units.**

Two- and three-dimensional boundary value problems, dielectric waveguides and other special waveguides, microwave networks and antenna arrays, electromagnetic properties of materials, and electromagnetic optics.

Prerequisite: EECS 280A

Restriction: Graduate students only.

**EECS 282. Monolithic Microwave Integrated Circuit (MMIC) Analysis and Design II. 4 Units.**

Design of microwave amplifiers using computer-aided design tools. Covers low-noise amplifiers, multiple stage amplifiers, broadband amplifiers, and power amplifiers. Hybrid circuit design techniques including filters and baluns. Theory and design rules for microwave oscillator design.

Restriction: Graduate students only.

**EECS 284P. RF Antenna Design . 4 Units.**

Advanced transmission line design, radiation of electromagnetic waves, dipole antennas, antenna arrays, advanced antenna designs, and practical design considerations in communications systems. Course is supplemented by RF design tools and modeling.

Prerequisite: EECS 280AP

Restriction: Master of Engineering students only. Graduate students only.

**EECS 285A. Optical Communications. 4 Units.**

Introduction to fiber optic communication systems, optical and electro-optic materials, and high-speed optical modulation and switching devices.

Restriction: Graduate students only.

**EECS 285AP. Optical Communications. 4 Units.**

Introduction to fiber optic communication systems, optical and electro-optic materials, and high-speed optical modulation and switching devices.

Prerequisite: Undergraduate-level Engineering Electromagnetics I (e.g. EECS E80A).

Restriction: Master of Engineering students only. Graduate students only.

**EECS 285B. Lasers and Photonics. 4 Units.**

Covers the fundamentals of lasers and applications, including Gaussian beam propagation, interaction of optical radiation with matters, and concepts of optical gain and feedback. Applications are drawn from diverse fields of optical communication, signal processing, and material diagnosis.

Prerequisite: Undergraduate course work in electromagnetic theory and atomic physics.

**EECS 285C. Nano Imaging. 4 Units.**

Theory and practice of modern nanoscale imaging techniques and applications. Traces the development of microscopy from ancient times to modern day techniques used for visualizing the nano-world from atoms to molecules including hands-on experience in the laboratory.

Restriction: Graduate students only.

**EECS 290. Curricular Practical Training. 1 Unit.**

Curricular practical training. Students will go through practical training under an industry mentor in a technical field corresponding to their concentration area.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EECS 292. Preparation for M.S. Comprehensive Examination. 1-8 Units.**

Individual reading and preparation for the M.S. comprehensive examination.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EECS 293. Preparation for Ph.D. Preliminary Examination. 1-8 Units.**

Individual reading and preparation for the Ph.D. preliminary examination.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EECS 294. Electrical Engineering and Computer Science Colloquium. 1 Unit.**

Invited speakers discuss their latest research results in electrical engineering and computer science.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EECS 295. Seminars in Engineering. 1-4 Units.**

Scheduled each year by individual faculty in major field of interest.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EECS 295P. Special Topics in Electrical Engineering and Computer Science. 4 Units.**

Studies in selected areas of Electrical Engineering. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Master of Engineering students only. Graduate students only.

**EECS 296. Master of Science Thesis Research. 1-16 Units.**

Individual research or investigation conducted in the pursuit of preparing and completing the thesis required for the M.S. degree in Engineering.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EECS 297. Doctor of Philosophy Dissertation Research. 1-16 Units.**

Individual research or investigation conducted in preparing and completing the dissertation required for the Ph.D. degree in Engineering.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**EECS 298. Topics in Electrical Engineering and Computer Science. 4 Units.**

Study of Electrical and Computer Engineering concepts.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EECS 299. Individual Research. 1-16 Units.**

Individual research or investigation under the direction of an individual faculty member.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Computer Engineering, B.S.

**Program Educational Objectives:** Graduates of the Computer Engineering program will (1) be engaged in professional practice at or beyond the entry level or enrolled in high-quality graduate programs building on a solid foundation in engineering, mathematics, the sciences, humanities and social sciences, and experimental practice as well as modern engineering methods; (2) be innovative in the design, research and implementation of systems and products with strong problem solving, communication, teamwork, leadership, and entrepreneurial skills; (3) proactively function with creativity, integrity and relevance in the ever-changing global environment by applying their fundamental knowledge and experience to solve real-world problems with an understanding of societal, economic, environmental, and ethical issues. (Program educational objectives are those aspects of engineering that help shape the curriculum; achievement of these objectives is a shared responsibility between the student and UCI.)

The undergraduate Computer Engineering curriculum includes a core of mathematics, physics, and chemistry. Engineering courses in fundamental areas fill in much of the remaining curriculum.

**High School Students:** See School Admissions information.

**Transfer Students:** Preference will be given to junior-level applicants with the highest grades overall, and who have satisfactorily completed the following **required** courses: two years of approved calculus, one year of calculus-based physics with laboratories (mechanics, electricity and magnetism), completion of lower-division writing, and one course in computational methods (e.g., C, C++). For course equivalency specific to each college, visit <https://assist.org>.

Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. Students who enroll at UCI in need of completing lower-division coursework may find that it will take longer than two years to complete their degrees. For further information, contact The Henry Samueli School of Engineering at 949-824-4334.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

**Major Requirements:**

**Mathematics and Basic Science Courses:**

EECS 55

Engineering Probability

EECS 70LA

Network Analysis I Laboratory

EECS 145	Electrical Engineering Analysis
I&C SCI 6D	Discrete Mathematics for Computer Science
MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
MATH 2D	Multivariable Calculus
MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations
PHYSICS 7C	Classical Physics
PHYSICS 7LC	Classical Physics Laboratory
PHYSICS 7D- 7E	Classical Physics and Classical Physics
PHYSICS 7LD	Classical Physics Laboratory
One additional math or basic science elective from the following:	
I&C SCI 6B	Boolean Logic and Discrete Structures
MATH 2E	Multivariable Calculus
PHYSICS 51A	Modern Physics
PHYSICS 52A	Fundamentals of Experimental Physics

or other courses as approved by faculty advisor.

### Engineering Topics Courses:

Students must complete a minimum of 26 units of engineering design.

#### Core Courses:

EECS 12	Introduction to Programming
EECS 20	Computer Systems and C Programming
EECS 22	Advanced C Programming
EECS 22L	Software Engineering Project in C Language
EECS 31	Introduction to Digital Systems
EECS 31L	Introduction to Digital Logic Laboratory
EECS 40	Object-Oriented Systems and Programming
EECS 50	Discrete-Time Signals and Systems
EECS 70A	Network Analysis I
EECS 70B	Network Analysis II
EECS 70LB	Network Analysis II Laboratory
EECS 111	System Software
EECS 112	Organization of Digital Computers
EECS 112L	Organization of Digital Computers Laboratory
EECS 113	Processor Hardware/Software Interfaces
EECS 114	Engineering Data Structures and Algorithms
EECS 118	Introduction to Knowledge and Software Engineering
EECS 119	VLSI
EECS 148	Computer Networks
EECS 159A- 159B	Senior Design Project I and Senior Design Project II
EECS 170A	Electronics I
EECS 170LA	Electronics I Laboratory
EECS 170B	Electronics II
EECS 170LB	Electronics II Laboratory

With the approval of a faculty advisor, students select any additional engineering topics courses needed to satisfy school and department requirements.

#### Engineering Elective Courses:

Select, with approval of a faculty advisor, a minimum of three courses of engineering topics.

COMPSCI 142A	Compilers and Interpreters
EECS 101	Introduction to Machine Vision
EECS 116	Introduction to Data Management

EECS 117	Parallel Computer Systems
EECS 120	Fundamentals of Parallel Computing
EECS 141A	Communication Systems I
EECS 141B	Communication Systems II
EECS 150	Continuous-Time Signals and Systems
EECS 152A	Digital Signal Processing
EECS 152B	Digital Signal Processing Design and Laboratory
EECS 199	Individual Study (up to 3 graded units)
ENGR 7A- 7B	Introduction to Engineering I and Introduction to Engineering II (*)

\* ENGR 7A and ENGR 7B can be counted as 4 units of Engineering Electives. ENGR 7A and ENGR 7B are available only to lower-division students. Both ENGR 7A and ENGR 7B must be taken to be counted as an Engineering Elective.

### Engineering Professional Topics Courses

ENGR 190W	Communications in the Professional World
-----------	--

At most an aggregate total of 6 units of EECS 199 may be used to satisfy degree requirements; EECS 199 is open to students with a 3.0 GPA or higher.

(The nominal Computer Engineering program will require 187 units of courses to satisfy all university and major requirements. Because each student comes to UCI with a different level of preparation, the actual number of units will vary.)

The sample program of study chart shown is typical for the major in Computer Engineering. Students should keep in mind that this program is based upon a sequence of prerequisites, beginning with adequate preparation in high school mathematics, physics, and chemistry. Students who are not adequately prepared, or who wish to make changes in the sequence for other reasons, must have their program approved by their advisor. Computer Engineering majors are encouraged to consult with academic counselors as needed, and students who are academically at risk are mandated to see a counselor as frequently as deemed necessary by the advising staff.

Freshman		
Fall	Winter	Spring
MATH 2A	MATH 2B	MATH 2D
EECS 12	I&C SCI 6D	PHYSICS 7D
General Education	PHYSICS 7C- 7LC	PHYSICS 7LD
General Education	EECS 31	EECS 31L
		General Education
Sophomore		
Fall	Winter	Spring
MATH 3A	MATH 3D	EECS 22L
PHYSICS 7E	EECS 22	EECS 50
EECS 20	EECS 55	EECS 70B
Math./Science Elective	EECS 70A	EECS 70LB
	EECS 70LA	General Education
Junior		
Fall	Winter	Spring
EECS 112	EECS 112L	EECS 111
EECS 40	EECS 114	EECS 113
EECS 145	EECS 170B	EECS 148
EECS 170A	EECS 170LB	General Education
EECS 170LA	General Education	
Senior		
Fall	Winter	Spring
EECS 159A	EECS 159B	ENGR 190W
EECS 118	General Education	Engineering Elective
EECS 119	General Education	General Education
Engineering Elective	Engineering Elective	

Students must obtain approval for their program of study and must see their faculty advisor at least once each year.

# Electrical and Computer Engineering, M.S.

The Department offers M.S. and Ph.D. degrees in Electrical and Computer Engineering with a concentration in Electrical Engineering and in Computer Engineering. Because most graduate courses are not repeated every quarter, students should make every effort to begin their graduate program in the fall.

Detailed descriptions of the two concentrations are as follows.

## Electrical Engineering Concentration (EE)

The Electrical Engineering faculty study the following areas: optical and solid-state devices, including quantum electronics and optics, integrated electro-optics, design of semiconductor devices and materials, analog and mixed-signal IC design, microwave circuits antenna and devices, and nano imaging; systems engineering and signal processing, including communication theory, signal processing, power electronics, neural networks, communications networks, systems engineering, and control systems. Related communication networks topics are also addressed by the Networked Systems M.S. and Ph.D. degrees.

## Computer Engineering Concentration (CPE)

The concentration in Computer Engineering provides students with a solid base in the design, development, and evaluation of computer systems and software. Thrust areas include computer architecture, software design, and embedded systems, but the program is highly customizable to the specific interests of the student. The research activities of the faculty in this concentration include parallel and networked computer systems, distributed software architectures and databases, real-time and embedded computer systems, VLSI architectures, computer design automation, low-power design, computer communication protocols and networks, security, programming languages for parallel/distributed processing, knowledge management, service-oriented architectures, and software engineering.

Two plans are offered for the M.S.: a thesis option and a comprehensive examination option. For either option, students are required to develop a complete program of study with advice from their faculty advisor. The graduate advisor must approve the study plan. Part-time study toward the M.S. is available. The program of study must be completed within four calendar years from first enrollment.

### Plan I: Thesis Option

The thesis option requires completion of 12 courses of study; an original research investigation; the completion of an M.S. thesis; and approval of the thesis by a thesis committee. The thesis committee is composed of three full-time faculty members with the faculty advisor of the student serving as the chair. Required undergraduate core courses and graduate seminar courses, such as EECS 290, EECS 292, EECS 293, EECS 294, and EECS 295, may not be counted toward the 12 courses. No more than one course of EECS 299 and one undergraduate elective course may be counted toward the 12 courses. Up to four of the required 12 courses may be from EECS 296 (M.S. Thesis Research) with the approval of the student's thesis advisor. Additional concentration-specific requirements are as follows; a list of core and concentration courses is given at the end of this section.

#### Electrical Engineering Concentration:

At least seven concentration courses in the Electrical Engineering Concentration (EE) must be completed. All courses must be completed with a grade of B (3.0) or better.

#### Computer Engineering Concentration:

Three core courses in the Computer Engineering Concentration (CPE) must be completed: EECS 211, EECS 213, and EECS 215. At least four additional concentration or approved courses must also be completed. All courses must be completed with a grade of B (3.0) or better.

### Plan II: Comprehensive Examination Option

The comprehensive examination option requires the completion of 12 courses and a comprehensive examination. Only one EECS 299 course can be counted if the EECS 299 course is four or more units. Undergraduate core courses and graduate seminar courses, such as EECS 290, EECS 292, EECS 293, EECS 294, and EECS 295, may not be counted toward the 12 courses requirement. No more than two of undergraduate elective courses may be counted. In fulfillment of the comprehensive examination element of the M.S. program, students can choose one of the two alternatives:

1) EECS 290 Curricular Practical Training or 2) EECS 294 Electrical Engineering and Computer Science Colloquium. Either of the two alternatives may be taken for 1 unit and completed with a satisfactory grade to fulfill the comprehensive exam requirements. Additional concentration-specific requirements are as follows; a list of core and concentration courses is given at the end of this section.

#### Electrical Engineering Concentration:

Students enrolled in the Electrical Engineering (EE) concentration who choose the Comprehensive Examination option must select one of the following plans of study.

#### Circuits and Devices Plan of Study:

Select four of the following:

EECS 270A	Advanced Analog Integrated Circuit Design I
EECS 270B	Advanced Analog Integrated Circuit Design II
EECS 277A	Advanced Semiconductor Devices I
EECS 277B	Advanced Semiconductor Devices II

EECS 280A	Advanced Engineering Electromagnetics I
-----------	---

EECS 285A	Optical Communications
-----------	------------------------

At least five additional courses from the list of EE concentration courses must be completed. All must be completed with a grade of B (3.0) or better.

#### Systems Plan of Study:

Select four of the following: <sup>1</sup>

EECS 240	Random Processes
----------	------------------

EECS 241A	Digital Communications I
-----------	--------------------------

EECS 250	Digital Signal Processing I
----------	-----------------------------

EECS 251A	Detection, Estimation, and Demodulation Theory
-----------	--

EECS 260A	Linear Systems I
-----------	------------------

EECS 267A	Industrial and Power Electronics
-----------	----------------------------------

At least five additional courses from the list of EE concentration courses must be completed. All must be completed with a grade of B (3.0) or better.

<sup>1</sup> If all six courses are not offered in an academic year, students who graduate in that year can petition to replace the courses that are not offered by EECS 242 and/or EECS 244.

### Electrical Engineering Concentration Courses

#### Electrical Engineering Concentration:

EECS 202A- 202B	Principles of Imaging and Techniques in Medical Imaging I: X-ray, Nuclear, and NMR Imaging
EECS 202C	Techniques in Medical Imaging II: Ultrasound, Electrophysiological, Optical
EECS 203A	Digital Image Processing
EECS 213	Computer Architecture
EECS 215	Design and Analysis of Algorithms
EECS 217	VLSI System Design
EECS 229	Low Power SoC Design
EECS 240	Random Processes
EECS 241A- 241B	Digital Communications I and Digital Communications II
EECS 242	Information Theory
EECS 243	Error Correcting Codes
EECS 244	Wireless Communications
EECS 245	Space-Time Coding
EECS 247	Information Storage
EECS 248A	Computer and Communication Networks
EECS 250	Digital Signal Processing I
EECS 251A- 251B	Detection, Estimation, and Demodulation Theory and Detection, Estimation, and Demodulation Theory
EECS 260A	Linear Systems I
EECS 261A	Linear Optimization Methods
EECS 267A- 267B	Industrial and Power Electronics and Topics in Industrial and Power Electronics
EECS 270A- 270B	Advanced Analog Integrated Circuit Design I and Advanced Analog Integrated Circuit Design II (and Advanced Analog Integrated Circuit Design II)
EECS 270C	Design of Integrated Circuits for Broadband Applications
EECS 270D	Radio-Frequency Integrated Circuit Design
EECS 272	Topics in Electrical Engineering
EECS 275A- 275B	Very Large Scale Integration (VLSI) Project and Very Large Scale Integration (VLSI) Project Testing
EECS 277A	Advanced Semiconductor Devices I
EECS 277B	Advanced Semiconductor Devices II
EECS 277C	Nanotechnology

EECS 278	Micro-System Design
EECS 279	Micro-Sensors and Actuators
EECS 280A	Advanced Engineering Electromagnetics I
EECS 280B	Advanced Engineering Electromagnetics II
EECS 282	Monolithic Microwave Integrated Circuit (MMIC) Analysis and Design II
EECS 285A	Optical Communications
EECS 285B	Lasers and Photonics
EECS 285C	Nano Imaging
EECS 298	Topics in Electrical Engineering and Computer Science

### Computer Engineering Concentration Courses

#### Computer Engineering Concentration:

Three core courses in the Computer Engineering Concentration (CPE) must be completed: EECS 211, EECS 213, and EECS 215. At least five additional concentration or approved courses must also be completed. All courses must be completed with a grade of B (3.0) or better.

#### Computer Engineering Concentration:

EECS 211	Advanced System Software <sup>1</sup>
EECS 213	Computer Architecture <sup>1</sup>
EECS 215	Design and Analysis of Algorithms <sup>1</sup>
EECS 217	VLSI System Design
EECS 220	Advanced Digital Signal Processing Architecture
EECS 221	Topics in Computer Engineering
EECS 222	Embedded System Modeling
EECS 223	Real-Time Computer Systems
EECS 224	High-Performance Computing
EECS 225	Embedded Systems Design
EECS 226	Embedded System Software
EECS 227	Cyber-Physical System Design
EECS 229	Low Power SoC Design
EECS 230	Energy Efficiency
EECS 248A	Computer and Communication Networks
EECS 298	Topics in Electrical Engineering and Computer Science
COMPSCI 233	Networking Laboratory
COMPSCI 234	Advanced Networks
COMPSCI 236	Wireless and Mobile Networking

<sup>1</sup> This course is also a core course.

In addition to fulfilling the course requirements outlined above, it is a University requirement for the Master of Science degree that students fulfill a minimum of 36 units of study.

### Program in Law and Graduate Studies (J.D./M.S.-ECE; J.D./Ph.D.-ECE)

Highly qualified students interested in combining the study of law with graduate qualifications in the ECE program are invited to undertake concurrent degree study under the auspices of UC Irvine's Program in Law and Graduate Studies (PLGS). Students in this program pursue a coordinated curriculum leading to a J.D. degree from the School of Law in conjunction with a Master's or Ph.D. degree in the ECE program. Additional information is available from the PLGS Program Director's Office, 949-824-4158, or by email to [plgs@uci.edu](mailto:plgs@uci.edu). A full description of the program, with links to all relevant application information can be found at the School of Law Concurrent Degree Programs website (<http://www.law.uci.edu/academics/interdisciplinary-studies/concurrent-degrees.html>) and in the Law School section (<http://catalogue.uci.edu/schooloflaw/#lawandgraduatestudies>) of the *Catalogue*.

## Electrical and Computer Engineering, Ph.D.

The Department offers M.S. and Ph.D. degrees in Electrical and Computer Engineering with a concentration in Electrical Engineering and in Computer Engineering. Because most graduate courses are not repeated every quarter, students should make every effort to begin their graduate program in the fall.

## Electrical Engineering Concentration (EE)

The Electrical Engineering faculty study the following areas: optical and solid-state devices, including quantum electronics and optics, integrated electro-optics, design of semiconductor devices and materials, analog and mixed-signal IC design, microwave circuits antenna and devices, and nano imaging; systems engineering and signal processing, including communication theory, signal processing, power electronics, neural networks, communications networks, systems engineering, and control systems. Related communication networks topics are also addressed by the Networked Systems M.S. and Ph.D. degrees (listed in the Interdisciplinary Studies section (<http://catalogue.uci.edu/interdisciplinarystudies/networkedsystems/>) of the *Catalogue*).

## Computer Engineering Concentration (CPE)

The concentration in Computer Engineering provides students with a solid base in the design, development, and evaluation of computer systems and software. Thrust areas include computer architecture, software design, and embedded systems, but the program is highly customizable to the specific interests of the student. The research activities of the faculty in this concentration include parallel and networked computer systems, distributed software architectures and databases, real-time and embedded computer systems, VLSI architectures, computer design automation, low-power design, computer communication protocols and networks, security, programming languages for parallel/distributed processing, knowledge management, service-oriented architectures, and software engineering.

The doctoral program in Electrical and Computer Engineering is tailored to the individual background and interest of the student. There are several milestones to pass: admission to the Ph.D. program by the Graduate Committee; Ph.D. preliminary examination on the background and potential for success in the doctoral program; departmental teaching requirement which can be satisfied through service as a teaching assistant or equivalent; original research work; development of a research report and dissertation proposal; advancement to Ph.D. candidacy in the third year (second year for students who entered with a master's degree) through the Ph.D. qualifying examination conducted on behalf of the Irvine Division of the Academic Senate; completion of a significant research investigation with original results; and completion and approval of a dissertation. The Ph.D. dissertation is written documentation of original research that has impact on the field of study for the Ph.D. A public Ph.D. dissertation defense is also required. During the Ph.D. study, four units of EECS 290 or EECS 294 must be completed.

The Ph.D. preliminary examination is conducted twice a year, in the fall and spring quarters. Detailed requirements for each concentration are specified in the departmental Ph.D. preliminary examination policies, available from the EECS Graduate Admissions Office. A student who already has an M.S. on enrollment must pass the Ph.D. preliminary examination within one complete academic year cycle after entering the Ph.D. program. A student who does not already have an M.S. on enrollment must pass the Ph.D. preliminary examination within two complete academic year cycles after entering the Ph.D. program. A student has only two chances to take and pass the Ph.D. preliminary examination. A student who fails the Ph.D. preliminary examination twice will be asked to withdraw from the program, or will be dismissed from the program, and may not be readmitted into the program.

The Ph.D. is granted upon the recommendation of the Doctoral Committee and the Dean of Graduate Studies. Part-time study toward the Ph.D. is not permitted. The normative time for completion of the Ph.D. is five years (four years for students who entered with a master's degree). The maximum time permitted is seven years.

## Program in Law and Graduate Studies (J.D./M.S.-ECE; J.D./Ph.D.-ECE)

Highly qualified students interested in combining the study of law with graduate qualifications in the ECE program are invited to undertake concurrent degree study under the auspices of UC Irvine's Program in Law and Graduate Studies (PLGS). Students in this program pursue a coordinated curriculum leading to a J.D. degree from the School of Law in conjunction with a Master's or Ph.D. degree in the ECE program. Additional information is available from the PLGS Program Director's Office, 949-824-4158, or by email to [plgs@uci.edu](mailto:plgs@uci.edu). A full description of the program, with links to all relevant application information can be found at the School of Law Concurrent Degree Programs website (<http://www.law.uci.edu/academics/interdisciplinary-studies/concurrent-degrees.html>) and in the Law School section (<http://catalogue.uci.edu/schooloflaw/#lawandgraduatestudies>) of the *Catalogue*.

## Electrical Engineering, B.S.

**Program Educational Objectives:** Graduates of the Electrical Engineering program will (1) engage in professional practice in academia, industry, or government; (2) promote innovation in the design, research and implementation of products and services in the field of electrical engineering through strong communication, leadership and entrepreneurial skills; (3) engage in life-long learning in the field of electrical engineering. (Program educational objectives are those aspects of engineering that help shape the curriculum; achievement of these objectives is a shared responsibility between the student and UCI.)

The undergraduate Electrical Engineering curriculum is built around a basic core of humanities, mathematics, and natural and engineering science courses. It is arranged to provide the fundamentals of synthesis and design that will enable graduates to begin careers in industry or to go on to graduate study. UCI Electrical Engineering students take courses in network analysis, electronics, electronic system design, signal processing, electromagnetics, and computer engineering. They learn to design circuits and systems to meet specific needs and to use modern computers in problem analysis and solution.

Electrical Engineering majors have the opportunity to select a specialization in Electro-optics and Solid-State Devices; and Systems and Signal Processing. In addition to the courses offered by the Department, the major program includes selected courses from the Donald Bren School of Information and Computer Sciences.

**High School Students:** See School Admissions information.

**Transfer Students:** Preference will be given to junior-level applicants with the highest grades overall, and who have satisfactorily completed the following **required** courses: two years of approved calculus, one year of calculus-based physics with laboratories (mechanics, electricity and magnetism), completion of lower-division writing, and one course in computational methods (e.g., C, C++). For course equivalency specific to each college, visit <https://assist.org>.

Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. Students who enroll at UCI in need of completing lower-division coursework may find that it will take longer than two years to complete their degrees. For further information, contact The Henry Samueli School of Engineering at 949-824-4334.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

**Major Requirements:**

**Mathematics and Basic Science Courses:**

ENGR 1A or CHEM 1A	General Chemistry for Engineers General Chemistry
EECS 55	Engineering Probability
EECS 70LA	Network Analysis I Laboratory
EECS 145	Electrical Engineering Analysis
MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
MATH 2D	Multivariable Calculus
MATH 2E	Multivariable Calculus
MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations
PHYSICS 7C	Classical Physics
PHYSICS 7LC	Classical Physics Laboratory
PHYSICS 7D- 7E	Classical Physics and Classical Physics
PHYSICS 7LD	Classical Physics Laboratory
PHYSICS 51A	Modern Physics

**Engineering Topics Courses:**

Students must complete each of the following courses and accumulate a minimum of 28 units of engineering design:

EECS 1	Introduction to Electrical Engineering and Computer Engineering
EECS 10	Computational Methods in Electrical and Computer Engineering
EECS 31	Introduction to Digital Systems
EECS 31L	Introduction to Digital Logic Laboratory
EECS 50	Discrete-Time Signals and Systems
EECS 70A	Network Analysis I
EECS 70B	Network Analysis II
EECS 70LB	Network Analysis II Laboratory
EECS 150	Continuous-Time Signals and Systems
EECS 159A- 159B	Senior Design Project I and Senior Design Project II
EECS 160A	Introduction to Control Systems
EECS 160LA	Control Systems I Laboratory
EECS 170A	Electronics I
EECS 170LA	Electronics I Laboratory
EECS 170B	Electronics II
EECS 170LB	Electronics II Laboratory
EECS 170C	Electronics III
EECS 170LC	Electronics III Laboratory
EECS 180A	Engineering Electromagnetics I

**Electrical Engineering Specialization:**

Students must satisfy the requirements for one of the five specializations listed below.

### Technical Elective Courses:

In addition to a specialization, and with approval of a faculty advisor, students must select a minimum of three other technical elective courses, comprising of at least 10 units. At least one of these courses must be from outside the student's specialization. All EECS courses not required for the major are approved as technical electives. Four (4) units of 199 course work count as one technical elective. ENGR 7A and ENGR 7B can be counted as 4 units of Technical Electives. ENGR 7A and ENGR 7B are available only to lower-division students. Both ENGR 7A and ENGR 7B must be taken to be counted as a Technical Elective.

### Engineering Professional Topics Courses

ENGR 190W	Communications in the Professional World
-----------	--

At most an aggregate total of 6 units of EECS 199 may be used to satisfy degree requirements; EECS 199 is open to students with a 3.0 GPA or higher.

(The nominal Electrical Engineering program will require 188-191 units of courses to satisfy all university and major requirements. Because each student comes to UCI with a different level of preparation, the actual number of units will vary.)

### Specialization in Electronic Circuit Design:

#### Requires:

EECS 170D	Integrated Electronic Circuit Design
EECS 170E	Analog and Communications IC Design
and select four of the following:	
EECS 166A	Industrial and Power Electronics
EECS 174	Semiconductor Devices
EECS 176	Fundamentals of Solid-State Electronics and Materials
EECS 179	Microelectromechanical Systems (MEMS)
EECS 182	Monolithic Microwave Integrated Circuit (MMIC) Analysis and Design
EECS 188	Optical Electronics

### Specialization in Semiconductors and Optoelectronics:

#### Requires:

EECS 174	Semiconductor Devices
EECS 188	Optical Electronics
PHYSICS 52A	Fundamentals of Experimental Physics
and select three of the following:	
EECS 170D	Integrated Electronic Circuit Design
EECS 176	Fundamentals of Solid-State Electronics and Materials
EECS 179	Microelectromechanical Systems (MEMS)
EECS 180B	Engineering Electromagnetics II
EECS 180C	Engineering Electromagnetics III
ENGR 54	Principles of Materials Science and Engineering

### Specialization in RF, Antennas and Microwaves:

#### Requires:

EECS 144	Antenna Design for Wireless Communication Links
EECS 180B	Engineering Electromagnetics II
EECS 182	Monolithic Microwave Integrated Circuit (MMIC) Analysis and Design
and select three of the following:	
EECS 170D	Integrated Electronic Circuit Design
EECS 170E	Analog and Communications IC Design
EECS 180C	Engineering Electromagnetics III
EECS 188	Optical Electronics
PHYSICS 52A	Fundamentals of Experimental Physics

### Specialization in Digital Signal Processing:

#### Requires:

EECS 22	Advanced C Programming
EECS 152A	Digital Signal Processing
EECS 152B	Digital Signal Processing Design and Laboratory

and select three of the following:

EECS 20	Computer Systems and C Programming
EECS 101	Introduction to Machine Vision
EECS 112	Organization of Digital Computers
EECS 141A	Communication Systems I
EECS 141B	Communication Systems II

#### Specialization in Communications:

##### Requires:

EECS 141A	Communication Systems I
EECS 141B	Communication Systems II

and select four of the following:

EECS 20	Computer Systems and C Programming
EECS 22	Advanced C Programming
EECS 144	Antenna Design for Wireless Communication Links
EECS 148	Computer Networks
EECS 152A	Digital Signal Processing
EECS 152B	Digital Signal Processing Design and Laboratory
EECS 170E	Analog and Communications IC Design
EECS 188	Optical Electronics

Listed below are sample programs for each of the five specializations within Electrical Engineering. These sample programs are typical for the accredited major in Electrical Engineering. Students should keep in mind that this program is based upon a rigid set of prerequisites, beginning with adequate preparation in high school mathematics, physics, and chemistry. Therefore, the course sequence should not be changed except for the most compelling reasons. Students who are not adequately prepared, or who wish to make changes in the sequence for other reasons, must have their programs approved by their advisor. Electrical Engineering majors are encouraged to consult with academic counselors as needed, and students who are academically at risk are mandated to see a counselor as frequently as deemed necessary by the advising staff.

### Sample Program of Study — Electrical Engineering (Electronic Circuit Design Specialization)

#### Freshman

Fall	Winter	Spring
MATH 2A	MATH 2B	MATH 2D
EECS 10	PHYSICS 7C	PHYSICS 7D

## Department of Materials Science and Engineering

### Julie M. Schoenung, Department Chair

916 Engineering Tower

949-824-5802

<http://www.eng.uci.edu/dept/mse> (<http://www.eng.uci.edu/dept/mse/>)

The Department of Materials Science and Engineering offers the B.S. in Materials Science and Engineering, a minor in Materials Science and Engineering, and the M.S. and Ph.D. in Materials Science and Engineering.

- Materials Science and Engineering, B.S.
- Materials Science and Engineering, M.S.
- Materials Science and Engineering, Minor
- Materials Science and Engineering, Ph.D.

## Faculty

Diran Apelian, Sc.D. Massachusetts Institute of Technology, *Distinguished Professor of Materials Science and Engineering* (solidification processing; aluminum metallurgy; clean metal/melt refining; plasma processing/spray forming; powder metallurgy; nanostructured materials; semi-solid processing; thermal processing; resource recovery and recycling; innovation in engineering education)

William Bowman, Ph.D. Arizona State University, *Assistant Professor of Materials Science and Engineering* (materials for energy conversion and storage, advanced transmission electron microscopy and spectroscopy, correlating multiscale properties, electrical properties of ceramics, electrochemistry and defect chemistry, interfaces, grain boundaries and surfaces, electron energy-loss spectroscopy, ceramic processing and thin-film growth)

Stacy Copp, Ph.D. University of California, Santa Barbara, *Samueli Faculty Development Chair and Assistant Professor of Materials Science and Engineering* (soft matter-based photonic materials; metal nanoclusters; polymer nanostructures; self-assembly; biomimetics; machine learning for materials discovery)

James Earthman, Ph.D. Stanford University, *Professor of Materials Science and Engineering; Biomedical Engineering* (biomaterials, compositionally complex materials, nanocrystalline alloys, quantitative percussion diagnostics, deformation and damage processes)

Allon Hochbaum, Ph.D. University of California, Berkeley, *Associate Professor of Materials Science and Engineering; Chemical and Biomolecular Engineering; Chemistry* (nanoscale materials and hybrid bio-inorganic devices for applications in clean energy)

David Kisailus, Ph.D. University of California, Santa Barbara, *Professor of Materials Science and Engineering* (investigation of synthesis - structure and structure - property relationships in biological and biomimetic materials, development of multifunctional structural materials, synthesis and crystal growth of nanoscale materials for energy conversion, storage, and environmental remediation)

Enrique Lavernia, Ph.D. Massachusetts Institute of Technology, *Distinguished Professor of Materials Science and Engineering* (nanostructured materials, additive manufacturing, powder metallurgy, mechanical behavior)

Martha L. Mecartney, Ph.D. Stanford University, *Professor Emeritus of Materials Science and Engineering; Chemical and Biomolecular Engineering* (ceramics for energy applications and for extreme environments, flash sintering, interfacial design of thermal conductivity, transmission electron microscopy)

Farghalli A. Mohamed, Ph.D. University of California, Berkeley, *Professor Emeritus of Materials Science and Engineering* (mechanical behavior of engineering materials such as metals, composites and ceramics, the correlation between behavior and microstructure, creep and superplasticity, mechanisms responsible for strengthening and fracture)

Daniel Mumm, Ph.D. Northwestern University, *Associate Professor of Materials Science and Engineering* (development of materials for power generation systems, propulsion, integrated sensing, advanced vehicle concepts and platform protection)

Xiaoqing Pan, Ph.D. Saarlandes University, *Henry Samueli Endowed Chair and Director of Irvine Materials Research Institute (IMRI) and Professor of Materials Science and Engineering; Physics and Astronomy* (atomic-scale structure, properties and dynamic behaviors of advanced materials including thin films and nanostructures for memories, catalysts, and energy conversion and storage devices)

Regina Ragan, Ph.D. California Institute of Technology, *Endowed Chair for the Center for Diversity in Engineering Education and Professor of Materials Science and Engineering; Chemical and Biomolecular Engineering* (exploration and development of novel material systems for nanoscale electronic and optoelectronic devices)

Timothy Rupert, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Materials Science and Engineering; Chemical and Biomolecular Engineering; Mechanical and Aerospace Engineering* (mechanical behavior, nanomaterials, structure property relationships, microstructural stability, grain boundaries and interfaces, materials characterization)

Julie M. Schoenung, Ph.D. Massachusetts Institute of Technology, *Department Chair and Professor of Materials Science and Engineering* (materials selection, green engineering, materials processing and characterization, nanostructured materials, structure-property relationships)

Lorenzo Valdevit, Ph.D. Princeton University, *Director of Institute for Design and Manufacturing Innovation (IDMI) and Associate Professor of Materials Science and Engineering; Mechanical and Aerospace Engineering* (architected materials, mechanical metamaterials, additive manufacturing, optimal design)

## Affiliate Faculty

Shane Ardo, Ph.D. Johns Hopkins University, *Associate Professor of Chemistry; Chemical and Biomolecular Engineering; Materials Science and Engineering* (inorganic and organometallic, physical chemistry and chemical physics, polymer, materials, nanoscience)

Plamen Atanassov, Ph.D. Bulgarian Academy of Sciences, *UCI Chancellor's Professor of Chemical and Biomolecular Engineering; Chemistry; Materials Science and Engineering* (electrocatalysis and electrocatalysts for energy conversion processes; bio-electrocatalysis and energy harvesting systems)

Peter J. Burke, Ph.D. Yale University, *Professor of Electrical Engineering and Computer Science; Biomedical Engineering; Materials Science and Engineering* (nano-electronics, bio-nanotechnology)

Penghui Cao, Ph.D. Boston University, *Assistant Professor of Mechanical and Aerospace Engineering; Materials Science and Engineering* (fundamental understanding of the mechanisms by which materials plastically deform and fail, particularly in extreme environments)

Sarah Finkeldei, Ph.D. RWTH Aachen University, *Assistant Professor of Chemistry; Materials Science and Engineering* (nuclear chemistry)

Alon A. Gorodetsky, Ph.D. California Institute of Technology, *Associate Professor of Chemical and Biomolecular Engineering; Chemistry; Materials Science and Engineering* (cephalopods, adaptive materials, camouflage, bioelectronics)

Zhibin Guan, Ph.D. University of North Carolina at Chapel Hill, *Professor of Chemistry; Biomedical Engineering; Chemical and Biomolecular Engineering; Materials Science and Engineering* (chemical biology, organic and synthetic, polymer, materials, nanoscience)

Jered Haun, Ph.D. University of Pennsylvania, *Associate Professor of Biomedical Engineering; Chemical and Biomolecular Engineering; Materials Science and Engineering* (nanotechnology, molecular engineering, computational simulations, targeted drug delivery, clinical cancer detection)

Michelle Khine, Ph.D. University of California, Berkeley, *Professor of Biomedical Engineering; Chemical and Biomolecular Engineering; Materials Science and Engineering* (development of novel nano- and micro-fabrication technologies and systems for single cell analysis, stem cell research, in-vitro diagnostics)

Matthew Law, Ph.D. University of California, Berkeley, *Associate Professor of Chemistry; Chemical and Biomolecular Engineering; Materials Science and Engineering* (inorganic and organometallic, physical chemistry and chemical physics, polymer, materials, nanoscience)

Mo Li, Ph.D. University of Michigan, *Assistant Professor of Civil and Environmental Engineering; Materials Science and Engineering* (unconventional infrastructure materials, and their interfaces with structural engineering, advanced manufacturing, spatial damage sensing, and the environment)

Ray Luo, Ph.D. University of Maryland, College Park, *Professor of Molecular Biology and Biochemistry; Biomedical Engineering; Chemical and Biomolecular Engineering; Materials Science and Engineering* (protein structure, noncovalent associations involving proteins)

Ali Mohraz, Ph.D. University of Michigan, *Associate Professor of Chemical and Biomolecular Engineering; Materials Science and Engineering* (colloid science, soft matter engineering with applications in health care and energy materials)

Mikael Nilsson, Ph.D. Chalmers University of Technology, *Adjunct Professor of Chemical and Biomolecular Engineering; Materials Science and Engineering* (actinide chemistry, solvent extraction fundamental chemistry and process development, extraction and detection equipment development, radiolysis and phase composition of organic solvent)

Joseph Patterson, Ph.D. University of Warwick, *Assistant Professor of Chemistry; Materials Science and Engineering* (polymer, materials, nanoscience)

Frank G. Shi, Ph.D. California Institute of Technology, *Professor of Chemical and Biomolecular Engineering; Materials Science and Engineering* (optoelectronic devices and materials, optoelectronic device packaging materials, optoelectronic medical devices and packaging, white LED technologies, high power LED packaging)

Vasan Venugopalan, Sc.D. Massachusetts Institute of Technology, *Department Chair and Professor of Chemical and Biomolecular Engineering; Biomedical Engineering; Materials Science and Engineering; Mechanical and Aerospace Engineering; Surgery* (laser-generated thermal, mechanical and radiative transport processes for application in medical diagnostics, imaging, therapeutics, biotechnology)

Huolin Xin, Ph.D. Cornell University, *Assistant Professor of Physics and Astronomy; Materials Science and Engineering*

Iryna Zenyuk, Ph.D. Carnegie Mellon University, *Associate Director of National Fuel Cell Research Center and Assistant Professor of Chemical and Biomolecular Engineering; Materials Science and Engineering; Mechanical and Aerospace Engineering* (renewable energy, fuel cells, electrolyzers, batteries, X-ray imaging techniques, multi-scale modeling, transport phenomena)

Weian Zhao, Ph.D. McMaster University, *Associate Professor of Pharmaceutical Sciences; Biological Chemistry; Biomedical Engineering; Materials Science and Engineering* (stem cell therapy, diagnostics, biosensors, immunotherapy, single-cell analysis)

## Courses

### **MSE 60. Laboratory in Synthesis and Characterization of Materials. 4 Units.**

Synthesis and characterization of ceramic, polymer, and semiconductor materials. Connect the process, structure, properties, and performance to materials science knowledge in a hands-on laboratory setting. Materials fee.

Prerequisite: ENGR 54 and CHEM 1C

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

### **MSE 69. Electronic and Optical Properties in Materials. 4 Units.**

Covers the electronic, optical, and dielectric properties of crystalline and amorphous materials to provide a foundation of the underlying physical principles governing the properties of existing and emerging electronic and photonic materials.

Prerequisite: PHYS 7D and PHYS 7E and (MATH 3A or ICS 6N) and MATH 3D and ENGR 54

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

### **MSE 141. Nano-Scale Materials and Applications. 4 Units.**

Overview of the chemistry, physics, and applications of nanometer-scale materials. Explore the effects of composition, bonding, and confinement on physical properties of nanomaterials, their chemical syntheses, and their device physics in electronic, optoelectronic, and energy technologies.

Prerequisite: (ENGR 1A or CHEM 1A or CHEM H2A) and ENGR 54 and MSE 69

Restriction: Biomedical Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

Concurrent with MSE 241.

### **MSE 151. Polymeric Materials. 4 Units.**

An introduction to physical aspects of polymers, including polymer molecular size and configuration, solution and bulk phase structural properties, mechanical properties including viscoelasticity and rheology, polymer synthesis methods, characterization techniques, processing methods, and examples from existing and emerging polymeric materials.

Prerequisite: ENGR 54 and (MSE 165A or CBE 40C or MAE 91)

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

### **MSE 155. Mechanical Behavior and Design Principles. 4 Units.**

Principles governing structure and mechanical behavior of materials, relationship relating microstructure and mechanical response with application to elasticity, plasticity, yielding, necking, creep, and fracture of materials. Introduction to experimental techniques to characterize the properties of materials. Design parameters.

Prerequisite: ENGR 54

Same as MAE 156.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Aerospace Engineering majors have second consideration for enrollment.

**MSE 155L. Mechanical Behavior Laboratory. 1 Unit.**

Introduction to experimental techniques to characterize mechanical properties of materials. Emphasis on correlations between property and microstructure. Experiments include: plastic stability in tension, effect of grain size on flow stress, microstructural engineering. Materials fee.

Corequisite: MSE 155

Prerequisite: ENGR 54

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

**MSE 158. Ceramic Materials for Sustainable Energy. 4 Units.**

A technical elective for students interested in materials. Topics covered include structure and properties of ceramic materials, and design for sustainable energy applications.

Prerequisite: ENGR 54

Restriction: Materials Science and Engr Majors have first consideration for enrollment. Chemical Engineering majors have second consideration for enrollment.

**MSE 163. Computer Techniques in Experimental Research. 4 Units.**

Principles and practical guidelines of automated materials testing. Computer fundamentals, programming languages, data acquisition and control hardware, interfacing techniques, programming strategies, data analysis, data storage, safeguard procedures.

Restriction: Materials Science and Engr Majors have first consideration for enrollment. Chemical Engineering majors have second consideration for enrollment.

**MSE 164. X-ray Diffraction, Electron Microscopy, and Microanalysis. 4 Units.**

Material characterization using X-ray diffraction and scanning electron microscopy (SEM). Topics include X-ray diffraction and analysis; SEM imaging and microanalysis. Materials fee.

Prerequisite: ENGR 54 and PHYS 7D

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

**MSE 164L. X-ray Diffraction, Electron Microscopy, and Microanalysis Lab. 1 Unit.**

Material characterization using X-ray diffraction and scanning electron microscopy (SEM). Topics include X-ray diffraction and analysis; SEM imaging and microanalysis.

Prerequisite: ENGR 54 and PHYS 7D

Restriction: Materials Science and Engr Majors only.

**MSE 165A. Thermodynamics of Materials. 4 Units.**

Treatment of the laws of thermodynamics and their application in understanding properties and equilibrium states of engineering materials. Develops relationships pertaining to multiphase equilibrium and presents graphical constructions for interpretation of phase diagrams. Statistical thermodynamics in relation to materials phenomena.

Prerequisite: CHEM 1C and PHYS 7C

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

**MSE 165B. Diffusion and Heat Transport in Materials. 4 Units.**

Examines how kinetics affect materials development, behavior, and processing. Highlights the ways in which kinetics and diffusion are key to designing materials processing and heat treating strategies, with examples in various applied topics.

Prerequisite: MSE 165A or CBE 40C or MAE 91. MSE 165A with a grade of C- or better

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

**MSE 165C. Materials Kinetics and Phase Transformations. 4 Units.**

Treatment of the kinetics of solid-state reactions and reactions at interfaces. Thermodynamics and kinetics of phase transformations, including solidification processes, diffusional and diffusionless phase transformations.

Prerequisite: ENGR 54 and (MSE 165B or (CBE 120B and CBE 120C) or MAE 120). MSE 165B with a grade of C- or better

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

**MSE 165CL. Laboratory in Materials Kinetics and Phase Transformations. 1 Unit.**

Covers topics of practical application of the kinetics of solid state reactions, reactions at interfaces, and the thermodynamics and kinetics of phase transformations to common materials systems.

Prerequisite: ENGR 54 and (MSE 165B or (CBE 120B and CBE 120C) or MAE 120). MSE 165B with a grade of C- or better

Restriction: Materials Science and Engr Majors only.

**MSE 171. Green Engineering: Theory and Practice. 4 Units.**

Methods and impacts of selecting alternative technologies, processes, materials, chemicals, to reduce pollution, waste, and use of toxic substances, thereby creating "green," environmentally responsible, sustainable solutions. Topics include environmental regulations, recycling, life-cycle assessment, economic analysis, design, green chemistry, and toxicology.

Restriction: Seniors only. Materials Science and Engr Majors have first consideration for enrollment.

**MSE 173. Fundamentals of Materials Processing: How are Materials Processed to Make Things?. 4 Units.**

An in-depth knowledge of manufacturing processes with focus on the fundamentals of materials processing (heat flow, mass flow, fluid flow, etc.). Processing fundamentals that apply to the three main classes of engineering materials: metals, ceramics, and polymers.

Prerequisite: ENGR 54

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

**MSE 174. Composite Materials Design. 3 Units.**

Introduction to fiber-reinforced composites for mechanical applications. Properties of reinforcing fibers. Manufacture of fibers and composites. Micromechanics of fiber composites. Strength criteria and failure modes. Macromechanics in design of laminated composite structures.

Prerequisite: ENGR 54 and ENGR 150

**MSE 175. Design Failure Investigation. 4 Units.**

Survey of mechanisms by which devices fail, including overload, fatigue, corrosion, and wear. Use of fractography and other evidence to interpret failure modes and specify design/manufacturing changes. Students redesign failed parts or structures based on actual parts and/or case histories.

Prerequisite: ENGR 54

Restriction: Materials Science and Engr Majors have first consideration for enrollment. Chemical Engineering majors have second consideration for enrollment.

**MSE 176. Surface and Adhesion Science. 4 Units.**

Structure, thermodynamics of, kinetics, and reactions on surfaces. Surface electronic and mechanical properties and characterization of all classes of materials including metals, semiconductors, ceramics, polymers, and soft materials. Adhesion between different materials is also addressed.

Prerequisite: (CBE 110 or MSE 165C) and (MSE 141 or MSE 69)

Same as CBE 183.

Restriction: Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

Concurrent with MSE 276 and CBE 283.

**MSE 189A. Senior Design Project I. 3 Units.**

Group supervised senior design projects that deal with materials selection in engineering design and that involve case studies in ethics, safety, design, failure modes, new products, and patents. Activities conclude with a presentation of the projects. Materials fee.

Prerequisite: ENGR 54 and MSE 155 and MSE 60 and MSE 165C

Grading Option: In Progress (Letter Grade with P/NP).

Restriction: Seniors only. Materials Science and Engr Majors only. MSE 189A, MSE 189B, and MSE 189C must be taken in the same academic year.

**MSE 189B. Senior Design Project II. 3 Units.**

Group supervised senior design projects that deal with materials selection in engineering design and that involve case studies in ethics, safety, design, failure modes, new products, and patents. Activities conclude with a presentation of the projects. Materials fee.

Prerequisite: MSE 189A

Grading Option: In Progress (Letter Grade with P/NP).

Restriction: Seniors only. Materials Science and Engr Majors only. MSE 189A, MSE 189B, and MSE 189C must be taken in the same academic year.

**MSE 189C. Senior Design Project III. 3 Units.**

Group supervised senior design projects that deal with materials selection in engineering design and that involve case studies in ethics, safety, design, failure modes, new products, and patents. Activities conclude with a presentation of the projects. Materials fee.

Prerequisite: MSE 189B

Restriction: Seniors only. Materials Science and Engr Majors only. MSE 189A, MSE 189B, and MSE 189C must be taken in the same academic year.

**MSE 190. Materials Selection and Design. 4 Units.**

Meaning and phases of design; design considerations; properties of engineering materials; materials property charts; materials selection; process selection; multi-constraint and multi-objective design. Selection of shape in mechanical components. Designing with hybrid materials: challenges and opportunities. Environmental considerations; case studies.

Prerequisite: ENGR 54 and ENGR 150

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

**MSE 191. Materials Outreach. 3 Units.**

Demonstrates major concepts in Materials Science and Engineering. Concepts of materials engineering covered include deformation in crystalline solids, effects of heat treatment on mechanical properties, thermal barrier materials, composites design, mechanical behavior of polymers, superconductivity in ceramics.

Prerequisite: ENGR 54

Restriction: Materials Science and Engr Majors have first consideration for enrollment.

**MSE 195. Special Topics in Materials Science and Engineering. 1-4 Units.**

Studies in selected areas of Materials Science and Engineering. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**MSE 198. Group Study. 1-4 Units.**

Group study of selected topics in engineering.

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**MSE 199. Individual Study. 1-4 Units.**

Supervised independent reading, research, or design for undergraduate Engineering majors. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

Repeatability: May be taken for credit for 8 units.

Restriction: Materials Science and Engr Majors only.

**MSE 199P. Individual Study. 1-4 Units.**

Supervised independent reading, research, or design for undergraduate Engineering majors. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**MSE 200. Crystalline Solids: Structure, Imperfections, and Properties. 4 Units.**

Principles and concepts underlying the study of advanced materials including alloys, composites, ceramics, semiconductors, polymers, ferroelectrics, and magnetics. Crystal structure and defects, surface and interface properties, thermodynamics and kinetics of phase transformations, and material processing, related to fundamental material properties.

Restriction: Graduate students only.

**MSE 201A. Critical Analysis and Technical Communication I. 2 Units.**

Develop an understanding of the process to conduct research. Topics include performing analytical analysis of the scientific literature, formation of a hypothesis, defining investigations to validate hypothesis, communicating analysis in written form, writing a research proposal.

Restriction: Graduate students only.

**MSE 201B. Critical Analysis and Technical Communication II. 2 Units.**

Develop oral presentation skills and skills to understand significance of published research. Topics include performing critical and analytical analysis of the scientific literature, connecting core course content with experimental/theoretical methods in the scientific literature, and communicating analysis in oral form.

Prerequisite: MSE 201A

Restriction: Graduate students only.

**MSE 205. Materials Physics. 4 Units.**

Covers the electronic, optical, and dielectric properties of crystalline materials to provide a foundation of the underlying physical principles of governing the properties of existing and emerging electronic and photonic materials.

Prerequisite: MSE 200

Restriction: Graduate students only.

**MSE 241. Nano-Scale Materials and Applications. 4 Units.**

Overview of the chemistry, physics, and applications of nanometer-scale materials. Explore the effects of composition, bonding, and confinement on physical properties of nanomaterials, their chemical syntheses, and their device physics in electronic, optoelectronic, and energy technologies.

Prerequisite: MSE 200 and MSE 205

Restriction: Graduate students only.

Concurrent with MSE 141.

**MSE 249. Special Topics in Materials Science and Engineering. 1-4 Units.**

Studies in selected areas of Materials Science and Engineering. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**MSE 254. Polymer Science and Engineering. 4 Units.**

An introduction to physical aspects of polymers, including configuration and conformation of polymer chains and characterization techniques; crystallinity viscoelasticity, rheology, and processing.

Restriction: Graduate students only.

**MSE 255A. Design with Ceramic Materials. 4 Units.**

Dependence of ceramic properties on bonding, crystal structure, defects, and microstructure. Ceramic manufacturing technology. Survey of physical properties. Strength, deformation, and fracture of ceramics. Mechanical design with brittle, environment-sensitive materials exhibiting time-dependent strengths.

Prerequisite: ENGR 54

Restriction: Graduate students only.

**MSE 256A. Mechanical Behavior of Engineering Materials. 4 Units.**

Principles governing structure and mechanical behavior of materials, relationship relating microstructure and mechanical response with application to elasticity, plasticity, creep, and fatigue, study of rate-controlling mechanisms and failure modes, fracture of materials.

Restriction: Graduate students only.

**MSE 256B. Fracture of Engineering Materials. 4 Units.**

Fracture mechanics and its application to engineering materials. Elastic properties of cracks, the stress intensity factor, the crack tip plastic zone, the J integral approach, fracture toughness testing, the crack tip opening displacement, fracture at high temperatures, fatigue crack growth.

Restriction: Graduate students only.

**MSE 259. Transmission Electron Microscopy. 4 Units.**

The theory and operation of the transmission electron microscope (TEM), including the basic construction, electron optics, electron diffraction and reciprocal space, formation of image and electron diffraction information, microanalysis, and specimen preparation.

Prerequisite: MSE 200

Restriction: Graduate students only.

**MSE 262. Grain Boundaries and Interfaces in Nanocrystalline Materials. 4 Units.**

Structure and character of grain boundaries and interfaces in solids including nanocrystalline materials. Role of grain boundaries in chemical segregation, fracture, deformation, creep, conductivity, diffusion, and grain growth. Experimental techniques and computational methods used to characterize and model grain boundaries.

Prerequisite: MSE 200

**MSE 264. Scanning Electron Microscopy. 4 Units.**

The theory and operation of the scanning electron microscope (SEM) and X-ray microanalysis. Topics covered include the basic design and electron optics, electron beam - specimen interactions, image formation and interpretation, X-ray spectrometry, and other related topics and techniques.

Prerequisite: MSE 200

Restriction: Graduate students only.

**MSE 265. Phase Transformations. 4 Units.**

Advanced thermodynamics and kinetics of phase transformations and phase transitions.

Prerequisite: MSE 200

Restriction: Graduate students only.

**MSE 267. Seminar in Systems Microbiology Research. 1 Unit.**

A research and journal club seminar that covers topics on bacteria and phage using approaches and principles from biology, engineering, and physics.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Same as MBB 268, PHYS 268.

Restriction: Upper-division students only. Graduate students only.

**MSE 271. Green Engineering: Theory and Practice. 4 Units.**

Methods and impacts of selecting alternative technologies, processes, materials, chemicals, to reduce pollution, waste, and use of toxic substances, thereby creating "green," environmentally responsible, sustainable solutions. Topics include environmental regulations, recycling, life-cycle assessment, economic analysis, design, green chemistry, and toxicology.

Restriction: Graduate students only.

**MSE 273. Electroceramics & Solid State Electrochemical Systems. 4 Units.**

Theory, underlying principles, experimental techniques, and applications of electroceramics and solid-state electrochemical systems. Links solid state physics, atomic structure, thermodynamics, defect chemistry, and transport processes to electrical properties of ceramics - spanning from insulators to fast-ion conductors and HT superconductors.

Prerequisite: MSE 200

**MSE 276. Surface and Adhesion Science. 4 Units.**

Structure, thermodynamics of, kinetics, and reactions on surfaces. Surface electronic and mechanical properties and characterization of all classes of materials including metals, semiconductors, ceramics, polymers, and soft materials. Adhesion between different materials is also addressed.

Same as CBE 283.

Restriction: Graduate students only.

Concurrent with MSE 176 and CBE 183.

**MSE 295. Seminar in Engineering. 1-4 Units.**

Seminars by individual faculty in major fields of interest.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**MSE 296. Master of Science Thesis Research. 1-16 Units.**

Individual research or investigation conducted in preparation for the thesis required for the M.S. degree in Engineering.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**MSE 297. Doctor of Philosophy Dissertation Research. 1-16 Units.**

Individual research or investigation conducted in preparation for the dissertation required for the Ph.D. degree in Engineering.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**MSE 298. Seminars in Materials Science and Engineering. 2 Units.**

Presentation of advanced topics and reports of current research efforts in Materials Science and Engineering.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**MSE 299. Individual Research. 1-16 Units.**

Individual research or investigation under the direction of an individual faculty member.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Materials Science and Engineering, B.S.

**Program Educational Objectives:** Graduates of the Materials Science and Engineering program will (1) establish a productive Materials Science and Engineering career in industry, government or academia; (2) apply critical reasoning and the requisite analytical/quantitative skills in seeking solutions to materials science and engineering problems; (3) promote innovation in materials discovery, development and design through effective leadership, skilled communications, and multidisciplinary teamwork; (4) exhibit a commitment to engineering ethics, environmental stewardship, continued learning, and professional development.

(Program educational objectives are those aspects of engineering that help shape the curriculum; achievement of these objectives is a shared responsibility between the student and UCI.)

Since the beginning of history, materials have played a crucial role in the growth, prosperity, security, and quality of human life. In fact, materials have been so intimately related to the emergence of human culture and civilization that anthropologists and historians have identified early cultures by the name of the significant materials dominating those cultures. These include the stone, bronze, and iron ages of the past. At the present time, the scope of materials science and engineering has become very diverse; it is no longer confined to topics related to metals and alloys but includes those relevant to ceramics, composites, polymers, biomaterials, nanostructures, intelligent materials, and electronic devices. In addition, present activities in materials science and engineering cover not only areas whose utility can be identified today, but also areas whose utility may be unforeseen. The

services of materials scientists and engineers are required in a variety of engineering operations dealing, for example, with emerging energy systems, design of semiconductors and optoelectronic and nano devices, development of new technologies based on composites and high-temperature superconductivity, biomedical products, performance (e.g., quality, reliability, safety, energy efficiency) in automobile and aircraft components, improvement in nondestructive testing techniques, corrosion behavior in refineries, radiation damage in nuclear power plants, and fabrication of advanced materials.

The undergraduate major in Materials Science and Engineering (MSE) provides students with a thorough knowledge of basic engineering and scientific principles. The undergraduate curriculum in MSE includes (a) a core of Chemistry, Physics, and Mathematics; (b) basic Engineering courses; (c) Materials and Engineering core; and (d) technical courses in Materials Science, Engineering, and Sciences.

Because of the interdisciplinary nature of MSE and its intimate relations with other Engineering disciplines (Aerospace, Biomedical, Chemical, Civil, Computer, Electrical, Environmental, and Mechanical Engineering), qualified students will be able to satisfy in a straightforward manner the degree requirements of their Engineering major and the MSE major.

**High School Students:** See School Admissions information.

**Transfer Students:** Preference will be given to junior-level applicants with the highest grades overall, and who have satisfactorily completed the following **required** courses: two years of approved calculus, one year of calculus-based physics with laboratories (mechanics, electricity and magnetism), completion of lower-division writing, one year of general chemistry (with laboratory), and one course in introductory programming. For course equivalency specific to each college, visit <https://assist.org>.

Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. Students who enroll at UCI in need of completing lower-division coursework may find that it will take longer than two years to complete their degrees. For further information, contact The Henry Samueli School of Engineering at 949-824-4334.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Major Requirements

#### Mathematics and Basic Science Courses:

##### Core Courses:

ENGR 1A or CHEM 1A	General Chemistry for Engineers General Chemistry
CHEM 1B- 1C	General Chemistry and General Chemistry
CHEM 1LC	General Chemistry Laboratory
MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
MATH 2D	Multivariable Calculus
MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations
MATH 2E	Multivariable Calculus
PHYSICS 7C- 7LC	Classical Physics and Classical Physics Laboratory
PHYSICS 7D- 7E	Classical Physics and Classical Physics
PHYSICS 7LD	Classical Physics Laboratory

#### Engineering Topics Courses:

##### Core Courses:

MSE 60	Laboratory in Synthesis and Characterization of Materials
MSE 69	Electronic and Optical Properties in Materials
MSE 151	Polymeric Materials
MSE 155	Mechanical Behavior and Design Principles
MSE 155L	Mechanical Behavior Laboratory
MSE 158	Ceramic Materials for Sustainable Energy
MSE 164	X-ray Diffraction, Electron Microscopy, and Microanalysis
MSE 164L	X-ray Diffraction, Electron Microscopy, and Microanalysis Lab
MSE 165A	Thermodynamics of Materials
MSE 165B	Diffusion and Heat Transport in Materials
MSE 165C	Materials Kinetics and Phase Transformations

MSE 165CL	Laboratory in Materials Kinetics and Phase Transformations
MSE 175	Design Failure Investigation
MSE 189A- 189B- 189C	Senior Design Project I and Senior Design Project II and Senior Design Project III
MSE 190	Materials Selection and Design
EECS 70A	Network Analysis I
or ENGRMAE 60	Electric Circuits
ENGR 54	Principles of Materials Science and Engineering
ENGR 150	Mechanics of Structures
or ENGRMAE 150	Mechanics of Structures
ENGRMAE 10	Introduction to Engineering Computations
ENGRMAE 30	Statics
or ENGR 30	Statics
or ENGRCEE 30	Statics
ENGRMAE 150L	Mechanics of Structures Laboratory

**Engineering Electives:**

Students must complete a minimum of four courses from the lists below (at most two of the courses can be Basic Science or Engineering Electives, and at least two courses must be Technical Electives):

**Basic Science or Engineering Electives**

BIO SCI 93	From DNA to Organisms
BME 50A	Cell and Molecular Engineering
BME 50B	Cell and Molecular Engineering
EECS 70B	Network Analysis II
ENGR 7A- 7B	Introduction to Engineering I and Introduction to Engineering II
ENGRMAE 52	Computer-Aided Design
ENGRMAE 80	Dynamics
or ENGRCEE 80	Dynamics
or ENGR 80	Dynamics
PHYSICS 52A	Fundamentals of Experimental Physics
STATS 7	Basic Statistics

**Technical Electives**

BME 110B	Biomechanics II
BME 111	Design of Biomaterials
BME 120	Sensory Motor Systems
CBE 187	Semiconductor Device Packaging
EECS 170A	Electronics I
EECS 174	Semiconductor Devices
EECS 176	Fundamentals of Solid-State Electronics and Materials
ENGR 165	Advanced Manufacturing
ENGRMAE 114	Fuel Cell Fundamentals and Technology
ENGRMAE 117	Solar and Renewable Energy Systems
ENGRMAE 118	Sustainable Energy Systems
ENGRMAE 145	Theory of Machines and Mechanisms
ENGRMAE 147	Vibrations
ENGRMAE 151	Mechanical Engineering Design
ENGRMAE 153	Advanced BIOMEMS Manufacturing Techniques
ENGRMAE 155	Composite Materials and Structures
ENGRMAE 157	Lightweight Structures
MSE 141	Nano-Scale Materials and Applications
MSE 171	Green Engineering: Theory and Practice

MSE 173	Fundamentals of Materials Processing: How are Materials Processed to Make Things?
MSE 174	Composite Materials Design
MSE 176	Surface and Adhesion Science
MSE 199	Individual Study

Students select, with the approval of a faculty advisor, any additional engineering topics courses needed to satisfy school and department requirements.

#### Engineering Professional Topics Course:

ENGR 190W	Communications in the Professional World
-----------	--

(The nominal Materials Science and Engineering program will require 187 units of courses to satisfy all university and major requirements. Because each student comes to UCI with a different level of preparation, the actual number of units will vary. Dual engineering majors are reminded that they are required to satisfy all requirements of both majors individually. Students should not assume that courses for one, such as senior design, will satisfy the requirements of the other, without prior approval.)

- <sup>1</sup> ENGR 7A-ENGR 7B is available only to lower-division students. Both ENGR 7A-ENGR 7B must be taken to be counted as an Engineering Elective course.
- <sup>2</sup> May be used to satisfy a maximum of one elective course requirement.

Students majoring in MSE may elect, with approval of their faculty advisor, to use available engineering electives to complete one of the following specializations.

#### Specialization in Materials Processing

Requires a minimum of three courses from:

CBE 187	Semiconductor Device Packaging
ENGR 165	Advanced Manufacturing
ENGRMAE 153	Advanced BIOMEMS Manufacturing Techniques
MSE 171	Green Engineering: Theory and Practice
MSE 173	Fundamentals of Materials Processing: How are Materials Processed to Make Things?
MSE 174	Composite Materials Design

#### Specialization in Energy Materials and Sustainability

Requires a minimum of three courses from:

ENGRMAE 114	Fuel Cell Fundamentals and Technology
ENGRMAE 117	Solar and Renewable Energy Systems
ENGRMAE 118	Sustainable Energy Systems
MSE 141	Nano-Scale Materials and Applications
MSE 171	Green Engineering: Theory and Practice

#### Specialization in Biomaterials:

Requires a minimum of three courses from:

BME 110B	Biomechanics II
BME 111	Design of Biomaterials
BME 120	Sensory Motor Systems
ENGRMAE 153	Advanced BIOMEMS Manufacturing Techniques

#### Specialization in Electronic and Functional Materials:

Requires a minimum of three courses from:

CBE 187	Semiconductor Device Packaging
EECS 170A	Electronics I
EECS 174	Semiconductor Devices
EECS 176	Fundamentals of Solid-State Electronics and Materials
MSE 141	Nano-Scale Materials and Applications
MSE 176	Surface and Adhesion Science

#### Specialization in Structural and Mechanical Materials:

Requires a minimum of three courses from:

ENGR 165	Advanced Manufacturing
MSE 173	Fundamentals of Materials Processing: How are Materials Processed to Make Things?
MSE 174	Composite Materials Design
ENGRMAE 145	Theory of Machines and Mechanisms
ENGRMAE 147	Vibrations
ENGRMAE 155	Composite Materials and Structures
ENGRMAE 157	Lightweight Structures

A sample program of study chart for the major in Materials Science and Engineering is available in the Undergraduate Student Affairs Office. Students should keep in mind that this program is based upon a sequence of prerequisites, beginning with adequate preparation in high school mathematics, physics, and chemistry. Students who are not adequately prepared, or who wish to make changes in the sequence for other reasons, must have their program approved by their faculty advisor. Materials Science and Engineering majors are encouraged to consult with academic counselors as needed, and students who are academically at risk are mandated to see a counselor as frequently as deemed necessary by the advising staff.

## Sample Program of Study — Materials Science and Engineering

Freshman		
Fall	Winter	Spring
MATH 2A	MATH 2B	MATH 2D
ENGR 1A	CHEM 1B	CHEM 1C

## Materials Science and Engineering, M.S.

Materials Science and Engineering focuses on the discovery of new materials, the tailoring of materials systems for optimum performance in a given technological application, and the design of novel materials solutions for emerging technologies. MSE is an interdisciplinary field incorporating elements of chemistry, physics, biology and/or engineering to derive and control the connections between structure (at length scales ranging from sub-atomic to macroscale), the processing necessary to achieve that structure, the fundamental properties (electrical, optical, thermal, mechanical, etc.), and their performance. These correlations are investigated using advanced materials characterization techniques and theoretical/computational analysis. Many of the most pressing scientific and technological challenges faced by humanity are constrained by the limits of currently available materials. The discovery, design and development of enabling materials is at the core of solving current and future scientific and engineering grand challenges, and benefit industries involved in electronics, advanced sensors, communications, human health, transportation, manufacturing recreation, energy conversion and storage, and environmental sustainability.

Current research programs include nanomaterials, nanostructures, nanoelectronics, nanodevices, nanocharacterization, device/system packaging materials, materials for fuel cells and related alternative energy systems, biocompatible materials, soft materials such as biological materials and polymeric materials, electronic and photonic materials, hybrid materials, interfacial engineering of materials, and multifunctional materials. Faculty with relevant research are affiliated with the Integrated Nanofabrication Research Facility (INRF), the National Fuel Cell Research Center (NFCRC), the

California Institute for Telecommunications and Information Technology (Calit2), the Advanced Power and Energy Program (APEP), the Laboratory for Electron and X-ray Instrumentation (LEXI), and the Irvine Materials Research Institute (IMRI), among others.

The MSE graduate degree program is hosted by the Department of Materials Science and Engineering (MSE). Faculty who may serve as advisors are listed as affiliated with the MSE Department and include faculty with strong materials science and engineering research programs from other departments. The formal degree that is awarded upon successful completion of the program is either the M.S. or Ph.D. in Materials Science and Engineering.

## Specific Fields of Emphasis

The Materials faculty at UCI have special interest and expertise in all areas of modern materials and technologies, including biomaterials, energy materials, advanced ceramics, polymers and nanocomposite materials, structural and nanostructured metallic materials, micro/nano-device materials, device/system packaging materials, and multifunctional materials.

Given the nature of Materials Science and Engineering as a cross-disciplinary program, students having a background and suitable training, in Materials, Engineering (Mechanical, Electrical, Civil, Chemical, Aerospace), and the Physical Sciences (Physics, Chemistry, Geology) are encouraged to participate. A student with an insufficient background may be required to take remedial undergraduate courses. Recommended background courses include an introduction to materials, thermodynamics, mechanical behavior, and electrical/optical/magnetic behavior.

The M.S. reflects achievement of an advanced level of competence for professional practice of materials science and engineering. Two options are available: a thesis option and a comprehensive examination option.

## Required Courses

Students are required to take one course from each area for the M.S. and as a basis for the Ph.D. preliminary examination.

### Crystal Structure and Defects:

MSE 200	Crystalline Solids: Structure, Imperfections, and Properties
---------	--

### Electrical and Optical Behavior:

MSE 205	Materials Physics
---------	-------------------

### Mechanical Behavior:

MSE 256A	Mechanical Behavior of Engineering Materials
----------	--

### Thermodynamics and Kinetics:

MSE 265	Phase Transformations
---------	-----------------------

## Electives

Faculty advisors should be consulted on the selection of elective courses. All graduate courses offered in MSE are potential electives. Graduate-level courses offered in other Engineering departments and relevant graduate courses from other schools may also be taken as electives.

### Plan I: Thesis Option

For the M.S. thesis option, students are required to complete a research study of great depth and originality and obtain approval for a complete program of study. A committee of three full-time faculty members is appointed to guide development of the thesis. A minimum of 36 units is required for the M.S.

For the thesis option, the following are required: four required core courses; three quarters of MSE 298 (Department Seminar); five additional graduate elective courses numbered 200–289 (or 200-295 if offered by other departments) for 3 or more units each, related to their field of graduate studies, and approved by the graduate advisor. Up to two of these elective courses can be substituted by up to eight units of MSE 296 (M.S. Thesis Research), and one of these elective courses may be substituted by an upper-division undergraduate elective course if the course is not a part of the required MSE undergraduate core curriculum and is approved by the MSE graduate advisor.

Full-time graduate students must enroll in the departmental seminar each quarter during their first year unless exempt by petition.

### Plan II: Comprehensive Examination Option

For the comprehensive examination option, students are required to complete 36 units of study and a comprehensive examination.

The following are required: four required core courses; three quarters of MSE 298 (Department Seminar); and a minimum of five additional graduate elective courses for 3 or more units numbered 200–289 (or 200-295 if offered by other departments), related to their field of graduate studies, and approved by the graduate advisor. One of these elective courses may be substituted by an upper-division undergraduate elective course if the course is not a part of the required MSE undergraduate core curriculum and is approved by the MSE graduate advisor.

Research units (MSE 296/MSE 299) do not count towards the degree requirements of the Comprehensive Exam Option. Full-time graduate students must enroll in the departmental seminar each quarter during their first year unless exempt by petition.

In addition to fulfilling the course requirements outlined above, it is a University requirement for the Master of Science degree that students fulfill a minimum of 36 units of study.

## Materials Science and Engineering, Minor

The interdisciplinary field of materials science and engineering has become critical to many emerging areas of advanced technology and their applications. As a result, there are needs and opportunities for engineers and scientists with education and training in materials science and engineering. The goal of the minor in Materials Science and Engineering (MSE) is to provide students at UCI with such education and training that will enable them, upon graduation, to not only participate in projects or programs of an interdisciplinary nature but also address challenging societal needs and complex technological advances.

Students are required to complete all prerequisites for required courses and selected electives. In particular, students need to complete the following courses before applying:

CHEM 1A	General Chemistry
CHEM 1LE	Accelerated General Chemistry Lab
MATH 2D	Multivariable Calculus
MATH 2E	Multivariable Calculus
MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations
PHYSICS 7C	Classical Physics
PHYSICS 7LC	Classical Physics Laboratory
PHYSICS 7D	Classical Physics
PHYSICS 7LD	Classical Physics Laboratory

The Materials Science and Engineering minor requires a total of seven courses—five required courses and two electives:

### Required courses:

ENGR 54	Principles of Materials Science and Engineering
MSE 165C	Materials Kinetics and Phase Transformations
Select three of the following:	
MSE 69	Electronic and Optical Properties in Materials
MSE 151	Polymeric Materials
MSE 155	Mechanical Behavior and Design Principles
MSE 158	Ceramic Materials for Sustainable Energy
MSE 164	X-ray Diffraction, Electron Microscopy, and Microanalysis
MSE 165A	Thermodynamics of Materials
MSE 165B	Diffusion and Heat Transport in Materials
MSE 175	Design Failure Investigation
MSE 190	Materials Selection and Design

### Electives:

Select two of the following:

BME 110B	Biomechanics II
BME 111	Design of Biomaterials
BME 120	Sensory Motor Systems
CBE 187	Semiconductor Device Packaging
EECS 170A	Electronics I
EECS 174	Semiconductor Devices
EECS 176	Fundamentals of Solid-State Electronics and Materials
ENGR 165	Advanced Manufacturing
ENGRMAE 114	Fuel Cell Fundamentals and Technology
ENGRMAE 117	Solar and Renewable Energy Systems
ENGRMAE 118	Sustainable Energy Systems
ENGRMAE 145	Theory of Machines and Mechanisms
ENGRMAE 147	Vibrations
ENGRMAE 151	Mechanical Engineering Design

ENGRMAE 153	Advanced BIOMEMS Manufacturing Techniques
ENGRMAE 155	Composite Materials and Structures
ENGRMAE 157	Lightweight Structures
MSE 141	Nano-Scale Materials and Applications
MSE 171	Green Engineering: Theory and Practice
MSE 173	Fundamentals of Materials Processing: How are Materials Processed to Make Things?
MSE 174	Composite Materials Design

## Materials Science and Engineering, Ph.D.

The Ph.D. in Materials Science and Engineering requires a commitment on the part of the student to dedicated study and collaboration with the faculty. Ph.D. students are selected on the basis of outstanding demonstrated potential and scholarship. Applicants must hold the appropriate prerequisite degrees from recognized institutions of high standing. After substantial preparation, Ph.D. candidates work under the supervision of faculty advisors. The process involves extended immersion in a research atmosphere and culminates in the production of original research results presented in a dissertation. Milestones to be passed in the Ph.D. program in order to remain in good standing include the following: acceptance into a research group by the faculty advisor at the end of the student's first year of study; successful completion of the Ph.D. preliminary examination by the end of the second year; preparation for pursuing research and the development of a research proposal culminating in passing the Qualifying Examination by the end of the third year of the Ph.D. program. The Qualifying Examination includes faculty evaluation of a written research dossier and an oral presentation. Students must advance to candidacy in their third year (second year for students who entered with a master's degree).

Students applying with the objective of a Ph.D. are admitted to the M.S./Ph.D. program only if they are likely to successfully complete a Ph.D. program. These students do not formally re-apply to the Ph.D. program after completing the M.S. Students who apply to the M.S.-only program must petition for the Ph.D. program if they desire to continue on for a Ph.D. Financial support is usually reserved for those students who plan to complete the Ph.D. The normative time to complete M.S. and Ph.D. degrees is two and five years, respectively.

The core course requirements for the Ph.D. are listed under 'Required Courses' above. Students must also enroll in MSE 298 (Department Seminar) each quarter during their first year unless exempt by petition. Ph.D. students must take two additional elective courses each for 3-4 units or a combination approved by the graduate advisor beyond the M.S. requirements. These courses are to be taken after the first year of graduate work, should be relevant to the Ph.D. dissertation topic, and must be selected in consultation with the research advisor and approved by the MSE graduate advisor. The preliminary examination is based on the four required core courses for the M.S. Students who have completed an MSE M.S. elsewhere must have a written approval by the graduate advisor to waive required MSE core courses, if they have taken the equivalent courses elsewhere.

Final examination involves the oral presentation and defense of an acceptable dissertation in a seminar attended by students and faculty. The Ph.D. is granted upon the recommendation of the Doctoral Committee and the Dean of the Graduate Division. The normative time for completion of the Ph.D. is five years (four years for students who entered with a master's degree). The maximum time permitted is seven years.

### Expectations for the Ph.D. Dissertation

The Ph.D. dissertation is written documentation of original research that has impact on the field of study for the Ph.D. Impact in the field is measured by accepted or published peer-reviewed journal articles, peer-reviewed conference proceedings, patents, or analogous original documented adoption of innovative technology. Faculty research advisors are to provide in writing their specific expectations consistent with the above criteria.

## Department of Mechanical and Aerospace Engineering

### Roger Rangel, Department Chair

4221 Engineering Gateway

949-824-8451

<http://mae.eng.uci.edu/>

The Department of Mechanical and Aerospace Engineering offers two undergraduate B.S. programs: one in Mechanical Engineering and the other in Aerospace Engineering. The Department also offers M.S. and Ph.D. programs in Mechanical and Aerospace Engineering.

Mechanical Engineers and Aerospace Engineers design, manufacture, and control machines ranging from robots to aircraft and spacecraft, design engines and power plants that drive these machines, analyze the environmental impact associated with power generation, and strive to promote environmental quality. These disciplines require the creative use of mathematics, physics, and chemistry together with engineering science and technology in areas such as fluid and solid mechanics, thermodynamics and heat transfer, dynamics, controls, and atmospheric science to achieve these goals. Mechanical Engineering and Aerospace Engineering students at UCI learn the problem-solving, design, modeling, and testing skills required to contribute to be leaders in advancing modern technology and to be on the forefront of scientific discoveries.

The Mechanical Engineering undergraduate program includes required courses that provide engineering fundamentals and technical electives that allow students to study particular areas of interest. Elective courses can be organized into specializations in Aerospace Engineering, Energy Systems

and Environmental Engineering, Flow Physics and Propulsion Systems, and Design of Mechanical Systems. Independent research opportunities allow students to pursue other avenues for focusing their studies.

Aerospace Engineering deals with all aspects of aircraft and spacecraft design and operation, thus requiring the creative use of many different disciplines. The undergraduate curriculum in Aerospace Engineering includes courses in subsonic and supersonic aerodynamics, propulsion, controls and performance, light-weight structures, spacecraft dynamics, and advanced materials. In the senior capstone course, students work in teams on the preliminary design of a commercial jet transport.

Career opportunities for Mechanical and Aerospace Engineering graduates are in a broad range of industries, including manufacturers of vehicles of all types, as well as aircraft and spacecraft, micro-mechanical systems, rehabilitation engineering, and research laboratories in universities and government.

- Aerospace Engineering, B.S.
- Mechanical and Aerospace Engineering, M.S.
- Mechanical and Aerospace Engineering, Ph.D.
- Mechanical Engineering, B.S.

## Faculty

Satya N. Atluri, ScD Massachusetts Institute of Technology, *Professor Emeritus of Mechanical and Aerospace Engineering*

James E. Bobrow, Ph.D. University of California, Los Angeles, *Professor Emeritus of Mechanical and Aerospace Engineering* (robotics, mechatronics, and design optimization)

Ramin Bostanabad, Ph.D. Northwestern University, *Assistant Professor of Mechanical and Aerospace Engineering* (design under uncertainty, probabilistic machine learning, materials informatics, computational microstructure characterization, topology optimization)

Jacob Brouwer, Ph.D. Massachusetts Institute of Technology, *Professor of Mechanical and Aerospace Engineering; Civil and Environmental Engineering* (fuel cells, energy systems dynamics, electrochemical systems design and analysis, chemical kinetics, reacting flows)

Natascha Buswell, Ph.D. Purdue University, *Assistant Professor of Teaching of Mechanical and Aerospace Engineering* (graduate engineering education, faculty development, engineering teaching, engineering education research methods)

Penghui Cao, Ph.D. Boston University, *Assistant Professor of Mechanical and Aerospace Engineering; Materials Science and Engineering* (fundamental understanding of the mechanisms by which materials plastically deform and fail, particularly in extreme environments)

David Copp, Ph.D. University of California, Santa Barbara, *Assistant Professor of Teaching of Mechanical and Aerospace Engineering* (optimal control and estimation, hybrid dynamical systems, energy storage, pedagogy)

Donald Dabdub, Ph.D. California Institute of Technology, *Associate Dean, Undergraduate Education and Professor of Mechanical and Aerospace Engineering; Civil and Environmental Engineering* (mathematical modeling of urban and global air pollution, dynamics of atmospheric aerosols, secondary organic aerosols, impact of energy generation on air quality, chemical reactions at gas-liquid interfaces)

Derek Dunn-Rankin, Ph.D. University of California, Berkeley, *Professor Emeritus of Mechanical and Aerospace Engineering; Civil and Environmental Engineering; Environmental Health Sciences* (combustion, optical particle sizing, particle aerodynamics, laser diagnostics and spectroscopy)

Said E. Elghobashi, Ph.D. University of London, *Distinguished Professor Emeritus of Mechanical and Aerospace Engineering* (direct numerical simulation of turbulent, chemically reacting and dispersed two-phase flows)

Manuel Gamero-Castaño, Ph.D. Yale University, *Associate Professor of Mechanical and Aerospace Engineering* (electric propulsion, with emphasis on colloid thruster technology for precision formation flying missions and Hall thrusters. Electrohydrodynamic atomization of liquids and related problems like electrospray ionization and technological applications of electrosprays, aerosol diagnostics)

Tryphon Georgiou, Ph.D. University of Florida, *Distinguished Professor of Mechanical and Aerospace Engineering* (dynamical systems and control, mathematical physics, applied mathematics. Current interests focus on stochastic control, geometry of optimal mass transport, inverse problems in physics and signal analysis, and topics related to the control of fluids, networks and thermodynamic systems)

Faryar Jabbari, Ph.D. University of California, Los Angeles, *Associate Dean for Academic Affairs and Professor of Mechanical and Aerospace Engineering* (optimal control theory, distributed parameter systems, parameter identification)

Zak Kassas, Ph.D. University of Texas at Austin, *Assistant Professor of Mechanical and Aerospace Engineering; Electrical Engineering and Computer Science* (cyber-physical systems (CPS), autonomous vehicles (aerial, ground, indoor, underwater), satellite-based navigation, intelligent transportation systems (ITS), cognitive and software-defined radio (SDR), sensor fusion)

Solmaz S. Kia, Ph.D. University of California, Irvine, *Assistant Professor of Mechanical and Aerospace Engineering; Computer Science* (systems and control, decentralized/distributed algorithm design for multi-agent systems, cooperative robotics)

John C. LaRue, Ph.D. University of California, San Diego, *Professor Emeritus of Mechanical and Aerospace Engineering* (fluid mechanics, heat transfer, turbulence)

Jaeho Lee, Ph.D. Stanford University, *Assistant Professor of Mechanical and Aerospace Engineering* (heat transfer, thermal management, thermoelectrics, phononics, nanomaterials)

Robert Liebeck, Ph.D. University of Illinois at Urbana-Champaign, *Adjunct Professor of Mechanical and Aerospace Engineering* (aerodynamics, hydrodynamics, aircraft design)

Feng Liu, Ph.D. Princeton University, *Professor of Mechanical and Aerospace Engineering* (computational fluid dynamics, turbomachinery, propulsion)

Marc J. Madou, Ph.D. Ghent University, *UCI Chancellor's Professor of Mechanical and Aerospace Engineering; Biomedical Engineering; Chemical and Biomolecular Engineering* (miniaturization science (MEMS and NEMS) with emphasis on chemical and biological applications )

J. Michael McCarthy, Ph.D. Stanford University, *Director of the Performance Engineering Program and Professor of Mechanical and Aerospace Engineering* (design of mechanical systems, computer aided design, kinematic theory of spatial motion)

Vincent G. McDonell, Ph.D. University of California, Irvine, *Adjunct Professor of Mechanical and Aerospace Engineering* (combustion, alternative fuels, gas turbines, sprays, diagnostics, combined heat and power, emissions, autoignition/flashback)

Kenneth D. Mease, Ph.D. University of Southern California, *Professor Emeritus of Mechanical and Aerospace Engineering* (nonlinear dynamics and control; flight guidance and control)

Lawrence Muzio, Ph.D. University of California, Berkeley, *Adjunct Professor of Mechanical and Aerospace Engineering* (thermodynamics, combustion and combustion in practical systems, air pollution formation and control, advanced diagnostics applied to practical combustion systems)

Bihter Padak, Ph.D. Stanford University, *Assistant Professor of Mechanical and Aerospace Engineering; Chemical and Biomolecular Engineering*

Dimitri Papamoschou, Ph.D. California Institute of Technology, *Professor of Mechanical and Aerospace Engineering* (compressible turbulence, jet and fan aeroacoustics, jet noise reduction, mixing enhancement, microphone phased array methods)

Edwin Peraza Hernandez, Ph.D. Texas A&M University, *Assistant Professor of Mechanical and Aerospace Engineering* (morphing structures, deployable structures, origami, tensegrity, active materials, structural optimization)

Roger H. Rangel, Ph.D. University of California, Berkeley, *Department Chair and Professor of Mechanical and Aerospace Engineering* (heat transfer, fluid mechanics, two-phase flows, fluid instability and atomization)

David J. Reinkensmeyer, Ph.D. University of California, Berkeley, *Professor of Anatomy and Neurobiology; Biomedical Engineering; Mechanical and Aerospace Engineering; Physical Medicine and Rehabilitation*

G. Scott Samuelsen, Ph.D. University of California, Berkeley, *Director of Advanced Power and Energy Program, Research Professor and Professor Emeritus of Mechanical and Aerospace Engineering; Civil and Environmental Engineering* (combustion, sprays, laser diagnostics, air quality, turbulent transport, alternative fuels, modeling reacting flows, practical systems, energy and environmental conflict)

Andrei M. Shkel, Ph.D. University of Wisconsin-Madison, *Professor of Mechanical and Aerospace Engineering; Biomedical Engineering; Electrical Engineering and Computer Science* (design and advanced control of micro-electro-mechanical systems (MEMS); high precision micro-machined gyroscopes; MEMS-enhanced optical systems, tools and prosthetic appliances; electromechanical and machine-information systems integration)

Athanasios Sideris, Ph.D. University of Southern California, *Professor of Mechanical and Aerospace Engineering* (control systems, neural networks)

William A. Sirignano, Ph.D. Princeton University, *Henry Samueli Endowed Chair in Engineering and Distinguished Professor of Mechanical and Aerospace Engineering* (combustion theory, multiphase flows, turbulent reacting flows, computational methods, rocket and jet propulsion, gas turbine and internal combustion engines)

Haithem Taha, Ph.D. Virginia Polytechnic Institute and State University, *Assistant Professor of Mechanical and Aerospace Engineering* (geometric nonlinear control theory; unsteady aerodynamics and aeroelasticity; optimization, calculus of variations and optimal control; flight dynamics and autopilot design; airplane performance and configuration aerodynamics)

Mark Walter, Ph.D. California Institute of Technology, *Professor of Teaching of Mechanical and Aerospace Engineering* (mechanics of multifunctional materials, building energy efficiency)

Yun Wang, Ph.D. Pennsylvania State University, *Professor of Mechanical and Aerospace Engineering* (fuel cells, computational modeling, thermo-fluidics, two-phase flows, electrochemistry, Computational Fluid Dynamics (CFD), turbulent combustion)

Gregory N. Washington, Ph.D. North Carolina State University at Raleigh, *Professor Emeritus of Mechanical and Aerospace Engineering* (dynamic systems with emphasis on modeling and control of smart material systems and devices)

Yoon Jin Won, Ph.D. Stanford University, *Assistant Professor of Mechanical and Aerospace Engineering; Chemical and Biomolecular Engineering* (multi-scale structures for thermal and energy applications, in particular fabrication, characterization, and integration of structured materials)

## Affiliate Faculty

Mohammad A. Al Faruque, Ph.D. University of Kaiserslautern, *Chair of Emulex Career Development and Associate Professor of Electrical Engineering and Computer Science; Computer Science; Mechanical and Aerospace Engineering* (cyber-physical systems, internet of things, embedded systems, CPS security)

Aparna Chandramowlishwaran, Ph.D. Georgia Institute of Technology, *Assistant Professor of Electrical Engineering and Computer Science; Computer Science; Mechanical and Aerospace Engineering* (high-performance computing, domain-specific compilers, algorithm-architecture co-design, data analysis, and scientific computing)

Joyce H. Keyak, Ph.D. University of California, San Francisco, *Professor in Residence of Radiological Sciences; Biomedical Engineering; Mechanical and Aerospace Engineering*

Arash Kheradvar, Ph.D. California Institute of Technology, *Professor of Biomedical Engineering; Mechanical and Aerospace Engineering* (cardiac mechanics, cardiovascular devices, cardiac imaging)

Abraham P. Lee, Ph.D. University of California, Berkeley, *Professor of Biomedical Engineering; Mechanical and Aerospace Engineering* (integrated point-of-care diagnostics, engineered 'theranostic' vesicles and particles, active cell sorting microdevices, microphysiological microsystems, and high throughput droplet bioassays)

Beth A. Lopour, Ph.D. University of California, Berkeley, *Assistant Professor of Biomedical Engineering; Mechanical and Aerospace Engineering* (computational neuroscience, signal processing, mathematical modeling, epilepsy, translational research)

Timothy Rupert, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Materials Science and Engineering; Chemical and Biomolecular Engineering; Mechanical and Aerospace Engineering* (mechanical behavior, nanomaterials, structure property relationships, microstructural stability, grain boundaries and interfaces, materials characterization)

Lorenzo Valdevit, Ph.D. Princeton University, *Director of Institute for Design and Manufacturing Innovation (IDMI) and Associate Professor of Materials Science and Engineering; Mechanical and Aerospace Engineering* (architected materials, mechanical metamaterials, additive manufacturing, optimal design)

Vasan Venugopalan, Sc.D. Massachusetts Institute of Technology, *Department Chair and Professor of Chemical and Biomolecular Engineering; Biomedical Engineering; Materials Science and Engineering; Mechanical and Aerospace Engineering; Surgery* (laser-generated thermal, mechanical and radiative transport processes for application in medical diagnostics, imaging, therapeutics, biotechnology)

Iryna Zenyuk, Ph.D. Carnegie Mellon University, *Associate Director of National Fuel Cell Research Center and Assistant Professor of Chemical and Biomolecular Engineering; Materials Science and Engineering; Mechanical and Aerospace Engineering* (renewable energy, fuel cells, electrolyzers, batteries, X-ray imaging techniques, multi-scale modeling, transport phenomena)

## Courses

### **ENGRMAE 10. Introduction to Engineering Computations. 4 Units.**

Introduction to the solution of engineering problems through the use of the computer. Elementary programming, numerical analysis, and data visualization with a high-level programming language such as MATLAB.

(Design units: 1)

Corequisite: MATH 2A

Prerequisite: MATH 2A or MATH 5A

Overlaps with EECS 10, EECS 12, BME 60B.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**ENGRMAE 30. Statics. 4 Units.**

Addition and resolution of forces, distributed forces, equivalent system of forces centroids, first moments, moments and products on inertia, equilibrium of rigid bodies, trusses, beams, cables. Course may be offered online.

(Design units: 0)

Corequisite: MATH 2D

Prerequisite: MATH 2D and PHYSICS 7C

Same as ENGRCEE 30, ENGR 30.

Restriction: School of Engineering students have first consideration for enrollment.

**ENGRMAE 52. Computer-Aided Design. 4 Units.**

Develops skills for interpretation and presentation of mechanical design drawings and the use of CAD in engineering design. An integrated approach to drafting based on sketching, manual drawing, and three-dimensional CAD techniques is presented.

(Design units: 0.5)

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**ENGRMAE 57. Manufacturing Processes in Engineering. 2 Units.**

With laboratory. Machines and processes of mechanical manufacturing. Safety and professional procedures emphasized. Use of measuring instruments, hand tools, lathe, mill, drill press, bandsaw, grinder, welding equipment.

(Design units: 0)

Grading Option: Pass/no pass only.

Restriction: School of Engineering students have first consideration for enrollment.

**ENGRMAE 60. Electric Circuits. 4 Units.**

Design and analysis of analog circuits based on lumped circuit elements with emphasis on the use of operational amplifiers. Sinusoidal and transient response. Constructional and laboratory testing of analog circuits, and introduction to data acquisition. Materials fee.

(Design units: 2)

Corequisite: MATH 3D

Prerequisite: PHYSICS 7D and PHYSICS 7LD

Overlaps with EECS 70A.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Materials Science Engineering Majors have first consideration for enrollment.

**ENGRMAE 80. Dynamics. 4 Units.**

Introduction to the kinematics and dynamics of particles and rigid bodies. The Newton-Euler, Work/Energy, and Impulse/Momentum methods are explored for ascertaining the dynamics of particles and rigid bodies. An engineering design problem using these fundamental principles is also undertaken.

(Design units: 0.5)

Prerequisite: MATH 2D and PHYSICS 7C

Same as ENGRCEE 80, ENGR 80.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRMAE 91. Introduction to Thermodynamics. 4 Units.**

Thermodynamic principles; open and closed systems representative of engineering problems. First and second law of thermodynamics with applications to engineering systems and design.

(Design units: 0.5)

Prerequisite: PHYSICS 7C and MATH 2D

Overlaps with CBE 40B.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRMAE 93. Topics in Design Project . 1-4 Units.**

Early-stage design/hands-on experience for students, and allows them to participate alongside seniors in the design project.

(Design units: 1)

Repeatability: Unlimited as topics vary.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment.

**ENGRMAE 106. Mechanical Systems Laboratory. 4 Units.**

Experiments in linear systems, including op-amp circuits, vibrations, and control systems. Emphasis on demonstrating that mathematical models can be useful tools for the analysis and design of electro-mechanical systems. Materials fee.

(Design units: 2)

Prerequisite: ENGRMAE 60 or EECS 70A

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRMAE 107. Fluid Thermal Science Laboratory. 4 Units.**

Fluid and thermal engineering laboratory. Experimental analysis of fluid flow, heat transfer, and thermodynamic systems. Probability, statistics, and uncertainty analysis. Report writing is emphasized and a design project is required. Materials fee.

(Design units: 1)

Corequisite: ENGRMAE 120

Restriction: Mechanical Engineering Majors have first consideration for enrollment.

**ENGRMAE 108. Aerospace Laboratory. 4 Units.**

Analytical and experimental investigation in aerodynamics, fluid dynamics, and heat transfer. Emphasis on study of flow over objects and lift and drag on airfoils. Introduction to basic diagnostic techniques. Report writing is emphasized. Design project is required.

(Design units: 2)

Prerequisite: ENGRMAE 130B

Restriction: Aerospace Engineering Majors have first consideration for enrollment. Mechanical Engineering majors have second consideration for enrollment.

**ENGRMAE 110. Combustion and Fuel Cell Systems. 4 Units.**

Fundamentals of gaseous, liquid, and coal-fired combustion and fuel cell systems. Fuels, fuel-air mixing, aerodynamics, and combustion and fuel cell thermodynamics. Operating and design aspects of practical systems including engines, power generators, boilers, furnaces, and incinerators.

(Design units: 2)

Prerequisite: ENGRMAE 115

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRMAE 112. Propulsion. 4 Units.**

Application of thermodynamics and fluid mechanics to basic flow processes and cycle performance in propulsion systems: gas turbines, ramjets, scramjets, and rockets.

(Design units: 1)

Prerequisite: ENGRMAE 135

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment.

**ENGRMAE 113. Electric Propulsion. 4 Units.**

Space propulsion requirements and maneuvers, stressing those best suited to electric propulsion. An introduction to plasma physics. Electrothermal, electromagnetic, and electrostatic accelerators, with emphasis in technologies (ion engines, Hall thrusters, and colloidal thrusters) belonging to the latter family.

(Design units: 1)

Prerequisite: ENGRMAE 112

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment.

Concurrent with ENGRMAE 213.

**ENGRMAE 114. Fuel Cell Fundamentals and Technology. 4 Units.**

Introduction to electrochemistry and electrocatalysis; nature of fuel-cell electrodes and electrolytes; charge transfer reactions at interfaces; charge transport and mass transport processes; fuel processing reactions; determination of fuel cell efficiency, fuel flexibility, emissions, and other characteristics.

(Design units: 0)

Prerequisite: ENGRMAE 115

Restriction: Seniors only. Mechanical Engineering Majors have first consideration for enrollment. Chemical Engineering majors have second consideration for enrollment.

Concurrent with ENGRMAE 214A.

**ENGRMAE 115. Applied Engineering Thermodynamics. 4 Units.**

Application of thermodynamic principles to compressible and incompressible processes representative of practical engineering problems; power cycles, refrigeration cycles, multicomponent mixtures, air conditioning systems, combustion, and compressible flow. Design of a thermodynamic process.

(Design units: 2)

Prerequisite: ENGRMAE 91 or CBE 40B or ENGRMSE 65A

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRMAE 117. Solar and Renewable Energy Systems. 4 Units.**

Basic principles, design, and operation of solar and other renewable energy systems including solar photo-voltaic, solar thermal, wind, and PEM fuel cell. Includes power generation and storage, and renewable fuels for transportation and stationary power generation.

(Design units: 1)

Prerequisite: (ENGRMAE 91 or CBE 40B)

Restriction: Mechanical Engineering Majors have first consideration for enrollment.

**ENGRMAE 118. Sustainable Energy Systems. 4 Units.**

Basic principles, design, and operation of sustainable energy systems including wind, solar photo-voltaic and thermal, hydroelectric, geothermal, oceanic, biomass combustion, advanced coal, and next generation nuclear. Includes power generation, storage, and transmission for stationary power generation.

(Design units: 1)

Prerequisite: ENGRMAE 115

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment.

Concurrent with ENGRMAE 218.

**ENGRMAE 119. Climate Solutions. 4 Units.**

Focuses on carbon neutrality and climate stability, addressing.

Same as EARTHSS 179, UPPP 111.

Restriction: Upper-division students only.

**ENGRMAE 120. Heat and Mass Transfer. 4 Units.**

Fundamentals of heat and mass transfer. Conduction, heat and mass transfer by convection in laminar and turbulent flows, radiation heat transfer, and combined modes of heat and mass transfer. Practical engineering applications.

(Design units: 0)

Prerequisite: ENGRMAE 130B

Overlaps with CBE 120B.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**ENGRMAE 130A. Introduction to Fluid Mechanics. 4 Units.**

Fundamental concepts; fluid statics; fluid dynamics; Bernoulli's equation; control-volume analysis; basic flow equations of conservation of mass, momentum, and energy; differential analysis; potential flow; viscous incompressible flow.

(Design units: 0)

Corequisite: ENGRMAE 91

Prerequisite: PHYSICS 7C and MATH 2D and MATH 2E and MATH 3D and (ENGRMAE 30 or ENGRCEE 30 or ENGR 30) and (ENGRMAE 80 or ENGRCEE 80 or ENGR 80). PHYSICS 7C with a grade of C- or better. MATH 2D with a grade of C- or better. MATH 2E with a grade of C- or better. MATH 3D with a grade of C- or better. ENGRMAE 30 with a grade of C- or better. ENGRCEE 30 with a grade of C- or better. ENGR 30 with a grade of C- or better. ENGRMAE 80 with a grade of C- or better. ENGRCEE 80 with a grade of C- or better. ENGR 80 with a grade of C- or better

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment.

**ENGRMAE 130B. Introduction to Viscous and Compressible Flows. 4 Units.**

Introduction to the analysis of viscous flows including fully developed laminar and turbulent flow in a pipe, viscous flow over immersed bodies, evaluation of boundary layer characteristics, lift and drag, compressible flow in a duct and normal shock waves.

(Design units: 1)

Prerequisite: ENGRMAE 130A

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment.

**ENGRMAE 132. Computational Fluid Dynamics. 4 Units.**

Introduction to computational fluid dynamics in simple engineering devices. The numerical simulations will be performed via the widely-used software ANSYS-Fluent. While Fluent is the choice of software, all major CFD packages are based on a similar numerical method.

(Design units: 0)

Prerequisite: ENGRMAE 130B. ENGRMAE 130B with a grade of C- or better

Restriction: Aerospace Engineering Majors only. Mechanical Engineering Majors only.

**ENGRMAE 135. Compressible Flow. 4 Units.**

Compressibility effects in fluid mechanics. One-dimensional flow with area variation, friction, heat transfer, and shocks. Design of gas supply systems. Two-dimensional flow with oblique shocks and isentropic waves. Supersonic airfoil theory and design, wind tunnel design. Basic diagnostics.

(Design units: 1)

Prerequisite: ENGRMAE 130A

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment.

**ENGRMAE 136. Aerodynamics. 4 Units.**

Analysis of flow over aircraft wings and airfoils, prediction of lift, moment, and drag. Topics: fluid dynamics equations; flow similitude; viscous effects; vorticity, circulation, Kelvin's theorem, potential flow; superposition principle, Kutta-Joukowski theorem; thin airfoil theory; finite wing theory; compressibility.

(Design units: 1)

Prerequisite: ENGRMAE 130B

Restriction: Aerospace Engineering Majors have first consideration for enrollment. Mechanical Engineering Majors have first consideration for enrollment.

**ENGRMAE 145. Theory of Machines and Mechanisms. 4 Units.**

Presents the basic mathematical theory of machines. Focuses on the principles of cam design, gearing and gear train analysis, and the kinematic and dynamic analysis of linkages, together with an introduction to robotics.

(Design units: 2)

Prerequisite: ENGRMAE 52 and (ENGRMAE 80 or ENGRCEE 80 or ENGR 80) and (MATH 3A or I&C SCI 6N)

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Materials Science and Engineering majors have second consideration for enrollment.

**ENGRMAE 146. Astronautics. 4 Units.**

Motion in gravitational force fields, orbit transfers, rocketry, interplanetary trajectories, attitude dynamics and stabilization, navigation, reentry, the space environment.

(Design units: 1)

Prerequisite: ENGRMAE 80 or ENGRCEE 80 or ENGR 80

Restriction: Aerospace Engineering Majors have first consideration for enrollment.

**ENGRMAE 147. Vibrations. 4 Units.**

Analysis of structural vibrations of mechanical systems. Modeling for lumped and distributed parameter systems. Topics include single and multi-degree of freedom systems, free and forced vibrations, Fourier series, convolution integral, mass/stiffness matrices, and normal modes with design project.

(Design units: 1)

Prerequisite: (ENGR 80 or ENGRCEE 80 or ENGRMAE 80) and MATH 2E and MATH 3D

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**ENGRMAE 150. Mechanics of Structures. 4 Units.**

Stresses and strains. Torsion. Bending. Beam deflection. Shear force and moment distributions in beams. Yielding and buckling of columns. Combined loading. Transformation of stresses and strain. Yielding criteria. Finite elements analysis of frames. Dynamic of two-bar truss.

(Design units: 2)

Prerequisite: (ENGRCEE 30 or ENGR 30 or ENGRMAE 30) and MATH 3A

Same as ENGR 150.

Overlaps with ENGRCEE 150.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**ENGRMAE 150L. Mechanics of Structures Laboratory. 1 Unit.**

Experimental techniques for the measurement of mechanical properties of materials and structures. Methods for load, displacement, and strain measurements. Tension, bending, compression tests. Determination of strength, stiffness, toughness for metals, polymers, ceramics, and composites. Deformation of structures. Materials fee.

(Design units: 0)

Corequisite: ENGRMAE 150

Prerequisite: ENGRMAE 30 or ENGR 30 or ENGRCEE 30

Overlaps with ENGRCEE 150L.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**ENGRMAE 151. Mechanical Engineering Design. 4 Units.**

A comprehensive group design project experience that involves identifying customer needs, idea generation, reverse engineering, preliminary design, standards, prototype development, testing, analysis, and redesign of a product involving fluid, thermal, and mechanical components. Introduces design for manufacturing and the environment. Materials fee.

(Design units: 3)

Corequisite: ENGRMAE 170

Prerequisite: ENGRMAE 120 and ENGRMAE 145

Restriction: Seniors only. Mechanical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**ENGRMAE 152. Introduction to Computer-Aided Engineering. 4 Units.**

Elements and principles of computer-aided engineering with modern hardware and software are presented with a design focus. Case studies are used to assist in finite-element method techniques. Not offered every year.

(Design units: 2)

Prerequisite: (ENGRMAE 150 or ENGR 150) and ENGRMAE 120

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**ENGRMAE 153. Advanced BIOMEMS Manufacturing Techniques. 4 Units.**

Introduction to BIOMEMS. Advanced biotechnology/biomedicine equipment based on MEMS and NEMS. Fundamentals of MEMS/NEMS sensing techniques and the biological and physics principles involved and the preferred MEMS and NEMS manufacturing techniques.

(Design units: 0)

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Biomedical Engineering Majors have first consideration for enrollment.

Concurrent with ENGRMAE 253.

**ENGRMAE 155. Composite Materials and Structures. 4 Units.**

Motivation for composite materials. Different classifications according to the nature of the matrix (PMC, MMC, CMC) and the reinforcement topology (fibers, whiskers, particulates). Mechanical properties. Failure mechanisms. Designing with composite materials. Advantages and limitations of homogenization techniques for numerical modeling.

(Design units: 0)

Prerequisite: ENGR 54 and (ENGRMAE 150 or ENGRCEE 150 or ENGR 150)

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering majors have second consideration for enrollment. Chemical Engineering majors have second consideration for enrollment. Civil Engineering majors have second consideration for enrollment. Materials Science and Engineering majors have second consideration for enrollment.

Concurrent with ENGRMAE 255.

**ENGRMAE 156. Mechanical Behavior and Design Principles. 4 Units.**

Principles governing structure and mechanical behavior of materials, relationship relating microstructure and mechanical response with application to elasticity, plasticity, yielding, necking, creep, and fracture of materials. Introduction to experimental techniques to characterize the properties of materials. Design parameters.

(Design units: 2)

Prerequisite: ENGR 54

Same as ENGRMSE 155.

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment. Aerospace Engineering majors have second consideration for enrollment.

**ENGRMAE 157. Lightweight Structures. 4 Units.**

Fundamentals of torsion and bending. Analysis and design of thin-wall and composite beams. Stress analysis of aircraft components. Stiffness, strength, and buckling. Introduction to the Finite Element method and its application to plates and shells.

(Design units: 2)

Prerequisite: ENGR 150 or ENGRCEE 150 or ENGRMAE 150

Restriction: Aerospace Engineering Majors have first consideration for enrollment. Mechanical Engineering majors have second consideration for enrollment. Civil Engineering majors have second consideration for enrollment. Materials Science and Engineering majors have second consideration for enrollment.

**ENGRMAE 158. Aircraft Performance. 4 Units.**

Flight theory applied to subsonic propeller and jet aircraft. Nature of aerodynamic forces, drag and lift of wing and fuselage, high-lift devices, level-flight performance, climb and glide performance, range, endurance, take-off and landing distances, static and dynamic stability and control.

(Design units: 2)

Prerequisite: ENGRMAE 130A

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment.

**ENGRMAE 159. Aircraft Design. 4 Units.**

Preliminary design of subsonic general aviation and transport aircraft with emphasis on layout, aerodynamic design, propulsion, and performance. Estimation of total weight and weight distribution, design of wings, fuselage, and tail, selection and location of engines, prediction of overall performance.

(Design units: 4)

Prerequisite: ENGRMAE 112 and ENGRMAE 136 and ENGRMAE 158

Restriction: Aerospace Engineering Majors have first consideration for enrollment. Mechanical Engineering Majors have first consideration for enrollment.

**ENGRMAE 164. Air Pollution and Control. 4 Units.**

Sources, dispersion, and effects of air pollutants. Topics include emission factors, emission inventory, air pollution, meteorology, air chemistry, air quality modeling, impact assessment, source and ambient monitoring, regional control strategies.

(Design units: 2)

Prerequisite: (ENGRMAE 91 or CBE 40B) and ENGRMAE 130A

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment.

**ENGRMAE 170. Introduction to Control Systems. 4 Units.**

Feedback control systems. Modeling, stability, and systems specifications. Root locus, Nyquist, and Bode methods of analysis and design.

(Design units: 2)

Prerequisite: (ENGRMAE 80 or ENGRCEE 80 or ENGR 80) and ENGRMAE 106

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Materials Science and Engr Majors have first consideration for enrollment.

**ENGRMAE 171. Digital Control Systems. 4 Units.**

Methods for analysis and design of discrete-time control systems. Z-transforms, difference equations, discrete Fourier transforms. Sampling theorem and applications. Z-plane stability, frequency response. Digital controller design. Introduction to digital filters.

(Design units: 2)

Prerequisite: ENGRMAE 170

Restriction: Civil Engineering Majors have first consideration for enrollment. Mechanical Engineering Majors have first consideration for enrollment.

**ENGRMAE 172. Design of Computer-Controlled Robots. 4 Units.**

Students design a small robotic device and program it to exhibit sentient behaviors. The basic aspects of mechatronic design are covered, including motor and sensor selection, control strategies, and microcomputer programming for the implementation of control paradigms. Materials fee.

(Design units: 3)

Corequisite: ENGRMAE 60

Prerequisite: ENGRMAE 170

Restriction: Mechanical Engineering Majors have first consideration for enrollment.

Concurrent with ENGRMAE 280.

**ENGRMAE 175. Dynamics and Control of Aerospace Vehicles. 4 Units.**

Equations of motion, linearization, stability derivatives, and longitudinal and lateral modes of motion. Handling qualities, sensors and actuators, and effects of various feedbacks on stability and performance. Stability augmentation. Autopilot design.

(Design units: 3)

Prerequisite: ENGRMAE 106

Restriction: Aerospace Engineering Majors have first consideration for enrollment. Mechanical Engineering Majors have first consideration for enrollment.

**ENGRMAE 182. Introduction to Machine Learning. 4 Units.**

Fundamental principles necessary to understand statistical learning methods. Introduction to the R programming language. Mathematical foundation for various machine learning algorithms. Computer implementation.

**ENGRMAE 183. Computer-Aided Mechanism Design. 4 Units.**

Focuses on design of planar, spherical, and spatial mechanisms using computer algebra and graphics. Topics include exact and approximate analytical design techniques. Students are required to use existing software (or develop new algorithms) to design various mechanisms for new applications.

(Design units: 4)

Prerequisite: MATH 3A or I&C SCI 6N

Restriction: Mechanical Engineering Majors have first consideration for enrollment.

**ENGRMAE 184. Fundamentals of Experimental Design. 4 Units.**

Review of statistics as applied to experimental research. Fundamentals and principles of statistical experimental design and analysis with emphasis on understanding and use of designed experiments, response surfaces, linear regression modeling, and process optimization.

(Design units: 1)

Restriction: Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment.

Concurrent with ENGRMAE 284.

**ENGRMAE 185. Numerical Analysis in Mechanical Engineering. 4 Units.**

Solution of mechanical-engineering equations by means of numerical methods. Errors in numerical analysis. Nonlinear equation and sets of equations. Numerical differentiation and integration. Ordinary differential equations. Boundary-value problems. Partial differential equations.

(Design units: 2)

Prerequisite: (ENGRMAE 10 or EECS 10 or EECS 12 or BME 60B) and MATH 3D and MATH 2E

Overlaps with MATH 105A.

**ENGRMAE 188. Engineering Design in Industry. 4 Units.**

Principles of engineering design in the context of an industrial application. Local manufacturing firms define an engineering design project to be completed in 10 weeks. Projects include initial brainstorming to final design, with a formal presentation.

(Design units: 4)

Repeatability: May be taken for credit 3 times.

Restriction: Mechanical Engineering Majors have first consideration for enrollment.

**ENGRMAE 189. Senior Project - Special Topics. 1-4 Units.**

Group or individual senior project of theoretical or applied nature involving design. Materials fee.

(Design units: 1-4)

Repeatability: May be taken for credit for 12 units as topics vary.

Restriction: Seniors only. Mechanical Engineering Majors only.

**ENGRMAE 193. Topics in MAE Design. 1-4 Units.**

Provides early-stage design/hands-on experience for upper-division students, and allows them to participate in senior design projects course ENGRMAE 189.

(Design units: 1)

Repeatability: May be taken for credit for 12 units as topics vary.

Restriction: Aerospace Engineering Majors have first consideration for enrollment. Mechanical Engineering Majors have first consideration for enrollment.

**ENGRMAE 195. Seminars in Engineering. 1-4 Units.**

Seminars by individual faculty in major fields of interest. Materials fee.

(Design units: 1-4)

Repeatability: Unlimited as topics vary.

**ENGRMAE 198. Group Study. 1-4 Units.**

Group study of selected topics in Aerospace and Mechanical Engineering.

(Design units: 1-4)

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**ENGRMAE 199. Individual Study. 1-4 Units.**

For undergraduate Engineering majors in supervised but independent reading, research, or design. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Repeatability: May be taken for credit for 8 units.

**ENGRMAE 199P. Individual Study. 1-4 Units.**

For undergraduate Engineering majors in supervised but independent reading, research, or design. Students taking individual study for design are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**ENGRMAE 200A. Engineering Analysis I. 4 Units.**

Linear algebra, including vector spaces, matrices, linear systems of equations, least squares, and the eigenvalue problem. Ordinary differential equations, including analytical and numerical solution methods, stability, and phase portraits.

Restriction: Graduate students only.

**ENGRMAE 200B. Engineering Analysis II. 4 Units.**

Review of ordinary differential equations, including Bessel and Legendre functions. Partial differential equations, including the diffusion equation, Laplace's equation, and the wave equation. Fourier series, Fourier and Laplace transforms and their applications.

Restriction: Graduate students only.

**ENGRMAE 205. Perturbation Methods in Engineering. 4 Units.**

Asymptotic Expansions of integrals. Regular and singular perturbations. Perturbation methods for ordinary and partial differential equations. Matched asymptotic expansions. Multiple-scale asymptotic expansion schemes. Not offered every year.

Prerequisite: ENGRMAE 200A and ENGRMAE 200B. Knowledge of linear differential equations.

Restriction: Graduate students only.

**ENGRMAE 206. Nonlinear Optimization Methods. 4 Units.**

Numerical methods for constrained and unconstrained optimization. Necessary and sufficient conditions for optimality. Conjugate gradient, variable metric algorithms. Gradient projection, penalty functions, and Lagrange methods. Not offered every year.

Prerequisite: ENGRMAE 200A

Restriction: Graduate students only.

**ENGRMAE 207. Methods of Computer Modeling in Engineering and the Sciences. 4 Units.**

Unified introduction to finite volume, finite element, field-boundary element, meshless, primal, dual, and mixed methods. Nonlinear problems posed by ordinary as well as partial differential equations. Computer implementations and comparisons of accuracy and convergence.

Restriction: Graduate students only.

**ENGRMAE 209P. Energy Efficiency Technology. 4 Units.**

Principles, design, operation of energy efficient technology in the built environment, including solar energy, green building design, low waste/emissions construction materials, energy harvesting, built environment energy conversion and storage, high efficiency lighting, daylighting, heat pumps, cooling systems, renewable power systems.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 210. Advanced Fundamentals of Combustion. 4 Units.**

Premixed, nonpremixed, and heterogenous reactions, with emphasis on kinetics, thermal ignition, turbulent flame propagation, detonations, explosions, flammability limits, diffusion flame, quenching, flame stabilization, and particle and spray combustion. Not offered every year.

Prerequisite: ENGRMAE 224 or ENGRMAE 230B

Restriction: Graduate students only.

**ENGRMAE 211P. Energy Storage Systems and Technology. 4 Units.**

Basic principles, design, and operation of energy storage systems and technology including lithium ion battery systems for transportation and stationary applications, for flow batteries (e.g., vanadium redox, sodium sulfur), and for reversible fuel cell electrolyzer systems and hydrogen energy storage.

Prerequisite: Required: Undergraduate-level knowledge of applied engineering thermodynamics.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 212. Engineering Electrochemistry: Fundamentals and Applications. 4 Units.**

Introduction to engineering electrochemistry fundamentals and applications. Examine thermodynamics and transport principles in typical electrochemical systems. Electrochemical sensors, batteries, fuel cells, and supercapacitors. Manufacturing aspects will also be covered.

Restriction: Graduate students only.

**ENGRMAE 212P. Engineering Electrochemistry: Fundamentals and Applications. 4 Units.**

Introduction to engineering electrochemistry fundamentals and applications. Examine thermodynamics and transport principles in typical electrochemical systems. Electrochemical sensors, batteries, fuel cells, and supercapacitors. Manufacturing aspects are also covered.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 213. Electric Propulsion. 4 Units.**

Space propulsion requirements and maneuvers, stressing those best suited to electric propulsion. An introduction to plasma physics. Electrothermal, electromagnetic and electrostatic accelerators, with emphasis in technologies (ion engines, Hall thrusters and colloidal thrusters) belonging to the latter family.

Restriction: Graduate students only.

Concurrent with ENGRMAE 113.

**ENGRMAE 214A. Fuel Cell Fundamentals and Technology. 4 Units.**

Introduction to electrochemistry and electrocatalysis; nature of fuel-cell electrodes and electrolytes; charge transfer reactions at interfaces; charge transport and mass transport processes; fuel processing reactions; determination of fuel cell efficiency, fuel flexibility, emissions and other characteristics.

Restriction: Graduate students only.

Concurrent with ENGRMAE 114.

**ENGRMAE 214AP. Fuel Cell Fundamentals and Technology. 4 Units.**

Introduction to electrochemistry and electrocatalysis; nature of fuel-cell electrodes and electrolytes; charge transfer reactions at interfaces; charge transport and mass transport processes; fuel processing reactions; determination of fuel cell efficiency, fuel flexibility, emissions, and other characteristics.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 214B. Fuel Cell Systems and Degradation. 4 Units.**

Fuel cell systems design; impacts of operating conditions; experimental and theoretical analysis methods for fuel cells systems; introduction to degradation mechanisms and mitigation techniques; provides broad insight into fuel-cell science, technology, system design and operation. Offered every other year.

Prerequisite: ENGRMAE 214A

Restriction: Graduate students only.

**ENGRMAE 214C. PEM Fuel Cells . 4 Units.**

An in-depth introduction to the fundamentals of PEM fuel cells, including thermodynamics, kinetics, and transport in electrochemical systems. Topics of specific interest to mechanical engineers will include water/heat management and dynamic responses.

Prerequisite: ENGRMAE 214A

Restriction: Graduate students only.

**ENGRMAE 215. Advanced Combustion Technology. 4 Units.**

Pollutant formation and experimental methods. Formation of gaseous pollutants and soot; transformation and emission of fuel contaminants in gas, liquid, and solid fuel combustion; methods employed to measure velocity, turbulence intensity, temperature, composition, particle size; methods to visualize reacting flows.

Prerequisite: ENGRMAE 200A and (ENGRMAE 230A or ENGRMAE 270A)

Restriction: Graduate students only.

**ENGRMAE 216. Statistical Thermodynamics. 4 Units.**

Statistics of independent particles, development of quantum mechanical description of atoms and molecules, application of quantum mechanics, evaluation of thermodynamics properties for solids, liquids, and gases, statistical mechanics of dependent particles (ensembles).

Restriction: Graduate students only.

**ENGRMAE 217. Generalized Thermodynamics. 4 Units.**

Generalized thermodynamics develops the laws of continuum thermodynamics from a set of plausible and intuitive postulates. The postulates are motivated qualitatively by a statistical description of matter and are justified by a posterior success for the resulting theory.

Restriction: Graduate students only.

**ENGRMAE 217P. Generalized Thermodynamics. 4 Units.**

Generalized thermodynamics develops the laws of continuum thermodynamics from a set of plausible and intuitive postulates. The postulates are motivated qualitatively by a statistical description of matter and are justified by a posterior success for the resulting theory.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 218. Sustainable Energy Systems. 4 Units.**

Basic principles, design and operation of sustainable energy systems including wind, solar photo-voltaic and thermal, hydroelectric, geothermal, oceanic, biomass combustion, advanced coal and next generation nuclear. Includes power generation, storage, and transmission for stationary power generation.

Restriction: Graduate students only.

Concurrent with ENGRMAE 118.

**ENGRMAE 218P. Sustainable Energy Systems. 4 Units.**

Basic principles, design, and operation of sustainable energy systems including wind, solar photo-voltaic and thermal, hydroelectric, geothermal, oceanic, biomass combustion, advanced coal, and next generation nuclear. Includes power generation, storage, and transmission for stationary power generation.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 219P. Solar and Renewable Energy Systems. 4 Units.**

Basic principles, design, and operation of solar and other renewable energy systems including solar photo-voltaic, solar thermal, wind, and PEM fuel cell. Includes power generation and storage, and renewable fuels for transportation and stationary power generation.

Prerequisite: Required: Knowledge of applied engineering thermodynamics.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 220. Conduction Heat Transfer. 4 Units.**

Steady state and transient conduction heat transfer in one- and multi-dimensional geometries. Analytical methods, exact and approximate. Numerical techniques are also included.

Restriction: Graduate students only.

**ENGRMAE 221. Convective Heat and Mass Transfer. 4 Units.**

Laminar and turbulent convective heat and mass transfer in external and internal flows. Forced and free convection. Exact and approximate solutions. Similarity solutions. Variable properties. Concentration boundary layer theory. Mass transfer conductance.

Prerequisite: ENGRMAE 230B

Restriction: Graduate students only.

**ENGRMAE 222. Radiative Heat Transfer. 4 Units.**

Black body radiation. Radiative transport equations for surfaces separated by non-participating media. Radiant energy transfer through absorbing, emitting, and scattering media. Radiation-conduction interaction. Radiation-convection interaction. Introduction to finite-difference solutions.

Restriction: Graduate students only.

**ENGRMAE 223A. Numerical Methods in Heat, Mass, and Momentum Transport (Laminar Flows) I. 4 Units.**

Introduction to the discretization of various types of partial differential equations (parabolic, elliptic, hyperbolic). Finite-volume discretization for one- and two-dimensional flows. Use of a two-dimensional elliptic procedure to predict sample laminar flows.

Prerequisite or corequisite: ENGRMAE 230A

Restriction: Graduate students only.

**ENGRMAE 223B. Numerical Methods in Heat, Mass, and Momentum II. 4 Units.**

Introduction to turbulence. Reynolds-averaging of Navier-Stokes equations. Second-order closure of the average equations. Use of two-dimensional elliptic procedure to predict confined turbulent flows. Not offered every year.

Prerequisite: ENGRMAE 223A

Restriction: Graduate students only.

**ENGRMAE 224. Advanced Transport Phenomena. 4 Units.**

Fundamentals of transport phenomena in fluid (gas and liquid), solid, and nano systems. Conservation equations, fundamentals of diffusion, ion transport, dispersion in turbulent/laminar flows, absorption, differential/staged distillation, transport in membranes, and nano/microscale transport phenomena. Not offered every year.

Restriction: Graduate students only.

**ENGRMAE 226. Special Topics in Fluid and Thermal Sciences. 1-4 Units.**

Special topics of current interest in fluid mechanics, heat and mass transfer, multiphase flows, or combustion. Emphasis could be placed on theory, computational methods, or experimental techniques.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ENGRMAE 227. Thermal Resistance Analysis in Microdevices and Nanomaterials. 4 Units.**

Heat transfer and thermal resistance analysis relevant for microdevices and nanomaterials. Overview of recent progress in nanotechnology and materials science. Thermal modeling strategies for novel electronic devices and energy conversion systems.

Restriction: Graduate students only.

**ENGRMAE 228. Nanoscale Phase Change Transport Physics. 4 Units.**

Discusses a wide range of phase change processes (i.e., evaporation, boiling, condensation, and freezing) through the use of novel thermal metamaterials with the aim of enhancing phase change performances.

Prerequisite: Undergraduate-level heat transfer is recommended.

Restriction: Graduate students only.

**ENGRMAE 229P. Nanoscale Materials for Modern Electronics. 4 Units.**

Introduction to design and synthesis of nanomaterials. Topics include thermal and liquid transport in materials systems, phase change heat transfer physics, and mechanical properties in materials systems.

Prerequisite: Required: Undergraduate-level knowledge of heat transfer.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 230A. Inviscid Incompressible Fluid Mechanics I. 4 Units.**

Equations of motion. Vector notation. Flow kinematics. Potential flow and complex potential. Vorticity and circulation. Bernoulli's theorem. Crocco's theorem. Conformal, Joukowski, and Schwarz-Christoffel transformations.

Restriction: Graduate students only.

**ENGRMAE 230B. Viscous Incompressible Fluid Mechanics II. 4 Units.**

Review of mass, momentum, energy equations. Stress tensor, constitutive relations. Laminar flows. Stokes and Oseen flows. Self-similarity. Boundary layer theory: thin-layer approximation, Falkner-Skan, Blasius solutions, integral methods. Jet, wake, cavity flows. Introduction to turbulence: instability, Reynolds averaging, mixing length.

Restriction: Graduate students only.

**ENGRMAE 230C. Compressible Fluid Dynamics. 4 Units.**

One-dimensional unsteady flow; Riemann invariants, acoustics, shock tube. Two-dimensional flow: shock polars, linear theory, similarity rules, method of characteristics. Three dimensional flow: slender-body theory. Effects of viscosity and conductivity: laminar boundary layer, Crocco-Busemann relations.

Prerequisite: ENGRMAE 230A or ENGRMAE 230B

Restriction: Graduate students only.

**ENGRMAE 230D. Theoretical Foundations of Fluid Mechanics. 4 Units.**

Well-posed problems and boundary, initial, and interface conditions; strong and weak solutions. Similarity, perturbation theory and limit behavior, bifurcations. Dispersive and nondispersive wave propagation, acoustics, ship waves, internal gravity waves, water waves. Vortices: mutual interactions and stability. Jets, wakes, cavities.

Prerequisite: ENGRMAE 230A and ENGRMAE 230B

Restriction: Graduate students only.

**ENGRMAE 231. Fundamentals of Turbulence. 4 Units.**

Phenomenon of turbulence. Reynolds equations. Dynamics of turbulence. Free turbulent shear flows. Wall-bounded turbulent shear flows. Turbulent transport of scalar quantities. Spectral dynamics. Mathematical models of turbulence.

Prerequisite: ENGRMAE 230A and ENGRMAE 230B

Restriction: Graduate students only.

**ENGRMAE 233. Turbulent Free Shear Flows. 4 Units.**

Practical and theoretical aspects of turbulent free shear flows. Instability, global scaling laws, mixing, and noise generation in incompressible and compressible shear layers, jets, and wakes. Kelvin-Helmholtz instability, near- and far-field growth rates, effect of compressibility, aeroacoustics of jets.

Prerequisite: ENGRMAE 200B and ENGRMAE 230A and ENGRMAE 230B

Restriction: Graduate students only.

**ENGRMAE 236. Nonequilibrium Gas Dynamics. 4 Units.**

Molecular description of fluid flow. Boltzmann equation. Chapman-Enskog expansion for flows with translational nonequilibrium. Shock structure. Inviscid flows with chemical and vibrational nonequilibrium. Not offered every year.

Prerequisite: ENGRMAE 230C

Restriction: Graduate students only.

**ENGRMAE 237. Computational Fluid Dynamics. 4 Units.**

Mathematical, physical, and computational fundamentals of computational fluid dynamics, numerical methods for solving the Euler and Navier-Stokes equations. Topics include: finite-difference and finite-volume discretization, time marching methods, von Neumann analysis, upwinding, flux splitting, TVD, and other high-resolution shock-capturing schemes.

Prerequisite: ENGRMAE 230C

Restriction: Graduate students only.

**ENGRMAE 238. Experimental Fluid Dynamics. 4 Units.**

Concepts and techniques for measurement of fluid motion. Quantitative and qualitative flow visualization. Flow facilities, shadowgraph, schlieren, interferometer, thermal anemometer. Laser diagnostics, fluorescence, Rayleigh, Raman, Mie scattering. Laser-Doppler, particle-image, and image-correlation velocimetry. Three- and four-dimensional digital imaging.

Prerequisite: ENGRMAE 230A and ENGRMAE 230B

Restriction: Graduate students only.

**ENGRMAE 239. Dynamics of Unsteady Flows. 4 Units.**

Unsteady potential flow modeling (Kelvin's circulation theorem, unsteady Bernoulli's equation). Theodorsen's frequency response, Wagner's step response, and the Kussner sharp-edged gust. State Space approximations for Unsteady Loads. Vortex Lattice. Flutter.

Prerequisite: ENGRMAE 230A is recommended.

Restriction: Graduate students only.

**ENGRMAE 241. Dynamics. 4 Units.**

Kinematics and dynamics of three-dimensional motions. Lagrange's equations, Newton-Euler equations. Applications include robot systems and spinning satellites.

Restriction: Graduate students only.

**ENGRMAE 242. Robotics. 4 Units.**

Spatial rigid-body transformations. Forward and inverse kinematics. Jacobian of serial and parallel chains. Screw coordinates and transformations. Rate and static analyses using screw theory. Singularity analysis. Trajectory generation. Not offered every year.

Restriction: Graduate students only.

**ENGRMAE 244. Theoretical Kinematics. 4 Units.**

Spatial rigid body kinematics is presented with applications to robotics. Orthogonal Matrices, Rodrigues' formula, Quaternions, Plucker coordinates, screw theory, and dual numbers are studied using modern projective geometry and multi-linear algebra. Applications include trajectory planning, inverse kinematics, and workspace analysis.

Restriction: Graduate students only.

**ENGRMAE 245. Spatial Mechanism Design. 4 Units.**

Fundamental kinematic theory required for planar, spherical, and spatial mechanism design. The focus is on algebraic methods for the exact solution of constraint equations. Not offered every year.

Restriction: Graduate students only.

**ENGRMAE 247. Micro-System Design. 4 Units.**

Covers the fundamentals of the many disciplines needed for design of Micro-Electro-Mechanical Systems (MEMS): microfabrication technology, structural mechanics on micro-scale, electrostatics, circuit interface, control, computer-aided design, and system integration.

Same as EECS 278.

Restriction: Graduate students only.

**ENGRMAE 247P. Micro-System Design. 4 Units.**

Covers the fundamentals of the many disciplines needed for design of Micro-Electro-Mechanical Systems (MEMS): microfabrication technology, structural mechanics on micro-scale, electrostatics, circuit interface, control, computer-aided design, and system integration.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 249. Micro-Sensors and Actuators. 4 Units.**

Introduction to the technology of Micro-Electro-Mechanical Systems (MEMS). Fundamental principles and applications of important microsensors, actuation principles on microscale. Introduction to the elements of signal processing; processing of materials for micro sensor/actuator fabrication; smart sensors and microsensor/microactuator array devices.

Same as EECS 279.

Restriction: Graduate students only.

**ENGRMAE 250. Biorobotics. 4 Units.**

Sensors, actuators, and neural circuits for biological movement control from an engineering perspective. Current approaches to robotic and mechatronic devices that support and enhance human movement in health and following neurologic injuries like stroke and spinal cord injury.

Restriction: Graduate students only.

**ENGRMAE 252. Fundamentals of Microfabrication. 4 Units.**

Introduces Engineering and Science students to the science of miniaturization. Different options to make very small machines (micro and nano size) are reviewed, materials choices are discussed, scaling laws are analyzed, and many practical applications are listed.

Restriction: Graduate students only.

**ENGRMAE 252P. Fundamentals of Microfabrication. 4 Units.**

Introduces engineering and science students to the science of miniaturization. Different options to make very small machines (micro and nano size) are reviewed, materials choices are discussed, scaling laws are analyzed, and many practical applications are listed.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 253. Advanced BIOMEMS Manufacturing Techniques. 4 Units.**

Introduction to BIOMEMS. Advanced biotechnology/biomedicine equipment based on MEMS and NEMS. Fundamentals of MEMS/NEMS sensing techniques and the biological and physics principles involved and the preferred MEMS and NEMS manufacturing techniques.

Restriction: Graduate students only.

Concurrent with ENGRMAE 153.

**ENGRMAE 254. Mechanics of Solids and Structures. 4 Units.**

Finite deformation kinematics; stress and strain measures; invariance in solid mechanics; objective rates; constitutive theory of elastic and inelastic solids; rate formulations; computational approaches; theories of plates and shells; applications to aerospace vehicles.

Restriction: Graduate students only.

**ENGRMAE 254P. Mechanics of Solids and Structures. 4 Units.**

Finite deformation kinematics; stress and strain measures; invariance in solid mechanics; objective rates; constitutive theory of elastic and inelastic solids; rate formulations; computational approaches; theories of plates and shells; applications to aerospace vehicles.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 255. Composite Materials and Structures. 4 Units.**

Motivation for composite materials. Different classifications according to the nature of the matrix (PMC, MMC, CMC) and the reinforcement topology (fibers, whiskers, particulates). Mechanical properties. Failure mechanisms. Designing with composite materials. Advantages and limitations of homogenization techniques for numerical modeling.

Restriction: Graduate students only.

Concurrent with ENGRMAE 155.

**ENGRMAE 256. Nanomechanics. 4 Units.**

Nanoscale materials and the experimental and computational techniques used to measure their properties. Mechanical behavior is the main focus, but other material properties such as diffusion and electron transport are discussed.

Restriction: Graduate students only.

**ENGRMAE 257P. Fabrication and Characterization of Nanomaterials . 4 Units.**

Introduction to nanoscale materials and experimental and computational techniques. Topics materials synthesis techniques, thin film deposition, nanoparticle and nanowire growth, characterization with electrons and X-rays, forces and surface interactions at the nanoscale, structure-property scaling laws, and atomistic/multiscale computer modeling.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 258. Mechanical Behavior of Solids - Continuum Theories. 4 Units.**

Presents a continuum, macroscopic view of deformation and failure of solids. Covers elasticity, plasticity, visco-elasticity, visco-plasticity, fracture and fatigue. Topics include discussions of physical behavior, mathematical formalism and measurement techniques.

Prerequisite: ENGRMAE 254

Restriction: Graduate students only.

**ENGRMAE 259. Mechanical Behavior of Solids - Atomistic Theories. 4 Units.**

Presents atomistic mechanisms that control mechanical behavior of materials. Covers plasticity, dislocation theory, strengthening mechanisms, high-temperature diffusion and grain boundary sliding, shear localization, void formation, ductile rupture, brittle fracture and fatigue.

Restriction: Graduate students only.

**ENGRMAE 259P. Mechanical Behavior of Solids - Atomistic Theories. 4 Units.**

Presents atomistic mechanisms that control mechanical behavior of materials. Covers plasticity, dislocation theory, strengthening mechanisms, high-temperature diffusion and grain boundary sliding, shear localization, void formation, ductile rupture, brittle fracture, and fatigue.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 260. Current Issues Related to Air Quality, Climate, and Energy. 4 Units.**

Current issues related to the atmosphere, climate, and air quality in the context of energy conversion and sustainability. Topics include transportation systems; building design; impacts on humans and ecosystems; modeling and meteorology; economics; and application to public policies.

Prerequisite: ENGRMAE 261 or CHEM 245 or EARTHSS 240

Same as CHEM 241.

Restriction: Graduate students only.

**ENGRMAE 270A. Linear Systems I. 4 Units.**

Input-output and state-space representations of continuous-time linear systems. State transition matrices, Controllability and observability. Irreducible realizations. State feedback and observer design.

Restriction: Graduate students only.

**ENGRMAE 270B. Linear Systems II. 4 Units.**

Advanced topics in linear systems: bases, linear operator representations, and Jordan forms. Review of dynamical systems, and stability. Time-varying systems, discrete-time representations, and multi-input/multi-output systems. Introduction to continuous and discrete time linear regulator (LQR) problems. Not offered every year.

Prerequisite: ENGRMAE 270A

Restriction: Graduate students only.

**ENGRMAE 272. Robust Control Theory. 4 Units.**

Methods for control design of systems with uncertainty. Feedback stability and small gain theorem. Multivariable stability margins and multiplier theory. H-infinity-optimal control, linear matrix inequalities. Not offered every year.

Prerequisite: ENGRMAE 270A

Restriction: Graduate students only.

**ENGRMAE 274. Optimal Control. 4 Units.**

Principles and methods of optimal control. Topics include objectives and issues in controlling nonlinear systems; linear variational and adjoint equations; optimality conditions via variational calculus, maximum principle, and dynamic programming; solution methods; applications to control robots and aerospace vehicles.

Prerequisite: ENGRMAE 200A and ENGRMAE 270A

Restriction: Graduate students only.

**ENGRMAE 275. Nonlinear Feedback Systems. 4 Units.**

Advanced tools for feedback control system analysis and synthesis. Norms, operators,  $L_p$  spaces, contraction mapping theorem, Lyapunov techniques along with their extensions. Circle criterion positivity and passivity. Applications to nonlinear control methods, such as sliding mode or adaptive techniques.

Prerequisite: ENGRMAE 270B

Restriction: Graduate students only.

**ENGRMAE 276. Geometric Nonlinear Control. 4 Units.**

Using the mathematics of differential geometry, a number of the concepts and results of linear systems theory have been extended to nonlinear systems. Describes these extensions and illustrate their use in nonlinear system analysis and design. Not offered every year.

Prerequisite: ENGRMAE 200A and ENGRMAE 270A

Restriction: Graduate students only.

**ENGRMAE 277. Learning Control Systems. 4 Units.**

Supervised learning for classification and regression: perceptrons, support vector machines, feed-forward neural networks, Gaussian processes. Generalization and model selection: cross-validation, regularization, and Bayesian methods. Unsupervised learning: clustering and dimensionality reduction. Learning control systems. Introduction to reinforcement learning.

Restriction: Graduate students only.

**ENGRMAE 278. Parameter and State Estimation. 4 Units.**

Bayesian and frequentist approaches to parameter and state estimation. Properties of estimators. Linear Gaussian systems and the Kalman Filter. Nonlinear state estimation, extended and unscented Kalman Filters. Introduction to Monte Carlo methods and particle filtering. Application to tracking and navigation.

Prerequisite: ENGRMAE 200A and ENGRMAE 270A

Restriction: Graduate students only.

**ENGRMAE 279. Special Topics in Mechanical Systems. 4 Units.**

Selected topics of current interest in mechanical systems. Topics include robotics, kinematics, control, dynamics, and geometric modeling.

Prerequisite: ENGRMAE 270A and ENGRMAE 241

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ENGRMAE 280. Design of Computer-Controlled Robots. 4 Units.**

The basic aspects of mechatronic design are covered, including motor and sensor selection, control strategies, finite state machines, inertial measurement units, and implementation of advanced feedback control laws. Students work in groups to create their own mechatronic device. Materials fee.

Restriction: Graduate students only.

Concurrent with ENGRMAE 172.

**ENGRMAE 284. Fundamentals of Experimental Design. 4 Units.**

Fundamentals and principles of statistical experimental design and analysis. Emphasis addresses understanding and use of designed experiments, response surfaces, linear regression modeling, process optimization, and development of links between empirical and theoretical models.

Restriction: Graduate students only.

Concurrent with ENGRMAE 184.

**ENGRMAE 294. Master of Science Thesis Project. 4 Units.**

Tutorial in which masters-level students taking the comprehensive examination option undertake a masters-level research project.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ENGRMAE 295. Special Topics in Mechanical and Aerospace Engineering. 1-4 Units.**

Special topics by individual faculty in major fields of interest.

Repeatability: Unlimited as topics vary.

**ENGRMAE 295P. Special Topics in Mechanical and Aerospace Engineering. 4 Units.**

Studies in selected areas of Mechanical and Aerospace Engineering. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Master of Engineering students only. Graduate students only.

**ENGRMAE 296. Master of Science Thesis Research. 1-16 Units.**

Individual research or investigation conducted in the pursuit of preparing and completing the thesis required for the M.S. in Engineering.

Repeatability: May be repeated for credit unlimited times.

**ENGRMAE 297. Doctor of Philosophy Dissertation Research. 1-16 Units.**

Individual research or investigation conducted in the pursuit of preparing and completing the dissertation required for the Ph.D. in Engineering.

Repeatability: May be repeated for credit unlimited times.

**ENGRMAE 298. Seminars in Mechanical and Aerospace Engineering. 1 Unit.**

Presentation of advanced topics and reports of current research efforts in mechanical engineering. Required of all graduate students in mechanical engineering.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**ENGRMAE 299. Individual Research. 1-16 Units.**

Individual research or investigation under the direction of an individual faculty member.

Repeatability: May be repeated for credit unlimited times.

Restriction: Consent of instructor to enroll

## Aerospace Engineering, B.S.

**Program Educational Objectives:** Graduates of the program will have the professional and scientific education that allows them to be successful as career engineers and in graduate programs. Specifically, they will be able to (1) function in professional environments in industry, government, and academia applying and building upon engineering science knowledge, problem-solving skills, and communication skills; (2) function as members of teams and in leadership roles applying ethical and inclusive standards including the AIAA code of ethics within and beyond traditional Aerospace Engineering disciplines; and (3) remain current with technology and contemporary scientific, environmental, and societal issues, and consequently improve skills and knowledge through a lifelong process of learning. (Program educational objectives are those aspects of engineering that help shape the curriculum; achievement of these objectives is a shared responsibility between the student and UCI.)

The undergraduate Aerospace Engineering curriculum includes a core of mathematics, physics, and chemistry. Engineering courses in fundamental areas constitute much of the remaining curriculum. A few technical electives allow the undergraduate student to specialize somewhat or to pursue broader understanding. A senior capstone design experience culminates the curriculum.

**High School Students:** See School admissions information.

**Transfer Students:** Preference will be given to junior-level applicants with the highest grades overall, and who have satisfactorily completed the following required courses: two years of approved calculus, one year of calculus-based physics with laboratories (mechanics, electricity and magnetism), completion of lower-division writing, one course in general chemistry (with laboratory), and one course in introductory programming. For course equivalency specific to each college, visit <http://assist.org>.

Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. Students who enroll at UCI in need of completing lower-division coursework may find that it will take longer than two years to complete their degrees. For further information, contact The Henry Samueli School of Engineering at 949-824-4334.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Major Requirements

#### Mathematics and Basic Science Courses:

CHEM 1A	General Chemistry
or ENGR 1A	General Chemistry for Engineers
CHEM 1LE	Accelerated General Chemistry Lab
MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
MATH 2D	Multivariable Calculus
MATH 2E	Multivariable Calculus
MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations
PHYSICS 7C	Classical Physics
PHYSICS 7LC	Classical Physics Laboratory
PHYSICS 7D- 7E	Classical Physics and Classical Physics
PHYSICS 7LD	Classical Physics Laboratory
PHYSICS 52A	Fundamentals of Experimental Physics

One additional General Education Category II course offered by the Schools of Physical Sciences, Biological Sciences, or Information and Computer Sciences.

**Engineering Topics Courses:**

Students must complete a minimum of 24 units of engineering design.

**Core Courses:**

ENGR 54	Principles of Materials Science and Engineering
ENGRMAE 10	Introduction to Engineering Computations
ENGRMAE 30	Statics
ENGRMAE 60 or EECS 70A	Electric Circuits Network Analysis I
ENGRMAE 80	Dynamics
ENGRMAE 91	Introduction to Thermodynamics
ENGRMAE 106	Mechanical Systems Laboratory
ENGRMAE 108	Aerospace Laboratory
ENGRMAE 112	Propulsion
ENGRMAE 130A	Introduction to Fluid Mechanics
ENGRMAE 130B	Introduction to Viscous and Compressible Flows
ENGRMAE 135	Compressible Flow
ENGRMAE 136	Aerodynamics
ENGRMAE 146	Astronautics
ENGRMAE 150	Mechanics of Structures
ENGRMAE 150L	Mechanics of Structures Laboratory
ENGRMAE 157	Lightweight Structures
ENGRMAE 158	Aircraft Performance
ENGRMAE 159	Aircraft Design
ENGRMAE 170	Introduction to Control Systems
ENGRMAE 175	Dynamics and Control of Aerospace Vehicles

**Technical Elective Courses:**

Students select a minimum of 12 units of technical electives. For students majoring in both Aerospace Engineering and Mechanical Engineering, a core course in one major cannot be counted as a technical elective in the other major. Any upper-division course in the department not used for the degree may be used as a technical elective. At least 4 units of technical electives must come from ENGRMAE upper-division courses and no more than 4 units of the technical electives should come from ENGRMAE 188, ENGRMAE 189, and ENGRMAE 199. With approval of the Undergraduate Advisor, students may choose from other departments' upper-division courses that have primarily technical content. Preapproved courses are listed on the MAE website: <http://engineering.uci.edu/files/mae-technical-electives.pdf>

**Engineering Professional Topics Course:**

ECON 20A or ECON 23	Basic Economics I Basic Economics for Engineers
ENGR 190W	Communications in the Professional World

At most an aggregate total of 4 units of 199 or H199 courses may be used to satisfy degree requirements.

(The nominal Aerospace Engineering program will require 185 units of courses to satisfy all university and major requirements. Because each student comes to UCI with a different level of preparation, the actual number of units will vary.)

Design unit values are indicated at the end of each course description. The faculty advisors and the Undergraduate Student Affairs Office can provide necessary guidance for satisfying the design requirements. Selection of elective courses must be approved by the student's faculty advisor and the departmental undergraduate advisor.

Freshman		
Fall	Winter	Spring
MATH 2A	MATH 2B	MATH 2D
ENGRMAE 10	PHYSICS 7C	PHYSICS 7D

ENGRMAE 170	Technical Elective *	Technical Elective
General Education	General Education	General Education

\*ENGR 7A-ENGR 7B is a technical elective, available only to lower-division students in Fall and Winter quarters. Both ENGR 7A and ENGR 7B must be taken to count as a technical elective. If ENGR 7A-ENGR 7B is taken, this will replace one technical elective course in the senior year.

The sample program of study chart shown is typical for the major in Aerospace Engineering. This program is based upon a set of prerequisites, beginning with adequate preparation in high school mathematics, physics, and chemistry. Students should consult with their academic counselor to structure their program of study. Aerospace Engineering majors are encouraged to consult with academic counselors as needed, and students who are academically at risk are mandated to see a counselor as frequently as deemed necessary by the advising staff.

## Mechanical and Aerospace Engineering, M.S.

The Mechanical and Aerospace Engineering faculty have special interest and expertise in five thrust areas: continuum mechanics; power, propulsion, and environment; micro/nanomechanics; and systems and design.

Continuum mechanics faculty study the physics of fluids, physics and chemistry of solids, and structural mechanics. Areas of emphasis in fluid mechanics include incompressible and compressible turbulent flows, multiphase flows, chemically reacting and other nonequilibrium flows, aeroacoustics, aerodynamics, and fluid-solid interaction. In the field of solid mechanics, research and course work emphasize theoretical and computational approaches which contribute to a basic understanding of and new insight into the properties and behavior of condensed matter. General areas of interest are large-strain and large-rotation inelastic solids, constitutive modeling, and fracture mechanics. Computational algorithms center on boundary element methods and the new class of meshless methods. Studies in structural mechanics involve the analysis and synthesis of low-mass structures, smart structures, and engineered materials, with emphasis on stiffness, stability, toughness, damage tolerance, longevity, optimal life-cycle costs and self-adaptivity.

Research in power, propulsion, and environment encompasses aerospace propulsion, combustion and thermophysics, fuel cell technologies, and atmospheric physics and impacts. In aerospace propulsion, particular emphasis is placed in the areas of turbomachinery, spray combustion, combustion instability, innovative engine cycles, and compressible turbulent mixing. The topic of combustion and thermophysics addresses the fundamental fluid-dynamical, heat-transfer, and chemical mechanisms governing combustion in diverse settings. Fuel-cell research encompasses the development of fuel-cell technology, hybrid engines, and thermionic devices. Activities cover the thermodynamics of energy systems, the controls associated with advanced energy systems, and systems analyses. The area of atmospheric physics and impacts deals with the modeling and controlling of chemical pollution, particle dispersion, and noise emission caused by energy-generation and propulsion devices. Research on atmospheric turbulence addresses the energy exchanges between the Earth's land and ocean surfaces and the overlying atmosphere. Micro/nanomechanics encompasses the thrusts of miniaturization engineering, mechatronics, and biotechnology. Miniaturization engineering is relevant to the development of small-scale mechanical, chemical and biological systems for applications in biotechnology, automotive, robotic, and alternative energy applications. It involves the establishment of scaling laws, manufacturing methods, materials options and modeling from the atom to the macrosystem. Mechatronic design is the integrated and optimal design of a mechanical system and its embedded control system. Main focus research is the design, modeling, and characterization of Micro-Electro-Mechanical Systems (MEMS). Particular emphasis is placed on analysis and design of algorithmic methods and physical systems that realize sensor-based motion planning. The thematic area of biotechnology involves the understanding, modeling, and application of fundamental phenomena in mechanical engineering, electrical engineering, and chemistry towards the development of bio-sensors and actuators.

Systems and design research is conducted in the areas of dynamic systems optimization and control, biomechanical engineering, robotics and machine learning, and design engineering. Advanced concepts in dynamics, optimization and control are applied to the areas of biorobotics, flight trajectory design, guidance and navigation, learning systems, micro sensors and actuators, flexible structures, combustion, fuel cells, and fluid-optical interactions.

Biomechanical engineering integrates physiology with engineering in order to develop innovative devices and algorithms for medical diagnosis and treatment. The focus of robotics and machine learning is the creation of machines with human-like intelligence capabilities for learning. Faculty in

design engineering develop methodologies to address issues ranging from defining the size and shape of components needed for force and motion specifications, to characterizing performance in terms of design parameters, cost and complexity.

Aerospace engineering research efforts combine specialties from each of the four thrust areas toward the design, modeling, and operation of complex aerospace systems.

Two plans are available to pursue study toward the M.S.: a thesis option and a comprehensive examination option. Opportunities are available for part-time study toward the M.S. The Plan of Study for both options must be developed in consultation with a Faculty Advisor and approved by the Department Graduate Advisor. Opportunities to pursue teaching experiences and to take a course to develop teaching excellence are also offered, and may be integrated into your plan of study.

### **Plan I: Thesis Option**

The thesis option requires completion of eight graduate, technical and science courses; the completion of an original research project with a Faculty Advisor, the writing of the thesis describing it; and approval of the thesis by a thesis committee. This plan is available for those who wish to gain research experience or as preparation for study toward the doctoral degree. Students must complete 12 units of ENGRMAE 296, 3 units of ENGRMAE 298, and four graduate courses from a restricted list in the selected major. Additionally, four of the eight required graduate courses must be from the MAE Department. With the approval of the graduate advisor, one non-core graduate course may be replaced by an upper-division undergraduate course in MAE; this course may not have been used to satisfy the undergraduate degree requirements.

### **Plan II: Comprehensive Examination Option**

The comprehensive examination option requires completion of eleven graduate, technical and science courses, plus a comprehensive exam. Students must complete 3 units of ENGRMAE 298 and four graduate courses from a restricted list. Additionally, six of the eleven required graduate courses must be from the MAE Department. Up to two of the required courses may be replaced by an equivalent number of units of ENGRMAE 294, which includes execution and documentation of a research or design project under a faculty advisor. With the approval of the graduate advisor, one graduate course may be replaced by an upper-division undergraduate course in MAE; this course may not be used to satisfy both undergraduate and graduate degree requirements. Consult the MAE Department (<http://mae.eng.uci.edu/>) website (<http://mae.eng.uci.edu/>) or Graduate Advisor, for detailed information on the comprehensive exam.

## **Mechanical and Aerospace Engineering, Ph.D.**

The Mechanical and Aerospace Engineering faculty have special interest and expertise in five thrust areas: continuum mechanics; power, propulsion, and environment; micro/nanomechanics; and systems and design.

Continuum mechanics faculty study the physics of fluids, physics and chemistry of solids, and structural mechanics. Areas of emphasis in fluid mechanics include incompressible and compressible turbulent flows, multiphase flows, chemically reacting and other nonequilibrium flows, aeroacoustics, aerodynamics, and fluid-solid interaction. In the field of solid mechanics, research and course work emphasize theoretical and computational approaches which contribute to a basic understanding of and new insight into the properties and behavior of condensed matter. General areas of interest are large-strain and large-rotation inelastic solids, constitutive modeling, and fracture mechanics. Computational algorithms center on boundary element methods and the new class of meshless methods. Studies in structural mechanics involve the analysis and synthesis of low-mass structures, smart structures, and engineered materials, with emphasis on stiffness, stability, toughness, damage tolerance, longevity, optimal life-cycle costs and self-adaptivity.

Research in power, propulsion, and environment encompasses aerospace propulsion, combustion and thermophysics, fuel cell technologies, and atmospheric physics and impacts. In aerospace propulsion, particular emphasis is placed in the areas of turbomachinery, spray combustion, combustion instability, innovative engine cycles, and compressible turbulent mixing. The topic of combustion and thermophysics addresses the fundamental fluid-dynamical, heat-transfer, and chemical mechanisms governing combustion in diverse settings. Fuel cell research encompasses the development of fuel-cell technology, hybrid engines, and thermionic devices. Activities cover the thermodynamics of energy systems, the controls associated with advanced energy systems, and systems analyses. The area of atmospheric physics and impacts deals with the modeling and controlling of chemical pollution, particle dispersion, and noise emission caused by energy-generation and propulsion devices. Research on atmospheric turbulence addresses the energy exchanges between the Earth's land and ocean surfaces and the overlying atmosphere. Micro/nanomechanics encompasses the thrusts of miniaturization engineering, mechatronics, and biotechnology. Miniaturization engineering is relevant to the development of small-scale mechanical, chemical and biological systems for applications in biotechnology, automotive, robotic, and alternative energy applications. It involves the establishment of scaling laws, manufacturing methods, materials options and modeling from the atom to the macrosystem. Mechatronic design is the integrated and optimal design of a mechanical system and its embedded control system. Main focus research is the design, modeling, and characterization of Micro Electro Mechanical Systems (MEMS). Particular emphasis is placed on analysis and design of algorithmic methods and physical systems that realize sensor-based motion planning. The thematic area of biotechnology involves the understanding, modeling, and application of fundamental phenomena in mechanical engineering, electrical engineering, and chemistry towards the development of bio-sensors and actuators.

Systems and design research is conducted in the areas of dynamic systems optimization and control, biomechanical engineering, robotics and machine learning, and design engineering. Advanced concepts in dynamics, optimization and control are applied to the areas of biorobotics, flight trajectory design, guidance and navigation, learning systems, micro sensors and actuators, flexible structures, combustion, fuel cells, and fluid-optical interactions.

Biomechanical engineering integrates physiology with engineering in order to develop innovative devices and algorithms for medical diagnosis and treatment. The focus of robotics and machine learning is the creation of machines with human-like intelligence capabilities for learning. Faculty in design engineering develop methodologies to address issues ranging from defining the size and shape of components needed for force and motion specifications, to characterizing performance in terms of design parameters, cost and complexity.

Aerospace engineering research efforts combine specialties from each of the five thrust areas toward the design, modeling, and operation of complex aerospace systems.

The doctoral program in Mechanical and Aerospace Engineering is tailored to the individual needs and background of the student. The detailed program of study for each Ph.D. student is formulated in consultation with a faculty advisor who takes into consideration the objectives and preparation of the candidate.

Within this flexible framework the Department maintains specific guidelines that outline the milestones of a typical doctoral program. All doctoral students should consult the Departmental Ph.D. guidelines for program details, but there are several milestones to be passed: admission to the Ph.D. program by the faculty; completion of three non-research graduate, technical courses beyond M.S. degree requirements; passage of a preliminary examination or similar assessment of the student's background and potential for success in the doctoral program; course work; meeting departmental teaching requirements, which can be satisfied through service as a teaching assistant or equivalent; research preparation; formal advancement to candidacy in the third year (second year for students who entered with a master's degree) through a qualifying examination conducted on behalf of the Irvine division of the Academic Senate, which includes the development of a research proposal; completion of a significant research investigation, and completion and defense of an acceptable dissertation. There is no foreign language requirement. The degree is granted upon the recommendation of the Doctoral Committee and the Dean of Graduate Studies. Students enrolled in the Ph.D. program must take a full-time load (minimum of 12 units). The normative time for completion of the Ph.D. is five years (four years for students who entered with a master's degree). The maximum time permitted is seven years. Before seeking admission, Ph.D. applicants are encouraged to communicate directly and in some detail with prospective faculty sponsors. The student's objectives and financial resources must coincide with a faculty sponsor's research interests and research support. Financial aid in the form of a teaching assistantship or fellowship may not cover the period of several years required to complete the program. During the balance of the period the student will be in close collaboration with the faculty research advisor.

## Mechanical Engineering, B.S.

**Program Educational Objectives:** Graduates of the program will have the professional and scientific education that allows them to be successful as career engineers and in graduate programs. Specifically, they will be able to (1) function in professional environments in industry, government, and academia applying and building upon engineering science knowledge, problem-solving skills, and communication skills; (2) function as members of teams and in leadership roles applying ethical and inclusive standards including the ASME code of ethics within and beyond traditional Mechanical Engineering disciplines; and (3) remain current with technology and contemporary scientific, environmental and societal issues, and consequently improve skills and knowledge through a lifelong process of learning. (Program educational objectives are those aspects of engineering that help shape the curriculum; achievement of these objectives is a shared responsibility between the student and UCI.)

The undergraduate Mechanical Engineering curriculum includes a foundation of mathematics, physics, and chemistry. Engineering courses in fundamental areas constitute much of the remaining curriculum. A few technical electives allow undergraduate students to specialize in Aerospace Engineering, Energy Systems and Environmental Engineering, Flow Physics and Propulsion Systems, and Design of Mechanical Systems or to pursue broader understanding in these areas. A senior capstone design experience culminates the curriculum.

**High School Students:** See School Admissions information.

**Transfer Students:** Preference will be given to junior-level applicants with the highest grades overall, and who have satisfactorily completed the following required courses: two years of approved calculus, one year of calculus-based physics with laboratories (mechanics, electricity and magnetism), completion of lower-division writing, one course in general chemistry (with laboratory), and one course in introductory programming.

Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. Students who enroll at UCI in need of completing lower-division coursework may find that it will take longer than two years to complete their degrees. #### Mathematics and Basic Science Courses:

CHEM 1A or ENGR 1A	General Chemistry General Chemistry for Engineers
CHEM 1LE	Accelerated General Chemistry Lab
MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
MATH 2D	Multivariable Calculus

MATH 2E	Multivariable Calculus
MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations
PHYSICS 7C	Classical Physics
PHYSICS 7LC	Classical Physics Laboratory
PHYSICS 7D- 7E	Classical Physics and Classical Physics
PHYSICS 7LD	Classical Physics Laboratory
PHYSICS 52A	Fundamentals of Experimental Physics
One additional General Education Category II course offered by the Schools of Physical Sciences, Biological Sciences, or Information and Computer Sciences.	

**Engineering Topics Courses:**

Students must complete a minimum of 24 units of engineering design.

**Core Courses:**

ENGR 54	Principles of Materials Science and Engineering
ENGRMAE 10	Introduction to Engineering Computations
ENGRMAE 30	Statics
ENGRMAE 52	Computer-Aided Design
ENGRMAE 60	Electric Circuits
or EECS 70A	Network Analysis I
ENGRMAE 80	Dynamics
ENGRMAE 91	Introduction to Thermodynamics
ENGRMAE 106	Mechanical Systems Laboratory
ENGRMAE 107	Fluid Thermal Science Laboratory
ENGRMAE 112	Propulsion
or ENGRMAE 115	Applied Engineering Thermodynamics
ENGRMAE 120	Heat and Mass Transfer
ENGRMAE 130A	Introduction to Fluid Mechanics
ENGRMAE 130B	Introduction to Viscous and Compressible Flows
ENGRMAE 145	Theory of Machines and Mechanisms
ENGRMAE 147	Vibrations
ENGRMAE 150	Mechanics of Structures
ENGRMAE 150L	Mechanics of Structures Laboratory
ENGRMAE 151	Mechanical Engineering Design
ENGRMAE 155	Composite Materials and Structures
or ENGRMAE 156	Mechanical Behavior and Design Principles
or ENGRMAE 157	Lightweight Structures
ENGRMAE 170	Introduction to Control Systems
ENGRMAE 189	Senior Project - Special Topics (minimum of 3 units)

**Technical Elective Courses:**

Students select a minimum of 16 units of technical electives. For students majoring in both Aerospace Engineering and Mechanical Engineering, a core course in one major cannot be counted as a technical elective in the other major. Any upper-division course in the department not used for the degree may be used as a technical elective. At least 8 units of the technical electives must come from ENGRMAE upper-division courses other than project-based courses ENGRMAE 188, ENGRMAE 189, and ENGRMAE 199. With approval of the Undergraduate Advisor, students may choose any remaining technical elective units from other departments' upper-division courses that have primarily technical content. Preapproved courses from other departments are listed on the MAE website: <http://engineering.uci.edu/files/mae-technical-electives.pdf>

**Engineering Professional Topics Course:**

ECON 20A	Basic Economics I
or ECON 23	Basic Economics for Engineers
ENGR 190W	Communications in the Professional World

At most an aggregate total of 4 units of 199 or H199 courses may be used to satisfy degree requirements.

(The nominal Mechanical Engineering program will require 188 units of courses to satisfy all university and major requirements. Because each student comes to UCI with a different level of preparation, the actual number of units will vary.)

### Specialization in Aerospace Engineering:

Completion of a Senior Design Project in this area, and

select two of the following:

ENGRMAE 112	Propulsion
ENGRMAE 135	Compressible Flow
ENGRMAE 136	Aerodynamics
ENGRMAE 158	Aircraft Performance
ENGRMAE 159	Aircraft Design
ENGRMAE 175	Dynamics and Control of Aerospace Vehicles

### Specialization in Energy Systems and Environmental Engineering:

Completion of a Senior Design Project in this area, and

select two of the following:

ENGRMAE 110	Combustion and Fuel Cell Systems
ENGRMAE 112	Propulsion
ENGRMAE 114	Fuel Cell Fundamentals and Technology
ENGRMAE 115	Applied Engineering Thermodynamics
ENGRMAE 117	Solar and Renewable Energy Systems
ENGRMAE 118	Sustainable Energy Systems
ENGRMAE 164	Air Pollution and Control

### Specialization in Flow Physics and Propulsion Systems:

Completion of a Senior Design Project in this area, and

select two of the following:

ENGRMAE 110	Combustion and Fuel Cell Systems
ENGRMAE 112	Propulsion
ENGRMAE 113	Electric Propulsion
ENGRMAE 132	Computational Fluid Dynamics
ENGRMAE 135	Compressible Flow

### Specialization in Design of Mechanical Systems:

Completion of a Senior Design Project in this area, and

select two of the following:

ENGR 165	Advanced Manufacturing
ENGRMAE 152	Introduction to Computer-Aided Engineering
ENGRMAE 171	Digital Control Systems
ENGRMAE 172	Design of Computer-Controlled Robots
ENGRMAE 183	Computer-Aided Mechanism Design
ENGRMAE 188	Engineering Design in Industry

Design unit values are indicated at the end of each course description. The faculty advisors and the Student Affairs Office can provide necessary guidance for satisfying the design requirements. Selection of elective courses must be approved by the student's faculty advisor and the departmental undergraduate advisor.

#### Freshman

Fall	Winter	Spring
MATH 2A	MATH 2B	MATH 2D
ENGRMAE 10	PHYSICS 7C	PHYSICS 7D
CHEM 1A or ENGR 1A	PHYSICS 7LC	PHYSICS 7LD
ENGR 7A*	CHEM 1LE	Basic Science
General Education	ENGR 7B*	
	General Education	

#### Sophomore

Fall	Winter	Spring
MATH 3A	MATH 3D	MATH 2E
PHYSICS 7E	ENGR 54	ENGRMAE 52

PHYSICS 52A	ENGRMAE 60	ENGRMAE 91
ENGRMAE 30	ENGRMAE 80	ECON 23 or 20A
General Education		

Junior		
Fall	Winter	Spring
ENGRMAE 115 or 112	ENGRMAE 130B	ENGRMAE 106
ENGRMAE 130A	ENGRMAE 147	ENGRMAE 120
ENGRMAE 150	General Education	ENGRMAE 145
ENGRMAE 150L	ENGRMAE 155, 156, or 157	General Education
ENGR 190W		
Senior		
Fall	Winter	Spring
ENGRMAE 107	ENGRMAE 151	ENGRMAE 189 (1 unit)
ENGRMAE 170	ENGRMAE 189 (1 unit)	Technical Elective
ENGRMAE 189 (1 unit)	Technical Elective *	Technical Elective
General Education	Technical Elective	General Education
	General Education	

\*ENGR 7A-ENGR 7B is a technical elective, available only to lower-division students in Fall and Winter quarters. Both ENGR 7A & ENGR 7B must be taken to count as a technical elective. If ENGR 7A-ENGR 7B is taken, this will replace one technical elective course in the senior year.

The sample program of study chart shown is typical for the accredited major in Mechanical Engineering. Students should keep in mind that this program is based upon a rigid set of prerequisites, beginning with adequate preparation in high school mathematics, physics, and chemistry. Students should consult with their academic counselor to structure their program of study. Mechanical Engineering majors are encouraged to consult with academic counselors as needed, and students who are academically at risk are mandated to see a counselor as frequently as deemed necessary by the advising staff.

Students can dual major in Mechanical Engineering and Aerospace Engineering by satisfying the degree requirements for both majors.

## Engineering Management, M.S.

John C. LaRue, **Professor of Mechanical and Aerospace Engineering, The Henry Samueli School of Engineering**

Joanna Ho, **Professor and Associate Dean of Masters Programs, The Paul Merage School of Business**

204 Rockwell Engineering Center; 949-824-8090

<http://www.eng.uci.edu/admissions/graduate/programs-and-concentrations/engineering-management> (<http://www.eng.uci.edu/admissions/graduate/programs-and-concentrations/engineering-management/>)

The Master of Science in Engineering Management is a graduate degree jointly offered by The Paul Merage School of Business and The Henry Samueli School of Engineering that will prepare engineers for leadership roles in technology, science, government, and engineering-based companies and organizations. The curriculum includes courses in engineering from The Henry Samueli School of Engineering and courses in business administration from The Paul Merage School of Business. Students will emerge as innovators by taking on the role of business and engineering project managers tasked with solving complex engineering product development challenges through consulting projects, business plans, and exposure to current issues within the engineering sector. Through this process, quantitative and qualitative skills along with business communication skills will be developed.

This competitive major teaches business from the engineering perspective and engineering from the business perspective, and students will learn to think about their work through the lens of innovation and to develop a crucial view to enhance their careers.

Applicants apply directly to The Samueli School for the M.S. in Engineering Management. Applicants must meet any applicable prerequisite requirements for the specific engineering specialization they wish to pursue. Admission to graduate standing in The Samueli School of Engineering is generally accorded to those possessing at least a B.S. in engineering or an allied field obtained with an acceptable level of scholarship from an institution of recognized standing. Those seeking admission without the prerequisite scholarship record may, in some cases, undertake remedial work; if completed at the stipulated academic level, they will be considered for admission. Those admitted from an allied field may be required to take supplementary upper-division courses in basic engineering subjects.

The Samueli and Merage Schools will evaluate applicants on their prior academic record and their potential for management and leadership as demonstrated in submitted application materials including work experience and in an interview. These materials will include university transcripts, GRE test scores, letters of recommendation, and a Statement of Purpose. Competitive applicants will be interviewed by the Merage School.

### Master of Science Degree: Plan II: Comprehensive Exam Option

The M.S. degree requires the completion of designated course work which corresponds to a minimum of 17 courses beyond the bachelor's degree. As part of the program, students must complete a two-week orientation and an intensive course in early to mid-September preceding the fall quarter which presents fundamental concepts of management to initiate students into the concrete challenges that managers in high-performing organizations typically confront.

## Core Requirements

Due to the interdisciplinary nature of this degree, it is important to establish a common foundation in Engineering Management for students from various backgrounds. This foundation is sufficiently covered in Engineering Management courses that are listed below and that deal with the following topics:

ENGR 280	Entrepreneurship for Scientists and Engineers
MGMTMBA 200	Thinking Strategically in the Digital Age
MGMTMBA 211	MBA Proseminar (3 quarters)
MGMTMBA 298	Merage Consulting Projects (or equivalent)

Plus, a departmental seminar based on specialization area, for example:

BME 298	Seminars in Biomedical Engineering
CBE 298	Seminars in Engineering
EECS 294	Electrical Engineering and Computer Science Colloquium
ENGRCEE 295	Seminars in Engineering
ENGRMAE 298	Seminars in Mechanical and Aerospace Engineering

## Electives

**Business.** In addition to the core courses listed above, at least five additional courses from The Merage School of Business are required. (Students will be recommended certain classes based on career tracks they plan to pursue.)

- Three Merage School M.B.A. core courses;
- Two additional courses from a selected group of either core or elective courses.

### M.B.A. Courses

#### Core:

MGMTMBA 201A	Business Analytics: Decision-Making
MGMTMBA 201B	Management Science
MGMTMBA 202	Organizational Leadership for Management
MGMTMBA 203A	Financial Reporting
MGMTMBA 203B	Driving Profitability Through Management Accounting
MGMTMBA 204A	Microeconomics for Management in the Digital Age
MGMTMBA 204B	Macroeconomics for Management
MGMTMBA 205	Marketing Principles
MGMTMBA 207	Competing with Digital: Technology, Analytics, and Platforms
MGMTMBA 208	Operational Excellence: Processes, Models, and Analytics
MGMTMBA 209A	Managerial Finance
MGMTMBA 210	Strategy: Foundations and Dynamics

#### Electives:

Refer to the Business School section of the Catalogue for a list of current M.B.A. electives.

**Engineering.** In addition to the core courses listed above, at least five courses from The Samueli School are required. (Students will be recommended certain classes based on career tracks they plan to pursue.)

- Three courses from a chosen primary specialization in Engineering: Biomedical Engineering, Chemical and Biomolecular Engineering, Civil Engineering, Electrical and Computer Engineering, Materials Science and Engineering, or Mechanical and Aerospace Engineering;
- Two additional elective courses chosen from the primary specialization, from another specialization, or from other courses within or outside The Samueli School as approved by the Director or Director-Elect.

## Approved Specialization Courses

### Biomedical Engineering:

BME 210	Molecular and Cellular Engineering
BME 213	Systems Cell and Developmental Biology
BME 220	Sensory Motor Systems
BME 221	Organ Transport Systems
BME 230A	Applied Engineering Mathematics I
BME 230B	Applied Engineering Mathematics II

BME 233	Dynamic Systems in Biology and Medicine
BME 251	Engineering Medical Optics
BME 260	Microfluids and Lab-On-A-Chip
BME 262	Microimplants
<b>Chemical and Biomolecular Engineering:</b>	
CBE 249	Special Topics in Chemical Engineering
CBE 261	Molecular Biotechnology
CBE 263	Kinetics of Biochemical Networks
CBE 264	Drug Delivery
CBE 276	Nuclear and Radiochemistry
CBE 282	Colloid Science and Engineering
CBE 288	Optoelectronics Packaging
MSE 241	Nano-Scale Materials and Applications
<b>Civil Engineering:</b>	
ENGRCEE 220A	Travel Demand Analysis I
ENGRCEE 221A	Transportation Systems Analysis I
ENGRCEE 225B	Transportation Planning Models II
ENGRCEE 229A	Traffic Systems Operations and Control I
ENGRCEE 249	Earthquake Engineering
ENGRCEE 250	Finite Element Method in Structural Engineering
ENGRCEE 258	Earthquake Resistant Structural Design
ENGRCEE 262	Environmental Chemistry II
ENGRCEE 263	Advanced Biological Treatment Processes
ENGRCEE 264	Carbon and Energy Footprint Analysis
ENGRCEE 265	Physical-Chemical Treatment Processes
ENGRCEE 266	Drinking Water and Wastewater Biotechnology
ENGRCEE 272	Groundwater Hydrology
ENGRCEE 273	Watershed Modeling
ENGRCEE 276	Hydrology
ENGRCEE 281	Structural Reliability
<b>Electrical and Computer Engineering:</b>	
EECS 202A	Principles of Imaging
EECS 203A	Digital Image Processing
EECS 211	Advanced System Software
EECS 213	Computer Architecture
EECS 215	Design and Analysis of Algorithms
EECS 217	VLSI System Design
EECS 221	Topics in Computer Engineering
EECS 222	Embedded System Modeling
EECS 225	Embedded Systems Design
EECS 230	Energy Efficiency
EECS 241A	Digital Communications I
EECS 248A	Computer and Communication Networks
EECS 250	Digital Signal Processing I
EECS 261A	Linear Optimization Methods
EECS 267A	Industrial and Power Electronics
EECS 277C	Nanotechnology
EECS 278	Micro-System Design
EECS 279	Micro-Sensors and Actuators
<b>Materials Science and Engineering:</b>	
CBE 264	Drug Delivery
EECS 277C	Nanotechnology

MSE 200	Crystalline Solids: Structure, Imperfections, and Properties
MSE 241	Nano-Scale Materials and Applications
MSE 249	Special Topics in Materials Science and Engineering
ENGRMAE 252	Fundamentals of Microfabrication
MSE 254	Polymer Science and Engineering
MSE 255A	Design with Ceramic Materials
MSE 256A	Mechanical Behavior of Engineering Materials
<b>Mechanical and Aerospace Engineering:</b>	
ENGRMAE 207	Methods of Computer Modeling in Engineering and the Sciences
ENGRMAE 212	Engineering Electrochemistry: Fundamentals and Applications
ENGRMAE 218	Sustainable Energy Systems
ENGRMAE 242	Robotics
ENGRMAE 247	Micro-System Design
ENGRMAE 249	Micro-Sensors and Actuators
ENGRMAE 250	Biorobotics
ENGRMAE 252	Fundamentals of Microfabrication
ENGRMAE 253	Advanced BIOMEMS Manufacturing Techniques
ENGRMAE 259	Mechanical Behavior of Solids - Atomistic Theories
ENGRMAE 270A	Linear Systems I
ENGRMAE 274	Optimal Control

## Engineering, B.S.

The Henry Samueli School of Engineering offers a general undergraduate major in Engineering to upper-division students who wish to pursue broad multidisciplinary programs of study or who wish to focus on a special area not offered in the six departments. Examples of other areas that may be of interest are biochemical engineering, electromechanical engineering, project management, or hydrology. The program of study in any area, aside from the established specializations, is determined in consultation with a faculty advisor.

Faculty in the Departments of Biomedical Engineering, Chemical and Biomolecular Engineering, Civil and Environmental Engineering, Electrical Engineering and Computer Science, Materials Science and Engineering, and Mechanical and Aerospace Engineering also teach courses in the major in Engineering program.

The general major in Engineering is only open to junior-standing students who have completed the required lower-division courses with a high level of achievement. Freshmen are not eligible to apply for this major. The sequential nature of the Engineering program and the fact that many courses are offered only once a year make it beneficial for students to begin their studies in the fall quarter.

**Transfer Students:** The general Engineering major is a specialized program for students who are seeking careers in areas other than traditional engineering disciplines and is open to upper-division students only. Preference will be given to junior-level applicants with the highest grades overall, and who have satisfactorily completed the following **required** courses: one year of approved calculus, one year of calculus-based physics with laboratories (mechanics, electricity and magnetism), one course in computational methods (e.g., C, C++), and one year of general chemistry (with laboratory).

Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. Students who enroll at UCI in need of completing lower-division coursework may find that it will take longer than two years to complete their degrees. For further information, contact The Henry Samueli School of Engineering at 949-824-4334.

Credit for at least 180 units, and no more than 196 units. All courses must be approved by a faculty advisor and the Associate Dean of Student Affairs prior to enrollment in the program.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Major Requirements

**Mathematics and Basic Science Courses:** MATH 2A-MATH 2B-MATH 2D, MATH 2E, MATH 3A, and MATH 3D. PHYSICS 7C, PHYSICS 7LC, PHYSICS 7D, and PHYSICS 7LD. With the approval of a faculty advisor and the Associate Dean, students select all additional Mathematics and Basic Science courses.

**Engineering Topics Courses:** ENGRMAE 10 or equivalent. With the approval of a faculty advisor and the Associate Dean, students select all additional Engineering Topics courses.

Design unit values are indicated at the end of each course description. The faculty advisors and the Student Affairs Office can provide necessary guidance for satisfying the design requirements.

Students should keep in mind that the program for the major in Engineering is based upon a rigid set of prerequisites, beginning with adequate preparation in high school mathematics, physics, and chemistry. Therefore, the course sequence should not be changed except for the most compelling reasons. Students must have their programs approved by an academic counselor in Engineering. A sample program of study is available in the Student Affairs Office.

## Engineering, M.S. (Concentration in Materials and Manufacturing Technology)

**Lorenzo Valdevit, Director and Graduate Advisor**

204 Rockwell Engineering Center; 949-824-8090

<http://engineering.uci.edu/interdisciplinary-graduate-programs/materials-and-manufacturing-technology> (<http://engineering.uci.edu/interdisciplinary-graduate-programs/materials-and-manufacturing-technology/>)

Materials and Manufacturing Technology (MMT) is concerned with the generation and application of knowledge relating the composition, structure, and processing of materials to their properties and applications, as well as the manufacturing technologies needed for production. During the past two decades, MMT has become an important component of modern engineering education, partly because of the increased level of sophistication required of engineering materials in a rapidly changing technological society, and partly because the selection of materials has increasingly become an integral part of almost every modern engineering design. In fact, further improvements in design are now viewed more and more as primarily materials and manufacturing issues. Both the development of new materials and the understanding of present-day materials demand a thorough knowledge of basic engineering and scientific principles including, for example, crystal structure, mechanics, mechanical behavior, electronic, optical and magnetic properties, thermodynamics, phase equilibria, heat transfer, diffusion, and the physics and chemistry of solids and chemical reactions.

The field of MMT ranks high on the list of top careers for scientists and engineers. The services of these engineers and scientists are required in a variety of engineering operations dealing, for example, with design of semiconductors and optoelectronic devices, development of new technologies based on composites and high-temperature materials, biomedical products, performance (quality, reliability, safety, energy efficiency) in automobile and aircraft components, improvement in nondestructive testing techniques, corrosion behavior in refineries, radiation damage in nuclear power plants, fabrication of steels, and construction of highways and bridges.

Subjects of interest in Materials and Manufacturing Technology cover a wide spectrum, ranging from metals, optical and electronic materials to superconductive materials, ceramics, advanced composites, and biomaterials. In addition, the emerging new research and technological areas in materials are in many cases interdisciplinary. Accordingly, the principal objective of the graduate curriculum is to integrate a student's area of emphasis—whether it be chemical processing and production, electronic and photonic materials and devices, electronic manufacturing and packaging, or materials engineering—into the whole of materials and manufacturing technology. Such integration will increase familiarity with other disciplines and provide students with the breadth they need to face the challenges of current and future technology.

Students with a bachelor's degree may pursue either the M.S. or Ph.D. in Engineering with a concentration in Materials and Manufacturing Technology (MMT). If students choose to enter the Ph.D. program directly, it is a requirement that they earn an M.S. along the way toward the completion of their Ph.D.

Given the nature of Materials and Manufacturing Technology as an interdisciplinary program, students having a background and suitable training in either Materials, Engineering (Biomedical, Civil, Chemical, Electrical, and Mechanical), or the Physical Sciences (Physics, Chemistry, Geology) are encouraged to participate. Recommended background courses include an introduction to materials, thermodynamics, mechanical properties, and electrical/optical/magnetic properties. A student with an insufficient background may be required to take remedial undergraduate courses following matriculation as a graduate student.

### Core Requirements

Because of the interdepartmental nature of the concentration, it is important to establish a common foundation in Materials and Manufacturing Technology (MMT) for students from various backgrounds. This foundation is sufficiently covered in MMT courses that are listed below and that deal with the following topics: MSE 200 Crystalline Solids: Structure, Imperfections, and Properties; ENGRMAE 252 Fundamentals of Microfabrication or ENGR 265 Advanced Manufacturing; ENGRMAE 259 Mechanical Behavior of Solids - Atomistic Theories. Core courses must be completed with a grade of B (3.0) or better.

### Electives

Electives are grouped into four areas of emphasis.

#### Chemical Processing and Production:

CHEM 213	Chemical Kinetics
CBE 200	Applied Engineering Mathematics I
CBE 210	Reaction Engineering

CBE 220A	Transport Phenomena I
CBE 240	Advanced Engineering Thermodynamics
ENGRCEE 262	Environmental Chemistry II
ENGRCEE 265	Physical-Chemical Treatment Processes
ENGRCEE 266	Drinking Water and Wastewater Biotechnology
ENGRCEE 276	Hydrology
<b>Electronic and Photonic Materials and Devices:</b>	
BME 210	Molecular and Cellular Engineering
BME 225	Tissue and Organ Biophotonics
BME 251	Engineering Medical Optics
CHEM 242A	Physical and Geometrical Optics
EECS 174	Semiconductor Devices
EECS 176	Fundamentals of Solid-State Electronics and Materials
EECS 188	Optical Electronics
EECS 277A	Advanced Semiconductor Devices I
EECS 277B	Advanced Semiconductor Devices II
EECS 277C	Nanotechnology
EECS 285A	Optical Communications
EECS 285B	Lasers and Photonics
EECS 280A	Advanced Engineering Electromagnetics I
EECS 280B	Advanced Engineering Electromagnetics II
ENGRMAE 220	Conduction Heat Transfer
ENGRMAE 221	Convective Heat and Mass Transfer
<b>Biomedical and Electronic Manufacturing:</b>	
BME 222	Biofluid Mechanics
BME 251	Engineering Medical Optics
BME 260	Microfluids and Lab-On-A-Chip
BME 262	Microimplants
CBE 288	Optoelectronics Packaging
EECS 279/ENGRMAE 249	Micro-Sensors and Actuators
ENGRMAE 212	Engineering Electrochemistry: Fundamentals and Applications
ENGRMAE 242	Robotics
ENGRMAE 247/EECS 278	Micro-System Design
ENGRMAE 250	Biorobotics
ENGRMAE 253	Advanced BIOMEMS Manufacturing Techniques
<b>Materials Engineering:</b>	
CHEM 225	Polymer Chemistry: Synthesis and Characterization of Polymers
MSE 241	Nano-Scale Materials and Applications
ENGRCEE 242	Advanced Strength of Materials
ENGRCEE 243	Mechanics of Composite Materials
ENGRCEE 254	Advanced Reinforced Concrete Behavior and Design
ENGRCEE 255	Advanced Behavior and Design of Steel Structures
ENGRMAE 212	Engineering Electrochemistry: Fundamentals and Applications
ENGRMAE 224	Advanced Transport Phenomena
ENGRMAE 230A	Inviscid Incompressible Fluid Mechanics I
ENGRMAE 230B	Viscous Incompressible Fluid Mechanics II
ENGRMAE 230C	Compressible Fluid Dynamics
ENGRMAE 254	Mechanics of Solids and Structures
ENGRMAE 255	Composite Materials and Structures
ENGRMAE 258	Mechanical Behavior of Solids - Continuum Theories
MSE 205	Materials Physics
MSE 254	Polymer Science and Engineering

MSE 255A	Design with Ceramic Materials
MSE 256A	Mechanical Behavior of Engineering Materials
MSE 259	Transmission Electron Microscopy
MSE 264	Scanning Electron Microscopy
MSE 265	Phase Transformations
MSE 273	Electroceramics & Solid State Electrochemical Systems
PHYSICS 238A- 238B- 238C	Condensed Matter Physics and Condensed Matter Physics and Condensed Matter Physics

It should be noted that specific course requirements within the area of emphasis are decided based on consultation with the Director of the MMT concentration.

Two options are available for M.S. students: a thesis option and a comprehensive examination option. Both options require the completion of at least 12 courses of study.

### Plan I. Thesis Option

For the thesis option, students are required to complete an original research project and write an M.S. thesis. A committee of three full-time faculty members is appointed to guide the development of the thesis. Students must also obtain approval for a complete program of study from the program director. At least seven courses (3-unit or 4-unit) must be taken from courses numbered 200–289, among which at least four courses (3-unit or 4-unit) are from MMT core courses and at least three courses (3-unit or 4-unit) are in the area of emphasis approved by the faculty advisor and the graduate advisor. Four units of BME 296, CBE 296, EECS 296, ENGR 296, ENGRCEE 296, or ENGRMAE 296 count as the equivalence of one course. Up to three courses equivalent of BME 296, CBE 296, EECS 296, ENGR 296, ENGRCEE 296, or ENGRMAE 296 and up to two courses (3-unit or 4-unit) of upper-division undergraduate elective courses taken as a graduate student at UCI can be applied toward the 12-course requirement.

### Plan II. Comprehensive Examination Option

For the comprehensive examination option, students are required to complete minimally 12 courses (3-unit or 4-unit) of study. At least eight courses (3-unit or 4-unit) must be taken from courses numbered 200–289, among which at least four courses (3-unit or 4-unit) are from MMT core courses and at least four courses (3-unit or 4-unit) are in the area of emphasis approved by the faculty advisor and the graduate advisor. Four units of BME 299, CBE 299, EECS 299, ENGRCEE 299, or ENGRMAE 299 count as the equivalence of one course. One course equivalent of BME 299, CBE 299, EECS 299, ENGRCEE 299, or ENGRMAE 299 and up to two courses (3-unit or 4-unit) of upper-division undergraduate elective courses taken as a graduate student at UCI can be applied toward the 12-course requirement.

In the last quarter, an oral comprehensive examination on the contents of study will be given by a committee of three faculty members including the advisor and two members appointed by the program director. Part-time study for the M.S. is available and encouraged for engineers working in local industries. Registration for part-time study must be approved in advance by the MMT program director, the School's Associate Dean, and the Graduate Dean.

In addition to fulfilling the course requirements outlined above, it is a University requirement for the Master of Science degree that students fulfill a minimum of 36 units of study.

Ozdal Boyraz (integrated optics, silicon photonics, optical communications systems and microwave photonics)

Peter J. Burke (nano-electronics, bio-technology)

Zhongping Chen (biomedical optics, optical coherence tomography, bioMEMS, and biomedical devices)

James C. Earthman (biomaterials, compositionally complex materials, nanocrystalline alloys, quantitative percussion diagnostics, deformation and damage processes)

Rahim Esfandypour (nanotechnology and nanoscience, flexible electronics, MEMS and NEMS fabrication and modeling, stretchable and wearable bio devices, translational micro/nanotechnologies, biological and chemical sensors, microfluidics, microelectronics circuits and systems, physiological monitoring, Internet of Things(IOT) bio devices, technology development for personalized/precision medicine, and Point of Care(POC) diagnostics)

Franco De Flaviis (microwave systems, wireless communications, electromagnetic circuit simulations)

Manuel Gamero-Castaño (electric propulsion, with emphasis on colloid thruster technology for precision formation flying missions and Hall thrusters, electrohydrodynamic atomization of liquids and related problems like electrospray ionization and technological applications of electrosprays, aerosol diagnostics)

Alon A. Gorodetsky (cephalopods, adaptive materials, camouflage, bioelectronics)

Michelle Khine (development of novel nano- and micro-fabrication technologies and systems for single cell analysis, stem cell research, in vitro diagnostics)

John C. LaRue (heat transfer, turbulence)

Abraham Lee (integrated point-of-care diagnostics, engineered “theranostic” vesicles and particles, active cell sorting microdevices, microphysiological microsystems, and high throughput droplet bioassays)

Chin C. Lee (electronic packaging, bonding technology, metallurgy, thermal design, semiconductor devices, electromagnetic theory, acoustics and optoelectronics)

Jaeho Lee (heat transfer, thermal management, thermoelectronics, phononics, nanomaterials)

Henry P. Lee (photonics, fiber-optics and compound semiconductors)

Guann Pyng Li (micro/nano technology for sensors and actuators, internet of things (IoT), smart manufacturing, biomedical devices and millimeter wave wireless communication)

Michael McCarthy (design of mechanical systems, computer aided design, kinematic theory of spatial motion)

Marc J. Madou (fundamental aspects of micro/nano-electro-mechanical systems [MEMS/NEMS], biosensors, nanofluidics, biomimetics)

Martha L. McCartney (ceramics for energy applications and for use in extreme environments, flash sintering, interfacial design of thermal conductivity, transmission electron microscopy)

Farghalli A. Mohamed (mechanical behavior of engineering materials such as metals, composites and ceramics, the correlation between behavior and microstructure, creep, and superplasticity, mechanisms responsible for strengthening and fracture)

Ayman S. Mosallam (advanced composites and hybrid systems, seismic repair and rehabilitation of structures, diagnostic/prognostic structural health monitoring techniques, 3D printing in construction and sustainable and green building technology)

Daniel R. Mumm (development of materials for power generation systems, propulsion, integrated sensing advanced vehicle concepts and platform protection)

Xiaoqing Pan (atomic-scale structure, properties and dynamic behaviors of advanced materials including thin films and nanostructures for memories, catalysts, and energy conversion and storage devices)

Regina Ragan (exploration and development of novel materials systems for nanoscale electronic and optoelectronic devices)

Timothy J. Rupert (mechanical behavior, nanomaterials, structure-property relationships, microstructural stability, grain boundaries and interfaces, materials characterization)

Andrei M. Shkel (design and advanced control of micro-electro-mechanical systems (MEMS); high precision micro-machined gyroscopes; MEMS-enhanced optical systems, tools and prosthetic appliances; electromechanical and machine-information systems integration)

Frank G. Shi (optoelectronic devices and materials, optoelectronic device packaging materials, optoelectronic medical devices and packaging, white LED technologies, high power LED packaging)

Lizhi Sun (CEE) (micro- and nano-mechanics, composites and nanocomposites, smart materials and structures, multiscale modeling, elastography)

William Tang (micro-electro-mechanical systems (MEMS) nanoscale engineering for biomedical applications, microsystems integration, microimplants, microbiomechanics, microfluidics)

Chen S. Tsai (integrated microwave magnetics, ultrasonic atomization for nanoparticles synthesis, silicon photonics)

Lorenzo Valdevit, Director (architected materials, mechanical metamaterials, additive manufacturing, optimal design)

Yoon Jin Won (multi-scale structures for thermal and energy applications, in particular fabrication, characterization, and integration of structured materials)

Albert Yee (materials science aspects of polymers and soft materials, particularly on how they are used to impact nanotechnology)

## Engineering, Ph.D. (Concentration in Materials and Manufacturing Technology)

**Lorenzo Valdevit, Director and Graduate Advisor**  
204 Rockwell Engineering Center; 949-824-8090

<http://engineering.uci.edu/interdisciplinary-graduate-programs/materials-and-manufacturing-technology> (<http://engineering.uci.edu/interdisciplinary-graduate-programs/materials-and-manufacturing-technology/>)

The Ph.D. in Engineering with a concentration in Materials and Manufacturing Technology requires a commitment on the part of the student to dedicated study and collaboration with the faculty. Ph.D. students are selected on the basis of outstanding demonstrated potential and scholarship. Applicants must hold the appropriate prerequisite degrees from recognized institutions of high standing. Students entering with a master's degree may be required to take additional course work, to be decided in consultation with the graduate advisor and the program director. Students without a master's degree may be admitted into the Ph.D. program. However, these students will be required to complete the degree requirements above for the master's degree prior to working on doctoral studies. After substantial academic preparation, Ph.D. candidates work under the supervision of faculty advisors. The process involves immersion in a research atmosphere and culminates in the production of original research results presented in a dissertation.

Milestones to be passed in the Ph.D. program include the following: acceptance into a research group by the faculty advisor during the student's first year of study, successful completion of the Ph.D. preliminary examination during years one or two, development of a research proposal, passing the qualifying examination during year three (second year for those who entered with a master's degree), and the successful completion and defense of the dissertation during the fourth or fifth year. There is no foreign language requirement.

The degree is granted upon the recommendation of the doctoral committee and the Dean of Graduate Division. The normative time for completion of the Ph.D. is five years (four years for students who entered with a master's degree). The maximum time permitted is seven years.

### **Concurrent Study in the Program in Law and Graduate Studies (PLGS)**

Students have the option to pursue a coordinated curriculum leading to a J.D. degree from the School of Law in conjunction with a Master's or Ph.D. in Engineering with a concentration in Materials and Manufacturing Technology. For students pursuing the M.S. thesis option, 8 units of research can be substituted for law electives, and comprehensive exam students can petition two course (non-course or area of emphasis courses) to be substituted by law electives.

Ozdal Boyraz (integrated optics, silicon photonics, optical communications systems and microwave photonics)

Peter J. Burke (nano-electronics, bio-technology)

Zhongping Chen (biomedical optics, optical coherence tomography, bioMEMS, and biomedical devices)

James C. Earthman (biomaterials, compositionally complex materials, nanocrystalline alloys, quantitative percussion diagnostics, deformation and damage processes)

Rahim Esfandypour (nanotechnology and nanoscience, flexible electronics, MEMS and NEMS fabrication and modeling, stretchable and wearable bio devices, translational micro/nanotechnologies, biological and chemical sensors, microfluidics, microelectronics circuits and systems, physiological monitoring, Internet of Things(IOT) bio devices, technology development for personalized/precision medicine, and Point of Care(POC) diagnostics)

Franco De Flaviis (microwave systems, wireless communications, electromagnetic circuit simulations)

Manuel Gamero-Castaño (electric propulsion, with emphasis on colloid thruster technology for precision formation flying missions and Hall thrusters, electrohydrodynamic atomization of liquids and related problems like electrospray ionization and technological applications of electrosprays, aerosol diagnostics)

Alon A. Gorodetsky (cephalopods, adaptive materials, camouflage, bioelectronics)

Michelle Khine (development of novel nano- and micro-fabrication technologies and systems for single cell analysis, stem cell research, in vitro diagnostics)

John C. LaRue (heat transfer, turbulence)

Abraham Lee (integrated point-of-care diagnostics, engineered "theranostic" vesicles and particles, active cell sorting microdevices, microphysiological microsystems, and high throughput droplet bioassays)

Chin C. Lee (electronic packaging, bonding technology, metallurgy, thermal design, semiconductor devices, electromagnetic theory, acoustics and optoelectronics)

Jaeho Lee (heat transfer, thermal management, thermoelectronics, phononics, nanomaterials)

Henry P. Lee (photonics, fiber-optics and compound semiconductors)

Guann Pyng Li (micro/nano technology for sensors and actuators, internet of things (IoT), smart manufacturing, biomedical devices and millimeter wave wireless communication)

Michael McCarthy (design of mechanical systems, computer aided design, kinematic theory of spatial motion)

Marc J. Madou (fundamental aspects of micro/nano-electro-mechanical systems [MEMS/NEMS], biosensors, nanofluidics, biomimetics)

Martha L. McCartney (ceramics for energy applications and for use in extreme environments, flash sintering, interfacial design of thermal conductivity, transmission electron microscopy)

Farghalli A. Mohamed (mechanical behavior of engineering materials such as metals, composites and ceramics, the correlation between behavior and microstructure, creep, and superplasticity, mechanisms responsible for strengthening and fracture)

Ayman S. Mosallam (advanced composites and hybrid systems, seismic repair and rehabilitation of structures, diagnostic/prognostic structural health monitoring techniques, 3D printing in construction and sustainable and green building technology)

Daniel R. Mumm (development of materials for power generation systems, propulsion, integrated sensing advanced vehicle concepts and platform protection)

Xiaoqing Pan (atomic-scale structure, properties and dynamic behaviors of advanced materials including thin films and nanostructures for memories, catalysts, and energy conversion and storage devices)

Regina Ragan (exploration and development of novel materials systems for nanoscale electronic and optoelectronic devices)

Timothy J. Rupert (mechanical behavior, nanomaterials, structure-property relationships, microstructural stability, grain boundaries and interfaces, materials characterization)

Andrei M. Shkel (design and advanced control of micro-electro-mechanical systems (MEMS); high precision micro-machined gyroscopes; MEMS-enhanced optical systems, tools and prosthetic appliances; electromechanical and machine-information systems integration)

Frank G. Shi (optoelectronic devices and materials, optoelectronic device packaging materials, optoelectronic medical devices and packaging, white LED technologies, high power LED packaging)

Lizhi Sun (CEE) (micro- and nano-mechanics, composites and nanocomposites, smart materials and structures, multiscale modeling, elastography)

William Tang (micro-electro-mechanical systems (MEMS) nanoscale engineering for biomedical applications, microsystems integration, microimplants, microbiomechanics, microfluidics)

Chen S. Tsai (integrated microwave magnetics, ultrasonic atomization for nanoparticles synthesis, silicon photonics)

Lorenzo Valdevit, Director (architected materials, mechanical metamaterials, additive manufacturing, optimal design)

Yoon Jin Won (multi-scale structures for thermal and energy applications, in particular fabrication, characterization, and integration of structured materials)

Albert Yee (materials science aspects of polymers and soft materials, particularly on how they are used to impact nanotechnology)

## Master of Engineering

**Fadi J. Kurdahi, Program Director**

949-824-8090

The Master of Engineering Program is administered by faculty of the Henry Samueli School of Engineering. The program offers the Master of Engineering degree in multiple concentrations and specializations.

The curriculum includes foundational courses that vary by specialization as well as an entrepreneurial/intrapreneurial sequence of courses that is common to all the specializations. The degree has a strong experiential learning component embodied in a capstone project supervised by faculty members. The M.Eng. program was developed, in part, to serve the needs of domestic and international students, and working professionals among whom the leaders of their respective specializations are especially likely to come.

Potential graduate students for the M.Eng. Program can apply via the Graduate Division's online application and indicate on their applications their interest in the program. Students apply directly to the concentration of their choice. Applicants are expected to hold a Bachelor's degree in an Engineering or Computer Science discipline. Students from other disciplines may be considered for admission if they have sufficient background in the basics of their target specialization. Applicants will be evaluated on the basis of their prior academic record and their potential for carrying out graduate-level work as demonstrated in submitted application materials. These materials include official university transcripts, letters of recommendation, GRE scores, and a Statement of Purpose where students can explain their relevant experience (academic or industry). Students with industry experience will be considered favorably, especially if their experience is relevant to the areas emphasized by their target specialization.

An admissions committee composed of senate faculty members will evaluate the applicant files and make admissions decisions based on the overall file presented by the student.

Overall, students will be admitted using criteria similar to those used in traditional M.S. degree from relevant departments.

## Master of Engineering Program Requirements

The Master of Engineering (M.Eng) consists of six concentrations electives specific to each concentration, plus 8 units of project courses leading to a final project. In addition, a common layer of three courses in Business/Communication/Leadership is required in all of the specializations.

A. Complete:

ENGR 200AP	Entrepreneurship Science and Engineering: Innovation
ENGR 200BP	Entrepreneurship Science and Engineering: Build
ENGR 200CP	Entrepreneurship Science and Engineering: Launch

B. Complete six technical courses. Acceptable courses for each concentration/specialization are listed below:

### Biomedical Engineering Concentration

Students in the BME Concentration select six courses from the following:

BME 234P	Neuroimaging Data Analysis
BME 262P	Microimplants
BME 295P	Special Topics in Biomedical Engineering

### Electrical Engineering and Computer Science Concentration

Students in the EECS Concentration select from two specializations:

Digital and Image Signal Processing

Complete the following:

EECS 213P	Computer Architecture
EECS 220P	Advanced Digital Signal Processing Architecture
EECS 250P	Digital Signal Processing I

Select three from the following:

EECS 202BP	Techniques in Medical Imaging: X-ray, Nuclear, and NMR Imaging
EECS 211P	Advanced System Software
EECS 215P	Design and Analysis of Algorithms
EECS 223P	Real-Time Computer Systems
EECS 240P	Random Processes
EECS 241AP	Digital Communications I
EECS 295P	Special Topics in Electrical Engineering and Computer Science

High Speed Communication Circuits and Systems

Complete:

EECS 241AP	Digital Communications I
EECS 244P	Wireless Communications
EECS 270AP	Advanced Analog Integrated Circuit Design I
EECS 285AP	Optical Communications

Select two from the following:

EECS 240P	Random Processes
EECS 241BP	Digital Communications II
EECS 250P	Digital Signal Processing I
EECS 270DP	Radio-Frequency Integrated Circuit Design
EECS 270BP	Advanced Analog Integrated Circuit Design II
EECS 280AP	Advanced Engineering Electromagnetics I
EECS 284P	RF Antenna Design
EECS 295P	Special Topics in Electrical Engineering and Computer Science

### Mechanical and Aerospace Engineering Concentration

Students in the MAE Concentration select from two specializations:

Energy Systems

Select six courses from the following:

ENGRMAE 209P	Energy Efficiency Technology
ENGRMAE 211P	Energy Storage Systems and Technology
ENGRMAE 212P	Engineering Electrochemistry: Fundamentals and Applications

ENGRMAE 214AP	Fuel Cell Fundamentals and Technology
ENGRMAE 217P	Generalized Thermodynamics
ENGRMAE 218P	Sustainable Energy Systems
ENGRMAE 219P	Solar and Renewable Energy Systems
ENGRMAE 295P	Special Topics in Mechanical and Aerospace Engineering

## Nanotechnology

Select six courses from the following:

ENGRMAE 229P	Nanoscale Materials for Modern Electronics
ENGRMAE 247P	Micro-System Design
ENGRMAE 252P	Fundamentals of Microfabrication
ENGRMAE 254P	Mechanics of Solids and Structures
ENGRMAE 257P	Fabrication and Characterization of Nanomaterials
ENGRMAE 259P	Mechanical Behavior of Solids - Atomistic Theories
ENGRMAE 295P	Special Topics in Mechanical and Aerospace Engineering

## C. Complete:

ENGR 210P	Capstone Project (8 units) <sup>1</sup>
-----------	---

<sup>1</sup> Students are required to complete a project that deals with a specific emphasis of their concentration/specialization. The project will be mentored by a faculty member and approved by the student's advisor and the Concentration Director. A project report must be submitted in partial fulfillment of the degree requirements. The project report needs to be approved by the mentor, the student's advisor and the director of the M.Eng. Program.

# The Paul Merage School of Business

---

## Eric Spangenberg, Dean

The Paul Merage School of Business (<http://merage.uci.edu/>) offers the B.A. in Business Administration, the B.S. in Business Information Management (offered jointly with the Donald Bren School of Information and Computer Sciences), the M.B.A. (Master of Business Administration), the MPAc (Master of Professional Accountancy), the Master of Finance, the Master of Innovation and Entrepreneurship, the M.S. in Business Analytics, the M.S. in Biotechnology Management (offered jointly with the School of Biological Sciences and The Henry Samueli School of Engineering), the M.S. in Engineering Management (offered jointly with The Henry Samueli School of Engineering), the Ph.D. in Management, and undergraduate minors in Management, Accounting, and Innovation and Entrepreneurship. The Master's degree is professional in nature and is intended to provide future managers with a firm foundation in the basic disciplines and in management tools and techniques; the Ph.D. in Management is for those who wish to pursue a career in scholarly research.

The undergraduate minor in Management is designed for those who wish to gain some insight into issues of modern management, as well as those who anticipate future graduate work in management. In establishing the undergraduate minor in Accounting, the faculty anticipated two types of students to be drawn to courses in accounting: (1) students preparing for careers in accounting or in other fields that require some knowledge of accounting, and (2) students planning to pursue a graduate degree in accounting who wish early guidance and undergraduate work appropriate to this career objective. The minor in Innovation and Entrepreneurship provides extensive academic and practical training for students to embark on careers as entrepreneurs (innovating to form new companies) and intrapreneurs (innovating within existing companies).

## Honors

**Graduation with Honors.** Honors at graduation, e.g., *cum laude*, *magna cum laude*, *summa cum laude*, are awarded to approximately the top 16 percent of the graduating seniors. To be eligible for honors, a general criterion is that students must have completed at least 72 units in residence at the University of California. The student's cumulative record at the end of the final quarter is the basis for consideration for awarding Latin honors. Other important factors are considered visit at Honors Recognition.

## Merage Career Center

The Merage Career Center, located within the Merage School, assists students with taking the next steps in their professional career. The Center has two main functions: (1) helping students develop lifelong career management skills through career and professional development activities, job search training, and personalized coaching services and (2) facilitating connections with organizations that hire for internships and full-time jobs. The relatively small size of the MBA program allows students to develop a close working relationship with the Career Center staff.

## Graduate Educational Objectives

The Paul Merage School of Business offers a general management MBA degree and a learning experience that prepares graduates for a lifetime of professional and personal growth with increasingly important enterprise-wide responsibilities. The rigorous curriculum, combined with extensive professional and interpersonal training made available through the School's Career Center, allows students to gain theoretical perspectives that are in turn tested and affirmed with practical application. The result is an environment that fosters the development of professional and personal skills vital to executives and managers. Students are encouraged to develop their ability to lead change by mastering communication skills, to work productively and actively within a team-oriented environment, to gain a solid grasp of quantitative skills, and to appreciate and effectively employ those solutions that integrate information and technology to offer creatively viable business options.

The School has developed a thematic approach to business education: leadership for a digitally-driven world. The goal is to graduate leaders with the exceptional ability to grow their organizations through strategic innovation supported by data analytics, information technology, and collaborative execution. Although a solid grounding in basic business disciplines provides the foundation for effective management, graduates are encouraged to aim higher. They learn about change as it takes place within the context of a knowledge-based, technology-driven society where information and its effective use are vital to establishing a competitive edge. Students, whether they are interested in finance, marketing, general management, strategic planning, accounting, operations, health care, human resources, international business, or other areas, will be thoroughly imbued and comfortable with the nature and importance of strategic innovation and how crucial it is toward sustaining growth in today's competitive global economy. Further, they will understand the impacts of technology and the technological processes that enable the gathering, analysis, dissemination, and use of information to change the way business is done. The thematic approach of the School provides a skill-set, core understanding, and depth of knowledge that will enable its graduates to be effective managers who are not only proficient in business procedures but have the leadership qualities and conceptual framework to affect change by transforming conventional business practices or perhaps even inventing new business processes and management techniques.

The Paul Merage School of Business also offers a number of specialized and joint master's programs, including: the Master of Professional Accountancy (MPAc); the Master of Finance (MFin); the Master of Innovation and Entrepreneurship (MIE); the M.S. in Business Analytics (MSBA); the M.S. in Engineering Management (MSEM), offered jointly with The Henry Samueli School of Engineering; and the M.S. in Biotechnology Management (MSBTM), offered jointly with the Department of Molecular Biology and Biochemistry (MB&B) in the School of Biological Sciences and the Department of Biomedical Engineering in The Henry Samueli School of Engineering. Joint M.D./MBA and J.D./MBA programs are also available.

- Accounting, Minor
- Biotechnology Management, M.S.

- Business Administration, B.A.
- Business Analytics, M.S.
- Business Information Management, B.S.
- Engineering Management, M.S.
- Innovation and Entrepreneurship, Minor
- J.D./M.B.A. Program
- M.D./M.B.A. Program
- Management, Minor
- Management, Ph.D.
- Master of Business Administration
- Master of Business Administration, Executive
- Master of Business Administration, Fully Employed
- Master of Finance
- Master of Innovation and Entrepreneurship
- Master of Professional Accountancy

Evaluation of the applicant's file for admission to the Master's and Ph.D. degree programs will consist of an integrated assessment of all materials (test scores, transcripts of previous academic work, work experience, essays, and letters of recommendation). The University admission standard of a 3.0 or better undergraduate grade point average (on a 4.0 scale) is preferred. The minimum TOEFL (Test of English as a Foreign Language) score acceptable for study at the School for all MBA and specialized master's programs is 80 or better on the Internet-based test. The Ph.D. program minimum acceptable score is 100 on the TOEFL Internet-based test. International MBA and specialized master's programs applicants may also take the Pearson Test of English (PTE), where the minimum score required for admission is 53; or the International English Language Testing System (IELTS), where the minimum score required is 7. Substantive work experience is considered for applicants to MBA programs.

Requests for application material should be addressed to either the Full-Time MBA (SB1 5400), Fully Employed MBA (SB1 4200), Executive MBA (SB1 4200), Ph.D. Program (SB1 3235), or Master of Professional Accountancy Program (SB1 4500), Master of Finance Program (SB1 4500), Master of Innovation and Entrepreneurship (SB1 4500), or M.S. in Business Analytics Program (SB1 4500) at

The Paul Merage School of Business

MBAPrograms@exchange.uci.edu

## Centers of Excellence

At The Paul Merage School of Business, the Centers of Excellence serve as the bridge between campus and community. The Merage School also offers specialized M.B.A. certificates in partnership with the Centers, including certificates in Digital Transformation, Innovation and Entrepreneurship, and Real Estate and Urban Development.

### Beall Center for Innovation & Entrepreneurship

Founded in 2007, The Beall Center for Innovation & Entrepreneurship (<http://merage.uci.edu/ResearchAndCenters/Beall/>) provides thought leadership in the fields of entrepreneurship education and innovation research to both the students and faculty of The Paul Merage School of Business and the greater worldwide academic community. Through the Center and its activities, a campuswide community of involvement for students and researchers passionate about innovation and entrepreneurship has been organized around a nexus of active volunteers, board members, and alumni who provide world-class programs, resources, and relationships to the University in the areas of entrepreneurship and new venture creation.

### Center for Global Leadership

The Center for Global Leadership (<http://merage.uci.edu/ResearchAndCenters/CLTD/>) is an important resource for UC Irvine and The Paul Merage School of Business students. This Center seeks to inspire global leadership by being the best place to learn, study, and develop ideas to improve socially responsible global leadership. This is done by enabling collaboration between leading scholars, students, and the global leadership community to generate innovative ideas and best practices to address the current and future challenges of an increasingly integrated world. The Center works with experienced leaders to identify practical global-leadership knowledge needs and then develops systematic research on these questions, sharing that knowledge through conferences and our Research Translations. We use this knowledge to develop co-curricular programs for students such as the Executive Mentoring Program and the Social Responsibility Initiative that connect students with community leaders.

### Center for Real Estate

The Center for Real Estate (<http://merage.uci.edu/ResearchAndCenters/CRE/>) at The Paul Merage School of Business is an integral and indispensable component of the program in Real Estate and Urban Development at UC Irvine. In addition to offering eight real estate elective courses, it provides

students with a network of connections to the business community, including members of its Advisory Board, industry leaders, and alumni. The Center offers fellowships, extracurricular activities, and resources that enhance the M.B.A. learning experience.

## **Center for Health Care Management and Policy**

The Center for Health Care Management and Policy (<http://merage.uci.edu/ResearchAndCenters/healthcare/>) at The Paul Merage School of Business advances knowledge through research and education while providing forums for dialogue on crucial challenges and concerns facing the nation's health care system today. This interdisciplinary research institute brings together health care scholars, policy experts, and industry professionals to share vital information and a range of perspectives on such fundamental issues as quality of care, cost, and access. A wide range of programs contribute to the debate on national health care policy and help leaders in government, business, and nonprofit organizations make better-informed decisions. The Center's activities build on the Merage School's health care-oriented educational programs, including its M.D./M.B.A. joint degree program.

## **Center for Digital Transformation**

The Center for Digital Transformation (CDT) (<http://merage.uci.edu/ResearchAndCenters/CDT/>) generates and disseminates knowledge that helps businesses, governments, and society adapt to and leverage the possibilities enabled by emerging digital technologies. Research themes include Digital Economics, Digital Business Models and Processes, Digital Services Delivery, and Big Data & Analytics. CDT serves as an interdisciplinary research institute, drawing on economists, behavioral scientists, sociologists, and computer scientists. The Center deploys an open innovation model, partnering with companies, nonprofits, experts, and the community at large to identify and address critical research questions. CDT hosts several outreach initiatives which support and educate students, as well as connects them to key industry professionals.

## **Center for Investment and Wealth Management**

The Center for Investment and Wealth Management (<http://merage.uci.edu/ResearchAndCenters/ciwm/>) is dedicated to the mission of educating Merage School M.B.A. students in the area of investment and wealth management. The Center seeks to enhance students' educational experience and help them to advance their professional expertise and growth at the same time. The education that the Center provides is a collaborative effort between UC Irvine's expert faculty and seasoned professionals dedicated to sharing their experience and knowledge. The concept is to create cutting-edge curriculum with the flexibility to teach students topics in real time. This year, a number of the Center's board members have participated as distinguished lecturers. They are prominently known in the wealth management community and speak to students about their career path, the industry, and ways to achieve success. They are from a wide array of backgrounds including financial institutions, investment companies, law firms, accounting firms, and wealth management companies in Orange County and beyond.

## **John S. and Marilyn Long U.S.-China Institute for Business and Law**

The John S. and Marilyn Long U.S.-China Institute for Business and Law (<http://longinstitute.uci.edu/>) at UC Irvine is a premier research entity established to facilitate and further develop legal and commercial relationships between the United States and China. The Long Institute is a collaborative effort between The Paul Merage School of Business and the School of Law at UC Irvine and will involve chaired professors with extensive expertise in the areas of both business and law as it relates to the U.S and China. The Institute serves to promote a bilateral understanding and engagement between the two economic superpowers and will feature events and research involving both scholars and practitioners from various industries engaging in U.S.-China trade. Students and faculty can also be involved by participating in exchange programs with major Chinese universities.

## **Faculty**

Dennis Aigner, Ph.D. University of California, Berkeley, *Professor Emeritus of Paul Merage School of Business*

Alpesh N. Amin, M.D. M.B.A. Northwestern University, *Department Chair and Thomas and Mary Cesario Endowed Chair in Medicine and Professor of Medicine; Biomedical Engineering; Paul Merage School of Business; Program in Public Health; Radiological Sciences*

Christopher Bauman, Ph.D. University of Illinois at Chicago, *Associate Professor of Paul Merage School of Business*

David Blake, Ph.D. Rutgers, The State University of New Jersey, *Professor Emeritus of Paul Merage School of Business*

Kevin Bradford, Ph.D. University of Florida, *Assistant Professor of Teaching of Paul Merage School of Business* (personal setting, sales management, distribution of firearms, marketing practices of guns, gun culture)

Tonya Bradford, Ph.D. Northwestern University, *Assistant Professor of Paul Merage School of Business* (rituals, market exchange, gift-giving, communities)

Philip Bromiley, Ph.D. Carnegie Mellon University, *Professor of Paul Merage School of Business*

Nai-Fu Chen, Ph.D. University of California, Los Angeles, *Professor Emeritus of Paul Merage School of Business*

Vidyanand Choudhary, Ph.D. Purdue University, *Professor of Paul Merage School of Business*

Elizabeth Chuk, Ph.D. University of Washington, *Assistant Professor of Paul Merage School of Business* (financial reporting, consequences of accounting standards, defined benefit pensions, earnings management)

- N. Edward Coulson, Ph.D. University of California, San Diego, *Professor of Paul Merage School of Business; Economics; Psychological Science*
- Imran Currim, Ph.D. Stanford University, *UCI Chancellor's Professor of Paul Merage School of Business*
- Sanjeev Dewan, Ph.D. University of Rochester, *Professor of Paul Merage School of Business*
- Joseph DiMento, Ph.D. University of Michigan, *Professor of School of Law; Criminology, Law and Society; Paul Merage School of Business; Urban Planning and Public Policy*
- Martha S. Feldman, Ph.D. Stanford University, *Roger W. and Janice M. Johnson Chair in Civic Governance and Public Management and Professor of Urban Planning and Public Policy; Paul Merage School of Business; Sociology* (organization theory and behavior, stability and change in organizations, decision-making and information processing, public management, qualitative research methods)
- Paul Feldstein, Ph.D. University of Chicago, *Professor Emeritus of Paul Merage School of Business*
- Mary Gilly Graham, Ph.D. University of Houston, *Professor of Paul Merage School of Business*
- John Graham, Ph.D. University of California, Berkeley, *Professor Emeritus of Paul Merage School of Business*
- Luyi Gui, Ph.D. Georgia Institute of Technology, *Assistant Professor of Paul Merage School of Business*
- Vijay Gurbaxani, Ph.D. University of Rochester, *Taco Bell Chair in Information Technology Management and Professor of Paul Merage School of Business; Informatics* (economics of information systems management, impact of information technology on organization and market structure)
- David Hirshleifer, Ph.D. University of Chicago, *Paul Merage Chair in Business Growth and Distinguished Professor of Paul Merage School of Business; Economics*
- Siew Hong Teoh Hirshleifer, Ph.D. University of Chicago, *Professor of Paul Merage School of Business*
- Joanna Ho, Ph.D. University of Texas at Austin, *Professor of Paul Merage School of Business*
- Chong Huang, Ph.D. University of Pennsylvania, *Assistant Professor of Paul Merage School of Business*
- Mireille Jacobson, Ph.D. Harvard University, *Associate Professor of Paul Merage School of Business*
- Philippe Jorion, Ph.D. University of Chicago, *Professor of Paul Merage School of Business; Economics*
- John Joseph, Ph.D. Northwestern University, *Associate Professor of Paul Merage School of Business*
- Lynn Robin Keller, Ph.D. University of California, Los Angeles, *Professor of Paul Merage School of Business*
- Sreya Kolay, Ph.D. University of Rochester, *Assistant Professor of Paul Merage School of Business*
- Sharon Koppman, Ph.D. University of Arizona, *Assistant Professor of Paul Merage School of Business; Sociology* (work and occupations, sociology of culture, creative industries)
- Kenneth Kraemer, Ph.D. University of Southern California, *Professor Emeritus of Paul Merage School of Business*
- Loraine Lau, Ph.D. University of California, Los Angeles, *Associate Professor of Paul Merage School of Business*
- Ben Lourie, Ph.D. University of California, Los Angeles, *Assistant Professor of Paul Merage School of Business*
- Radhika Lunawat, Ph.D. University of Minnesota, *Assistant Professor of Paul Merage School of Business; Economics*
- Newton Margulies, Ph.D. University of California, Los Angeles, *Professor Emeritus of Paul Merage School of Business*
- Peter Navarro, Ph.D. Harvard University, *Professor Emeritus of Paul Merage School of Business*
- David Neumark, Ph.D. Harvard University, *Distinguished Professor of Economics; Paul Merage School of Business*
- Tingting Nian, Ph.D. New York University, *Assistant Professor of Paul Merage School of Business*
- Gerardo Okhuysen, Ph.D. Stanford University, *Professor of Paul Merage School of Business*
- Judith Olson, Ph.D. University of Michigan, *Professor Emeritus of Informatics; Paul Merage School of Business; Urban Planning and Public Policy* (interactive and collaborative technology, human-computer interaction, computer-supported cooperative work)
- Jone Pearce, Ph.D. Yale University, *Professor of Paul Merage School of Business*

Cornelia Pechmann, Ph.D. Vanderbilt University, *Professor of Paul Merage School of Business*

Morton Pincus, Ph.D. Washington University, *Professor of Paul Merage School of Business*

Andrew Policano, Ph.D. Brown University, *Professor Emeritus of Paul Merage School of Business*

Judy Rosener, Ph.D. Claremont Graduate University, *Professor of Teaching Emerita of Paul Merage School of Business*

Maritza Salazar, Ph.D. New York University, *Assistant Professor of Paul Merage School of Business; Psychological Science* (team science, group dynamics and processes, team-based organizations, global teams, impact of culture on work behavior, international management, management of innovation and learning)

Claudia Schoonhoven, Ph.D. Stanford University, *Professor Emerita of Paul Merage School of Business*

Christopher Schwarz, Ph.D. University of Massachusetts, *Associate Professor of Paul Merage School of Business*

Carlton Scott, Ph.D. University of New South Wales, *Professor Emeritus of Paul Merage School of Business*

Devin Shanthikumar, Ph.D. Stanford University, *Assistant Professor of Paul Merage School of Business*

Terrence Shevlin, Ph.D. Stanford University, *Paul Merage Chair in Business Growth and Professor of Paul Merage School of Business*

Kut So, Ph.D. Stanford University, *Professor of Paul Merage School of Business*

Eric Spangenberg, Ph.D. University of Washington, M.B.A. Portland State University, *Dean of The Paul Merage School of Business and Professor of Paul Merage School of Business; Psychological Science* (sensory cues in the retail environment and the effects of self-prediction on behavior)

Zheng Sun, Ph.D. New York University, *Associate Professor of Paul Merage School of Business*

Eli Talmor, Ph.D. University of North Carolina at Chapel Hill, *Professor Emeritus of Paul Merage School of Business*

John Turner, Ph.D. Carnegie Mellon University, *Associate Professor of Paul Merage School of Business*

Rajeev Tyagi, Ph.D. University of Pennsylvania, *Walter B. Gerken Chair in Enterprise and Society and Professor of Paul Merage School of Business*

Kerry Vandell, Ph.D. Massachusetts Institute of Technology, *Professor Emeritus of Paul Merage School of Business; School of Law; Urban Planning and Public Policy*

Alladi Venkatesh, Ph.D. Syracuse University, *Professor of Paul Merage School of Business* (social impacts of information technology, Internet and the New Economy, Smart Home technologies, children and multimedia)

Libby Weber, Ph.D. University of Southern California, *Associate Professor of Paul Merage School of Business*

Patricia A. Wellmeyer, M.S. California State University, Fullerton, *Assistant Professor of Teaching of Paul Merage School of Business*

Margarethe Wiersema, Ph.D. University of Michigan, *Professor of Paul Merage School of Business*

Mingdi Xin, Ph.D. New York University, *Assistant Professor of Paul Merage School of Business*

David Yang, Ph.D. Harvard University, *Assistant Professor of Paul Merage School of Business*

Shuya Yin, Ph.D. University of British Columbia, *Associate Professor of Paul Merage School of Business*

Maia Young, Ph.D. Stanford University, *Assistant Professor of Paul Merage School of Business*

Lu Zheng, Ph.D. Yale University, *Professor of Paul Merage School of Business*

## Accounting Courses

### **MPAC 200A. Intermediate Accounting Intensive I. 4 Units.**

Designed to provide students with technical U.S. accounting theory and principles background necessary for graduate work in accounting. Current international accounting convergence issues and standards will be discussed on emerging topics.

Repeatability: May be taken for credit 2 times.

Restriction: Accountancy Majors only.

**MPAC 200B. Foundations of Taxation Intensive. 4 Units.**

Provides students with the basic concepts of federal income taxation applicable to all taxpayers. Specifically, principles of taxation for individuals, corporations, and partnerships are discussed.

Repeatability: May be taken for credit 2 times.

Restriction: Accountancy Majors only.

**MPAC 200C. Intermediate Accounting Intensive II and Special Topics. 4 Units.**

Designed to provide students with the technical U.S. accounting theory and principles background necessary for graduate work in accounting. Current international accounting convergence issues and standards will be discussed on emerging topics.

Repeatability: May be taken for credit 2 times.

Restriction: Accountancy Majors only.

**MPAC 200D. Auditing Intensive. 4 Units.**

Designed to provide students with an understanding of the fundamental principles, processes, and ethical considerations involved in the performance of a financial statement audit under U.S. auditing standards.

Repeatability: May be taken for credit 2 times.

Restriction: Accountancy Majors only.

**MPAC 230. Accounting ProSeminar: Career and Professional Development. 2 Units.**

Provides students with information and practical skills for success in the program and for professional accounting and business career planning, and with discussions of current issues confronting the accounting profession.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 2 times.

Restriction: Accountancy Majors only.

**MPAC 231A. Financial Statement Analysis and Forecasting. 4 Units.**

Develops skills to analyze corporate financial reports. Topics include profitability, risk analysis, cash flow analysis, revenue and asset recognition, and forecasting. The skills are useful for students to evaluate financial reporting quality, detect earnings management, and predict firms' financial performance.

Prerequisite: Intermediate accounting.

Restriction: Accountancy Majors only.

**MPAC 231B. Advanced Financial Statement Analysis. 4 Units.**

Develops skills to analyze corporate financial reports with a focus on liabilities, stockholders' equity, and valuation. Topics include forecasting financial statements, cash flows- and earnings-based equity, and valuation models, accounting analysis of mergers and acquisitions, lease pensions, and derivatives.

Restriction: Accountancy Majors only.

**MPAC 232. Taxes and Business Strategy. 4 Units.**

Develops a student's ability to identify, understand, and evaluate tax-planning opportunities. The focus is on tax planning concepts and the effects of taxes on business decisions rather than on detailed tax rules, compliance, or legal research.

Restriction: Accountancy Majors only.

**MPAC 233. Non-for-Profit Accounting. 4 Units.**

Focuses on the accounting and reporting for governmental and non-for-profit entities. Topics include preparation of fund basis financial statements and related reporting and auditing issues. Use of non-financial performance measures for non-for-profit entities is also discussed.

Restriction: Accountancy Majors only.

**MPAC 234. Accounting Policy and Research. 2 Units.**

Considers issues in contemporary accounting standard setting and regulation by examining academic accounting research of the various issues. Enables students to develop their knowledge and better appreciate current debates in accounting.

Restriction: Accountancy Majors only.

**MPAC 235. Advanced Managerial Accounting. 4 Units.**

Design of cost information and systems used to plan and control organizational activities; procedures used to account for unit, process, and program costs; cybernetic evaluation of costing procedures; cost estimation, analysis, and accounting via computers.

Restriction: Accountancy Majors only.

**MPAC 236. Forensic Accounting . 2 Units.**

Elective course focuses on the principles, and application of forensic accounting. Topics include the identification, detection, and prevention of fraud, valuations, damage calculations, and litigation support. The role of forensic accountants in the legal system will also be discussed.

Restriction: Accountancy Majors only.

**MPAC 237. International Accounting. 4 Units.**

An online course. A comprehensive study of differences between US GAAP and International Financial Reporting Standards (IFRS).

Prerequisite: Intermediate accounting.

Restriction: Accountancy Majors only.

**MPAC 238. Advanced Auditing and Assurance Services. 4 Units.**

Designed to provide advanced coverage of topics and emerging issues in auditing and assurance services. Provides a deeper understanding of the fundamental concepts of auditing, assurance services, and developing hot-topics within the auditing profession.

Prerequisite: Intermediate accounting and basic auditing.

Restriction: Accountancy Majors only.

**MPAC 239. Ethics in Accounting and Business. 4 Units.**

Designed to introduce students to the intellectual principles of ethical decision making by emphasizing the theories of ethics and their application in the business, and specifically, accounting professions. MPAC capstone course with a final comprehensive exam for the program.

Restriction: Accountancy Majors only.

**MPAC 241. Accounting Internship. 2-4 Units.**

Provides students with the opportunity to apply accounting knowledge through actual work experiences. The internship experience will provide students with knowledge of career opportunities, an understanding of how accounting plays in today's business environment, and prepare students for success.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Accountancy Majors only.

**MPAC 290. Special Topic Seminars. 2-4 Units.**

Studies in selected area of Accounting. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Accountancy Majors only.

**MPAC 291. Professional Research and Communication. 4 Units.**

Combines research of the professional accounting literature on a range of technical topics with a written communication and oral presentations of the findings.

Restriction: Accountancy Majors only.

**MPAC 299. Individual Study. 1-4 Units.**

Individual study under the direction of a selected faculty member.

Repeatability: May be repeated for credit unlimited times.

Restriction: Accountancy Majors only.

## Business Analytics Courses

### **BANA 200. Foundations of Business Analytics. 2 Units.**

Provides overview of the field of business analytics, and the theory and practice underpinnings of the three MSBA curricular tracks: Data Analytics, Marketing Analytics, and Operations Analytics. Provides students with a working knowledge of the R programming language.

Restriction: Graduate students only. Business Analytics Majors only.

### **BANA 201A. Statistics for Data Science. 4 Units.**

Methods of statistical inference, emphasizing applications to administrative and management decision problems. Topics include classical estimation and hypothesis testing, regression, correlation, analysis of variance, decision analysis, and forecasting.

Restriction: Graduate students only. Business Analytics Majors only.

### **BANA 201B. Management Science for Analytics. 4 Units.**

An introduction to computer-based models for decision making. Topics include optimization (linear programming, integer programming, network flow models) and computer simulation. Uses spreadsheets extensively, including Excel built-in and add-in packages.

Restriction: Graduate students only. Business Analytics Majors only.

### **BANA 205. Foundations of Marketing. 4 Units.**

Introduction to the field of marketing. Objectives include developing familiarity with fundamental concepts, theories, and techniques in marketing, and acquainting students with the type of decisions made by marketing managers, including customer targeting, product, pricing, distribution, promotion, and research.

Restriction: Graduate students only. Business Analytics Majors only.

### **BANA 211. MSBA ProSeminar.**

Provides students in the Merage School Master of Science in Business Analytics program with information and practical skills for success in the MSBA program and for business career planning.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Business Analytics Majors only.

### **BANA 212. Data and Programming for Analytics. 4 Units.**

Challenges and teaches students how to handle data, from initial data acquisition to final data analysis. Provides students with a working knowledge of the Python programming language.

Prerequisite: Basic familiarity with programming is recommended.

Restriction: Graduate students only. Business Analytics Majors only.

### **BANA 241. Business Analytics Internship. 2-4 Units.**

Students apply analytics and big data knowledge obtained from classroom theory through work experiences. Provides knowledge of career opportunities, an understanding of the role analytics plays in business environments, and preparation for the business analytics profession.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Business Analytics Majors only.

### **BANA 257. Marketing on the Internet for Business Analytics. 4 Units.**

Examines the impact of the Internet on traditional methods of doing marketing, and explores its existing and future uses. Discusses how to capitalize on and increase the Internet's utility as a tool that can increase marketing effectiveness, efficiency, and competitiveness.

Restriction: Graduate students only.

### **BANA 271. Marketing Analytics. 4 Units.**

Introduces students to quantitative marketing analytics methods and teaches them how to apply the methods to business problems of interest. Topics include: resource allocation and ROI, marketing mix analytics, customer analytics, market segmentation and targeting, advertising, promotions, and digital marketing.

Restriction: Graduate students only.

**BANA 273. Machine Learning for Analytics. 4 Units.**

Introduces methods to mine data repositories for business intelligence to facilitate analytical decision-making. Topics include clustering for market segmentation, association rules to discover relationships between different purchase decisions, and Naive-Bayes classification techniques for decision making using decision-trees.

Restriction: Graduate students only. Business Analytics Majors only.

**BANA 275. Natural Language Processing and Applications. 4 Units.**

Focuses on providing students knowledge of advanced techniques for data analytics. Students deepen their understanding of topics including: dimension reduction, text mining and topic modeling, sentiment analysis, collaborative filtering, and causal estimation.

Restriction: Graduate students only.

**BANA 277. Customer and Social Analytics. 4 Units.**

Examines how business managers can leverage Web 2.0 and social media analytics to create value for their organizations and customers. Topics include digital and social strategies; Web and search analytics; display and mobile advertising; social networks and influence; social media.

Restriction: Graduate students only.

**BANA 288. Predictive Analytics. 4 Units.**

Deals with predicting entities (forecasting) and predicting membership of known groups (classification). Blends methodologies of forecasting and data mining, focusing on multiple regression, logistic regression, neural nets, ARIMA, discriminate analysis, and k-nearest neighbors, and applying these methods to managerial problems/decision-making.

Restriction: Graduate students only.

**BANA 290. Special Topics in Business Analytics. 4 Units.**

Studies in selected areas of business analytics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**BANA 294. Big Data Analytics with Hadoop. 4 Units.**

In-depth hands-on exploration of various cutting-edge information technologies used for big data analytics. Focuses on using Hadoop, Sqoop, Pig, and Hive for ETL operations and on understanding the MapReduce algorithm using Apache Mahout for data mining algorithms.

Restriction: Business Analytics Majors only.

**BANA 295. Big Data Management Systems. 4 Units.**

Provides an introductory-level overview to the emerging technologies in database systems. Students gain critical insight into big data challenges, the choices of different systems and technologies available, relative advantages/disadvantages, and unique aspects of different systems.

Restriction: Graduate students only.

**BANA 298A. Business Analytics Capstone Prep. 2 Units.**

Prep course for the required capstone project. Students apply the knowledge and methods acquired through the program's coursework to an applied business analytics problem. Requirements include project selection, submission of project plan, and data collection/analysis.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Business Analytics Majors only.

**BANA 298B. Business Analytics Capstone Project. 4 Units.**

Continuation of the capstone project. Students apply the knowledge and methods acquired through the coursework in the program to an applied business analytics problem. Work includes data analysis, completed research paper, and final presentation.

Prerequisite: BANA 298A

Restriction: Graduate students only. Business Analytics Majors only.

**BANA 299. Individual Study. 1-4 Units.**

Individual study under the direction of a selected faculty member.

Repeatability: May be repeated for credit unlimited times.

## Executive MBA Courses

### **MGMT EP 200. Thinking Strategically in the Digital Age for Executives. 6 Units.**

Focuses on the strategic and organizational challenges that a rapidly changing environment poses to the firm's management and frames them according to Merage's strategic emphasis on analytical decision making, innovation, and information technology.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Administration - Executive Majors only.

### **MGMT EP 201A. Business Analytics: Decision-Making for Executives. 4 Units.**

Methods of statistical inference, emphasizing applications to administrative and management decision problems. Topics include classical estimation, hypothesis testing, regression, correlation, analysis of variance, decision analysis, and forecasting.

Restriction: Graduate students only. Administration - Executive Majors only.

### **MGMT EP 202. Organizational Leadership for Executives. 4 Units.**

Develops a better understanding of individual and group behavior in and across organizations, and the frameworks by which to analyze and understand behavior in complex organizations. Enhances the skills required to manage collaboration and lead. Every other weekend course.

Restriction: Graduate students only. Administration - Executive Majors only.

### **MGMT EP 203A. Financial Reporting Policies for Executives. 4 Units.**

Involves the development, analysis, and interpretation of financial accounting information for external reporting purposes. Emphasis on measurement and valuation issues in decision-making problems and cases. Every other weekend course format.

Restriction: Graduate students only. Administration - Executive Majors only.

### **MGMT EP 203B. Managerial Accounting for Executives. 4 Units.**

Involves developing and using internal financial and non-financial information to help organizations make planning, budgeting, control, operating, and performance evaluation decisions. Every other weekend course format.

Prerequisite: MGMT EP 203A. MGMT EP 203A with a grade of C or better

Restriction: Graduate students only. Administration - Executive Majors only.

### **MGMT EP 204A. Microeconomics for Executives in the Digital Age. 4 Units.**

Provides basic tools for analyzing economic decisions of consumers and firms. Topics include demand and supply analysis, production and cost theory, perfect competition, monopoly, market failures, and introductory game theory. Every other weekend course format.

Restriction: Graduate students only. Administration - Executive Majors only.

### **MGMT EP 204B. Macroeconomics for Executives. 4 Units.**

Introduces use of macroeconomic analysis to manage the business cycle for competitive advantage. 'Business cycle-sensitive' management is explored within the context of marketing, operations management, HRM, merger and acquisition activity, and capital financing and expenditures. Every other weekend course format.

Prerequisite: MGMT EP 204A. MGMT EP 204A with a grade of C or better

Restriction: Graduate students only. Administration - Executive Majors only.

### **MGMT EP 205. Marketing Leadership. 4 Units.**

Introduction to marketing. Topics include developing familiarity with fundamental marketing concepts, theories, and techniques; acquainting students with the type of decisions made by executives, including customer targeting, product, pricing, place, promotion, and research. Every other weekend course format.

Restriction: Graduate students only. Administration - Executive Majors only.

### **MGMT EP 207. Competing with Digital: Technology, Analytics, Business Models. 4 Units.**

Focuses on how information technology is used to create value in organizations through product, process, and strategy innovation. Aims to help managers understand the strategic role of key information technologies in managing organizations. Every other weekend course format.

Restriction: Graduate students only. Administration - Executive Majors only.

**MGMT EP 208. Operational Excellence: Processes, Strategy, and Analytics. 4 Units.**

Introduction to strategic and tactical issues in production and operations management. A blend of quantitative and qualitative considerations. Topics include product planning, process design, capacity management, production planning, inventory control, just-in-time manufacturing, and quality management. Every other weekend course format.

Restriction: Graduate students only. Administration - Executive Majors only.

**MGMT EP 209A. Managerial Finance for Executives. 4 Units.**

Introduces students to financial theory and concepts. Topics include time value of money, valuation of stocks and bonds, capital budgeting, portfolio theory, and capital structure choice. Every other weekend course format.

Prerequisite: MGMT EP 201A and MGMT EP 203A and MGMT EP 204A. MGMT EP 201A with a grade of C or better. MGMT EP 203A with a grade of C or better. MGMT EP 204A with a grade of C or better

Restriction: Graduate students only. Administration - Executive Majors only.

**MGMT EP 210. Strategy for Executives: Foundations and Dynamics . 4 Units.**

Provides conceptual frameworks and techniques to analyze and develop firm strategies. Through case analysis/discussion, helps improve strategic thinking by developing frameworks by which to assess, evaluate, and respond to different business situations. Every other weekend course format.

Prerequisite: MGMT EP 200 and MGMT EP 202 and MGMT EP 205 and MGMT EP 209A. MGMT EP 200 with a grade of C or better. MGMT EP 202 with a grade of C or better. MGMT EP 205 with a grade of C or better. MGMT EP 209A with a grade of C or better

Restriction: Graduate students only. Administration - Executive Majors only.

**MGMT EP 219. Practice of General Management for Executives. 4 Units.**

Teaches the graduating MBA how the best managers actually manage. Students develop a toolkit of proven concepts and practices that will help them succeed as managers at any level.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT EP 225. Negotiations For Executives. 4 Units.**

Using a combination of theory and practice via negotiation simulations, students expand their repertoire of negotiating skills and develop their ability to analyze different negotiation situations and contexts. Every other weekend course format.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT EP 290. Special Topics in Business. 2-4 Units.**

Studies in selected areas of business. Topics addressed vary each quarter.

Repeatability: May be repeated for credit unlimited times.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT EP 295A. Global Business I for Executives. 4 Units.**

Fundamentals of global strategy, economics, and financial issues. Topics include global manager's environment, global strategy, impact of national culture on business systems, strategies and practices, foreign direct investment, corporate governance, human resources, and international marketing. Every other weekend course format.

Restriction: Graduate students only. Administration - Executive Majors only.

**MGMT EP 295B. Global Business II for Executives. 4 Units.**

Emphasizes and reinforces international perspectives contained in the M.B.A. curriculum by providing a week-long intensive seminar abroad in the second year. Scholars and business people from the host country instruct Executive M.B.A. students in designed class sessions and company visits.

Restriction: Graduate students only. Administration - Executive Majors only.

**MGMT EP 296. Executive Leadership. 4 Units.**

Focuses on the conceptual, practical, and personal dimensions of executive leadership. Past and current leadership theories are addressed. Individual personal assessment and diagnosis. Every other weekend course format.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Administration - Executive Majors only.

**MGMT EP 299. Individual Study. 1-8 Units.**

Individual Study under the direction of a selected faculty member.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**Fully Employed MBA Courses****MGMT FE 200. Thinking Strategically in the Digital Age for Managers. 6 Units.**

Focuses on the strategic and organizational challenges that a rapidly changing environment poses to the firm's management and frames them according to Merage's strategic emphasis on analytical decision making, innovation, and information technology.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Admin - Fully Employed Majors only.

**MGMT FE 201A. Business Analytics: Decision-Making for Managers. 4 Units.**

Methods of statistical inference, emphasizing applications to administrative and management decision problems. Topics include classical estimation, hypothesis testing, regression, correlation, analysis of variance, decision analysis, and forecasting. Evening or weekend course format.

Restriction: Graduate students only. Admin - Fully Employed Majors only.

**MGMT FE 201B. Management Science for Managers. 4 Units.**

Uses both prescriptive analysis and risk analysis to explore linear programming models, network problems, and simulation. The goal is to introduce and help students acquire some skills of logical thinking with formal models and improve students' decision making capability.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 202. Organizational Leadership for Managers. 4 Units.**

Develops a better understanding of individual and group behavior in and across organizations; the frameworks by which to analyze and understand behavior in complex organizations; and enhances the skills required to manage collaboration and lead. Evening or weekend course format.

Restriction: Graduate students only. Admin - Fully Employed Majors only.

**MGMT FE 203A. Financial Reporting for Managers. 4 Units.**

Involves the development, analysis, and interpretation of financial accounting information for external reporting purposes. Emphasis on measurement and valuation issues in decision-making problems and cases. Evening or weekend course format.

Restriction: Graduate students only. Admin - Fully Employed Majors only.

**MGMT FE 203B. Driving Profitability Through Managerial Accounting. 4 Units.**

Teaches skills for making vital strategic and tactical decisions (e.g., outsourcing; adding/dropping product lines), to maximize profitability while managing risk. Also covers managerial tools (e.g., budgeting, cost-volume-profit analysis) to drive strategy implementation and incentivize employees. Taught in an evening/weekend format.

Prerequisite: MGMT FE 203A or MGMTMBA 203A. MGMT FE 203A with a grade of C or better. MGMTMBA 203A with a grade of C or better

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 204A. Microeconomics for Managers in the Digital Age. 4 Units.**

Provides basic tools for analyzing economic decisions, the determinants and consequences of market structure and market failure. Topics include demand and supply analysis, production and cost theory, perfect competition, monopoly, and introductory game theory. Evening and weekend course format.

Restriction: Graduate students only. Admin - Fully Employed Majors only.

**MGMT FE 204B. Macroeconomics for Managers. 4 Units.**

Introduces use of macroeconomic analysis to manage the business cycle for competitive advantage. 'Business cycle-sensitive' management is explored within the context of marketing, operations management, HRM, merger and acquisition activity, and capital financing and expenditures. Evening and weekend course format.

Prerequisite: MGMT FE 204A or MGMTMBA 204A

Restriction: Graduate students only. Business Administration Majors only.

**MGMT FE 205. Marketing Management. 4 Units.**

Introduction to marketing. Develops familiarity with fundamental concepts, theories, and techniques in marketing and acquaints students with the type of decisions made by marketing managers including customer targeting, product, pricing, placement, promotion, and research. Evening or weekend course format.

Restriction: Graduate students only. Admin - Fully Employed Majors only.

**MGMT FE 206. Business and Government for Managers. 4 Units.**

Introduces students to the many non-market issues that affect today's managers, such as environment protection, health and safety, intellectual property protection, antitrust, and lobbying. Takes an interdisciplinary approach using economics, political science, public policy, and law. Evening and weekend course.

Restriction: Graduate students only. Admin - Fully Employed Majors only.

**MGMT FE 207. Competing with Digital. 4 Units.**

Focuses on the technological and managerial issues surrounding the development and use of IT in organizations. Examines how technology can be used to execute an organization's business strategy and to enable new, innovative business strategies. Evening or weekend course format.

Restriction: Graduate students only. Admin - Fully Employed Majors only.

**MGMT FE 208. Operational Excellence: Processes, Principles, and Analytics. 4 Units.**

Introduction to strategic and tactical issues in production and operations management. Blend of quantitative and qualitative considerations. Topics include product planning, process design, capacity management, production planning, inventory control, distribution management, just-in-time manufacturing, quality management. Evening or weekend course format.

Restriction: Graduate students only. Admin - Fully Employed Majors only.

**MGMT FE 209A. Finance for Managers. 4 Units.**

Introduces students to financial theory and concepts. Topics include time value of money, valuation of stocks and bonds, capital budgeting, portfolio theory, and capital structure choice. Evening or weekend course format.

Prerequisite: MGMT FE 201A and MGMT FE 203A and MGMT FE 204A

Restriction: Graduate students only. Admin - Fully Employed Majors only.

**MGMT FE 209B. Investments for Managers. 4 Units.**

Foundations of investment management. Theory and empirical evidence related to portfolio theory, market efficiency, and valuation models for equities, bonds, and options. Emphasis on practical applications, including optimal investment strategies. Evening or weekend course format.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 210. Strategy for Managers: Foundations and Dynamics . 4 Units.**

Provides conceptual frameworks and techniques to analyze and develop firm strategies. Through case analysis and discussion, helps improve strategic thinking by developing frameworks by which to assess, evaluate, and respond to different business situations. Evening or weekend course format.

Prerequisite: MGMT FE 200 and MGMT FE 202 and MGMT FE 205 and MGMT FE 209A

Restriction: Graduate students only. Admin - Fully Employed Majors only.

**MGMT FE 211. Networks, Platforms, and Ecosystems . 4 Units.**

Focuses on unique strategic issues raised by multi-sided platform businesses that facilitate interaction among different parties. Combining economic theory and case examples to unpack subtle factors making multi-sided businesses different. From value propositions to pricing strategies to design decisions.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 212. Business Growth Strategies for Managers. 4 Units.**

Focuses on management of growth opportunities in industries where applied innovation, usually in the form of technology, people, or processes, creates distinct competitive advantages.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 214. Entrepreneurship. 4 Units.**

A project course in which student teams develop a business plan to launch a new venture. Drafts of sections of the plan are due throughout the course. Evening or weekend course format.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 215. Strategy in a Digital Age. 4 Units.**

Focuses on applying unchanging basic principles of strategy, economics, and organization to digital technologies. Studies historical and contemporary competitive situations to work out key underlying digital mechanisms that shape competition over time.

Restriction: Master of Business Admin Degree students only.

**MGMT FE 217. Competitive Intelligence for Managers. 4 Units.**

Focuses on how to design a competitive intelligence program, which is a core foundation upon which competitive strategies and execution tactics are developed, assessed, and modified. Evening or weekend course format.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 219. Practice of General Management. 4 Units.**

Designed to teach the graduating M.B.A. students how the best managers actually manage. Students will develop a toolkit of proven concepts and practices that will help them succeed as managers at any level.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 220. Organizational Change in a Digital World for Managers. 4 Units.**

Focuses on the implementation of change. Identifies the features of successful changes in organizations of varying sizes and configurations, with an emphasis on the reasons why individuals resist or embrace change. Evening or weekend course format.

Prerequisite: MGMT FE 202 or MGMTMBA 202

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 222. Performance Management in 21st Century Organizations . 4 Units.**

The key to sustained competitive advantage in a 21st century organization. Performance management is all about aligning employee attitudes and behaviors with firm goals and performance.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 225. Negotiations For Managers. 4 Units.**

Using a combination of theory and practice via negotiation simulations, students expand their repertoire of negotiating skills and develop their ability to analyze different negotiation situations and contexts. Evening or weekend course format.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 227. Global Negotiations. 4 Units.**

Emphasizes economic, political, social, and cultural environments of international business negotiations. Topics include self-assessment/analysis, environmental analysis, international team building, negotiation processes and strategies, resources, skills, pre-negotiation preparations, agreements, and post-contract negotiations. Specific emphasis will be placed on cross-cultural problem-solving.

Restriction: Graduate students only.

**MGMT FE 228. International Management for Managers. 4 Units.**

Introduction to the effects of different national cultures, and political and economic systems on the assumptions, expectations, organizational practices, and organizational forms needed to conduct cross-national organizational work. Evening or weekend course format.

Prerequisite: MGMT FE 202

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 229. Building Your Leadership Toolkit. 2 Units.**

Provides insights/perspectives about the study and development of leadership. Helps students answer three questions: Where am I currently as a leader? What tools can I use to improve my leadership? What is my plan for the future as a leader.

Prerequisite: MGMT FE 202 or MGMTMBA 202. MGMT FE 202 with a grade of C or better. MGMTMBA 202 with a grade of C or better

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 231A. Financial Statement Analysis and Valuation for Managers I. 4 Units.**

Develops skills essential to using financial statements for business analysis by examining financial information quality, profitability and risk analysis, earnings management, revenue recognition, asset recognition and valuation, and how financial reporting is related to the business environment and managerial incentives.

Prerequisite: MGMT FE 203A or MGMT MBA 203A. MGMT FE 203A with a grade of C or better. MGMT MBA 203A with a grade of C or better

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 231B. Financial Statement Analysis and Valuation for Managers II. 4 Units.**

Focuses on the financial statement analysis of liabilities and stockholders' equity. Topics include forecasting financial statements, earnings-based valuation models, accounting analysis of mergers and acquisitions, leases, bankruptcy prediction, and derivatives. Evening or weekend course format.

Prerequisite: MGMT FE 203A or MGMT MBA 203A. MGMT FE 203A with a grade of C or better. MGMT MBA 203A with a grade of C or better

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 233. Wealth Management for Managers. 4 Units.**

Aims to integrate behavioral finance, psychology, personal financial planning, risk management, and asset management to provide students with the theoretical and practical knowledge to effectively build and manage wealth.

Restriction: Admin - Fully Employed Majors only.

**MGMT FE 245. FinTech and the Digital Economy. 4 Units.**

Provides working knowledge of the role of IT-enabled innovation in financial markets to help students acquire an understanding of broad economic issues that are of wide applicability in many areas of FinTech. Both qualitative analysis and quantitative applications are explored.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 246A. Introduction to the Real Estate Process. 4 Units.**

Introductory survey course providing an understanding of the real estate market. Topics include real estate economics, valuation, feasibility, investment, tax considerations, financing, development, and corporate real estate asset management. Hands-on lectures, with guest lectures by real estate professionals.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 246B. International Real Estate. 4 Units.**

Survey of international real estate investment opportunities. Topics include size and breadth; opportunities and challenges (tax treatment, currency/political/market risks, transaction costs, lack of local knowledge); ownership vehicles (REITs, joint ventures, equity funds, etc.). Global cast of guest lecturers supplements lectures.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 246C. Real Estate Capital Markets. 4 Units.**

Understanding the four sectors of real estate capital markets: public debt, private debt, public equity, private equity; estate investment, key players, investment types drive capital solutions, underwriting strategies, and vehicle structuring, debt versus equity source characteristics and implications for returns.

**MGMT FE 246D. The Real Estate Development Process. 4 Units.**

Nature and composition of development community and development process. Emphasis on role of conflicting interests, values and goals, and market uncertainty. Special attention paid to deal structuring and risk management. Lectures, guest lecturers, team projects evaluating actual development project.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 246F. Seminar in Management of the Real Estate Enterprise. 4 Units.**

Beyond 'The Deal' to management of the real estate enterprise itself. Explores aspects of decision-making focused upon strategic objectives: goal setting, legal/tax structures, family-owned firms, going public, corporate ethics, capital structure, diversification, core competencies, technology. Guest professionals.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 246G. Applied Real Estate Security Analysis and Portfolio Management. 4 Units.**

Provides an understanding of the public real estate investment trust (REIT) market and its place in modern investment strategies, presents methods for analyzing and valuing companies, and introduces basic concepts for constructing and managing a real estate investment portfolio.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 247. Venture Capital and Private Equity for Managers. 4 Units.**

Geared to students who are seeking a career in finance and/or in working with venture capital firms, private equity/buyout firms, investment banks, commercial lenders, mezzanine fund investors, corporate finance, and entrepreneurial firms.

Restriction: Master of Business Admin Degree students only.

**MGMT FE 249. Derivatives for Managers. 4 Units.**

Studies financial derivatives instruments, including forward contracts, futures, swaps, and options. Advanced applications of these instruments, including pricing and risk management, are emphasized. Evening or weekend course format.

Prerequisite: MGMT FE 209A or MGMTMBA 209A

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 251A. Marketing Research for Managers. 4 Units.**

Qualitative and quantitative marketing techniques that generate customer insights. Discusses problem formulation, data collection, statistical analyses, formulating managerial recommendations, implementation, and how research is used by companies. Evening or weekend course format.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 252A. Managing Advertising and Communications. 4 Units.**

Integrated marketing communications, including advertising, sale promotions, public relations, and direct mail. Exposure to elements of a communications plan; marketing research, including copy testing and tracking; creating brand value; media strategies; metrics. Evening or weekend course format.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 255. Business to Business Selling and Sales Management. 4 Units.**

Sales is the interpersonal process where the needs of the buyer are uncovered and satisfied, to the long-term benefit of both parties. Students explore sales force management and personal selling in a dynamic, digital environment.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 257. Marketing on the Internet for Managers. 4 Units.**

Examines the Internet's impact on traditional methods of marketing. Discusses how to capitalize on and increase the Internet's utility as a tool that can increase marketing effectiveness, efficiency, and competitiveness. Evening or weekend course format.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 258. Marketing Strategies for High Technology for Managers. 4 Units.**

Framework and tools for managing technology-intensive businesses. Product and pricing policies; network externalities; compatibility concerns; systems competitions; technological and market uncertainty; technology licensing strategies; contracting in high-tech markets; product line design; product bundling strategies; usage-based pricing; pricing of networks; auctions.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 259. Strategic Brand Management for Managers. 4 Units.**

Addresses important branding decisions faced by organizations. A computer simulation allows students hands-on experience in making decisions about their brand and seeing the results of those decisions. Evening or weekend course format.

Prerequisite: MGMT FE 205 or MGMTMBA 205

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 273. Business Intelligence for Analytical Decisions for Managers. 4 Units.**

Introduces methods to mine data repositories for business intelligence to facilitate analytical decision-making. Topics include clustering for market segmentation; association rules to discover relationships between different purchase decisions; Naive-Bayes classification techniques for decision making using decision-trees. Evening or weekend format.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 278. Data and Programming for Analytics. 4 Units.**

Challenges and teaches students to handle data that come in a variety of forms and sizes. Guides students through the whole data management process, from initial data acquisition to final data analysis.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 279. Digital Strategies and Markets. 4 Units.**

Examines how online social media are impacting organizations and markets. Topics include collective intelligence, online social influence, social networks, and social media monetization. The target audience consists of students interested in IT consulting, competitive strategy, marketing, and entrepreneurship.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 281. Analytical Decision Models for Managers. 4 Units.**

An introduction of analytics tools for decision making. Topics include linear and non-linear optimization and simulation models. Excel Solver will be used as the optimization tool and Risk Solver Platform will be used as the simulation tool. Evening or weekend.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 282. Revenue Management for Managers. 4 Units.**

Students learn to apply advanced analytics to earn incremental revenue through the efficient use of resources and science-based pricing methods. Statistics and optimization (using Excel and Excel Solver). Industry-specific implementation issues.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 283. Decision Analysis for Managers. 4 Units.**

Models of preferences and uncertainty; exercises in creative problem solving. Assessment and use of preference models for private, public, and not-for-profit decision making. Assessment and use of subjective probabilities in decision making. Evening or weekend course format.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 288. Predictive Analytics. 4 Units.**

Deals with predicting entities, such as demand for a product or service (forecasting) and predicting membership of known groups (classification). Blends methodologies of forecasting and data mining and focuses on the application of these methods to managerial problems and decision-making.

Restriction: Graduate students only.

**MGMT FE 290. Special Topics in Business. 2-4 Units.**

Studies in selected areas of Business. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 292. Business Law for Managers. 4 Units.**

Detailed study from a business viewpoint of contract theories, assignments, delegation of duties, third-party beneficiary contracts, defenses to consensual contracts, types of conditions, methods of excusing conditions, remedies, and types of damages. Evening or weekend course format.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 293. Information, Communication, and Coordination: Practicum for Analyzing Organizations. 4 Units.**

Use of contextual inquiry and ethnographic methods to assess real world contexts. Exploring culture, power, physical layout, and the role of artifacts in information flow, communication practices, and coordination through qualitative fieldwork in an organization.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMT FE 294. EDGE for Managers. 4 Units.**

Explores the crucial roles of external forces: globalization, technology, shifting demographics - as transformative catalysts for change - opening markets, erasing boundaries, and transforming industries. This course prepares future business leaders to innovate and successfully compete.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 295A. Introduction to Global Business for Managers.**

Fundamentals of global strategy, economics, and financial issues. Topics include global manager's environment, global strategy, impact of national culture on business systems, strategies and practices, foreign direct investment, corporate governance, human resources, and international marketing. Evening and weekend course format.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Admin - Fully Employed Majors only.

**MGMT FE 295B. Global Business for Managers. 4 Units.**

Emphasizes and reinforces international perspectives contained in the FEMBA curriculum by providing a week-long intensive seminar abroad in the second year. Scholars and business people from the host country instruct FEMBA students in specially designed class sessions and company visits.

Prerequisite: MGMT FE 295A. MGMT FE 295A with a grade of B or better

Restriction: Graduate students only. Admin - Fully Employed Majors only.

**MGMT FE 296. Executive Leadership. 6 Units.**

Provides perspectives on leadership. Helps students answer three questions: Where am I currently as a leader? What tools can I use to improve my leadership? What is my plan for the future as a leader? Evening or weekend course format.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 298. Merage Consulting Projects for Managers. 4 Units.**

Provides students the opportunity to put into practice concepts, skills, and tools acquired in other parts of the MBA program. Seminars augment internship experiences with analyses of relevant administrative issues.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT FE 299. Individual Directed Study. 1-8 Units.**

Individual study under the direction of a selected faculty member.

Restriction: Graduate students only. Master of Business Admin Degree students only.

## Health Care MBA Courses

**MGMT HC 200. Responding to Dynamic Times: Thinking Strategically for Healthcare Executives. 7 Units.**

Focuses on the strategic and organizational challenges that a rapidly changing environment poses to the firm's management and frames them according to Merage's strategic emphasis on analytical decision making, innovation, and information technology.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 201A. Statistics for Healthcare Executives . 5 Units.**

Methods of statistical inference, emphasizing applications to administrative and management decision problems. Topics include classical estimation, hypothesis testing, regression, correlation, analysis of variance, decision analysis, and forecasting.

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 201B. Operations Analytics for Healthcare Executives. 5 Units.**

An introduction to computer-based models for decision making. Topics include optimization (linear programming, integer programming, network flow models) and computer simulation. Uses spreadsheets extensively, including Excel built-in and add-in packages. Once a month weekend course format.

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 202. Organizational Behavior for Healthcare Executives. 5 Units.**

Develops a better understanding of individual and group behavior in and across organizations, the frameworks by which to analyze and understand behavior in complex organizations; enhances the skills required to manage collaboration and lead. Once a month weekend course format.

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 203A. Financial Reporting for Healthcare Executives. 5 Units.**

Involves the development, analysis, and interpretation of financial accounting information for external reporting purposes. Emphasis on measurement and valuation issues in decision-making problems and cases. Once a month weekend course format.

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 203B. Managerial Accounting for Healthcare Executives. 5 Units.**

Involves developing and using internal financial and non-financial information to help organizations make planning, budgeting, control, operating, and performance evaluation decisions. Once a month weekend course format.

Prerequisite: MGMT HC 203A

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 204A. Microeconomics for Healthcare Executives. 5 Units.**

Provides basic tools for analyzing economic decisions of consumers and firms. Topics include demand and supply analysis, production and cost theory, perfect competition, monopoly, market failures, and introductory game theory. Once a month weekend course format.

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 205. Marketing for Healthcare Executives. 5 Units.**

Introduction to marketing. Develops familiarity with fundamental marketing concepts, theories, and techniques, and acquainting students with the type of decisions made by marketing managers, including customer targeting, product, pricing, place, promotion, and research. Once a month weekend course format.

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 206. Business and Government for Healthcare Executives. 2 Units.**

Introduces students to the many non-market issues that affect today's managers: environment protection, health and safety, intellectual property protection, antitrust, and lobbying. Takes an interdisciplinary approach using economics, political science, public policy, and law. Once a month weekend course format.

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 207. Competing with Digital in Healthcare: Analytics, Platforms, and Business Models. 5 Units.**

Focuses on how information technology is used to create value in healthcare-related organizations through product, process, and strategy innovation. Aims to help managers and healthcare professionals understand the strategic role of technology. Every other weekend course format.

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 209A. Managerial Finance for Healthcare Executives. 5 Units.**

Introduces students to financial theory and concepts. Topics include time value of money, valuation of stocks and bonds, capital budgeting, portfolio theory, capital structure choice. Once a month weekend course format.

Prerequisite: MGMT HC 201A and MGMT HC 203A and MGMT HC 204A

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 209B. Investments for Healthcare Executives. 3 Units.**

Foundations of investment management. Theory and empirical evidence related to portfolio theory, market efficiency, and valuation models for equities, bonds, and options. Emphasis on practical applications, including optimal investment strategies. Once a month weekend course format.

Prerequisite: MGMT HC 209A

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 210. Strategic Management for Healthcare Executives. 5 Units.**

Provides conceptual frameworks and techniques to analyze and develop firm strategies. Through case analysis and discussion, helps students improve analytical and strategic thinking by which to assess, evaluate, and respond to different business situations. Once a month weekend course format.

Prerequisite: MGMT HC 200 and MGMT HC 202 and MGMT HC 205 and MGMT HC 209A

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 225. Negotiations For Healthcare Executives. 5 Units.**

Using a combination of theory and practice via negotiation simulations, students expand their repertoire of negotiating skills and develop their ability to analyze different negotiation situations and contexts. Once a month weekend course format.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT HC 267. Understanding Managed Care. 2-5 Units.**

This course is designed to increase understanding of the various concepts of managed health care with an emphasis on the organizational processes required to make it work, and explore the economics and financial pressures these organizations face.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT HC 290. Special Topics in Business. 2-5 Units.**

Studies in selected areas of business. Topics addressed vary each quarter.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMT HC 295. Federal Policy in Health Care. 8 Units.**

National/international one-week residential course exploring political analysis as related to management of health care organizations. Topics include political environment of management, concepts, and processes central to political analysis, bureaucratic politics, politics, and the manager.

Restriction: Graduate students only. Administration - Health Care Majors only.

**MGMT HC 296. Leadership for Healthcare Executives. 7 Units.**

Focuses on the conceptual, practical, and personal dimensions of executive leadership. Past and current leadership theories are addressed. Individual personal assessment and diagnosis. Once a month weekend course format.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Administration - Health Care Majors only.

## Innovation and Entrepreneurship Courses

**INNO 202. Leadership for Entrepreneurs. 4 Units.**

Assists experienced and inexperienced entrepreneurs with some of the challenges of managing others, and helps them build their understanding and skills so they can become more successful managers of people.

Restriction: Graduate students only.

**INNO 203. Financial Accounting for Entrepreneurs. 2 Units.**

Provides the building blocks of financial accounting that are essential to entrepreneurs. Covers financial ratios and statements, including forecasting financial statements, basic transaction analysis, and generally accepted accounting principles.

Restriction: Graduate students only.

**INNO 205. Marketing for Entrepreneurs. 4 Units.**

Develops familiarity with fundamental concepts, theories, and techniques in marketing, and acquaints students with the type of decisions made by marketing managers including customer targeting, product, pricing, placement, promotion, and research.

Restriction: Graduate students only.

**INNO 209. Managerial Finance for Entrepreneurs. 2 Units.**

Provides the building blocks of finance knowledge that are essential to entrepreneurs. Covers investment and financing decisions, including the time value of money, cash flow creation, cost of capital, and capital budgeting.

Restriction: Graduate students only.

**INNO 211. MIE Pre-Accelerator .**

Prepares students for the New Venture Competition in spring quarter. Students form teams to create a startup, submit concept paper, pitch ideas, and attend workshops throughout the academic year.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Master of Innovation and Entrepreneurship Degree students only. Graduate students only.

**INNO 212. Business Growth Strategies for Entrepreneurs. 4 Units.**

Focuses on management of growth opportunities in industries where applied innovation, usually in the form of technology, people, or processes, creates distinct competitive advantages.

Restriction: Graduate students only.

**INNO 214. Entrepreneurship. 4 Units.**

Student teams develop a business plan to launch a new venture. Drafts of sections of the plan are due throughout the course.

Restriction: Master of Innovation and Entrepreneurship Degree students only.

**INNO 215. Lean Startup. 4 Units.**

Exposes students to an entrepreneurial experience with the same pressures and demands of an early-stage startup to provide a real-world, hands-on learning experience in starting a company.

Restriction: Master of Innovation and Entrepreneurship Degree students only.

**INNO 218. Venture Capital for Entrepreneurs. 2 Units.**

Overview of venture capital and private equity, which constitute the alternative asset class (as opposed to conventional investments). Many start-up and entrepreneurial firms require substantial capital, and venture capital and private equity organizations finance these high-risk but potentially high-reward companies.

Restriction: Graduate students only.

**INNO 252D. New Product Development for Entrepreneurs. 4 Units.**

Designed to introduce the new product development process and techniques to identify markets, develop new product ideas, measure consumer preferences, position and design new products, and test them prior to launch. Evening or weekend course format.

Restriction: Graduate students only.

**INNO 257. Marketing on the Internet for Entrepreneurs. 4 Units.**

Examines impact of the internet on traditional methods of marketing. Discusses how to capitalize on and increase the internet's utility as a tool that can increase marketing effectiveness, efficiency, and competitiveness. Evening or weekend course format.

Restriction: Graduate students only.

**INNO 275. Innovation Internship. 2-4 Units.**

Students apply innovative and creative knowledge obtained from classroom theory through work experiences. Provides knowledge of career opportunities, an understanding of the role innovation plays in business environments, and preparation to become an entrepreneur.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Master of Innovation and Entrepreneurship Degree students only.

**INNO 290. Special Topics in Innovation and Entrepreneurship. 4 Units.**

Studies in selected areas of innovation and entrepreneurship. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**INNO 292. Business Law for Entrepreneurs. 2 Units.**

Focuses on educating individuals starting, or investing in, a new business in the U.S. Provides an overview to common legal issues faced by entrepreneurs, such as business formation and structure, governance and employment contracts, and intellectual property and taxation.

Restriction: Graduate students only.

**INNO 294. Edge: Innovation in the New Digital Age. 4 Units.**

Explores the strategic and operational issues that business leaders face in adapting to the new business environment, what we call innovating, managing, and competing at the edge.

Restriction: Master of Innovation and Entrepreneurship Degree students only.

**INNO 298. Merage Consulting Projects for Entrepreneurs. 4 Units.**

Provides students the opportunity to put into practice concepts, skills, and tools acquired in other parts of the MBA program. Seminars augment internship experiences with analyses of relevant administrative issues.

Restriction: Graduate students only.

**INNO 299. Individual Study. 1-8 Units.**

Individual study under the direction of a selected faculty member.

Repeatability: May be repeated for credit unlimited times.

## Management MBA Courses

**MGMTMBA 200. Thinking Strategically in the Digital Age. 4 Units.**

Focuses on the strategic and organizational challenges that a rapidly changing environment poses to the firm's management and frames them according to Merage's strategic emphasis on analytical decision making, innovation, and information technology.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only. Business Administration Majors only.

**MGMTMBA 201A. Business Analytics: Decision-Making. 4 Units.**

Methods of statistical inference, emphasizing applications to administrative and management decision problems. Topics include classical estimation and hypothesis testing, regression, correlation, analysis of variance, decision analysis, and forecasting.

Prerequisite: Courses in basic statistics with probability.

Restriction: Graduate students only. Business Administration Majors only.

**MGMTMBA 201B. Management Science. 4 Units.**

An introduction to computer-based models for decision making. Topics include optimization (linear programming, integer programming, network flow models) and computer simulation. Uses spreadsheets extensively, including Excel built-in and add-in packages.

Restriction: Graduate students only. Business Administration Majors only.

**MGMTMBA 202. Organizational Leadership for Management. 4 Units.**

Develops a better understanding of the causes and consequences of individual and group behavior, and the frameworks by which to analyze and understand complex organizations; and enhances the skills required to manage and lead an organization.

Restriction: Graduate students only. Business Administration Majors only.

**MGMTMBA 203A. Financial Reporting. 4 Units.**

Involves the development, analysis, and interpretation of financial accounting information for external reporting purposes.

Restriction: Graduate students only. Business Administration Majors only.

**MGMTMBA 203B. Driving Profitability Through Management Accounting. 4 Units.**

Teaches core skills for making vital strategic and tactical decisions (e.g., outsourcing; adding/dropping product lines), to maximize profitability while managing risk. Also covers operational and managerial tools (e.g., budgeting, planning, cost-volume-profit analysis) to drive strategy implementation and incentivize employees.

Prerequisite: MGMTMBA 203A or MGMT FE 203A

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 204A. Microeconomics for Management in the Digital Age. 4 Units.**

Provides basic tools for analyzing economic decisions of consumers and firms. Topics include demand and supply analysis, production and cost theory, perfect competition, monopoly, market failures, and introductory game theory.

Restriction: Graduate students only. Business Administration Majors only.

**MGMTMBA 204B. Macroeconomics for Management. 4 Units.**

Introduces use of macroeconomic analysis to manage the business cycle for competitive advantage. Such 'business cycle-sensitive' management is explored within the context of marketing, operations management, HRM, merger and acquisition activity, and capital financing and expenditures.

Prerequisite: MGMTMBA 204A or MGMT FE 204A

Restriction: Graduate students only. Business Administration Majors only.

**MGMTMBA 205. Marketing Principles. 4 Units.**

Introduction to the field of marketing. Objectives include developing familiarity with fundamental concepts, theories, and techniques in marketing, and acquainting students with the type of decisions made by marketing managers including customer targeting, product, pricing, distribution, promotion, and research.

Restriction: Graduate students only. Business Administration Majors only.

**MGMTMBA 207. Competing with Digital: Technology, Analytics, and Platforms. 4 Units.**

Focuses on the technological and managerial issues surrounding the development and use of IT in organizations. Examines role of technology in organizations, how technology can be used to execute an organization's business strategy and to enable new, innovative business strategies.

Restriction: Graduate students only. Business Administration Majors only.

**MGMTMBA 208. Operational Excellence: Processes, Models, and Analytics. 4 Units.**

Introduction to strategic and tactical issues in production and operations management. A blend of quantitative and qualitative considerations. Topics include product planning, process design, capacity management, production planning, inventory control, distribution management, just-in-time manufacturing, quality management.

Restriction: Graduate students only. Business Administration Majors only.

**MGMTMBA 209A. Managerial Finance. 4 Units.**

Introduces students to financial theory and concepts. The main topics covered are time value of money, valuation of stocks and bonds, capital budgeting, portfolio theory, capital structure choice.

Prerequisite: MGMTMBA 201A and MGMTMBA 203A and MGMTMBA 204A

Restriction: Graduate students only. Business Administration Majors only.

**MGMTMBA 209B. Investments. 4 Units.**

Foundations of investment management. Theory and empirical evidence related to portfolio theory, market efficiency, asset pricing models, factor models, and option pricing theory. Students are expected to combine market research results and electronic information sources to create optimal investment strategies.

Prerequisite: MGMTMBA 209A or MGMT FE 209A

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 210. Strategy: Foundations and Dynamics. 4 Units.**

Provides conceptual frameworks and techniques to analyze and develop firm strategies. Through case analysis and discussion, helps improve strategic thinking by developing frameworks by which to assess, evaluate, and respond to different business situations.

Prerequisite: MGMTMBA 200 and MGMTMBA 202 and MGMTMBA 205 and MGMTMBA 209A

Restriction: Graduate students only. Business Administration Majors only.

**MGMTMBA 211. MBA Proseminar.**

Provides students in the Merage School Full-time MBA Program with information and practical skills for success in the MBA program, and for business career planning.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMTMBA 213. New Venture Management. 4 Units.**

Teaches students how to launch and manage a new business by providing an overview of the start-up process, including how to identify new business opportunities and how to develop a sound operating model, value new ventures, and understand capital financing.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 214. Entrepreneurship: Planning the New Venture. 4 Units.**

Project course in which student teams develop a business plan to launch a new venture. The final business plan is presented to an expert panel.

Prerequisite: (MGMTMBA 202 or MGMT FE 202) and (MGMTMBA 205 or MGMT FE 205) and (MGMTMBA 210 or MGMT FE 210)

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 215. Global Competitive Strategy. 4 Units.**

Explores advanced topics in managing the geographic scope of the firm: locating activities in the right places, which markets to penetrate, horizontal integration across countries, and multinational partnering.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 217. Competitive Intelligence. 4 Units.**

The course focuses on how to design a competitive intelligence program which is a core foundation upon which competitive strategies and execution tactics are developed, assessed, and modified.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 218. Business Dynamics. 4 Units.**

Enhances students' analytical skills by analyzing complex challenges that businesses face and to quickly implement a winning response.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 220. Organizational Change. 4 Units.**

Focuses on the implementation of change, including identifying the features of successful change in organizations of varying sizes and configurations, with an emphasis on the reasons why individuals resist or embrace change.

Prerequisite: MGMTMBA 202 or MGMT FE 202

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 225. Negotiations. 4 Units.**

Using a combination of theory and practice via negotiation simulations, students expand their repertoire of negotiating skills and develop their ability to analyze different negotiation situations and contexts.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 228. International Management. 4 Units.**

Introduction to the effects of different national cultures, political and economic systems on the assumptions, expectations, organizational practices, and organizational forms needed to conduct cross-national organizational work.

Prerequisite: MGMTMBA 202 or MGMT FE 202

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 229. Leadership Strategies. 4 Units.**

Provides insight/perspectives about the study and development of leadership. Helps students answer three questions: Where am I currently as a leader? What tools can I use to improve my leadership? What is my plan for the future as a leader. Materials fee.

Prerequisite: MGMTMBA 202 or MGMT FE 202. MGMTMBA 202 with a grade of C or better. MGMT FE 202 with a grade of C or better

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMTMBA 231A. Financial Statement Analysis and Valuation I. 4 Units.**

Develops skills essential to using financial statements for business analysis by examining financial information quality, profitability and risk analysis, earnings management, revenue recognition, asset recognition and valuation, and how financial reporting is related to the business environment and managerial incentives.

Prerequisite: MGMTMBA 203A or MGMT FE 203A. MGMTMBA 203A with a grade of C or better. MGMT FE 203A with a grade of C or better

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMTMBA 243. Bonds and Fixed Income. 4 Units.**

Fixed-income markets include treasury bonds, corporate bonds, and asset-backed securities. Focuses on techniques and methodologies for valuing different types of debt as well as their uses.

Prerequisite: (MGMTMBA 209A or MGMT FE 209A) and (MGMTMBA 209B or MGMT FE 209B)

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 244. Multinational Finance. 4 Units.**

Focuses on financial issues facing multinational corporations, the most important of which is the management of foreign exchange risk. Other topics include investments and financing decisions in international capital markets.

Prerequisite: MGMTMBA 209A or MGMT FE 209A

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 245. FinTech and the Digital Economy for Business. 4 Units.**

Provides working knowledge of the role of IT-enabled innovation in financial markets to help students acquire an understanding of broad economic issues that are of wide applicability in many areas of FinTech. Both qualitative analysis and quantitative applications are explored.

Restriction: Master of Business Admin Degree students only.

**MGMTMBA 247. Venture Capital and Private Equity. 4 Units.**

Geared to students who are seeking a career in finance and/or in working with venture capital firms, private equity/buyout firms, investment banks, commercial lenders, mezzanine fund investors, corporate finance, and entrepreneurial firms.

Restriction: Master of Business Admin Degree students only.

**MGMTMBA 248. Corporate Valuation. 4 Units.**

Studies cases that expand concepts covered in the introductory corporate finance course and focuses on estimating the value of firms and projects in diverse settings.

Prerequisite: (MGMTMBA 209A or MGMT FE 209A) and (MGMTMBA 209B or MGMT FE 209B)

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 249. Derivatives. 4 Units.**

Studies financial derivatives instruments, including forward contracts, futures, swaps, and options. Advanced applications of these instruments, including pricing and risk management, are emphasized.

Prerequisite: MGMTMBA 209A or MGMT FE 209A

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 250. Consumer Behavior. 4 Units.**

Examines the consumer decision-making process with an emphasis on application of concepts and research findings from behavioral sciences for solution of marketing problems. Includes models of consumer decision-making, information processing theories, and sociological influences on consumer decision-making.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 251A. Marketing Research. 4 Units.**

Covers conducting marketing research to generate consumer insights that will drive sales, market share, and profitability and/or realize other quantitative objectives. Discusses problem formulation, data collection, statistical analyses, formulating managerial recommendations, implementation, and how research is used by companies.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 252D. New Product Development. 4 Units.**

Designed to introduce the new product development process and techniques to identify markets, develop new product ideas, measure consumer preferences, position and design new products, as well as test them prior to launch. Analytical thinking and techniques are emphasized.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 254. Global Marketing. 4 Units.**

Provides an understanding of the problems and perspectives of marketing across national boundaries, and develops analytical abilities for structuring and controlling marketing programs related to overseas business. Financial, legal, and cultural barriers to international marketing are emphasized.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 257. Marketing on the Internet. 4 Units.**

Examines the impact of the Internet on traditional methods of doing marketing, and explores its existing and future uses. Discusses how to capitalize on and increase the Internet's utility as a tool that can increase marketing effectiveness, efficiency, and competitiveness.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMTMBA 262. Managing Nonprofits. 4 Units.**

Focuses on the similarities and differences between for-profit and nonprofit organizations, with emphasis on the management of nonprofits. Topics include: marketing, fundraising, staffing, management/director relationships, use of volunteers, and emerging career opportunities.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 263. Economics of Information. 4 Units.**

Provides students with an understanding of fundamental economic principles governing information technology industries. Particularly, implications for optimal pricing strategies, determinants/consequences of market structure, and the role and rationale for government intervention and the implications for business strategy.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMTMBA 270. Data Camp for Managers. 2 Units.**

Provides an overview of R for basic data analytics and visualization with hands-on training using Data Camp. This project is meant to foreshadow the analysis that students will be doing in their electives.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMTMBA 274. Data and Programming for Analytics. 4 Units.**

Challenges and teaches students to handle data that come in a variety of forms and sizes. Guides students through the whole data management process, from initial data acquisition to final data analysis.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMTMBA 276. Analytics and Technology Consulting. 4 Units.**

Focuses on elements of analytics and personalized engagement. Students work on a project using a real-life business problem and data to get hands-on understanding.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMTMBA 277. Blockchain and Cryptocurrency. 2 Units.**

Provides students with an introduction to and an architectural understanding of 'why' and 'how' Blockchain was created, an overview of altcoins, and provide an understanding of the challenges and risks involved with this new Blockchain technology and cryptocurrency landscape.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMTMBA 279. Digital Strategies and Markets. 4 Units.**

Examines how online social media are impacting organizations and markets. Topics include collective intelligence, online social influence, social networks, and social media monetization. The target audience consists of students interested in IT consulting, competitive strategy, marketing, and entrepreneurship.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 283. Decision Analysis. 4 Units.**

Models of preferences and uncertainty; exercises in creative problem solving. Assessment and use of preference models (von Neumann-Morgenstern expected utility and measurable value functions) for private, public, and not-for-profit decision making. Assessment and use of subjective probabilities in decision making.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 285. Supply Chain Analytics. 4 Units.**

Introduces students to the use of advanced analytics and data-driven methods to successfully manage uncertainty in supply chains, meeting customer needs in the most timely and cost effective manner, and driving business disruptions through innovations.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMTMBA 286. Fundamentals of Business Analytics. 4 Units.**

Focuses on the business understanding, on the process of business analytics, and teaching a framework to understand the key drivers that could be fed into a mathematical model. Emphasizes how to make use of information to drive digital change.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMTMBA 287. Project Management. 4 Units.**

Examines the fundamental components of project management and its role in the modern corporation. Emphasis on how to initiate, implement, control, and terminate a project. Use of computer package for project management.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 288. Predictive Analytics for Business. 4 Units.**

Deals with predicting entities, such as demand for a product or service (forecasting) and predicting membership of known groups (classification). Blends methodologies of forecasting and data mining and focuses on the application of these methods to managerial problems and decision-making.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMTMBA 290. Field Studies in Management. 2-4 Units.**

Each quarter a number of special topic seminars are offered in the 290 series. Examples of possible topics include Communication in Organizations, Power and Authority in Organizations, International Management, Health Care Administration, Real Estate Development.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 292. Business Law. 4 Units.**

Detailed study from a business viewpoint of contract theories, assignments, delegation of duties, third-party beneficiary contracts, defenses to consensual contracts, types of conditions, methods of excusing conditions, remedies, and types of damages.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 293. Biotech Management . 5 Units.**

Taught jointly by Bio Sci and Merage School faculty, the course addresses fundamental aspects within, and associated with, the biotechnology industry. Curriculum is focused largely on management issues, including finance, product development, pharmaceuticals, project management, regulatory affairs, and ethics.

Same as MOL BIO 253.

Restriction: Graduate students only. Biotechnology Majors only.

**MGMTMBA 294. Edge. 4 Units.**

Edge explores the crucial roles of external forces - globalization, technology, shifting demographics - as transformative catalysts for change - opening markets, erasing boundaries, and transforming industries. This course prepares future business leaders to innovate and compete successfully.

Restriction: Graduate students only. Master of Business Admin Degree students only.

**MGMTMBA 295B. Micromarketing with Digital Footprints. 2-4 Units.**

How businesses use digital footprints from household data and point-of-purchase data to customize product offerings and delivery, store locations, advertising, and promotions to households and neighborhoods with the highest market potential. Hands-on experience with Geographic Information System (GIS) mapping software.

Corequisite: MGMTMBA 205 or MGMT FE 205.

Restriction: Master of Business Admin Degree students only. Graduate students only.

**MGMTMBA 298. Merage Consulting Projects. 4 Units.**

Provides students the opportunity to put into practice concepts, skills, and tools acquired in other parts of the M.B.A. program. Seminars augment internship experiences with analyses of relevant administrative issues.

Restriction: Second-year MBA students only.

**MGMTMBA 299. Individual Study . 1-12 Units.**

Individual study under the direction of the selected faculty member.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Management PhD Courses

### **MGMTPHD 291. Ph.D. Special Topics Seminar. 2-12 Units.**

Each quarter a number of special topic seminars are offered in the 291 series for Ph.D. students. Examples include topics such as methods seminar, experimental design, qualitative research, structural equation modeling.

Repeatability: Unlimited as topics vary.

### **MGMTPHD 292. Pre-Colloquium Seminar . 0-2 Units.**

Seeks to facilitate discussion of upcoming Colloquium research papers increasing the likelihood that Ph.D. students are active participants in all of the Colloquia. Active participation enhances exposure of Ph.D. students to visiting scholars.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only. Management Majors only.

### **MGMTPHD 297A. Doctoral Proseminar. 2 Units.**

Analysis of the central theories and theoretical controversies in the field of management. Examination of the formal education for managerial careers and exploration of issues relating to professional careers in research and scholarship in the field of management.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

### **MGMTPHD 297B. University Teaching.**

Designed to prepare students for teaching career; incorporates seminars addressing topics of classroom dynamics, syllabus preparation, teaching techniques; establishes mentor relationship with faculty member in student's teaching area, provides classroom experience and includes option of videotape analysis of teaching style.

Restriction: Graduate students only.

### **MGMTPHD 297D. Philosophy of Science. 4 Units.**

Provides exposure to fundamental issues regarding how knowledge is created, defended, and replaced both in the natural and social sciences. Covers current debates on the meaning of the term "scientific" and the validity of the scientific method.

Restriction: Graduate students only.

### **MGMTPHD 297F. Doctoral Research Methods. 4 Units.**

An introduction to the fundamentals of social science research: theory development, research design, methods, data management, and writing for scholarly publications; for doctoral students intending scholarly research careers. Involves hands-on practice in formulating hypotheses, designing research, and conducting journal reviews.

Restriction: Graduate students only. Management Majors only.

### **MGMTPHD 297H. Experimental Design. 4 Units.**

Advanced course provides experience in planning and implementing an experiment or quasi-experiment, including choice of topic, study design, data analysis, and manuscript preparation. Data analysis topics include ANOVA, ANCOVA, repeated measures, logistic regression, chi-square, and tests of mediation.

Restriction: Graduate students only.

### **MGMTPHD 297I. Applied Multivariate Statistics. 2-4 Units.**

Provides an overview of the most common techniques for multivariate analysis: principal component analysis, factor analysis, cluster analysis, MANOVA, regression with continuous variables, and regression with discrete variables.

Restriction: Graduate students only.

### **MGMTPHD 297K. Advanced Qualitative Methods: Analyzing Qualitative Data. 4 Units.**

Introduction to the theory and practice of analyzing qualitative data. Students must have already learned about data collection and research design for qualitative research and must have qualitative data they can analyze.

Same as UPPP 213, POL SCI 273A.

Restriction: Graduate students only.

**MGMTPHD 297L. Writing for Scholarly Publication. 4 Units.**

Introduces methods for planning and carrying out scholarly writing.

Restriction: Graduate students only.

**MGMTPHD 297M. SAS Boot Camp . 2 Units.**

Teaches basics of SAS programming for empirical research. No prior knowledge of SAS or other computer programming language is required. Provides knowledge and tools to replicate an empirical study and learn how to perform very advanced data procedures.

Restriction: Graduate students only.

**MGMTPHD 297Q. Game-Theoretic Models for Management Research. 4 Units.**

Introduces some classic game-theoretic models for management research. It is about modeling strategic interactions between business competitors and/or partners in an analytical framework. Various applications will be discussed, e.g., pricing strategies, business alliances, e-commerce, negotiations, and contracts, etc.

Restriction: Graduate students only.

**MGMTPHD 297R. Theories of Power and Empowerment. 4 Units.**

Studies different ways of thinking about power and its uses. Explores theories of power that inform various notions of empowerment, including resistance, participatory democracy, and workplace empowerment.

Same as UPPP 279, POL SCI 223A.

Restriction: Graduate students only.

**MGMTPHD 297T. Decision Theory. 2-4 Units.**

Decision theories and preference models: How models are elicited or theories are experimentally tested, relevance to different management research areas, alternative theories, applications in management practice, and interpretations for the general public.

Restriction: Graduate students only.

**MGMTPHD 297U. Foundational Theories of Organizations. 4 Units.**

Covers major economic and sociological perspectives guiding the study of organizations (i.e., transaction cost economics, agency theory, institutional theories, organizational ecology, network and diffusion theories, behavioral theories, resource dependence), and examines how different theoretical perspectives are tested.

Restriction: Graduate students only.

**MGMTPHD 297V. Information, Psychology, and Social Processes. 4 Units.**

In the marketplace for ideas, which succeed and which fail? How do ideas and information spread between individuals, and how do populations of ideas evolve? This course reviews recent research on these issues and applications to business.

Restriction: Graduate students only.

**MGMTPHD 297W. Establishing Your Academic Career. 4 Units.**

Overview of the best practices for succeeding in an academic career. Presenting oneself in conversation, in written documents, in research talks, and in teaching.

Restriction: Graduate students only.

**MGMTPHD 299. Individual Directed Study. 1-12 Units.**

Individual study under the direction of a selected faculty member.

Repeatability: May be taken for credit for 12 units.

Restriction: Graduate students only.

**MGMTPHD 399. University Teaching. 2-4 Units.**

Limited to teaching assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Management Courses

### **MGMT 1. Introduction to Business and Management. 4 Units.**

Rigorous overview of major business functions and management topics. Addresses the global and fast-changing environment in which modern business enterprises operate as well as the challenges posed by concerns about sustainable growth, ethics, and social responsibility.

Restriction: Business Administration Majors have first consideration for enrollment.

### **MGMT 4A. Basic Economics for Managers I. 4 Units.**

Microeconomic principles for managers. Useful applications of basic economic principles to situations in business as well as in various professions. Materials fee.

Overlaps with ECON 23, ECON 20A.

Restriction: Business Administration Majors have first consideration for enrollment. For School of Social Sciences majors, MGMT 4A may not be used as a substitute for ECON 20A.

(III)

### **MGMT 4B. Basic Economics for Managers II. 4 Units.**

Macroeconomic principles for managers. Useful applications of basic economic principles to situations in business as well as in various professions.

Prerequisite: MGMT 4A or ECON 20A

Overlaps with ECON 20B.

Restriction: Business Administration Majors have first consideration for enrollment. For School of Social Sciences majors, MGMT 4B may not be used as a substitute for ECON 20B.

(III)

### **MGMT 5. Management of Contemporary Organizations. 4 Units.**

Equips students with working knowledge of several major subject areas within the context of business and society studies. Topics include: role of management in organizations, corporate social responsibility and responsiveness, ethics and values in business, government regulation, and international business.

### **MGMT 7. Statistics for Business Decision Making. 4 Units.**

Basics of data analysis and the fundamental notion of statistical inference emphasizing applications to administrative and management decision problems. Classical estimation and hypotheses testing, regression, correlation, analysis of variance, nonparametric methods, and statistical probability.

Overlaps with STAT 7, STAT 8, ECON 15A, ECON 15B.

Restriction: Business Administration Majors have first consideration for enrollment.

(Va)

### **MGMT 10. Business Management in the World Today. 4 Units.**

Accounting scandals, e-commerce, and globalization are only a few examples that show the profound impact of business practices on individuals and on society at large. Provides students with a broad overview of business functions and management practices.

### **MGMT 30A. Principles of Accounting I. 4 Units.**

First in a two course introductory series. Emphasis on financial accounting concepts and practices essential to the administration of business enterprises; including recording and valuation of financial transactions, and preparation, analysis, and interpretation of financial statements.

Overlaps with ECON 25.

Restriction: Business Administration Majors have first consideration for enrollment.

### **MGMT 30B. Principles of Accounting II. 4 Units.**

Second in a two-course introductory series. Emphasis is on the introduction of managerial accounting concepts and techniques as tools to aid management in carrying out the primary internal functions of planning, control, and decision-making.

Prerequisite: MGMT 30A

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 90. Special Topics in Management. 1 Unit.**

Studies in selected areas of management. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**MGMT 101. Management Science. 4 Units.**

Concepts and methods of management science, which applies mathematical modeling and analysis to management problems. Topics include linear and integer programming, project scheduling, inventory management, queuing analysis, decision analysis, and simulation.

Prerequisite: MGMT 7

Restriction: Upper-division students only. Business Administration Majors have first consideration for enrollment.

**MGMT 102. Managing Organizational Behavior. 4 Units.**

Basic theory and concepts which provide the manager with tools for understanding behavior of people in organizations. Areas such as individual, group, and organizational determinants of attitudes, turnover, and job performance.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 105. Introduction to Marketing. 4 Units.**

Basic marketing concepts; discussion of the role marketing plays in modern society. Topics include industrial and consumer marketing, promotion, distribution, and pricing theory.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 107. Introduction to Management Information Systems. 4 Units.**

Information Technology (IT) continues to drive rapid productivity growth and structural changes in the economy. Topics include what IT is, and how companies can use IT to improve business processes, enhance customer services, and gain competitive advantage over rivals.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 109. Introduction to Managerial Finance. 4 Units.**

Basics of financial administration. Capital budgeting, cost of capital, cash budgeting, working capital management, and long-term sources of funds. Provides a basic understanding of issues and techniques involved in financial decision making.

Prerequisite: MATH 2B and MGMT 30A

Overlaps with ECON 134A.

Restriction: Upper-division students only. Business Administration Majors have first consideration for enrollment.

**MGMT 110. Strategic Management. 4 Units.**

Addresses management of the entire business. Role of the general manager in organizations, industry analysis, core competencies, growth through vertical integration, innovation, acquisition and diversification, globalization, strategy implementation, and the ethical and moral responsibility of a manager.

Prerequisite: MGMT 102 and MGMT 105 and MGMT 109

Overlaps with ECON 147B.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 111. China and the Global Order. 4 Units.**

Introduces students to China's economic and military relations with the world, assessment of likelihood for conflict, and how to strategically manage business risk from regional conflict. Includes an original documentary series and engaging discussion.

**(VIII)**

**MGMT 113. New Ventures: A Course in Entrepreneurship. 4 Units.**

Introduction to the survival and growth of new ventures. Methods include analysis of live cases, guest speakers, discussion, and field projects with contemporary new ventures to learn about new venture management and surviving the liabilities of newness.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 115. Lean Startup. 4 Units.**

Based on the well-known Lean Launchpad course currently used by a growing segment of the startup world. Students work in teams to ideate, develop a Business Model Canvas, and gather customer/market feedback.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 123. Learning to Think Creatively and Innovate. 4 Units.**

Learn about your own thinking process; develop the ability to think both logically and creatively and to understand how emotions affect your thinking. Class sessions involve discussion and experiential exercises. Business problems and issues are used for discussion and exercises.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 124. Human Resources Management. 4 Units.**

Theory and practice of managing human resources. Students will identify and analyze HR dilemmas, apply labor law, and design systems and processes to develop the human resources needed to help organizations achieve their goals.

Restriction: Business Administration Majors have first consideration for enrollment. Business Information Mgmt Majors have first consideration for enrollment.

**MGMT 125. Negotiations. 4 Units.**

The objective is to assist students in developing an understanding of different theoretical perspectives and develop their skills in negotiating. Exploration of feelings and beliefs about negotiation, negotiation skills, and putting theory into action by practicing new negotiation skills.

Prerequisite: MGMT 102

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 126. Foundations of Teams. 4 Units.**

Social and psychological processes that detract from effective teamwork and collaboration. Tools to understand how to be a better team member are introduced. Provides the foundation for students to become effective team leaders and to manage difficult team situations.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 128. International Management. 4 Units.**

Impact of different cultures and political/economic systems on assumptions, expectations, and organizational practices relevant to conducting business in different national settings. Understanding of the challenges of cross-national management and resources utilized to work and conduct business outside the United States.

Restriction: Business Administration Majors have first consideration for enrollment.

**(VIII)****MGMT 129. Leadership. 4 Units.**

Case analyses, free-form discussion, and written assignments designed to develop critical thinking skills, as well as knowledge of approaches to differing leadership challenges. Experiential exercises encourage students to develop their ability to innovate, foster collaboration, manage conflict, and value diversity.

Prerequisite: MGMT 102

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 131A. Intermediate Accounting I. 4 Units.**

First course in a series of two intermediate-level courses in financial accounting theory and practice. Concepts include the measurement, valuation and reporting of current and long-term assets, current liabilities, and revenue recognition issues.

Prerequisite: MGMT 30A and MGMT 30B

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 131B. Intermediate Accounting II. 4 Units.**

Second course in a series of two intermediate-level courses in financial accounting theory and practice. Concepts include the measurement, valuation, and reporting of long-term liabilities and contingencies, accounting for stockholders' equity, and the Statement of Cash Flows.

Prerequisite: MGMT 131A

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 131C. Intermediate Accounting III. 4 Units.**

Third in a three-part series (A, B, and C). Focuses on developing knowledge related to investments, debt/equity issues, accounting for income taxes, pensions, leases, and revenue recognition.

Prerequisite: MGMT 131B

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 132A. Individual Taxation. 4 Units.**

Fundamentals of federal income taxation pertaining to individuals. Topics include income, deductions, credits, property transactions, and the impact of taxes on business and investment decisions.

Prerequisite: MGMT 30B

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 133. Corporate and Partnership Taxation. 4 Units.**

Fundamentals of federal income taxation pertaining to partnerships and corporations, including subchapter S corporations. Emphasis on the tax issues associated with formation, operation, and termination of these entities.

Prerequisite: MGMT 132A

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 136. Accounting Information Systems & Spreadsheets. 4 Units.**

Fundamentals of accounting information systems including internal controls and transaction processing cycles. Development of efficient spreadsheets as applied to financial and managerial accounting concepts.

Prerequisite: MGMT 30B

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 137. Advanced Accounting. 4 Units.**

Covers advanced concepts in accounting theory and practice. Topics include business combinations, consolidated financial statements, foreign exchange transactions, international, and governmental/nonprofit accounting standards.

Prerequisite: MGMT 131B

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 138. Auditing. 4 Units.**

An introduction to auditing practice with emphasis on the verification of financial statements and related information. Topics include professional ethics, assessment of audit risk, study and evaluation of internal control, gathering and evaluating audit evidence, and audit reporting.

Prerequisite: MGMT 131B

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 141. Investments. 4 Units.**

Foundations of investment management. Theory and empirical evidence related to portfolio theory, market efficiency, asset pricing models, factor models, and option pricing theory. Students are expected to combine market research results and electronic information sources to create optimal investment strategies.

Prerequisite: MGMT 109

Overlaps with ECON 132A.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 144. Multinational Finance. 4 Units.**

Focuses on financial issues facing multinational corporations, the most important of which is the management of foreign exchange risk. Introduction to investments and financing decisions in international capital markets.

Prerequisite: MGMT 109 and (ECON 20A or MGMT 4A) and (ECON 20B or MGMT 4B)

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 146A. Introduction to the Real Estate Process. 4 Units.**

Introductory survey course providing a working knowledge of the real estate market, both residential and commercial. Topics include real estate economics, appraisal, feasibility, investment, tax considerations, financing, and development. Lectures and cases, with supplemental presentations by real estate professionals.

Restriction: Upper-division students only. Business Administration Majors have first consideration for enrollment.

**MGMT 147. Applied Financial Valuation. 4 Units.**

Case study course designed to confront students with real-world financial valuation problems. Situations are chosen to enhance students' understanding of the application of finance theory. The principal focus is on estimating the value of firms and projects in diverse settings.

Prerequisite: MGMT 109 and MGMT 141

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 149. Derivatives. 4 Units.**

Introduction to financial derivatives. Covers forward contracts, futures, swaps, and options. Applications of these instruments, including pricing and risk management, are emphasized.

Prerequisite: MGMT 109

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 150. Consumer Behavior. 4 Units.**

Application of the behavioral sciences to understanding buyer behavior. Topics include perception, memory, affect, learning, persuasion, motivation, behavioral decision theory, social and culture influences, and managerial implications.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 151. Marketing Research. 4 Units.**

Research to aid managerial decisions for products and services; problem formulation, research design, data collection, sampling, statistical analyses, managerial recommendations, and implementation in several real-world settings.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 153. Sales Management. 4 Units.**

Designed for students interested in learning about sales force management and personal selling by firms engaged in business-to-business and consumer goods/services marketing. Covers advantages of personal selling, how to perform sales calls, challenges of sales managers, roles of buying centers.

Restriction: Business Information Mgmt Majors have first consideration for enrollment. Business Administration Majors have first consideration for enrollment.

**MGMT 154. Global Marketing. 4 Units.**

Students are exposed to the challenges and opportunities facing marketers in the international marketplace. Special attention is given to the management of cultural differences in product development, distribution systems, pricing, and promotion.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 155. Brand Management. 4 Units.**

Introduction to issues in planning, implementing, and evaluating brand strategies, relevant theories, models, and tools for the making of brand decisions; application of these principles.

Prerequisite: MGMT 105

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 156. Pricing Strategy . 4 Units.**

Provides a framework for designing and analyzing pricing strategies. Emphasizes role of pricing in the marketing-mix decisions and broader marketing strategy of a firm. Incorporates study of various economic, psychological, competitive, and organizational foundations that enter into effective pricing decisions.

Prerequisite: MGMT 105

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 157. Marketing on the Internet. 4 Units.**

Recent developments in interactive technologies indicate that marketing on the internet is becoming a serious business activity, with exponential growth. How to do marketing on the Internet and identify the key issues pertaining to the marketing process.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 165. U.S. Healthcare Systems. 4 Units.**

Providers, suppliers, payers, consumers, and the unique market dynamics among these players. Structure, organization, and financing of health care. The health care industry's relationship to the overall economy will be explored.

Restriction: Business Administration Majors have first consideration for enrollment. Business Information Mgmt Majors have first consideration for enrollment.

**MGMT 166. Business of Medicine. 4 Units.**

In order to improve the quality and efficiency of health care delivery one must understand the design and management of health care operations. Opportunities for innovation and changes needed to design a simple, accessible, fair, and effective health care system.

Restriction: Business Administration Majors have first consideration for enrollment. Business Information Mgmt Majors have first consideration for enrollment.

**MGMT 171. Social Media. 4 Units.**

Covers theoretical aspects and business applications of social media tools including blogs, wikis, social networking platforms, immersive environments, and other social computing technologies. Also covers business value of social-media-enabled processes.

Restriction: Business Administration Majors have first consideration for enrollment. Business Information Mgmt Majors have first consideration for enrollment.

**MGMT 173. Business Intelligence for Analytical Decisions. 4 Units.**

BI from both managerial and technical perspectives. Learn to apply a variety of data mining techniques to learn business intelligence embedded in data, and apply that intelligence to run your business more efficiently. These techniques are useful in different areas.

Prerequisite: MGMT 107

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 174. Database Management and Applications. 4 Units.**

Query, manipulate, and understand data and learn about leading edge applications for databases. Database fundamentals including entity relationship design, creating database tables, normalization, and data querying. Contemporary applications of database using case studies. Applications include data warehousing, data mining.

Prerequisite: MGMT 107

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 176. Digital Strategies. 4 Units.**

Covers business strategies for firms that make technology products. Insights are applicable not only to industries that make information and technology goods but also to industries that leverage digitization and network effects for their products.

Restriction: Business Administration Majors only.

**MGMT 178. Management of Information Technology. 4 Units.**

Strategic use and impact of information technology (IT) in organizations. Covers what IT is, and how it works, business value of IT, and IT strategies that organizations can employ to create value.

Prerequisite: MGMT 107

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 182. Supply Chain Management. 4 Units.**

Flows of materials and information among all of the firms that contribute to a product or service. Forecasting, demand management, logistical networks, inventory management, supplier contracting, sourcing, information technology, flexibility, globalization, and performance management.

Prerequisite: MGMT 101

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 189. Operations Management. 4 Units.**

Managing the productive resources, from which raw materials as inputs are being transformed into useful outputs of final products and services. Explanation of issues pertaining to both manufacturing and services-oriented systems.

Prerequisite: MGMT 101

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 190. Special Topics in Management. 2-4 Units.**

Studies in selected areas of management. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 191W. Business Communication. 4 Units.**

Provides students with a solid foundation in business communication. Emphasis is placed on improving students' written and oral communication skills to help them succeed in (1) upper-division Business Administration courses, (2) graduate school, and (3) work and career activities.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Business Administration Majors only.

(Ib)

**MGMT 192. Business Law. 4 Units.**

A study of the legal environment of business. Topics include contracts, agency, partnerships, corporations, and other basic principles of law as they relate to business transactions.

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 194. Financial Statement Analysis. 4 Units.**

Study of financial statements and their related footnotes; tools and procedures common to financial statement analysis; relationships among business transactions, environmental forces (political, economic, social), and reported financial statement information; how financial statement information can help solve certain business problems.

Prerequisite: MGMT 30A and MGMT 30B

Restriction: Business Administration Majors have first consideration for enrollment.

**MGMT 198A. Administrative Internship. 4 Units.**

Selected undergraduates serve as managers within administrative units on campus with a three-quarter course which complements the intern experience. Topics include management ethics, study of non- and for-profit institutions, career management, and the changing nature of the workforce.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**MGMT 198B. Administrative Internship. 4 Units.**

Selected undergraduates serve as managers within administrative units on campus with a three-quarter course which complements the intern experience. Topics include management ethics, study of non- and for-profit institutions, career management, and the changing nature of the workforce.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**MGMT 198C. Administrative Internship. 4 Units.**

Selected undergraduates serve as managers within administrative units on campus with a three-quarter course which complements the intern experience. Topics include management ethics, study of non- and for-profit institutions, career management, and the changing nature of the workforce.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**MGMT 199. Independent Study. 1-4 Units.**

Individual study under the direction of a selected faculty member.

Repeatability: May be repeated for credit unlimited times.

## Accounting, Minor

The Paul Merage School of Business faculty offers an undergraduate minor in Accounting consisting of seven upper-division courses. In addition, two lower-division introductory accounting courses, one lower-division microeconomics course, and one lower-division single variable calculus course are prerequisites to the minor program.

In establishing the undergraduate minor in Accounting, the faculty anticipated two types of students to be drawn to courses in accounting: (1) students preparing for careers in accounting or in other fields that require some knowledge of accounting, and (2) students planning to pursue a graduate degree in accounting who wish early guidance and undergraduate work appropriate to this career objective.

Students are eligible to apply for the minor in Accounting if they have upper-division standing and have completed MGMT 30A and MGMT 30B with a grade no lower than B (3.0) and all other prerequisite courses with a grade no lower than C (2.0). Completion of the prerequisite courses does not guarantee admission to the minor in Accounting. Admission is on a competitive basis, and students must submit an application, transcripts, and a statement of purpose. Applications are accepted on a quarterly basis. Interested students are encouraged to obtain further information from the Undergraduate Programs Office, SB2 202; or visit the Undergraduate Programs website (<https://merage.uci.edu/programs/undergraduate/minors.html>).

The Paul Merage School of Business faculty offers an undergraduate minor in Accounting consisting of seven upper-division courses. In addition, two lower-division introductory accounting courses, one lower-division microeconomics course, and one lower-division single variable calculus course are prerequisites to the minor program.

In establishing the undergraduate minor in Accounting, the faculty anticipated two types of students to be drawn to courses in accounting: (1) students preparing for careers in accounting or in other fields that require some knowledge of accounting, and (2) students planning to pursue a graduate degree in accounting who wish early guidance and undergraduate work appropriate to this career objective.

Students are eligible to apply for the minor in Accounting if they have upper-division standing and have completed MGMT 30A and MGMT 30B with a grade no lower than B (3.0) and all other prerequisite courses with a grade no lower than C (2.0). Completion of the prerequisite courses does not guarantee admission to the minor in Accounting. Admission is on a competitive basis, and students must submit an application, transcripts, and a statement of purpose. Applications are accepted on a quarterly basis. Interested students are encouraged to obtain further information from the Undergraduate Programs Office, SB2 202; or visit the Undergraduate Programs website (<http://merage.uci.edu/undergrad/>).

### Prerequisite Courses

The following are prerequisites for enrolling in the upper-division undergraduate minor courses:

ECON 20A	Basic Economics I
MATH 2A	Single-Variable Calculus
MGMT 30A	Principles of Accounting I
MGMT 30B	Principles of Accounting II

Transfer students should check with their college counselor for established equivalencies for these prerequisite courses. Students not taking MGMT 30A and MGMT 30B at UCI during regular session or summer session must complete MGMT 131A with a minimum grade of B.

NOTE: Individual courses that students may select within the minor may require additional prerequisites.

### Requirements for the Undergraduate Minor in Accounting

Completion of seven courses:

A. Three core accounting courses:

MGMT 131A	Intermediate Accounting I
MGMT 131B	Intermediate Accounting II
MGMT 132A	Individual Taxation

B. Select two accounting elective courses from the following:

MGMT 133	Corporate and Partnership Taxation
MGMT 136	Accounting Information Systems & Spreadsheets
MGMT 137	Advanced Accounting
MGMT 138	Auditing
MGMT 194	Financial Statement Analysis

C. Select two additional courses from the following:

an upper-division accounting elective course list above	
MGMT 1	Introduction to Business and Management
MGMT 101	Management Science
MGMT 102	Managing Organizational Behavior
MGMT 105	Introduction to Marketing
MGMT 107	Introduction to Management Information Systems
MGMT 109	Introduction to Managerial Finance
MGMT 110	Strategic Management
MGMT 113–129, 141–184	
MGMT 189	Operations Management
MGMT 192	Business Law
MGMT 190	Special Topics in Management (provided topics have not been covered in other accounting courses)

With Merage School faculty approval, a student may substitute a maximum of one minor course.

NOTE: Students may not receive both the minor in Accounting and the minor in Management.

## Business Administration, B.A.

### Office of Admission

Undergraduate Major (<http://www.admissions.uci.edu>):

Office of Admissions and Relations with Schools (<http://www.admissions.uci.edu/>)

Phone: 949-824-6703

Fax: 949-824-2951

The undergraduate Business Administration program at The Paul Merage School of Business educates students to understand and apply the theories and concepts of effective business and management and prepares students for a wide variety of careers and life experiences. Business Administration majors can pursue careers in the for-profit and not-for-profit sectors or can proceed on to graduate school in several disciplines including business, economics, and law. The program provides a broad learning experience in a multidisciplinary and global context and focuses on the development of essential managerial skills, especially critical thinking, quantitative and qualitative analysis, and effective communication skills.

### Program Information

The Business Administration major at The Paul Merage School of Business offers a traditional business curriculum similar to those at other top business schools in the country. The major is broad, drawing on the social sciences more generally to study organizations, interpersonal communication skills, individual and group behavior, leadership, strategy, financial and accounting issues, ethics, information technology, marketing, and a variety of other topics in the context of a rapidly changing global environment.

The faculty strongly encourages majors to create an educational program composed of courses within and outside the Merage School that provide substance and focus to their careers and enable them to pursue their own personal interests. While preparing students for careers in management, the Merage School, through academic advising, will help students fashion an undergraduate program that they can tailor to their own unique career objectives. Examples of programs of study that allow Business Administration majors to blend management education with specific industry areas include (but are not limited to) bioscience business, government service, international commerce, arts management, entrepreneurship in computer gaming, and other combinations. Through appropriate choice of courses, students can prepare to pursue a law degree, a master's degree in a variety of areas including accounting, or a doctoral program in business or related disciplines.

Students are required to complete 11 business courses that provide a foundation in essential core business competencies, followed by a minimum of 5 business electives to include one emphasis. Students select a minimum of one of six emphases in Accounting, Finance, Information Systems, Marketing, Operations and Decision Technologies, or Organization and Management. This program of study enables students to develop areas of focus as they pursue the Business Administration major. Because much business is conducted on a global scale, students are required to either participate in the University's Education Abroad Program or to take one of a number of designated courses that stresses the international dimension of a business area. Students interested in learning more about the full array of requirements for professional licensing in Accounting are encouraged to visit the California Board of Accountancy (<http://www.dca.ca.gov/cba/>) and American Institute of CPAs (<http://www.aicpa.org/BecomeACPA/CPAExam/Pages/CPAExam.aspx>) websites.

While academic course content is crucial to an undergraduate business major, auxiliary noncurricular programs also are important to students' academic experience. The Merage School incorporates a cocurricular element into the classroom experience. Drawing from Merage School and University resources, students are exposed to opportunities to enhance communication and presentations skills, attend formal speaker events, and engage in

mentoring. The Merage faculty is committed to ensuring that undergraduate majors have ample opportunity to enhance their writing and presentation skills through class assignments and a business communication course.

Students are strongly encouraged to become involved with the Merage Undergraduate Student Association and with the many affiliated business clubs. These high-profile student groups promote interaction between students and the surrounding business community through their Corporate Speaker Series, social activities, and student/employer receptions. Students with an entrepreneurial interest are invited to participate in the annual Merage School New Venture Competition offered by the Don Beall Center for Innovation and Entrepreneurship.

Work experience is an important way to learn about business and management. UCI's Internship Program, sponsored by the UCI Division of Career Pathways, can assist students in finding opportunities to work in either voluntary or paid positions in business, nonprofit, or industrial settings. Students who plan to enter business or apply to a graduate school of business or management in the future will find it necessary to supplement their academic work with a variety of practical experiences.

Another opportunity is UCI's Undergraduate Administrative Intern Program, which offers selected students the opportunity to assume one-year positions under the guidance of University administrators. Students can choose from a range of offices in which they will be asked to undertake special projects specifically related to the management and administration of UCI and higher education in general. These internships are supplemented by a two-quarter management seminar and by field trips to administrative conferences such as meetings of The Regents of the University of California.

## Admission to the Major in Business Administration

In the event that the number of students who elect Business Administration as a major exceeds the number of positions available, applicants may be subject to screening beyond minimum University of California admissions requirements.

**Freshmen:** Preference will be given to those who rank the highest using the selection criteria as stated in the Undergraduate Admissions section of the *Catalogue*.

**Transfer students:** Junior-level applicants with the highest grades overall (minimum cumulative GPA of 3.0) and who satisfactorily complete lower-division courses equivalent to UCI's calculus (MATH 2A-MATH 2B), economics (ECON 20A-ECON 20B or MGMT 4A-MGMT 4B), and statistics and accounting (MGMT 7, MGMT 30A, MGMT 30B) will be given preference for admission. MGMT 1 may be completed at UCI. Admission to the major will be competitive due to limited space availability.

## Change of Major

Students who wish to declare the Business Administration major should contact The Paul Merage School of Business Undergraduate Programs Office (<http://merage.uci.edu/undergrad/>), SB2 202, for information about change-of-major requirements, procedures, and policies. Students should carefully review criteria for each major they are considering on the UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu/>). Review of applications and selection to the major is governed by the Undergraduate Programs Committee. Admission to the major is very competitive due to limited space availability. Completion of the prerequisite courses does not guarantee admission into the major.

**All students must meet the University Requirements.**

### Business Administration Major Requirements

#### A. Lower-Division:

MATH 2A	Single-Variable Calculus
MATH 2B	Single-Variable Calculus
MGMT 1	Introduction to Business and Management
MGMT 4A	Basic Economics for Managers I
or ECON 20A	Basic Economics I
MGMT 4B	Basic Economics for Managers II
or ECON 20B	Basic Economics II
MGMT 7	Statistics for Business Decision Making
MGMT 30A	Principles of Accounting I
MGMT 30B	Principles of Accounting II

#### B. Upper-Division Core:

MGMT 101	Management Science
MGMT 102	Managing Organizational Behavior
MGMT 105	Introduction to Marketing
MGMT 107	Introduction to Management Information Systems
MGMT 109	Introduction to Managerial Finance
MGMT 110	Strategic Management
MGMT 191W	Business Communication

C. Business Electives: Select 5 upper-division Merage School electives numbered 111-196, to include completion of one of the defined emphases below:<sup>1</sup>

Emphasis in Accounting:

MGMT 131A	Intermediate Accounting I
MGMT 131B	Intermediate Accounting II
MGMT 132A	Individual Taxation

Emphasis in Finance:

MGMT 141	Investments
and select two of the following:	
MGMT 144	Multinational Finance
MGMT 147	Applied Financial Valuation
MGMT 149	Derivatives

Emphasis in Information Systems:

Select three of the following:	
MGMT 171	Social Media
MGMT 173	Business Intelligence for Analytical Decisions
MGMT 174	Database Management and Applications
MGMT 178	Management of Information Technology

Emphasis in Marketing:

Select three of the following:	
MGMT 150	Consumer Behavior
MGMT 151	Marketing Research
MGMT 154	Global Marketing
MGMT 155	Brand Management

Emphasis in Operations and Decision Technologies:

MGMT 189	Operations Management
and complete the following:	
MGMT 180	
MGMT 182	Supply Chain Management

Emphasis in Organization and Management:

Select three of the following:	
MGMT 125	Negotiations
MGMT 126	Foundations of Teams
MGMT 128	International Management
MGMT 129	Leadership

D. International Business Requirement: Fulfillment of the International Business requirement by:

1. Selecting one of the following (which may also be used for specified category C requirements above):<sup>1</sup>

MGMT 128	International Management
MGMT 144	Multinational Finance
MGMT 154	Global Marketing

2. or, participating in select UC Education Abroad Program options, with prior approval of the Associate Dean.

<sup>1</sup> By exception, students may petition the Associate Dean to accept an upper-division elective that has business content equivalent to a stated Merage elective.

NOTE: Students majoring in Business Administration may not minor in Management, Accounting, or Innovation and Entrepreneurship or double major in Business Information Management. Students may pursue more than one Merage School emphasis via the Business Electives in the category C requirements above. Students are strongly advised to work closely with faculty, staff, and career advisors to tailor a course of study optimal for their educational and career plans. Pairing of particular emphases could be beneficial; examples include Accounting and Finance, Marketing and Information Systems, Operations and Decision Technologies and Information Systems, or Health Care Management and Organization and Management. Students are permitted to pursue additional courses within an area of emphasis to exceed the required three.

## Business Analytics, M.S.

M.S. in Business Analytics (<https://merage.uci.edu/programs/masters/master-science-business-analytics/>)

Email: [msba@merage.uci.edu](mailto:msba@merage.uci.edu) (%20msba@merage.uci.edu)

Business analytics involves the application of sophisticated statistical and analytical methods to extract business value and strategic advantage from the growing availability of large data sets. The ability to effectively analyze evidence-based data is becoming critical for every firm in every industry, so that the demand for professionals with business analytics skill sets far outstrips the supply of such individuals. Big data and analytics have become an essential factor of production at par with traditional labor and capital inputs.

Responsive to these trends, the Paul Merage School of Business offers a Master of Science in Business Analytics, a one-year self-supporting full-time degree targeted at a mix of individuals with and without work experience.

Applicants may apply directly to the Paul Merage School of Business. Applicants must meet all the prerequisite requirements at the time of matriculation into the program. Admission to graduate-level standing in the Paul Merage School of Business is accorded to those possessing an undergraduate degree with an acceptable level of scholarship from an institution of recognized standing. A quantitative background is encouraged, so undergraduate degrees in mathematics, computer science, economics, statistics, engineering, and physics are recommended.

Applicants for admission will be evaluated on their academic record and potential for leadership, as demonstrated by the materials submitted in the application. These materials must include official university transcripts, two letters of recommendations, two essays, a resume, and a personal interview (by invitation only). The GMAT or GRE are not required but strongly recommended for applicants with GPA's under a 3.3. While these tests are not required, the admissions team is looking for evidence of strong verbal and quantitative skills.

If the potential applicant received his/her undergraduate degree from a foreign country and his/her primary language is not English, s/he will be responsible to take the TOEFL exam with a minimum score of 80 on the internet-based test. A Pearson Test of English (PTE) may be substituted for the TOEFL. The minimum score for the PTE is 53.

The curriculum explores three essential areas of training: data management, analytics methods, and business context. Students learn how to handle large data sets, and apply a range of analytics methods – including data analytics, marketing analytics, and operation analytics – to gain business insights relevant to a specific business context.

The program consists of 10 core courses (32 units) and five elective courses (20 units), for a total of 52 units to be completed in 12 months. The required courses are as follows:

A. Complete the following:

BANA 200	Foundations of Business Analytics
BANA 201A	Statistics for Data Science
BANA 201B	Management Science for Analytics
BANA 205	Foundations of Marketing
BANA 211	MSBA ProSeminar (four quarters)
BANA 212	Data and Programming for Analytics
BANA 273	Machine Learning for Analytics
BANA 277	Customer and Social Analytics
BANA 298A	Business Analytics Capstone Prep
BANA 298B	Business Analytics Capstone Project

B. Select five BANA or other Merage graduate program elective course offerings.

## Innovation and Entrepreneurship, Minor

The minor in Innovation and Entrepreneurship provides extensive academic and practical training for students to embark on careers as entrepreneurs (innovating to form new companies) and intrapreneurs (innovating within existing companies).

The program provides students with knowledge and practical experience on certain core topics on the process of innovation and entrepreneurship, i.e., planning a new venture, lean startup methodology, venture capital, private equity, etc. Students are strongly encouraged to apply the associated business skills in the New Venture Competition and in internships.

Students will be eligible to apply for the minor in Innovation and Entrepreneurship if they have completed MGMT 1 with a grade no lower than "C" (2.0) and will have junior status upon entry. Elective offerings in the minor may have additional prerequisites. Completion of the prerequisite course does not guarantee admission to the minor in Innovation and Entrepreneurship. Admission is on a competitive basis and students must submit an application, transcripts, and a statement of purpose. Applications are accepted on a quarterly basis. Interested students are encouraged to obtain further information from the Undergraduate Programs Office, SB2 202; or visit the Undergraduate Programs website (<http://merage.uci.edu/undergrad/>).

A. Complete the following:

MGMT 1	Introduction to Business and Management
MGMT 113	New Ventures: A Course in Entrepreneurship

MGMT 115	Lean Startup
B. Select at least four electives from the following:	
MGMT 30A	Principles of Accounting I
MGMT 102	Managing Organizational Behavior
MGMT 105	Introduction to Marketing
MGMT 109	Introduction to Managerial Finance
MGMT 110	Strategic Management
MGMT 125	Negotiations
MGMT 126	Foundations of Teams
MGMT 129	Leadership
MGMT 151	Marketing Research
MGMT 192	Business Law

With Merage School faculty approval, a student may substitute a maximum of one minor course.

NOTE: Students may not receive both the minor in Management and the minor in Innovation and Entrepreneurship. Students in the B.A. in Business Administration and B.S. in Business Information Management Programs are not eligible to minor in Innovation and Entrepreneurship.

## J.D./M.B.A. Program

Highly qualified students interested in combining the study of law with professional qualifications in business are invited to undertake concurrent degree study under the auspices of UC Irvine's Program in Law and Graduate Studies (PLGS). Students approved for this concurrent degree program pursue a coordinated curriculum leading to a J.D. from the School of Law in conjunction with an MBA from The Paul Merage School of Business. The objective of the program is to promote interdisciplinary study of law while also enabling students to obtain both a J.D. and a business degree in less time than would be required to acquire both degrees separately. The normative time for completion of the J.D./MBA program is four years.

UC Irvine's PLGS program is well suited to students interested in professional or academic careers focused on the interdisciplinary or multidisciplinary study of law and legal institutions, policy analysis, and/or applied research in law-related fields (for example, taxation, corporate reporting and governance, regulation and compliance, discrimination, securities, property, real estate, and intellectual property).

Applicants must submit separate applications for admission to the School of Law and to the Merage School. Once admitted for study into both components of the program, concurrent degree students will work with the PLGS director and the director of the Full-Time MBA program to develop a program of study that will permit efficient pursuit of both degrees. Concurrent degree students' law enrollments will include a required 1-unit "Graduate Legal Studies" colloquium and a 3-unit "Interdisciplinary Perspectives on Law" course. Concurrent degree students will be eligible to apply for financial support through the Merage School while pursuing their MBA and through the School of Law while pursuing law studies.

**Program Structure.** Students in the program complete a four-year combined curriculum leading to a J.D. from the UCI School of Law and an MBA from the The Paul Merage School of Business.

**Program Overview.** The School of Law requires students to complete 86 law semester units of study for the J.D., 68 of which must be classroom units of law instruction. The remaining 18 law units can be completed outside the School of Law, at the student's discretion, and with approval of the School's Dean of Students. Ten of these 18 law units of non-law instruction can be obtained in courses undertaken in the concurrent degree department. The remaining eight law units are typically spent in non-classroom clinical practice.

The Full-Time MBA program operates on a quarter system and J.D./MBA students are required to complete a minimum of 76 MBA units. The curriculum consists of courses divided into two groups designed to achieve specific educational objectives. The courses are divided as follows: 10 required Common Core Courses (40 MBA units) and 36 MBA units of elective courses which students select to emphasize career goals and educational interests. A maximum number of 120 hours of classroom instruction, or 16 MBA units (normally four 4-unit quarter courses), may be utilized toward the MBA, total, from sources outside of UCI's Merage School. This includes any "non-Merage course approvals" taken in other UCI units, intercampus exchange courses, etc.

The MBA component of the J.D./MBA requires that the 16 MBA units of electives permitted from outside the Merage School may be (but are not restricted to be) taken from among appropriate School of Law electives but may not be counted simultaneously toward satisfying concurrent degree requirements in the School of Law.

Detailed information about J.D./MBA curriculum paths is available online at the Dual Degree Program website (<http://www.law.uci.edu/academics/interdisciplinary-studies/concurrent-degrees.html>).

## M.D./M.B.A. Program

The M.D./MBA program requires five or six years for completion. It is aimed at individuals who are exceptional in ability and motivation and who seek a career as physicians with major responsibility for administration and management in health care organizations and institutions. Students in this program pursue a combined curriculum for an M.D. degree from the School of Medicine and an MBA from The Paul Merage School of Business.

Students must be currently enrolled in the M.D. program and in good academic standing in order to apply to the combined M.D./MBA program. During their second or third year of medical school, interested students submit an application to The Paul Merage School of Business Admissions Committee, after review by the School of Medicine. Final acceptance to the program is granted by The Paul Merage School of Business, and MBA course work begins following completion of the student's third year of medical school. Students should be aware that enrollment in the M.D. program does not guarantee acceptance into the MBA program.

The total number of units required to graduate for each program separately are satisfied in the M.D./MBA program. The Full-Time MBA program operates on a quarter system and M.D./MBA students are required to complete a minimum of 76 MBA units.

For more information about the M.D./MBA program, contact the School of Medicine's admissions office by phone at 949-824-5388 or by email at [medadmit@uci.edu](mailto:medadmit@uci.edu) (%20medadmit@uci.edu).

## Management, Minor

The Paul Merage School of Business faculty offers an undergraduate minor in Management which consists of seven courses. In addition, prerequisites include one lower-division microeconomics course and one course or one sequence selected from the statistics courses outlined below. MGMT 1 serves as a prerequisite and also counts as one of the seven courses required for the minor.

In establishing the undergraduate minor, the faculty anticipated three types of students to be drawn to courses in administration: (1) students who wish to learn about the management of organizations as a way of preparing for a career in business, (2) students preparing for careers in other fields that require some knowledge of management, and (3) students who expect to go on to graduate work in management who wish early guidance and undergraduate work appropriate to this career objective.

Students are eligible to apply for the minor in Management if they have completed all prerequisite courses (including MGMT 1 ) with a grade no lower than C (2.0) and have upper-division standing. Completion of the prerequisite courses does not guarantee admission to the minor in Management. Admission is on a competitive basis, and students must submit an application, transcripts, and a statement of purpose. Applications are accepted on a quarterly basis. Interested students are encouraged to obtain further information from the Undergraduate Programs Office, SB2 202; or visit the Undergraduate Programs website (<http://merage.uci.edu/undergrad/>).

## Prerequisite Courses

The following are prerequisites for enrolling in the upper-division undergraduate minor courses:

MGMT 1	Introduction to Business and Management
--------	---

ECON 20A	Basic Economics I
----------	-------------------

and one course or one sequence selected from:

ANTHRO 10A- 10B- 10C	Probability and Statistics and Probability and Statistics and Probability and Statistics
ENGRCEE 11	Methods II: Probability and Statistics
ECON 15A- 15B	Probability and Statistics in Economics I and Probability and Statistics in Economics II

MGMT 7	Statistics for Business Decision Making
STATS 7	Basic Statistics
STATS 8	Introduction to Biological Statistics
STATS 67	Introduction to Probability and Statistics for Computer Science
SOCECOL 13	Statistical Analysis in Social Ecology
PSYCH 10A- 10B- 10C	Probability and Statistics in Psychology I and Probability and Statistics in Psychology II and Probability and Statistics in Psychology III
SOC SCI 10A- 10B- 10C	Probability and Statistics in Social Sciences I and Probability and Statistics in Social Sciences II and Probability and Statistics in Social Sciences III
SOCIOL 10A- 10B- 10C	Probability and Statistics and Probability and Statistics and Probability and Statistics

Transfer students should check with their college counselor for established equivalencies for these prerequisite courses.

NOTE: Individual courses that students may select within the minor may require additional prerequisites, including MATH 2A.

## Requirements for the Undergraduate Minor in Management

Completion of seven courses:

A. One lower-division core course:

MGMT 1	Introduction to Business and Management
--------	---

B. Select four core courses from the following:

MGMT 30A	Principles of Accounting I
MGMT 101	Management Science
MGMT 102	Managing Organizational Behavior
MGMT 105	Introduction to Marketing
MGMT 107	Introduction to Management Information Systems
MGMT 109	Introduction to Managerial Finance
MGMT 110	Strategic Management

C. Select two of the following:

a course from the core course list above	
MGMT 113–129, 141–184	
MGMT 189	Operations Management
MGMT 192	Business Law
MGMT 190	Special Topics in Management (provided specific topics have not been covered in other courses)

With Merage School faculty approval, a student may substitute a maximum of one course. Students participating in the UC Education Abroad Program may substitute a maximum of two courses, with Merage School faculty approval.

NOTE: Students may not receive both the minor in Management and the minor in Accounting. Students may not receive both the minor in Management and the minor in Innovation and Entrepreneurship.

## Management, Ph.D.

Ph.D. (<http://merage.uci.edu/PhD/>)

Email: [phd@merage.uci.edu](mailto:phd@merage.uci.edu)

Phone: 949-824-8318

The Paul Merage School of Business admits students for the Ph.D. in the fall quarter only. The deadline for application is January 4. The Ph.D. program requires a commitment to full-time study. In addition to the other requirements, Ph.D. applicants are encouraged to submit a previously prepared paper (research report, research essay, case study) which may be indicative generally of the applicant's interests and capabilities.

The School offers the Ph.D. in Management to students with backgrounds in a variety of disciplines. While a master's degree is preferred, students may be admitted to the doctoral program directly from the baccalaureate degree. There are many appropriate undergraduate majors, including (but not limited to) psychology, political science, business or public administration, mathematics, computer sciences, economics, sociology, and so forth.

Students with academic strengths in disciplines not usually considered as precursors for management (e.g., natural sciences, humanities, and the arts) are encouraged to apply. The Ph.D. program is designed to prepare students for academic careers in a number of the fields of management, e.g., organization and management, strategy, operations and decision technologies, management information systems, finance, accounting, and marketing. Requirements of the Ph.D. program include a broad knowledge of core management disciplines. In addition, the Ph.D. student must qualify as a skilled researcher and must complete a dissertation demonstrating these skills.

In addition to the usual University of California requirements for admission to graduate study, students must provide one of the following:

- the Graduate Management Admissions Test (GMAT) or the Graduate Record Exam (GRE) verbal and quantitative parts
- a cumulative GPA of 3.0 or above
- statement of purpose
- minimum of three references, of which two should be from academic sources.

Students holding an appropriate Baccalaureate degree may be admitted directly to graduate study leading to the Ph.D. in Management.

## Admission

In addition to the usual University of California requirements for admission to graduate study, students must provide one of the following:

- the Graduate Management Admissions Test (GMAT) or the Graduate Record Exam (GRE) verbal and quantitative parts
- a cumulative GPA of 3.0 or above
- statement of purpose
- minimum of three references, of which two should be from academic sources.

Students holding an appropriate Baccalaureate degree may be admitted directly to graduate study leading to the Ph.D. in Management.

## Teaching Requirements

All degree candidates are required to complete the Teaching Development course MGMTPHD 297B. The objective of the course is to ensure that our Ph.D. students are adequately prepared to assume academic teaching responsibilities upon completion of their programs and to ensure that business doctoral students who teach classes at UCI are adequately prepared to do so effectively.

## Coursework and Degree Requirements

The Ph.D. Program in The Paul Merage School of Business is divided into phases, Qualifying and Dissertation. The objective and requirements of each phase are outlined below.

### Phase I (Qualifying)

Provides students with a general exposure to their fields of emphasis, the discipline of management, and methodological tools. This phase must be completed within nine quarters. At the end of either year 1 or year 2 (depending on the field of emphasis), students will take a written comprehensive field examination covering material within their specific fields of emphasis.

### Course Requirements

The Merage School doctoral courses are offered on a two-part School-wide menu: Theoretical Breadth and Research Methods. Courses may be added to the two menus as needed or availability as determined by the faculty.

1. **Specialization requirement:** Two courses in the student's primary area of specialization (one of the seven fields of emphasis offered by The Merage School of Business. At least one of these courses must be a Ph.D.-level seminar or Independent Study at the doctoral level. Requirements in the student's area of specialization are determined by the faculty in that area within the guidelines of doctoral study.
2. **Breadth requirement:** All doctoral students are required to take four breadth courses. Breadth courses are defined as the courses on the School-wide menus and courses offered in areas other than the student's area of specialization. These could be courses offered by other areas within Merage or departments outside of Merage. Students must take (at least) two courses from the School-wide menus, and (at least) two additional Ph.D.-level courses pertinent to the academic area of study.
3. **Research skills requirements:** Two courses that emphasize research skills that contribute to the development of research capabilities, as determined by the faculty in the area of specialization.
4. MGMTPHD 297A- Doctoral Proseminar and MGMTPHD 297B - University Teaching. These course requirements are common to all students, regardless of area of specialization.

This phase is also designed to prepare students for research and scholarship in their areas of emphasis. Following successful passage of the written comprehensive field examination, the student should select a Chair and, together with that Chair, identify a three-or four-member 'working' committee of the five-member Candidacy Committee. The 'working' committee, in consultation with the student, develops a program for the remainder of the Qualifying Phase. The program consists of the specification of the content of the student's area of emphasis, requirements for the completion of written papers, and the methods by which the student will demonstrate readiness to conduct original research and scholarship. Students usually enroll in independent study with faculty advisors, as well as other courses as appropriate each quarter. During this period of advanced study, students gain a

thorough understanding of their specific fields of emphasis, including detailed knowledge of the current literature and research trends. In this phase, students will prepare themselves to become scholars who, through meaningful research, will make a significant contribution to the advancement of their chosen fields.

Phase I is completed upon successful passage of a formal oral qualifying examination conducted by the Candidacy Committee comprised of five faculty members, a majority of whom are affiliated with the Merage School.

### Phase II (Dissertation)

This phase requires the completion of a significant original research project and a dissertation which demonstrates the candidate's creativity and ability to launch and sustain a career in research. Phase II typically ranges from 12 to 18 months in duration. The type of research project selected will be an important determinant of the amount of time a student will spend in this phase. Upon approval of the dissertation and final dissertation defense, the student's Dissertation Committee recommends conferral of the Ph.D. degree.

### Course Requirements

Students enroll in 12.0 of Individual Study units under their Faculty Advisor's supervision for research/dissertation work until they defend their dissertation and graduate.

### Advancement to Candidacy

The student undertakes advancement to candidacy or the Ph.D. upon successfully demonstrating a high level of scholarship in full-time study at the doctoral level, when all preparatory work has been completed and the student is ready to proceed to the dissertation phase, as signified by successfully passing the oral qualifying examination at the end of Phase I.

The normative time for advancement to candidacy is three years. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is six years.

## Master of Business Administration

Full-Time M.B.A. (<http://merage.uci.edu/FullTimeMBA/>)

Email: [mba@merage.uci.edu](mailto:mba@merage.uci.edu)

Phone: 949-824-4622

The Paul Merage School of Business offers a variety of programs leading to the MBA (Master of Business Administration) degree. This includes a two-year, Full-Time MBA program.

The Paul Merage School of Business admits students to the two-year, Full-Time MBA program or a Full-Time MBA with a concentration in Analytics in Digital Leadership in the fall quarter. Students from a variety of undergraduate disciplines, including liberal arts, social sciences, physical or biological sciences, computer science, and engineering, are encouraged to apply. In addition to the general University rules governing admission to graduate study, the School normally requires the completion of the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE). There are no specific prerequisite requirements for the Full-Time MBA program. However, the Admissions Committee does look for evidence of quantitative proficiency and strong verbal skills in all applicants. The final deadline for completion of all phases of the application procedure is generally around April 1. However, since admissions are received on a rolling basis, applicants are encouraged to check with the MBA Admissions Office regarding application submission.

The evaluation of an applicant's file for admission consists of an integrated assessment of all materials submitted including test scores, transcripts of previous academic work, work experience, essays, and letters of recommendation. A quantitative background is encouraged for the Full-Time MBA with a STEM-certified concentration in Analytics in Digital Leadership, such as undergraduate degrees in mathematics, computer science, economics, statistics, engineering, and/or physics. The Full-Time MBA program at the Paul Merage School is distinctive for its focus on providing students the capabilities and skills to succeed in a digitally-driven world. The Merage School's curriculum distinguishes students as leaders in data-driven decision-making, the role of information technology, and digitally-driven leadership.

The Full-Time MBA program requires a minimum of 92 units with a minimum grade point average of 3.0 in the core curriculum and overall. Students in the concentration that do not meet this GPA requirements will be advised to transfer out of the concentration to ensure their academic success. The curriculum consists of courses divided into two groups designed to achieve specific educational objectives. Ten required Common Core Courses (40 units) and 52 units of elective courses which students select to emphasize career goals and educational interests. For those students pursuing a concentration in Analytics in Digital Leadership, students must enroll in four electives from the below concentration list as well one required elective: MGMTMBA 270. A thesis is not required.

### Course Requirements

A. Complete:

MGMTMBA 200	Thinking Strategically in the Digital Age
MGMTMBA 201A	Business Analytics: Decision-Making
MGMTMBA 202	Organizational Leadership for Management

MGMTMBA 203A	Financial Reporting
MGMTMBA 204A	Microeconomics for Management in the Digital Age
MGMTMBA 205	Marketing Principles
MGMTMBA 207	Competing with Digital: Technology, Analytics, and Platforms
MGMTMBA 208	Operational Excellence: Processes, Models, and Analytics
MGMTMBA 209A	Managerial Finance
MGMTMBA 210	Strategy: Foundations and Dynamics
B. Select 52 units of electives	

### Concentration in Analytics in Digital Leadership Course Requirements

A. Complete:

MGMTMBA 270	Data Camp for Managers
-------------	------------------------

B. Select 16 units from the following list of electives:

MGMTMBA 201B or MGMT FE 281	Management Science Analytical Decision Models for Managers
MGMTMBA 215 or MGMT FE 215	Global Competitive Strategy Strategy in a Digital Age
MGMTMBA 245 or MGMT FE 245	FinTech and the Digital Economy for Business FinTech and the Digital Economy
MGMTMBA 273 or MGMT FE 273	Business Intelligence for Analytical Decisions for Managers
MGMTMBA 274 or MGMT FE 278	Data and Programming for Analytics Data and Programming for Analytics
MGMTMBA 285 or MGMT FE 285	Supply Chain Analytics
MGMTMBA 288 or MGMT FE 288	Predictive Analytics for Business Predictive Analytics
MGMTMBA 294 or MGMT FE 294	Edge EDGE for Managers

C. Select 34 units of electives

**Residence Requirement.** Five quarters.

**International Requirement.** Students must fulfill the requirement in one of the following ways: completion of a Paul Merage School of Business international elective in a functional area; participation in a Paul Merage School of Business international exchange program; or completion of an upper-division or graduate international course offered by another UC school, with the approval of The Paul Merage School of Business Associate Dean.

**Electives.** In addition to the core courses, 52 more units of elective courses are required. Of the 52 units of electives, 18 units for the Analytics in Digital Leadership concentration are outlined above. The major emphasis in the elective courses is to develop additional depth in a discipline or interdisciplinary area or specialized competence in the use of a particular set of technical tools and methods. Students select their electives in light of their educational and career goals and interests.

Further information may be obtained by contacting the University of California, Irvine, Full-Time MBA Program Office, The Paul Merage School of Business, SB1 5400, Irvine, CA 92697-3125; 949-824-4622; or visit the Full-Time MBA website (<http://merage.uci.edu/FullTimeMBA/>).

## Master of Business Administration, Executive

Executive M.B.A (<http://merage.uci.edu/ExecutiveMBA/>).

Email: [mbaprograms@exchange.uci.edu](mailto:mbaprograms@exchange.uci.edu)

Phone: 949-824-4565

Fax: 949-824-0522

The Executive MBA (EMBA) program presents a challenging 21-month course of study specifically designed for executives, senior managers, professionals, entrepreneurs, and technical experts throughout Southern California. Participants have an average of 15 years work experience (with a minimum of eight years), demonstrated leadership abilities, and a proven track record of success. Commencing each fall, students meet for seven consecutive quarters on four class weekends scheduled on Friday and Saturday at The Paul Merage School of Business. The cohort program gives students the opportunity to actively participate in class discussions and interact closely with their peers.

The program offers an applications-oriented curriculum with an international and digital focus designed to give the seasoned working professional contemporary management tools for successfully leading organizations in a changing business environment. The EMBA program is a 76-unit program and offers a maximum amount of core and elective course material presented in an accelerated timetable.

MGMT EP 200	Thinking Strategically in the Digital Age for Executives
MGMT EP 202	Organizational Leadership for Executives
MGMT EP 207	Competing with Digital: Technology, Analytics, Business Models
MGMT EP 201A	Business Analytics: Decision-Making for Executives
MGMT EP 203A	Financial Reporting Policies for Executives
MGMT EP 204A	Microeconomics for Executives in the Digital Age
MGMT EP 208	Operational Excellence: Processes, Strategy, and Analytics
MGMT EP 209A	Managerial Finance for Executives
MGMT EP 205	Marketing Leadership
MGMT EP 210	Strategy for Executives: Foundations and Dynamics

B. Select 34 units of electives.

In addition to the two, four-day residentials, students participate in an in-depth academic, week-long global residential course abroad. This provides a unique opportunity to experience global business firsthand from a corporate, academic, and cultural standpoint.

Further information may be obtained by contacting the University of California, Irvine, Executive MBA Programs, The Paul Merage School of Business, SB1 4200, CA 92697-3125; 949-824-4565; or visit the Executive MBA website (<https://merage.uci.edu/programs/mba/executive-mba/>).

## Master of Business Administration, Fully Employed

Fully Employed M.B.A (<http://merage.uci.edu/FullyEmployedMBA/>).

Email: [mbaprograms@exchange.uci.edu](mailto:mbaprograms@exchange.uci.edu)

Phone: 949-824-4565

The Fully Employed MBA (FEMBA) program gives emerging managers an opportunity to earn an MBA with minimal disruption to their professional lives. Students attend classes delivered in-person or hybrid (online and in-person) during the program. The FEMBA Program enrolls new students in spring and fall. Students that begin the program in spring attend classes nine consecutive quarters, including summers, and complete the program within 27 months. Students that begin the program in fall attend classes during the Fall-Spring academic year and complete the program within 33 months. Students also have the opportunity to accelerate their program to graduate in 21 months.

The program consists of both core courses and electives, allowing students to establish a solid foundation of traditional business skills and then customize their education based on personal interests and goals. The curriculum provides constant interaction between information presented in the classroom and what is being used on the job, reinforcing and enhancing the student's learning experience.

A. Complete:

MGMT FE 200	Thinking Strategically in the Digital Age for Managers
MGMT FE 201A	Business Analytics: Decision-Making for Managers
MGMT FE 202	Organizational Leadership for Managers
MGMT FE 203A	Financial Reporting for Managers
MGMT FE 204A	Microeconomics for Managers in the Digital Age
MGMT FE 205	Marketing Management
MGMT FE 207	Competing with Digital
MGMT FE 208	Operational Excellence: Processes, Principles, and Analytics
MGMT FE 209A	Finance for Managers
MGMT FE 210	Strategy for Managers: Foundations and Dynamics

B. Select 36 units of electives.

In addition to classroom work, students attend three experiential residential courses including one abroad focusing on global markets. In this concentrated setting, students and faculty have an in-depth opportunity to explore a variety of business challenges and how those challenges can best be met using contemporary management tools.

Further information may be obtained by contacting the University of California, Irvine, Fully Employed MBA Program Office, The Paul Merage School of Business, SB1 4200, Irvine, CA 92697-3125; 949-824-4565; or visit the Fully Employed MBA website (<https://merage.uci.edu/programs/masters/fully-employed-mba/>).

## Master of Finance

Master of Finance (<http://sites.uci.edu/masteroffinance/>)

**Phone: 949-824-9859**

Email: [mfin@merage.uci.edu](mailto:mfin@merage.uci.edu) ([mpac@merage.uci.edu](mailto:mpac@merage.uci.edu))

The Master of Finance program provides extensive and practical training for quantitative and analytical jobs in the field of finance. The program prepares graduates for entry- and mid-level positions in the field of finance, and opportunities to specialize in areas such as corporate finance, investments management, wealth management, and real estate. The program is a one-year, self-supporting terminal master's degree, which includes opportunities for extra-curricular internships or practicums.

Students build a strong understanding of modern finance, as well as the quantitative and analytical skills needed to address complex problems found in the field of finance today. Graduates will be prepared for positions in such finance fields as risk management, asset and wealth management, real estate management, and forecasting. Longer term career paths could include chief finance officer, risk managers, chief risk officer, and portfolio managers at banks, asset management companies, and investment funds.

Further information may be obtained by contacting the University of California Irvine, Master of Finance Program Office, The Paul Merage School of Business, SB1 4500, Irvine, CA 92697: 949-824-9859 or visit the Master of Finance website (<https://merage.uci.edu/programs/masters/master-finance/>).

Applicants may apply directly to the Paul Merage School of Business. Applicants must meet all the prerequisites requirements at the time of matriculation into the program. Admission to graduate-level standing in the Paul Merage School of Business is accorded to those possessing an undergraduate degree with an acceptable level of scholarship from an institution of recognized standing. A quantitative background in subjects such as calculus and intermediate statistics and probability is encouraged, and undergraduate degrees in sciences, engineering, mathematics, economics, and business programs are recommended.

Applicants for admission will be evaluated on their academic record and potential for leadership, as demonstrated by the materials submitted in the application. These materials must include official university transcripts, two letters of recommendation, two essays, a resume, and a personal interview (by invitation only). The GMAT or GRE are not required but strongly recommended for applicants with GPA's under a 3.3. While these tests are not required, the admissions team is looking for evidence of strong verbal and quantitative skills. If the potential applicant received his/her undergraduate degree from a foreign country and his/her primary language is not English, then s/he will be responsible to take the TOEFL exam with a minimum score of 80 on the internet-based test. A Pearson Test of English (PTE) may be substituted for the TOEFL. The minimum score for the PTE is 53. Scores are valid for two years.

The program consists of seven required courses (24 units) and seven electives (28 units), for a total of 52 units to be completed in 12 months. The required courses are as follows:

A. Complete the following:

FIN 203A	Financial Reporting for Management
FIN 240	Financial Research Methodology
FIN 210	Foundations of Finance
FIN 241	Risk Management
FIN 249	Derivatives
FIN 296	Master of Finance Capstone
FIN 211	Master of Finance ProSeminar <sup>1</sup>

B. Select seven electives from FIN and/or other Merage graduate programs elective course offerings.

<sup>1</sup> Must be taken during the fall, winter, and spring quarters.

## Master of Innovation and Entrepreneurship

The Master of Innovation and Entrepreneurship (MIE) provides extensive academic and practical training for students to embark on careers as entrepreneurs (innovating to form new companies), and as intrapreneurs (innovating within existing companies).

The program provides students with knowledge and experience on core topics on the process of innovation and entrepreneurship, i.e., identifying new venture opportunities through lean startup methodology, developing a business model, preparing a business plan, assembling a team, raising the necessary financing including venture capital, and launching a new business. The program is a self-supporting terminal master's degree, which includes opportunities for extra-curricular internships or practicums.

Students participate in the New Venture Competition at the Merage School, jointly run by the Beall Center for Innovation and Entrepreneurship and UCI Applied Innovation, from November through May. Students participating in the competition are coached and judged by entrepreneurs, business leaders, angel investors, and venture capitalists, and will have the option of attending several lunch and learns, and short workshops on a variety of topics aimed at increasing the odds of success in the competition. Post May, students have the opportunity to enter the Wayfinder incubator at UCI

Applied Innovation where Innovation Advisors (IAs) through a broad set of available resources, help student teams build relationships with investors, advisors, and community partners to pave the path for successful capital raising, advancement of technology, and refinement of their business models, among other significant milestones.

Applicants may apply directly to the Paul Merage School of Business. Applicants must meet all the prerequisite requirements at the time of matriculation into the program. Admission to graduate level standing in the Paul Merage School of Business is accorded to those possessing an undergraduate degree with an acceptable level of scholarship from an institution of recognized standing.

Applicants for admission are evaluated on their academic record and potential for leadership, as demonstrated by the materials submitted in the application. These materials must include official university transcripts, two letters of recommendation, two essays, a resume, and a personal interview (by invitation only). The GMAT or GRE are strongly recommended for applicants with GPAs under a 3.3. While these tests are not required, the admissions team is looking for evidence of strong verbal and quantitative skills. If the potential applicant received his/her undergraduate degree from a foreign country and his/her primary language is not English, then s/he is responsible to take the TOEFL exam with a minimum score of 80 on the internet-based test. A Pearson Test of English (PTE) may be substituted for the TOEFL. The minimum score for the PTE is 53.

### Admission

Applicants may apply directly to the Paul Merage School of Business. Applicants must meet all the prerequisite requirements at the time of matriculation into the program. Admission to graduate level standing in the Paul Merage School of Business is accorded to those possessing an undergraduate degree with an acceptable level of scholarship from an institution of recognized standing.

Applicants for admission are evaluated on their academic record and potential for leadership, as demonstrated by the materials submitted in the application. These materials must include official university transcripts, two letters of recommendation, two essays, a resume, and a personal interview (by invitation only). The GMAT or GRE are strongly recommended for applicants with GPAs under a 3.3. While these tests are not required, the admissions team is looking for evidence of strong verbal and quantitative skills. If the potential applicant received his/her undergraduate degree from a foreign country and his/her primary language is not English, then s/he is responsible to take the TOEFL exam with a minimum score of 80 on the internet-based test. A Pearson Test of English (PTE) may be substituted for the TOEFL. The minimum score for the PTE is 53.

### Requirements

The program consists of 10 required courses (28 units) and two electives (8 units), for a total of 36 units. The degree can be completed full-time over three quarters or part-time over six quarters. The maximum time to degree is two years. The required courses are as follows:

#### A. Complete:

INNO 202	Leadership for Entrepreneurs
INNO 203	Financial Accounting for Entrepreneurs
INNO 205	Marketing for Entrepreneurs
INNO 209	Managerial Finance for Entrepreneurs
INNO 211	MIE Pre-Accelerator <sup>1</sup>
INNO 214	Entrepreneurship
INNO 215	Lean Startup
INNO 218	Venture Capital for Entrepreneurs
INNO 292	Business Law for Entrepreneurs
INNO 294	Edge: Innovation in the New Digital Age

#### B. Select two electives from the following:

INNO 212	Business Growth Strategies for Entrepreneurs
INNO 252D	New Product Development for Entrepreneurs
INNO 257	Marketing on the Internet for Entrepreneurs
INNO 298	Merage Consulting Projects for Entrepreneurs

<sup>1</sup> Must be taken during the fall, winter, and spring quarters.

## Master of Professional Accountancy

Master of Professional Accountancy (<http://merage.uci.edu/go/mpac/>)

Email: [mpac@merage.uci.edu](mailto:mpac@merage.uci.edu)

Phone: 949-824-9240

The Master of Professional Accountancy (MPAc) program provides an intensive, focused level of training that will prepare graduates for entering positions within an accounting firm, private company, or public/nonprofit organization. Combined with undergraduate preparation in accounting, the MPAc program will enable students to meet the State of California Board of Accountancy educational standards for licensure as a certified public

accountant in California. The program is a self-supporting terminal master's degree and includes the opportunity for a one-quarter internship. The program is offered as a full-time, one-year program or on a part-time basis in which students complete the program requirements over two years.

Students who complete this program will possess the necessary knowledge to solve fundamental and strategic issues in accounting. They will learn to apply both critical thinking and established accounting processes to issues crucial to the audit and accountability of an organization. The coursework will have a pedagogical underpinning of ethical behavior and professional conduct. The underlying philosophy in the program's framework is intended to develop a foundational understanding of key accounting principles and concepts while also offering a breadth of broader issues and topics relevant to the discipline.

Further information may be obtained by contacting the University of California, Irvine, Master of Professional Accountancy Program Office, The Paul Merage School of Business, SB1 4500, Irvine, CA 92697-3125; 949-824-9240; or visit the Master of Professional Accountancy website (<http://merage.uci.edu/MPAc/>).

Applicants may apply directly to The Paul Merage School of Business. Applicants to the fall class must meet all prerequisite requirements at the time of matriculation into the program. Specifically, an applicant must have satisfactorily completed the following prerequisite courses (or their equivalent) in accounting (although students lacking up to two upper-division undergraduate accounting courses will be permitted to petition to enroll in those courses as an additional part of the MPAC program): The minimum coursework that must be completed or in progress at the time of application submission is: Introductory Financial and Managerial Accounting (two courses). The following courses will need to be completed before the program begins in Fall: at least 6 upper-division U.S. accounting-based courses: Intermediate Accounting I, Intermediate Accounting II, Individual Taxation, Auditing, and 2 upper-division accounting electives (recommended electives include: Corporate and Partnership Taxation, Accounting Information Systems, Advanced Accounting, Cost Accounting, and International Accounting. At the discretion of the Admissions Committee, "provisional admission status" will be offered to highly qualified candidates who have met most, but not all, of the prerequisite requirements and will satisfy the requirements prior to matriculation. The GMAT or GRE are not required but strongly recommended for applicants with GPA's under a 3.3. While these tests are not required, the admissions team is looking for evidence of strong verbal and quantitative skills.

Other highly qualified applicants who do not meet the entrance requirements to begin the program in the fall quarter will be offered an opportunity to enroll in an intensive summer pre-session at The Paul Merage School of Business. The pre-session will be required of those who possess an excellent undergraduate record of achievement, strong letters of recommendation, and a clear focus relative to a career in accounting; and, who need specific prerequisite coursework in accounting and business. The summer pre-session will include four courses. Students must successfully complete all of the pre-session coursework to meet the course prerequisites of the MPAC program in order to enter the program in the fall quarter. Pre-session coursework will be done over the two designated Summer Sessions. Students will enroll in a curriculum of two courses in Summer Session I and two courses in Summer Session II. The courses are as follows:

MPAC 200A	Intermediate Accounting Intensive I
MPAC 200B	Foundations of Taxation Intensive
MPAC 200C	Intermediate Accounting Intensive II and Special Topics
MPAC 200D	Auditing Intensive

Admission to graduate standing in The Paul Merage School of Business is accorded to those possessing an undergraduate degree with an acceptable level of scholarship from an institution of recognized standing. Applicants for admission will be evaluated on their academic record and potential for leadership as demonstrated in submitted application materials. These materials will include official university transcripts and resume, two letters of recommendation, a statement of purpose, and an essay. A personal interview, by invitation only, will be part of the admission process. We highly recommend that applicants take the GMAT or GRE. While these tests are not required, the admissions team is looking for evidence of strong quantitative skills. In lieu of evidence for a strong quantitative background in the form of previous coursework or relevant professional experience, the school can use the GMAT/GRE test as evidence of such a skill set. Those students educated from a country where English is not the primary language will be required to possess a minimum score on the Test of English for Foreign Language (TOEFL) of 600 for the paper-based test and 80 for the Internet-based test. Further, international applicants may also take the Pearson Test of English (PTE). The minimum required score for admission is 53. Scores are valid for two years.

The program requires students to complete no less than 11 courses and a minimum of 44 units. Of the minimum of 11 courses needed to complete the program, students must satisfactorily complete seven required courses. The required courses are as follows:

MPAC 230	Accounting ProSeminar: Career and Professional Development (Students must enroll in both Proseminar courses.)
MPAC 231A	Financial Statement Analysis and Forecasting
MPAC 232	Taxes and Business Strategy
MPAC 235	Advanced Managerial Accounting
MPAC 238	Advanced Auditing and Assurance Services
MPAC 239	Ethics in Accounting and Business
MPAC 291	Professional Research and Communication

Students will be expected to enroll in and successfully complete at least 16 units of elective work as part of the program requirements. Students will be permitted to enroll in M.B.A. or MPAC level courses if the student has met the prerequisites and there is space allowed in the course. Further, students will be encouraged to pursue a formal internship experience in the winter and/or spring quarters by enrolling in MPAC 241 Accounting Internship, a 2-4 unit course.

# UCI Faculty Lists

## UCI Faculty Distinctions

The 2007 Nobel Peace Prize was awarded to the Intergovernmental Panel on Climate Change (IPCC) and former Vice President Al Gore. Several UC Irvine climate scientists have played a part in writing, reviewing, and editing IPCC climate change reports over the last decade, including Michael Prather, *Professor of Earth System Science and Fred Kavli Chair in Earth System Science*; Donald R. Blake, *Professor of Chemistry and Earth System Science*; Michael L. Goulden, *Associate Professor of Earth System Science and of Ecology and Evolutionary Biology*; Gudrun Magnusdottir, *Professor of Earth System Science*; James T. Randerson, *Associate Professor of Earth System Science*; Soroosh Sorooshian, *Director of the Center for Hydrometeorology and Remote Sensing (CHRS)*, and *UCI Distinguished Professor of Civil and Environmental Engineering and of Earth System Science*; Susan E. Trumbore, *Professor of Earth System Science*; Stanley C. Tyler, *Researcher, Department of Earth System Science*; Jin-Yi Yu, *Associate Professor of Earth System Science*; and Charles S. Zender, *Associate Professor of Earth System Science*.

## UCI Nobel Laureates

### Nobel Prize in Chemistry, 2004

Irwin Rose, *UCI Distinguished Professor Emeritus, Department of Physiology and Biophysics* (d. 2015)

### Nobel Prize in Chemistry, 1995

F. Sherwood Rowland, *Research Professor Emeritus of Chemistry and Earth System Science, and Bren Chair* (d. 2012)

### Nobel Prize in Physics, 1995

Frederick Reines, *UCI Distinguished Professor Emeritus of Physics* (d. 1998)

## UCI Endowed Chairs

### Daniel G. Aldrich, Jr. Endowed Chair

Frank L. Meyskens, Jr., *Director of the Chao Family Comprehensive Cancer Center and Professor of Medicine*

### Louise Turner Arnold Chair in the Neurosciences

Daniele Piomelli, *Professor of Anatomy and Neurobiology; Pharmacology; Biological Chemistry*

### Howard Baskerville Professor of Humanities

Nasrin Rahimieh, *Professor of Comparative Literature; Culture and Theory; Gender and Sexual Studies*

### Arnold and Mabel Beckman Chair in Laser Biomedicine

Michael W. Berns, *Professor of Surgery; Developmental and Cell Biology; Biomedical Engineering*

### Grace Beekhuis Bell Chair in Biological Chemistry

Suzanne B. Sandmeyer, *Professor of Biological Chemistry; Microbiology and Molecular Genetics; Chemical Engineering and Materials Science*

### Warren L. Bostick Chair in Pathology

Edwin Monuki, *Professor of Pathology and Laboratory Medicine*

### Donald Bren Professors, The Donald L. Bren Endowment

Geoffrey Bowker, *Professor of Informatics*

Michael Carey, *Professor of Computer Science*

Steven Frank, *Professor of Ecology and Evolutionary Biology*

Sheldon Greenfield, *Professor of Medicine*

Wilson Ho, *Professor of Physics and Astronomy; Chemistry*

Anthony James, *Professor of Microbiology and Molecular Genetics; Molecular Biology and Biochemistry*

Ramesh C. Jain, *Professor of Information and Computer Sciences*

Arthur D. Lander, *Director, Center for Complex Biological Systems and Professor of Developmental and Cell Biology; Biomedical Engineering; Pharmacology*

Eric Rignot, *Professor of Earth System Science*

Paolo Sassone-Corsi, *Director of the Center for Epigenetics and Metabolism and UCI Distinguished Professor, Departments of Biological Chemistry; Pharmaceutical Sciences; Microbiology and Molecular Genetics*

Leslie Thompson, *Professor of Psychiatry and Human Behavior*

**Conexant-Broadcom Chair in the Center for Pervasive Communications**

Hamid Jafarkhani, *UCI Chancellor's Professor of Electrical Engineering and Computer Science*

**Thomas and Mary Cesario Endowed Chair in Medicine**

Alpesh Amin, *Professor of Medicine; Management; Biomedical Engineering*

**Ralph V. Clayman Endowed Chair in Endourology**

Ralph V. Clayman, *Professor of Urology*

**John E. Connolly Chair in Surgery**

Ninh Tuan Nguyen, *Department Chair and Professor of Surgery*

**Dean's Leadership Circle Endowed Professorship**

Andrew J. Policano, *Professor of Management; Economics*

**Edward A. Dickson Emerti Professor**

Sidney Golub, *Professor Emeritus of Microbiology and Molecular Genetics*

Timothy Tackett, *Professor Emeritus of History*

**Ralph J. and Carol M. Cicerone Chair in Earth System Science**

James Randerson, *Professor of Earth System Science*

**Endowed Chair in Developmental and Cell Biology**

Kavita Arora, *Department Chair and Professor of Developmental and Cell Biology*

**Philip J. DiSaia Chair in Gynecologic Oncology**

Robert E. Bristow, *Director of the Division of Gynecologic Oncology and Professor, Department of Obstetrics and Gynecology (Gynecologic Oncology)*

**Suzanne Dykema Endowed Chair In Pancreatic Cancer**

David Imagawa, *Professor of Clinical Surgery*

**Endowed Chair for the Center for Diversity in Engineering Education**

Regina Ragan, *Director for the Center for Diversity of Engineering Education and Professor of Chemical Engineering and Materials Science*

**Endowed Chair in Gastrointestinal Endoscopic Oncology**

Kenneth Chang, *Professor in Clinical Medicine*

**Walter B. Gerken Chair in Enterprise and Society**

Rajeev K. Tyagi, *Professor of Management*

**Endowed Chair in Ecology and Evolutionary Biology**

Kathleen Treseder, *Professor of Ecology and Evolutionary Biology*

**Falmagne Endowed Chairs in Mathematical Psychology and Cognitive Sciences**

Zygmunt Pizlo, *Professor of Cognitive Sciences*

Jeffrey Rouder, *Professor Cognitive Sciences*

**Walter B. Gerken Chair in Enterprise and Society**

Rajeev Tyagi, *Professor of Business*

**Clifford S. Heinz Chair**

Stergios Skaperdas, *Professor of Economics*

**Roger W. and Janice M. Johnson Chair in Civic Governance and Public Management**

Martha Feldman, *Professor of Planning, Policy, and Design; Management; Political Science; Sociology*

**Fred Kavli Chair in Earth System Science**

Ellen Druffel, *Professor of Earth System Science*

**The Robert A. and Barbara L. Kleist Chair in Informatics**

Gillian Hayes, *Professor of Informatics; Education*

**William J. Link Chair in Biomedical Engineering**

Abraham Lee, *Department Chair and Professor of Biomedical Engineering and Professor of Mechanical and Aerospace Engineering*

**John S. and Marilyn Long Chair in U.S.-China Business Law**

Ji Li, *Professor of Law*

**John D. and Catherine T. MacArthur Foundation Chair in Digital Media and Learning**

Mizuko "Mimi" Ito, *Professor in Residence of Anthropology; Education; Informatics*

**Dorothy J. Marsh Chair in Reproductive Biology**

Philip J. Di Saia, *Chief of Gynecology and Gynecologic Oncology and Professor of Obstetrics and Gynecology; Radiation Oncology*

**Della Martin Chair in Psychiatry**

William E. Bunney, Jr., *UCI Distinguished Professor Emeritus of Psychiatry and Human Behavior*

**Maseeh Chair in Persian Studies and Culture**

Touraj Daryaee, *Director of the Dr. Samuel M. Jordan Center for Persian Studies and Culture and Professor of History*

**Maseeh Professor in Persian Performing Arts**

Hossein Omoumi, *Professor of Music and of Persian Performing Arts*

**Gary McCue Administrative Term Chair in Cosmology**

James Bullock, *Professor of Physics and Astronomy*

**James L. McGaugh Chair in the Neurobiology of Learning and Memory**

Craig Stark, *Professor of Neurobiology and Behavior*

**Abraham I. Melden Chair in Moral Philosophy**

Margaret Gilbert, *Professor of Philosophy*

**Paul Merage Chair in Business Growth**

David A. Hirshleifer, *Professor of Management; Economics*

Terrence J. Shevlin, *Professor of Management*

**Eric L. and Lila D. Nelson Chair in Neuropharmacology**

Olivier Civelli, *Department Chair of Pharmacology and Professor, Departments of Pharmacology; Developmental and Cell Biology; Pharmaceutical Sciences*

**Stacey Nicholas Endowed Chair for Diversity in Engineering Education**

Regina Ragan, *Professor of Chemical Engineering and Materials Science*

**Nichols Term Chair in Neuroscience**

Claudia Kawas, *Professor of Neurology, Neurobiology and Behavior*

**Jack W. Peltason Endowed Chair**

Bernard N. Grofman, *Professor of Political Science; Economics*

**The Robert and Marjorie Rawlins Chair of Music**

Michael Dessen, *Associate Professor of Music*

**Ronald W. Reagan Endowed Chair in Geriatrics**

Lisa Gibbs, *Chief of the Division of Geriatric Medicine and Gerontology and Professor of Family Medicine*

**Reeve-Irvine Chair in Spinal Cord Injury Research**

Oswald Steward, *Director, Reeve-Irvine Research Center; Senior Associate Dean for Research, School of Medicine; and Professor, Departments of Anatomy and Neurobiology; Neurobiology and Behavior*

**Chair in Rhetoric and Communication**

Virginia Jackson, *Associate Professor of English*

**Norman Rostoker Chair in Applied Physics**

Toshiki Tajima, *Professor of Physics and Astronomy*

**Henry Samueli Endowed Chairs**

Xiaoqing Pan, *Professor of Chemical Engineering and Materials Science; Physics and Astronomy*

William A. Sirignano, *Professor of Mechanical and Aerospace Engineering*

H. Kumar Wickramasinghe, *Department Chair and Professor of Electrical Engineering and Computer Science; Biomedical Engineering; Chemical Engineering and Materials Science*

**Susan Samuelli Chair in Integrative Medicine**

Shaista Malik, *Director of the Susan Samuelli Center for Integrative Medicine, Professor of Medicine*

**Walter R. Schmid Chair in Pediatric Urology**

Antoine Khoury, *Professor, Department of Urology*

**Danette (Dee Dee) Shepard Chair in Neurological Studies**

Tallie Z. Baram, *Professor of Pediatrics; Neurology; Physiology and Biophysics; Anatomy and Neurobiology*

**Gerald B. Sinykin, M.D. Chair in Family Medicine**

Emily Dow, *Interim Chair and Professor of Family Medicine*

**Jack H. Skirball Endowed Chair**

James V. Jester, *Professor of Ophthalmology; Biomedical Engineering*

**Ted and Janice Smith Family Foundation Endowed Chair in Information and Computer Science**

Marios Papaefthymiou, *Dean of the Donald Bren School of Information and Computer Sciences*

**Robert R. Sprague Chair in Brain Imaging**

Steven G. Potkin, *Director of the Brain Imaging Center and Professor of Psychiatry and Human Behavior*

**Roger F. Steinert, MD, Endowed Chair in Ophthalmology**

Baruch Kuppermann, *Professor of Ophthalmology*

**Taco Bell Chair in Information Technology Management**

Vijay Gurbaxani, *Professor of Management; Informatics*

**Teller Family Chair in Jewish History**

Matthias Lehmann, *Professor of History; European Languages and Studies*

**Edward and Vivian Thorp Chair in Mathematics**

Karl C. Rubin, *Department Chair and Professor of Mathematics*

**Thomas T. and Elizabeth C. Tierney Chair in Global Peace and Conflict Studies**

Etel Solingen, *Professor of Political Science*

**Claire Trevor Endowment for the Dean of the Claire Trevor School of the Arts**

Stephen Barker, *Dean of the Claire Trevor School of the Arts and Professor of Drama*

**Claire Trevor Professors in the Arts**

Daniel Joseph Martinez, *Professor of Arts*

Bryan Reynolds, *Professor of Drama*

**Fong and Jean Tsai Chair in Women's Imaging**

Stephen Feig, *Division Director of Mammography and Professor of Clinical Radiological Sciences, Department of Radiological Sciences*

**UCI Excellence in Teaching Chair in Mathematics**

Richard Schoen, *Professor of Mathematics*

**Chair in Urology, Oncology**

Thomas Ahlering, *Professor of Urology*

**Dr. Stanley van den Noort Endowed Chair**

Tahseen Mozaffar, *Professor of Neurology*

**Drew, Chace, and Erin Warmington Chair in the Social Ecology of Peace and International Cooperation**

Scott A. Bollens, *Professor of Planning, Policy, and Design*

**UCI Chancellor's Fellows**

Sharon Block, *Professor of History*

Yong Chen, *Professor of History*

Mahtab Jafari, *Professor of Pharmaceutical Sciences*

Elizabeth Jarvo, *Professor of Chemistry*

Matthew Law, *Professor of Chemistry*

Jennifer Lee, *Professor of Sociology*

Mona Lynch, *Professor of Criminology, Law and Society*

Jennifer Martiny, *Professor of Ecology and Evolutionary Biology*

Robert Spitale, *Professor of Pharmaceutical Sciences*

Isabella Velicogna, *Professor of Earth System Science*

Geoff Ward, *Professor of Criminology, Law, and Society*

Michael Yassa, *Professor of Neurobiology and Behavior*

## UCI Chancellor's Professors

Kei Akagi, *UCI Chancellor's Professor of Music; Asian American Studies*

Jonathan Alexander, *Campus Writing Coordinator and UCI Chancellor's Professor of English; Culture and Theory; Education; Gender and Sexuality Studies*

Pierre F. Baldi, *UCI Chancellor's Professor of Computer Science; Biological Chemistry; Biomedical Engineering; Developmental and Cell Biology*

Jeffrey Barrett, *UCI Chancellor's Professor of Logic and Philosophy of Science*

Emiliana Borrelli, *Professor of Microbiology and Molecular Genetics*

Kieron Burke, *UCI Chancellor's Professor of Chemistry; Physics and Astronomy*

Kitty C. Calavita, *UCI Chancellor's Professor Emerita of Criminology, Law and Society*

Chuansheng Chen, *UCI Chancellor's Professor of Psychology and Social Behavior; Education*

Carol McDonald Connor, *UCI Chancellor's Professor of Education*

Rina Dechter, *UCI Chancellor's Professor of Computer Science*

James P. Dourish, *UCI Chancellor's Professor of Informatics; Computer Science*

David A. Eppstein, *UCI Chancellor's Professor of Computer Science*

Michael S. Franz, *UCI Chancellor's Professor of Computer Science; Electrical Engineering and Computer Science*

Charles Gabe, *UCI Chancellor's Professor of Molecular Biology and Biochemistry*

Michael T. Goodrich, *UCI Chancellor's Professor of Computer Science; Electrical Engineering and Computer Science*

Michael R. Gottfredson, *UCI Chancellor's Professor of Criminology, Law and Society; School of Law; Sociology*

Douglas Granger, *UCI Chancellor's Professor of Psychology and Social Behavior*

Hamid Jafarkhani, *Conexant-Broadcom Chair in the Center for Pervasive Communications and UCI Chancellor's Professor of Electrical Engineering and Computer Science*

Zeev Kain, *UCI Chancellor's Professor of Anesthesiology and Perioperative Care*

Natalia Komorova, *UCI Chancellor's Professor of Mathematics*

Frank M. LaFerla, *Dean of School of Biological Sciences and UCI Chancellor's Professor of Neurobiology and Behavior; Neurology*

Eva Y. Lee, *UCI Chancellor's Professor Emerita of Biological Chemistry*

Peter Li, *UCI Chancellor's Professor Emeritus of Mathematics*

John S. Lowengrub, *UCI Chancellor's Professor of Mathematics; Biomedical Engineering; Chemical Engineering and Materials Science*

Steven J. Mailloux, *UCI Chancellor's Professor of English; Comparative Literature*

Qing Nie, *UCI Chancellor's Professor of Mathematics*

Margot Norris, *UCI Chancellor's Professor Emerita of English; Comparative Literature*

Eric Pearlman, *Director of the Institute of Immunology and UCI Chancellor's Professor of Physiology and Biophysics; Ophthalmology*

Duncan Pritchard, *UCI Chancellor's Professor of Philosophy*

Charles C. Ragin, *UCI Chancellor's Professor of Sociology*

Markus W. Ribbe, *UCI Chancellor's Professor of Molecular Biology and Biochemistry; Chemistry*

Rozanne Sandri-Goldin, *UCI Chancellor's Professor of Microbiology and Genetics*

Eli Simon, *UCI Chancellor's Professor of Drama*

Padhraic Smyth, *UCI Chancellor's Professor of Computer Science*

Hal Stern, *UCI Chancellor's Professor of Statistics*

Daniel Stokols, *UCI Chancellor's Professor Emeritus of Psychology and Social Behavior; Planning, Policy, and Design; Program in Public Health*

Richard N. Taylor, *UCI Chancellor's Emeritus Professor of Informatics*

Brook Thomas, *UCI Chancellor's Professor Emerita of English*

Leslie Thompson, *UCI Chancellor's Professor of Psychiatry and Human Behavior*

Gene Tsudik, *UCI Chancellor's Professor of Computer Science*

Jeffrey N. Wasserstrom, *UCI Chancellor's Professor of History*

Cécile Marie Whiting, *Department Chair and UCI Chancellor's Professor of Art History; Visual Studies*

Hong-Kai Zhao, *UCI Chancellor's Professor of Mathematics; Computer Science*

Albert Zlotnik, *UCI Chancellor's Professor of Physiology and Biophysics*

## UCI Faculty Membership in Prestigious and Highly Prestigious Learned Societies

Alexander Von Humboldt Foundation: 2

Alfred P. Sloan Foundation: 47

American Academy of Arts and Sciences: 15

American Association for the Advancement of Science: 105

American Association of University Women (AAUW): 7

American Council of Learned Societies: 26

American Philosophical Society: 5

American Psychological Association: 6

Association for Psychological Science: 11

Center for Advanced Studies in the Behavioral Sciences: 2

Center for Hellenic Studies: 2

Center for the Advanced Study in the Visual Arts: 2

David and Lucile Packard Foundation: 2

Entomological Society of America: 1

Institute for Advanced Study: 4

John Simon Guggenheim Memorial Foundation: 27

MacArthur Foundation: 1

National Academy of Education: 22

National Academy of Engineering: 6

National Academy of Sciences: 14

National Endowment for the Humanities (NEH): 21

National Humanities Center: 4

Newberry Library: 1

Optical Society of America, The (OSA): 5

Princeton University Center for Human Values: 2  
Radcliffe Institute for Advanced Study: 6  
Renaissance Society of America: 1

*Faculty current as of Fall 2019. Source Academic Analytics awards matches full data (release AAD2018.07.01535). Awards as of 6/29/2020.*

## UCI Distinguished Professors

Aijaz Ahmad, *UCI Distinguished Professor of Comparative Literature*

Hoda Anton-Culver, *UCI Distinguished Professor of Epidemiology*

Diran Apelian, *UCI Distinguished Professor of Materials Science and Engineering*

V. Ara Apkarian, *UCI Distinguished Professor of Chemistry*

Kyriacos Athanasiou, *UCI Distinguished Professor of Biomedical Engineering*

Satya N. Atluri, *UCI Distinguished Professor Emeritus of Mechanical and Aerospace Engineering*

John C. Avise, *UCI Distinguished Professor of Ecology and Evolutionary Biology*

Pierre Baldi, *UCI Distinguished Professor of Computer Science*

Tallie Z. Baram, *UCI Distinguished Professor of Pediatrics*

Alan Barbour, *UCI Distinguished Professor of Microbiology and Molecular Genetics*

Christopher Barty, *UCI Distinguished Professor of Physics and Astronomy*

Frank D. Bean, *UCI Distinguished Professor of Sociology; Economics; Education*

Ermanno Bencivenga, *UCI Distinguished Professor Emeritus of Philosophy*

Michael Berns, *UCI Distinguished Professor of Surgery*

Donald R. Blake, *UCI Distinguished Professor of Chemistry*

Andrew Borovik, *UCI Distinguished Professor of Chemistry*

Philip Bromiley, *UCI Distinguished Professor of Business*

Jan Brueckner, *UCI Distinguished Professor of Economics*

William E. Bunney, Jr., *Della Martin Chair in Psychiatry and UCI Distinguished Professor Emeritus of Psychiatry and Human Behavior*

Michael D. Cahalan, *UCI Distinguished Professor of Physiology and Biophysics*

Michael Carey, *UCI Distinguished Professor of Computer Science*

Ronald Carson, *UCI Distinguished Professor of English*

Leo Chavez, *UCI Distinguished Professor of Anthropology*

Jerome Christensen, *UCI Distinguished Professor Emeritus of English*

Olivier Civelli, *UCI Distinguished Professor of Pharmacology*

Ralph Clayman, *UCI Distinguished Professor of Urology*

Robert Corn, *UCI Distinguished Professor of Chemistry*

Carl Cotman, *UCI Distinguished Professor of Neurology*

Imran Currim, *UCI Distinguished Professor of Business*

Rina Dechter, *UCI Distinguished Professor of Computer Science*

Luis De La Maza, *UCI Distinguished Professor of Pathology*

Joseph Dimento, *UCI Distinguished Professor of Professor*

Barbara A. Doshier, *UCI Distinguished Professor of Cognitive Sciences*

Michael V. Drake, *UCI Distinguished Professor of Ophthalmology*

Ellen Druffel, *UCI Distinguished Professor of Earth System Science*

Greg Duncan, *UCI Distinguished Professor of Education; Economics; and Psychology and Social Behavior*

Nikil Dutt, *UCI Distinguished Professor of Computer Science*

Jacquelynn S. Eccles, *UCI Distinguished Professor of Education; Psychology and Social Behavior*

Said E. Elghobashi, *UCI Distinguished Professor of Mechanical and Aerospace Engineering*

William J. Evans, *UCI Distinguished Professor of Chemistry*

George Farkas, *UCI Distinguished Professor of Education*

Howard Federoff, *UCI Distinguished Professor of Neurology*

Barbara J. Finlayson-Pitts, *Director of AirUCI and UCI Distinguished Professor of Chemistry*

Zachary Fisk, *UCI Distinguished Professor of Physics and Astronomy*

Matthew Foreman, *UCI Distinguished Professor of Mathematics*

Efi Foufoula-Georgiou, *UCI Distinguished Professor of Civil and Environmental Engineering*

Steven Frank, *UCI Distinguished Professor of Ecology and Evolutionary Biology*

Christine Gall, *UCI Distinguished Professor of Anatomy and Neurobiology*

Bryant Garth, *UCI Distinguished Professor Emeritus of Law*

Jean-Luc Gaudiot, *UCI Distinguished Professor of Electrical Engineering and Computer Science*

Tryphon Georgiou, *UCI Distinguished Professor of Mechanical and Aerospace Engineering*

Margaret Gilbert, *UCI Distinguished Professor of Philosophy*

Charles Gabe, *UCI Distinguished Professor of Molecular Biology and Biochemistry*

David Golberg, *UCI Distinguished Professor of Comparative Literature*

Steven Goldstein, *UCI Distinguished Professor of Physiology and Biophysics*

Michael Goodrich, *UCI Distinguished Professor of Computer Sciences*

Enrico Gratton, *UCI Distinguished Professor of Biomedical Engineering*

Sheldon Greenfield, *UCI Distinguished Professor of Medicine*

Bernard Grofman, *UCI Distinguished Professor of Political Science*

Stephan Hanessian, *UCI Distinguished Professor of Pharmaceutical Sciences*

John Hemminger, *UCI Distinguished Professor of Chemistry*

David Hirshleifer, *UCI Distinguished Professor of Business*

Wilson Ho, *UCI Distinguished Professor of Physics and Astronomy*

Ramesh Jain, *UCI Distinguished Professor of Computer Sciences*

Anthony James, *UCI Distinguished Professor of Microbiology and Molecular Genetics*

Svetlana Jitomirskaya, *UCI Distinguished Professor of Mathematics*

Pramod Khargonekar, *UCI Distinguished Professor of Electrical Engineering and Computer Science*

Abel Klein, *UCI Distinguished Professor of Mathematics*

Judith Kroll, *UCI Distinguished Professor of Language Science*

Arthur Lander, *UCI Distinguished Professor of Developmental and Cell Biology*

Andrew Lankford, *UCI Distinguished Professor of Physics and Astronomy*

Enrique Lavernia, *UCI Provost and UCI Distinguished Professor of Chemical Engineering and Material Science*

Ellis Levin, *UCI Distinguished Professor of Medicine*

Elizabeth F. Loftus, *UCI Distinguished Professor of Psychology and Social Behavior; Cognitive Sciences; Criminology, Law and Society; School of Law*

Lar Lubovitch, *UCI Distinguished Professor of Dance*

Gary Lynch, *UCI Distinguished Professor of Psychiatry and Human Behavior*

Penelope J. Maddy, *UCI Distinguished Professor of Logic and Philosophy of Science; Mathematics; Philosophy*

Catherine Malabou, *UCI Distinguished Professor of Comparative Literature*

David B. Malament, *UCI Distinguished Professor Emeritus of Logic and Philosophy of Science*

Mihai Maniutiu, *UCI Distinguished Professor of Drama*

George Marcus, *UCI Distinguished Professor of Anthropology*

James L. McGaugh, *UCI Distinguished Professor Emeritus of Neurobiology and Behavior*

Bruce L. McNaughton, *UCI Distinguished Professor of Neurobiology and Behavior*

Carrie Menkel-Meadow, *UCI Distinguished Professor of Law*

Frank Meyskens, *UCI Distinguished Professor of Medicine*

John Miles, *UCI Distinguished Professor of English*

J. Hillis Miller, *UCI Endowed Chair and UCI Distinguished Professor Emeritus of Comparative Literature; English*

Kristen Monroe, *UCI Distinguished Professor of Political Science*

Shaul Mukamel, *UCI Distinguished Professor of Chemistry; Physics and Astronomy*

Gonzalo Navajas, *UCI Distinguished Professor of Spanish and Portuguese*

David Neumark, *UCI Distinguished Professor of Economics*

Alexandru Nicolau, *UCI Distinguished Professor of Computer Sciences*

Adeli Nyamathi, *UCI Distinguished Professor of Nursing*

Larry E. Overman, *UCI Distinguished Professor of Chemistry*

Ian Parker, *UCI Distinguished Professor of Neurobiology and Behavior*

Jone Pearce, *UCI Distinguished Professor Emeritus of Business*

Reginald Penner, *UCI Distinguished Professor of Chemistry*

Daniele Piomelli, *UCI Distinguished Professor of Anatomy and Neurobiology*

Thomas Poulos, *UCI Distinguished Professor of Molecular Biology and Biochemistry*

Michael Prather, *UCI Distinguished Professor of Earth System Science*

Duncan Pritchard, *UCI Distinguished Professor of Philosophy*

Rajagopalan Radhakrishnan, *UCI Distinguished Professor of English*

Yvonne Rainer, *Claire Trevor Professor and UCI Distinguished Professor Emerita of Art*

Wilfred Recker, *UCI Distinguished Professor of Civil and Environmental Engineering*

Karen S. Rook, *UCI Distinguished Professor Emeritus of Psychological Science*

Michael Rose, *UCI Distinguished Professor of Ecology and Evolutionary Biology*

Karl Rubin, *UCI Distinguished Professor Emeritus of Mathematics*

Vicki Ruiz, *UCI Distinguished Professor of History; Chicano/Latino Studies*

Ruben G. Rumbaut, *UCI Distinguished Professor of Sociology; Criminology, Law and Society; Education*

Michael Ryan, *UCI Distinguished Professor of English*

Scott Rychnovsky, *UCI Distinguished Professor of Chemistry*

Donald G. Saari, *UCI Distinguished Professor of Economics; Logic and Philosophy of Science; Mathematics*

Hamid Said, *UCI Distinguished Professor of Medicine*

Eric Saltzman, *UCI Distinguished Professor of Earth System Science*

Paolo Sassone-Corsi, *UCI Distinguished Professor of Biological Chemistry*

Richard Schoen, *UCI Distinguished Professor of Mathematics*

Gabriele Schwab, *UCI Distinguished Professor of Comparative Literature*

Bert L. Semler, *UCI Distinguished Professor of Microbiology and Molecular Genetics*

Kenneth J. Shea, *UCI Distinguished Professor of Chemistry; Chemical Engineering and Materials Science*

Alice Silverberg, *UCI Distinguished Professor Emeritus of Mathematics*

William Sirignano, *UCI Distinguished Professor of Mechanical and Aerospace Engineering*

Brian Skyrms, *UCI Distinguished Professor of Logic and Philosophy of Science*

David W. Smith, *UCI Distinguished Professor of Philosophy*

David A. Snow, *UCI Distinguished Professor Emeritus of Sociology*

Etel Solingen, *UCI Distinguished Professor of Political Science*

Soroosh Sorooshian, *UCI Distinguished Professor of Civil and Environmental Engineering*

George Sperling, *UCI Distinguished Professor Emeritus Cognitive Sciences*

Eric J. Stanbridge, *UCI Distinguished Professor Emeritus of Microbiology and Molecular Genetics*

Oswald Steward, *UCI Distinguished Professor of Neurobiology and Behavior*

Andre Tenner, *UCI Distinguished Professor of Molecular Biology and Biochemistry*

Julian Thayer, *UCI Distinguished Professor of Psychological Science*

Ngugi Wa Thiong'O, *UCI Distinguished Professor of Comparative Literature: English*

Steven C. Topik, *UCI Distinguished Professor Emeritus of History*

Judith Treas, *UCI Distinguished Professor of Sociology*

Chen Tsai, *UCI Distinguished Professor of Electrical Engineering and Computer Science*

Gene Tsudik, *UCI Distinguished Professor of Computer Science*

Vijay Vazirani, *UCI Distinguished Professor of Computer Science*

Steven R. White, *UCI Distinguished Professor of Physics and Astronomy*

H. Kumar Wickramasinghe, *UCI Distinguished Professor of Electrical Engineering and Computer Science*

Samuel Wilson, *UCI Distinguished Professor Emeritus of Surgery*

## Faculty

Kevork N. Abazajian, Ph.D. University of California, San Diego, *Professor of Physics and Astronomy*

M. Ackbar Abbas, M.Phil. University of Hong Kong, *Professor of Comparative Literature* (Hong Kong culture and postcolonialism, visual culture, architecture and cinema, cultural theory, globalization)

Pablo J. Abbona, M.D. National University of Cuyo, *Health Sciences Clinical Professor of Radiological Sciences*

Geoffrey W. Abbott, Ph.D. University of London, *Senior Associate Dean for Academic Personnel and Vice Dean for Basic Science Research and Professor of Physiology and Biophysics; Physiology and Biophysics*

Hermelinda G. Abcede, M.D. Medical College of Wisconsin, *Health Sciences Assistant Clinical Professor of Neurology*

Mohammad Javad Abdolhosseini Qomi, Ph.D. Massachusetts Institute of Technology, *Assistant Professor of Civil and Environmental Engineering* (mechanics and physics of multi-scale porous materials, nano- and meso-chemo-mechanics, engineering advanced materials for sustainable infrastructures)

Nadine Abi-Jaoudeh, M.D. University of Montreal, *Professor of Radiological Sciences*

Tayloria Adams, Ph.D. Michigan Technological University, *Assistant Professor of Chemical and Biomolecular Engineering* (dielectrophoresis, microfluidic devices, stem cells, biomarker development, cell membrane biophysics, cell sorting)

Adeyemi Adeleye, Ph.D. University of California, Santa Barbara, *Assistant Professor of Civil and Environmental Engineering* (water/environmental chemistry, environmental nanotechnology, pollution remediation, fate and effects of emerging contaminants)

Felice C. Adler-Shohet, M.D. Vanderbilt University, *Health Sciences Associate Clinical Professor of Pediatrics*

Behnoosh Afghani, M.D. University of Southern California, *Health Sciences Clinical Professor of Pediatrics*

Neerja Aggarwal, Ph.D. University of California, Irvine, *Lecturer of Economics*

Amir Aghakouchak, Ph.D. University of Stuttgart, *Professor of Civil and Environmental Engineering* (hydrology, climatology, remote sensing of environment, climate extremes, compound and cascading hazards, climate change, stochastic modeling, water resources management)

Hamidreza Aghasi, Ph.D. Cornell University, *Assistant Professor of Electrical Engineering and Computer Science* (analog circuit design, mm-wave and terahertz integrated circuits, high resolution integrated sensing and imaging, neuromorphic computation, emerging device technologies)

Nancy M. Aguilar-Roca, Ph.D. University of California, San Diego, *Associate Professor of Teaching of Ecology and Evolutionary Biology*

Aijaz Ahmad, *Distinguished Professor of Comparative Literature* (critical theory, world literature, marxism, tricontinental social thought)

Iftekhar Ahmed, Ph.D. Oregon State University, *Assistant Professor of Informatics* (data mining, software engineering, software testing and analysis, software maintenance, empirical studies)

Zahra G. Ahmed, Ph.D. University of California, Irvine, *Senior Lecturer of Undergraduate Education*

Jane C. Ahn, M.D. City University of New York, Mount Sinai, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

June Ahn, Ph.D. University of Southern California, *Associate Professor of Education*

Kyle Ahn, M.D. New York Medical College, *Vice Chair for Academic Affairs and Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Dennis Aigner, Ph.D. University of California, Berkeley, *Professor Emeritus of Paul Merage School of Business*

Shlomit Aizik, Ph.D. Tel Aviv University, *Associate Professor of Pediatrics*

Kei Akagi, B.A. International Christian University, *Professor of Music; Asian American Studies*

Takeo Akasaki, Ph.D. University of California, Los Angeles, *Professor Emeritus of Mathematics* (ring theory)

Yama Akbari, Ph.D. University of California, Irvine, *Assistant Professor of Neurology; Neurological Surgery*

Mohammad A. Al Faruque, Ph.D. University of Kaiserslautern, *Chair of Emulex Career Development and Associate Professor of Electrical Engineering and Computer Science; Computer Science; Mechanical and Aerospace Engineering* (cyber-physical systems, internet of things, embedded systems, CPS security)

Samar Al-Bulushi, Ph.D. Yale University, *Assistant Professor of Anthropology* (surveillance, policing, and militarized urbanisms; Islam, Africa, and the racialized geopolitics of the war on terror; elites, diplomacy, and transnational governance)

Yousuf Al-Bulushi, Ph.D. University of North Carolina at Chapel Hill, *Assistant Professor of Global and International Studies*

Amal Alachkar, Ph.D. University of Manchester, *Associate Professor of Teaching of Pharmaceutical Sciences* (neurotransmitter systems, molecular pharmacology, neuropsychopharmacology)

Nurudeen O. Alao, Ph.D. Northwestern University, *Lecturer of Social Sciences*

Bruce Albala, Ph.D. Syracuse University, *Associate Dean of Innovation of Clinical Trials and Adjunct Professor of Neurology*

Lonnie R. Alcaraz, M.F.A. University of California, Irvine, *Professor of Drama* (lighting design, digital imaging)

Navid Alem, M.D. University of California, Irvine, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Jonathan Alexander, Ph.D. Louisiana State University, *Associate Dean, Division of Undergraduate Education and Campus Writing Coordinator and Chancellor's Professor of English; Culture and Theory; Education; Gender and Sexuality Studies; Informatics* (writing studies, sexuality studies, queer theory, new media studies)

Nicolaos G. Alexopoulos, Ph.D. University of Michigan, *Professor Emeritus of Electrical Engineering and Computer Science* (high-frequency integrated circuit antennas, wireless communication, materials)

Shannon L. Alfaro, M.S. University of California, Irvine, *Continuing Lecturer of Computer Science* (design/analysis of combinational and sequential systems using SSI/MSI/LSI modules, hardware/firmware implementation of algorithms)

Isabel M. Algaze Gonzalez, M.D. University of Puerto Rico, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Michael T. Alkire, M.D. University of California, Los Angeles, *Professor in Residence of Anesthesiology and Perioperative Care*

David Allan, Choreographer/Former Soloist, National Ballet of Canada; Choreographer, ballet companies, operas, film, and television, *Professor Emeritus of Dance* (ballet, pas de deux, choreography)

Jun F. Allard, Ph.D. University of British Columbia, *Associate Professor of Mathematics; Physics and Astronomy* (mathematical and computational biology)

Bobbie J. Allen, Ph.D. University of Washington, *Lecturer of English*

Elizabeth G. Allen, Ph.D. University of Michigan, *Associate Professor of English; Comparative Literature; European Languages and Studies; Religious Studies* (Chaucer, Gower, 15th century poetry; exemplary literature, romance, chronicle, episodic form; intersections between ethics and politics, politics and religion; hospitality, sovereignty, legal and constitutional history of England)

Steven D. Allison, Ph.D. Stanford University, *Professor of Ecology and Evolutionary Biology; Earth System Science*

Ana Maria Amar Sanchez, Ph.D. University of Buenos Aires, *Professor Emerita of Spanish and Portuguese*

Edwin Amenta, Ph.D. University of Chicago, *Professor of Sociology; Political Science* (political sociology, historical and comparative sociology, social movements, social policy)

Alpesh N. Amin, M.D. M.B.A. Northwestern University, *Department Chair and Thomas and Mary Cesario Endowed Chair in Medicine and Professor of Medicine; Biomedical Engineering; Paul Merage School of Business; Program in Public Health; Radiological Sciences*

Eyal Amiran, Ph.D. University of Virginia, *Professor of Comparative Literature* (digital media theory, twentieth-century literature, narrative and textual theory, psychoanalysis, modern and postmodern intellectual history)

Animashree Anandkumar, Ph.D. Cornell University, *Assistant Professor of Computer Science* (statistical inference and learning of graphical models, scalable network algorithms)

Rhea Anastas, Ph.D. The Graduate Center of The City University of New York, *Associate Professor of Art* (20th century experimentalism in the visual arts, critical theory, cultural theory)

Arash Anavim, M.D. University of Tehran, *Health Sciences Clinical Professor of Radiological Sciences*

Bogi Andersen, M.D. University of Iceland, *Professor of Medicine; Biological Chemistry*

Aileen J. Anderson, Ph.D. University of California, Irvine, *Director of the Sue and Bill Gross Stem Cell Research Center and Professor of Physical Medicine and Rehabilitation; Anatomy and Neurobiology*

Michael Andreasen, M.F.A. University of California, Irvine, *Lecturer of English*

Katherine M. Andreeff, M.D. Wayne State University, *Health Sciences Associate Clinical Professor of Pediatrics*

Ioan Andricioaei, Ph.D. Boston University, *Professor of Chemistry; Physics and Astronomy* (chemical biology, physical chemistry and chemical physics, theoretical and computational)

Alfredo H.-S. Ang, Ph.D. University of Illinois at Urbana-Champaign, *Professor Emeritus of Civil and Environmental Engineering* (structural and earthquake engineering, risk and reliability engineering)

Ara Apkarian, Ph.D. Northwestern University, *UCI Distinguished Professor of Chemistry* (physical chemistry and chemical physics)

Kevin H. Appel, M.F.A. University of California, Los Angeles, *Department Chair and Executive Director of University Art Galleries and Professor of Art* (painting)

Ramesh D. Arasasingham, Ph.D. University of California, Davis, *Professor of Teaching of Chemistry* (chemical education and inorganic chemistry)

Joseph Arditti, Ph.D. University of Southern California, *Professor Emeritus of Developmental and Cell Biology* (developmental physiology of orchids)

Shane Ardo, Ph.D. Johns Hopkins University, *Associate Professor of Chemistry; Chemical and Biomolecular Engineering; Materials Science and Engineering* (inorganic and organometallic, physical chemistry and chemical physics, polymer, materials, nanoscience)

Elham Arghami, M.D. Mashhad University of Medical Sciences, *Health Sciences Assistant Clinical Professor of Family Medicine*

Jeffrey Armstrong, M.D. University of South Carolina, *Health Sciences Associate Clinical Professor of Pediatrics*

Kavita Arora, Ph.D. University of Bombay, *Professor of Developmental and Cell Biology* (Drosophila development; TGF- $\beta$  signal transduction; cell signaling)

Antonio C. Arrieta, M.D. Cayetano Heredia University, *Health Sciences Clinical Professor of Pediatrics*

Jeffrey S. Arroyo, M.D. University of California, Los Angeles, *Health Sciences Assistant Clinical Professor of Family Medicine*

Vellore Arthi, Ph.D. University of Oxford, *Assistant Professor of Economics*

Richard Arum, Ph.D. University of California, Berkeley, *Dean of the School of Education and Professor of Education; Criminology, Law and Society; Sociology*

Muhammad Aslam, M.D. Punjab University, *Health Sciences Clinical Professor of Pediatrics*

Dana W. Aswad, Ph.D. University of California, Berkeley, *Professor Emeritus of Molecular Biology and Biochemistry*

Plamen Atanassov, Ph.D. Bulgarian Academy of Sciences, *UCI Chancellor's Professor of Chemical and Biomolecular Engineering; Chemistry; Materials Science and Engineering* (electrocatalysis and electrocatalysts for energy conversion processes; bio-electrocatalysis and energy harvesting systems)

Kyriacos Athanasiou, Ph.D. Columbia University, *Henry Samueli Chair in Engineering and Director of DELTAi (Directing Engineering and Life Science Translational Advances at Irvine) and Distinguished Professor of Biomedical Engineering* (understanding and enhancing the healing processes of musculoskeletal tissues as well as the body's cartilaginous tissues, effecting translation of engineering innovations to clinical use, especially in terms of instruments and devices)

Satya N. Atluri, ScD Massachusetts Institute of Technology, *Professor Emeritus of Mechanical and Aerospace Engineering*

Peter R. Atsatt, Ph.D. University of California, Los Angeles, *Professor Emeritus of Ecology and Evolutionary Biology*

Scott Atwood, Ph.D. University of Oregon, *Assistant Professor of Developmental and Cell Biology; Dermatology*

Stephanie Au, M.S.N. California State University, Long Beach, *Health Sciences Assistant Clinical Professor of Nursing*

Luis Avilés, Ph.D. Brown University, *Professor of Spanish and Portuguese* (Golden Age literature and critical theory)

John C. Avise, Ph.D. University of California, Davis, *UCI Distinguished Professor of Ecology and Evolutionary Biology*

Sarah Awad, M.F.A. University of California, Los Angeles, *Assistant Professor of Teaching of Art* (drawing, painting)

Ender Ayanoglu, Ph.D. Stanford University, *Professor of Electrical Engineering and Computer Science* (communication systems, communication theory, communication networks)

Manny Azizi, Ph.D. University of Massachusetts, *Associate Professor of Ecology and Evolutionary Biology*

Nader Bagherzadeh, Ph.D. University of Texas at Austin, *Professor of Electrical Engineering and Computer Science; Computer Science* (parallel processing, computer architecture, computer graphics, memory systems, 3-D ICs, heterogeneous computing, low-power processing)

Donna G. Baick, M.D. Finch University of Health Sciences, The Chicago School of Medicine, *Health Sciences Associate Clinical Professor of Obstetrics and Gynecology*

Drew Bailey, Ph.D. University of Missouri, *Associate Professor of Education; Cognitive Sciences; Psychological Science*

Stanley Bailey, Ph.D. University of California, Los Angeles, *Professor of Sociology; Religious Studies* (race and ethnicity, religion, immigration, Latin America)

Rachel Baker, Ph.D. Stanford University, *Assistant Professor of Education*

Brigitte Baldi, Ph.D. Massachusetts Institute of Technology, *Lecturer of Statistics*

Pierre F. Baldi, Ph.D. California Institute of Technology, *Director of the Institute for Genomics and Bioinformatics and Distinguished Professor of Computer Science; Biological Chemistry; Biomedical Engineering; Developmental and Cell Biology; Mathematics* (artificial intelligence and machine learning, biomedical informatics, databases and data mining, environmental informatics, statistics and statistical theory)

Etienne Balibar, Ph.D. Catholic University of Nijmegen, *Professor Emeritus of French* (political philosophy, critical theory, epistemology of the social sciences, ethics)

Nina Bandelj, Ph.D. Princeton University, *Professor of Sociology* (economic sociology, culture, organizations, social networks, political economy, globalization, social change, central and eastern Europe)

Tirtha Banerjee, Ph.D. Duke University, *Assistant Professor of Civil and Environmental Engineering* (atmospheric boundary layer dynamics, turbulent fluid dynamics, land/water/vegetation - atmosphere interaction, wildfires, vegetation dynamics, carbon and water cycles, hydrology, wetlands and terrestrial aquatic interfaces)

Fayez M. Bany-Mohammed, M.D. University of Jordan, *Health Sciences Clinical Professor of Pediatrics*

Tallie Z. Baram, M.D., Ph.D. University of Miami, *Weizmann Institute of Science and Danette 'Dee Dee' Shepard Chair in Neurological Studies and Distinguished Professor of Pediatrics; Anatomy and Neurobiology; Neurology; Physiology and Biophysics*

Vladimir Baranovsky, Ph.D. University of Chicago, *Professor of Mathematics* (algebra and number theory)

Edward Barawid, D.O. Western University of Health Sciences, *Health Sciences Assistant Clinical Professor of Physical Medicine and Rehabilitation*

Alan G. Barbour, M.D. Tufts University, *Distinguished Professor of Microbiology and Molecular Genetics; Ecology and Evolutionary Biology; Medicine*

Lee Bardwell, Ph.D. Stanford University, *Professor of Developmental and Cell Biology* (intracellular signaling in development and disease)

Stephen F. Barker, Ph.D. University of Arizona, *Dean of the Claire Trevor School of the Arts and Professor of Drama* (post-modern theatre, Beckett, critical theory)

Stephen A. Barney, Ph.D. Harvard University, *Professor Emeritus of English*

Jeffrey A. Barrett, Ph.D. Columbia University, *Professor of Logic and Philosophy of Science; Philosophy*

Cristobal Barrios, M.D. University of Miami, *Assistant Dean of Admissions and Health Sciences Clinical Professor of Surgery*

James D. Barry, M.D. Uniformed Services University, *Health Sciences Clinical Professor of Emergency Medicine*

Scott Bartell, Ph.D. University of California, Davis, *Associate Professor of Program in Public Health; Environmental Health Sciences; Statistics*

Aaron J. Barth, Ph.D. University of California, Berkeley, *Professor of Physics and Astronomy*

Jami Bartlett, Ph.D. University of California, Berkeley, *Associate Professor of English* (The 19th-Century Novel, literature and philosophy, narrative theory)

Christopher P.J. Barty, Ph.D. Stanford University, *Distinguished Professor of Physics and Astronomy*

Steven W. Barwick, Ph.D. University of California, Berkeley, *Professor of Physics and Astronomy*

Victoria Basolo, Ph.D. University of North Carolina at Chapel Hill, *Professor of Urban Planning and Public Policy*

Cynthia M. Bassham, M.F.A. American Conservatory Theatre, *Associate Professor of Teaching of Drama* (voice, speech for actors, acting)

Anjan S. Batra, M.D. Ohio State University, *Professor of Pediatrics*

Amy Bauer, Ph.D. Yale University, *Associate Professor of Music*

Emily L. Baum, Ph.D. University of California, San Diego, *Associate Professor of History; Religious Studies* (modern Chinese history, history of medicine)

Christopher Bauman, Ph.D. University of Illinois at Chicago, *Associate Professor of Paul Merage School of Business*

Frank D. Bean, Ph.D. Duke University, *UCI Distinguished Professor of Sociology; Economics; Education* (international migration, demography, Mexican immigration, racial and ethnic relations, economic sociology, family)

Robert J. Beck, Ph.D. University of Chicago, *Senate Emeritus of Education*

Henry J. Becker, Ph.D. Johns Hopkins University, *Professor Emeritus of Education*

Matthew N. Beckmann, Ph.D. University of Michigan, *Associate Professor of Political Science* (presidency, congress, interest groups, mass media, and politics)

Haroutune Bedelian, M.A. Royal Academy of Arts, *Professor of Music*

Lorna Griffitt Bedelian, D.M.A. Indiana University, *Professor of Teaching of Music*

Kevin T. Beier, Ph.D. Harvard University, *Assistant Professor of Physiology and Biophysics; Pharmaceutical Sciences*

D. Bell, Ph.D. University of California, Berkeley, *Professor Emeritus of Economics*

James D. Belluzzi, Ph.D. University of Chicago, *Adjunct Professor of Pharmaceutical Sciences*

Catherine Benamou, Ph.D. New York University, *Associate Professor of Film and Media Studies; Culture and Theory; Visual Studies* (Hispanophone and Lusophone cinema and television, U.S. Latino media, Orson Welles and maverick cinema, transnational flows, spectatorship, cinematic memory and cultures of preservation)

Claudia Benavente, Ph.D. University of Arizona, *Assistant Professor of Pharmaceutical Sciences; Developmental and Cell Biology* (genetics, epigenetics, cancer, pediatric cancer, retinoblastoma, osteosarcoma)

Ruth M. Benca, M.D. Ph.D. University of Chicago, *Department Chair and Professor of Psychiatry and Human Behavior; Neurobiology and Behavior*

Ermanno Bencivenga, Ph.D. University of Toronto, *Professor of Philosophy; Humanities*

Miriam Bender, Ph.D. University of San Diego, *Assistant Professor of Nursing*

Gregory A. Benford, Ph.D. University of California, San Diego, *Professor Emeritus of Physics and Astronomy*

Lbachir Benmohamed, Ph.D. Pasteur Institute, *Professor of Ophthalmology*

Albert F. Bennett, Ph.D. University of Michigan, *Professor Emeritus of Ecology and Evolutionary Biology*

Frances Bennett, B.F.A. University of California, Irvine, *Lecturer of Music*

Houri Berberian, Ph.D. University of California, Los Angeles, *Director of the Armenian Studies Program and Meghrouni Family Chair in Armenian Studies and Professor of History; Religious Studies* (modern Armenian history, Middle East history)

Bruce G. Berg, Ph.D. Indiana University, *Associate Professor of Cognitive Sciences* (audition, auditory attention, psychophysics of complex sounds, computational models of hearing)

Jill Berg, Ph.D. University of Pittsburgh, *Professor Emerita of Nursing*

Alice C. Berghof, Ph.D. University of California, Irvine, *Lecturer of Humanities; English*

Oliver G. Berghof, Ph.D. University of California, Irvine, *Lecturer of Humanities*

Hillary Berk, Ph.D. University of California, Berkeley, *Assistant Professor of Teaching of Criminology, Law and Society* (sociology of law/law and society, gender, family, reproduction and surrogacy, law and emotion, civil rights, dispute resolution)

Rudi C. Berkelhamer, Ph.D. University of California, Berkeley, *Professor of Teaching Emerita of Ecology and Evolutionary Biology*

Michael W. Berman, M.D. George Washington University, *Professor Emeritus of Obstetrics and Gynecology*

Nicole P. Bernal, M.D. Case Western Reserve University, *Health Sciences Associate Clinical Professor of Surgery*

Victoria Bernal, Ph.D. Northwestern University, *Professor of Anthropology; Culture and Theory; Gender and Sexuality Studies; Religious Studies* (gender, war, cyberspace, Islam, transnationalism, Africa)

Hans-Ulrich Bernard, Ph.D. University of Goettingen, *Professor Emeritus of Molecular Biology and Biochemistry; Program in Public Health*

Sven D. Bernecker, Ph.D. Stanford University, *Professor of Philosophy*

Michael W. Berns, Ph.D. Cornell University, *Arnold and Mabel Beckman Chair in Laser Biomedicine and Professor of Surgery; Biomedical Engineering; Developmental and Cell Biology*

Veronica Berrocal, Ph.D. University of Washington, *Associate Professor of Statistics*

Neil J. Bershad, Ph.D. Rensselaer Polytechnic Institute, *Professor Emeritus of Electrical Engineering and Computer Science* (communication and information theory, signal processing)

Elizabeth Bess, Ph.D. University of Utah, *Assistant Professor of Chemistry* (chemical biology)

Nakia C. Best, Ph.D. University of North Carolina at Chapel Hill, *Assistant Professor of Nursing*

Brittany M. Betancourt, B.A. University of California, Irvine, *Senior Lecturer of Undergraduate Education*

Roland Betancourt, Ph.D. Yale University, *Director of the Graduate Program in Visual Studies and Chancellor's Fellow and Associate Professor of Art History; Religious Studies; Visual Studies* (Byzantine and Medieval art, critical and queer theory; histories of race, gender, and sexuality)

Rishi Bhargava, M.D. Indiana University, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Nitin Narain Bhatia, M.D. Baylor College of Medicine, *Department Chair and Professor of Orthopaedic Surgery*

Jianming Bian, Ph.D. Chinese Academy of Sciences, *Assistant Professor of Physics and Astronomy*

Lubomir Bic, Ph.D. University of California, Irvine, *Professor of Computer Science* (parallel and distributed computing, mobile agents, networks, and distributed systems)

Zuzana Bic, Dr.P.H. Loma Linda University, *Associate Professor of Teaching of Program in Public Health*

Edna E. Biddy, M.D. Universidad Autonoma de Baja California, *Health Sciences Assistant Clinical Professor of Family Medicine*

Anke Biendarra, Ph.D. University of Washington, *Associate Professor of German* (20th- and 21st-century German literature, culture, and film, cultural studies)

John T. Billimek, Ph.D. University of California, Irvine, *Associate Professor of Family Medicine*

Arnold Binder, Ph.D. Stanford University, *Professor Emeritus of Criminology, Law and Society* (research methodology, juvenile delinquency, police organization and methods)

Biraj Bista, M.D. Kasturba Medical College and Hospital, *Health Sciences Assistant Clinical Professor of Radiological Sciences*

Rebecca W. Black, Ph.D. University of Wisconsin-Madison, *Associate Professor of Informatics; Education* (digital media and learning, fan studies)

David Blake, Ph.D. Rutgers, The State University of New Jersey, *Professor Emeritus of Paul Merage School of Business*

Donald R. Blake, Ph.D. University of California, Irvine, *UCI Distinguished Professor of Chemistry* (analytical, atmospheric, environmental)

Josh D. Blank, J.D. Harvard Law School, LL.M. New York University School of Law, *Professor of School of Law*

Sharon B. Block, Ph.D. Princeton University, *Professor of History* (digital humanities, early American, race and sexuality)

Suzanne A. Blum, Ph.D. University of California, Berkeley, *Professor of Chemistry; Chemistry* (inorganic and organometallic, organic and synthetic, physical chemistry and chemical physics, polymer, materials, nanoscience)

Bruce Blumberg, Ph.D. University of California, Los Angeles, *Professor of Developmental and Cell Biology; Biomedical Engineering; Environmental Health Sciences; Pharmaceutical Sciences* (gene regulation by nuclear hormone receptors in vertebrate development physiology, endocrine disruption)

Mathew M. Blurton-Jones, Ph.D. University of California, San Diego, *Associate Professor of Neurobiology and Behavior*

James E. Bobrow, Ph.D. University of California, Los Angeles, *Professor Emeritus of Mechanical and Aerospace Engineering* (robotics, mechatronics, and design optimization)

Maureen E. Bocian, M.D. University of Illinois, *Senate Emerita of Pediatrics; Genetic Counseling*

Hans R. Bode, Ph.D. Yale University, *Professor Emeritus of Developmental and Cell Biology* (molecular basis of pattern formation in Hydra)

Thomas D. Boellstorff, Ph.D. Stanford University, *Professor of Anthropology* (virtual worlds, sexuality, postcoloniality, HIV/AIDS, mass media and popular culture, language and culture, Indonesia, Southeast Asia)

Daniel E. Bogart, Ph.D. University of California, Los Angeles, *Professor of Economics*

Alexander D. Boiko, Ph.D. University of Illinois at Urbana–Champaign, *Assistant Professor of Molecular Biology and Biochemistry*

Scott A. Bollens, Ph.D. University of North Carolina at Chapel Hill, *Drew, Chace and Erin Warmington Chair in the Social Ecology of Peace and International Cooperation and Professor of Urban Planning and Public Policy*

Catherine I. Bolzendahl, Ph.D. Indiana University, *Associate Professor of Sociology* (gender, gender and sexuality studies, the welfare state, political sociology, comparative sociology, family, quantitative methodology)

Anna Boncompagni, Ph.D. University of Roma Tre Italy, *Assistant Professor of Philosophy*

Stephen C. Bondy, Ph.D. University of Birmingham, *Professor of Medicine; Environmental Health Sciences; Program in Public Health*

Boris H. Borazjani, M.D. University of California, Irvine, *Health Sciences Assistant Clinical Professor of Surgery*

Andrew L. Borba, M.F.A. New York University, *Co-Head of Acting and Assistant Professor of Drama* (acting)

Jessica Borelli, Ph.D. Yale University, *Associate Professor of Psychological Science* (developmental psychopathology, attachment, emotion, prevention on mental health problems in children and adolescents)

Peyman Borghei, M.D. Tehran University of Medical Sciences, *Health Sciences Assistant Clinical Professor of Radiological Sciences*

Aaron Bornstein, Ph.D. New York University, *Assistant Professor of Cognitive Sciences* (memory, decision-making, reinforcement learning, neuroimaging, computational cognitive neuroscience)

Jennifer Bornstein, M.F.A. University of California, Los Angeles, *Associate Professor of Art* (photography)

Andrew Borovik, Ph.D. University of North Carolina at Chapel Hill, *Professor of Chemistry* (chemical biology, inorganic and organometallic, organic and synthetic)

Emiliana Borrelli, Ph.D. University of Strasbourg, *Chancellor's Professor of Microbiology and Molecular Genetics; Pharmaceutical Sciences*

Alex Borucki, Ph.D. Emory University, *Associate Professor of History; African American Studies* (African diaspora, early modern Atlantic world, slave trade, colonial Latin America)

Ramin Bostanabad, Ph.D. Northwestern University, *Assistant Professor of Mechanical and Aerospace Engineering* (design under uncertainty, probabilistic machine learning, materials informatics, computational microstructure characterization, topology optimization)

Daniela A. Bota, M.D., Ph.D. Carol Davila University of Medicine and Pharmacy, *Chief Scientific Officer, Center for Clinical Research and Vice Dean for Clinical Research and Associate Professor of Neurology; Neurological Surgery; Pathology and Laboratory Medicine*

Elliot L. Botvinick, Ph.D. University of California, San Diego, *Professor of Surgery; Biomedical Engineering*

Graeme T. Boushey, Ph.D. University of Washington, *Associate Professor of Political Science; Urban Planning and Public Policy* (California politics and statewide elections, American politics, state and federal policy-making, ballot measures and the initiative process)

Geoffrey C. Bowker, Ph.D. University of Melbourne, *Chancellor's and Donald Bren Professor of Informatics; Visual Studies* (values in design, social studies of databases, science and technology studies)

Peter A. Bowler, Ph.D. University of California, Irvine, *Professor of Teaching of Ecology and Evolutionary Biology*

John P. Boyd, Ph.D. University of Michigan, *Professor Emeritus of Anthropology*

Ozdal Boyraz, Ph.D. University of Michigan, *Professor of Electrical Engineering and Computer Science* (integrated optics, silicon photonics, optical communications systems, and microwave photonics)

Elaheh Bozorgzadeh, Ph.D. University of California, Los Angeles, *Professor of Computer Science* (computer architecture and design, design automation and synthesis for embedded systems, VLSI CAD, reconfigurable computing)

Matthew E. Bracken, Ph.D. Oregon State University, *Professor of Ecology and Evolutionary Biology*

Kevin Bradford, Ph.D. University of Florida, *Assistant Professor of Teaching of Paul Merage School of Business* (personal setting, sales management, distribution of firearms, marketing practices of guns, gun culture)

Tonya Bradford, Ph.D. Northwestern University, *Assistant Professor of Paul Merage School of Business* (rituals, market exchange, gift-giving, communities)

Timothy J. Bradley, Ph.D. University of British Columbia, *Professor Emeritus of Ecology and Evolutionary Biology*

Matthew T. Brady, M.D. Tufts University, *Health Sciences Assistant Clinical Professor of Surgery*

William A. Branch, Ph.D. University of Oregon, *Department Chair and Professor of Economics*

Paulo Brando, Ph.D. University of Florida, *Assistant Professor of Physics and Astronomy*

Alexander U. Brandt, M.D. Charite - Universitaetsmedizin Berlin, *Associate Adjunct Professor of Neurology*

Stacy Branham, Ph.D. Virginia Tech, *Assistant Professor of Informatics* (human-computer interaction, design, assistive technology, safe and brave space, well-being, disability, feminism, marginality, inclusion, interdependence)

David A. Brant, Ph.D. University of Wisconsin-Madison, *Professor Emeritus of Chemistry* (biophysical)

Emily M. Brauer, M.A. University of Southern California, *Lecturer of English*

Richard A. Brestoff, M.F.A. New York University, *Professor of Drama* (film and television acting)

Alyssa Brewer, Ph.D. Stanford University, *Associate Professor of Cognitive Sciences; Language Science* (neuroimaging of visual perception, visual deficits, neurological disorders)

Gregory Brewer, Ph.D. University of California, San Diego, *Adjunct Professor of Biomedical Engineering* (neuronal networks, decoding brain learning and memory, brain-inspired computing, Alzheimer's disease, brain aging, neuron cell culture)

Adriana D. Briscoe, Ph.D. Harvard University, *Professor of Ecology and Evolutionary Biology*

Robert E. Bristow, M.D. M.B.A. University of Southern California; Johns Hopkins University, *Edward J. Quilligan Administrative Chair in Obstetrics and Gynecology and Philip J. Di Saia, M.D., Prestigious Chair in Gynecologic Oncology and Department Chair and Professor of Obstetrics and Gynecology*

David Brodbeck, Ph.D. University of Pennsylvania, *Professor of Music; European Languages and Studies*

James P. Brody, Ph.D. Princeton University, *Associate Professor of Biomedical Engineering* (bioinformatics, micro-nanoscale systems)

Philip Bromiley, Ph.D. Carnegie Mellon University, *Professor of Paul Merage School of Business*

Yvette Brooks, M.D. University of Cincinnati, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Liane R. Brouillette, Ph.D. University of Colorado Boulder, *Professor of Education* (educational policy, arts-based learning)

Ashley Broussard, M.D. Tulane University, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Jacob Brouwer, Ph.D. Massachusetts Institute of Technology, *Professor of Mechanical and Aerospace Engineering; Civil and Environmental Engineering* (fuel cells, energy systems dynamics, electrochemical systems design and analysis, chemical kinetics, reacting flows)

Donald J. Brown, Ph.D. University of Colorado Denver, *Senate Emeritus of Ophthalmology*

Sara Brown, Ed.D. College of Saint Mary, *Health Sciences Assistant Clinical Professor of Nursing*

Susan K. Brown, Ph.D. University of Washington, *Professor of Sociology; Religious Studies* (immigration, inequality, urban sociology)

Andrew Browne, M.D., Ph.D. University of Cincinnati, *Health Sciences Assistant Clinical Professor of Ophthalmology; Biomedical Engineering*

David Brownstone, Ph.D. University of California, Berkeley, *Professor Emeritus of Economics*

Tim-Allen Bruckner, Ph.D. University of California, Berkeley, *Associate Professor of Program in Public Health; Urban Planning and Public Policy*

Jan K. Brueckner, Ph.D. Stanford University, *Distinguished Professor of Economics; Urban Planning and Public Policy*

Taylor J. Brueseke, M.D. Pennsylvania State University, *Health Sciences Assistant Clinical Professor of Obstetrics and Gynecology*

Daniel R. Brunstetter, Ph.D. University of California, Davis, *Associate Professor of Political Science; European Languages and Studies* (political theory, international relations, French political thought)

Peter J. Bryant, Ph.D. University of Sussex, *Research Professor and Professor Emeritus of Developmental and Cell Biology* (tumor-suppressor genes of *Drosophila* and humans)

Susan V. Bryant, Ph.D. University of London, *Professor Emerita of Developmental and Cell Biology* (molecular basis of limb development and regeneration)

David K. Buchbinder, M.D. Medical College of Wisconsin, *Health Sciences Associate Professor of Pediatrics*

Michael J. Buchmeier, Ph.D. McMaster University, *Professor of Medicine; Microbiology and Molecular Genetics; Molecular Biology and Biochemistry*

Long T. Bui, Ph.D. University of California, San Diego, *Assistant Professor of Global and International Studies*

Rémi Buisson, Ph.D. Université Laval, *Assistant Professor of Biological Chemistry; Pharmaceutical Sciences*

James S. Bullock, Ph.D. University of California, Santa Cruz, *Dean of the School of Physical Sciences and Professor of Physics and Astronomy*

Steven J. Bunch, M.D. University of Utah, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

David A. Buote, Ph.D. Massachusetts Institute of Technology, *Professor of Physics and Astronomy*

Dan L. Burk, J.D. Arizona State University, *UCI Chancellor's Professor of School of Law*

Carol M. Burke, Ph.D. University of Maryland, College Park, *Professor Emerita of English; Religious Studies* (literary and cultural theory, literary journalism, new media studies)

Kieron Burke, Ph.D. University of California, Santa Barbara, *Professor of Chemistry; Physics and Astronomy* (physical chemistry and chemical physics, theoretical and computational)

Leanne Burke, Ed.D. Southern Connecticut State University, *Health Sciences Associate Clinical Professor of Nursing*

Peter J. Burke, Ph.D. Yale University, *Professor of Electrical Engineering and Computer Science; Biomedical Engineering; Materials Science and Engineering* (nano-electronics, bio-nanotechnology)

Amanda Burkhardt, Ph.D. University of California, Irvine, *Assistant Adjunct Professor of Physiology and Biophysics*

Nancy T. Burley, Ph.D. University of Texas at Austin, *Professor of Ecology and Evolutionary Biology*

Keith R. Burnett, M.D. Creighton University, *Health Sciences Clinical Professor of Radiological Sciences*

Joseph E. Burns, M.D. McGill University, *Health Sciences Associate Clinical Professor of Radiological Sciences*

Michael J. Burns, M.D. University of California, Irvine, *Health Sciences Clinical Professor of Emergency Medicine; Medicine*

Ellen S. Burt, Ph.D. Yale University, *Professor Emerita of English* (eighteenth-century French literature and nineteenth-century poetry)

Candace Burton, Ph.D. University of California, San Francisco, *Assistant Professor of Nursing*

Michael L. Burton, Ph.D. Stanford University, *Professor Emeritus of Anthropology*

Anton Burtsev, Ph.D. University of Utah, *Assistant Adjunct Professor of Computer Science* (novel low-latency datacenters, microkernels, virtualization, datacenter environments)

Jorge A. Busciglio, Ph.D. Universidad Nacional de Córdoba, *Professor of Neurobiology and Behavior*

Robin M. Bush, Ph.D. University of Michigan, *Professor Emeritus of Ecology and Evolutionary Biology*

Claudia Buss, Ph.D. McGill University, *Associate Adjunct Professor of Pediatrics*

Andres Bustamante, Ph.D. University of Miami, *Assistant Professor of Education*

Natascha Buswell, Ph.D. Purdue University, *Assistant Professor of Teaching of Mechanical and Aerospace Engineering* (graduate engineering education, faculty development, engineering teaching, engineering education research methods)

Jennifer R. Butler, M.D. University of Virginia, *Health Sciences Associate Clinical Professor of Obstetrics and Gynecology*

John A. Butler, M.D. Loyola University Chicago, *Professor of Surgery*

Carter Butts, Ph.D. Carnegie Mellon University, *Professor of Sociology; Computer Science; Electrical Engineering and Computer Science; Statistics* (mathematical sociology, social networks, quantitative methodology, human judgment and decision making, economic sociology)

Lee Cabatingan, Ph.D. University of Chicago, *Assistant Professor of Criminology, Law and Society; Anthropology* (Caribbean law and sovereignty; construction of authority at the Caribbean Court of Justice)

Michael D. Cahalan, Ph.D. University of Washington, *Department Chair and Distinguished Professor of Physiology and Biophysics*

Lawrence F. Cahill, Ph.D. University of California, Irvine, *Professor of Neurobiology and Behavior; Psychological Science*

Vincent J. Caiozzo, Ph.D. University of California, Irvine, *Professor Emeritus of Orthopaedic Surgery; Environmental Health Sciences*

Kitty C. Calavita, Ph.D. University of Delaware, *Professor Emerita of Criminology, Law and Society* (sociology of law, criminology, social deviance, immigration, inequality)

James L. Calderwood, Ph.D. University of Washington, *Professor Emeritus of English*

Anne L. Calof, Ph.D. University of California, San Francisco, *Professor of Anatomy and Neurobiology; Developmental and Cell Biology*

Alejandro E. Camacho, J.D., LL.M. Harvard University, Georgetown University, *Professor of School of Law; Political Science*

Diane R. Campbell, Ph.D. Duke University, *Professor of Ecology and Evolutionary Biology*

Joan E. Campbell, M.D. University of California, San Diego, *Health Sciences Clinical Professor of Radiological Sciences*

Richard D. Campbell, Ph.D. The Rockefeller University, *Professor Emeritus of Developmental and Cell Biology* (Morphogenesis; biology of Hydra; fractal geometry of biological forms)

Sarah Campbell, M.S. University of California, Irvine, *Health Sciences Assistant Clinical Professor of Nursing*

Shanyce L. Campbell, Ph.D. University of North Carolina at Chapel Hill, *Assistant Professor of Education*

Belinda Campos, Ph.D. University of California, Berkeley, *Associate Professor of Chicano/Latino Studies; Family Medicine; Psychological Science* (culture, relationships, positive emotion, health)

Francis A. Cancian, Ph.D. Harvard University, *Professor Emeritus of Anthropology*

Elizabeth M. Cane, M.F.A. University of California, Los Angeles, *Lecturer of Film and Media Studies*

Matthew P. Canepa, Ph.D. University of Chicago, *Elahe Omidyar Mir-Djali Presidential Chair and Professor of Art History; Religious Studies; Visual Studies* (Achaemenid, Seleucid, Parthian, and Sasanian art and archaeology; Iranian visual cultures and Afro-Eurasian exchange; critical approaches to space, place, landscape, urbanism, and memory)

Hung Cao, Ph.D. University of Texas at Arlington, *Assistant Professor of Electrical Engineering and Computer Science; Biomedical Engineering* (MEMS, sensors, implants, heart disease, neurological disease, wireless biomedical systems)

Penghui Cao, Ph.D. Boston University, *Assistant Professor of Mechanical and Aerospace Engineering; Materials Science and Engineering* (fundamental understanding of the mechanisms by which materials plastically deform and fail, particularly in extreme environments)

Filippo Capolino, Ph.D. University of Florence, *Professor of Electrical Engineering and Computer Science* (optics/electromagnetics in nanostructures and sensors, antennas/microwaves, RF and wireless systems)

Fabio Cappuccini, M.D. University of Bologna, *Health Sciences Clinical Professor of Obstetrics and Gynecology*

Michael Carey, Ph.D. University of California, Berkeley, *Donald Bren Professor of Information & Computer Sciences and Distinguished Professor of Computer Science* (databases and data mining, parallel and distributed systems)

Ronald Carlson, M.A. University of Utah, *Professor Emeritus of English* (creative writing, fiction, contemporary literature, short stories)

Ann Marie Carlton, Ph.D. Rutgers University, *Associate Professor of Chemistry* (atmospheric and environmental, physical chemistry and chemical physics, theoretical and computational)

Joseph C. Carmichael, M.D. University of Missouri-Columbia, *Health Sciences Associate Clinical Professor of Surgery*

F. Lynn Carpenter, Ph.D. University of California, Berkeley, *Professor Emerita of Ecology and Evolutionary Biology*

Juliette A. Carrillo, M.F.A. Yale University, *Assistant Professor of Drama* (directing)

David Carroll, Ph.D. Johns Hopkins University, *Professor Emeritus of French* (critical theory and twentieth-century French literature)

Juli C. Carson, Ph.D. Massachusetts Institute of Technology, *Professor of Art* (art history, critical theory, curatorial practice )

David O. Carter, J.D. University of California, Los Angeles, *Lecturer of Political Science*

Marie Cartier, Ph.D. Claremont Graduate University, *Lecturer of Film and Media Studies*

Jean-Paul Carvalho, Ph.D. Oxford University, *Associate Professor of Economics; Logic and Philosophy of Science; Religious Studies*

Anita Casavantes Bradford, Ph.D. University of California, San Diego, *Associate Professor of Chicano/Latino Studies; Asian American Studies; History* (20th century U.S., U.S. in the world, Cuba and the Caribbean; history of childhood; history of immigration, race and ethnicity; transnational and comparative Latina/o history; religion, politics and social movements)

David W. Casper, Ph.D. University of Michigan, *Associate Professor of Physics and Astronomy*

Dennis R. Castellano, M.F.A. University of California, Irvine, *Professor of Teaching Emeritus of Drama* (music theatre)

Jeanett Castellanos, Ph.D. Washington State University, *Associate Professor of Teaching of Social Sciences*

Larisa T. Castillo, Ph.D. University of California, Irvine, *Lecturer of Humanities*

Elizabeth E. Cauffman, Ph.D. Temple University, *Professor of Psychological Science; Criminology, Law and Society; Education; School of Law* (adolescent development, mental health, juvenile justice, legal and social policy)

Jennifer N. Cech, Ph.D. University of Washington, *Health Sciences Assistant Clinical Professor of Pediatrics; Genetic Counseling*

Bharath Chakravarthy, M.D. Boston University, *Associate Clinical Professor of Emergency Medicine; Program in Public Health*

A. Richard Chamberlin, Ph.D. University of California, San Diego, *Department Chair and Professor Emeritus of Pharmaceutical Sciences; Chemistry* (chemical biology, organic and synthetic)

Mark D. Chambers, M.D. University of Illinois at Urbana–Champaign, *Health Sciences Associate Clinical Professor of Radiological Sciences*

Simone Chambers, Ph.D. Columbia University, *Professor of Political Science* (democratic theory, ethics, secularism, rhetoric, civility, and the public sphere)

Alexandre Chan, Pharm.D. Rutgers University, *Department Chair and Professor of Clinical Pharmacy Practice*

Jefferson Chan, M.D. Ph.D. University of California, San Francisco, *Professor of Pathology and Laboratory Medicine; Environmental Health Sciences*

Gary A. Chanan, Ph.D. University of California, Berkeley, *Professor Emeritus of Physics and Astronomy*

Vishal S. Chandan, M.D. Maharashtra University of Health Sciences, *Health Sciences Clinical Professor of Pathology and Laboratory Medicine*

Nahum D. Chandler, Ph.D. University of Chicago, *Professor of African American Studies; Asian American Studies; Comparative Literature; English; European Languages and Studies* (modern philosophy, intellectual history, history of the human sciences)

Aparna Chandramowlishwaran, Ph.D. Georgia Institute of Technology, *Assistant Professor of Electrical Engineering and Computer Science; Computer Science; Mechanical and Aerospace Engineering* (high-performance computing, domain-specific compilers, algorithm-architecture co-design, data analysis, and scientific computing)

Vanitha Chandrasekhar, Ed.D. University of California, Irvine, *Lecturer of Education* (education technology)

Carrie E. Chandwani, M.D. Chicago Medical School, *Health Sciences Associate Clinical Professor of Emergency Medicine*

Melissa Chang, M.D. University of Alabama, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Pei Lin Chang, M.D. Chicago Medical School, *Health Sciences Assistant Clinical Professor of Pediatrics*

Peter Chang, M.D. Northwestern University, *Assistant Professor in Residence of Radiological Sciences; Computer Science; Pathology and Laboratory Medicine*

Wayne Wei Chung Chang, M.D. Saint Louis University, *Health Sciences Clinical Professor of Medicine; Program in Public Health*

Elizabeth C. Chao, M.D. University of California, Irvine, *Assistant Adjunct Professor of Pediatrics; Genetic Counseling*

John Charles Chaput, Ph.D. University of California, Riverside, *Professor of Pharmaceutical Sciences; Chemistry; Molecular Biology and Biochemistry* (chemical and synthetic biology)

Susan T. Charles, Ph.D. University of Southern California, *Department Chair and Professor of Psychological Science* (emotional processes across the adult life span, subjective experience and cognitive processes, health and emotion)

Vinayak Chaturvedi, Ph.D. University of Cambridge, *Associate Professor of History; Culture and Theory; European Languages and Studies; Religious Studies* (modern South Asia, social and intellectual history)

Anthony Chau, M.D. University of California, Los Angeles, *Health Sciences Assistant Clinical Professor of Surgery*

Leo Chavez, Ph.D. Stanford University, *Distinguished Professor of Anthropology* (migration, media, discourse analysis, visual semiotics, medicine)

David Chaylan, M.D. University of Iowa, *Assistant Adjunct Professor of Radiological Sciences*

Allen M. Chen, M.D. Yale University, *Department Chair and Professor of Radiation Oncology*

Chuansheng Chen, Ph.D. University of Michigan, *UCI Chancellor's Professor of Psychological Science; Education* (cross-cultural psychology, adolescent development, cognitive neuroscience, genes and behavior)

Dongbao Chen, Ph.D. China (Beijing) Agricultural University, *Professor of Obstetrics and Gynecology*

Jefferson W. Chen, M.D. Ph.D. Johns Hopkins University, *Health Sciences Clinical Professor of Neurological Surgery*

Jessica Chen, M.A. California State University, Long Beach, *Lecturer of Chinese*

Jiawei Chen, Ph.D. Johns Hopkins University, *Associate Professor of Economics*

Lily K. Chen, D.O. Western University of Health Sciences, *Health Sciences Assistant Clinical Professor of Physical Medicine and Rehabilitation*

Liu Chen, Ph.D. University of California, Berkeley, *Research Professor and Professor Emeritus of Physics and Astronomy*

Long Chen, Ph.D. Pennsylvania State University, *Professor of Mathematics* (applied and computational mathematics)

Lulu Y. Chen, Ph.D. University of California, Irvine, *Assistant Professor of Anatomy and Neurobiology*

Mu-Chun Chen, Ph.D. University of Colorado Boulder, *Professor of Physics and Astronomy*

Nai-Fu Chen, Ph.D. University of California, Los Angeles, *Professor Emeritus of Paul Merage School of Business*

Phang-Lang Chen, Ph.D. University of California, San Diego, *Associate Professor of Biological Chemistry*

Qi Alfred Chen, Ph.D. University of Michigan, *Assistant Professor of Computer Science* (smart systems and IoT)

Tempe K. Chen, M.D. Albert Einstein College of Medicine, *Health Sciences Assistant Clinical Professor of Pediatrics*

Yong Chen, Ph.D. Cornell University, *Associate Dean of Curriculum and Student Services and Professor of History; Asian American Studies; Religious Studies* (Asian American history and immigration, food and culture, U.S./China economic and cultural interactions)

Yunan Chen, Ph.D. Drexel University, *Associate Professor of Informatics; Program in Public Health* (medical informatics, human computer interaction)

Amy H. Cheng, M.D. Georgetown University, *Health Sciences Assistant Clinical Professor of Pediatrics*

Nadia Chernyak, Ph.D. Cornell University, *Assistant Professor of Cognitive Sciences* (cognitive development, social cognition, prosocial behavior, moral cognition, agency and free will, conceptual development)

Alexander L. Chernyshev, Ph.D. Russian Academy of Sciences, *Professor of Physics and Astronomy*

Natalia Chernyshoff, Ph.D. University of California, Davis, *Lecturer of Economics*

Kenneth S. Chew, Ph.D. University of California, Berkeley, *Professor of Teaching of Urban Planning and Public Policy*

James T. Chiampi, Ph.D. Yale University, *Professor Emeritus of Italian; Religious Studies* (Dante and Italian Renaissance)

Chieh L. Chieng, M.F.A. University of California, Irvine, *Lecturer of English*

Theresa Lynn Chin, M.D. Virginia Commonwealth University, *Health Sciences Assistant Clinical Professor of Surgery*

Katherine Chiu, M.D. University of California, Irvine, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Ken W. Cho, Ph.D. University of Pennsylvania, *Professor of Developmental and Cell Biology* (TGF- $\beta$  signaling, gene regulatory networks in development)

Eleanore Choate, M.A. California State University, Long Beach, *Lecturer of Music*

Hyunju Choe, M.A. University of Utah, *Lecturer of Korean*

Bernard H. Choi, Ph.D. University of Texas at Austin, *Professor of Surgery; Biomedical Engineering*

Chungmoo Choi, Ph.D. Indiana University, *Associate Professor of Korean Culture; Religious Studies* (women's literature and film, Christianity and ethics, popular culture, anthropology)

Ho Joon Choi, M.D. Seoul National University, *Health Sciences Clinical Professor of Anesthesiology and Perioperative Care*

Michael Choi, Ph.D. University of Wisconsin, Madison, *Assistant Professor of Economics*

Yoon Jae Choi, M.D. Korea University, *Health Sciences Assistant Clinical Professor of Neurology*

Chinsui J. Chou, M.D. University of California, Irvine, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Pai H. Chou, Ph.D. University of Washington, *Professor Emeritus of Electrical Engineering and Computer Science* (embedded systems, low-power design, wireless sensing systems, energy harvesting, wearable medical devices, real-time systems, hardware/software co-design)

Vidyanand Choudhary, Ph.D. Purdue University, *Professor of Paul Merage School of Business*

Daniel Chow, M.D. University of California, Los Angeles, *Assistant Professor in Residence of Radiological Sciences; Neurology; Pathology and Laboratory Medicine*

Jerome C. Christensen, Ph.D. Cornell University, *Professor Emeritus of English* (Hollywood motion pictures, corporate authorship, romantic literature)

Eleanor Chu, M.D. New York Medical College, *Health Sciences Assistant Clinical Professor of Radiological Sciences*

Nkiruka Chuba, M.D. University of California, San Francisco, *Health Sciences Assistant Clinical Professor of Obstetrics and Gynecology*

Elizabeth Chuk, Ph.D. University of Washington, *Assistant Professor of Paul Merage School of Business* (financial reporting, consequences of accounting standards, defined benefit pensions, earnings management)

Judith H. Chung, M.D. Ph.D. University of Pennsylvania; University of California, Los Angeles, *Professor of Obstetrics and Gynecology*

Peter J. Chung, M.D. Columbia University, *Health Sciences Assistant Clinical Professor of Pediatrics*

Olivier Cinquin, Ph.D. University College London, *Associate Professor of Developmental and Cell Biology* (mathematical modeling of networks, systems biology)

Olivier Civelli, Ph.D. Swiss Federal Institute of Technology in Zurich, *Professor of Pharmaceutical Sciences; Developmental and Cell Biology* (novel neuroactive molecules, molecular neuropharmacology)

Damon Clark, Ph.D. Oxford University, *Associate Professor of Economics; Urban Planning and Public Policy*

Michael P. Clark, Ph.D. University of California, Irvine, *Professor Emeritus of English*

Michael T. Clegg, Ph.D. University of California, Davis, *Donald Bren Professor and Professor Emeritus of Ecology and Evolutionary Biology*

Patricia Cloud, M.M. University of Southern California, *Lecturer of Music*

Katherine E. Coakley, M.D. Boston University, *Health Sciences Assistant Clinical Professor of Obstetrics and Gynecology*

Melitza J. Cobham-Browne, M.D. Universidad de Panamá, *Health Sciences Clinical Professor of Pediatrics*

Melanie Cocco, Ph.D. Pennsylvania State University, *Associate Professor of Molecular Biology and Biochemistry; Pharmaceutical Sciences*

Amber R. Coffey-Leis, M.D. Johns Hopkins University, *Health Sciences Assistant Clinical Professor of Orthopaedic Surgery; Plastic Surgery*

Allen J. Cohen, M.D. University of Miami, *Health Sciences Clinical Professor of Radiological Sciences*

Robert S. Cohen, D.F.A. Yale University, *Professor Emeritus of Drama* (acting theory, acting, directing)

Susana Cohen-Cory, Ph.D. The Rockefeller University, *Professor of Neurobiology and Behavior*

Benjamin N. Colby, Ph.D. Harvard University, *Professor Emeritus of Anthropology*

Simon A. Cole, Ph.D. Cornell University, *Professor of Criminology, Law and Society; History; School of Law* (science, technology, law, criminal justice)

Rebecca J. Coleman, M.D. University of California, San Francisco, *Health Sciences Associate Clinical Professor of Pediatrics*

Annalisa Coliva, Ph.D. University of St. Andrews, *Professor of Philosophy*

Ian Collier, Ph.D. University of Melbourne, *Professor of History; European Languages and Studies* (Europe and the Muslim world, the French Revolution and the global history of the Revolutionary age)

Penelope R. Collins, Ph.D. University of Toronto, *Associate Professor of Education*

Philip Collins, Ph.D. University of California, Berkeley, *Professor of Physics and Astronomy*

Rachael L. Collins, Ph.D. University of California, Irvine, *Lecturer of English*

Lisa Colosimo, D.O. Midwestern University - Arizona College of Osteopathic Medicine, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Freddie Combs, M.D. University of Arizona, *Health Sciences Associate Clinical Professor of Radiological Sciences*

Gilberto Q. Conchas, Ph.D. University of Michigan, *Professor of Education; Asian American Studies; Sociology* (urban education, sociology of education, comparative race and ethnicity)

AnneMarie M. Conley, Ph.D. University of Michigan, *Associate Professor of Education*

Christine Connell, Ph.D. University of California, Irvine, *Lecturer of Humanities*

Ross F. Conner, Ph.D. Northwestern University, *Professor Emeritus of Urban Planning and Public Policy*

Kwasi M. Connor, Ph.D. University of Southern California, *Assistant Professor of Ecology and Evolutionary Biology*

Bridget R. Cooks Cumbo, Ph.D. University of Rochester, *Associate Professor of African American Studies; Art History; Culture and Theory; Visual Studies* (African American art, museum studies, feminist and post-colonial theory)

Miles C. Coolidge, M.F.A. California Institute of the Arts, *Professor of Art* (photography)

Dan M. Cooper, M.D. University of California, San Francisco, *Senior Associate Dean, Clinical Translational Science and Associate Vice Chancellor, Clinical Translational Research and Professor of Pediatrics; Biomedical Engineering; Pharmaceutical Sciences*

Michael Cooper, Ph.D. University of California, Berkeley, *Professor of Physics and Astronomy*

William J. Cooper, Ph.D. University of Miami, *Professor Emeritus of Civil and Environmental Engineering; Urban Planning and Public Policy* (environmental chemistry, advanced oxidation processes for water treatment, aquatic photochemistry of carbon cycling)

Asantha R. Cooray, Ph.D. University of Chicago, *Professor of Physics and Astronomy*

David Copp, Ph.D. University of California, Santa Barbara, *Assistant Professor of Teaching of Mechanical and Aerospace Engineering* (optimal control and estimation, hybrid dynamical systems, energy storage, pedagogy)

Mary Corey, M.A. University of California, Riverside; Certified Professional Labanotator, *Professor of Dance* (dance history, dance notation and reconstruction)

Robert Corn, Ph.D. University of California, Berkeley, *UCI Distinguished Professor of Chemistry; Biomedical Engineering* (analytical, chemical biology, physical chemistry and chemical physics, polymer, materials, nanoscience)

Maria M. Corrada-Bravo, Sc.D. Johns Hopkins University, *Professor in Residence of Neurology; Epidemiology*

Miles Corwin, M.A. University of Missouri-Columbia, *Professor of English* (law enforcement, the criminal justice system, homicide, inner-city education, affirmative action)

Carl W. Cotman, Ph.D. Indiana University, *Professor of Neurology; Neurobiology and Behavior*

N. Edward Coulson, Ph.D. University of California, San Diego, *Professor of Paul Merage School of Business; Economics; Psychological Science*

Ardith Courtney, D.O. University of North Texas, *Health Sciences Associate Clinical Professor of Neurology*

Susan B. Coutin, Ph.D. Stanford University, *Professor of Criminology, Law and Society; Anthropology; Religious Studies* (law, culture, immigration, human rights, citizenship, political activism, Central America)

Alicia Cox, Ph.D. University of California, Riverside, *Assistant Professor of Comparative Literature; English* (19th-century American literature; Native American and Indigenous literature and cultural studies; gender and sexuality studies; queer Indigenous studies; Indigenous feminisms; autobiography; American Indian boarding school studies; settler colonialism)

Elana M. Craemer, M.D. Albert Einstein College of Medicine, *Health Sciences Assistant Clinical Professor of Family Medicine*

Karina S. Cramer, Ph.D. California Institute of Technology, *Professor of Neurobiology and Behavior*

Michael C. Cranston, Ph.D. University of Minnesota, *Department Chair and Professor of Mathematics* (probability)

John L. Crawford, Media Artist and Software Designer, *Professor of Dance; Informatics* (screendance, interactive media, telematic performance, motion capture, digital arts)

Thomas J. Crawford, Ph.D. Harvard University, *Professor of Teaching Emeritus of Psychological Science* (attitude theory and social problems research)

Bridgit O. Crews, Ph.D. University of California, Santa Barbara, *Health Sciences Assistant Clinical Professor of Pathology and Laboratory Medicine*

David H. Cribbs, Ph.D. West Virginia University, *Professor Emeritus of Neurology*

Elizabeth D. Crook, Ph.D. University of California, Santa Cruz, *Assistant Professor of Teaching of Earth System Science*

Roderic N. Crooks, Ph.D. University of California, Los Angeles, *Assistant Professor of Informatics* (science and technology studies, education technology, critical data studies, data visualization, community archives)

Rachel E. Croskery-Roberts, J.D. University of Michigan, *Clinical Professor of Law of School of Law*

Robert W. Crow, M.D. University of Southern California, *Health Sciences Associate Clinical Professor of Ophthalmology; Neurology*

Anne J. Cruz, Ph.D. Stanford University, *Professor Emerita of Spanish and Portuguese*

Jose B. Cruz, Ph.D. University of Illinois at Urbana-Champaign, *Professor Emeritus of Electrical Engineering and Computer Science*

Brian J. Cummings, Ph.D. University of California, Irvine, *Associate Dean of Faculty Development - Senate and Professor of Physical Medicine and Rehabilitation; Anatomy and Neurobiology*

Michael G. Cumsy, Ph.D. University of California, Berkeley, *Professor of Teaching of Molecular Biology and Biochemistry*

Lucia G. Cunningham, Ph.D. University of Kansas, *Professor Emerita of Spanish and Portuguese*

Elliott P. Currie, Ph.D. University of California, Berkeley, *Professor of Criminology, Law and Society* (criminal justice policy in the U.S. and other countries, causes of violent crime, social context of delinquency and youth violence, etiology of drug abuse and assessment of drug policy, race and criminal justice)

Imran Currim, Ph.D. Stanford University, *UCI Chancellor's Professor of Paul Merage School of Business*

James Cyriac, M.D. SUNY Upstate Medical University, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Dvora Cyrlak, M.D. Yale University, *Health Sciences Clinical Professor of Radiological Sciences*

Claudia I. Czimczik, Ph.D. Max Planck Institute, *Associate Professor of Earth System Science*

Thomas M. D'Zmura, Ph.D. University of Rochester, *Professor of Cognitive Sciences* (vision, hearing, language, brain-computer interfaces)

Nancy A. Da Silva, Ph.D. California Institute of Technology, *Professor of Chemical and Biomolecular Engineering; Biomedical Engineering* (molecular biotechnology, metabolic engineering and synthetic biology, eukaryotic expression systems, biorenewable chemicals)

Donald Dabdub, Ph.D. California Institute of Technology, *Associate Dean, Undergraduate Education and Professor of Mechanical and Aerospace Engineering; Civil and Environmental Engineering* (mathematical modeling of urban and global air pollution, dynamics of atmospheric aerosols, secondary organic aerosols, impact of energy generation on air quality, chemical reactions at gas-liquid interfaces)

Maria G. Dacoste-Iyer, M.D. Topiwala National Medical College, *Health Sciences Clinical Professor of Pathology and Laboratory Medicine*

Donald C. Dafoe, M.D. University of Wisconsin Madison, *Professor of Surgery*

Xing Dai, Ph.D. University of Chicago, *Professor of Biological Chemistry; Dermatology*

Teresa A. Dalton, Ph.D. University of Denver, *Associate Professor of Teaching of Criminology, Law and Society* (quantitative methodology, criminology, law and social sciences)

Anthony V. Daly, M.F.A. University of California, Irvine, *Lecturer of Physical Sciences*

Shaun Daly, M.D. Rush Medical College, *Health Sciences Assistant Clinical Professor of Surgery*

Quoc-Viet Dang, Ph.D. University of California, Irvine, *Assistant Professor of Teaching of Electrical Engineering and Computer Science* (e-learning, data analysis, autonomous vehicle racing, cyber-physical systems, making the world a better place)

Mark W. Daniels, M.D. Stanford University, *Health Sciences Assistant Clinical Professor of Pediatrics*

Keith Danner, Ph.D. University of California, Riverside, *Lecturer of English*

James N. Danziger, Ph.D. Stanford University, *Professor Emeritus of Political Science*

Eve Darian-Smith, Ph.D. University of Chicago, *Department Chair and Professor of Global and International Studies; Anthropology; Criminology, Law and Society*

Touraj Daryaei, Ph.D. University of California, Los Angeles, *UCI Endowed Chair in Persian Studies and Culture and Professor of History; Religious Studies* (Iran, Zoroastrianism, Ancient Medieval World)

Cyrus Dastur, M.D. Drexel University, *Health Sciences Associate Clinical Professor of Neurology; Neurological Surgery*

Desha Dauchan, M.F.A. University of California, Los Angeles, *Lecturer of Film and Media Studies*

Sohail Daulatzai, Ph.D. University of Southern California, *Associate Professor of Film and Media Studies; African American Studies; Visual Studies* (decolonization, empire, race, Muslim studies, Black studies)

David Huw Davies, Ph.D. University College London, *Assistant Adjunct Professor of Physiology and Biophysics*

Christopher J. Davis, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Teaching of Mathematics* (algebra and number theory)

Jonathan Davis, D.M.A. Juilliard School, *Lecturer of Music*

Kristen A. Davis, Ph.D. Stanford University, *Associate Professor of Civil and Environmental Engineering; Earth System Science* (coastal oceanography, fluid mechanics, turbulent flows)

Rebecca Davis, Ph.D. University of Notre Dame, *Associate Professor of English; Religious Studies* (Old and Middle English literature, Piers Plowman, medieval religious culture, women's writing, medieval philosophy)

Steven J. Davis, Ph.D. Stanford University, *Associate Professor of Earth System Science; Civil and Environmental Engineering*

Rakhi Dayal, M.D. Maulana Azad Medical College, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Franco De Flaviis, Ph.D. University of California, Los Angeles, *Professor of Electrical Engineering and Computer Science* (microwave systems, wireless communications, electromagnetic circuit simulations)

Helen De La Maza, M.A. Oregon State University, *Lecturer of Education*

Luis M. De La Maza, M.D., Ph.D. University of Minnesota, *Professor of Pathology and Laboratory Medicine*

Nzola De Magalhaes, Ph.D. University of California, Irvine, *Assistant Adjunct Professor of Surgery*

Arthur S. De Vany, Ph.D. University of California, Los Angeles, *Professor Emeritus of Economics*

Myrona L. DeLaney, Ed.D. University of California, Irvine, *Head of Music Theatre and Associate Professor of Teaching of Drama* (music theatre, singing, acting)

Louis DeSipio, Ph.D. University of Texas at Austin, *Professor of Chicano/Latino Studies; Political Science* (ethnic politics, Latino politics, immigration, naturalization, U.S. electoral politics)

Rina Dechter, Ph.D. University of California, Los Angeles, *UCI Chancellor's Professor of Computer Science* (automated reasoning, knowledge-representation, planning and learning)

Lorene D. Delany-Ullman, M.F.A. University of California, Irvine, *Lecturer of English*

Tony Delap, Claremont Graduate University, *Professor Emeritus of Art*

Michael Demetriou, M.D. Ph.D. University of Toronto, *Professor of Neurology; Microbiology and Molecular Genetics*

Darren Denenberg, Ph.D. University of Maryland, *Lecturer of Informatics*

Michael B. Dennin, Ph.D. University of California, Santa Barbara, *Professor of Physics and Astronomy*

Amy Dent, Ph.D. Duke University, *Assistant Professor of Teaching of Psychological Science* (meta-analysis, academic context and consequences of self-regulation, educational and developmental psychology of academic learning)

Amy Depaul, B.A. Boston University, *Lecturer of English*

Suvarna Ajay Deshmukh-Rane, M.D. Bharti Vidyapeeth Medical College, *Health Sciences Assistant Clinical Professor of Pathology and Laboratory Medicine*

Prajakta Deshpande, M.D. Seth G.S. Medical College, *Health Sciences Assistant Clinical Professor of Family Medicine*

Michael Dessen, Ph.D. University of California, San Diego, *Professor of Music*

Robert C. Detrano, M.D. Sapienza University of Rome, *Health Sciences Clinical Professor of Radiological Sciences; Medicine; Program in Public Health*

Russell L. Detwiler, Ph.D. University of Colorado Boulder, *Associate Professor of Civil and Environmental Engineering* (groundwater hydrology, contaminant fate and transport, subsurface process modeling, groundwater/surface-water interaction)

Sanjeev Dewan, Ph.D. University of Rochester, *Professor of Paul Merage School of Business*

Vijay Dhar, M.D. Gauhati Medical College, *Health Sciences Clinical Professor of Pediatrics*

Taizoon Q. Dhoon, M.D. University of Utah, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Fabrizio Di Maio, Ph.D. University of Rome II Tor Vergata, *Director of Italian Language Program and Lecturer of Italian* (didactics of Italian as a foreign language, Italian historical novels, politically engaged literature)

Joseph DiMento, Ph.D. University of Michigan, *Professor of School of Law; Criminology, Law and Society; Paul Merage School of Business; Urban Planning and Public Policy*

Justin T. Diedrich, M.D. Case Western Reserve University, *Health Sciences Assistant Clinical Professor of Obstetrics and Gynecology*

Diane L. Diefenderfer, Former Soloist, Los Angeles Ballet, Eglevsky Ballet Company, Frankfurt Ballet Company, Director of Pilates Program for Dance Wellness, Undergraduate Advisor, *Associate Professor of Teaching of Dance* (ballet, pointe, repertory)

Michelle Digman, Ph.D. University of Illinois at Chicago, *Associate Professor of Biomedical Engineering; Developmental and Cell Biology* (biophotonics, fluorescence Spectroscopy and microscopy, nano-scale imaging, mechanotransduction, cancer cell migration, fluorescence lifetime and metabolic mapping)

Michael B. Dillencourt, Ph.D. University of Maryland, College Park, *Professor of Computer Science* (algorithms and complexity, networks and distributed systems, data structures, computational geometry, graph algorithms)

Huanjun Ding, Ph.D. University of Rochester, *Assistant Adjunct Professor of Radiological Sciences*

Peter H. Ditto, Ph.D. Princeton University, *Professor of Psychological Science* (social psychology, judgment and decision making, political and moral reasoning)

Hamid Djalilian, M.D. University of Minnesota, *Professor of Otolaryngology; Biomedical Engineering*

Andrew Djunaide, M.D. Georgetown University, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

An H. Do, M.D. University of California, Los Angeles, *Health Sciences Assistant Clinical Professor of Neurology*

John Christopher Dobrian, Ph.D. University of California, San Diego, *Professor of Music; Informatics*

Robert J. Doedens, Ph.D. University of Wisconsin-Madison, *Professor Emeritus of Chemistry* (inorganic and organometallic)

Rainer B. Doemer, Ph.D. Dortmund University, *Professor of Electrical Engineering and Computer Science; Computer Science* (system-level design, embedded computer systems, design methodologies, specification and modeling languages, advanced parallel simulation, integration of hardware and software systems)

Mine Dogucu, Ph.D. Ohio State University, *Assistant Professor of Teaching of Statistics*

Matthew O. Dolich, M.D. State University of New York at Stony Brook, *Associate Dean of Graduate Medical Education and Health Sciences Clinical Professor of Surgery*

Franklin Dollar, Ph.D. University of Michigan, *Associate Professor of Physics and Astronomy* (applied physics)

John D. Dombrink, Ph.D. University of California, Berkeley, *Professor Emeritus of Criminology, Law and Society* (crime and criminal justice, deviance and social control)

Neil Donaldson, Ph.D. University of Bath, *Lecturer of Mathematics* (differential geometry)

Carlos E. Donayre, M.D. University of Florida, *Professor of Surgery*

Vy M. Dong, Ph.D. California Institute of Technology, *Professor of Chemistry* (organic and synthetic)

Yingying Dong, Ph.D. Boston College, *Associate Professor of Economics*

Joseph H. Donnelly, M.D. Georgetown University, *Health Sciences Clinical Professor of Pediatrics*

Peter J. Donovan, Ph.D. University College London, *Professor of Biological Chemistry; Developmental and Cell Biology*

C. David Dooley, Ph.D. University of California, Los Angeles, *Professor Emeritus of Psychological Science* (community psychology, epidemiology, economic change)

Shayan Doroudi, Ph.D. Carnegie Mellon University, *Assistant Professor of Education; Informatics* (learning analytics, learning sciences, educational technology)

Barbara A. Doshier, Ph.D. University of Oregon, *UCI Distinguished Professor of Cognitive Sciences* (human information processing, memory retrieval, attention, visual perception)

Kimberly A. Douglas, M.D. Creighton University, *Health Sciences Associate Clinical Professor of Pediatrics*

James P. Dourish, Ph.D. University College London, *Chancellor's Professor of Informatics* (human-computer interaction, computer-supported cooperative work)

Emily E. Dow, M.D. University of Cincinnati, *Health Sciences Clinical Professor of Family Medicine*

Nia Dowell, Ph.D. The University of Memphis and Institute for Intellect Systems, *Assistant Professor of Education* (learning analytics, online group interaction, computational linguistics, technology, STEM)

Timothy L. Downing, Ph.D. University of California, Berkeley, *Assistant Professor of Biomedical Engineering; Microbiology and Molecular Genetics* (stem cells and tissue engineering, regenerative biology, cell programming, epigenomics, mechanobiology)

Ellen R. Druffel, Ph.D. University of California, San Diego, *Fred Kavli Chair in Earth System Science and Distinguished Professor of Earth System Science*

Jaya Dubey, M.A. University of California, Irvine, *Lecturer of English*

Sue P. Duckles, Ph.D. University of California, San Francisco, *Professor Emeritus of Pharmaceutical Sciences*

John Duffy, Ph.D. University of California, Los Angeles, *Professor of Economics*

Benjamin Duncan, Ph.D. University of Memphis, *Lecturer of Academic English/English as a Second Language*

Greg Duncan, Ph.D. University of Michigan, *UCI Distinguished Professor of Education; Economics; Psychological Science* (economics of education, program evaluation, child development)

Derek Dunn-Rankin, Ph.D. University of California, Berkeley, *Professor Emeritus of Mechanical and Aerospace Engineering; Civil and Environmental Engineering; Environmental Health Sciences* (combustion, optical particle sizing, particle aerodynamics, laser diagnostics and spectroscopy)

Holly Durbin, M.F.A. University of California, Los Angeles, *Professor of Drama* (costume design)

Anthony J. Durkin, Ph.D. University of Texas at Austin, *Associate Professor of Biomedical Engineering* (spatial frequency domain imaging, wide field functional imaging, quantitative near-infrared spectroscopy of superficial tissues, chemometrics, fluorescence spectroscopy, quantitative spectral imaging)

Nikil D. Dutt, Ph.D. University of Illinois at Urbana–Champaign, *UCI Chancellor's Professor of Computer Science; Cognitive Sciences; Electrical Engineering and Computer Science* (embedded systems, computer architecture, electronic design automation, software systems, brain-inspired architectures and computing)

Igor E. Dzyaloshinskii, Ph.D. Moscow State University, *Professor Emeritus of Physics and Astronomy*

James Earthman, Ph.D. Stanford University, *Professor of Materials Science and Engineering; Biomedical Engineering* (biomaterials, compositionally complex materials, nanocrystalline alloys, quantitative percussion diagnostics, deformation and damage processes)

Kathryn Eason, M.A. University of Colorado Boulder, *Lecturer of English*

Loren P. Eason, Ph.D. University of California, Irvine, *Lecturer of English*

Jacquelynne S. Eccles, Ph.D. University of California, Los Angeles, *UCI Distinguished Professor of Education; Psychological Science* (academic motivation and achievement, school and family influences on adolescent development, gender and ethnicity in STEM fields)

Aimee Lara Edinger, Ph.D. University of Pennsylvania, *Associate Professor of Developmental and Cell Biology* (cancer biology and metabolism, growth control, protein trafficking)

Lilangi Ediriwickrema, M.D. Yale University, *Health Sciences Assistant Clinical Professor of Ophthalmology*

Karen L. Edwards, Ph.D. University of Washington, *Department Chair and Professor of Epidemiology; Program in Public Health*

Kimberly D. Edwards, Ph.D. University of California, Irvine, *Department Vice Chair and Professor of Teaching of Chemistry* (general chemistry, chemical education)

Robert A. Edwards, M.D., Ph.D. Baylor College of Medicine, *Associate Professor of Pathology and Laboratory Medicine*

Rufus D. Edwards, Ph.D. Rutgers, The State University of New Jersey, *Professor of Program in Public Health; Environmental Health Sciences; Epidemiology*

Benis Egoh, Ph.D. Stellenbosch University, *Assistant Professor of Earth System Science*

Paul C. Eklof, Ph.D. Cornell University, *Professor Emeritus of Mathematics* (logic and algebra)

Magda S. El Zarki, Ph.D. Columbia University, *Professor of Computer Science; Informatics* (telecommunications, networks, wireless communication, video transmission)

Said E. Elghobashi, Ph.D. University of London, *Distinguished Professor Emeritus of Mechanical and Aerospace Engineering* (direct numerical simulation of turbulent, chemically reacting and dispersed two-phase flows)

Jennifer Elia, M.D. Jefferson Medical College, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Salma Elmalaki, Ph.D. University of California, Los Angeles, *Assistant Professor of Teaching of Electrical Engineering and Computer Science* (mobile computing, pervasive autonomous system, personalized computing, and internet-of-things (IoT))

Ahmed Aly Elrefaie, M.D. Wake Forest University, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Ahmed Eltawil, Ph.D. University of California, Los Angeles, *Professor of Electrical Engineering and Computer Science* (design of system and architectures for computing and communication devices, low power implementations and architectures for digital signal processing)

James J. Emerson, Ph.D. University of Chicago, *Assistant Professor of Ecology and Evolutionary Biology*

German A. Enciso Ruiz, Ph.D. Rutgers, the State University of New Jersey, *Professor of Mathematics; Developmental and Cell Biology* (applied and computational mathematics, mathematical and computational biology)

Scott A. Engwall, M.D. University of Florida, *Department Chair and Health Sciences Clinical Professor of Anesthesiology and Perioperative Care*

Laura Enriquez, Ph.D. University of California, Los Angeles, *Assistant Professor of Chicano/Latino Studies; Asian American Studies; Sociology* (undocumented 1.5 generation young adults, immigration, citizenship, Latino families)

Sonja Entringer, Ph.D. University of Trier, *Associate Adjunct Professor of Pediatrics*

Dae Seok Eom, Ph.D. The University of Texas at Austin, *Assistant Professor of Developmental and Cell Biology* (cellular projection mediated long-range cell-to-cell communication)

David A. Eppstein, Ph.D. Columbia University, *UCI Chancellor's Professor of Computer Science* (algorithms and complexity; computer graphics and visualization; geometric optimization)

Daniel Epstein, Ph.D. University of Washington, *Assistant Professor of Informatics; Computer Science* (human-computer interaction, personal informatics, ubiquitous computing, social computing, health informatics)

Rahim Esfandypour, Ph.D. Stanford University, *Assistant Professor of Electrical Engineering and Computer Science; Biomedical Engineering* (nanotechnology and nanoscience, flexible electronics, MEMS and NEMS fabrication and modeling, stretchable and wearable bio devices, translational micro/nanotechnologies, biological and chemical sensors, microfluidics, microelectronics circuits and systems, physiological monitoring, Internet of Things (IoT) bio devices, technology development for personalized/precision medicine, and Point of Care (POC) diagnostics)

Lorraine S. Evangelista, Ph.D. University of California, Los Angeles, *Professor Emerita of Nursing*

Dennis Evans, Ed.D. University of Southern California, *Non-Senate Academic Emeritus of Education*

Gregory R.D. Evans, M.D. University of Southern California, *Department Chair and Professor of Plastic Surgery; Biomedical Engineering; Surgery*

William J. Evans, Ph.D. University of California, Los Angeles, *UCI Distinguished Professor of Chemistry* (inorganic and organometallic)

Marc-Eivind C. Evensen, M.D. University of California, Irvine, *Health Sciences Clinical Professor of Physical Medicine and Rehabilitation*

Kai Evers, Ph.D. Duke University, *Associate Professor of German* (20th-century German literature and film, modernism and Holocaust literature, theories of violence and catastrophic imagination)

Alice Fahs, Ph.D. New York University, *Professor Emerita of History* (Civil War America, American cultural history, gender)

Celia Faiola, Ph.D. Washington State University, *Assistant Professor of Ecology and Evolutionary Biology; Chemistry*

Christopher Fan, Ph.D. University of California, Berkeley, *Assistant Professor of English; Asian American Studies* (transnational Asia American, 20th, and 21st century literature, speculative fiction, political economy)

Hung Y. Fan, Ph.D. Massachusetts Institute of Technology, *Professor Emeritus of Molecular Biology and Biochemistry*

Herschel Farbman, Ph.D. Yale University, *Department Chair and Associate Professor of Comparative Literature; French* (modernism, critical theory)

Hamed Farid, M.D. University of California, San Diego, *Health Sciences Associate Clinical Professor of Radiological Sciences*

Marjan Farid, M.D. University of California, San Diego, *Health Sciences Clinical Professor of Ophthalmology*

George Farkas, Ph.D. Cornell University, *UCI Distinguished Professor of Education; Sociology* (educational achievement gaps, interventions, educational policy)

Sarah Bennett Farmer, Ph.D. University of California, Berkeley, *Associate Professor of History* (modern French history, twentieth-century Europe, social and cultural history)

Ted Farzaneh, M.D. Shaheed Beheshti University of Medical Sciences, *Health Sciences Assistant Clinical Professor of Pathology and Laboratory Medicine*

Clifford L. Faulkner, M.A. California State University, Long Beach, *Professor of Teaching Emeritus of Drama* (scenery design, history of design, gay theatre)

Katherine Faust, Ph.D. University of California, Irvine, *Professor of Sociology* (social networks, animal social organization, population processes and social networks, research methods)

Howard J. Federoff, M.D. Ph.D. Albert Einstein College of Medicine, *Professor of Neurobiology and Behavior; Neurology*

David Fedman, Ph.D. Stanford University, *Assistant Professor of History* (Japan and Korea, environmental history, historical geography, global history, modern war)

Stephen Feig, M.D. New York University, *Fong and Jean Tsai Chair in Women's Imaging and Professor of Radiological Sciences*

David Feldman, Ph.D. University of Missouri-Columbia, *Professor of Urban Planning and Public Policy; Political Science*

Julian Feldman, Ph.D. Carnegie Institute of Technology, *Professor Emeritus of Computer Science*

Martha S. Feldman, Ph.D. Stanford University, *Roger W. and Janice M. Johnson Chair in Civic Governance and Public Management and Professor of Urban Planning and Public Policy; Paul Merage School of Business; Sociology* (organization theory and behavior, stability and change in organizations, decision-making and information processing, public management, qualitative research methods)

Paul Feldstein, Ph.D. University of Chicago, *Professor Emeritus of Paul Merage School of Business*

Philip Felgner, Ph.D. Michigan State University, *Director of the Vaccine Research and Development Center and Professor in Residence of Physiology and Biophysics*

Jonathan L. Feng, Ph.D. Stanford University, *Professor of Physics and Astronomy*

Asaf Ferber, Ph.D. Tel Aviv University, *Assistant Professor of Mathematics* (combinatorics and probability)

Julie E. Ferguson, Ph.D. Oxford University, *Associate Professor of Teaching of Earth System Science*

Amanda N. Fernandez, M.D. University of the East, Ramon Magsaysay Memorial Medical Center, *Health Sciences Associate Clinical Professor of Pediatrics*

Nohema Fernandez, D.M.A. Stanford University, *Professor Emerita of Music*

Dayantha Fernando, M.D. Georgetown University, *Health Sciences Associate Clinical Professor of Radiological Sciences*

Raúl A. Fernández, Ph.D. Claremont Graduate University, *Executive Secretary of the UC-Cuba Academic Initiative and Professor Emeritus of Chicano/Latino Studies; Social Sciences*

Leonard A. Ferrari, Ph.D. University of California, Irvine, *Professor Emeritus of Electrical Engineering and Computer Science* (machine vision, signal processing, computer graphics)

Robert R. Field, M.D. University of Kansas, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Gordon J. Fielding, Ph.D. University of California, Los Angeles, *Professor Emeritus of Economics*

Aleksandr Figotin, Ph.D. Tashkent University of Information Technologies, *Professor of Mathematics* (applied and computational mathematics, mathematical physics)

Sarah Finkeldei, Ph.D. RWTH Aachen University, *Assistant Professor of Chemistry; Materials Science and Engineering* (nuclear chemistry)

Mark Finkelstein, Ph.D. Stanford University, *Professor Emeritus of Mathematics; Center for Educational Partnerships* (analysis)

Barbara J. Finlayson-Pitts, Ph.D. University of California, Riverside, *Director of AirUCI and UCI Distinguished Professor of Chemistry* (analytical, atmospheric and environmental, physical chemistry and chemical physics)

Marcello Fiocco, Ph.D. University of California, Santa Barbara, *Associate Professor of Philosophy*

Anita W. Fischer, M.A. Loyola Marymount University, *Lecturer of English*

Chanel E. Fischetti, M.D. University of California, Irvine, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Jennifer J. Fisher, Ph.D. University of California, Riverside; founder and editor of Dance Major Journal, *Professor of Dance* (critical dance studies)

Mark J. Fisher, M.D. University of Cincinnati, *Professor of Neurology; Anatomy and Neurobiology; Political Science*

Zachary Fisk, Ph.D. University of California, San Diego, *UCI Distinguished Professor Emeritus of Physics and Astronomy*

Laura E. Fitzmaurice, M.D. University of California, Los Angeles, *Health Sciences Associate Clinical Professor of Obstetrics and Gynecology*

Lisa Flanagan-Monuki, Ph.D. University of California, San Diego, *Associate Professor of Neurology; Anatomy and Neurobiology; Biomedical Engineering*

Victor Fleischer, J.D. Columbia Law School, *Professor of School of Law*

Angela G. Fleischman, M.D. Stanford University, *Assistant Professor of Medicine; Biological Chemistry*

Pamela L. Flodman, M.S. University of California, Irvine, *Adjunct Professor of Pediatrics; Genetic Counseling*

Glenda M. Flores, Ph.D. University of Southern California, *Associate Professor of Chicano/Latino Studies; Sociology* (Latina/o sociology, gender and work, middle-class minorities, education, urban ethnography)

Ryuko Flores, M.A. University of California, Los Angeles, *Lecturer of Japanese*

David Floriolli, M.D. University of California, Irvine, *Health Sciences Associate Clinical Professor of Radiological Sciences*

Giovanna A. Fogli, Ph.D. Yale University, *Lecturer of Humanities*

Vivian R. Folkenflik, M.A. Cornell University, *Non-Senate Academic Emerita of Humanities*

Matthew Foreman, Ph.D. University of California, Berkeley, *Distinguished Professor of Mathematics; Logic and Philosophy of Science* (ergodic theory and dynamical systems, logic and foundations)

Donald N. Forthal, M.D. University of California, Irvine, *Professor of Medicine; Molecular Biology and Biochemistry*

Michelle A. Fortier, Ph.D. University of Nebraska Lincoln, *Associate Professor of Nursing; Nursing; Psychological Science*

Norbert Fortin, Ph.D. Boston University, *Associate Professor of Neurobiology and Behavior*

Kim Fortun, Ph.D. Rice University, *Department Chair and Professor of Anthropology* (environmental problems and science, science and technology, environmental health, disaster, India)

Michael Fortun, Ph.D. Harvard University, *Associate Professor of Anthropology* (anthropology of science, air pollution science, data science, genetics, history of science, United States, Iceland)

Donald E. Fosket, Ph.D. University of Idaho, *Professor Emeritus of Developmental and Cell Biology* (regulation of cytoskeleton formation and function)

Efi Foufoula-Georgiou, Ph.D. University of Florida, *Distinguished Professor of Civil and Environmental Engineering* (hydrology and geomorphology with emphasis on modeling the interactions between the atmosphere, land, and the terrestrial environment at plot to large-watershed scale)

Christie Fowler, Ph.D. Florida State University, *Assistant Professor of Neurobiology and Behavior*

Edward B. Fowler, Ph.D. University of California, Berkeley, *Professor Emeritus of Japanese* (modern Japanese literature, cultural studies, film)

Keith Fowler, D.F.A. Yale University, *Professor Emeritus of Drama* (directing, acting)

Charles C. Fowlkes, Ph.D. University of California, Berkeley, *Professor of Computer Science; Cognitive Sciences* (artificial intelligence, computer vision, machine learning, computational biology)

John Christian Fox, M.D. Tufts University, *Department Chair and Professor of Emergency Medicine*

Roy Fox, Ph.D. The Hebrew University of Jerusalem, *Assistant Professor of Computer Science* (theory and applications of reinforcement learning, dynamical systems, information theory, robotics)

David John Frank, Ph.D. Stanford University, *Professor of Sociology; Education; Political Science* (globalization, sexuality, the natural environment, higher education)

Richard I. Frank, Ph.D. University of California, Berkeley, *Professor Emeritus of History* (Roman history, Classical tradition)

Steven A. Frank, Ph.D. University of Michigan, *Distinguished Professor and Donald Bren Professor of Ecology and Evolutionary Biology; Logic and Philosophy of Science*

Michael S. Franz, Ph.D. Swiss Federal Institute of Technology in Zurich, *UCI Chancellor's Professor of Computer Science; Electrical Engineering and Computer Science* (systems software, particularly compilers and virtual machines, trustworthy computing, software engineering)

Matthew Freedman, Ph.D. University of Maryland-College Park, *Professor of Economics*

Fillmore Freeman, Ph.D. Michigan State University, *Professor of Chemistry* (organic and synthetic, theoretical and computational)

Kathryn Steinhaus French, M.S. University of Colorado Denver, *Health Sciences Clinical Professor of Pediatrics; Genetic Counseling*

Michael D. Fried, Ph.D. University of Michigan, *Professor Emeritus of Mathematics* (arithmetic geometry and complex variables)

Marcia G. Froehlich, M.F.A. University of Michigan, *Assistant Professor of Drama* (costume design)

Daniel H. Frost, M.S. University of California, Irvine, *Professor of Teaching Emeritus of Computer Science* (artificial intelligence, software engineering, computer graphics, teaching of programming)

Ron D. Frostig, Ph.D. University of California, Los Angeles, *Professor of Neurobiology and Behavior; Biomedical Engineering*

John P. Fruehauf, M.D. Rush University, *Professor Emeritus of Medicine; Pharmaceutical Sciences*

David A. Fruman, Ph.D. Harvard University, *Professor of Molecular Biology and Biochemistry*

James A. Fujii, Ph.D. University of Chicago, *Associate Professor Emeritus of Japanese* (modern Japanese literature, human-animal relations, cultural studies)

Dorothy B. Fujita-Rony, Ph.D. Yale University, *Associate Professor of Asian American Studies; Culture and Theory; History* (U.S. history, Asian American studies)

Roy M. Fujitani, M.D. University of Hawaii at Manoa, *Professor of Surgery*

Michael A. Fuller, Ph.D. Yale University, *Professor of East Asian Studies; Chinese; Religious Studies* (Chinese poetry and poetics, the cultural and intellectual contexts for poetry, aesthetic theory, linguistic issues in classical Chinese)

Filipp Furche, Ph.D. University of Karlsruhe, *Professor of Chemistry* (physical chemistry and chemical physics, theoretical and computational)

Richard Futrell, Ph.D. Massachusetts Institute of Technology, *Assistant Professor of Computer Science; Language Science* (language processing, Bayesian modeling, NLP)

Israel Gabriel, Bat-Dor Dance Company; Former Assistant Artistic Director, *Associate Professor of Teaching Emeritus of Dance* (ballet, modern, pas de deux, repertory)

Sergio Gago-Masague, Ph.D., *Assistant Professor of Teaching of Computer Science* (pervasive computing, user-centric software design, human computer interaction, serious games)

Daniel D. Gajski, Ph.D. University of Pennsylvania, *Professor Emeritus of Electrical Engineering and Computer Science* (embedded systems, software/hardware design, design methodologies and tools, science of design)

Christine M. Gall, Ph.D. University of California, Irvine, *Department Chair and Distinguished Professor of Anatomy and Neurobiology; Neurobiology and Behavior*

Natalie M. Gallant, M.D. University of Southern California, *Health Sciences Associate Clinical Professor of Pediatrics; Genetic Counseling*

De Gallow, Ph.D. University of Southern California, *Senior Lecturer of Undergraduate Education*

Valerie B. Galvan-Turner, M.D. University of Texas Medical Branch, *Health Sciences Clinical Instructor of Obstetrics and Gynecology*

Manuel Gamero-Castaño, Ph.D. Yale University, *Associate Professor of Mechanical and Aerospace Engineering* (electric propulsion, with emphasis on colloid thruster technology for precision formation flying missions and Hall thrusters. Electrohydrodynamic atomization of liquids and related problems like electrospray ionization and technological applications of electrosprays, aerosol diagnostics)

Sunil P. Gandhi, Ph.D. University of California, San Diego, *Associate Professor of Neurobiology and Behavior*

Anand K. Ganesan, M.D., Ph.D. Medical College of Wisconsin, *Associate Professor of Dermatology; Biological Chemistry*

Joshua Garcia, Ph.D. University of Southern California, *Assistant Professor of Informatics* (software engineering, software security, software analysis and testing, software architecture, software maintenance)

Ajay Garde, Ph.D. University of Southern California, *Associate Professor of Urban Planning and Public Policy*

David M. Gardiner, Ph.D. University of California, San Diego, *Professor of Developmental and Cell Biology* (limb development and regeneration)

Michelle Garfinkel, Ph.D. Brown University, *Professor of Economics*

Sumit Garg, M.D. New York Medical College, *Health Sciences Associate Clinical Professor of Ophthalmology*

John Jay Gargus, M.D. Ph.D. Yale University, *Director of the Center for Autism Research and Translation and Professor Emeritus of Physiology and Biophysics; Genetic Counseling; Pediatrics*

Alejandra Garland Becerra, M.D. Universidad de San Martín de Porres, *Health Sciences Assistant Clinical Professor of Neurology*

Bryant G. Garth, J.D. Stanford University, *Senior Associate Dean of Academic Affairs and Vice Dean and UCI Chancellor's Professor of School of Law*

Armando S. Garza, M.D. University of California, Davis, *Health Sciences Assistant Clinical Professor of Radiological Sciences*

Irene Gassko, Ph.D. Boston University, *Lecturer of Computer Science*

Brandy Gatlin-Nash, Ph.D. Florida State University, *Assistant Professor of Education; Language Science*

Jean-Luc Gaudiot, Ph.D. University of California, Los Angeles, *Professor of Electrical Engineering and Computer Science; Computer Science* (parallel processing, computer architecture, processor architecture)

Brandon S. Gaut, Ph.D. University of California, Riverside, *Biological Sciences Associate Dean for Research and Innovation and Professor of Ecology and Evolutionary Biology*

Nien-Hui Ge, Ph.D. University of California, Berkeley, *Professor of Chemistry* (analytical, chemical biology, physical chemistry and chemical physics, polymer, materials, nanoscience)

Suzanne Gearhart, Ph.D. Johns Hopkins University, *Professor Emerita of French* (seventeenth- and eighteenth-century French literature, philosophy and literature)

Kelvin W. Gee, Ph.D. University of California, Davis, *Professor of Pharmaceutical Sciences*

Jean G. Gehricke, Ph.D. Free University of Berlin, *Associate Adjunct Professor of Pediatrics*

Alexander Gelley, Ph.D. Yale University, *Professor Emeritus of Comparative Literature* (eighteenth- and nineteenth-century European novel, critical theory)

Mary Gendy, M.D. Wright State University, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Linda M. Georgianna, Ph.D. Columbia University, *Professor Emerita of English*

Tryphon Georgiou, Ph.D. University of Florida, *Distinguished Professor of Mechanical and Aerospace Engineering* (dynamical systems and control, mathematical physics, applied mathematics. Current interests focus on stochastic control, geometry of optimal mass transport, inverse problems in physics and signal analysis, and topics related to the control of fluids, networks and thermodynamic systems)

Robert B. Gerber, Ph.D. Oxford University, *Professor Emeritus of Chemistry* (atmospheric and environmental, physical chemistry and chemical physics, theoretical and computational)

Donovan German, Ph.D. University of Florida, *Associate Professor of Ecology and Evolutionary Biology*

Paul David Gershon, Ph.D. University of Liverpool, *Professor of Molecular Biology and Biochemistry*

Amy Gerstler, M.F.A. Bennington College, *Professor Emerita of English* (poetry, creative writing, fiction, creative nonfiction, hybrid literature, visual art, lyric essay, art and science, women writers)

Michel Gervais, *Lecturer of Dance*

Martha Gever, Ph.D. City College of the City University of New York, *Professor Emerita of Art* (history and criticism: video, media studies, popular culture)

Zina Giannopoulou, Ph.D. University of Illinois at Urbana-Champaign, *Associate Professor of Classics; European Languages and Studies* (Plato, philosophy and literature, Greek tragedy and epic, film, and reception of classics)

Lisa M. Gibbs, M.D. Stanford University, *Ronald W. Reagan Chair in Geriatrics and Health Sciences Clinical Professor of Family Medicine*

Margaret P. Gilbert, Ph.D. Oxford University, *Abraham I. Melden Chair in Moral Philosophy and Professor of Philosophy*

Daniel L. Gillen, Ph.D. University of Washington, *Department Chair and Professor of Statistics; Program in Public Health*

Howard A. Gillman, Ph.D. University of California, Los Angeles, *Chancellor and Professor of Political Science; Criminology, Law and Society; History; School of Law*

Mary Gilly Graham, Ph.D. University of Houston, *Professor of Paul Merage School of Business*

Lindsay Gilmour, M.F.A. University of Wisconsin, Milwaukee, *Assistant Professor of Dance* (modern choreography, improvisation)

Kimberly Marie Gimenez, M.D. University of California, Irvine, *Health Sciences Clinical Professor of Anesthesiology and Perioperative Care*

Tony D. Givargis, Ph.D. University of California, Riverside, *Professor of Computer Science* (embedded systems, platform-based system-on-a-chip design, low-power electronics)

James B. Given, Ph.D. Stanford University, *Professor Emeritus of History*

Charles Glabe, Ph.D. University of California, Davis, *Professor of Molecular Biology and Biochemistry*

Jonathan D. Glater, J.D. Yale University, *Professor of School of Law*

Amihai Glazer, Ph.D. Yale University, *Professor of Economics*

Richard Godden, Ph.D. University of Kent, *Professor of English* (20th century and contemporary American literature, Faulkner)

Douglas S. Goheen, Ph.D. University of Denver, *Professor Emeritus of Drama* (scenery design, digital imaging)

June-Anne Gold, M.B.B.S., D.C.H., M.R.C.P. University of London, *Health Sciences Clinical Professor of Pediatrics; Genetic Counseling*

David Theo Goldberg, Ph.D. The Graduate Center, City University of New York, *Director of the UC Humanities Research Institute and Professor of Comparative Literature; Anthropology; Criminology, Law and Society* (race, racism, race and the law, political theory, South Africa, digital humanities)

Rachel E. Goldberg, Ph.D. Brown University, *Assistant Professor of Sociology* (health, social demography, family, children and youth, gender, migration)

Wendy A. Goldberg, Ph.D. University of Michigan, *Professor Emerita of Psychological Science; Education* (developmental psychology, work and family, infant sleep, transition to parenthood, autism)

Isaac Goldbring, Ph.D. University of Illinois at Urbana-Champaign, *Associate Professor of Mathematics; Logic and Philosophy of Science* (logic and foundations)

Emily B. Goldenberg, M.D. Virginia Commonwealth University, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Alan L. Goldin, M.D. Ph.D. University of Michigan, *Professor of Microbiology and Molecular Genetics; Anatomy and Neurobiology; Physiology and Biophysics*

Ruth Goldstein, Ph.D. University of California, Berkeley, *Assistant Professor of Global and International Studies*

Steven A.N. Goldstein, M.D., Ph.D. Harvard University, *Vice Chancellor for Health Affairs and Distinguished Professor of Physiology and Biophysics*

Brandon Golob, Ph.D. University of Southern California, *Assistant Professor of Teaching of Criminology, Law and Society* (law-related educational programs; social media and online privacy; inclusive pedagogy; media effects; law and popular culture)

Maryam Golshan-Momeni, M.D. University of Tehran, *Health Sciences Associate Clinical Professor of Radiological Sciences*

Kiarash Golshani, M.D. Oregon Health & Science University, *Health Sciences Associate Clinical Professor of Neurological Surgery*

Sidney Golub, Ph.D. Temple University, *Edward A. Dickson Emeritus Professor and Professor Emeritus of Microbiology and Molecular Genetics*

Ramon Gomez, Ph.D. University of California, Los Angeles, *Assistant Adjunct Professor of Electrical Engineering and Computer Science* (analog and RF circuit design)

Gilbert G. Gonzalez, Ph.D. University of California, Los Angeles, *Professor Emeritus of Chicano/Latino Studies; Social Sciences*

Sara Goodman, Ph.D. Georgetown University, *Associate Professor of Political Science; European Languages and Studies* (citizenship policy, immigration, immigrant integration, ethnic diversity in democracies, diaspora)

Deborah Goodman-Gruen, M.D., Ph.D., M.P.H. University of California, Los Angeles, *Associate Adjunct Professor of Epidemiology*

Michael T. Goodrich, Ph.D. Purdue University, *UCI Chancellor's Professor of Computer Science* (computer security, algorithm design, data structures, Internet algorithmics, geometric computing, graphic drawing)

Shane Goodridge, Ph.D. University of Victoria, *Assistant Professor of Teaching of Education*

Michele B. Goodwin, J.D. Boston College, *Director, Center for Biotechnology and Global Health Policy and UCI's Chancellor's Professor of School of Law; Criminology, Law and Society; Gender and Sexuality Studies; Program in Public Health*

Scott C. Goodwin, M.D. Harvard University, *Hasso Brothers Endowed Chair in Radiological Sciences and Professor Emeritus of Radiological Sciences*

Charlotte Gore, M.D. University of California, San Diego, *Health Sciences Assistant Clinical Professor of Ophthalmology*

Anton Gorodetski, Ph.D. Moscow State University, *Professor of Mathematics* (ergodic theory and dynamical systems)

Alon A. Gorodetsky, Ph.D. California Institute of Technology, *Associate Professor of Chemical and Biomolecular Engineering; Chemistry; Materials Science and Engineering* (cephalopods, adaptive materials, camouflage, bioelectronics)

Michael R. Gottfredson, Ph.D. University at Albany, State University of New York, *Chancellor's Professor of Criminology, Law and Society; School of Law; Sociology* (criminology, juvenile delinquency, crime theory, public policy)

Michael L. Goulden, Ph.D. Stanford University, *Professor of Earth System Science; Ecology and Evolutionary Biology*

Celia Goulding, Ph.D. King's College London, *Professor of Molecular Biology and Biochemistry; Pharmaceutical Sciences*

Namita Goyal, M.D. Ross University, *Health Sciences Assistant Clinical Professor of Neurology*

Kyle Grady, Ph.D. University of Michigan, *Assistant Professor of English* (early modern literature and culture, African American literature and culture, critical race theory)

John Graham, Ph.D. University of California, Berkeley, *Professor Emeritus of Paul Merage School of Business*

Sergei A. Grando, M.D., Ph.D., D.Sc. Central Institute of Dermatology and Venereology, *Medical Institute, Kiev, Ukraine; PostGraduate Institute for Physicians, Kiev, Ukraine; Central Institute of Dermatology and Venereology, Moscow, Russia and Professor of Dermatology; Biological Chemistry*

Douglas A. Granger, Ph.D. University of California, Irvine, *Director of the Institute for Interdisciplinary Salivary Bioscience and Professor of Psychological Science* (psychoneuroendocrinology, salivary bioscience, hormone-behavior relationships across the lifespan, in high- and low-risk populations)

Richard H. Granger, Ph.D. Yale University, *Professor Emeritus of Computer Science*

Stanley B. Grant, Ph.D. California Institute of Technology, *Professor Emeritus of Civil and Environmental Engineering* (environmental engineering, inland and coastal water quality, coagulation and filtration of colloidal contaminants, environmental microbiology)

Lisa B. Grant Ludwig, Ph.D. California Institute of Technology, *Professor of Program in Public Health*

Enrico Gratton, Ph.D. University of Rome, *Distinguished Professor of Biomedical Engineering; Developmental and Cell Biology; Physics and Astronomy* (design of new fluorescence instruments, protein dynamics, single molecule, fluorescence microscopy, photon migration in tissues)

Elizabeth Greeban, M.A. University of California, Irvine, *Lecturer of Education*

Kim Green, Ph.D. University of Leeds, *Associate Professor of Neurobiology and Behavior*

Michael M. Green, Ph.D. University of California, Los Angeles, *Stacy Nicholas Dean of The Henry Samueli School of Engineering and Associate Dean for Undergraduate Student Affairs of The Henry Samueli School of Engineering and Professor of Electrical Engineering and Computer Science* (analog/mixed-signal IC design, broadband circuit design, theory of nonlinear circuits)

Michael T. Green, Ph.D. University of Chicago, *Professor of Molecular Biology and Biochemistry; Chemistry* (chemical, biology, inorganic and organometallic, physical chemistry and chemical physics, theoretical and computational)

Milton Greenberg, Ph.D. University of California, Irvine, *Assistant Adjunct Professor of Physiology and Biophysics*

Sean Greenberg, Ph.D. Harvard University, *Associate Professor of Philosophy; European Languages and Studies; Religious Studies*

Ellen Greenberger, Ph.D. Harvard University, *Professor Emerita of Psychological Science* (developmental psychology, social and cultural influences on adolescent and young adult development, family relationships and consequences throughout the lifespan)

Frederick Greene, B.M. University of Southern California, *Lecturer of Music*

Susan M. Greenhalgh, Ph.D. Columbia University, *Professor Emeritus of Anthropology*

Fred S. Greensite, M.D. University of California, San Diego, *Professor Emeritus of Radiological Sciences*

Charlotte Griffin, M.F.A. University of Texas, Austin, *Assistant Professor of Dance* (choreography, modern, screen dance)

Joshua Grill, Ph.D. Wake Forest University School of Medicine, *Associate Professor of Neurobiology and Behavior; Neurobiology and Behavior*

Nicole Grimes, Ph.D. University of Dublin, *Associate Professor of Music*

Bernard N. Grofman, Ph.D. University of Chicago, *Professor of Political Science; Economics* (public choice, mathematical models of collective decision making, formal democratic theory, politics of small groups, representation, voting rights)

Anna Grosberg, Ph.D. California Institute of Technology, *Associate Professor of Biomedical Engineering; Chemical and Biomolecular Engineering* (computational modeling of biological systems, biomechanics, cardiac tissue engineering)

Daniel Gross, Ph.D. University of California, Berkeley, *Professor of English* (emotion studies, history and theory of rhetoric, early modern literature and culture, Heidegger and rhetoric)

John E. Gross, M.D. University of Missouri-Columbia, *Vice Dean for Faculty and Clinical Affairs and Health Sciences Clinical Professor of Plastic Surgery*

Steven P. Gross, Ph.D. University of Texas at Austin, *Professor of Developmental and Cell Biology; Physics and Astronomy* (force generation by molecular motors in living cells)

Emily D. Grossman, Ph.D. Vanderbilt University, *Professor of Cognitive Sciences* (visual perception, neuroimaging)

Geeta Grover, M.D. University of California, Irvine, *Health Sciences Clinical Professor of Pediatrics*

Leonid Groyzman, M.D. Nicolae Testemianu State University of Medicine and Pharmacy, *Health Sciences Associate Clinical Professor of Neurology; Neurological Surgery*

Zhibin Guan, Ph.D. University of North Carolina at Chapel Hill, *Professor of Chemistry; Biomedical Engineering; Chemical and Biomolecular Engineering; Materials Science and Engineering* (chemical biology, organic and synthetic, polymer, materials, nanoscience)

Jody Guarino, Ed.D. Azusa Pacific University, *Lecturer and Supervisor of Teacher of Education*

Alex Guenther, Ph.D. Washington State University, *Professor of Earth System Science*

Arnold Guerra, Ph.D. University of California, Irvine, *Lecturer of Physics and Astronomy*

Nancy Guerra, Ed.D. Harvard University, *Dean of the School of Social Ecology and Professor of Psychological Science; Criminology, Law and Society* (childrens' aggression and behavior problems, prevention of youth violence, promotion of healthy youth development)

Luyi Gui, Ph.D. Georgia Institute of Technology, *Assistant Professor of Paul Merage School of Business*

Patrick Q. Guidotti, Ph.D. University of Zurich, *Professor of Mathematics* (analysis and partial differential equations, applied and computational mathematics)

- Susan Guilfoyle, M.S. University of Southern California, *Lecturer of Education* (reading, language and literacy)
- Michele Guindani, Ph.D. Universita Luiga Bocconi, *Professor of Statistics*
- Alberto D. Gullaba, M.F.A. University of California, Irvine, *Lecturer of English*
- Gultekin Gulsen, Ph.D. Bogazici University, *Associate Professor of Radiological Sciences; Biomedical Engineering; Physics and Astronomy*
- Yigit S. Guner, M.D. Rosalind Franklin University at Chicago Medical School, *Health Sciences Associate Clinical Professor of Surgery*
- Qitao Guo, Ph.D. University of California, Berkeley, *Associate Professor of History; Religious Studies* (social, cultural, and religious history of pre-modern China (the Ming and Qing dynasties))
- Yuqing Guo, Ph.D. University of Washington, *Assistant Professor of Nursing*
- Ranjan Gupta, M.D. Albany Medical College, *Professor of Orthopaedic Surgery; Biomedical Engineering*
- Vijay Gurbaxani, Ph.D. University of Rochester, *Taco Bell Chair in Information Technology Management and Professor of Paul Merage School of Business; Informatics* (economics of information systems management, impact of information technology on organization and market structure)
- Tatyana Gurvich, Pharm.D. University of Southern California, *Assistant Adjunct Professor of Family Medicine*
- Kaaryn Gustafson, J.D., Ph.D. University of California, Berkeley, *Co-Director, Center on Law, Equality and Race (CLEar) and Professor of School of Law*
- Elizabeth Guthrie, Ph.D. University of Illinois at Urbana-Champaign, *Professor of Teaching Emerita of French* (second-language acquisition and teaching)
- Gary L. Guymon, Ph.D. University of California, Davis, *Professor Emeritus of Civil and Environmental Engineering* (water resources, groundwater, modeling uncertainty)
- John F. Guzowski, Ph.D. University of California, Irvine, *Associate Professor of Neurobiology and Behavior*
- Linda G. Haas, Ph.D. University of South Florida, *Lecturer of English*
- Ali A. Habib, M.D. Aga Kahn University, *Health Sciences Associate Clinical Professor of Neurology*
- Bambi Haggins, Ph.D. University of California, Los Angeles, *Associate Professor of Film and Media Studies; African American Studies; Visual Studies* (Black [African American] comedy in film, television, digital media and performance, television history, comedy as social and political discourse, African-American studies, American studies)
- Casey A. Hall, Ph.D. University of California, Irvine, *Lecturer of Humanities*
- Chad Michael Hall, M.F.A. Ohio State University, *Artistic Director - MULTIPLEX DANCE and Assistant Professor of Dance* (contemporary technique, choreography, improvisation, dance, and video)
- James E. Hall, Ph.D. University of California, Riverside, *Professor Emeritus of Physiology and Biophysics*
- Herbert W. Hamber, Ph.D. University of California, Santa Barbara, *Professor Emeritus of Physics and Astronomy*
- Sherine Hamdy, Ph.D. New York University, *Associate Professor of Anthropology* (medical anthropology, science, technology and society, bioethics, comics, Islam, Egypt, middle east)
- Afshan B. Hameed, M.D. King Edward Medical College, *Health Sciences Clinical Professor of Obstetrics and Gynecology*
- Barbara A. Hamkalo, Ph.D. University of Massachusetts, *Professor Emerita of Molecular Biology and Biochemistry*
- Stephan Hammel, Ph.D. University of Pennsylvania, *Assistant Professor of Music*
- Jay J. Han, M.D. University of California, San Francisco, *Professor of Physical Medicine and Rehabilitation*
- Min Han, M.D. Xi'an Jiaotong University, *Health Sciences Assistant Clinical Professor of Pathology and Laboratory Medicine*
- Sora Han, Ph.D. University of California, Santa Cruz, *Director of the Graduate Program in Culture and Theory and Associate Professor of Criminology, Law and Society; African American Studies; Culture and Theory; School of Law* (law and popular culture, critical race theory, philosophies of punishment, feminism and psychoanalysis)
- Stephen Hanessian, Ph.D. Ohio State University, *Professor of Pharmaceutical Sciences; Chemistry* (organic chemistry, medicinal chemistry)
- John Wesley Hann, M.D. University of California, Los Angeles, *Health Sciences Assistant Clinical Professor of Family Medicine*

Janice L. Hansen, Ph.D. University of California, Irvine, *Lecturer of Education*

Cynthia Haq, M.D. Indiana University, *Gerald B. Sinykin, M.D., Chair in Family Medicine and Department Chair and Professor of Family Medicine*

Matthew Harding, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Economics; Statistics*

Heidi Hardt, Ph.D. Graduate Institute of International and Development Studies, *Assistant Professor of Political Science* (international security, international organizations, NATO, European Union, African Union, crisis management, organizational learning)

Scott Hardy, M.D., M.P.H. Saint Louis University School of Medicine, *Clinical Professor of Environmental Health Sciences; Program in Public Health*

Matthew Hare, D.M.A. University of Iowa, *Lecturer of Music*

Tabetha Ridgeway Harken, M.D. University of Colorado Boulder, *Health Sciences Associate Clinical Professor of Obstetrics and Gynecology*

Jason Harnell, *Lecturer of Music*

Martin Harries, Ph.D. Yale University, *Professor of English* (20th century theater, critical theory)

Anna L. Harris, M.D. Loma Linda University, *Health Sciences Clinical Professor of Anesthesiology and Perioperative Care*

Ian G. Harris, Ph.D. University of California, San Diego, *Professor of Computer Science; Electrical Engineering and Computer Science* (hardware/software covalidation, manufacturing test)

Gail K. Hart, Ph.D. University of Virginia, *Professor Emerita of German* (18th- and early-19th-century German drama and fiction, Schiller, history of punishment)

Patricia L. Hartz, Ph.D. University of California, Irvine, *Non-Senate Academic Emerita of Humanities*

George C. Harvey, M.F.A. University of California, Irvine, *Professor Emeritus of Drama* (artistic direction, producing, lighting design)

Sandra Harvey, Ph.D. University of California, Santa Cruz, *Assistant Professor of African American Studies; Culture and Theory* (black diasporas, sovereignty, indigeneity, visual art and culture, Enlightenment philosophy, feminist and queer theories)

Richard L. Hasen, J.D. University of California, Los Angeles, *UCI Chancellor's Professor of School of Law; Political Science*

Anton N. Hasso, Ph.D. Loma Linda University, *Professor of Radiological Sciences*

Kristen L. Hatch, Ph.D. University of California, Los Angeles, *Associate Professor of Film and Media Studies; Visual Studies* (classical Hollywood, stardom, melodrama, histories of gender, race and sexuality, girlhood studies)

Tamera J. Hatfield, M.D. Ph.D. University of California, Irvine; University of North Carolina, *Health Sciences Associate Clinical Professor of Obstetrics and Gynecology*

Jered Haun, Ph.D. University of Pennsylvania, *Associate Professor of Biomedical Engineering; Chemical and Biomolecular Engineering; Materials Science and Engineering* (nanotechnology, molecular engineering, computational simulations, targeted drug delivery, clinical cancer detection)

Bradford A. Hawkins, Ph.D. University of California, Riverside, *Professor Emeritus of Ecology and Evolutionary Biology*

Heather T. Hawthorne, M.D. University of Arkansas at Little Rock, *Health Sciences Clinical Professor of Pediatrics*

Erika Hayasaki, B.A. University of Illinois at Urbana-Champaign, *Associate Professor of English* (literary journalism in the digital age, narrative nonfiction, immersion journalism, youth, culture, crime, poverty, health, science, education, urban affairs, death)

Gillian Hayes, Ph.D. Georgia Institute of Technology, *Robert A. and Barbara L. Kleist Professor of Informatics; Education* (interactive and collaborative technology, human-computer interaction, computer-supported cooperative work, educational technology, ubiquitous computing)

Wayne B. Hayes, Ph.D. University of Toronto, *Associate Professor of Computer Science* (biomedical informatics and computational biology, computer vision, scientific and numerical computing)

Douglas M. Haynes, Ph.D. University of California, Berkeley, *Vice Chancellor for Equity, Diversity, and Inclusion and Professor of History; African American Studies* (social and cultural history of modern Britain, social history of modern medicine)

Elizabeth Head, Ph.D. University of Toronto, *Vice Chair for Research and Professor of Pathology and Laboratory Medicine*

Glenn E. Healey, Ph.D. Stanford University, *Professor of Electrical Engineering and Computer Science* (machine learning, data science, sabermetrics, physical modeling, computer vision, image processing)

Patrick L. Healey, Ph.D. University of California, Berkeley, *Professor Emeritus of Developmental and Cell Biology* (plant cellular differentiation and morphogenesis, ultrastructure and histochemistry of secretory systems, early reproductive development)

Gary Heaton-Smith, D.M.A. University of California, Los Angeles, *Lecturer of Music*

Jutta Heckhausen, Ph.D. University of Strathclyde, *Professor of Psychological Science; Education* (life-span developmental psychology, motivation, individual agency and social context)

William W. Heidbrink, Ph.D. Princeton University, *Professor of Physics and Astronomy*

Jeremy Heis, Ph.D. University of Pittsburgh, *Associate Professor of Logic and Philosophy of Science; Philosophy*

Rebeca Louise Helfer, Ph.D. Columbia University, *Associate Professor of English; European Languages and Studies* (Renaissance literature and culture, memory, Spenser)

Bhumi Dave Heliker, M.D. University of Pittsburgh, *Health Sciences Assistant Clinical Professor of Obstetrics and Gynecology*

Jeffrey S. Helmreich, Ph.D. University of California, Los Angeles, *Assistant Professor of Philosophy; School of Law*

Mohammad A. Helmy, M.D. University of California, Irvine, *Associate Dean of Academic Affairs - Clinical and Health Sciences Clinical Professor of Radiological Sciences*

John C. Hemminger, Ph.D. Harvard University, *UCI Distinguished Professor of Chemistry* (analytical, atmospheric and environmental, physical chemistry and chemical physics, polymer, materials, nanoscience)

Carrie Hempel, J.D. Yale University, *Associate Dean for Clinical Education and Service Learning and Clinical Professor of School of Law*

Andrea K. Henderson, Ph.D. University of Pennsylvania, *Professor of English* (19th century literature, literature and visual arts, literature and science)

James D. Herbert, Ph.D. Yale University, *Professor of Art History; Visual Studies* (modern European art)

June Herman, M.D. University of North Dakota, *Health Sciences Clinical Professor of Radiological Sciences*

L. R. Herman, B.S. University of California, Irvine, *Academic Coordinator of Biological Sciences*

Aleah Hernandez, Ph.D. University of California, Irvine, *Assistant Professor of Teaching of Classics* (Greek epic and tragedy, classical reception, gender studies in Classics)

Ivette N. Hernandez-Torres, Ph.D. Brown University, *Associate Professor of Spanish and Portuguese* (Colonial Latin America, Latin America and Caribbean literatures and cultures)

Amalia C. Herrmann, M.A. Cornell University, *Lecturer of Humanities*

Klemens J. Hertel, Ph.D. University of Colorado Boulder, *Associate Dean of Graduate and Postdoctoral Studies and Vice Chair and Professor of Microbiology and Molecular Genetics*

Payam Heydari, Ph.D. University of Southern California, *Professor of Electrical Engineering and Computer Science* (design and analysis of analog, radio-frequency, millimeter-wave and terahertz integrated circuits)

Alan F. Heyduk, Ph.D. Massachusetts Institute of Technology, *Department Vice Chair and Professor of Chemistry* (inorganic and organometallic)

Hamid Hezari, Ph.D. Johns Hopkins University, *Associate Professor of Mathematics* (analysis and partial differential equations)

Gregory S. Hickok, Ph.D. Brandeis University, *Professor of Cognitive Sciences; Language Science* (neuroanatomy of language, neural plasticity, neuroimaging, cognitive neuroscience)

James W. Hicks, Ph.D. University of New Mexico, *Department Chair and Professor of Ecology and Evolutionary Biology*

Elsie R. Hidalgo, M.D. University of California, Los Angeles, *Health Sciences Clinical Professor of Pediatrics*

Andrew Highsmith, Ph.D. University of Michigan, *Associate Professor of History* (United States history since 1865; cities and suburbs in American life; public policy history; political history; social inequality; land-use policy)

Lucas Hilderbrand, Ph.D. New York University, *Professor of Film and Media Studies; Visual Studies* (Queer cultures and media, cultural studies, documentary, pornography, popular music, video art, histories of technology)

Donald D. Hill, M.F.A. University of Southern California, *Department Chair and Co-Head of Stage Management, Associate Producer and Professor of Teaching of Drama* (stage management, directing, acting)

Lamar M. Hill, Ph.D. University of London, *Professor Emeritus of History*

Marcelo Hinojosa, M.D. University of California, Irvine, *Health Sciences Associate Clinical Professor of Surgery*

John R. Hipp, Ph.D. University of North Carolina at Chapel Hill, *Professor of Criminology, Law and Society; Sociology; Urban Planning and Public Policy* (community context of crime, household decisions and neighborhood change, research methods)

Ann Hironaka, Ph.D. Stanford University, *Professor of Sociology; Asian American Studies* (political sociology, war and peace, environmental sociology, ethnic and racial conflict)

Jan Hirsch, Ph.D. University of South Carolina, *Director and Founding Dean and Professor of Clinical Pharmacy Practice*

Dan S. Hirschberg, Ph.D. Princeton University, *Professor of Computer Science* (analyses of algorithms, concrete complexity, data structures, models of computation)

David Hirshleifer, Ph.D. University of Chicago, *Paul Merage Chair in Business Growth and Distinguished Professor of Paul Merage School of Business; Economics*

Siew Hong Teoh Hirshleifer, Ph.D. University of Chicago, *Professor of Paul Merage School of Business*

Jeffrey H. Ho, D.O. Touro U College of Osteopathic Medicine, *Health Sciences Assistant Clinical Professor of Pediatrics*

Joanna Ho, Ph.D. University of Texas at Austin, *Professor of Paul Merage School of Business*

Wilson Ho, Ph.D. University of Pennsylvania, *Donald Bren Professor and Professor of Physics and Astronomy; Chemistry*

Allon Hochbaum, Ph.D. University of California, Berkeley, *Associate Professor of Materials Science and Engineering; Chemical and Biomolecular Engineering; Chemistry* (nanoscale materials and hybrid bio-inorganic devices for applications in clean energy)

Alan R. Hoffer, Ph.D. University of Michigan, *Professor Emeritus of Education*

Paul L. Hoffman, J.D. New York University, *Adjunct Professor of School of Law*

Franz J. Hoffmann, Ph.D. University of Hohenheim, *Professor of Teaching Emeritus of Developmental and Cell Biology* (regeneration of cultured plant cells, somatic cell genetics)

Jessica M. Hoffmann, M.D. Creighton University, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Christine L. Hollister, M.D. Dartmouth College, *Health Sciences Clinical Professor of Anesthesiology and Perioperative Care*

John W. Hollowell, Ph.D. University of Michigan, *Professor of Teaching Emeritus of English*

E. Alison Holman, Ph.D. University of California, Irvine, *Associate Professor of Nursing*

Todd C. Holmes, Ph.D. Massachusetts Institute of Technology, *Department Vice Chair and Professor of Physiology and Biophysics*

Amanda J. Holton, Ph.D. University of California, Irvine, *Associate Professor of Teaching of Chemistry* (chemistry, chemical education)

Alice J. Hon, M.D. New Jersey Medical School, *Health Sciences Assistant Clinical Professor of Physical Medicine and Rehabilitation*

Juan Hong, Ph.D. Purdue University, *Professor Emeritus of Chemical and Biomolecular Engineering*

Michael K. Hooker, M.F.A. California Institute of the Arts, *Head of Design and Professor of Drama* (sound design)

Wirachin Hoonpongmanont, M.D. Mahidol University, *Assistant Professor of Emergency Medicine*

Suellen Hopfer, Ph.D. Pennsylvania State University, *Assistant Professor of Program in Public Health; Asian American Studies*

Herbert J. Hopster, Ph.D. Aachen University, *Professor Emeritus of Physics and Astronomy*

Naoto Hoshi, Ph.D. Kanazawa University, *Associate Professor of Pharmaceutical Sciences; Physiology and Biophysics*

Roosbeh Houshyar, M.D. Ross University, *Health Sciences Associate Clinical Professor of Radiological Sciences; Urology*

Douglas Houston, Ph.D. University of California, Los Angeles, *Associate Professor of Urban Planning and Public Policy*

Kristine Houston, M.S. National University, *Lecturer of Education*

Michael A. Hoyt, Ph.D. Arizona State University, *Associate Professor of Program in Public Health; Epidemiology; Psychological Science*

Jeffrey J. Hruby, M.A. California State University, Fullerton, *Lecturer of Education*

Ruohmei Hsieh, M.A. State University of New York at Stony Brook, *Academic Coordinator and Lecturer of Chinese*

Frank P.K. Hsu, M.D. University of Maryland, College Park, *Department Chair and Department Chair of Physical Medicine and Rehabilitation and Professor of Neurological Surgery; Biomedical Engineering; Otolaryngology*

Kuo-Lin Hsu, Ph.D. University of Arizona, *Professor of Civil and Environmental Engineering* (remote sensing of precipitation, hydrologic systems modeling, stochastic hydrology, water resources systems planning)

Yilin Hu, Ph.D. Loma Linda University, *Assistant Professor of Molecular Biology and Biochemistry*

Hu Ying, Ph.D. Princeton University, *Department Chair and Professor of Chinese; Comparative Literature* (narrative literature, translation theory, feminist theory)

Chong Huang, Ph.D. University of Pennsylvania, *Assistant Professor of Paul Merage School of Business*

Lan Huang, Ph.D. University of Florida, *Professor of Physiology and Biophysics; Biological Chemistry; Biomedical Engineering; Pharmaceutical Sciences*

Martin W. Huang, Ph.D. Washington University, St. Louis, *Professor of Chinese* (late imperial Chinese literature, culture, gender)

Kenneth B. Huber, Ph.D. University of California, Irvine, *Lecturer of Mathematics*

Matthew L. Huffman, Ph.D. University of California, Santa Barbara, *Professor of Sociology* (inequality, organizations, work and employment, research methods)

Bradley S. Hughes, Ph.D. University of California, Irvine, *Associate Professor of Teaching of Ecology and Evolutionary Biology; Education*

Christopher C. Hughes, Ph.D. University of London, *Director of Edwards Lifesciences Center for Advanced Cardiovascular Technology and Professor of Molecular Biology and Biochemistry; Biomedical Engineering* (tissue engineering, growth and patterning of blood vessels)

D'Iorah Hughes, J.D. Duke University School of Law, *Adjunct Professor of School of Law*

Elliot E. Hui, Ph.D. University of California, Berkeley, *Associate Professor of Biomedical Engineering* (microscale tissue engineering, bioMEMS, cell-cell interactions, global health diagnostics)

James R. Hull, Ph.D. University of North Carolina at Chapel Hill, *Assistant Professor of Teaching of Social Sciences* (social networks and social exchange, monetization, barter, multidimensional poverty measures, migration outcomes at origin, classroom technologies and scaling, student engagement, scholarship of teaching and learning)

Anneeth Kaur Hundle, Ph.D. University of Michigan, Ann Arbor, *Dhan Kaur Sahota Presidential Chair of Sikh Studies and Assistant Professor of Anthropology; Religious Studies* (Sikh studies, African and South Asian diaspora/studies; politics of afro-asianism; citizenship, race, and decolonization; minoritization and community formation, postcolonial and transnational feminisms; gender and sexuality; critical university studies; Uganda, East Africa, global south)

Juliette L. Hunt, M.D. University of California, Davis, *Health Sciences Associate Clinical Professor of Pediatrics*

Robert F. Hunt, Ph.D. University of Kentucky, *Assistant Professor of Anatomy and Neurobiology*

George L. Hunt, Jr., Ph.D. Harvard University, *Professor Emeritus of Ecology and Evolutionary Biology*

Joseph Huszti, MM Northwestern University, *Professor Emeritus of Music*

Simon Huttegger, Ph.D. University of Salzburg, *Department Chair and Professor of Logic and Philosophy of Science*

Kevin C. Hutton, M.D. Georgetown University, *Health Sciences Associate Clinical Professor of Emergency Medicine*

Travis E. Huxman, Ph.D. University of Nevada, *Professor of Ecology and Evolutionary Biology*

Karajeane Hyde, M.A. Vanguard University, *Lecturer of Education* (mathematics education)

Michael Hyland, Ph.D. Northwestern University, *Assistant Professor of Civil and Environmental Engineering* (modeling, design, control, and analysis of smart city transportation systems with emphases on shared-use autonomous mobility services and urban transit networks)

Hyunyoung Hyun, M.A. Yonsei University, *Academic Coordinator and Lecturer of Korean*

Mustafa Ibrahim, M.S. California State University, *Lecturer of Computer Science* (software engineering)

Hirohito Ichii, Ph.D. Kobe University, *Associate Professor of Surgery*

Kei Igarashi, Ph.D. University of Tokyo, *Assistant Professor of Anatomy and Neurobiology*

David B. Igler, Ph.D. University of California, Berkeley, *Professor of History* (U.S., American West, environmental, and Pacific history)

Alexander T. Ihler, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Computer Science* (artificial intelligence and machine learning, probabilistic models, sensor networks, and distributed systems)

Constance Iloh, Ph.D. University of Southern California, *Assistant Professor of Education*

Adria Imada, Ph.D. New York University, *Associate Professor of History* (indigenous and Pacific Islands studies, race, gender and medicine, visual studies)

David Imagawa, Ph.D. Johns Hopkins University, *Suzanne Dykema Endowed Chair in Pancreatic Cancer and Professor of Surgery*

Helen Ingram, Ph.D. Columbia University, *Professor Emerita of Urban Planning and Public Policy*

Matthew Inlay, Ph.D. University of California, San Diego, *Assistant Professor of Molecular Biology and Biochemistry*

Sandra S. Irani, Ph.D. University of California, Berkeley, *Professor of Computer Science* (algorithms and complexity)

Sanaz Attaripour Isfahani, M.D. Tehran University of Medical Sciences, *Health Sciences Assistant Clinical Professor of Neurology*

Paata Ivanisvili, Ph.D. Michigan State University, *Assistant Professor of Mathematics* (analysis, probability)

Autumn S. Ivy, M.D., Ph.D. University of California, Irvine, *Assistant Professor of Pediatrics; Neurology; Physiology and Biophysics*

Oren J. Izenberg, Ph.D. Johns Hopkins University, *Associate Professor of English* (poetics, modern and contemporary poetry, 20th century literature and culture, philosophy and literature)

Faryar Jabbari, Ph.D. University of California, Los Angeles, *Associate Dean for Academic Affairs and Professor of Mechanical and Aerospace Engineering* (optimal control theory, distributed parameter systems, parameter identification)

Bryan Jackson, M.F.A. University of California, Los Angeles, *Continuing Lecturer of Art* (digital filmmaking)

Jesse C. Jackson, M.A. University of Toronto, *Director of the Minor in Digital Arts and Associate Professor of Art; Informatics* (digital art, informatics, design, architecture)

Virginia W. Jackson, Ph.D. Princeton University, *Chair in Rhetoric and Communication and Associate Professor of English; Comparative Literature* (poetics, 19th, 20th and 21st century American poetry, 19th century American literature and culture, the history of literary theory)

Stephanie A. Jacobs, M.D. University of Pittsburgh, *Health Sciences Assistant Clinical Professor of Obstetrics and Gynecology*

Mireille Jacobson, Ph.D. Harvard University, *Associate Professor of Paul Merage School of Business*

Susanne M. Jaeggi, Ph.D. University of Bern, *Associate Professor of Education; Cognitive Sciences* (working memory, executive functions, cognitive training, lifespan development aging, individual differences)

Syed A. Jafar, Ph.D. Stanford University, *Professor of Electrical Engineering and Computer Science* (wireless communication and information theory)

Mahtab F. Jafari, Pharm.D. University of California, San Francisco, *Director of the Center for Healthspan Pharmacology and Professor of Pharmaceutical Sciences; Ecology and Evolutionary Biology* (anti-aging pharmacology and preventive medicine)

Hamid Jafarkhani, Ph.D. University of Maryland, College Park, *Conexant-Broadcom Chair in the Center for Pervasive Communications and UCI Chancellor's Professor of Electrical Engineering and Computer Science* (communication theory, signal processing coding, wireless networks, medical image segmentation)

Daniel Jaffurs, M.D. University of Pittsburgh, *Health Sciences Assistant Clinical Professor of Surgery*

Ramesh Chandra Jain, Ph.D. Indian Institute of Technology Kharagpur, *Donald Bren Professor of Information & Computer Sciences and Distinguished Professor of Computer Science* (computer vision, multimedia computing, image databases, machine vision, intelligent systems)

Vivek Jain, M.D. Memorial University of Newfoundland, *Health Sciences Associate Clinical Professor of Neurology*

James G. Jakowatz, M.D. University of Kansas, *Health Sciences Clinical Professor of Surgery*

Mehrdad Jalili, M.D. University of Isfahan, *Health Sciences Professor of Pediatrics*

Aaron J. James, Ph.D. Harvard University, *Professor of Philosophy*

Anthony A. James, Ph.D. University of California, Irvine, *Distinguished Professor and Donald Bren Professor of Microbiology and Molecular Genetics; Molecular Biology and Biochemistry*

Winston A. James, Ph.D. University of London, *Professor of History* (Caribbean, African American, African diaspora)

Larry D. Jamner, Ph.D. State University of New York at Stony Brook, *Professor of Psychological Science* (health psychology, psychophysiology, pain, mHealth)

Kenneth C. Janda, Ph.D. Harvard University, *Professor Emeritus of Chemistry* (physical chemistry and chemical physics)

Stanislaw M. Jarecki, Ph.D. Massachusetts Institute of Technology, *Professor of Computer Science* (algorithms and complexity, applies and distributed cryptograph)

Susan C. Jarratt, Ph.D. University of Texas at Austin, *Professor Emerita of Comparative Literature; Education* (histories and theories of rhetoric, ancient Greek rhetoric, writing studies)

Elizabeth R. Jarvo, Ph.D. Boston College, *Professor of Chemistry* (inorganic and organometallic, organic and synthetic)

Luis A. Jauregui, Ph.D. Purdue University, *Assistant Professor of Physics and Astronomy*

R. (Jay) Jayakrishnan, Ph.D. University of Texas at Austin, *Professor of Civil and Environmental Engineering* (transportation systems analysis)

Ivan G. Jeliakov, Ph.D. Washington University, *Associate Professor of Economics; Statistics*

Maxwell Y. Jen, M.D. University of California, San Francisco, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Brian C. Jenkins, Ph.D. University of North Carolina at Chapel Hill, *Assistant Professor of Teaching of Economics*

Jade Marcus Jenkins, Ph.D. University of North Carolina at Chapel Hill, *Assistant Professor of Education*

Ulysses S. Jenkins, M.F.A. Otis Art Institute, *Professor of Art; African American Studies* (video, performance art)

Angela C. Jenks, Ph.D. University of California, Berkeley, *Associate Professor of Teaching of Anthropology* (medical anthropology, race and ethnicity, urban ethnography, United States)

Valerie Jenness, Ph.D. University of California, Santa Barbara, *Distinguished Professor of Criminology, Law and Society; Sociology* (links between deviance and social control [especially law], the politics of crime control and criminalization, social movements and social change, corrections and public policy)

Linda Cohen Jennings, Ph.D. California Institute of Technology, *Professor of School of Law; Economics*

Joseph Jonghyun Jeon, Ph.D. University of California, Berkeley, *Professor of English; Asian American Studies; Culture and Theory* (Asian-American literature, film modernism)

Amanda Jerome, M.A. California State University, Fullerton, *Lecturer of Academic English/English as a Second Language*

James V. Jester, Ph.D. University of Southern California, *Jack H. Skirball Chair in Ophthalmology Research and Professor of Ophthalmology; Biomedical Engineering*

Jonathan Jewkes, M.D. Loma Linda University, *Health Sciences Clinical Instructor of Radiological Sciences*

Priyaranjan Jha, Ph.D. Columbia University, *Professor of Economics*

C. Sunny Jiang, Ph.D. University of South Florida, *Department Chair and Professor of Civil and Environmental Engineering; Ecology and Evolutionary Biology; Environmental Health Sciences* (water pollution microbiology, environmental biotechnology, aquatic microbial ecology)

Lai Jiang, Ph.D. New York University, *Lecturer of Economics*

Luohua Jiang, Ph.D. University of California, Los Angeles, *Associate Professor of Epidemiology*

Dalie Jimenez, J.D. Harvard Law School, *Professor of School of Law*

Rongsheng Jin, Ph.D. Columbia University, *Professor of Physiology and Biophysics*

Wenlong Jin, Ph.D. University of California, Davis, *Associate Professor of Civil and Environmental Engineering* (intelligent transportation systems, traffic flow theory, transportation network analysis)

Svetlana Jitomirskaya, Ph.D. Moscow State University, *Distinguished Professor of Mathematics* (mathematical physics)

Victor C. Joe, M.D. Virginia Commonwealth University, *Health Sciences Associate Clinical Professor of Surgery*

Adriana M. Johnson, Ph.D. Duke University, *Associate Professor of Comparative Literature* (Latin American literature and film, subaltern studies, postcolonial studies, politics and culture)

Jennifer Johnson, M.D. University of Münster, *Senate Emerita of Pediatrics*

Kathleen Johnson, Ph.D. University of California, Berkeley, *Associate Professor of Earth System Science*

Michael P. Johnson, Ph.D. Stanford University, *Professor Emeritus of History*

Victoria E. Johnson, Ph.D. University of Southern California, *Professor of Film and Media Studies; African American Studies; Culture and Theory; Visual Studies* (U.S. television, history, media industry studies, critical race theory, cultural geography, sound and music in popular media, media law and policy)

Wesley O. Johnson, Ph.D. University of Minnesota, *Professor Emeritus of Statistics*

Jeffrey M. Johnston, M.A. University of Southern California, *Lecturer of Education*

Stephen N. Jolley, Ph.D. Cambridge University, *Professor Emeritus of Philosophy*

James Jones, Ph.D. Georgia Institute of Technology, *Associate Professor of Informatics* (software engineering, software testing and analysis, debugging and fault localization, static and dynamic analysis, software visualization)

Neil Jones, M.D. Oxford University, *Professor of Orthopaedic Surgery*

Rose Jones, Ph.D. University of California, Irvine, *Lecturer of Academic English/English as a Second Language*

Sara M. Jordan, M.D. University of New Mexico, *Health Sciences Clinical Instructor of Obstetrics and Gynecology*

Scott A. Jordan, Ph.D. University of California, Berkeley, *Professor of Computer Science; Electrical Engineering and Computer Science* (pricing and differentiated services in the Internet, resource allocation in wireless networks, telecommunications policy)

Philippe Jorion, Ph.D. University of Chicago, *Professor of Paul Merage School of Business; Economics*

John Joseph, Ph.D. Northwestern University, *Associate Professor of Paul Merage School of Business*

Tibor Juhasz, Ph.D. Attila József University, *Professor of Ophthalmology; Biomedical Engineering*

Sang-Woo Jun, Ph.D. Massachusetts Institute of Technology, *Assistant Professor of Computer Science* (computer systems architecture, hardware acceleration, non-volatile memory)

Kwang M. Jung, Ph.D. Chung-Ang University, *Associate Adjunct Professor of Anatomy and Neurobiology*

Nii-Kabu Kabutey, M.D. Albany Medical College, *Health Sciences Assistant Clinical Professor of Surgery*

Pavan Kadandale, Ph.D. Rutgers, The State University of New Jersey, *Assistant Professor of Teaching of Molecular Biology and Biochemistry*

Tatiana Kain, M.D. Ben Gurion School of Medicine, *Health Sciences Associate Clinical Professor of Radiological Sciences*

Zeev Kain, M.D. Ben Gurion School of Medicine, *Chancellor's Professor of Anesthesiology and Perioperative Care; Medicine*

Peter Kaiser, Ph.D. University of Innsbruck, *Department Chair and Professor of Biological Chemistry*

Kamyar Kalantar-Zadeh, M.D. University of Bonn, *Professor of Medicine; Program in Public Health*

Katalin Kalman, Ph.D. Jozsef Attila University, *Associate Project Scientist of Ophthalmology*

Marek Kaminski, Ph.D. University of Maryland, College Park, *Associate Professor of Political Science; Economics* (voting models, democratization, political consequences of electoral laws)

Daniel Kang, M.D. University of Maryland, College Park, *Health Sciences Clinical Instructor of Pediatrics*

Hosun Kang, Ph.D. Michigan State University, *Associate Professor of Education*

Laura H. Kang, Ph.D. University of California, Santa Cruz, *Professor of Gender and Sexuality Studies* (feminist epistemologies and theories, cultural studies, ethnic studies)

Grace Kao, M.D. National Taiwan University, *Health Sciences Associate Clinical Professor of Neurology*

Nathan Kaplan, Ph.D. Harvard University, *Associate Professor of Mathematics* (algebra and number theory)

Manoj Kaplinghat, Ph.D. Ohio State University, *Professor of Physics and Astronomy*

Andromache Karanika, Ph.D. Princeton University, *Department Chair and Associate Professor of Classics; European Languages and Studies; Religious Studies* (Greek epic poetry, Greek lyric, ritual, gender and performance, reception of antiquity in Byzantium)

Larisa Karkafi, Ph.D. University of California, Los Angeles, *Lecturer of Academic English/English as a Second Language*

Kalev Kask, Ph.D. University of California, Irvine, *Lecturer of Computer Science* (artificial intelligence focusing on automated reasoning, graphical models)

Zak Kassas, Ph.D. University of Texas at Austin, *Assistant Professor of Mechanical and Aerospace Engineering; Electrical Engineering and Computer Science* (cyber-physical systems (CPS), autonomous vehicles (aerial, ground, indoor, underwater), satellite-based navigation, intelligent transportation systems (ITS), cognitive and software-defined radio (SDR), sensor fusion)

Kari L. Kassir, M.D. University of California, Irvine, *Health Sciences Clinical Professor of Pediatrics*

Ketu H. Katrak, Ph.D. Bryn Mawr College, *Professor of Drama; Comparative Literature; English* (drama and performance, African drama and Ancient Sanskrit drama [from India], postcolonial literature and theory, women writers and feminist theory)

David Katz, M.D. Case Western Reserve University, *Non-Senate Academic Emeritus of Radiological Sciences*

Mitchell Katz, M.D. State University of New York Downstate Medical Center, *Health Sciences Clinical Professor of Pediatrics*

Robert J. Katzer, M.D. Temple University, *Health Sciences Associate Clinical Professor of Emergency Medicine*

Friederike Kaufel, M.A. California State University, Long Beach, *Lecturer of Academic English/English as a Second Language*

Claudia H. Kawas, M.D. University of Louisville, *Nichols Term Chair in Neuroscience and Professor of Neurology; Neurobiology and Behavior*

David G. Kay, J.D. Loyola Marymount University, *Professor Emeritus of Teaching of Informatics; Computer Science* (computer law, computer science education)

David A. Kaye, J.D. University of California, Berkeley, *Clinical Professor of School of Law*

Kirk A. Keegan, M.D. University of Maryland, College Park, *Non-Senate Academic Emeritus of Obstetrics and Gynecology*

Charlene J. Keeler, M.A. California State University, Fullerton, *Lecturer of English*

Jonathan I. Keeperman, M.F.A. University of California, Irvine, *Lecturer of English*

Tarah M. Keeperman, M.A. University of California, Irvine, *Lecturer of English*

Lynn Robin Keller, Ph.D. University of California, Los Angeles, *Professor of Paul Merage School of Business*

Pamela A. Kelley, J.D. Yale University, *Lecturer of Political Science* (civil rights law, constitutional law, gender discrimination, legal profession, leadership, ethics)

Kristen M. Kelly, M.D. University of California, Irvine, *Health Sciences Professor of Dermatology; Surgery*

Richard Kelly, M.D. Stanford University, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Maria Cristina Kenney, M.D., Ph.D. University of California, Los Angeles; University of Arizona, *Professor of Ophthalmology; Pathology and Laboratory Medicine*

Bonnie D. Kent, Ph.D. Columbia University, *Professor Emeritus of Philosophy; Religious Studies*

Kai Kessenbrock, Ph.D. Ludwig Maximilian University of Munich, *Assistant Professor of Biological Chemistry*

Joyce H. Keyak, Ph.D. University of California, San Francisco, *Professor in Residence of Radiological Sciences; Biomedical Engineering; Mechanical and Aerospace Engineering*

Alya Khan, M.D., M.S. Saba School of Medicine, *Assistant Clinical Professor of Environmental Health Sciences; Program in Public Health*

Pramod Khargonekar, Ph.D. University of Florida, *UCI Distinguished Professor of Electrical Engineering and Computer Science* (systems and control theory; learning and intelligent systems; applications to renewable energy and smart grid, neural engineering, and economics; leadership and creativity; technology and society)

Arash Kheradvar, Ph.D. California Institute of Technology, *Professor of Biomedical Engineering; Mechanical and Aerospace Engineering* (cardiac mechanics, cardiovascular devices, cardiac imaging)

Aaron Kheriaty, M.D. Georgetown University, *Health Sciences Associate Clinical Professor of Psychiatry and Human Behavior; Religious Studies*

Michelle Khine, Ph.D. University of California, Berkeley, *Professor of Biomedical Engineering; Chemical and Biomolecular Engineering; Materials Science and Engineering* (development of novel nano- and micro-fabrication technologies and systems for single cell analysis, stem cell research, in-vitro diagnostics)

Rostam Khoshsar, M.D. University of Tehran, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Shahira Khoury, M.D. Ain Shams University, *Health Sciences Associate Clinical Professor of Physical Medicine and Rehabilitation*

Solmaz S. Kia, Ph.D. University of California, Irvine, *Assistant Professor of Mechanical and Aerospace Engineering; Computer Science* (systems and control, decentralized/distributed algorithm design for multi-agent systems, cooperative robotics)

Soheila Kian, Ph.D. University of California, Los Angeles, *Lecturer of Persian*

Dennis F. Kibler, Ph.D. University of California, Irvine, *Professor Emeritus of Computer Science* (artificial intelligence and machine learning, gene regulation, biological genomes)

Nafiz M. Kiciman, M.D. Hacettepe University, *Health Sciences Professor of Pediatrics*

P. Douglas Kiester, Ph.D. University of Utah, *Health Sciences Professor of Orthopaedic Surgery*

Douglas V. Kiklowicz, M.F.A. University of California, Irvine, *Lecturer of English*

David B. Kilgore, M.D. University of Southern California, *Health Sciences Professor of Family Medicine*

Herbert P. Killackey, Ph.D. Duke University, *Professor Emeritus of Neurobiology and Behavior*

Christine M. Kim, M.D. Saint Louis University, *Health Sciences Associate Clinical Professor of Obstetrics and Gynecology*

Claire J. Kim, Ph.D. Yale University, *Professor of Asian American Studies; Political Science*

Deborah Kim, M.D. Drexel University, *Health Sciences Clinical Instructor of Ophthalmology*

Eleana Kim, Ph.D. New York University, *Associate Professor of Anthropology; Asian American Studies* (kinship, transnationalism, environment, Korea)

Jae Hong Kim, Ph.D. University of Illinois at Urbana-Champaign, *Assistant Professor of Urban Planning and Public Policy*

Kyung Hyun Kim, Ph.D. University of Southern California, *Professor of Korean Culture; Asian American Studies; Film and Media Studies; Visual Studies* (East Asian cinema, modern Korea, critical theory)

Michael J. Kim, M.D. Northwestern University, *Health Sciences Clinical Professor of Radiological Sciences*

Moon H. Kim, M.D. Yonsei University, *Non-Senate Academic Emeritus of Obstetrics and Gynecology*

Saewung Kim, Ph.D. Georgia Institute of Technology, *Associate Professor of Earth System Science*

Sharon Kim, M.D. Drexel University, *Health Sciences Clinical Professor of Pediatrics*

Sung Eun (Summer) Kim, J.D. Harvard University, *Assistant Professor of School of Law*

Young Hee Kim, Ph.D. University of California, Irvine, *Lecturer of Humanities*

Young-Suk Kim, Ed.D. Harvard University, *Professor of Education; Asian American Studies*

Virginia E. Kimonis, M.D. University of Southampton, *Professor of Pediatrics; Environmental Health Sciences; Genetic Counseling; Pathology and Laboratory Medicine*

Mari Kimura, D.M.A. Juilliard School, *Professor of Music*

Christine King, Ph.D. University of California, Irvine, *Assistant Professor of Teaching of Biomedical Engineering* (engineering and STEM education, active learning, wireless health systems, rehabilitation, brain-computer interfaces, robotics)

Susan M. King, Ph.D. Massachusetts Institute of Technology, *Professor of Teaching of Chemistry* (organic chemistry, chemical education)

Anne A. Kirkby, Ph.D. California Institute of Technology, *Lecturer of Physics and Astronomy*

David P. Kirkby, Ph.D. California Institute of Technology, *Professor of Physics and Astronomy*

Ivan I. Kirov, M.D. Medical Academy, *Health Sciences Clinical Professor of Pediatrics*

Philip D. Kiser, Pharm.D. Ph.D. Case Western Reserve University, *Assistant Professor of Physiology and Biophysics; Ophthalmology*

Masashi Kitazawa, Ph.D. Iowa State University, *Associate Professor of Medicine; Environmental Health Sciences*

Henry John Klassen, M.D. University of Pittsburgh, *Associate Professor in Residence of Ophthalmology*

Raymond O. Klefstad, Ph.D. University of California, Irvine, *Associate Professor of Teaching of Computer Science* (embedded systems, networks and distributed systems, programming languages and systems)

Abel Klein, Ph.D. Massachusetts Institute of Technology, *Distinguished Professor of Mathematics* (mathematical physics)

Christopher M. Klein, J.D. University of Chicago, *Lecturer of School of Law*

Laura Klein, Ph.D. University of California, Irvine, *Lecturer of French*

Susan B. Klein, Ph.D. Cornell University, *Professor of Japanese; Religious Studies* (premodern and modern theater and dance, Japanese religions, feminist critical theory)

Stuart A. Kleinfelder, Ph.D. Stanford University, *Professor of Electrical Engineering and Computer Science* (circuits and systems for visual imaging, X-rays, electron microscopy, particle physics, and other applications)

Michael T. Kleinman, Ph.D. New York University, *Adjunct Professor of Environmental Health Sciences; Program in Public Health*

J. Zoe Klemfuss, Ph.D. Cornell University, *Assistant Professor of Psychological Science; Language Science* (narrative development, children's autobiographical memory, sociocontextual influences on children's narrative, memory and well-being, children's eyewitness abilities)

Ruth Klüger, Ph.D. University of California, Berkeley, *Professor Emerita of German* (Kleist, nineteenth-century literature, Stifter, Holocaust literature)

Daniel J. Knauer, Ph.D. University of Nebraska, *Professor Emeritus of Developmental and Cell Biology* (human antithrombins and related serine protease inhibitors)

Daniel Knight, Ph.D. Ohio State University, *Assistant Professor of Teaching of Chemical and Biomolecular Engineering* (engineering pedagogy)

Jason M. Knight, M.D. Eastern Virginia Medical School, *Health Sciences Clinical Professor of Pediatrics*

Alfred Kobsa, Ph.D. University of Vienna, *Professor Emeritus of Informatics; Computer Science* (user modeling, human-computer interaction, artificial intelligence, cognitive science, interdisciplinary computer science)

Scott J. Koenig, M.D. New York University, *Health Sciences Clinical Instructor of Orthopaedic Surgery*

Sreya Kolay, Ph.D. University of Rochester, *Assistant Professor of Paul Merage School of Business*

Natalia Komarova, Ph.D. University of Arizona, *UCI Chancellor's Professor of Mathematics; Ecology and Evolutionary Biology* (applied and computational mathematics, mathematical and computational biology, mathematics of complex and social phenomena)

Allen P. Kong, M.D. University of California, Irvine, *Health Sciences Assistant Clinical Professor of Surgery*

Mei Kong, Ph.D. McGill University, *Associate Professor of Molecular Biology and Biochemistry*

Sarah Koo, M.M. The Juilliard School, *Lecturer of Music*

Harold Koopowitz, Ph.D. University of California, Los Angeles, *Professor Emeritus of Ecology and Evolutionary Biology*

Sharon Koppman, Ph.D. University of Arizona, *Assistant Professor of Paul Merage School of Business; Sociology* (work and occupations, sociology of culture, creative industries)

Jeffrey Kopstein, Ph.D. University of California, Berkeley, *Professor of Political Science; Religious Studies* (comparative politics, dictatorship and democracy, ethnic politics, political violence, post-communism)

Igor Kopylov, Ph.D. University of Rochester, *Associate Professor of Economics*

Jerzy Kosmala, D.M. Indiana University, *Lecturer of Music*

Madeline Kozlowski, M.F.A. Brandeis University, *Professor Emerita of Drama* (costume design)

Kenneth Kraemer, Ph.D. University of Southern California, *Professor Emeritus of Paul Merage School of Business*

Peter O. Krapp, Ph.D. University of California, Santa Barbara, *Professor of Film and Media Studies; English; European Languages and Studies; Informatics; Music; Visual Studies* (digital culture, media history, cultural memory)

Stuart M. Krassner, SCE Johns Hopkins University, *Professor Emeritus of Developmental and Cell Biology* (developmental transitions of hemoflagellates)

Diana N. Krause, Ph.D. University of California, Los Angeles, *Adjunct Professor of Pharmaceutical Sciences*

Arthur Kreitenberg, M.D. University of California, San Diego, *Health Sciences Clinical Professor of Orthopaedic Surgery*

Jeffrey L. Krichmar, Ph.D. George Mason University, *Professor of Cognitive Sciences; Computer Science* (computational neuroscience, robotics)

Lauren D. Krill, M.D. Thomas Jefferson University, Jefferson Medical College, *Health Sciences Clinical Instructor of Obstetrics and Gynecology*

Mayil S. Krishnam, M.D. Stanley Medical College, *Professor of Radiological Sciences*

Ilya N. Krivorotov, Ph.D. University of Minnesota, *Professor of Physics and Astronomy*

Judith Kroll, Ph.D. Brandeis University, *Distinguished Professor of Language Science* (psycholinguistics, bilingualism, second language acquisition, language production, lexical processing, reading, visual cognition, gender and science)

Christopher A. Kroner, M.D. Tulane University, *Health Sciences Assistant Clinical Professor of Family Medicine*

Jason Russell Kronewetter, Ph.D. University of California, Irvine, *Lecturer of Mathematics*

Frithjof Kruggel, M.D. Ludwig Maximilian University of Munich, *Professor of Biomedical Engineering* (biomedical signal and image processing, anatomical and functional neuroimaging in humans, structure-function relationship in the human brain)

Katsiaryna Krupchyk, Ph.D. Belarusian State University, *Professor of Mathematics* (analysis and partial differential equations, inverse problems, and imaging)

Anthony James Kubiak, Ph.D. University of Wisconsin-Madison, *Professor of Drama* (American and modern drama, modern poetry, critical theory, philosophy)

Charis E. Kubrin, Ph.D. University of Washington, *Professor of Criminology, Law and Society; Sociology* (crime, neighborhood effects and social processes, race/ethnicity and violence, immigration and crime)

Kate Kuhlman, Ph.D. University of Michigan, *Assistant Professor of Psychological Science* (developmental psychopathology, psychoneuroimmunology, psychoneuroendocrinology, early life stress, and adolescent depression)

Baruch D. Kuppermann, M.D., Ph.D. University of Miami, *California Institute of Technology, Director, Gavin Herbert Eye Institute; Roger F. Steinart, M.D., Endowed Chair in Ophthalmology and Department Chair and Professor of Ophthalmology; Biomedical Engineering*

Fadi J. Kurdahi, Ph.D. University of Southern California, *Director, Center for Embedded Computer Systems and Associate Dean for Graduate and Professional Studies and Professor of Electrical Engineering and Computer Science; Computer Science* (embedded and cyber-physical systems, VLSI system design, design automation of digital systems)

John A. Kusske, M.D. University of California, San Francisco, *Professor Emeritus of Neurological Surgery*

Young Jik Kwon, Ph.D. University of Southern California, *Professor of Pharmaceutical Sciences; Biomedical Engineering; Chemical and Biomolecular Engineering; Molecular Biology and Biochemistry* (gene therapy, drug delivery, cancer-targeted therapeutics, artificially-induced cellular vesicles, multi-modal therapies)

Frank M. LaFerla, Ph.D. University of Minnesota, *Dean of the School of Biological Sciences and Professor of Neurobiology and Behavior; Neurology*

John C. LaRue, Ph.D. University of California, San Diego, *Professor Emeritus of Mechanical and Aerospace Engineering* (fluid mechanics, heat transfer, turbulence)

Antoinette Lafarge, M.F.A. School of Visual Arts, *Professor of Art* (digital media)

Shadi Lahham, M.D. University of California, Irvine, *Assistant Professor of Emergency Medicine*

Anne Lai, J.D. New York University, *Assistant Clinical Professor of School of Law*

Kimberly Lakes, Ph.D. University of Wisconsin-Madison, *Associate Professor in Residence of Pediatrics; Education*

Jonathan Lakey, Ph.D. University of Alberta, *Professor of Surgery; Biomedical Engineering*

Cynthia Lakon, Ph.D. University of North Carolina at Chapel Hill, *Associate Professor of Program in Public Health*

Chandana Lall, M.D. University College of Medical Sciences, *Health Sciences Professor of Radiological Sciences*

Joleah B. Lamb, Ph.D. James Cook University, *Assistant Professor of Ecology and Evolutionary Biology*

Charles E. Lambert, Ph.D. University of California, Irvine, *Assistant Adjunct Professor of Environmental Health Sciences*

Joseph F. Lambert, Ph.D. Michigan State University, *Professor Emeritus of Philosophy*

Arthur D. Lander, Ph.D. University of California, San Francisco, *Donald Bren Professor and Professor of Developmental and Cell Biology; Biomedical Engineering; Logic and Philosophy of Science* (systems biology of development, pattern formation, growth control)

Felicia L. Lane, M.D. Georgetown University, *Health Sciences Associate Clinical Professor of Obstetrics and Gynecology*

Karen T. Lane, M.D. University of California, Los Angeles, *Health Sciences Associate Clinical Professor of Surgery*

Lance-David Bennett Langdon, Ph.D. University of California, Irvine, *Visiting Assistant Professor of Humanities*

Mark I. Langdorf, M.D. University of California, San Diego, *Professor of Emergency Medicine*

Andrew J. Lankford, Ph.D. Yale University, *Professor of Physics and Astronomy*

Joel Lanning, Ph.D. University of California, San Diego, *Assistant Professor of Teaching of Civil and Environmental Engineering* (seismic design of civil structures, large-scale testing, alternative building materials, teaching methods in engineering education)

Jenel Lao, Ed.D. University of California, Irvine and Los Angeles, *Lecturer of Education*

Kathryn M. Larsen, M.D. University of Washington, *Health Sciences Professor of Family Medicine*

Richard H. Lathrop, Ph.D. Massachusetts Institute of Technology, *Professor of Computer Science* (modeling structure and function, machine learning, intelligent systems and molecular biology, protein structure/function prediction)

P. Michelle Latiolais, M.F.A. University of California, Irvine, *Professor of English* (creative writing, fiction, contemporary literature)

Loraine Lau, Ph.D. University of California, Los Angeles, *Associate Professor of Paul Merage School of Business*

Matthew Law, Ph.D. University of California, Berkeley, *Associate Professor of Chemistry; Chemical and Biomolecular Engineering; Materials Science and Engineering* (inorganic and organometallic, physical chemistry and chemical physics, polymer, materials, nanoscience)

Jon M. Lawrence, Ph.D. University of Rochester, *Professor Emeritus of Physics and Astronomy*

Karen R. Lawrence, Ph.D. Columbia University, *Professor Emerita of English*

Devon A. Lawson, Ph.D. University of California, Los Angeles, *Assistant Professor of Physiology and Biophysics*

Rodrigo Lazo, Ph.D. University of Maryland, College Park, *Associate Professor of English; Culture and Theory* (hemispheric American studies, nineteenth century, Latino studies and the Americas, Cuba, immigrant literature)

Khanh-Van T. Le-Bucklin, M.D. University of California, San Francisco, *Associate Vice Chancellor for Education and Vice Dean for Medical Education and Health Sciences Clinical Professor of Pediatrics*

Mark A. LeVine, Ph.D. New York University, *Professor of History; Religious Studies* (modern Middle Eastern history, Islamic studies, histories of empire and globalization)

Alana Lebron, Ph.D. University of Michigan, *Assistant Professor of Program in Public Health; Chicano/Latino Studies*

Abraham P. Lee, Ph.D. University of California, Berkeley, *Professor of Biomedical Engineering; Mechanical and Aerospace Engineering* (integrated point-of-care diagnostics, engineered 'theranostic' vesicles and particles, active cell sorting microdevices, microphysiological microsystems, and high throughput droplet bioassays)

Chin C. Lee, Ph.D. Carnegie Mellon University, *Director of Materials and Manufacturing Technology and Professor of Electrical Engineering and Computer Science* (electronic packaging, bonding technology, metallurgy, thermal design, semiconductor devices, electromagnetic theory, acoustics and optoelectronics)

Eva Y. Lee, Ph.D. University of California, Berkeley, *UCI Chancellor's Professor Emerita of Biological Chemistry*

Gabseon Lee, M.A. University of Illinois at Urbana-Champaign, *Lecturer of Academic English/English as a Second Language*

Henry P. Lee, Ph.D. University of California, Berkeley, *Professor of Electrical Engineering and Computer Science* (photonics, fiber-optics and compound semiconductors)

Jaeho Lee, Ph.D. Stanford University, *Assistant Professor of Mechanical and Aerospace Engineering* (heat transfer, thermal management, thermoelectrics, phononics, nanomaterials)

James K. Lee, Ph.D. University of California, Los Angeles, *Associate Professor of Asian American Studies; Culture and Theory; English; Religious Studies* (Asian American literature and culture, contemporary U.S. literature, race and ethnic studies, urban studies, religious studies)

Jerry Won Lee, Ph.D. University of Arizona, *Associate Professor of English; Anthropology; Asian American Studies; Comparative Literature; Culture and Theory*

Julia Hyoun Joo Lee, Ph.D. University of California, Los Angeles, *Department Chair and Associate Professor of Asian American Studies; Culture and Theory; English* (Asian American literature and culture, African American literature and culture, ethnic literature, twentieth-century American literature.)

Jung-Ah Lee, Ph.D. University of Washington, *Associate Professor of Nursing*

Meredith A. Lee, Ph.D. Yale University, *Professor Emerita of German* (lyric poetry, eighteenth-century literature, Goethe, music and literature)

Michael D. Lee, Ph.D. University of Adelaide, *Professor of Cognitive Sciences* (computational models and bayesian methods in decision making, representation, categorization, individual differences, and the wisdom of the crowd)

Nancy Lee, M.D. Temple University, *Health Sciences Clinical Instructor of Ophthalmology*

Sei Young Lee, M.A. University of Arizona, *Lecturer of Academic English/English as a Second Language*

Stephen Lee, J.D. University of California, Berkeley, *Professor of School of Law; Asian American Studies*

Thay Q. Lee, Ph.D. Gothenburg School of Business, Economics and Law, *Professor in Residence of Orthopaedic Surgery; Physical Medicine and Rehabilitation*

Wen-Hwa Lee, Ph.D. University of California, Berkeley, *Professor Emeritus of Biological Chemistry*

Ying-Ying Lee, Ph.D. University of Wisconsin-Madison, *Assistant Professor of Economics*

Horacio Legras, Ph.D. Duke University, *Professor of Spanish and Portuguese; Comparative Literature; Culture and Theory; European Languages and Studies* (Latin American literature and culture, Latin American film, visual arts in Latin America, psychoanalysis, and photography)

Rachel Lehman, Ph.D. University of California, Irvine, *Lecturer of Mathematics* (mathematics education and probability)

Matthias Lehmann, Ph.D. Freie Universität Berlin, *Director of the Interdisciplinary Minor in Jewish Studies and Teller Family Chair in Jewish History and Professor of History; Religious Studies* (early modern and modern Jewish history, Sephardic studies)

Herbert H. Lehnert, Ph.D. University of Kiel, *Professor Emeritus of German* (Thomas Mann)

Daphne Pi-Wei Lei, Ph.D. Tufts University, *Head of Doctoral Studies and Professor of Drama; Asian American Studies* (Asian theatre, Asian American theatre, intercultural theatre, gender theory, performance theory)

Raul P. Lejano, Ph.D. University of California, Los Angeles, *Professor Emeritus of Urban Planning and Public Policy*

Michael E. Lekawa, M.D. Thomas Jefferson University, Jefferson Medical College, *Health Sciences Professor of Surgery*

Anne Lemnitzer, Ph.D. University of California, Los Angeles, *Associate Professor of Civil and Environmental Engineering* (geotechnical and earthquake engineering, soil structure interaction, RC design, seismic monitoring)

Karen R. Lenz, M.A. Northern Arizona University, *Lecturer of Academic English/English as a Second Language*

Michael Leon, Ph.D. University of Chicago, *Professor Emeritus of Neurobiology and Behavior*

Karen Leonard, Ph.D. University of Wisconsin, *Professor Emeritus of Anthropology; Religious Studies*

Julia C. Lerch, Ph.D. Stanford University, *Assistant Professor of Sociology* (sociology of education, global and transnational sociology, civic education, humanitarian emergencies, international organizations)

Jack I. Lerner, J.D. Harvard University, *Clinical Professor of School of Law*

Marc A. Lerner, M.D. City University of New York, Mount Sinai, *Health Sciences Clinical Professor of Pediatrics*

Rebecca L. Leshay, M.S. University of North Carolina, *Health Sciences Assistant Clinical Professor of Pediatrics; Genetic Counseling*

Christopher R. Leslie, J.D. University of California, Berkeley, *UCI Chancellor's Professor of School of Law*

Frances L. Leslie, Ph.D. University of Aberdeen, *Professor Emeritus of Pharmaceutical Sciences*

Simon Leung, B.A. University of California, Los Angeles, *Professor of Art; Asian American Studies* (new genres, critical theory, contemporary art history, performance)

Ellis Levin, M.D. Thomas Jefferson University, Jefferson Medical College, *Professor in Residence of Medicine; Biological Chemistry*

Ines Levin, Ph.D. California Institute of Technology, *Assistant Professor of Political Science* (elections, voting, statistics)

Kathie Levin, Ph.D. Bar-Ilan University, *Lecturer of Academic English/English as a Second Language*

Glenn S. Levine, Ph.D. University of Texas at Austin, *German Language Program Director and Professor of German; Education; Language Science* (applied linguistics, foreign language pedagogy, German-Jewish culture and history, Yiddish language and culture, European culinary history)

Linda J. Levine, Ph.D. University of Chicago, *Professor of Psychological Science* (bias in predicted and remembered emotion, memory and emotion, the development of children's ability to regulate emotion)

Marco Levorato, Ph.D. University of Padua, *Assistant Professor of Computer Science; Electrical Engineering and Computer Science* (artificial intelligence and machine learning, networks and distributed systems, statistics and statistical theory, stochastic modeling, signal processing)

Audrey Chen Lew, Ph.D. University of California, Los Angeles, *Assistant Professor of Teaching of Neurobiology and Behavior*

Jayne Elizabeth Lewis, Ph.D. Princeton University, *Director of Humanities Honors Program and Professor of English; European Languages and Studies; Religious Studies* (literature and medicine, restoration and 18th century British literature, literature of the supernatural and gothic fiction, history and/of fiction, atmosphere as literary concept and construct within natural philosophy)

Joseph S. Lewis, M.F.A. Maryland Institute College of Art, *Professor of Art* (public art)

Chen Li, Ph.D. Stanford University, *Professor of Computer Science* (databases and text processing, multimedia databases, data integration)

Guann-Pyng Li, Ph.D. University of California, Los Angeles, *Director of the UCI Division of the California Institute for Telecommunications and Information Technology (Calit2), Director of the Integrated Nanosystems Research Facility and Professor of Electrical Engineering and Computer Science; Biomedical Engineering* (micro/nano technology for sensors and actuators, internet of things (IoT), smart manufacturing, biomedical devices and millimeter wave wireless communication)

Han Li, Ph.D. University of California, Los Angeles, *Assistant Professor of Chemical and Biomolecular Engineering* (molecular biotechnology)

Mo Li, Ph.D. University of Michigan, *Assistant Professor of Civil and Environmental Engineering; Materials Science and Engineering* (unconventional infrastructure materials, and their interfaces with structural engineering, advanced manufacturing, spatial damage sensing, and the environment)

Peter Li, Ph.D. University of California, Berkeley, *Chancellor's Professor Emeritus of Mathematics* (geometry and topology)

Song-Ying Li, Ph.D. University of Pittsburgh, *Professor of Mathematics* (analysis and partial differential equations)

Wei Li, Ph.D. Institute of Biophysics, Chinese Academy of Sciences, *Endowed Chair and Professor of Biological Chemistry*

Zhou Li, Ph.D. Indiana University Bloomington, *Assistant Professor of Electrical Engineering and Computer Science* (data-driven security analytics, internet measurement, side-channel analysis, IoT security)

Patricia Liao, M.D. Northwestern University, *Health Sciences Clinical Professor of Pediatrics*

Lih-Huei Liaw, M.S. Northeastern University, *Project Scientist of Surgery*

Robert Liebeck, Ph.D. University of Illinois at Urbana-Champaign, *Adjunct Professor of Mechanical and Aerospace Engineering* (aerodynamics, hydrodynamics, aircraft design)

Lukas Ligeti, *Assistant Professor of Music*

Mimi Liljeholm, Ph.D. University of California, Los Angeles, *Assistant Professor of Cognitive Sciences* (neural and computational bases of learning, reasoning, and decision making)

William J. Lillyman, Ph.D. Stanford University, *Professor Emeritus of German* (Romanticism, Goethe, Tieck)

Felicidad (Bliss) Lim, Ph.D. New York University, *Professor of Film and Media Studies; Visual Studies* (Philippine cinema, temporality, postcolonial and feminist film theory, transnational horror and the fantastic, film archives)

Henry Lim, Ph.D. Northwestern University, *Professor Emeritus of Chemical and Biomolecular Engineering*

Charles L. Limoli, Ph.D. University of California, San Diego, *Professor of Radiation Oncology; Environmental Health Sciences*

Jack J. Lin, M.D. Rush University, *Associate Professor of Neurology; Biomedical Engineering*

Kwei-Jay Lin, Ph.D. University of Maryland, College Park, *Professor of Electrical Engineering and Computer Science; Computer Science* (real-time systems, distributed systems, service-oriented computing)

Shin Lin, Ph.D. University of California, Los Angeles, *Professor of Developmental and Cell Biology* (combined use of biochemistry, cell biology, molecular biology, molecular biophysics to study the structure and function of proteins involved in cytoskeletal/contractile functions and signal transduction in muscle and nonmuscle cells)

Zhihong Lin, Ph.D. Princeton University, *Professor of Physics and Astronomy*

Eric Lindsay, D.M. Indiana University, *Lecturer of Music*

Robert W. Lingua, M.D. University of Southern California, *Health Sciences Professor of Ophthalmology*

Renee Link, Ph.D. University of California, Irvine, *Associate Professor of Teaching of Chemistry* (organic chemistry, chemical education)

Mark E. Linskey, M.D. Columbia University, *Professor of Surgery*

Linda S. Lippa, M.D. Columbia University, *Health Sciences Professor of Ophthalmology*

Leah Litman, J.D. University of Michigan Law School, *Assistant Professor of School of Law*

Christophe Litwin, Ph.D. New York University, *Program Director and Assistant Professor of French; German* (early modern French literature, early modern European moral and political philosophy)

Catherine Liu, Ph.D. Yale University, *Professor of Film and Media Studies; Visual Studies* (Hou Hsiao-hsien, culture wars, Frankfurt School, historiography of critical theory/cultural studies, surveillance, cold war culture and neoliberalism)

Chang C. Liu, Ph.D. Scripps Research Institute, *Assistant Professor of Biomedical Engineering; Chemistry; Molecular Biology and Biochemistry* (genetic engineering, directed evolution, synthetic biology, chemical biology)

Feng Liu, Ph.D. Princeton University, *Professor of Mechanical and Aerospace Engineering* (computational fluid dynamics, turbomachinery, propulsion)

Fong W. Liu, M.D. University of Alabama, *Health Sciences Clinical Instructor of Obstetrics and Gynecology*

Haoping Liu, Ph.D. Cornell University, *Professor of Biological Chemistry*

Jeffrey W. Liu, M.D. Brown University, *Health Sciences Clinical Instructor of Ophthalmology*

Wendy F. Liu, Ph.D. Johns Hopkins University, *Associate Professor of Biomedical Engineering; Chemical and Biomolecular Engineering* (biomaterials, microdevices in cardiovascular engineering, cell-cell and cell-micro-environment interactions, cell functions and controls)

Feng Liu Smith, Ph.D. Iowa State University, *Assistant Professor of Epidemiology; Medicine*

Loretta Livingston, Ph.D. Texas Woman's University; Certified Laban Movement Analyst; former principal with Bella Lewitzky Dance Company, Graduate TA Advisor, Co-Advisor for B.F.A. Choreography/Senior Thesis/Honors Thesis concerts, *Professor of Dance* (choreography, Laban movement analysis, body and practice)

Erin Lockwood, Ph.D. Northwestern University, *Assistant Professor of Political Science* (financial derivatives, financial regulation, international political economy, political theory, risk and uncertainty)

Melissa Lodoen, Ph.D. University of California, San Francisco, *Associate Professor of Molecular Biology and Biochemistry*

Elizabeth F. Loftus, Ph.D. Stanford University, *UCI Distinguished Professor of Psychological Science; Cognitive Sciences; Criminology, Law and Society; School of Law* (cognitive psychology, human memory, psychology and law)

Anthony D. Long, Ph.D. McMaster University, *Professor of Ecology and Evolutionary Biology; Pharmaceutical Sciences*

Margherita Long, Ph.D. Princeton University, *Associate Professor of Japanese; Comparative Literature* (modern Japanese literature and film, environmental humanities, feminism, eco-documentary)

Kenneth J. Longmuir, Ph.D. University of Oregon, *Professor Emeritus of Physiology and Biophysics*

Mara Jane Lonner, M.F.A. California Institute of the Arts, *Associate Professor of Teaching Emerita of Art* (drawing, painting, 3D design)

Cristina V. Lopes, Ph.D. Northeastern University, *Professor of Informatics* (programming languages, acoustic communications, operating systems, software engineering)

Beth A. Lopour, Ph.D. University of California, Berkeley, *Assistant Professor of Biomedical Engineering; Mechanical and Aerospace Engineering* (computational neuroscience, signal processing, mathematical modeling, epilepsy, translational research)

Catherine B. Lord, M.F.A. State University of New York at Buffalo, *Professor Emerita of Art* (queer theory, feminism, photography)

Shahram Lotfipour, M.D. University of Iowa, *Professor of Emergency Medicine; Program in Public Health*

Shahrdad Lotfipour, Ph.D. University of California, Irvine, *Assistant Professor of Emergency Medicine; Pharmaceutical Sciences*

Ira T. Lott, M.D. Ohio State University, *Professor Emeritus of Pediatrics*

Catherine Loudon, Ph.D. Duke University, *Professor of Teaching of Ecology and Evolutionary Biology*

Annie M. Loui, *Co-Head of Acting and Professor of Drama* (movement, directing, acting)

Ben Lourie, Ph.D. University of California, Los Angeles, *Assistant Professor of Paul Merage School of Business*

John S. Lowengrub, Ph.D. Courant Institute of Mathematical Sciences, *Chancellor's Professor of Mathematics; Biomedical Engineering* (applied and computational mathematics, mathematical and computational biology)

Kim D. Lu, M.D. Tufts University, *Health Sciences Assistant Clinical Professor of Pediatrics*

Stephanie Lu, M.D. University of California, San Diego, *Health Sciences Assistant Clinical Professor of Ophthalmology*

Yunxia Lu, Ph.D. University Tongi Medical College, *Associate Professor of Program in Public Health*

Zhiqin Lu, Ph.D. Courant Institute of Mathematical Sciences, *Professor of Mathematics* (geometry and topology)

Paul Lubinsky, M.D. University of Capetown, *Health Sciences Associate Clinical Professor of Pediatrics*

Lar Lubovitch, Honorary Doctorate, Juilliard School of the Arts, *Founder and Director of New York-based Lar Lubovitch Dance Company and UCI Distinguished Professor of Dance* (choreography, repertory, technique, and special projects)

Ulrike Luderer, M.D., Ph.D. Northwestern University, *Director of the Environmental Health Sciences Graduate Program and Professor of Medicine; Developmental and Cell Biology; Environmental Health Sciences; Program in Public Health*

Jacob E. Ludwig, M.A. California State University, San Bernardino, *Lecturer of Academic English/English as a Second Language*

Jeffrey Ludwig, Ph.D. Massachusetts Institute of Technology, *Assistant Professor of Teaching of Mathematics*

George S. Lueker, Ph.D. Princeton University, *Professor Emeritus of Computer Science* (algorithms and complexity)

Angela F. Lukowski, Ph.D. University of Minnesota, *Associate Professor of Psychological Science* (contextual influences on cognitive development in infancy and early childhood)

Radhika Lunawat, Ph.D. University of Minnesota, *Assistant Professor of Paul Merage School of Business; Economics*

Ray Luo, Ph.D. University of Maryland, College Park, *Professor of Molecular Biology and Biochemistry; Biomedical Engineering; Chemical and Biomolecular Engineering; Materials Science and Engineering* (protein structure, noncovalent associations involving proteins)

Zhigang D. Luo, M.D., Ph.D. State University of New York at Buffalo, *Professor of Anesthesiology and Perioperative Care; Pharmacology*

Andrej Luptak, Ph.D. Yale University, *Professor of Pharmaceutical Sciences; Chemistry; Molecular Biology and Biochemistry* (chemical biology)

Julia R. Lupton, Ph.D. Yale University, *Associate Dean for Research and Professor of English; Comparative Literature; Education; Religious Studies* (Renaissance literature, literature and psychology)

Gyorgy Lur, Ph.D. University of Liverpool, *Assistant Professor of Neurobiology and Behavior*

Cecelia M. Lynch, Ph.D. Columbia University, *Professor of Political Science; Religious Studies* (international relations (theory, organization, law) religion and ethics, social movements and civil society actors (on peace, security, globalization, humanitarianism, and religion)

Gary S. Lynch, Ph.D. Princeton University, *Professor of Psychiatry and Human Behavior; Anatomy and Neurobiology*

Molly L. Lynch, M.F.A. University of California, Irvine; Pilates Certified; Choreographer/Artistic Director of the National Choreographers Initiative, *Department Chair and Professor of Dance* (ballet, repertory, arts management, and senior seminar)

Mona Lynch, Ph.D. University of California, Santa Cruz, *Professor of Criminology, Law and Society; School of Law* (law and society, psychology and law, punishment and society, race and criminal justice)

David C. Lyon, Ph.D. Vanderbilt University, *Department Vice Chair and Associate Professor of Anatomy and Neurobiology; Cognitive Sciences*

Juliet F. MacCannell, Ph.D. Cornell University, *Professor Emerita of English*

Grant R. MacGregor, Ph.D. University of Sussex, *Professor of Developmental and Cell Biology* (mouse reproduction, development, homeostasis)

Richard E. MacMillen, Ph.D. University of California, Los Angeles, *Professor Emeritus of Ecology and Evolutionary Biology*

Katherine Mackey, Ph.D. Stanford University, *Clare Booth Luce Assistant Professor of Earth System Science*

Salvatore R. Maddi, Ph.D. Harvard University, *Professor Emeritus of Psychological Science* (personality, psychopathology, health psychology, creativity)

Marc J. Madou, Ph.D. Ghent University, *UCI Chancellor's Professor of Mechanical and Aerospace Engineering; Biomedical Engineering; Chemical and Biomolecular Engineering* (miniaturization science (MEMS and NEMS) with emphasis on chemical and biological applications )

Gudrun Magnúsdóttir, Ph.D. Colorado State University, *Professor of Earth System Science*

Arash Mahajerin, M.S. Indiana University-Purdue University Indianapolis, *Health Sciences Clinical Professor of Pediatrics*

Viviana A. Mahieux, Ph.D. Harvard University, *Associate Professor of Spanish and Portuguese* (Latin American avant-gardes, journalism and literature, material cultures, media studies, modern and contemporary Mexico)

Stephen V. Mahler, Ph.D. University of Michigan, *Assistant Professor of Neurobiology and Behavior*

Scott Mahlke, Ph.D. University of Illinois at Urbana-Champaign, *Professor of Computer Science* (custom-fit architectures for energy efficiency and reliability, compilers and run-time systems)

Lilith Mahmud, Ph.D. Harvard University, *Associate Professor of Anthropology* (freemasonry, elites, gender, nationalism, race, citizenship, critical studies of Europe, secrecy, transparency, knowledge production, secret societies, power)

Steven J. Mailloux, Ph.D. University of Southern California, *Professor Emeritus of English; Comparative Literature* (rhetoric, critical theory, American literature, law and literature)

Monica Majoli, M.F.A. University of California, Los Angeles, *Professor of Art* (painting)

Carol A. Major, M.D. Case Western Reserve University, *Assistant Dean of Student and Inclusive Excellence and Health Sciences Professor of Obstetrics and Gynecology*

Aditi Majumder, Ph.D. University of North Carolina at Chapel Hill, *Professor of Computer Science; Electrical Engineering and Computer Science* (novel displays and cameras for computer graphics and visualization, human-computer interaction, applied computer vision)

Catherine Malabou, Ph.D. Ecole des Hautes Etudes en Sciences Sociales, *UCI Distinguished Professor of Comparative Literature; French; German* (German idealism, contemporary French philosophy, cultural theory, neurobiology, epigenetics)

David B. Malament, Ph.D. The Rockefeller University, *Professor Emeritus of Logic and Philosophy of Science*

Joan Malczewski, Ph.D. Columbia University, *Associate Professor of History* (American political development, education, progressivism, philanthropy, and American south)

Sam Malek, Ph.D. University of Southern California, *Associate Professor of Informatics* (software engineering, software architecture, software security, software analysis and testing)

Deepika Malik, MBBS BJ Medical College, Gujarat University, *Health Sciences Clinical Instructor of Ophthalmology*

Fred M. Malkin, M.D. University of Miami, *Health Sciences Associate Clinical Professor of Pediatrics*

Lynn Mally, Ph.D. University of California, Berkeley, *Professor Emerita of History*

John Manchak, Ph.D. University of California, Irvine, *Professor of Logic and Philosophy of Science; Religious Studies*

Mark A. Mandelkern, Ph.D. University of California, Berkeley, *Research Professor and Professor Emeritus of Physics and Astronomy*

Vladimir A. Mandelshtam, Ph.D. Russian Academy of Sciences, *Professor of Chemistry* (physical chemistry and chemical physics, theoretical and computational)

Stephan Mandt, Ph.D. University of Cologne, *Assistant Professor of Computer Science* (artificial intelligence and machine learning, probabilistic modeling, Bayesian deep learning, variational inference)

Alberto Manetta, M.D. University of Buenos Aires, *Professor Emeritus of Obstetrics and Gynecology*

Stephen Mang, Ph.D. University of California, Irvine, *Assistant Professor of Teaching of Chemistry* (chemical education, advanced laboratories)

Raheela Maniar, M.A. University of California, Los Angeles, *Lecturer of Arabic*

Mihai Maniutiu, Ph.D. Caragiale Academy of Theatrical Arts and Cinematography, *UCI Distinguished Professor of Drama* (directing)

Virginia Mann, Ph.D. Massachusetts Institute of Technology, *Professor of Language Science; Education* (reading ability: phenome awareness, developmental dyslexia, phonological skills, early intervention, precocious readers; speech perception: context effects, cross-linguistic comparisons)

Jerry E. Manning, Ph.D. University of Utah, *Professor Emeritus of Molecular Biology and Biochemistry*

William W. Mantulin, Ph.D. Northeastern University, *Adjunct Professor of Surgery*

Alexei A. Maradudin, Ph.D. University of Bristol, *Professor Emeritus of Physics and Astronomy*

Francesco Marangoni, Ph.D. Vita-Salute San Raffaele University, *Assistant Professor of Physiology and Biophysics*

Nicholas J. Marantz, Ph.D. Massachusetts Institute of Technology, *Assistant Professor of Urban Planning and Public Policy; School of Law*

George E. Marcus, Ph.D. Harvard University, *Distinguished Professor of Anthropology* (elites, ethnography, cultural critique, Pacific)

Newton Margulies, Ph.D. University of California, Los Angeles, *Professor Emeritus of Paul Merage School of Business*

Raffaele Mari, M.A. San Diego State University, *Lecturer of Economics*

Omri Marian, J.D., LL.M. University of Michigan Law School, *Assistant Professor of School of Law*

Gloria J. Mark, Ph.D. Columbia University, *Professor of Informatics* (computer-supported cooperative work, human-computer interaction)

Athina Markopoulou, Ph.D. Stanford University, *Nicolaos G. and Sue Curtis Alexopoulos Presidential Chair in Electrical Engineering and Computer Science and Department Chair and Professor of Electrical Engineering and Computer Science; Computer Science* (networking: including network protocols, network measurement and analysis, mobile systems and mobile data analysis, network security and privacy)

J. Lawrence Marsh, Ph.D. University of Washington, *Professor Emeritus of Developmental and Cell Biology* (mechanisms of neurodegeneration and molecular genetics of development)

John F. Marshall, Ph.D. University of Pennsylvania, *Professor Emeritus of Neurobiology and Behavior*

Craig C. Martens, Ph.D. Cornell University, *Professor of Chemistry* (physical chemistry and chemical physics, polymer, materials, nanoscience, theoretical and computational)

Donald C. Martin, M.D. University of British Columbia, *Professor Emeritus of Surgery*

Elizabeth Martin, Ph.D., University of Missouri, *Assistant Professor of Psychological Science* (adult psychopathology, schizotypy and schizophrenia, social anhedonia, emotional and social dysfunction)

Rachel Martin, Ph.D. Yale University, *Department Vice Chair and Professor of Chemistry; Molecular Biology and Biochemistry* (analytical, chemical biology, physical chemistry and chemical physics)

Theodore Martin, Ph.D. University of California, Berkeley, *Associate Professor of English; Culture and Theory* (Contemporary literature, genre fiction, literary history, crime, and the novel)

Daniel J. Martinez, B.F.A. California Institute of the Arts, *Claire Trevor Professor and Professor of Art* (public art, sculpture, installation, performance)

Adam Martiny, Ph.D. Technical University of Denmark, *Professor of Earth System Science; Ecology and Evolutionary Biology*

Jennifer Martiny, Ph.D. Stanford University, *UCI Chancellors' Fellow and Professor of Ecology and Evolutionary Biology*

G. Robert Mason, M.D. University of Chicago, *Professor Emeritus of Surgery*

Selma Masri, Ph.D. Beckman Research Institute of the City of Hope, *Assistant Professor of Biological Chemistry*

Lyle Massey, Ph.D. University of California, Los Angeles, *Associate Professor of Art History; Visual Studies* (Italian Renaissance and early modern European art, gender theory, science studies)

Richard Matthew, Ph.D. Princeton University, *Professor of Urban Planning and Public Policy; Political Science*

Joshua Mauney, Ph.D. Tufts University, *Jerry D. Choate Presidential Chair in Urology Tissue and Engineering and Associate Professor of Urology; Biomedical Engineering*

William M. Maurer, Ph.D. Stanford University, *Dean of the School of Social Sciences and Professor of Anthropology; Criminology, Law and Society; School of Law* (anthropology of law, globalization, Caribbean, anthropology of money and finance, gender and kinship)

Debra K. Mauzy-Melitz, Ph.D. Marquette University, *Assistant Professor of Teaching of Developmental and Cell Biology* (role of writing in scientific teaching)

Cheryl Lee Maxson, Ph.D. University of Southern California, *Professor Emerita of Criminology, Law and Society* (crime and delinquency, youth violence, street gangs, juvenile justice system and policing)

Melissa Mazmanian, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Informatics* (computer-mediated communication, organization studies, information and communication technologies in practice, social response to emerging technologies, work/non-work negotiations in the information age)

Sanjoy Mazumdar, Ph.D. Massachusetts Institute of Technology, *Professor of Urban Planning and Public Policy; Religious Studies*

Shampa Mazumdar, Ph.D. Northeastern University, *Lecturer of Sociology; Religious Studies* (religion, immigration, Asian American, urban sociology)

Sarah McBane, Pharm.D. University of North Carolina at Chapel Hill, *Health Sciences Clinical Professor of Clinical Pharmacy Practice*

Michael T. McBride, Ph.D. Yale University, *Professor of Economics; Logic and Philosophy of Science; Religious Studies*

J. Michael McCarthy, Ph.D. Stanford University, *Director of the Performance Engineering Program and Professor of Mechanical and Aerospace Engineering* (design of mechanical systems, computer aided design, kinematic theory of spatial motion)

Katherine T. McCartney, M.D. Stritch School of Medicine, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Philip McCarty, Ph.D. University of California, Santa Barbara, *Associate Professor of Teaching of Global and International Studies*

Annie McClanahan, Ph.D. University of California, Berkeley, *Associate Professor of English; Culture and Theory* (U.S. culture, the novel, political and economic theory)

Richard D. McCleary, Ph.D. Northwestern University, *Professor of Criminology, Law and Society; Urban Planning and Public Policy* (criminal justice, research methodology, statistics)

Michael McClelland, Ph.D. University of Georgia, *Professor of Microbiology and Molecular Genetics*

Gregory J. McClure, M.F.A. University of California, Irvine, *Lecturer of English*

Christopher E. McCoy, M.D. University of California, San Francisco, *Health Sciences Associate Clinical Professor of Emergency Medicine*

Jack R. McCullough, Ph.D. United States International University, *Associate Professor of Teaching Emeritus of Education*

Vincent G. McDonell, Ph.D. University of California, Irvine, *Adjunct Professor of Mechanical and Aerospace Engineering* (combustion, alternative fuels, gas turbines, sprays, diagnostics, combined heat and power, emissions, autoignition/flashback)

James L. McGaugh, Ph.D. University of California, Berkeley, *Research Professor and Professor Emeritus of Neurobiology and Behavior; Logic and Philosophy of Science*

Martin C. McGuire, Ph.D. Harvard University, *UCI Endowed Chair and Professor Emeritus of Economics*

Matthew J. McHenry, Ph.D. University of California, Berkeley, *Professor of Ecology and Evolutionary Biology*

Lowell B. McKay, M.F.A. University of California, Irvine, *Lecturer of English*

Joseph H. McKenna, Ph.D. Fordham University, *Lecturer of History; Religious Studies* (history of religious ideas)

Kevin McKeown, M.A. University of California, Los Angeles, *Lecturer of Music*

Nancy Ann McLoughlin, Ph.D. University of California, Santa Barbara, *Associate Professor of History; European Languages and Studies; Religious Studies* (late Medieval Europe, intellectual history, gender)

James L. McMichael, Ph.D. Stanford University, *Professor Emeritus of English*

Michael G. McNally, Ph.D. University of California, Irvine, *Professor of Civil and Environmental Engineering; Urban Planning and Public Policy* (travel behavior, transportation systems analysis)

Bruce L. McNaughton, Ph.D. Carleton University, *UCI Distinguished Professor of Neurobiology and Behavior*

Alexander McPherson, Ph.D. Purdue University, *Professor Emeritus of Molecular Biology and Biochemistry*

Mary McThomas, Ph.D. University of California, Los Angeles, *Associate Professor of Political Science* (immigration, theories of citizenship, feminist political theory, gender and politics)

Roger D. McWilliams, Ph.D. Princeton University, *Associate Dean of the School of Physical Sciences and Professor of Physics and Astronomy*

Toby Meadows, Ph.D. University of Melbourne, *Assistant Professor of Logic and Philosophy of Science*

Kenneth D. Mease, Ph.D. University of Southern California, *Professor Emeritus of Mechanical and Aerospace Engineering* (nonlinear dynamics and control; flight guidance and control)

Martha L. Mecartney, Ph.D. Stanford University, *Professor Emeritus of Materials Science and Engineering; Chemical and Biomolecular Engineering* (ceramics for energy applications and for extreme environments, flash sintering, interfacial design of thermal conductivity, transmission electron microscopy)

Sara Mednick, Ph.D. Harvard University, *Associate Professor of Cognitive Sciences* (memory consolidation, sleep, pharmacology, aging, brain stimulation)

James W. Meeker, J.D., Ph.D. State University of New York at Buffalo, *Professor Emeritus of Criminology, Law and Society; Sociology* (sociology of law, criminal justice, research methodology, statistics, access to civil justice)

Gopi Meenakshisundaram, Ph.D. University of North Carolina at Chapel Hill, *Professor of Computer Science* (geometry and topology for computer graphics, image-based rendering, object representation, surface reconstruction, collision detection, virtual reality, telepresence)

Sharad Mehrotra, Ph.D. University of Texas at Austin, *Professor of Computer Science* (databases and data mining, multimedia computing, networks and distributed systems)

Richard Mendelsohn, Ph.D. Massachusetts Institute of Technology, *Adjunct Professor of Logic and Philosophy of Science*

Carrie Menkel-Meadow, J.D. University of Pennsylvania, *UCI Chancellor's Professor of Political Science; School of Law*

Dan Mercola, M.D., Ph.D. University of California, Los Angeles, *Professor of Pathology and Laboratory Medicine*

Natasha Mesinkovska, M.D., Ph.D. Mayo Medical School, *Health Sciences Assistant Clinical Professor of Dermatology; Surgery*

Irene Messoloras, D.M.A. University of California, Los Angeles, *Lecturer of Music*

Raju Metherate, Ph.D. McGill University, *Professor of Neurobiology and Behavior*

David S. Meyer, Ph.D. Boston University, *Professor of Sociology; Political Science; Urban Planning and Public Policy* (social movements, public policy, peace and war, social justice)

Ronald L. Meyer, Ph.D. California Institute of Technology, *Professor Emeritus of Developmental and Cell Biology* (development of nerve connections, nerve injury, and regeneration)

Frank L. Meyskens, M.D. University of California, San Francisco, *Daniel G. Aldrich, Jr. Endowed Chair and Professor of Medicine; Biological Chemistry; Program in Public Health*

David E. Michalik, D.O. College of Osteopathic Medicine of the Pacific, *Health Sciences Clinical Professor of Pediatrics*

John Middlebrooks, Ph.D. University of California, San Francisco, *Professor of Otolaryngology; Biomedical Engineering; Cognitive Sciences; Neurobiology and Behavior*

Milena Mihail, Ph.D. Harvard University, *Associate Professor of Computer Science* (randomization, expander graphs, Markov chains, network design)

Maryse J. Mijalski, Ed.D. University of Southern California, *Director of the French Language Program and Lecturer of French* (Second-language pedagogy and teaching.)

Michel Mikhael, M.D. Cairo University School of Medicine, *Health Sciences Clinical Professor of Pediatrics*

Alison Mikkor, J.D. New York University School of Law, *Assistant Professor of Lawyering Skills of School of Law*

Fabio Milani, Ph.D. Princeton University, *Professor of Economics*

John Miles, Ph.D. Harvard University, *Professor Emeritus of English; Religious Studies* (religion, literature, international relations, western scriptures [Jewish, Christian, Muslim] as literature; religious poetry and music, religion, science, and the environment)

George E. Miller, Ph.D. Oxford University, *Professor of Teaching Emeritus of Chemistry* (analytical and radioanalytical chemistry and chemical education)

J. Hillis Miller, Ph.D. Harvard University, *UCI Endowed Chair and Distinguished Professor Emeritus of Comparative Literature; English* (Victorian literature, critical theory)

Tyrus Miller, Ph.D. Stanford University, *Dean of the School of Humanities and Professor of English; Art History; Comparative Literature; Visual Studies* (modernist and avant-garde studies in literature and visual arts; critical theory and aesthetics; modern architecture and urbanism; East-Central European studies; culture of socialism and post-socialism; Frankfurt School theory)

Jeffrey C. Milliken, M.D. University of Michigan, *Health Sciences Professor of Surgery*

Steven D. Mills, M.D. New York Medical College, *Associate Professor of Surgery*

Jessica Millward, Ph.D. University of California, Los Angeles, *Associate Professor of History; African American Studies; Culture and Theory* (U.S., slavery, African diaspora, African American gender and women)

Glen M. Mimura, Ph.D. University of California, Santa Cruz, *Associate Professor of Film and Media Studies; Visual Studies* (minoritarian and political film; media and race; popular culture and social movements)

David K. Min, J.D. Harvard University, *Assistant Professor of School of Law*

Yong Soon Min, M.F.A. University of California, Berkeley, *Professor Emerita of Art* (minority, diasporic, and third cinemas; media, nationalism, and globalization; race, sexuality, and popular culture)

Donald S. Minckler, M.D. University of Oregon School of Medicine, *Professor Emeritus of Ophthalmology*

Volodymyr Minin, Ph.D. University of California, Los Angeles, *Professor of Statistics*

Carey Minnis, M.A. California State Polytechnic University, Pomona, *Lecturer of Academic English/English as a Second Language*

Laura J. Mitchell, Ph.D. University of California, Los Angeles, *Associate Professor of History* (social and cultural history of South Africa, Africa, and the world)

Eric D. Mjolsness, Ph.D. California Institute of Technology, *Professor of Computer Science; Mathematics* (artificial intelligence and machine learning, biomedical informatics and computational biology, applied mathematics, mathematical biology, modeling languages)

Lora D. Mjolsness, Ph.D. University of Southern California, *Lecturer of Russian* (Soviet and Russian Animation; 19th century, 20th century and Contemporary Children's Literature; Russian Folklore.)

Lilit Mnatsakanyan, M.D. Yerevan State Medical University, *Health Sciences Assistant Clinical Professor of Neurology*

David L. Mobley, Ph.D. University of California, Davis, *Vice Chair and Professor of Pharmaceutical Sciences; Chemistry* (chemical biology, physical chemistry and chemical physics, theoretical and computational)

John Moeller, M.D. University of Chicago, *Health Sciences Clinical Instructor of Emergency Medicine*

Robert G. Moeller, Ph.D. University of California, Berkeley, *Professor Emeritus of History* (modern European history)

Ali Mohraz, Ph.D. University of Michigan, *Associate Professor of Chemical and Biomolecular Engineering; Materials Science and Engineering* (colloid science, soft matter engineering with applications in health care and energy materials)

Kristine Molina, Ph.D. University of Michigan, *Associate Professor of Psychological Science* (racism and discrimination, social inequality, health disparities, Latinx health)

Sabee Y. Molloy, Ph.D. University of Wisconsin-Madison, *Professor of Radiological Sciences; Biomedical Engineering*

William R. Molzon, Ph.D. University of Chicago, *Professor of Physics and Astronomy*

Kristen R. Monroe, Ph.D. University of Chicago, *UCI Chancellor's Professor of Political Science* (ethics, international relations, political and moral psychology, normative political theory, politics of difference, conflict resolution)

Michael J. Montoya, Ph.D. Stanford University, *Professor Emeritus of Anthropology*

Edwin S. Monuki, M.D., Ph.D. University of California, San Diego, *Department Chair and Warren L. Bostick Chair in Pathology and Professor of Pathology and Laboratory Medicine; Developmental and Cell Biology*

Connor Mooney, Ph.D. Columbia University, *Assistant Professor of Mathematics* (partial differential equations)

Kailen Mooney, Ph.D. University of Colorado Boulder, *Professor of Ecology and Evolutionary Biology*

Jefferson Moore, Ph.D. Oregon State University, *Professor of Earth System Science*

Liron Mor, Ph.D. Cornell University, *Assistant Professor of Comparative Literature* (literary and critical theory, contemporary Israeli and Palestinian literature and film, postcolonial theories, conflict, sympathy, questions of translation and literary adaptation)

Alejandro Morales, Ph.D. Rutgers, The State University of New Jersey, *Professor Emeritus of Chicano/Latino Studies* (Latin American and Chicano literature, film studies)

Joseph M. Morales, Ph.D. University of California, Berkeley, *Lecturer of Humanities*

Santiago Morales-Rivera, Ph.D. Harvard University, *Associate Professor of Spanish and Portuguese; European Languages and Studies* (Modern Peninsular literature and culture, critical theory, literary history, narrative, music)

Elliott Moreau, M.M. University of Southern California, *Lecturer of Music*

Mathieu Morlighem, Ph.D. Ecole Centrale Paris, *Vice Chair and Associate Professor of Earth System Science*

David K. Morohashi, M.D. University of Washington, *Health Sciences Professor of Family Medicine*

Debra E. Morrison, M.D. Northwestern University, *Health Sciences Clinical Professor of Anesthesiology and Perioperative Care; Urology*

Naomi Morrisette, Ph.D. University of Pennsylvania, *Associate Professor of Molecular Biology and Biochemistry*

Susan Katharine Morrissey, Ph.D. University of California, Berkeley, *Professor of History; European Languages and Studies* (Russia, terrorism and political violence, suicide)

Seyed Ali Mortazavi, Ph.D. California Institute of Technology, *Professor of Developmental and Cell Biology; Biological Chemistry* (functional genomics to study transcriptional regulation in development)

Sameh Mosaed, M.D. New York Medical College, *Health Sciences Associate Clinical Professor of Ophthalmology*

Ayman S. Mosallam, Ph.D. Catholic University of America, *Professor of Civil and Environmental Engineering* (advanced composites and hybrid systems, seismic repair and rehabilitation of structures, diagnostic/prognostic structural health monitoring techniques, 3D printing in Construction and sustainable and green building technology)

Harry David Mosier, M.D. Johns Hopkins University, *Professor Emeritus of Pediatrics*

Peter J. Mostert, D.O. Oklahoma State University, *Health Sciences Clinical Instructor of Radiological Sciences*

Tahseen Mozaffar, MBBS Aga Kahn University, *Dr. Stanley van den Noort Endowed Chair and Interim Department Chair and Professor of Neurology; Pathology and Laboratory Medicine*

Laurence D. Mueller, Ph.D. University of California, Davis, *Professor of Ecology and Evolutionary Biology*

Dana Mukamel, Ph.D. University of Rochester, *Professor of Medicine; Program in Public Health*

Shaul Mukamel, Ph.D. Tel Aviv University, *UCI Distinguished Professor of Chemistry; Physics and Astronomy* (physical chemistry and chemical physics, polymer, materials, nanoscience, theoretical and computational)

Jogeshwar Mukherjee, Ph.D. Jodhpur National University, *Professor in Residence of Radiological Sciences; Biomedical Engineering*

J. Dennis Mull, M.D. Medical College of Virginia, *Professor Emeritus of Family Medicine*

R. Michael Mulligan, Ph.D. Michigan State University, *Biological Sciences Associate Dean of Graduate Studies and Professor of Developmental and Cell Biology; Ecology and Evolutionary Biology* (RNA editing in plant mitochondria and chloroplasts)

Ruth A. Mulnard, D.N.Sc. University of San Diego, *Professor Emerita of Nursing*

Ian Andrew Munro, Ph.D. Harvard University, *Associate Professor of Drama; English* (European drama and performance, early modern popular culture, theatrical performance of wit)

Margaret Murata, Ph.D. University of Chicago, *Professor Emerita of Music*

Penny R. Murata, M.D. Women's Medical College of Pennsylvania, *Health Sciences Professor of Pediatrics*

Yuji Murata, M.D. Osaka University, *Professor Emeritus of Obstetrics and Gynecology*

Simona Murgia, Ph.D. Michigan State University, *Associate Professor of Physics and Astronomy*

John Murillo III, Ph.D. Brown University, *Assistant Professor of African American Studies* (Afro-pessimism, theoretical physics, radical black feminism, literary theory, 20th/21st century black literature, black speculative fiction)

Cynthia T. Murphy, M.D. University of South Dakota, *Health Sciences Associate Clinical Professor of Physical Medicine and Rehabilitation*

Keith Murphy, Ph.D. University of California, Los Angeles, *Associate Professor of Anthropology* (linguistics, design, aesthetics and morality, Sweden)

Craig Murray, Ph.D. University of Edinburgh, *Associate Professor of Chemistry* (atmospheric and environmental, physical chemistry and chemical physics)

Sandra Murray, M.D. University of California, Irvine, *Health Sciences Associate Clinical Professor of Pediatrics*

Lawrence Muzio, Ph.D. University of California, Berkeley, *Adjunct Professor of Mechanical and Aerospace Engineering* (thermodynamics, combustion and combustion in practical systems, air pollution formation and control, advanced diagnostics applied to practical combustion systems)

Ana Muñoz, Ph.D. University of California, Los Angeles, *Assistant Professor of Criminology, Law and Society* (gang profiling, youth justice, gang injunctions and databases, immigration enforcement, policing, race, state violence)

Angela Myers, M.C.H., M.D. Stanford University, *Health Sciences Assistant Clinical Professor of Pediatrics; Genetic Counseling*

Farzad Naeim, Ph.D. University of Southern California, *Adjunct Professor of Civil and Environmental Engineering* (performance-based earthquake engineering; structural health monitoring; seismic instrumentation; structural design of tall buildings; nonlinear response of structures; seismic isolation; energy dissipation systems and devices; design characteristics of earthquake ground motions; seismic analysis and design of complex structures)

Ayako Nagai, Ph.D. University of Illinois at Urbana-Champaign, *Lecturer of Japanese*

Ajanta Naidu, M.D., M.B.A. University of California, Irvine, *Interim Department Chair and Health Sciences Clinical Professor of Pediatrics*

Orhan Nalcioğlu, Ph.D. University of Oregon, *Professor Emeritus of Radiological Sciences*

Sylvia Nam, Ph.D. University of California, Berkeley, *Assistant Professor of Anthropology; Biological Chemistry; Urban Planning and Public Policy* (urban studies, property, transnational expertise, Southeast Asia)

Victorya S. Nam, M.A. Biola University, *Lecturer of Academic English/English as a Second Language*

Bin Nan, Ph.D. University of Washington, *Professor of Statistics*

Patricia W. Nance, M.D. University of South Florida, *Health Sciences Clinical Professor of Physical Medicine and Rehabilitation*

Shoba Narayan, M.D. University of California, Los Angeles, *Health Sciences Clinical Professor of Pediatrics*

Bonnie A. Nardi, Ph.D. University of California, Irvine, *Professor Emeritus of Informatics* (computer-supported collaborative work, human-computer interaction, computer-mediated communication, user studies methods, activity theory, cultural responses to technology development)

Louis E. Narens, Ph.D. University of California, Los Angeles, *Professor of Cognitive Sciences; Logic and Philosophy of Science* (measurement, logic, metacognition)

Alexandra Natapoff, J.D. Stanford Law School, *Professor of School of Law*

Deepika Nathan, M.S. Northwestern University, *Health Sciences Assistant Clinical Professor of Pediatrics; Genetic Counseling*

Daniel Nation, Ph.D. University of Miami, *Associate Professor of Psychological Science* (clinical neuropsychology)

Lisa Marie Naugle, Ph.D. New York University, *Director of International Initiative for CTSA, Artistic Director for DTM2 Performance Ensemble and Professor of Dance* (modern dance, choreography, online/interactive technology, improvisation, teaching of dance)

Gonzalo Navajas, Ph.D. University of California, Los Angeles, *Distinguished Professor of Spanish and Portuguese* (eighteenth through twentieth-first century Spanish literature and intellectual history, film, critical theory, cultural criticism, creative writing)

Emily Navarro, Ph.D. University of California, Irvine, *Lecturer of Informatics*

Peter Navarro, Ph.D. Harvard University, *Professor Emeritus of Paul Merage School of Business*

Emre Neftci, Ph.D. University of Zurich, *Assistant Professor of Cognitive Sciences; Computer Science* (computational neuroscience, neuromorphic engineering, machine learning)

Alan Nelson, Ph.D. University of Illinois at Chicago, *Professor Emeritus of Philosophy*

Ariana M. Nelson, M.D. University of Michigan, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Corey Nelson, M.D. Thomas Jefferson University, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Edward L. Nelson, M.D. University of Oregon, *Associate Professor of Medicine; Molecular Biology and Biochemistry*

J. Stuart Nelson, Ph.D. University of California, Irvine, *Professor of Surgery; Biomedical Engineering*

Kari J. Nelson, M.D. Medical College of Wisconsin, *Health Sciences Clinical Instructor of Radiological Sciences*

Keith L. Nelson, Ph.D. University of California, Berkeley, *UCI Endowed Chair and Edward A. Dickson Professor Emeritus of History; Religious Studies*

Linda D. Nelson, Ph.D. Ohio State University, *Senate Emerita of Neurology*

Thomas L. Nelson, M.D. University of California, San Francisco, *Professor Emeritus of Pediatrics*

Zoran Nenadic, Ph.D. Washington University, *William J. Link Chair in Biomedical Engineering and Department Chair and Professor of Biomedical Engineering; Electrical Engineering and Computer Science* (adaptive biomedical signal processing, control algorithms for biomedical devices, brain-machine interfaces, modeling and analysis of biological neural networks)

Anthony B. Nesburn, M.D. Harvard University, *Adjunct Professor of Ophthalmology*

David Neumark, Ph.D. Harvard University, *Distinguished Professor of Economics; Paul Merage School of Business*

Robert L. Newcomb, Ph.D. University of California, Santa Barbara, *Senior Lecturer with Security of Employment Emeritus of Pediatrics; Clinical Translational Science*

Jane O. Newman, Ph.D. Princeton University, *Professor of Comparative Literature; English; European Languages and Studies; Religious Studies* (comparative Renaissance and early modern literature and culture [English, French, German, Italian, neo-Latin], Mediterranean Renaissance studies, Baroque, afterlives of antiquity, Walter Benjamin, Erich Auerbach, pre-modern lessons for the modern and post-modern)

Riley D. Newman, Ph.D. University of California, Berkeley, *Professor Emeritus of Physics and Astronomy; Logic and Philosophy of Science; Physics and Astronomy*

Robert W. Newsom, Ph.D. Columbia University, *Professor Emeritus of English*

Hanh T. Nguyen, M.D. Medical College of Virginia, *Health Sciences Assistant Clinical Professor of Family Medicine*

Ninh T. Nguyen, M.D. University of Texas at San Antonio, *John E. Connolly Chair in Surgery and Department Chair and Professor of Surgery*

Phu Dinh Nguyen, Ph.D. University of California, Irvine, *Assistant Adjunct Professor of Civil and Environmental Engineering* (hydrology, GIS, satellite precipitation estimation algorithms, databases and visualization tools for remotely-sensed data and information, crowdsourcing, water resources systems)

Tan Quoc Viet Nguyen, M.D. Michigan State University, *Health Sciences Assistant Clinical Professor of Family Medicine*

Y. Vien T. Nguyen, D.O. Western University of Health Sciences, *Health Sciences Clinical Instructor of Radiological Sciences*

Tingting Nian, Ph.D. New York University, *Assistant Professor of Paul Merage School of Business*

Andrea C. Nicholas, Ph.D. University of Chicago, *Associate Professor of Teaching of Neurobiology and Behavior*

Walter Nicholls, Ph.D. University of California, Los Angeles, *Associate Professor of Urban Planning and Public Policy; Sociology* (urban sociology, politics and policy, social movements, immigration, comparative urbanism, theory, planning conflicts)

Bruce Nickerson, M.D. University of California, Los Angeles, *Health Sciences Associate Clinical Professor of Pediatrics*

Alexandru Nicolau, Ph.D. Yale University, *Department Chair and Professor of Computer Science* (architecture, parallel computation, programming languages and compilers)

Qing Nie, Ph.D. Ohio State University, *Director of the NSF-Simons Center for Multiscale Cell Fate Research and Chancellor's Professor of Mathematics; Biomedical Engineering* (applied and computational mathematics, mathematical and computational biology)

Robert J. Nielsen, Ph.D. California Institute of Technology, *Assistant Professor of Chemical and Biomolecular Engineering* (electronic structure, electrocatalysis, mechanism, alkane activation, homogenous catalysis)

Tiffany K. Nielsen, D.N.P. Brandman University, *Health Sciences Assistant Clinical Professor of Nursing*

Delma J. Nieves, M.D. University of Washington, *Health Sciences Clinical Professor of Pediatrics*

Mikael Nilsson, Ph.D. Chalmers University of Technology, *Adjunct Professor of Chemical and Biomolecular Engineering; Materials Science and Engineering* (actinide chemistry, solvent extraction fundamental chemistry and process development, extraction and detection equipment development, radiolysis and phase composition of organic solvent)

James P. Nisbet, Ph.D. Stanford University, *Associate Professor of Art History; Visual Studies* (modern and contemporary art)

Sergey Nizkorodov, Ph.D. University of Basel, *Co-Director, AirUCI and Department Vice Chair and Professor of Chemistry* (analytical, atmospheric and environmental, physical chemistry and chemical physics)

Karen L. Noblett, M.D. University of California, Irvine, *Health Sciences Professor of Obstetrics and Gynecology*

Carrie J. Noland, Ph.D. Harvard University, *Director of the International Center for Writing and Translation and Director of French and Professor of French; Comparative Literature* (20th-century poetry and poetics, avant-garde movements in art and literature, critical theory, performance studies)

Trina Norden-Krichmar, Ph.D. University of California, San Diego, *Assistant Professor of Epidemiology; Biological Chemistry; Computer Science; Pharmaceutical Sciences*

Margot Norris, Ph.D. State University of New York College at Buffalo, *Professor Emerita of English; Comparative Literature* (modern Irish, British, American and continental modernism, literature and war)

Raymond W. Novaco, Ph.D. Indiana University, *Professor of Psychological Science* (anger, violence, stress, trauma, and interventions)

James S. Nowick, Ph.D. Massachusetts Institute of Technology, *Professor of Chemistry; Pharmaceutical Sciences* (chemical biology, organic and synthetic, polymer, materials, nanoscience)

Andrew Noymer, Ph.D. University of California, Berkeley, *Associate Professor of Program in Public Health; Sociology*

Diane J. Nugent, M.D. University of California, Los Angeles, *Health Sciences Clinical Professor of Pediatrics*

Dayle S. Nunez, Ph.D. Stanford University, *Professor Emeritus of Spanish and Portuguese*

Eliezer Nussbaum, M.D. Tel Aviv University, *Professor of Pediatrics*

Adeline Nyamathi, Ph.D. Case Western Reserve University, *Founding Dean and Distinguished Professor of Nursing*

Cailin O'Connor, Ph.D. University of California, Irvine, *Associate Professor of Logic and Philosophy of Science*

Laura B. O'Connor, Ph.D. Columbia University, *Associate Professor of English; Comparative Literature* (Irish literature, twentieth-century poetry, Anglo-American modernism)

Diane K. O'Dowd, Ph.D. University of California, San Diego, *Professor of Developmental and Cell Biology; Anatomy and Neurobiology* (regulation of activity in developing and adult nervous systems)

Rachel S. O'Toole, Ph.D. University of North Carolina at Chapel Hill, *Associate Professor of History* (Colonial Latin America, African Diaspora, colonialisms, race, racism, indigenous histories, gender, Atlantic worlds)

Andre Obenhaus, Ph.D. University of British Columbia, *Professor in Residence of Pediatrics; Anatomy and Neurobiology*

Juan Pedro Ochoa-Ricoux, Ph.D. California Institute of Technology, *Assistant Professor of Physics and Astronomy*

Andrew O. Odegaard, Ph.D. University of Minnesota, *Assistant Professor of Epidemiology*

Candice Odgers, Ph.D. University of Virginia, *Professor of Psychological Science; Criminology, Law and Society* (developmental and quantitative psychology; social inequalities and child health; new technologies and adolescent development)

Adedeji Ogunfolu, M.M. University of Michigan, Ann Arbor, *Lecturer of Music*

Oladele A. Ogunseitan, Ph.D. University of Tennessee, *Department Chair and Professor of Program in Public Health; Environmental Health Sciences*

Gerardo Okhuysen, Ph.D. Stanford University, *Professor of Paul Merage School of Business*

Ronke Olabisi, Ph.D. University of Wisconsin-Madison, *Assistant Professor of Biomedical Engineering* (orthopedic tissue engineering and regenerative medicine for injury, aging, disease, and space flight)

Dariusz Oleszkiewicz, B.A. California Institute of the Arts, *Lecturer of Music*

Spencer C. Olin, Ph.D. Claremont Graduate University, *Professor Emeritus of History*

Gustavo Oliveira, Ph.D. University of California, Berkeley, *Assistant Professor of Global and International Studies*

Deborah Oliver, M.F.A. California Institute of the Arts, *Lecturer of Art* (performance art, new genres)

Leticia Oliveros, M.D. University of Iowa, *Health Sciences Professor of Pediatrics*

Vincent Olivieri, M.F.A. Yale University, *Associate Dean of Graduate Affairs and Professor of Drama* (sound design)

Bonnie Jean Olsen, Ph.D. California School of Professional Psychology, *Health Sciences Professor of Family Medicine*

Ellen Olshansky, Ph.D. University of California, San Francisco, *Professor Emerita of Nursing*

Betty H. Olson, Ph.D. University of California, Berkeley, *Professor Emeritus of Civil and Environmental Engineering* (molecular applications for optimizing biological processes in wastewater treatment, environmental health, drinking water microbiology)

Carol Booth Olson, Ph.D. University of California, Los Angeles, *Professor Emerita of Education*

Gary Olson, Ph.D. Stanford University, *Professor Emeritus of Informatics* (interactive and collaborative technology, human-computer interaction, computer-supported cooperative work)

Judith Olson, Ph.D. University of Michigan, *Professor Emeritus of Informatics; Paul Merage School of Business; Urban Planning and Public Policy* (interactive and collaborative technology, human-computer interaction, computer-supported cooperative work)

Kevin E. Olson, Ph.D. Northwestern University, *Professor of Political Science; Culture and Theory; European Languages and Studies* (political theory, history of political thought, legal theory, philosophy of the social sciences)

Valerie A. Olson, Ph.D. Rice University, *Associate Professor of Anthropology* (environmental systems, science and technology, U.S., extreme environments)

Hossein Omoumi, Ph.D. University of Florence, *Maseeh Professor in Persian Performing Arts and Professor of Music*

Hector H. Orjuela, Ph.D. University of Kansas, *Professor Emeritus of Spanish and Portuguese*

Kathryn Osann, Ph.D. University of California, Berkeley, *Adjunct Professor of Medicine; Environmental Health Sciences*

Megan Boysen Osborn, M.D. University of California, Irvine, *Associate Dean for Students and Associate Professor of Emergency Medicine*

Donald R. Ostergard, M.D. University of California, San Francisco, *Senate Emeritus of Obstetrics and Gynecology*

Sean B. Ostlund, Ph.D. University of California, Los Angeles, *Assistant Professor of Anesthesiology and Perioperative Care*

Larry E. Overman, Ph.D. University of Wisconsin-Madison, *UCI Distinguished Professor of Chemistry* (inorganic and organometallic, organic and synthetic)

Emily Owens, Ph.D. University of Maryland at College Park, *Professor of Criminology, Law and Society; Economics* (how government policies affect the prevalence of criminal activity as well as how agents within the criminal justice system, particularly police, prosecutors, and judges, respond to policy changes)

Jon Pltt, Ph.D. University of California, Berkeley, *Assistant Professor of Japanese* (Japanese literature, cinema, and sound media, environmental philosophy, ecocriticism, affect theory, new materialism, speculative realism/object oriented ontology)

Bihter Padak, Ph.D. Stanford University, *Assistant Professor of Mechanical and Aerospace Engineering; Chemical and Biomolecular Engineering*

Brian Paegel, Ph.D. University of California, Berkeley, *Professor of Pharmaceutical Sciences* (chemical biology, drug discovery, drug discovery, miniaturization, evolution)

Jane M. Page, M.F.A. Indiana University, *Head of Directing and Professor of Drama* (directing, acting)

Marilyn J. Pais, M.D. Women's Medical College of Pennsylvania, *Senior Lecturer with Security of Employment Emerita of Radiological Sciences*

Krzysztof Palczewski, Ph.D. Wrocław University of Science and Technology, *Irving H. Leopold Chair of Ophthalmology and Professor of Ophthalmology; Physiology and Biophysics*

Andrew A. Palermo, B.F.A. University of Cincinnati, College-Conservatory of Music, *Associate Professor of Drama* (music theatre choreography)

Julian I. Palley, Ph.D. University of New Mexico, *Professor Emeritus of Spanish and Portuguese*

David T. Pan, Ph.D. Columbia University, *Professor of German* (18th-, 19th-, and early 20th-century German literature and intellectual history)

Xiaoqing Pan, Ph.D. Saarland University, *Henry Samuelli Endowed Chair and Director of Irvine Materials Research Institute (IMRI) and Professor of Materials Science and Engineering; Physics and Astronomy* (atomic-scale structure, properties and dynamic behaviors of advanced materials including thin films and nanostructures for memories, catalysts, and energy conversion and storage devices)

Mitradas M. Panicker, Ph.D. Carnegie-Mellon University, *Associate Adjunct Professor of Physiology and Biophysics*

Nicholas R. Pannunzio, Ph.D. Beckman Research Institute of City of Hope, *Assistant Professor of Medicine; Biological Chemistry*

Alessandra Pantano, Ph.D. Princeton University, *Associate Professor of Teaching of Mathematics* (algebra and number theory)

Maria C. Pantelia, Ph.D. Ohio State University, *Director, Thesaurus Linguae Graecae® and Professor of Classics; Religious Studies* (Greek epic, Hellenistic poetry, digital technologies in the humanities)

Marios Papaefthymiou, Ph.D. Massachusetts Institute of Technology, *Ted and Janice Smith Family Foundation Dean and Professor of Computer Science* (computer architecture and design, networks and distributed systems)

Dimitri Papamoschou, Ph.D. California Institute of Technology, *Professor of Mechanical and Aerospace Engineering* (compressible turbulence, jet and fan aeroacoustics, jet noise reduction, mixing enhancement, microphone phased array methods)

Sara R. Paradise, M.D. George Washington University, *Health Sciences Clinical Instructor of Emergency Medicine*

Gerard C. Pardo, Ph.D. Stanford University, *Professor Emeritus of Civil and Environmental Engineering* (structural analysis, experimental structural dynamics)

Kyle P. Paredes, M.D. M.B.A. University of California, San Francisco, *Assistant Dean of Student Affairs and Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Ellen Park, M.D. Tufts University, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Hannah L. Park, Ph.D. Stanford University, *Assistant Professor in Residence of Epidemiology*

Jung In Park, Ph.D. University of Minnesota, *Assistant Professor of Nursing*

Ian Parker, Ph.D. University College London, *Professor of Neurobiology and Behavior; Physiology and Biophysics*

William H. Parker, Ph.D. University of Pennsylvania, *Professor Emeritus of Physics and Astronomy*

Michael J. Parsons, Ph.D. University of London, *Associate Professor of Developmental and Cell Biology* (development and regeneration of the endocrine pancreas)

Jennifer Pastor, M.F.A. University of California, Los Angeles, *Professor of Art* (sculpture)

Alka Patel, Ph.D. Harvard University, *Associate Professor of Art History; History; Religious Studies; Visual Studies* (South Asian and Islamic art and architecture, historiographies, Islamic diasporas in Cuba)

Anup Patel, M.D. University of Nevada, *Health Sciences Clinical Professor of Pediatrics*

Hiren Patel, M.D. Philadelphia College of Osteopathic Medicine, *Health Sciences Assistant Clinical Professor of Obstetrics and Gynecology*

Pranav Patel, M.D. Saint Louis University, *Chief, Division of Cardiology; Director of Cardiac Catheterization Laboratory and Cardiac Care Unit (CCU) and Health Sciences Associate Clinical Professor of Medicine; Biomedical Engineering*

Medha Pathak, Ph.D. University of California, Berkeley, *Assistant Professor of Physiology and Biophysics*

Sameer S. Pathare, M.D. Medical College of Wisconsin, *Health Sciences Clinical Professor of Pediatrics*

Joseph Patterson, Ph.D. University of Warwick, *Assistant Professor of Chemistry; Materials Science and Engineering* (polymer, materials, nanoscience)

Richard Pattis, M.S. Stanford University, *Professor of Teaching of Computer Science; Informatics* (MicroWorlds for teaching programming, debugging, computational tools for non-computer scientists)

Keyianoosh Paydar, M.D. University of Tennessee, *Health Sciences Associate Clinical Professor of Surgery*

Jone Pearce, Ph.D. Yale University, *Professor of Paul Merage School of Business*

Lisa Pearl, Ph.D. University of Maryland, College Park, *Professor of Language Science; Cognitive Sciences; Logic and Philosophy of Science* (language development, linguistics, computational sociolinguistics, cognitive modeling)

Eric Pearlman, Ph.D. University of Texas Health Sciences Center at San Antonio, *Director of the Institute for Immunology and Chancellor's Professor of Physiology and Biophysics; Ophthalmology*

Cornelia Pechmann, Ph.D. Vanderbilt University, *Professor of Paul Merage School of Business*

Roberto Pelayo, Ph.D. California Institute of Technology, *Assistant Professor of Teaching of Mathematics* (algebra and data science)

Elizabeth Pena, Ph.D. Temple University, *Professor of Education; Language Science*

Andrew Penner, Ph.D. University of California, Berkeley, *UCI Chancellor's Fellow and Professor of Sociology* (gender, inequality, education, family, race)

Emily K. Penner, Ph.D. University of California, Irvine, *Assistant Professor of Education*

Kristine R. Penner, M.D. University of California, San Francisco, *Health Sciences Assistant Clinical Professor of Obstetrics and Gynecology*

Reginald M. Penner, Ph.D. Texas A&M University, *UCI Chancellor's Professor of Chemistry* (analytical, physical chemistry and chemical physics, polymer, materials, nanoscience)

Simon G. Penny, M.F.A. Sydney College of the Arts, *Professor of Art; Informatics* (informatics, robotic sculpture, interactive environments, electronic media)

James W. Penrod, M.F.A. University of California, Irvine; C.M.A. Laban Institute of Movement Studies, *Professor Emeritus of Dance* (ballet, modern, dance notation, choreography, movement analysis)

Kylie Peppler, Ph.D. University of California, Los Angeles, *Associate Professor of Informatics; Education* (learning sciences, design, maker culture, arts, game design, computer programming, wearables)

Edwin Peraza Hernandez, Ph.D. Texas A&M University, *Assistant Professor of Mechanical and Aerospace Engineering* (morphing structures, deployable structures, origami, tensegrity, active materials, structural optimization)

Casey C. Perin, Ph.D. University of California, Berkeley, *Associate Professor of Philosophy*

Barry Perkins, M.A. New England Conservatory of Music, *Lecturer of Music*

Allison J. Perlman, Ph.D. University of Texas at Austin, *Associate Professor of History; Film and Media Studies; Visual Studies* (history of broadcasting, American social movements, media law and policy, media activism, popular memory)

Megan Peters, Ph.D. University of California, Los Angeles, *Assistant Professor of Cognitive Sciences* (perception, metacognition, consciousness, computational modeling, computational cognitive neuroscience)

Robert L. Peters, Ph.D. University of Wisconsin-Madison, *Professor Emeritus of English*

Ying Y. Petersen, Ph.D. University of California, Berkeley, *Lecturer of Chinese*

Ellena Peterson, Ph.D. Georgetown University, *Professor Emerita of Pathology and Laboratory Medicine*

Kristin Peterson, Ph.D. Rice University, *Associate Professor of Anthropology* (science and technology, feminism, pharmaceuticals, West Africa)

Bojan M. Petrovic, Ph.D. University of California, Irvine, *Lecturer of Social Sciences*

Parham Pezeshk, M.D. Shahid Beheshti University of Medical Sciences and Health Services, *Health Sciences Clinical Instructor of Radiological Sciences*

Robert F. Phalen, Ph.D. University of Rochester, *Professor of Medicine; Environmental Health Sciences*

Peter H. Pham, M.D. University of California, Los Angeles, *Associate Professor of Radiological Sciences*

Son Phan, M.D. University of Vermont, *Health Sciences Assistant Clinical Professor of Radiological Sciences*

Nicolas M. Phielipp, M.D. University of Buenos Aires, *Health Sciences Assistant Clinical Professor of Neurology*

Kavita S. Philip, Ph.D. Cornell University, *Professor of History; Informatics* (history of modern South Asia, science and technology, political ecology, critical theoretical studies of race, gender, colonialism, new media, and globalization)

Susanne J. Phillips, D.N.P. Yale University, *Health Sciences Clinical Professor of Nursing*

Davin Phoenix, Ph.D. University of Michigan, *Assistant Professor of Political Science* (racial attitudes, affect and behavior, public opinion, political communication, urban politics, mobilization of marginalized groups)

Aimee Pierce, M.D. Columbia University College of Physicians and Surgeons, *Health Sciences Assistant Clinical Professor of Neurology*

Paul Piff, Ph.D. University of California, Berkeley, *Assistant Professor of Psychological Science* (social psychology, group processes, altruism and cooperation, socioeconomic status, inequality, social emotion, moral judgment, ethics, uncertainty)

Alessio Pigazzi, M.D. Boston University, *Associate Professor of Surgery*

Morton Pincus, Ph.D. Washington University, *Professor of Paul Merage School of Business*

Gerald Pinter, B.A. University of North Texas, *Lecturer of Music*

Melissa Pinto, Ph.D. University of Louisville, *Associate Professor of Nursing*

Daniele Piomelli, Ph.D. Columbia University, *Louise Turner Arnold Chair in the Neurosciences and Distinguished Professor of Anatomy and Neurobiology; Biological Chemistry; Pharmaceutical Sciences*

Seth D. Pipkin, Ph.D. Massachusetts Institute of Technology, *Assistant Professor of Urban Planning and Public Policy*

Zygmunt Pizlo, Ph.D. University of Maryland at College Park, *Falmagne Endowed Chair and Professor of Cognitive Sciences* (human and machine vision, 3D shape, symmetry, virtual reality, robotics, problem solving)

Janice G. Plastino, Ph.D. University of Southern California, *Professor Emerita of Dance* (kinesiology/anatomy, research methods, choreography, dance science/medicine)

Maksim Plikus, Ph.D. University of Southern California, *Associate Professor of Developmental and Cell Biology* (mechanisms of regeneration, stem cell control)

Lawrence Plon, Pharm.D. M.A. University of Southern California, *Assistant Adjunct Professor of Pharmaceutical Sciences*

Dale J. Poirier, Ph.D. University of Wisconsin-Madison, *Professor Emeritus of Economics*

Andrew Policano, Ph.D. Brown University, *Professor Emeritus of Paul Merage School of Business*

Alice Police, M.D. Loma Linda University, *Health Sciences Assistant Clinical Professor of Surgery*

Francesca Polletta, Ph.D. Yale University, *Professor of Sociology* (social movements, democracy, culture, sociology of law, political sociology, social theory)

Henry N. Pontell, Ph.D. State University of New York at Stony Brook, *Professor Emeritus of Criminology, Law and Society; Sociology* (white-collar and corporate crime, criminology, criminal justice, deviance and social control, sociology of law)

Katherine M. Porter, J.D. Harvard University, *Professor of School of Law*

Robert W. Porter, M.D. Northwestern University, *Senate Emeritus of Neurological Surgery*

Dmitry Portnoy, M.D. Moscow State University, *Health Sciences Clinical Professor of Anesthesiology and Perioperative Care*

Manuel Porto, M.D. Rutgers, the State University of New Jersey, *The Edward J. Quilligan Chair in Maternal-Fetal Medicine and Professor of Obstetrics and Gynecology*

Eric Potma, Ph.D. University of Groningen, *Professor of Chemistry; Electrical Engineering and Computer Science* (analytical, chemical biology, physical chemistry and chemical physics)

Thomas L. Poulos, Ph.D. University of California, San Diego, *Distinguished Professor of Molecular Biology and Biochemistry; Chemistry; Pharmaceutical Sciences* (chemical biology)

Ilhem Messaoudi Powers, Ph.D. Weill Cornell Graduate School of Medical Sciences, *Associate Professor of Molecular Biology and Biochemistry; Microbiology and Molecular Genetics*

Michael J. Prather, Ph.D. Yale University, *UCI Distinguished Professor of Earth System Science*

Jessica Pratt, Ph.D. University of California, Irvine, *Associate Professor of Teaching of Ecology and Evolutionary Biology*

Joann Prause, Ph.D. University of California, Irvine, *Professor of Teaching Emerita of Psychological Science* (statistics, quantitative epidemiology, employment typology)

Adrian Preda, M.D. Carol Davila University, *Health Sciences Professor of Psychiatry and Human Behavior; Religious Studies*

Daryl Preece, Ph.D. University of Glasglow, *Assistant Professor of Biomedical Engineering* (nano-optics, neuro-photonics, optical forces and mechanotransduction, singular optics, and biophotonics)

Jennifer A. Prescher, Ph.D. University of California, Berkeley, *Professor of Chemistry; Molecular Biology and Biochemistry; Pharmaceutical Sciences* (chemical biology, organic and synthetic)

Sarah D. Pressman, Ph.D. Carnegie Mellon University, *Associate Professor of Psychological Science* (health psychology, positive emotions, stress physiology, psychosocial effects on physiology and health)

Henry W. Pribram, MB BChir Cambridge University, *Professor Emeritus of Radiological Sciences*

Douglas W. Priestly, M.D. University of Manitoba, *Health Sciences Clinical Professor of Physical Medicine and Rehabilitation*

Francois W. Primeau, Ph.D. Massachusetts Institute of Technology, *Professor of Earth System Science*

Michael D. Prislín, M.D. Georgetown University, *Professor of Family Medicine*

Duncan Pritchard, Ph.D. University of St. Andrews, *Professor of Philosophy*

Michael S. Pritchard, Ph.D. University of California, San Diego, *Associate Professor of Earth System Science*

Sergey V. Pronin, Ph.D. University of Chicago, *Assistant Professor of Chemistry* (organic and synthetic chemistry)

Aaron Przybysz, M.D. University of Michigan, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Ralph Purdy, Ph.D. University of California, Los Angeles, *Professor Emeritus of Pharmaceutical Sciences*

Geetha Puthenveetil, MBBS St. Johns Medical College, *Health Sciences Clinical Professor of Pediatrics*

Feng Qiao, Ph.D. University of California, Los Angeles, *Associate Professor of Biological Chemistry*

Annie Qu, Ph.D. The Pennsylvania State University, *Professor of Statistics*

Lisa K. Quane, M.D. University of Illinois at Urbana-Champaign, *Health Sciences Professor of Radiological Sciences*

Jodi A. Quas, Ph.D. University of California, Davis, *Professor of Psychological Science* (memory development, children's involvement in the legal system)

Bradley A. Queen, Ph.D. Boston University, *Associate Professor of Teaching of English*

Edward J. Quilligan, M.D. Ohio State University, *Professor Emeritus of Obstetrics and Gynecology*

W. Leslie Quinlivan, MBBS University of London, *Professor Emeritus of Obstetrics and Gynecology*

Isabela Seong Leong Quintana, Ph.D. University of Michigan, *Assistant Professor of Asian American Studies* (comparative and relational ethnic studies; Asian American history; Chicanx/Latinx history; race and gender; borderlands, diasporas, and empire)

Aziz-Ul-Haq Qureshi, M.A. California State University, Long Beach, *Lecturer of Academic English/English as a Second Language*

Rajagopalan Radhakrishnan, Ph.D. Binghamton University, State University of New York, *Distinguished Professor of English; African American Studies; Comparative Literature; Culture and Theory* (critical theory, postcoloniality, nationalisms and diasporas, poststructuralism, postmodernism, democracy and minority discourse, cultural studies, globalization and transnationalism)

Leslie J. Raffel, M.D. Medical College of Pennsylvania, *Health Sciences Clinical Professor of Pediatrics; Genetic Counseling*

Gregory Rafijah, M.D. Chicago Medical School, *Health Sciences Assistant Clinical Professor of Orthopaedic Surgery*

Regina Ragan, Ph.D. California Institute of Technology, *Endowed Chair for the Center for Diversity in Engineering Education and Professor of Materials Science and Engineering; Chemical and Biomolecular Engineering* (exploration and development of novel material systems for nanoscale electronic and optoelectronic devices)

Charles C. Ragin, Ph.D. University of North Carolina at Chapel Hill, *UCI Chancellor's Professor of Sociology* (comparative and historical sociology, social inequality, political sociology, quantitative methodology, qualitative methodology)

Kathryn Ragsdale, Ph.D. University of Chicago, *Lecturer of History* (Japan: Meiji to present; Asia-Pacific War; Japanese film and popular culture)

Ramin Rahimian, M.D. University of California, Los Angeles, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Nasrin Rahimieh, Ph.D. University of Alberta, *Director of the Humanities Core Program and Howard Baskerville Professor of Comparative Literature; European Languages and Studies; Gender and Sexuality Studies* (Modern Persian literature and culture, diaspora studies, women's writing.)

Amir M. Rahmani, Ph.D. University of Turku, Finland, *Assistant Professor of Nursing*

Yvonne Rainer, *Claire Trevor Professor and Professor Emerita of Art* (performance, dance, video)

Govind R. Rajan, MBBS University of Delhi, *Health Sciences Clinical Professor of Anesthesiology and Perioperative Care*

Arvind Rajaraman, Ph.D. Stanford University, *Professor of Physics and Astronomy*

Vibhuti Ramachandran, Ph.D. New York University, *Assistant Professor of Global and International Studies; Criminology, Law and Society*

Leslie M. Randall, M.D. University of Louisville, *Assistant Professor of Obstetrics and Gynecology*

James T. Randerson, Ph.D. Stanford University, *UCI Chancellor's Professor of Earth System Science; Civil and Environmental Engineering; Ecology and Evolutionary Biology*

Roger H. Rangel, Ph.D. University of California, Berkeley, *Department Chair and Professor of Mechanical and Aerospace Engineering* (heat transfer, fluid mechanics, two-phase flows, fluid instability and atomization)

Jose Mari Ranz Navapotro, Ph.D. Universidad Autónoma de Madrid, *Associate Professor of Ecology and Evolutionary Biology*

Bahram Raofi, M.D. University of Tehran, *Health Sciences Clinical Professor of Radiological Sciences*

Darren R. Raphael, M.D. University of California, Irvine, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Renee J. Raphael, Ph.D. Princeton University, *Associate Professor of History; European Languages and Studies; Religious Studies* (early modern Europe, history of science, intellectual history)

Michael Ratz, Ph.D. Technical University of Munich, *Professor of Physics and Astronomy*

Radoslav Raychev, M.D. Sofia Medical University, *Health Sciences Assistant Clinical Professor of Neurological Surgery*

Olga Razorenova, Ph.D. Institute of Molecular Genetics, *Assistant Professor of Molecular Biology and Biochemistry*

Elizabeth L. Read, Ph.D. University of California, Berkeley, *Assistant Professor of Chemical and Biomolecular Engineering; Molecular Biology and Biochemistry* (dynamics of complex biochemical systems, regulation of immune responses)

Colleen Reardon, Ph.D. University of California, Los Angeles, *Professor of Music*

Wilfred W. Recker, Ph.D. Carnegie Mellon University, *Distinguished Professor of Civil and Environmental Engineering* (transportation systems modeling, traffic control, and urban systems analysis)

Michael R. Recto, M.D. University of the Philippines, College of Medicine, *Health Sciences Clinical Professor of Pediatrics*

David L. Rector, Ph.D. Massachusetts Institute of Technology, *Professor Emeritus of Mathematics* (algebraic topology and computer algebra)

Varalakshmi Reddy, M.D. Osmania Medical College, *Health Sciences Professor of Pediatrics*

David F. Redmiles, Ph.D. University of Colorado Boulder, *Professor of Informatics* (computer-supported cooperative work, human computer interaction, software engineering, globally distributed development teams, user interfaces, software tools)

John L. Redpath, Ph.D. University of Newcastle, *Professor Emeritus of Radiation Oncology; Environmental Health Sciences*

William S. Reeburgh, Ph.D. Johns Hopkins University, *Professor Emeritus of Earth System Science*

Barbara L. Reed, Ph.D. Indiana University, *Associate Professor of Teaching Emerita of English*

Karin E. Reed, M.D. Wayne State University, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

R. Anthony Reese, J.D. Stanford University, *UCI Chancellor's Professor of School of Law*

Amelia C. Regan, Ph.D. University of Texas at Austin, *Professor of Computer Science* (algorithm development and complexity, networks and distributed systems, network optimization)

Christina M. Reh, M.D. Loma Linda University, *Health Sciences Clinical Professor of Pediatrics*

Stephanie Reich, Ph.D. Vanderbilt University, *Associate Professor of Education; Informatics; Psychological Science* (child development, parenting, peer interactions, media, program evaluation)

Janelle Reinelt, Ph.D. Stanford University, *Professor Emerita of Drama* (British theatre, political theory, performance)

David J. Reinkensmeyer, Ph.D. University of California, Berkeley, *Professor of Anatomy and Neurobiology; Biomedical Engineering; Mechanical and Aerospace Engineering; Physical Medicine and Rehabilitation*

Keramet Reiter, Ph.D. University of California, Berkeley, *Associate Professor of Criminology, Law and Society; School of Law* (prisons and extreme punishments, legal history, criminal justice policy, criminal and civil rights law, law and society)

Maria G. Rendón, Ph.D. Harvard University, *Assistant Professor of Urban Planning and Public Policy; Sociology* (urban sociology, immigration, race/ethnicity, sociology of education and social policy)

Bryan R. Reynolds, Ph.D. Harvard University, *UCI Chancellor's Professor and Claire Trevor and Professor of Drama* (Shakespeare, Renaissance drama, critical theory, feminist theory, performance theory, cultural studies)

Sherif Rezk, M.D. Alexandria University, *Professor of Pathology and Laboratory Medicine*

Katherine Rhodes, Ph.D. Georgia State University, *Assistant Professor of Education* (mathematical cognition and achievement, linguistic minority equity and inclusion, child development, psychometrics, latent trait modeling)

Markus W. Ribbe, Ph.D. University of Bayreuth, *UCI Chancellor's Professor of Molecular Biology and Biochemistry; Chemistry* (chemical biology, inorganic and organometallic)

Virginia Richards, Ph.D. University of California, Berkeley, *Professor of Cognitive Sciences* (auditory perception and cognition, human psychophysics)

Debra J. Richardson, Ph.D. University of Massachusetts, *Professor Emeritus of Informatics* (software engineering, program testing, life-cycle validation, software environments)

Gary Richardson, Ph.D. University of California, Berkeley, *Professor of Economics; Religious Studies*

L. Song Richardson, J.D. Yale Law School, *Dean of the School of Law and Professor of School of Law; Asian American Studies*

Justin Richland, Ph.D. University of California, Los Angeles, *Associate Professor of Anthropology* (legal discourse analysis and semiotics, anthropology of law; contemporary native American law, politics, art, and ethnographic museology)

Lindsey Richland, Ph.D. University of California, Los Angeles, *Associate Professor of Education*

Cameron Ricks, M.D. American University of the Caribbean, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Hidemi Riggs, Ph.D. University of California, Los Angeles, *Academic Coordinator and Lecturer of Japanese*

Eric Rignot, Ph.D. University of Southern California, *Department Chair and Donald Bren Professor of Earth System Science; Civil and Environmental Engineering*

Jenna Riis, Ph.D. Johns Hopkins University, *Assistant Professor of Psychological Science* (early life adversity; stress; salivary bioscience; neuroendocrine-immune relations; program implementation and evaluation)

Jenny K. Rinehart, Ph.D. University of New Mexico, *Assistant Professor of Teaching of Psychological Science* (health psychology, clinical psychology, sexual victimization prevention, risk perception)

Joseph Rinehart, M.D. Loyola University Chicago, *Associate Clinical Professor of Anesthesiology and Perioperative Care*

Stephen G. Ritchie, Ph.D. Cornell University, *Director of the Institute of Transportation Studies and Professor of Civil and Environmental Engineering* (transportation engineering, advanced traffic management and control systems, development and application of emerging technologies in transportation)

Thorsten Ritz, Ph.D. University of Ulm, *Professor of Physics and Astronomy*

Monica B. Rivera, M.D. University of California, Los Angeles School of Medicine, *Health Sciences Clinical Professor of Radiological Sciences*

Annie E. Ro, Ph.D. University of California, Los Angeles, *Assistant Professor of Program in Public Health; Asian American Studies*

Ty Robbins, Ph.D. University of California, Santa Barbara, *Lecturer of Economics*

Hugh J. Roberts, Ph.D. McGill University, *Associate Professor of English* (romantic literature, Shelley, literature and science, chaos theory and literature, politics and literature)

William S. Roberts, M.F.A. California Institute of the Arts, *Associate Professor of Teaching of Art* (photography)

James Robertson, Ph.D. New York University, *Assistant Professor of History* (intellectual and cultural history of Europe and the Balkans)

Paul M. Robertson, Ph.D. University of Texas at Austin, *Assistant Professor of Physics and Astronomy*

Michael J. Robinson-Dorn, J.D. Cornell University, *Clinical Professor of School of Law*

Trilby Robinson-Dorn, J.D. Tulane University, *Associate Dean and Professor of School of Law*

Belinda Robnett, Ph.D. University of Michigan, *Professor of Sociology* (social movements, race and ethnicity, gender, social change, African Americans)

Guillaume Rocheteau, Ph.D. University of Paris, *Professor of Economics*

Tara Rodman, Ph.D. Northwestern University, *Assistant Professor of Drama; Asian American Studies* (modernist performance, Japanese theatre and dance, transnationalism, racial formation, global Asias)

Bobby Rodriguez, D.M.A. University of California, Los Angeles, *Lecturer of Music*

Fernando Rodriguez, Ph.D. University of Michigan, *Assistant Professor of Teaching of Education*

Jaime E. Rodriguez, Ph.D. University of Texas at Austin, *Professor Emeritus of History*

Nancy Rodriguez, Ph.D. Washington State University, *Professor of Criminology, Law and Society* (race, crime, and justice; juvenile justice; collateral consequences of imprisonment; criminal justice policy)

Vanessa Rodriguez, M.S.N. Samuel Merritt University, *Health Sciences Assistant Clinical Professor of Nursing*

Jose Antonio Rodriguez Lopez, Ph.D. University of California, Berkeley, *Associate Professor of Economics*

Alejandra Rodriguez-Verdugo, Ph.D. University of California, Irvine, *Assistant Professor of Ecology and Evolutionary Biology*

Jennifer S. Roh, M.D. Texas Technological College, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Judit Romhanyi, Ph.D. Budapest University of Technology and Economy, *Assistant Professor of Physics and Astronomy*

A. K. Romney, Ph.D. Harvard University, *Professor Emeritus of Anthropology*

Fatimah Tobing Rony, Ph.D. Yale University, *Department Chair and Associate Professor of Film and Media Studies; Visual Studies* (ethnographic film, race and representation, film production)

Karen S. Rook, Ph.D. University of California, Los Angeles, *Distinguished Professor of Psychological Science* (gerontology, social relationships and health)

Rocio Rosales, Ph.D. University of California, Los Angeles, *Assistant Professor of Sociology; Chicano/Latino Studies* (international migration, immigrant and ethnic economics, urban sociology, ethnography, Latino/a studies, race and ethnicity, immigrant detention)

Ana Rosas, Ph.D. University of Southern California, *Associate Professor of Chicano/Latino Studies; History* (Chicana/o comparative history, immigration, ethnicity)

Michael R. Rose, Ph.D. University of Sussex, *Professor of Ecology and Evolutionary Biology*

Abraham Rosenbaum, M.D. The Technion - Israel Institute of Technology, *Health Sciences Clinical Professor of Anesthesiology and Perioperative Care*

Mark Rosenbaum, J.D. Harvard University, *Adjunct Professor of School of Law*

Emily S. Rosenberg, Ph.D. State University of New York at Stony Brook, *Professor Emerita of History* (U.S. and the world, transnational/global history, international relations)

Shawn W. Rosenberg, M.Litt. University of Oxford, *Professor of Political Science* (political psychology, deliberative democracy, ideology, social theory, social and development psychology)

Judy Rosener, Ph.D. Claremont Graduate University, *Professor of Teaching Emerita of Paul Merage School of Business*

Ezra A. Ross, J.D. Harvard University, *Professor of School of Law*

Lauren Ross, Ph.D. University of Pittsburgh, *Assistant Professor of Logic and Philosophy of Science*

Richard I. Ross, M.D. University of Maryland, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Steven D. Ross, M.D. University of Southern California, *Health Sciences Professor of Orthopaedic Surgery*

Amanda Ross-Ho, M.F.A. University of Southern California, *Associate Professor of Art* (sculpture)

Diego Rosso, Ph.D. University of California, Los Angeles, *Director of the UCI Water-Energy Nexus Center (WEX) and Professor of Civil and Environmental Engineering* (environmental process engineering, mass transfer, wastewater treatment, carbon- and energy-footprint analysis)

Jeffrey Rouder, Ph.D. University of California, Irvine, *Falmagne Endowed Chair and Professor of Cognitive Sciences* (mathematical and statistical models of perception and cognition, bayesian mixed models, psychometrics)

John C. Rowe, Ph.D. State University of New York College at Buffalo, *Professor Emeritus of English; Comparative Literature*

Michael Ruane, M.A. University of California, Los Angeles, *Lecturer of Urban Planning and Public Policy*

Bonnie Ruberg, Ph.D. University of California, Berkeley, *Assistant Professor of Film and Media Studies; Visual Studies* (video games, digital media, digital cultures, queer studies, gender and sexuality)

Elyssa Rubin, M.D. Sackler School of Medicine, *Health Sciences Clinical Professor of Pediatrics*

Karl Rubin, Ph.D. Harvard University, *Distinguished Professor Emeritus of Mathematics* (algebra and number theory)

Scott E. Rudkin, M.D. University of California, Irvine, *Health Sciences Clinical Professor of Emergency Medicine*

Gina A. Ruggiero, M.A. The New School, *Lecturer of Academic English/English as a Second Language*

Vicki L. Ruiz, Ph.D. Stanford University, *Professor Emeritus of History; Chicano/Latino Studies* (Chicana/Latina history, U.S. labor, immigration, gender)

Ruben G. Rumbaut, Ph.D. Brandeis University, *Distinguished Professor of Sociology; Chicano/Latino Studies; Criminology, Law and Society; Education* (international migration, immigration laws, criminalization, incarceration, social inequality and mobility, race and ethnicity)

Elizabeth A. Runcie, D.O. Des Moines University, *Health Sciences Clinical Instructor of Emergency Medicine*

Miryha Gould Runnerstrom, Ph.D. University of California, Irvine, *Assistant Professor of Teaching of Program in Public Health*

Timothy Rupert, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Materials Science and Engineering; Chemical and Biomolecular Engineering; Mechanical and Aerospace Engineering* (mechanical behavior, nanomaterials, structure property relationships, microstructural stability, grain boundaries and interfaces, materials characterization)

Vanessa L. Russell, M.A. California State University, Fullerton, *Lecturer of Academic English/English as a Second Language*

Bernard Russo, Ph.D. University of California, Los Angeles, *Professor Emeritus of Mathematics* (functional analysis)

James E. Rutledge, Ph.D. University of Illinois at Chicago Circle, *Professor Emeritus of Physics and Astronomy*

Nancy L. Ruyter, Ph.D. Claremont Graduate University, *Professor Emerita of Dance* (dance history, Spanish dance, bibliography and research)

Michael Ryan, Ph.D. University of Iowa, *Professor of English; Religious Studies* (American literature, creative writing, poetry, poetics, autobiography)

Scott D. Rychnovsky, Ph.D. Columbia University, *UCI Distinguished Professor of Chemistry* (chemical biology, organic and synthetic)

Nathan Rynn, Ph.D. Stanford University, *Professor Emeritus of Physics and Astronomy*

Donald G. Saari, Ph.D. Purdue University, *UCI Distinguished Professor Emeritus of Economics; Logic and Philosophy of Science; Mathematics*

Kourosh Saberi, Ph.D. University of California, Berkeley, *Professor of Cognitive Sciences* (conscious systems, evolutionary game theory, nature of reality, machine learning, artificial intelligence)

Kamal Sadiq, Ph.D. University of Chicago, *Associate Professor of Political Science* (comparative politics, immigration and citizenship in developing countries, India and southeast Asia, Asian security)

Hamid M. Said, Pharm.D., Ph.D. Baghdad University, Aston University, *Distinguished Professor of Medicine; Physiology and Biophysics*

Ann K. Sakai, Ph.D. University of Michigan, *Professor of Ecology and Evolutionary Biology*

Sangeeta S. Sakaria, M.D. Indiana University, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Naghme Salamat Saberi, M.D. New York Medical College, *Health Sciences Associate Clinical Professor of Obstetrics and Gynecology*

Maritza Salazar, Ph.D. New York University, *Assistant Professor of Paul Merage School of Business; Psychological Science* (team science, group dynamics and processes, team-based organizations, global teams, impact of culture on work behavior, international management, management of innovation and learning)

Katie Salen Tekinba#, M.F.A. Rhode Island School of Design, *Professor of Informatics* (game design, connected learning design, human-computer interaction)

Sharon V. Salinger, Ph.D. University of California, Los Angeles, *Professor Emerita of History* (early America and early Modern Caribbean—social and labor history, race, gender)

Eric S. Saltzman, Ph.D. University of Miami, *UCI Distinguished Professor of Earth System Science; Chemistry*

Constance J. Samaras, M.F.A. Eastern Michigan University, *Professor Emerita of Art* (photography, intermedia, cultural criticism)

Catherine Z. Sameh, Ph.D. Rutgers, The State University of New Jersey, *Assistant Professor of Gender and Sexuality Studies* (Iranian feminism, human rights, transnational feminisms, gender and social movements in the Middle East and Muslim world, Islam, women of color feminisms)

Henry Samueli, Ph.D. University of California, Los Angeles, *Adjunct Professor of Electrical Engineering and Computer Science* (digital signal processing, communications systems engineering, CMOS integrated circuit design for applications in high-speed data transmission systems)

G. Scott Samuelsen, Ph.D. University of California, Berkeley, *Director of Advanced Power and Energy Program, Research Professor and Professor Emeritus of Mechanical and Aerospace Engineering; Civil and Environmental Engineering* (combustion, sprays, laser diagnostics, air quality, turbulent transport, alternative fuels, modeling reacting flows, practical systems, energy and environmental conflict)

Javier D. Sanchez-Yamagishi, Ph.D. Massachusetts Institute of Technology, *Assistant Professor of Physics and Astronomy*

Zlatina Sandalska, Ph.D. University of Southern California, *Lecturer of Russian*

Brett F. Sanders, Ph.D. University of Michigan, *Professor of Civil and Environmental Engineering; Urban Planning and Public Policy* (urban flooding, coastal flooding, dam-break flooding, flood hazard modeling, flood risk management, sediment management, shallow-water hydrodynamics and morphodynamics, computational methods, remote-sensing with drones, translational research for flood modeling targeting community resilience, population health and poverty alleviation)

Judith Haymore Sandholtz, Ph.D. Stanford University, *Professor of Education*

Suzanne B. Sandmeyer, Ph.D. University of Washington, *Grace Beekhuis Bell Chair in Biological Chemistry and Professor of Biological Chemistry; Microbiology and Molecular Genetics*

Jose Y. Sandoval, M.D. University of California, Los Angeles, *Health Sciences Clinical Professor of Family Medicine*

Rozanne M. Sandri-Goldin, Ph.D. Johns Hopkins University, *Department Chair and Chancellor's Professor of Microbiology and Molecular Genetics*

Terry Sanger, M.D. Harvard Medical School, *Vice President and Chief Scientific Officer for Children's Hospital Orange County and Professor of Electrical Engineering and Computer Science*

Ardalan Amiri Sani, Ph.D. Rice University, *Assistant Professor of Computer Science* (involves building efficient, high performance, and reliable systems)

Rossella Santagata, Ph.D. University of California, Los Angeles, *Professor of Education* (teacher preparation and professional development, teaching and learning in STEM fields, video technologies, teaching and learning as cultural practices, equity and education)

Gerasimos X. Santas, Ph.D. Cornell University, *Professor Emeritus of Philosophy*

Jean-Daniel M. Saphores, Ph.D. Cornell University, *Professor of Civil and Environmental Engineering; Economics; Urban Planning and Public Policy* (transportation and environmental systems (with a focus on air pollution and energy use), travel behavior analysis, alternative fuel vehicles, automated vehicles, transit use, sustainable infrastructure management, and decision making under uncertainty using real options)

I. James Sarfeh, M.D. Albany Medical College, *Professor Emeritus of Surgery*

Barbara W. Sarnecka, Ph.D. University of Michigan, *Professor of Cognitive Sciences; Logic and Philosophy of Science* (cognitive development, language development, number concepts, conceptual change, individual cognitive development, historical development of science and mathematics)

George Sarraf, Ph.D. Claremont Graduate University, *Lecturer of Economics*

Erdem Sasmaz, Ph.D. Stanford University, *Assistant Professor of Chemical and Biomolecular Engineering* (heterogenous catalysis and nanoparticle synthesis for clean energy production and carbon dioxide utilization)

Jon F. Sassin, M.D. Saint Louis University, *Professor Emeritus of Neurology*

Paolo Sassone-Corsi, Ph.D. University of Naples Federico II, *Donald Bren Professor and Distinguished Professor of Biological Chemistry; Microbiology and Molecular Genetics; Pharmaceutical Sciences*

Brian Sato, Ph.D. University of California, San Diego, *Associate Professor of Teaching of Molecular Biology and Biochemistry; Education*

Mona Sazgar, M.D. McMaster University, *Health Sciences Associate Clinical Professor of Neurology*

Robin C. Scarcella, Ph.D. University of Southern California, *Professor of Academic English/English as a Second Language; Education*

David Schaefer, Ph.D. University of Arizona, *Associate Professor of Sociology* (social networks, social psychology, criminology, health, human development)

Karl Schafer, Ph.D. New York University, *Professor of Philosophy*

Martin Schechter, Ph.D. New York University, *Professor Emeritus of Mathematics* (analysis and partial differential equations, mathematical physics)

Stephen Scheinberg, Ph.D. Princeton University, *Professor Emeritus of Mathematics*

Edgar T. Schell, Ph.D. University of California, Berkeley, *Professor Emeritus of English*

Jeanne Scheper, Ph.D. University of California, Santa Barbara, *Department Chair and Associate Professor of Gender and Sexuality Studies* (feminist performance studies and visual culture, cultural studies, theories of race, gender and sexuality, trans-Atlantic modernism)

Jan W. Scherfig, Ph.D. University of California, Berkeley, *Professor Emeritus of Civil and Environmental Engineering* (water reclamation, waste treatment processes, environmental engineering)

Isaac D. Scherson, Ph.D. Weizmann Institute of Science, *Professor of Computer Science; Electrical Engineering and Computer Science* (parallel computing architectures, massively parallel systems, parallel algorithms, interconnection networks, performance evaluation)

Chelsea Schields, Ph.D. City University of New York, *Assistant Professor of History* (history of modern Europe, colonialism, decolonization, gender and sexuality)

Thomas F. Schilling, Ph.D. University of Oregon, *Department Chair and Professor of Developmental and Cell Biology* (zebrafish development, vertebrate genetics, craniofacial development)

Shira A. Schlesinger, M.D. University of California, San Diego, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Annette M. Schlichter, Ph.D. Humboldt University of Berlin, *Associate Professor Emerita of Comparative Literature* (feminist theory and criticism, queer theory, critiques of heterosexuality, contemporary American literature, gender and literature, voice studies)

Beryl F. Schlossman, Doctorate University of Paris 7, Ph.D. Johns Hopkins University, *Professor of Comparative Literature* (Modern literature, critical theory, film studies, psychoanalysis, the arts in society.)

Sanford Schneider, M.D. New York University, *Health Sciences Clinical Professor of Pediatrics*

John Schneiderman, M.F.A. University of California, Irvine, *Professor of Teaching of Music*

Richard M. Schoen, Ph.D. Stanford University, *UCI Excellence in Teaching Chair in Mathematics and Distinguished Professor of Mathematics* (differential geometry, partial differential equations, general relativity)

Evan Schofer, Ph.D. Stanford University, *Professor of Sociology* (comparative political sociology, sociology of education, quantitative methods and statistics, globalization, sociology of the environment, organizations, sociology of science)

Natalie B. Schonfeld, Ph.D. Claremont Graduate University, *Senior Lecturer of Undergraduate Education*

William R. Schonfeld, Ph.D. Princeton University, *Professor Emeritus of Political Science*

Claudia Schoonhoven, Ph.D. Stanford University, *Professor Emerita of Paul Merage School of Business*

Merritt D. Schreiber, Ph.D. Ohio State University, *Associate Professor Emeritus of Emergency Medicine*

Steven S. Schreiber, M.D. Albany Medical College, *Professor in Residence of Neurology; Anatomy and Neurobiology; Psychiatry and Human Behavior*

Samuel E. Schriner, Ph.D. University of Washington, *Vice Chair and Assistant Professor of Teaching of Pharmaceutical Sciences* (aging, genetics, biochemistry, mitochondria)

Sabrina E. Schuck, Ph.D. University of California, Riverside, *Health Sciences Assistant Clinical Professor of Pediatrics; Education; Psychological Science*

Stephen Schueller, Ph.D. University of Pennsylvania, *Assistant Professor of Psychological Science* (clinical psychology, depression, mHealth, technology, implementation science, treatment and prevention, positive psychology)

Carl Schultz, M.D. University of California, Irvine, *Professor Emeritus of Emergency Medicine*

Jonas Schultz, Ph.D. Columbia University, *Professor Emeritus of Physics and Astronomy; Logic and Philosophy of Science*

Tonya L. Schuster, Ph.D. University of California, Riverside, *Lecturer of Sociology* (sociology of medicine and alternative medicine, social relationships and health social psychology, research design)

Gabriele M. Schwab, Ph.D. University of Konstanz, *UCI Chancellor's Professor of Comparative Literature; Anthropology; Culture and Theory; English; European Languages and Studies; German* (modern literature, critical theory, psychoanalysis, comparative literature)

Martin Schwab, Ph.D. Heidelberg University, *Professor Emeritus of Philosophy*

Adam J. Schwarz, M.D. Stanford University, *Health Sciences Associate Clinical Professor of Pediatrics*

Christopher Schwarz, Ph.D. University of Massachusetts, *Associate Professor of Paul Merage School of Business*

Ran Schwarzkopf, M.D. Ben Gurion University of Negev, *Health Sciences Assistant Clinical Professor of Orthopaedic Surgery*

Armin Schwegler, Ph.D. University of California, Berkeley, *Professor of Spanish and Portuguese* (Spanish linguistics, history of the Spanish language, Creole languages, language contact, African influences in Latin America, language origins)

Howard Schwid, M.D. University of Wisconsin-Madison, *Health Sciences Clinical Professor of Anesthesiology and Perioperative Care*

John A. Scolaro, M.D. Boston College, *Health Sciences Assistant Clinical Professor of Orthopaedic Surgery*

Nina Scolnik, B.M. Oberlin College, *Professor of Teaching of Music*

Gregory Scontras, Ph.D. Harvard University, *Assistant Professor of Language Science* (semantics, pragmatics, computational modeling, heritage bilingualism)

Carlton Scott, Ph.D. University of New South Wales, *Professor Emeritus of Paul Merage School of Business*

Bert Scruggs, Ph.D. University of Pennsylvania, *Associate Professor of Chinese* (Taiwanese literature, postcolonial discourse)

Nicholas I. Scurich, Ph.D. University of Southern California, *Associate Professor of Psychological Science; Criminology, Law and Society; School of Law* (judgment and decision making, juridical proof, violence risk assessment)

Patricia Seed, Ph.D. University of Wisconsin-Madison, *Professor of History; Informatics* (mapping: history and design, game design, navigation)

Christopher Seeds, Ph.D. New York University, *Assistant Professor of Criminology, Law and Society* (punishment and social control, law and society, criminal justice, social theory, life sentencing and capital punishment)

Jacobo Sefami, Ph.D. University of Texas at Austin, *Professor of Spanish and Portuguese* (Latin American literature, with emphasis in 20th/21st century poetry; Latin American Jewish writers)

Magdalene J. Seiler, Ph.D. University of Munich, *Associate Professor in Residence of Anatomy and Neurobiology; Physical Medicine and Rehabilitation*

Marcus M. Seldin, Ph.D. Johns Hopkins University, *Assistant Professor of Biological Chemistry*

Sherilyn K. Sellgren, M.B.A. University of California, Irvine, *Lecturer of Political Science*

Bert L. Semler, Ph.D. University of California, San Diego, *Distinguished Professor of Microbiology and Molecular Genetics*

Donald F. Senear, Ph.D. University of Washington, *Professor of Molecular Biology and Biochemistry*

Stefano Sensi, M.D. Gabriele D'Annunzio University of Chieti Pescara, *Associate Adjunct Professor of Neurology*

Cagin Senturk, M.D. Hacettepe University Medical School, *Health Sciences Clinical Professor of Radiological Sciences*

Arnold K. Seong, M.F.A. University of Washington, *Lecturer of Academic English/English as a Second Language*

Caesar D. Sereseres, Ph.D. University of California, Riverside, *Associate Professor of Political Science* (U.S. foreign policy, U.S. Latin American relations, Mexican-American politics)

Carroll S. Seron, Ph.D. New York University, *Professor Emerita of Criminology, Law and Society; School of Law* (sociology of law, sociology of professions, law and society, sociology of legal profession, methods and police misconduct)

Jared Charles Sexton, Ph.D. University of California, Berkeley, *Professor of African American Studies; Culture and Theory; Film and Media Studies; Visual Studies* (race and sexuality, policing and imprisonment, contemporary U.S. cinema and political culture, multiracial coalition, critical theory)

Gregory Shaffer, J.D. Stanford University, *Director, Center of Globalization, Law and Society and UCI Chancellor's Professor of School of Law; Political Science*

Nilopa Shah, Ph.D. University of California, Irvine, *Lecturer of Economics*

Shalini S. Shah, M.D. St. George's University, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Babak Shahbaba, Ph.D. University of Toronto, *Professor of Statistics; Computer Science*

A. J. Shaka, Ph.D. Oxford University, *Professor of Chemistry* (chemical biology, physical chemistry and chemical physics)

Joel B. Shallit, M.D. University of California, Los Angeles, *Assistant Adjunct Professor of Family Medicine*

Ronald C. Shank, Ph.D. Massachusetts Institute of Technology, *Professor Emeritus of Medicine; Environmental Health Sciences*

Devin Shanthikumar, Ph.D. Stanford University, *Assistant Professor of Paul Merage School of Business*

Johanna F. Shapiro, Ph.D. Stanford University, *Professor of Family Medicine*

Kelli Sharp, D.P.T. Chapman University, *Assistant Professor of Dance; Physical Medicine and Rehabilitation* (somatic practices, dance science, kinesiology, physical therapy, motor learning and performance)

Kenneth J. Shea, Ph.D. Pennsylvania State University, *Distinguished Professor of Chemistry* (analytical, chemical biology, organic and synthetic, polymer, materials, nanoscience)

Lili Sheibani, M.D. University of California, Irvine, *Health Sciences Clinical Instructor of Obstetrics and Gynecology*

Deanna Shemek, Ph.D. Johns Hopkins University, *Professor of Italian* (Italian literature and cultural history; Renaissance studies; early modern popular culture; early modern to contemporary narrative; women's and gender studies; literary theory; digital humanities; textual scholarship)

Jay Shen, M.D. Loma Linda University, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Weining Shen, Ph.D. North Carolina State University, *Assistant Professor of Statistics*

Yanning Shen, Ph.D. University of Minnesota, *Assistant Professor of Electrical Engineering and Computer Science* (machine learning, data science, network science, and statistical-signal processing)

Lavonne Sheng, M.D. University of California, Irvine, *Health Sciences Clinical Professor of Pediatrics*

Phillip C-Y Sheu, Ph.D. University of California, Berkeley, *Professor of Electrical Engineering and Computer Science; Biomedical Engineering; Computer Science* (semantic computing, robotic computing, artificial intelligence, biomedical computing, multimedia computing)

Terrence Shevlin, Ph.D. Stanford University, *Paul Merage Chair in Business Growth and Professor of Paul Merage School of Business*

Frank G. Shi, Ph.D. California Institute of Technology, *Professor of Chemical and Biomolecular Engineering; Materials Science and Engineering* (optoelectronic devices and materials, optoelectronic device packaging materials, optoelectronic medical devices and packaging, white LED technologies, high power LED packaging)

Yongsheng Shi, Ph.D. Syracuse University, *Professor of Microbiology and Molecular Genetics*

Aomawa Shields, Ph.D. University of Washington, *Assistant Professor of Physics and Astronomy*

Sanghyuk Shin, Ph.D. University of California, San Diego, San Diego State University, *Assistant Professor of Nursing*

Michael Shindler, Ph.D. University of California, Los Angeles, *Assistant Professor of Teaching of Computer Science* (theory and machine learning, computer science education)

Manabu Shiraiwa, Ph.D. Max Planck Institute for Chemistry, *Associate Professor of Chemistry* (atmospheric and environmental, chemical biology, physical chemistry and chemical physics, theoretical and computational)

Paul R. Shirey, Ph.D. University of California, Irvine, *Lecturer of Social Sciences; Economics*

Yuri Shirman, Ph.D. University of California, Santa Cruz, *Professor of Physics and Astronomy*

Andrei M. Shkel, Ph.D. University of Wisconsin-Madison, *Professor of Mechanical and Aerospace Engineering; Biomedical Engineering; Electrical Engineering and Computer Science* (design and advanced control of micro-electro-mechanical systems (MEMS); high precision micro-machined gyroscopes; MEMS-enhanced optical systems, tools and prosthetic appliances; electromechanical and machine-information systems integration)

Inna Shniter, M.D. University of Missouri, Columbia, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Cynthia H. Sholly, M.D. University of Utah, *Health Sciences Professor of Pediatrics*

Gretchen K. Short, Ph.D. University of California, Irvine, *Lecturer of Humanities; English*

Yasser Shoukry, Ph.D. University of California, Los Angeles, *Assistant Professor of Electrical Engineering and Computer Science* (resilience, safety, security and privacy of artificial intelligence (AI), controlled cyber-physical systems (CPS), internet-of-things (IoT), and robotic systems)

Athanasios Sideris, Ph.D. University of Southern California, *Professor of Mechanical and Aerospace Engineering* (control systems, neural networks)

Barry E. Siegel, M.S. Columbia University, *Professor of English* (literary journalism, English)

Jack H. Sills, M.D. Northwestern University, *Health Sciences Clinical Professor of Pediatrics*

Roxane C. Silver, Ph.D. Northwestern University, *Professor of Psychological Science; Program in Public Health* (coping with traumatic life events (personal losses and collective traumas), stress, social psychology, health psychology)

Victoria A. Silver, Ph.D. University of California, Los Angeles, *Professor of English; Religious Studies* (early modern literature and culture, religious studies, history and theory of rhetoric, literature and philosophy)

Alice Silverberg, Ph.D. Princeton University, *Distinguished Professor Emerita of Mathematics; Computer Science* (algebra and number theory)

Dennis J. Silverman, Ph.D. Stanford University, *Professor Emeritus of Physics and Astronomy*

Eli Simon, M.F.A. Brandeis University, *UCI Chancellor's Professor and Professor of Drama* (acting, directing)

Valeria B. Simon, M.D. University of Illinois at Urbana-Champaign, *Health Sciences Clinical Instructor of Obstetrics and Gynecology*

Kenneth W. Simons, J.D. University of Michigan Law School, *UCI Chancellor's Professor of School of Law*

Sandra Simpkins, Ph.D. University of California, Riverside, *Professor of Education* (organized after-school activities, motivation, family influences, diversity and equity, immigration and culture, STEM)

Jennifer L. Simpson, M.D. University of Michigan, *Health Sciences Professor of Ophthalmology*

Richard A. Sims, M.F.A. University of California, Irvine, *Lecturer of English*

Jasjit Singh, M.D. Duke University, *Health Sciences Associate Clinical Professor of Pediatrics*

Kathryn E. Singh, M.P.H., M.S. University of California, Irvine, *Health Sciences Associate Clinical Professor of Pediatrics; Genetic Counseling*

Sameer Singh, Ph.D. University of Massachusetts Amherst, *Assistant Professor of Computer Science; Electrical Engineering and Computer Science; Language Science* (artificial intelligence and machine learning, databases and data mining, scientific and numerical computing)

William A. Sirignano, Ph.D. Princeton University, *Henry Samueli Endowed Chair in Engineering and Distinguished Professor of Mechanical and Aerospace Engineering* (combustion theory, multiphase flows, turbulent reacting flows, computational methods, rocket and jet propulsion, gas turbine and internal combustion engines)

Albert Siryaporn, Ph.D. University of Pennsylvania, *Assistant Professor of Physics and Astronomy; Molecular Biology and Biochemistry*

Eiko Sithi-Amnuai, M.A. University of Sydney, *Lecturer of Japanese*

Zuzanna S. Siwy, Ph.D. Silesian University of Technology, *Professor of Physics and Astronomy; Biomedical Engineering; Chemistry*

Stergios Skaperdas, Ph.D. Johns Hopkins University, *Clifford S. Heinz Chair and Professor of Economics; Political Science*

Kira Skavinski, D.O. New York Inst of Technology, *Health Sciences Assistant Clinical Professor of Family Medicine*

Harry B. Skinner, M.D. Medical University of South Carolina, *Professor Emeritus of Orthopaedic Surgery*

Dorota Skowronska-Krawczyk, Ph.D. University of Geneva, *Assistant Professor of Physiology and Biophysics*

Brian Skyrms, Ph.D. University of Pittsburgh, *UCI Distinguished Professor of Logic and Philosophy of Science; Economics; Philosophy*

Kenneth A. Small, Ph.D. University of California, Berkeley, *Professor Emeritus of Economics*

Tammy Ann Smecker-Hane, Ph.D. Johns Hopkins University, *Associate Professor of Physics and Astronomy*

Keyue M. Smedley, Ph.D. California Institute of Technology, *Professor of Electrical Engineering and Computer Science* (power electronics, renewables, energy storage and grid stabilization)

Brian Smith, M.D. Universidad Autonoma De Guadalajara, *Health Sciences Assistant Clinical Professor of Surgery*

Charles Smith, Ph.D. University of California, San Diego, *Professor of Political Science; Criminology, Law and Society* (law and legal institutions, comparative and international law)

David A. Smith, Ph.D. University of North Carolina at Chapel Hill, *Professor of Sociology; Urban Planning and Public Policy* (world systems analysis, urbanization, development, comparative-historical sociology, dependent development in east Asia)

David W. Smith, Ph.D. Stanford University, *Professor of Philosophy*

James N. Smith, Ph.D. California Institute of Technology, *Professor of Chemistry* (analytical, atmospheric and environmental, physical chemistry and chemical physics)

Jaymi Smith, B.F.A. DePaul University, *Professor of Drama* (lighting design)

John H. Smith, Ph.D. Princeton University, *Professor of Comparative Literature; Culture and Theory; German; Religious Studies* (18th- and 19th-century literature and intellectual history, literary theory)

Moyra Smith, M.D., Ph.D., M.F.A. University of Pretoria, *Professor Emerita of Pediatrics; Genetic Counseling*

William H. Smoke, Ph.D. University of California, Berkeley, *Professor Emeritus of Mathematics* (homological algebra)

Padhraic J. Smyth, Ph.D. California Institute of Technology, *Professor of Computer Science; Education; Statistics* (artificial intelligence and machine learning, pattern recognition, applied statistics, data mining, information theory)

David M. Snow, J.D. Loyola Marymount University, *Lecturer of Urban Planning and Public Policy*

David A. Snow, Ph.D. University of California, Los Angeles, *Professor Emeritus of Sociology* (collective behavior, protest and social movements, framing processes, social psychology and culture, homelessness and social problems, qualitative methods)

Richard Snyder, Ph.D. University of Southern California, *Undergraduate Advisor and Assistant Professor of Teaching of Classics* (philosophy and literature, epic tradition, Latin poetry)

Kut So, Ph.D. Stanford University, *Professor of Paul Merage School of Business*

Henry W. Sobel, Ph.D. Case Western Reserve University, *Professor Emeritus of Physics and Astronomy*

Braxton Soderman, Ph.D. Brown University, *Assistant Professor of Film and Media Studies; Visual Studies* (digital and new media studies, video games, networks, digital art and electronic literature)

Damien Sojoyner, Ph.D. University of Texas at Austin, *Associate Professor of Anthropology; Culture and Theory* (prisons; public education; urban anthropology; race; African diaspora theory; public policy and law; gender; United States)

Antoine N. Soliman, M.D. Pennsylvania State University, *Health Sciences Clinical Professor of Pediatrics*

Etel Solingen, Ph.D. University of California, Los Angeles, *Thomas T. and Elizabeth C. Tierney Chair in Global Peace and Conflict Studies and Professor of Political Science* (international relations theory, international political economy, international cooperation, macropolitics/institutions, comparative politics, world politics and regional orders)

Dorothy J. Solinger, Ph.D. Stanford University, *Professor Emeritus of Political Science* (Chinese domestic politics and political economy, comparative politics, East Asian politics)

Knut Solna, Ph.D. Stanford University, *Professor of Mathematics* (applied and computational mathematics, inverse problems and imaging, probability)

Robert A. Solomon, J.D. George Washington University, *Clinical Professor of School of Law*

Charles A. Sondhaus, Ph.D. University of California, Berkeley, *Professor Emeritus of Radiological Sciences*

Amit Soni, M.D. St. George's University, *Health Sciences Clinical Professor of Pediatrics*

Dara H. Sorkin, Ph.D. University of California, Irvine, *Associate Professor in Residence of Medicine; Program in Public Health; Psychological Science*

Soroosh Sorooshian, Ph.D. University of California, Los Angeles, *Director of the Center for Hydrometeorology and Remote Sensing (CHRS) and UCI Distinguished Professor of Civil and Environmental Engineering; Earth System Science* (hydrology, hydrometeorology and hydroclimate modeling, remote sensing, water sources management)

Cascade J. Sorte, Ph.D. University of California, Davis, *Associate Professor of Ecology and Evolutionary Biology*

Ann Southworth, J.D. Stanford University, *Professor of School of Law; Criminology, Law and Society*

Marian Sowa, M.D. , *Health Sciences Associate Clinical Professor of Neurology*

Eric Spangenberg, Ph.D. University of Washington, M.B.A. Portland State University, *Dean of The Paul Merage School of Business and Professor of Paul Merage School of Business; Psychological Science* (sensory cues in the retail environment and the effects of self-prediction on behavior)

M. Anne Spence, Ph.D. University of Hawaii at Manoa, *Professor Emerita of Pediatrics; Genetic Counseling*

Paul J. Spencer, M.A. Trinity College Dublin, *Lecturer of Academic English/English as a Second Language*

Robert Spitale, Ph.D. University of Rochester, *Director of the UCI Transcriptomics Core and Associate Professor of Pharmaceutical Sciences; Chemistry; Molecular Biology and Biochemistry* (chemistry, chemical biology, RNA biology)

Kurt Squire, Ph.D. Indiana University, *Professor of Informatics; Education* (video game design, games for learning, mobile technologies, civic engagement, place-based learning)

Ramesh Srinivasan, Ph.D. Tulane University, *Department Chair and Professor of Cognitive Sciences; Biomedical Engineering* (perception, attention, decision-making, cognitive and clinical neuroscience)

Michael J. Stamos, M.D. Case Western Reserve University, *Dean and Professor of Surgery*

Eric J. Stanbridge, Ph.D. Stanford University, *Professor Emeritus of Microbiology and Molecular Genetics*

Thomas A. Standish, Ph.D. Carnegie Institute of Technology, *Professor Emeritus of Information and Computer Sciences* (software testing and analysis, software semantics and epistemology, programming and cognition, software comprehension)

P. Kyle Stanford, Ph.D. University of California, San Diego, *Professor of Logic and Philosophy of Science; Philosophy*

Craig Stark, Ph.D. Carnegie Mellon University, *James L. McGaugh Chair in the Neurobiology of Learning and Memory and Professor of Neurobiology and Behavior*

Arnold Starr, M.D. New York University, *Research Professor of Neurobiology and Behavior*

Robert E. Steele, Ph.D. Yale University, *Professor of Biological Chemistry*

Robin Steinberg-Epstein, M.D. University of California, Irvine, *Health Sciences Professor of Pediatrics*

Roger F. Steinert, M.D. Harvard University, *Irving H. Leopold Chair in Ophthalmology and Professor of Ophthalmology*

Constance Steinkuehler, Ph.D. University of Wisconsin-Madison, *Professor of Informatics; Education* (video games for impact, game-mediated cognition and learning, online social interaction, video games and policy)

Barry A. Steinmetz, M.D. Baylor College of Medicine, *Health Sciences Associate Clinical Professor of Pediatrics*

James Steintrager, Ph.D. Columbia University, *Director of the Emphasis in Critical Theory and Professor of English; European Languages and Studies* (eighteenth-century comparative literature, ethical philosophy and literature, systems theory, amatory and erotic fiction)

Judith Stepan-Norris, Ph.D. University of California, Los Angeles, *Professor of Sociology* (labor unions, sociology of work, political sociology, American society, research methods, historical-comparative methods, class formation)

Megan L. Stephenson, M.D. University of California, Irvine, *Health Sciences Clinical Instructor of Obstetrics and Gynecology*

Hal S. Stern, Ph.D. Stanford University, *UCI Chancellor's Professor of Statistics; Cognitive Sciences*

Heather Stern, M.S. California State University, Fullerton, *Lecturer of Academic English/English as a Second Language*

Ronald J. Stern, Ph.D. University of California, Los Angeles, *Professor Emeritus of Mathematics* (geometry and topology)

Sharon M. Stern, Ph.D. University of Utah, *Professor of Teaching Emerita of Program in Public Health*

David Stetson, B.M. University of Southern California, *Lecturer of Music*

Oswald Steward, Ph.D. University of California, Irvine, *Director, Reeve-Irvine Research Center and Reeve-Irvine Chair in Spinal Cord Injury Research and Distinguished Professor of Anatomy and Neurobiology; Neurobiology and Behavior*

Cassandra L. Stewart, M.D. Medical University of South Carolina, *Health Sciences Clinical Instructor of Pediatrics*

Robin S. Stewart, M.A. University of California, Irvine, *Lecturer of Academic English/English as a Second Language*

Mark Steyvers, Ph.D. Indiana University, *Professor of Cognitive Sciences; Computer Science; Psychological Science* (higher-order cognition, cognitive neuroscience, computational modeling, collective intelligence)

Svetlana R. Stivi, M.D. University of California, Irvine, *Health Sciences Associate Clinical Professor of Family Medicine*

Jane K. Stoeber, J.D. Harvard University, *Clinical Professor of School of Law*

Daniel Stokols, Ph.D. University of North Carolina, Chapel Hill, *Professor Emeritus of Psychological Science; Religious Studies; Urban Planning and Public Policy*

Jeanne M. Stone, M.A. California State University, Long Beach, *Lecturer of Education*

Ian Straughn, Ph.D. University of Chicago, *Assistant Professor of Teaching of Anthropology; Religious Studies* (archaeology, cultural heritage, middle east and Islamic studies, space and landscape, material culture)

Jeffrey D. Streets, Ph.D. Duke University, *Professor of Mathematics* (geometry and topology)

Anna K. Striedter, Ph.D. University of California, San Diego, *Lecturer of Academic English/English as a Second Language*

Georg F. Striedter, Ph.D. University of California, San Diego, *Professor of Neurobiology and Behavior*

Sabrina Strings, Ph.D. University of California, San Diego, *Assistant Professor of Sociology* (race, gender, embodiment, sociology of medicine, sociology of media)

Suzanne L. Strom, M.D. University of Texas, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Allen R. Stubberud, Ph.D. University of California, Los Angeles, *Professor Emeritus of Electrical Engineering and Computer Science*

Min-Ying Su, Ph.D. University of California, Irvine, *Professor of Radiological Sciences; Physics and Astronomy*

Yang Su, Ph.D. Stanford University, *Associate Professor of Sociology* (social movements and collective action, political sociology, China's political transition)

Luis Suarez-Villa, Ph.D. Cornell University, *Professor Emeritus of Urban Planning and Public Policy*

Mohammad A. Subeh, M.D. Oregon Health Sciences University, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Jeffrey R. Suchard, M.D. University of California, Los Angeles, *Associate Dean of Basic Science Education and Professor of Emergency Medicine*

Gabriel R. Sudario, M.D. University of California, San Francisco, *Health Sciences Clinical Instructor of Emergency Medicine*

Erik B. Sudderth, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Computer Science; Statistics* (artificial intelligence and machine learning, computer vision, statistics and statistical theory)

Christine Suetterlin, Ph.D. University of Basel, *Associate Professor of Developmental and Cell Biology* (centrosome and cilia regulation, Golgi, host-pathogen interaction)

Naomi Sugie, Ph.D. Princeton University, *Associate Professor of Criminology, Law and Society; Sociology* (sociology of crime and punishment, inequality, families, demography, methods, new technologies for data collection)

Serk Bae Suh, Ph.D. University of California, Los Angeles, *Associate Professor of Korean* (modern Korean literature)

Katumi Sumikawa, Ph.D. Imperial College London, *Professor of Neurobiology and Behavior*

Coral Sun, M.D. University of Florida, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Lizhi Sun, Ph.D. University of California, Los Angeles, *Professor of Civil and Environmental Engineering* (micro- and nano-mechanics, composites and nanocomposites, smart materials and structures, multiscale modeling, elastography)

Sha Sun, Ph.D. University of Chicago, *Assistant Professor of Developmental and Cell Biology* (long noncoding RNAs in epigenetic programming)

Zheng Sun, Ph.D. New York University, *Associate Professor of Paul Merage School of Business*

Shuichi Suzuki, M.D. Kitasato University, *Associate Professor of Neurological Surgery; Neurology*

Morgan L. Swank, M.D. Creighton University, *Health Sciences Clinical Instructor of Obstetrics and Gynecology*

Eric Swanson, Ph.D. Stanford University, *Professor of Economics*

James M. Swanson, Ph.D. Ohio State University, *Professor Emeritus of Pediatrics*

Vivek Swarup, Ph.D. University of Laval, *Assistant Professor of Neurobiology and Behavior*

A. Lee Swindlehurst, Ph.D. Stanford University, *Professor of Electrical Engineering and Computer Science* (signal processing, estimation and detection theory, applications in wireless communications, geo-positioning, radar, sonar, biomedicine)

Bryan Sykes, Ph.D. University of California, Berkeley, *Associate Professor of Criminology, Law and Society; Program in Public Health; Sociology* (demography, criminology, research methods, health, social inequality, statistics)

Elizabeth Symanski, M.S.N. University of California, Irvine, *Health Sciences Clinical Instructor of Nursing*

Richard Symanski, Ph.D. Syracuse University, *Professor of Teaching of Ecology and Evolutionary Biology*

Celia Symons, Ph.D. University of California, San Diego, *Assistant Professor of Ecology and Evolutionary Biology*

Michael F. Szalay, Ph.D. Johns Hopkins University, *Department Chair and Professor of English; Film and Media Studies; Visual Studies* (contemporary television and literature)

Rein Taagepera, Ph.D. University of Delaware, *Professor Emeritus of Political Science*

Peter Taborek, Ph.D. California Institute of Technology, *Professor of Physics and Astronomy*

Timothy Tackett, Ph.D. Stanford University, *Professor Emeritus of History*

Yona Tadir, M.D. Tel Aviv University, *Adjunct Professor of Surgery*

Agnes Taffard, Ph.D. University of Liverpool, *Professor of Physics and Astronomy*

Haithem Taha, Ph.D. Virginia Polytechnic Institute and State University, *Assistant Professor of Mechanical and Aerospace Engineering* (geometric nonlinear control theory; unsteady aerodynamics and aeroelasticity; optimization, calculus of variations and optimal control; flight dynamics and autopilot design; airplane performance and configuration aerodynamics)

Timothy Tait, Ph.D. Michigan State University, *Department Chair and Professor of Physics and Astronomy*

Fumiko Tajima, Ph.D. University of Tokyo, *Lecturer of Physics and Astronomy*

Toshiki Tajima, Ph.D. University of California, Irvine, *UCI Endowed Chair and Adjunct Professor of Physics and Astronomy*

Ronald Takemoto, M.D. University of Southern California, *Health Sciences Clinical Professor of Physical Medicine and Rehabilitation*

Shauhin A. Talesh, J.D., Ph.D. University of Connecticut, University of California, Berkeley, *Director, Law and Graduate Studies Program and Professor of School of Law; Criminology, Law and Society; Sociology*

Eli Talmor, Ph.D. University of North Carolina at Chapel Hill, *Professor Emeritus of Paul Merage School of Business*

Harry H. Tan, Ph.D. University of California, Los Angeles, *Professor Emeritus of Electrical Engineering and Computer Science* (communication and information theory, stochastic processes)

Ming Tan, M.D. Johns Hopkins University, *Professor of Microbiology and Molecular Genetics; Medicine*

Theresa Tanenbaum, Ph.D. Simon Fraser University, *Assistant Professor of Informatics* (digital games and narrative, tangible and wearable interaction, maker and DIY culture, nonverbal communication and virtual worlds)

William C. Tang, Ph.D. University of California, Berkeley, *Professor of Biomedical Engineering; Chemical and Biomolecular Engineering; Electrical Engineering and Computer Science* (micro-electro-mechanical systems (MEMS) nanoscale engineering for biomedical applications, microsystems integration, microimplants, microbiomechanics, microfluidics)

Sora P. Tanjasiri, Ph.D. University of California, Los Angeles, *Professor of Epidemiology*

Dawn T. Tanner, M.D. Creighton University, *Health Sciences Clinical Instructor of Radiological Sciences*

Jeremiah Tao, M.D. University of South Carolina, *Health Sciences Associate Clinical Professor of Ophthalmology*

Blanca Tapia-Zuniga, M.D. University of California, Irvine, *Health Sciences Assistant Clinical Professor of Family Medicine*

Sharief K. Taraman, M.D. Wayne State University, *Health Sciences Clinical Professor of Pediatrics*

William B. Tate, J.D. Stanford University, *Lecturer of School of Law*

Candice E. Taylor, M.D. University of Southern California School of Medicine, *Health Sciences Assistant Clinical Professor of Pediatrics*

Darryl Taylor, D.M.A. University of Michigan, *Professor of Music; African American Studies*

Richard N. Taylor, Ph.D. University of Colorado Boulder, *Professor Emeritus of Informatics* (software engineering, user interfaces, environments, team support)

Emily Taylor Poppe, J.D. Northwestern University School of Law, *Assistant Professor of School of Law*

Jamshid Tehranzadeh, M.D. Pahlavi University, *Professor Emeritus of Radiological Sciences*

Andrea Tenner, Ph.D. University of California, San Diego, *Professor of Molecular Biology and Biochemistry; Neurobiology and Behavior*

Rei Terada, Ph.D. Boston University, *Professor of Comparative Literature; Culture and Theory* (theory, poststructuralism, nineteenth- and twentieth-century poetry)

Chuu-Lian Terng, Ph.D. Brandeis University, *Professor Emerita of Mathematics* (differential geometry and integrable systems)

Alan Terricciano, M.A. Eastman School of Music, *Associate Dean for Undergraduate Affairs and Professor of Dance; Music* (music for dance, musical resources, critical issues in dance, music theory, keyboard skills, and repertoire)

Jennifer Terry, Ph.D. University of California, Santa Cruz, *Professor of Gender and Sexuality Studies; Comparative Literature* (cultural studies, social theory; science and technology studies, formations of gender and sexuality, critical approaches to modernity, American studies in transnational perspective, processes of militarization)

Michael Tesler, Ph.D. University of California, Los Angeles, *Associate Professor of Political Science* (American politics, race, ethnicity and politics, quantitative methods)

Krishnansu S. Tewari, M.D. University of California, Irvine, *Professor of Obstetrics and Gynecology*

Gaby T. Thai, M.D. Tufts University, *Health Sciences Professor of Neurology*

Julian F. Thayer, Ph.D. New York University, *Professor of Psychological Science* (health psychology, psychopathology, health disparities, heart rate variability, emotions, stress)

Debra S. Thiercof, M.S. California State University, Fullerton, *Lecturer of Academic English/English as a Second Language*

Ngugi Wa Thiong'O, B.A. Makerere University, *UCI Distinguished Professor of Comparative Literature; English* (African and Caribbean literatures, theater and film, performance studies, cultural and political theory)

Brook Thomas, Ph.D. University of California, Santa Barbara, *UCI Chancellor's Professor Emeritus of English* (U.S. literature and culture, law and literature, literature and history)

Leslie M. Thompson, Ph.D. University of California, Irvine, *Chancellor's Professor and Donald Bren Professor of Psychiatry and Human Behavior; Biological Chemistry; Neurobiology and Behavior*

Philip D. Thompson, M.F.A. University of California, Irvine, *Professor of Drama* (voice, speech for actors, acting)

William C. Thompson, Ph.D. Stanford University, *Professor Emeritus of Criminology, Law and Society; Psychological Science; School of Law* (psychology and law, criminal justice, forensic science, expert evidence, human judgment and decision making, use of social science in appellate litigation)

Katherine L. Thompson-Peer, Ph.D. Harvard Medical School, *Assistant Professor of Developmental and Cell Biology* (investigating how neurons respond and recover after injury)

Danielle M. Thomsen, Ph.D. Cornell University, *Assistant Professor of Political Science* (American politics, U.S. congress, political parties, gender and politics)

Alexander W. Thornton, B.S. University of California, Irvine, *Continuing Lecturer of Computer Science*

Kevin Thornton, Ph.D. University of Chicago, *Associate Professor of Ecology and Evolutionary Biology*

Kara L. Thorsen, Ph.D. University of California, Irvine, *Lecturer of Social Ecology*

Beatrice Tice, J.D. Stanford University, *Associate Dean for LL.M. and International Student Programs and Professor of School of Law*

Timothy M. Tift, M.A. Pepperdine University, *Associate Professor of Teaching Emeritus of Education*

David Timberlake, Ph.D. University of California, San Diego, *Associate Professor of Program in Public Health*

Roberto Tinoco, Ph.D. University of California, San Diego, *Assistant Professor of Molecular Biology and Biochemistry*

Elizabeth Tinsley, Ph.D. Otani University, *Assistant Professor of Religious Studies; Chinese* (Buddhism in East Asia, Japanese Buddhism, East Asian religions, Buddhist visual and textual cultures, visual theory)

Heidi E. Tinsman, Ph.D. Yale University, *Department Chair and Professor of History; Gender and Sexuality Studies* (Latin America, gender and sexuality, world history)

Katharine Tinto, J.D. New York University, *Assistant Clinical Professor of School of Law*

Pornchai Tirakitsoontorn, M.D. University of California, San Diego, *Health Sciences Associate Clinical Professor of Pediatrics*

Susan M. Tiso, D.N.P. George Washington University, *Health Sciences Clinical Professor of Nursing*

George E. Tita, Ph.D. Carnegie Mellon University, *Professor of Criminology, Law and Society; Urban Planning and Public Policy* (criminology, community context of violence, urban youth gangs, homicide studies)

Edriss S. Titi, Ph.D. Indiana University, *Professor Emeritus of Mathematics* (analysis and partial differential equations, applied and computational mathematics)

Hector Tobar, M.F.A. University of California, Irvine, *Associate Professor of Chicano/Latino Studies; English* (storytelling, literature, history of Los Angeles, Latin American history, Latino history)

Douglas J. Tobias, Ph.D. Carnegie Mellon University, *Department Chair and Professor of Chemistry* (atmospheric and environmental, chemical biology, physical chemistry and chemical physics, theoretical and computational)

Jerome S. Tobis, M.D. Chicago Medical School, *Professor Emeritus of Physical Medicine and Rehabilitation*

Harold E. Toliver, Ph.D. University of Washington, *Professor Emeritus of English*

Francesco Tombola, Ph.D. University of Padua, *Associate Professor of Physiology and Biophysics*

William M. Tomlinson, Ph.D. Massachusetts Institute of Technology, *Professor of Informatics; Education* (environmental informatics, educational technology, computer graphics/visualization/digital arts)

Corey Tong, M.D. Robert Wood Johnson Medical School, *Health Sciences Clinical Instructor of Anesthesiology and Perioperative Care*

Andrew T. Tonkovich, M.F.A. University of California, Irvine, *Lecturer of English*

Grace Tonner, J.D. Loyola Marymount University, *Clinical Professor of Law of School of Law*

Julianne S. Toohey, M.D. University of California, Irvine, *Health Sciences Clinical Professor of Obstetrics and Gynecology*

Shannon L. Toohey Dean, M.D. University of California, Irvine, *Assistant Professor of Emergency Medicine*

Nojan Toomari, M.D. Western University of Health Sciences, *Health Sciences Clinical Instructor of Surgery*

Steven Topik, Ph.D. University of Texas at Austin, *Professor Emeritus of History* (Brazil, Latin America, world history, commodities especially coffee, the state in the economy)

Keith Topper, Ph.D. University of California, Los Angeles, *Associate Professor of Political Science; Culture and Theory* (political theory, critical theory, poststructuralism, theories of power, language and politics, theory and politics of interpretation, politics of culture, philosophy of the social sciences)

Jason D. Toranto, M.D. University of Michigan, *Health Sciences Assistant Clinical Professor of Surgery*

Lillibeth Torno, M.D. University of Santo Tomas, *Health Sciences Associate Clinical Professor of Pediatrics*

Julio R. Torres, Ph.D. Georgetown University, *Assistant Professor of Spanish and Portuguese; Language Science* (heritage and second language acquisition; multilingualism)

Rodolfo D. Torres, Ph.D. Claremont Graduate University, *Professor of Urban Planning and Public Policy; Political Science*

Minodora Totoiu, M.D. University of Medicine and Pharmacy of Targu-Mures, *Health Sciences Clinical Professor of Pediatrics*

Paul E. Touchette, Ed.D. Harvard University, *Recall Non-Senate Academic of Pediatrics*

Anne E. Tournay, MBBS University College London, *Health Sciences Associate Clinical Professor of Pediatrics*

Aaron Trammell, Ph.D. Rutgers University, *Assistant Professor of Visual Studies* (analog games and video games, sound, fan studies, digital subjectivity)

Bao Q. Tran, M.D. Creighton University, *Health Sciences Assistant Clinical Professor of Physical Medicine and Rehabilitation*

Huy T. Tran, M.D. Western University of Health Sciences, *Health Sciences Professor of Family Medicine*

Lily H. Tran, M.D. University of Rochester, *Health Sciences Clinical Professor of Pediatrics*

Tri Chan Tran, Ph.D. University of California, Los Angeles, *Lecturer of Vietnamese; Vietnamese*

Bernard H. Tranel, Ph.D. University of California, San Diego, *Professor of Language Science*

Judith Treas, Ph.D. University of California, Los Angeles, *UCI Chancellor's Professor of Sociology* (gender, inequality, family, aging and life course, social demography)

David K. Trend, Ph.D. Miami University, *Professor of Art* (visual culture)

Kathleen K. Treseder, Ph.D. Stanford University, *UCI Chancellor's Fellow and Professor of Ecology and Evolutionary Biology*

Virginia L. Trimble, Ph.D. California Institute of Technology, *Professor of Physics and Astronomy*

Lien N. Trinh, M.D. St. George's University, *Health Sciences Clinical Professor of Pediatrics*

Richard J. Triplett, M.A. Otis Art Institute, *Professor Emeritus of Drama* (scenery and costume design, history of design)

Susan E. Trumbore, Ph.D. Columbia University, *Professor of Earth System Science*

Chen S. Tsai, Ph.D. Stanford University, *Distinguished Professor of Electrical Engineering and Computer Science* (integrated microwave magnetics, Ultrasonic Atomization for Nanoparticles Synthesis, silicon photonics)

Fong Y. Tsai, M.D. Taipei Medical University, *Senate Emeritus of Radiological Sciences*

Shiou-Chuan (Sheryl) Tsai, Ph.D. University of California, Berkeley, *Professor of Molecular Biology and Biochemistry; Chemistry; Pharmaceutical Sciences*

Wei Kang (Kevin) Tsai, Ph.D. Massachusetts Institute of Technology, *Professor Emeritus of Electrical Engineering and Computer Science* (data communication networks, control systems)

Li Sheng Tseng, Ph.D. University of Chicago, *Associate Professor of Mathematics* (geometry and topology, mathematical physics)

Peter Tseng, Ph.D. University of California, Los Angeles, *Assistant Professor of Electrical Engineering and Computer Science; Biomedical Engineering* ((bio) Micro-Electro-Mechanical systems, wearable technology, materials-by-design, bioelectromagnetism, nanotechnology)

Gene Y. Tsudik, Ph.D. University of Southern California, *UCI Chancellor's Professor of Computer Science* (computer and network security and privacy; applied cryptography)

Khoa M. Tu, M.D. University of California, Irvine, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Irene Tucker, Ph.D. University of California, Berkeley, *Professor of English* (Victorian studies)

Laura Tucker, Ph.D. University of California, San Diego, *Assistant Professor of Teaching of Physics and Astronomy*

Stephen Tucker, D.M.A. University of California, Los Angeles, *Robert and Marjorie Rawlins Chair in Music and Associate Professor of Music*

John Turner, Ph.D. Carnegie Mellon University, *Associate Professor of Paul Merage School of Business*

Susan F. Turner, Ph.D. University of North Carolina at Chapel Hill, *Professor of Criminology, Law and Society* (sentencing and corrections, applied research methods)

Kristin E. Turney, Ph.D. University of Pennsylvania, *Associate Professor of Sociology; Criminology, Law and Society* (social inequality, family demography, population health, incarceration and punishment, intergenerational transmission of disadvantage, child well-being)

Rajeev Tyagi, Ph.D. University of Pennsylvania, *Walter B. Gerken Chair in Enterprise and Society and Professor of Paul Merage School of Business*

Martin Tynan, M.D. Trinity College, *Health Sciences Professor of Orthopaedic Surgery*

Carole J. Uhlaner, Ph.D. Harvard University, *Professor Emeritus of Political Science* (comparative political behavior, formal theory/social choice)

Kojiro Umezaki, M.A. Dartmouth College, *Professor of Music; Computer Science*

Robert M. Uriu, Ph.D. Columbia University, *Associate Professor of Political Science* (international relations, international political economy, international politics of East Asia/Japan, U.S. foreign policy toward East Asia)

Jessica Utts, Ph.D. Pennsylvania State University, *Professor Emeritus of Statistics*

Cherry C. Uy, M.D. Far Eastern University, *Health Sciences Professor of Pediatrics*

Mark Vagins, Ph.D. Yale University, *Adjunct Professor of Physics and Astronomy*

Duane J. Vajgrt, M.D. University of California, San Francisco, *Health Sciences Professor of Radiological Sciences*

Shermeen B. Vakharia, M.D. Aga Khan University, *Health Sciences Clinical Professor of Anesthesiology and Perioperative Care*

Lorenzo Valdevit, Ph.D. Princeton University, *Director of Institute for Design and Manufacturing Innovation (IDMI) and Associate Professor of Materials Science and Engineering; Mechanical and Aerospace Engineering* (architected materials, mechanical metamaterials, additive manufacturing, optimal design)

Alfonso Valdez, Ph.D. University of Southern California, *Lecturer of Social Sciences*

Georges Y. Van Den Abbeele, Ph.D. Cornell University, *Professor of Comparative Literature; English; European Languages and Studies* (French and European philosophical literature, travel narrative and tourism/migration studies, critical theory and aesthetics, francophone literature, history of cartography, media history and theory)

Richard A. Van Etten, M.D., Ph.D. Stanford University, *Director, Chao Family Comprehensive Cancer Center; Chao Family Endowed Director's Chair in Cancer Research and Treatment and Senior Associate Dean and Associate Vice Chancellor for Cancer and Professor of Medicine; Biological Chemistry*

Ann J. Van Sant, Ph.D. University of California, Berkeley, *Associate Professor Emerita of English* (restoration and 18th century literature)

André W. Van der Hoek, Ph.D. University of Colorado Boulder, *Professor of Informatics* (software engineering)

Joachim S. Vandekerckhove, Ph.D. University of Leuven, *Associate Professor of Cognitive Sciences; Statistics* (response time modeling, model fitting, computational statistics, psychometrics, bayesian statistics)

Deborah Lowe Vandell, Ph.D. Boston University, *Chancellor's Professor Emerita of Education; Psychological Science* (longitudinal studies of development, early childhood education, after-school programs, summer learning, child development, adolescent development)

Kerry Vandell, Ph.D. Massachusetts Institute of Technology, *Professor Emeritus of Paul Merage School of Business; School of Law; Urban Planning and Public Policy*

Christopher Vanderwal, Ph.D. Scripps Research Institute, *Professor of Chemistry; Pharmaceutical Sciences* (organic and synthetic)

Gerard Vanhoven, Ph.D. Stanford University, *Professor Emeritus of Physics and Astronomy*

Roxanne Varzi, Ph.D. Columbia University, *Professor of Anthropology; Culture and Theory; Film and Media Studies; Religious Studies; Visual Studies* (Iran, media, war, visual anthropology, film studies, ethnographic and fiction writing)

Douglas Vaughn, M.D. Drexel University, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Vijay Vazirani, Ph.D. University of California, Berkeley, *Distinguished Professor of Computer Science* (algorithms and complexity, scientific and numerical computing)

Nosratola D. Vaziri, M.D. University of Tehran, *Professor Emeritus of Medicine; Physiology and Biophysics*

Joel R. Veenstra, M.F.A. University of California, Irvine, *Co-Head of Stage Management and Associate Professor of Teaching of Drama* (stage management, acting)

Charles P. Vega, M.D. University of Wisconsin-Madison, *Assistant Dean of Cultural and Community Education and Health Sciences Clinical Professor of Family Medicine*

Irene I. Vega, Ph.D. University of California, Los Angeles, *Assistant Professor of Sociology* (international migration, socio-legal studies, race/ethnicity, educational inequality)

Alexander Veidenbaum, Ph.D. University of Illinois at Urbana-Champaign, *Professor of Computer Science* (computer architecture, embedded systems, compilers, programming languages and systems, database and data mining)

Isabella Velicogna, Ph.D. Università degli Studi di Trieste, *UCI Chancellor's Fellow and Professor of Earth System Science*

Swapna Vemuri, M.D. Wayne State University, *Health Sciences Clinical Instructor of Ophthalmology*

Nalini Venkatasubramanian, Ph.D. University of Illinois at Urbana-Champaign, *Professor of Computer Science* (multimedia computing, networks and distributed systems, global information infrastructure, multiple resource management services)

Alladi Venkatesh, Ph.D. Syracuse University, *Professor of Paul Merage School of Business* (social impacts of information technology, Internet and the New Economy, Smart Home technologies, children and multimedia)

Vasan Venugopalan, Sc.D. Massachusetts Institute of Technology, *Department Chair and Professor of Chemical and Biomolecular Engineering; Biomedical Engineering; Materials Science and Engineering; Mechanical and Aerospace Engineering; Surgery* (laser-generated thermal, mechanical and radiative transport processes for application in medical diagnostics, imaging, therapeutics, biotechnology)

Sunil P. Verma, M.D. University of Southern California, *Assistant Dean of Workforce Development and Health Sciences Associate Clinical Professor of Otolaryngology; Music*

Roman Vershynin, Ph.D. University of Missouri-Columbia, *Professor of Mathematics* (probability, data science)

Jeffrey Viaclovsky, Ph.D. Princeton University, *Professor of Mathematics* (differential geometry, geometric analysis)

Veronica M. Vieira, D.Sc. Boston University, *Professor of Program in Public Health; Environmental Health Sciences*

James D. Vigil, Ph.D. University of California, Los Angeles, *Professor Emeritus of Criminology, Law and Society* (urban research, urban poverty, culture change, socialization and education, psychological anthropology, street gangs in cross-cultural perspective, Mexico and U.S. southwestern ethnohistory, comparative ethnicity)

S. Armando Villalta, Ph.D. University of California, Los Angeles, *Assistant Professor of Physiology and Biophysics; Neurology*

Luis P. Villarreal, Ph.D. University of California, San Diego, *Professor Emeritus of Molecular Biology and Biochemistry*

Roberto Villaverde, Ph.D. University of Illinois at Urbana-Champaign, *Professor Emeritus of Civil and Environmental Engineering* (structural dynamics and earthquake engineering)

Adriana Villavicencio, Ph.D. New York University, *Assistant Professor of Education*

Juan Villegas, Ph.D. University of Chile, *Professor Emeritus of Spanish and Portuguese*

Catherine Vimuttinan, M.A. University of Southern California, *Lecturer of Academic English/English as a Second Language*

Baoquan N. Vo, M.D. University of California, San Francisco, *Health Sciences Assistant Clinical Professor of Family Medicine*

Samantha Vortherms, Ph.D. University of Wisconsin, Madison, *Assistant Professor of Political Science* (comparative political economy, development, social welfare)

David Van Vranken, Ph.D. Stanford University, *Associate Dean of the School of Physical Sciences and Professor of Chemistry* (organic and synthetic)

Jasper A. Vrugt, Ph.D. University of Amsterdam, *Associate Professor of Civil and Environmental Engineering; Earth System Science* (examining how (eco)systems work, why theories deviate from data, how scientists diagnose change, as applied to biogeosciences, ecology, geomorphology, geophysics, hydrology, soils)

Trung Q. Vu, M.D. University of California, Irvine, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

K. Mark Vuchinich, M.D. University of California, San Diego, *Health Sciences Professor of Obstetrics and Gynecology*

Linda T. Võ, Ph.D. University of California, San Diego, *Professor of Asian American Studies; Culture and Theory; Sociology; Urban Planning and Public Policy* (race and ethnic relations, immigrants and refugees, gender relations, community and urban studies)

Matthew Wade, M.D. George Washington University, *Health Sciences Assistant Clinical Professor of Ophthalmology*

Wilima Wadhwa, Ph.D. University of California, Irvine, *Lecturer of Economics*

Feizal Waffarn, MBBS University of Madras, *Professor Emeritus of Pediatrics*

Akio Wakabayashi, M.D. University of Tokyo, *Professor Emeritus of Surgery*

Amanda Jane Walker, M.F.A. University of California, Los Angeles, *Lecturer of Music*

Richard F. Wallis, Ph.D. Catholic University of America, *Professor Emeritus of Physics and Astronomy*

Craig Walsh, Ph.D. University of California, Los Angeles, *Professor of Molecular Biology and Biochemistry*

Katharine R. Walsh, Ph.D. University of California, Irvine, *Lecturer of Humanities*

Philip Walsh, Ph.D. University of California, Irvine, *Lecturer of Humanities*

Roger Walsh, Ph.D. University of Queensland, *Professor of Psychiatry and Human Behavior; Religious Studies*

Mark Walter, Ph.D. California Institute of Technology, *Professor of Teaching of Mechanical and Aerospace Engineering* (mechanics of multifunctional materials, building energy efficiency)

Anne Walthall, Ph.D. University of Chicago, *Professor Emerita of History*

Daqing Wan, Ph.D. University of Washington, *Professor of Mathematics* (algebra and number theory)

Frederic Yui-Ming Wan, Ph.D. Massachusetts Institute of Technology, *Professor Emeritus of Mathematics* (applied and computational mathematics, mathematical and computational biology)

Annabel Wang, M.D. McGill University, *Health Sciences Associate Clinical Professor of Neurology*

Beverly Wang, M.D. Jiangxi Medical College, *Professor of Pathology and Laboratory Medicine; Otolaryngology*

Feng Wang, Ph.D. University of Michigan, *Professor of Sociology* (contemporary demographic, economic, and social processes, social inequality in state socialisms, contemporary China)

Ping H. Wang, M.D. Harvard University, *Professor of Medicine; Physiology and Biophysics*

Raymond Wang, M.D. University of California, Los Angeles, *Health Sciences Clinical Professor of Pediatrics*

Richert Wang, Ph.D. University of California, Irvine, *Lecturer of Computer Science*

Szu-Wen Wang, Ph.D. Stanford University, *Professor of Chemical and Biomolecular Engineering; Biomedical Engineering* (combining principles of self-assembly with nature-inspired macromolecular systems to engineer new materials and therapeutic strategies)

Tommy Wang, M.D. Albany Medical College, *Health Sciences Assistant Clinical Professor of Pediatrics*

Tong Wang, M.F.A. University of Utah; Principal dancer with the Shanghai Ballet, Tulsa Ballet Theatre, Dayton Ballet, Ballet West, *Associate Professor of Dance* (ballet, choreography, men's ballet, pas de deux)

Wenqi Wang, Ph.D. Shanghai Institutes for Biological Sciences, *Assistant Professor of Developmental and Cell Biology* (the signaling networks underlying tissue homeostasis and organ size control)

Yun Wang, Ph.D. Pennsylvania State University, *Professor of Mechanical and Aerospace Engineering* (fuel cells, computational modeling, thermo-fluidics, two-phase flows, electrochemistry, Computational Fluid Dynamics (CFD), turbulent combustion)

Zhiying Wang, Ph.D. California Institute of Technology, *Assistant Professor of Electrical Engineering and Computer Science* (information theory, coding theory for data storage, modeling, compression, and computation for genomic data)

Geoff Ward, Ph.D. University of Michigan, *Associate Professor of School of Law; School of Law*

Andrzej J. Warminski, Ph.D. Yale University, *Associate Dean for Academic Personnel and Professor of English; Humanities* (romanticism, history of literary theory, contemporary theory, literature and philosophy)

Rahul Warrior, Ph.D. Yale University, *Associate Professor of Developmental and Cell Biology* (developmental genetics of transcription and proteoglycan synthesis)

Mark J. Warschauer, Ph.D. University of Hawaii at Manoa, *Professor of Education; Informatics* (language, literacy, technology, STEM)

Gregory N. Washington, Ph.D. North Carolina State University at Raleigh, *Professor Emeritus of Mechanical and Aerospace Engineering* (dynamic systems with emphasis on modeling and control of smart material systems and devices)

Jeffrey N. Wasserstrom, Ph.D. University of California, Berkeley, *UCI Chancellor's Professor of History; School of Law* (modern China, protest, world history)

Marian L. Waterman, Ph.D. University of California, San Diego, *Professor of Microbiology and Molecular Genetics*

Martin P. Wattenberg, Ph.D. University of Michigan, *Professor of Political Science* (American and comparative political behavior)

Jacqueline Y. Way, Ph.D. University of California, Irvine, *Lecturer of English*

James O. Weatherall, Ph.D. Stevens Institute of Technology, *Professor of Logic and Philosophy of Science*

Zidia O. Webb, M.A. Michigan State University, *Associate Professor of Teaching Emeritus of Spanish and Portuguese*

Libby Weber, Ph.D. University of Southern California, *Associate Professor of Paul Merage School of Business*

Steven L. Wechsler, Ph.D. University of North Carolina at Chapel Hill, *Professor of Ophthalmology*

Kai Wehmeier, Ph.D. University of Münster, *Director, Center for the Advancement of Logic, its Philosophy, History, and Applications and Professor of Logic and Philosophy of Science; Language Science; Philosophy*

Henry Weinstein, J.D. University of California, Berkeley, *Professor of School of Law*

Arthur Weis, Ph.D. University of Illinois at Urbana-Champaign, *Professor Emeritus of Ecology and Evolutionary Biology*

Gregory A. Weiss, Ph.D. Harvard University, *Professor of Chemistry; Molecular Biology and Biochemistry; Pharmaceutical Sciences* (analytical, chemical biology, organic and synthetic, polymer, materials, nanoscience)

John H. Weiss, M.D., Ph.D. Stanford University, *Professor of Neurology; Anatomy and Neurobiology*

Stephen G. Weller, Ph.D. University of California, Berkeley, *Professor Emeritus of Ecology and Evolutionary Biology*

Patricia A. Wellmeyer, M.S. California State University, Fullerton, *Assistant Professor of Teaching of Paul Merage School of Business*

Tracie A. Welser, M.A. University of South Florida, *Senior Lecturer of Undergraduate Education*

Christopher H. Wen, M.D. Baylor College of Medicine, *Health Sciences Associate Clinical Professor of Radiological Sciences*

Lari B. Wenzel, Ph.D. Arizona State University, *Professor of Medicine; Program in Public Health*

Frank J. Wessel, Ph.D. University of California, Irvine, *Project Scientist of Physics and Astronomy*

Robert W. West, Ph.D. University of Michigan, *Professor Emeritus of Mathematics* (algebraic topology)

Joel J. Westman, Ph.D. University of California, Los Angeles, *Professor Emeritus of Mathematics* (analysis)

Douglas R. White, Ph.D. University of Minnesota, *Professor Emeritus of Anthropology*

Nicholas P. White, Ph.D. Harvard University, *Professor Emeritus of Philosophy*

Stephen H. White, Ph.D. University of Washington, *Professor Emeritus of Physiology and Biophysics*

Steven R. White, Ph.D. Cornell University, *Professor of Physics and Astronomy*

Daniel Whiteson, Ph.D. University of California, Berkeley, *Professor of Physics and Astronomy; Logic and Philosophy of Science*

Katrine Whiteson, Ph.D. University of Chicago, *Assistant Professor of Molecular Biology and Biochemistry*

Cécile Marie Whiting, Ph.D. Stanford University, *Chancellor's Professor of Art History; Visual Studies* (American art, 20th century visual culture)

Robert J. Whitley, Ph.D. New Mexico State University, *Professor Emeritus of Mathematics* (analysis)

Christopher A. Whytock, J.D. Georgetown University, *Professor of School of Law; Political Science*

H. Kumar Wickramasinghe, Ph.D. University of London, *Henry Samueli Endowed Chair in Engineering and Professor of Electrical Engineering and Computer Science; Biomedical Engineering* (nanoscale measurements and characterization, scanning probe microscopy, storage technology, nano-bio measurement technology)

Warren F. Wiechmann, M.D., M.B.A. University of California, Irvine, *Associate Dean of Clinical Science Education and Associate Dean of Education Technology and Associate Professor of Emergency Medicine*

Jonathan M. Wiener, Ph.D. Harvard University, *Professor Emeritus of History*

Margarethe Wiersema, Ph.D. University of Michigan, *Professor of Paul Merage School of Business*

Jamie Wikenheiser, Ph.D. Case Western Reserve University, *Associate Adjunct Professor of Anatomy and Neurobiology*

Petra E. Wilder-Smith, Ph.D. University of Bern, *Associate Professor in Residence of Surgery*

Frank B. Wilderson III, Ph.D. University of California, Berkeley, *Department Chair and Professor of African American Studies; Culture and Theory* (Afro-Pessimism, film theory, Marxism, narratology)

Amy Wilentz, B.A. Harvard University, *Professor of English* (formal mechanisms of literary journalism, travel journalism as a literary form, explanatory journalism, role of journalism for the everyday reader)

Janet L. Williams, Ph.D. Brandeis University, *Professor Emerita of Mathematics* (probability and statistics)

Kirk Williams, Ph.D. University of Arizona, *Professor of Criminology, Law and Society; Sociology* (family violence, youth violence, homicide studies, risk assessment, violence prevention program evaluation)

Russell A. Williams, MBBS University of Sydney, *Professor of Surgery*

Tiffany Willoughby-Herard, Ph.D. University of California, Santa Barbara, *Associate Professor of African American Studies; Comparative Literature; Culture and Theory; Political Science* (South Africa, poor whites, race in foreign policy, diaspora, comparative racial politics, third world feminisms, feminist pedagogy, black political thought)

Samuel E. Wilson, M.D. Wayne State University, *Professor of Surgery*

William C. Wilson, M.D. Temple University, *Chief Medical Officer for UCI Health and Health Sciences Professor of Anesthesiology and Perioperative Care*

Jessica L. Wimer, J.D. Indiana University, *Associate Dean for the Law Library and Research Professor of School of Law*

Deborah A. Wing, M.D. Tulane University, *Professor in Residence of Obstetrics and Gynecology*

Bert Winther-Tamaki, Ph.D. New York University, *Department Chair and Professor of Art History; Asian American Studies; Visual Studies* (modern Japanese art and visual culture, Asian American art, art and globalization)

Dolores Wirth, M.A. California State University, Fullerton, *Lecturer of Education*

Garrett A. Wirth, M.D. Albany Medical College, *Health Sciences Associate Clinical Professor of Surgery*

Dominik Franz X. Wodarz, Ph.D. Oxford University, *Professor of Ecology and Evolutionary Biology; Mathematics*

Brandon S. Wolff, M.A. University of San Francisco, *Lecturer of Academic English/English as a Second Language*

Geoffrey Wolff, B.A. Princeton University, *Professor Emeritus of English*

Jesse Wolfson, Ph.D. Northwestern University, *Assistant Professor of Mathematics* (topology)

Yoon Jin Won, Ph.D. Stanford University, *Assistant Professor of Mechanical and Aerospace Engineering; Chemical and Biomolecular Engineering* (multi-scale structures for thermal and energy applications, in particular fabrication, characterization, and integration of structured materials)

Brian Wong, M.D. Johns Hopkins University, *Professor of Otolaryngology; Biomedical Engineering*

Edward K. Wong, M.D. University of Southern California, *Professor Emeritus of Ophthalmology*

Karna Wong, Ph.D. University of California, Los Angeles, ; *Asian American Studies*

Nathan D. Wong, Ph.D. Yale University, *Adjunct Professor of Medicine; Epidemiology*

Waylan Wong, M.D. University of California, San Diego, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Jennifer Wong-Ma, Ph.D. University of California, Los Angeles, *Associate Professor of Teaching of Computer Science* (computer architecture and design, embedded systems, hardware intellectual property protection, statistical optimization)

Marcelo A. Wood, Ph.D. Princeton University, *UCI Chancellor's Fellow and Department Chair and Professor of Neurobiology and Behavior*

Peter W. Woodruff, Ph.D. University of Pittsburgh, *Professor Emeritus of Philosophy*

Clifford A. Woolfolk, Ph.D. University of Washington, *Professor Emeritus of Molecular Biology and Biochemistry*

Alisa V. Wray, M.D. Tulane University, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

S. Ama Wray, Ph.D. University of Surrey, *Associate Professor of Dance; African American Studies* (jazz, choreography, improvisation, teaching of dance, jazz ensemble)

Charles E. Wright, Ph.D. University of Michigan, *Associate Professor of Cognitive Sciences* (cognitive psychology, human motor control, fitts task, aimed movements, handwriting, immersive virtual reality, 1/f noise, quantitative models)

Valerie L. Wright, Ph.D. Fuller Theological Seminary, *Lecturer of Social Sciences*

Judy Tzu-Chun Wu, Ph.D. Stanford University, *Director of Humanities Center and Chancellor's Professor of Asian American Studies; Culture and Theory* (Asian American history; comparative racialization and immigration; empire and decolonization; gender and sexuality)

Jun Wu, Ph.D. University of California, Los Angeles, *Associate Professor of Program in Public Health; Environmental Health Sciences*

Patrick Wu, M.D. University of Virginia, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Ruqian Wu, Ph.D. Institute of Physics, Chinese Academy of Science, *Professor of Physics and Astronomy*

Sing-Yung Wu, M.D. Johns Hopkins University, *Senate Emeritus of Radiological Sciences*

Roberta Wue, Ph.D. New York University, *Associate Professor of Art History; Visual Studies* (modern Chinese art, photography, print culture)

Zeba Wunderlich, Ph.D. Harvard University, *Assistant Professor of Developmental and Cell Biology* (understanding the organization of regulatory information in the genome)

Jing Xia, Ph.D. Stanford University, *Professor of Physics and Astronomy*

Xiaohui Xie, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Computer Science; Developmental and Cell Biology* (computational biology, bioinformatics, genomics, neural computation, machine learning)

Huolin Xin, Ph.D. Cornell University, *Assistant Professor of Physics and Astronomy; Materials Science and Engineering*

Jack Xin, Ph.D. New York University, *Chancellor's Professor of Mathematics* (applied and computational mathematics, mathematical and computational biology, probability)

Mingdi Xin, Ph.D. New York University, *Assistant Professor of Paul Merage School of Business*

Danli L. Xing, M.D. Robert Wood Johnson Medical School, *Health Sciences Clinical Instructor of Ophthalmology*

Di Xu, Ph.D. Columbia University, *Associate Professor of Education*

Xiangmin Xu, Ph.D. Vanderbilt University, *Professor of Anatomy and Neurobiology; Biomedical Engineering; Computer Science*

Vahid Yaghmai, M.D. New York Medical College, *Department and Hasso Brothers Endowed Chair in Radiological Sciences and Health Sciences Clinical Professor of Radiological Sciences*

Guiyun Yan, Ph.D. University of Vermont, *Professor of Program in Public Health; Ecology and Evolutionary Biology*

David Yang, Ph.D. Harvard University, *Assistant Professor of Paul Merage School of Business*

Jann N. Yang, DSc Columbia University, *Professor Emeritus of Civil and Environmental Engineering* (system identification and damage detection, structural health monitoring, structural control, earthquake engineering, structural dynamics)

Jenny Y. Yang, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Chemistry* (inorganic and organometallic, organic and synthetic, polymer, materials, nanoscience)

Jing Yang, M.D. Norman Bethune Health Science Center, *Assistant Professor in Residence of Ophthalmology*

Qin Yang, M.D. Ph.D. Nanjing University of Chinese Medicine, Osaka University, *Associate Professor of Medicine; Physiology and Biophysics*

Daniel S. Yanni, M.D. University of California, San Diego, *Assistant Professor of Neurological Surgery*

Michael Yassa, Ph.D. University of California, Irvine, *UCI Chancellor's Fellow and Director of the Center for the Neurobiology of Learning and Memory and Associate Professor of Neurobiology and Behavior*

Albert Fan Yee, Ph.D. University of California, Berkeley, *Professor of Chemical and Biomolecular Engineering; Biomedical Engineering* (physics of polymers and soft materials, and their applications in nanotechnology and biomedical devices. Mechanics and toughening of polymers and composites)

James J. Yeh, Ph.D. University of Minnesota, *Professor Emeritus of Mathematics* (analysis and partial differential equations, probability)

Brent Yeung, M.D. Georgetown University, *Assistant Professor of Anesthesiology and Perioperative Care*

Douglas B. Yim, M.D. University of Southern California, *Health Sciences Associate Clinical Professor of Radiological Sciences; Surgery*

Ilona S. Yim, Ph.D. University of Trier, *Associate Professor of Psychological Science* (stress, pregnancy and postpartum depression, biopsychology of stress, developmental psychobiology)

Hong Zhen Yin, M.D. , *Specialist of Neurology*

Shuya Yin, Ph.D. University of British Columbia, *Associate Professor of Paul Merage School of Business*

Kyoko Yokomori, Ph.D. University of Tokyo, *Professor of Biological Chemistry*

Bruce N. Yonemoto, M.F.A. Otis Art Institute, *Professor of Art; Asian American Studies* (video, experimental media, film theory)

Gregory Y. Yoshikawa, M.D. New York Medical College, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Hiroshi Yoshioka, Ph.D. University of Tsukuba, *Professor in Residence of Radiological Sciences*

Julie H. Youm, Ph.D. Columbia University, *Assistant Dean of Education Compliance and Quality and Assistant Adjunct Professor of Emergency Medicine*

Bassam Younes, M.D. Semmelweis University of Medicine, *Health Sciences Associate Clinical Professor of Pediatrics*

Christopher Young, M.D. Duke University, *Health Sciences Clinical Instructor of Obstetrics and Gynecology*

Maia Young, Ph.D. Stanford University, *Assistant Professor of Paul Merage School of Business*

Robert R. Young, M.D. Harvard University, *Senate Emeritus of Neurology*

Ronald F. Young, Ph.D. State University of New York Downstate Medical Center, *Professor Emeritus of Neurological Surgery*

Homayoun Yousefi'zadeh, Ph.D. University of Southern California, *Adjunct Professor of Electrical Engineering and Computer Science* (communications networks)

Julie N. Youssef, D.O. New York Institute of Technology College of Osteopathic Medicine, *Health Sciences Assistant Clinical Professor of Pediatrics*

Clare C. Yu, Ph.D. Princeton University, *Professor of Physics and Astronomy*

Jin Yu, Ph.D. University of Illinois at Urbana-Champaign, *Assistant Professor of Physics and Astronomy*

Jin Yi Yu, Ph.D. University of Washington, *Vice Chair and Professor of Earth System Science*

Yaming Yu, Ph.D. Harvard University, *Associate Professor of Statistics*

Yifeng Yu, Ph.D. University of California, Berkeley, *Professor of Mathematics* (analysis and partial differential equations)

Zhaoxia Yu, Ph.D. William Marsh Rice University, *Associate Professor of Statistics*

Alyson K. Zalta, Ph.D. University of Pennsylvania, *Assistant Professor of Psychological Science* (clinical psychology, trauma, posttraumatic stress disorder, resilience, prevention, treatment, cognitive behavioral therapy)

David Zamorano, M.D. University of Southern California, *Health Sciences Associate Clinical Professor of Orthopaedic Surgery*

Michael V. Zaragoza, M.D., Ph.D. Case Western Reserve University, *Associate Professor of Pediatrics; Biological Chemistry; Genetic Counseling*

Farzin Zareian, Ph.D. Stanford University, *Associate Professor of Civil and Environmental Engineering* (structural engineering, performance-based earthquake engineering, structural reliability, structural control)

Omaima A. Zayed, Ph.D. University of California, Irvine, *Lecturer of Academic English/English as a Second Language*

Martin Zeman, Ph.D. Humboldt University of Berlin, *Professor of Mathematics; Logic and Philosophy of Science* (logic and foundations)

Charles S. Zender, Ph.D. University of Colorado Boulder, *Professor of Earth System Science; Computer Science*

Fan-Gang Zeng, Ph.D. Syracuse University, *Director of Hearing Research and Professor of Otolaryngology; Anatomy and Neurobiology; Biomedical Engineering; Cognitive Sciences*

Iryna Zenyuk, Ph.D. Carnegie Mellon University, *Associate Director of National Fuel Cell Research Center and Assistant Professor of Chemical and Biomolecular Engineering; Materials Science and Engineering; Mechanical and Aerospace Engineering* (renewable energy, fuel cells, electrolyzers, batteries, X-ray imaging techniques, multi-scale modeling, transport phenomena)

Mei Zhan, Ph.D. Stanford University, *Associate Professor of Anthropology* (medical anthropology, cultural and social studies of science, globalization, transnationalism, gender, China and United States)

Xiangwen Zhang, Ph.D. McGill University, *Assistant Professor of Mathematics* (geometry and topology)

Hong-Kai Zhao, Ph.D. University of California, Los Angeles, *Chancellor's Professor of Mathematics; Computer Science* (applied and computational mathematics, inverse problems and imaging)

Shuang Zhao, Ph.D. Cornell University, *Assistant Professor of Computer Science* (computer graphics with a focus on material appearance modeling and physically-based rendering)

Weian Zhao, Ph.D. McMaster University, *Associate Professor of Pharmaceutical Sciences; Biological Chemistry; Biomedical Engineering; Materials Science and Engineering* (stem cell therapy, diagnostics, biosensors, immunotherapy, single-cell analysis)

Kai Zheng, Ph.D. Carnegie Mellon University, *Associate Professor of Informatics* (health informatics, human factors and human-computer interaction, technology adoption and acceptance, outcomes and evaluation)

Lu Zheng, Ph.D. Yale University, *Professor of Paul Merage School of Business*

Weian Zheng, Ph.D. University of Strasbourg, *Professor Emeritus of Mathematics* (probability theory and financial engineering)

Qun-Yong Zhou, Ph.D. Oregon Health & Science University, *Professor of Pharmaceutical Sciences*

Xiaolin Zi, Ph.D. Shanghai University, *Associate Professor of Urology; Pharmaceutical Sciences*

Joanne F. Zinger, Ph.D. University of California, Riverside, *Associate Professor of Teaching of Psychological Science* (expressive writing, meta-analysis, positive psychology, health psychology, preventive medicine, educational psychology)

Paul Andrew Zissos, Ph.D. Princeton University, *Humanities Language Learning Program Director and Professor of Classics; European Languages and Studies* (Latin epic, medieval Latin, Roman history and culture, Classical reception)

Hadar Ziv, Ph.D. University of California, Irvine, *Associate Professor of Teaching of Informatics* (software testing, requirements engineering, Bayesian modeling)

Mary L. Zupanc, M.D. University of California, Los Angeles, *Health Sciences Clinical Professor of Pediatrics*

Elizabeth van Es, Ph.D. Northwestern University, *Associate Professor of Education* (teacher cognition, pre-service teacher education, in-service teacher professional development, teacher learning communities, uses of video in teacher learning)

# Undergraduate Academic Advising

---

At the time of admission to UCI every undergraduate student is assigned to the school that offers the student's selected major. Students who have indicated "Undergraduate/Undeclared" as a major on their UC application for admission and scholarships receive assistance from the Undergraduate/Undeclared Advising Program until they select an academic major.

Jurisdiction over all questions of academic regulations and academic standing rests with the dean or associate dean of the school to which a student is assigned or, in the case of undergraduate/undeclared majors, with the Dean of the Division of Undergraduate Education. Each academic unit provides academic advising for its students and processes requests to add or drop courses, waive or change graduation or other requirements, or change majors. Students are responsible for knowing the governing regulations of the school or program to which they are assigned.

While each academic unit is responsible for maintaining a system that provides academic advising, these systems differ from unit to unit. All advising offices include academic advisors, professionals who assist students in planning their program, selecting a major, and making progress toward a degree. Peer academic advisors (trained upper-division students) assist students in many of the same areas as academic advisors. In addition, they are able to answer questions related to student life issues, providing a student perspective. Students may find contact information for their academic advising offices here (<https://ps.uci.edu/stuaff/ac.html>).

New students are required to plan their academic programs with an academic counselor shortly after being admitted. New students are sent information regarding group academic advising sessions during the summer prior to matriculation. An academic advisor can help the student determine whether the classes the student wishes to take are appropriate to the student's level of preparation, whether the proposed classes fit within the student's educational goals, and whether the classes will help meet some of the requirements for graduation.

Some schools have faculty advisors, where consultation between students and their faculty advisors is mandatory. Regardless of whether or not consultation between student and advisor is required, students are responsible for initiating and maintaining periodic contact with their assigned faculty advisor. The actual frequency of these meetings is determined by the desires of the student, the advisor, and the unit's governing regulations.

Each quarter, students are encouraged to go to the appropriate academic advising office prior to registration for advice concerning class enrollment.

## Peer Academic Advising Program

684 Aldrich Hall  
949-824-4319  
<http://peeradvisor.uci.edu> (<http://peeradvisor.uci.edu>)

The Peer Academic Advising Program provides valuable services for all UCI undergraduate students. The program provides student-to-student academic counseling based on the academic and personal experiences of fellow UCI students. Peer Academic Advisors (PAAs) are juniors and seniors who rigorously train in academic counseling before beginning work as PAAs. They are found in the academic advising offices of academic units across campus. PAA training prepares them to manage issues related to academic counseling and provides them with a wide knowledge of campus resources available to students, such as the Division of Career Pathways, the Disability Services Center, Financial Aid, Housing, and the Learning and Academic Resource Center (LARC). PAAs can also provide students with information and perspectives that come from their personal experience as successful UCI undergraduates.

During the academic year, PAAs maintain regular office hours in their respective academic units. They assist students with selecting courses to best fit their college and career paths, planning quarterly programs of study, learning about the various majors and minors, information about UCI's resources and opportunities, and simply adjusting to life as UCI undergraduates.

256 Aldrich Hall  
949-824-6987  
<http://uu.uci.edu>

Students who enter the University as freshmen or sophomores may be uncertain about which major they should choose and may not feel ready to declare their major or even to identify their interests with a particular school. Such students participate in the Undergraduate/Undeclared Advising Program, which is administered by the Division of Undergraduate Education. The goal of the Undergraduate/Undeclared Advising Program is to help students make the best informed choice of a major that is possible to meet their academic goals. All students at UCI are required to choose their major by the time they reach junior status.

To make a good decision about which major to declare, students should know the range of programs UCI offers and have some experience with them, have a good knowledge of their own abilities and interests, have clear educational goals, and have a sense of their vocational goals and of the academic programs at UCI that will provide appropriate preparation. Students in the Undergraduate/Undeclared Advising Program receive quarterly individualized staff counseling that helps them explore the variety of course offerings on campus, become more aware of their own interests and abilities, formulate sound educational goals, and learn how to prepare for graduate education and/or possible careers.

To assist students in choosing a major, the program offers a course designed to expose undeclared students to a variety of opportunities and resources available to them and to introduce students to the schools and majors offered. In addition, students learn about research and career opportunities within different disciplines.

# Undergraduate Honors Programs

---

## Campuswide Honors Collegium

**Charles E. Wright, Associate Dean**

1200 Student Services II

949-824-5461

<http://honors.uci.edu>

[honors@uci.edu](mailto:honors@uci.edu)

The Campuswide Honors Collegium is dedicated to promoting high standards of scholastic excellence and personal growth by combining the qualities and support of a liberal arts college with the resources and prestige offered by a major research university. The unique opportunities provided by the Campuswide Honors Collegium for students to learn and engage with other talented and motivated students and with faculty in a supportive learning community help students get the most out of their education, achieve ambitious goals, and prepare for future careers and graduate and professional school.

Special features of the Campuswide Honors Collegium include:

- A General Education curriculum designed especially for honors students and taught by leading faculty
- Undergraduate research under the mentorship of a member of the faculty
- Special activities involving faculty, visiting scholars, and community leaders
- Personalized one-on-one honors academic advising
- Academic workshops and social activities with peers
- Leadership and service activities
- Opportunities for professional development and mentorship
- Honors theme housing
- Four-year eligibility for on-campus housing
- Priority enrollment in courses
- Honors notation on the transcript and the diploma
- Campuswide Honors Alumni chapter

Additional information about opportunities for Campuswide Honors students, the honors curriculum, and admission to the Campuswide Honors Collegium is available on the Campuswide Honors Collegium website (<http://honors.uci.edu/>).

## Requirements for completion

Successful completion of the Campuswide Honors Collegium requires that students take required honors courses, engage in faculty mentored research that culminates in an honors thesis or project, and fulfill Campuswide Honors Collegium GPA requirements. Specifically, students must meet/fulfill the following requirements in order to be certified as completing the Campuswide Honors Collegium:

1. Enroll in a minimum of 12 graded units each quarter
2. Achieve an overall GPA of 3.2 or above by graduation
3. Complete required honors courses with a letter grade of C or better
4. Complete two quarters of research and develop it into an approved honors thesis project

Campuswide Honors Collegium students must also meet various designated academic progress and advising requirements as appropriate.

## How to join the Campuswide Honors Collegium

The Campuswide Honors Collegium seeks to admit students who have a demonstrated passion for learning, a willingness to explore and be challenged, and an interest in pursuing academic excellence in a range of disciplines outside of their major area. **Incoming freshmen** may be admitted to the Campuswide Honors Collegium upon entering the university on the basis of their UCI application. **Incoming transfer students** who have completed a community college honors program with a specific GPA may be eligible for special consideration for admission to the Campuswide Honors Collegium through the Honors to Honors Program agreement with the UCI Office of Admissions (<https://www.admissions.uci.edu/>). **Current UCI students** may also apply to the Campuswide Honors Collegium after completion of at least one quarter at UCI with 12 or more graded units and a grade point average of 3.5 or better. The application is available via the Campuswide Honors Collegium website (<http://honors.uci.edu/>).

## Campuswide Honors Collegium classes

The Campuswide Honors curriculum is designed to provide a comprehensive educational experience for students of all backgrounds and interests. It is composed of honors core courses and seminars in the Humanities, Social Sciences, and Sciences that build on each other, and which hone

students' writing, communication, and critical thinking skills. Students who take honors classes will learn deeply about a broad variety of topics and will develop transferable skills that will prepare them well for future careers as well as graduate and professional school. Most Campuswide Honors students complete 3-9 honors courses, depending on major. Current Campuswide Honors students should contact an honors advisor for more information about their specific honors curriculum requirement.

## Campuswide Honors Collegium research and thesis project

Honors research provides important preparation for life after college. Students who complete honors research and a culminating research project will have practical experience in their field that demonstrates their ability to take initiative, work independently and as part of a team, solve problems, and communicate professionally. Campuswide Honors students are also strongly encouraged to participate in major-specific and school honors programs. Research and thesis projects completed by Campuswide Honors students in major-specific or school honors programs can meet the requirements of both their major-specific or school honors program and the Campuswide Honors Collegium. Additional research and thesis support is provided by the Campuswide Honors faculty and staff, major-specific and school honors faculty, and the Undergraduate Research Opportunities Program (<http://www.urop.uci.edu/>). (<http://catalogue.uci.edu/divisionofundergraduateeducation/www.urop.uci.edu>)

## Honors Opportunities

UCI offers many challenging and enriching honors opportunities to its most accomplished and motivated students. These include the comprehensive Campuswide Honors Collegium (<http://www.honors.uci.edu/>), which enrolls outstanding students of all majors from the freshman through senior years, including transfer students; a variety of major-specific honors programs at the upper-division level; the Humanities Honors Program, also offered at the upper-division level, but open to all majors on campus; and several Excellence in Research programs.

These programs offer some of the advantages usually associated with selective liberal arts colleges: rigorous, personalized classes and the intellectual exchange that creates a community of scholars. The difference, however, is that UCI's programs are supported by and benefit from the resources of a major research university, including renowned faculty, research opportunities, and the 40.8-million-print volume University of California Library system.

Honors students enhance their education by participating in the UC Education Abroad Program (<http://uc.eap.ucop.edu/>), the International Opportunities Program (<http://www.studyabroad.uci.edu/prospective/index.shtml/>), and the Capital Internship Program (<http://capitalinternships.uci.edu/>). Qualified honors students are also encouraged to take advantage of resources available through the Scholarship Opportunities Program (<http://scholars.uci.edu/>) and the Undergraduate Research Opportunities Program (<http://www.urop.uci.edu/>). These programs are also described in other sections of this *Catalogue*.

## Major-Specific and School Honors Programs

Honors programs for qualified junior- and senior-level students also are available to Drama, Music, and Art majors in the Claire Trevor School of the Arts, and to all qualified junior- and senior-level majors in the following Schools: School of Biological Sciences, Humanities, Donald Bren School of Information and Computer Sciences, Physical Sciences, Social Ecology, and Social Sciences; and to qualified junior- and senior-level majors in the Program in Public Health. The focal point of each of these programs is the development of analytical and research skills through the pursuit of research under faculty supervision. An honors-level thesis or creative project is required by most of the programs. Campuswide Honors Collegium students are encouraged to participate in these programs as well as in the Collegium. The honors thesis or creative project that is developed through these programs by Campuswide Honors students also satisfies the Campuswide Honors Collegium research and thesis requirement. Additional information is available in the specific academic unit sections of this *Catalogue*.

## Excellence in Research Programs

The School of Biological Sciences and the School of Social Ecology offer students the opportunity to pursue research through their Excellence in Research Programs. Students work on their research projects under faculty supervision and have the opportunity to present their results to peers and faculty and, in certain instances, to have their research papers published. Additional information is available in the specific academic unit sections of this *Catalogue*.

## Phi Beta Kappa

Founded in 1776, Phi Beta Kappa is the oldest and most respected undergraduate honor society in the United States. It supports and recognizes academic excellence and scholarly achievement in the liberal arts and sciences, and promotes the principles of freedom of inquiry and liberty of thought and expression. UC Irvine's Phi Beta Kappa Chapter (Mu of California) was founded in 1974. Phi Beta Kappa is UCI's most selective honor society, with only 5 percent of graduating seniors and 1 percent of juniors invited to become members each year. An annual initiation ceremony for new members is held in June. For additional information, including selection criteria, visit the Phi Beta Kappa website (<http://phibetakappa.uci.edu/>).

## Honors Recognition

Students who graduate during the academic year with academic honors, and those who receive special school awards, are honored in school-based ceremonies. Some honors societies may also hold special ceremonies for selected students. Of the graduating seniors, no more than 16 percent will receive academic honors: approximately 2 percent *summa cum laude*, 4 percent *magna cum laude*, and 10 percent *cum laude*. The criteria used in selecting candidates for these honors are available at the counseling office of each school. One general criterion is that students must have completed at least 72 quarter units in residence at a University of California campus. The student's cumulative record at the end of the final quarter is the basis for consideration for awarding Latin Honors. Students who have on file recorded acts of academic dishonesty, as defined in *University of California*

*Policies Applying to Campus Activities, Organizations and Students*, may be excluded by the Associate Deans from consideration for academic honors at graduation. For further information contact the academic counseling office of each school.

## Honors at Graduation

Of the graduating seniors, no more than 16 percent will receive academic honors: approximately 2 percent *summa cum laude*, 4 percent *magna cum laude*, and 10 percent *cum laude*. The criteria used by each School in selecting candidates for these honors are included in each School's section of the *Catalogue*. A general criterion is that students must have completed at least 72 units in residence at a University of California campus. The student's cumulative record at the end of the final quarter is the basis for consideration for awarding Latin Honors.

## A

About the UCI General Catalogue .....	15
About UCI .....	17
Academic Calendar .....	29
Academic English and ESL (AC ENG) .....	30
Academic English/English as a Second Language Program .....	1758
Academic Regulations and Procedures .....	1097
Academic Structure .....	20
Academic Testing Center .....	929
Accountancy, Master of Professional .....	2807
Accounting, Minor .....	2794
Accreditation .....	21
Administrative Services Credential .....	1397
Admission as a Freshman Applicant .....	1179
Admission as a Transfer Applicant .....	1183
Admission of International Students .....	1187
Admitted Students, Information for .....	1096
Advanced Placement and International Baccalaureate Credit .....	1189
Aerospace Engineering, B.S. ....	2739
African American Studies (AFAM) .....	31
African American Studies, B.A. ....	1556
African American Studies, Department of .....	1551
African American Studies, Minor .....	1557
Aid for Students with Disabilities .....	1169
Air Force Reserve Officers Training Corps (AFROTC) .....	1157
All Courses .....	30
Alumni, UC Irvine .....	23
Anatomy and Neurobiology (ANATOMY) .....	35
Anatomy and Neurobiology, Department of .....	1837
Ancient Iran and the Premodern Persianate World, Graduate Specialization .....	1544
Anesthesiology (ANESTH) .....	36
Anthropology (ANTHRO) .....	37
Anthropology, B.A. ....	2331
Anthropology, Department of .....	2317
Anthropology, Minor .....	2332
Anthropology, Ph.D. ....	2333
Appendix .....	727
Appendix .....	727
Application for Graduation .....	1121
Applied Physics, B.S. ....	2045

Arabic (ARABIC) .....	49
Arboretum, UCI .....	24
Archaeology, Minor .....	1564
Archive .....	1240
Armenian (ARMN) .....	50
Armenian Studies, Minor .....	1702
Army ROTC, UCI .....	1157
Art (ART) .....	51
Art, B.A. ....	823
Art, Department of .....	810
Art History (ART HIS) .....	63
Art History, B.A. ....	1565
Art History, Department of .....	1557
Art History, M.A. (4+1) .....	1567
Art History, Minor .....	1567
Art, M.F.A. ....	825
Arts and Humanities (ARTSHUM) .....	69
Arts (ARTS) .....	68
Arts, Claire Trevor School of the .....	745
Asian American Studies (ASIANAM) .....	69
Asian American Studies, B.A. ....	1573
Asian American Studies, Department of .....	1567
Asian American Studies, Graduate Emphasis .....	1574
Asian American Studies, M.A. (4+1) .....	1574
Asian American Studies, Minor .....	1575
Asian Studies, Minor .....	1753
Asian Studies, Minor .....	1753
Athletics, Intercollegiate .....	1104

## B

Bio Sci & Educational Media Design (BSEMD) .....	73
Biochemistry and Molecular Biology, B.S. ....	1381
Bioinformatics, Minor .....	1023
Biological Chemistry (BIOCHEM) .....	73
Biological Chemistry, Department of .....	1840
Biological Sciences, B.S. ....	1342
Biological Sciences (BIO SCI) .....	75
Biological Sciences, M.S. ....	1344
Biological Sciences, Minor .....	1346
Biological Sciences, Ph.D. ....	1347
Biological Sciences, School of .....	1288
Biology/Education, B.S. ....	1347
Biomedical and Translational Science (BATS) .....	97

Biomedical and Translational Science, Master of Science in .....	1843
Biomedical Engineering, B.S. ....	2620
Biomedical Engineering (BME) .....	98
Biomedical Engineering, Department of .....	2606
Biomedical Engineering, M.S. ....	2622
Biomedical Engineering, Minor .....	2624
Biomedical Engineering, Ph.D. ....	2625
Biomedical Engineering: Premedical, B.S. ....	2627
Biomedical Sciences, Ph.D. ....	1845
Biotechnology Management, M.S. ....	1351
Bookstore (The Hill) .....	1114
Business Administration, B.A. ....	2795
Business Analytics (BANA) .....	107
Business Analytics, M.S. ....	2797
Business Economics, B.A. ....	2398
Business Information Management, B.S. ....	1201
Business School, The Paul Merage School of .....	2758

## C

Campus Assault Resources & Education (CARE) .....	1110
Campus Centers .....	1238
Campus Recreation .....	1110
Campus Recreation (CAMPREC) .....	109
Campus Safety and Security .....	734
Campus Setting .....	22
Campus Tours .....	1161
Career Opportunities .....	1174
Catalogue Rights .....	1121
Categories of Application .....	1178
Celebrate UCI .....	22
Center for Student Wellness & Health Promotion .....	1110
Chancellor's Welcome .....	744
Change of Major .....	1119
Chemical and Biomolecular Engineering (CBE) .....	109
Chemical and Biomolecular Engineering, Department of .....	2629
Chemical and Biomolecular Engineering, M.S. ....	2637
Chemical and Biomolecular Engineering, Ph.D. ....	2638
Chemical Engineering, B.S. ....	2639
Chemical Engr and Materials Science (CBEMS) .....	115
Chemistry, B.S. ....	1960
Chemistry (CHEM) .....	116
Chemistry, Department of .....	1939
Chemistry, Ph.D. ....	1968

Chicano/Latino Studies, B.A. ....	2343
Chicano/Latino Studies (CHC/LAT) ....	133
Chicano/Latino Studies, Department of ....	2334
Chicano/Latino Studies, Graduate Emphasis ....	2344
Chicano/Latino Studies, Minor ....	2345
Child Care Services ....	1110
Chinese (CHINESE) ....	142
Chinese Language and Literature, Minor ....	1615
Chinese Studies, B.A. ....	1615
Chinese Studies, Minor ....	1616
Civic and Community Engagement, Minor ....	1203
Civil and Environmental Engineering, Department of ....	2641
Civil and Environmental Engineering (ENGRCEE) ....	147
Civil and Environmental Engineering, M.S. ....	2658
Civil and Environmental Engineering, Ph.D. ....	2659
Civil Engineering, B.S. ....	2660
Claire Trevor School of the Arts ....	745
Classical Civilization, Minor ....	1581
Classics, B.A. ....	1582
Classics (CLASSIC) ....	161
Classics, Department of ....	1576
Classics, M.A. ....	1584
Classics, Ph.D. ....	1585
Cognitive Sciences, B.S. ....	2362
Cognitive Sciences (COGS) ....	163
Cognitive Sciences, Department of ....	2345
Cognitive Sciences, Ph.D. ....	2366
Commencement ....	1120
Community and Environmental Medicine (CEM) ....	164
Comparative Literature, B.A. ....	1594
Comparative Literature (COM LIT) ....	164
Comparative Literature, Department of ....	1587
Comparative Literature, M.A. ....	1595
Comparative Literature, Minor ....	1596
Comparative Literature, Ph.D. ....	1596
Computational Science, Ph.D. ....	1207
Computer Engineering, B.S. ....	2690
Computer Game Science, B.S. ....	996
Computer Science and Engineering, B.S. ....	1213
Computer Science and Engineering (CSE) ....	187
Computer Science, B.S. ....	1023
Computer Science (COMPSCI) ....	168

Computer Science, Department of .....	1000
Computer Science, M.S. ....	1028
Computer Science, Master of .....	1031
Computer Science, Ph.D. ....	1029
Computer-and Network-Use Policy .....	734
Concurrent Master's Degree Program with Civil and Environmental Engineering .....	2176
Conservation and Restoration Science, Master of .....	1372
Counseling Center .....	1110
Creative Writing, Minor .....	1633
Credit by Examination .....	1102
Criminology, Law and Society, B.A. ....	2137
Criminology, Law and Society (CRM/LAW) .....	187
Criminology, Law and Society, Department of .....	2120
Criminology, Law and Society, Master of Advanced Study .....	2138
Criminology, Law and Society, Minor .....	2138
Criminology, Law and Society, Ph.D. ....	2139
Critical Theory, Emphasis in .....	1547
Criticism (CRITISM) .....	201
Culture and Theory (CLT&THY) .....	201
Culture and Theory, Doctor of Philosophy in .....	1547
Culture and Theory, Ph.D. ....	1547

## D

Dance, B.A. ....	844
Dance, B.F.A. ....	846
Dance (DANCE) .....	202
Dance, Department of .....	829
Dance, M.F.A. ....	847
Data Science, B.S. ....	1067
Declaration of Major .....	1097
Department of Developmental and Cell Biology .....	1352
Department of Environmental and Occupational Health .....	1261
Department of Epidemiology and Biostatistics .....	1265
Department of Health, Society, and Behavior .....	1270
Department of Neurobiology and Behavior .....	1384
Department of Population Health and Disease Prevention .....	1271
Dermatology (DERM) .....	216
Development and Cell Biology, B.S. ....	1358
Developmental and Cell Biology, B.S. ....	1358
Developmental and Cell Biology, Department of .....	1352
Developmental and Cell Biology (DEV BIO) .....	216
Digital Arts, Minor .....	827
Digital Filmmaking, Minor .....	828

Digital Information Systems, Minor .....	1047
Dining, UCI Hospitality & .....	1114
Disabilities, Aid for Students with .....	1169
Disability Services Center .....	1110
Division of Undergraduate Education .....	929
Doctor of Nursing Practice (D.N.P.) .....	2506
Donald Bren School of Information and Computer Sciences .....	944
Drama and Theatre, Ph.D. ....	867
Drama, B.A. ....	869
Drama, Department of .....	848
Drama (DRAMA) .....	219
Drama, M.F.A. ....	874
Drama, Minor .....	878

## E

Earth and Atmospheric Sciences, Minor .....	1985
Earth System Science, B.S. ....	1985
Earth System Science, Department of .....	1971
Earth System Science (EARTHSS) .....	237
Earth System Science, Ph.D. ....	1990
East Asian Cultures, B.A. ....	1616
East Asian Studies, Department of .....	1597
East Asian Studies (EAS) .....	249
East Asian Studies, Ph.D. ....	1617
Ecological Preserve, UCI .....	24
Ecology and Evolutionary Biology, B.S. ....	1369
Ecology and Evolutionary Biology, Department of .....	1362
Ecology and Evolutionary Biology (ECO EVO) .....	252
Ecology and Evolutionary Biology, Graduate Program .....	1371
Economics, B.A. ....	2400
Economics, Department of .....	2379
Economics (ECON) .....	256
Economics, Minor .....	2401
Economics, Ph.D. ....	2402
Education, Credential Programs in .....	1397
Education (EDUC) .....	274
Education, Minor .....	1421
Education, Ph.D. ....	1422
Education, School of .....	1396
Education Sciences, B.A. ....	1419
Educational Affairs (Sch of Med) (ED AFF) .....	292
Electrical and Computer Engineering, M.S. ....	2693
Electrical and Computer Engineering, Ph.D. ....	2695

Electrical Engineering & Computer Science (EECS) .....	292
Electrical Engineering and Computer Science Engineering, Department of .....	2667
Electrical Engineering, B.S. ....	2696
Elementary and Secondary Education, M.A.T. ....	1424
Embedded and Cyber-Physical Systems (ECPS) .....	312
Embedded and Cyber-Physical Systems, Master of .....	1223
Emergency Medicine (ER MED) .....	313
Engineering and Computer Science in the Global Context, Concentration .....	1071
Engineering, B.S. ....	2749
Engineering (ENGR) .....	313
Engineering, M.S. (Concentration in Materials and Manufacturing Technology) .....	2750
Engineering Management, M.S. ....	2746
Engineering, Master of .....	2755
Engineering, Ph.D. (Concentration in Materials and Manufacturing Technology) .....	2753
Engineering, The Henry Samueli School of .....	2518
English, B.A. ....	1634
English, Department of .....	1621
English (ENGLISH) .....	318
English, M.F.A. ....	1636
English, Minor .....	1636
English, Ph.D. ....	1636
Environmental and Occupational Health, Department of .....	1261
Environmental Engineering, B.S. ....	2664
Environmental Health, Science, and Policy (ENVIRON) .....	322
Environmental Health Sciences, M.S. ....	1261
Environmental Health Sciences, Ph.D. ....	1263
Environmental Science and Policy, B.A. ....	1216
Epidemiology and Biostatistics, Department of .....	1265
Epidemiology (EPIDEM) .....	323
Epidemiology, M.S. ....	1269
Epidemiology, Ph.D. ....	1270
Estimated Expenses .....	1161
European Languages and Studies, Department of .....	1639
European Studies, B.A. ....	1660
European Studies (EURO ST) .....	326
European Studies, Minor .....	1661
European Thought and Culture, M.A. (4+1) .....	1662
Executive M.B.A. ....	2804
Executive MBA (MGMT EP) .....	328
Exercise Sciences, B.S. ....	1392
Expenses, Tuition, and Fees .....	1161
Experimental Pathology .....	1847

**F**

Family Medicine (FAM MED) .....	330
Federal Work Study .....	1172
Feminist Studies, Graduate Emphasis .....	1685
Film and Media Studies, B.A. ....	1678
Film and Media Studies, Department of .....	1671
Film and Media Studies (FLM&MDA) .....	330
Film and Media Studies, Minor .....	1679
Film and Media Studies (see FLM&MDA) (FILMSTD) .....	335
Finance (FIN) .....	335
Finance, Master of .....	2806
Financial Aid .....	1167
First-Year Integrated Program (FIP) .....	929
French, B.A. ....	1663
French (FRENCH) .....	337
French, Minor .....	1664
Full-Time Master of Business Administration .....	2803
Fully Employed MBA (MGMT FE) .....	344
Fully-Employed Master of Business Administration .....	2805

**G**

Gender and Sexuality Studies, B.A. ....	1685
Gender and Sexuality Studies, Department of .....	1680
Gender and Sexuality Studies (GEN&SEX) .....	351
Gender and Sexuality Studies, Minor .....	1686
General Education (GE) Requirements .....	1122
Genetic Counseling, M.S. ....	1850
Genetics, B.S. ....	1360
Genetics, B.S. ....	1360
Geography, The Curriculum in .....	2490
German (GERMAN) .....	354
German, Ph.D. ....	1668
German Studies, B.A. ....	1665
German Studies, Minor .....	1666
Global and International Studies, Department of .....	2405
Global Cultures, B.A. ....	1760
Global Cultures (GLBLCLT) .....	360
Global Cultures, Minor .....	1761
Global Cultures, Undergraduate Program in .....	1758
Global Health, Minor .....	1271
Global Middle East Studies, B.A. ....	1218
Global Middle East Studies (GLBL ME) .....	361
Global Middle East Studies, Minor .....	1219

Global Studies, Graduate Emphasis .....	2416
Global Studies, Ph.D. ....	2417
Global Sustainability, Minor .....	1219
Grading System .....	1099
Graduate Degrees .....	1077
Graduate Division .....	1083
Graduate Information .....	1095
Graduate Scholarship Requirements .....	1099
Grants .....	1170
Greek (GREEK) .....	361
Greek, Minor .....	1587

## H

Health Care MBA (MGMT HC) .....	362
Health Informatics, Minor .....	1048
Health, Society, and Behavior, Department of .....	1270
Hearing and Speech Sciences, Minor .....	2370
Hebrew (HEBREW) .....	364
Herbarium, UCI .....	24
Hill, The (UCI Bookstore) .....	1114
Hindi (HINDI) .....	365
History and Philosophy of Science, Minor .....	1222
History and Theory of Music, Ph.D. ....	901
History, B.A. ....	1703
History, Department of .....	1687
History (HISTORY) .....	365
History, M.A. ....	1704
History, Minor .....	1705
History, Ph.D. ....	1705
Honors at Graduation .....	2905
Honors Opportunities .....	2904
Honors Recognition .....	2904
Hospitality, UCI Dining & .....	1114
Housing, Student .....	1114
Human Biology, B.S. ....	1393
Humanities and Arts (HUMARTS) .....	382
Humanities and Law, Minor .....	1754
Humanities and Law, Minor .....	1754
Humanities (HUMAN) .....	377
Humanities Language Learning Program .....	1743
Humanities, School of .....	1428

## I

Independent Study: Undergraduates Only .....	1103
--	------

Informatics, B.S. ....	1049
Informatics, Department of ....	1032
Informatics (IN4MATX) ....	382
Informatics, M.S. ....	1053
Informatics, Minor ....	1054
Informatics, Ph.D. ....	1054
Information and Computer Science, B.S. ....	1072
Information and Computer Science (I&C SCI) ....	390
Information and Computer Science, M.S. ....	1072
Information and Computer Science, Minor ....	1073
Information and Computer Sciences, Donald Bren School of ....	944
Information for Prospective Students ....	1160
Innovation and Entrepreneurship (INNO) ....	396
Innovation and Entrepreneurship, Master of ....	2806
Innovation and Entrepreneurship, Minor ....	2798
Integrated Composition, Improvisation, and Technology, Ph.D. ....	902
Intercollegiate Athletics ....	1104
Interdisciplinary Studies ....	1201
Internal Medicine (INT MED) ....	396
International Studies, B.A. ....	2419
International Studies (INTL ST) ....	396
International Studies, Minor ....	2420
Intersegmental General Education Transfer Curriculum ....	1152
Iranian Studies (IRAN) ....	407
Italian (ITALIAN) ....	408
Italian Studies, Minor ....	1670

## J

J.D./M.B.A. Program ....	2799
Japanese (JAPANESE) ....	410
Japanese Language and Literature, B.A. ....	1619
Japanese Language and Literature, Minor ....	1619
Japanese Studies, Minor ....	1620
Jewish Studies, Minor ....	1755
Judaica Studies (JUDAICA) ....	415
Juris Doctor ....	1775
Juris Doctor/Doctor of Philosophy ....	1772
Juris Doctor/Master of Business Administration ....	1772
Juris Doctor/Master Programs ....	1772

## K

Korean (KOREAN) ....	415
Korean Literature and Culture, B.A. ....	1620
Korean Literature and Culture, Minor ....	1621

**L**

Language Science, B.A. ....	2431
Language Science, Department of .....	2421
Language Science (LSCI) .....	418
Language Science, Ph.D. ....	2433
Laser Microbeam and Medical Program .....	24
Latin American Studies, Graduate Emphasis .....	1755
Latin American Studies, Minor .....	1755
Latin American Studies, Minor .....	1755
Latin (LATIN) .....	427
Latin, Minor .....	1587
Law (J.D.) .....	1775
Law (LAW) .....	428
Law, School of .....	1768
Legal and Forensic Psychology, Master .....	2160
Libraries, UCI .....	24
Life on Campus .....	1104
Linguistics (LINGUIS) .....	428
Linguistics, Minor .....	2434
Literary Journalism, B.A. ....	1637
Literary Journalism (LIT JRN) .....	428
Literary Journalism, Minor .....	1638
Loans .....	1171
Logic and Philosophy of Science, Department of .....	2434
Logic and Philosophy of Science (LPS) .....	429

**M**

M.D./M.B.A. Program .....	2800
M.D./M.P.H. Dual Degree Program .....	1272
Majors and Careers .....	1172
Management MBA (MGMTMBA) .....	443
Management (MGMT) .....	436
Management, Minor .....	2800
Management, Ph.D. ....	2801
Management PhD (MGMTPHD) .....	449
Master of Business Administration .....	2803
Master of Business Administration, Executive .....	2804
Master of Business Administration, Fully Employed .....	2805
Master of Computer Science .....	1031
Master of Conservation and Restoration Science .....	1372
Master of Embedded and Cyber-Physical Systems .....	1223
Master of Engineering .....	2755
Master of English .....	1639

Master of Finance .....	2806
Master of Human Computer Interaction and Design .....	1056
Master of Innovation and Entrepreneurship .....	2806
Master of Laws (LL.M.) .....	1776
Master of Legal and Forensic Psychology .....	2160
Master of Professional Accountancy .....	2807
Master of Professional Accountancy (MAC) .....	451
Master of Professional Accountancy (MPAC) .....	451
Master of Public Health .....	1272
Master of Public Policy .....	2177
Master of Software Engineering .....	1057
Master of Urban and Regional Planning .....	2177
Materials Science and Engineering, B.S. ....	2710
Materials Science and Engineering, Department of .....	2702
Materials Science and Engineering, M.S. ....	2714
Materials Science and Engineering, Minor .....	2716
Materials Science and Engineering (MSE) .....	454
Materials Science and Engineering, Ph.D. ....	2717
Mathematical, Computational, and Systems Biology, M.S. ....	1224
Mathematical, Computational, and Systems Biology, Ph.D. ....	1224
Mathematics, B.S. ....	2012
Mathematics, Department of .....	1991
Mathematics for Biology, Minor .....	2011
Mathematics, M.S. ....	2021
Mathematics (MATH) .....	460
Mathematics, Minor .....	2022
Mathematics, Ph.D. ....	2023
Mechanical and Aerospace Engineering, Department of .....	2717
Mechanical and Aerospace Engineering (ENGRMAE) .....	478
Mechanical and Aerospace Engineering, M.S. ....	2741
Mechanical and Aerospace Engineering, Ph.D. ....	2742
Mechanical Engineering, B.S. ....	2743
Medical Anthropology, Minor .....	2333
Medical Education (MED ED) .....	496
Medical Humanities, Graduate Emphasis .....	1756
Medical Humanities, Graduate Emphasis in .....	1756
Medical Humanities (MED HUM) .....	496
Medical Humanities, Minor .....	1757
Medical Pharmacology (PHARM) .....	497
Medicine, M.D. Program in .....	1783
Medicine (MED) .....	499
Medicine, School of .....	1778

Microbiology and Immunology, B.S. ....	1383
Microbiology and Molecular Genetics, Department of ....	1854
Microbiology and Molecular Genetics (M&MG) ....	499
Microbiology (MIC BIO) ....	499
Minor Programs ....	1121
Molecular Biology and Biochemistry, Department of ....	1373
Molecular Biology and Biochemistry (MOL BIO) ....	503
Music, B.A. ....	904
Music, B.Mus. ....	906
Music, Department of ....	883
Music, M.F.A. ....	908
Music (MUSIC) ....	508
Music Theatre, B.F.A. ....	879

## N

Native American Studies, Minor ....	1226
Networked Systems, M.S. ....	1226
Networked Systems (NET SYS) ....	524
Networked Systems, Ph.D. ....	1227
Neurobiology and Behavior, Department of ....	1384
Neurobiology and Behavior, Graduate Program ....	1390
Neurobiology and Behavior (NEURBIO) ....	525
Neurobiology, B.S. ....	1391
Neurobiology, B.S. ....	1391
Neurology (NEUROL) ....	529
Nonresident Freshman Admission Requirements ....	1179
Nursing Science, B.S. ....	2508
Nursing Science, M.S. ....	2511
Nursing Science (NUR SCI) ....	529
Nursing Science, Ph.D. ....	2512
Nursing, Sue and Bill Gross School of ....	2492

## O

Office of Admissions and Relations with School ....	1160
Office of Equal Opportunity and Diversity ....	21
Office of Information Technology ....	25
Office of Medical Education ....	1781
Office of Research ....	1233
Office of the University Ombudsman ....	21
Ophthalmology (OPHTHAL) ....	542
Organized Research Units ....	1235

## P

Pathology and Laboratory Medicine ....	1847
--	------

Pathology and Laboratory Medicine (PATH) .....	542
Pediatrics Genetics (PED GEN) .....	544
Pediatrics (PEDS) .....	544
